# REPORT OF THE COMMISSIONER OF INDIAN AFFAIRS.

DEPARTMENT OF THE INTERIOR,  
OFFICE OF INDIAN AFFAIRS,  
*Washington, D. C., September 30, 1921.*

SIR: I have the honor to submit this, the Ninetieth Annual Report of the Bureau of Indian Affairs, for the fiscal year ended June 30, 1921.

It will be noted that much of the statistical matter of the character shown in former reports is eliminated from this one, only such tabulated data appearing as will be required to furnish information to Congress and as seems likely to be useful to the reader having more than ordinary interest in Indian affairs. It is doubtful if statistical information to the extent contained in previous reports is of special annual value, and my present intention is to publish it not oftener than once in four years. At this time particularly, when the reduction of public expenditures is of prime importance, and no sum is too small to be saved in the effort to restore normal conditions, it is believed there is special reason for this omission, as well as the briefest narration consistent with a fair account of the bureau's work during the year.

## SCHOOLS.

From various causes arising within and immediately following the war period there was some lowering of the standards of efficiency in the usually commendable work of the Indian schools, and these causes were largely unavoidable. During the early part of the fiscal year 1921, when contracts were made for school supplies, prices were still very high; therefore support funds which were needed for other purposes had to be used frequently in paying for subsistence, clothing, and other necessities, thus leaving the fund for the employment of instructors so short that it was impossible to offer salaries that would hold many capable employees or attract well-qualified people. This condition of affairs has existed through several years, requiring the temporary employment of many persons whose qualifications were often below a satisfactory standard, in order to keep the schools open, even if in some instances not normally effective.

For similar reasons the material equipment of the schools throughout the country could not always be desirably maintained. Conditions are, however, more promising. Teachers and school employees are now generally available through the regular channels, the cost of supplies and many materials is declining, and the prospects are hopeful for strengthening the personnel, equipment, and consequent efficiency of the schools for training the Indian youth in the duties of full citizenship and developing in them the force of character that will insure their safe transition through the dangerous period between the close of school life and the time when they should fill worthy places in our social order. An earnest effort must be made to vitalize and to dignify our schools.

**SUPERVISION.**—In order to advance the schools to a larger measure of usefulness in the program for the betterment of the Indian, a chief supervisor of Indian education has been appointed. He will inaugurate thoroughly constructive methods and practice for the schools, and for this purpose he has been intrusted with a large discretionary power in carrying forward the educational policy of this bureau. The Indian country has been divided into districts and a supervisor of schools is assigned to each. These will work under the immediate direction of the chief supervisor. This reorganization ought to accomplish splendid results along educational lines and to work out a greater unity of purpose and action throughout the service, especially in developing a spirit of friendly cooperation with public-school authorities wherever it is practicable to place Indian children in public schools. The time has come when the great work of educating Indian youth, which is the recognized obligation of the white race in this country, should be more effectually organized for the best results possible under economic safeguards, and I have earnestly requested the school service everywhere to cooperate heartily with this effort to achieve a more unified and constructive progress.

Probably but comparatively few of the taxpaying citizens of the country realize what a complex problem the education of the Indian youth is. The Indians are distributed throughout more than one-half of the States. Some of them group themselves within limited areas, while others live as individual families scattered over large territories. Some are non-English speaking people, just emerging from a life of ignorance and superstition, while others are almost ready to take up the full duties of citizenship. In fact, there are all classes and conditions between the almost untouched Apache and the independent Navajo of the Black Mountains of Arizona, and the intelligent, ambitious, forward-looking Cherokees, Choctaws, and Chippewas. This makes a complex and varied system of schools necessary. Some must be educated in boarding schools, some in day schools. Others are provided for in mission schools and still others are ready for mingling with children in the public schools.

Of the approximately 86,000 Indian children of school age it may be said, speaking in terms of thousands, that about 30,000 are enrolled in the Government schools and about an equal number in non-Government schools. The day and boarding schools under Government control offer academic courses from the first grade through intermediate and grammar grades; in a few instances through what is equal to junior high school. Vocational courses of equal grade are offered, with special emphasis put upon agriculture and home economics. In the large nonreservation schools many trade courses are provided. Of not less, probably of greater, importance than the academic training is the industrial preparation of Indian boys and girls for independent citizenship, and therefore these courses must be maintained. However, because of the fact that the schools are distributed over so much territory, and of the further fact that schools of such varied types, offering so many different courses, must be provided, the problems of supervision and of procuring a well-trained teaching force are difficult. This all means that if the Indians of this country are to become productive citizens the educational program must be carefully planned and vigorously carried

on. While this is a time when economy in every line is necessary it should be remembered that to allow children to grow up in ignorance and untrained, and therefore to continue to be unproductive, is false economy. Every child of every nationality in this country is entitled to an opportunity to get an education. Of all nationalities, certainly the Indians, the native Americans, are entitled to educational opportunities equal to those of all other nationalities. While there are many Indian children out of school because of lack of school facilities, especially in the Southwest, fortunately in other sections of the country conditions are changing rapidly and public schools are now available for a very large percentage of the Indian children in those sections.

The placing of all Indian children in the public schools is the ultimate aim. In a majority of the States we meet with the heartiest cooperation in providing for Indians in public schools. In order to assist State school authorities in enrolling and in maintaining regular attendance of Indians in public schools, the following regulations have been formulated in accordance with an act of Congress as quoted therein:

REGULATIONS CONCERNING ENROLLMENT AND ATTENDANCE OF INDIAN CHILDREN IN SCHOOL, PURSUANT TO THE ACT OF FEBRUARY 14, 1920.—The following amendment to regulations approved February 28, 1921, is hereby issued pursuant to the act of February 14, 1920 (41 Stat. L., 408, 410), which reads in part:

Hereafter the Secretary of the Interior is authorized to make and enforce such rules and regulations as may be necessary to secure the enrollment and regular attendance of eligible Indian children who are wards of the Government in schools maintained for their benefit by the United States or in the public schools.

ARTICLE I. Superintendents of reservations or schools within the various States shall, in every way possible, assist State, county, or local district officers in compiling school censuses for their respective districts with a view to placing all Indian children in school and enforcing their regular attendance in accordance with the existing compulsory-education laws and regulations of the different States.

ART. II. The compulsory-education laws and regulations of the different States in which Indians reside are hereby adopted as an amendment to regulations concerning enrollment and attendance of Indian children in school, authorized by the above-quoted act of February 14, 1920. Where State, county, or district officials care to do so, they may enforce such State laws and regulations as embodied herein with respect to Indian children, and superintendents and other Indian Service officials are hereby directed to cooperate with said officials to the fullest extent possible in the enforcement of said laws and regulations.

If an Indian, on the ground of wardship, raises the question of jurisdiction of State or county officials and his contention is well founded, then the superintendent or other proper officials to whom the Indian appeals shall enforce the above law and regulations referred to and authorized by the act quoted above, using Federal agencies and officials who perform duties similar to those named in the laws and regulations embodied herein.

ART. III. Where Indian children, regardless of civil status, live beyond the limit of distance and thereby are exempt from attending public schools, or where any other conditions prevent State, county, or district officials from enforcing State laws and regulations, as provided in Article II hereof, and their parents refuse or fail of their own free will to place them in a suitable school, they shall attend a boarding school or schools (as far as capacity of such schools is available) designated by the Commissioner of Indian Affairs.

ART. IV. When parents fail or refuse to comply with Article III of these regulations, the same punishment and fines shall be imposed on them as though their residence was within the distance for compulsory attendance at a public school.

ART. V. It is the purpose of this amendment to place all Indian children in school, either public or private, or in schools maintained by the United States for the benefit of Indians, as far as facilities are provided.

Any part or parts of former regulations which may in any way conflict with this amendment are hereby revoked.

Furthering the incentive of placing Indian children in public schools, tuition is being paid for each pupil whose parent is a non-taxpayer and where the pupil is not less than one-fourth Indian blood. Tuition being paid is based on the cost of education of white pupils in the schools where the Indians attend.

Thus, in spite of the fact that there are a large number of children in the Southwest who must be provided with school facilities, it is hoped that annual gratuity appropriations need not be increased, and in fact may after a few years be decreased, because so many of the Indian children elsewhere may be placed in public schools and because in certain sections of the country Indian day schools may be transferred to State control and be maintained as public schools.

Another means of reducing expenditures for the maintenance of Indian schools will be the building of more Indian day schools, or enlarging day schools where the school population can be thus cared for. For instance, the Pueblos and the Hopis could all attend day schools, because they live in villages. Their day schools should be enlarged and their courses should be extended to include six grades, and all of the children of these tribes should be required to attend these schools until they complete the sixth grade. Thus capacity in the boarding schools now occupied by these children would become available for Navajos and others whose home life makes day schools impracticable for them. While attending day schools Indian children are largely supported by their parents.

The day school is the means of gradually withdrawing gratuitous support from the Indians. It gives them little or no aid in clothing and subsistence, but it carries civilization to the great mass of Indian homes, while other types of schools do not afford this opportunity so well. The influence of the day schools, planted almost at the door of Indian homes, is not limited to the children alone, but reaches out to the parents and entire community, and every day leaves its permanent mark. It becomes when properly equipped, managed, and in the hands of competent teachers the center of community interests. All kinds of helpful activities in farming, dairying, gardening, stock raising, cooking, canning, sewing, nursing, household management, and sanitation may be and are being introduced into these communities, thus increasing the assets of the Nation by improving farming areas and the saving of many lives.

The day school is a means of educating children in the subjects commonly given in the public schools without interfering with the natural and normal relation between children and parents, as the case must be when children are placed in school where they can not return home each night.

**SCHOOLS CLOSED.**—During the past year the following boarding schools have been closed: Crow Creek and Lower Brule in South Dakota; Yakima, Wash.; Cass Lake and Leech Lake in Minnesota; and Crow, Mont. The pupils from these schools have been or will attend either Indian day schools, public schools, mission schools, or be transferred to near-by Indian boarding schools.

**NEEDS.**—There is a very general conviction that all Indian children of the first, second, and third grades should be required to devote more time to the study of English. Arrangements are being made to meet this demand as rapidly as funds will permit. Additional school rooms and additional teachers will be provided so that all pupils of the first three grades in all schools can be kept in the academic department all of each day. Formal industrial instruction will then be begun in the fourth grade.

It is not anticipated that additional funds for conducting Indian schools will come through larger appropriations; the necessity, therefore, confronts us of applying measures of economy with such care and wisdom as will not cripple essential activities but make substantial gains by better organization, closer supervision, and more efficient instruction. In this way pupils should be enabled to accomplish a standard grade of work within a shorter period than is now done, which would result in an earlier completion of the courses provided and some consequent reduction of Federal expenditure.

A thorough revision of the course of study has been made, with the intention of having it effective within the current school year.

### HEALTH.

The year covered by this report has shown an increase of population, an excess of births over deaths, and has compared favorably with other years respecting the health of the Indian people. There have been epidemic invasions on several of the reservations; and owing to a shortage of regular physicians and nurses, progress against tuberculosis and trachoma was not entirely satisfactory.

**PREVENTION OF DISEASE.**—As the line of progress advances society in favored communities seeks more and more to advance itself through appeals to all agencies that may offer protection and contribute to its welfare. The time has come when preventive medicine, with its coadjutants, philanthropy and social uplift, must be applied to the solution of the health problems of the Indian Service. Heredity, which may be defined as the genetic relation between successive generations, is now recognized as an important factor of preventive medicine. Its laws should be taught in the Indian schools, particularly with regard to their application to health. Education and environment have but limited power to improve an imperfect basis of human life, but diseases and impairments that can not be cured may be prevented.

The physician, as well as the sanitarian, is helpless in the presence of many deplorable conditions, both in the individual and in society at large, which are inherited from ancestors—conditions which might have been prevented, but can never be entirely remedied when they exist. Dr. Oliver Wendell Holmes said more than a half century ago that the time to begin the training of a child is a hundred years before its birth. The best protection that one can have against disease is inherited vital energy manifesting itself in healthy organic cells that will respond to every favoring force of habit, environment, education, and training that may encompass them, while at the same time offering stern resistance to all inimical influences and factors that beset them.

**MEDICAL POLICY.**—The Indian Service countenances no fads and trusts no fanciful theories; its policy is to make use of all scientific

knowledge which it can command to secure to future generations of Indians the best of all birthrights—the right to be well born and to possess sound minds in sound bodies.

**HEALTH EDUCATION.**—If medical service for the Indians consisted only of the dispensing of medicine to those who are ill, the duties would be very simple, notwithstanding their importance. But the Indian medical service is a social uplift service allied inseparably with its educational and industrial activities.

The present administration is seeking to discourage a perfunctory response to duty and to foster a real, live, purposeful policy and determination to restore to a race its pristine health and virility by means of the application of the laws of preventive medicine, operating through education, social uplift, and constructive science, as applied to nutrition, hygiene, and the relations of all the agencies under control that may improve or impair the racial qualities of future generations of Indians, either physically or mentally. The purpose of the Indian Service is to bring about gradual and permanent improvement in the physical, mental, and moral nature of every Indian who may be influenced by the factors and conditions that promote favorable change. The hope of the Indian race lies in the children, and what we wish to appear in them must be taught in their schools.

**DISEASES.**—The Indians are subject to the same diseases as white people. They have more trachoma and perhaps more tuberculosis, but there are fewer venereal diseases, less diphtheria and scarlet fever, and, as a rule, pneumonia is not so prevalent among them as it is among the whites. The problems of treatment and care of the Indian, however, differ in many respects from the treatment of white people. Tact and a knowledge of Indian nature, with experience in the use of preventive measures, are as essential to the success of the service physician as an intimate understanding of medicine and surgery, and in this direction he may be greatly aided by the efficient field matron whose duties closely relate her to the family, especially the mothers and daughters, and who in her work for the improvement of home conditions is often able to locate many cases of disease and by skillful sympathy obtain the consent of the patient for medical treatment.

**EPIDEMICS.**—Several reservations, particularly of those in the Southwest, have had visitations of measles, smallpox, chickenpox, mumps, scarlet fever, and influenza in an attenuated form. Some cases of sore throat with infection have also been present in a few communities.

Several deaths resulted from bronchial pneumonia following measles, but there were no fatal issues from any of the other diseases named in the preceding paragraph.

The epidemic situation with respect to these diseases was practically clear at the close of the fiscal year.

**TYPHUS FEVER.**—Typhus fever appeared on the San Juan Navajo Reservation about November 20, 1920, by introduction from a neighboring Republic. The disease occurred among the Indians, and, with the exception of Dr. Davis, a medical missionary of the Presbyterian Church, whose station was at Red Rock, and Dr. Graffin, agency physician at Shiprock, both of whom died, it has

been confined to the Indians, there being 52 cases with 21 deaths, exclusive of the two cases among whites.

A number of physicians and nurses were detailed to combat the epidemic, and the United States Public Health Service effectively assisted, its representatives in the field being Passed Asst. Surg. C. E. Waller, State health officer of New Mexico, and Dr. Charles Armstrong, passed assistant surgeon.

The last case was reported on June 13, 1921.

The educational value to the Navajos of the campaign against typhus has been greater than the money outlay.

**ORGANIZATION.**—The health service at the close of the year consisted of one chief medical supervisor, six special physicians (eye, ear, nose, and throat), seven traveling field dentists, about 175 stationed physicians, including contracts; approximately 100 stationed nurses, 6 traveling nurses, and 87 field matrons.

It has not been practicable to fill all the nursing positions with trained nurses, but as they become available practical nurses will be replaced with graduates.

### FARMING.

While many of the Indians engage in other industries, by far the greater number must look to agriculture for their support. Last year 49,962 Indians cultivated 890,700 acres of land, producing crops worth \$11,927,366, as compared with 36,459 Indians who cultivated 762,126 acres the previous year, the value of the crops being \$11,037,589. The comparatively slight increase in the value of the crops is owing to the fall of prices.

Advantage is taken of every means of stimulating the interest and enthusiasm of the Indians along agricultural lines, a few of which will be mentioned below.

**EXPERIMENTATION.**—Recognizing the benefit of experimentation, Congress makes a small appropriation each year for such purposes on the different reservations. This money is used in conducting experiments with different crops, plants, etc., with the view of developing varieties best suited to the conditions which prevail in a particular locality. The largest and most important farm of this nature is at Sacaton, on the Gila Reservation in Arizona, which is operated jointly by the Indian Service and the Bureau of Plant Industry of the United States Department of Agriculture. The operation of this farm has been very successful and of great benefit not only to the Indians but to the whites as well.

**COOPERATIVE EXTENSION WORK.**—The States Relations Service of the United States Department of Agriculture has placed its facilities at our disposal for the benefit of the Indians. The county agents cooperate with the Indian Service farmers; representatives of the State agricultural colleges often visit reservations and give illustrated lectures on suitable topics appropriate to that particular vicinity, and boys' and girls' clubs have been organized on several reservations.

**INDIAN FAIRS.**—The spirit of competition is a strong incentive to success. Agricultural fairs are held in the fall of each year on many of the reservations, at which the Indians display farm products and live stock in competition with each other, premiums being given for the best exhibits. Most of the fairs are managed by the

Indians themselves, under the supervision of the superintendent, which furnishes them with practical experience in business organization.

The Indians also exhibit at county and State fairs, sometimes in open competition with the whites, where they have won numerous prizes.

Encouragement is given to these industrial displays and cooperation is sought from county and State agricultural associations. It is believed that such occasions may be the means of diverting the interest of the Indians from so-called Wild West shows and sensational round-ups, which offer little aside from old-time feats of barbarity that have no elevating effect upon the spectators but tend to impress the Indian that these performances receive popular approval.

### STOCK RAISING.

The live-stock industry of the Indians, in common with like interests throughout the country, has during the past two or three years faced the most trying and disastrous period in its history. The severest drought ever experienced in the Southwest has prevailed in that region and seriously affected the interests of the Indian on all reservations. Similar conditions prevailed in Montana and other parts of the Northwest during the summer of 1918, and were followed by the most severe winter experienced in that locality. Reports received indicate, however, that the herds on several of the reservations came through these periods more satisfactorily than any of the other herds in the Northwest, and that the stock interests of the Indians there are now in exceptionally good condition. It is also understood that the calf crop this season is a good one.

These conditions have emphasized the need for conserving and protecting the range on Indian reservations in every way possible. These ranges are now overrun with large numbers of wild and worthless ponies, which should be disposed of in order that the ranges may be available and utilized for more valuable stock. It is therefore proposed to adopt plans for ridding the various ranges of this class of stock and inaugurate a strenuous campaign to that end.

Arrangements are now being made for the distribution of the tribal herd on the Crow Indian Reservation under the provisions of the act of June 4, 1920 (41 Stats., 751-754). Regulations and instructions were approved under date of June 7, 1921, in accordance with the provisions of that act, by which the Indians of that reservation who are competent to handle stock will receive their shares in stock and the other Indians will have their shares placed to their credit in cash. Many of these Indians have been very successful in handling their live-stock interests, and this action will no doubt materially aid them in their advancement along such lines.

During the year the Indians of the Jicarilla Reservation have been enabled to establish themselves in the sheep industry by reason of having about 12 head of sheep issued from the tribal herd to each member of the tribe, which provided each family with from 24 to 100 head, according to the size of the family. This has led them to resume their outdoor life and habits, with material benefit to their health, as well as to take an active interest in their industrial advancement. The results from the adoption of this policy on the Jicarilla

Reservation indicate that a similar policy can be adopted on other reservations to the decided benefit of the Indians. Under this policy the Indians of several of the reservations are now forming stock associations which have for their object the improvement of the grade of their live stock.

The dourine eradication work carried on in cooperation with the Bureau of Animal Industry to rid the various reservations of diseased horses has been practically completed, with the exception of the reservations in Arizona and New Mexico, where proper handling of the work for one or two years longer would insure complete extermination of the disease.

Considerable attention has been given to the improvement of the dairy stock belonging to the Indians and the schools on the various reservations. Some of the schools now have the best dairy herds in their locality, from which the Indians desiring to engage in the dairy industry can be furnished first-class stock.

The Indians, in common with others engaged in the live-stock industry, are now facing the period of liquidation and adjustment in a manner indicating that their interests will be placed on a sound, permanent basis at an early date.

### REIMBURSABLE FUNDS.

The small appropriation of \$100,000 available for this purpose during the year has been of great benefit to the Indians. Under this plan Indians having no funds of their own have been provided with farming implements, seed, stock, and other articles, by the use of which they are assisted toward self-support.

In the Northwest, larger acreages have been placed in cultivation by the Indians this year than ever before. This is possible quite largely by the use of reimbursable funds. In the Southwest considerable like expenditure has been made for sheep and cattle. The following extracts from the reports of field officials will indicate the benefit which the Indians have already derived from the use of such funds and suggest the need of future expenditures of this nature.

SHOSHONE RESERVATION, WYO.—“On Tuesday I visited one Egan Bonatsie, of the Crow Heart district, who was once puttering around on 5 acres of ground but who now farms and farms well 75 acres. He has about \$800 worth of alfalfa this year and \$200 or \$300 worth of oats, in addition to potatoes and other vegetables for home use. He has been a liberal buyer under the reimbursable plan and is now fully self-supporting and is paying his agreements off by partial payments each fall when his crops are sold. I feel that reimbursable issues have gone a long way toward making this man self-supporting and comfortable when it could not well have been accomplished in the same length of time in any other manner.”

TONGUE RIVER RESERVATION, MONT.—“These Indians have no individual Indian money except the comparatively small amount derived from sale of their cattle. Allotments have not been made and they must have some help in order to procure the farming equipment they need. Reimbursable funds expended here for farming equipment and for the mill have been of great benefit to them. Young men are maturing each year and the aid given in the past does not fill their needs. Many of those now able to farm are reasonably well equipped, but the need for reimbursable issues is not past.

There is much good land on the reservation not yet farmed and much can yet be accomplished toward making these people self-supporting if they have the implements and seed necessary. Without rentals, land-sale money, or other individual funds, I see no practical way of accomplishing this without reimbursable issues."

### LEASING.

While it is the intention that each able-bodied Indian so disposed shall cultivate at least a portion of his allotment, on many of the reservations the acreage of agricultural land is greatly in excess of that which the Indians themselves will cultivate. In such cases it is the policy to lease the surplus land under the provision of existing law, sometimes for all cash, but more generally part of the consideration is in the shape of permanent improvements on the land, which become the property of the allottee upon the expiration of the lease. The maximum period for which allotted land can be leased is five years, except that irrigable land of this class may be leased for not to exceed 10 years. The recent law simplifies the execution of such leases by providing that the restricted allotments of any Indian may be leased for farm and grazing purposes by the allottee or his heirs, subject only to the approval of the superintendent.

### INDIAN EMPLOYMENT.

The growing force of Indian activity is recognized in their persistent work throughout the year in whatever they could find to do, their readiness to turn from one gainful occupation to another exemplifying industry and resourcefulness. They worked in the expansion of the natural resources of the reservations, in oil wells, mining, road building, agriculture, etc. Fishing, also picking berries for personal use and for sale, occupied whole families in some localities. The wild-rice and maple-sugar industries added to the food supply and to the exchequer of Indians in the north-central regions. They gathered and sold roots having food and medicinal properties; they also contributed, as formerly, from their native arts articles of utilitarian and esthetic value, as canoes, makuks to hold maple sugar, and other articles of birch bark, baskets, beadwork, pottery, blankets, home-tanned pelts of animals, which find ready markets. The sheep industry engages the activities of many Indians, half of the population of one tribe being shepherds. One railway system found it profitable to continue to provide attractive workrooms for families of Indian artisans at stations along the line, where their handiwork sells readily. Forty Indians are digging a tunnel at one point.

In professional athletics the Indian continued to "make good" last year; a few found work in shops vending athletic goods. Several conducted summer camps for guests and acted as guides for tourists and in Boy Scout work. Thousands of dollars were earned by Indian students working in families as housekeepers, nurses, farm hands, in drying fruits and vegetables, and in the sugar-beet fields of many States. In the Arkansas Valley the vacation camp of Indian student beet-field workers was maintained, and as a vacation lesson in economics the boys paid their transportation and board and had spending money. A part of their earnings was deposited as a nucleus of a bank account. Purposeful recreation was provided. The Indian

schools, with their graduates, contributed last year teachers, carpenters, farmers, housekeepers, etc.; the automobile factories sent out skilled Indian mechanics, and each year a number of Indians have been placed in factories for such training. Indians are on the stage and in the professions doing well.

With productivity at a low ebb abroad and high prices at home, the problem of employment presses for solution, and it has been necessary in some localities to exert extraordinary effort to find work for Indians. Because the Indian is gradually becoming a literate race he is fitting in wherever work is available.

### FIVE CIVILIZED TRIBES.

Substantial progress was made during the year in winding up tribal affairs. In the Creek Nation all allotments have been completed and members have been paid their pro rata shares of tribal funds, the unfinished business of that nation involving only the disposition of approximately \$244,000 worth of tribal property. In the Seminole Nation allotment work has been completed, members have been paid their pro rata shares of tribal moneys, and only \$25,100 worth of tribal property remains to be disposed of. The Cherokee tribal affairs have heretofore been entirely closed.

The largest and most valuable tribal property yet to be disposed of is the segregated coal and asphalt mineral deposits in the Choctaw and Chickasaw Nations, of which 424 tracts remain unsold, which embrace an area of 379,284.46 acres. Owing to unsettled financial conditions, the unsold coal and asphalt minerals in the Choctaw and Chickasaw Nations were not offered for sale during the year. There also remains unsold 2,330 town lots.

There are 34,182 acres of land in the Choctaw and Chickasaw Nations reserved by coal and asphalt lessees for mining purposes subject to lease by the Government for the benefit of said nations, except such portions thereof as are actually required by said lessees for mining purposes. During the year there has been collected as rental on this property a total of \$17,740.86.

The important remaining work relates to the individual affairs of some 18,500, known as the restricted class, or those having one-half or more Indian blood, from all of whose land restrictions have not been removed. In less than 10 years the restricted period as applied under existing law will expire. This should be a period of constructive effort as regards the education of children of school age, the determination of those actually competent to manage their affairs, the wise conservation of lands and funds of those remaining under restrictions, the sale or leasing of their lands and the careful disbursement of proceeds for improvement of homes and equipment to promote self-support, and the fullest encouragement toward self-reliance and industrial efficiency, if the extension of the trust period in a very large number of cases is to be avoided.

The cashier for the Five Civilized Tribes handled a total of \$19,853,181.54, including receipts and disbursements of all classes of funds.

Indian money belonging to individual Indians amounting to \$2,797,951.01 was expended for their maintenance, farms, buildings, live stock, and equipment. There was credited to individual Indian accounts the sum of \$6,990,738.25.

The restriction against alienation of the allotted lands of individual Indians was removed from 135,960.46 acres, involving 1,778 applications for removal of restrictions.

A Federal income tax of \$514,386.25 was paid by 340 restricted Indians, as compared with \$351,148.18 paid by 243 of this class in the preceding year.

At the local, county, and district fairs last year restricted Indians won the following prizes: One hundred and thirty-six first, 48 second, 6 third, and 1 fifth; at the Hughes County Free Indian Fair they won 61 first and 37 second, and at the Oklahoma Free State Fair, held at Muskogee, they won 4 first, 4 second, 4 third, 1 fourth, and 1 fifth prizes.

**OIL AND GAS IN THE FIVE CIVILIZED TRIBES.**—The abrogation during the fiscal year 1920 of the 4,800 acre limitation in the Five Civilized Tribes permitted all lessees holding the maximum acreage to obtain other leases and tended to increase oil and gas activities during the first half of the fiscal year 1921, resulting in an increase in revenue to the Indians during this period. However, the recent drops in the price of oil resulted in general depression of the oil industry. On January 1, 1921, the price of mid-continent crude oil was \$3.50 per barrel and reductions were made until it had reached \$1 per barrel. In February a number of pipe-line companies cut their runs 30 per cent, so that it was necessary to authorize the storage of oil taken from departmental oil and gas leases. The depression in the industry and consequent suspension of new operations has naturally had its effect upon the income of the Indians derived from payments of bonus, rents, and royalties, the revenue from this source being considerably reduced. Most of the pipe-line companies are now taking 100 per cent of the oil from leases to which their pipe lines are connected and the prospects are brighter for the coming year.

On May 10, 1921, the Supreme Court of the State of Oklahoma, in the case of *Winona Oil Co. v. Barnes*, rendered an opinion which is to the effect that extensions of leases made by guardians of minors are invalid if made without competitive bidding.

On May 10, 1921, the United States District Court for the Eastern District of Oklahoma, in the case of *Pearl Chisholm et al. v. Creek and Indians Development Co.*, rendered a decision holding that the spouse must join with the allottee in the execution of leases and modifications thereof in cases where such inherited tribal or allotted lands constitute the family homestead.

#### **OIL AND GAS OUTSIDE THE FIVE CIVILIZED TRIBES AND OSAGE NATION.**

In February, 1921, oil was discovered by the Western States Oil & Land Co. in section 34, township 6 south, range 32 east, Crow Reservation, Mont., the well having a flow of approximately 200 barrels of heavy black oil. The new strike caused considerable excitement and interest and stimulated oil and gas activities on the reservation.

Under section 7 of the act of Congress approved June 4, 1920 (41 Stat. L., 751-753), mining leases on lands of the Crow Indians require the authorization of the tribal council, and on February 17, 1921, the business committee of the Crow Tribe of Indians revoked

the authority theretofore granted the superintendent to execute oil and gas mining leases on their lands, and the leasing of such lands has been suspended pending authorization by the Indians in council assembled.

Three oil and gas leases, covering 14,363.87 acres of land in the Blackfeet Reservation, Mont., were approved. Oil has not been discovered on the reservation, but as the leases provide for immediate drilling operations the value of the lands for oil and gas purposes will be determined.

One hundred and sixty-six oil and gas leases, covering 13,803.43 acres of land in the Kiowa Reservation in Oklahoma, were sold. The amounts realized from bonus and advance royalties were \$135,216.12 and \$2,058.77, respectively. The average bonus per acre was \$9.80.

On November 18, 1920, the 4,800 acreage limitation as applied to the Indian reservations in the State of Oklahoma, exclusive of the Five Civilized Tribes, Osage Nation, and Kiowa Reservation, was modified so as to permit a lessee to thereafter acquire oil and gas leases on a total of 9,600 acres of restricted land. The modification of this rule enabled all those holding the maximum acreage to obtain additional leases, resulting in increased income to the Indians derived from payments of bonus and royalties. The depression in the oil industry, following the drop in price of crude oil, commencing about January 1, 1921, and the consequent curtailment of new operations, reduced the income from this source to an appreciable extent.

Oil development on the ceded portion of the Shoshone Indian Reservation in Wyoming has not heretofore progressed satisfactorily, due to lack of transportation facilities and pipe lines and litigation instituted by F. Chatterton and associates of Riverton, Wyo., against various lessees of departmental oil and gas leases. A compromise settlement was made whereby Mr. Chatterton and associates dismissed the suits and waived all rights in and to the lands embraced in said suits, in consideration of which a lease was executed in favor of Mr. Chatterton covering 2,400 acres of land within the ceded portion of the reservation, which lease, in addition to the usual rents and royalties, provided for the payment of \$72,000 bonus and extensive drilling operations. Due to the settlement of this troublesome litigation which has been holding back development in this field and the fact that large capital has become interested in the lands, conditions should materially improve during the coming year.

#### **OIL AND GAS DEVELOPMENT, OSAGE RESERVATION.**

Development of the oil and gas resources in the Osage Indian Reservation, Okla., during the fiscal year 1921 has been rapid, notwithstanding a scarcity of materials necessary to carry on drilling operations and other unfavorable conditions affecting the oil industry. It is estimated that during the calendar year 1920 Osage County produced more oil than any other county in the United States. In the early part of the calendar year 1921 the discovery was made of what is known as the Burbank pool on the west side of the reservation, where very little development work had heretofore been done. This new field already has more than 35 oil wells producing oil in large quantities.

Two sales of oil leases were held during the fiscal year—one on October 12, 1920, and the other on June 14, 1921. Approximately

36,000 acres were sold for lease at the sale in October for a bonus consideration aggregating \$3,993,750. At the sale held June 14, 1921, approximately 25,918 acres were sold for lease for a bonus consideration aggregating \$4,559,100. The tracts offered on the east side have always brought a much higher bonus than those offered on the west side until the June sale, when the average bonus for tracts on the west side was \$504.67 per acre and for those on the east side \$43.29 per acre. This difference in bonus offered for leases on the east and west sides of the reservation is probably due to the discovery of the Burbank pool mentioned above and the fact that all acreage limitations on the west side have been abolished.

Prior to November 18, 1920, the regulations governing the leasing of Osage land for oil and gas mining purposes provided that no person, firm, partnership, joint-stock association, or corporation would be permitted to acquire any interest in Osage land for oil purposes by lease, assignment, drilling contract, or otherwise in excess of 4,800 acres. On November 18, 1920, this provision was modified and the acreage which any one person, firm, partnership, etc., could acquire fixed at 20,000 acres on the east side. On the west side all acreage limitations were removed.

By the act of March 3, 1921 (Pub. No. 360, 66th Cong.), the act of June 28, 1906 (34 Stat. L., 539), which reserves to the Osage Indians in Oklahoma the oil, gas, coal, or other minerals in Osage County, Okla., until 1931, was amended to reserve to the Osage Tribe the minerals until 1946. This act authorizes and directs the Secretary of the Interior with the Osage council to offer for lease for oil and gas purposes all of the remaining portion of the unleased Osage land prior to April 8, 1931, of which there is approximately 1,000,000 acres unleased for oil, offering the same annually at the rate of not less than one-tenth of the unleased area. This act also gives the State of Oklahoma authority to levy and collect a gross production tax on all oil produced in Osage County. It also authorizes and directs the Secretary of the Interior to pay an additional 1 per cent of the amount received by the Osage Tribe as royalties from production of oil and gas to Osage County, Okla., for the construction and maintenance of roads and bridges therein. This extension of the mineral trust period has been urgently sought by the Osage Tribe for several years.

There was an oil production during the year of 20,625,127.40 barrels and an income of \$15,166,297.01 from royalties and bonuses on oil and gas.

### PROBATE WORK IN EASTERN OKLAHOMA.

There is no more important functioning of the work of the Commissioner of Indian Affairs than that involved in the protection of the estates of minor Indians and in seeing that the property of decedents is conserved and descends to those who are justly entitled thereto.

A corps of legal representatives, known as probate attorneys, are maintained in that part of Oklahoma which was formerly the Indian Territory to look after the probate matters affecting restricted allottees or their heirs. The eastern part of Oklahoma, formerly the Indian Territory, consists of 40 counties, and in this area the work of the probate attorneys is performed, owing to the large Indian

population and the fact that these lands were allotted to the individual members of the Five Civilized Tribes. The territory was divided into 17 districts, with a certain designated town in each district as a headquarters for the probate attorney. The districts consist of from one to four or more counties, according to the amount of probate work in each county and the railroad facilities enabling the probate attorney to cover his district and attend the different county and district courts.

These attorneys have been the means of preventing much wasteful extravagance and incompetence by their supervision of probate cases, by checking reports of guardians, requiring new bonds, and in preventing losses to dependent Indian estates worth millions of dollars.

### PROBATING ESTATES OF DECEASED INDIANS AND APPROVAL OF WILLS.

The probate work of the Indian Service is important because no inherited allotment can be sold or leased or a patent fee issued therefor until the heirs have been determined. Inasmuch as the law provides that departmental findings as to heirs shall be final, it is apparent that special care and consideration should be given to the evidence supporting each heirship case submitted and that so far as possible no heirs on either the lineal or collateral side should be omitted, since under existing legislation neither State nor Federal courts may review the heirship decisions of the Secretary of the Interior, except for mistake of law after the land has passed beyond the administration of the land department. In order properly to carry on this work, persons trained in the legal profession, especially in probate matters, are essential both in the field and in the office.

The annual appropriation of \$100,000 for probate work is reimbursable from a graduated scale of fees which range generally from \$15 to \$50, depending on the appraised valuation of a given allotment. No fee is charged where an estate is valued less than \$250. In case the Indian devises his lands, the same fee is charged for probating the will as if he had died intestate and his heirs formally determined. The combined effort of the field and office forces results in about 4,000 decisions annually, with a considerable amount of accompanying correspondence.

The year's work of determining heirs of deceased Indians and the consideration of wills of Indians or persons having interest in Indian trust property under provisions of the act of June 25, 1910 (36 Stat. L., 855-856), as amended by the act of February 14, 1913 (37 Stat. L., 678), progressed satisfactorily.

Final disposition was made of 3,889 heirship cases and 308 wills, 69 reopened cases, 10 cases in which former decisions were affirmed, and 82 modifications of former findings.

Eighteen claims against estates of deceased Indians were allowed. Cases of a miscellaneous character numbered 3,564.

Sixteen examiners of inheritance were engaged in holding hearings on reservations and the public domain.

Number of letters written, 7,760.

The aggregate of fees earned during the year, as authorized by the act of February 14, 1920 (41 Stat. L., 413), approximates the sum of \$98,070.

## IRRIGATION.

The ever-increasing population of the United States and its growing exports correspondingly augment the requirements for food production. These requirements demand that every acre of tillable land should be made to yield each year to the full extent of its possibilities.

Arid lands comprise much of the vast area of our West and Southwest, which in its original state was in most instances practically a barren waste, and included a considerable area of Indian reservations. Much of this territory, however, has been eliminated by the progressive development of Indian irrigation projects, which forcibly demonstrates the great advantage of artificial water to arid lands. Instances are recorded where such lands after reclamation have been enhanced in value \$400 to \$500 per acre.

The most notable of our products are those on the Yakima Reservation, in the State of Washington. The gross value of the crops raised during the year within the irrigation projects on this reservation is \$11,001,600, an increase over the previous year of \$1,001,600. While the general condition and surroundings of our other projects are not quite so favorable as those of the Yakima Reservation, reports show corresponding increases throughout in crop productions.

The irrigable area of the Wapato project on the Yakima Reservation is about 120,000 acres. We have a recognized prior right of 720 second-feet of water for this division, which is sufficient to irrigate approximately 70,000 acres. It has been the desire of the Indian Service to secure from the Reclamation Service the perpetual use of 250,000 acre-feet of water annually in addition to the said 720 second-feet of water now appropriated to the Wapato division. With this end in view, an agreement was had with that service providing for the diversion of flood or storage water in said amount during the irrigation season of each year, subject, of course, to prior existing rights. This agreement is of material benefit to this project.

An agreement having been previously reached with the white landowners in the Florence Casa Grande Valley as to a diversion of the available water for irrigation purposes from the Gila River, and the work of signing up white landowners desiring to come within this project having been completed, the arduous task of selecting the lands in white ownership, consisting of 27,000 acres, was taken up. The lands owned by those persons having subsisting water rights were given preference. The next in order were those persons owning lands who were members of the Casa Grande Water Users' Association in good standing. These two classes of persons completely exhausted the available area. There are 35,000 acres of land within the Gila Indian Reservation which comes within this project, making a total area of 62,000 acres which will be benefited by the project.

Advertisements were issued looking to the construction of the diversion dam under contract, but no satisfactory bids were received, those submitted being on a cost-plus or fixed-fee basis. Our appropriations for this work being limited and these bids carrying no assurance that the total cost would not greatly exceed the limit placed thereon by Congress, namely, \$250,000, it was not deemed advisable to accept any of the offers. Due to these conditions and the fact that the two-year period within which the construction should begin would expire on May 1, 1921, it was decided on January 3,

1921, that construction of the dam be undertaken by "force account," under the immediate supervision of Assistant Chief Engineer C. R. Olberg, of the Irrigation Service, this bureau.

Actual work on the construction of the dam was begun in February, and while many adverse conditions were encountered, nevertheless the work has progressed very rapidly, and on June 23 Engineer Olberg wired that the main slab under existing conditions would probably be completed by July 4. Upon its completion the bulk of the work is over and the danger of any damage resulting from unexpected floods passed. This dam will be of material benefit to both the Indians and whites in that part of the State of Arizona.

The appropriation act for the fiscal year 1922 provided \$150,000 for the construction of a diversion dam across the Big Horn River, Crow Indian Reservation, Mont. Due to the extreme drought, immediate work on the dam was imperative if the crops for this season were to be furnished water. To meet the exigency a joint resolution making the money for this purpose immediately available was approved by the Congress on May 6, 1921. Work was thereafter promptly begun on the dam, and the crops in the aggregate of three-fourths of a million of dollars have been saved.

Considerable concern has been manifested by several outside parties of the State of Idaho interested in effecting an arrangement for the enlargement of the Fort Hall irrigation project to include certain lands in white ownership.

The impression seems to prevail among many people that there is much more water available than is necessary for the Fort Hall project as now constituted. Information of the office indicates that the total acreage that can be served by the present project when it is repaired and partially reconstructed is about 54,000 acres. The present supply of water is sufficient to irrigate in addition thereto about 16,000 acres.

It is the desire to cooperate with these interests where cooperation is possible, to the end that every drop of available water be used upon the lands susceptible to economic irrigation. Supervising Engineer Dietz was therefore instructed to cooperate with the State engineer of Idaho in obtaining data to enable a thorough study of this matter for the purpose of determining some feasible plan which will work justice to all concerned.

There are several methods of securing water for irrigation purposes, such as damming rivers, pumping from underground reservoirs, or impounding flood waters. The first has been longest used and is the most general. Pumping water has been resorted to with satisfactory results and in some localities is the best if not the only means of supply. This is particularly true in the Navajo country where water is especially scarce. During the past year a great number of wells have been driven which have proven satisfactory and have been the means of adding considerable area to the grazing range.

#### ALLOTMENTS.

The allotment work on the Gila River Reservation in Arizona was completed and schedules containing 4,869 selections of irrigable and nonirrigable land, embracing approximately 96,000 acres, were approved. These allotments consist of 10 acres of irrigable land and

10 acres of nonirrigable land. The allotment work on the Umatilla Reservation in Oregon was continued, and a total of 798 allotments were approved, embracing approximately 64,000 acres. On the Bad River Reservation in Wisconsin 545 allotments were made and approved, embracing approximately 12,000 acres. These allotments contain 20 acres each, and are supplemental to allotments previously made under the act of August 1, 1914 (38 Stat., 582-605). On the Lower Brule Reservation in South Dakota, 20 allotments were approved, embracing approximately 3,200 acres, and on the Cheyenne River Reservation, South Dakota, 194 allotments were approved, embracing approximately 32,000 acres. In addition to the foregoing, allotments have been made and approved during the year on other reservations as follows:

| Reservation.              | Number of allotments. | Area.         |
|---------------------------|-----------------------|---------------|
|                           |                       | <i>Acres.</i> |
| Colorado River, Ariz..... | 92                    | 920.00        |
| Fallon, Nev.....          | 17                    | 170.00        |
| Walker River, Nev.....    | 1                     | 20.00         |
| Warm Springs, Oreg.....   | 1                     | 160.00        |
| Klamath, Oreg.....        | 3                     | 479.47        |

The surplus lands of the Blackfeet Reservation in Montana have been allotted under the act of June 30, 1919 (41 Stat. L., 3-16). These allotments consist of 828 original allotments of approximately 320 acres each, and 3,485 additional allotments of approximately 80 acres each. The schedules containing these allotments have been received but not yet approved.

Allotments have been made to the Camp McDowell Indians in Arizona, consisting of 221 allotments of grazing land of approximately 100 acres each, embracing lands on the camp McDowell Reservation, and 227 allotments of irrigable lands on the Salt River Reservation containing approximately 5 acres each. No action has yet been taken on the allotment schedule pending a thorough investigation of the entire Camp McDowell situation. This investigation has been ordered. It is the purpose of the office to see that the property rights of the Camp McDowell Indians are fully protected and that everything possible is done to promote their best interests.

A schedule of 358 allotments to the heirs of deceased persons on the Crow Reservation, Mont., was received on June 29. The allotments aggregate 160 acres each; no action has yet been taken on this schedule.

**PUBLIC-DOMAIN ALLOTMENTS.**—There were 417 allotments made and approved on land on the public domain in various States. These comprise an area of approximately 66,720 acres and were made in accordance with the provisions of the act of Congress of February 8, 1887 (24 Stat., 388), as amended. During the previous fiscal year the regulations governing public-domain allotments were amended so that an Indian woman married to an Indian man, who has himself received an allotment on the public domain or is entitled to one, is eligible to file an application in her own name, provided she is otherwise qualified. A considerable number of new applications have been filed by applicants having that status and a large number

of applications made by Indian wives, heretofore rejected, have been reinstated and approved.

**APPRAISEMENT AND REAPPRAISEMENT OF SURPLUS RESERVATION LANDS.**—During the year many applications for appraisement and reappraisement of surplus reservation areas, subject to homestead disposition, were made under authority of the act of June 6, 1912 (37 Stat., 125).

**EXTENSION OF TRUST PERIOD.**—The period of trust was extended by order of the President on allotments made to the Chippewa Indians of the Fond du Lac Reservation, Minn., to the Pala and Sycuan Mission Indians of California, to the Kickapoo Indians in Kansas, and to the Indians of various tribes residing on the public domain, wherein the period of trust would otherwise expire during the calendar year 1921. An order was also obtained extending the period of trust on land patented to the Agua Caliente Band of Indians in California, which would otherwise have expired during the year 1921.

**THE OMAHA CASES.**—By a decree of the United States Supreme Court April 11, 1921, in the Omaha allotment cases, the decree of the Circuit Court of Appeals, Eighth Circuit, was affirmed. The court held, in effect, that Hiram Chase, jr., Mary Gilpin, and other applicants, are not entitled to allotments of land on the Omaha Reservation under the provisions of the act of March 3, 1893 (27 Stat., 630). This decision opens the way for carrying into effect the provisions of the act of May 11, 1912 (37 Stat., 111).

From the foregoing it will be seen that work in progress and largely completed during the year covered more than 7,000 allotments and a landed area of nearly a million acres. This kind of development is of special importance and should be extended as rapidly as constituted facilities will permit, because there is nothing better for the average Indian, as there are few things better for most men, than to own enough land to provide a settled homestead that will yield, if need be, through the owner's labor the means of self-support.

### REMOVAL OF RESTRICTIONS AND LAND SALES.

During the year there were issued to competent Indians 1,692 patents in fee, and sales were approved to purchasers of Indian lands covering 1,268 tracts containing 135,893 acres, in which patents were to be issued.

Certificates of competency were issued for 451 tracts containing 128,350 acres, and restrictions were removed from 42 tracts containing 1,850 acres.

In issuing patents in fee to Indians many were issued under the so-called "declaration of policy" to Indians of one-half or less Indian blood without any further proof of competency.

This practice, however, has been discontinued, and in all cases involving the issuance of patents to Indians, the practice is now to require a formal application and proof of competency.

A number of cases involving the prosecution of persons under section 5 of the act of June 25, 1910 (36 Stat. L., 855), and the recovery of lands illegally conveyed, and also the abatement of taxes illegally levied and assessed against Indian trust lands, have been disposed of or settled.

During the year there has been a great falling off in the number of land sales and in the acreage sold, owing to the general depres-

sion in business conditions and the financial stringency. For these reasons also the prices obtained have in most cases been lower than those received in 1920; and in many instances it has been found necessary, with the consent of the Indians interested, to extend the time of payment on the notes of the purchasers.

A number of tracts of land have been purchased for Indians with their trust funds, and in these cases the abstracts of title have been examined in this office, and in case the Indian interested was regarded as not competent to handle his affairs, a restriction as to future alienation except with the consent of the Secretary of the Interior has been included in the deed.

### FARMING AND GRAZING LEASES.

Under the act of Congress dated June 25, 1910 (36 Stats. L., 855), allotted Indians who are holding their lands under trust patents are authorized to lease the same for a period not to exceed five years under regulations prescribed by the Secretary of the Interior. Under these regulations allottees at various agencies have been classified as competent and noncompetent, the competent being permitted to transact the business incident to making their own leases and collecting their own rentals. In the case of incompetent Indians leases of lands are negotiated in the agency office and the rentals paid through the superintendent.

In order to eliminate as far as possible the extra handling of leasing work and the routine transmission of papers to the office, superintendents and others in charge of allotted Indian lands were early in the year authorized to grant certificates of competency to Indians who were properly qualified to negotiate leases. This has resulted in a considerable saving in clerical work and such applications for this privilege are not now sent to the bureau for action.

Under the act of February 14, 1920 (41 Stat. L., 408-415), the department was authorized and directed to charge a reasonable fee for the work incident to the sale, leasing or assigning of tribal or allotted Indian lands, the same to be collected from vendees, lessees, or grantees and covered into the United States Treasury as miscellaneous receipts. Regulations were accordingly promulgated which fixed a fee of \$5 for each lease or sublease. This fee in some cases was found to work a hardship, and by order of May 27, 1921, the department directed that in all farming and grazing leases a fee of but \$1 be charged where the total rental is not more than \$100; a fee of \$2.50 where such rental is not over \$250; and \$5 where the total rental is more than \$250.

A further saving and reduction in the amount of official work was effected by an item in the Indian appropriation act of March 3, 1921 (41 Stat. L., 1225-1232), which requires that all farming and grazing leases thereafter entered into shall be subject only to the approval of the superintendent or other officer in charge of the reservation where the land is located—this provision not to apply to the Five Civilized Tribes. Regulations were promulgated March 3, 1921, under the foregoing act, which required superintendents to approve and retain at the agency all leases of the character indicated, except that in cases where disputes or contests arise that he is unable to adjust satisfactorily, he shall submit all the facts and evidence with a copy of the lease to the office for settlement.

### AS TO INDIAN COMPETENCY.

The general course of treaties, agreements, and legislation has been in line with the purpose of reserving definite areas of land as tribal estates and of allotting therefrom as rapidly as possible freeholds in severalty, with the aim of inducing by this transfer of tribal to individual holdings a departure from old communal traits and customs to self-dependent conditions and to a democratic conception of the civilization with which the Indian must be assimilated if he is to survive.

In the process of allotting lands to the Indians, and the sale of such surplus as they do not need, many reservations have acquired a mixed population of both Indians and whites which has hastened local self-government, public schools, and other social, civic, and industrial benefits to the backward race.

Various reservations indicate this evolution, and some are now practically merged with white settlements and show but little racial divergence in the prevailing customs and activities. There are, it is true, a few exceptions to this transforming process, as in some semiarid portions of the Southwest where tribal relations must largely continue until existing physical conditions have been changed. The Navajo country is the most conspicuous of these exceptions and for some time to come will call for exceptional consideration, particularly as regards education, health, and such industrial advancement as the physical character of the country will permit. But the general out-work of the reservation system, with certain curable defects, is in the right direction.

As is well known, the law provides for issuing to the Indian a trust patent upon the land allotted to him, which exempts it from taxation and restricts him from its sale or encumbrance until he is declared competent to manage his business affairs, when he may, upon application, receive a patent in fee and be free to handle or dispose of his land the same as any white citizen.

It is doubtful if a satisfactory method has been found for determining the competency upon which to base a termination of the trust title. Applications for patents in fee have too often been adroitly supported by influences which sought to hasten the taxable status of the property or to accomplish a purchase at much less than its fair value, or from some other motive foreign to the Indian's ability to protect his property rights.

Notwithstanding the sincere efforts of officials and competency commissions to reach a safe conclusion as to the ability of an Indian to manage prudently his business and landed interests, experience shows that more than two-thirds of the Indians who have received patents in fee have been unable or unwilling to cope with the business acumen coupled with the selfishness and greed of the more competent whites, and in many instances have lost every acre they had. It is also true that many of the applications received for patents in fee are from those least competent to manage their affairs, while the really competent Indians are in large numbers still holding their lands in trust. It is evident to the careful observer that degree of blood should not be a deciding factor to establish competency, as there are numerous instances of full-bloods who are clearly demonstrating their industrial ability by the actual use made of their land and who are shrewdly content with a restrictive title thereto that exempts them

from taxation. At the same time the instances are far too frequent where those of one-half or less Indian blood—often young men who have had excellent educational privileges—secure patents in fee, dispose of their land at a sacrifice, put most of the proceeds in an automobile or some other extravagant investment, and in a few months are “down and out,” as far as any visible possessions are concerned.

The situation, therefore, suggests the need of some revision of practice as a check upon the machinations of white schemers who covertly aid the issuance of fee patents in order to cheat the holders out of their realty, and as a restraint upon those who are not so lacking in competency as in the disposition to make the right use of it, and also as a stimulant to the thrifty holder of a trust title to accept the entire management of his estate with the full privileges and obligations that follow.

The well-known purposes of the Government are to fit the Indian for self-support and to protect his interests while doing so, and then to expect him to do his best toward independent living. The Government should not be expected to shirk its trust. It should not be made easy for young men to squander their substance and drift into vagrancy, nor for successful landholders to remain under restrictions not justified by their qualifications for citizenship.

It is hoped to find a way through which the competency of an applicant for a patent in fee can be tested by actual accomplishments on his land or in the particular industry in which he may be engaged, such as the maintenance of himself and family, if married, in a fair degree of comfort for a definite period prior to his application, so that not only the ability but the inclination and ambition to exert it will be evidenced and constitute a determining element. The same principle also argues that this standard of competency should bar an extension of the trust period to every energetic Indian who is getting ahead year after year, proving himself a capable farmer, stock grower, or a thrifty provider for his family in some vocation, and because of this ability to manage well his affairs should gladly assume the full rights and obligations which the issuance of a patent in fee confers. In all such instances of unquestionable competency consideration might well be given to the matter of determining the individual interests in tribal property and turning over to these progressive Indians their full share of the tribal estate.

#### SEGREGATION OF TRIBAL FUNDS ON FINAL ROLL.

The act of May 25, 1918 (40 Stat. L., 591), and June 30, 1919 (41 Stat. L., 9), provide that the funds of any Indian tribe, if susceptible of segregation, may be distributed among the members thereof upon the preparation and approval of a final roll. Under authority of the acts mentioned, final rolls have been approved or are in process of preparation on the following reservations: Crow and Flathead, Mont.; Fort Hall, Idaho; Cheyenne and Arapahoe, Osage, Kiowa, Otoe, Ponca, and Pawnee, Okla.; Rosebud, Sisseton, and Yankton, S. Dak.; and Spokane, Wash.

The practice is to pay the shares of competent Indians to them for expenditure as they see fit, and to place the shares of noncompetents and minors to the credit of their respective accounts, subject to the individual Indian money regulations.

## INDIVIDUAL INDIAN MONEY.

The year ended showed a decided increase in the disbursement of individual Indian money. This is partly accounted for by the policy of disbursing their funds to returned soldiers who ask for the same, and the fact that there were more competent Indians and therefore larger sums were turned over to them than heretofore. The continued high prices in some sections of the country, the numerous crop failures, and the tight money market in general made it necessary to expend larger amounts than usual for the benefit of the older Indians.

In many cases it necessitated the selling of Liberty bonds, which were held in trust for various Indians, in order to provide them with the funds needed to purchase food, clothing, and the proper farming equipment to enable them to work their allotments.

On the whole the Indians have made good use of their money. A great many of them have purchased comfortable houses or have made improvements to their old ones. They have also invested largely in cattle and modern farming implements.

In regard to minors, while the general policy of conserving their funds has not been changed, it has been found necessary and advisable in some cases to allow the disbursement of their money for the purchase of land and cattle and the payment of tuition at colleges or automobile schools. In the first-named purchases the deed to the realty is made in their names and the cattle are branded with their individual brands. In other cases their funds have been used to pay traveling and hospital expenses when medical treatment was deemed necessary by a reputable physician.

## DEPOSITARIES FOR INDIAN FUNDS.

The demand for depositaries for Indian moneys continued through most of the year despite the fact that receipts from land sales at some agencies were much below what they would have been had the money market been easier. Deposits amounting to \$6,345,800 were authorized for 258 banks. At some agencies, owing to decreased receipts, it was necessary to reduce the deposits to meet current disbursements and in a number of instances to discontinue some banks as depositaries.

Due to the great demand for money by banks, better interest rates have been procured on Indian funds than during any previous period, the average rate in some localities being 5 per cent, and at one agency practically all the time deposits are earning 6 per cent.

The number of bonds or renewals of bonds approved during the year was 1,846, representing a total amount of \$38,560,396. As a margin of 5 per cent and in some cases 10 per cent must be allowed to cover interest as it accrues the deposit under these bonds is, of course, considerably less.

Considering the large number and wide distribution of banks which carry Indian deposits it was perhaps inevitable, in a period of such general financial strain as the country has been experiencing, that there should be a few of these depositaries among the banks which closed their doors during the year. It is gratifying to report, however, that in some instances the closing was only temporary, and that

the sureties on the bonds of the banks permanently closed paid in full both principal and interest.

## PURCHASE AND TRANSPORTATION OF INDIAN SUPPLIES.

A pronounced change in market conditions occurred within the year. The early months showed a continued scarcity of supplies and material with consequent high prices, which condition, under the pressure of the so-called "buyer's strike," reversed itself very decidedly during the closing months, bringing about lower prices in many lines, much to the relief of this service. The change likewise was apparent in the increased competition secured through advertisements. Competition on Government purchases is a fairly accurate barometer of commercial conditions, for, if business is good on the outside, there is apparently little desire to supply the Government, unless the volume is large, but when, as for the past several months, business is at a standstill, then interest in Government orders is awakened. This service has benefited accordingly.

The opening of bids and awarding of annual supply contracts took place as usual in the spring of 1920, at Chicago, St. Louis, and San Francisco, also at Washington, D. C., on coal, beef, pork, mutton, and oleomargarine, and in the fall at Chicago on dried fruit, canned goods, cereals, flour, and other products.

The regular list of supplies was purchased in the spring of 1920, except where the reaction in prices had not definitely taken place, as with sugar, shoes, linseed oil, and numerous other items. By a careful analysis of market conditions later purchases were made at a considerable saving. To illustrate, sugar at the usual time of buying was quoted in New York at approximately 23 cents per pound; by holding off it was purchased for December delivery at 7.74 cents and for February delivery at 7.5 cents per pound, a saving of approximately \$90,000. Linseed oil, offered in June, 1920, at \$1.85 per gallon, was purchased in March, 1921, at an average price of 85 cents, a saving of approximately \$9,750. Sole and harness leather were bought later in the season at a saving of approximately \$4,000. The larger part of the leather shoes were not bought until they were actually needed. In the fall, after a third advertisement, when prices had dropped approximately 25 per cent, they were contracted for at a net saving of about \$13,000.

Field officers ordered for the year only those items and in such quantities as they felt were absolutely vital to the successful operation of their plants. Reserve supplies since the outbreak of the war have gradually been depleted, until a surplus now exists at the end of the year at few, if any, places. Such surplus as exists and is not required at the point where located is transferred to other places where the supplies can be used. It seems, therefore, that the quantities called for by the field officers, generally speaking, have about reached the minimum status.

The surplus of other departments, particularly the War and Navy Departments and the United States Shipping Board, has been drawn on whenever reported on any items or class of items for which this service was in the market. Many thousands of dollars' worth of material and supplies have thus been obtained during the fiscal year 1921 and several prior years, and this cooperation will continue with

any other department for the purpose of disposing of surplus Government property.

The effort to deliver supplies to the schools and agencies at a certain time was in some instances made secondary to buying when the market was right. Field officers realizing this economic gain have cooperated splendidly. Little trouble was experienced in getting cars, and shipments once started reached their destinations in a reasonable time. The warehouses, particularly in Chicago, had difficulty in obtaining proper help, but toward the end of the year this condition was somewhat improved.

### FORESTRY.

About July 1, 1920, the abnormal demand for timber products that had existed for many months began to weaken, and within three months from that date the sale of manufactured products became very difficult. During the remainder of the calendar year 1920 there was no marked decline of prices, but the sale and shipment of products steadily declined. Early in the year 1921 manufacturers began to offer the lower grades of stock at greatly reduced prices, and during the first six months of the year the market became continuously weaker.

The suspension of shipments during the last months of 1920 and the subsequent reduction of prices below the actual cost of production of a large portion of the lumber then in the hands of manufacturers resulted in the closing of many mills manufacturing logs cut on Indian reservations and a resultant abandonment of logging, or a great curtailment of operations, on nearly all contract areas.

Large sales of yellow pine at very satisfactory prices were made on the Jicarilla and Klamath Reservations, and a sale of white and Norway pine, cedar, and other products on allotments of the Nett Lake Reservation proved exceptionally advantageous to the Indians. However, the demand for stumpage has been very light during the greater part of the year and comparatively few offerings of timber have been made.

The improvement of telephonic communication on reservations, begun early in 1920, has been continued through the year, as has also the systematic valuation survey of the Klamath Reservation. It is expected that the Klamath forest survey will be completed during the working season of 1922, and the Service will then be in possession of reliable and complete data as to forest resources and land classification on this extensive reservation. Special attention has been given to a study of lumber production costs for the purpose of obtaining complete data for use in stumpage appraisals and price readjustments. Very satisfactory progress has been achieved in this direction. Several mill scale studies have been conducted and substantial advancement made in the collection of photographic illustrations of forestry operations on Indian reservations.

The forest-fire situation was particularly acute in Washington and Montana during July and August, 1920, and unusually heavy expenditures were incurred on the Colville and Flathead Reservations in efforts to control the fires. The damage to timber and grazing would have been much greater except for the effort and funds thus expended.

The steady expansion in timber sales on Indian reservations during the past decade has resulted in the receipt of an income that has enabled the service to establish the Indians in various enterprises on the Flathead, Fort Apache, Jicarilla, Klamath, Menominee, Mes-calero, Red Lake, Tulalip, and other reservations of incalculable value to the advancement of the Indians industrially, socially, and morally.

### RAILROADS AND HIGHWAYS.

During the year no important railroad right of way has been applied for or granted. However, the local and State highway authorities have continued their activities in providing new and improved roads across Indian lands, and approximately 80 permits for the opening of such roads have been issued.

Several applications for water-power sites are pending before the Federal Water Power Commission under the act of June 10, 1920 (41 Stat. L., 1063), but no projects of importance affecting Indian lands have as yet been approved.

### ROADS AND BRIDGES.

Good roads constitute one of the most important factors of progress among the Indians as well as the whites. Congress makes no general appropriation for work of this nature on the Indian reservations. It therefore becomes necessary to draw upon our regular appropriations for the support and civilization of the Indians, except in the comparatively few cases where specified appropriations have been made for particular reservations. Such appropriations were available during the year, as follows: For roads on the Hoopa Valley Reservation, Calif., \$10,500; the San Juan Reservation, N. Mex., \$11,000; and the Taholah Reservation, Wash., \$17,025; for bridges on the Leupp Reservation, Ariz., \$3,500; the Blackfeet Reservation, Mont., \$10,000; and the Cheyenne River Reservation, S. Dak., \$25,000; and for roads and bridges on the Red Lake Reservation, Minn., \$10,000; the Pine Ridge Reservation, S. Dak., \$25,000; and the Shoshone Reservation, Wyo., \$25,000; a total for all purposes of \$137,025.

The two bridges near the Leupp Agency, Ariz., for which appropriations were made two years ago (one across the Canyon Diablo, and the other across the Little Colorado River), were completed during the year. The appropriation of \$10,500 on the Hoopa Valley Reservation, Calif., was for continuing work on the road from Hoopa to Weitchpec which was begun several years ago. It is expected that this work will be completed during the present year. It will open up a hitherto almost inaccessible country and connect with the county road system off the reservation. The appropriation of \$11,000, at San Juan, N. Mex., was for the completion of the highway from Gallup to the Mesa Verde National Park across the Navajo and San Juan Reservations. This road has been completed. The appropriation of \$25,000, at Cheyenne River, S. Dak., was to cover our part of the cost of a bridge across the river of that name in conjunction with the Bureau of Public Roads and the State highway commission under the Federal aid road act, the total cost being approximately \$119,000.

The expense of road work on other reservations was met from the regular support appropriation, the largest amount being expended at Crow, Mont., and Uintah and Ouray, Utah. Indian labor is largely employed, which assists in their support to this extent.

### THE FEDERAL WATER POWER ACT.

A number of applications have been filed under the Federal water power act of June 10, 1920, the provisions of which, it is believed, will give greater encouragement to water power development. Careful attention has been given to the subject with such preliminary work as has been practicable, and it is expected that definite progress will be made during the coming year.

### METALLIFEROUS MINERALS.

Operations under section 26 of the act of June 30, 1919 (41 Stat. L., 31), while still in their infancy, promise a good income to the Indians. A rich silver mine has been discovered on the San Juan Reservation in New Mexico. A number of good copper prospects have been discovered on some of the reservations. The most important and most promising claims are probably those located on asbestos deposits in the San Carlos and Fort Apache Indian Reservations in Arizona. Judging from the known field it is by no means improbable that the values will run very high, so as to bring many thousands of dollars in royalties to the Indians.

The Indian appropriation act of March 3, 1921, contained an amendment to section 26 of the act of June 30, 1919, supra, directing that wherever the term "metalliferous" occurs in said act of June 30, 1919, it shall be defined and construed to include magnesite, gypsum, limestone, and asbestos. The amendment is a legislative interpretation of the word "metalliferous," and inasmuch as it has been considered that magnesite, gypsum, limestone, and asbestos were nonmetalliferous minerals, the amendment so far as authorizing the mining of these minerals is concerned is retroactive to the date of the original act of June 30, 1919, and validates mining locations covering such minerals made prior to March 3, 1921.

### PUEBLO INDIAN PROBLEM.

The condition of the Pueblos with respect to their land titles and the encroachment of squatters is one that has proved very troublesome in the past.

Last year a plan was formulated whereby the Department of Justice is to cooperate with the special attorney appointed for the Pueblos in removing trespassers and quieting the title of the Indians to their lands.

A number of suits had been filed, some quite recently, not only for the purpose indicated but to determine the right of the Indians who use water from irrigation ditches which the whites have appropriated.

The Attorney General of the United States has appointed an attorney to represent his office in the matter of Indian litigation, etc., who will have an office in Santa Fe, N. Mex. He has been instructed

to investigate thoroughly all Pueblo Indian titles, including the original grants, surveys, history of individual holdings, disputes concerning water rights, and in fact to make a comprehensive report upon which can be based a request for legislation, if the same is deemed necessary, which will give justice to the Indians or the settlers.

### INDIAN CLAIMS.

Congress has enacted legislation providing for certain Indian tribes to take alleged valuable claims against the Government to the Court of Claims for adjudication.

Under the jurisdictional act of May 26, 1920 (41 Stat. L., 623), the Indians of the Klamath Reservation, Oreg., have had several councils, but the matter of selecting a suitable tribal attorney or firm of attorneys to present their claims to the court has not as yet been definitely settled.

Under the act of June 3, 1920 (41 Stat. L., 623), authorizing the Sioux tribes to have their claims heard by the Court of Claims, a council of delegates from each of the bands of the Sioux was held December 15-17, 1920, at Fort Thompson, S. Dak., on the Crow Creek Reservation, which submitted the names of several attorneys. The firm of Messrs. Hughes, Rounds, Schurman & Dwight, of New York City, was authorized to enter into contract with these Indians, which contract was approved February 25, 1921.

Subsequently Hon. Charles E. Hughes, who had become Secretary of State, withdrew from the firm, which was then reorganized under the name of Rounds, Schurman & Dwight.

At a conference held with the Sioux tribal delegates June 22, 1921, at Omaha, Nebr., the representatives of the law firm mentioned notified the Indians that they desired to withdraw from the case and have their contract canceled.

Considerable work has already been accomplished toward obtaining evidence on behalf of the Indians, and upon the selection of other attorneys and the completion of a new contract with these tribes the work of formally presenting their claims to the Court of Claims will be pushed.

### SUPPRESSION OF LIQUOR TRAFFIC.

The national prohibition act has made it more difficult for Indians to obtain intoxicating liquor, and the resulting benefit to them will no doubt be augmented as the enforcing machinery of the general prohibitory legislation becomes more effective. As yet, however, the protection of the Indians from intoxicants is largely a problem distinct from national prohibition and is in need of direct attention from this service. Such attention has been given to the fullest extent practicable under appropriations by Congress for that purpose, which for some time past have been materially reduced each year. The appropriation for the fiscal year 1919 was \$150,000, for the current year \$35,000. Such special officers and facilities as can be provided are distributed in localities where violations of law are most persistent, and prosecutions are found to be principally necessary against bootleggers and moonshine stills. This work is always more successful where full support is given to the Indian Service by the local and State officials.

## **INDIANS, AND STATE BONUSES FOR SOLDIERS.**

The passage of an act by the New York State Legislature providing bonuses for soldiers of that State who served in the World War has given rise to a question that will probably be of interest to Indians in other States which have enacted similar legislation. For a time the State bonus commission of New York was doubtful of its right to include the reservation Indians who had served in the war as beneficiaries under the law referred to, because of decisions to the effect that such Indians were not citizens and not amenable to the State law. But in the opinion of the attorney general of that State, Indian soldiers of the State, otherwise qualified, are entitled to the bonus.

## **PENSIONS FOR INDIAN SCOUTS WHO SERVED IN INDIAN WARS.**

Pensions are provided for Indian scouts by the pension act of March 4, 1917. Many scouts and their widows have made claim for pension under this act since its passage and a great many Indian scouts who served during the Indian wars have been awarded pensions by reason of their scout service. Indians who have claims under the pension act are given every assistance in the preparation and presentation of the claims. The Indian scouts now have many claims pending or in the course of preparation.

## **COMPENSATION FOR INJURIES.**

Indian Service employees throughout the country are assisted in the preparation and presentation of their claims to the United States Employees' Compensation Commission on account of injuries sustained while in the performance of their official duties. The Federal compensation act has proved to be of great benefit to Indian Service employees who are not able to continue their regular work for the Government because of injury. The dependents, in case of the death of the employee, are likewise assisted in the submission of their claims.

## **CITIZENSHIP FOR INDIAN SOLDIERS AND SAILORS.**

A number of Indian soldiers have taken advantage of the opportunity for United States citizenship presented to them by the act of November 6, 1919, providing that Indian soldiers and sailors who served in the World War and have been honorably discharged may be granted citizenship by courts of competent jurisdiction.

## **CIVIL AND CRIMINAL SUITS INVOLVING INDIAN LANDS.**

Information has been filed and indictments found against various persons for procuring the signatures of Indians to deeds affecting title to Indian lands held in trust by the United States for allottees, or their heirs, in violation of section 5 of the act of June 25, 1910 (36 Stats. L., 855); also, information has been filed against groups of persons, involving transactions in Indian trust lands, and indict-

ments have been found in such cases under section 37 of the United States criminal code for conspiracy to defraud the United States. Action in these cases, which are awaiting trial, is the result of investigations by United States Indian inspectors of complaints made by Indians and others, the evidence adduced being placed in the hands of the Attorney General. In a few instances, where it appeared that the person procuring an Indian's signature to a deed or mortgage believed the land was unrestricted, and that there was no intention to violate the law, a reconveyance was accepted and no other action taken.

Civil suits have been filed and property recovered, of which Indians have been deprived through fraud or through illegal taxation, a recent case being the United States *v.* Yakima County, Washington, et al., involving land purchased for Indians with funds held in trust by the United States and land conveyed with restriction against alienation. A number of similar cases will soon be sent to the Attorney General for appropriate action unless efforts now being made by the office to settle out of court are successful. Some counties have already refunded amounts illegally assessed and paid, and in one case the office has been able to recover land from the holder of the tax deed.

#### DEFRAUDING OTTAWA AND CHIPPEWA INDIANS OF MICHIGAN.

Early in the month of June the United States district attorney for Grand Rapids, Mich., brought to trial a full-blood Ottawa Indian of Michigan, Dr. William Jones Masqueskey, alias Petoskey, who had been arrested and indicted for illegally and fraudulently collecting moneys from the Ottawa and Chippewa Indians of Michigan while claiming to be a Government official connected with the Indian Service. He was placed on trial June 13, charged with using the mails to defraud and with impersonating a Government official. The evidence showed that he had collected from \$1,000 to \$2,000 from these citizen Indians while posing as an agent or officer of the Indian Bureau, and that he was clearly guilty as indicted. It was also shown that he had served 20 years in the Michigan State penitentiary for forgery and other crimes; and as the evidence adduced was overwhelmingly against him, he pleaded guilty and ere this has probably been sentenced.

It is hoped that his arrest and conviction will put a stop to the practice of a number of Indians, especially in Wisconsin and Michigan, in collecting moneys from these citizen Chippewa and Ottawa Indians.

#### FISHING IN RED LAKE, MINN.

During the World War, under the special need of increased production of food, a cooperative arrangement was made with the Minnesota State game and fish commissioner, working in connection with the Minnesota Public Safety Commission, for the taking of fish from Red Lake within the Red Lake Indian Reservation, Minn. By this arrangement, opportunity for employment of Indians was provided, the food supply to the nation was increased, and a rev-

enue provided to the Red Lake Tribe on account of the fish taken. In addition to the benefits above mentioned, the State of Minnesota made a large profit from these fishing operations in Red Lake during the year 1918. Approximately 825,446 pounds of fish were taken from the lake from October 15, 1917, to January 1, 1919. Operations were also conducted in 1919 and 1920, the agreement for these years limiting the quantity to be taken at 500,000 pounds for the year.

During the current calendar year, 1921, fishing operations have been continued and recently authority was granted to increase the amount that may be taken during the year from 500,000 to 800,000, the increase being largely to allow many of the Indians to continue fishing to the close of the season and in view of representations that this fishing is the only means of support for a large number of old Indian men and women.

### LIBRARY.

The Indian Office has a working and reference library of some 3,000 volumes which is being built up for the purpose of convenience not only to its employees but to the various historians and historical societies throughout the United States, and comprises publications concerning Indian history, customs, biography, etc. It contains a series of volumes relative to Indian laws and usage which have been compiled from time to time until there are 122 books of approximately 1,000 pages each. Law books pertaining to the supervision of Indian lands, moneys, and other property interests form a portion of the library for the special use of the law clerks of the office.

During the past year considerable time has been given to the compilation of a card catalogue of the publications relating to the American Indians and kindred subjects. Some of these publications are books contained in the office library, some have come to the notice of the office through other channels, and a large number are congressional documents. These have all been indexed in such a manner that they are of assistance to the correspondence clerks desiring information upon any one subject, whether the individual Indian, the tribe, or special topics of interest relating to the work. As the files of the office increase, this index becomes more valuable as an aid in quickly locating important reports, investigations, precedents, and information of a technical character, and thus facilitates appreciably all administrative activities as well as inquiry from outside sources.

EXHIBITS.—A small but excellent collection of exhibits, containing pottery, basketry, and other samples of Indian craftsmanship, makes the library one of the attractive places of the office in which the visitor is very often interested. Some of the pottery and basketry are excellent specimens of their class.

### THE BUREAU'S WORKERS.

The Indian Service has not fully recovered from disturbing war conditions that caused a definite shrinkage in what may be termed the "permanent working force." There are still too many temporary

employees, but it is becoming much easier to fill positions from applicants certified by the United States Civil Service Commission than at any time for several years past. The most difficult to obtain in this manner are physicians and trained nurses, particularly the latter. The continuing shortage of experienced teachers throughout the country also has its effect upon a most important branch of our service, although the necessity for temporary employment is considerably reduced.

Of the number of employees retired under the act approved May 22, 1920, 24 were eligible for annuities and five were not entitled to such benefit because they had served less than 15 years at the age of retirement. Of those who reached the age of retirement, 32 were retained on duty under the provisions of section 6 of the law. It may be added in this connection that, under a decision of the Civil Service Commission, any person employed in an excepted position or appointed under a noncompetitive examination by obtaining a classified status through a regular competitive examination may be given credit for time previously employed in computing the length of service rendered under the retirement act. This should work to the advantage of many intelligent and progressive Indians who are now filling excepted positions or are employed under a noncompetitive examination granted because of Indian blood, and should be an inducement to them and to others to secure a classified status through the necessary competitive tests.

The reclassification of the departmental civil service is receiving consideration in Congress that seems to foretell enacted legislation on this subject in the near future. Probably the most important object sought is uniform compensation for work of the same kind wherever performed, and if nothing further were accomplished this result would be of great stabilizing value to all activities affected, including those of the Indian Bureau, and should lead to more permanency in our field personnel, even if the law were not at once applicable to that body of workers. This bureau has at times felt embarrassment through withdrawals from its service because of more attractive remuneration for practically the same character of work performed in other branches of the Government.

There are now in the office and field of the Indian Service fewer employees than for some years past, and in view of postwar needs for the strictest economy of public funds, the number will not be allowed to exceed the imperative demands of all matters arising out of the relations of the Government's wards. This many-sided and largely human task deals with both individuals and groups and requires a wide range of knowledge and experience. To carry it forward we must have not only administrators but teachers, lawyers, physicians, nurses, mechanics, farmers, accountants, and a corps of inspectors for special and confidential duties, together with many others for chiefly nontechnical work, whose combined service touches every phase of the peculiar life we are endeavoring to prepare for successful assimilation with the white man's civilization. These men and women are with little exception faithful, capable, loyal, and often self-sacrificing workers, whose average annual salary of but little over \$800 strongly suggests an interest in their work not measured by money alone.

## THE HELPFUL MISSIONARIES.

No report of important and promising conditions among the Indians should fail to acknowledge the constant labors of the Christian missionaries. From the heroic days of John Eliot amid the Puritan settlements and the coming of the Franciscan friars to the far Southwest, there has been among the Indians a devoted and widening achievement by these faithful teachers of the spiritual conceptions that must hold a fundamental place in our civilization. It is impossible to see how the purposes of the Government, free as they have been and must remain from sectarian alliances, could have succeeded as well as the record shows without the cooperation given by the dauntless faith and works of the missionary.

Among the outstanding facts of Indian progress must be written to-day the more than 600 missionary workers, with an even larger number of churches, and over 100,000 church-going Indians.

Governmental administration must indeed count itself fortunate in having the assistance of men and women whose best powers, and often their lives, are freely given for the moral ideals of Christian citizenship.

## COURT DECISIONS.

*Annie Harris et al. v. Harry H. Bell et al.* (decided by the United States Supreme Court November 15, 1920).—By this suit certain conveyances of lands allotted in the name and right of a Creek Indian after his death were assailed. Held that the heirs received the lands as an inheritance from the deceased allottee and not as a direct allotment to them. Held further that the power of the Secretary of the Interior to examine and approve or disapprove a conveyance made prior to May 27, 1908, under the act of April 26, 1906 (34 Stats., 137), was not taken away by the act of May 27, 1908 (35 Stats., 312).

*George G. LaMotte et al. v. the United States* (decided by the United States Supreme Court January 24, 1921).—This was a suit by the United States to enjoin certain parties from asserting or exercising any right under certain leases obtained from individual Osage Indians without the approval of the Secretary of the Interior. Held that the action of the courts below was correct in enjoining the defendants (appellants here) from asserting or exercising any right under leases of restricted lands given by individual Osages without the approval of the Secretary of the Interior and from negotiating or procuring other leases of the same class without conforming to the regulations prescribed. Held further that leases of restricted lands belonging to minor allottees or minor heirs given by guardians with the sanction of the local courts, in which guardianships were pending, required the approval of the Secretary. Held further that leases covering restricted lands given by parents on behalf of minor allottees or minor heirs where the parent has received a certificate of competency or where the parent is a white man, require the approval of the Secretary. Held further that restrictions are removed from property disposed of by will approved by the Secretary of the Interior.

*State of Oklahoma v. the State of Texas, defendants; the United States of America, intervenor* (decided by the United States Supreme

*court April 11, 1921*).—This was a suit in equity brought in the original jurisdiction of the Supreme Court by the State of Oklahoma against the State of Texas to establish the true boundary line between those States where it follows the course of the Red River from the one hundredth degree of west longitude to the easterly boundary of Oklahoma. The court found that the matter was *res judicata*, as the result of a former decree of the Supreme Court in the case of the *United States v. The State of Texas* (162 U. S., 1), wherein it was decided that the treaty of 1819 between the United States and Spain fixed the boundary along the southern bank of the Red River. This case has a bearing on the claims of Indians of the Kiowa and Comanche Tribes, now pending in the Supreme Court of the United States, as to riparian rights extending to the center of the stream or to the southern bank of the said river.

*C. R. Privett et al. v the United States et al. (decided by the United States Supreme Court April 18, 1921)*.—This suit was brought by the United States in virtue of its interest in maintaining the restrictions and safeguarding the Indians in the possession and enjoyment of the lands allotted out of the tribal domain. Held that no stipulation, contract, or judgment rendered in suits to which the Government is a stranger can affect its interests. Held also that the reliance on a decision in a prior suit wherein the Government did not appear is ill-founded, and that the deeds running to Privett were void because one of the heirs, a minor, was born after March 4, 1906, and the Secretary of the Interior had not approved the deeds.

*Mike Blanset v. Oscar Cardin, as guardian of Jesse Daylight, minor, et al. (decided by the United States Supreme Court May 16, 1921)*.—Mike Blanset, a white man, brought suit to have himself declared to be owner of an undivided one-third interest in all lands and other property of which his wife (a deceased Quapaw allottee) died seized or possessed; also to declare void the will of his wife and its approval by the Secretary of the Interior. The case was appealed to the Supreme Court of the United States and presented as its ultimate question the accordance or discordance of the laws of Congress and the laws of the State of Oklahoma. It was held that it was the intention of Congress that this class of Indians should have the right to dispose of the property by will under act of February 14, 1913 (37 Stats., 378), free from restrictions on the part of the State as to the portions to be conveyed or as to the objects of the testator's bounty, provided such will was in accordance with the regulations and met with the approval of the Secretary of the Interior.

*Anchor Oil Company v. W. H. Gray, F. D. McDonnell, Chas. Egan et al. (decided by the United States Supreme Court June 1, 1921)*.—This was a suit in equity involving the ownership of a leasehold estate for oil and gas mining purposes in a Creek allotment, Oklahoma. Held that the authority of the Secretary of the Interior to approve and thereby confirm oil and gas mining leases made by full-blood Creek allottees upon their allotment derived from section 2 of the act of May 27, 1908, did not cease at the time of the death of the allottee by reason of the provisions of section 9 of the same act. (35 Stats., 315.) Held further that the validity of the lease being conditioned upon the approval of the Secretary of the Interior, such approval might be given at any time either before or after the death of the allottee so far as the rights of the heirs and those claiming

under them with notice were concerned. The approval when given related back and took effect as of the execution of the lease. Held further that the filing of a lease given by an allottee in the office of the superintendent for the Five Civilized Tribes for transmission to the Secretary of the Interior constituted notice to all parties thereafter claiming under said allottee or his heirs.

*The United States v. Geo. E. Bowling et al.* (decided by the Supreme Court of the United States June 1, 1921).—This was an action by the United States to recover the possession of a tract of land in Oklahoma with damages for its detention and use for several years. The point involved was whether the court below erred in excluding as evidence an exemplified copy of a decision by the Secretary of the Interior determining the heirship of those in whose interest the suit was brought. Held that the lower court erred in sustaining the objection of the introduction in evidence of the Secretary's determination of heirship, and that by reason of supplemental acts of Congress contained in the Indian appropriation bills the right of the Secretary of the Interior to determine Indian heirs extended to restricted as well as trust allotments, although the former was not specifically mentioned in the act of June 25, 1910. (36 Stats., 855.) Judgment reversed and case remanded for a new trial.

### LEGISLATION.

On February 6, 1921, an act conferring jurisdiction on the Court of Claims to hear, determine, and render judgment in the Osage civilization-fund claim of the Osage Indians against the United States was approved.

Congress also passed an act amending the act of Congress of June 28, 1906, entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma." This act extends the mineral trust period on Osage lands for a period of 15 years from April 7, 1931, or until April 8, 1946, and provides that the unleased portion of the Osage Reservation shall be leased prior to April 8, 1931, offering the same annually at the rate of not less than one-tenth of the unleased area. By this act all members of the Osage Tribe are declared to be citizens of the United States. Homestead allotments shall not be subject to taxation prior to April 8, 1931, if held by the original allottee. The act also provides for quarterly payments to competent Osage Indians. A portion of the funds of minors shall be deposited in bank or invested in Government or State bonds. The State of Oklahoma is authorized to levy and collect a gross production tax on oil and gas produced within the Osage Nation, and a further tax of 1 per cent of the amount received by the tribe as royalties from production of oil and gas is to be used for the construction and maintenance of roads in Osage County only.

An act providing for the allotment of lands within the Fort Belknap Reservation, Mont., was approved March 3, 1921. This act confers citizenship upon all Indians receiving trust patents under the provisions of the act, and the allottees shall have the benefit of and be subject to the laws, both civil and criminal, of the State in which they reside. Mineral lands may be allotted, but the minerals remain tribal property. Lands are set aside for school, agency,

and mission purposes, as well as for parks and water-power sites. Provision is made for the construction of necessary irrigation projects. The sum of \$270,000 is appropriated for carrying out the provisions of the act.

The annual Indian appropriation act, approved March 3, 1921, appropriates from the Federal Treasury the sum of \$9,761,554.67, segregated as follows: Treaty appropriations, \$906,620; gratuity appropriations, \$7,257,449.67; and reimbursable appropriations, \$1,597,485. The amount of \$2,716,921.50 is authorized to be expended from various Indian funds, a portion of which is to be paid out per capita to certain tribes of Indians. For health work \$375,000 is appropriated; for new buildings at the Indian school, Phoenix, Ariz., \$50,000 is appropriated; \$25,000 is available for road construction on the Blackfeet Reservation, Mont., between the Yellowstone and Glacier National Parks; and \$17,500 is made available for expenses in connection with certain Osage tax suits now pending in the Federal courts.

Legislation enacted in the Indian appropriation act amended the act authorizing the leasing of Indian lands for the mining of metalliferous minerals so as to include magnesite, gypsum, limestone, and asbestos. Authority is granted for the leasing of lands of Indian allottees for farming and grazing purposes, subject only to the approval of the superintendent or other officer in charge of the reservation where the land is located. The Secretary of the Interior is authorized to accept reconveyances to the Government of privately owned and State school lands, and relinquishments of valid homestead entries or other filings, including Indian allotment selections, within any township of the public domain in San Juan, McKinley, and Valencia Counties, N. Mex., and to permit lieu selections by those surrendering their rights so that the holdings of any claimant within any township wherein such reconveyances or relinquishments are made may be consolidated and held in solid areas.

### CONCLUSION.

As a closing word, it is a satisfaction to acknowledge among the employees of the bureau, both in the office and field, a spirit of loyalty and earnest endeavor that carries assurance of agreeable and successful working relations.

It is also a special pleasure to have received your cordial support and to feel that wise suggestions from your office are available at any time.

Very respectfully,

CHAS. H. BURKE, *Commissioner.*

The SECRETARY OF THE INTERIOR.

## STATISTICAL TABLES.

**TABLE 1.—Indian population of the United States, exclusive of Alaska, June 30, 1921.**

[Figures compiled from reports of Indian school superintendents, supplemented by information from the 1920 Census for localities in which no Indian Office representative is located.]

|  |         |
|--|---------|
| Grand total.....   | 340,838 |
| Five Civilized Tribes, including freedmen and intermarried whites..... | 101,506 |
| By blood.....  | 75,519  |
| By intermarriage.....  | 2,582   |
| Freedmen.....  | 23,405  |
| Exclusive of Five Civilized Tribes.....                                | 239,332 |

### INDIAN POPULATION BY STATES.

## REPORT OF THE COMMISSIONER OF INDIAN AFFAIRS.

DEPARTMENT OF THE INTERIOR,  
OFFICE OF INDIAN AFFAIRS,  
*Washington, D. C., September 1, 1922.*

SIR: I have the honor to submit this the Ninety-first Annual Report of the Bureau of Indian Affairs for the fiscal year ended June 30, 1922.

### SCHOOLS.

Recognizing the importance of the Indian Bureau's educational work, the chief supervisor of education was authorized at the beginning of the year to call a conference at his headquarters in Lawrence, Kans., of all the school supervisors for the purpose of developing definite plans for the work of the school year.

The conference first completed the following organization of districts for purposes of school supervision:

Headquarters district: Kansas, Nebraska, and western Oklahoma.

Five Civilized Tribes district: That portion of eastern Oklahoma included in the Cherokee, Creek, Seminole, Choctaw, and Chickasaw countries.

Southwest district: New Mexico, Arizona, and Colorado.

Pacific coast district: California, Nevada, Oregon, and Washington.

Rocky Mountain district: Utah, Idaho, Wyoming, and Montana.

Great Lakes district: Minnesota, Wisconsin, Michigan, Iowa, and, as an adjunct, North Carolina and Mississippi.

Dakota district: North Dakota and South Dakota.

A school supervisor was assigned to each of these districts, with instructions to visit and make a careful survey of every phase of the educational work during the year. Every jurisdiction in the United States and every school under each jurisdiction has been visited at least once, and many of them twice or more. The supervisors have carefully inspected all school plants for the purpose of determining their capacity, their physical condition, how equipped, their most urgent needs as to repairs, new construction, and new equipment. Very special efforts have been made to determine whether or not the schools are being utilized to the best possible advantage and to their greatest capacity.

ENROLLMENT.—Questions of enrollment and attendance in schools of all kinds—Government, mission, and public—have been considered matters of first importance by all supervisors, and they have urged cooperation on the part of not only Government field officials and employees, but also of public-school authorities in sections of the country where public schools are accessible to the Indians. For

various reasons, including insufficient support funds, the attendance had diminished during the war period and the years immediately following. Many schools had not been utilizing their entire capacity, and it seemed that Indians and those responsible for their education needed to be awakened to the prime value of education in the preparation of Indians to take their rightful places as productive citizens. With that end in view a school enrollment campaign week was planned and an urgent appeal issued on August 12, 1921, indicating in detail the course to be taken by all superintendents in fulfilling the slogan, "Every eligible pupil in school," and outlining the co-operation that should be sought from missionary workers, Indian traders, and all service employees, with the definite view of filling all available capacity in Government, mission, and public schools.

The response was prompt and whole-hearted, with the result that very early in the school year practically all schools were filled to utmost capacity and many, particularly the large nonreservation boarding schools, were compelled to turn away hundreds of boys and girls who were eager for education. The school year 1921-22 has broken all previous records of enrollment and attendance. The total increase in average attendance in schools of all kinds was approximately 3,000, a very large proportion of which was in the Government boarding schools and in the public schools. In fact, the average attendance in these boarding schools was 16,453, which exceeds by 549 their capacity of 15,904. There was considerable unused day-school capacity, which may be attributed to several facts: First, economic conditions among Indians in many sections of the country made them desirous of placing as many as possible of their children in school where they could be clothed, fed, and cared for; second, many children who had previously gone to Government day schools enrolled in public schools; third, in a very large number of day-school districts there are not enough children to fill the schools to capacity. Especially is this true when the day-school course is limited to three grades, and therefore it is proposed to extend the grades in day schools where children are available and can be accommodated for higher work. In this way boarding-school capacity will be released for those who can not have day-school privileges.

A further study of statistics reveals some facts that demand the attention of those who are responsible for Indian education in this country. There are in round numbers 90,000 Indian children between 5 and 18 years of age. Approximately 65,000 of them have been enrolled in school during the school year 1921-22, leaving 25,000 out of school. Of that number, approximately 7,000 are ineligible to attend schools for normal children because of ill health, defective eyesight, early marriage, and other reasons. These unfortunate ones, however, should not be neglected. Eliminating the ineligible, there are still approximately 18,000 Indian children of school age to be provided for in some way. I desire to call special attention to the States that have large numbers of Indian children out of school, growing up without an English education and without industrial training of any kind to prepare them for independent living; in other words, following in the footsteps of their parents and soon to become another generation of non-English-speaking

people, a dependent group unfitted for American citizenship who, if given equal opportunities with all other nationalities in this country to go to school, will become an economic asset instead of a liability.

*Not in school (approximate).*

|                   |       |                 |       |
|-------------------|-------|-----------------|-------|
| Arizona-----      | 7,500 | California----- | 2,500 |
| Minnesota-----    | 1,900 | Montana-----    | 1,100 |
| Nevada-----       | 800   | New Mexico----- | 4,000 |
| North Dakota----- | 1,500 | Oklahoma-----   | 6,000 |
| South Dakota----- | 1,100 | Utah-----       | 400   |
| Washington-----   | 1,000 |                 |       |

At first glance these statistics are rather alarming, but an analysis of the school survey, made during the year by the school supervisors, shows that the problem of providing school facilities for these children may not be as difficult as it would seem. The explanation is in the fact that in many of these States, particularly in California, Minnesota, Montana, North Dakota, Oklahoma, South Dakota, and Washington, public schools are available for large numbers of Indian children, and every year the enrollment of Indians in public schools in these States is increasing. Therefore, aside from utilizing to full capacity the Indian schools already in existence in those States, the problem will be largely one of cooperation with the public-school authorities in enrolling Indian children.

A splendid demonstration of what may be accomplished in placing Indian children in public schools when there is hearty cooperation between Federal, State, and local authorities is the work that has been done in the Crow (Montana) country. The Montana State Legislature voted to provide for the education of all Crow children in the public schools if certain Crow lands were given to the State for school purposes. There conditions were met, all Government schools there were closed or arrangements made for them to be conducted as public schools, the Indian children were enrolled in the public schools, and have made very satisfactory records of attendance and scholarship. Nearly all of the mission schools on this reservation have also been closed and many of the children who formerly attended them are attending the public schools. Many Indian children are also attending public schools at Fort Peck and at Browning, Mont.

Owing to several years of crop failure, with heavy reverses to many stock men in Montana, the school funds in that State are being greatly reduced and, therefore, Federal aid should be given where there are large tracts of Indian lands not subject to taxation, and where public schools are maintained in which Indian children enroll. Educational work among Indians in Montana has been greatly neglected, and regardless of the willingness of public-school authorities to do all they can, there is a demand for some extension of the educational work by the Government. One good nonreservation school where industrial training could be offered to Indian boys and girls of Montana is needed.

Practically all of the Government schools of Minnesota have been closed and the Indian children are rapidly being absorbed by the public schools, and although many children are now out of school the principal work in this State will be cooperation with public-school authorities. Liberal tuition should be paid for Indian chil-

dren enrolled in public schools in cases where districts are poor and Indians do not pay taxes.

It will not be necessary to build any more Government schools, except in the Southwest and possibly in Montana. Schools in other sections should be liberally supported and in a few instances somewhat enlarged, as at Chilocco and Haskell Institute, which are situated to serve the large Indian population in Oklahoma and the Southwest.

Arizona and New Mexico, with their school population of between 11,500 and 12,000, without any kind of school facilities, constitute the big educational need among Indians. The United States Government more than 50 years ago made a treaty with the Navajo Indians pledging that for every 30 children a school would be provided. Generations of children have grown up in ignorance and superstition without having the promise fulfilled, and now, while many of their children are well provided for, large numbers are neglected the same as were their fathers and mothers. Having heard echoes of the Navajo prayer for more enlightenment since the beginning of my administration, and believing the problem of that section to be among the most worthy of attention, I left Washington late in April accompanied by the chief supervisor of Indian education, Mr. H. B. Pairs, and spent almost seven weeks traveling, mostly by automobile, throughout New Mexico, Arizona, southern California, and southern Colorado, visiting Indian reservations, agencies, and schools, meeting, talking with, and listening to individual Indians and representative groups, observing their home life, investigating their industries, and conferring about their desires and needs. Our party traveled nearly 3,000 miles overland, visited every reservation in New Mexico, all but three small ones in Arizona, spent three days in California, and one and one-half in Colorado. Almost all of the country visited is arid or semiarid, and New Mexico and Arizona particularly are best adapted to sheep and cattle raising, upon which the Indians chiefly depend, following their flocks of sheep and goats and their herds of cattle over large areas of country to find feed for them. These conditions make their home life miserable and retard progress. They also create a difficult and expensive school problem. Practically all education must be in boarding schools where the children can be cared for, because the home, such as it is, must move with the flocks according to the seasons. Another obstacle in the way is the prevailing custom of having the little boys and girls from 6 years of age up help their mothers herd the sheep, and little children not yet in their teens may be often seen trudging along after the flocks away out in the desert, miles from home or habitation of any kind. It is a pitiful picture, and when it is realized that hundreds, possibly thousands, of these little children spend days, weeks, and months at such labor instead of going to school as they should, it intensifies the feeling that the Government has not kept faith with these people.

When we visited the schools that have been provided and saw the groups of bright, clean, well-dressed children, heard them read and sing, saw their superior writing and drawing, their handiwork, and watched them in their drills and in their play, and then thought of the thousands out on the desert following the flocks and

herds, and living in the temporary summer wigwams or in the winter mud hogans without any of the conveniences and comforts of even the most primitive civilized life, we could understand why they should feel that Washington, the Great Father, had forgotten his red children. When asked what they wanted most, they invariably said, "Water and education," and these are the first great needs. Following the vision that education will give them will come the better home life.

Last year there was a very general drought throughout almost all of the Indian country in the Southwest. Following the war period the price of wool and of stock had gone down to less than cost of production. The Indians, as well as other people, must have some way to gain their livelihood. There was an unusually large crop of piñon nuts, and the Indians, facing necessity, took advantage of the opportunity and last year gathered and marketed \$550,000 worth of these nuts, which were sold at from 10 to 20 cents per pound. This is mentioned not only to commend their remarkable industry but to show that the only feasible education for the children is in boarding schools. Entire families went wherever the piñon nuts could be found.

In the Papago country, whole villages have been abandoned because of the drought and the people have gone, as they should, to places where work has been available.

Surely these people who are so resourceful and who demonstrate ability to meet economic emergencies such as would tax the most intelligent, thoroughly trained people, are worthy of assistance in educating their children.

Schools should be provided for all of the Indians of the Southwest within the next four or five years. The fulfillment of the promise of the Government, made half a century ago (treaty of 1868), must be accomplished. Knowing the conditions and needs, who will say "no"? As Commissioner of Indian Affairs, I am not willing to longer overlook the failure to provide schools for these native Americans.

REVISION OF COURSE OF STUDY.—While in conference during July and August the school supervisors, with the assistance of a few superintendents and instructors from representative schools, made a revision of the tentative course of study which was prepared for use in Indian schools and introduced in 1916. As now revised the course will parallel more closely the grades of the public schools in which there is a rapidly increasing enrollment of Indian children and the industrial courses are improved to harmonize with the academic revision, some additional work being provided relating to gas engines and auto mechanics to meet the ever increasing demand of the times. The course is now in effect and was published in loose-leaf form, making it convenient to revise any portion, if desired, without the expense of an entire reprint. In applying this course of study the steadfast purpose and practice will be to furnish the largest possible number of Indian children with a good academic and industrial education.

UNIFORM EXAMINATION.—In connection with the use of the uniform course of study, the requirement of uniform examinations at the middle and close of the year is deemed necessary to maintain work and supervision at a satisfactory standard in schools located in all

sections of the country, including 21 different States, and this plan is now followed.

**SUPPLEMENTING THE COURSE OF STUDY.**—As so many of the Indian children come from very primitive homes where many of the ordinary lessons of daily life are never taught, it seems advisable to select some subject for special study each year and thus definitely stamp certain valuable impressions on the memories of Indian young people. For the past year the subject, "Prevention of waste," was selected. This was done because the entire Nation had been asked by the President to practice economy in every possible way. The subject is one of great importance to Indians, and the time and effort given to its study were well spent. Not only have the young people been benefited, but results are seen also in the fact that it has been possible to support the largest number of Indian children in the schools that have ever been enrolled, with all schools in full-time operation, and to the best of my knowledge, with no resulting deficits. This cooperation of the schools in the study and consideration of a special subject of interest to all is worthy of record.

**PERSONNEL.**—As was said in my last annual report, during the war period and immediately following the call of patriotism and the lure of better salaries than could be paid to those employed in the Indian schools took hundreds of instructors away from our service and the same conditions made it very difficult to find people to fill positions. The result was that the general efficiency standards became greatly lowered. At the beginning of the year plans were formulated for the improvement of the personnel of the school service. A reading course was announced for all school employees, and throughout the year the supervisors have encouraged efforts for self-improvement on the part of all instructors. Arrangements were also made for summer school work for as many instructors as could possibly be spared from their respective schools. Certain State institutions were designated in each supervisor's district to which all instructors were encouraged to go for a few weeks. The summer schools opened in June with a fairly good representation of the teachers, but for financial and other reasons, fully as many chose to attend institutions other than those designated.

The advantage of selecting certain institutions was that large enough groups might be brought together for round-table conferences. It is believed that attendance at the State institutions, where hundreds of public-school teachers are gathered, will be mutually helpful. Those employed in the Indian schools will have opportunities to associate with the public-school workers and thus to become better acquainted with the trend of public-school work, and the teachers of public schools will have a similar opportunity to learn of the work of Indian schools. This is important because of the ever-increasing attendance of Indian children in public schools.

While at the beginning of the school year it was difficult to get applicants enough to fill all vacancies in the Indian schools, there was a very large increase in applications during the year, and just at its close the Civil Service Commission reported that there were nearly 500 names on the list of teachers. This will make it possible to make selections with great care as vacancies occur, and the prospect now is that the standards of efficiency can be raised rapidly.

The school year has been one of great activity. The school field force is well organized, the schools have been full to capacity, the personnel is being gradually but markedly improved, the demand for enrollment for another year is limited only by capacity, and the school spirit among students and teachers is fine in almost all of the schools, according to reports by supervisors. The attitude of public school authorities and patrons toward Indian children and their enrollment in the public schools was never so favorable, and as an essential to success the spirit of cooperation among the workers in Government, mission, and public schools is very generally harmonious.

In the education of the Indian youth lies the hope of the future generations of the American Indian. In this time, when it is so essential to practice economy in every possible way, it should be realized that the child who is allowed to grow up in this country without being taught English and manual skill in some useful occupation is always in danger of becoming a liability. It is false economy to neglect the education of any children.

### HEALTH.

The medical work of the bureau progressed during the year with no unusual perplexities and in the main with satisfactory results. With approximate return to normal conditions, many vacancies occasioned by the war and other attractive inducements have been filled. However, our health service has been growing, as the Indians have become aware of its advantages over their own crude and superstitious methods of treatment, and the personnel for this important work is still incomplete, principally because of low salaries that do not attract competent medical men and graduate nurses.

There were but few epidemics on the reservations last year, and health conditions showed gradual improvement. Special educational efforts were carried forward and the usefulness of hospitals increased as far as possible within the funds provided. The health work now functions through a corps of 150 physicians—regular and contract—81 nurses, and 70 field matrons. The nurses as a rule give their time to the hospitals and assist the physicians in dispensary clinics, while the latter also visit Indian homes. Field matrons are to our service what the public-health nurses are to the State and county health organizations. A good field matron, or a field nurse, is almost indispensable in the practice of preventive medicine.

The bureau operated 12 tuberculosis hospitals, 31 school hospitals, 10 agency hospitals, 27 general hospitals, and 1 nervous and mental disease hospital, with a total bed capacity of 2,411. There is at present no legislative provision for their repair and improvement other than the funds appropriated for their support, which are insufficient for proper maintenance. It has been impossible with the current appropriations to consider opening new hospital units. There is a need for at least two, one for general purposes located in the Middle West, with adequate facilities and personnel for handling all classes of cases, except possibly nervous and mental diseases, and fully equipped as a training school for nurses, so that Indian girls may have facilities for completing the vocational or preparatory work

started in the schools. The other should be an institution located in the Southwest for the care of advanced cases of pulmonary and other forms of tuberculosis which, in addition to providing comfort to these cases in their last illness, would also be a medium of protecting other members of the family from constant contact with the contagion.

Aside from individual funds which may be applied in a limited number of cases, and tribal funds where available, there are practically no sanitary improvement funds. The appropriation, "Relieving distress and prevention of diseases among Indians," is not directly applicable for the betterment of living conditions. The older Indians, generally speaking, know little of the evils of poor ventilation, of the dangers of overcrowding, or of the way in which disease is transmitted; in other words, their health habits are bad. In white communities the customs of polite society require certain standards of personal cleanliness and freedom from the apparent signs of disease. On Indian reservations and in Indian communities the absence of such conventional standards makes it difficult to secure sanitary progress. The Indian Service has its problems of child welfare, of the care of aged, indigent poor and the physically and mentally incapacitated, and the obligations to aid and alleviate rest not only measurably upon every field employee but very heavily upon the medical service intrusted with the prevention and treatment of disease over a large territory, much of which is not provided with good roads. In view, therefore, of the great importance of Indian health work, the high qualifications necessary, the arduous duties, difficulties of travel, and frequently isolated living conditions, I can not too strongly urge the just and immediate necessity for increasing the salaries of the medical personnel to equal those of other Government departments.

**RED CROSS COOPERATION.**—I am deeply interested in making greater gains in all health progress by a general elevation of Indian home life and social standards and am glad to announce that a plan of cooperation has recently been effected with the executive committee of the Red Cross whereby they are furnishing, at the society's expense, the services of three full-time visiting nurses for Indian Service work. Under this fortunate arrangement important assignments were promptly selected where the service of these nurses could be rendered to meet urgent needs. Excellent results are anticipated through this commendable action of the American Red Cross, for which I desire to express sincere appreciation. It is the intention to have these trained workers of varied experience closely study living conditions in Indian homes with a view to applying methods that will be of practical value to our health activities, and by suggestion indicate wherein they may be more effectively organized or enlarged. Their survey will enter somewhat the realm of social service and domestic welfare for the purpose of cooperating with our body of field matrons, whose duties bring them in intimate relation to household conditions and whose work is worthy of every assistance that may flow from experience in other fields of like service. If the results are as contemplated I shall earnestly seek such provisions as are now lacking to accomplish a higher average of Indian health.

## FARMING.

**GENERAL.**—The service industries show a substantial increase in the number of Indians farming and in the total cultivated acreage. There has also been consistent progress along the lines of better and more intensive farming and the use of modern agricultural machinery.

**EXPERIMENTATION.**—The most important station for this work is at Sacaton, on the Pima Reservation, in Arizona, operated under a cooperative agreement with the Bureau of Plant Industry of the Department of Agriculture. Many useful plants have been developed at this station, notably a long-staple Egyptian cotton, now grown extensively by both Indians and whites in that section, also promising results of tests made with Peruvian alfalfa, Mexican June corn, Bermuda onions, fruits, nuts (particularly the pecan), trees, and forage plants.

**DATE GARDEN.**—A small tract of land has been set aside on the Martinez Reservation, Calif., for use as a date garden; also in cooperation with the Bureau of Plant Industry. This section is well adapted to the production of dates. Offshoots will be furnished Indians free, and it is expected that the industry will be developed to such an extent as to contribute materially to their self-support and progress.

**COOPERATIVE EXTENSION WORK.**—This service has continued to avail itself of the cooperative extension work of the Department of Agriculture and the various State colleges with good results. In many cases the county agents make no distinction between whites and Indians in their work. Boys' and girls' clubs have been organized on several reservations. Experts from the State college frequently visit the reservations and schools and give illustrated lectures on topics of interest.

**AGRICULTURAL FAIRS.**—Agricultural fairs were held on many of the reservations, where the Indians displayed their products in competition with each other, suitable prizes being given for the best exhibits. The Indians also won many premiums in open competition at county and State fairs.

## STOCK RAISING.

There was comparatively little change in live-stock conditions during the year, but there is every prospect of a general improvement. The value of the Indians' live stock is considerably less than several years ago, due to lower market prices, but their interests are more satisfactory than those of many other owners, and the improvement in the grade of their stock has more than offset any decrease in the number of animals owned.

Probably nothing has contributed so largely to the welfare and progress of the Indians of the Southwest as the development of the sheep industry. The Indians are furnished pure-bred rams at a nominal price from a herd maintained on the Jicarilla Reservation, N. Mex. About 500 of these rams were supplied the Indians of the Navajo Reservations during the past year. The Indians also procure first-class acclimated animals from the tribal herds on the easy-payment plan.

Indians owning stock are encouraged to form stock-growers' associations, which will largely supervise and handle their live-stock matters. Such associations, with constitutions and by-laws, have already been formed by the Indians of the Fort Hall and Western Shoshone Reservations. On the former the association has assumed responsibility for the repayment of reimbursable funds advanced for the purchase of bulls. The adoption of this plan on other reservations will undoubtedly result in greater interest and progress of the Indians along these lines.

The eradication of dourine has been so successful as to justify a reduction of the force employed for that purpose.

### INDIAN ARTS AND CRAFTS.

GENERAL.—The original native industries of the Indians, with their beautiful and distinctive artistry, are being crowded out by the pressure of modern commercialism. The extinction of these industries would be most unfortunate, and I have thought for some time that we should give them special encouragement.

FEDERATION OF WOMEN'S CLUBS.—A favorable opportunity was presented by the request of the chairman of the committee on Indian welfare of the Federation of Women's Clubs to have an exhibit of Indian arts and crafts at their biennial convention at Chautauqua, N. Y., from June 20 to 30, with which I gladly complied. The exhibit consisted of Navajo rugs and silverware, beadwork, pottery, basketry, articles made by Indian pupils in Government schools, and various maps, charts, and photographs. The exhibit of this office was very successful and constituted one of the attractive features of the convention.

### REIMBURSABLE FUNDS.

A conservative expenditure of \$100,000 appropriated for encouraging industry and self-support among the Indians proved unequal to all the demands for help of this character. Consideration was given to the relative merits of the various requests. In some instances requests were denied because the repayment conditions could not be met, or it seemed best to encourage the Indians to obtain the articles with their own money, as the whites do. Requests from 12 reservations, amounting to approximately \$55,000, could not be granted. In addition to the appropriation, about \$100,000 were expended under the reimbursable regulations from money otherwise available—mostly tribal funds authorized by Congress. This plan has been a material factor in the industrial progress of the Indians during the past few years.

The first use of the reimbursable plan on an extensive scale was in 1911. A complete analysis of expenditures and repayments from 1911 to 1921 shows the following:

|                           |                       |
|---------------------------|-----------------------|
| Repaid (collections)----- | \$2, 400, 573. 02     |
| Outstanding-----          | 1, 455, 301. 94       |
| Losses charged off-----   | 22, 711. 68           |
| Property on hand-----     | 140, 816. 46          |
|                           | <hr/> 4, 019, 403. 10 |

## INDUSTRIAL SURVEY.

Last spring superintendents were directed to make an industrial survey of their entire reservations by visiting the homes of the Indians accompanied by the farmer, field matron, and physician, to ascertain their condition, needs, and resources, with the view to organizing the work of the reservation service so that each family will make the best use of its resources. This survey was the initial step in a campaign for improved homes and surroundings; more intensive farming of areas already in cultivation; increase in the acreage farmed where practicable, with resultant reduction of leasing; proper care of domestic live stock, and one or more milch cows for each family; the extension of the range stock industry, with pigs and poultry on every Indian farm.

Preliminary replies have been received from 100 superintendents outlining their plans for the work, and 30 have submitted final reports of the original survey. The reports consist of a separate sheet for each family, with photograph in many cases, and detailed information relative to each family's industrial and economic status and resources.

It is the intention of the office to make the industrial survey the basis of a more comprehensive survey of each reservation, which will embrace on one hand the needs along the lines of health, education, home building, sanitation, and social welfare, and on the other hand will take in all the resources of the Indians, both tribal and individual. The purpose of the survey is to formulate for each reservation a definite program or policy which may be followed for such term of years as will place the Indians on a self-supporting basis. It is believed that a program can be outlined in each case so reasonable and businesslike that succeeding administrations will follow it without material change, thus giving stability to the work and a clear hope of eventual success.

The personal visits of the superintendents and other employees to the homes of the Indians have brought about a closer understanding between them, which can not fail to be productive of good results. The plan has already developed large increases in the cultivated acreages, and in better crops, gardens, and homes.

## INDIAN HOMES.

During the past year special efforts have been made with a view to improving the home and living conditions among the Indians. It is realized that substantial progress is being made along these important lines. However, the radical changes necessary in bringing a people's ancient mode of habitation, originally based on the simplest idea of construction without modern materials or tools, to our present standard of constructional advancement must of necessity be a slow process.

Progress along these lines is necessarily dependent upon a general change from the early tribal customs and language to a standard similar to our own. This particular phase of the work is to receive special emphasis during the coming year, and the importance of improving home and living conditions and how to attain them will be a feature of Indian school work.

In addition to the educational work it is planned that field officials shall frequently visit the homes of the Indians under their jurisdiction and give them such practical instruction and assistance as is possible.

### BLACKFEET RESERVATION.

One of the outstanding accomplishments of the year was on the Blackfeet Reservation, Mont. The Indians of this reservation had reached a very low industrial and economic status, which made it necessary during the winter of 1920-21 to issue free rations to over 2,000, or about two-thirds of the entire population. A systematic program was inaugurated, having in view the industrial rehabilitation of the Indians. Every Indian family in the Heart Butte district, where most of the full bloods reside, had a garden last spring, and 90 per cent of the Indians residing on their allotments over the reservation generally engaged in small farming activities. Last winter free rations were issued to only 1,250 Indians. Seed and machinery were provided; a sawmill and flour mill were erected; and the entire reservation organized into an industrial association, with community chapters in each district.

The Fourth of July celebration, which formerly lasted 10 days, to the detriment of the Indians' farm and industrial interests, was voluntarily abandoned by the Indians themselves this year, in place of which they had a one-day celebration on the Fourth of July similar to the whites. It is the intention to provide each Indian with sufficient wire to fence his allotment, and furnish poultry, milch cows, sheep, and pigs as rapidly as the Indians show willingness and ability to care for them.

### INDIAN EMPLOYMENT.

The self-support of many Indians working at home is a vital economic factor. They supply stores and tourists with useful and esthetic specimens of aboriginal art, such as pottery, rugs, and silverware, beadwork, basketry, etc.; they fish, hunt, and gather medicinal plants, fruits, and nuts which sell readily. The piñon nut, wild rice, and the maple sugar crops realized hundreds of thousands of dollars last year. Indians work in shops, families, schools, and hospitals, and as laborers on farms, public highways, in mines, irrigation ditches, and are in the air, land, and naval forces of their country. Railroads employ them for scenic advertising and as laborers. Film corporations engage them for picturization. Indian students earn thousands of dollars during vacation in beet fields, orchards, and other outing employment.

Indians of broader contact with life are acquiring vital relationship with the business interests of communities and are found in about every line of self-supporting activity followed by people of other races.

### LEASING OF TRIBAL LANDS.

On many of the reservations where there is surplus land not utilized by the Indians it is rented to outside parties for farming or grazing, but chiefly for the latter purpose. A large revenue is thus derived to the credit of the tribe and used under congress-

sional authorization to support necessary reservation activities, or in some cases paid to the Indians on a per capita basis. Tribal leases or permits now in effect on 44 reservations number approximately 470. The rentals are charged either on a per acre or per head basis, at a rate which will be fair to the Indians and equitable to the stockman.

### ROADS AND BRIDGES.

**MYTON, UTAH, BRIDGE.**—Under authority of a provision in the Indian appropriation act for the fiscal year 1922 the bridge across the Duchesne River near the town of Myton, Utah, constructed from an appropriation made by the act of August 5, 1909, was turned over to the State, which agreed to maintain and repair it at all times in the future without expense to the United States.

**COOPERATIVE ROAD WORK.**—Section 3 of the act of November 11, 1921, known as the "Federal highway act," provides in part as follows:

The Secretary of Agriculture is authorized to cooperate with the State highway departments, and with the Department of the Interior in the construction of public highways within Indian reservations, and to pay the amount assumed therefor from the funds allotted or apportioned under this act to the State wherein the reservation is located.

Interpreting this provision, the Comptroller General held, in effect, that, should the State agree, and comply with the other provisions of the act, the entire cost of that portion of any public highway across an Indian reservation may be paid from Government funds apportioned under the act to the State within which the reservation is located, no contribution being necessary by the State for the construction of that part of the road; however, the State must make provision for upkeep and repairs, as in other cases. It is expected that this will result in a great impetus to the construction of badly needed highways across Indian reservations.

### SEGREGATION OF TRIBAL FUNDS.

Under the acts of May 25, 1918, and June 30, 1919, the funds of the following tribes were segregated and paid to the Indians on final rolls: Cheyenne and Arapaho, Oklahoma, \$406,611.86; Spokane, Wash., \$28,160; Yankton, S. Dak., \$103,611.87. In addition the rolls of the following tribes were closed during the year, but the funds have not yet been distributed: Fort Hall, Idaho; Apache, Kiowa, and Comanche, Oklahoma; Pawnee and Ponca, Oklahoma; Rosebud, South Dakota.

### IRRIGATION.

Water is the most important factor in crop production anywhere. All vegetables contain more water than anything else, but very much less than is required to produce a good crop; consequently, in the arid sections engineering skill has supplied the lack of rainfall, making possible successful production in areas that were formerly barren waste.

The extent to which large areas of land have been reclaimed by irrigation methods on Indian reservations in the West and South-

west is not widely known. There are now fifty Indian reservations on which have been developed irrigation systems. The aggregate irrigable area on these reservations approximates 605,000 acres. Construction work on many of the projects which are yet incomplete is being carried on from year to year by appropriations from Congress so that greater areas may be reclaimed, thus enhancing the value of the Indian's lands and at the same time increasing the crops of the country.

A dam across the Gila River for the diversion of its natural flow was completed during the past year, and on May 10 was formally dedicated as the Ashurst-Hayden diversion dam. This entire project embraces 35,000 acres of land within the Gila River Indian Reservation and 27,000 acres in white ownership in the Florence-Casa Grande Valley. The cost of construction was \$250,000.

A diversion dam across the Big Horn River on the Crow Indian Reservation, Mont., was also completed at a cost of \$132,000.

There is now under construction a diversion dam with bridge superstructure across the Gila River on the Gila River Indian Reservation near Sacaton, Ariz., which will, no doubt, be completed this year.

On June 24, 1922, a draft of a proposed contract with the Salt River Valley Water Users' Association was approved which, if executed, will provide means of augmenting the present water supply of the Salt River Indians. The question of obtaining more water for these Indians has been under consideration for some time, and the present prospects of obtaining a much needed additional supply are very gratifying.

On June 27, 1922, an agreement was approved with the South Tule Independent Ditch Co., of Porterville, Calif., providing for the equitable distribution of the waters of the Tule River that adequately protects the Indian's rights, which brings to an amicable close a long-standing dispute.

An agreement was also reached with the Southern Sierras Ditch Co. wherein adequate provision was made for the protection of the water rights of certain Indians along Birch Creek, Inyo County, Calif.

A suit started several years ago for the purpose of determining the water rights of the Indians on the Uintah Reservation, Utah, will probably be satisfactorily settled out of court in the near future. Copies of proposed decree and court order protecting the Indians' rights have, in the main, been agreed upon and as soon as the State engineer's office has issued certificates of water rights on proof submitted, such certificates will be submitted to the court as a basis for the final decree.

#### ALLOTMENTS.

During the year, 5,774 allotments were made and approved to individual Indians embracing lands on various reservations covering approximately 694,000 acres, of which 4,301, comprising 554,613 acres were in the Blackfeet Reservation, Mont., 920 with an area of 123,457 acres in the Flathead Reservation, Mont., 374 including 2,777 acres in the Hoopa Valley Reservation, Calif., and the re-

mainder in different reservations of Arizona, California, Minnesota, Montana, Nevada, Oregon, South Dakota, Washington, and Wisconsin.

In addition to the foregoing, schedules are pending for 169 irrigable allotments aggregating 845 acres to Indians of the Salt River Reservation, Ariz., 214 allotments, from 10 to 40 acres each, to Indians of the Torres and Martinez Reservations in California, with like work in progress on other Mission reservations in California, and a tract of 285 acres on the Crow Reservation, Mont. Allotment work is also progressing in the Fort Peck Reservation, Mont., on land classified as coal, with coal deposits to be reserved to the United States, and on irrigable lands to children, thus entitled under the act of August 1, 1914, to the extent of approximately 1,000 acres. The work of classifying and allotting lands to about 1,150 Indians in the Fort Belknap Reservation, Mont., under the act of March 3, 1921, is also going forward.

**PUBLIC DOMAIN ALLOTMENTS.**—Under the act of February 8, 1887, as amended, 296 allotments were made and approved on land on the public domain in various States, comprising an area of approximately 45,100 acres. Two amendments were made to the regulations governing allotments on the public domain, both pertaining to allotment applications of deceased Indians.

**APPRAISEMENT AND REAPPRAISEMENT OF SURPLUS RESERVATION LANDS.**—During the year many applications for appraisement and reappraisement of surplus reservation areas, subject to homestead disposition, were made under authority of the act of June 6, 1912, 2 of which were disallowed, 10 approved, and the remainder await action and report from the field.

**OMAHA RESERVATION TRIBAL LANDS.**—During the year a considerable number of applications for the exchange of lands because of the erosion of allotments by the Missouri River were approved under the provisions of the act of May 11, 1912, pertaining to the reservation of tribal lands. Most of these applications for exchange had been pending since 1912, awaiting the final decision in the case of Hiram Chase, jr., and others, mentioned in my last annual report. A plan for future disposition of the remaining tribal lands is now under consideration by this office and the tribal council.

### SALES AND REMOVAL OF RESTRICTIONS.

The regulations governing the sale of allotted and inherited Indian lands and the issuance of patents in fee and certificates of competency have been modified and revised in many particulars, and as approved bring the practice in these cases more in conformity with transactions between white citizens, particularly in enabling purchasers of Indian lands on the deferred payment plan to assign their interests.

A stricter policy has been followed in issuing patents to Indians on the ground of competency, as seemed to be required in order to more fully protect their interests.

Several prosecutions under section 5 of the act of June 25, 1910, for the recovery of lands illegally conveyed and the abatement of taxes illegally levied have been conducted to a successful issue.

In many instances it has been found necessary, on account of the general financial stringency, to extend the time of deferred payments

on Indian lands with the consent of the Indians interested. It is believed that improved conditions will obviate the necessity for this course during the coming year. Last year 1,006 original and inherited allotments embracing 104,814 acres were sold for \$2 232 833. There were received 1,306 applications for patents, of which 395 were denied and 911 approved, covering 98,406 acres. There were 186 certificates of competency issued on 48,423 acres, and 29 removals of restrictions on 1,661 acres.

### FARMING AND GRAZING LEASE REGULATIONS.

Arrangements have recently been made with the Department of Justice whereby superintendents in charge of Indian reservations are authorized to submit directly to the proper United States district attorney with full report cases of failure of lessees to pay rentals, with recommendation that suit be instituted to collect same. This has eliminated a great amount of routine correspondence heretofore necessary under the practice requiring superintendents to report these cases to this office, after which they were referred to the office of the Secretary and then to the Department of Justice.

By recent decision of the United States District Court, District of Nebraska, Omaha Division, in the case of *United States v. The Bank of Winnebago*, it was held, in effect, that a lien on crops not planted would not take precedence over a subsequent mortgage given by the lessee on such crops and that the Government could not therefore enforce the lien clause contained in farming and grazing leases as against the mortgagee of such crops. This decision resulted in amending the leasing regulations so as to require all farming and grazing leases to be recorded in the local recorder's office and also in some States to require the lessees to give notes secured by mortgages given on their crops as soon as planted.

### RIGHTS OF WAY.

**HIGHWAYS.**—Permission under the act of March 3, 1901, has been granted for the opening of over 200 miles of public highways, not including roads opened in the States of Nebraska and Montana under the act of March 4, 1915, full authority to approve maps of location filed thereunder having been placed in the hands of the several superintendents as contemplated by the act.

**RAILROADS.**—On November 22, 1921, permission to proceed with the construction of a line of railroad from Hardin to the Soap Creek oil field, Crow Reservation, Mont., was granted to the Chicago, Burlington & Quincy Railroad Co. When this line is completed the Soap Creek oil field will be afforded the transportation facilities so necessary to its early development.

**POWER PROJECTS.**—Under the Federal water power act of June 10, 1920, as amended by the act of March 3, 1921, a grant was made to the Wisconsin-Minnesota Power & Light Co. involving the flowage of approximately 300 acres of tribal land within the Lac Courte Oreille Indian Reservation, Wis. At a hearing and council held at Reserve, the tribe expressed opposition to the project upon any terms or conditions whatever. However, the benefits which would result to the public from the equalization of the stream flow of the Chip-

pewa River, as proposed by the company, were so evident and considerable as to outweigh the objections of the tribe and accordingly license was issued to the company on August 8, 1921. A yearly rental of \$1,200 in addition to the stocking of the reservoir with muskalonge, pike, and bass, and other beneficial conditions were secured for the Indians.

### CLAIMS OF THE INDIANS OF CALIFORNIA.

A hearing was held last April at which a number of delegates representing Indians of the State of California asked a modification of the previous adverse report on jurisdictional bills S. 2236 and H. R. 4383 to permit these Indians to have their claims against the Government heard by the Court of Claims.

At this hearing it was made clear that the previous adverse report would not be modified, as the department was unwilling to approve any bill that had for its purpose compensating Indians for the value of lands (about \$10,000,000) involved in the 18 treaties which were rejected by the Senate in 1852 by a unanimous vote.

It was also stated at this hearing that where Indians are without any tribal property and are indigent the Government should extend to them liberal aid in providing for their care and comfort and in securing to them the advantages of education and civilization, to the end that they may have homes and become self-supporting, useful citizens of the country; that a definite roll of these Indians should be made through the department showing their blood status, condition, and needs, with a view to legislation that would provide necessary relief; and that more liberal appropriations should be made for them than heretofore.

### EMPLOYMENT OF TRIBAL ATTORNEYS.

Under existing law, attorney's contracts were last year approved for the following tribes: Kiowa, Comanche, and Apache, in Oklahoma; Bannock and Shoshone, in Idaho; Blackfeet and Gros Ventre, in Montana; Sisseton and Wahpeton Sioux, in North Dakota; Clallam, in Washington; and Santee and Flandreau Band, in South Dakota.

Several contracts not in accordance with law, and without proper sanction, were disapproved.

### CHIPPEWA INDIANS OF MINNESOTA.

The affairs of the Chippewa Indians of Minnesota received much attention during the year, and I personally visited the different agencies and met in council many of the members of the tribe for the purpose of gathering, as far as practicable, first-hand information upon the general situation.

In order to cover thoroughly the various interests involved it was decided to make a careful survey and an inquiry into all the different matters about which the Indians complain, and particularly with reference to the contention that they have never been compensated for the lands appropriated and now incorporated in what is known as the Minnesota National Forest, or for the timber left standing

thereon to promote reforestation, as authorized by the act of May 23, 1908.

The commission designated for this investigation will aim to secure accurate and full information, to be submitted for your consideration with a view to having any legislation to which the Indians may be entitled brought to the attention of Congress at its regular session in December of this year.

This bureau has for many years held that the State of Minnesota has no valid claim to the swamp lands on Indian reservations within the State as they existed on January 14, 1889, and has sought in various ways to prevent the patenting of such lands to the State, which prior to 1913 had covered approximately 152,364 acres. On June 22, 1922, the Department of Justice was requested to institute an original action in the Supreme Court of the United States to determine the respective rights of the Chippewa Indians and the State to these lands and to about 37,000 acres that remain unpatented.

#### LAND FOR HOMELESS INDIANS IN CALIFORNIA.

By the act of March 3, 1921 (41 Stat. L., 1234) an appropriation was made for the purchase of land for various small bands of Indians scattered throughout the State of California who are without means of obtaining a home or of earning adequate subsistence, and options recommended by this office on June 24, 1922, were approved for the purchase of six tracts of land totaling 289.61 acres in different sections of that State at a total cost of \$8,846.50, which exhausted the available balance of the appropriation for the fiscal year. These tracts were carefully selected by field officials of the Indian Service, and are deemed especially suitable for the object in view. The title to the land is retained by the Government.

#### FINAL ROLLS OF INDIAN TRIBES.

During the year final rolls of the following tribes were made and approved under the provisions of the act of June 30, 1919 (41 Stat. L., 9), for the purpose of prorating the tribal trust funds:

Pawnee, Cheyenne and Arapahoe, Kiowa, Comanche, Apache, and Ponca, in Oklahoma; Rosebud Sioux, in South Dakota; Bannock and Shoshone, in Idaho.

#### TRIBAL CLAIMS.

Bills were introduced in the Sixty-seventh Congress proposing to authorize various tribes and bands of Indians to submit alleged claims against the Government to the Court of Claims for adjudication. Reports were made to the Committee on Indian Affairs of the Senate and House of Representatives on such bills relating to about 20 claims of this character.

#### FORESTRY.

Because of continued depression in the lumber market no large offering of timber was made during the first half of the year and the

logging operations on areas previously contracted were much below normal. To meet the urgent requests of allottees of the Quinaielt Reservation in Washington that they be permitted to realize funds from the timber on their allotments, a tract, designated on the Point Grenville logging unit, was offered and sealed bids received on March 30, 1922. This unit, comprising approximately 305,000,000 feet, was sold to the M. R. Smith Lumber & Shingle Co. Immediately after this sale another unit of 305,000,000 feet, designated as the Cook Creek logging unit, was offered. The market showed great improvement in the Grays Harbor region soon after the offering and a bid of \$4.35 per thousand for cedar, spruce, and Douglas fir was received.

In September, 1921, the logging operations of the J. S. Stearns Lumber Co. on the Bad River Reservation in Wisconsin were completed. From the commencement of logging operations in 1894 this company had cut from this one reservation 1,267,579,303 feet of timber, from which the Indians had received approximately \$7,000,000. A small amount of timber on this reservation sold to the Bell Lumber Co. has not yet been cut. During the year logging operations were conducted by contractors on the Lac Courte Oreille, Red Lake, Coeur d'Alene, Colville, Flathead, Spokane, Tulalip, Klamath, and Jicarilla Reservations and the Indian Service manufactured at the Menominee Indian mills in Wisconsin about 15,000,000 feet of lumber.

The losses from forest fires during the year ending June 30, 1922, were very small. Recent months have witnessed a renewal of logging activities on several reservations. An early recovery of the lumber market seems now assured and preparations are being made for the consummation of timber sales on reservations occupied by Indians needing funds for industrial development.

### SUPPRESSION OF LIQUOR TRAFFIC.

Since the coming of national prohibition the Indians do not obtain intoxicating liquors as easily as heretofore and the results have been very beneficial to them. The Indians are doing better work, crime has decreased, and progress is evidenced by increased industrial activities. The liquor problem among the Indians now involves the illegal manufacture of dangerous and poisonous concoctions which are demoralizing and injurious to health. The protection of the Indians from intoxicants is now largely a problem distinct from national prohibition and is in need of special and direct attention from the Indian Service. The appropriations by Congress for suppressing the liquor traffic among Indians have been materially reduced each year, diminishing from \$150,000 in 1919 to \$35,000 for the past year. Such special officers and facilities as can be provided from the appropriation are distributed in localities where most needed. The prosecutions are principally against bootleggers and persons operating moonshine stills. Wherever possible the enforcement officers work and cooperate with the local and State officials, which has proven to be very successful. Many preparations ordinarily intended for medicinal purposes but containing a large percentage of alcohol are offered to Indians at enormous profits. Many illicit stills have been raided and the operators vigorously prosecuted in an effort to protect the Indians from the evils of the illicit traffic in intoxicants.

### PEYOTE.

In my judgment legislation is urgently needed to control the growing and harmful habit among the Indians of using peyote. Scientific investigation of the nature of this narcotic drug shows conclusively its dangerous effects. Some of the Indians profess to use peyote as a medicine for nearly all diseases, while others claim it is an ancient Indian sacrament in their worship. But medical scientists say that peyote has no medicinal value and if habitually used results in the derangement of both mental and physical structure. Its defense as a religious rite is largely fictitious, the promoters of its use having seized upon this idea in an attempt to prevent or delay prohibiting legislation. On a number of Indian reservations the use of peyote is not known; on others its introduction has been very recent, and on some it is becoming an insidious and alarming curse.

Since the matter of prohibitory or regulating legislation has been before Congress a number of times without enactment, the Indian Bureau has not sought strict regulations in restraint of this evil under the general powers vested in the department, but has recently issued a pamphlet on peyote containing much information compiled from the office files and other scientific sources for the purpose of aiding a fair and unprejudiced understanding of the subject, and a limited number of copies will be available to those interested in the improvement of social welfare generally, and especially among the Indians.

### INDIAN CUSTOM MARRIAGE AND DIVORCE.

I think it not untimely to suggest the need of legislation subjecting all Indians to the laws of civilization respecting their marital relations. Indian Service officers and employees, missionaries, and others have been teaching for many years the enlightened moral standards for this phase of social well-being and, as compared with 10 years ago, gratifying progress has been made. But there is still too much disregard of the sacred principle upon which conjugal happiness and the dignity of family life depend to be passed by without the correction for which there is lacking adequate court jurisdiction.

The vicious practice of Indian custom marriage and separation is deplorable enough when followed by those of no education above the teachings of tribal tradition, but it is intolerable on the part of Indians who know better and have benefited by the uplift of conditions that rest upon a higher social order. The tribal courts, or court of Indian offenses, are not sufficient to deal successfully with the loose marital relations of barbaric origin and there should be some means provided for invoking State law more effectively than now exists, or otherwise requiring the decency which must be at the heart of all family life before we can have the right beginning of progress toward civilization.

## PENSIONS FOR INDIAN SCOUTS.

Under the act of March 4, 1917, provisions are made for pensioning Indians who were enlisted in the military service of the United States as scouts, etc., and rendered service in Indian wars specified in that act. Indians who have claims for pensions thereunder are given assistance in the preparation of their claims by the superintendents of the different agencies and the Indian Office, and in the past year nearly 100 Indian scouts were awarded pensions on account of their services, while many others have claims pending or in the course of preparation.

## FIVE CIVILIZED TRIBES.

The only unfinished business of the Creek and Seminole Nations involves the disposition of tribal property for the former, worth approximately \$197,475, and like property for the latter valued at \$30,100, all allotment work having been heretofore completed and the citizens of both nations paid their prorata shares of tribal funds. The Cherokee tribal affairs were entirely closed some years ago, and there remain to be disposed of only the extensive tribal holdings of the Choctaw and Chickasaw Nations, estimated at about \$13,500,000, and involving the sale of land and mineral deposits, the collection of deferred payments on previous sales, and the payment of accumulating tribal funds to individual members.

There are now approximately 17,900 persons of one-half or more Indian blood from all of whose land restrictions have not been removed, and the individual affairs of this restricted class, covering large and varied interests, educational, agricultural, mineral, and home building, must be carefully administered with a view to hastening the competency of the Indians to manage for themselves, since under existing law the restricted period, as applicable to members of the Five Civilized Tribes, will expire in less than nine years.

Last year restriction against alienation of allotments was removed from 509 Indians, and restrictions were conditionally removed from 231 tracts of land sold under supervision by the Government, which covered also use of the proceeds thereof. Individual Indian money in the sum of \$2,334,220.06 was expended for maintenance, farms, buildings, live stock, and equipments; 142 houses and 28 barns were built; 88 wells constructed; 233 wagons, 416 horses and mules, 178 cattle, and 323 hogs were purchased.

Splendid records were made by Indian farmers who exhibited their products at county, district, and State fairs with the most progressive white farmers.

A large enrollment of Indian children was reported in the public schools, but this was mainly outside the restricted class, for whom the continuation of tribal boarding schools will be necessary for some time to come.

**OIL AND GAS IN THE FIVE CIVILIZED TRIBES.**—During the year 130,415.41 acres were leased for oil and gas mining purposes. The

total revenue derived from oil and gas leases by restricted Indians is classified as follows:

|                                    |                 |
|------------------------------------|-----------------|
| Bonuses.....                       | \$689, 126. 41  |
| Casinghead gas collections.....    | 108, 423. 13    |
| Royalties on production.....       | 2, 247, 738. 78 |
| Advance royalties and rentals..... | 852, 331. 00    |
| Total .....                        | 3, 897, 619. 32 |

A total of 333 wells were drilled on departmental leases, 210 of which produced oil, 38 produced gas, and 85 were dry holes. The initial production of the oil wells ran from 20 to 4,000 barrels daily and the approximate initial production of the gas wells was from 1,000,000 to 20,000,000 cubic feet per day. The gross oil production for the year was 8,181,971.56 barrels.

On June 12, 1922, the Solicitor for the Interior Department rendered an opinion to the effect that extensions of oil and gas leases on lands of minor and incompetent members of the Five Civilized Tribes, which extensions were made in accordance with rules and regulations prescribed by the Secretary of the Interior, are valid, although not advertised in conformity with rules laid down by the Supreme Court of the State of Oklahoma, his opinion being based on the provisions of the act of May 27, 1908 (35 Stat. L., 312).

On July 30, 1921, the regulations governing the utilization of casinghead gas produced from oil wells were amended so as to adopt the actual selling price of gasoline as the basis on which to compute the royalty due the Indians.

#### OIL AND GAS OUTSIDE THE FIVE CIVILIZED TRIBES.

At the close of the fiscal year 1921 the market price of oil had fallen to \$1 a barrel, the lowest quotation since August 26, 1916. Improved conditions are indicated by the later advance to \$2 a barrel and the fancy prices paid by large oil companies for good acreage when available.

The question of what constitutes the highest posted market price of crude oil in the mid-continent field has been the subject of controversy for a number of years and on February 16, 1922, the department reached the following conclusions:

1. The term "mid-continent oil field" shall be construed to mean the territory embraced in that field at the time the lease form and regulations were adopted, namely, the States of Oklahoma and Kansas, and not the present mid-continent oil field which takes in producing territory in Texas, Arkansas, and Louisiana.

2. The term "highest posted market price in the mid-continent oil field" shall be construed as the highest price posted by a purchasing company taking a substantial portion of the oil in the territory it is serving in Oklahoma or Kansas as distinguished from the company taking its oil mainly from companies with which it is affiliated and from leases producing a certain grade of oil or which purchases only a small portion of the oil in the territory it is serving.

The abrogation on July 20, 1921, of the 9,600-acre rule as applied to Indian reservations in Oklahoma, exclusive of the Five Civilized Tribes, Osage Nation, and Kiowa Reservation, enabled all lessees

holding maximum acreage to obtain additional leases in undeveloped territory, resulting not only in the development of land in unproven fields but an increase in the revenue of the Indians as well.

On June 19, 1922, a well was completed in the Otoe field in Oklahoma which produced about 300 barrels of oil a day and from four to five million cubic feet of gas. This is the first oil from the Otoe field, although gas in commercial quantities has been produced since 1915.

Oil development on the ceded portion of the Shoshone Indian Reservation, Wyo., is satisfactory, considering the lack of transportation and pipe-line facilities. Five new wells were completed in township 6 north, range 2 west. The production in this field has now reached proportions that will probably justify pipe-line construction this summer, which means a market for oil and immediate expansion of the field.

Two oil and gas wells are being drilled on restricted Indian land on the Blackfeet Reservation, Mont., under leases approved last year. The result will probably determine whether any more leases will be negotiated on that reservation.

There are now five producing oil wells on restricted Indian land in the Soap Creek field, Crow Reservation, Mont., with an estimated production of from 2,000 to 3,000 barrels a day for some years. Enough leases have been approved in several sections of the reservation to insure the testing of the various structures, but drilling operations on many of the leases have been delayed by lack of transportation and pipe-line facilities. Considerable trouble in the Soap Creek structure has come from infiltration of water, and a competent petroleum engineer has been detailed to investigate this condition in the field and take whatever steps are necessary to provide for protection against damage by water.

On the treaty part of the Navajo Reservation four leases of tribal land, each covering approximately 4,800 acres have been executed and approved, three of them being on the southern part of the reservation under the jurisdiction of the superintendent of the Navajo Agency, Fort Defiance, Ariz., and one in the north under the superintendent of the San Juan Agency, Shiprock, N. Mex. Test wells are now being drilled.

Two gas wells were brought in on tribal land of the Ute Mountain Indian Reservation in New Mexico adjacent to the Navajo Reservation, one producing approximately 2,000,000 cubic feet and the other producing approximately 36,000,000 cubic feet of gas per day.

On June 9, 1922, the Secretary of the Interior held that Executive-order reservations are subject to lease under the provisions of the oil-leasing act of February 25, 1920 (41 Stat. L., 437). Leases on such lands will be handled by the General Land Office.

**OSAGE RESERVATION.**—The outstanding feature on the Osage Reservation, Okla., has been the development of the Burbank field on the west side of the reservation. The limits of this field have not yet been determined and a number of large producing wells have been brought in yielding a high grade of oil. As a result, very large amounts of bonus have been offered for leases of tracts adjoining producing leases in this field, one tract containing 160 acres being

sold for a bonus of \$1,585,000, and several other tracts for more than \$1,000,000 each.

Three sales of Osage oil leases were held during the fiscal year and the number of acres sold and bonus received therefor are shown by the following tabulation:

| Date of sale.      | Acres sold. | Bonus per acre. | Total bonus. |
|--------------------|-------------|-----------------|--------------|
| Dec. 12, 1921..... | 35,825      | \$202.86        | \$7,267,600  |
| Mar. 2, 1922.....  | 33,467      | 118.02          | 3,949,950    |
| June 28, 1922..... | 32,900      | 330.94          | 10,887,950   |
| Total.....         | 102,192     | .....           | 22,105,500   |

Regulations to govern the settlement of damages to surface owners of their leases caused by mineral lessees in the Osage Reservation, as provided by the act of Congress approved March 3, 1921 (41 Stat., 1249), were approved October 20, 1921.

### METALLIFEROUS MINERALS.

Ten leases covering mining claims located on various Indian reservations under the provisions of section 26 of the act of June 30, 1919 (41 Stat., 31), as amended by the Indian appropriations act of March 3, 1921, authorizing mining for metalliferous minerals, including magnesite, gypsum, limestone, and asbestos, on unallotted lands of Indian reservations were approved during the year. A number of applications for lease covering principally asbestos deposits in the Fort Apache and San Carlos Reservations were also approved, although leases thereon have not been consummated.

### PROBATING ESTATES AND APPROVING WILLS OF DECEASED INDIANS.

Probating the trust estates of deceased Indians as well as passing upon their wills is important work requiring service trained in probate matters, both in the field and the office.

A graduated fee is charged for probating estates and approving wills, and these fees range from \$15 to \$50, depending on the appraised valuation of the estates of decedents.

During the year 3,164 heirship cases and 341 wills were disposed of.

Miscellaneous cases involving minor matters numbered 3,806.

Fifteen examiners of inheritance were employed in holding hearings on reservations and the public domain.

Fees aggregating \$80,840 were earned under authority of the act of February 14, 1920, which are covered into the Treasury of the United States and to that extent offset the \$100,000 annually appropriated for this work.

### PROBATE WORK IN EASTERN OKLAHOMA.

A very important probate business is conducted in that part of Oklahoma which was formerly the Indian Territory, where it is necessary to see that the property of deceased restricted and de-

TABLE 7.—*General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1915—Continued.*

(See Pres. proc. May 20, 1891, vol. 27, p. 979.) 229,634.91 acres allotted to 1,379 Indians (see letter book 445, p. 311). Under acts of Mar. 1, 1907 (34 Stat. L., 1042), and June 1, 1910 (36 Stat. L., 455), 532 allotments, aggregating 35,687 acres, were approved Aug. 15, 1910, and 579 allotments, aggregating 112,544 acres, were approved Apr. 5, 1912. (See 61502-1910, proclamation June 29, 1911 (40 L. D., 151), 227,504 acres open; see H. J. Res. Apr. 3, 1912 (37 Stat. L., 631), and proclamation of Sept. 17, 1915, opening surface of lands classified as coal to homestead entry, authorized by act of Aug. 3, 1914 (38 Stat. L., 681).   |
| Standing Rock.....<br>(Under Standing Rock School.)<br>Tribes: Blackfeet, Hunkpapa, Upper and Lower Yanktonai Sioux.           |                    | Treaty of Apr. 29, 1868, vol. 15, p. 635, and Executive orders Jan. 11-Mar. 14, 1875, and Nov. 28, 1876. Agreement ratified by act of Feb. 28, 1877, vol. 19, p. 254, and Executive orders Aug. 9, 1879, and Mar. 20, 1884 (1,520,640 acres in South Dakota); unratified agreement of Oct. 17, 1882. (For modification see sundry civil appropriation act approved Mar. 3, 1883, vol. 22, p. 624; for text see Misc. Indian Doc., vol. 14, p. 305.) Act of Congress of Apr. 30, 1888, vol. 25, p. 94, not accepted. Act of Congress, Mar. 2, 1889, vol. 25, p. 888. President's proclamation of Feb. 10, 1890, vol. 26, p. 1554. Under acts Mar. 2, 1889, supra, Mar. 1, 1907 (34 Stat. L., 1041), May 29, 1908 (35 Stat. L., 451-460), and Feb. 14, 1913 (37 Stat. L., 675), 4,714 Indians have been allotted 1,387,976 acres. Under President's proclamation of Aug. 19, 1909 (36 Stat. L., 2500), 1,061,500 acres were opened to settlement. Remainder of lands opened to settlement by proclamation Mar. 15, 1915, as authorized by act Feb. 14, 1913 (37 Stat. L., 675, 680). |
| Turtle Mountain.....<br>(Under Turtle Mountain Agency.)<br>Tribe: Pembina Chippewa.  |                    | Executive orders Dec. 21, 1882, Mar. 29 and June 3, 1884. Agreement made Oct. 2, 1892, amended by Indian appropriation act approved and ratified Apr. 21, 1904, vol. 33, p. 194. 43,820 acres allotted to 326 Indians and 186 acres reserved for church and school purposes under the above-named act. Allotments to 2,577 members of this band on public domain aggregating 370,704 acres have been approved.   |
| Total.....   | 100,000            |  |
| <b>OKLAHOMA.</b>   |                    |  |
| Apache.....<br>(Under Kiowa School.)   |                    | Formerly Fort Sill. (See Executive order Feb. 26, 1897.) Act Mar. 3, 1901 (31 Stat., 1173); act June 28, 1902 (32 Stat., 467). Ex. Doc. No. 117, 49th Cong., 2d sess., act Aug. 24, 1912 (37 Stat., 534); act June 30, 1913 (38 Stat., 92). Lands to be purchased for those members of this band, some 80 in number, who elected to remain in Oklahoma.  |
| Cherokee.....<br>(Under superintendent Five Civilized Tribes.)   | 1308               | Treaty with Western Cherokees at city of Washington, May 6, 1828 (7 Stat., 311), as amended by the treaty at Fort Gibson of Feb. 14, 1833 (7 Stat., 414); referred to in treaty with Cherokees at New Echota, Ga., Dec. 29, 1835 (7 Stat., 478); July 19, 1866 (14 Stat., 799), as supplemented by treaty of Apr. 27, 1868 (16 Stat., 727). Agreement of July 1, 1902 (32 Stat., 716). Approximately 41,824 Cherokees, including 4,919 freedmen, were allotted an average of 110 acres, 40 acres of which was a homestead to be nontaxable while held by the original allottee. Total acreage allotted, 4,346,203; sold, 50,905; unsold, 308.  |
| Cherokee Outlet.....   |                    | Agreement of Dec. 19, 1891; ratified sec. 10 by act of Mar. 3, 1893 (27 Stat., 640), unoccupied part of Cherokee Outlet, not included in Territory of Oklahoma (26 Stat., 81). 62 Indians allotted 4,949.45 acres under act of Mar. 3, 1893.   |

1 Surveyed.

tion from various sources, both individual and collective, animated, I am sure, by a desire to enlighten and elevate the spiritual elements of Indian life and character.

The federated endeavors of American women, now recognized as an admirable and effective instrumentality for the refinement of human aspirations and the strengthening of all worthy organization for social betterment, are full of kindly interest in our work.

The office has during the past year received friendly encouragement and helpful support from many organizations working for the welfare and advancement of the Indians, and an expression of appreciation is due for their valuable assistance.

I feel a peculiar obligation to the great body of Indian Service workers in the office and field, whose loyalty, industry, and, whenever necessary, a cheerful acceptance of hardship in the discharge of duty, indicate a high average of efficiency that is not adequately commended in a few words.

I wish in closing to acknowledge my appreciation of your helpful advice, your deep interest in the welfare of the Indians, and your hearty cooperation and support at all times.

Very respectfully,

CHAS. H. BURKE, *Commissioner*.

The SECRETARY OF THE INTERIOR.

TABLE 7.—General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1915—Continued.

| Name of reservation and tribe.   | Area (unallotted). | Date of treaty, law, or other authority establishing reserve.  |
|--|--------------------|--|
| OKLAHOMA—continued.  |                    |  |
| Kiowa and Comanche.<br>(Under Kiowa Agency.)<br>Tribes: Apache, Comanche, Delaware, and Kiowa. | Acres.             | Treaty of Oct. 21, 1867, vol. 15, pp. 581 and 589; agreement made Oct. 6, 1892; ratified by act of June 6, 1900, vol. 31, p. 676, ceding 2,488,893 acres, of which 445,000 acres have been allotted to 3,444 Indians; 11,972 acres reserved for agency, school, religious, and other purposes. The residue, 2,033,583 acres, opened to settlement (letter books 486, p. 440; 488, p. 478). President's proclamation of July 4, 1901, vol. 32, p. 1975; June 23, 1902, vol. 32, p. 2007; Sept. 4, 1902, vol. 32, p. 2026; and Mar. 29, 1904, vol. 33, p. 2340. Of the 480,000 acres grazing land set apart under act of June 6, 1900, 1,841.92 acres were reserved for town sites under act Mar. 20, 1906 (34 Stat. L., 801), 82,059.52 acres were allotted to 513 Indians under act of June 5, 1906 (34 Stat. L., 213), and 480 acres allotted to 3 Indians under act of June 5, as amended by act Mar. 1, 1907 (34 Stat. L., 1018). The General Land Office reports the sale and entry of approximately 401,465.92 acres under act of June 5, and of 21,251.75 acres under act of June 28, 1906, to June 30, 1911. (See 874C-1909.) (See 75344-1908.) Under act May 29, 1908 (35 Stat., 471), and act June 25, 1910 (36 Stat., 801), 20,498 acres allotted to 169 Indians. Sale of unused, unreserved lands, act Mar. 3, 1911 (36 Stat., 1069). Act Mar. 4, 1915, Department of Agriculture experiment station. Sale of school and agency reserves, act June 30, 1913 (38 Stat., 92). |
| Fort Sill Apaches.<br>(Under Kiowa School.)  |                    | Formerly prisoners of war, remnants and descendants of Chief Geronimo's Band, 6,149 acres of inherited Kiowa, Comanche, and Apache lands were purchased by the United States for allotment to 81 Indians and 3 whites of this band, who elected to remain in Oklahoma. (187 of the band removed to Mescalero. See Ann. Rept. 1913.) These lands were purchased under the acts of June 25, 1910 (36 Stat., 855), Aug. 24, 1912 (37 Stat., 534), appropriating \$200,000; June 30, 1913 (38 Stat., 94), appropriating \$100,000; and Aug. 1, 1914 (38 Stat., 587). See Executive order Feb. 26, 1897, act Mar. 3, 1901 (31 Stat., 1173); act June 28, 1902 (32 Stat., 467); Ex. Doc. No. 117, 49th Cong., 2d sess.   |
| Modoc.<br>(Under Seneca School.)<br>Tribe: Modoc.  |                    | Agreement with Eastern Shawnees made June 23, 1874 (see Ann. Rept. 1882, p. 271), and confirmed in Indian appropriation act approved Mar. 3, 1875, vol. 18, p. 447. Lands all allotted—3,966 acres allotted to 68 Indians, 8 acres reserved for church and cemetery purposes, 2 acres for school, and 24 acres for timber. (Letter book 220, p. 102.) Act Mar. 3, 1909. (35 Stat., 752.)   |
| Oakland.<br>(Under Ponca School.)<br>Tribes: Tonkawa and Lipan.                                |                    | Act of May 27, 1878, vol. 20, p. 84. (See Ann. Rept. for 1882, p. LXII.) (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 476.) (See deed from Nez Perce, May 22, 1885, vol. 6, Indian Deeds, p. 504.) 11,456 acres allotted to 73 Indians; 160.50 acres reserved for Government and school purposes. The residue, 79,276.60 acres, opened to settlement. (Letter book, 257, p. 240.) Agreement made Oct. 21, 1891, ratified by Indian appropriation act approved Mar. 3, 1893, vol. 27, p. 644. (For text, see Ann. Rept., 1893, p. 524.)   |
| Osage.<br>(Under Osage School.)<br>Tribes: Great and Little Osage.                             |                    | Article 16, Cherokee treaty of July 19, 1866, vol. 14, p. 804; order of Secretary of the Interior, Mar. 27, 1871; act of June 5, 1872, vol. 17, p. 228. (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 482.) (See act of June 28, 1906 (34 Stats., 539), act of Mar. 3, 1909 (35 Stats., 787), and Public Resolution No. 51, approved Feb. 28, 1909.) 2,230 Indians have been allotted 1,065,134.31 acres (3 selections). Since July 1, 1909, these 2,230 Indians have been allotted 1,465,350 acres from surplus lands, and 5,178.53 acres have been reserved for church, town-site, and railroad purposes. Act Mar. 3, 1909 (35 Stat., 778).   |
| Otoe.<br>(Under Otoe School.)<br>Tribes: Oto and Missouri.                                     |                    | Act of Mar. 3, 1881, vol. 21, p. 381; order of the Secretary of the Interior, June 25, 1881. (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 479.) Under acts of Feb. 8, 1887 (24 Stats., 388), Feb. 28, 1891 (26 Stats., 794), and Apr. 21, 1904 (33 Stats., 189), 128,251 acres were allotted to 514 Indians (885 allotments—see letter book 929, p. 326), 720 acres were reserved for agency, school, church, and cemetery purposes, and 640 acres set aside for tribal uses.  |

TABLE 7.—General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1915—Continued.

| Name of reservation and tribe.   | Area (unallotted). | Date of treaty, law, or other authority establishing reserve.   |
|--|--------------------|---|
| OKLAHOMA—continued.  |                    |   |
| Ottawa.....<br>(Under Seneca School.)<br>Tribe: Ottawa of<br>Blanchards Fork and<br>Roche de Boeuf.        | Acres.             | Treaty of Feb. 23, 1867, vol. 15, p. 513; 12,995 acres were allotted to 160 Indians; 557.95 acres were authorized to be sold by act of Mar. 3, 1891 (vol. 26, p. 989). The residue, 1,587.25 acres, sold. Letter book 229, p. 115, and act Mar. 3, 1909 (35 Stat., 752).  |
| Pawnee.....<br>(Under Pawnee School.)<br>Tribe: Pawnee.  |                    | Act of Apr. 10, 1876, vol. 19, p. 29. Of this, 230,014 acres are Cherokee and 53,006 acres are Creek lands. (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 470.) 112,701 acres allotted to 820 Indians; 840 acres were reserved for school, agency, and cemetery purposes; the residue, 169,320 acres, opened to settlement. (Letter books 261, p. 358, and 263, p. 5.) Agreement made Nov. 23, 1892, ratified by act of Mar. 3, 1893, vol. 27, p. 644. (For text see Ann. Rept., 1893, p. 526.)  |
| Peoria.....<br>(Under Seneca School.)<br>Tribes: Kaskaskia, Mi-<br>ami, Peoria, Pianka-<br>shaw, and Wea.  |                    | Treaty of Feb. 23, 1867, vol. 15, p. 513. 43,334 acres allotted to 218 Indians. The residue, 6,313.27 acres, sold under act of May 27, 1902 (32 Stats., 245).   |
| Ponca.....<br>(Under Ponca School.)<br>Tribe: Ponca.   | 1 387              | Acts of Aug. 15, 1876, vol. 19, p. 192; Mar. 3, 1877, vol. 19, p. 287; May 27, 1878, vol. 20, p. 76; and Mar. 3, 1881, vol. 21, p. 422. (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 473.) There have been allotted to 782 Indians 100,734 acres, and reserved for agency, school, mission, and cemetery purposes 523.66 acres, leaving unallotted and unreserved 387 acres. (Letter books 302, p. 311, and 813 p. 401.) Indian appropriation act approved Apr. 21, 1904, vol. 33, p. 217. (See 35067-1915.)  |
| Potawatomi.....<br>(Under Shawnee School.)<br>Tribes: Absentee Shaw-<br>nee and Potawatomi.                |                    | Treaty of Feb. 23, 1867, vol. 15, p. 531; act of May 23, 1872, vol. 17, p. 159. (222,716 acres are Creek ceded lands; 365,851 acres are Seminole lands.) Agreements with citizen Potawatomi June 25 and Absentee Shawnee June 26, 1860; ratified and confirmed in the Indian appropriation act of Mar. 3, 1891, vol. 26, pp. 1016-1021. 215,679.42 acres allotted to 1,489 Potawatomi, and 70,791.47 acres allotted to 563 Absentee Shawnees, and 510.63 acres reserved for Government purposes; the residue opened to settlement by the President's proclamation of Sept. 18, 1891, vol. 27, p. 989. (See letter book 222, pp. 442, 444, and Ann. Rept. for 1891, p. 677.) |
| Quapaw.....<br>(Under Seneca School.)<br>Tribe: Quapaw.  |                    | Treaties of May 13, 1833, vol. 7, p. 424, and of Feb. 23, 1867, vol. 15, p. 513. (56,245.21 acres allotted to 248 Indians, 400 acres reserved for school and 40 acres for church purposes. (Letter book 335, p. 326.) Agreement of Mar. 23, 1893, ratified in Indian appropriation act approved Mar. 2, 1895, vol. 28, p. 907. Agreement of Jan. 2, 1899, ratified in Indian appropriation act approved Mar. 3, 1901, vol. 31, p. 1067. Act of Mar. 3, 1903, vol. 32, p. 997.   |
| Sauk and Fox.....<br>(Under Sac and Fox<br>School.)<br>Tribes: Ottawa, Sauk and<br>Fox of the Mississippi. |                    | Treaty of Feb. 18, 1867, vol. 15, p. 495; agreement June 12, 1890; ratified by act of Feb. 13, 1891, vol. 26, p. 749. 87,683.46 acres allotted to 548 Indians, and 800 acres reserved for school and agency purposes; the residue opened to settlement by the President's proclamation Sept. 18, 1891, vol. 27, p. 989. (See letter book 222, p. 169, and Ann. Rept. for 1891, p. 377.)   |
| Seminole.....<br>(Under superintendent Five<br>Civilized Tribes, Muskogee,<br>Okla.)                       |                    | Treaties of Mar. 21, 1866, vol. 14, p. 755. (See Creek agreement of Feb. 14, 1881, Ann. Rept. 1882, p. 54, and deficiency act of Aug. 5, 1882, vol. 22, p. 265.) Agreement of Mar. 16, 1889. (See Indian appropriation act approved Mar. 2, 1889.) Agreement recorded in the treaty book, vol. 3, p. 35; agreement made Dec. 16, 1897, ratified by the act of July 1, 1898, vol. 30, p. 567; agreement of Oct. 7, 1899, ratified by act of June 2, 1900, vol. 31, p. 250. Approximately 3,127 Indians have been allotted 359,697 acres; sold, 4,223.74 acres.   |
| Seneca.....<br>(Under Seneca School.)<br>Tribe: Seneca.  |                    | Treaties of Feb. 28, 1831, vol. 7, p. 348; of Dec. 29, 1832, vol. 7, p. 411, and of Feb. 23, 1867, vol. 15, p. 513. 41,813 acres allotted to 435 Indians; 104.22 acres reserved for Government, church, and school purposes. Agreement of Dec. 2, 1901, ratified by act of May 27, 1902, vol. 32, p. 262.   |

(See act of June 15, 1880, ratifying the agreement of Mar. 6, 1880, vol. 21, p. 199.) 12,540 acres allotted to 83 Indians, remainder of reservation restored to public domain, act of June 7, 1897, vol. 30, p. 62. (Letter book 403, p. 115.) Joint resolution of June 19, 1902, vol. 32, p. 744.   |
| Total.....  | 306,880                    |   |
| <b>WASHINGTON.</b>  |                            |   |
| Chehalis.....<br>(Under Cushman School.)<br>Tribes: Chinook (Tsimuk), Clatsop, and Chehalis.  |                            | Order of the Secretary of the Interior, July 8, 1864; Executive order, Oct. 7, 1886. 471 acres set aside for school purposes. The residue, 3,753.63 acres, restored to the public domain for Indian homestead entry. 36 Indians made homestead selections, covering all the land. (See letter book 152, p. 201, and 153, p. 45.)  |
| Columbia.....<br>(Under Colville School.)<br>Tribe: Columbia (Moses band.)  |                            | Executive orders, Apr. 19, 1879, Mar. 6, 1880, and Feb. 23, 1883. (See Indian appropriation act of July 4, 1884, vol. 23, p. 79.) Agreement made July 7, 1883, ratified by act of July 4, 1884, vol. 23, p. 79. Executive order, May 1, 1886; Executive order of Mar. 9, 1894; department orders of Apr. 11, 1894, and Apr. 20, 1894, and Executive order of Jan. 19, 1895. 26,218 acres allotted to 35 Indians (see Executive order of May 21, 1886, and act of Mar. 8, 1906, 34 Stats., 55).  |
| Colville.....<br>(Under Colville Agency.)<br>Tribes: Coeur d'Alene, Colville, Kalispel, Okanagan, Lake, Methow, Nespelem, Pend d'Oreille, Sanpoil, and Spokane. | 1 1,297,009                | Executive orders, Apr. 9 and July 2, 1872; agreement made July 7, 1883, ratified by act of July 4, 1884, vol. 23, p. 79. Act of July 1, 1892, vol. 27, p. 62. (See acts of Feb. 20, 1896, vol. 29, p. 9, and July 1, 1898, vol. 30, p. 593.) 51,653 acres in north half allotted to 660 Indians (see letter book 428, p. 100); remainder of north half, estimated at 1,449,268 acres, opened to settlement Oct. 10, 1900 (see proclamation of the President, dated Apr. 10, 1900, 31 Stats., p. 1963). 240 acres have been reserved for town sites. The residue, 1,297,009 acres (estimated), unallotted. Act of Feb. 7, 1903, vol. 32, p. 803. Allotments to be made under act of Mar. 22, 1906 (34 Stat. L., 80), and act of June 25, 1910 (36 Stat., 863). Lands now being allotted. |
| Hoh River.....<br>(Under Neah Bay School.)<br>Tribe: Hoh.   | 640                        | Executive order, Sept. 11, 1893.  |
| Kalispel.....<br>(Under Coeur d'Alene Agency, Idaho.)   | 4,629                      | Executive order, Mar. 23, 1914.   |
| Klickitat.....<br>(Nonreservation; Roseburg, Oreg.)   |                            | 6 townships in Gilliam County, Wash., set aside for allotment selection by about 200 Indians under sec. 4, act Feb. 8, 1887 (24 Stat., 388), as amended. (See 80088-1912.)  |
| Lummi.....<br>(Under Tulalip School.)<br>Tribes: Dwamish, Etakum, Lummi, Snohomish, Sukwamish, and Swiawamish.  |                            | Treaty of Point Elliott, Jan. 22, 1855, vol. 12, p. 927; Executive order, Nov. 22, 1873. Allotted 12,560.94 acres to 109 Indians; school conducted on 2-acre tract purchased from John Martin.  |
| Makah.....<br>(Under Neah Bay School.)<br>Tribes: Makah and Quileute.   | 19,312                     | Treaty of Neah Bay, Jan. 31, 1855, vol. 12, p. 939; Executive orders, Oct. 26, 1872, Jan. 2 and Oct. 21, 1873. 3,727 acres allotted to 373 Indians. (See letter book 960, 228 and 37679 1907.)  |
| Muckleshoot.....<br>(Under Cushman School.)<br>Tribe: Muckleshoot.  |                            | Executive orders, Jan. 20, 1857, and Apr. 9, 1874. 44 Indians have been allotted 3,532.72 acres.  |

TABLE 7.—General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1915—Continued.

| Name of reservation and tribe.   | Area (unallotted). | Date of treaty, law, or other authority establishing reserve.  |
|--|--------------------|--|
| WASHINGTON—continued.  |                    |  |
| Nisqualli.<br>(Under Cushman School.)<br>Tribes: Muckleshoot, Nisqualli, Puyallup, Skwawksnamish, Stallakoom, and 5 others.      | Acres.             | Treaty of Medicine Creek, Dec. 26, 1854, vol. 10, p. 1132; Executive order, Jan. 20, 1857. Land all allotted. 4,718 acres to 30 Indians.   |
| Ozette.<br>(Under Neah Bay School.)<br>Tribe: Ozette.  | 640                | Executive order, Apr. 12, 1893.  |
| Port Madison.<br>(Under Tulalip School.)<br>Tribes: Dwamish, Etakmur, Lummi, Snohomish, Sukwamish, and Swiwamish.                | 1 65               | Treaty of Point Elliott, Jan. 22, 1855, vol. 12, p. 927; order of the Secretary of the Interior, Oct. 21, 1864. 7,219 acres allotted to 51 Indians; the residue, 65 acres, unallotted.   |
| Puyallup.<br>(Under Cushman School.)<br>Tribes: Muckleshoot, Nisqualli, Puyallup, Skwawksnamish, Stallakoom, and 5 others.       |                    | Treaty of Medicine Creek, Dec. 26, 1854, vol. 10, p. 1132; Executive orders, Jan. 20, 1857, and Sept. 6, 1873. 17,463 acres allotted to 167 Indians. Agreement made Nov. 21, 1876, ratified by act of Feb. 20, 1893, vol. 27, p. 464. (For text see annual report 1893, p. 518.) The residue, 599 acres laid out as an addition to the city of Tacoma, has been sold, with the exception of 39.79 acres reserved for school, and 19.43 acres for church and cemetery purposes, under acts of Mar. 3, 1893 (27 Stat., 633, June 7, 1897) (30 Stats., 62), and act of June 21, 1906 (34 Stats., 377).  |
| Quileute.<br>(Under Neah Bay School.)<br>Tribe: Quileute.  | 2 837              | Executive order, Feb. 19, 1889.  |
| Quinalt.<br>(Under Cushman School.)<br>Tribes: Quaitso and Quinalt.  | 1 158, 784         | Treaties of Olympia, July 1, 1855, and Jan. 25, 1856, vol. 12, p. 971; Executive order, Nov. 4, 1873. Under acts of Feb. 8, 1887 (24 Stats., 388), and Feb. 28, 1891 (26 Stats., 794), 600 Indians have been allotted 54,989.80 acres and 456.56 have been reserved for agency, lighthouse, and other purposes, leaving unallotted and unreserved 158,784 acres. Act Mar. 4, 1911 (36 Stat., 1545).  |
| Shoalwater.<br>(Under Cushman School.)<br>Tribes: Shoalwater and Chehalis.   | 1 335              | Executive order, Sept. 22, 1866, 55,535-7-1909.  |
| Skokomish.<br>(Under Cushman School.)<br>Tribes: Clallam, Skokomish, and Twana.  |                    | Treaty of Point No Point, Jan. 26, 1855, vol. 12, p. 933; Executive order, Feb. 25, 1874. Allotted in treaty reserve 4,990 acres; residue, none. (See L. B., 895, p. 268.) Allotted in Executive order addition, known as the Fisher addition, 814 acres; residue, none. (L. B., 895, p. 285.) 62 allotments.  |
| Snohomish or Tulalip.<br>(Under Tulalip School.)<br>Tribes: Dwamish, Etakmur, Lummi, Snohomish, Sukwamish, and Swiwamish.        | 1 324              | Treaty of Point Elliott, Jan. 22, 1855, vol. 12, p. 927; Executive order, Dec. 23, 1873. 22,166 acres allotted to 164 Indians.   |
| Spokane.<br>(Under Spokane Agency.)<br>Tribe: Spokane.   | 82, 647            | Executive order, Jan. 18, 1881. Agreement made Mar. 18, 1887, ratified by Indian appropriation act approved July 13, 1892, vol. 27, p. 139. (For text see Ann. Rept., 1892, p. 743.) Joint resolution of Congress of June 19, 1902, vol. 32, p. 744. Under act of May 29, 1908 (35 Stat. L., 458), approximately 626 Indians have been allotted 64,794 acres, and 1,247.30 acres set aside for church, school, agency, and town-site purposes. By proclamation of May 22, 1909, the President opened the surplus lands to settlement. 5,781 acres classified as agricultural land, 82,647.50 acres classified as timber reserved for tribal use. |
| Squaxon Island (Klahchemin).<br>(Under Cushman School.)<br>Tribes: Nisqualli, Puyallup, Skwawksnamish, Stallakoom, and 5 others. |                    | Treaty of Medicine Creek, Dec. 26, 1854, vol. 10, p. 1132; land all allotted, 1,494.15 acres, to 23 Indians.   |
| Swinomish (Perry's Island).<br>(Under Tulalip School.)<br>Tribes: Dwamish, Etakmur, Lummi, Snohomish, Sukwamish, and Swiwamish.  |                    | Treaty of Point Elliott, Jan. 22, 1855, vol. 12, p. 927; Executive order, Sept. 9, 1873. Allotted, 7,359 acres to 71 Indians; reserved for school, 89.80 acres.  |

## THE BUREAU OF INDIAN AFFAIRS.

When the War Department was created by Congress under the act of August 7, 1789, the duties assigned to it included those "relative to Indian affairs."

A Bureau of Indian Affairs was organized in the War Department on March 11, 1824, with Thomas L. McKenney as its chief, and among the duties to which he was assigned were: The administration of the fund for the civilization of the Indians, under regulations established by the department, the examination of the claims arising out of the laws regulating the intercourse with Indian tribes, and the ordinary correspondence with superintendents, agents, and subagents. He was succeeded September 30, 1830, by Samuel S. Hamilton, whose successor about one year later was Elbert Herring.

By the act of July 9, 1832, there was created in the War Department the office of Commissioner of Indian Affairs, who, subject to the Secretary of War and the President, should have "the direction and management of all Indian affairs and all matters arising out of Indian relations."

On June 30, 1834, an act was passed "to provide for the organization of the Department of Indian Affairs." Under this enactment certain agencies were established and others abolished, and provision was made for subagents, interpreters, and other employees, the payment of annuities, the purchase and distribution of supplies, etc. This may be regarded as the organic law of the Indian Department.

When the Department of the Interior was created by act of March 3, 1849, the Bureau of Indian Affairs was transferred thereto, and hence passed from military to civil control.

Section 441 of the Revised Statutes provides that "the Secretary of the Interior is charged with the supervision of public business relating to \* \* \* the Indians."

Section 463 of the Revised Statutes reads: "The Commissioner of Indian Affairs shall, under the direction of the Secretary of the Interior and agreeable to such regulations as the President may prescribe, have the management of all Indian affairs, and of all matters arising out of Indian relations."

## REPORT OF THE COMMISSIONER OF INDIAN AFFAIRS.

DEPARTMENT OF THE INTERIOR,  
OFFICE OF INDIAN AFFAIRS,  
*Washington, D. C., September 1, 1923.*

SIR: I have the honor to submit this the Ninety-second Annual Report of the Bureau of Indian Affairs for the fiscal year ended June 30, 1923.

### EDUCATIONAL EFFORT.

**ATTENDANCE.**—The effective enrollment drive of 1921-22 was repeated last year with advantages accruing from previous experience and awakened interest. A program of special effort was furnished in detail to all superintendents directing that for enrollment week every resource of the agency should be enlisted and that in addition to special, systematized work by all field employees invitation should be extended to the missionaries of the reservations to give their Sunday service an educational trend. The active cooperation of traders was also solicited. An earnest appeal to field workers urged as a guiding maxim for the Indian Service, "Every eligible Indian child in school every day," and as the immediate goal, "Every Indian school filled to its limit." The result, so far as at all practicable, was a very successful year. The total capacity of all Government boarding schools was more than filled, and any shortage at day schools was, with negligible exception, the result of a lack of children near enough to attend.

**PUBLIC SCHOOLS AND OTHER EXTENSIONS.**—The enrollment and average attendance of Indian children in public schools has been unprecedented. The number enrolled in these and other non-Government schools last year was approximately 13,000 more than in all Government schools, which increased the expense for tuition by about \$100,000, but as compared with the maintenance of boarding schools it saved a much larger sum to the Government. Notwithstanding this favorable showing, as well as the extension of facilities for 350 pupils at the Fort Apache military post, Arizona, now converted into the Theodore Roosevelt School, together with enlargements at other boarding schools for about 800 more, there still remains, particularly in the Southwest, almost an emergency demand for additional school privileges to save non-English speaking children from reaching their majority unfitted for American citizenship. The boys and girls of the great Navajo people are still the most in need and, in some respects, the most deserving of education.

**ORGANIZATION.**—The revised course of study, partially introduced in 1922, was in printed form and fully distributed at the opening of the last school year. It calls for all-day attendance of all pupils in

the primary grades. Every effort has been made to fulfill this provision, because it is economically sound in principle and whenever effective must reduce the scholastic period and the consequent cost of it. There are, however, many instances where the lower grades are still in school only one-half of each day because funds were lacking to provide suitable classrooms and some additional teachers. But this initiatory expense would be insignificant as compared with the aggregate saving from fewer years of schooling to accomplish a given number of grades.

**READING COURSE FOR TEACHERS.**—The law wisely passed by the last Congress providing for the granting of educational leave to teachers in our service for a period of 30 days is very helpful and greatly appreciated. Supplementing this provision, reading course work has been planned for teachers not only to keep them progressive in pedagogics, but to broaden their knowledge upon matters of public interest and general welfare, and in this direction standard works for reading circle discussion have been selected upon such subjects as "American social problems," "The school as a social institution," and "Problems of American democracy." A further list of books was suggested from which employees were advised to purchase one or more for private use, and the plan contemplates that before the close of the year each instructor shall prepare and submit a short thesis on the subject of study.

Many teachers are using a part of their annual leave to lengthen their time at summer schools under educational leave of absence which, with their regular reading-course work, will enable them to earn credits that will eventually be sufficient to secure degrees, and can not fail to increase the teaching efficiency of our service.

**HOME ECONOMICS AND HOME BUILDING.**—There is no subject of more importance to the Indian people than home making and home keeping. Therefore, as a step forward in Indian education a specialist in home economics was employed to supervise all school work pertaining to the betterment of Indian home life. During the year this supervisor visited more than 50 typical schools and made a careful study of housing, food, clothing, and instruction. She also assisted in reorganizing the work and instruction of many schools in home economics and gathered a great fund of information which will be used in improving conditions another year.

"Home building" was the special subject for study in all schools last year. The pupils of sufficient age submitted essays upon this subject which very generally showed a studious interest and the result of good instruction.

**SURVEY OF INDIAN EDUCATION IN OKLAHOMA.**—The State legislature of Oklahoma having appropriated funds for the expense of a survey of all schools in that State, invited the United States Bureau of Education to conduct the survey. In consideration of the large Indian population in Oklahoma, the Commissioner of Education requested representatives of the Indian Bureau to participate in this work. Accordingly, Chief Supervisor Peairs and the supervisors of the eastern and western districts of Oklahoma became members of this survey committee and spent nearly three weeks in company with Dr. Thomas Jesse Jones, secretary of the Phelps-Stokes Foundation, and Miss Bertha Eckert, of the National Y. W. C. A., the other members of the committee, visiting and studying typical schools of

all classes, whether Government, mission, public, or private. As the large majority of Indian children in Oklahoma are enrolled in public schools, special attention was given to both rural and city schools of the class attended by Indians. A discussion of the conclusions reached by the survey will not be practicable within the limits of this report, but they deal with such matters as nontaxable Indian land, the adaptation of educational methods and subject matter to the needs of Indian children, the question of when the Government should withdraw and leave the responsibility of Indian education entirely to the State, and other important subjects. Because of its large Indian population, the State of Oklahoma is looking forward to a larger responsibility in the education of all its citizens, and it is believed that the survey committee's report is worthy of careful study as regards approaching conditions in that and other States. Copies of the committee's report, published December 11, 1922, may be had on application to the Commissioner of Education, Washington, D. C., or the State superintendent of schools of Oklahoma.

**THE CALIFORNIA CONFERENCE.**—As in Oklahoma, there are questions of Indian education of great importance to the citizenry of California, in view of which some of the school officials of the latter State suggested a conference of State and Federal officers looking to closer cooperation in the education of Indian children in the public schools of California. Such a conference was held at Sacramento in January, 1923, at which State Superintendent Will C. Wood presided, and was attended by school officials, health officers, and representative people from all parts of the State. The immediate result was a better understanding of all phases of the problem of Indian education in California and a mutual agreement between Government and State authorities to cooperate in securing for Indian children opportunities equal to those of all other nationalities. The conclusions of the conference called attention to approximately 500 Indian children in California not attending any school, due chiefly to social and economic causes, such as orphanage, abandoned children, and those from homes of low standard. It was indicated that the State would accept responsibility for children in public-school districts, if their home conditions made them acceptable under the law, but that Congress should provide additional boarding-school capacity for at least 200, available first to the needs of California Indians.

Health conditions were also made the subject of a resolution based upon the claim that the supervision by public-health nurses is essential to render many Indian children acceptable in the public schools and asking that Congress make a special appropriation of \$25,000 annually to aid a like expense of the State in the extension of necessary nursing service.

It is believed that through such conferences in the Indian country a better understanding and cooperation can be secured, particularly in the direction of enrolling Indian children in the public schools, which is a rapidly growing movement. The people in a number of States are encouraging it. They are apparently anxious to find a solution of the problem before the Government transfers it entirely to the States. The Government may wisely stress this

movement because it means reduced Federal expense and the kind of education provided for all American children. This trend toward State school facilities removes almost entirely the need of new Government schools, except in the Navajo and Pueblo countries, and if the present rate of progress can be maintained for a few years the demands there will be met. The pressing need now is in that region, and in the proper upkeep of school plants filled to their utmost capacity.

**PER CAPITA COST OF INDIAN SCHOOLS.**—Occasionally there is criticism of the total cost to the Government of Indian education. In fact the per capita allowance has never been sufficient to maintain satisfactory educational standards. As compared with other similar institutions, this allowance has always been low. The limit per pupil of \$167 before the war was more liberal than \$200 now. The present average cost of clothing, subsistence, fuel, furniture, building materials, and other necessities in boarding schools is more than 50 per cent higher than in 1913. Likewise wages and salaries have been largely increased in nearly every business, trade, or profession, with but slight advance in the Indian Service. In view of these conditions Indian schools have maintained a degree of efficiency and accomplished results that will stand comparison with any other line of public service. Of course, greater efficiency could be attained and the Indian school system made more effective in every way with a boarding school allowance of \$250 per pupil, which would still be moderate as compared with State industrial schools.

### HEALTH.

The people of the United States are naturally interested in the health of the Indians because progressive society accepts the conclusions of philosophy and the edict of science that health is essential to human happiness and usefulness. From every ethical and practical standpoint the Indian is entitled to relief from sickness and a knowledge of how to keep well, and to this end the Indian Service tries to discharge its obligation.

**DIFFICULTIES.**—Prophylactic medicine, in a broad sense, deals as hygiene with the individual and as sanitation with his environment. It is very difficult to make application of either branch of this science to those who are not in alignment with the health motive, or do not understand the principles underlying the prevention of diseases. It is particularly difficult on Indian reservations where the people have no accurate knowledge of the mode of transmission of diseases, and our work there is delayed by the necessity of making explanations and persuading the people to acquiesce in policies and measures that are for their greatest good.

**NEED OF EDUCATION.**—Community health effort may protect water supplies; it may, in considerable degree, prevent the contamination of food before it reaches the consumer; it may better the local environment and lessen the danger arising therefrom; but in many things it must depend upon cooperation of the individual. Most of the preventable sickness which ends in untimely death can not be avoided or controlled by precautions or measures applied by others than those whose safety is directly involved. Instructed childhood is the material out of which healthy citizenship must be made, and

our service hopes to solve its health problems largely through the instruction of Indian children in both hygiene and sanitation.

**PRINCIPAL DISEASES.**—The diseases taxing every resource of this bureau are trachoma, tuberculosis, and pneumonia, the last too largely augmenting the death rate. Trachoma is not a direct cause of mortality, but produces considerable suffering and incapacity, and the estimate of 30,000 cases of this disease among the Indians includes follicular conjunctivitis which clinically resembles trachoma but is distinguished by its mildness, its freedom from danger, and its spontaneous cure in early adolescence. There are, however, enough cases of true trachoma to constitute a formidable problem.

Tuberculosis by causing much incapacity and death in every age group from childhood to old age is the most discouraging and decimating disease with which we have to contend.

It is estimated that there are about 25,000 cases of tuberculosis in all forms, mostly pulmonary and glandular, among the Indians. But this is not astonishing because few of any race escape infection in childhood; resisting forces are, however, often lacking in the Indian's home life and progress of the disease is less arrested there. For the treatment of this disease we have five sanatoria schools and six sanatoria with a combined capacity of about 800. Many cases are treated by agency and school physicians in our general hospitals and in the homes of the patients. Pupils in Government schools are instructed upon the nature and treatment of the disease, and improvement of the situation through these measures is encouraging. Pneumonia, always a dangerous disease, is also favored by the Indian's way of living and its prevention and treatment are largely a matter of better sanitation, but it is doubtful whether, proportionately, more fatalities occur from it among Indians than among whites.

**INFANT MORTALITY.**—A study of this subject, another problem of special concern, includes everything that pertains to child life; and every successful means employed to reduce the number of deaths gives collateral assurance of better living conditions and better chances to promote child welfare. Our facilities for reducing infant mortality and furthering a campaign for better babies are inadequate to meet the demands. The number of hospitals and field matrons is insufficient. With enough well-equipped hospitals, it would be an easier matter to gain the confidence of the Indians where it is wanting, for, through the Indian mothers and their babies, an appeal could be made to which the whole tribe would eventually respond. The hospital nurse and the field matron can do more to win over those who array themselves against approaching enlightenment than any other class of employees. The mothers and the babies that have passed through the hospital at Keshena, an Indian settlement on an unallotted reservation in Wisconsin, have been the means of dissipating every shadow of opposition to physicians, hospitals, and nurses in that jurisdiction. What has been accomplished there is possible for other communities.

**NEEDS OF THE SERVICE.**—There is need of more sanatoria schools for the children, a hospital for incurable patients suffering from tuberculosis, and another for adult curable patients. It is not advisable, as a rule, to hospitalize together adults and children. Our

sanatoria schools are for children in the incipient stage of the disease, and every time an advanced case is admitted to die some incipient case is deprived of the opportunity to get well. None of the sanatoria are as well prepared to take care of adults as they are of children. In the first place, children have a much better chance to recover and go out from the institution, leaving room for others. But adequate provision should be made for adults for, whether curable or incurable, they are, as a rule, a greater source of danger to the community than younger patients.

A hospital school for crippled children is also a pressing need. Many of these underprivileged ones are intelligent and ambitious, with undiminished longings for sympathy, encouragement, and the opportunity of self-expression, and for happiness. Their demand is not for charity but for an opportunity for an education that will make them producers, make them self-supporting instead of a burden to others. Their ambition is a right, not a privilege. Proper hospital treatment, with vocational education, would fit them for useful careers.

**ACCOMPLISHMENTS.**—The health work of the bureau for the year has been successful notwithstanding a lack of funds. The Indians have held their own in life's battle. The number of births has exceeded the number of deaths, and the race is numerically a little stronger. Financial expenditures have been very guarded. Many things that should have been done have been deferred, but there has been some expansion. A new 30-bed hospital has been constructed at Fort Hall, Idaho, and a building has been remodeled at Fore Belknap, Mont., for school and reservation hospital purposes. At the Soboba subagency, near San Jacinto, Calif., some of the buildings have been converted into a hospital plant for the Mission Indians; at Fort Apache, Ariz., a hospital has been opened in connection with the Theodore Roosevelt Indian Boarding School; at the Tongue River Agency, Lame Deer, Mont., plans have been made for remodeling a large residence into a hospital for the Northern Cheyenne Indians, Wyoming, and at White Earth, Cloquet, and Onigum, all in Minnesota, arrangements were perfected for the re-opening of hospitals for the Chippewas.

**COOPERATION.**—In citing the accomplishments of the regular health personnel, mention should be made of the Red Cross nurses who have efficiently cooperated with us on the reservations at Pine Ridge, Rosebud, Jicarilla, Mescalero, Zuni, Navajo, and in the jurisdiction of the two Pueblo agencies. Acknowledgment is also due the United States Public Health Service for helpful cooperation in the Southwest.

### PERSONNEL.

During the war period and immediately following it was necessary to make numerous appointments of persons who did not, and could not, measure up to high standards of efficiency. A rapid elimination of these appointees has not been practicable, but gradual substitution has been effected and concerted effort has been made to select applicants who are suitably qualified for the positions sought, with the result that conditions have been much improved in the teaching service because of an ample eligible list. In other important call-

ings, including physicians, nurses, matrons, cooks, and laundresses, there is still a shortage of civil-service eligibles which is difficult to overcome under the limited compensation permitted, particularly where professional skill and ability to give instruction are required.

It is earnestly hoped that under the reclassification of salaries the board having charge of such work will be able to give the personnel of this bureau equitable recognition as compared with employees of like qualifications, whether outside or within the Government service. Probably no body of workers rendering the quality of service required of ours can be found whose average salary is so low.

The numerical extent of our personnel necessarily includes many who have devoted the best years of their lives to the Indian Service, but who are now physically unable to give the full measure required by the positions they hold. The present retirement law will eventually provide only inadequately for these employees and its amendment so as to allow a higher maximum annuity would be most deserving for the many years of faithful service rendered. A further amendment providing for a lower maximum retirement age, with privilege of extension in exceptional cases, would enable a decided strengthening of efficiency, particularly as related to teaching and some other lines of our service where both mental and physical powers are not sufficiently vigorous at the age of 70 to secure the best results.

### PROGRESS IN IRRIGATION.

The reclamation of land by irrigation is very essential to various parts of the Indian country. Some 600,000 acres have been thus reclaimed, and over 700,000 are still susceptible of irrigation. In addition to the operation and maintenance of 50 projects constructed on Indian reservations, the active work last year included the following in the Southwest:

The preparation of plans and estimates for draining seeped conditions and restoring to cultivation 8,890 acres of Pueblo lands in New Mexico; the installation of domestic water supply systems for the Pueblos of Picuris and San Ildefonso; the completion of plans for improving and enlarging the irrigation system on the San Juan Pueblo; the further drilling of wells on the Navajo and Hopi Reservations, where 120 are now furnishing water; the construction of protective works against floods from Bonito Creek for the Navajo school and agency buildings at Fort Defiance, Ariz.; the completion of a plant, with dam, canals, spillway, etc., for electric power and water for domestic and irrigation purposes at the Fort Apache School and Agency, Ariz.

Plans and estimates were prepared and appropriations secured for lining of the main canal on the Salt River project, in Arizona. It is estimated that the water conserved by this work will be sufficient to irrigate an additional thousand acres for the Salt River Indians. An agreement was entered into with the Salt River Valley Water Users' Association for the acquiring of electric energy for pumping purposes to provide additional water for these Indians.

Construction of a dam with bridge superstructure across the Gila River within the Gila River Reservation, Ariz., was commenced and will be completed at the earliest practicable date. This dam is to be

used in connection with the Ashurst-Hayden Dam previously built across the Gila River above Florence, Ariz., and the Florence-Casa Grande Canal, now under construction for the diversion of the natural flow of the Gila River to provide irrigation for 35,000 acres of land belonging to the Indians of this reservation and 27,000 acres of land in white ownership in the Florence-Casa Grande Valley, Ariz.

In the Northwest work was begun on the enlargement of the canals and structures and the general rehabilitation of the Fort Hall project, Idaho. The completion of this work will provide adequate irrigation facilities for 52,000 acres. An agreement executed with the Empire irrigation district of Bancroft, Idaho, provides for exchange of part of our Blackfoot Marsh Reservoir waters for an equal quantity of water in Jackson Lake Reservoir whenever available, which will enable the irrigation of approximately 50,000 acres in the State of Idaho that could not otherwise be irrigated.

Construction of the Ray Lake Reservoir was begun to provide additional water supply for the Wind River irrigation project, in Wyoming. Regulations were issued authorizing the furnishing of water on this project and the Crow project in Montana to water users who are delinquent in payment of irrigation charges.

Construction was continued making available for cultivation large additional areas of land on the Wapato project, Yakima Reservation, Wash.

Regulations making the relief act of February 28, 1923, in so far as consistent, applicable to the Blackfeet, Fort Peck, and Flathead projects, in Montana, were issued. Extension of time in which to pay charges due on the Modoc Point project, in Oregon, was also granted.

Water rights were acquired from the Bozeman Trail Ditch Co. for 1,959 acres held in trust for the Indians on the Crow Reservation, Mont.

A suit started several years ago for determining the water rights of the Indians on the Uintah Reservation, Utah, was satisfactorily settled out of court, and water-right certificates were issued by the State engineer of Utah covering the lands of this reservation upon which proof of beneficial use of water has been submitted.

### LANDED INTERESTS OF THE INDIANS.

**ALLOTMENTS.**—Allotment of lands to individual Indians was carried forward last year as rapidly as general conditions would permit, the total number on reservations reaching 3,923, covering approximately 1,904,000 acres. Of these, 2,126, comprising 1,654,412 acres, were on the Crow Reservation, Mont.; 1,077, covering 198,632 acres on the Fort Peck Reservation, Mont.; 276, embracing 10,742 acres in California, principally on the Mission and Hoopa Valley Reservations; 217, comprising 34,936 acres on the Cheyenne River and Lower Brule Reservations, S. Dak.; 168, including 819 acres on the Salt River Reservation, Ariz.; and about 60 on 4,000 acres in other reservations. On the public domain, 245 allotments were made in various States embracing 34,432 acres.

**FEE PATENTS AND COMPETENCY CERTIFICATES.**—Patents in fee were issued to 625 Indians, adjudged competent to manage their busi-

ness affairs, covering a total of 64,000 acres. Under a law enacted in 1916, a patent was issued to the Washington State Historical Society on two small tracts in the Colville Reservation marking the site of the early operations of the Hudson Bay Co., and the money payment therefor was deposited in the United States Treasury. A trust patent on 320 acres was issued to the Agua Caliente Band of Mission Indians in California.

Restrictions as to alienation were removed and certificates of competency issued involving 150 tracts, aggregating 1,550 acres. Ordinarily, if the Indian has attained the competency of the average white man his application for a certificate or patent in fee has been granted.

**LAND SALES AND LEASES.**—Sales of land and the acreage involved were 1,328 and 171,715, respectively, as compared with 1,006 and 104,814 for the previous year. Installment payments of the purchase price of lands sold on time have been generally satisfactory, but it has been found necessary to grant some extensions, and in such cases the consent of the Indians interested and the payment of interest due are required.

The Indians are encouraged to hold and cultivate their lands, whenever possible, and to make their homes there, but the surplus not thus used is leased, not only for the immediate revenue but for the benefits of cultivation and permanent improvements eventually accruing to the Indian owner. Last year, between forty and fifty thousand farming and grazing leases were made on more than 4,000,000 acres of allotted lands for which the Indians received a cash rental of approximately \$5,000,000.

**LANDS RECLASSIFIED AND REAPPRAISED.**—Action on 116 applications for reclassification and reappraisal of lands subject to homestead disposition on various reservations, pursuant to the act of June 6, 1912, resulted in a reduction of the original appraisement in 45 cases and in 71 cases the applications for reduction were denied.

**CALIFORNIA INDIANS.**—Two tracts of land containing 70 acres were purchased for homeless Indians in California at a total cost of \$8,500 from funds appropriated by Congress for this purpose. It is estimated that about 200 Indians may obtain home sites on these tracts.

**EXTENSION OF TRUST PERIOD.**—The period of trust was extended for 10 years by order of the President on allotments made to Indians on the reservations at Devils Lake, N. Dak.; Round Valley, Calif., and Santee, Nebr. More than 800 allotments are covered by these extensions.

**LAND FOR NAVAJO INDIANS.**—Settlement of conflicts over grazing rights of Navajo Indians and cattlemen in a number of townships in New Mexico east, and formerly a part of the Navajo Reservation, was effected through an appropriation of \$100,000. Of this amount \$10,000 was used for leasing several townships and \$90,000 for purchasing one township with a large free-flowing artesian well, together with small tracts on other townships containing a well and locations where water may be developed.

**INDIANS IN SAN JUAN COUNTY, UTAH.**—Preliminary surveys were commenced for allotments to two small bands of Utes and Piutes in San Juan County, Utah. These two bands were headed by Old Posey and Polk, the former now deceased, and in the past have given much trouble to the authorities of Utah. The lands to be allotted

are partly within the La Sal National Forest and partly on the public domain. The number of Indians to be benefited is about 180, including men, women, and children.

**MOISE TOWN SITE.**—The town site of Moise, on the Flathead Reservation, Mont., embracing 160 acres, was abandoned and the withdrawal revoked. This land has since been allotted to qualified Indians.

**RESTORATION OF LANDS IN UTAH.**—A tract of unsurveyed land in San Juan County, Utah, embracing approximately 600,000 acres, was restored to the public domain and when surveyed will be subject to disposition as other public lands. These lands were withdrawn for the benefit of the Piute Indians, most of whom have removed to other parts of Utah or returned to Arizona. The few that remain may acquire title to such lands as they have occupied and improved under the general allotment laws.

**ALLOTMENTS ON FORT BELKNAP RESERVATION.**—A final roll was approved of Indians entitled to allotment on the Fort Belknap Reservation, Mont., pursuant to the act of March 3, 1921, and the work of allotting these Indians is now in progress. More than 600,000 acres are to be disposed of under this legislation, and the number of Indians to be benefited is 1,176.

**SWAMP LANDS ON MENOMINEE AND LAC COURTE OREILLE RESERVATIONS, WIS.**—On May 26, 1923, the department made request upon the Governor of Wisconsin that appropriate action be taken by the legislative branch of the State government for the reconveyance to the United States of the swamp and overflow lands in the two reservations mentioned. The patent for the lands on the Menominee Reservation was issued on November 13, 1865; and the patents for the lands on the Lac Courte Oreille Reservation were issued from 1881 to 1885. The department contends that the wrongful issuance of these patents conveyed no title to the State.

### THE CHIPPEWA INTERESTS IN MINNESOTA.

Following a personal visit to the Minnesota Chippewa Indians, and a careful investigation made by a commission fairly representative of the Government and the Indians, it is felt that valuable adjustments have been made in the interest of these tribes. Additional school facilities were provided; physicians were appointed and assigned at White Earth Reservation and at the old Leech Lake Agency; a system of rationing and caring for the old was also put into operation and met the hearty approval of all factions among the Indians. After investigating the Indians' claims the commission made an award of \$1,490,195.50 as due them on account of Indian lands and timber taken for the Minnesota National Forest under the act of May 23, 1908. This finding was approved by the President April 9, and on May 31, 1923, the full amount was transferred from the general fund in the Treasury to the Chippewa tribal trust funds, as authorized by the act above cited.

Upon the request of the Interior Department, action has been instituted in the Supreme Court concerning title to all the swamp lands within the several Indian reservations in Minnesota. The case involves about 190,000 acres, of which more than 152,000 acres have been patented to the State of Minnesota and about 38,000 acres re-

main unpatented. The case has been set for preliminary hearing at the October, 1923, term of the court.

The Court of Appeals, District of Columbia, on June 6 upheld the decision of the lower court in the suit of John G. Morrison, jr., *v.* Secretary of the Interior et al. The decision sustained the action of the lower court in dismissing the complaint filed by Morrison in behalf of himself and other Chippewas, in which legal effort was made to take the supervision of the funds and property of these Indians out of the hands of the Interior Department. Under the decision the administration of the affairs of the Chippewas remains subject to departmental jurisdiction.

The Interior Department made a favorable report on a bill (H. R. 12274) providing for an appropriation by Congress of \$1,787,751.36 to compensate the Chippewa Indians of Minnesota for lands disposed of to settlers under the free homestead act of June 14, 1889, exemption from payment at \$1.25 per acre having been granted the settlers by the act of May 1, 1900.

### FARMING AND STOCK RAISING.

The limits of this report will not admit of a detailed narration of the Indian's progress as a farmer and stock grower. Every year adds steadily to the number who carry from the schools to their allotments the theory and practice of productive agriculture and live-stock improvement; and as white settlement occupies the surplus land of the reservations, the Indians readily acquire the white man's methods of handling the soil and stocking it. A comparison of the Indian's settled life and domestic activities to-day with these conditions 30 or 40 years ago is the way to form an estimate of Indian progress.

Last year there was a substantial increase in the number of Indians farming, in their cultivated acreage, in the use of modern implements and machinery, and in the adoption of successful methods. There was also a marked recovery from the depression of live-stock interests prevalent throughout the country during the years 1918 to 1921. The Indians of the southwestern reservations have been furnished with high-grade rams for improving their sheep and as a result are receiving much higher prices for their wool.

The upward trend in prices on all classes of stock is bringing encouraging returns and stimulating interest in stock raising among the Indians generally.

**INDUSTRIAL SURVEY AND FIVE-YEAR PROGRAM.**—This movement was outlined in the annual report for 1922 and has received somewhat special attention. Detailed surveys have been made of 71 reservations with the view of determining the exact situation of the Indians, their needs, and resources; and similar surveys will be made of other reservations as rapidly as possible. The reports of these surveys will be used as the basis for the formulation of a definite, systematic industrial program for each reservation extending over a period of five years. Programs have already been approved for a number of the reservations.

Perhaps the most conspicuous example of the possibilities of the five-year program is found on the Blackfeet Reservation, Mont.,

where such a plan was adopted two years ago. At that time the Indians depended largely on the Government, rations being issued to about 2,000 members of the tribe during the winter. With the exception of the old and indigent they are now practically self-supporting and raised sufficient flour last year to justify the cancellation of the estimate for their regular annual allowance of flour. The wheat production on this reservation has been increased from 1,000 bushels in 1921 to 100,000 bushels the past year. It is proposed to make this five-year program the greatest forward step ever taken in the industrial progress of the Indians and the general improvement of their home life.

**REIMBURSABLE ASSISTANCE.**—Under this provision of law purchases of various equipment, supplies, and live stock are made for the Indians and from four to six years allowed for repayment. The plan has proved one of the greatest aids ever devised for promoting the industrial welfare of the Indians, and has enabled many of them to become self-supporting who otherwise would be dependent upon the Government. Large repayments were made last year. The total reimbursable appropriation for the year was \$80,000 and was authorized for expenditure but, owing to unsatisfactory bids, especially on cattle, and the drought existing throughout the Southwest, making it inadvisable to add new and better bred sheep to the ranges, only \$62,846 was expended during the year. In addition to this about \$65,000 was expended under the reimbursable regulations from money otherwise available, mostly tribal funds authorized by Congress.

**COOPERATIVE EXPERIMENTATION.**—This work is a definite contribution to Indian farming in certain localities. It has been continued during the year at Sacaton in the Pima Reservation, Ariz., by the joint operation of our service and the Bureau of Plant Industry, United States Department of Agriculture, and with good results in the production of improved varieties or crops suited to the semiarid condition which prevails on the reservations in that part of the country. Extension to the Papago Reservation is planned for the present year. The experimental date gardens at Palm Springs on the Aguas Calientes Reservation and at Martinez, Calif., promise well in getting the Indians interested in this remunerative industry, which it is hoped will eventually make them entirely self-supporting.

### FAIRS AND EXHIBITS.

In September, 1922, exhibits of native Indian arts and crafts were shown at Santa Fe and Gallup, N. Mex., consisting of basketry, beadwork, pottery, Navajo rugs, silverware, etc.; and in April, 1923, an exhibit of Indian-made goods was collected and displayed at the exposition of the Travel Club of America, New York City, to acquaint the public, including the local merchants, with the variety and beauty of aboriginal handiwork. The Indian booth proved extremely attractive and was visited by large numbers of people. Much of the work was sold, and it is believed that through the exposition the market for Indian native wares will be broadened. The object of these displays was to stimulate interest in the per-

petuation of the native industries, now gradually disappearing. The exhibits attracted wide attention, and large sales of the different articles were made. In addition the Indians continued their exhibits at the local county fairs with good results, winning many prizes in competition with the white farmers.

### HIGHWAYS AND BRIDGES.

A very liberal policy has been adopted in connection with the opening of public highways through Indian lands, and there has been the fullest possible cooperation with the local and State authorities. There were approved last year more than 50 applications for permission to open public roads covering approximately 129 miles of highway. Damages therefor were assessed in behalf of the Indians, amounting to about \$12,000. Special appropriations were available for road work on five reservations in the total sum of \$53,000.

The Federal aid road act of November 9, 1921, as interpreted by the Comptroller General, permits the payment of the entire cost of public highways across Indian reservations from Government funds appropriated to the State in which the reservation is located. This has given a great impetus to road work on the Indian reservations, and such projects have been approved for about 25 reservations.

### INTEREST ON INDIAN MONEYS AND PAYMENT OF TRIBAL FUNDS.

During the year there was deposited in banks approximately \$36,000,000 of individual Indian moneys upon which the interest earnings were over \$1,425,000. About 1,100 banks are kept bonded to protect deposits of Indian funds. This placing at interest the surplus moneys of the Indians, not immediately needed for their benefit, teaches them the principles of thrift and economy and the earning power of money.

Under recent laws the rolls of the various tribes except the Osages, Chippewa of Minnesota, Menominee, and the Five Civilized Tribes, are being closed. During the past year the rolls have been so closed and moneys paid out at the following agencies: Rosebud, S. Dak.; Fort Belknap, Mont.; Otoe and Missouri and Pawnee, Okla. This prorating of tribal trust funds leads the Indian to assume individual responsibility.

### INDIAN CLAIMS AGAINST THE GOVERNMENT.

On April 23, 1923, the Court of Claims held there was nothing due the Indians in the suit of the Sisseton and Wahpeton Sioux *v.* United States.

May 7, 1923, the Sioux Nation filed suit in the court for an adjudication of their claims, including that to the Black Hills.

The Indians of the Klamath Agency, Oreg., Fort Berthold, Mont., and Yankton, S. Dak., and the northern and southern branches of the Cheyennes and similar branches of the Arapahos are preparing to enter suit to have their claims adjudicated.

## INDIAN EMPLOYMENT.

As in years past, adult Indians and pupils of the New Mexico schools spent the summer in the Arkansas Valley of Colorado and Kansas, working for ranchers and in the beet fields. This is remunerative labor under invigorating climatic conditions.

An employment office established at Tempe, Ariz., places Indians on highways, in mines, cotton fields, and on any work available, while a fleet of trucks is maintained to transport them to the work, at a minimum of expense. Families are employed to a great extent, and the Cotton Growers' Association provides housing for workers in the cotton fields.

Inquiry made last year for the purpose of ascertaining the proportion of Indian school students who after completing the eighth grade have been successful in industrial or other occupations shows that in 762 cases of incomplete returns 85 per cent are self-supporting, 8 are more prosperous, in that they are accumulating property and are progressive beyond their ordinary needs, and that only 7 per cent are unsatisfactory because of shiftless habits or failure to make their own way without assistance. Photographs accompanying reports of these conditions disclose in scores of instances modern cottages, well-kept and attractive home surroundings, and an interest in live stock, poultry, and gardening equal, and often superior, to average country life among the whites. It is believed that more complete data would not be less favorable, and that the returned student class as a whole are justifying the expenditure of public funds provided for their education.

## FIVE CIVILIZED TRIBES.

Because of extensive repairs to the Mekusukey Academy, one less tribal school of the Five Civilized Tribes was in operation last year, but the combined enrollment was practically equal to that of the preceding year.

Enrollment of Indian children in the public schools was 15,335 as compared with 13,893 of the previous year. The attendance of those children in nonreservation schools was also increased, and was unusually good in contract and denominational schools.

Health conditions were not so favorable, trachoma and tuberculosis furnishing the obstinate diseases that call for better hospital facilities and additional field matrons. An appropriation for emergency cases would be very helpful and might include a reimbursable provision effective when the beneficiary has funds that can be applied in repayment.

There has been a noticeable decrease in the use of intoxicants, except in the rougher portions of the State where it is difficult to locate stills, the principal trouble now being to prevent the sale of Choctaw beer and patent medicines containing a large percentage of alcohol.

A decided improvement was manifested in general farming, both as to increased crop production and the raising of more and better live stock. That the restricted Indians are able to compete with their white neighbors in farm crops was evidenced by the large num-

ber of premiums awarded them in local, district, and county fairs, and in the State fair.

Last year restrictions were removed from 418 Indians, and conditionally removed from 231 tracts of land. The restricted class now numbers approximately 17,500.

Individual money totaling \$2,760,078.56 was expended for maintenance, farms, buildings, live stock, and equipment.

The leases of these Indians during the year for oil and gas mining embraced 197,540 acres, and their total revenue from existing oil and gas leases was as follows:

|                                    |                   |
|------------------------------------|-------------------|
| Bonuses .....                      | \$1, 084, 797. 89 |
| Casing-head gas collections.....   | 133, 226. 07      |
| Royalties on production.....       | 3, 155, 454. 26   |
| Advance royalties and rentals..... | 1, 217, 530. 21   |
| Total .....                        | 5, 591, 008. 43   |

The probate work of the Five Civilized Tribes, including also the Quapaw Agency, was continued with beneficial results by the force of attorneys reduced the previous year to eight. Their districts are large, embracing in all some 40 counties, and the individual work is heavy. Their service, however, is essential and valuable in conserving the estates of deceased, restricted, and dependent Indians and in safeguarding these estates for the benefit of those who are justly entitled to them.

#### QUAPAW LEAD AND ZINC MINING LANDS.

The leasing for mining purposes of the Quapaw Indian restricted allotted lands in Oklahoma is governed by the provisions of the Act of Congress of March 3, 1921, and departmental regulations thereunder.

During the year, 25 leases for lead and zinc mining purposes were approved, covering in the aggregate 3,644 acres. Applications for leases of considerable additional acreage are under consideration. In these new leases increased royalty rates for the Indian owners of the land and the proper mining development of the land are provided for. The approved leases are upon such terms and conditions as, it is believed, will fully protect the interests of the Indian owners of the land.

#### PURCHASE AND TRANSPORTATION OF SUPPLIES.

Under annual contracts for the year made in May and June, 1922, supplies were purchased at the lowest cost since the peak of post-war prices was reached. A rather steady advance followed through the year, resulting in similar contracts for the ensuing year at increases of from 10 to 30 per cent on perhaps half the commodities bought. These annual contracts approximated in value \$2,000,000, and included food, wearing apparel, medical supplies, fuel, school supplies, and many other classes of goods. A similar amount was spent on miscellaneous purchases and building machinery, etc. The upward movement of prices affected these transactions quite materially.

In keeping with our policy, a standard grade of goods was bought, wholesome but not fancy food supplies, good and serviceable clothing, shoes, etc., best quality of drugs, and coal giving the largest British thermal unit values for the money invested. Close inspection of the deliveries made by contractors and others, following careful purchasing, guaranteed a maximum return in service for every dollar spent.

The transportation of supplies required an expenditure a little less than \$550,000, based on commercial tariff less land-grant rates. The reduction on account of shipping, wherever practicable, over land-grant roads resulted in a saving to the Government of approximately \$125,000.

Notwithstanding the general uneasiness throughout the winter regarding the procurement of coal, the Indian Service experienced practically no difficulty, all requirements being met either before the season started or during the early months of it. A consistent improvement in the quality of fuel now being bought largely on the British thermal unit basis has been noted.

Bills for supplies and services were promptly paid throughout the year, complaints for failure to do so being negligible in number.

### ECONOMIC EFFICIENCY.

The present administration of Indian affairs has made economy in the expenditure of public funds a live subject and has directed its inspection service to report definitely wherein savings could be effected within the various jurisdictions visited. In the interest of both economy and efficiency, the policy has been to combine, wherever practicable, several small agencies into one jurisdiction with central headquarters. Among the more important instances of the past year are the Consolidated Chippewa Agency, with headquarters at Cass Lake, Minn., and the Consolidated Ute Agency, with headquarters at Ignacio, Colo., composed, respectively, of the several Chippewa agencies and the Ute Mountain and Southern Ute agencies.

It is the purpose to cooperate fully with efforts of the Chief Executive to lighten the load of taxation incident to the war, and in order to give further emphasis to this matter an appeal was issued on June 28, 1923, as having special bearing upon the succeeding year's work, and it is gratifying to add that of the practically unanimous response from the field, a very large percentage has been letters heartily assuring full support to the spirit and letter of the circular, which follows:

#### *To Superintendents and Disbursing Officials:*

Herewith are inclosed the recent addresses of the President and the Director of the Bureau of the Budget, which you are urged to study carefully, because they contain the gospel of our financial practice. They furnish the cogent logic of the timely maxim, "More business in Government." They bring to us an unusual opportunity to understand the purpose and practical workings of the budget system which fortunately became a fact of Federal administration at a time when it was most needed; at a time when the relentless extortions of war had entailed the most difficult problems of peace.

These addresses should reach every employee in our service as an inspiration to cooperate in the post-war victories that must be won. It will be seen that from the signal triumph of a "balanced budget" the President leads on to a maximum expenditure next year of \$3,000,000,000, exclusive of the national debt reduction, which means a cut in the estimated expenditures of approxi-

mately \$162,000,000, and that he finds this to be not only a just obligation to the Nation's taxpayers but a proof to the world of the way to recover from war excesses.

It is confidently assumed that the Indian Service will give united assurance to save its full proportion of the proposed reduction. No other response to the suggestion of the Chief Executive can be entertained. Our past retrenchment work as a whole is not under criticism. Rather, it was done so well as to prove that we can do a little better hereafter. Let us rally our forces to that effort. Most of you can probably recall how a saving might have been made in some transaction or routine duty. Every corner of your experience should be searched for an instance to be corrected next year. Do not be surprised at a reduction of submitted estimates. This must be done in some cases to keep step with the forward peace-time movement. Do not feel that maximum appropriations can be used, if a saving is practicable under the strictest rules of economy.

The keynote has been sounded from which there is no retreat: "Greater economy and greater efficiency in the conduct of routine Government business." The cost of major or special undertakings will, as a rule, be properly controlled. It is in the minor, daily uses of money, time, supplies, labor, and like factors, and in the vigilant calculation of contemplated outlay that supervision and loyal support by subordinate workers can roll up from 150 jurisdictions an aggregate of savings that will keep our service henceforth in the front rank of economic achievement. There is not the slightest question that we can do this, if we go about it willingly, conscientiously, and patriotically; nor is there any doubt that by this process of cost cutting we can improve individual and institutional efficiency the field over.

These suggestions are, therefore, offered as an earnest appeal to all Indian Service workers, and through them to every Indian ward—pupil or parent—to revive enthusiastically the thrift idea and pledge themselves to the sound principle of prudent spending and careful saving. Through such an aggressive campaign the reduction of public expense would be merely incidental to the lasting benefits accruing to the personal, social, and civic life we deal with.

The inclosed pamphlet is a splendid treatise on civil Government, and you are requested to make an effectively educational use of it.

Please acknowledge the receipt of this circular after you have read the pamphlet.

Sincerely yours,

CHAS. H. BURKE,  
*Commissioner.*

Approved:

E. C. FINNEY,  
*Acting Secretary.*

## OIL AND GAS OPERATIONS.

Notwithstanding the overproduction of crude oil and low prices, leasing for oil and gas operations on restricted Indian lands was active and very successful last year, due considerably to the policy adopted during the depression of the oil industry of permitting lessees to hold their leases without drilling, except where existing conditions require wells to be drilled.

Over 300,000 acres were leased for oil and gas mining purposes. The gross oil production for the year was approximately 54,000,000 barrels, and the revenue received by the Indians from existing leases approximated \$37,000,000. In the Osage Reservation alone 67,864 acres were offered for oil mining lease, 48,031 acres selling for a bonus of \$14,246,600. Several 160-acre leases sold for more than \$1,000,000 each, the highest price paid for any one tract being \$1,325,000, and the total revenue to the Osages from oil and gas leases was \$30,572,111.14.

A high-grade oil was discovered on the Hogback structure of the Navajo Treaty Reservation, N. Mex., from a well with an estimated

production of about 350 barrels a day brought in by the Midwest Refining Co. under an exploration lease approved last year. In view of the interest manifested and the frequent applications for leases on the Hogback and other structures, regulations were approved on April 24, 1923, outlining the method by which oil and gas leases on this reservation will be let. Leases on the Hogback structure in the neighborhood of the producing well will be sold at public auction to the highest bidder in tracts of not exceeding 640 acres each. On other structures, a single exploration lease may be granted and in case oil and gas develop, the remaining lands will be offered for lease at public auction. A similar plan for leasing lands on the Southern Ute Reservation in Colorado and New Mexico was adopted on May 24, 1923.

To promote better and more uniform administration of the affairs of the Navajo Tribe of Indians, particularly as to matters affecting their interests at large, such as oil, gas, and other mineral deposits, tribal timber and the development of underground water, regulations were approved January 27, 1923 (revised April 24, 1923), providing for the appointment of a commissioner to the Navajo Tribe and the organization of a Navajo tribal council with which administrative officers of the Government may directly deal in all matters affecting the tribe as a whole. Hon. H. J. Hagerman was appointed commissioner to the Navajo Tribe and the organization of a Navajo tribal council has been completed.

On November 7, 1922, the regulation limiting the oil and gas holdings of any one lessee on the Kiowa Reservation, Okla., to 9,600 acres in the aggregate was abolished, as the danger of monopoly it was designed to prevent is now eliminated by the remaining small area of restricted land and the active competition of oil operators in the field.

All existing regulations governing the leasing of restricted Indian lands for mining purposes were amended on April 10, 1923, so as to prohibit the making of such leases to employees of the United States Government, whether connected with the Indian Service or otherwise.

The ruling of November 9, 1922, prohibiting the making of mining leases to foreigners and noncitizens was revoked by the Secretary of the Interior on May 16, 1923, the decision being rendered in a case involving oil and gas leases to the Roxana Petroleum Corporation covering lands belonging to members of the Five Civilized Tribes in Oklahoma and in the Osage Reservation.

A cooperative agreement between the Bureau of Mines and the Indian Office regarding the supervision of operations for mining coal, oil, gas, and other minerals from leases on restricted Indian lands, except in the Osage Nation and the Five Civilized Tribes, was approved June 29, 1923. Under this agreement thoroughly competent engineers and practical men will be available for regular field service and it will be their duty to see that mining operations are conducted efficiently and economically.

### FORESTRY.

A marked interest on the part of operators in offerings of timber on Indian lands developed last year, due partly to improvement in

lumber market conditions, but quite largely to the special activity of our Forestry service in drawing public attention to the opportunities for successful logging and milling operations on Indian reservations. This reviving interest was favorable to efforts of the previous year to dispose of timber on the Quinaielt Reservation, Wash., where the Mounts and the Quinaielt Lake units were sold. On the latter unit \$5 per M was received for Douglas fir, amabilis fir, cedar, and white pine, and \$3 per M for hemlock. These were record prices for that region. Nearly a half billion feet of yellow pine on the Colville Reservation, Wash., were sold for \$3 per M; and an equal amount on the Warm Springs Reservation, Oreg., was sold for \$2.88 per M, which were satisfactory prices considering the relative inaccessibility of these units. Both contracts provide for increases in stumpage price after four years and each three years thereafter. On the Flathead Reservation, Mont., the large Valley Creek unit was sold at \$5.12 per M for yellow pine and \$3.01 per M for Douglas fir and larch; and the smaller Big Arm unit brought prices of \$4.55 and \$2.50 per M for the same species. There were several smaller sales on this reservation. Prices of \$3.80 and \$4.30 for yellow pine were received on two sales within the Nez Perce timber reserve, Idaho, and a large unit within the Klamath Reservation, Oreg., the Antelope Valley, brought \$3.75 for yellow pine and lower prices for inferior species.

The total value of the Indian timber sold during the year exceeds \$6,000,000 at the minimum prices, and the increases in price, for which provision is made in the contracts, together with the overrun of the estimates anticipated, will probably raise this amount very substantially. As the cost of administration will not exceed 8 per cent, the ultimate net return from the year's sales will exceed \$7,000,000, to be used exclusively for the benefit of the Indians holding the timber lands. Valuation surveys and land classifications were continued, and distinct progress made in the improvement of telephonic communication, lookout systems, and other means for adequate protection from forest fires. The losses from fire were very small when compared with the protected area of nearly 7,000,000 productive acres, with a value of approximately \$130,000,000.

### SUPPRESSION OF THE LIQUOR TRAFFIC.

The continual reduction of the special appropriation for suppression of the liquor traffic among the Indians, now only one-sixth of what it was previous to national prohibition, has placed the responsibility for that duty more and more upon the superintendents in charge of reservations and the employees under their jurisdiction. It can hardly be admitted that the means for enforcing constitutional prohibition have made up for the consequent curtailment of the special force of this bureau for liquor suppression. The bootlegger is a sly, resourceful, and persistent offender who too often finds the Indian a willing accessory. Everything possible is done through our regular employees to aid the limited number of special officers allowed, and the results are believed to be commensurate with the available agencies for law enforcement.

### PEYOTE.

A growing interest is manifested in the subject of peyote in its relation to the Indians. Calls coming from every section of the country for copies of the peyote pamphlet exhausted the first edition of 1,000 copies in the first few months. Another edition of 2,000 copies was printed and is being distributed in the same manner.

Three States—North Dakota, South Dakota, and Montana—passed laws during the year against the sale, transportation, and distribution of peyote, making with Utah, Kansas, Nevada, and Colorado, which already had laws, seven peyote-prohibition States.

### ESTATES AND WILLS OF DECEASED INDIANS.

A graduated fee ranging from \$20 to \$75 is charged for probating trust estates of deceased Indians and approving their wills, the amount of the fee depending on the appraised valuation of the estates.

This work is conducted by a force made up principally of attorneys especially trained in probate procedure whose salaries and expenses are paid from a reimbursable appropriation. Last year 13 examiners of inheritance were employed in the field conducting hearings on reservations and the public domain. The fees collected and covered into the Treasury amounted to \$81,749.40, and during the year 2,601 heirship cases, 215 wills, and 3,112 miscellaneous cases involving probate questions were disposed of.

### PUEBLO LAND TITLES.

Proposed legislation to adjust title to lands within the Pueblos in New Mexico received the consideration of Congress during the last session. Extensive hearings were held by the Senate Committee on Public Lands and the House Committee on Indian Affairs. A bill drafted by a subcommittee of the Senate Committee on Public Lands was favorably reported, passed the Senate, and was favorably reported by the House committee, but failed to pass the House during the closing hours of the session.

It is conceded by all informed persons that legislation is necessary to settle satisfactorily controversies affecting Pueblo land titles and every effort will be made at the approaching session of Congress to procure the enactment of legislation to adjust this most important and complicated question on a basis which will be fair and just to the Pueblo Indians, as well as others who may have legal or equitable rights.

### INDIAN DANCES.

A long-time tendency of the Indians has been to give too much time to dances, powwows, celebrations, and general festive occasions to the interruption of their self-supporting duties, and these meetings have frequently given opportunity for excesses of one kind or another detrimental to their moral and economic welfare. To correct this practice, a letter was widely circulated among the Indians

last year urging the need of more serious attention to their home interests, particularly in the planting and harvest seasons and, while granting them the privileges of wholesome amusements and occasional feast days, earnest appeal was made that they shorten somewhat the length of these gatherings and omit from them the use of harmful drugs, intoxicants, gambling, and degrading ceremonials. The main purpose, however, was to draw their attention more closely to the industrial necessity of making their own living; of doing their work well at seasonable times, caring for their crops and live stock; and of awakening in them a home-making interest with higher ideals of family life.

### LIBRARY.

During the past year a set of mimeographed bulletins has been compiled by the library of the office, to which additions will be made as the necessity arises. These bulletins consist of bibliography and short articles on various activities of the office, and some Indian customs, which are of general interest to the public. Not only are they furnished to inquirers, but an effort is being made to reach the libraries and schools of the country, in order that they may receive first-hand information upon the subjects treated.

Further research has also been made in perfecting a card catalogue of the library containing detailed reference to publications on Indian history, biography, customs, and congressional reports, and comprehensive of practically every phase of the Indian question.

### CONCLUSION.

A closing word of genuine appreciation is due the personnel of this bureau for loyal, faithful, and, in the main, efficient cooperation in a complicated and difficult work. Many of these workers by their long service have become trustworthy students of Indian problems and conditions. They are much more than job holders—they are uplifters; they are people of altruistic purposes, and they are invaluable helpers to any administrative head of Indian affairs.

If space permitted, it would be a pleasure also to acknowledge gratefully in each instance the assurance of confidence and support, from both individuals and organizations, that has come to this office concerning its effort to discharge the functions required by law and its views as to what is best for our Nation's wards. Indian affairs were widely discussed within the year, which was no misfortune, because discussion is a good thing. The liberty of opinion and speech under our Government has seldom harmed anything worth saving. Occasionally harsh things have been said about the Indian Service, but immediately there were well-informed people who knew some good things about it and mentioned them. In the give and take of controversy the real purpose of the self-seeking reformer has generally leaked out and the real merit of administration has become better known. This bureau has stood for certain measures and policies respecting Indian welfare which it believed to be sound in principle and permanently beneficial to a backward peo-

ple. Perhaps it will be pardonable to insert here one of the briefer indorsements of that attitude:

*Be it resolved*, That the Board of Managers of the American Baptist Home Mission Society, having a somewhat intimate knowledge of Indian conditions through its educational and missionary workers among the Indians, desires to assure the Secretary of the Interior of its continued and growing confidence in the administration of Indian matters through the Commissioner of Indian Affairs.

The board most emphatically disavows all sympathy with criticism of the Indian administration which originates either with those whose unjust exploitation of Indians is thwarted by the Indian Office, or with those who are ignorant of the actual facts and of the dangers threatening Indian progress, and are moved by impractical and abstract theories inapplicable to present conditions.

Without claiming to have sufficient detailed information to pass judgment on every feature of the policy of the Indian Office, the board of managers desires to commend in most unqualified terms the Commissioner of Indian Affairs and his chief assistants for their deep and active interest in Indian welfare, for their attitude toward degrading customs and habits, for their persistent efforts to save the Indians from exploitation by unprincipled men, and for their unflinching courage in antagonizing powerful interests in their effort to protect and help the wronged and helpless.

We are confident that the great mass of our Christian American citizens will stand back of any administration and officials moved by such a spirit and purpose.

In conclusion, I thank you for frequent and helpful suggestions and the benefit of your deep interest in the advancement of the Indians.

Very respectfully,

CHAS. H. BURKE, *Commissioner*.

THE SECRETARY OF THE INTERIOR.

TABLE 1.—Indian population of the United States, exclusive of Alaska, June 30, 1923.

[Figures compiled from reports of Indian school superintendents, supplemented by information from the 1920 census for localities in which no Indian Office representative is located.]

|  |         |
|--|---------|
| Grand total.....   | 344,303 |
| Five Civilized Tribes, including freedmen and intermarried whites..... | 101,506 |
| By blood.....  | 75,519  |
| By intermarriage.....  | 2,582   |

## THE BUREAU OF INDIAN AFFAIRS

When the War Department was created by Congress under the act of August 7, 1789, the duties assigned to it included those "relative to Indian affairs."

A Bureau of Indian Affairs was organized in the War Department on March 11, 1824, with Thomas L. McKenney as its chief, and among the duties to which he was assigned were: The administration of the fund for the civilization of the Indians, under regulations established by the department, the examination of the claims arising out of the laws regulating the intercourse with Indian tribes, and the ordinary correspondence with superintendents, agents, and subagents. He was succeeded September 30, 1830, by Samuel S. Hamilton, whose successor about one year later was Elbert Herring.

By the act of July 9, 1832, there was created in the War Department the office of Commissioner of Indian Affairs, who, subject to the Secretary of War and the President, should have "the direction and management of all Indian affairs and all matters arising out of Indian relations."

On June 30, 1834, an act was passed "to provide for the organization of the Department of Indian Affairs." Under this enactment certain agencies were established and others abolished, and provision was made for subagents, interpreters, and other employees, the payment of annuities, the purchase and distribution of supplies, etc. This may be regarded as the organic law of the Indian Department.

When the Department of the Interior was created by act of March 3, 1849, the Bureau of Indian Affairs was transferred thereto, and hence passed from military to civil control.

Section 441 of the Revised Statutes provides that "the Secretary of the Interior is charged with the supervision of public business relating to \* \* \* the Indians."

Section 463 of the Revised Statutes reads: "The Commissioner of Indian Affairs shall, under the direction of the Secretary of the Interior and agreeable to such regulations as the President may prescribe, have the management of all Indian affairs, and of all matters arising out of Indian relations."

*Commissioners of Indian Affairs*

# REPORT OF THE COMMISSIONER OF INDIAN AFFAIRS

DEPARTMENT OF THE INTERIOR,  
OFFICE OF INDIAN AFFAIRS,  
*Washington, D. C., September 1, 1924.*

SIR: I have the honor to submit this the Ninety-third Annual Report of the Bureau of Indian Affairs for the fiscal year ended June 30, 1924. Its contents pertain largely to the cardinal functions of administration established in recent years along the lines of improving the health of the Indians as the vital basis of their value to themselves and to our general population; of providing the educational guidance that will fit them for contact and competition with the progressive, English-speaking elements of the American people, and of protecting and developing their varied property interests in such manner as will train them in practical industry and self-support.

## HEALTH

**POPULATION.**—The Indian population is wholly dependent upon the difference between its birth rate and death rate for its accessions and losses. During the fiscal year to which this report pertains, there was a normal gain, as measured by reservation standards. The net increase, while not large, is a favorable indication of what may be expected under better industrial conditions and better health service, both of which are foreshadowed in the scheme of blending all constructive efforts in a five-year program, the main objectives of which are the reduction of infant mortality, the prevention of diseases, the rehabilitation, so far as practicable, of those who are incapacitated through illness, and the improvement of living conditions.

**DISEASES.**—Indians are subject to the same diseases which afflict other people. They have more trachoma and tuberculosis, but less diphtheria, scarlet fever, toxic goiter, cancer, typhoid fever, and cardio-vascular diseases. Under similar conditions of living, it is doubtful whether the Indians would have any more tuberculosis and trachoma than other people, and it is believed that as the industrial conditions improve and when the appropriations for sanitation and medical aid become sufficient to throw around them the same safeguards and give them the same protective attention as given to people in organized communities, preventable diseases will be no more prevalent among Indians than among the white people; for up to a certain limit, public health is purchaseable. Under adequately financed health efforts, a decrease in illness and in the death rate can be attained.

Indian mothers know too little of hygiene and sanitation, and under existing conditions so favorable to infection by the germs of tuberculosis—a disease to which many Indian children succumb—it

is exceedingly difficult to induce the parents to abandon their erroneous beliefs and customs fostered by the native medicine men, and turn to a hygienic way of living. Public hygiene in organized communities may be enforced, but personal hygiene must be taught, and the teaching process among Indians is slow; for general sanitary improvement and the observance of the laws of hygiene are dependent upon the intelligence of the community, as expressed through cooperative effort for the common good, and upon the state of advancement of the people.

**TUBERCULOSIS.**—There is more infection of tuberculosis among all children than is generally known, Indian children being no exception to the rule, but there are definite indications that tuberculosis is not so prevalent nor so fatal among Indians as formerly. The Indians are developing greater resistance and a higher degree of relative immunity; besides, better provisions obtain for the hospitalization and isolation of patients.

**TRACHOMA.**—Early in the year all Indian Service physicians were urged to take more aggressive measures against trachoma, and not wait for the coming of the special physician. Directions were issued to place all trachomatous pupils in school in order that they might receive treatment. Trachoma surveys were made during the year in Minnesota, Wisconsin, California, Arizona, and New Mexico, and thousands of cases received operative or other treatment. As a result of the surveys in Arizona and New Mexico, the southwestern trachoma campaign was organized to begin operation July 1, 1924. This campaign will cover the States of Arizona and New Mexico, and a portion of Utah, and, in its organization, scope, and purpose, it is probably the most extensive health effort ever undertaken by the Indian medical service.

The Indian appropriation act carried an extra allowance of \$130,000 for health work during the fiscal year 1925. Of this amount \$40,000 was allocated for the establishment of a hospital at Shawnee, Okla., utilizing the abandoned plant of the former boarding school, and the remainder was set apart for the improvement of health conditions among Indians, particularly with respect to trachoma and tuberculosis.

The Navajo Reservation, which has the largest population of any reservation of the United States, has been selected as the first battle ground in an aggressive campaign against trachoma, the selection having been decided upon not only because of its large population of Navajos but because it is believed that the superintendent, who has been with these Indians for more than 20 years, will be able to give a special impetus to the work. The trachoma campaign will rely altogether upon persuasion and demonstration to attain its purposes. The Navajos are a primitive people, and if success can be attained by these methods with them it will show that the policy is applicable among all Indians. There is no law under which Indians can be compelled to submit to treatment for trachoma, nor is it deemed advisable to resort to drastic measures in this particular. When a few are cured, the news will be broadcasted in their own way throughout all the Navajo country; and when a Hopi, Zuni, or a Pueblo is cured, he will pass the glad tidings along to his tribesmen as effectively as could be done by any radio broadcasting station in the world.

service by this class of employees, who number about 100. She will promote efficiency and unity in their efforts, coordinating their activities with the general health policy of the bureau, and maintain a continuous campaign for better home conditions among the Indians. It is hoped that her endeavors will have earnest cooperation by white communities everywhere in the Indian country.

**UNFULFILLED NEEDS.**—In last year's report there was presented the need for sanatoria schools of greater number, for hospitals for incurable patients suffering from tuberculosis, and for an institution for crippled children. These needs are still partially unsatisfied. With the increase in hospital facilities already planned for, the situation with reference to general hospital and sanatorium treatment will to a considerable extent be improved; but the plea of the underprivileged children with their longing for sympathy, encouragement, and the opportunity for self-expression and happiness is still unheeded. The crippled child is not asking for charity, but for simple justice, which is his birthright. The community owes these unfortunate children a right to all that science can do to give them a fair chance in the competitive race of life.

**ACKNOWLEDGMENTS.**—The Office of Indian Affairs desires to express its appreciation of all the efforts that have been made by various agencies and individuals to cooperate with it in its purpose to improve the health and sanitary condition for the Indian people. Among the organizations that should be mentioned particularly are the American Red Cross, the National Health Council, the United States Public Health Service, and the various State and county boards of health. There are also a large number of public-spirited organizations and citizens who have shown their friendliness to the cause. Grateful acknowledgment is made to all, including the Congress of the United States for increasing the appropriations for the current year's health work.

## SCHOOLS

**ATTENDANCE.**—Enrollment and attendance in most of the Government schools have been equal to capacity, the exceptions resulting mainly from frequent epidemics of contagious diseases, particularly in the Southwest. In a few instances lack of funds to employ teachers or to purchase equipment and supplies has prevented capacity attendance. The higher cost of nearly all classes of supplies last year seriously handicapped school work. Not infrequently funds were insufficient to provide actual necessities and too often day-school children were not properly clothed and nourished. Until more liberal appropriations for maintenance can be procured attendance should not be further increased. Congress has been fairly liberal in appropriating funds for increasing school capacity and rapid progress is being made toward providing facilities for all Indian children of school age, but funds for equipment and maintenance have not been increased according to needs. This has made it necessary to shorten the school term somewhat, limiting it to nine months. On account of home conditions quite generally among Indians, it would be desirable to lengthen the term rather than to shorten it. It is believed, however, that we have almost reached the peak of

financial requirements, because, although there are many children in the Southwest yet to be enrolled in the Government schools, the number in other sections entering public schools is increasing very rapidly. The amount appropriated and paid out for tuition last year was much larger than ever before, which is an encouraging feature in Indian education. Once in the public schools, Indian children become neighbors and competitors of children of other nationalities and thus learn the lessons of American civilization as they can not learn them when segregated.

**SUMMER SCHOOLS FOR RETARDED PUPILS.**—Immediately following the regular school term in June, 1923, summer sessions were organized in boarding schools for which funds were available and approximately 700 children were enrolled in 20 boarding schools. Of this number, 691 remained during the entire period of from four to six weeks, and at the end of the term 80 per cent of them, although having failed in the regular examination at the end of the year, passed the examinations given at the end of the summer session and were promoted to the next higher grade. If they had not attended the summer session, they would have been required to repeat their 1923 grade work at an expense of not less than \$200 per pupil, or at a total cost to the Government of approximately \$100,000. The actual cost of conducting the summer session was very light because the regular teachers did the teaching without additional compensation. Practically the only expense was for subsistence, which was comparatively little, as during the summer season many of the schools raise all vegetables needed and thus limit this expense to a minimum. But of greater importance than the saving of \$100,000 was the year gained in the education of these pupils whose places will be filled that much sooner by other deserving children. These summer sessions were so generally successful that it is hoped to make them permanent in our school program, as funds become available, for there must always be a considerable number who fall behind from lack of the individual attention they need, a condition existing more or less in all schools however well organized.

**IMPROVEMENT OF TEACHERS IN SERVICE.**—All instructors are encouraged to attend a summer session of not less than 30 days at least every other year. The law allows not to exceed 30 days' educational leave per year, but on account of the necessity of having teachers each year to conduct the summer sessions for Indian children it becomes necessary to divide the teaching force into two groups, which groups alternate, one going to school for teachers and the other teaching during the summer session operated for Indian children. The number of teachers attending summer schools for self-improvement has increased from 29 in 1921 to 335 in 1923.

**READING CIRCLE WORK FOR INSTRUCTORS.**—The policy of maintaining reading courses for those in the service has been continued. The books used during the year 1923-24 were: Human Conduct, Peters; The Principal and His School, Cubberly; Types of Elementary Teaching and Learning, Parker; Home Economics in Schools, Hanna; Teaching of Agriculture, Nolan; How to Teach a Trade, Selvidge. Human Conduct was read and thoughtfully studied by all employees and was made the subject for discussion at faculty meetings. Other books were quite generally read by those who were

directly interested in the respective subjects. The summer school work for teachers and the winter reading and studying of suggested courses are important means of increasing efficiency and are beginning to show definite results.

**PECUILIAR SCHOOL NEEDS OF THE NAVAJOS.**—Although it has never been possible to get an actual and reliable census of the Navajos, it is estimated that there are several thousand Navajo children of school age out of school because of lack of school facilities. The capacity of schools is being increased quite rapidly, but it is very expensive to build boarding schools which are the only type practicable for the Navajos because of the economic conditions among them. Therefore it will be several years until school facilities will be available for all of the Navajo children; moreover, the sheep industry being the principal source of income of the Navajos, they must have some of their children to help with the sheep during all seasons of the year. Because of these conditions it would be a means of getting all of their children into school at an early date and also of great economy in connection with the building program if the Navajo school plants were kept in operation during the entire year instead of for nine months as at present. Those children who are at home helping with the sheep during the regular school year while the others are in school could attend summer sessions and thus at least get a start in learning English and in elementary education instead of growing up in ignorance. Such a plan would undoubtedly appeal to the Indian parents as they feel, and are justified in the opinion, that they must have the help of some of their children at all seasons of the year in the care of their flocks. If such a policy were adopted practically all of the Navajo children would be given at least a short term in school without further delay. To make it possible to inaugurate this policy it would be necessary to appropriate more money for support of schools, as it would be impossible to conduct the schools continuously with the present force of employees and without more supplies.

**SUPERVISORS' CONFERENCE.**—Last year's educational work began auspiciously with a conference of several days in Washington by all supervisors of Indian schools for the discussion of policies and procedure under our school system. A comprehensive program in which a number of the office personnel took part covered fully the range of educational activities and established in many ways a more effective cooperation between the office and field service. Among the various subjects discussed special interest was shown in the welfare of returned students and the committee investigating this matter found ample evidence that the Indian Bureau has been placing students at work outside of the schools ever since Indian schools were established, hundreds annually as wage workers, as household and farm assistants, and in local industries in different sections; that ex-students are placed on railroads, highways, in factories, mines, cotton and beet fields, and other agricultural activities, and that some of the larger schools have patrons (householders, hotels, business houses, etc.) eagerly awaiting each term closing to give clerical, domestic, and other employment to the graduates. It was, however, recommended that the supervisor of Indian employment be given a woman assistant; that visits be made to the reservations and Indian

settlements to offer work to able-bodied, idle Indians; that cooperation be given by superintendents, day school teachers and others who should keep a list of Indians in need of work, and that superintendents and supervisors be expected to confer with local organizations and public-spirited individuals, including the churches, women's clubs, Y. M. C. A. and Y. W. C. A. and other civic welfare activities, and interest them in giving employment to Indians, showing them that the Indians are in the community permanently and may be a menace or an asset; that they are teachable; that it is their right to have a chance to become self-respecting, constructive workers; that they should have recreations and courtesy, and that it will be of economic advantage to offer help and direction to this end. It was also urged that very special interest in the career of girls be made a definite feature and that officials generally should endeavor to interview members of civic and religious organizations and women's clubs, with a view to awakening and guiding active interest in behalf of the Indian youth, particularly the girls, by assisting them to find self-supporting employment in exemplary surroundings and by offering such encouragement and sympathetic counsel as will win their attention and choice to the higher forms of culture, pleasure, and usefulness approved by our white civilization.

Another fortunate movement at this conference was that which has led to the organization of Junior Red Cross societies in nearly all of the Indian schools within the past year. Among the uplifting lessons taught by the World War is that of inspiring the lives of young people with the spirit of unselfish service. The Junior Red Cross under the motto, "I serve," is rapidly extending its membership and activities to the elementary and secondary schools of the world and in harmony with this crusade Indian children are now enlisted for an educational and pleasurable service to their homes, schools, and communities; for the reception of service from other American children, and for the cultivation of a superracial understanding and friendship and a finer cooperation in the common interests of all children. A simple but complete program has been worked out for all schools, and a special field worker has been assigned by the American Red Cross to Arizona and New Mexico to assist in organization and development through the Junior Red Cross of projects designed to meet some of the characteristic social problems of the Indian people. It is felt that these junior societies have an opportunity to serve with practical effect the returned student, the community center, certain lines of Indian art, and the domestic life of the parental home. It is already known that by correspondence with other than Indian schools and through class letters with classes of children all over the world there has begun a practical method of teaching English and a delightful acquaintance with children of other nationalities that brings broadening vision to Indian youth. But crowning all lesser benefits is the chaplet of unselfish service that should never wither amid the rivalries and complexities of an expanding civilization. We feel that large spiritual gains and strength of both individual and social character can be reaped from this cultivation of generous human sympathies, and that official appreciation is due the promoters of the Junior Red Cross and our service workers for their hearty cooperation.

## PERSONNEL

RECLASSIFICATION.—The success or failure of any institution or organization is determined more largely by the character of the personnel employed thereby than by any other factor. Modern, well equipped buildings contribute to the efficiency of any school, or institution, but they are unimportant as compared with the personnel. In any undertaking in which the human element is the important one to be considered and to be developed and improved, as is the case in the work of the Indian Service, the personnel must have not only human sympathy and vision but thorough, practical education and training and also experience. To make it possible to attract workers of this character to the Indian Service and to hold them with anything like permanency has been one of the greatest of difficulties to overcome because of the very low salaries offered and paid by the Government to Indian Service employees. Being one of the old bureaus of the Government, salaries were extremely low when compared with bureaus organized more recently, or as compared with salaries paid in the business or educational world, therefore the recent enactment of legislation providing for the reclassification of salaries of employees of the Federal Government, which will mean equalization and reasonable increases, is cause for great encouragement among all employees of this bureau, whether employed in the Washington office or in the field service.

With better salaries provided it is expected that increased efficiency will follow and that a consequent reduction in the number of employees will be practicable. Steps have already been taken to effect this reduction which is an economic necessity in view of the Government's plan for lower taxation.

## INDIAN LAND INTERESTS

ALLOTMENTS.—Last year allotments were made and approved to individual Indians embracing lands on various reservations as shown in the following table:

| Reservation                   | Allotments | Acreage    | Reservation                | Allotments | Acreage    |
|-------------------------------|------------|------------|----------------------------|------------|------------|
| Fort Independence, Calif..... | 40         | 116.28     | Crow Creek, S. Dak.....    | 1          | 80.00      |
| Fond du Lac, Minn.....        | 3          | 196.15     | Lower Brule, S. Dak.....   | 17         | 3,234.78   |
| Leech Lake, Minn.....         | 1          | 80.00      | Rosebud, S. Dak.....       | 1          | 160.00     |
| Fallon, Nev.....              | 4          | 40.00      | Standing Rock, S. Dak..... | 1          | 160.00     |
| Walker River, Nev.....        | 2          | 40.00      | Quinalaet, Wash.....       | 1          | 80.00      |
| Fort Berthold, N. Dak.....    | 539        | 162,823.29 | Oneida, Wis.....           | 1          | 45.00      |
| Klamath, Oreg.....            | 7          | 870.00     |                            |            |            |
| Umatilla, Oreg.....           | 23         | 1,868.08   | Total.....                 | 642        | 169,953.53 |
| Warm Springs, Oreg.....       | 1          | 160.00     |                            |            |            |

In addition to the foregoing, 1,171 allotments were made, on schedules not yet approved, to the Indians of the Fort Belknap Reservation, Mont., covering approximately 550,000 acres or nearly 500 acres for each Indian; also allotments to 91 Indians of the Kalispell Reservation, Wash., each Indian to receive approximately 40 acres of agricultural land. Allotments are being made to the non-removal Mille Lac Indians in Pine, Mille Lacs, and Aitken Coun-

ties, Minn., which will probably be completed during the current calendar year. The allotment work among the Indians of the Mission Reservations in southern California is also in progress. On the public domain, 103 allotments were made in various States, embracing 14,449.88 acres.

**EXTENSION OF TRUST PERIOD.**—The period of trust was extended by order of the President on allotments made to Indians on the reservations at Hoopa Valley, and Round Valley, Calif.; Umatilla, Oreg.; Lake Traverse, S. Dak.; and Kickapoo, Okla. These extensions cover more than 3,000 allotments, 3 of them for 10-year periods and the others 15 years.

**CALIFORNIA INDIANS.**—Three tracts of land containing 190 acres were purchased for homeless Indians in California, at a total cost of \$7,650, from funds appropriated by Congress for this purpose. It is estimated that about 250 Indians may obtain home sites on these tracts.

**FORT SILL APACHES.**—Pursuant to the act of August 24, 1912 (37 Stat. L. 534), and acts supplemental thereto, 800 acres of inherited Indian lands were purchased for 11 Indians for the sum of \$25,450. These lands are located on the Kiowa, Comanche, and Apache Reservation in Oklahoma, and will provide home sites for the Indian beneficiaries and their families.

**PAPAGO INDIANS.**—An important decision was handed down by the Supreme Court for the District of Columbia in favor of the Government in the case of the Pueblo of Santa Rosa *v.* The Secretary of the Interior et al., involving a total of about 2,000,000 acres of land in southern Arizona occupied by the Papago Indians. This case has been pending in the courts since 1915, and although brought nominally in the name of the Indians, the suit was actually filed and sponsored by certain white men who claimed an interest in the land through an alleged purchase from the Indians more than thirty years ago.

**INDIANS IN SAN JUAN COUNTY, UTAH.**—Field work in connection with individual allotments for two small bands of Utes and Paiutes in southeastern Utah has been completed. These Indians were under the leadership of Old Posey and Polk, and had no fixed habitation. Old Posey is now deceased. Applications have been filed through the usual channels and a 25-year trust patent will be issued to each applicant in the absence of any valid objection under applicable laws and regulations. About 180 Indians will be benefited.

**LAND SALES AND LEASES.**—Sales were made of 1,286 tracts of allotted land, aggregating about 125,099 acres. Many of the sales were for cash, but the majority were on time payments of 25 per cent down the remainder being payable in installments of 1, 2, and 3 years. Many of the allotments were inherited land, as every possible encouragement is given the Indians to cultivate and otherwise improve their individual holdings for homemaking purposes. In many cases where allottees could not use their lands to advantage, either for agricultural or grazing purposes, leases were made for cash, or both cash and improvements, and some on share of crop.

**FEE PATENTS AND COMPETENCY CERTIFICATES.**—Each application for a fee patent or competency certificate was carefully scrutinized. Many applications were denied and approvals given only where it

seemed to be clearly shown by what the applicants were doing for themselves, and had accomplished for a year or two, that they were as competent as our average citizens to look after their own business affairs. The number of approvals was 913 covering 106,199 acres.

**SWAMP LANDS IN WISCONSIN AND MINNESOTA.**—It was reported last year that request had been made upon the Governor of Wisconsin for appropriate action by the legislative branch of the State government for a reconveyance to the United States of the swamp and overflowed lands on the Menominee and Lac Courte Oreille Reservations in Wisconsin. No satisfactory arrangement for such action could be entered into, and later the matter was taken up with the Department of Justice with a view to instituting action against the State for the recovery of the lands. With the consent of the court, an action for the recovery of the lands was filed in the Supreme Court against the State on April 21, 1924.

With reference to the previously reported suit in the Supreme Court against the State of Minnesota for the recovery of the swamp and overflowed lands within the reservations of the State, the reply of the State to the Government's bill of complaint has been filed and marked progress toward a settlement of the issue has been made.

### IMPORTANT LEGISLATION

**EASTERN BAND OF CHEROKEE INDIANS.**—The act of June 4, 1924, authorizes the Eastern Band of Cherokee Indians to convey all its lands, moneys, and other properties to the United States, in trust, for an equitable distribution thereof among the individual members, and further authorizes the Secretary of the Interior to make a new tribal roll, whose action in the matter shall be conclusive as to the final membership of the band.

These Indians are the descendants of those who under article 12 of the New Echota treaty of 1835 elected to remain in southwestern North Carolina instead of removing west of the Mississippi River, as others of their number did in 1838, and under this treaty and acts of Congress to carry out its provisions the remaining band became owners in common of several thousand acres of land in the counties of Jackson, Swain, Cherokee, and Graham. Congress by the act of July 27, 1868, directed that the Commissioner of Indian Affairs should have the same supervision of the eastern North Carolina Cherokees as of other Indian tribes. In 1889 these Indians were incorporated by an act of the General Assembly of North Carolina, ostensibly to facilitate their transaction of business. With the aid of the Federal Government title to their lands was perfected and by departmental consent they sold several thousand acres, but still own about 60,000 acres, none of which can be sold without consent of the Secretary of the Interior, and under the act of June 4, 1924, these lands, as above stated, are to be conveyed to the United States for the purpose of allotting them.

**OTHER LEGISLATION.**—No Congress in recent years has equaled the Sixty-eighth in the passage of important bills relating to Indian affairs. Among the more notable acts not mentioned elsewhere are the following: Extending restrictions against alienation on homestead allotments to Kaw Indians in Oklahoma; reserving additional

lands for the Indians of the Zia Pueblo in Arizona; reserving additional lands for the Paiute-Goshute Indians in Utah; authorizing allotments to Indians on the Lac du Flambeau Reservation, Wisconsin; authorizing an appropriation of \$25,000 to purchase land for the Temoak Band of Indians in Nevada.

**INDIAN CLAIMS.**—Jurisdictional bills authorizing the adjudication of the following Indian claims were enacted during the year, and the Indians are preparing to enter suit:

Wichita and affiliated bands of Indians of Oklahoma. Act approved June 4, 1924.

Blackfeet, Blood, Piegan, Gros Ventre, Flathead, Kootenais, Upper Pend d'Oreilles, Nez Perce, and Colville Nations or tribes of Indians in Montana, Idaho, and Washington. Act of March 13, 1924.

Stockbridge Tribe of Indians in Wisconsin. Act of June 7, 1924.

Amendatory legislation for the relief of the Saginaw, Swan Creek, and Black River bands of Chippewa Indians in Michigan was approved May 24, 1924, which will, no doubt, make possible the adjudication of their claim.

By the act of April 28, 1924, \$85,000 was authorized to be appropriated for the relief of dispossessed allotted Indians of the Nisqually Reservation, Wash.

The act of Congress approved April 14, 1924, authorizes the payment of just annuity claims of persons of Chippewa blood whose names have been erroneously omitted or stricken from the Chippewa annuity rolls; or who have been or may hereafter be found entitled to enrollment for payments authorized by section 7 of the act of Congress approved January 14, 1889.

The claims of the Sioux Indians mentioned in the last annual report amount to many millions of dollars. Considerable progress has been made toward collecting, classifying, and arranging the evidence in the case, which will be very voluminous.

## INDIAN FARMING AND STOCK RAISING

**OBSTRUCTIVE ATTRACTIONS.**—The most promising opportunity of the adult Indians is in the productive use of their land. Of course, many of the younger generation who have had the advantages of vocational training and have become interested in educational, commercial, and mechanical pursuits follow their ambitions away from reservation life and are becoming successful workers in the miscellaneous activities of white communities, which is a creditable and encouraging sign. But for those who continue on the reservations the soil is their capital and they should learn how to use it in providing comfortable and healthful homes and establishing themselves as thrifty, progressive citizens of the State that holds their future. Indian lands are not always the best. Considerable areas are inferior, but where not well suited to cultivation they are often valuable for grazing, so that in much of the Indian country farming or stock raising offers a gainful occupation.

In the special effort given to this industrial side of our work, in which the value of settled habits of living and home attachments is prominent, we meet with opposition, more serious than is generally

realized, through the "show" projects that offer constant inducements to the Indians to leave their homes and local means of support for pleasurable attractions of various kinds that usually bring them little or nothing above subsistence and the managers of which often go "broke" and leave the Indians stranded hundreds of miles from home. If departmental sanction were given to all the requests received for Indians, from a few dozen to several hundred, to add savage scenery to wild-west performances or give so-called pageantry a pagan coloring, thousands of the Indians would be on the road much of their time with nothing at home of any value when they returned.

This phase of the Indian situation is mentioned to suggest how helpful to our work would be the sentiment of white folks everywhere in support of a policy that would save the Indian from vagabondage and encourage him in self-help, thrift, and the art of individual industry that he must learn and practice in order to be fit to survive in the midst of modern competition from which eventually no power can save him.

**INDUSTRIAL SURVEY AND FIVE-YEAR PROGRAM.**—In the face of various obstacles, however, there was a substantial forward movement last year. The industrial surveys started two years ago have accomplished much in awakening Indians to a self-supporting use of their resources. The personal visits of superintendents to their homes have created a bond of common interest, which makes a solid foundation on which to work. The superintendents are unanimous in saying that this experience has been the greatest single factor in obtaining the cooperation of the Indians.

These surveys are made as a part of the program by which a certain objective is set for five years with plans for its attainment. All assistance is being given the Indians to make use of their possessions and improve their living conditions. Letters received from superintendents throughout the service report more industrial activity last year and larger acreage under cultivation than ever before.

**STOCK RAISING.**—The livestock industry of the Indians, notwithstanding adverse conditions in the country at large, show advances during the year, especially noticeable in the Navajo country where the effort of the Government to have Indians improve their sheep is beginning to be appreciated, as shown by their request for a sufficient number of high-grade rams to improve the grade of their sheep, to be paid for in cash or on the reimbursable plan from individual funds.

A general survey of the dairy industry on the various reservations was made during the year. This has resulted in the elimination of many unprofitable animals and the increased efficiency of those retained in the herds, or the addition of first-class animals to replace those disposed of.

The campaign to have Indians remove their worthless horses from the range and dispose of them, so that the grazing might be available for more valuable stock, has been carried on for several years with better results the past year, during which the Indians of the Spokane Reservation forwarded a petition requesting approval of a plan to dispose of their worthless horses and replace them on the

range with first-class cattle. Indians of other reservations are also beginning to appreciate the necessity of action along this line.

**REIMBURSABLE FUND.**—The reimbursable fund has probably been the main factor in the industrial progress of the Indians. Its use is widespread, ranging from the purchase of seed, farming implements, and sawmills to breeding stock, etc. In all cases the beneficiaries are carefully selected. This appropriation is teaching the Indians to pay for what they get and enables them to obtain the necessary equipment to become self-supporting and improve their economic condition generally.

**BOYS' AND GIRLS' CLUBS.**—Club work for boys and girls has been inaugurated on 17 reservations, with a total enrollment of over 400 children from 9 to 14 years of age. The projects embrace sheep, pig, poultry, calf, corn, potato, garden, bread, canning, and sewing clubs. With the exception of two reservations each club member has financed his or her own project. The public school, because now attended by a great many Indian pupils, is used as the point of contact for club work. The proposition is placed before the Indian children the same as the white children by the county agent. The club leaders include Indian Service farmers, public-school teachers, neighboring white farmers, and Indian men and women who have met with success in such work. The county and State fairs are used to stimulate interest in the club work. An Indian girl won sufficient prizes on canned goods to pay her tuition in high school for the coming year. Interest in club work is further aroused by permitting the boys and girls to attend encampments under the auspices of the extension division of the Department of Agriculture cooperating with the State college, where lectures, demonstrations, and other activities are held. On one reservation the club members were sent to the State university to attend a short course on club projects. The plans for the coming year may be summarized as follows: (1) Improved leadership and better organization of local units; (2) increased enrollment; (3) periodic demonstrations by county agents in central locations; (4) greater variety of projects; (5) institutes and short courses.

The parents learn almost as much as the children through these club projects, and in this way will frequently take up some branch of farming work without realizing what prompted them to do so.

## FAIRS AND EXHIBITS

The strictly Indian fair on the reservation was inaugurated as a means of stimulating the interest of the Indians in agriculture and related industries at a time when no county fairs were held by the whites in the vicinity of the reservation because of the then sparsely settled condition of the country. However, with the coming of the whites, the organization of counties, and the opening of the reservation to settlement and entry, county fairs began to be held by the whites.

The policy now is to discontinue the strictly Indian fair on the reservation and to have the Indians exhibit their farm products, livestock, etc., at conveniently located county fairs on the same basis as other exhibitors. Quite a number of the strictly Indian fairs have

been discontinued within the past few years, and eventually it is hoped that they will all be abolished, the Indians taking part in the county fairs just like their white neighbors. The Indians have won many prizes at such fairs in open competition with other exhibitors.

### ROADS AND BRIDGES

Special appropriations in the sum of \$109,500 were available for the construction and repair of roads and bridges during the year on the following reservations: Fort Apache, Ariz., \$15,000, Hoopa Valley, Calif., \$8,000, Red Lake, Minn., \$9,000, Mescalero, N. Mex., \$15,000, Osage, Okla., \$35,000, Taholah, Wash., \$7,500, Shoshone, Wyo., \$20,000.

The use of 100 per cent Federal aid, as mentioned in my last annual report, has given a remarkable impetus to road work on the Indian reservations, and projects for such work have been approved for an aggregate length of 249.87 miles and total Federal aid of \$2,786,-449.31.

### OIL AND GAS

The high prices of crude oil and the tremendous demand for the products of petroleum in past years have resulted in the search for oil being extended to all sections of the country, in consequence of which leases on restricted Indian lands for oil and gas mining purposes are being made in practically every State where such lands are located, and oil fields are in operation on Indian lands in Oklahoma, Montana, Wyoming, and New Mexico.

Theoretically the basic conditions of the oil industry during the year improved somewhat over the previous year, which was characterized by overproduction and unstable market conditions. The industry is still far from normal, however, and at the close of the year the larger purchasing companies were again prorating their runs and storing approximately 50 per cent of the oil from leases to which their lines are connected. Notwithstanding these adverse conditions oil and gas operations on restricted Indian lands were fairly successful, as shown by the fact that nearly 226,910 acres were leased for oil and gas mining purposes. The gross oil production for the year was approximately 49,640,458 barrels, and the revenue received by the Indians from existing leases approximated \$29,-145,517.

In the Osage Reservation alone 120,000 acres were offered for oil mining lease, 62,448 acres selling for a grand total of \$16,457,000. The outstanding feature in these sales was the record-breaking prices received for tracts in the famous Burbank pool, one 160-acre tract bringing \$1,990,000, another \$1,995,000 and each of several others selling for more than \$1,000,000. The total revenue to the Osage Indians from oil and gas leases was \$24,670,483.

A sale of leases on unallotted lands of the Navajo Treaty Reservation, N. Mex., on which oil was discovered last year netted to the Indians \$80,598. The sale included exploratory leases on the Tocito, Table Mesa, Rattlesnake, and Beautiful Mountain structures in undeveloped portions of the reservation, requiring extensive drilling operations. On the Rattlesnake structure, which is located about 12

miles west of the discovery well on the Hogback structure, three producing wells and one dry hole have been drilled. The oil produced from both these structures is from the same formation and is encountered at a depth of about 800 feet. No oil has yet been found on the other three structures. At the end of the year 16 wells had been drilled on the reservation, 8 of which are producers, with an estimated capacity of from 20 to 1,200 barrels per day each. Plans are under way for the construction of a pipe line to the field, which will mean a market for the oil, expansion of the field, and more revenue to the Indians.

On the Southern Ute Reservation in New Mexico, on which three wells producing large quantities of gas have been drilled under leases heretofore approved, five exploratory leases were sold on June 10, 1924, for a total bonus of \$43,600. One lease brought \$36,000, an exceptionally high price for a "wildcat lease." No oil has been discovered on the reservation, but as the leases provide for immediate drilling operations, the question of oil in paying quantities will, no doubt, be determined during the current year.

Following the decision of the Supreme Court of the United States in the case of *Oklahoma v. Texas* (256 U. S. 70; 258 U. S. 574; 261 U. S. 345; 262 U. S. 505, 734), holding, among other things, that allotments made to the Kiowa, Comanche, and Apache Indians on the north side of the Red River in Oklahoma include and cover the right and title to the river bed between such tracts and the medial line of the river, a number of persons, who had entered upon the river-bed land of these Indian allottees under attempted placer locations initiated in accordance with the mining laws of the United States, applied for preferential rights to oil and gas leases based on the expenditure of money in the effort to discover and produce oil. After careful consideration the conclusion was reached that, in the absence of any wells having been completed producing oil or gas in paying quantities, leases on the areas riparian to the Indian allotments should, in the interest of the Indians, be offered at public auction to the highest responsible bidder, with the understanding, however, that any property, either machinery or casing, placed by placer claimants on the lands to be sold, may be removed by them in event they are not the successful bidders.

### INDIAN EMPLOYMENT

The year marked a steady gain in the number of Indians finding remunerative employment. The demand for Indian labor is greater than the supply, and no shortage of good wages and food prevails for Indians willing to work. Their wage service is increasing in agriculture, railroading, land reclamation, in telephone, telegraph, and highway construction, and wherever earnings are available in beet fields, or by picking fruit, gathering nuts, herbs, wild rice, and other products. Automobile factories continue to employ ambitious young men and advance them as their skill and experience warrant. Hundreds of Indian school graduates are giving excellent service in Government and commercial positions, and approximately 2,000 Indians are employed in our service.

The cotton fields of the Southwest are attracting an increasing number of Indian laborers, and a fleet of trucks transports them to

## RECAPITULATION.

<sup>1</sup> Unknown.<sup>2</sup> Estimated.

Difficulty has been experienced in obtaining adequate water supply for the Indians on the Walker River Reservation in Nevada. Due to a shortage of supply, the white water users along the stream above the Indian reservation are utilizing practically all of the available water, so that very little other than seeped and return flow reaches Indian lands. The situation became so serious last spring that aid from the Department of Justice was sought. It is apparent from existing conditions that court action will be necessary in this case before the Indians will be granted their full rights, owing to the location of their lands with relation to lands of the whites subject to irrigation.

Work has progressed very satisfactorily on the rehabilitation, enlargement, and relocation of the canals of the Fort Hall project in Idaho, for the purpose of adequately caring for the irrigable lands on this project which have heretofore been estimated at 52,000 acres, but under a recent survey shown to reach approximately 55,000 acres. By an act of Congress approved May 9, 1924, authority was granted for the disposal of lands on this reservation, commonly referred to as the Fort Hall Bottoms, for reservoir purposes for use in connection with the Minidoka irrigation project under the Reclamation Bureau. The price agreed upon, after several conferences between the bureaus interested was \$700,000, which met with the approval of a delegation of Indians duly elected by the tribal council and sent to Washington for this purpose. The area of land to be flooded is within the limits of what would be a 1,700,000 acre-foot contour line plus a 5-foot freeboard. The determination of a reservoir of this capacity saves to the Indians for their tribal use the better class of lands in the Fort Hall Bottoms, which is of considerable importance to them. The act provides for not to exceed \$100,000 of the money stipulated to be paid to the Indians for use in relocating, enlarging, and reconstructing the main canal of the Fort Hall irrigation project so as to provide irrigation facilities for the Indian lands situated in the southern portion of the reservation commonly known as the Michaud Flats, and thus to secure irrigable lands for those Indians who were allotted on the Fort Hall Bottoms and are required by the act to relinquish their allotments. The soil tests show that the land referred to as the Michaud Flats is of the highest character and quality in that section of the State, after water has been applied. Much benefit to the Indians is, therefore, secured by this legislation.

Following your transfer last spring of the administration of the construction, operation, and maintenance of the Flathead Indian project, Montana, from the Bureau of Reclamation to the Irrigation Service of this bureau, investigations were made which indicate favorable possibilities of making a success of this project, that has an ultimate irrigable area of 125,000 acres. It appears that in the past considerable speculation in lands existed, due to lack of a uniform water rental or assessment for operation and maintenance against all the lands on this project to which water can actually be served but requiring only payment for water from landowners who applied therefor, and that such speculation resulted in the placing of an added burden upon the actual farmers of the project. In order to alleviate this situation and to effect justice throughout the

project, a minimum uniform charge was assessed against all lands on this project that can actually be served with water. This minimum charge, fixed at 25 cents per acre, will be credited on the amounts due from those landowners actually using the water and, it is hoped, will have a tendency to eliminate the speculative feature and induce more owners to farm their lands or dispose of them to others desiring to actually place the lands in a state of cultivation.

With reference to the Blackfeet and Fort Peck Indian irrigation projects, the administration of which you also transferred from the Bureau of Reclamation to this bureau, their prospects are not very encouraging, and at this time there are comparatively few acres of either of them under cultivation, but every effort is being made to induce the Indians to cultivate their lands. Operations on all three projects transferred will receive close attention with a view to reaping practical returns from the investments involved, and it is hoped that definite progress can be reported a year hence.

An act approved September 21, 1922, authorized the construction of a spillway and drainage ditch to lower the level of Lake Andes in the Yankton Reservation, S. Dak. This act did not authorize the acquiring of rights of way for use in connection with the project and performance of the work was held in abeyance until such authority was obtained. On May 20, 1924, Congress authorized the use of part of the money appropriated for this purpose to acquire necessary rights of way across private lands by purchase or condemnation under judicial process. This work will be completed in the near future.

An appropriation was made for payment of part of the expense assessable against the Indian lands to be included in a drainage district organized in pursuance to the State laws of Wyoming for the drainage of Indian lands on the ceded portion of the Wind River Reservation and lands in private ownership adjacent thereto. The work will be pushed as rapidly as possible and when the system is completed a considerable area of Indian lands now water-logged and unfit for cultivation will be made available for farming. Irrigable surveys of the lands within both the Wind River project, in Wyoming, and the Crow project, in Montana, are being made for the purpose of eliminating any areas that can not actually be economically irrigated.

Work has been continued on the construction of the Wapato unit in the Yakima Reservation, Wash., and this project, with the exception of four generating units and pumping plant is about completed. It is estimated that these units, for the generation of electricity to operate the pumping plant, will cost \$310,000, the pumping plant alone about \$260,000, and it is hoped to have this part of the work completed during the fiscal year 1926. When these units and pumping plant have been constructed and placed in operation the Wapato unit of the Yakima project thus completed will serve 120,000 acres of land. This undoubtedly is one of the finest irrigation projects on any of the Indian reservations and compares favorably with any other irrigation project in the West. The Indians on this reservation have been allotted 80 acres of irrigable land, 40 acres of which have a free water right, and 40 acres supplied from storage reser-

voirs are assessable for the water right in addition to the construction, operation, and maintenance.

By an act approved May 9, 1924, authorizing the deferring of payments of irrigation charges, regulations were approved by the department under which water users are granted two classes of relief on charges that accrued prior to March 2, 1924. The first class deals with the operation and maintenance or water rental accruals prior to that date, and in all proper cases relief will be given granting extension up to March 1, 1927, in which to pay these charges. Interest will be charged on the deferred payments at the rate of 5 per cent per annum in lieu of any penalty or interest then in existence. In the event water users show that it is impossible for them to pay these charges by that date relief under section 2 of the act may be granted extending the accrued assessments over the remaining period yet to run on the construction charges. Under this legislation considerable relief and benefit are extended to the water users.

### CITIZENSHIP

A very important enactment of legislation during the last session of Congress was that approved June 2, 1924, granting citizenship to Indians, as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.* That all noncitizen Indians born within the territorial limits of the United States be, and they are hereby, declared to be citizens of the United States: *Provided*, That the granting of such citizenship shall not in any manner impair or otherwise affect the right of any Indian to tribal or other property.

Under this act, all Indians born within the territorial limits of the United States, who had not theretofore been made citizens, became citizens on that date, without the necessity of any formality of application, judicial hearing, issuance of certificate, or otherwise.

Since the act specifically provides that the granting of such citizenship shall not impair or otherwise affect the right of any Indian to tribal or other property, their property rights continue to be protected, and they are not thrown en masse upon the mercies, or subject to the prey, of unscrupulous persons. The release of the trust or restrictions upon Indian property will continue to be determined upon the merits of the individual cases.

As native-born Indians are now citizens of the United States, they are entitled to suffrage under the same conditions as other residents of the States. They should, therefore, investigate the election laws of their States to enable them to register or otherwise comply with the requirements necessary to entitle them to vote.

### THE ADVISORY COUNCIL ON INDIAN AFFAIRS

Special recognition should be given in this report to the careful and constructive work done by the advisory council on Indian affairs assembled by you on December 12, 1923. This committee of public-spirited and representative citizens from all sections of the country, including members of the Indian race, entered upon its duties with helpful purpose and thorough inquiry. Its discussions upon many phases of Indian conditions and administration were candid, sympa-

thetic, and searching, and its concluding resolutions are a valued contribution to the Indian Service. I am greatly encouraged thereby and wish to share in grateful acknowledgment of the council's closing expression, as follows:

We, the members of the advisory council on Indian affairs, highly appreciate the privilege of this conference, made possible by the invitation of the Secretary of the Interior, and desire to assure him we are deeply conscious of the fact that he, the Commissioner of Indian Affairs, and their associates are rendering great service in protecting and promoting the interests of the Indians within the limitations of their authority and have at heart their largest welfare.

## LAW AND ORDER

**THE SUPPRESSION OF THE LIQUOR TRAFFIC.**—Much attention is given to protecting the Indians from the use of intoxicating liquors. The isolation, seclusion, and remoteness of some of the reservations, and the location of the largest reservations near the Canadian and Mexican borders make the manufacture, sale and introduction of illegal liquors easy. The bootlegger is a cunning, resourceful, and treacherous offender, and finds the Indian an easy prey.

Following national prohibition, the continued reduction of the special appropriation for the suppression of the liquor traffic among Indians has made it impossible to maintain an adequate force, but the small number of special enforcement officers employed, who know the habits and characteristics of the Indians, with the cooperation of the reservation superintendents and employees under the jurisdiction of the superintendents, have obtained gratifying results. The number of convictions secured and the quantities of illegal liquors seized are convincing evidence that the work of the liquor suppression service of this bureau is valuable and effective.

**PEYOTE.**—Legislation has not yet been enacted to enable effectual action in stopping the spread of the peyote evil among Indians. The national antinarcotic conference held in Washington last year adopted the following resolution:

In view of the medical and other evidence showing that peyote is an article which is detrimental to the health and moral welfare of the American Indians, and in view of the insidious and alarming rapidity with which its use is spreading; be it

*Resolved*, That we recommend and urge that Congress pass appropriate legislation to stop the spread of the evil influence thereof by prohibiting its use, sale, and possession.

A bill was introduced in the present Congress, but it has not yet been enacted into law.

## FORESTRY

The first half of the fiscal year fell within a period of unusually heavy production of lumber in the Northwest. This resulted in a large surplus of lumber at the mills and a consequent decline in production on Indian lands during the first six months of the calendar year 1924. The income from timber cut on the Flathead Reservation in Montana in the fiscal year ending June 30, 1924, was approximately \$250,000; on the Colville, Spokane, Quinaielt, and Tulalip jurisdictions in the State of Washington nearly \$500,000, and the actual cash return for timber removed from lands within the Kla-

math Indian Reservation in Oregon was over \$750,000. Prior to 1917 no timber sales of consequence had been made on any one of these reservations, except dead and windthrown timber on the Flathead. Thus in eight years the logging enterprises on reservations in these three States have been developed so as to produce an annual income of \$1,500,000. Less important operations were conducted on the Coeur d'Alene and Nez Perce Indian lands. On the Metolius unit of the Warm Springs Reservation, sold in 1922, the cutting of timber has not yet been started. In May, 1923, logging operations were begun on the Elk and Silver Creek unit of the Mescalero Reservation, and during the fiscal year \$77,283.61 was derived from 20,352,720 feet of timber cut within the Jicarilla Reservation in New Mexico. The only logging operation in Arizona was on the Fort Apache Reservation, where 55,774,100 feet were cut at the rate of \$3 per thousand feet. Aside from the cutting of about 20,000,000 feet at the Menominee Indian Mills in Wisconsin, only limited operations were conducted on Indian lands in Minnesota and Wisconsin during the year.

On a unit of 65,000,000 feet offered for sale on the Flathead Reservation, Mont., \$4.87 per thousand feet was received for yellow pine. In Washington a small quantity of yellow pine within the Coeur d'Alene Reservation sold for \$6 per thousand, and about 18,000,000 feet of yellow pine on the Spokane Reservation brought \$3, while a large and scattered area of yellow pine in the northeastern part of the Colville Reservation was sold for \$3.10 per thousand feet. On four large units offered on the Klamath Reservation, Oreg., late in the fiscal year 1924 yellow and sugar pine brought the following prices: Trout Creek unit, \$4.78; North Marsh unit, \$5.53; Squaw Flat unit, \$5.72; and Long Prairie unit, \$6.67. The prices of \$5.72 and \$6.67 are the highest that have been received for Klamath timber and are believed to be the highest prices at which large tracts of yellow pine timber have ever been sold in Oregon, California, or Washington. Each of these contracts provides for two definite periodic increases in stumpage prices and for further increases within definite limits after the first 10-year period. A large but inaccessible unit of rather inferior quality of spruce, fir, cedar, and hemlock was sold on the Makah Reservation in western Washington.

The steady improvement in telephonic communication and in the lookout and patrol organization is reflected in the comparatively small expenditures for fire suppression and the relatively insignificant losses from forest fires during the year. Experience in the Indian Service, as in other branches of the Federal administration, in State work, and in private forest protection, has shown the value of thorough organization of the protective agencies.

During the past year special attention has again been given to the standardization of the records as to forestry work at the various agencies. Previous efforts along this line have been only partially successful because of lack of adequate supervision. It is the purpose of the forestry branch to devote attention to the accounting features at agencies hereafter as may be necessary to insure that there is an accurate and complete record as to all expenditures and income connected with the administration of the forests. Nearly all of the field employees have recognized the advantages that would accrue from

complete and accurate records and have responded generously to suggestions as to the perfecting of old records and the maintenance of a higher standard in the future.

### PUEBLO LANDS

Final adjudication and settlement of conflicting titles affecting lands claimed by the Pueblo Indians of New Mexico will become accomplished facts as a result of the enactment of the Pueblo Indian law by Congress, approved June 7, 1924. There are about 20 pueblos, involving a total Indian population of between 6,500 and 8,000, each pueblo consisting of about 17,000 acres of land, making a grand total of 340,000 acres. These Indians were found by Coronado and the first Spanish explorers in 1541, many of them residing in villages and occupying the same lands that the Pueblo Indians now occupy. The rights of these Indians to the land they occupied was recognized by the Spanish conquerors from early days. During the Spanish occupation of New Mexico some grants were also made to non-Indians by the Spanish Government. Upon the termination of Spanish sovereignty in this territory, these Pueblo Indians came under the jurisdiction of the Mexican Government, which gave them many political and civil rights. All of the land grants made to and held by the Indians have been and are now held in a type of communal occupancy and ownership. The relationship of the inhabitants of this territory and the Government of the United States was established by the treaty of Guadalupe Hidalgo, in 1848, and in 1859 Congress confirmed the Spanish grants to the Indians. The legal status of these Indians was not finally determined until 1913, when the Supreme Court of the United States passed upon the subject. Up to that time it had been assumed by both the Territorial and State courts of New Mexico that the Pueblos had the right to alienate their property. From earliest times also the Pueblos had invited the Spaniards and other non-Indians to dwell with them, and in many cases Pueblos and individual Indians attempted to convey lands to non-Indians, which, under the decision of the Supreme Court, they were not competent to do. As a result of this situation, conflicts as to title and right of possession arose and exist in many instances.

There are now approximately 3,000 claimants to lands within the Pueblo grants, the non-Indian claimants with their families comprising about 12,000 persons. With few exceptions, the non-Indian claims range from a town lot of 25-foot front to a few acres in extent. To settle the complicated questions of title and to secure for the Indians all of the lands to which they are entitled is the purpose of the legislation. The law provides for a Pueblo Lands Board to consist of the Secretary of the Interior, the Attorney General, and a third member to be appointed by the President of the United States.<sup>1</sup> The Secretary of the Interior and the Attorney General may act through assistants in investigations and deliberations conducted in New Mexico, with headquarters in Santa Fe. The duty of

<sup>1</sup> The President has since appointed Mr. Roberts Walker, an attorney of New York City, as his representative on the board.

the board is to investigate, determine, report, and describe the lands within the boundaries of any lands granted or confirmed to the Pueblo Indians by the United States or any prior sovereignty, title to which the board shall find not to have been extinguished in accordance with the provisions of this act. It is required that the board shall be unanimous in all decisions by which it is determined that the Indian title has been extinguished. The board is also required to report upon each pueblo as a separate unit and to file one copy of the report with the Attorney General, one with the Secretary of the Interior, and one with the Board of Indian Commissioners. Upon the completion of each report the Attorney General is required to institute a suit to quiet the title to the lands described therein as Indian lands, the Indian title to which is determined by the report not to have been extinguished. Since 1848 titles to these Pueblo lands have been in dispute. A way is now provided through the legislation recently enacted to provide for an early and definite settlement of all Indian and non-Indian claims to these lands. The law is eminently fair to the Indians and also to the settlers. If the board finds that the United States Government was negligent in not bringing proper suits to recover lands for Indians, by reason of which nonaction such lands have definitely been lost to the Indians, compensation is to be made to the Pueblos for the value of such lands; the same may be said where any water rights have been lost to the Indians by reason of nonaction of the Federal Government. The Pueblo Lands Board now has under consideration the preparation of rules and regulations under which the act will be administered and will no doubt at an early date begin its activities in the field and make the preliminary investigations necessary to a final determination of land titles between the Indians and non-Indian claimants.

### FIVE CIVILIZED TRIBES

Progress has been made toward the closing out of the tribal affairs of the Five Civilized Tribes. In the Choctaw and Chickasaw Nations the remaining tribal property is valued at \$12,986,292.51; in the Creek Nation at \$130,142.48 and in the Seminole Nation at \$30,000. No tribal property remains to be disposed of in the Cherokee Nation. In view of the near approach of the winding up of the tribal affairs and the desire of the tribes for an accounting, and that they should be allowed to prosecute such tribal claims as they might have against the United States, legislation was obtained conferring upon the United States Court of Claims jurisdiction to hear, consider, and determine any and all legal and equitable claims which the Five Civilized Tribes might have against the United States under any treaty or agreement, or under any act of Congress relating to Indian affairs, provided such claims had not theretofore been adjudicated or determined.

There are now approximately 17,500 persons of these tribes of one-half or more Indian blood whose allotments are restricted against alienation. Their individual affairs must be carefully administered to prepare them to make their way unassisted by the Government, since, under existing law, the restricted period of this class will expire in 1931.

The condition of the restricted Indians is being improved by the construction of better buildings, and the purchase of livestock and farming equipment. For this purpose \$3,152,040.34 in individual Indian money was expended last year. There were 119 houses and 52 barns built, 82 wells constructed, and 244 horses, 410 mules, 288 head of cattle, and 617 hogs purchased. Restrictions were unconditionally removed from the allotments of 474 Indians, and conditionally removed from 441 tracts of land. There was a decided gain in agricultural products and improved livestock which, aside from reported data, was evidenced by premiums awarded Indians at county, district, and State fairs in competition with all entrants.

School attendance was well maintained during the year. Eight tribal boarding schools enrolled 1,210 pupils, the public schools 14,963, and 1,813 were enrolled at nonreservation, contract, and denominational schools. An enrollment of 1,600 was estimated for children inside the corporate limits of towns, making in all 19,586, which is 77 per cent of the total enumeration eligible for attendance.

Health conditions do not show the improvement desired. Trachoma prevails to an extent that needs further facilities for treatment, and the tuberculosis sanatorium at Tali hina is insufficient to meet demands. The great difficulty lies in the fact that Indians, as a rule, do not seek medical advice soon enough, which furnishes a field for effective visiting of homes by nurses and field matrons and an increase of this service is needed.

During the year 11,582 acres were leased for oil and gas mining; the gross oil production was 10,665,492.73 barrels and the total income from oil and gas was as follows:

|  |                        |
|--|------------------------|
| Bonuses received for leases.....       | \$242, 989. 06         |
| Royalty on oil and gas production..... | 2, 430, 805. 09        |
| Advance royalty.....                   | 264, 980. 00           |
| Annual rental.....                     | 641, 233. 61           |
| <b>Total .....</b>                     | <b>3, 580, 007. 76</b> |

The probate work of the Five Civilized Tribes, including the Quapaw Agency, covers 40 counties of Oklahoma (old Indian Territory), and is handled by eight probate attorneys, one of whom acts in a supervisory capacity. During the past fiscal year these attorneys appeared in 1,528 cases, brought 44 civil actions, involving \$40,146.60, removed 184 delinquent guardians, conserved funds amounting to \$207,437.99, and saved to minors \$115,435.47, held 15,731 conferences with Indians, and wrote 25,631 official letters. Many of these Indians have been overreached by the practice of having guardians appointed for adult restricted Indians declared incompetent in the local courts. Section 6 of the act of May 27, 1908 (35 State. 312), conferring jurisdiction on the probate courts of Oklahoma over the persons and property of restricted minor allottees should be repealed and the jurisdiction of the Secretary of the Interior restored.

Based on numerous statements as to the manner in which the estates of Indians were being handled by guardians and administrators under State jurisdiction, officials of the Indian Service and those connected with outside organizations made an investigation taking up a large number of cases, and on the strength of these reports legislation was sought with a view of restoring to the Federal Government

the complete administration of the estates of these Indians. Hearings were held by committees of Congress, and it was determined that a joint congressional committee would make an investigation in Oklahoma to ascertain first hand the facts before considering the proposed legislation.

### QUAPAW LEAD AND ZINC MINING LANDS

Under the provisions of section 26 of the act of Congress approved March 3, 1921, and departmental regulations thereunder, there were approved last year 11 leases for lead and zinc mining purposes covering in the aggregate approximately 1,900 acres. The leasing of 41 additional tracts embracing approximately 4,600 acres is under consideration. The leases approved provide higher royalty rates for the Indian owners of the land. Through arrangement with the Bureau of Mines one of its representatives was detailed to Miami, Okla., to make investigations and examinations in relation to the land covered by lease applications, and the technical data and other information furnished in his reports relating to the mineral development, mining operations and mining improvements on the land aided the Indian Office in determining the terms and conditions upon which the leases should be made and the requirements for the proper mining development. The leases awarded were upon such terms and conditions as it is believed will fully protect the interests of the Indian owners of the restricted land.

### PURCHASE OF SUPPLIES

Under contracts for the year, made in the spring of 1923, some of our supplies were purchased at better prices than formerly, but for the most part the service continues to suffer from causes incident to the World War. However, there is a noticeable revival of interest among bidders this year, with some prospect of better conditions. There has been close adherence to the fixed policy of purchasing only standard grades of goods and supplies. These have been subjected to rigid inspection both before awards and after actual delivery under contract, with the result that the supplies so purchased have almost without exception been entirely satisfactory.

The coal situation, both anthracite and bituminous, has been satisfactory for the year. All fuel requirements were met promptly, either before the season arrived to require coal or very soon thereafter. The quality of the coal as determined by scientific analysis has been kept at high grade. So far as possible and practicable, cost of transportation considered, surplus property obtained from other departments of the Government has been utilized in lieu of new materials.

### HEIRSHIP MATTERS

During the fiscal year 2,125 heirship cases and 207 wills were disposed of, and the fees collected and covered into the Treasury amounted to \$71,000. The heirship hearings in the field are conducted by a corps of examiners especially equipped by legal training and experience, whose salaries and expenses are paid from a reimbursable appropriation.

A graduated fee ranging from \$20 to \$75 is charged for probating trust estates of deceased Indians and approving their wills, the amount of the fee depending on the appraised valuation of the estates.

### CONCLUSION

In conclusion, I wish to renew the appreciation expressed in former reports of the faithful, loyal, and generally efficient service of my associates in the Washington office and throughout the field. I can not but feel that it is unusual to find in so large a body of workers such a uniformly high standard of devotion to duty.

It has also been a great encouragement to receive frequent assurances of confidence in our administrative purpose and endeavors from individuals and associations of long experience and deep sympathy with Indian welfare and progress, and who have an intelligent and unselfish understanding of the Indian's needs and the various conditions that confront all efforts in his behalf. The moral support and cooperation from such sources are of incalculable value in a cause so essentially human as the affairs of the Indians.

Your counsel and cooperation have been sincerely appreciated.

Very respectfully,

CHAS. H. BURKE,  
*Commissioner.*

The SECRETARY OF THE INTERIOR.

## LEGISLATION RELATING TO INDIAN AFFAIRS

**CITIZENSHIP:** H. R. 6355. Approved June 2, 1924. Declares every non-citizen Indian born within the territorial limits of the United States a citizen with provision that granting of citizenship does not remove restrictions on Indian lands now under Government guardianship.

**EDUCATION:** H. R. 5078. Approved June 5, 1924. Appropriates \$5,571,864 to provide education and schools for the Indians for the fiscal year of 1925 as compared with \$5,244,175 in 1924, an increase of \$327,689. Of this appropriation \$350,000 is to be used in sending Indian children to public schools.

**HEALTH:** H. R. 5078. Approved June 5, 1924. Appropriates \$500,000 to preserve health and provide medical treatment for Indians during the fiscal year of 1925 as compared with \$370,000 in 1924. A specific appropriation of \$50,000 for maintenance of a tuberculosis sanatorium for the Chippewa Indians of Minnesota is included in the first deficiency bill.

**PROTECTION OF PUEBLO LANDS:** S. 2932. Approved June 7, 1924. Provides for the appointment of a board composed of the Secretary of the Interior, the Attorney General, and a third member selected by the President to determine whether Pueblo Indians or non-Indian occupants hold title to disputed tracts of lands in New Mexico with necessary legal processes for adjudication and settlement of all conflicting claims.

**SAN CARLOS DAM:** S. 966. Approved June 7, 1924. Authorized construction of dam at a cost of \$5,500,000 across the canyon of the Gila River near San Carlos, Ariz., for irrigation of lands occupied by the Pima Indians on the Gila Indian Reservation.

**FORT HALL LANDS:** S. 2902. Approved May 9, 1924. Provides for sale of Indian lands of the Fort Hall Reservation to the Minidoka reclamation project, the Indians to receive not less than \$700,000, to be deposited to the credit of their tribe in the Federal Treasury drawing 4 per cent interest.

**DEFERRING OF IRRIGATION CHARGES:** S. 1631. Approved May 9, 1924. Authorizes Secretary of the Interior to defer charges against Indians covering construction costs, rentals, and penalties due on reclamation projects on various Indian reservations.

**LEASING OF UNALLOTTED LANDS:** H. R. 6298. Approved May 29, 1924. Authorizes leasing for mining purposes of unallotted lands on Indian reservations at public auction for a period of 10 years with consent of the Indians.

**INVESTIGATIONS:** H. J. Res. 348. Approved June 4, 1924. Appropriates \$5,000 to cover expenses of investigation by House Committee on Indian Affairs into administration of Indian affairs in the State of Oklahoma.

**S. Res. 241.** Approved June 7, 1924. Authorizes expenditures from contingent fund of the Senate for investigation into any subject connected with the Indians by Senate Committee on Indian Affairs during recess of Congress.

**ADJUDICATION OF INDIAN CLAIMS:** S. 321. Approved March 13, 1924. Authorizes Blackfeet, Blood, Piegan, and other Montana tribes of Indians to present claims against the United States in the Court of Claims for adjudication.

**CHEROKEES:** H. R. 4457. Approved March 19, 1924. Gives Cherokee Indians the right to present claims against the United States in the Court of Claims for adjudication.

**SEMINOLES:** H. R. 5799. Approved May 20, 1924. Confers jurisdiction on Court of Claims to hear, examine, and adjudicate any claims which the Seminole Indians have against the United States.

**CREEKS:** H. R. 7913. Approved May 24, 1924. Allows Creek Indians to present claims against the United States in the Court of Claims for final adjudication and judgment.

**WICHITAS:** H. R. 731. Approved June 4, 1924. Permits Wichita and affiliated bands of Indians to present claims against the United States to the Court of Claims for adjudication and judgment.

**STOCKBRIDGE INDIANS:** S. 3111. Approved June 7, 1924. Confers jurisdiction on Court of Claims to hear, examine, and adjudicate any claims which the Stockbridge Indians have against the United States.

**CHOCTAWS AND CHICKASAWS:** H. R. 5325. Approved June 7, 1924. Allows the Choctaw and Chickasaw Tribes of Indians to present claims against the United States to the Court of Claims for adjudication and settlement.

**CHIPPEWA INDIANS PER CAPITA PAYMENTS:** H. R. 185. Approved January 25, 1924. Provides for per capita payment of \$100 to the enrolled members of the Chippewa Tribe of Indians of Minnesota to be withdrawn from their tribal fund deposited in the Federal Treasury.

**BACK ANNUITIES:** H. R. 2876. Approved April 14, 1924. Authorizes the Secretary of the Interior to pay back annuities to persons of Chippewa Indian blood found to have been omitted from the regular roll of the tribe.

**LAC DU FLAMBEAU CHIPPEWAS:** H. R. 3684. Approved May 10, 1924. Authorizes the Secretary of the Interior to add the names of Indians legally entitled to the tribal roll of the Lac du Flambeau Band of Chippewas in Minnesota.

**MISCELLANEOUS LEGISLATION:** S. 1704. Approved April 28, 1924. Authorizes appropriation of \$85,000 to be paid to the Indians of the Nisqually Reservation in Washington in settlement of their claims for lands taken from them for military purposes.

**FLATHEAD INDIANS:** H. R. 2875. Approved May 31, 1924. Authorizes the adding of the names of certain Indians to the final roll of the Flathead Indian Tribe.

**BLACKFEET INDIANS:** H. R. 2879. Approved June 2, 1924. Provides for the disposal of homestead allotments of deceased Blackfeet Indians.

**LAC COURTE OREILLE:** H. R. 2883. Approved April 12, 1924. Validates certain allotments made to the Indians of the Lac Courte Oreille Reservation in Wisconsin.

**INDIAN LAND SALES:** H. R. 4803. Approved April 12, 1924. Authorizes the Secretary of the Interior to sell lands and plants on Indian reservations no longer needed for administrative purposes.

**KANSAS AND KAWS:** H. R. 2887. Approved May 27, 1924. Extends restriction against alienation on homestead lands of the Kansas and Kaw Indians for a period of 20 years.

**CHOCTAW-CHICKASAWS:** H. R. 4462. Approved May 24, 1924. Provides for the disposition of town-site funds to members of the Choctaw and Chickasaw Indian Tribes of Oklahoma.

**CHEROKEES OF NORTH CAROLINA:** H. R. 3852. Approved June 4, 1924. Provides for final settlement and disposition of the affairs of the Eastern Band of Cherokee Indians of North Carolina.

**SIOUX CLAIMS:** S. 1174. Approved June 7, 1924. Authorizes Secretary of the Interior to investigate and report to Congress the facts regarding claims of Sioux Indians for horses destroyed by the Government.

**PAYMENT OF TAXES:** H. R. 1414. Approved June 7, 1924. Authorizes the payment of taxes to Stevens and Ferry Counties, in the State of Washington, on allotted lands of Colville Indian Reservation.

**ROAD FOR APACHES:** H. R. 4117. Approved April 12, 1924. Authorizes \$100,000 for the construction of a road within the Apache Indian Reservation in Arizona.

**ZIA PUEBLOS:** H. R. 2877. Approved April 12, 1924. Reserves and sets aside lands in New Mexico as a reservation for the Zia Pueblos.

**RED LAKE INDIANS:** H. R. 4460. Approved June 3, 1924. Authorizes Secretary of the Interior to reimburse certain Red Lake Indians of Minnesota for garden plots surrendered for school-farm use.

**QUINAIELT INDIANS:** H. R. 5416. Approved May 31, 1924. Sets aside for lighthouse purposes certain tribal lands of Quinaielt Indians of Washington, for which they are to be paid.

**PIUTE INDIANS:** H. R. 2884. Approved May 31, 1924. Provides for reservation of lands in Utah for occupancy by certain bands of Piute Indians.

**UTE INDIANS:** H. R. 2882. Approved May 31, 1924. Authorizes the setting aside of a tract of land in San Juan County, Utah, as a school site for Ute Indians.

**LEASING FOR KAWS:** S. 2798. Approved April 28, 1924. Empowers Secretary of the Interior to lease for mining purposes unallotted lands on the Kaw Indian Reservation in Oklahoma.

OSAGE TRANSFERS: H. R. 6483. Approved April 12, 1924. Permits transfer and assignment of rights in lands, money, and mineral interests on Osage Indian Reservation.

YUMA LANDS: H. R. 4804. Approved April 12, 1924. Authorizes allotment of certain lands on Fort Yuma Indian Reservation in California within Powell townsite.

GIRLS' DORMITORY: H. R. 192. Approved June 7, 1924. Authorizes \$50,000 for a girls' dormitory at the Lapwai Indian Reservation in Idaho.

DRAINAGE SYSTEM FOR PIUTES: S. 1203. Approved June 7, 1924. Amends the act authorizing construction of a drainage system for Piute Indian lands in Nevada.

HOMELESS INDIANS: S. 1308. Approved June 7, 1924. Authorizes appropriation of \$25,000 to purchase tract of land for the use and occupancy of Temoak Band of homeless Indians of Ruby Valley, Nev.

SALE OF LANDS: S. 1309. Approved June 7, 1924. Empowers Secretary of the Interior to sell certain lands on Pyramid Lake Indian Reservation in Nevada to settlers, the funds to be deposited to the credit of Piute Indians.

NAVAJO HIGHWAY: S. 2159. Approved June 7, 1924. Makes annual appropriation for the maintenance of highway across the Navajo Indian Reservation.

TABLE 1.—Indian population of the United States, exclusive of Alaska, June 30, 1924

[Figures compiled from reports of Indian agency superintendents, supplemented by information from the 1920 census for localities where no Indian Office representative is located]

|  |         |
|--|---------|
| Grand total                            | 346,902 |
| Five Civilized Tribes                  | 101,506 |
| By blood                               | 75,519  |
| By intermarriage                       | 2,582   |
| Freedmen                               | 23,405  |
| Exclusive of the Five Civilized Tribes | 245,396 |

## INDIAN POPULATION BY STATES

|                      |        |                |         |
|----------------------|--------|----------------|---------|
| Alabama              | 405    | Nebraska       | 2,574   |

## THE BUREAU OF INDIAN AFFAIRS

When the War Department was created by Congress under the act of August 7, 1789, the duties assigned to it included those "relative to Indian affairs."

A Bureau of Indian Affairs was organized in the War Department on March 11, 1824, with Thomas L. McKenney as its chief, and among the duties to which he was assigned were the administration of the fund for the civilization of the Indians under regulations established by the department, the examination of the claims arising out of the laws regulating the intercourse with Indian tribes, and the ordinary correspondence with superintendents, agents, and subagents. He was succeeded September 30, 1830, by Samuel S. Hamilton, whose successor about one year later was Elbert Herring.

By the act of July 9, 1832, there was created in the War Department the office of Commissioner of Indian Affairs, who, subject to the Secretary of War and the President, should have "the direction and management of all Indian affairs and all matters arising out of Indian relations."

On June 30, 1834, an act was passed "to provide for the organization of the Department of Indian Affairs." Under this enactment certain agencies were established and others abolished and provision was made for subagents, interpreters, and other employees, the payment of annuities, the purchase and distribution of supplies, etc. This may be regarded as the organic law of the Indian Office.

When the Department of the Interior was created by act of March 3, 1849, the Bureau of Indian Affairs was transferred thereto, and hence passed from military to civil control.

Section 441 of the Revised Statutes provides that "the Secretary of the Interior is charged with the supervision of public business relating to \* \* \* the Indians."

Section 463 of the Revised Statutes reads: "The Commissioner of Indian Affairs shall, under the direction of the Secretary of the Interior and agreeable to such regulations as the President may prescribe, have the management of all Indian affairs, and of all matters arising out of Indian relations."

*Commissioners of Indian Affairs*

## REPORT OF THE COMMISSIONER OF INDIAN AFFAIRS

DEPARTMENT OF THE INTERIOR,  
OFFICE OF INDIAN AFFAIRS,  
*Washington, D. C. September 12, 1925.*

SIR: I have the honor to submit this, the Ninety-fourth Annual Report of the Bureau of Indian Affairs for the fiscal year ended June 30, 1925. Its contents comprise a resumé of the principal activities of the year with such associated comments as relate to those features of the Indian work upon which special emphasis has been placed during recent years of administrative direction, namely, health, education, and the training and influence which tend toward the development of useful and self-dependent Indian citizens.

### HEALTH

It is indeed gratifying to be able to report that our health campaign for the conquest of diseases among Indians has achieved a fair degree of success, notwithstanding the difficulties under which it has been carried on. Statistics will show that the Indian race is not a dying race, but a race which is gradually gaining in number and responding to the impulse imparted by education and changing environment.

**HEALTH ACTIVITIES.**—The Bureau of Indian Affairs has activities in 24 of the 48 States of the Union, namely: Arizona, California, Colorado, Florida, Idaho, Iowa, Kansas, Michigan, Nevada, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, South Dakota, Minnesota, Mississippi, Montana, Nebraska, Utah, Washington, Wisconsin, and Wyoming. In its health work the Indian Service is not aiming merely to care for and cure the sick. This is one object, but not the only one. The main issue is to build up the vitality of the Indian people and to establish for them a new standard of living. Such an undertaking presents a formidable problem, involving a school-health program, an industrial program, and a great amount of preventive work and systematic attention to the physical welfare of children, in order that a stronger race may be developed.

**HEALTH EDUCATION.**—A program of health education for Indian schools was inaugurated and this is outlined more fully under the heading "Education" in this report.

It is realized that if the Indians of future generations are to live more rationally than those of this generation the schools must exemplify the training and habits which are to make them different. What we wish to appear in the lives of a people must be taught in their schools. The Indian children will respond to health education. The hope of any race is the children of that race. We have begun

with the Indian children with a definite health program. In the course given the value of health habits to be acquired in early life is emphasized, and stress is placed upon average habits—such habits as can be adopted by the average pupil and carried over into the realm of character.

**CHILD HEALTH DAY.**—The 1st day of May has been set aside as Child Health Day for the whole country. The Indian Service will observe it in all of its schools. Secretary Herbert Hoover, of the Department of Commerce, has written into the literature of this day a preamble to the child's bill of health, as follows:

"The purpose of the May Day celebration is to force attention upon our most precious material asset—our children. The tie between the child and all adult life is at once the strongest and the gentlest in human nature. Greater sacrifices are made for children than for ourselves; greater happiness is derived from these sacrifices than from all the triumphs that personal success can bring. Our daily labors, whether in the home or in the outside world of competition for material things, or even in the search for culture and for spiritual advancement, derive largely from the conscious or unconscious impulse to cherish the child and to hold the child's affection and respect.

"Lest in the hurry and strain of life we should ever forget these obligations, it is well for us to recall the child's bill of rights, which may be expressed as follows:

"The ideal to which we should strive is that there should be no child in America that has not been born under proper conditions, that does not live in hygienic surroundings, that ever suffers from undernutrition, that does not have prompt and efficient medical attention and inspection, that does not receive primary instruction in the elements of hygiene and good health."

**EPIDEMICS.**—The year to which this report pertains could be designated as a year of epidemics. Not since the fiscal year which ended June 30, 1919, have there been so many cases of influenza. Besides influenza there have been epidemics of smallpox, measles, scarlet fever, mumps, and chicken pox. The population of many reservations and schools have been invaded, some of them being attacked by several of the epidemics in rapid succession or simultaneously. One case of typhus was reported from a school in Arizona. Although the year has not been a normal one, there has been an excess of births over deaths and consequently an increase in population.

**GENERAL DISEASES.**—Indians have the same diseases as other people and possess no racial immunity from any class of diseases; however, there are fewer cases of cancer, typhoid fever, diabetes, Bright's disease, and cardiovascular disease, according to population, than among the white races. This is also true of pneumonia, except perhaps in years characterized by measles and influenza epidemics, when there is always an increase in the number of cases and deaths from this disease. Although the Indian Medical Service has to contend with all diseases that are common to the country, its most formidable problems continue to be tuberculosis and trachoma.

**TUBERCULOSIS.**—The conditions in the Indian Service with respect to tuberculosis are gradually improving. Improvement among the Rosebud Sioux in consequence of the program for the prevention and

cure of disease has been most gratifying, and from all over the Indian country come reports that there is evidence of decline in the morbidity and mortality from tuberculosis, particularly in those sections in which sanatoria have been established.

**TRACHOMA.**—The word "trachoma" began to appear in the reports of the physicians in the United States Indian Service during the last part of the last decade of the nineteenth century and has been employed with increasing frequency during the years of the present century, until now the word is used more than the name of any other disease except perhaps tuberculosis; much attention has been given to preventing and curing this disease in all the Indian country, particularly in the Southwest, where it is the most prevalent. During the fiscal year to which this report pertains the scope of special trachoma work of the Bureau of Indian Affairs, apart from that done by stationed physicians, covered the States of New Mexico, Oklahoma, California, Arizona, Montana, and Wyoming. Surveys were made in Wisconsin, Minnesota, and South Dakota.

**SPECIAL PHYSICIANS.**—The Indian country is divided into six districts for the purpose of giving special attention to the diseases of the eye, ear, nose, and throat, and in addition there is one specialist at large who devotes his time to giving instructions to agency and school physicians concerning such diseases.

**SOUTHWESTERN TRACHOMA CAMPAIGN.**—The southwestern trachoma campaign was organized and began work on the 1st day of July, 1924. The organization was made up of three units, each unit being composed of a special physician, two nurses, an interpreter, and an orderly. Later another special physician and his nurse were detailed to work with the campaign. Dr. J. S. Perkins, special physician for the district of Arizona and New Mexico, was placed in general supervisory charge of all the units; Dr. Polk Richards was designated consulting ophthalmologist; and Mr. Chester L. Walker, traveling auditor, was appointed purchasing agent. The work began within the Navajo jurisdiction, which has an Indian population of about 13,000. The population of this reservation was surveyed for trachoma just before the trachoma work began, and the incidence of the disease was found to be about 33 per cent. Later in the year another unit was added for work among the Hopi, and another unit was added and is working among the Walapai and Apaches.

The record of work done for the fiscal year is as follows:

|  |        |
|--|--------|
| Number of Indians examined for trachoma.....                     | 38,111 |
| Number of cases of trachoma found.....                           | 7,236  |
| Percentage of positive cases to number examined.....             | 19     |
| Number of cases of trachoma operated upon.....                   | 4,235  |
| Number of cases of trachoma treated without operation.....       | 2,951  |
| Number of eye operations for conditions other than trachoma..... | 2,863  |

The average percentage of trachoma among the Indians of the territory of the Southwestern Trachoma Campaign, which includes all of Arizona, New Mexico, and California south of Porterville, and that strip of Utah which forms a part of San Juan Reservation, is about 19.

During the fiscal year five demonstration clinics were held for the instruction of physicians and nurses at Blackfoot, Mont.; Fort

Defiance, Ariz.; Albuquerque, N. Mex.; Phoenix, Ariz.; and Riverside, Calif.

The clinics at Blackfoot, Mont., and Albuquerque, N. Mex., were conducted by Dr. L. Webster Fox, of the post graduate medical school of the University of Pennsylvania.

### HEALTH FACILITIES

**HOSPITALS.**—During the fiscal year 1925 the Chippewa Sanatorium at Onigum, Minn., the Shawnee Sanatorium at Shawnee, Okla., and the Albuquerque Trachoma Hospital were established, and arrangements were made for opening Indian hospitals at Klamath Agency, Oreg.; Nixon, Nev.; Poplar, Mont., and Tuba City, Ariz. The capacity of Fort Spokane Hospital was increased from 20 beds to 30 beds, and that of the Laguna Sanatorium more than doubled. The new hospital at Chilocco School was built during the year and improvements were made in many of the hospitals throughout the service.

**ASYLUMS.**—The Indian Service operates an asylum for the insane at Canton, S. Dak., with a capacity of nearly 100, and makes contracts with State institutions for the care and custody of patients who can not be hospitalized in the Canton Asylum. Facilities are lacking for the care of the feeble-minded and the senile demented. An institution to relieve the Canton Asylum of patients of this class ought to be provided, for when a bed in an asylum is given over to a patient for life it reduces the number to whom the institution can render service.

**FIELD NURSING SERVICE.**—The Bureau of Indian Affairs has continued its cooperation with the American Red Cross, and several nurses from this organization are employed. It is the purpose to increase the number of public-health nurses in the Indian Service and to improve the field-matron service. Several graduate nurses were added to the field personnel during the year and arrangements made for the establishment of a public-health nursing service for reservation Indians. The field matrons in 1924 made 54,103 domiciliary visits, thus reaching 313,589 Indians. In this enumeration individuals may be counted several times, but the figures in the aggregate show that on an average each field matron saw in her official capacity about 5,500 Indians during the fiscal year.

Miss Elinor D. Gregg, whose overseas service and public-health nursing experience, as well as her former connection with the Red Cross, particularly fit her for the position, has been appointed to supervise the field nursing and field-matron activities, with a view of increasing the scope and usefulness of both, and coordinating them with the health and uplift aims of the other branches of the Indian work.

**UNFULFILLED NEEDS.**—The Indian Service still needs more sanatorium schools, one or more hospitals for incurable cases of tuberculosis, an institution for the care of the feeble-minded, including the senile demented, and a hospital for crippled children. The plea of the crippled child is growing stronger as the years go by.

**COOPERATION.**—Acknowledgment is made of the helpful cooperation of the United States Public Health Service, the American Medical Association, the American Child Health Association, the Na-

tional Tuberculosis Association, the American Red Cross, State boards of health, and State and county health officers; also of cooperation from numerous philanthropic organizations and individuals interested in the welfare of the Indians. Without such cooperation from these various sources our burdens would have been heavier and our achievements less. Special acknowledgment is made of the help received from Dr. L. Webster Fox, of the postgraduate medical school of the University of Pennsylvania, for valuable assistance and advice given in our trachoma work, and to Doctors White and White, of Tulsa, for their voluntary work among Oklahoma Indians.

### EDUCATION

**ATTENDANCE.**—So far as data is available at this time, it appears that both enrollment and attendance of Indian children in all schools has shown improvement over the figures for the preceding year. Attendance has, however, been diminished in a number of schools by rather serious epidemics of communicable diseases, such as influenza, measles, and mumps. It is increasingly difficult to secure an enrollment or maintain an attendance equal to capacity during the first and second years following the establishment of a new school. In any case, securing attendance of Indian children in the schools at the time of opening in September has always and will continue to offer one of the greatest difficulties with which the service has to contend. With few exceptions it is believed that further increases in capacity or establishment of new schools are inadvisable at the present time. Efficient administration of the school service has suffered considerably in the endeavor to keep pace with increases of this kind, and the undivided efforts of the service should be directed toward increased efficiency, better attendance, and more rapid educational progress in the operation of the schools which it now has. Moreover, facilities and equipment are not yet sufficient in many schools. The yearly increase of attendance of Indian children in the State public schools is an added factor which is of material significance in its bearing upon the future of the Government schools. Also it can readily be understood that it is difficult to adjust financial requirements to changing capacities and varying conditions.

**EDUCATION AND ENROLLMENT WEEK.**—The week beginning August 31 was designated as Education and Enrollment Week and all school and agency employees were instructed to utilize every possible opportunity to interest Indian parents in the education of their children. Missionaries, traders, and in fact every one in touch with Indian communities, were invited to espouse the cause of "Education" during the week prior to the opening of the school year. This same policy has been followed for several years and has become recognized as an important feature of the educational program. Each year interest in the activities of the week seems to increase. As a result enrollment, which only a few years ago was an enormous task, is now becoming a more pleasant one, except in a few isolated sections of the country where the Indians do not yet appreciate the value of education. During Education Week, last fall, the slogan adopted was: "Indian citizenship demands increased educational activity." Involved in this thought are four essentials:

1. Every eligible child in school.
2. As nearly perfect attendance as possible.
3. All available school capacity utilized; no overcrowding.
4. More pupils and better schools.

Nearly all superintendents caught the spirit of the idea, and the results were better than expected. The school year opened formally on September 2, 1924, and closed June 10, 1925. The general attendance in Government schools was good, though not all that is to be desired, and in public schools the enrollment of Indian children was larger than ever before, the average attendance varying according to local conditions of health, interest, and supervision of attendance. The trend of attendance toward public schools is quite marked, as it should be. Each year the sentiment of public-school officials is becoming more friendly.

**EXTENSION OF GRADES OF INDIAN SCHOOLS.**—A definite policy has been adopted in regard to the grading of the Government Indian schools and this program will in general tend to uniformity between schools of the same class. The day schools and smaller reservation schools will maintain 6 grades, a few of the larger reservation schools and the smaller nonreservation schools 9 grades, and several large nonreservation schools 12 grades. This program has been, and will be, put into operation wherever economic conditions are such as to make possible the maintenance of additional grades, the supplying of essential equipment, and employment of necessary teachers. The program embraces 6 elementary grades,\* 3 junior vocational grades, and 3 senior vocational grades, thus conforming to the general trend for elementary and secondary schools. Adoption of this policy constitutes a recognition of the fact that if Indian young people are to compete with those of other nationalities they must have equal educational opportunities. It may take several years to fully perfect this policy, but its adoption is believed to embody the correct principle with regard to Indian schools, especially, and should offer encouragement to Indians and their friends. With rapidly increasing enrollment of Indian children in public schools, including many in public high schools, the development of vocational, junior, and senior courses in the Government boarding schools should meet all legitimate needs for Indian youth.

**SUMMER SCHOOLS FOR RETARDED PUPILS.**—Immediately following the close of the regular school term of the fiscal year 1924, summer sessions for retarded children were organized in Indian schools throughout the country. The majority of the summer sessions lasted four weeks and approximately 80 per cent of the students who were in attendance made passing grades and thus became eligible to continue in their regular classes instead of having to lose a year in repeating work as was often the case before the policy of holding summer sessions was inaugurated. As 546 students made up work during the summer session, the saving to the Government was approximately \$109,200. This should be recognized as a definite and essential policy fully justified by the economy in education thereby effected.

**SUMMER SCHOOLS FOR INSTRUCTORS IN INDIAN SCHOOLS.**—Because of the very great importance of health education in its relation to the future of Indians it was deemed advisable, in planning for

summer school attendance this year, to designate certain educational institutions with which arrangements could be made for special instruction in those subjects closely related to health education and to require, as far as possible, the instructors employed in the Indian schools to attend these institutions. The following institutions were designated: The State Teachers' College, Aberdeen, S. Dak.; The Agricultural and Mechanical College, Stillwater, Okla.; The State Teachers' College, Greeley, Colo.; The Northern Arizona State Normal, Flagstaff, Ariz.; Southern Branch of the University of California, Los Angeles, Calif.; The Agricultural College, Corvallis, Oreg.; Stout Institute, Menominee, Wis.; Teachers' College, Columbia University, New York City.

Approximately 400 teachers and other instructors of Indian schools were enrolled in these institutions, not only giving special attention to health education, but also taking many other courses closely related to that subject and yet other courses of general value to teachers. This larger attendance at summer schools shows an increasing interest on the part of the teachers in qualifying themselves for more efficient teaching.

**JUNIOR RED CROSS.**—The cooperation of the Junior Red Cross was of such value during the fiscal year 1924 that it was believed desirable to invite a continuation of the activities of that organization and to suggest that the main emphasis for the school year be placed on health education. To that end the following letter was circulated:

"OCTOBER 6, 1924.

*"To all Superintendents and Employees:*

"During the present year the Junior Red Cross will continue to cooperate with the Indian schools as they did during the past year, but with the main emphasis on health. Those schools which have these organizations should perfect them.

"In connection with this special emphasis, the American Child Health Association has cooperated in planning a program for all Indian schools. The prevalence of disease among Indians is startling. One large reservation reported that 20 per cent of the children examined for entrance into school were tubercular. If disease is as prevalent as this, ill health must be still more so. These conditions can be combated best, perhaps, through the schools. For this reason the work outlined in the program of health education which is attached must be made a special topic this year. During the succeeding years it will become a regular topic with special emphasis on it.

"The American Child Health Association, 370 Seventh Avenue, New York City, with its splendid organization and its wealth of material stands ready to cooperate with us in putting over this program. Any teacher or employee who faces a problem that is troublesome can get assistance by writing to this organization. They will be glad to hear from you and will welcome an opportunity to assist you.

"The splendid example of cooperation which this association gives should not be lost on the workers in our service. The program as outlined offers many opportunities for agency and school employees to join forces in this work. The conferences outlined in the day

school program are vital elements in the conduct of the program. Every employee in the service participating in these conferences ought to feel a personal interest and responsibility in the matters discussed and should be willing, yes, solicitous, to do the part assigned him or her. Our united efforts over a term of years ought to materially improve the conditions that have been found to exist among the Indian people. The effects of a thoughtful, wisely planned, constructive program of health education will, in part, be immediately apparent, but they should be felt even more strongly in the second, the third, and the fourth generations.

"The commissioner has an intense interest in this program, as does everyone who has the welfare of the Indian at heart. Let us attack this program with the spirit of crusaders, to the end that the American Indian may take his place in the ranks of American citizens as a clean, upstanding, vigorous, healthy individual, physically and mentally able to make the biggest contribution of which he is capable."

Prior to the issuance of this letter conferences had been held at Santa Fe, N. Mex., and at Rosebud, S. Dak., for the purpose of outlining a program of health education for Indian schools. The adoption of this program, to be given a permanent and prominent place in the general course of study for Indian schools, is believed to be the most important educational event of the year. To combat diseases already contracted is necessary and of importance, but to give instruction to the healthy children which will result in the formation of health habits is of much greater importance. It is better to expend thousands of dollars in prevention than to expend hundreds of thousands in attempting to cure.

The health-education program was introduced in all Indian schools and other schools in which Indian children are enrolled were invited to cooperate in extending the course to Indians everywhere in the United States. Much emphasis has been given to the subject by the schools throughout the year. The National Red Cross and the American Child Health Association have rendered all possible help with the program. A number of special bulletins prepared under the direction of the American Child Health Association have been printed and circulated in the schools. Arrangements have been made for the American Child Health Association to prepare one bulletin for each month of the school year 1926, those bulletins defining special phases of health education and being used to supplement the regular health program.

IMPROVEMENT OF INDIAN HOMES, AND THE RED CROSS.—Probably the greatest need in connection with the education of the Indian youth of this generation is the improvement of the homes to which, in a majority of cases, they must return. With the aid of modern school facilities for about 80 per cent of the Indian children, they are making wonderful progress; in fact, such rapid progress that the parents, particularly under the economic hardships of the war period and the greater handicaps of the reconstruction period, have not been able to keep pace with the needs of the awakened children. This fact being recognized, special efforts are being made to find ways and means of encouraging the Indians to greater effort toward preparing homes suitable for their children when they return from school with cognizance of better living standards and a desire to

help their home folks to establish and maintain such standards. The task is a large one and will require cooperation by every available organization. The Junior Red Cross and the American Child Health Association are already at work with the school force. The Red Cross has been at work among reservation communities, particularly along health lines, and just now its representatives are making plans to give demonstrations during the next few years in the interest of home improvement. They have decided to place trained home-economics teachers and trained nurses in certain districts and to develop there a program of home improvement which it is hoped will extend its influence among neighboring Indians. Their efforts, contributed in harmony with the plans and best thought of the office, should be successful in bringing about a distinct advance in the matter of better home conditions, to which Indian students may return with the hope of maintaining to some extent the ideals and standards which have been taught them in the schools.

**EFFECT OF ADJUSTED COMPENSATION FOR EMPLOYEES.**—Unquestionably the increase of salaries under reclassification has had much to do with a marked improvement in the personnel of the service. Many who were inclined to drift along, taking roads of least resistance, discouraged because of low salaries, insufficient to enable them to live decently and respectably, have taken new courage and are now rendering good service. The standard of efficiency has been raised materially because of increased compensation, and this has made it possible to make a material reduction in the number of employees. During the year 534 positions throughout the service were dropped, but the increased school facilities provided in the Southwest made necessary the establishment of 190 new positions, making a net reduction of 344 positions, representing an annual expenditure for salaries of \$284,651. In addition, positions in the Washington office were discontinued carrying a total expenditure for salaries of \$19,810.

**READING CIRCLE WEEK.**—In accordance with past practice, all school employees were required to read certain books which were selected because adapted to aid teachers in their study of subjects chosen for special consideration during the year. The *Personality of the Teacher*, by Charles McKenny, was selected for the purpose of promoting greater individual efficiency. *Health Education in Rural Schools*, by J. Mace Andress, was used in connection with the health program for the year. Instructors were encouraged to read other books of special value in relation to their individual needs.

**THE SOUTHWEST.**—Through the generosity of Congress in providing funds for construction purposes in the Southwest, increased capacity has been provided for as many children as it has been possible to enroll, and with the completion of projects now under way, including the conversion of Fort Wingate Military Post into a school to be known as the Charles H. Burke School, with a capacity, when completed, for 750 children, the building period is rapidly nearing an end. It will be necessary to enlarge more of the Pueblo and Hopi day schools and possibly to construct a few new day schools among those tribes as well as to provide funds to construct some buildings at schools already in operation to balance them, but certainly the end of new construction and enlargement is in sight.

More liberal upkeep and maintenance funds are and will be needed for schools to make it possible to operate them in a really efficient manner.

### PERSONNEL

**RECLASSIFICATION.**—This has been the first year of the operation of adjusted compensation in the field service, as permissible under the classification act, and the results, both as to better feeling among the employees and increased efficiency, have been noticeable. There are still some inequalities in salaries which it is hoped will be eventually adjusted, but generally speaking our field personnel has been materially strengthened by the present classification in that we have been able during the past year to accomplish our work with a considerably reduced force. The number of positions has been reduced by 344, so that we enter the fiscal year 1926 with a field force of 4,932 positions, which is the lowest number authorized in the history of the Indian field service since it has assumed its present magnitude. This has been accomplished by means of consolidations and abolishment of positions, notwithstanding the fact that during the year 1925 it was necessary to establish positions for four new boarding schools and to provide additional employees for increased capacity at several others. It was also necessary to provide employees for increased medical activities and for the new Coolidge Dam, upon which the preliminary work has been commenced. The positions authorized on July 1, 1925, include several for the new Charles H. Burke School necessary in connection with preliminary organization at that place.

### INDIAN LAND INTERESTS

**ALLOTMENTS.**—During the fiscal year ended June 30, 1925, a total of 1,909 allotments were made and approved to individual Indians embracing lands on various reservations aggregating approximately 595,000 acres as shown in the following table:

| Reservation                 | Number of allotments | Acreage       |
|-----------------------------|----------------------|---------------|
| Colorado River, Ariz.....   | 3                    | 30. 000       |
| Round Valley, Calif.....    | 1                    | 10. 000       |
| Leech Lake, Minn.....       | 1                    | 19. 210       |
| Mille Lac, Minn.....        | 282                  | 1, 878. 140   |
| White Earth, Minn.....      | 2                    | 162. 050      |
| Fort Belknap, Mont.....     | 1, 171               | 539, 065. 264 |
| Fallon, Nev.....            | 10                   | 100. 000      |
| Walker River, Nev.....      | 2                    | 40. 000       |
| Fort Berthold, N. Dak.....  | 2                    | 179. 890      |
| Klamath, Oreg.....          | 1                    | 160. 000      |
| Umatilla, Oreg.....         | 44                   | 3, 521. 290   |
| Warm Springs, Oreg.....     | 1                    | 160. 000      |
| Cheyenne River, S. Dak..... | 266                  | 41, 353. 370  |
| Lower Brule, S. Dak.....    | 20                   | 3, 210. 390   |
| Colville, Wash.....         | 1                    | 120. 000      |
| Kalispell, Wash.....        | 91                   | 3, 808. 170   |
| Quinalt, Wash.....          | 11                   | 880. 000      |
| Total.....                  | 1, 909               | 594, 697. 474 |

In addition to the foregoing, 104 allotments were made on the public domain in various States embracing 14,684.57 acres.

**QUINAIELT ALLOTMENTS.**—In accordance with the decision of the Supreme Court on April 7, 1924 (224 U. S. 466), in the case of *Tommy Payne v. United States of America*, which was a suit brought by an Indian of the Quinaielt Reservation to compel this department to allot to him lands containing valuable merchantable timber, preparation has been made for the allotting of all the Indians who are found to be eligible for allotment on the Quinaielt Reservation without regard to the value of the timber on their allotment selections. A special appropriation of funds was provided for the work by Congress in the second special deficiency appropriation for the fiscal year 1925, approved on March 4, 1925 (Public 631). On April 15, 1925, Special Allotting Agent Charles E. Roblin was detailed to the Quinaielt Reservation to take charge of the surveying and allotting, and Superintendent William B. Sams, of the Taholah Agency, has charge of all cases wherein there is a question as to the eligibility of the applicant, his finding being, of course, subject to review by this office and the department in the event of an appeal therefrom. The special allotting agent has organized a surveying crew, and the work is now progressing in a very satisfactory manner. He reports that to date of June 24, 1924, there have been certified to him the names of 422 Indians who are eligible, and it is estimated that there will be several hundred others who will be found eligible for allotment.

**INDIAN ENROLLMENTS.**—Work on the final roll of the Chippewa Indians of the Lac du Flambeau Reservation, Wis., was taken up under the provisions of the act of May 10, 1924 (43 Stat. L. 132), and instructions were issued to prepare a roll of the Indians of the Quinaielt Reservation, Wash. Neither roll was completed during the year, but the field work on each is far advanced.

The act of June 4, 1924 (43 Stat. L. 376), provides for the making of a final roll of the Eastern Band of Cherokee Indians of North Carolina upon the approval of the conveyance of their property to the United States. Because of the fact that the conveyance has not been consummated, the preparation of the roll has not been started.

**EXTENSION OF TRUST PERIOD.**—The period of trust was extended by order of the President on allotments made to Indians on the reservations at Bois Fort and Deer Creek, Minn.; Colville and Yakima, Wash.; and Omaha, Nebr. The period of trust was also extended for 10 years on patents issued to the Twenty-Nine Palms and Cabazon Bands of Mission Indians in California.

**LEASING OF INDIAN LANDS.**—The policy of the Government has been to give each Indian a tract of land and encourage him to make his living thereon, and at the same time to acquire the arts of civilization. The Indians have accordingly been urged to make homes and to farm their allotments. The surplus lands—those not used—are leased for agricultural purposes not only for the immediate revenue, but for the benefits of cultivation and permanent improvements finally accruing to the Indian owner. During the past year there were over 40,000 farming and grazing leases made for such purposes on about 4,000,000 acres of allotted land. The Indians received therefor, in addition to other benefits, a cash rental of approximately \$5,000,000.

**CALIFORNIA INDIANS.**—Two tracts of land, one containing 1 acre and the other containing 2 acres, together with water rights, were purchased at a total cost of \$3,150 for the relief of homeless Indians in the vicinity of Big Pine, Calif. These purchases are under the jurisdiction of the superintendent of the Bishop Indian School, and it is estimated that they will supply home sites for nine Indian families convenient to the labor opportunities and school advantages of the town of Big Pine.

**LANDS RESERVED FOR INDIANS.**—Under the act of March 3, 1925, (Public No. 550), 40 acres on the public domain in New Mexico were permanently withdrawn for the use and benefit of certain Navajo Indians. By Executive order of March 18, 1925, approximately three townships on the public domain in Nevada were temporarily withdrawn for the use and benefit of the Indians of the Walker River Reservation. By Executive order of February 27, 1925, 320 acres on the public domain in Arizona were temporarily withdrawn and reserved for use as a camping ground for the pupils of the Indian school at Phoenix.

**TOWNSITES.**—Regulations were approved for the appraisal and sale by public auction of lots within the townsites of Hayes and Lodge Pole on the Fort Belknap Reservation, Mont., as authorized by the act of March 3, 1921 (41 Stat. L. 1355). The proceeds of these sales will be credited to the tribal fund of the Fort Belknap Indians.

**RIGHTS OF WAY FOR HIGHWAYS, BRIDGES, RAILROADS, ETC.**—New regulations concerning rights of way and easements for various purposes are in course of preparation, in order to conform to recent laws. These rules will include all effective provisions and exclude all obsolete ones.

The policy of cooperation with the local and State highway authorities in connection with the opening of public highways has been continued with the result that many additional miles of road have been authorized. When constructed these roads will be of great benefit to the Indians and to the general public by affording them increased transportation facilities and enhancing the value of their lands.

A notable accomplishment was the settlement of the claims of the Fond du Lac Indians against the United States Railroad Administration for damages resulting from fire alleged to have been caused by the engines of the Great Northern Railway Co. during the period of Government operation. These claims, numbering 245, were for an aggregate amount of \$222,968.77.

#### IMPORTANT LEGISLATION

A number of important items of legislation affecting Indian matters were enacted by the second session of the Sixty-eighth Congress, including the following:

The act of March 3, 1925 (Public, No. 549), authorizing cancellation of restricted fee patents issued to Indians of the Winnebago Reservation, Nebr., and the issuance of trust patents in lieu thereof containing a restriction against alienation for 10 years;

The act of March 3, 1925 (Public, No. 551), authorizing exchanges of Government and privately owned lands on the additions to the

Navajo Reservation in Arizona, established by Executive orders of January 8, 1900, and November 14, 1901;

The act of February 20, 1925 (Public, No. 429), authorizing exchanges of Government and privately owned lands on the Walpai Reservation, Ariz.;

The act of March 3, 1925 (Public, No. 532), authorizing the sale to the city of Los Angeles of certain land purchased for the homeless Indians in California;

The act of February 28, 1925 (Public, No. 503), authorizing an appropriation of \$422,939.01 to compensate Chippewa Indians of Minnesota for timber in connection with the settlement for the Minnesota National Forest;

The act of March 4, 1925 (Public, No. 608), to extend the time of payment for land sold on the ceded part of the Fort Peck Reservation, Mont., and for forfeiture of purchase money and cancellation of entries in certain cases.

**INDIAN CLAIMS.**—Jurisdictional bills authorizing the adjudication of the following Indian claims were enacted during the year, and petitions are being filed by the Indians in the United States Court of Claims:

Ponca Indians in Oklahoma and Nebraska. Act approved January 9, 1925 (Public, No. 312).

Yankton Band of Sioux Indians, South Dakota, for claim to Red Pipestone Quarries. Act approved January 9, 1925 (Public, No. 313).

Delaware Tribe of Indians, Oklahoma. Act approved February 7, 1925 (Public, No. 367).

Indians in the State of Washington, west of the Cascade Mountains, except the S'Klallam or Clallam Tribe. Act approved February 12, 1925 (Public, No. 402).

Kansas or Kaw Tribe of Indians. Act approved March 3, 1925 (Public, No. 577).

The act of March 3, 1925 (Public, No. 533), authorized the appropriation of \$400,000 in settlement of the claims against the Government of the S'Klallam or Clallam Tribe of Indians. When this amount shall have been appropriated by Congress prompt steps will be taken to pay out the money per capita to the Indians entitled thereto as provided by the act cited.

#### SUITS FILED IN THE UNITED STATES COURT OF CLAIMS

Suits were filed during the year in the United States Court of Claims for the adjudication of Indian claims as follows:

Assiniboin Tribe, Oklahoma. Suit filed June 2, 1925.

Delaware Tribe, Oklahoma. Suit filed May 28, 1925.

Indians of the Fort Berthold Reservation, N. Dak. Amended petition filed July 31, 1924, reinstating these claims before the Court of Claims.

Indians of the Klamath Reservation, Oreg. Suits filed May 21, 23, and 25, 1925.

Stockbridge Tribe, Wisconsin. Petition filed August 6, 1925.

Yankton Sioux, South Dakota. Suit filed September 30, 1924, for claim to Red Pipestone Quarries.

## INDIAN FARMING AND STOCK RAISING

**FARMING.**—With respect to the adult Indians, the primary object of this service is to assist them in achieving self-support through the use of their land for farming purposes and for livestock. It is, of course, not the intention to make farmers or stockmen out of all the Indians; but where Indians not otherwise gainfully employed have available land suited to these industries, every effort is made to encourage them in the effective use thereof. While detailed figures are not yet available, preliminary reports indicate that there has been a substantial increase during the year in the number of Indians farming and in the acreage cultivated; and also that the Indians are constantly improving their methods and becoming more proficient in the use of modern agricultural equipment and machinery. The following extracts from the reports typify the progress that has been made throughout the service:

"There will be a much larger amount of wheat threshed than for several years. The price will also be good, being higher than last season."

"We have fully 100 per cent gain in farm activity this spring beyond that of prior years. Should there be a seasonable year, our yield will be large."

"Never before in the history of these people have they done so much work. Their crops show it. \* \* \* All crops are in fine condition and the harvest will be immense."

**STOCK RAISING.**—There is comparatively little change in livestock conditions during the year, due principally to the generally unsatisfactory status of the livestock market. Despite this, however, the Indians within the several reservations are taking an active interest in improvement of the grade of their stock and in betterment of conditions generally. This is particularly true in the Southwest, where the Indians have been induced to engage extensively in the sheep-raising industry. On the Mescalero Reservation, where sheep were issued to a large part of the tribe, the Indians who objected to engaging in that industry are now asking that sheep be issued to them. On several of the reservations the incomes of the Indians from that source are contributing largely to their self-support.

There appears to be a prospect of solving the problem of disposing of the worthless horses on the ranges through an arrangement which contemplates using the animals for the manufacture of fertilizer, packing-house products, and other commercial purposes.

The control of contagious diseases among the livestock of the Indians has progressed to such an extent that their stock is comparatively free from such diseases and it has been possible to reduce the force of employees engaged in this activity.

**INDUSTRIAL SURVEY.**—The system of industrial surveys inaugurated several years ago, as mentioned in my last report, has been continued with splendid results. Complete reports are on file from about 60 reservations, and surveys are in progress on 30 additional reservations which will be completed as rapidly as possible. A separate survey is made of each home by the superintendent, accompanied by the farmer, field matron, and physician, complete information being secured relative to the industrial and economic

status of the family, its means, and resources. A picture is also taken of the home, occupants, and surroundings, which is sent to the office with the report showing allotment number, degree of blood, number in family, education, and land holdings of each member, location and description of home, crops raised, available equipment, and a tentative industrial program for the family. The superintendents report that these visits have been the means of developing a closer bond of sympathy and understanding between the Indians and the superintendent and employees.

**FIVE-YEAR PROGRAM.**—Systematic programs have been adopted on many of the reservations setting forth definite objectives to be accomplished each year for a period of five years. This method has brought about material progress among the Indians; and it is expected that programs will be approved for a considerable number of additional reservations during the next year. The program is first made for the reservation as a whole, and then, on the basis of the industrial survey reports, a program is worked out for each separate family. To systematize the work and make it more effective, farm chapters have been organized on many of the reservations, with representative Indians as officers thereof. Competition between the chapters stimulates the work and furnishes an incentive for increased effort along industrial lines. The State agricultural colleges cooperate in every practical way and have placed their facilities at our disposal for the benefit of the Indians.

**HOME BUILDING.**—One of the important objectives of the five-year program is an improved home for each family according to the circumstances of the owner. Where funds are available and the Indian has reached the stage where he is ready for a permanent home, in most localities, he brings in the logs from the mountains to the agency sawmill where the logs are manufactured into lumber for his use. This leaves only the doors, windows, hardware, and roofing to be purchased by the superintendent from available funds, and sold to the Indians on easy terms. Where the Indians have been superstitious about living in a house after a death has occurred therein, the superintendents are gradually obviating this difficulty by having the sick Indian removed from the house to a tent. As time goes on this superstition will be gradually overcome. To encourage the Indians in providing themselves with better homes, the superintendents keep plans and pictures of the completed buildings on exhibit at the agency office and other places. These act as an incentive by showing the Indians just what their homes will look like when completed, and implant in them the desire therefor. Where the Indians have individual funds on deposit under supervision derived from oil and gas royalties, lease rentals, land sales, etc., it is the practice to encourage them to use such funds for the construction of improved homes.

**REIMBURSABLE FUNDS.**—One of the most important factors in the progress made by the Indians within recent years has been the use of reimbursable funds, which comprise two classes, viz, appropriations made by Congress for this specific purpose, and tribal funds authorized by Congress for general support and civilization purposes. The policy is to use tribal funds for this purpose wherever available, and thus leave the reimbursable appropriation for expenditure on the reservations which have no tribal funds, as this ap-

appropriation is always insufficient to meet the demands made upon it. The use of this fund is intimately correlated with the five-year program. On this point one superintendent reports:

"As the office is aware, these Indians have had no personal funds for years to speak of and therefore have not been in a position to make payments on these individual accounts, and the fact that they have been able to do so at this time is due to the benefits derived from the first year of the five-year program."

The appropriations from 1914 to 1920 specified June 30, 1925, as the date for the return to the Treasury of expenditures therefrom. The following table shows the status of repayments:

|  | Repayments     | Balance unpaid |
|--|----------------|----------------|
| Funds due in Treasury June 30, 1925..... | \$1,806,137.31 | \$587,610.78   |
| Other funds.....                         | 1,504,377.47   | 799,921.75     |
|  | 3,310,514.78   | 1,387,532.53   |

These figures obtained from reports for June 30, 1925.  
Five reports not received at date of compilation.

As the use of this fund becomes more generally established among the Indians the percentage of loss, already small, will be gradually reduced from year to year.

**BOYS' AND GIRLS' CLUBS.**—Boys' and girls' club work among the Indians has made excellent progress during the year, and is now established as one of the most important and helpful features of the industrial program. This work was inaugurated in a systematic way about a year ago and at the time of my last annual report there were approximately 400 Indian children enrolled in the clubs. The work has now been introduced in 40 reservations with a total membership of over 1,800 Indian boys and girls, who finance their own projects, which include pig, calf, poultry, sheep, goat, corn, potato, garden, onion, bread, cooking, sewing, nursing, and rope clubs. The club enrollment of 1,800 is exclusive of the Five Civilized Tribes, Oklahoma, which reports over 2,500 members. Club leaders are now selected from employees of the service, and include teachers, farmers, field matrons, and day-school principals and inspectors, with a few returned Indian students who have developed the necessary qualities of leadership therefor.

A feature of the club work consists of educational trips on a competitive basis to the State short course, encampments, and fairs, and it is hoped to send an Indian demonstration team to the National Club Congress to be held in connection with the Chicago Livestock Show next fall.

To stimulate interest in the club work, a bulletin is issued called the "Indian Boys' and Girls' Club News," containing news and personal items about the work, which is distributed to all club members and other interested persons. The following is a typical extract therefrom:

"Allen Ware, a Kiowa boy who entered a pig at the county fair, took the sweepstakes over all entries and sold his prize pig for \$95. This attracted the attention of the president of the Poland China Association and all Kiowa pig club members were invited to join."

## ROADS AND BRIDGES

Appropriations for road and bridge work on the reservations were available as follows:

## ROADS

|                                  |          |
|----------------------------------|----------|
| Hoopa Valley (reimbursable)----- | \$8, 000 |
| Red Lake (tribal funds)-----     | 9, 000   |
| Mescalero (reimbursable)-----    | 12, 000  |
| Wind River (reimbursable)-----   | 10, 000  |

## BRIDGES

|  |           |
|--|-----------|
| Cochiti and San Juan Pueblos (reimbursable)----- | \$82, 000 |
|--|-----------|

Contracts have been let for the Cochiti and San Juan Bridges, after readvertising on the basis of bidders' own designs, with a resultant saving of \$22,500 as compared with the original bids based on designs prepared by the State highway department.

Under decisions of the Comptroller General interpreting a provision of the Federal highway act, the entire cost of that portion of any public highway across tribal and trust-patent allotted Indian land may be paid from the State's apportionment of funds appropriated by the act if the State will agree thereto and if the road is part of the State's approved 7 per cent system. This has given a great impetus to the construction of public roads on Indian reservations, a total of 433.94 miles having been built, at an aggregate expenditure of \$3,592,245.

## OIL AND GAS

Due to the depressed condition of the oil industry generally, caused by overproduction, the low price of crude oil, and unsettled market conditions, leasing activities on Indian reservations were below normal during the greater part of the fiscal year ending June 30, 1925. However, the present outlook indicates that the oil industry will be more active during the coming year, due primarily to the unparalleled consumption of gasoline and the greatly increased demand for other petroleum products, which will naturally increase the price of crude oil and thus create a greater incentive for its production.

While the production from Indian leases was almost as great as last year, the number of acres leased and the amount of revenue received were considerably less. The falling off in the amount of revenue received was largely due to a decrease in the amount of bonus received from the sale of Osage leases. Notwithstanding these adverse conditions, a very favorable showing was made, as is evidenced by the fact that 146,147 acres were leased for oil and gas mining purposes. The gross oil production for the year was approximately 48,138,278 barrels and the revenue received by the Indians from existing leases approximated \$16,939,697.

In the Osage Reservation alone there were at the end of the year 475,769 acres under lease for oil-mining purposes, on which there were 9,357 producing wells, with a total oil production of 33,662,179 barrels for the year, from which the Osage Indians received a revenue of \$12,141,620. Under the jurisdiction of the Superintendent for the Five Civilized Tribes there were 806,173 acres under lease, upon which there were 7,047 producing wells, with a total oil production

of 13,532,857 barrels for the year, from which the Indians received a revenue of \$4,214,100.

During the year six wells were completed on leases located on the Navajo treaty reservation, four of which are producing. There are now 14 producing wells on the reservation, the oil from which is of a very high grade and contains a large gasoline content. A deep test well is being drilled on the Rattlesnake structure for the purpose of testing out the sands in the lower horizons. The Midwest Refining Co. has laid a 3-inch pipe line from its lease on the Hogback structure to Farmington, N. Mex., a distance of 20.1 miles. The Santa Fe Co. has laid a 2-inch pipe line from its lease on the Rattlesnake structure to connect with the west end of the Midwest Refining Co.'s Hogback line, a distance of about 14 miles. The United Oil Co. has built a small refinery at Farmington, N. Mex., which will take care of at least part of the production from the Rattlesnake structure. Based on the report and recommendation of the Bureau of Mines the department on April 25, 1925, approved, as a price basis for computing royalties, a differential of 60 cents per barrel above the mid-continent price for 36–38.9 gravity oil produced on the Hogback structure and a differential of 45 cents for oil produced on the Rattlesnake structure.

On May 18, 1925, a hearing was held with representatives of Osage operators with regard to revoking the order of May 9, 1923, which permitted lessees to hold their leases without drilling upon payment of an annual rental of \$1 per acre, and the superintendent was advised by letter approved June 4, 1924, that the order would not be changed so far as existing leases were concerned, but that advertisements of lands offered thereafter should indicate that at least one well be drilled within 12 months from date of approval, as provided in the lease.

During the period of overproduction and low prices several oil companies operating in the Osage Reservation were granted permission to remove from the reservation oil produced from their leases and to store the same. When the oil which had been run to storage was sold a question arose whether the royalty settlements should be made on the basis of the price prevailing on the day of removal of the oil from the reservation for storage or the price received on the day of sale. The matter was presented to the department for consideration and the solicitor on January 31, 1925, held that settlement should be made on the basis of the price prevailing on the date of removal, provided it be removed before the sale thereof, unless a different basis of settlement be stipulated in an agreement executed by the parties to the lease with the approval of the Secretary of the Interior.

On July 23, 1924, the department prescribed new regulations under section 3 of the act of February 28, 1891 (26 Stat. L. 795), as amended by the act of May 29, 1924 (43 Stat. L. 244), to govern the leasing of tribal Indian lands for mining purposes. These regulations provide that oil and gas leases on tribal lands shall be sold at public auction to the highest responsible bidder in tracts not exceeding 640 acres: *Provided, however*, That the Secretary of the Interior in his discretion may offer at public auction an exploratory lease for any number of acres not exceeding 4,800 on structures where there is no lease; also that the 10-year term of existing tribal oil and gas

leases may, with the consent of the tribal council speaking for and on behalf of the Indians, be extended for as long a time as oil or gas is found in paying quantities. A new lease form for use in leasing restricted allotted Indian lands for oil and gas mining purposes was promulgated May 1, 1925. New regulations have been prescribed to govern the leasing of restricted Indian lands for mining purposes, but have not as yet been printed. These regulations, in accordance with the present policy of the department, provide that all oil and gas leases on such lands shall be offered at public auction. The requirement contained in the old regulations to the effect that a filing fee of \$6 shall be collected in connection with each lease or assignment is omitted from the new regulations.

### INDIAN EMPLOYMENT

It has not been an easy task to lead the Indian rapidly toward individual enterprise, but he has learned that his undivided initiative is indispensable to the highest service that he can render to himself or to his race. Evidences of this lesson appear not only in his growing tendency toward settled family life, with the convenience and comforts of a permanent home, but in the ambition of the younger element to find employment in the miscellaneous activities of modern affairs.

The encouragement of adult heads of families in the essentials of individual prosperity is having promising results through our five-year program on many reservations, and the Government schools are chiefly instrumental in the vocational guidance of Indian students. Through industrial training the boys and girls are acquiring interest and skill in the occupations of white people and are becoming eager to participate in them. The curricula of the schools offers a many-sided experience in gardening, poultry, dairying, crop production, farm mechanics, and other trades. The training in domestic science under the direction of the school mothers and teachers of home economics gives the girls proficiency in a wide range of household duties. Instruction in many of the larger schools is supplemented by vacation employment of the older pupils, termed "Outing service," where they gain experience in the varied activities of white communities, make friends, and are encouraged by a new environment to become efficient in the opportunities presented for remunerative work. These students are adequately paid and many of the more ambitious remain in their outing homes throughout the year attending high school with their patron's children. Their earnings reach approximately \$125,000 a year.

During the past year the employment of student labor was unusually large. The lighter work of thinning and hoeing sugar beets affords vacation service for many of the small boys, and combines with good wages invigorating health benefits attending a climatic change. The following excerpt from a letter addressed by the vice president of the Garden City Co., Kansas, to the supervisor of Indian employment is suggestive of the results:

"The last of the 220 Indians who were furnished by you for work in the Garden City beet fields have been returned to their various schools and reservations. We are writing you this letter—a word of praise for the boys, and your department as a whole—because of

the splendid work they performed during the two months they were here. For your information not one word of complaint was received against their work from over 200 growers for whom they performed labor."

Indians are an increasing factor in the constructive development of the West, where they are employed not only as day laborers in cotton fields, mines, and on railroad, irrigation, and other construction, but are filling responsible posts in business and professional lines. The fleet of trucks started in 1924 has recently been doubled and passenger facilities, with information concerning available employment, are placed on various reservations for transporting workers to different points at a minimum charge. Headquarters for the trucks in charge of the employment official have been established at a central point, with reconditioning shops which will constitute an automobile school for Indians, where they may learn practical repair work, driving, and handling of motor-driven vehicles.

### PRINCIPAL IRRIGATION ACTIVITIES

Perplexing economic problems confronting the farmers, particularly the irrigationists, are resulting in concentrated thought and effort being given to the complete scope of the irrigation subject to permit of a more successful program to include not only those problems dealing with the construction features of irrigation systems but to provide comfortable homes and make successful farmers of our Indians.

Congress in the enabling act of June 7, 1924 (43 Stat. L. 475), authorizing the construction of the Coolidge Dam across the canyon of the Gila River near San Carlos, Ariz., for the purpose of providing irrigation for lands allotted to the Pima Indians and for irrigation of such other lands in public and private ownership as may be feasibly irrigated from the waters impounded by the dam, imposed obligations not previously contained in legislation applying to the reclamation of Indian lands with a view of taking advantage of past experience along these lines.

On deferred payments an interest charge of 4 per cent per annum is made and no money can be expended on account of any lands in private ownership coming within the project until appropriate repayment contracts covering such lands shall have been executed with a district organized under State law, confirmed by decree of a court of competent jurisdiction, the form of such contract to be approved by the Secretary of the Interior. Individual holdings within the project are restricted to 160 acres with a view to making the project economically sound.

The interior appropriation act for the fiscal year 1926 made immediately available \$450,000 for beginning work provided for in the act of June 7, 1924. The provisions of the basic act, as above indicated, are numerous, and in addition to the foregoing it is necessary to perfect and negotiate a basic contract with the board of governors of the Florence-Casa Grande project, after which the individual landowners' signatures thereto must be secured. This is due to the fact that the department now has contracts covering the distribution of the natural flow of the Gila River to 27,000 acres of private lands,

and it is essential and desirable that such lands be designated as coming within the San Carlos project. It is necessary to ascertain the lands in public and private ownership best entitled to be brought within the project and to perfect the plans for the definition of the project so that it may be approved by the Secretary of the Interior to enable the carrying out of the mandate of Congress.

Arrangement, if possible, also must be made for the relocation of approximately 12 miles of the Southern Pacific Railroad Co.'s tracks by agreement; or if this be not possible, by starting condemnation proceedings therefor. The engineering features of the project preliminary to construction have been carried on, and under date of June 17, 1925, a board of consulting engineers was appointed to supervise plans and specifications for this structure. Prior thereto on May 16, 1925, there was appointed a board to appraise the various rights of the Apache Indians on the San Carlos Reservation that will be affected by construction of the reservoir. The preliminary work of this project is progressing as rapidly as can be expected in view of the various requirements imposed by the act authorizing the project. The legal work has been placed in the hands of Mr. John F. Truesdell, who is familiar with conditions on the ground and with the Indians' problems. The Department of Justice is handling the suit for the adjudication of the water rights of the natural flow of the Gila River. A tentative form of bill has been drafted and no doubt suit will be instituted in the near future for the settlement of the water rights of the Indians and the white water users along this stream. The outlook, in view of these conditions, is indeed promising for these Indians. They are of a peaceful nature, agriculturists for generations and, with an adequate supply of water to enable the proper cultivation of their lands, will undoubtedly be a self-sustaining people.

The diversion dam with bridge superstructure across the Gila River at Sacaton, Ariz., was reported on June 15 of this year to be approximately complete. This dam was constructed for the benefit of the Indians at a cost approximating \$700,000. In addition to the construction of this dam, work on the construction of the Florence-Casa Grande Canal has been continued.

The drainage system at the Pueblo Isleta, commenced in 1923, has been completed at an approximate cost of \$45,000. Approximately 3,500 acres of agricultural land have been reclaimed by this work at an average cost of about \$14.40 an acre. The drainage project is functioning even better than was expected, and it is believed that the results show greater success than anticipated in teaching these Indians and those of the other pueblos along the Rio Grande the value of reclaiming their water-logged lands by this method.

Work was continued on water development by drilling of wells to increase the supply for irrigation, domestic, and stock purposes on the Navajo and Hopi Reservations in Arizona and New Mexico. The sum of \$45,000 was available for this purpose. The benefits of this work were particularly felt during the past year which was an exceptionally dry one in that section of the country. A similar appropriation is available for continuation of this work during next year.

The difficulties experienced in the past in obtaining adequate water supply for the Indians on the Walker River Reservation in Nevada

have not yet been obviated. The Department of Justice has in contemplation the filing of a suit for the adjudication of the waters of the Walker River, from which the Indians obtain their water supply for irrigation. These Indians' crops suffered severely owing to insufficient water flowing down the river to their canals during the past season, and the Indians were more or less discouraged from this loss. The success of their agriculture depends largely upon the outcome of the proposed litigation.

Contracts were let for carrying on part of the rehabilitation program on the Fort Hall project in Idaho. In addition to the work being accomplished by contractors, very satisfactory progress has been made by our regular force in continuing such construction as could be accomplished with our available equipment. The Bureau of Reclamation made payment in the sum of \$700,000, as provided in the act approved May 9, 1924, for that area of the Fort Hall Bottoms which will be inundated by the construction of the American Falls Reservoir as part of the Minidoka project. Of this sum, \$600,000 was deposited in the Treasury for the benefit of the Indians, and draws 4 per cent interest. The other \$100,000 was expended for enlarging the main Fort Hall Canal to sufficient additional capacity to provide carrying facilities for the irrigation of the Michaud Flats, a unit of the Fort Hall project which has not yet been developed. It is contemplated to complete during the next fiscal year the rehabilitation program on the project, thereby making adequate irrigation facilities for the irrigation of some 52,000 acres of land which is considered to be as fine agricultural land as any in the State of Idaho.

Construction work was continued on the Flathead project, in addition to the operation and maintenance work. Considerable dissatisfaction has been evidenced by the farmers of this project, because it has not been completed earlier. The ultimate irrigable area of the project approximates 125,000 acres.

The Camas Unit of the project, at least in part, has a doubtful soil quality. The Bureau of Soils of the Department of Agriculture has assigned one of its men to make a soil survey of this unit, and a report on this survey, when received, will be of material benefit in coping with the difficulties arising.

Slight increases in the cultivated areas on the Blackfeet and Fort Peck projects have been made since the placing of the administration of these projects under this bureau. The indications are even more encouraging for the future.

Final report by the commissioners of the LeClair-Riverton Irrigation District was filed in the district court of Fremont County, Wyo., on February 9, 1924, thus completing the final organization of the district. This district, in pursuance of tripartite agreement between the United States Government, the Riverton Ditch Co., and the district approved by the department August 2, 1924, is operating, in addition to the Riverton Ditch Co.'s works, the Government's irrigation works constructed for the benefit of the Indians on the ceded part of the Wind River Reservation in Wyoming. Under this agreement the Government is to pay its proportionate share of the cost of operating the system. Construction work on the diminished part of this reservation has been continued to enable the proper irrigation of the lands within the project. Considerable work of re-

placing old wooden structures, no longer serviceable, with permanent concrete structures has been done. In addition to this the regular work of operating and maintaining the system has been prosecuted.

Construction work of that part of the Satus Unit of the Wapato project, Yakima Reservation, Wash., to be irrigated by gravity from the drainage water from the Wapato project, was carried on, thus assuring the conservation of this drainage water for the lands of the unit. Prior to progress of this work considerable concern had been evidenced that possibly this drainage water would be lost as it flows down to lands in private ownership and might thus be appropriated by others unless steps were taken to enable its being placed to beneficial use on the reservation lands. The possibility of the loss of this water has accordingly been avoided and the lands susceptible of irrigation from this gravity flow can now be irrigated at very small cost.

There has been considerable agitation for the completion of the Wapato Unit of the project on this reservation by the installation of pumping and power machinery. It is estimated that the cost of installing the unit will be \$520,000. When the installation shall have been accomplished the unit will be complete and will then serve 120,000 acres of excellent farm land.

On the Uintah irrigation project, Utah, there are 18 separate headings complicating its operation. Some of the canals and laterals of the project are jointly used by canal and irrigation companies. With a view to facilitating operation, forms of agreements with the Dry Gulch Irrigation Co. were approved February 19, 1925. It is to be hoped that the carrying out of the provisions of these agreements will result in more successful operation of the irrigation works.

On the Crow project in Montana curtailment of construction work, consisting primarily of replacing wooden structures with permanent ones, was effected with an approximate saving in the appropriation of \$67,000 without impairing the operation thereof.

It is also gratifying to note that a saving of \$1,860 per annum has been made in irrigation district No. 1 by the removal of the district office from rented quarters to the Federal building at Yakima.

In addition to the various activities herein enumerated some 150 projects, many of which are small in character, have been operated and maintained during the past year. The total area of irrigable lands under constructed works on Indian projects approximates 636,000 acres, with an ultimate area approximating 1,370,000 acres. The estimated value of the crops raised on these projects for the past year is \$23,000,000. In construction work on these projects to June 30, 1924, there had been expended approximately \$24,000,000, with an additional expenditure approximating \$6,660,000 for operation of constructed works on these projects.

Originally the costs of these Indian projects were considered gratuitous or were payable out of tribal funds. By this latter method of payment the Government advanced funds for the construction of the irrigation works on the diminished parts of the reservations and was to receive its reimbursement from the sale of the lands of the ceded portion of the reservations. By the act of August 1, 1914 (38 Stat. L. 583), however, a change was made in

this method of payment by converting these gratuities into reimbursable expenditures. This law is applicable to Indian irrigation projects except in a few cases where specific law applies.

By the act of February 14, 1920 (41 Stat L. 408), the Secretary of the Interior was directed to begin collection of irrigation charges under authority provided for in the act of August 1, 1914, and in pursuance thereto regulations were promulgated for the levying of assessments of irrigation charges on a per acre basis. In most instances the Indians are not financially able to pay the charges, with the result that the amount collected has been comparatively small.

On the larger projects, the principal ones of which are those on the Yakima and Colville Reservations in Washington, the Klamath Reservation in Oregon, the Blackfeet, Fort Peck, Flathead, Fort Belknap, and Crow Reservations in Montana, the Fort Hall Reservation in Idaho, the Southern Ute Reservation in Colorado, the Pima Reservation in Arizona, the Wind River Reservation in Wyoming, and the Uintah Reservation in Utah, white interests have purchased through Government sale allotments of deceased Indians and are now cultivating their holdings under the respective projects. Assessments are made against the white interests on a per acre basis and every effort is made for collection of the amounts owing. These interests also have suffered financial losses and in many instances have not been able to pay the charges when due. Advantage was accordingly taken by many of them of the relief legislation of May 9, 1924, authorizing the granting of extension of time in which to pay irrigation assessments. The collections on these projects June 30, 1924, on behalf of operation and maintenance charges total \$1,787,718.57, with an additional collection on behalf of construction of \$369,758.51, with other miscellaneous collections, bringing the grand total to \$2,264,859.15.

The beginning of the irrigation season during the calendar year of 1925 indicates that better financial conditions exist among the white water users, as practically no requests have been forwarded to the office asking for additional time in which to pay the obligations to the Government, and it has also been noted that few complaints relative to the management of the projects have been filed; these conditions are indeed gratifying. Much confusion exists due to lack of uniformity of laws applying to Indians' irrigation projects. This is particularly true with reference to collections. On 11 of the projects unpaid charges are a lien against the land, which protects the Government's interests. In order to afford proper protection, it is desirable that a lien be created against lands under all Indian projects to assure repayment of the expenditures.

#### LAW AND ORDER

**INDIAN OFFENSES AND CUSTOMS.**—Indians within reservations are punishable in the Federal courts for the seven major crimes specifically mentioned in section 328 of the United States Criminal Code of 1910. For many other offenses made punishable in general by State laws, Indians are, as a rule, exempt from punishment by reason of the provisions of sections 2145 and 2146, United States Revised Statutes. Existing regulations or means of enforcing same are in-

adequate to deal with the situation satisfactorily. In a great many cases there is little reason for recognizing "Indian custom" to defeat the maintenance of well-recognized law and order. The majority of the worst offenders are not the real old or ignorant Indians, but the younger classes, who know better, but who also know that the laws are inadequate to punish them.

By the act of June 2, 1924, all Indians who were not already citizens are made such, and it is believed that with few exceptions they should be made subject to the penal laws applicable to all other citizens. Sections 328 and 329 of the Federal penal code should be enlarged to provide for most cases of crime or offenses committed by Indians within Indian reservations.

**SUPPRESSION OF LIQUOR TRAFFIC.**—While the appropriation has been decreased again for the current fiscal year, and operations will therefore necessarily be curtailed, good results have been secured. In addition to the law violators actually caught and prosecuted, the activities of the officers have prevented many Indians from being made the victims of those who are criminal enough to debauch them. Much assistance and cooperation is secured from the officers of the Federal Prohibition Director's force, United States marshals and deputies, etc., and from many State officers, such as sheriffs and their deputies, city police, etc. The problem of keeping intoxicating liquors from Indians is still acute, however, and the work is exceedingly hard and hazardous, two of our comparatively small force having been shot to death during the year by criminals engaged in violation of the liquor laws.

**PEYOTE.**—Reports continue to come in relative to the evil influences of peyote and the crafty schemes of those promoting its sale and use. A Federal law is needed to prohibit or curb its use and sale. Bills heretofore introduced have failed of passage.

**MARRIAGE AND DIVORCE.**—Indians are more and more adopting the general practice of civilization in marrying in accordance with the laws of the State in which they reside. The old form of "Indian-custom marriage" is not so frequently utilized by Indians who desire to assume the relationship of husband and wife, and where such relationship was entered into by Indian custom they are usually willing to conform to the State law upon request of the superintendent. There are some who, not desiring to take up the marriage relationship in good faith, fall back on the "Indian-custom marriage" and "Indian-custom divorce" to protect them in their licentiousness. On most of the Indian reservations at least it is believed that the Indians are sufficiently well advanced to justify an act of Congress requiring Indians to comply with the State laws in the matter of marriage and divorce. Such law, of course, would not be retroactive, but would provide for legal procedure after the date fixed by the act.

**PENSION OF INDIAN SCOUTS.**—Many old Indian warriors who rendered faithful service to Uncle Sam in the years gone by have been rewarded by the granting of pensions to assist them in meeting their needs in their old age. At the same time it is to be regretted that others who have lost their discharges and are unable to give the name by which they were enrolled in the Army have been unable, therefore, to secure their pension. A technical construction of law pre-

vents the United States Indian Superintendent in charge of these old scouts from securing a copy of the roster for the purpose of identification through a study of the names and the questioning of the Indians through an interpreter.

**FISH WITHIN RESERVATIONS.**—During the year this bureau has cooperated with the United States Fish Commission in the restocking of many of the Indian-reservation streams and lakes with fish for the benefit of the Indians and the general public. On a number of Indian reservations fish forms an important part of the subsistence of the Indians. On a few commercial fishing reaches considerable proportions and brings large receipts to the individual fishermen and to the tribe.

### FORESTRY

Extensive sales having been made on a number of reservations during recent years, it has been the policy during the past year to restrict offerings of timber except where the economic interests of a particular tribe of Indians clearly demanded its sale, or conditions were peculiarly favorable for a sale at advantageous prices. Thus, on the Klamath Reservation in Oregon only three small tracts were offered, namely, the Big Spring, the Cherry Creek, and the Kawumkan Bend Units. The prices received for yellow pine on these respective units were \$6.36, \$6.11, and \$5.07 per thousand feet. For small units of medium quality these were considered exceptionally high prices. About 20,000,000 feet of yellow pine lying south of the Navajo River within the Jicarilla Reservation in New Mexico, was sold at \$3.60. Sales from individual allotments were made on various reservations at satisfactory prices.

The total amount of timber cut under contract from Indian lands during the fiscal year 1925 was 460,000,000 feet and the total stumpage value of such timber was \$1,858,000. The net proceeds of such sales are placed to the credit of the various tribes or of the individual owning allotments from which the timber is cut, and are then available for purposes beneficial to the Indians. The funds thus derived have done much to improve living conditions among the Indians and to afford them capital as a foundation for economic success.

The winter of 1923-24 and the spring and summer of 1924 marked a period of exceptionally light precipitation throughout the Cascade and Rocky regions. For instance, at the Warm Springs Agency in Oregon the precipitation between January 1, 1924, and September 20, 1924, was only 1½ inches. Anticipating an exceptionally dangerous fire season special preparations were made in April, 1924, and through constant vigilance and effective organization the damage from forest fires on Indian lands was held at a low figure. The funds expended in the establishment of lookout stations and strategic telephonic connections will not be fully effective without a force of men trained and properly stationed for the prompt suppression of incipient conflagrations.

On October 5, 1924, the large sawmill that had been operated on the Menominee Indian Reservation since 1908 was burned. This resulted in a substantial loss, especially on account of the almost com-

plete cessation of logging and milling operations during the remainder of the fiscal year 1925. However, \$186,460.24 was collected as insurance on the property burned and an act approved March 4, 1925 (43 Stat. L. 1330), appropriated \$275,000 for the rebuilding of the mill. The construction of a modern reinforced concrete mill is now in progress and it is expected that milling operations will be resumed in the spring of 1926.

Under authority of an appropriation contained in the Interior appropriation act for the fiscal year 1925 a single-band sawmill has been constructed at Redby, Minn., on the Red Lake Indian Reservation, and during the sawing season of 1925 over 4,000,000 feet of pine timber will be manufactured at this mill. It is hoped that an enterprise may be developed at Redby that will not only afford employment for a large number of Red Lake Indians but will return a substantial profit on a commercial basis.

The Interior appropriation act for 1925 also contains an item of \$25,000 for the construction of telephone lines from the nearest railroad points to the agencies at Sells and Keams Canon in Arizona. The construction of these two telephone lines, each about 75 miles in length, was completed early in June, 1925. Standard equipment was used and the long-desired means of communication with the outside world will assist materially in the carrying on of the work at these two agencies. Steps have also been taken for establishment of telephonic communication with the Havasupai Agency and for rebuilding, on a standard basis, of lines to the Navajo and the Western Navajo Agencies in Arizona.

#### PUEBLO LANDS BOARD

The act of Congress, approved June 7, 1924 (43 Stats. L. 636), provides for the creation of a board, to be known as the "Pueblo Lands Board," to be composed of three persons—one as the representative of the President, the other two as representatives of the Secretary of the Interior and the Attorney General. The duties of this board consist in adjusting and quieting title to Pueblo lands in New Mexico between settlers and the Pueblo Indians. Mr. Roberts Walker was appointed as the President's representative, Mr. H. J. Hagerman and Mr. Charles H. Jennings to represent the Secretary of the Interior and the Attorney General, respectively. The board has effected an organization and is now actively employed in its field duties at Santa Fe, N. Mex. The expenses of the board are provided for in two special appropriations (43 Stats. L. 756 and 1028), amounting in the aggregate to \$58,500.

**NEW YORK INDIAN CLAIMS.**—Some of the tribes of the Six Nations Indians of New York, claiming that the sale of certain of their lands to the State of New York was illegal, are seeking to recover large sums of money from the State. It has been reported that attorneys or other representatives of the claimants have assessed members of these tribes in New York and individual Indians in Oklahoma, Wisconsin, Canada, and elsewhere, in sums as much as \$25 per capita for the purpose of obtaining funds with which to institute suit; and that unless the assessments were paid the names of the Indians

approached would be stricken from the tribal rolls. The Indians so assessed have been advised against contributing money for such purposes, and through information received from the Attorney General of New York, that the State would not recognize any such claims as valid and has offered no sum of money in settlement. There is now pending in the United States Supreme Court the case of United States of America ex rel. Walter S. Kennedy and Sylvester J. Pierce v. William F. Waldo et al., No. 509. This case was the result of action taken by the New York tribal Indian authorities to dispossess certain Indian heirs of certain reservation lands, which action was held illegal by decision of the State court, and the matter was then appealed to the United States Supreme Court. It is believed that the decision when rendered will settle the question of the jurisdiction of the so-called Indians' Peacemakers' Court and of the State courts, as well as the larger question of State and Federal jurisdiction over these Indians and their internal affairs.

### PURCHASE OF SUPPLIES

Under contracts for the year entered into in the spring of 1924, and later for subsequent purchases, prices generally remained firm, some staple commodities weakening in the last few months of the year, others maintaining a higher level. Interest in our requirements continued unabated and competition was keen. Supplies of standard quality were purchased and careful inspection by competent employees and others was made before deliveries were accepted, with the result that with but few exceptions favorable comment from field officers has been received. Of especial importance is the fact that all units of the service were kept amply supplied with fuel. Surplus supplies of other governmental branches have been utilized when obtainable on an economical basis. The need is urgent for a simplification of the statutory requirements regarding the procurement, execution, and disposition of supply contracts. Under existing law concerning this matter long delays in the procurement of all essential supplies for the field units are unavoidable and obviously detrimental to sound economic business administration.

### HEIRSHIP AND PROBATE

Under the provisions of sections 1 and 2 of the act of June 25, 1910 (36 Stat. L. 855, 856), as amended by the act of February 14, 1913 (37 Stat. L. 678), the Secretary of the Interior is authorized to determine the heirs of deceased Indians and to consider their wills, and either approve or disapprove the same as justified. This work has progressed satisfactorily. At the present time there are 12 examiners of inheritance employed in the field, with necessary clerical assistants, whose duty it is to prepare the cases for departmental action, in accordance with formal regulations approved by the department June 19, 1923.

During the fiscal year ended June 30, 1925, 1,695 heirship cases were settled and 206 wills disposed of, and final disposition was made of 2,250 miscellaneous probate cases for the Indians. Fees in the amount of \$61,994.60 for determination of heirship cases were earned,

and there was earned \$10,500 as fees for the approval of wills, making a total of \$72,494.60. In addition, 378 probate cases were determined in which no fees could be charged, the appraised value being less than \$250. There was collected the sum of \$68,111.59 as fees, a graduated fee ranging from \$20 to \$75 being charged for probating the estates; the money collected is turned into the Federal Treasury.

#### QUAPAW LEAD AND ZINC MINING LANDS

The leasing of Quapaw Indian restricted allotted lands in Oklahoma for lead and zinc mining purposes is governed by the provisions of the act of Congress of March 3, 1921, and departmental regulations thereunder. At the present time there are 58 lead and zinc mining leases in force covering approximately 7,056 acres of land, and on this acreage there are 49 subleases covering 2,460 acres. There are 106 mines and mills on the restricted lands, 95 of which are producing. During the past year the mines on the restricted Quapaw Indian lands produced 259,432.28 tons of lead and zinc concentrates, which sold for \$15,135,569.23.

The royalties received at the Quapaw Indian Agency during the year for the benefit of the Indian owners of the land aggregated \$1,257,119.16, an amount equal to approximately  $8\frac{1}{2}$  per cent of the gross sales of the concentrates. The mines on the restricted Indian lands of the Quapaw Agency supplied approximately 20 per cent of the zinc and 8 per cent of the lead produced in the United States.

In the new leases made during the year increased royalty rates for the Indian owners of the land were obtained and the proper mining development of the land was provided for. The leasing of additional acreage is under consideration. Through the cooperative arrangement with the Bureau of Mines technical data and valuable information has been obtained relating to mineral development, mining operations, and mining improvements on the Quapaw lands, which has materially aided the Indian Office in determining the terms and conditions upon which leases should be made, and the requirements for the proper mining developments.

#### THE FIVE CIVILIZED TRIBES IN OKLAHOMA

Further progress has been made during the year toward the closing out of the tribal affairs of the Five Civilized Tribes. In the Choctaw and Chickasaw Nations the remaining tribal property is valued at \$11,143,241.28, in the Creek Nation at \$128,134.48, and in the Seminole Nation at \$30,000. A few tracts of Cherokee tribal land have not yet been disposed of. There remains to be collected on tribal property heretofore sold a total of \$1,151,502.61.

There are approximately 17,000 Indians of the restricted class, and careful consideration is being given to the proper administration of their affairs, and especially in regard to the education of the children of school age, the removal of restrictions from the Indians who are competent to manage their own affairs, the conservation of the lands and funds of those remaining in the restricted class, the sale of land under Government supervision, and the disbursement of

the proceeds in improving Indian homes, the leasing of the restricted lands for oil and gas and agricultural purposes, and the collection and disbursement of the rentals and royalties.

The reports from the field are to the effect that there is a decided improvement manifested on the Indian farms in the way of increasing production and raising more and better livestock.

Effective cooperation between the field officers of the Indian Service and county representatives in agricultural matters was had during the year, which resulted in benefit to the Indian farmers.

Under the supervision of the field force there was expended during this fiscal year the sum of \$3,774,691.59 of individual Indian money for maintenance, farms, buildings, livestock, and equipment. During the year restrictions were unconditionally removed from the lands of 273 Indians and 80,001.36 acres of restricted individual Indian lands were leased for oil and gas mining purposes, the gross oil production for the year being 13,532,856.81 barrels. The total income from oil and gas was as follows:

|  |                 |
|--|-----------------|
| Bonus received for leases.....         | \$247, 259. 80  |
| Royalty on oil and gas production..... | 3, 116, 870. 21 |
| Advance royalty and rental.....        | 849, 970. 30    |
| Total .....                            | 4, 214, 100. 31 |

During the year the cashier for the Five Civilized Tribes has handled a total of \$32,242,673.81, including receipts and disbursements of all classes of funds. There was credited to the individual Indian accounts the sum of \$7,379,551.06.

On June 30, 1925, the balance of individual Indian moneys on hand amounted to \$13,182,949.08.

The very important work of our probate attorneys conducted in that part of Oklahoma formerly the Indian Territory has continued with beneficial results to the restricted Indians of the Five Civilized Tribes and Quapaw Agency. These attorneys have been the means of preventing much wasteful extravagance by their careful supervision of probate cases, checking reports of guardians and investigations of abuses complained of. They have carefully guarded the interests, especially of those Indians who, for want of education, lack of business experience, or because of age or other conditions, are unable to properly protect themselves in matters affecting their property.

The Indians freely consult these attorneys in matters relating to guardianship administration of estates, transactions of various kinds concerning inherited and restricted property, and in regard to the conservation and use of their restricted lands and funds.

In view of the investigation made and information obtained as to the manner in which the estates of Indians were being handled by guardians and administrators under State jurisdiction, an effort was made to obtain legislation with a view of restoring to the Secretary of the Interior the exclusive jurisdiction and control of the funds, lands, and other property of the restricted Indians. The matter is still under consideration with a view of recommending to Congress legislation for the better protection of the property and interests of the restricted Indians of the Five Civilized Tribes.

**CONCLUSION**

In concluding this report I wish to express sincere appreciation of the loyalty and faithfulness of the employees of the Indian Service and the helpful assistance rendered by individuals, missionaries, churches, and organizations working for the benefit of Indians generally, and to acknowledge with gratitude your unfailing cooperation and support.

Very respectfully,

CHAS. H. BURKE,  
*Commissioner.*

The SECRETARY OF THE INTERIOR.

TABLE 1.—*Indian population of the United States, exclusive of Alaska, June 30, 1925*

TABLE NO. 2.—*Indian and school population, number eligible for school attendance, number in schools, etc., and capacity of schools provided for Indian children during fiscal year ended June 30, 1925—Continued*

| RECAPITULATION                                      |        |
|---|--------|
| Indian children of school age.....                  | 83,765 |
| Indian children eligible for school attendance..... | 77,577 |
| Government schools:                                 |        |
| Nonreservation boarding.....                        | 8,542  |
| Reservation boarding.....                           | 10,615 |
| Day.....  | 4,604  |
|   | 23,761 |
| Mission schools:                                    |        |
| Contract boarding.....                              | 2,047  |
| Noncontract—  |        |
| Boarding.....                                       | 3,635  |
| Day.....  | 1,307  |
|   | 4,942  |
| Private or State schools, contract boarding.....    | 6,989  |
| Public schools.....                                 | 291    |
|   | 34,452 |
| Total, all classes.....                             | 65,493 |
| Number of eligible children not in school.....      | 12,191 |

This table is prepared from reports covering Indian children from 6 to 18 years of age, inclusive. Table No. 3 shows slightly increased totals due to inclusion in many schools of students under 6 or over 18 years of age.

TABLE NO. 3.—*Location, capacity, enrollment, and average attendance, etc., of schools during fiscal year ended June 30, 1925*

## THE BUREAU OF INDIAN AFFAIRS

The Department of War was created by act of Congress of August 7, 1789, and the duties assigned to it included those "relative to Indian affairs."

A Bureau of Indian Affairs was organized in the War Department on March 11, 1824, with Thomas L. McKenney as its chief, and among the duties assigned to the bureau were the administration of the fund for the civilization of the Indians under regulations established by the department, the examination of claims arising out of the laws regulating the intercourse with Indian tribes, and the ordinary correspondence with superintendents, agents, and sub-agents. He was succeeded September 30, 1830, by Samuel S. Hamilton, whose successor about one year later was Elbert Herring.

By act of July 9, 1832, there was created in the War Department the office of Commissioner of Indian Affairs, who, subject to the Secretary of War and the President, should have "the direction and management of all Indian affairs and all matters arising out of Indian relations."

On June 30, 1834, an act was passed "to provide for the organization of the Department of Indian Affairs." Under this enactment certain agencies were established and others abolished and provision was made for subagents, interpreters, and other employees, the payment of annuities, the purchase and distribution of supplies, etc. This may be regarded as the organic law of the Indian Office.

When the Department of the Interior was created by act of March 3, 1849, the Bureau of Indian Affairs was transferred thereto, and hence passed from military to civil control.

Section 441 of the Revised Statutes provides that "the Secretary of the Interior is charged with the supervision of public business relating to \* \* \* the Indians."

Section 463 of the Revised Statutes reads: "The Commissioner of Indian Affairs shall, under the direction of the Secretary of the Interior and agreeable to such regulations as the President may prescribe, have the management of all Indian affairs, and of all matters arising out of Indian relations."

## REPORT OF THE COMMISSIONER OF INDIAN AFFAIRS

DEPARTMENT OF THE INTERIOR,  
OFFICE OF INDIAN AFFAIRS,  
*Washington, D. C., September 15, 1926.*

SIR: I have the honor to submit this, the Ninety-fifth Annual Report of the Bureau of Indian Affairs for the fiscal year ended June 30, 1926. For the purpose of promoting efficiency in the general administration of all health, educational, agricultural, and industrial activities which concern the Indians, reorganization of prior methods of the bureau in regard to such administration has been effected. There has also been developed and put into effect a budget system for all Indian field units or superintendencies. These measures to which attention is particularly invited are more fully outlined in the report.

### HEALTH

REORGANIZATION OF THE MEDICAL SERVICE.—Plans for the reorganization of the Indian medical service were perfected during the latter part of the year. For the furtherance and development of the work this new plan provides for the service of a chief medical director and for division of the country generally into four districts, as follows:

District No. 1: Michigan, Wisconsin, Minnesota, Iowa, North Dakota, and South Dakota.

District No. 2: Montana, Wyoming, Idaho, Utah, Washington, Oregon, and Northern California.

District No. 3: Southern California, Nevada, Arizona, New Mexico, and Colorado.

District No. 4: Nebraska, Kansas, Oklahoma, Mississippi, and North Carolina.

Each district will be under the immediate supervision of a medical director whose functions will be to make inspections of the various Indian activities with respect to the school, hospital, sanatorium, and health features; to study and report upon standardized methods of procedure and facilities, including personnel; to coordinate medical and sanitary activities by means of conferences; to investigate and adjust controversies; to report on matters affecting the Indian medical service and its public-health policies; to promote cordial relations with State and local sanitary authorities and other public-health organizations and to maintain an office in such district which shall serve as a general center for Indian medical service activities.

In this organization provision has been made for the service of an epidemiologist who will work in the field under appropriate direction and who will have supervision over epidemiological matters

relating to the Indian medical service. Provision has also been made for a physician especially qualified in tuberculosis and trachoma, who will cover the field in dealing with special problems connected with these diseases.

Under this scheme of reorganization it is expected that more accurate compilation of morbidity and mortality statistics will be made, the medical activities better coordinated and standardized, and the general medical service to the Indians improved through more detailed and comprehensive studies and by the application of such studies to the needs of the service. With this end in view the United States Public Health Service has detailed Dr. Marshall C. Guthrie to serve as chief medical director, assigning certain other officers to act as district medical directors, and that service has indicated its willingness to act in an advisory and cooperative capacity through the services of its hospitals, laboratories, and public-health resources, including the active services of its six field medical directors and other personnel. The reorganization anticipates also increasing the number of special physicians and nurses now engaged in the eradication of trachoma. Special provision will also be made for putting into effect approved methods of detecting, treating, and safeguarding those who are sufferers from tuberculosis. An increase in the number of field dentists for reservation and school work is anticipated, as well as a material increase in the nursing personnel specially trained for public-health work.

It is believed that when this organization has been put on a thorough working basis an improved medical, dental, nursing, and sanitary service to the Indians will result.

**HEALTH ACTIVITIES.**—Continued progress in the health activities of the Bureau of Indian Affairs in its campaign for improved conditions among the Indians may be reported at the close of the fiscal year 1926. Education has shown the Indian more clearly the advantages of scientific medical and hospital care, and as a result thereof the need for improved facilities is growing annually. Analysis of vital statistics shows that the birth rate exceeds the death rate. The Bureau of Indian Affairs now maintains health activities in 24 States, which are engaged in treating disease and in improving general sanitary conditions on the Indian reservations. Especial attention has been given to the prevention of disease, and a regularly outlined educational course on this subject is now provided for the Indian schools.

**HEALTH EDUCATION.**—Realizing the importance of health education as a means of improving health and living conditions, the course in this work established in the Indian schools a year ago has been extended in its scope to reach children of practically all ages attending the Government schools. It is believed that the training of the child in correct standards of sanitation will result in improved health conditions within the reservation as the pupils return to their homes after leaving school.

**EPIDEMICS.**—During the past year there were no unusually severe epidemics among the Indians of the country. The use of prophylactic vaccines and other preventive measures is greatly modifying epidemics among the Indian people. A campaign was waged throughout the early part of this year for more thorough vaccination against

smallpox, and reports received indicate that the campaign was very successful.

**GENERAL CONDITIONS AND RESULTS.**—Tuberculosis and trachoma continue to constitute the most formidable problems with which the medical service is confronted. Tuberculosis carries the major death toll of the Indian race. However, progress has been made in limiting the ravages of this disease.

The new sanatorium school located at Shawnee, Okla., with a capacity of 100 beds, has been in operation during the year and is developing into a successful institution.

A new dormitory has been added to the plant of the Fort Lapwai Sanatorium, Idaho, affording increased capacity and better facilities for properly caring for patients there, and as this is an important institution, maintaining, as it frequently does, a waiting list of patients for whom there is no room, Congress has appropriated funds for an additional dormitory and hospital building for the coming year. When these are completed, Fort Lapwai will be an excellent institution for the care, treatment, and education of tuberculous children.

During the year the former boarding-school plant at Pyramid Lake, Nev., has been converted into a sanatorium school with a capacity for 80 patients. This institution will care for the tuberculous children of this particular part of the country, where there has been an increasing demand for sanatorium accommodations, since through education these Indians are more fully realizing the value of such institutions.

The trachoma work has been continued and expanded during the past year. The southwest trachoma campaign has been continued with excellent results. Two physicians and two nurses have been added to the workers in this district. The record of the work accomplished by the special physicians engaged in this campaign is as follows

|  |         |
|--|---------|
| Number of Indians examined for trachoma.....   | 14, 756 |
| Number of cases of trachoma found.....         | 4, 479  |
| Number of cases operated upon.....             | 1, 938  |
| Number of cases treated without operation..... | 2, 541  |

Besides the campaign in the Southwest, the other special physicians have kept up the trachoma work in their districts. The trachoma hospital at Albuquerque, N. Mex., has been filled to capacity throughout the year. Additional trachoma work will be undertaken during the coming year in connection with the reorganization of the Indian medical service.

The field nursing service has been extended and a number of reservations have been supplied with graduate nurses for public-health nursing in Indian homes. This new service is greatly needed and is being developed as rapidly as is consistent with available funds.

The service still needs more sanatorium schools, additional hospitals for the care of terminal cases of tuberculosis, an institution for the care of the feeble-minded, and a hospital for crippled children.

During the year the construction of a hospital at the Klamath Agency, Oreg., was begun and this institution will soon be completed and in operation. Heretofore the Klamath jurisdiction had no hospital facilities. The new institution, with a capacity of 50 beds, will, it is believed, care for all Indians of the reservation

requiring hospital service, thus obviating the necessity for the hospitalization of Indians in institutions off the reservation and at an increased expense, besides furnishing this accommodation to a large number who could never have been reached otherwise.

On the Fort Peck Reservation at Poplar, Mont., a hospital is nearing completion which will have a capacity of 44 beds. This hospital will be open to all Indians of the jurisdiction. In the past there has been no way of hospitalizing the older Indians of the reservation except to admit them to the small hospital at the boarding school. The new building will furnish facilities for care of the sick at the school and among the reservation Indians.

## REORGANIZATION OF METHODS FOR ADMINISTRATIVE DIRECTION

The plan of reorganization of the medical service of the bureau has been explained in the text which precedes under the heading "Health."

Reorganization has also been effected with regard to the direction and supervision of all educational, agricultural, and industrial activities and the personnel relating thereto. In pursuance of this plan there has been appointed a general superintendent under whose charge the territory in which Indian activities are conducted has been divided into nine districts, as follows:

District No. 1 (headquarters, Lawrence, Kans.): Kansas, Nebraska, Mississippi, North Carolina, eastern Oklahoma.

District No. 2 (headquarters, Minneapolis, Minn.): Michigan, Wisconsin, Minnesota, Iowa.

District No. 3 (headquarters, Pierre, S. Dak.): South Dakota.

District No. 4 (headquarters, Browning, Mont.): North Dakota, Montana, Wyoming.

District No. 5 (headquarters, Fort Lapwai, Idaho): Idaho, Washington, Oregon.

District No. 6 (headquarters, Riverside, Calif.): California, Nevada.

District No. 7 (headquarters, Flagstaff, Ariz.): Arizona.

District No. 8 (headquarters, Albuquerque, N. Mex.): New Mexico, Colorado, Utah.

District No. 9 (headquarters, Anadarko, Okla.): Western Oklahoma.

The field units of each district are under immediate supervision of a district superintendent whose station has been so designated that the several units within his district may be reasonably accessible for personal communication. In addition to direct supervision of the activities mentioned, the duties of these officials will embrace assistance in the preparation of budgets, responsibility for the interpretation and execution of the policies of the commissioner, inspection of school and agency activities, supervision of school and agency organization and of classroom and vocational instruction, examination of the condition and needs of material plants and of personnel, conference with State and county officials, and conduct of special investigations when directed. They will report concerning these matters as occasion may require.

It is expected that many matters of detail and management not involving questions of policy will be adjusted by the district superintendents, thereby lessening the volume of correspondence with the office and expediting and simplifying the field work.

To the office of general superintendent, with headquarters at Washington, has been assigned Mr. H. B. Peairs, whose guidance and assistance in directing, coordinating, and strengthening the Indian field work through this organization should prove most effective.

### BUDGET SYSTEM

A budget system for all field-service units was formulated and introduced during the year in order that its operation might be tested prior to presentation of budgets for the ensuing year. The plan comprises the determination and assignment of all moneys required for each unit for the entire year and includes the issuance of a single authority for all expenditures at such unit in lieu of the multitude of separate authorities which it has been customary for many years to issue from time to time to meet innumerable current needs. Even during the few months which have elapsed since its introduction, daily observation of the system strongly supports the conviction that it will prove highly successful and will remain as a logical and permanent method.

### CONFERENCE OF DISTRICT SUPERINTENDENTS

Pursuant to the new plan of organization, a conference of district superintendents was held at Washington from May 3 to 12, at which were present the general superintendent, the superintendents of the nine districts, and the supervisor of home economics. At this conference plans and procedure for the future were discussed and adopted. Recommendations submitted by the conference included submission of the annual Indian-school census in June of each year; a post-card form for weekly report of attendance of Indian children in State public schools; a report by each district superintendent in April, setting forth the financial, industrial, and personnel needs of his district, listed in the order of their importance; definite eligibility rules and a more uniform procedure for enrollment of Indian children in Federal schools; a careful study of local school conditions for the purpose of devising ways and means of reducing institutional labor to a minimum in order that more time may be devoted to instruction; instructions for the better distribution of surplus property; leasing of their lands by Indians prior to expiration of the trust period, coupled with the suggestion that the Indian should not be permitted to live in idleness from the rentals of his property nor from other unearned moneys, but, to have the benefit of this money, should be at work; legislation which will eliminate the necessity for preparation of formal contracts where an amount not exceeding \$5,000 is involved; provision in acts making appropriations for purchase of lands which will permit the use of a part of the moneys for the building of homes on the lands acquired. Many other matters of detail but of importance to the welfare of the service were considered.

Time was devoted by the conference to consideration of plans and methods for better assistance of Indians in the matter of home building and home improvement. Much work of this character has been done within the reservations already, but as an instance of systematized effort attention was called to methods pursued at the Kiowa

Agency, in Oklahoma. At this unit a set of building plans had been gathered suitable for Indian homes of low or moderate cost. Any Indian desiring to secure for himself a home is assisted to select a plan suited to his financial circumstances. A standard form of building contract and bond, to be entered into by the building contractor, are then provided in order to sufficiently safeguard the interests of the Indian owner. It was recommended that this procedure be extended to the entire service. The building of good homes by Indians and reasonable improvement of all living conditions has been recognized as a material factor in their progress, educational and otherwise, and is essential to the future of the students who, returning from school, will be seriously affected by discouraging home and family conditions. .

## EDUCATION

**ATTENDANCE AND GRADING.**—Nearly all of the Indian schools were filled to capacity, except in a few instances where the tributary school population does not equal the capacity of the school, and a few schools were somewhat crowded beyond their actual capacity. Statistics showing enrollment and attendance in all schools are to be found in Table No. 3 of this report. There is given at this point, however, a statement in tabular form showing approximate attendance and distribution by grades of the children in the Government Indian schools.

### *Enrollment of Indian children in Federal schools during the fiscal year 1926*

| Wyoming        | 14             | 12    | 25    | 15    | 8     | 7     | 8     |       |       |     |     |     |     |
| Total          | 3,288          | 3,070 | 2,963 | 3,167 | 3,211 | 2,635 | 2,133 | 1,629 | 1,130 | 792 | 492 | 232 | 159 |

The total of 24,901 children shown is not the same as given in Table No. 3, hereinafter, for the reason that reports are not complete at the time of this writing. In grade 12 are included 17 special students taking advanced work.

A provision in the Interior Department appropriation act for the fiscal year 1926 authorized the use of moneys for the remodeling and

improvement of the former military post at Fort Wingate, N. Mex., now to be known as the Charles H. Burke School. This plant was secured from the War Department and the school to be established there will be primarily for the education of Navajo Indian children, of whom there are many now without school facilities. The work of reconstruction has been begun, but will not be finally completed until later in the ensuing fiscal year. It will eventually accommodate 700 Indian children.

**ATTENDANCE IN PUBLIC SCHOOLS.**—There has been an increase in the number of Indian children for whom payment of tuition to State public schools has been authorized and paid as compared with the number for the preceding fiscal year. Authorities have been issued for payments to 737 public-school districts for 10,340 pupils, as compared with 655 school districts and 8,752 children during the fiscal year 1925. Total payments thereunder will approximate \$311,000, from an appropriation of public money, as compared with \$260,541 during 1925.

These figures do not include children for whom tuition has been paid from the tribal funds of the Chippewa Indians in Minnesota, nor those of the Five Civilized Tribes in Oklahoma. Payment of tuition was authorized for 933 Chippewa children in 38 districts in Minnesota. In the territory of the Five Civilized Tribes financial assistance was rendered to 149 districts in which the total enrollment exceeded 15,000.

**EXTENSION OF GRADES.**—In the report for the fiscal year 1925 announcement was made of the adoption of a policy of grading in Indian schools which would comprise six elementary grades, three junior high-school, and three senior high-school grades. Extension of the courses so as to include the senior high grades, the tenth to the twelfth, inclusive, has been authorized at the Albuquerque school, New Mexico, the Chilocco school, Oklahoma, and the Salem school, Oregon. By reference to the table showing enrollment by grades it may be seen that there were about 910 students in these higher grades during the year, and it is believed that the demand by Indian youth for high-school training is an indication of rapid educational progress among a large proportion of the Indians.

**CHANGE IN SCHOOL PROGRAM.**—Pursuant to recommendation of the conference of district superintendents, the boarding-school program has been so modified that there shall be assigned each week one-half time for classroom instruction, one-fourth for vocational instruction, and one-fourth for institutional work details of pupils. The effect of this program is to increase the proportion of the school day to be devoted to instruction proper and to decrease the time given by pupils to institutional details which are for the performance only of noneducational routine labor.

It should be explained that pupils of the three primary grades, so far as existing regulations have prevailed, are in classroom during all daily periods, and it is desired that such attendance be extended to the fourth and fifth grades as rapidly as circumstances and available moneys permit. The school program is essentially the platoon system of organization.

Reduction of the work detail is being accomplished by the introduction of improved methods and labor-saving equipment, such as dish-washing machines, food trucks, laundry machinery, and other

Contracts awarded under advertisement of Aug. 21, 1911.

1 Delivered prior to Jan. 1, 1912.

2 In carload lots of flour, bran, oats, and feed; if shipped in less than carload lots 25 cents per hundred-weight additional.

3 If delivered at Standing Rock Agency, N. Dak.

4 If delivered at Martin Kenel School, N. Dak.

5 Deliveries to be made at such places at Tulalip and at such times and in such quantities as may be required by the superintendent in charge of the school.

## INDIAN LAND INTERESTS

**ALLOTMENTS.**—During the fiscal year ended June 30, 1926, allotments totaling 2,592 were made and approved to individual Indians embracing lands on various reservations, aggregating 13,177.46 acres, as shown in the following table:

| Reservation                | Number of allotments | Acreage     | Reservation          | Number of allotments | Acreage     |
|----------------------------|----------------------|-------------|----------------------|----------------------|-------------|
| Leech Lake, Minn.....      | 1                    | 21. 05      | Umatilla, Oreg.....  | 10                   | 723. 28     |
| Fort Peck, Mont.....       | 5                    | 457. 74     | Yankton, S. Dak..... | 1                    | 120         |
| Fallon, Nev.....           | 8                    | 80          | Oneida, Wis.....     | 1                    | 25          |
| Walker River, Nev.....     | 2                    | 40          | Spokane, Wash.....   | 1                    | 120         |
| Standing Rock, N. Dak..... | 2, 560               | 11, 123. 28 | Total.....           | 2, 592               | 13, 177. 46 |
| Navajo, N. Mex.....        | 1                    | 160         |                      |                      |             |
| Klamath, Oreg.....         | 2                    | 307. 11     |                      |                      |             |

In addition to the foregoing, 71 allotments were made to Indians residing on the public domain in various States, comprising 9,783.80 acres.

**EXTENSION OF TRUST PERIOD.**—The period of trust was extended by order of the President on allotments made to Indians within the following reservations: Papago, Ariz.; Cass Lake, Leech Lake, and White Oak Point, Minn.; Ponca, Nebr.; Fort Berthold, N. Dak.; Iowa, Sac and Fox, Kiowa, Comanche, Apache, and Wichita, Eastern Shawnee and Otoe, Okla.; Grand Ronde, Oreg.; Yankton and Rosebud, S. Dak.; and reserved lands of the Chief Moses Band, Wash.

**CALIFORNIA INDIANS.**—One tract of land containing 45 acres was purchased at a cost of \$9,000 for the relief of homeless Indians in the vicinity of Healdsburg, Sonoma County, Calif. These Indians are under the jurisdiction of the Sacramento Indian Agency, and the land will supply home sites for the Dry Creek and Geyserville Bands, consisting of 92 persons. The land is in a neighborhood where school facilities and labor opportunities exist. To date approximately \$197,000 have been expended from gratuity appropriations in purchasing 9,307 acres of land for homeless Indians in California.

**CHOCTAW INDIANS IN MISSISSIPPI.**—Two tracts of land, one containing 65 acres and the other 40 acres, were purchased at a total cost of \$1,250. The proposed purchase of two additional tracts, one containing 80 acres and the other 40 acres, involving an expenditure of \$2,600, is still pending. These purchases are under the jurisdiction of the Choctaw Indian Agency, and will supply homes for four Indian families. To date \$29,465 have been expended in purchasing 1,700 acres of land which has been resold to 36 Mississippi Choctaw Indians of the full blood under the reimbursable plan.

**PUBLIC LANDS RESERVED FOR INDIAN USE.**—By act of June 24, 1926, Memaloose Island, in the Columbia River, Oreg., containing about 4 acres, is permanently reserved as a burial ground for the Yakima Indians and Confederate Tribes. By the act of June 1, 1926, 240 acres of public land in California are permanently withdrawn as an addition to the Morongo Reservation. By the act of May 21, 1926, 865.65 acres were permanently withdrawn and added to the Makah

Reservation in Washington. By the act of May 10, 1926, 80 acres of public land in California are permanently withdrawn as an addition to the Mesa Grande Reservation, also known as Santa Clara No. 1. By the act of March 22, 1926, 320 acres of public land in Arizona are permanently withdrawn as a camp site for the pupils of the Indian school at Phoenix.

**TRIBAL ENROLLMENTS.**—The final roll of the Chippewa Indians of the Lac du Flambeau Reservation, Wis., made under the act of May 19, 1924 (43 Stat. L. 132), was approved June 21, 1926, and allotments thereunder will be made at a later time. This roll as approved contains 548 names in addition to those on the old tribal roll.

Under the act of June 4, 1924 (43 Stat. L. 376), the Eastern Band of Cherokee Indians of North Carolina conveyed in trust to the United States their lands and moneys as a condition precedent to allotment of the lands and payment of the funds to the members of the tribe who may be found entitled thereto. Under instructions approved November 5, 1925, the work of enrollment is now proceeding. May 15, 1926, was fixed as the last day for submission of applications to the Cherokee Enrolling Commission, at Cherokee, N. C.; and there have been to date more than 11,000 applications filed, which will receive consideration in the field and be submitted for the final action of the department.

**TAXATION OF RESTRICTED INDIAN PROPERTY.**—Numerous tracts of land bought for homes for Indians with their restricted nontaxable funds, and conveyed with restrictions against alienation or incumbrance without the consent of the Secretary of the Interior, have been taxed by local authorities, and some of the lands were sold for nonpayment of assessments. Personal property used on Indian lands has also been taxed. Suits have been filed in the Federal courts for the protection of such real and personal property, some of which have been decided in favor of the Government. Those decided adversely have been appealed.

The United States District Court for the District of South Dakota recently has decreed the return of approximately \$13,000 paid Dewey County, S. Dak., for taxes illegally assessed against Indian personal property.

Both civil and criminal prosecution has been recommended, and cases are now pending, against persons who have procured the signatures of Indians to deeds and contracts affecting the title to Indian trust lands, in violation of section 5 of the act of June 25, 1910. (36 Stat. L. 855.)

**REMOVAL OF RESTRICTIONS AGAINST ALIENATION.**—For the past five years a conservative policy has been pursued in granting fee titles to individual Indians, and especially during this year applications for the release of allotted lands from Government control have been closely scrutinized. Not exceeding 40 per cent of the applications received were granted. The records show that the lands of a vast majority of Indians who have been given absolute control of their allotments have passed from Indian ownership in various ways—by sale for small values, through unredeemed mortgages, and in some instances by tax deeds. Therefore a very decided halt was necessary to protect allottees appearing to be competent, and in no cases are fee patents now granted or restrictions on lands otherwise removed unless the evidence from the field clearly justifies the belief that the appli-

cant is competent and will be permanently benefited by the release of his landed property from Governmental control. This protective policy has not prevented the consideration of sales of lands, under Government supervision and after competitive bidding, to provide funds in cases of emergency.

**SALES OF INDIAN LANDS.**—During the year 852 applications for fee patents were received; 322 were granted and 530 denied. Certificates of competency were issued to 72 applicants, and the restrictions against sales were removed from 20 allotments. There were sold 433 tracts, aggregating 44,217 acres of original allotments, and 770 tracts of inherited lands, aggregating 81,834 acres, a total of 126,051 acres, for a total consideration of \$2,713,416. This is a decrease of 13,413 acres as compared to the area sold during the preceding year, but the increase in proceeds amounted to \$218,001. On several reservations the bids received for the tracts more recently advertised indicate a marked increase in demand with correspondingly higher offers.

Many allotments are not entirely suitable as home sites for Indian families, and there is a growing tendency on their part to use an inherited tract in preference to the original allotment, or to remove to one of the near-by towns, buy a home there with their sale proceeds, and become town residents. Often among the younger groups the head of the family finds employment in some mechanical capacity. Initiative of this sort is to be encouraged, and where the proceeds of sales will enable such social and business betterment its use in the purchase of town property is effected through the agency offices. For protection of such families their title is made inalienable without the consent of the Secretary of the Interior.

Though farm life does not appeal to all Indians, there are many who are retaining and cultivating the more suitable tracts and using their moneys in permanent improvements and equipment. Such is the condition within the Kiowa Reservation, where 96 new houses were erected at a cost of \$188,640 and 57 barns at an expenditure of \$41,496, with other improvements. These Indians expended in 1926, under the superintendent's supervision, \$272,021 out of sale receipts amounting to \$592,901.

Individual Indian moneys deposited in bonded banks are available for expenditure by check of the Indian owners, thus giving them an economic standing superior to that of many of their white neighbors.

## SUITS FILED IN THE UNITED STATES COURT OF CLAIMS

Suits have been filed during the year in the United States Court of Claims for the adjudication of Indian claims, as follows:

Blackfeet Nation, Montana, including the Nez Perces of the Colville (Wash.), and Fort Lapwai (Idaho) Reservations, and the Gros Ventre Tribe of the Fort Belknap Reservation, Mont. Suit filed July 10, 1925.

Delaware Tribe of Oklahoma. A second petition was filed October 2, 1925. Wichita and Affiliated Tribes, Oklahoma. Suit filed October 21, 1925.

Kaw Tribe, Oklahoma. Suit filed February 9, 1926.

Creek Nation, Oklahoma. Suit filed May 20, 1926.

Choctaw Nation, Oklahoma. Three suits filed June 14, 1926.

Suit filed September 30, 1924, on behalf of the Yankton Sioux, South Dakota, claiming title and compensation for the red pipestone quarries, Minnesota,

was dismissed by the court June 8, 1925, as without merit, the court holding that the only right possessed by these Indians in and to the quarries was that of user, which right they still exercise. Appeal has been taken to the United States Supreme Court.

### OIL AND GAS

Improved market conditions prevailing in the oil and gas industry resulting from the constant increase in the use of petroleum products naturally served to stimulate greater interest in the leasing of Indian lands for mining of these products.

During the year 205,953 acres were leased for oil and gas mining purposes, being an increase of a little more than 40 per cent over the acreage leased during the prior year. On the Osage Reservation, Okla., 45,874 acres were leased, making a total of 556,662 acres now under lease for oil-mining purposes on that reservation. New leases were approved on 96,572 acres belonging to allottees of the Five Civilized Tribes in Oklahoma, making a total of 785,535 acres of their lands now under oil and gas mining leases. The Indians other than the Osage and Five Civilized Tribes received an income during the year from oil and gas leases of more than \$1,000,000. The Osage Tribe received as rentals and royalties from oil and gas leases a revenue for the year of \$10,487,943; and the leases of the Five Civilized Tribes Indians produced an income of approximately \$4,425,213. The gross oil production for the year was approximately 41,907,021 barrels.

Within the treaty portion of the Navajo Indian Reservation, N. Mex., nine wells were completed during the year, seven of which produced oil. There are now 19 wells on the Navajo Reservation producing oil of about 62° A. P. I. gravity. The second sale of tribal leases within that reservation was held June 23, 1926, at which time 12 additional leases were sold embracing 18,160 acres. The bonus received for these leases amounted to \$62,400. At the same sale two exploratory leases on approximately 9,300 acres on the Ute Mountain Reservation were sold for which a bonus of \$2,400 was received.

A pipe line has been constructed within the Navajo Reservation by the Continental Oil Co. from the Rattlesnake and Table Mesa structures to Gallup, N. Mex., a distance of 97 miles. Several large storage tanks were also built in connection with its pipe line by that company which is the owner of an interest in the Rattlesnake lease. This additional means of transporting and marketing of oil will no doubt stimulate a greater interest in this field and result in increased oil runs from wells already producing, some of which have probably not been operated to their full capacity.

A sale of Osage oil leases was held March 17 and 18, 1926. Leases on approximately 46,331 acres were sold for a bonus of \$3,998,485. By an act of Congress approved April 17, 1926, authority was granted to lease for mining purposes tribal Indian lands reserved for Indian agency and school purposes.

An act approved June 12, 1926, authorizes the establishment of a trust fund to be administered for the benefit of the Kiowa, Comanche, and Apache Indians of the Kiowa Reservation, Okla., and their unallotted children, from certain oil royalties received from leases in the bed of the Red River adjoining the Kiowa Reservation.

## QUAPAW LEAD AND ZINC MINING LANDS

From the Quapaw restricted Indian land in the northeastern part of Oklahoma are produced approximately 7 per cent of the lead and 25 per cent of the zinc output from ore mined in the United States. At the present time there are 50 departmental lead and zinc mining leases in force covering 6,976 acres of Quapaw restricted land, and on this acreage are also 52 subleases covering 2,420 acres.

During the fiscal year ended June 30, 1926, the mines on the Quapaw Indian restricted land produced 289,622 tons of lead and zinc concentrate which sold for a total of \$17,672,498. The royalty from these sales amounted to \$1,679,836, which sum is equal to 9.61 per cent of the gross sales. Forty-three restricted Indians share in the above-mentioned royalties. The leasing of additional acreage is under consideration. Through a cooperative arrangement with the Geological Survey, technical data and valuable information has been obtained relating to the mineral development, mining operations, and improvements on the Quapaw restricted lands, which data and other information has been of great aid to the Indian Bureau in determining the terms and conditions upon which leases should be made and the requirements for the proper mining development of the land in the interest of the Indian owners.

Reports received show a greater production of lead and zinc concentrate and a greater aggregate royalty during the fiscal year ended June 30, 1926, as compared with that of prior fiscal years.

## INDUSTRIAL ACTIVITIES OF THE INDIANS

**FIVE-YEAR PROGRAM.**—The chief object of this service in its work among the adult Indians is to help them to become self-supporting through their own efforts in the utilization of their land and other resources. During the past few years much progress has been made in agriculture and stock raising among the Indians through application of five-year programs within the various reservations. This program consists of a definite outline of industrial activities and projects to be carried out as far as possible within a certain period. The chapters organized in conjunction with the program, mention of which was made in my last report, are composed of the male adults of a community having related interests and who work together for the promotion of the welfare and progress of the Indians. The State agricultural colleges continue to cooperate in the work. In communities where the Indian population is interspersed among the whites, the Indians join county or State industrial organizations maintained for the whites, and in this way become familiar with the point of view of their white neighbors and gradually become a real part of the community. Chapters are well established within 28 reservations, and community organizations under other titles, such as clubs, etc., are functioning within 8 other reservations. The movement is growing; and aside from the material benefits derived, the Indians are learning how to conduct community meetings and are acquiring a real interest in community development. Through auxiliaries to the chapters the Indian women are evincing much interest in learning up-to-date methods of preserving and canning fruits,

vegetables, and meats; in cooking, improved sanitary conditions and home improvement generally. Many of them are making a success of poultry raising, not only furnishing their own tables with meat and eggs, but deriving some income from surplus products of this nature which they sell. Sewing clubs have a large enrollment and furnish instruction in the manufacture of garments, patching, darning, etc. Many of the older Indian women derive a good income from the manufacture of lace, beadwork, pottery, blankets, and other articles of native Indian handicraft. Within the Shoshone Reservation, Wyo., the organization of chapters with the consequent activity in farming has resulted in an increase of acreage in cultivation by full-blood Indians. Within the Pine Ridge Reservation, S. Dak., the industrial survey and the five-year program have resulted in an evident awakening of the Indians. The superintendent is particularly proud of the fact that the average full-blood Indian had successful crops of corn and potatoes, averaging about 100 bushels of corn and 50 bushels of potatoes each. Some of the Indians even had surplus crops to sell. A small flour mill and corn grinder have been installed, which enable the Indians to have their flour and corn meal ground without the long hauls otherwise necessary to reach outside mills.

**INDUSTRIAL SURVEYS.**—Industrial surveys inaugurated several years ago are still made by superintendents, through which they become acquainted with actual living conditions among the Indians. Reports submitted to the office by superintendents furnish available information as to their resources and living conditions and indicate the possibilities.

**STOCK RAISING.**—There has been gradual improvement during the past year in the livestock industry generally throughout the country, which has redounded to the benefit of the Indians as well as others. Heavy rains in the Southwest last spring, for the first time in several years, brought about an improved condition of the ranges and stock as a result of the abundant feed available thereon.

The sheep industry is growing in many sections of the Indian country and has been found to be an important factor in establishing home ties. The farm flock of sheep must be given careful attention, and this requires that one member of the family at least remain at home, thus discouraging the departure of the whole family for days and sometimes weeks at a time to attend celebrations and festivities to the detriment of their crops and livestock.

Many Indians are increasing their individual herds of cattle in addition to cultivating their crops, and, therefore, are not dependent on one branch of farm activity.

Progress is being made in removal of worthless ponies from some of the reservations and a survey is being made by representatives of the War Department and the Indian Service with the view of determining whether horses, satisfactory for Army use, can be obtained from the Indians.

**HOME BUILDING.**—One of the main objectives of the five-year program is the construction of improved homes. The new homes are built according to the circumstances of the owner. This phase is stressed in the belief that it will result in greater progress toward self-support by encouraging the cultivation of small tracts of land at least and the care of milch cows, hogs, and poultry.

**REIMBURSABLE FUNDS.**—The use of reimbursable funds continues to be one of the principal means of enabling the Indians to utilize their land and become self-supporting. The appropriation of \$158,000 for 1926 was supplemented by \$30,000 from tribal funds used under the reimbursable regulations. As the funds of some tribes are diminishing it becomes necessary to substitute the reimbursable fund therefor. For instance, the Uintah and Ouray Agency, Utah, received for the first time material assistance from this fund to the extent of an assignment of \$10,000 authorized for the purchase of seed and farm implements.

Unusual interest shown by the Indians in increasing their cultivated acreage, improving the grade of their livestock, and in developing better conditions generally, is due in considerable measure to the assistance derived from the use of this fund. This aid is to the Indians what farm and bank loans are to the whites. Most Indians are not qualified to borrow from those sources, and the Government acts as their banker. Not only does this plan equip the Indians to carry on their work, but it aids them in obtaining necessary supplies and equipment at much lower prices than if bought locally. At the Navajo Agency, Ariz., wagons purchased for the Indians were delivered to them at a cost of \$145.61, while the local price was \$184. Each purchaser had a \$50 cash payment ready, which left a balance of less than \$100 on a first-class wagon suitable for general utility work around the home and farm, and in many cases serving to supplement their income by hauling freight, etc. That the Indians appreciate this plan and are sincere in their promise to pay, is shown by the following instances:

(1) At Pine Ridge Agency, S. Dak., in the spring of 1925 \$2,483 was expended for potatoes, \$3,200 for corn, and \$1,042.63 for oats. On December 31, 1925, the Indians had repaid \$2,331.73 on potatoes, \$1,623.49 on corn, and \$644.52 on oats.

(2) At the San Juan Agency, N. Mex., \$8,900 was expended for rams in the spring of 1925. The report for December 31, 1925, shows collections of \$5,000.

If reimbursable funds had not been available, these Indians could not have had the seed to plant or the rams with which to improve the breed of their flocks.

During the fiscal year 1926, 3,243 agreements were made for sales to Indians on the reimbursable plan.

**4-H CLUB WORK.**—The year 1926 brought unusual progress in boys' and girls' club work, as shown by comparison of the figures for three years. At the end of 1924 there were 400 club members within 17 reservations; in 1925 the enrollment had increased to 1,800 within 40 reservations; this year we have over 3,000 Indian boys and girls engaged in the work within 63 reservations not including the Five Civilized Tribes with more than 2,500 members. The work involves dairy calf, pig, poultry, corn, potato, garden, canning, bread making, clothing, food selection and preparation, and home-improvement projects. The children finance their own projects.

The work has advanced to a point where the Indian boys and girls are taking a prominent part in local, State, and National club events. There were many outstanding activities, foremost among which may be mentioned—

A Kiowa Indian boy won a free trip to the National Club Congress. He was county health winner; also the best all-around club member of his county.

An Indian boy from the Uintah and Ouray Reservation won the blue ribbon in the garden project for the State of Utah.

A team of girls from the Northern Pueblos, New Mexico, won second prize in the garden demonstration at the State contest.

A team of Winnebago Indian boys gave a demonstration at the National Club Congress in Chicago.

Several hundred Indian boys and girls attended club camps and short courses.

All the honors were won in competition with the whites. The success of the year's work indicates the growing influence which club work is exercising among Indian parents throughout the country.

**FARMING AND GRAZING LEASES.**—While every effort is made to have the Indians themselves utilize their farming and grazing lands so far as possible, there still remain considerable areas in excess of the acreage which they can so use and develop. Such surplus lands are, therefore, leased to other persons upon the best terms obtainable and the income derived therefrom is available for support of the Indian owners.

The act of July 3, 1926, provides that the unallotted irrigable lands within any Indian reservation may be leased for farming purposes for a period not exceeding 10 years with the consent of the tribal or business committee of the Indians. This law places irrigable tribal land on the same basis as allotted land by authorizing leases for the period mentioned, and it is expected that there will result the utilization of large areas of tribal land which it was not possible to lease under prior existing law.

### EMPLOYMENT OF INDIANS

A survey of the field reveals Indians engaged in the activities of people of other races. At home they make articles of aboriginal art, which tourists and traders purchase with readiness. Observation of the comfortable homes and of the industry of their neighbors has inspired a praiseworthy restlessness among them, which induces them to seek work. There is a demand for Indian labor with adequate wages in land reclamation, railroading, agriculture, logging, nutting, fishing, driving taxicabs, as automobile mechanics, etc. Enlistments in the Army and Navy have developed both noncommissioned and commissioned officers. Cinema companies employ a number and over 1,700 are on the pay roll of the Government. The five-year program provides occupation at home for those members of the family who are agriculturally inclined. The work at the school plants affords practical experience to students, while the skill developed through Indian school training enables graduates to secure employment in the mechanical trades, and as teachers, nurses, clerks, and home makers.

Many lost to the reservations as Indians may be found merged in the body politic as citizen workers in factories, shops, on farms, and in other pursuits. A Ute housekeeper in New Jersey, a Shawnee manager of a college dining room, a Chippewa structural-iron worker, are a few among hundreds of students of Government schools who were trained to be skillful workers and inspired to become self-supporting.

Definite progress is noted in mitigating the fluctuations of employment. An employment office is maintained at Phoenix, Ariz. The development of the Southwest offers a diversity of work to Indians

which they have accepted during the past year in larger measure than ever before. The cotton growers are offering better wages and are gradually extending their acreage and drawing Indians from adjacent reservations, in larger numbers each year, gradually building up an army of dependable cotton workers. This recurrent employment at a worth while wage enlists the interest of Indians.

Beet field work is available each season for Indians of all ages. The children work during several weeks of vacation, hoeing and thinning beets, and the older Indians carrying on the cultivation of the crop to maturity. Many remain to work in the sugar-beet factory. Opportunities for such workers are increasing, and within the past month Indian lads have been placed in new fields. One superintendent wrote concerning a group of boys as follows:

The boys returned Friday; all of them looked better cared for and happier than we have ever before seen them to be. They have much to relate about their trip and experiences, and should be better pupils in school next year because they have seen what is being done elsewhere.

### ANNUITY AND PER CAPITA PAYMENTS

Annuity and per capita payments to Indians have been made during the year in a total sum approximating \$33,175,000, of which \$29,983,000, derived from oil and gas rentals, was paid to the Osage Indians of Oklahoma, and \$3,192,000, accruing mainly from tribal leases and timber sales, was disbursed to various other tribes.

When not otherwise required by law or treaty, it is the usual practice to make per capita payments in the spring in order to provide the Indians with funds to assist in their farming activities, but sometimes in the fall, when necessary to help toward their support during the winter. It is the endeavor to discourage the fall payments, however, and to induce the Indians to conserve their resources and funds, thus obviating the necessity for aid of this nature.

Under the stimulus of the industrial program, the Indians are gradually perceiving the advantage of expending their money wisely for purposes of permanent benefit in connection therewith, rather than for mere temporary use; and field reports indicate a gratifying advance in this respect during the year.

### ROADS AND BRIDGES

Appropriations were available during the year for roads and bridges at the following places, namely:

Red Lake, Minn., \$9,000; tribal funds.  
Mescalero, N. Mex., \$10,000; reimbursable.  
Wind River, Wyo., \$8,000; reimbursable.

In addition to these, whenever funds could be spared from the general appropriations, authority has been granted for expenditures for such purposes. In this way considerable road work was accomplished and at the same time an opportunity was afforded the Indians to earn remuneration which would assist in their support to this extent.

Cooperative road work under the Federal highway act has been continued with the result that during the year 100.63 miles of through

highways have been constructed or approved across Indian reservations for 100 per cent Federal aid without expense to the Indian Service, involving an estimated expenditure of \$1,708,184. Since the passage of this act there has been constructed to date a total of 534.37 miles of standard road at a cost of \$5,200,429.

## LAW AND ORDER

**INDIAN OFFENSES.**—Legislation is urgently needed to remedy the situation relative to the maintenance of law and order within Indian reservations. Because of a law passed in 1854—section 3, act of March 27, 1854 (10 Stat. L. 270), and amended February 18, 1875 (18 Stat. L. 320; sec. 2146 U. S. R. S.)—Indians within reservations are not as a general rule subject to the State or Federal laws governing offenses committed.

Sections 328 and 329 of the United States Criminal Code of 1910 provide for prosecution of Indians for only eight offenses, viz, murder, manslaughter, rape, assault with intent to kill, assault with a dangerous weapon, arson, burglary, and larceny.

For other offenses, including assault with intent to commit rape, assault with intent to commit bodily harm, robbery, mayhem, breaking and entering a house in the daytime, malicious mischief, adultery, unlawful cohabitation, fornication, seduction, carnal knowledge, statutory rape, bigamy, incest, lewdness, desertion of wife and family, wife beating or other cruelty, etc., the only corrective or punitive action that can be taken is through the reservation courts of Indian offenses.

For many years the agents, superintendents, teachers, matrons, farmers, physicians, and other Government employees and the missionaries have been teaching the Indians the ways and customs of civilization. The majority of Indians to-day have advanced in civilization to such an extent that they comply generally with the laws of the land. The trouble usually experienced is with those Indians who know the laws sufficiently well but who also know the exemption in certain cases of Indians from responsibility for willful commission of offenses under existing laws.

Legislation in one form or another has been recommended by this office on this subject for a number of years. There has been some difference of opinion among students of the matter as to the question whether the proposed legislation should extend the criminal laws of the United States generally to Indians within the reservations, whether to enlarge somewhat the list of crimes named in sections 328 and 329 of the Criminal Code, or whether to make Indians subject to all or a part of the State criminal laws.

Bills were introduced in the recent session of Congress (H. R. 7826, S. 1038, 69th Cong.) proposing to extend the criminal laws of the United States so as to apply to Indians, but legislation was not enacted. It is hoped that some improvement in the existing law may be secured during the next session of Congress, as it is a most difficult matter to maintain law and order among Indians under present conditions.

**SUPPRESSION OF LIQUOR TRAFFIC.**—Intoxicating liquor has been found to be a primary cause in the production of crime and criminals,

and it is too frequently the ally of the grafter and white criminal who robs and ruins helpless Indians. While the appropriation is not large enough to employ a force sufficient to cope with the situation, much good has been accomplished by the small number employed. The work that the officers do can not be measured entirely by the number of arrests made. There are Indians who will not go in pursuit of whisky but who are too weak to resist temptation when it is thrust upon them. Hence, in addition to the large number of law violators actually apprehended and prosecuted, the activities of the officers have prevented many from being made victims by those who are criminal enough to debauch them. Also the special officers have been instrumental in creating a friendlier feeling on the part of Indians toward law enforcement and other law-enforcement officers. Much assistance and cooperation is secured from the officers of the Federal Prohibition Administrator's forces, United States marshals and deputies, and from many State officers, such as sheriffs and their deputies, and city police. The problem of protecting the Indians from intoxicating liquor is still considered one of the gravest. The work is considered hard and hazardous. Two officers have been shot to death and another seriously wounded during the year by criminals engaged in violating the liquor laws.

**MARRIAGE AND DIVORCE.**—Most Indians now marry and are divorced in accordance with the laws of the several States. The Indians have now reached a stage of civilization where they should be required to comply with the laws governing marriage, including the issuance of a license and the recording of the marriage. If the Indians have a special ceremony to which they wish to conform, there appears to be no objection thereto, provided they comply with the requirements of the State law. Legislation designed to effect these ends has been introduced in Congress and the subject carefully considered by the House Committee on Indian Affairs at the recent session of Congress.

**PEYOTE.**—While frequent reports are received showing that some Indians are becoming undeceived with reference to the use of peyote, there are many others which indicate that peyote promoters are continuing their efforts to extend the sale and use of peyote.

**PENSION OF INDIAN SCOUTS.**—Many Indian scouts were awarded pensions during the year for military service performed by them for the Government years ago. At the same time it is regretted that many others were unable to obtain pensions for alleged service because of their inability to establish identification. Many old Indian scouts who rendered valuable service to the Government are not now entitled to a pension because their service was not rendered within the periods specified in the pension laws. It is hoped that this condition will soon be remedied by enactment of legislation to cover these cases.

## FORESTRY

While prices at the mills for manufactured timber products remained comparatively low throughout the year ended June 30, 1926, there was a good demand as to volume in the western yellow-pine region, and mills operating in the Klamath Falls district were particularly active, the total volume removed from the Klamath

Reservation, Oreg., during the year having exceeded 200,000,000 feet. The low prices caused a substantial curtailment in the Southwest, the Lake States, and western Washington until the late spring of 1926.

During the fiscal year a sale of more than 175,000,000 feet was made in the Nogal-Tularosa watersheds on the Mescalero Reservation, N. Mex., at the rate of \$4 per thousand feet. Considering the character of the timber and the difficulties of exploitation, this was a very satisfactory price. Operations on the unit began in February, 1926. Late in the year three moderate-sized units, namely, the Modoc Point, Weeks, and Crooked Creek units, were offered on the Klamath Reservation, Oreg. The prices received for yellow pine on these respective units were \$7.29, \$7.84, and \$8 per thousand feet. These very high prices illustrate strikingly the eagerness with which lumbermen seek the privilege of obtaining stumpage from Indian lands. The service has sought to restrict offerings on the Klamath Reservation with a view to the maintenance of a sustained yield under a comprehensive plan of forest management. To afford revenue for various Indian allottees, the West Fork unit, comprising a large, rough tract within the Colville Reservation, Wash., containing approximately 85,000,000 feet, was sold at prices of \$3.26 for yellow pine and \$1.05 for fir and larch. This is the sixth unit sold on the Colville Reservation since 1918. There have been informal inquiries from those interested in other timber on the reservation, but in view of existing contracts it does not seem advisable for the service to encourage further development of sales in the immediate future. The units already sold will afford a substantial and constant revenue for many years.

Extensive logging operations on the Tulalip and Nez Perce Reservations were brought to a close during the year. For the timber removed from the Tulalip Reservation during the past 10 years the Indians have received approximately \$2,000,000. Operations continued under prior sales on the Coeur d'Alene, Idaho, Flathead, Mont., and Spokane, Wash., Reservations. No extensive development has yet occurred on the Metolius unit of the Warm Springs Reservation, Oreg., and no large unit has yet been offered on the Yakima Reservation, Wash. It is hoped that extensive operations on both the Warm Springs and Yakima Reservations may be assured during the next year.

A complete audit of the records and a revaluation of the physical plant at the Menominee Indian Mills, Wis., have been made during the year. The new system of accounting outlined for this project will correct many of the difficulties in management which have existed for some time, and if the new system be faithfully applied the books should exhibit at all times the actual success that is being achieved. It is hoped that the fiscal year 1927 may mark the realization of plans for a decided improvement in silvicultural practice on the Menominee Reservation forest. An excellent forest nursery has been developed during the past two years, and with systematic regulation of the cut, the artificial restocking of nonforested land, and the practical application of selective cutting principles the Menominee Reservation may afford a conspicuous example of successful forest management.

The year 1926 may quite fittingly be selected as marking the close of a distinct 10-year period in the forestry work of the Indian Service. It was in the fiscal year 1917 that effective results were first attained on a large scale in a policy of awakening lumbermen to the unusual opportunities for successful timber operations on reservations in the western States. In that year the Schley, Evaro, and Ronan units on the Flathead Reservation, Mont., the southern Mount Scott and middle Mount Scott units on the Klamath Reservation, Oreg., and the Cooley unit on the Fort Apache Reservation, Ariz., comprising a total of more than 1,000,000,000 feet board measure, were sold for very satisfactory prices. These six large sales sharply directed attention of operators to the timber resources of Indian reservations; and the following years witnessed a growing interest in timber on the Colville, Quinalt, Spokane, and Tulalip Reservations, Wash., Flathead, Mont., Klamath, and Warm Springs, Oreg., Nez Perce, Idaho, and Mescalero, N. Mex., Reservations. Between June 30, 1916, and June 30, 1926, the income derived from timber cut on lands under the direct administration of the Indian Bureau has been approximately \$16,000,000.

### PRINCIPAL IRRIGATION ACTIVITIES

One of the most important irrigation problems dealt with by this office during the fiscal year has been the disposal of the many preliminary matters in connection with the construction of the Coolidge Dam across the canyon of the Gila River near San Carlos, Ariz., authorized by act of June 7, 1924 (43 Stat. L. 475). While many intricacies were met, it is felt that real progress has been made.

After the passage of the enabling act no work could be undertaken until funds were made available by the Interior appropriation act for the fiscal year 1926. As prior plans had been made in 1915, it was first necessary as a preliminary step to bring up to date the data essential to the preparation of plans for a dam best suited to the site. Field investigations were necessary, and upon completion of these, plans of six types of dam were prepared, with estimates of cost, for the purpose of selecting the type of dam best adapted in this instance.

Many complex questions were met in connection with an engineering construction authorized to cost \$5,500,000 in addition to innumerable other matters such as alleged water rights requiring adjustment in order to comply with the law.

After the plans had progressed to a stage where it was deemed advisable to obtain the views and judgment of consulting engineers, three engineers were appointed, one of whom declined to accept owing to the limited salary authorized. The others, Messrs. Louis C. Hill and Fred T. Noetzli, rendered valuable service. After the plans were received in the office it was further desired, owing to the importance and the magnitude of the project, to obtain the views of other engineers to determine whether or not the type of dam known as the multiple dome dam, conceived and designed by the assistant chief engineer of this service, C. R. Olberg, and approved by the chief engineer and this office, was the proper type of dam. The securing of consulting engineers for this purpose was facilitated by the enactment by Congress of an act approved March 18, 1926, which author-

ized the employment of such engineers, not to exceed three in number, including the services of a retired Army Officer.

Three engineers were appointed, namely, Maj. Gen. W. C. Langfitt and Lansing H. Beach, and Consulting Engineer A. J. Wiley, all of whom are widely known in the engineering profession. Before assumption of his duties by Major General Beach it was held by the Comptroller General that the act permitted the employment of but one retired Army officer. Therefore, the two other consulting engineers proceeded to investigate and review the plans of several types of dams, and under date of May 5, 1926, a report was submitted wherein the construction of the multiple dome dam was recommended. This report received departmental approval on May 8, and the assistant chief engineer was immediately advised to begin preparation of specifications and plans preliminary to advertisement for bids for construction of the dam.

This work has progressed rapidly, and with a view of facilitating early construction authority was granted to have the plans and specifications printed in Los Angeles, Calif., thereby avoiding considerable delay. Allowing necessary time for completion, printing, and advertising, the contract may be awarded about the 1st of October, 1926. If these plans be carried out the contractor will be able to install his plant and make necessary preliminary preparations by the 1st of March, 1927, which will enable him to pour the foundation of the dam prior to the usual flood period of the Gila River and thereby avert possible danger to any work accomplished and prevent postponement of construction until after the flood period. A period of two years from that time should suffice for completion of the dam.

Under the Florence-Casa Grande project, in addition to the engineering features, a form of contract to be entered into with the water users, including those with whom the Government now has contracts, was approved and the execution of such contract by the landowners is proceeding as rapidly as conditions will permit, in order that the bureau may be in position at an early date to recommend the designation of the lands best entitled to come within the San Carlos project. A report has been received from the board appointed for the purpose of determining the extent of the damages to the rights on the San Carlos Reservation which will be suffered by the Government and by the Indians by the inundation of certain areas after the dam shall have been constructed.

Among the problems requiring disposition was the relocation of about 14 miles of a branch line of the Southern Pacific Railway situated within the reservoir site. Surveys of a new line were made by our engineers and these were checked by the railroad company's engineers and found to be approximately in accord with the requirements. It was estimated that the new line would cost approximately \$1,800,000 to \$2,400,000. Negotiations were had with the president and the executive vice president of that company regarding the cost of removing the part of the road affected. An agreement was reached, and under date of April 15, 1926, a contract was executed which provides for payment to the company of \$1,000,000 in lieu of all damages that might be suffered by it, or the alternative of the company's removing its tracks, the Government and the company to share the cost on a 50 per cent basis, with a limitation

agents in the delivery of deeds to the Snake element, and the spirit of opposition on the part of the recalcitrant Indians to the acceptance of their deeds seems to be slowly dying out. Seventy-three deeds to the 1-acre tracts reserved from allotment for church purposes under the provisions of the Cherokee agreement have been prepared and delivered to the proper authorities.

During the year recommendations of this office have received departmental approval and appropriate notations on the rolls have been made in the cases of 9 enrolled citizens where field investigations developed the fact that they had died prior to September 1, 1902, in the case of one minor who died prior to March 4, 1906, and in 8 cases of duplicate enrollment, so that the number of enrolled citizens of the Cherokee Nation entitled to allotments, including "New borns," is 41,698 as against 41,716, the number appearing in the last annual report.

The following tables show the status of enrollment and allotment in the Cherokee Nation:

*Status of allotments in Cherokee Nation June 30, 1911.*

|   | Aces.           |
|---|-----------------|
| Total area of Cherokee Nation.....  | 4, 420, 067. 73 |
| Reserved from allotment for railroad right of way, town sites, etc.<br>(approximate)..... | 22, 880. 00     |
| Total area subject to allotment.....  | 4, 397, 187. 73 |
| Allotted prior to July 1, 1910.....   | 4, 345, 419. 02 |
| Allotted July 1, 1910, to June 30, 1911.....  | 2, 003. 27      |
| Unallotted land sold, regulations of Oct. 12, 1910.....                                   | 10, 362. 39     |
| Unallotted land sold, regulations of Feb. 20, 1911.....                                   | 25, 330. 64     |
| Unallotted land to be disposed of.....  | 14, 072. 41     |
|   | 4, 397, 187. 73 |

*Distribution of allotments made in Cherokee Nation during year ended June 30, 1911.*

|   | Aces.      |

| Freedmen, act of July 1, 1902.....           | 4, 296  | 4, 283    | 13            |
| Minor Cherokees, act of Apr. 26, 1906.....   | 4, 989  | 3, 921    | 1, 068        |
| Minor freedmen, act of Apr. 26, 1906.....    | 615     | 495       | 120           |
| Total.....                                   | 41, 698 | 40, 196   | 1, 502        |

The large number of citizens to whom no allotment was made is accounted for by reason of the failure of land suitable for allotment and the consequent desire of these citizens to take in lieu thereof

twice the appraised value of an average allotment, or \$651.20, as provided by law.

The remaining unallotted lands were offered for sale under regulations of October 12, 1910, and February 20, 1911, to the amount of 49,765 acres, of which 35,692 acres were sold, leaving a balance of 14,073 acres yet to be disposed of.

#### CHOCTAW AND CHICKASAW NATIONS.

Complete allotments have been made to all citizens and freedmen of the Choctaw and Chickasaw Nations, except to seven Chickasaw freedmen and one Choctaw by blood, who can not be located, although repeated efforts have been made to ascertain their whereabouts; and seven Choctaw citizens whose allotments can not be adjusted until the determination of several suits that have been instituted by the Department of Justice to cancel patents covering the lands involved.

During the year 27 allotments were made to Choctaw and Chickasaw citizens and freedmen in both nations, containing 3,197.25 acres. Allotment certificates and patents covering all of these allotments have been prepared and delivered in all cases where the contest period has expired.

*Status of allotments and unallotted lands in the Choctaw and Chickasaw Nations on June 30, 1911.*

| Total area unallotted and unsold on June 30, 1911, not including the<br>forest reserve and land segregated for coal and asphalt.....    | 1, 142, 071. 43  |
| <hr/>   |                  |
|   | 11, 150, 676. 74 |

This statement shows the unallotted and unsold land to exceed the area of unallotted land sales by a small amount, which is accounted for from the fact that a number of tracts of land were withdrawn from sale by reason of freedmen having made applications to purchase same, which applications were rejected on account of their failure to pay for same within the time limit prescribed by law.

During the year a total of 1,826 Choctaw and Chickasaw patents have been prepared, which includes 1,412 patents covering lands purchased by freedmen, 323 covering lands allotted to Choctaw and Chickasaw citizens and freedmen, and 94 covering lands reserved for tribal churches and schools and freedmen churches.

There have been delivered from this office during the year 286 Choctaw and Chickasaw homestead and allotment patents, 1,412

outlay of funds, so that it is not economical for anyone to lease the land if he must pay the irrigation charges in addition to other expenses. This is particularly true where the lands have become alkaline, require summer fallowing, and must lie idle for at least one season without possibility of remuneration. Owing to circumstances of this nature there are lands that can not possibly hope ever to repay the irrigation charges unless legislation of this character be enacted.

Confusion also exists due to lack of uniformity of laws applying to Indian irrigation projects. This is particularly true with reference to collections. On 11 of the projects unpaid charges are a lien against the land, and the interests of the Government are thus protected. In order to afford proper protection, it is desirable that a lien be created against lands under all the Indian irrigation projects to assure repayment of the expenditures. At the present time where no lien exists there is no assurance that the costs of the projects will be repaid.

### THE FIVE CIVILIZED TRIBES IN OKLAHOMA

During the year further progress has been made toward the closing out of the tribal affairs of the Five Civilized Tribes; 41,196 acres of tribal lands of the Choctaw, Chickasaw, Cherokee, and Creek Nations, including 95 town lots, were offered for sale at public auction in July, 1925; about 29,963 acres were sold.

In the Choctaw and Chickasaw Nations the remaining tribal property is valued at \$10,752,957, in the Creek Nation at \$99,550, and in the Seminole Nation at \$30,000. There remains to be collected from purchasers of tribal property heretofore sold a total sum of \$1,022,505.

Upon request of the Committee on Indian Affairs of the House of Representatives, a census was taken of the living enrolled full-blood and other restricted members of the Five Civilized Tribes. From the census it appears that the living enrolled full bloods number 9,100 and that the other living enrolled restricted Indians number 2,286, making a total of 11,386 living enrolled restricted Indians of the Five Civilized Tribes. The conservation and protection of the property interests of the Indians of the restricted class and the proper administration of their affairs relating to their restricted lands and funds are now our chief concern.

Reports from the field indicate that there is a decided improvement in management by Indian farmers of their farms and of their livestock. The field clerks and Government farmers assist and encourage the restricted Indians in their farming endeavors and devote as much time as possible in visits to the homes of the Indian allottees, thereby obtaining first-hand information as to conditions and as to necessary changes and improvements and how they may best be brought about. It is reported that the exhibit of the Indians of the Five Civilized Tribes at the Oklahoma Free State Fair in Muskogee in October, 1925, occasioned much favorable comment and was a splendid display of agricultural progress. Information was received that several prizes were awarded to restricted Indians for individual entries in open competition against all exhibitors.

Under the supervision of the field force, the sum of \$4,049,335, individual Indian money, has been expended for maintenance, farms,

buildings, livestock, and equipment. There were 73 houses and 43 barns built, 83 wells were drilled or dug, and purchase was made of 134 horses, 191 mules, 306 head of cattle, and 444 hogs. During the year 992 tracts of allotted land were advertised for sale, consisting of lands from which restrictions had been removed, and about one-third of the tracts offered were sold.

The cashier for the Five Civilized Tribes agency has handled a total of \$29,015,661.24, including receipts and disbursement of all classes of funds. The collections of tribal funds amounted to \$429,346.30 and there was credited to individual Indian accounts the sum of \$6,538,201.45.

### PROBATE ATTORNEYS, FIVE CIVILIZED TRIBES

The probate attorneys whose field covers what was formerly Indian Territory, now the eastern part of Oklahoma, have continued with energy and success their very good and important work. The Indians freely consult these attorneys, who they realize are careful guardians of their interests and are always ready to serve and aid them in any proper manner by advice or by proper legal action.

The activities of these attorneys are varied and the different classes of legal work handled by them are those of a general practicing attorney at law. They appear in all the courts of Oklahoma, State and Federal, and give advice to the Indians, their heirs and their guardians; draw leases, examine abstracts of title, collect money due to the Indians for rentals, negotiate sales of inherited and other lands, and furnish information regarding Indian lands to prospective lessees and purchasers; examine the county records relative to the status of lands; prepare petitions for the removal of unsatisfactory guardians and petitions requiring guardians to make annual reports and to make a full accounting to their wards; and settle and adjust controversies when possible without resorting to litigation.

This corps of attorneys, during the fiscal year ended June 30, 1926, appeared in 2,311 cases; initiated 27 actions involving approximately \$20,500; instituted five criminal actions; saved approximately \$143,916 to minors and others; and obtained 79 quitclaim deeds to remove clouds from title to restricted lands of Indians.

### HEIRSHIP AND PROBATE

During the fiscal year ending June 30, 1926, the heirs to 2,039 Indian estates were determined, 145 Indian wills approved, and 47 wills disapproved. In addition thereto 139 wills were approved as to form during the lifetime of the makers.

During the year 11 examiners of inheritance, with necessary clerical assistants, were employed in the field.

The total amount of fees earned during the year for probate work was approximately \$64,000 and there has been collected and deposited in the United States Treasury during that period approximately \$55,000 as fees.

### PUEBLO LANDS BOARD

Reference was made in the report of the preceding year to the creation of the Pueblo Lands Board pursuant to the act of June 7,

1924 (43 Stat. L. 636). The function of this board consists in the quieting and adjustment of titles to Pueblo lands in New Mexico as between settlers and Pueblo Indians.

Hearings have been held by the representatives appointed to serve on this board, for the Pueblos of Tesuque, Jemez, Nambe, and Taos, and preliminary inquiries have been made in the case of Picuris.

In each of these cases notice was given to all adverse claimants, oral testimony received, and record and documentary evidence assembled. The report in the Tesuque case was completed, and suits to quiet title will be filed in the Federal court. The reports for Jemez and Nambe have also been completed and the report for Taos partially so. In the case of Tesuque there were 17 adverse claimants, at Nambe 211, and at Taos 503. Each one of these adverse claims, many of which are less than an acre in extent, has required separate and careful investigation. In each case the water rights of the respective parties have also to be determined.

In general it has seemed apparent that all parties adversely interested in these lands have been satisfied that the findings of the board were fair and equitable, and as yet no suits adverse to its reports have been instituted.

### PURCHASE OF SUPPLIES

Food, clothing, fuel, medical and other supplies required to maintain the boarding and day schools of the service and to conduct the agency and school work were purchased during the year in the usual quantities and manner. Little difference in commodity prices was felt during the early part of the year as compared with the prior year, but toward the end, particularly when the annual contracts for the next fiscal year were executed, appreciable declines were recorded in many lines. Considerable surplus supplies were transferred without cost to the service during the year, although the available supply was greatly reduced as compared with prior years. An effort to get all necessary supplies delivered by the time the schools open resulted in some improvement during the year. The usual careful inspection of deliveries of supplies purchased was made.

Our relations with contractors and others have been very satisfactory, generally speaking. During the year three contractors were debarred from further dealing with the Indian Service. Manufacturers and jobbers were keenly interested in our requirements for which bids were solicited during the latter part of the fiscal year for use during the fiscal year 1927, as evidenced by the largest number of bids ever received at the spring lettings and by their close check of the awards made. The situation as to provision of fuel for the field units during the year was most satisfactory, both as to the character of fuel furnished and the maintenance of supply at the points of consumption.

### CONCLUSION

In concluding this report, I wish to acknowledge again my full recognition of the cooperation and service rendered by the employees of the Indian Bureau both in the office and the field. I also wish to express my appreciation of the cooperation and service rendered

by certain State officials; also the valuable assistance rendered by missionaries of all denominations and other organizations working among Indians; the voluntary services of outside expert physicians who have devoted considerable time to the Indian problem, and to a number of individuals who have given considerable time and thought and who have made many valuable suggestions regarding the Indian work. I also wish to express my grateful appreciation of your unfailing interest and support.

Very respectfully,

CHAS. H. BURKE,  
*Commissioner.*

The SECRETARY OF THE INTERIOR.

## LEGISLATION RELATING TO INDIAN AFFAIRS

**CHIPPEWA INDIANS; PAYMENTS:** Act of February 19, 1926. Authorizes the Secretary of the Interior to make a per capita payment of \$50 to each enrolled member of the Chippewa Tribe of Indians in Minnesota.

**KAW INDIANS:** Act of February 27, 1926. Authorizes the Secretary of the Interior to issue certificates of competency removing restrictions against alienation on inherited lands of the Kansas or Kaw Indians, Oklahoma.

**TAHOLAH ROAD:** Act of March 1, 1926. Authorizes an expenditure of \$50,000 of the tribal funds of the Quinaialet Indians, for completion of a road from Taholah to Moclips, Wash.

**SIoux REIMBURSEMENTS:** Act of March 1, 1926. Authorizes an appropriation of \$15,345 in settlement of claims of certain Sioux Indians for horses destroyed because infected with glanders.

**FIRST DEFICIENCY ACT:** Act of March 3, 1926. Carries appropriations covering deficiencies, and special authorizations for the Indian Service, among which are the following items: For the Chippewa Indians in Minnesota in settlement of their claim for certain timber and interest, \$422,939.01; for compensation to Chippewa Indians of Minnesota for lands disposed of under the free homesteads act of May 17, 1900, \$1,787,751.36; for payment to the Clallam Indians, Washington, in settlement of their claims, \$400,000; for interest found due the Omaha Indians, Nebraska, on their claims, \$374,465.02; for repairs and improvements to buildings and grounds at the Charles H. Burke School, Fort Wingate (formerly military post), N. Mex., \$134,895; for payment of local taxes to the counties of Stevens and Ferry, State of Washington, \$81,640.37; and for remodeling and reconstructing boys' dormitory and hospital building at Fort Lapwai, Idaho, \$52,000.

**KOOTENAI INDIANS; LANDS:** Act of March 11, 1926. Authorizing the sale of land of Kootenai Indians, in Boundary County, Idaho, and the purchase of other land for allotment to said Indians.

**COOLIDGE DAM:** Act of March 18, 1926. Authorizes the employment of consulting engineers in connection with plans and specifications for the Coolidge Dam, Ariz.

**LUMMI RESERVATION, RECLAMATION OF:** Act of March 18, 1926. Authorizes an appropriation of \$65,000 for the purpose of reclaiming and draining 4,400 acres within the Lummi Indian Reservation, Wash.

**PHOENIX CAMPING RESERVE:** Act of March 22, 1926. Provides for the permanent withdrawal of 80 acres of land in Arizona for use as a camp ground for pupils of the Indian school at Phoenix, Ariz.

**FIVE CIVILIZED TRIBES; LIMITATION OF SUITS:** Act of April 12, 1926. Amends section 9 of the act of May 27, 1908, covering removal of restrictions in the Five Civilized Tribes, Oklahoma; provides for putting into force the statute of limitations of the State of Oklahoma in reference to suits involving Indian titles, and provides for the United States to join in certain actions.

**INSURANCE ON TRIBAL PROPERTY:** Act of April 13, 1926. Authorizes the payment of insurance premiums on tribal property of Indians.

**SIoux MONUMENT:** Act of April 14, 1926. Authorizes the acquirement of a tract of land, and the erection of a monument thereon, on the site of the battle with the Sioux Indians in which the commands of Major Reno and Major Benteen were engaged.

**CROW TUITION:** Act of April 14, 1926. Authorizes the payment of tuition for Indian children of the Crow Reservation, Mont., enrolled in public schools.

**SENECA SCHOOL IMPROVEMENTS:** Act of April 14, 1926. Authorizes an appropriation of \$40,000 for remodeling and repairing the Seneca School plant at Wyandotte, Okla. (Quapaw Reservation).

**CAHUILLA LANDS:** Act of April 14, 1926. Authorizes the purchase of approximately 20 acres of land in California to be added to the Cahuilla Indian Reservation, and an appropriation of \$2,000 therefor.

**MINING LEASES ON RESERVES:** Act of April 17, 1926. Authorizes the leasing, for mining purposes, of land reserved for Indian agency and school purposes.

**BLACKFEET TRIBAL FUNDS:** Act of April 19, 1926. Provides that funds placed to the credit of the Indians of the Fort Peck and Blackfeet Reservations, Mont., under the act of May 18, 1916, shall bear interest at 4 per cent and be subject to expenditure in accordance with existing law.

**TAHOLAH WATER SUPPLY:** Act of April 19, 1926. Authorizes an expenditure of \$3,000 for the development of a domestic water supply for the Quinaielt Indians at Taholah, Wash.

**PUEBLO LANDS; CONDEMNATION:** Act of May 10, 1926. Provides for the condemnation of lands of the Pueblo Indians, New Mexico, for public purposes and for any purpose for which lands may be condemned under the laws of that State.

**RENO INDIANS, LAND FOR:** Act of May 10, 1926. Provides for the purchase of additional land to be added to the Indian colony at Reno, Nev., and authorizes an appropriation of \$4,500 therefor.

**MESA GRANDE ADDITIONS:** Act of May 10, 1926. Provides for the addition of certain lands to the Mesa Grande Indian Reservation, Calif.

**INTERIOR APPROPRIATION ACT:** Act of May 10, 1926. Interior Department appropriation act, fiscal year 1927. Carries appropriations for the Indian Service from Federal funds totaling \$11,985,660 and from tribal funds \$2,343,520. These appropriations are for medical, educational, irrigation, and general support and civilization purposes.

**CHIPPEWAS; ADJUDICATION OF CLAIMS:** Act of May 14, 1926. Authorizes the Chippewa Indians of Minnesota to bring suit in the Court of Claims.

**INDIAN MONEYS:** Act of May 17, 1926. Provides for the deposit and expenditure of funds known as Indian moneys, proceeds of labor.

**DRESSLERVILLE INDIANS; WATER:** Act of May 17, 1926. Authorizes an appropriation of \$5,500 for a domestic water supply for the Dresslerville Indian colony, Nevada.

**COLVILLE HOMESTEAD ENTRIES:** Act of May 17, 1926. Extends for a period of five years from and after September 4, 1926, time for homestead entries on the south half of the diminished Colville Indian Reservation, Wash.

**SAC AND FOX TITLE:** Act of May 17, 1926. Confirms title in the Sac and Fox Indians of Oklahoma to certain lands and buildings.

**FIVE TRIBES; ADJUDICATION OF CLAIMS:** Act of May 19, 1926. Authorizes the Creek, Seminole, Cherokee, Choctaw, and Chickasaw Indians, members of the Five Civilized Tribes, Oklahoma, to file separate or joint suits in the Court of Claims, under special jurisdictional acts.

**FORT HALL LANDS:** Act of May 19, 1926. Extending the provisions of section 2455 of the Revised Statutes, providing for sale of certain lands, to the Fort Hall Reservation, Idaho.

**CROW ALLOTMENTS:** Act of May 10, 1926. Provides for the making of allotments of land to newborn children on the Crow Reservation, Mont.

**CROW LEASES:** Act of May 26, 1926. Amends Crow allotment act of June 4, 1920, and provides for more liberal leasing of their lands by Indians.

**MORONGO LANDS:** Act of June 1, 1926. Authorizes the withdrawal of 240 acres of land in California to be set aside as an addition to the Morongo Indian Reservation.

**SANTA YSABEL LANDS:** Act of June 3, 1926. Provides for the purchase of lands for addition to the Santa Ysabel Reservation, Calif., and authorizes an appropriation of \$25,000 therefor.

**TONGUE RIVER ALLOTMENTS:** Act of June 3, 1926. Authorizes the making of allotments on the Tongue River Reservation, Mont., and authorizes an appropriation therefor.

**CASA GRANDE RUINS:** Act of June 7, 1926. Authorizes the withdrawal of certain lands in Casa Grande Ruins needed for the San Carlos reclamation project.

**KIOWA TRUST FUND:** Act of June 12, 1926. Authorizes the Secretary of the Interior to set aside and administer oil royalties, rentals, and bonuses as a trust fund for the Kiowa Commanche, and Apache Indians, Oklahoma.

**FORT PECK HOMESTEAD PAYMENTS:** Act of June 15, 1926. Extends for a period of one year time for making homestead payments on Fort Peck lands, Montana.

**RICE LAKE, MINN.:** Act of June 23, 1926. Provides for setting aside Rice Lake, in Minnesota, for exclusive use of Chippewa Indians.

**PAPAGO ROAD:** Act of June 23, 1926. Authorizes an appropriation of \$125,000 for construction of a road across the Papago Reservation, Ariz., between Ajo and Tucson.

**QUANAH PARKER MONUMENT:** Act of June 23, 1926. Authorizes an appropriation of \$1,500 for the purpose of erecting a monument to Quanah Parker, late chief of the Comanche Indians, Oklahoma.

**BURNS, OREGON, SCHOOL:** Act of June 23, 1926. Authorizes an appropriation of \$8,000 for erection of a school building at Burns, Oreg., for Indian children.

**MAMALOOSE ISLAND:** Act of June 23, 1926. Authorizes the permanent withdrawal of Mamaloose Island, and reserves same for cemetery purposes for the Yakima Indians, Washington.

**SIoux JURISDICTIONAL ACT:** Act of June 23, 1926. Amends the Sioux jurisdictional act of June 3, 1920, extending the time for filing of suit in the Court of Claims by the Cheyenne and Arapahoe Indians.

**PAIUTE IRRIGATION:** Act of June 26, 1926. Authorizes the cancellation and remittance of construction assessments against allotted Paiute Indian lands, Nev.

**PAPAGO AGENCY LAND:** Act of June 28, 1926. Authorizes an appropriation of \$9,500 for the purchase of additional land for the Papago Agency, Ariz.

**WALKER RIVER DAM:** Act of June 30, 1926. Authorizes an appropriation for investigations, surveys, etc., to determine feasibility of a dam across Walker River, Nev., for irrigation of Indian lands.

**POTAWATOMI; ADJUDICATION OF CLAIMS:** Act of July 2, 1926. Authorizes the citizen Potawatomi Indians to file suit in the Court of Claims.

**SURPLUS BOOKS:** Act of July 3, 1926. Authorizes transfer of surplus books from Navy Department to Interior Department for use in Indian schools.

**CROW; ADJUDICATION OF CLAIMS:** Act of July 3, 1926. Authorizes the Crow Indians of Montana to file suit in the Court of Claims.

**CHIPPEWA ROAD:** Act of July 3, 1926. Authorizes an appropriation of \$6,000 from the tribal funds of the Chippewa Indians in Minnesota for construction of a road to the sanatorium at Leech Lake.

**FORT BELKNAP REVOLVING FUND:** Act of July 3, 1926. Authorizes the creation of a revolving fund, from the tribal funds of the Indians of the Fort Belknap Reservation, Mont., for the purpose of aiding Indians in their industrial activities.

**LEASING IRRIGABLE LANDS:** Act of July 3, 1926. Authorizing the leasing of unallotted irrigable lands for agricultural purposes for a period of 10 years.

**SECOND DEFICIENCY ACT:** Act of July 3, 1926. Carries appropriations of \$1,002,178.71 for miscellaneous items in connection with Indian Service activities, including \$725,000 for construction work on the Coolidge Dam. Carries appropriations in fulfillment of special acts of Congress.

TABLE 1.—Indian population of the United States, exclusive of Alaska, June 30, 1926

[Figures compiled from reports of Indian agency superintendents, supplemented by 1920 census where no Indian representative is located]

|   |          |
|---|----------|
| Grand total.....                        | 349, 876 |
| Five Civilized Tribes.....              | 101, 506 |

#### RECAPITULATION

|  |        |
|--|--------|
| Indian children of school age                  | 84,553 |
| Indian children eligible for school attendance | 76,879 |
| Government schools:                            |        |
| Nonreservation boarding                        | 8,809  |
| Reservation boarding                           | 11,283 |
| Day  | 4,499  |
|  | 24,591 |
| Mission schools:                               |        |
| Contract boarding                              | 2,025  |
| Noncontract—                                   |        |
| Boarding                                       | 3,678  |
| Day  | 1,628  |
|  | 4,630  |
| Private or State schools contract boarding     | 7,331  |
| Public schools                                 | 240    |
|  | 37,730 |
| Total all classes                              | 69,892 |
| Number of eligible children not in school      | 7,244  |

NOTE.—This table is prepared from reports covering Indian children from 6 to 18 years of age, inclusive. Table 3 shows slightly increased totals, due to inclusion in many schools of students under 6 or over 18 years of age.

TABLE 3.—Location, capacity, enrollment, attendance, and highest grade taught, etc., of schools during fiscal year ended June 30, 1926

| Superintendencies and names of schools | Capacity | Total enrollment | Average attendance | Highest grade taught | Class of school             |
|--|----------|------------------|--------------------|----------------------|-----------------------------|

# *BUREAU OF INDIAN AFFAIRS*

## *THE POVERTY OF THE INDIAN SERVICE*

The Indian Service has not kept pace with the progress elsewhere along health, educational, industrial, and social lines. The appropriations for general purposes for the fiscal year 1923 were \$10,316,221.30, and in the five fiscal years since they have been increased by about \$2,338,463.70, principally for medical and health activities. But the cumulative effect of many years of financial neglect has demanded even larger appropriations, if the Government may perform its full duty to the American Indian. Underrating the requirements of the Indian Service has continued so long that it has become a habit difficult to correct.

The direction of Indian affairs to-day affects the education, health, morals, and religion of approximately 350,000 people, all of them recently made citizens of the United States. There are 193 Indian tribes, speaking 58 languages; 200 reservations, widely separated in 26 different States and occupying a territory as large as New England and New York combined; 106 superintendents in charge of reservations; 202 Indian schools, with 700 teachers; and 96 hospitals, with 178 physicians and 146 nurses.

The efficiency of an organization depends on the rank and file of its personnel. Supervision may be competent, but the struggle with untrained, incompetent, or dissatisfied help, especially when far removed from final administrative authority, is discouraging. With a more stable field force, the officers of the Indian Service could devote more attention to constructive work and less to training new employees and doing the work of the inefficient. Authority could then be decentralized by transferring more of the administrative responsibility from Washington to the field, where it belongs. The Assistant Secretary of the Interior in Washington, having supervision over the Bureau of Indian Affairs, for example, was required to take 18,000 administrative actions on Indian cases last year, in addition to many thousands receiving final action in the Indian Bureau. Much of this work should have been handled in the field offices.

That the situation has not been entirely hopeless is due to a great extent to competent supervision and to the innate missionary spirit of many of the employees. Advancement among the Indians has been accomplished despite the financial handicap, but the missionary spirit largely depended upon to hold underpaid employees in the Indian Service years ago is not now adequate in itself. The greater opportunities for remunerative employment in all lines which have

developed during the past decade have made it more difficult each year to find capable young people willing to sacrifice their most productive years to a service that offers a restricted social life and little opportunity for a successful career.

The turnover of physicians in the Indian field service for the fiscal year 1927 was 56 per cent; for nurses, 122 per cent; for teachers, 48 per cent; while the average turnover for all permanent employees in the service was 67 per cent. These figures can not be ignored. They are a definite expression of the conditions underlying the so-called Indian problem and have their origin in shortage of funds. The constant capitulation between necessities and means brings despair to those engaged in the work, because the necessities of the human element in the Indian Service should dominate.

The Indian medical and nursing services should be stabilized. More and better hospitals are required throughout, but even if the hospital plants and equipment were in excellent condition, much of the effectiveness of the health work would be lost if the personnel continues to be subject to constant change. Benefits will not accrue unless doctors and nurses have a tenure of office sufficiently long to permit them to become familiar with the medical and nursing problems peculiar to the Indians and bring about the application of professional fitness to them.

The frequent turnover of personnel in the medical and nursing services has been due to low salaries, poor living conditions, isolation, and long hours of labor. Four years ago the entrance pay for agency and school physicians was \$1,200, which has since been increased to \$2,400 gross and \$2,100 net after deducting allowances for quarters, heat, and light. This salary is still lower than in other branches of the Government engaged in health work, and promotions are slower than in the other services.

The entrance pay for trained nurses is \$1,680 gross, with \$1,500 net after deducting the allowances mentioned. Other Federal services pay \$1,680 gross for staff nurses, \$1,860 for head nurses, and \$2,100 for chief nurses. All the positions in the Indian Service, except one of head nurse, are in the lowest grade, thus affording practically no chance for advancement.

Quarters in the Indian medical service vary from a comfortable cottage fairly well furnished, to one room without reasonable facilities for bath and toilet. Frequently these quarters are inadequate for a physician with a family, and at some places even for a physician without family. At one station the physician lives in a three-room adobe house without conveniences and with the necessity of conveying water for domestic purposes a distance of 2 miles. Quarters in other medical branches of the Government are comfortable and adequate by comparison, with modern bath and toilet facilities.

The quarters of nurses frequently comprise only a bedroom, with the necessity of sharing bath and toilet facilities with other personnel. In other Federal services, nurses are usually given comfortable living quarters, frequently with sitting-room facilities, modern furniture, sanitary bath and toilet facilities for a group of two or three nurses, if not private bath for individual quarters. A modern tiled bathroom with sanitary plumbing in the Indian Service is the exception rather than the rule.

The activities of the Indian medical service are usually located at points remote from centers of population, where there is no opportunity for the physician and nurse to associate with members of their own profession. As they can not attend meetings of medical or nursing character, their contacts with others of their kind are infrequent or do not occur at all. They are also precluded from joining in any agency sociability because of the demands of their work, and other recreational opportunities are limited.

The Indian Service is understaffed with physicians and nurses as well as other personnel. A physician attached to an Indian Service hospital, as a rule, also has a reservation practice to carry out. The distances required in travel over unimproved roads and in all conditions of weather run up to many miles. The duties are arduous and call for whole-time service day or night.

There are 66 hospitals in the Indian field service having only one graduate nurse each. She is responsible for all the hospital work, except medical, and for that also to a considerable extent when the doctor is absent on reservation work. She serves full duty during the daylight hours and is subject to call at any hour of the night. Even in the hospitals where two or three nurses are on duty the demands are so great that they have no regular hours off duty.

In other Federal services there are definite hours of duty, upon the completion of which the physician and the nurse, except in emergency, have a definite period during which no calls are made upon them for professional services. These hours can be spent in rest, recreation, social activities, or used for professional advancement.

It will be seen from the foregoing that the Indian medical service suffers in competition with other medical branches of the Government. Competent physicians and nurses who accept employment with the Indian field service are inclined to move along to some other service at the first opportunity.

To correct these conditions increased funds will be required. It will be necessary to modernize existing quarters and to construct additional quarters where they are now lacking. It will also be necessary to employ additional physicians and nurses. If we are to recruit competent and well-trained professional people for these positions we must be able to compete in the market with others hiring

personnel of this type. We must give them spheres of activity which will not make greater demands than other Federal services and out of proportion to their ability to respond. Promotions should be made regularly upon demonstration of professional fitness and sufficient length of service. These conditions are being corrected as rapidly as means will permit.

Isolation is inherent in many stations, and to offset its undesirable features more attention must be given to the physical comfort of personnel. The employees must be offered attractive housing conditions and such opportunities for recreation and entertainment as can be had in isolated localities. At the present time we are not attracting the younger, more vigorous, and better type of physician or nurse.

The Indian school service likewise suffers by comparison. High-school instruction all over the United States costs more than elementary instruction, and yet Indian schools offering high-school courses often do not have as much money as lower-grade schools. Appropriations for the maintenance and operation of Indian schools have permitted an annual expenditure of not more than \$225 per student, which includes lodging, clothing, subsistence, and academic and vocational instruction, and such overhead charges as administration, power, fuel, and various other expenses. If the amount of this allotment per pupil does not speak for itself, comparison might be made with the cost of maintenance of other schools of similar character which afford industrial training, keeping in mind that the Indian boarding schools undertake to provide clothing for their pupils. It has not been possible on this budget to secure a sufficient number of necessary employees or obtain for the salaries offered those who possess the essential qualifications to operate efficiently.

This is especially true in the case of vocational instruction. Teachers of trade subjects, agriculture, and home economics as a rule have been such in name only, possessing neither education nor attainments fitting them to impart knowledge to classes of Indian students. Much of this personnel has been of the character of manual or mechanical labor to handle the mass of institutional work to be done each day, but which is actually performed under their supervision and instruction by details of Indian children to an extent detrimental to the pursuit of their studies.

It has been desired to introduce the platoon system of school organization, the three-quarters day of class instruction, one-quarter day of institutional detail (work) representing time divisions of the scholastic day, and to keep the children of the three lower primary grades in the classroom all day. To carry into effect these measures for securing a more rapid progress of the pupils and to reach a higher

standard of instruction necessitates employment of "auditorium teachers" and "instructors of shop subjects."
