The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

THE ELECTROCARDIOGRAM —

ITS INTERPRETATION AND CLINICAL APPLICATION

by LOUIS H. SIGLER, M.D., F.A.C.P.

Attending Cardiologist and Chief of Cardiac Clinics, Coney Island and Harbor Hospitals; formerly Instructor in Medicine, New York Post Graduate Medical School, Columbia University.

The consultant and diagnostician, the physician in general practice, teachers and investigators in special fields, and students of internal medicine will find Dr. Sigler's book a basic guide in the use of a supremely important technic and in the interpretation of its data.

The 203 figures of the book comprise nearly 400 electrocardiograms with over 1400 individual lead strips.

ARTIFICIAL PNEUMOTHORAX in PULMONARY TUBERCULOSIS

INCLUDING ITS RELATIONSHIP TO THE
BROADER ASPECTS OF COLLAPSE THERAPY

by T. N. RAFFERTY, M.D.,
Phoenix, Arizona.

Formerly Resident Physician, William H. Maybury Sanatorium (Detroit Municipal Tuberculosis Sanatorium), Northville, Michigan.

Introduction by

HENRY STUART WILLIS, M.A., M.D.
*Superintendent and Medical Director,
William H. Maybury Sanatorium, Northville, Michigan.*

"The refreshing point of view which Dr. Rafferty presents in his book bespeaks the best thought on the subject. It should help materially in ushering in a new era in this field of endeavor.

"His work is timely. It should point the way to a more uniform base line for the use of pneumothorax and should lead distinctly to better clinical treatment of tuberculosis."

—HENRY STUART WILLIS, M.D.,
in the Foreword.
