The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

The "Hindle" Electrocardiograph in Industry

PLANT OF A. O. SMITH CORPORATION, MILWAUKEE, WISC.
(One of the largest manufacturers of auto frames in this country)

Modern industry today is giving more and more attention to the health of its employees, and many have built up Departments for such welfare work.

At stated intervals the employee is given a thorough physical examination, and an electrocardiogram taken. The employee, if found necessary, is then sent to his family physician for treatment, and this results in a reduction of labor turnover and a higher standard of health.

The plant above illustrated has a Department of Preventative Medicine, and they report to us as follows:—

"The Hindle Electrocardiograph has been used in the Department of Preventative Medicine for the past year. It has contributed in no small measure to the success of this department in reducing a labor turnover and absences due to illness."

It is generally conceded that an Electrocardiogram is now indispensable to complete diagnosis of heart cases
