Dedica

TO TRADITION

Anniversaries, particularly anniversaries connected with school, present unlimited opportunity for emotional expression. This is the fiftieth Badger, and we would feel guilty of negligence if we failed to take advantage of this rare opportunity to sentimentalize at least a little bit.

Tradition is not, in itself, an important thing. It is merely personalized and symbolical history. We can point at random at any number of traditional things and ideas in our own university, some beautiful, some amusing, some even unpleasant, but all a part of Wisconsin, and a part of the life we have lived while at Wisconsin.

We traditionally sing Varsity at a football game. There are traditions concerning the time when Abe Lincoln's statue will assume a standing posture, and that the curse of an old Indian has decreed that at least one white man will drown in Lake Mendota each year. Yes, we have our share of worthy traditions.

Without our realizing it, tradition serves us best as a measuring stick. It is the standard by means of which we may evaluate those things in everyday life which are of a more transitory nature. There is something traditional about the ivy on North Hall. The struggle which carried the ivy to the top of building is simply symbolic of the struggle which has made the University the institution which it is today. We of Wisconsin must remember that each year we add to this traditional standard of value. To us is entrusted the future, since ours is the standard by which it shall be measured.

Administration

GLENN FRANK

Harris & Ewing

Frank O. Holt

THE promotion of Registrar Frank O. Holt to the position of Dean of the University Extension Division is a splendid tribute to a worthy career devoted to the betterment of the University of Wisconsin.

The thousands of students who have found in him sympathetic understanding of their problems will wish him luck in his new position.

The establishment of Orientation Week, the organization of the State High School Student Relations Bureau, the dispatching of "good will squadrons" from the university into the state are only a few of the positive accomplishments of this energetic, most-visited man in the university administration.

President Glenn Frank

DURING the ten-year tenure of President Glenn Frank, the University of Wisconsin has maintained its position among the leading educational institutions of the world. This achievement is due in no small measure to the intelligent direction of President Frank, whose keen perception of the constantly varying contemporary situation has enabled the university's curriculum to keep step with the changing times.

The fact that Glenn Frank has been mentioned not infrequently as a potential presidential nominee in 1936, suggests that even those most critical of academic participation in government would be willing to trust "flexible intelligence" of the Wisconsin brand in the White House.

FRANK O. HOLT

In Service to the Nation

The University Brings Itself in Touch with the Living Realities of State

THE ideal of *service* is one of those intangible criteria which the University of Wisconsin, as all other schools, must strive to maintain. In the ordinary course of events the practice of this ideal goes forward practically unnoticed. Only in exceptional cases is the rendition of this service called to view. The present national administration has provided one of these exceptional cases.

The New Deal, as presented by President Roosevelt, created an emergency that demanded men trained in special fields of endeavor. The successful functioning of the new institutions rested on the effectiveness with which these men thought and acted. It is only natural that the educational institutions were among the places to which the administration turned its plea in this emergency. Many of our men stepped forward and gave their service in this extraordinary situation. The University of Wisconsin can be proud that it was able to contribute some of these men who sacrificed their time to help establish and perfect the intricate and component parts of the New Deal Machinery.

The President's Committee on Economic Security was an agency created for the purpose of advising the President and Congress on matters of social security. Professor Edwin E. Witte of the economics department received the appointment as the Executive Director of this committee when it was first organized in July of 1934. At present, he still holds this position, dividing his energy and efforts between the committee's work and his teaching in the Economics department. The work of this group has resulted in the introduction into Congress of the Social

GARRISON

WITTE

Securities Act and the Work Relief Bill, both extremely important measures. Cooperation and coordination of the various state legislative programs for social security is also included in the quota of responsibilities of Professor Witte's committee.

When the administration found itself in need of a man to serve as Chairman of the newly created National Labor Relations Board in July of 1934, Lloyd K. Garrison, Dean of Wisconsin's Law School, was called. This board had under its jurisdiction twenty-two regional labor boards throughout the country. Labor troubles of all kinds, but especially controversies involving Section 7A of the Recovery Act were handled by these boards. The work of the national board included: (a) judicial—the trying of cases appealed from the regional boards; (b) administrative-establishment and working out of the procedure to be followed by the regional boards; and (c) mediatoryassistance by way of arbitration and conciliation in avoiding of important strikes. Although the last of these was not considered a wholly desirable function for such a judicial agency, the settlement of the seamens' strike that threatened to tie up the shipping on the entire Atlantic seaboard proved the commission's effectiveness in this line. With the Board established and functioning in good order, Dean Garrison returned to the university in October of this year.

The University of Wisconsin was represented on the National Labor Relations Board by others who worked in various capacities. These included Professors Nathan Feinsinger, Charles Bunn, and William Gorham Rice, Jr. The latter served for some time as General Counsel for the Board and is at present serving as United State's Labor Commissioner in Geneva, Switzerland, in connection with the International labor organization of the League of Nations.

Professor Martin G. Glaeser, of the Economics department was another of those called. Because of his valuable experience in the field of public utility economics, Professor Glaeser was made special Economic Advisor to the Tennessee Vallev Authority. The work he performed consisted mainly in advising the members of the authority on the problems of management such as appraisals, valuation and other factors pertinent to the successful working of the project. The work of the Tennessee Valley Authority is especially unique because of the nature and size of the experiment being performed. It is to be the testing ground for a new public utility conception within the United States.

The School of Agriculture contributed more men to this new government service than did any of the other departments of the University. Among them was Professor Noble Clark. Professor Clark's work was in connection with the Land Policy Section of the Agricultural Adjustment Administration. His position as Regional Director of the lake states area kept him busy traveling throughout the states of

GLAESER

CLARK

Wisconsin, Minnesota, and Michigan. The objective of the program was to bring about better use of the lands in those states. Professor Clark's work consisted in the establishment and development of the machinery throughout the lake states area whereby there could be governmental regulation of the uses of sub-marginal lands. This program hoped to better the position of the people living here and at the same time effect savings in governmental costs throughout the area. With the project well under way and working effectively, Professor Clark is again back at his desk and classroom in Ag Hall.

At the request of Secretary Wallace of the Department of Agriculture, Professor Asher Hobson is spending the present semester at work with the department in Washington. Professor Hobson is instrumental in a program, the purpose of which is to bring about greater efficiency in the gathering, analyzing and dissemination of the great amount of the statistical work which is done by the department.

Probably the longest time spent in Washington can be credited to Professor R. K. Froker. Mr. Froker, during his stay in Washington, worked on various phases of the regulation of the dairy industry. The regulation of the fluid milk supply to the metropolitan centers such as New York, was one of the more outstanding efforts. Various other men from the School of Agriculture, including Professors Wehrwein, Bakken and Shaars, have spent some time in Washington working on several aspects of Agricultural and Rural Economics in connection with the Agricultural Adjustment Administration.

The complete roll includes others who gave of their time and energy in this national emergency. These men, by virtue of their special talents, were needed in the time of crisis. Their service was in the establishment and development of the institutions conceived in the New Deal. The university is living up to its ideal of *service* in thus lending its talent for such a need.

Faculty An Informal Pictorial Presentation

Edwin B. Fred, Dean of the Graduate School, is one of those amusing persons who has no idea when to stop working. He is interested in everything and keeps a charming personality in spite of his strenuous program. He is one of the few individuals who has not neglected the art of conversation.

Students who see in the New Deal a chance for employment in the government service would do well to listen to John M. Gaus, Professor of Political Science. An alert student of the problems of administration, he is probably the man best informed in the personnel problems of the government machine. Besides, he has been secretary of Governor Philip F. LaFollette's Executive Council and is the author of several good books.

Since Animal Biology is the most popular freshman laboratory course, Prof. Michael Guyer meets most of them personally or through his massive book. Teacher and lecturer by necessity, he is a brilliant technician and scientist by inherent love. His far-reaching research in heredity and eugenics has won him worldwide renown.

Still a staunch supporter of language attainment examinations for college students, Professor F. Daniel Cheydleur compromised with others of the French department on either exams or sufficient credits for a language certificate. But he would still like to see the modern foreign languages take their place in the sun of collegiate education on the basis of knowledge rather than credit hours.

The height of sartorial elegance, one generation removed from a Spanish hacienda—a snubnosed scotch terrier and a beautiful wife his most cherished possessions—Ricardo Quintana, English professor and profound student of Milton, has built up a legend around his way of dismissing class for no reason at all.

¹⁷ A medic student, by the time he has rolled the last pill and carved the last cadaver, is a taciturn sort of cuss at best. Still, if there's one man who can bring a smile to that wearied face, it's Walter E. Sullivan, Professor of Anatomy. Combining genuine erudition with thoroughly human qualities, he is one of the men that Wisconsin M. D.'s won't soon forget.

Youthful and jovial dispenser of medieval history, Prof. Robert Reynolds of the history department, makes the "dryest" of courses sparkle with life. His knowledge of French, Latin, Greek and old English, combined with an inextinguishable enthusiasm for research, forecasts a future that his colleagues predict cannot be anything short of brilliant.

Ray Dvorak, the man with the big smile and the long baton, will take his place in Wisconsin history as "The Man Who Taught the Band to Play Jazz." Shocking a few, but pleasing the great majority, Dvorak has put himself over as few men have in their first year at Wisconsin. His is the unique position of leader in the rebirth of student patriotism.

Professor of Mechanics since 1893, Edward R. Maurer is one of the most widely known men on the faculty of the College of Engineering. Author of several good texts, his reputation is based upon outstanding research in the field of mechanics.

Miss Abby Marlatt does water colors. Aside from that her life is filled with enough committee meetings, chairmanships, and national activities to keep her completely occupied, but she finds time to devote her full energies to the direction of the Home Economics Department.

After obtaining his degree at Michigan and continuing his studies at Marburg and Heidelburg, Professor Edwin B. Hart came to Wisconsin in 1906 as Assistant Professor of Agricultural Chemistry. His work here has covered products of protein decomposition, chemistry of cheese ripening and other dairy chemistry, some of which was carried on in conjunction with the late Dr. Babcock.

The U. S. Army's representative on this campus is Capt. Remington Orsinger, commandant of the R. O. T. C. Brisk, energetic, bright-eyed, he is a welcome guest at all prominent social affairs, for his brusque, abrupt military manner disappears completely when he enters the social arena. His chief asset is his ability to remain unquoted in the Daily Cardinal, thus escaping criticism because of his presumed position as militaristic propagandist.

Professor Selig Perlman really doesn't look like this. But then Professor Perlman is very unlikely to be affected with what a yearbook picture does to his face. One of the most popular guest speakers the campus boasts, he has made economics popular and understandable. Originally a sociologist, he has become an economist who surprises many with his anti-Communist invective.

Startling academic circles with his rediscovery of the ancient kingdom of Trebizond, Alexander Vasiliev, recipient of occasional royal decorations, is one of the world's leading authorities on Byzantine history. Eminent historian and accomplished pianist, all those acquainted with this amiable scholar will miss him during his sojourn at Columbia.

Leader of the followers of St. Pat through 33 stormy March Seventeenths, Frederick E. Turneaure probably has as little love for a shyster as any of his exuberant charges. But since responsibility for his charges' actions is indirectly his, he has saved the lives of untold hundreds of lawyers. But—Erin Go Bragh!

Physics may be just ten credits of freshmen science to some, but to those who had it under the white-haired, stogie-smoking William F. Steve, it is a memory of a class no one could sleep through. To Professor Steve goes this year's title of Best Faculty Showman.

A taskmaster for insisting on sincerity in his art students, Wayne L. Claxton has brought to the art department a forward looking progressiveness which has uncovered unsuspected talent among collegiaries. Although the field of art metal is his special hobby, he believes in allowing his students to work in that medium which most definitely expresses their own personality and spark of genius.

Considered one of the best lecturers in the University by the embryo daisy dissectors who frequent his classes in the Biology Building, Professor George Bryan makes chromosomes and chlorophyll seem like something more than mere abstractions in a text book. Professor Bryan joined the faculty in 1914 and, after taking a leave of absence with the army, came back to receive a professorship in the Botany Department in 1927.

Because in tinkering around with a hobby for twelve years he has discovered that there are no two guns exactly alike, J. Howard Mathews, head of the chemistry department, has won nation-wide fame as a pioneer in the study of ballistics as a method of scientific crime detection. Tiny scratches on bullets or shells have, under the microscope of Dr. Mathews, spelled freedom or imprisonment for men on trial for murder.

Mental ability and I. Q.'s, his forte in the field of psychology, do not stop his prowess on the golf links, but when he isn't teaching or shooting pars in faculty golf tournaments, Prof. V. A. C. Henmon is busy correlating intelligence tests with high school averages to determ ine the degree of college success for an entering freshman class. His success, so far, in predicting the number who will survive the bumps is phenomenal, and used by colleges throughout the country.

World Politics

In Which We Attempt A Review of That Well Known Course, Political Science 125.

TO those seeking to formulate a program for a well-rounded education, a "must" course that is seldom omitted is Political Science 125, commonly known as World Politics. Perhaps it is because all is not well with the economic system that the the present day

student is be-

coming aware

that our own

country is only

a small entity in

the aura of world

politics, but at any rate, this is

a course which

has enjoyed a

phenomenal in-

crease in enrol-

ment in the past

GRAYSON L. KIRK

one, two, or three years. While much can be attributed to Joe College's coming of age, a great deal of the increased participation in this course is undeniably due to the personality of Grayson Kirk, assistant professor of political science.

Visiting 165 Bascom on any Monday or Wednesday afternoon at 1:30, you will see a well-groomed, handsome, and almost youthful appearing man discoursing on contemporary political situations with

Hour Examination

This is the course which provides an analytical introduction to the foundations of international relations. Here one encounters such pregnant, and today meaningful, phrases as nationalism, imperialism, and a few other "isms." Sometimes during the semester you will hear a discussion of racial, populational, and economic factors on world politics. The subject is sort of game to Prof. Kirk. He never hesitates to make predictions on the outcome of any contemporary situation and in most cases his prophecies have come astonishingly true. Notwithstanding present developments in the international scene, Prof. Kirk is still a firm believer in the settlement of international disputes by methods other than war, and any scheme which smacks of conciliation and cooperation is pretty sure to come in for a kind word.

Prof. Kirk helps to keep the course interesting by remaining ever on the alert to recommended new books with modern approaches to world problems, and his intelligent appraisals of conditions in the constantly-changing world political arena are a stimulating dish to many students whose diets in respect to political matters were previously furnished solely by our five-cent national weeklies.

Even though you may find it necessary to haunt Bascom reading room in order to get all your outside reading done, the lectures do provide you with the basic information with which to intelligently appraise the contemporary international political scene. What else can you ask from a course?

a certain mellifluity of voice that seems to retard the perfectly natural desire on the part of any audience to fall into a slumber following the noon meal.

Political Science 125

7 December, 1934

 Compare the case for economic nationalism, as presented by Dean Donham, with the case for the middle-of-the-road internationalism, as presented by Secretary Wallace. Include a discussion of specific points of national policy.

 Explain specifically how the post-war burden of public and private indebtedness complicated international trading operations. Explain the gold exchange standard and its relation to international trade.

Music Appreciation

Elect It As A Pipe Course, But If You Don't Watch Out You'll Learn Something.

MUSIC 65, more familiarly known as "Music Apprech," suffers the opprobrium of being known as a notorious "pipe course." But the strange thing about the course is that it was intended to be a "pipe" by its founders.

The course was introduced in its present form in 1918 by Dr. C. H. Mills, after a discussion with the late President Van Hise. Though courses in music appreciation had been given before this time, this was the first time that a popularized version had been offered. The two men agreed that in the hurrying days of student life, crammed to the last minute with required subjects in various literary and professional courses, there should be some cultural course which might be elected for credit by the busiest undergraduate, requiring no outside reading or extra work, but which might provide a much needed balance to some of the very one-sided intellectual diets.

The course became popular at once ... especially with athletes and such students as walked in fear of the dread specter *eligibility* ... and has continued to hold its own with enrolments of between two and three hundred regularly. The course has changed somewhat since its inception and though students are still not required to do any outside reading, examinations are given at regular periods, which show surprising results.

Time and again experience has shown students who openly admitted that they took the course for an easy credit completed the course with quite an astonishing knowledge of music as an art. When cases like this are noted, Dr. Mills feels gratified that the mission of the course has been fulfilled.

Dr. Mills does for the campus what Walter Damrosch has been doing for an

DR. MILLS

air-minded public, selecting from his wide knowledge the high spots of every side of music, throwing in an organ recital occasionally, and sugaring the doses of history and theory which he feels necessary for their good, to the end that they leave the course well equipped to listen intelligently and to enjoy the wealth of music which comes into every home by way of radio in this enlightened age.

And speaking of radio, "music apprech" steps out from the campus into hundreds of homes through the medium of the University Station WHA, and if we are to judge by fan mail, it is becoming as popular there as it is on the campus.

All of which brings us to the ever perplexing problem, "What does the catcher say when he walks up to the pitcher? What do the football players say in the huddle?" Who knows but what they might be discussing the fugues they heard a few days before in Music 65?

Credit and Crescendo

Monday and Wednesday at Nine O'clock in Music Hall; Econ. 1a Under Kiekhofer.

W ITH the present national administration simmering in a mess of alphabet soup tended by brain-trusting economists it is only natural that the intellectual curiosity (such as it is) of our university should flow in the direction of the economist. The brunt of the wave strikes, in no small part, on the shoulders of Professor William H. Kiekhofer, whose course in Introductory Economics is better known as *Econ 1a*.

Three times a week, during the fall semester, a horde of seven hundred odd souls file into the auditorium of Music Hall to hear the silver-tongued Kiekhofer expound on the intricacies of our economic institutions. As arpeggios and arias are gently wafted from other parts of the

Prof. Kiekhofer

building, the principles of supply and demand compete for the attention of the assembly—a sad state—necessitated by the fact that no other hall on the campus can cope with the numbers of the future Tugwells and Townsends.

It would be a gross injustice, no doubt, to intimate that it took a depression to make *Econ 1a* popular. For many year's Kiekhofer's oratory has been practically as traditional on the campus as the handwriting on Kiekhofer's Wall . . . which, as he takes great pains to explain each fall, bears no connection to him.

Econ 1a has the reputation of being a "tough course to get a grade out of." The favored few in this respect are usually journalists or political science majors. The basis for such discrimination seems to rest mainly on the ability to write "much ado about nothing." Their papers, being heavier by the virtue of the additional ink placed thereon, sail farther when thrown down the stairs at the time when the grades are determined. Engineers who frequently wander into this course find their slide rules of no avail and after one semester of chastisement are glad to go back to their pipes in the plumbing school.

It was once rumored that there was a student who did all of the assigned reading although no one has ever been definitely able to verify the fact. The majority of the inmates spend most of their time studying from Kiekhofer's "Outlines of Economics"—a really good little book which the author constantly revises, much to the disgruntlement of the local book stores.

There is no more cosmopolitan meeting place on the entire campus than *Econ 1a* lecture. The "forgotten third" sits beside the social register, the grind rubs elbows with the playboy, the star halfback smiles on his hero worshiper.—The home-ec, the agric, the engineer, the geologist, and the accountant, in fact, *toute 1a monde* gathers to pay homage to that spellbinding economist in his "melting pot of the campus"—ECON 1a.

On Man and Nature

From Seclusion In The Distant Past This Man Brings Figures Which Live Again

WHEN a new student asks an old what course he should take, the reply invariably includes Philosophy 25.

Prof. Otto

that. Those are the two things I'm most interested in."

Perhaps the young lady was voicing the opinion

of many other students. At any rate, enrollment is limited to 350.

Although he has offered the course for years, Professor Max Otto has a way of making the students feel that the subject is as fresh to him as it is to them. With a poignancy peculiarly all his own, Professor Otto takes figures out of the dusty archives of the past and recreates A cute young thing who was having her hair frizzed in the beauty parlor asked the operator this question. She replied with the customary "Man and Nature," and the young thing complacently answered, "Yes, I think I'll take them into living creatures, in fact so real that one can almost see their mobile forms instead of the abbreviated stature of the lecturer on the platform. His keen comprehension of human nature enhances his capacity to fascinate even the most indifferent audiences with his colorful and vivid character portrayals of such personalities as Socrates, Jesus, Saint Augustine, and others touched upon by the course.

Indeed, even the reading list is an inducement to take "Man and Nature." Books by Breasted, Papini, Plato, Hayden, and Prof. Otto are only a few that offer personal enrichment to the student finding time to consider them.

But no mere enumeration of lectures and titles can give the essence of this course so highly prized by the students. The arresting personality of Mr. Otto himself permeates every angle of the course. His life is the vital expression of the philosophy he teaches. A humanist, groping for a realization of the "good life," Professor Otto believes "that mankind yet may take its own destiny consciously and intelligently in hand."

Instructional Staff

Otto Vivas Fries Boegholt Ely

The Alumni Association

THE Wisconsin Alumni Association is a voluntary, cooperative organization of graduates and former students of the University whose purpose is "to promote the welfare of the University and to encourage the interest of the alumni in the University and in each other." It is a means to an end. The student who takes a genuine interest in the University and in campus affairs wishes to continue that interest after graduation. The Alumni Association is not only the medium through which this may best be done; it is also the instrumentality through which the desire to effectively serve the institution, its students and alumni will find large opportunities. In the words of President Frank, it is "the medium through which a critical loyalty will be able to expose the weakness and promote the strength of the University."

The Wisconsin Alumni Magazine, which is the official publication of the Association, was first published in 1899, by a committee of alumni, of which the late President Van Hise, then serving in the department of geology, was a member. The magazine is now issued monthly and

goes to all members of the Association. Its major purpose is to present to former students a living record of the living realities of Wisconsin and to interpret the new and vital things that are happening on the campus. In addition, of course, it brings to alumni news of classmates and friends of college days-where they are and what they are doing, also the activities of alumni groups throughout the world. Supplementing the magazine, the Association sends to its members from time to time, various university bulletins and pamphlets which are not only interesting in themselves but also convey a clearer idea of the services the university is rendering. The production of a second series of motion pictures has also been undertaken which will be available to alumni and through them to other interested groups.

The governing body of the Association consists of twenty directors elected at large for a term of two years. Ten are elected each year by mail ballot of the membership from a list of fifteen nominees. The officers consist of the president, vicepresident, and treasurer, none of whom,

Myron Harshaw President

WALTER ALEXANDER Vice-President

BASIL PETERSON Treasurer

HERMAN EGSTAD Secretary

with the exception of the treasurer, may succeed himself in office more than once. They serve for a term of one year.

The Alumni Research Foundation

******THE Wisconsin Alumni Research Foundation was organized Novem^{*} ber 14, 1925, under the laws of the state of Wisconsin as a corporation not for profit. The purposes as set forth in the charter are:

> 'To promote, encourage and aid scientific investigations and research at the University and to assist in providing the means and machinery by which the scientific discoveries and inventions of the staff may be developed and patented and the public and commercial uses thereof determined; and by which such utilization may be made of such discoveries and inventions and patent rights as may tend to stimulate and promote and provide funds for further scientific investigation and research within said University.'

"The funds which launched this nonprofit-making link between the educational and business world were voluntarily subscribed by interested alumni. The Foundation divorced itself forever from politics and political influence by placing its management in the hands of a self-perpetuating board of six trustees, all alumni of the University: George I. Haight, Chicago, president; William S. Kies, New York; Judge Evan A. Evans, Chicago; L. M. Hanks, Madison; T. E. Brittingham, Jr., Madison; TimothyBrown, Madison.

"The first official action of the Foundation was to accept the discoveries of Dr. Steenbock in the field of vitamins, and to lay down the principle that the discoverer or inventor assigning the fruits of his scientific research to the Foundation should be rewarded by a 15% interest in the net receipts arising from the patenting and commercialization of this discovery.

"Most educational foundations start with an endowment, which often runs into millions of dollars, and with a fairly well defined program for which funds have been furnished. The Wisconsin Alumni Research Foundation had no such start. All it had was the willingness of an individual to turn over to a body of interested alumni an idea that was subject to patent in order to protect it from misuse.

"The scheme of organizing an alumni foundation was a new one. It had never been developed or, so far as I know, even thought of anywhere else in the country. Since this plan was effected a large number of universities and colleges have followed, and I think we may say with some pride that in forming the Wisconsin Alumni Research Foundation, we have pioneered in blazing the trail for the handling of important discoveries which are of aid to the human race in a manner that will protect the public, do away with most of the abuses of commercialization of patents, and leave the scientist who discovers the process in a position where he can devote himself to science without worrying about the commercial development of his discovery.

"To protect the public it was necessary to provide a careful system of checks upon the licensees, and to that end a substantial

MRS. GEORGE LINES Board of Directors

ROGER MINAHAN Board of Directors

laboratory was organized and equipped at Madison, where samples of irradiated products are tested at varying intervals without the knowledge of the licensees.

"The Foundation has organized a complete staff of specialists who call upon the medical profession and acquaint them with medical and clinical facts in connection with the use of Vitamin D milk. The Foundation has had to establish an advertising and publicity department which furnishes educational material, and which censors the advertising of its licensees. Every effort has been made to maintain the dignity of the University of Wisconsin whose name the Foundation bears, and every precaution is taken so that nothing of an unethical nature may appear in any statements published by the licensees of the Foundation."

-From an address by William S. Kies.

A. T. SANDS Board of Directors

EARL VITS Board of Directors

DEDICATED TO RESEARCH NATURAL SCIENCES THE

HE Wisconsin Alumni Research Foundation at the date of its organization had no endowment fund. It

had to build one out of earnings. Its assets consisted of one patent, and the modest initial funds supplied by a group of alumni.

Royalties from this patent and others have built up a sound capital structure, the income from which is devoted to scientific research projects at the University.

Here are specific examples of the Foundation's activities: In June, 1932, a group of highly trained men and women took their doctors' degrees at Wisconsin to step out into a world already greatly overmanned. From funds allotted by the Foundation, twenty-three Post-doctorate Associateships were created, permitting this group to continue productive work on important research.

In 1933, necessary curtailment of the State's appropriation to the

> WISCONSIN ALUMNI RESEARCH

University threatened to cripple research work on many scientific projects. In this crisis the Foundation offered its aid.

Said President Glenn Frank, addressing the Alumni Association:

"Between sixty and seventy important researches . . . would have had to be abandoned, but . . . The Alumni Research Foundation has ... saved the day for productive scholarship."

And here is a new departure. This year the Foundation made a grant to the University for the establishment of special fellowships for young men and women of exceptional talent and originality in the natural sciences. Nominations from scientists or teachers of standing are welcomed and seriously investigated. Nominations are not confined to Wisconsin alone. Exceptional ability is the only "open sesame" to these Alumni Research Foundation Fellowships.

ALUMNI

FOUNDATION

WISCONSIN RESEARCH

Elections

In which the Class of 1935 is called upon to keep the political scene from going entirely to pot.

STUDENT apathy in campus politics became so pronounced during the past year that seers might be inclined to predict it will only be a matter of time before one sees an advertisement in the student newspaper:

"Campus offices, yours for the asking."

Out of twenty available positions, eleven of them went by default to students finding enough ambition to visit the dean's office to claim them.

The campaign for the election of Junior Prom King, which usually divides Langdon

FRANK KLODE

Street into two warring camps, amounted to little more than a diplomatic conference last fall.

Each year the elections chairman finds himself the spearhead of criticism emanating from many sources, but the present chief, Arthur Benkert, proved himself too confoundedly efficient to rate anything more than official announcements in the Daily Cardinal. With an unspectacular elections chairman, and the Sophomore and Junior class positions going by "gentlemen's agreements," it was absolutely necessary that the Senior campaign provide the theatrics . . . and it did.

On the opening day of school there were four men in the race for the presidency, but only one of these, Frank Klode, stayed in the race until the end. Other candidates were Marvin Peterson, Edwin Wilkie and John Lehigh. A few days later the situation became complicated when it was pointed out that Klode and Wilkie, both holding campus executive positions, were therefore ineligible to run for office.

Meanwhile John Lehigh was informed by the powers that be that he was still somewhat of a member of the class of

RICHARD BRAZEAU

1936, and he had to drop out, being replaced by Herman Teufel.

Frank Klode was the first to make the supreme sacrifice, resigning his position as head of the Cardinal Board of Control in order to stay in the race. Wilkie was more defiant and reiterated his intentions of staying in the derby, despite his presidency of the Forensic Board. A day later the elections Board issued an ultimatum to Wilkie, and he decided that the Forensics Board needed him more.

As Wilkie stepped out, his place was taken by Gordon Armbruster, who commanded considerable support among the independents. A day later, Bob Dudley, a Phi Psi, who had many friends, thought his chances were pretty good, and filed for the post. The "open door policy" prevailed for a few more days and when the time came for filing there were five in the race, the newest addition being Bob Blauner, an independent.

Armbruster lost no time convincing Blauner that two independents in the race would crucify the cause of the nonaffiliated, and as Blauner dropped out, Peterson ceded his support to Frank Klode. Dudley retaliated by enlisting the support of Teufel, and the battle was on as the Cardinal carried an editorial entitled "Student Politics Reach Evil Days."

The following day Armbruster decided the rigors of the campaign were unsuited to his wavering health, and planned leaving the race. At a Dudley organization meeting,

WADSWORTH

HEUN

BROOKS CASSADY

LYONS

platform by now

bore hardly a sem-

McCloskey BROOKER

blance to the one he started out with.

On the 27th of October, Dudley charged the Klode camp with bribery in enlisting the support of Armbruster. After hearing the testimony, three referees appointed by the Elections Board, agreed with the contention of Klode's counsel, Alexander Shannon Cannon, that there was no evidence of misconduct in the procedure.

Out of 1,250 eligible voters, only 300 turned out to give Klode almost a 2 to 1 maigin over Dudley, and it was apparent that Armbruster had "put it on ice" for Klode.

Richard Brazeau, Psi U., had such a strong machine organized to put him in as Prom King that all other competition was The Brazeau gang witscared away. nessed the sad spectacle of having periodical political roundups with no opposition to discuss. A few days before filing Emmett Tabat, an S. A. E., decided to make the run. Both won positions on the electorate by default. Using ten comps from Prom as bait, Brazeau succeeded in getting Tabat into an agreement, and the election was unnecessary as was the case

Page 31

in the Sophomore race, when George Cassady conceded the leadership of the triumvirate to Joe Brooks, Phi Delt.

The same apathy was evident in the spring elections. On Tuesday February 27, the night before filing, the Langdon street political machine met at the Alpha Chi Rho house and said "John, what job do you want, and Frank what'll you have? ... there'll be no opposition, we're sure." And they were right. The next day the dean's office announced that seven of the 15 available campus positions went by default.

It looked as though the directorate of the Freshman class would also be determined by a gentlemen's agreement after Robert McCloskey, Eugene Brooker, and Mavis Lyons, all won by default. It was reported that Brooker and Miss Lyons conceded the leadership to McCloskey . . . until there entered into the campaign the influence of the mysterious Mr. Armbruster, who urged Miss Lyons not to "betray the integrity of the independents." So an election was conducted, and thanks to the efforts of lock Rvan's Jim Farley tactics behind the scenes, McCloskey won a smashing victory.

Despite the paucity of candidates in the election, a huge vote, the largest in two years was piled up. Another significant result of the election was the close vote, 734 to 702, to retain the Stevens Plan of class directors.

You May Have Met---

A university community of eight thousand is sort of a cross-roads of the cosmos. In an environment of such variegated color, one runs into almost as many different types of personality as there are students. Some of them have outstanding traits that set them off from the others, while others have talents that compensate for lack of personality.

In presenting a group of students, we are not decreeing that these selected are the most unusual students in the University. Without setting any definite standard of what makes a person interesting, we are trying to present a group of students who are enough different from the average run that we feel that they have something about them that makes them worth knowing.

No doubt we have missed out on scores who would qualify on any similar list, but we have tried to assemble those students who come most often in contact with a considerable portion of the University's population.

Co-eds know Gilly McDonald as the blonde with black hair on his chest, but to most of the campus he is known as one of the scrappiest basketball players that ever trod a Wisconsin hardwood. All-conference guard, member of the interfraternity board, eligible bachelor, President of the "W" Club, are some of the achievements of this Badger stalwart.

Hannah Greeley is one of those women typified by the word versatile. Anti-War leader, Sunday school teacher and senior representative on W. S. G. A. Council, she handles all the jobs well without taking herself too seriously. She penned the write-ups for the "Old Pictures" section in this year's Badger, and we'll credit her with a sense of humor.

Personifying the Good Clean Boy in campus politics to many, Edwin Wilkie progressed as far as a threatened candidate for senior class president. President of Y. M. C. A. and the Forensics Board, he carried the weight of making the campus Wilkie-conscious for the benefit of ten or twelve younger brothers. He is the current example of the town boy who made good.

Adroit. That's the word for Frank Klode, who in a long and devious political career has never left himself wide open. Center of the tastiest elections scandal of recent years, he came out with election, which amounted to tacit approval, if not complete vindication.

Seldom is his name seen in print, but a potent force in campus politics is John Wright. John prefers to remain in the background and let his proteges get the "ink," but, just the same, all political aspirants in the Junior Class come to this "behind-the-scenes" dictator for counsel. When he isn't dabbling in politics, he is one of Doc Spears' right hand men on the football managerial staff.

Because she has an infectious personality, Hinda Cohen seldom has the opportunity to find herself alone. In a world filled with blasé people, it is refreshing to meet one her type who becomes completely absorbed in anything occupying her attention. Possessing a keen intellect, a radiant personality, and a capacity to do any kind of a job well, the company of Hinda Cohen is universally desired.

Brass buttons and leather Sam Brown gleaming, William Harrison Haight, Jr., has represented stalwart Americanism in this hotbed of communism for three long years. Violently disliked by some, derided by many, he has at least maintained a really sincere attitude in the face of continual criticism.

One of those insidious left-wingers you've heard so much about of late, Leo Genzeloff is executive secretary of the National Student League. Really a pretty decent chap in spite of the reputed diabolical tendencies of the group he leads, Comrade Leo has enough of the proletarian in him to warrant the everlasting vigilance of William (God Save the Status Quo) Haight.

He fought the Alumni Association. He fought the National Student League. He fought the Union Board. He even fought with his own staff. But Charles Bernhard, struggling with the toughest activity job on the campus, brought the Cardinal through a hard year in spite of continuous opposition from one source or another.

Freshman and sophomore politicians will not soon forget Wilson Weisel, who, as vice-president of Union Board, epitomized smooooothness to dozens of embryo campus dictators. Combining polish with ability to land telling blows in the clinches, he has made his mark as one of the more capable of this year's crop of big shots.

When Rusty Lane lines up the actors and picks out an ingenue, there's one entry who is bound to lead the field. Hitting a keynote as Peter Pan, Marjorie Muehl has played responsively in roles which less sensitive actresses might have butchered. And—the final word in an actor's dictionary—she's a trouper.

Chin Tang comes from Canton, China, but there is something that sets him off from the typical Chinese student on the campus. Large of stature, and a good mixer, he differs from his smaller and more secluded brothers. Captain of the International Club soccer team, and exceptional tennis player, he is regarded by all who know him as an all-round good fellow.

With a liberal smattering of brains, beauty, and personality, Mary Belle Lawton must be the composite of hundreds of college boy's conception of the ideal Co-ed. A smooth date, who doesn't talk too much about the swanky formal she attended the week before, this prom center of the midwest could use a few more Mary Belles.

Ever since George has been in the University, his violin case carrying the inscription "Geo. Danz, violinist," has been the target of derision from Daily Cardinal columnists, but that's only an indication of his conscientiousness. A talented musician, George is equally at home playing symphonic, popular, or chamber music.

"Cardinal to Rocking Horse to Octopus for a double play," is the way the sports section would write this paragraph. A feature writer on the Cardinal, Maurice (pronounced M'reece) graduated to editor's saddle on the Rocking Horse and then moved into the same job on Octy. Endowed with a genuine sense of humor, Blum can even see the funny side of himself.

We suspect that many students go into activities solely to win the approval of the "folks back home," but Peg Stiles is one of those unusual individuals who seems to enter the arena of campus affairs for the sheer enjoyment she derives from them. Thriving on responsibility, her list of activities speaks for itself.

The rigors of a stiff engineering course fail to keep Les Janett from participating in a wide range of activities. Besides usurping all the honors in his given field, he has been editor of the Wisconsin Engineer, member of Iron Cross, band, orchestra, one of the champion A. K. L. singers, and . . . well, we're only allowed fifty words.

Although Haresfoot publicity men waste fabulous amounts of black ink and white paper predicting glittering professional careers for their proteges, here's one who isn't looking for his name in lights. Tony Canepa, whose tap routines were featured in "Dictated—Not Red" and "Break the News," will take a job with an American rubber company in South America, where tap dancers are, they say, unknown. May he bring light to the heathen.

Bob Clark is the answer to a coach's prayer for the ideal type of athlete. Few more conscientious men ever wore the Badger spangles than Bob, who hurdles consistently well for Coach Tom Jones. A capable student who would rather listen to others tell of their exploits, the list of Bob's boosters run into the hundreds.

Bob Beyer, the boy who fired the opening gun in a battle which threatened to crack Union Board wide open, has combined scholastic achievements with a recognized ability to get out the independent vote. Head of the nonfraternity dynasty, he took bachelor's and master's degrees in four years and picked up a Phi Beta Kappa key en route.

IN YEARS PAST

A short pictorial history dealing with those events and institutions which are an essential part of the last fifty years at the university.

THE Delta Gamma "Sorores in Universitate," as the 1887 Badger would have it, are languishing here in a typical pose. For those on the campus who have wondered(how any group of girls could so perfectly master all phases of the art of sophisticated boredom, this picture should be a revelation.

Here we have not only an early example of the smooth beauty which distinguish several D. G.'s today, but also of their taste for "luxurious living." Note the stained glass window and the draperies . . . not confined to the furnishings of houses in those days.

N 1882 it was the Thetas who had the "lawdge" and the Chi Psis, ignominiously enough, had only this house. A taste for pretentiousness had not yet captured their souls . . . or else it found its outlet in derbies and wing collars. (Would not Prof. Ross look "chic" in this picture?)

In those days the Chi Psi house was on the site of the present Gypsy Trail tea room. There is a slight suggestion of the country in the picture. Note the outdoor plumbing facilities modestly enclosed in a lattice fence. The modern temper is different. Do you recall the Chi Phi homecoming decoration last year?

THE members of Phi Delta Theta devoted themselves to serious pursuits in the early nineteenth century. Each member was requested to read an essay. The minutes of March 29th, 1859 record the failure of three out of the five members present to produce such works. This disgraceful behavior shows that all Phi Delts have not always been exceptional men.

A custom since abandoned by the brothers held full sway in those days when the feminine sex demanded less time of the members. Meetings were pleasantly lengthened out by the serving of oysters, eggs, and lemonade. The description of the minutes would make the mouth water.

Below are two facsimilies of Interfraternity Ball tickets. The first one would admit the bearer to a fraternity hop, a gala affair, held when a ball meant yards and yards of taffeta and silk, good breeding, and graceful waltzes. Could the Ball of '34 compete with such elegance?

March 29th 1839. 610 Society met on Cleancellor Latherops Precitation room members present - Win F. Vilas. P.G. Slaughter, A.J. Mc Farlan F. T. Starkeventher and L. S. Clark. For offray, Mr. Vilas Jailed and consequently no eriticism Mr. M'Farlance read an elpay " Richard Cours dection", briticism by L.S. Clark. Mr. Slampher fuiled to produce the spay required by the motion of last meetin Mr. L. Sleast read an epay - Poem " midnight Provisings". Continien by mr. Me Farlance Mr. Markweather Jailed to read an elony. The Lectorfor the evening - Mr. M. Farlance, read an affecting nar ration, by H. C. Johnson - The Dead Marine". tation, by 11.0. Jourson the secan marine. The minities of the Alphu chapter of the QAO. of Wis. then proceeded to do justice to the viands propared for the occasion. The systems were plenteous. Cuscions, servory superabundant - The eags were cooked as mae, alone knew how to accomplish the skillful Salbution; and eater with great gusto The lemonade was sweetly acidulous, represhing, copious, satisfying-Good feeling prevailed on all sides, and cordial mention of absent brothers in the bond, with many expreptions of beind remembrance and good wishes. Society adjourned to meet next terre Lemare flolute. Sec.

THIS strange picture of the lower campus leaves out many present landmarks. Although Science Hall was at the end of Langdon, it housed Stephen Babcock, and cadavers were out of place in an institution of learning. The "Old Union" was the fine residence of the University President, but the library was not even in embryo. Students walked and talked in a grove of trees instead of behind the stacks.

"Daddy" Bleyer took his apprentice training on their staff and could even be called on the carpet in those days. Notice the beginnings of his moustache.

Two "ladies," substantial representatives of their sex, found places among the editors. Perhaps their somewhat ponderous air supplied the conservative note so often lacking in these radical days.

 MAREL ROBINSON

THESE very desperate looking fellows are engineers of long, long ago. The gentleman in the foreground is a cross between a lumberjack, a wild western villain, and your grandfather. He seems to be measuring the stress and strain of the times. Judging by the intent look on the boys' faces, the engineers must have been persevering plumbers even in those days.

N INE hardy men, all with their jewelry on! It has long been known that a few silly girls wear fraternity pins on their negligees, but no one ever suspects that the Wisconsin Boat Club honored their insignia to the extent of wearing them on bathing suits. For that is what these modest little outfits are.

But do not let the real point of this picture be lost. It represents Wisconsin's first attempt to produce a winning crew. But berry crates have been the insidious foe for the Badger crews and have rather consistently opposed any success of her shells.

D.B.Frankenburget

IF the ferocious expression on the faces of several of these boys is any criterion of their belligerence, this Wisconsin eleven of 1889 should have won every game of the season. Besides the fullback, two halfbacks, and a quarterback, there were seven "rushers" on the team. It is ridiculous to assume these seven have anything in common with the type of individuals seen in fraternities and sororities during the first few weeks of school. These husky fellows played without the many accoutrements of today. Helmets and shoulder pads are conspicuous by their absence. In those days football heroes had to depend on their own fine figures to win them feminine admiration.

I N the following extract from the 1892 Badger, tribute is paid to Professor David B. Frankenburger, who is remembered today in connection with the oratorical prize bearing his name:

"In the natural mingling of races that goes on in the United States, it is not surprising that Professor Frankenburger finds in his line of descent a strain of French, Irish, and Scotch, as well as German blood. Students of several nationalities may find in Professor Frankenburger a touch of kinship.

"In 1879 he accepted the chair of Rhetoric and Oratory in the University, under the impression that in a professor's chair he would find leisure for a literary career, for he had often courted the muses. Among his best poems are "My Old Home," "The Bells of Bethlehem," and "Our Welcome Home."

T is unfortunate that these snappy boys have left no descendents, for a good deal of spice could be added to modern serenades by such a neat group of banjo players. This hobby was so popular in the nineties that the musicians organized themselves into a club so as to be able to give concerted expression to their musical souls. It was not only to gratify their own tastes but to devote themselves to an occupation which would lend charm to the drawing room, that these students found strumming the instruments a delightful pastime.

THIS picture shows that Chester Lloyd Jones was once a college boy himself. It is rumored that university life was more than lectures for this handsome lady-killer.

HERE is George Clark Sellery, obviously the scholar. But those who know him say he is a real scout who likes his beer and egg sandwiches on Sunday nights.

DERHAPS the library (Music Hall) meant business to those boys, but it really looks too good to be true. Photographers were great posers in those days. But that can't explain the popularity of the place. It surpasses Bascom reading room. Maybe students campaigned for more books on reserve and better ventilation. At any rate, the ladies were not an annoying factor in those days. They acted in the capacity of librarians who didn't hound the boys with "Your fee card, please."

Fizz Boom Ah Fizz Boom Ah Mighty Ninety, Rah, Rah, Rah!

This is the yell that cheered the Badger team twelve years before, but it was probably fixed up to suit the interests of '02. At any rate, Wisconsin's red and white Zebras were fast men who swept their opponents off their feet or confused them with their stripes. The football trousers also add to their strange appearance.

 \bigcirc H, the tragedy of it all! The plight of poor Sophie causes the heart to miss at least one beat, and Percy's desperate look touches the audience deeply. For the theater-goer delighted in shedding many a tear in those days, and really did not feel the performance a success unless he could share in the joys and tribulations of the hero and shake his fist at the villain. The sophisticated audience of Bascom is a modern achieve-And not much of an ment. achievement at that!

HERE are two of Wisconsin's farmers giving a fine cow an eye, ear, nose and throat examination.

Time was when the stock pavilion confined itself to "stock pavilioning" and left the gentle art of "concerting" to better hands.

Since those days the applause of students has been added to the moos of cows.

THIS is one of the pic-tures most cherished by the Ag school. It shows Wisconsin's renowned scientist, Stephen A. Babcock, demonstrating his cream separator to President Chamberlain and to William A. Henry, once dean of the School of Agriculture. The story goes that when he had perfected this wonderful instrument, Mr. Babcock rushed over to the house of Mr. Van Hise, who was President at that time, and got him out of bed to look at it.

The cream separator was on view in the writing room at the Union last fall. Probably farmers wouldn't recognize this crude looking affair, yet it is in substance all that the subsequent separators have been. Chromium plate and electricity only add to the value of this original achievement.

YOU couldn't mistake this for anyone other than Scotty, embryo disciplinarian. But don't forget, he has his beer and billiards in the Rathskeller every noon.

PROF. OTTO was the smoothest dresser in his graduating class. Notice the jeweled tie pin.

The other gentleman, Friedrich Bruns, is at present a German professor who can't decide what the score is in his native land.

THE last Houseparty Prom was held in the gymnasium in 1913. Ah, the glorious informality of it all! Where was King Al Tormey and his lovely queen?

Flowers are conspicuous by their absence and dresses by their presence. It looks as though the boys ganged up to see that their ladies didn't get any corsages. However, it was the day for decoration. The gym was completely transformed. Rafters were shrouded and canopies hung over the boxes. Notice the chandeliers (lights were still in vogue in 1913). Couples were discret and chaperons on their feet in those enviable days.

IT looks like the same boat that the Alpha Gams rowed when they copped the sorority crew championship from the Kappas a year ago. Wonder if "Dad" Vail took as much interest in these girls as Ralph Hunn has taken in his proteges?

HEN four blasts sounded the Main Hall alarm, Miss Alice King, now of the employment office, was in a class. She startled her instructor by announcing that the building was on fire. The combined efforts of students and firemen failed to save this old landmark. The University considered replacing it with an iron tower which had been on the old capitol. But the plan was given up and our Bascom Hall had to go domeless.

IN the nineties the upper campus was the scene of many a bloody baseball game. By the eager expressions on their faces it is easy to see that the girls loved the game. This was a real field day, and everyone was prettily dressed in white for the occasion.

SOME students flippantly asked if the gentlemen in the picture were tossing pennies. Although Dean Russell's position might suggest this, it is nothing of the sort.

The picture is highly prized by the University. The five men were all prominent University figures, and Dean Russell is still an important person in the Ag school. Here we have Presidents Van Hise and Chamberlain; H. L. Russell and Wm. A. Henry, each dean of the Ag school at some time; and on the extreme right, Stephen A. Babcock. The occasion was the silver anniversary of the invention of the Babcock Tester, which determines the butter fat content in milk.

IT's 1918. Many students are giving up their careers and starting for the Front. Perhaps they think it means adventure. The light in Lucy's eyes shows she feels it's serious business. The noise of the station before the train pulls out helps Lucy bid a sad farewell and wait "Till Johnny Comes Home Again."

BE THIS MEMORIAL

CYRIL C. DUCKWORTH

MEETING a fate no less tragic than the destiny of any character he so masterfully played on the Wisconsin Theatre stage, Cyril C. Duckworth was taken by an untimely death during the Christmas holidays.

It was Wisconsin's good fortune that Cyril Duckworth, after a career on the legitimate state, decided that he should contribute his talents toward the advancement of the Wisconsin Theatre. No roles were too difficult for his versatile artistry. His characterizations in "Anthony and Cleopatra," "Peter Pan," "Fashion," "A Kiss for Cinderella," "Paola and Francesca," and "Behold This Dreamer," were evidences of his professional skill.

To perpetuate the memory of one of the finest actors appearing on the Wisconsin stage, a plaque dedicated to him will be placed in Bascom Hall, financed by the proceeds from the play "The Vinegar Tree," presented by his late associates in April.

KENNETH J. WHEELER

KENNETH JENSEN WHEELER, whose untimely death occurred only a few weeks after the tragic passing of Cyril Duckworth, possessed a personal vitality that greatly exceeded his physical resources.

Ken won the admiration of faculty and students alike as a man who could be trusted with responsibility, as one whose enthusiasm was reinforced with lofty ideals. This tenacious earnestness to carry every responsibility to a successful conclusion, undoubtedly contributed materially toward his final breakdown.

Prominent in campus activities, Ken was a member of the Union Board, of which he later became vice-president, Orientation Week Chairman in 1933, Union Forum Committee Chairman, and Elections Chairman. Almost any one who knew him predicted a promising career in life. In Ken's personality were the ingredients that go toward success.

Another Year

A Subjective Chronicle of Events Which Took Place During the School Year 1934-1935

INVESTIGATIONS . . . keynote of the school year 1934-35.

Were you investigated? If not, you must have felt neglected. Communism, atheism, and perversionism . . . the legislature's own words . . . were investigated, as were numerous other facets of the university . . . Frank Klode and Gordon Armbruster and their manipulations before the senior class elections . . . Union Board and its infamous caucus . . . fraternity rushing . . . the Prom Kingnaping . . . practically everyone and everything . . .

You were variously occupied with the progress of the boxing team, your FERA job, getting an education, or the Class Struggle, but you, too, felt the influence of the investigations in progress. Possibly, just possibly, you read the Cardinal and learned about it there. Perhaps you picked it up between classes while smoking a cigarette on Bascom Hall steps, or maybe it drifted over from the next booth while you waited for your beer at Lohmaier's . . .

"Dudley claims that Klode . . ."

"Brunette? Well, I know a guy from Green Bay and he says that . . ."

"Weisel and Schilling . . ."

"Beyer and Krueger . . . and Corey . . . "

"Hearst . . ."

"Phi Delts . . . exceptional men . . ." "Snell . . ."

Even Pat O'Dea was investigated. So was the 1935 Badger, but that's another story. Investigations . . . a keynote . . . an epidemic!

Mail Order

"Fraternities are dirty rushers. Sororities are cleaner rushers. Sororities have preferential rushing. Therefore fraternities should install the mail order system."

This was the general tone if not the actual words with which the interfraternity board submitted directed rushing for its first trial last fall. The results: fewer pledges, greater complication, charges of chiselling.

In the good old days, when Barlow Weems, freshman, reached Madison he had dinner at a couple of houses and chose one. He was then given (a) a trip to Paratore's, (b) a pledge pin, and (c) immediate and effective instruction in the lowly position of a mere pledge. All of which made him a prospective brother in case he should ever make his grades.

But things are no longer thus. Indeed, no. Now Barlow is given a constant round of gaiety and dinners (tickets on sale in Dean Goodnight's office. Price, forty-five cents). And Barlow is ready to embark on the dizzy whirl which is to make of him a fraternity man. Ah, yes.

Undoubtedly the practices which the board was trying to eliminate, were present. Undoubtedly the evils still went on, plus red tape which seemed far too cumbersome. For, when the house is trying to get that halfback from Dubuque before the Phi Psi's do, it is easy to overstep. And the only crime is getting caught.

Revisions to the rules, which yielded only 250 pledges in the regulated rushing period, were immediately sought. Complaints were studied and adjustments made with a view to simplifying the system and at the same time gathering more freshmen.

As an example, fraternities are not to be allowed to get dates for their prospective brethren, a rule which will make it unnecessary for the lads to explain to all their girls that what their rushees want are little blondes with builds. Cider and doughnuts will be the stipulated refreshments in after-dinner rushing functions, with the ever-present budget in view.

But the best of all revisions, the houses agree, is the one which rules that evening rushing shall end at 10 p. m. rather than 11, as before. The reason? So that the chapters will not be nervous wrecks bebefore the week is up.

Immediately after the disappointing rushing period, all houses went after pledges to make up for the delay—on an unrestricted basis.

Seen and Sung

About this time some of the movies we saw were "Little Miss Marker," Mae West's "Belle of the Nineties," "The Thin Man," "The Scarlet Empress," and "The Affairs of Cellini."

As we lounged down the hill after our two-thirties, we were whistling "Needle in a Haystack," "You Fit into the Picture," "Honeymoon Hotel." We dropped everything when Ben Bernie and Frank Prince (Prinz to Wisconsin) went to work on "It's Dark on Observatory Hill." And we helped the band with the doleful story of "The Man on the Flying Trapeze."

Horse Trading I

One explosion, two fizzles.

That was the score of the class elections held October 31. The explosion was the Klode-Dudley imbroglio, culminating in Klode's trial on charges of "bribery and misconduct" and followed by an anticlimax election which Klode won overwhelmingly. The fizzles were the junior and sophomore elections, which were never held.

The spectacle of a candidate for leadership of the graduating class on trial for bribery was a rare one in the big sideshow to football. But it was not as unusual as the decisions reached in the two lower classes. Dick Brazeau, Psi U, staged a show of strength and backed Emmett Tabat, his S. A. E. opponent, into a state of content with second place in the junior directorate. Joe Brooks, lanky Phi Delt, did exactly the same thing with Theta Chi's George Cassady in the sophomore election.

Politicians on both sides of each of these exchanges expressed themselves as satis-

This is part of the gracious reception committee at the First Wisconsin Salon of Art held in our own Union. Reading from left to right: Dean of Women Greeley, Mrs. M. S. Slaughter, Mrs. Wellwood Nesbitt, and Mrs. Oskar Hagen, wife of the professor of art history.

fied with the outcome. Neither of the losers, it seemed, expected to win anything more than second, while neither of the winners wanted to go through the hurly-burly of a campaign.

Cassady, however, showed himself a man of practical considerations. He expected a refund of his registration fee, it seemed, and five dollars was five dollars.

"If I had known I wouldn't get my money back, I would have made the run," he grumbled.

The marked apathy exhibited in the two classes caused a general protest against the Steven plan, which dictates that three directors are to be the class officers, with one carrying over into the second year. However, a referendum favoring its abolishment was defeated in the spring election.

But the senior class election was a sweetheart. Eight men nominated themselves; six of these found scholastic difficulties, were ruled out by the elections board, or made their deals and ceded their support to their survivors. Two lasted to the end; these were the first and the last to enter the lists.

Frank Klode vs. Bob Dudley. The old line machine vs. an uncertain number of Greek letter organizations. The fraternities scrapping it out while the barbarians wondered just what had happened to Gordon Armbruster, the independent white hope.

Klode was the first man in the field, and he took on all comers. Eddie Wilkie was unwilling to drop a sure Forensics Board job for a possible chance against the Chi Psi candidate. John Lehigh—or was it Dean Goodnight?—found himself to be a junior after all. Herman Teufel found the going a little tough. Marvin Peterson pulled out for political reasons. Bob Blauner withdrew to further the independent chances as personified by Armbruster. And Armbruster . . . So Dudley was Klode's only opponent.

Undoubtedly, offers were extended and received. Blauner hinted to his friends

The sight of Gertrude Stein (right) and her faithful secretary, Alice B. Toklas is sufficient to bring to mind her campus stay, and to set us off writing: Though today is today, it is still yesterday's tomorrow which in short is tomorrow's yesterday. This is all to show that while today . . . we had better quit right here.

that his brief candidacy had not been a net loss. And then there was this Armbruster business.

Dudley claimed that Klode offered to repay Armbruster's registration fee (ten dollars), for a withdrawal and the customary statement. Wilson Weisel and Bill Schilling, Union Board tycoons, backed Dudley, a Phi Psi and a previous political ally. They had heard a phone call in which Armbruster gave evidence which seemed highly damaging to Klode, but found that the justices—three senior lawyers—considered it mere hearsay and all but threw it out of court.

Klode won the trial. At least, he was not dropped from the ballot, which would have meant the automatic election of Dudley. But the tribunal intimated that its decision was made on technical grounds and that there was something behind the whole case which needed explaining.

Election was the next day. Undisturbed by the half-revelations made during the hearings, the Klode machine (a minority which was sure to cast its ballots), rolled to the polls. The Dudley contingent worked to get out the vote, but the air of general political listlessness induced by the junior and sophomore compromises killed the interest of the independents, who would be most affected by the hints of scandal. 301 votes were cast, of which Adolf Hitler, a dark horse, got one.

Klode won, 192–108.

Legend

"All that remains is the glorious legend of one of the greatest athletes this campus has ever seen."

This statement, written of Pat O'Dea for the 1934 Badger, was true a year ago. Today it is false.

The look on Glenn Frank's face is a manifestation of sentiment which we find impossible to explain; equally impossible is the chore of rationalizing on the height and form of the Carillon Bell Tower which Prexy is shown dedicating on a cold and windy day. Our sole hope is that it may never be perverted to the ends Octopus and campus humorists have suggested. Patrick John O'Dea, the lithe Australian whose feats were the crowning touch of the heydey of Wisconsin football, was a name. He was a name spoken by alumni orators at football banquets. He was someone you heard about in Morgan's on Homecoming morning. He was a "glorious legend."

But Pat O'Dea now lives. He came back to Wisconsin last fall and was the center of a genuinely enthusiastic Homecoming. He spent ten days on the University campus, addressed 6,000 persons in the biggest mass meeting in years, saw Allan Mahnke, sophomore center, snare a juggled Illinois pass and lumber twenty yards to a 7-3 victory.

Pat, you see, had been dead. All trace of the Kangaroo Kicker was lost in 1918, and the general theory was that he had joined an Australian regiment and lost his life somewhere in France. So when he came out of the obscurity of a smalltown business man, who had not wished to be an ex-hero, there was natural doubt and then widespread demand to see the man who could curve a football as pitchers curve a baseball and hit a five-yard target at eighty yards.

Most of us expressed our disbelief. Pat's own brother, Andy, who once coached the Wisconsin crew, declared that this could not be his brother. But confirmation arrived. Yellowed newspaper clipping books, old photographs, and snapshots of the Pat of today proved that this was indeed the man. Then he came home.

Wisconsin tradition, which students complacently agreed was dead and gone, burst forth again. The old tales which Wisconsin men had cherished were brought forth and retold with added vigor. There was the story of the berry-crate crew, which will always represent the fate which has dogged the Badger sweeps on the Hudson. There was the story of the police force refusing to honor Prexy Charles Van Hise's check for bail for a group of students. There was the story of how Dad Morgan then raised the amount necessary to save Madison the expense of

United States Senator Gerald P. Nye appeared in the Union late in the fall to volunteer inside information on the armaments industry and to say a good word for the LaFollette boys. Shown here are Roger Hagen, William Nathenson, Senator Nye, Charles Mills and John Cramer.

a new jail by releasing the celebrants before they could take the old one to pieces. And there was the story of Pat O'Dea.

To the generations of Wisconsin men raised in the O'Dea tradition, his return was a dream come true. Long years of conjecture and hazy hope were culminated in his return, and the Wisconsin tribe came back to welcome him.

The saga of Pat O'Dea has been told and retold. The accounts of fabulous drop-kicks and unbelievable punts have been dug out of the record books and checked against the newspaper files. They have taken on new meaning with Pat's return.

Pat O'Dea returned from the dead. The University realized that it could not repay the treasure he has created for her, but those who bade him welcome demonstrated the meaning of the Pat O'Dea legend. Wisconsin has found him after an absence of over a third of a century.

She will not willingly lose track of him again.

Protest I

Bearing placards and blazing torches and shouting "Down with War," 500 students trudged up Langdon Street around the capitol square, and hiked back to the lower campus in one of the first public demonstrations fostered by the student anti-war committee on the eve of Armistice Day.

Whipped by a chilling wind off Lake Mendota, the group there held a mass meeting which was all the more impressive because of the bizarre and fitful light of the torches.

But the parade was the thing which drew the most interest. Containing leaders in liberal organizations and representatives of almost every student religious center on the campus, it showed the hold which opposition to war had already taken upon the mass thought of the student body.

Prizes, donated by the Inter-Church Council, were given the floats of Ochsner House of Tripp Hall, Theta Xi, and

Wesley Foundation. A grotesque sidelight to the whole affair was the announcement that the fifteen dollars awarded to Ochsner would be used for a beer party.

"You will not be so readily duped as we were before you," the Rev. Alfred Swan of the First Congregational Church prophesied at the lower campus meeting, and observers agreed that the continuance of the opposition to war might have lasting effects.

By mass votes the assembly went on record as favoring the abolition of R. O. T. C. and expressing its agreement with anti-war leaders on other campuses.

The first of the local movements to emotionalize the opposition to war, the fall movement failed to draw the fire which was directed against the spring strike.

Coup

So they kidnaped Dick Brazeau.

While we hold an unqualified belief that it would be a fine thing if all Prom Kings were kidnaped and kidnaped permanently, it is hard not to condemn the group of college boys who engineered what they frankly expected to be one of the biggest coups of all time.

In the first place, few and far between were those who were willing to believe that the abduction was the McCoy. On the surface it was an ideal publicity gag, and Brazeau's promise of "something unusual" in an advertisement the day before didn't help his case any.

Secondly, it was decidedly poor policy for the five fraternity brothers and three pre-election henchmen to take a chance on splitting one of the strongest political machines of recent years for the sake of (their own words) "the combination of publicity and the pleasure of the prank" Incidentally, crack the machine they did, although the exact extent of the damage will not be apparent until next fall's election.

And in the third place, it was a damn fool thing to do.

The immediate result of the whole affair was a short period of wonder for most of the dancers at Pre-Prom and a subject for beer parlor discussions for the next two or three days. The purpose of the event, the kidnappers claimed later, was to publicize Prom, but little help came of it. In fact, the consensus was that it was one of the causes of the first financial loss a Prom has suffered in the present college generation.

Virginia Wheary, Brazeau's Queen, was escorted by one of his friends, as custom dictates. In this case it was Jock Ryan, who later appeared as a man of the hour in freshman elections. And Miss Wheary, in the face of an unprecedented situation, took the whole thing with chin up.

When Brazeau called the Union after he was released, about 11:00, Ryan, Harvey Leiser, the Queen and assorted other allies dashed out to his apartment, where the King held court. Demonstrating a broken derby, torn shoes, and a slight scratch on his cheek, Brazeau told his story amid the tenseness proper to the tale of a ruler of men telling his tale of subjugation by overwhelming odds. Thus far, fine.

But the next morning things started to crop up. An unconfirmed rumor of someone asking Cardinal Editor Bernhard (a fraternity brother of the injured party), what the paper's attitude would be toward such an event. An unconfirmed rumor of political animosities that had flared again. An unconfirmed rumor of possible legal action by Brazeau's family, and through it all, unveiled charges of "Fake!"

And the charges still stand in some quarters. Although eight men have confessed their parts in the crime, although two of them wrote an "expose" for the Octopus which exposed little, but provided valuable instruction in the technic of kidnapping, although Brazeau and Dean Scott H. Goodnight have both announced that they considered the affair closed, there are still rumblings.

And Prom lost money.

Stuff

Breakfast literary clubs all over the campus were revived with the rebirth of the Cardinal's famous "Rambler," under the more innocuous nom de plume of the "Trouble Shooter;" but the only thing it shot was the well known stuff, such as a day by day report of the status of the Dick Tinkham-Helen Savage relations. Its scoops consisted of pin hangings while its moral crusade centered around the failure of certain houses to abide by W.S. G. A. curfew rules and the presence of women in the Rathskeller. Because Chuck Bernhard checked the column daily, there were no reports of indignant parents yanking their children out of school, but despite its scandal-purged complexion people read it.

The Literary Digest figures showed that Wisconsin students voted 8 to 1 against participation in an aggressive war and 4 to 1 in favor of taking part in a defensive war.

Champs

With one of the best teams in recent years, Coach Foster's Badger cagers continued to pack 'em into the field house. 8,735 fans, an all-time record, watched the Badgers take Indiana in an overtime game. As the season progressed, the Badgers became tough, and despite a bad early start, the boys were right up in there in the stretch. Playing sensational ball, the Cards invaded LaFayette to play the game that might give them the first undisputed championship since way back. Some sport writers, after Wisconsin had hit its stride, thought only a cataclysm could keep the Wisconsin cagers from a championship and at Purdue that was just what happened. Coach Foster's men went completely to pieces, the score . . . well, it isn't even worth remembering.

"Unholy"

A doldrum period in the campus merrygo-round ended when four members of the Union Board charged a group of their colleagues on the board, whom they termed "the unholy five," with railroading a hand-picked candidate into a vacancy on the body. Details of the caucus, charged by the insurgents to be a negation of student democracy, and their subsequent resignations, furnished the Cardinal with a banner-headline story. Strangely, the resignations were never filed with the board, and after a "clarification" by the accused, the rebels returned to the august board.

This interview scene was repeated scores of times during the week that Miss Florence Jackson (left) of Wellesley College, and president of the national committee of bureaus of occupation visited the campus. Hailed nationwide as a vocational adviser for women, Miss Jackson was busy giving lectures, interviews, and conferences to interested students.

Horse Trading II

With the Union Board schism repaired, the campus focused its attention on the annual spring elections. Seven important campus posts, including that of Junior member of the Union Board, went by default. Mavis Lyons, winning a position on the freshman directorate became the first woman to hold such a campus political post in many years. In the W. S. G. A. elections, the same apathy was apparent as four out of nine positions went to those claiming them.

Despite a comparatively quiet election campaign, the spring election polled more ballots than any contest in two years, and the steady march of independents into positions formerly controlled by Greeks continued.

After a heated campaign to win the chairmanship of the Freshman directorate, Bob McCloskey found himself a man without a position. After faculty financial advisors had decided to merge the Frosh Frolic and Soph Shuffle, Joe Brooks, leader of the Sophomore directorate, decided leading the hop wasn't such a big job and that he could handle most of the work himself.

Jock Ryan, patronage dispenser for the McCloskey machine, protested vehemently and threatened to withdraw Freshman support of the dance. Finally, the freshmen were taken into joint sponsorship of the dance, but occurring only a week before Military Ball, it hardly drew a corporal's guard.

Brooks didn't only cross up the frosh; he even wolved on one of his best pals, Don Heun, a colleague on the directorate. Brooks conferred the honor of queen on Huen's girl friend, Martha Jackson, who was queen of the Frosh Frolic the year before. Who knows but what some sentimental minded Prom King next year will ask Miss Jackson to be his company during the hours of the Promenade?

More Stuff

A small-pox epidemic in the city of Madison caused many co-eds to wonder how they could attend the formal Interfraternity Ball without displaying vaccination scars. Although not a single case was reported on the campus, the student body marched out to the infirmary en masse for inoculations.

The ravages of the small-pox epidemic didn't invade the campus, so the Interfraternity Ball was held and a goodly portion of the crowd reported a tolerably interesting time, the entertainment consisting of the presentation of the 1935 Badger's most eligible bachelors (or at least the announcement of them; there's still a few modest men left on the campus), good music by Dell Coon, and other bits including an extemporaneous terpsichorean exhibition by a member of one of the campus's top rung sororities.

Laurels just came too fast for Gilly McDonald and Chub Poser. After being selected by campus co-eds as "eligible bachelors," both won all-conference basketball honors on the majority of the all-star teams.

Never a year passes that some Daily Cardinal columnist doesn't get himself into a maelstrom of something or other. Edward Hale in "Huffs and Puffs" insinuated that the council room of the Union was so infested with a peculiar species of screwy individuals that the average student didn't care to have his out-of-town visitor visit the beautiful edifice. For some tine after, the Readers' Say-So column of the Cardinal was glutted with protestations from the apostles of tolerance.

When the storm of resentment from certain quarters over Hale's article had subsided, the invective was transferred to Prof. Russo, who was alleged to have said "There is no greater pest than the International Jew" in a moment of emotion during a forum on modern dictatorships at the Union.

Control

Following on the heels of difficulties at the University of Iowa, the Interfraternity Board, after relaxing from the strenuous effects of their annual ball, took steps to put Hell Week under control, in order to prevent indiscretions that might harm the good name of the university. (At that time of the year it still had one.)

By laying down three rules, the board hoped to eliminate the possibility of Hell Week atrocities. The edict asked for limitation of Hell Week activities to 24 hours, restricting them to the confines of fraternity houses, and the replacing of humiliating tasks and unreasonable regimentation with constructive activities.

Most of the fraternities accepted the new rules, but Jim Neller, of the D. U.'s appeared at a protest meeting to declare that Hell Week was a source of enrichment to neophytes, and backed up by a number of other fraternities, succeeded in getting a revision of the rules.

So with the revision of the rules, neophytes will still have to search Camp Randall Stadium for 1916 pennies. The quest will be permitted, but fraternities will be required to furnish the board with a report of the proposed itinerary. The board also took the humane step of suggesting that all paddling be done by one man whom they desired to call the "freshman trainer."

Brains, Feuds

Coach Tom Jones' indoor track squad helped to prove that brains and brawn are often tenable. Finishing the season undefeated, Jones' lads displayed similar skill in the classroom, compiling a B aggregate average for the squad of forty.

Like investigations and weather, the annual feuds between lawyers and engineers are here to stay. During the last days in March, Letters and Scientists plodding their way up to Bascom Hall for their eight o'clocks found the usual residue of barnyard debris, plumbing equipment, and tissue littering up the facades of both the Law and Engineering buildings.

Victor Pape, despite his sleek, lawyerlike appearance, was elected St. Pat of the engineers and for all the ballyhoo concerning the parade, the procession was only an

With two unmarred records, one of winning all of his year's matches, and the other of never having his smooth, black hair ruffled in the bitterest of contests, Gordon Harmon well exemplifies the clean-cut but vicious gentlemen who performed so creditably in the squared circle for Wisconsin.

abbreviated version of those of former years.

Protest II

One of the amusing dramas enacted each year on this campus is the war between the anti-war advocates and those who insist that preparedness is the best guarantee of peace. This year's drama was largely a struggle between the cohorts of Gordon Corey and William Harrison Haight, Jr. The campus is still wondering who won. The Corey forces claimed the decision with an attendance of a thousand at their anti-war meeting, while the Haight batallions were only able to enlist about twenty-five at their meeting. But Corey's show is over, while Haight still has his inning now and then around the senate chambers.

Like the grass, the pacifistic spirit of

the Anti-war committee grew greener with the spring days. Backed by almost every campus organization but the Kappa Betes, the committee petitioned President Glenn Frank to call a convocation on April 12, the day of the nationwide student strike against war. About a week later, President Frank's official statement declared that the calling of a convocation to espouse the platform of a single group would be inimical to the non-partisan spirit of the university.

Undaunted by the failure to receive official sanction, the committee held its anti-war meeting on April 12, before a goodly crowd in Music Hall. By some queer form of mathematics, the Daily Cardinal reporter "estimated" that 29.8 per cent of all students had cut their eleven o'clocks, while only 11.3 per cent of the student body attended the Music Hall meeting. About twenty-five students, satisfied with the present set-up, attended the Haight-Schubring show at the Union. An unusual phase of the strike campaign was the devoutly pacifistic Daily Cardinal's refusal to sanction the strike on the grounds that its aims were not compatible with the platform of the National Student League, who helped to back the strike. It was no wonder that Editor Bernhard was lampooned in the proletarian skits presented at the May Day celebration of the L. I. D. and N. S. L. a few weeks later.

Sabers and Sables

Although the pernicious anti-war sentiment was penetrating into the remotest recesses of the campus, the military department risked the chance of holding its annual military ball.

The military department may not have an ideology, but if it must be a tribute to military efficiency, the Military Ball proved the most well-managed dress-up affair the campus has witnessed in some time.

Faculty financial advisors claim that the comp racket will eventually ruin every

The posters, and possibly the figures, tell this story so well as to bar repetition. While we understand nothing came of the court action, the Cardinal, the Hotel Loraine, the L. I. D. and N. S. L., and "Green Pastures" got free publicity, and we got this picture. This must be an example of the Share-the-Wealth propaganda.

large campus dance unless steps are not taken to curb it. A student officer could have sworn to even participate in an aggressive war, but even that would not bring a comp from the tight-fisted heads of the military department.

The comps issued even to the higher-ups in the corps were notoriously few. Happening only a few days before the regular government stipend arrived, a number of the officers had to have it "put on the cuff," and with the same military efficiency the department did not fail to garnishee their cadets' wages when the time came.

Unlike our prom king, Chairman Harvey Bent really kept the campus guessing over his choice of honorary cadet colonel. He had been seen more than infrequently with a blonde freshman from the Theta House (we won't call the place what the Trouble Shooter does) and when the announcement was made, even those supposedly in the know were surprised to find the choice was one of the elder Thetas, Agnes Ricks. Lest one insinuate sorority politics, it must be said that Harvey hung his pin on Miss Ricks the day after the ball.

Dividends

Wisconsin is often credited with taking the lead in the advancement of many movements, but the athletic department is reaping the fruits of an experiment all its own. The experiment, the establishment of boxing as an intercollegiate sport, has grown in popularity so fast that it has exceeded the fondest expectations of its sponsors. The lion's share of the credit for this very successful venture must go to George Downer, athletic publicity director, whose foresight and business acumen makes him a valuable asset to the department.

Not only in three years has the "brain child" of George Downer provided the campus with a new form of entertainment, but he has also built up a sport that pays astonishing dividends. The game has not only paid for itself, but has helped to finance other branches of the department to a considerable extent.

Striking mirrors of student thought, at least of the Engineers, are the floats in the annual St. Pat parade. This one perhaps reflects campus disgust with student politicians and a desire for a campus Hitler to run the student community. We hesitate to agree with their devastating proposal.

On April first, 9,100 boxing fans jammed their way into the University field house to set a high-water mark for attendance at any indoor event here and to see likable Johnny Walsh's boxers strengthen their claim to a mythical national championship by defeating the West Virginia mountaineers.

Good Word

However, the brain child of another member of the athletic department didn't fare so well. Dr. Walter E. Meanwell proposed that the university adopt a compulsory fee of \$5 which not only would admit every student to any athletic event, but would also stabilize the finances of the athletic department.

Meanwell submitted the proposal to the student body with the stipulation that it would not be adopted unless there was 75% assent. A majority favored the plan, through a vote taken by the House Presidents' Council and W. S. G. A., but it fell short of the three-quarters total, and the Doctor is a man of his word. The plan was dropped.

Herbert Terwilliger, early in April succeeded William O. Schilling, Jr., as president of the Union Board, and since seven of the nine new members earning positions on the board this spring are affiliated, Terwilliger ought to have smoother sailing than did his predecessor, who just couldn't seem to satisfy the independent faction within the group.

The practice of conferring the traditional "red derby" to some one on the campus was revived at the Gridiron Banquet in April when Sigma Delta Chi bestowed the coveted honor on Prof. John D. Hicks, one of the more popular members of the History department.

Although Sigma Delta Chi was unable to secure a top-notch speaker, as in former years, the skits under the direction of Gerald Beznor and Rusty Lane were of high order. The practice of rewarding two outstanding editors each year was established this year by the fraternity.

Plaudits

Although Madison was visited with a blizzard on May 3, Coach Ralph Hunn's Badger crew got its shell into Lake Mendota considerably earlier than in any recent year.

To us, until this year, the crew was something amusing. Every spring day we could hear the resounding commands of the coxie, "Stroke . . . stroke . . . stroke" cover the waterfront, but nary an opportunity we had to see the much-exercised boys appear in an honest-to-goodness race. We understand that the athletic department has rectified this little annoyance this year, and once more the persistent Badger oarsmen will be able to receive the plaudits of the multitudes on their native shores.

A survey made by the W. A. A. in the middle of April, solved a problem that had been perplexing us for a long time. Statistics have shown that men outnumber women here roughly 2 to 1, and we often wondered how there were enough women to go around. When the survey revealed that the Wisconsin co-ed had an average of almost four dates a week, we suddenly realized that the "forsaken third" had to be content with maybe Wednesday and Sunday dates.

The realization that occasional Bascom theatre productions might hold their own with the average legitimate show came to us when we saw "The Vinegar Tree," including such stars as Rusty Lane, Marjorie Muehl, and Vivian Merrill, sponsored as a benefit performance in honor of the late Cyril C. Duckworth.

Letters and Eggs

Following in the footsteps of Samuel Rogers, Mark Schorer, one of the younger staff members in the English department, had his novel "A House Too Old" published by a New York house. On the subject of literati, Bill Harley was offered the editorship of Octopus, contingent upon his re-entry into school next fall . . . which gives Wisconsin another tradition.

Haresfoot went into its 37th year, minus its old slogan "All our girls are men: yet everyone's a lady" and carrying a new one, "This Year's Show Is a Different Show." The present production discarded female impersonations and the change was apparently welcomed by the majority of Haresfoot fans. "Break the News," written by Mel Adams and Howard Teichman, proved to be a fast-moving show with plenty of variety; in fact, many critics were moved to say it was the best since "It's A Gay Life" of five years ago.

All the glamour of a Hollywood premiere was brought to Madison, when Haresfoot officials opened their home appearance a la Grauman. As they entered the theatre, community and university notables were introduced over radio by Gordy Swarthout, former Haresfooter whose claim to fame was his writing of the lyrics of the immortal Haresfoot tune "Can't Help Loving You." But, nevertheless, eggs flew at the opening.

Rex Karney took over the reins of the Cardinal early in May, succeeding Chuck Bernhard as the center of all campus controversies. Jay Tompkins was appointed business manager for another year.

The Blood Purge

Introducing, Ladies and Gentlemen, the State Senate's Annual Three-Ring (ircus of Muck Raking

THERE was something rotten at the University of Wisconsin. Whenever a list of radical schools was published, there was the Cardinal flag of our Alma Mater heading the list. Of course, this university was the same one which was rated as one of the best educational institutions of the nation, but what of that?

The Wisconsin State Senate, that august body of lawmakers, is composed of clean, upright men. They are, supposedly, all Boy Scout leaders and Sunday School teachers in private life, and their souls are marvels of spotless white. They view with undisguised alarm the iniquities of the younger generation.

It all started, it seems, when Wisconsin was placed upon a list of the ten "most red" universities of the country. Representative Hamilton Fish hurled the charges and started the red-baiting bees buzzing in legislative bonnets. Wisconsin's senatorial bonnets seem well adapted to the activities of this particular species of insect, and the result was to be expected.

And so, with great fanfare and waving of flags, the crusade for moral and social uplift got under way. There were a number of minor matters such as the state budget, unemployment relief and the taxation program which had to be pushed aside for the time being to make way for this significant occasion, but then, who wants to pass a law when there's a possibility of finding out what "them Reds out at the U. are doing."

And they were right. Didn't the world's greatest newspaper say so? Didn't

that reporter from the Wisconsin News say so? Didn't the Sheboygan Press and the La Crosse Tribune say so? Well, then, let's go to it! Why not call all those lousy foreigners in and put 'em on the carpet. Why not take the whole school and drop it in Lake Mendota? Why not add Bascom Hill to the sister institution across the lake?

BUT the matter is not funny to those directly concerned. To the University it may well mean decreased enrollment and a slashed budget. To the student body and the faculty, it represents a reflection upon their character. The University has been placed in a very precarious position due to the actions of certain newspapers which have played up the sensational aspects of the case. And the end, at this writing, is not yet. What are some of the facts?

The committee found that there was little or no publicity in the exposure of thirty students of Red learnings at the University. The evidence as to the political coloring of even these thirty was inconclusive. Nor was the fact that a strong peace movement existed on the campus enough to give the investigators a banner headline in the state press. When Professor E. A. Ross told the committee the exact extent of Communist activities on the campus, he took the first step toward ending the probe. It seemed that Mr. Ross disappointed the committee by being too much of a red-blooded Ameri-The red hearing seemed to have can. changed into a red herring as Mr. Ross effectively squelched the charges. Asked by the committee at the end of his testimony as to whether or not he thought the investigation was justified, he struck a keynote of student opinion when he replied:

"The mere fact of investigation is condemnation. I had supposed that this committee was sure of its ground before it compromised the university before the eyes of the parents of this state. I had supposed that it had the actual testimony. But you have added weight and dignity to mere charges which have not been substantiated."

This done, and Dean Snell came upon the scene to reveal some breaches of the accepted convention at the Milwaukee Extension center. Here was something for the committee to look into, and look into it the committee did with all the gusto of a small boy prying up the biggest stones he can find expecting to find something awful and slimy underneath. The fact that the story concerned one or two faculty members at a separate institution was no bar; the extension division was under the University and the yellow press previewed the coming testimony with such tasty banner headlines as "U. W. Yacht Love" and "To Probe Free Love at U. W."

The best analysis, at this writing, seems to be that Dean Snell, feeling that he had been unfairly treated, decided to bring out testimony which would vindicate him in the eyes of the state. That by so doing he would permanently injure the University does not seem to have entered into his considerations.

THIS publication is not current enough in its appearance to pass upon reliability of the evidence thus far presented.

More of the story may have come out bebefore you read this. But of one thing we are sure: whatever may be said of the conduct of certain faculty members in the Milwaukee Extension and whatever may be said of any particular individual or small group of individuals in the University community of 8,000 students, the damning insinuations which have been leveled against the faculty and students are entirely without justification. The guilt for the crime against the University may be laid squarely in the lap of the yellow press and in the lap of the Senate investigators for making possible this sensational treatment of matter, in itself, of comparatively small import. If something is rotten, let's clean it up; but why all this ballyhoo?

This crucifixion of the University by self-seeking politicians has become almost an annual affair. The tragedy is that after dragging the University and everyone connected with it through the mud and slime of a thousand unfounded suspicions, the matter is left in a cloud of uncertainty. It is difficult to interpret such action as anything but a desire for personal publicity on the part of a few politically minded individuals.

One thing has been made clear by the whole affair. The University, if it wishes to protect its good name, must defend itself. When the matter came before the Senate, the newspapers, almost without exception, demanded a "thorough housecleaning," just as though the University were all that it was painted. Only the representatives of the student body and, more recently, the Alumni Association, have had the courage and sincerity to take their school's part.

In the face of steadily increasing opposition, it appears that the investigation will soon be a dead issue. But why was it ever started?

PUBLICATIONS . . .

The 1935 Badger

RICHARD S. BRIDGMAN

IF all the college yearbooks which have been published since 1885, the year the first Badger made its appearance, were stacked one on top of another, they would form an eternal monument to the sales methods of American printers and engravers; a monument which would make George Washington turn green with envy and fairly spin in his grave; a monument, perhaps, to the gullibility of the American college graduate.

We wish that some day an economics student might do a thesis to determine the correlation between the extensive use of gold leaf in college yearbooks during the last fifty years, and this nation's sudden departure from the gold standard in 1933. The history of college yearbooks is deeply

JOHN K. WOOD

obscured intons of gold leaf and imitation leather covers, but it could not be otherwise. Public opinion is the all-powerful dictator.

The 1935 Badger, like Topsy (or even a geranium), just grew. It is the illegitimate product of a union between Homer's *Iliad* and the story about the traveling salesman. The staff merely guided this growth, correcting congenital weaknesses, swearing at photographers over the telephone and writing nasty letters to paper salesmen. Have you ever edited a yearbook? It's a great little extra-curricular activity. Try it some morning if you find your eleven o'clock lecture unusually boring.

But we must treat our traditional institutions with due reverence and respect.

Fromer Allen Adams Greeley

ORRIN E. SWENSON

The Badger is, in all good faith, a significant and worth-while publication. Sometimes we think we are not fully enough appreciated by those who see merely the outward evidences of our attainments in the form of a big book with a flashy cover. Among the unsung services which our noble institution performs for the university community are (1) the granting of bronze, silver and even gold keys to industrious staff workers who must earn sorority activity points and might not otherwise be blessed with collegiate jewelry, (2) the management of occasional afternoon teas (without benefit of tea) for socially inclined Pi Phis and A. O. Pis, and (3) the furnishing of office space for the Interfraternity Ball Committee. Thus our existence during the months from September to March is not entirely futile.

During the latter part of March and the month of April, we seriously under-

GORDON C. MCNOWN

take the project of publication. The editor and his immediate associates set themselves methodically and conscienciously to the task of flunking out of college with varying degrees of success. Then the mountain gives birth to a mouse, and the red and gold monstrosity is enthusiastically foisted upon an expectant student body to the accompaniment of much shouting and speech making at the Badger banquet in the latter part of May. (Pos-

Parish Metz

BATZLE Eilenberger

sibly it will be June this year, or even July, but we hope not.)

Incidentally, we are using 100-pound paper this year. It makes you think you are getting more for your money. There are really no more pages in the book than last year, although there is a good deal more engraving because we think the Badger should be primarily a picture book. Two column lay-out is something of a departure from our traditional methods.

Page 142

There are one or two other things we wanted to call to your attention, but we probably won't think of them until the book is out. If there's anything you don't like, just write to your senator and we'll have a fine investigation. How about that cover?

The Daily Cardinal

CHARLES H. BERNHARD

THE modern conception of a public servant demands sincere and unselfish devotion to public interest. During the past year, The Daily Cardinal has tried to carry out this concept to a vigorous and intelligent conclusion.

There have been no "sacred cows" exempt from criticism. No outside individual group has been able to influence the editorial policy of the newspaper. Condemnation has been expressed where condemnation was thought due. But in every case, a proposed change or remedy has been put forth in an effort to be constructive.

In any discussion of the general policy of the Cardinal, the co-operative attitude which it has frequently exhibited should not be overlooked. Praise and support have been given to worthy projects and

W. JAY TOMPKINS

ideals without reference to former attitudes. The support given a sane athletic program is typical of this.

Naturally, in the pursuit of its objective policy of "the greatest good for the greatest number," the Cardinal has incurred the enmity of many selfish elements. This is an unfortunate but apparently unavoidable result. But we have kept faith with our ideals and with the student body, and such an attainment is purchased cheaply at this price.

In conclusion, The Daily Cardinal of this year leaves with the University a record of intellectual integrity, honesty of purpose, and sincere devotion to its welfare.

> CHARLES H. BERNHARD, Executive Editor.

Most Eligible

WISCONSIN'S "Most Eligible Bachelors" were selected by popular vote of Wisconsin women in a contest sponsored by the 1935 Badger during the early part of the second semester. The choice was based on personality, appearance, likeability or what have you. The selections were made public at the second annual Interfraternity Ball on March 8, and are herewith recorded for all posterity. Why did we hold this contest? Well, we were a bit bored with the usual type of beauty contest and thought the campus could stand a change. The campus survived.

This is just another example of how our great institution, The Wisconsin Badger, can, and will continue to serve the university community. We love to do little things like this, though the rewards are solely of the spirit. Such bountiful gestures seem fairly to leap from the kindness of our collective hearts. No one offered us any material remuneration to print the pictures on this page; in fact, were offered considerable sums of money by persons concerned if we would only promise not to print them. But high minded journalists that we are, we have consistently refused to be swayed by selfish motives and the pictures are herewith presented. May the Badger ever continue to serve you as a public minded institution. The Daily Cardinal, to the contrary notwithstanding.

Chuck Adair, a member of Phi Gamma Delta fraternity, is probably best known for his work with Haresfoot, of which organization he is president. He has taken part in Wisconsin Player's productions and during the past year officiated as master of ceremonies at 770 Club in Tripp Commons. He dates a lot . . . comes from Xenia (don't you like that name?), Ohio . . . majors in Political Science and Economics.

Gil McDonald was probably the most spectacular member of Wisconsin's Big Ten championship basketball team during the past season. The ample supply of black hair on his chest, so evident at basketball games and in the showers at the Sig Chi house, just in case you frequent the showers at the Sig Chi house, probably had something to do with Gil's selection. Gil was co-chairman of Interfraternity Ball, but missed his train out of Chicago, or something, and didn't get to the affair.

Chub Poser, whose real name is Rolf, was named on practically every all-conference basketball team to be selected this year. He, along with Sig Chi brother and co-bachelor McDonald, was one of the outstanding guards in the country. Better known for his scholarship in the Med school and for his athletic prowess than for his social philandering, he nevertheless seems to sway the feminine heart.

Class of 1936

FROM, the high light of the social life at Wisconsin, falling in the interim between semesters, eagerly anticipated, hopefully planned, and delightfully executed.

Breaking a long line of tradition, Prom, this year, was held on a Thursday night instead of the usual Friday. This startling change culminated a long series of band worries by the Prom committee. Although Ferde Grofe and Jess Hawkins were originally scheduled to lure the attending crowds onto the dance floor, the growing dissatisfaction of the student body over the choice, forced the chairman to contact Jan Garber, a national favorite, who unfortunately could only be present during the week, hence a Thursday Prom.

The Court of Honor again present this year, after its first inauguration, in 1934, was composed of Jane Greer, Marion Isaly, Ina Mary Frederici, Margaret Stedman, Katharine Halverson, Marion Bachhuber, Har-

VIRGINIA WHEARY

Page 153

riet Quall, and Bernice Butters, who filled Great Hall with beauty and charm. Maurice Freed, art editor of Esquire, made the selections.

King Dick Brazeau with his lovely lady, Queen Virginia Wheary, welcomed the attending couples who filled Great Hall to overflowing. Enchanting gowns framed against the sombre black of the men's clothes gave color and light to the occasion. The lilting strains of the year's most popular pieces gave rhythm and harmony to the affair. The large number of guests gravitating around the orchestra platform gave ample proof to the popularity of the orchestra choice, which after all, determines in great part the success of the affair.

No more attempts were made to kidnap the King as those so successfully planned at Pre-Prom. With that affair cleared up and the confession of its instigators readily given, the dance went on one of the most successful in many years.

On this page are a few informal shots taken at the big affair. In the upper left hand corner are Jay Tompkins and Edna Balsley. In the upper right hand corner are Tommy Smith and Rosemary Townley. Lower left shows Stan Johnson with Marion Lucas and lower right John Fish with "Pip" McKenzie.

LOIS SECHEVERELL

CARRYING on the tradition founded last year of entertaining both fathers and mothers at the university on the same weekend, the committee, with the help of the foundation last year, made the event a memorable one, adding many new attractions to the full program.

To increase a budget badly cut because of the persisting depression, the campus loyally came to the finance committee's support by buying tags on tag day. This financial aid gave the committee opportunity to elaborate the program with a water carnival, patterned on the idea of Venetian Night of past years. Held after the Interfraternity and Intersorority Sing, with members of the audience turning their chairs to the lake front, a colorful swimming exhibition was put on by the combined Dolphin clubs. Sinfonia, the men's music fraternity, its voices in harmonious singing.

The much-loved Senior Swing-out, dance drama, crew races, men's smoker in

ROBERT KASKA

the Rathskeller, and Banquet were not slighted, but held with full attendance. After the banquet, the fraternities, with the newly added sorority groups, serenaded the parents from the balcony of the Union. The weekend was a galaxy of colorful events thrilling to parent and student alike. Again the contacts committee functioned well, executing finely planned exhibits in the different schools and departments which the guests visited to view those projects their children were carrying on at the University.

Those in charge were: Lois Se Cheverell and Robert Kaska, General Chairmen; Elsie Lunde and John Lehigh, Program; Jane Greer and Robert Dudley, Banquet; Kathryn Narr and Edward Martin, Finance; Monica Clark and William Jones, Invitations; Mary E. Coleman and Rex Karney, Publicity; Alice Krug and Owen McDonald, Contacts.

Military Ball

April 5, 1935

HARVEY G. BENT

"There's something about a soldier . . ."

Military Ball, the R. O. T. C.'s annual contribution to the legend that there is something about a soldier, has one advantage which no other campus social event can present. Comparing it with Prom (and how the boys from the little red brick building on Langdon Street love to do just that), it has all that the junior class's part of the social calendar has.

Music? Decorations? Formal gowns? Military Ball has them all.

But the army has one thing no other group can have . . . uniforms. Brass buttons, shining sabers, gleaming leather boots, bright medals . . . these are the difference between a mere dance and glamour, and the cadets are ready to prove it.

While class dances from Frosh Frolic (now deceased) to Senior Ball have to struggle through the political entanglements of the unhappy soul who heads the group, Military Ball has a simple system of choosing committeemen and is under strict surveillance of the commandant of the post. The result is efficiency unheard of in other affairs.

Music, long one of the greatest problems, was solved this year before most of the campus had thought of the event which was held April 5, Freddie Martin, who was headlined, was contracted early in the season, with elimination of the uncertainty which left Prom-goers in the dark almost until the last minute.

Honorary Cadet Colonel Agnes Ricks, the guest of Captain Harvey Bent, led the parade through the arch of sabers in the grand march, one of the most colorful parts of the evening's ceremonies.

Decorations for the dance accentuated this motif. Flags, machine guns, and more flags were used in almost every room of the building, all of which was turned over to the military for the evening.

EXCITEMENT running high, enthusiasm running over, greater preparations made, bigger bonfires built, larger crowds anticipated, all out to greet the return of Wisconsin's long lost hero, Pat O'Dea, the greatest football player the school has ever boasted. After being lost from view for 35 years, the famous kicker came back to his alma Mater to be met by alumni who had traveled from all corners of the country to see him again. A huge bonfire throwing its red glare over a sea of upturned faces, the largest rally in years pressing around the library steps to hear their football idol encourage an oft-beaten team, creating in the students a swelling school spirit never before equalled. Saturday, a thrilled crowd, jamming every inch of the stadium, watching a fight-imbued Badger eleven defeat a highly rated Illinois squad.

Lawyers and engineers fighting over the chance to be O'Dea's guard of honor . . . buttons and tickets sold at the rate of a thousand a day . . . a great shortage of rooms for homecoming alumni . . . Bernie Cummings playing in the Union for a joyous crowd . . . hordes of alumni reminiscing about the good old days.

The greatest Homecoming Wisconsin's ever seen!

November 27, 1934

Orientation Week

September 14, 1934

ANALOYCE ELKINGTON

THE largest freshman class in five years poured into the city one week before school began to be assimilated into the routine and throb of the campus life by a staff of counselors directed by two general chairmen, Analoyce Elkington and Wilson Weisel. Under the guidance of these students, already a part of the college life, the incoming class is introduced to the campus, campus leaders and campus organizations. With the cooperation of the Y. W. C. A., Y. M. C. A. and W. S. G. A., luncheons, teas, and smokers for the new collegians, create a feeling of camaraderie and personal contact which is followed through the entire year until the class is thoroughly a part of the University.

Supplementing the usual run of activities offered to the novitiates, the chairmen instituted several novel ideas this year, adding greatly to the program. Under the supervision of the women's affairs committee, a fashion tea was held in Great Hall at which time co-eds modelled costumes suitable for all campus occasions. Under the charge of Miss Susan Bayliss, assistant dean of women, a series of vocational teas were given for the women.

WILSON WEISEL

These teas were divided into groups according to vocations, and those attending were given a brief survey of the fields they were about to enter, and told what would be demanded of them scholastically and personally to be successful in their chosen callings.

The advent into the social world is made via the Freshmen Mixer, a dateless dance, which winds up the week in a blaze of music and gaiety. Held at the Union, this dance is eagerly attended by Freshmen and carefully followed by upperclassmen. This last affair successfully launches the freshmen social season and gives the new students a brief but entirely satisfactory glimpse of what, socially, the college world holds.

Those assisting the two general chairmen were: Beth Black, Mary Bossort, Jean Campion, Katherine Narr, Katherine Niles, Harriet Oldenberg, Marylois Purdy, Mildred Quimby, Jane Read, Ethel Webster, James Booth, Karl Boedecker, Richard Brazeau, Franz Bidinger, Donald Griswold, Walter Hamburg, Edward Martin, David Phillips, Victor Schlitz, John Wadsworth.

Pan-Hellenic Ball

Cyril Barnett						Ľ	Decorations

TO the ladies, theirs to plan the dance, theirs to decide who the escorts will be, theirs to fire the first shot in the opening round of social activities for the year!

Each year, the co-eds have one dance which is definitely their own affair, arrangements and pleasure are in their hands, Pan-Hellenic Ball is its name. Louise Langemo, choosing Arthur Treleven as her escort, led the feminine contingent of fraternity row in the dance which primarily is given to foster greater friendships among sorority members.

This year, planning a greater project than merely giving scholarships to deserving women, the committee selected Larry O'Brien, popular local orchestra, to play. By saving the expense of importing a band, the Council brought Miss Florence Jackson, of the personnel bureau of Wellesley College to the campus for the week of December 3. Miss Jackson, a foremost authority on vocational guidance for women, lectured on all phases of vocations

LOUISE LANGEMO

and held conferences with all who requested them.

Morse Brown Walbridge Parke Stiehm Halverson Buchholz, Tyler Allen Fessenden Barnett

Commencement

ONCE again, a newly graduated group leaves the campus facing trying conditions in an unsettled world. But this year, the senior class is imbued with greater hope than those of preceding years. A new courage is in the air, a new conviction that life again holds hope, security, and promise, that their four years were not spent in vain.

With the stirring words of the President's Baccalaureate and Graduation speeches goading them on to fresh trials, the class lifts its head to face a new world ahead. With the troubles of their past years of schooling amid depression and gloom widening their vision and courage, the class has a background for future success and victory that will be difficult to conquer. Likewise, the class leaves the University in the midst of serious problems yet unsolved, social questions raging, war clouds imminent, yet the graduates leave with the knowledge and confidence that those behind will settle it just as they themselves settled past difficulties.

The value of their past academic life cannot be denied and although the breezy optimism of the boom period is lacking, its place has been taken by a stern facing of realities which bodes greater dependability and activity than ever before.

After the granting of undergraduate depress by President Frank, six men were handed honorary degrees by the University for prominence and activity in their own special fields.

Doctor of Science: John Lucian Savage, Denver, Colorado, Chief designing engineer, U. S. Bureau of Reclamation.

Doctor of Music: John Alden Carpenter, Chicago, Illinois, composer.

Doctor of Letters: Karl Young, New Haven, Connecticut, Professor of English at Yale University.

Doctor of Laws: Robert Barber Goodman, Marinette, Wisconsin, Manager of Goodman Lumber Company.

Albert Russell Mann, Ithaca, New York, Provost of Cornell University.

Karl Taylor Compton, Cambridge, Massachusetts, President of Massachusetts Institute of Technology.

FORENSICS DRAMATICS MUSIC

The Forensics Season

Frankenburger Prize

INTANGIBLE returns were not the only dividends paid participants in forensics this year. John Dietrich, with his speech, "Webs of Steel," won one hundred dollars donated by Joseph E. Davies (class of 1898), for winning the Frankenburger oratorical contest from a large field of competitors.

At Ann Arbor, Michigan, on May 3, James Doyle, winner of second place in the Frankenburger contest, represented Wisconsin in the Northern Oratorical League contest. Awards of one hundred and fifty dollars were given winners there. Doyle placed third against a group of outstanding speakers from Big Ten Schools. The title of his oration was "An American Tragedy."

John Dietrich

Peace Prize

ALWAYS a popular oration subject, peace is the sole topic in the contest sponsored annually by the Interstate Peace Association. Arthur Magidson won the state contest in 1934 and his manuscript took second place in a nation-wide competition.

James Pasch won the right to represent Wisconsin in the state contest this year when his oration, "The Four Horsemen Ride Again" took first place in the university competition March 14. He won the twenty-dollar third prize in the state contest, which was a feature of the peace day observance, April 12.

Roy Zess and Hilton Hanna won second and third places respectively in the university competition.

JAMES PASCH

The Forensics Season

IN the climax of the forensic season at Wisconsin, colleges and universities from all over the country were represented in the fourth annual tournament sponsored by Delta Sigma Rho, honorary forensic fraternity. Twelve varsity teams discussed the prevention of shipment of munitions, five varsity teams argued the merits of the non-company union as the sole collective bargaining agency, six Wisconsin colleges and universities entered teams, none of which had had varsity experience in a contest wherein they discussed the same question, and ten institutions sent individual speakers to discuss the socialization of medicine.

Wisconsin's discussion contest entrants found no place in the finals, but in the varsity debate tournament, home teams won nine times and lost twelve. In the junior tournament, four wins and five losses were recorded.

James Doyle, Arthur Smith, and Henry Arnstein were Wisconsin's representatives in the discussion contest. In the debates there were Wisconsin men's and women's varsity and freshman affirmative and negative teams and two affirmative and one negative team organized especially for the tournament. These latter teams included Arthur Magidson, David August, Hilton Hanna, James Pasch, Hyman Taxman, Hugh Ingersoll, William Haight, and Walter Schubring. The tournament began in the afternoon, March 29, and was concluded with a banquet March 30, at which after dinner speeches were featured.

Besides participating in the Delta Sigma Rho tournament, the men's varsity teams, during the second semester, took part in the Western Conference Debate League tournament at Northwestern University, April 5 and 6. Myron Krueger and Carl Thompson, affirmative; and John Weaver and George Duggar, negative; spoke for Wisconsin there on the subject of noncompany unions as collective bargainers. The teams won two and lost four debates. The negative team debated Michigan over radio station WMAQ, Chicago. In exhibition debates, the teams met Carroll College and the University of Minnesota; in the latter encounter, the Wisconsin

TEMPLIN

affirmative and the Minnesota negative talked over radio station WHA.

During the first semester Wisconsin teams, met the Universities of Iowa, Minnesota, and Marquette, on the subject of federal aid to education. On December 14, the Wisconsin affirmative team, composed of James Doyle, Arthur Smith, and Walter Schubring, lost to Iowa's negative in an exhibition before more than 200 high school debaters attending a speech institute at Madison. At Minneapolis, on December 13, the Wisconsin negative team, which included Frederick Reel, William Haight, and Theodore Case, lost to Minnesota's affirmative. A team made up of members of the varsity defeated Marquette on October 30. Other members of the squad performed exhibition debates before clubs and speech institutes. Martin Mueller, Hilton Hanna, George Duggar, and Carl Thompson, composed this group. Faculty members of the department of speech discussed forensics for the high school students at this new speech institute activity.

Women varsity debaters, besides speaking in the Delta Sigma Rho tournament, won from Iowa and lost to Minnesota. Ruth Chaimson and Caryl Morse, formed the affirmative and Marion Bachhuber and Mildred Templin the negative, in the tournament debates. Discussing the question of government monopoly of munition manufacturers, the negative team, composed of Ruth Chaimson, Helen Hinman, and Mildred Templin, won at the University of Iowa February 28. The affirmative team, composed of Ruth Anne Bailey, Marion Raath, and Caryl Morse, lost to Minnesota at Madison on March 2. In the intra-mural discussion contest, November 9 to 22, some dramatists came out from the wings, formed a team which they called "Behold These Dreamers" and took first place. Hesperia placed second. "Do too many attend colleges and universities?" was the problem. The winning team was composed of John Dietrich, Edward Crowley, and Edward Manthei. Jack Eisendrath, Gordon Sylander, and Bernard Perelson, spoke for Hesperia.

The first unit in a successful and enthusiastic program for freshmen was an extemporaneous speaking contest, October 17, won by Robert Breakstone, with Thomas Green second. The next activity was the debate tryout, December 6. Howard Huenink and Sam Wasserman. made up the final affirmative selection, and Merlin Volz and Robert Breakstone the negative. Walter Bond and Frank Pieper also debated for the freshmen. In the declamatory contest, on December 6, "The Challenge," Avis Zentner won. Horace Wilkie's oration, won the oratorical contest March 21. Byron Johnson placed second with his "The Future."

Vilas Medals, tokens of highest forensic recognition attainable at Wisconsin, were awarded at the 1934 spring forensic banquet, to Joseph Fishelson, Dorothy Gray, Bernard J. Hankin, William Johnson, Ellen Judson, Myron Krueger, and Lloyd Towle. The awards are gold medals, purchased with income from a trust fund established in 1910 by Mrs. William F. Vilas, in memory of her husband, a Wisconsin graduate and former Postmaster General, Secretary of the Interior, and United States Senator.

Forensics Board

HOLDING the spotlight in forensic affairs at Wisconsin, the Forensic Board exercises a helpful paternalism over its various dependent organizations and plans each year, a constructive program of intramural and intercollegiate competition.

The board is composed of student representatives from each speech society and functional organization togther with four faculty members from the Speech Department. These members vote upon all questions pertaining to forensic activities, and sponsor all contests which come under this heading.

With the adoption of a new plan for the ensuing year, all administrative functions of the board are to be placed in the hands of a director, elected by the board, not necessarily a member of the board and of no specific class. This will tend to unify the actions of the board and centralize the responsibility.

The footlight parade of activities sponsored by this energetic body included the fourth annual debate tournament of Delta Sigma Rho, with twelve teams from all over the country represented, the Western Conference Debate League Tourney at Northwestern, radio debates with Michigan and Minnesota, women's debates with Iowa and Minnesota, intra-mural discussion contests and an extensive freshman debate program.

With the awarding of the Vilas Medals, signal recognition or merit, to seven students outstanding in the forensic field the curtain was rung down on another versatile year.

Officers for the past year were: Edwin Wilkie, President; George Duggar, Vice-President; Betty Daniel, Secretary.

Representatives on the board are: John Byrnes, Athena; William Haight, sophomore class; Myron Krueger, Delta Sigma Rho; Marjorie Muehl, junior member; Frederick Reel, sophomore class member; Helen Schindler, Zeta Phi Eta; Paul Schuette, Hesperia; Doris Ward, Pythia; Annette Weiss, Castalia.

Haight Reel Byrnes Ward Weis Ewbank Krueger Wilkie Daniel Cady Schuette Thompson Duggar Muehl

Castalia

OLDEST of women's forensic organizations in the country, Castalia boasts a large membership, spirited participation in campus activities and high standards of attainment. At its founding, in 1864, the credo set forth by the embryo club embraced four fields: music, art, literature and forensics.

Varsity debate, "770" programs, university concerts, intersociety contests, theatre productions, reading-hours, and practically every other extra-curricular field is represented by Castalians. Add to this, outstanding musicians such as Elaine Tottingham, who presented an hour of opera excerpts, interpreted and annotated for the Club, the popular duo-whistling-team of Se Cheverell and Fessenden, "Peg" Stiles of Octy, Jean Charters of W.S.G A, and Louise Langemo, who queened the annual Pan-Hellenic Ball. Distinguished faculty members include Helen C. White and Ruth C. Wallerstein.

Castalia's enterprising Forensics Board representative, Annette Weiss, appointed Hospitality Chairman for the State Highschool Debate Tournament, set an all-time record for the efficient housing of visiting students.

Officers number: Jean Campion, Presi-

dent; Nita Lyans, Vice-President; Josephine Quann, Secretary; and Gertrude Bruns, Treasurer.

The members are: 1935: Gertrude Bruns, Jane Day, Mary Katherine Febock, Ariel Femrite, Ruth Hammerstrom, Delphine Heston, Mrs. Julia Hill, Alice Krug, Katherine Niles, Josephine Quann, Jeris Sayre, Laura Severson, Margaret Simpson, June Shafer, Cora Thomas, Mary Cecilia Trackett, Marion Wartinbee, Margaret Rieder, Arliss Sherin.

1936: Eleanor Bond, Dorothea Bond, Helen Bonham, Charlotte Bromm, Jean Campion, Amy Chisholm, June Cottrill, Lorraine Fessenden, Jean Lucia Findley, Betty Herreid, Evelyn Heckendorf, Virginia Herfurth, Lydia Keown, Nita Lyans, June Reif, Dorothy Roden, Mary Stiehm, Dorothy Swafford, Elaine Tottingham, Annette Weiss, Jane Werner, Ruth King.

1937: Grace Fleischauer, Jean Howland, Katherine James, Elizabeth Kuck, Katherine Luse, Marian Peters, Imogene Shults, Frances Schmidt, Eleanor Zuegal, Alice Lange, Marian Maynard, Ina Mary Frederici, Severa Krug, Mary Ellen L'Hommedieu, Marie Muth, Emily Mazanec.

1938: Josephine Lescohier, Alice Mullen, Marjorie Frost, Jeanne Paunack.

Pythia

FEMININE counterpart of Hesperia, Pythia opens the door to women in collegiate forensics. Since its inception, in 1902, it has broadened its field to include not only debate and declamation, but also dramatics, music and creative writing. The cultivation of stimulating friendships, the expression of individual talent and an appreciation of the arts it sponsors, are the aims of this group.

Its meetings are open forums for discussions and outlet for creative expression. Any member who wants constructive criticism on her music, writing or reading has the opportunity of presenting it to the group.

Every year it numbers among its members, outstanding debaters and readers: Helen Hinman and Helen Schindler, who have figured prominently on Prof. Johnson's reading hours, Avis Zentner, winner of the Freshman Declamatory Contest, Ruth Chaimson, member of the Women's Intersociety Debate squad, Charlotte Arnold, first in the extempore reading contest and Romance Cowgill, queen of the Forensic Ball. Zona Gale, writer of note, Gladys Borchers, teacher of English and debate coach, and Bonnivere Marsh, star of many Bascom productions, are only a few of the Pythians who have scored high in their respective fields.

Officers for the past year are: Dorothy Lee, President; Jean Lackey, Vice-President; Elizabeth Schweinem, Corresponding Secretary; Caroline Weir, Recording Secretary; Esther Ferson, Treasurer; Mary Crowley, Historian; Betty Dunham, Intersociety Representative; Emma-Jean Archer, Publicity.

The list of members includes: 1935: Emma-Jean Archer, Betty Dunham, Mary Crowley, Ruth Chaimson, Marion Hoffman, Dorothy Lee, Helen Hinman, Fanny Herborg, Ruth Larsen.

1936: Esther Ferson, Dorothea Schumacher, Caroline Weir, Betty Schweinem, Marjorie Desormeaux, Betty Hagberg, Mildred Slocum, Bernice Hoppe, Helen Schindler.

1937: Romance Cowgill, Lucile Sill, Frances Gumble, Suzanne Stinson.

1938: Charlotte Arnold, Avis Zentner.

Slocum Schweinem Gumble Larsen Archer Chaimson Cowgill Dunham Arnold Crowley Ferson Lee Weir Desormeaux Sill

Hesperia

ANY day, wandering through the labyrinth of speech rooms on fourth-Bascom, one might run into a group of radio-minded Hesperians, improving their speech by means of the radio-lab. Listening to each other over the amplifier and the "curtain" mike, they say, makes for better diction and fluency. This energetic organization put through any number of projects in the forensic field during the past year.

Among their annual intercollegiate debates with smaller colleges near Madison, were numbered Beloit, Ripon, Carroll and the Franklin Club at Marquette.

Winning three out of four starts in the round-robin tournament of the annual intersociety rivalry, Hesperia was awarded the medal; individual victors were Robert Breakstone, first in declamation, and Roy Zess, who won the extemporaneous speaking award.

The traditional mock-trial of the lawyers was another event in the Hesperian calendar, but the most spectacular was their third annual Speech Ball. Held in Tripp Commons the same night as the hilarious Haresfoot Follies, Hesperians and other loyal speech enthusiasts nevertheless, commandeered a good crowd and a good band. "Roundy" Coughlin, erstwhile connoisseur of women, was there to choose the Speech Queen—a new feature of the Ball, invented by ingenious Hesperians.

Arthur Smith was president for the first semester, Bernard Perelson for the second. Paul Collins, Secretary; Walter Schubring, Treasurer; George Feinberg, intersociety representative; Paul Schuette, Forensic Board Representative.

The members are: Graduates: Henry Arnstein, Herbert Williams.

1935: Jack Eisendrath, John Kurtz, Newell Metcalf, Blaine Seaborn, Donald Stone.

1936: Harold Gall, William Haight, Harland Holman, E. Radcliffe Park, Walter Schubring, Arthur Smith, Carl Thompson, Ivan Trosch.

1937: Loren Brindley, Paul Collins, George Feinberg, Hugh Ingersoll, Phillip Johnson, Fred Newman, Bernard Perelson, Paul Schuette, William Sieker, Oscar Shienbrood, B. Keith Williams, Roy Zess.

1938: Andrew Beath, Robert Breakstone, Arthur Gerend, Byron Johnson, Frank Pieper, George Sieker, Roth Schleck, Francis Stumreiter, Donald Thayer, John Zupan.

Wisconsin Players

OCCUPYING a unique position in the realm of collegiate dramatics, the Wisconsin Players this year presented on the boards of historic Bascom Theatre five major productions: "Behold This Dreamer," "The Roof," "Blossomtime," "If" and "Inspector General." In April the group gave a benefit performance of "The Vinegar Tree," in memoriam to CyrilDuckworth, veteran Wisconsin Player who came to Bascom with stock experience and was cast in leading roles in the little theatre as well as in the local Civic Theatre.

Studio shows, directed by a student committee, including Vivian Merrill, Jean Thorel, Holger Hagen and Fred Buerki, ranged from Fred Buerki's presentation of "Dracula" to "Welded," by Holger Hagen and Jean Thorel's "Once in a Lifetime." This experimental studio was organized three years ago to provide an opportunity for student direction of plays; so far it has proved very successful with an increasingly large number of regular patrons, and bids fair to be a permanent feature of the Players' activities at Wisconsin.

Social high-lights of the Players' season were a tea held for the Wisconsin Players' Guild Festival, the formal awarding of a prize for the most original play in the state high-school contest, and the spring dinnerdance and initiation, held May 24th.

In spite of the change of directors over a year ago, when William C. Troutman left for radio work and J. Russel Lane, genial "daddy" of all Wisconsin Players, stepped into his shoes, the Theatre productions have been held up to their accustomed high level.

Present officers are: Edward Manthei, President; Marian Dakin, Vice-President; Katherine Mitchell, Secretary and Marjorie Muehl, Treasurer.

Members include: Graduates: Charles Peerenboom, Vivian Merrill, Charles Hagen, Marian Dakin, Martin Sorenson, Ramond Kuhn.

1935: Allen Bartenbach, Elizabeth Krauskopf, Roshara Bussewitz, Bernard Ailts, Charles Adair, William Kraus, John Doolittle, Albert Gallistel, Dorothy Lyne, Marie Felzo, Charles Le Clair, Marion Owens, Gwendolyn Hanson, Mary Hanson, Joseph Sturm, Holger Hagen.

1936: Howard Schmidt, Dorothy Dougherty, Helen Theiler, Bernice Hoppe, Helen Schindler, Gustaf Lehrkind, Jean Thorel, Lorraine Fessenden.

1937: Cyril Hager, Romance Cowgill, John Dietrich, Harold Silberstein, Phyllis Wahl, Eloise Kummer.

Haresfoot

A NOTHER Wisconsin tradition was cast to the wind, when producers of the 37th annual Haresfoot production decreed that the day of female impersonations had passed.

No longer could they flaunt the slogan —"All our girls are men, yet everyone's a lady"—"Break the News" was definitely a man's show, discarding the traditional girl-choruses and girl-leads. Sixteen prominent men, including such veterans as "Chuck" Adair, Tony Canepa and Sidney Winn, headlined the cast with Bill Purnell in his tenth year as director, Norm Phelps on the music, Mel Adams, publicity, and Frank Ladwig handling the tour, which embraced Chicago, Milwaukee, Rockford, Sheboygan, Kenosha, Fond du Lac, Wausau, Janesville and Madison.

After the Chicago performance, no less a nite-spot than the well-known Blackhawk, featured in their floor-show, Chuck Adair and Tony Canepa, with that rhythm-sifter, Kay Kayser. Why the Alumni dinner—tendered the show that night—missed the boys, is anyone's guess.

"Break the News," written by Howard Teichmann and Mel Adams, the music by Frank Salerno and Bob Fleming, was a fast-moving satire on the modern newspaper—a musical comedy revue in two acts and 31 scenes, with the office of a metropolitan newspaper for its background, its theme the lampooning of everyday news personalities and events. Fieldday for the men, as the only women cluttering up the show were Shirley Temple, Juliette and Mrs. Tarzan; no chance here for glittering clothes and female wiles. Wit and flashing repartee had to save the day, and keep the bald-headed rows awake.

Opening-night in Madison, May 3, was a triumph—a bona-fide Broadway premiere with city and state dignitaries out en-masse, the 50-cent seats straining to catch the jokes between bursts of Kappa Bete ribaldry. Of course, you could always go again and really hear the show, but there is nothing like a first night to put you in the mood.

And so the ghost of another Haresfoot show is laid; "Break the News" fades into the limbo of forgotten things, the costumes are reluctantly discarded, props and make-up boxes stowed away in the dim recesses of a musty warehouse, empty theatres echo to the sound of vanished feet and only the untarnished, unquenchable spirit of Haresfoot goes lightly down the years.

Haresfoot officers are: Chuck Adair, President; Tony Canepa, Vice-President; Frank Salerno, Secretary; Paul Rockey, Treasurer; Jean Thorel, Keeper of Haresfoot; Frank Ladwig, Manager; William H. Purnell, Director.

Present members of the club are: Graduates: Eugene Grosman, Norm Phelps, and Robert Fleming.

1935: Paul Rockey, Leonard Haug, Carl Amundson, Frank Klode, Roland Biersach, Charles Adair, Thomas Runkle, Myron Thompson, Anthony Canepa, Allen Guentzel, Jean Thorel, Frank Ladwig. 1936: Frank Greer, Sidney Wynn.

1937: Frank Salerno.

Page 172

Men's Glee Club

THE Men's Glee Club is one of Wisconsin's oldest and best-loved traditions. Organized in 1887, it has built up an enviable reputation largely through the efforts of Prof. E. Earle Swinney, who became its director in 1919. Not the least of the Club's popularity is due to Prof. Swinney's fine baritone which strengthens the chorus and gives an added maturity to the more difficult selections.

Winning, three out of four times, the Western Conference Intercollegiate contest held in Chicago, the Glee Club in 1923 went to Carnegie Hall, New York, to sing in the eastern finals. From there to the White House to appear before President Coolidge and his assembled staff.

A trip to Europe, in 1927, and yearly tours of the United States, won wide acclaim for the organization, but during the past year, due to general curtailment, it has confined itself to four WIBA broadcasts and to concerts before the Association of Commerce, the Rotary Club, Kiwanis, the Christ Presbyterian Church and the Union Concert Series. In great demand for banquets and entertainments of all kinds, the Club for the last few years has been singing for local affairs. The Union concert, however, was an innovation and was declared to be an outstanding performance in respect to artistry and technique.

The incumbent officers are: Robert Ricker, President; Frank Schroeder, Vice-President; David Lloyd, Secretary-Treasurer; and John Hanchett, Librarian.

Members of the Club include: Graduates: Ralph James, Hugh Gunderson, Gordon Bueschel, Neal Glenn, William Bascom, Robert Lee, Elmer McMurray, Lauren Reese, Victor Lemke.

1935: Frank Schroeder, David Lloyd, Harold Dodge, Robert Ricker, John Kurtz, Walter Kammer, George Whittier, Lyman Newton.

1936: Francis McGuigan, John Hanchett, Alfred Mergen, Holdrich Kammer, Norman Ruenzel, Carl Behrend, Arthur Hoffman.

1937: William Stewart, William Livingston, Hubert Slater, Paul Christenson.

Gaarder Bascom Ricker Kammer Slater Stewart Lee Gunderson Christenson McGuigan Newton Behrend Whittier Lemke Prof. Swinney Llovd Hoffman Schroeder Reese Kurtz Rusenzel

Union Concert Series

PROVIDING for the cultural needs of the University, the Men's Union each year arranges a series of concerts and recitals, at which appear artists and musical organizations of international repute, all virtuosi in their particular field, to perform the world's finest music.

Through the efforts of Wilson Weisel, Vice-President of the Union Board and chairman of the concert committee, aided by Franz Bidinger, assistant manager, and Robert Hitchcock, head usher, this year's series scored an outstanding success.

The Don Cossack Choir appeared November 13, presenting a varied program of Russian airs and traditional melodies. The Choir holds a unique place in the musical world as superb performers of a type of music rarely heard.

When Jose Iturbi, who ranks as one of the outstanding pianists of the day, gave a recital on November 26, critics hailed his playing as an example of the most consummate art. "Mastery of technique . . . dazzling skill . . . brilliant concert" were some of the opinions of local reviewers.

The Union next presented Lucille Meusel, soprano, and Ennio Bolognini, cellist, in a joint recital on December 11, which held particular charm for the listeners through the intimacy of the program these superb artists had arranged.

The recital of Myra Hess, on March 5, gave audiences here the opportunity to listen to the world's greatest woman pianist in a concert containing works by important composers from the eighteenth century to the present day.

When Nathan Milstein, violin virtuoso appeared March 21, the Cardinal reviewer wrote that his performance was "unequalled by any but the great Kreisler himself." Playing before as large and enthusiastic an audience as Great Hall had ever held, Mr. Milstein was recalled for encores half a dozen times.

WILSON WEISEL

To complete a season during which first string representatives in every branch of music had appeared, the Union on April 2, presented the Chicago Symphony Orchestra, under the direction of Frederick Stock. Among the first three orchestras in the country, this group with all of its 90 musicians, headed by the world renowned Dr. Stock, gave a brilliant concert, it's first in Madison since 1925. "Madison music lovers," said one critic, "undoubtedly received one of the greatest musical experiences in many years."

Plans for next year's series have already been made. Prospects are Albert Spaulding, considered America's finest violinist, who has appeared here before; Guiomar Novaes, the famous Argentine pianist, widely acclaimed when she appeared in New York and European cities last year and Nino Martini, Metropolitan Opera tenor, well-known for his radio work.

MAURICE BOYD Properties

DIRECTOR RAY DVORAK

UNDER the capable direction of its new leader, Raymond F. Dvorak, the bands have completed a highly successful year.

"Ray" Dvroak, who succeeded the late "Major" E. W. Morphy, hails from Illinois where he was assistant band director and director of glee clubs, and in this year's work he has proven himself to be a very popular and able director.

The principal activities of the bands during the past year include four major concerts, two NBC broadcasts, several open-air twilight concerts, and the attendance of the bands at all of the main athletic contests.

The University Bands, with a total of 170 men, are divided into three units: the Concert Band, which is composed of musicians of professional caliber, a first Regimental Band, which is a training school for the Concert Band, and a second Regimental Band. Membership in the bands is determined by tryouts held at the beginning of each semester.

The Concert Band this year has studied more than 140 of the larger works. The regimental bands have also studied a certain amount of concert music. Men who have served in the varsity bands for three years are entitled to wear a key.

Regimental Bands

Robert E. Adams, Harold H. Berkholtz, Robert F. Brock, Carlton C. Brechler, Gordon R. Bueschel, D. Weston Day, Leon C. Dosch, Edward N. Dougherty, Ellis V. Dewards, Harold G. Fennama, Raymond C. Radio on the Campus

THE Wisconsin campus, home of the oldest educational broadcasting station in America, is decidedly radio conscious. Just as in 1917, students and faculty members carried on experiments which became recognized as the first telephonic broad-

casts, so today they are making history by finding practical uses for this powerful device.

As an extra-curricular activity radio has attracted students with a wide range of inter-Announcing is ests. but one phase of the experience available. Dramatics, music, writing, program preparation, and sound effects techniques have their appeals. The experience gained in this way has enabled many students to get a foot on the radio ladder. Some have achieved great success professionally.

The growth of radio at Wisconsin has been an unusual development. In a fiveyear period it has expanded from a makeshift collection of sending apparatus, with a single dingy broadcasting studio, to a highly efficient transmitter with tall antenna towers outside the city, and the most modern broadcasting center to be found in Wisconsin. Among the vents particularly fascinating to students are the DX broadcasts staged in the early morning hours. These are heard by listeners all over the country, and in foreign lands as well.

Radio Hall, the home of Station WHA,

has become one of the campus show places. It embodies three studios, control room, offices, rehearsal room, workshops, pipe organ, and a lounge executed in an Indian motif. The station is unique in that it sells no time for advertising purposes and concerns itself primarily with providing educational opportunities for all who wish to listen. Lauded as a national

Lauded as a national leader in its field, toward which all radio stations should look for

guidance, station WHA was cited as the example of what non-commercial stations could do, at the sixth annual institute for education by radio, held in Columbus, Ohio, this spring.

Harold B. McCarty, program director, Harold A. Engle, promotion director, and Verne Hansen, studio announcer, attended the convention.

STUDENT GOVERNMENT

The Wisconsin Union

THE Wisconsin Union is an embodiment of a fundamental idea about education . . . the idea that only full living induces full learning, and that full living comes only where and when there is the opportunity for comfortable living, cordial and frequent social give and take, complete self-expression, and a certain feeling of unity of purpose and action with one's neighbors and friends. As President Conant of Harvard said, addressing his first class of freshmen, "More souls are saved around the dinner table than through courses."

With the Memorial Union Building as its main tool, the governing council of students, faculty, and alumni provides a program of music, dances, art, games, forums, dining groups, faculty discussion, literature, winter and other informal sports that is probably unequalled by any other university.

The activities of the Union are not sponsored by the University merely to make the undergraduate years pleasurable and picturesque, nor even solely because they equip students for intelligent use of leisure. They engage the attention of the college administration because they are necessary complements of the classroom and laboratory.

Professor Stephen Leacock of McGill University has stated the importance of extra-classroom life in this way: "As a college teacher, I have long since realized that the most that the teacher, as such, can

PORTER BUTTS House Director

do for the student is a very limited matter. The real thing for the student is the life and environ-

WILLIAM SCHILLING President

ment that surround him. All that he really learns, in a sense, he learns by the active operation of his own intellect and not as the passive recipient of lectures . . . If a student is to get from his college what it should give him, a life in common with other students is his absolute right . . . A university that fails to give it to him is cheating him."

Men's Union Board

THE Men's Union Board not only serves as the corporate directors of the men's student body (The Men's Union), but also, with W. S. G. A., governs the policies of the Memorial Union building.

Because the Board is given the responsibility of men's government by the faculty and regents, it serves as the administrative committee of the House Presidents Council, furnishes funds and facilities for its activities, and provides continuity from one year to the next.

Among the social, and at the same time, incomeearning activities which Union Board annually sponsors are the Union concert series of the world's outstanding artists and campus dances, which include the popular "770 Club," the only collegiate night club in the country. In addition, the Board operates the campus orchestra booking service and with W. S. G. A. carries on an extensive program of assistance for high school students planning to enter the University through its Public Relations Committee.

W. S. G. A.

COMPOSED of all women in the university, the Women's Self-Government Association is a valuable agent in the integrating of all women's activities on the Wisconsin campus. The history of the association dates back to 1898, when the ladies of the "mauve decade" shook off the shackles, and decided they were capable of instituting and obeying their own rules.

The supervision of the association is vested in the hands of a council of fifteen members, who are delegated executive responsibility at the annual elections.

Two other branches of the association help to make and enforce rules which do not come under the jurisdiction of the faculty. One, the Legislative Board, is composed of the presidents of all women's houses, and resembles the House President's Council sponsored by the Men's Union Board.

The third branch of authority is the Judicial Committee, which handles cases regarding infringements of the studentmade W. S. G. A. house rules. This is one of the ways Wisconsin has devised to relieve the Dean of Women of the more routine problems of discipline. The office of executive secretary is nobly discharged by Mrs. James (Peg) Watrous, whose own personal energy serves as an example to those whom she entrusts with responsibility.

The executive council for the year 1934-35 included President, Jean Charters; Vice-President, Joan Buchholz, Secretary, Hinda Cohen; Treasurer; Mary Kristen; Senior Member-at-large on Union Council, Frances Stiles; Junior Memberat-large on Union Council, Monica Clark; Senior Class Representative, Hannah Greeley; Junior Class Representative, Lois Montgomery; Sophomore Class Representative, Frances Schmidt; Freshman Class Representative, Marion Bradley; Judicial Committee Chairman, Mary Bossort: District Chairman, Laurentine Beers: Elections Chairman, Jean Campion; Elections Assistant, Patricia Graney; Census Chairman, Louise Aarons.

Temporary ex-officio members include: Orientation Week Chairman, Annaloyce Elkington; Co-Chairmen of Freshman Scholarship Banquet, Elizabeth and Lucile Ransom; Student Public Relations Committee, Jean Fisher; Mother's and Father's Week-end Chairman, Lois SeCheverell

Y. W. C. A.

OFFERING to each girl on the campus a chance fof self-expression and development of her individual leadership ability through committee work and interest groups, the University Y. W. C. A. has this year carried out an ever-broadening program of campus activities.

The Y. W. C. A., in cooperation with the Y. M. C. A., sponsored both the Significant Living Series, in which nationally known speakers were brought to the university to help create an awareness of economic, social, political, and religious problems; and the traditional Christmas Festival.

At the beginning of the year individual conferences were held with each new member, in an effort to get better acquainted and help her find the place for her interests and abilities in the Y. W. C. A. and to adjust herself to campus life.

Innovations in the year's program were the monthly meetings at which all committees and members of the organization met as a whole and became better acquainted, and the dinners at which facultystudent friendships were fostered. Among the many other activities of Y. W. C. A. committees have been the personnel activities under the guidance of the office of the Dean of Women, and the interesting work at the Neighborhood House, in the city Girl Reserve department, at the Hospital, and at the Infirmary.

Leading the organization throughout the year have been members of the Cabinet, who are: Mary MacKechnie, President; Betsy Walbridge, Vice-President; Lois SeCheverell, Secretary; Ruth Hammerstrom, Treasurer; Ethel Webster, Forums; Harriet Oldenburg, Membership; Katherine Niles, X Committee; Mary K. Febock, Publicity; Betty Dunham, Monthly Meetings; Lucille Vetting, Current Issues; Anne Hirst, Finance; Alice Ebbott, Social Service; Annaloyce Elkington, Orientation; Louise Haack, International Relations; Ruth Buss, Social Committee; Caryl Morse, Member-at-large; Jane Bond, Freshman Advisory Council Chairman; Severa Krug, Conference Chairman; and Eleanor Dahl, Executive Secretary.

Members of the freshman advisory council are Betty Ransom, Lucille Ransom, Fay Hickey, Severa Krug, Louise Haack, and Jane Bond, Chairman. Miss Hazel Manning is chairman of the Advisory Board.

The Senior Class

FRANK C. KLODE President

ENTERING the university when a depression was going from bad to worse and continuing its education at the bottom of economic conditions to graduate into an unstable future, the class of 1935 looks back down the avenue of undergraduate days.

Striking a symbol of service the senior class developed and fostered a Student Speaking Bureau for the purpose of bringing the real university closer to the taxpayer of the state. In the first half year of its operation its success may be judged by the number of requests for the Speaking Bureau's services. One hundred and fifty towns in the State of Wisconsin sent in applications for student speakers. The senior class believes that the bureau has reciprocal benefit to the student speaker as well as the citizen listener. So as a self-supporting and going organization, with almost unlimited potentialities for the creation of cooperation the class of 1935 leaves the Student Speakers Bureau to the University of Wisconsin.

By way of a class gift, this year's senior class contributed its funds to the creation of a Rental Book Library. Dedicated to the aid of the needy student, it is the hope of the class that the limited fund which it was able to give may in the future be added to and expanded in order that the students partaking of its benefits may likewise be broadened.

JUNE days, crowded with dancing, swimming, dinners, dramatic events, boat races, picnics, music, and traditions to add to the pleasant memories of college days for the members of the class of 1935--that's Senior Week.

With Walter L. Meyer as general chairman, an elaborate social program has been planned beginning on Tuesday, June 18, with a Senior sing, to be followed by an informal dance. An all-day picnic, including beer, pretzels, barbecue, games and a camp fire is scheduled for Wednesday. Thursday afternoon there will be a musical fiesta, and in the evening a theater party for the senior class. A Informal Dance Committee ROBERT BOES

mixer dance is scheduled for Friday afternoon, and the senior play will be Friday evening.

On Saturday, which is Alumni Day, there will be a senior swim in the afternoon, and a senior and alumni banquet in the evening, to be followed by the traditional pipe of peace ceremony and a senior and alumni dance. The baccalaureate address is on Sunday afternoon, and a parents' and seniors' dinner in the evening. Monday,'Senior Week is brought to an end with the Commencement exercises. Moving pictures of all the events will be taken and the pictures will be kept in files for showing at future class reunions.

After Fifty Years

REGINNING at the time when President Bascom made it a practice to meet weekly with students on Sunday afternoons, the Young Men's Christian Association has been vitally related to the life of the University for half a century. Its work and program demonstrate vitality in evolution. To discover student needs and ways to meet them is the evolutionary principle that has shaped its development. Far from regretting that former activities originally initiated by the Association have been taken over by other agencies and carried forward to new high standards, we believe the peculiar genius of this student-faculty fellowship lies in its freedom to pioneer new fields and demonstrate new methods.

The Young Men's Christian Association of the University of Wisconsin is currently defined as an Association of students and faculty constituted to help students achieve a satisfying adjustment in their social, moral and religious ideas and behavior during the years in college. The Association is Christian in that it accepts Jesus' life and teaching as the inspiration and guide of personal conduct.

Those students who are in sympathy with the purpose of this Association are invited to become members.

The Roster of the Association Presidents shows a succession of students, now alumni, established in positions of influence in business, the professions, and the

EDWIN M. WILKIE

Young Men's Christian Association. Their activity and their influence have extended over a large part of the world. Their later careers are evidenced of the leadership the Association has enjoyed and the value of Association experience to men in the University.

The Association may look back with pride upon its fifty years of service to the University. It will always continue to serve as long as there is need for Christian leadership in the advancement of student activities. The Association may well continue to attain to the same high standard in the future that has characterized it in the past.

Women's Athletic Association

IN sponsoring its many clubs, groups, and various activities, the W. A. A. has as its aim the reality of getting as many as possible interested in its recreational sports and of giving the student training in the sports which she can use when she gets through school. It is run on an activity basis, and with Miss Margaret Meyer as its faculty adviser, it has gone far in realizing its aim.

At the head of the association is the W. A. A. Board, which is composed of the officers of the organization, the presidents of the sports clubs, an intra mural representative, and the faculty adviser.

There are eleven regular clubs each of which has a faculty adviser who coaches the women in the different sports; six of them, namely the Baseball, Basketball, Bowling, Dolphin, Tennis, and Volleyball Clubs, sponsor inter-sorority, interdormitory, inter-independent, inter-church and inter-class competition. Then there are the several groups which are managed by the Intramural Board and which include badminton, golf, mixed golf, mixed tennis, mixed Volleyball, and ping pong. The competition in these is supplied by sororities, dormitories, independents, and churches. Due to lack of facilities, the women's crew had to be given up this year, but the W. A. A. hopes that within a few years it will be able to buy crew equipment for the women.

Considering the clubs in the order of appearance from fall through winter to summer, we have the three seasonal clubs: Outing, Orchesis, and Dolphin.

BLANCHE M. TRILLING Director of Physical Education for Women

The Outing Club has charge of the beautiful W. A. A. cottage on Lake Mendota, where many parties, often overnight outings, are held. It has offered the use of the cottage to any group of university women. Also it has undertaken the task of instructing children of grade and high school age in hand craft. June Schroeder is serving as president.

Besides giving its own superb performances of its dance drama during Mother's and Father's weekend, Orchesis this year, with Virginia Duncan as its president, has sponsored the appearances of Ted Shawn and of Harold Kreutzberg. At a meeting of the Directors of Physical Education of Midwest Colleges, which was held here April 1, 2, and 3, the members of Orchesis gave an exhibition and on March 8, at a convention in Milwaukee, they assisted Miss H'Doubler in a demonstration of various types of dances.

The great event of the Dolphin Club was its annual water pageant, Ice Breakers, which was given March 22 and 23; the girls, with the aid of their president, Louise Barnhardt, did a splendid performance. As Ice Breakers suggests, their review took place amid ice cakes, igloos, and polar bears, with three or four eskimo The participators wore rubber girls. suits (for the first time in Lathrop pool) the colors of which conveyed the vivid impression of a rainbow. There were fancy diving, stunt diving, races, and various formations, all of which were given names as such as Northern Star, Northern Lights, Comets, etc. One, for instance, called Mush-On, consisted of two of the smaller girls sitting in innertubes while others, with ropes through their mouths, pulled them through the water.

In the closing number, Northern Star, the girls formed a star, making it more lovely and impressive by holding aloft many 4th-of-July sparklers.

This club meets once each week in Lathrop pool.

Early in the fall, the Volleyball season attracts many contestants from among the sororities, dormitories, independents, churches, and classes. In the competition between them, sponsored by the Volleyball Club, with Jean Gaskeen as its president, Gamma Phi Beta won over the rest of the Greek section, and a team from the club itself was winner among the independents.

In the mixed volleyball competition, Kappa Delta won supremacy over their rivals, and Wesley Foundation surpassed their independent foes.

Early in the fall, under the leadership of Betty King, the Hockey Club sponsored a Hockey Play Day, in which LaCrosse Teachers' College, Rockford College, University of Iowa, Carroll College, Oshkosh Teachers' College, and the Milwaukee State Teachers' College participated. So-

W. A. A. BOARD

Duncan Gaskeen Barnhardt Mazanec Rockman King J. Bond Horne Maneval Pitzer E. Bond

called "Inter-color" competition was also offered by the club.

Then in the winter there are the Basketball and Bowling Clubs, the presidents of which are Nathalie Rockman and Helen Tuman, respectively. In the basketball competition, Alpha Chi Omega was victorious among the Greeks, and Barnard among the independents. There is also interclass competition within the club itself.

The annual basketball game which decides the supremacy between juniors and seniors was held on April 16. The rivalry between these two classes is very keen, and the juniors who this year had the responsibility of hiding the goat so the seniors couldn't find it, were determined to win.

As for bowling, in the telegraphic meets which the Club sponsored, their team was defeated by the Ohio Wesleyan representatives, but was victorious over Vassar. In the intra-mural competition, Gamma Phi Beta won over the other sororities, and Chadbourne was victor of the independents.

In the spring come baseball and tennis, archery and golf. The Tennis Club, presided over by Clara Davis, sponsors intra-mural and inter-class games, the finals of which, as a rule, are played off on Field Day during Mother's and Father's weekend.

The Archery Club, headed by June Schroeder, is still a comparatively new organization, while the Bit-and-Spur Club was just started this year. However, their splendid work on Field Day speak well for them.

In ping pong competition, sponsored by the Intra-mural Board, the Alpha Phis proved superior among the sororities, and Chadbourne won over the independents.

The Randall Green Festival, which this year fell on May 25, during Mother's and Father's weekend, climaxes the tennis competition, and decides the winners of the baseball finals. This same day brings the spectacle of an old-fashioned parade, American folk dancing, old-fashioned games, tumbling, bowling-on-the-green, which is new in this country, a riding drill, and an archery exhibition.

So that the university women may become better acquainted and also learn more about the various activities of its clubs, the women's Athletic Association holds teas in Lathrop Hall Lounge each Wednesday afternoon from 3:30 to 5:30. The chairman for the teas this year was Emily Mazanec.

At the spring banquet each year, besides the awarding of the cups to the intramural winners, final emblems are awarded. Two fifty dollar scholarships are presented each year and the names of these recipients are announced at Senior Swingout.

This spring the W. A. A. also sent six girls to the North Sectional Meeting of the Athletic Federation of College Women, which was held in Chicago, March 28–30.

The W. A. A. is grateful to Miss Blanche M. Trilling and the Women's Physical Education Department for the use of their equipment for its various activities.

The officers for this year are: Floretta Maneval, President; Virginia Lee Horne, Vice-President; Eleanor Bond, Recording Secretary; Jane Bond, Corresponding Secretary; Bernice Pitzer, Treasurer.

ATHLETICS . . .

THE LITTLE GIANT

THE marked up-grade in Wisconsin sports has been no thing ungoverned. When the faculty athletic board overruled political interferences last July and named Dr. Walter E. Meanwell as the director of Intercollegiate athletics, it was the first stone in the rough path to conference peaks. Dr. Meanwell brought to his new office 22 years of experience and

with it a knowledge of sports almost uncanny in its foresight.

His first official act as director was to recommend Harold E. (Bud) Foster as his own successor to the head basketball coach position. The board and the regents accepted Foster unanimously. What happened during the late basketball season is already history. Doc's selection and faith in Bud was only a sample of how he was going to govern Wisconsin's Sports destiny.

The "Little Giant" came to Wisconsin in

1911 and took over what he calls the "mass physical education of the entire student body;" it is now under the title of Intramurals. That was Doc's predilection: sports for all, and under his thumb the system now operating under Prof. Guy S. Lowman received its first impression. It took only a few years before Dr. Meanwell became seriously interested in basketball. He had been instructing a boy's club in an entirely new form of the sport in Baltimore-short pass, short shot, and pivot-and brought that type of play here. It has gained national and international recognition, and is coached under a modified form by all the outstanding coaches in the United States.

During the war years, Doc went to the

University of Missouri for two seasons where he turned out championship fives. He returned to the Badgers in 1919 and has been here ever since. During his regime as coach, Doc developed ten championship teams out of 18 he has directed: eight of them here. The record has never been surpassed or even equalled in big league basketball.

On the intimate side

Dr. Meanwell exemplifies the height of

physical training. Long

before he entered into

collegiate work, he was

the amateur boxing and

wrestling champion of

Canada at 126 pounds.

Under the internation-

ally famous colors of

the Argonaut Club,

Doc first began his sport life, and today

he is still a "champion"

in the eyes of his as-

sociates in the Wis-

consin athletic department. He said once

that when basketball

was his job, it was up

to him to make the

DR. WALTER E. MEANWELL

that he is athletic director, he says, his job is wider, more plastic, and the trick is to push all sports to the top of the heap.

Doc has since proven that his desire to push all sports is sincere. Recent steps for the furtherance of Wisconsin athletics generally have been the placement of crew and ice hockey back on an intercollegiate basis, after having been on an intramural standard for three years. To prove that Wisconsin athletics could climb from a cellar position, "Doc" Meanwell has placed the Badgers in a position where they can mount in repute as well as financially.

From a single-tracked interest in basketball, Wisconsin's "Little Giant" has turned to a program of "sports for all."

FOOTBALL . . .

JACK BENDER

Captain-Elect

RAY DAVIS, captain-elect of the 1935 football team, is one of the few Easterners who has ever "gotten places" on a Wisconsin football team.

Davis comes from Hartford, Connecticut, and is now a Senior. He's been one of the hard workers on Doc Spear's squad for two years and is just the kind of man the good doctor likes to have captain one of his elevens. Big, strong, weighing close to 200 pounds and standing within close range of six feet, Davis is no slouch for the opposing guard to face in the toughest of games. He usually plays the left side of the line.

Ray's election last fall came somewhat as a surprise to those who had looked to a backfield man as a possible choice to succeed Jack Bender. But when one takes time off and observes Ray Davis' record, one of tough, he-man football, it is no wonder that he was chosen to lead the Badgers through their 1935 schedule, a suicide schedule, which promises to demand the utmost of the Wisconsin gridmen. IN electing a captain to lead the 1934 football team, the 1933 squad turned to the line once more, voting upon the leadership qualities of Jack Bender, who had seen two years varsity service previously in a guard position.

Although he had not played a full time first string position during this time, Bender's good nature, coupled with his potential capabilities as a leader, prompted the '33 gridsters to elect him to the captaincy.

A member of Sigma Chi fraternity, Bender's home is in Bluffton, Indiana. In addition to winning his letter in football during his junior year, Bender also played on the varsity basketball team, winning a minor letter during the 1933-34 season under "Doc" Meanwell. He was enrolled in the chemical engineering course of the College of Engineering.

RAY DAVIS

Sundt with Backs

THE elevation of Guy Sundt from freshman football coach to assistant coach in charge of the backfield for the 1935 gridiron season, met with the approval of the student body at large, due to the great popularity of the former freshman football and track coach.

Sundt came to Wisconsin in the fall of 1918, direct from Stoughton High, where he played all four major sports, football, basketball, track and baseball. At that time, there was no rule requiring Freshmen to remain out of varsity competition so Guy stepped right into a fullback job he was to hold for four years. He also won varsity letters in track and basketball.

Upon graduation he went to Ripon, where he remained until 1924, when he returned to Wisconsin to assume the position of assistant track coach. In '25 he also served as frosh football and varsity baseball mentor. When Glen Thistlethwaite came to Wisconsin in '28, Sundt was his backfield coach and again, When Doc Spears arrived from Minnesota, Sundt was already whipping the backs into shape.

BILL WOERNER

GUY SUNDT

Woerner with Ends

It didn't take long for the boys around the athletic department to realize that in securing the services of Bill Woerner, they will not only benefit by what one of the finest end coaches in the country has to offer, but in addition, come what may in the win and lose column, the 1935 Badger grid campaign will not be entirely devoid of smiles.

Bill is a product of Purdue University, where he studied engineering to the tune of an honor grade average. Between times Woerner played end on the Boilermaker elevens of 1928–30, and in spite of his scant 160 pounds, was afforded allconference recognition in 1929. He won additional honors in being elected president of his Senior class.

From Purdue, Woerner went to the University of Washington, where he turned out two All-American ends of recent years, Ernie Nesbit and Bill Smith. In Stan Haukedahl and Bob Null, Wisconsin's new end coach will have some rather good material with which to work.

Football

THE 1934 football season brought a different type of spirit, thrills, and enjoyment, to the Wisconsin campus that had not been experienced in some time.

The story of the return of O'Dea to the Badger campus is told on other pages in this book, but, nevertheless, it is probably due to his discovery and return for "Wisconsin's Greatest Homecoming" that a revival of interest and spirit was evidenced on Bascom Hill.

As usual, pre-season expectations were high. A multitude of "All-American" freshmen gave the fans something to talk about. After the dismal 1933 season they looked forward to 1934 as the one bright ray of light.

The team did well . . . at least as well as could have been expected. They weren't a crackerjack team, but they came through with two non-conference victories over Marquette and South Dakota, and another pair over Illinois and Michigan, losing to Notre Dame, Northwestern, Purdue and Minnesota to finish in a tie for fifth place in the final conference rating list, with Northwestern.

COACH SPEARS

Wisconsin 3, Marquette o

Opening up the season against the "Golden Avalanche" from Marquette, the Badger gridsters and some 20,000 fans

STRAIN

NELLEN

Page 196

Purdue Game

found a surprising disappointment awaiting them upon the chalk-marked surface of Randall stadium. Having usually had their own way against Hilltop gridiron contingents in the past, the Cards were somewhat annoyed to find the Marquette line a difficult thing to penetrate.

The Badgers penetrated the line at odd times, and succeeded in skirting the ends on an occasional reverse or dash, but when the yardage was really needed for scoring, the Badgers could not do a thing against the stubborn Marquette defense. Thirty seconds to go after yardage gained by Jankowski, Null, Fish and Schuelke, put the ball on the Marquette 17-yard line. Signals called for a placement. Ball snapped, Stan Ferris receives, places . . . Pacetti boots . . . it's good. And 20,000 Badger fans go wild. A real hair-raising "thriller," in modern tempo.

Wisconsin 28, South Dakota 7

Another bit of tough non-conference competition was presented to the Badgers on the following Saturday, when a small

Mortell

LUBINSKY

PACETTI

but determined group of South Dakota Jackrabbits came to Camp Randall to give Wisconsin a fight.

The Jackrabbits lived up to their nickname during the early period of the game, uncorking an aerial attack which baffled the Badger secondary long enough to per-

JORDAN

mit Miller, South Dakota quarterback, to snare a 30-yard pass from Belfany and scamper the remaining 20 yards for the first score of the game.

The Badgers soon went to work in earnest, however. Lynn Jordan hurled a 20-yard pass to Stan Haukedahl, Badger wingman, who tumbled across the South Dakota goal line for the first Cardinal tally. The remaining three Badger touchdowns came as the result of long marches down the field. George Dehnert plunged over for two touchdowns, after successful ball-carrying attempts on the parts of Tommerson, Mortell, Schuelke, and Jankowski. Jankowski, sophomore fullback, made the fourth score on a plunge from the three-yard stripe. Mario Pacetti converted all four points after touchdown with successful placement kicks.

Purdue 14, Wisconsin o

Journeying to Lafayette, Indiana, the following week for their 1934 conference debut, the Badgers played an erratic and weak game against Purdue's Boilermakers, emerging on the short end of a 14–0 score.

The same old running, passing, and punting game of Duane Purvis, All-American halfback, and Jim Carter, which

FERRIS

Page 198

Northwestern Game

was largely responsible for Purdue's 14–0 Homecoming victory in 1933, again led the Plumbers to a repetition of the early performance.

The only bright spot in the game for Badger fans came when the Cards made three inspiring defensive stands within their own 4-yard line, holding the Boilermakers for four downs at each time. On offense, the passing combination of Lynn Jordan and Stan Haukedahl accounted for quite a bit of the Badger yardage, while the flying feet of sophomore wingman Bob Null, on four end-around plays, accounted for five yards per attempt.

Notre Dame 19, Wisconsin o

Again on the road the following week, the Badgers faced their last non-conference foe of the season in Notre Dame's Ramblers, at South Bend, Indiana, taking as thorough a beating as could be administered to a 19–0 tune.

The Irish practically had their own way that afternoon, cutting through the Badger line and secondary like butter, extending themselves at three different times in order to take scores. Fred Carideo drew first blood for Notre Dame, side stepping four Badger tacklers to score from the Badger 10-yard line. Melinkovich and Elser scored the remaining two Notre Dame touchdowns, Melinkovich, on a 38-yard run late in the third period, and Elser on a series of power drives through the Badger line.

A belated Badger rally in the last period when the Cards marched from their own 29-yard line to the Irish 22-yard marker, was cut short by the final gun. The fine work of Karl Schuelke in passing and running, Lynn Jordan and Bob Null, made the last period yardage for the Badgers.

Northwestern 7, Wisconsin o

A lethargic Badger team extended its conference losses to two, when it bowed

CALLAHAN

Page 199

Pohl

to Northwestern on the rain soaked gridiron at Dyche stadium in Evanston. The Badgers only threatened to score twice, once when a pass from Jordan to Jankowski placed the ball on the Wildcat 7-yard line late in the first quarter, and again in the third quarter, when another series of passes brought the Cardinal forces within the Purple 10-yard line. The Northwestern line, however, withstood all the pounding offered by the Cards at both opportunities.

Freddy Lind made the lone Northwestern score when the Badger left tackle was drawn out of position, on a diagonal 28yard run through the Badger secondary.

Strangely enough, it was the Badger aerial attack, despite the rain, which most annoyed the Wildcats, the Cards making much more yardage through the air, never, however, being able to make one of the passes count for a score. The Badgers wound up with a total of 276 yards gained to Northwestern's 173, and 10 first downs to the Wildcats' 7.

Wisconsin 10, Michigan o

Scoring their first conference victory in two years, the Badgers laughed at Michigan the following week at Ann Arbor, coming through on the brighter side of a 10–0 score. What probably was the most spectacular play of the season came at the opening whistle, when Lynn Jordan, Badger halfback, received the kickoff on his own goal line and behind perfect interference, ran 100 yards to a touchdown.

Thereafter the Badgers played the Michigan style of play, passing occasionally, punting, and praying a lot. The Wolverines never seriously threatened the Badger goal line, although they tore the Cardinal line to shreds during the earlier periods of the game, never, however, reaching a scoring position. "Mars"

WRIGHT

FISH

Page 200

Michigan Game

Pacetti was another luminary for the Badgers, blocking a Michigan punt, then recovering the ball on the Wolverine 9-yard line. After line smashing attempts by Fontaine had failed, Pacetti booted a placement from the Michigan 19-yard line for an additional three points.

Wisconsin 7, Illinois 3

What probably was the most brilliant and inspiring victory for the Badgers came the following Saturday, when at the Homecoming game with Illinois in Madison, the Badgers upset the Illini's chances

Christiansen

for a share in the conference championship to a 7-3 tune.

Before Pat O'Dea and a crowd of 28,000 Homecoming fans, the Badgers played the inspired type of football which is a sight for sore eyes to any Coach. The threatened aerial and trick attack of the Zuppkemen was smothered thoroughly by the fast charging Badger line and by a a specially conceived secondary defense which was practically air-tight against the "flying trapeze" and "razzle dazzle" type of offense.

Wisconsin scored early in the second

MAHNKE

Page 201

DEANOVICH

period when Allen Mahnke, Badger center, snared a blocked Illinois pass and ran the remaining 20 yards unmolested for a score. Pacetti converted. The fine work of Pacetti and Milt Kummer at the guard positions, and Haukedahl and Null at ends, bolstered up the line to the extent of its turning in the finest performance of the season.

Minnesota 34, Wisconsin o

An irrepressible horde of Vikings from Minnesota invaded Camp Randall the following Saturday for the Badger's closing game, steam-rollered their way over the Badger wall for a 34–0 triumph. The Badgers fought hard and fast, but they were no match for the more powerful Gopher team.

The Vikings mowed down the Badger forwards like wheat. A multitude of Gopher backs, including All-American Pug Lund, Alphonse, and a host of others, tore through the Badger line like paper. The score might have been lower if the Badgers had not been so determined to score against the mighty foe, but they were determined and the Badger aerial attack was swallowed by the Gopher secondary, a majority of the Badger passes being intercepted.

The Cards only threatened to score once late in the first half, when Ed Christiansen blocked a Gopher punt and Swede Jensen recovered for the Badgers on the Gopher 19-yard line. A Badger pass from Jordan was intercepted by Svendsen, Minnesota, and the only hope faded.

Cross Country Champions

Vea Roderick Kleinschmidt Jones James Lashway Ruenzel Mohrhusen

FINISHING in a tie with Indiana for the mythical conference dual meet championship, Wisconsin's 1934 cross country team went through its schedule of five meets undefeated.

Under Coach Tom E. Jones' guidance, the Badger harriers developed from a green, inexperienced squad with only two lettermen, Captain Henry Lashway and Evan James, into one of the most powerful aggregations in the Big Ten. A trio of outstanding men, Jerry Mohrhusen, Karl Kleinschmidt and Norman Ruenzel, carried the team to unexpected heights and upset such strong hill and dale squads as Iowa and Illinois.

Opening the season with a triangular run against Milwaukee State Teachers' College and the Milwaukee Y. M. C. A., the Badger harriers demonstrated that they would be a difficult team to beat. Jerry Mohrhusen took first place and the remaining Cardinal runners finished well up among the leaders to earn the low total of 25, while the State Teachers' had 31 and the Y. M. C. A. 78. In beating Purdue by a 15–40 score, Jerry Mohrhusen and Evan James tied for first, while in the run against LaCrosse Teachers' College, six of the Card harriers, Mohrhusen, Lashway, Kleinschmidt, Vea, Ruenzel and James, locked arms to break the tape together. This meet was won by the score of 15–49.

Continuing its practice of finishing bunched up at the head of the pack, four Badgers, Mohrhusen, Kleinschmidt, Lashway and James, finished in a tie for first place to defeat a supposedly strong Iowa squad by the score of 17–40.

Homecoming morning found the Illinois cross country team, which claimed the Big Ten crown last year, although no championship meet was held, opposing the Badger harriers. The Illini team, composed mainly of veterans, had not been defeated in two years of cross country campaigning previous to the 22–37 defeat at the hands of the Cards. Thus Wisconsin retained its undefeated status and a share in the 1934 conference dual meet championship.

Page 204

BASKETBALL .

Foster's First Year

WHEN records are filed away for posterity, the scribes will undoubtedly place a star on that of Bud Foster, who is now enjoying his first Big Ten basketball title as a head coach. Although his Badgers ended in a triple tie with Purdue and Illinois for the 1934-35 championship, Bud has fondly caressed the crown much as a mother pets her first-

born. Skeptics and downright antagonists to Bud's appointment last July were burned to the collar over the "injustice" done to the grand old game, and predicted sudden doom for Bud and his cagers when the official conference schedule would open.

Bud Foster's ideas were different. After being directly under the wing of Dr. Meanwell for nine years, Bud was well versed in handling basketball men. In 1928–29 and 1929–30 he had been named as Wisconsin's only all-conference for-

ward, and in the latter season he crashed the All-American ranks, the only Badger ever to be honored in such style.

After graduation, Bud continued his cage play among the finest in the sport acting as keyman with the Oshkosh big league five for four years. Returning in 1933, as freshman basketball coach, Bud launched a huge yearling tournament from which he graduated in 1934 to the chair he will hold indefinitely . . . the youngest Big Ten mentor.

Foster's early basketball history is one for the historians. He had never seen a basketball before he found himself as the gawky center on a Mason City, Iowa, high school scrub five. With a short minute left to play, Bud took the tip-off himself and plopped one in from the center circle. That started it. But during his sophomore year, 1928, when he was an important cog in Doc Meanwell's highgeared team, Bud was declared ineligible because he had competed in an independent tournament in Chicago with several of his high school team-mates. A loophole in the conference regulations finally allowed Bud to re-

enter Big Ten compe-

tition, and from there

Wisconsin got its first

championship in five

years, a coach who

stands ace-high in cam-

pus traditions, and a

revival of the halcyon days of Doc Mean-

COACH FOSTER

temperaments, foibles, etc. It isn't very many years since Bud was among the toiling up Bascom Hill to an eight o'clock class, and his elevation to head coachship hasn't stolen his humor and keen understanding of "the boys."

Bud is one of them. He is their coach, but more than a coach, he is a friend. He knows their respective humors, whims and moods, and knows what each one asks for in the matter of understanding and treatment—and he responds. That's what makes Bud Foster a great coach, and even more than that, a great man to the campusat-large. Wisconsin has nothing to worry about with a man like Foster, who can give a basketball team, something more than the game.

Page 206

Conference Champions

BASKETBALL SQUAD Loughan Gilbert Steen Foster Fallon Garrott Reinhardt Fuller Wegner Hammann DeMark Jones Preboski McDonald Stege Poser

WISCONSIN entered its 1934-35 basketball season with an all-veteran team, but under the tutelage of a new coach and a new-comer to the major circles of college basketball coaching. The youngest coach in the Big Ten, Harold T. Foster, assumed his new duties under a tremendous handicap. His predecessor, Doc Meanwell, let with him his 1933-34 team intact . . . a team which had tied for second the previous season.

Badger fans were clamoring for blood. They wanted a conference basketball championship brought to Madison. And they were out for blood . . . if they didn't get that championship. Abuse of all sorts was heaped upon everybody's heads by the "misanthropes" for the selection of as young and inexperienced a coach as Foster.

Foster thumbed his nose at the critics, however, and brought the boys through with a one-third share of the conference championship, the Badgers going through a difficult schedule with nine victories and three losses in the conference, and six wins and two 'osses among non-conference competition.

With such seasoned veterans as Chub Poser, Gilly McDonald, Nick DeMark, Ed Stege, Bob Knake, Pete Preboski, and Ray Hamann returning, and such sterling sophomores as "Buck" Jones and Gordon

Poser

Fuller making their varsity debut, as his nucleus, Foster went to work in earnest, shaping his championship aggregation.

The squad got off to a bad start, surrendering their opening practice game, to of all things, the freshman team. That loss did them more good than harm, however, and set them for their intercollegiate debut against Franklin college, which they romped through for a 34–11 victory, Chub Poser garnering scoring honors with four field goals and three free throws.

Slackening somewhat, the Badgers managed to stave off a late Carleton college rally to nose out Carleton 27–26 in a second non-conference game. Wabash came and was conquered 33–20, Pete Preboski taking scoring honors this time. Gordie Fuller led the sophomore basketeers in scoring this game, running up 6 points in the short space of time he played.

Bob Knake was lost to the Cards through ineligibility at this point, and Coach Foster set about looking for another center to support Stege, finding a perfect replacement in "Buck" Jones, sophomore pivot.

The first big game of the season against Marquette at the fieldhouse found the Badgers on their toes, coming through with a 29–20 victory, Gordie Fuller holding Cy Rubado, Hilltop high scorer, down to new low scoring honors. DeMark, Stege and Poser each accounted for 7 points.

Beginning their Christmas recess, activity against Marquette the following week at Milwaukee, the Cards were handed their first defeat 33-25. A second

McDonald

Page 208

non-conference loss was suffered against the powerful Pittsburgh five, 31-27, the following week. The Badgers set their teeth, however, and came ahead a bit later to down the strong Michigan State quintet, 23-21, at the fieldhouse.

In the conference opener against Purdue at the end of Christmas recess, the Badgers lost a heart-breaker 19–18 before a near-capacity crowd at the fieldhouse. A doubtful foul call gave the Boilermakers a last minute point which put the game on ice. The Badgers outplayed Purdue, conceding a majority of points, however, on free throws resulting from personal fouls.

The following Monday night the highly touted Northwestern five, then potential conference champions, was set back 12–9 in what was probably the most perfect defensive stand made by the Badgers all

DeMark

IONES

season. Ed Stege took scoring honors with three baskets and three free throws, comprising nine points.

Traveling to Bloomington the following Saturday night, the Cards maintained their top form, gaining their third conference victory over Indiana, 30–23. Pete Preboski still in high shooting form connected for 14 points. The work of Sophomore Jones at the pivot position was also outstanding.

Still running at high speed the Badgers returned to Madison the following Monday night to rout Michigan, 34–20. Preboski again took scoring honors with field goals and a free toss for nine points.

The second setback of the season came at Evanston the Saturday night of that week, when Northwestern, keyed up to a peak never again evidenced by the Purple during the remainder of the season, handed

Preboski

Wisconsin a 36–31 beating. The Badgers played a good game, but just couldn't overcome the spirited offensive drive and defensive stand of the Wildcats, falling from second to fifth place in conference standings. A total of 15 fouls was also helpful to the Purple.

Meeting Minnesota at the fieldhouse, the Badgers struck hard and fast, bewildering the Gopher defense with their smart and fast floorwork, to emerge on the long end of a 38–31 score, rising to fourth place. Preboski again took scoring honors with 12 points, DeMark a close second with 10.

From then on the Badgers clicked smoothly, smashing down obstacle after obstacle. Chicago came to the fieldhouse and was nosed out 26–24, after a spirited second half rally by the Badgers. The Maroons led at half time, but could not withstand the strong offensive drive of the Cards during the later stages of the game. Gilly McDonald's work in holding down the scoring antics of Bill Harlow, leading conference scorer, was little short of sensational.

Probably the greatest thriller of the year occurred when Indiana invaded the fieldhouse in a return match before a capacity house. The Badgers ran up a rather substantial margin by the end of the first half, but a second half rally by the Hoosiers brought the game to a 27–27 standstill at the final gun.

While 8,500 fans yelled themselves hoarse, both teams returned to an overtime period of play. Presenting an airtight defense which the Hoosiers were unable to penetrate, the Cards went to work and potted five baskets for an addi-

STEGE

Page 210

tional 10 points before the end of the extra period. The victory brought the Badgers up to second place.

The following Monday night, the Badgers invaded the Minnesota fieldhouse at Minneapolis, a last second basket by Chub Poser giving the Cards a 28–27 victory over the Gophers before a capacity crowd of 13,500.

Journeying to Ann Arbor, Wisconsin humbled Michigan, 33–19, scoring at will against the weak Wolverine defense. The victory gave the Badgers a tie for first with Purdue, in as much as Ohio State humbled the Boilermakers the same night. DeMark and Poser shared scoring honors with nine points each.

The following Monday night, Indiana humbled Purdue, giving the Badgers a

Fuller

HAMANN

clear first place, and a chance for the title, with Chicago the only obstacle. The Badgers came and conquered Chicago the following Saturday night, hitting peak form for a 48–25 victory, clinching at least a share in the conference championship.

Purdue alone stood in the way of an undisputed title, and the Boilermakers did remain in the way. A natural let down after the high pitch to which they were keyed against Chicago, found the Cards in poor shape against Purdue in the final game of the season and the Boilermakers rode to an easy 43–24 victory. Illinois gained a share in the championship by defeating Michigan that night, and Purdue made it a threesome by beating Northwestern the following week.

Climaxing a successful season, the Badgers attained new honors in the selection of Chub Poser and Gilly McDonald to pair at the guard positions on practically every newspaper and honorary all-conference basketball team named. Chub's great offensive and defensive work all year earned him the honorary position, while Gilly's marvelous defense tactics in holding such high scorers as Harlow of Chicago, Fisher of Northwestern, and Cottom of Purdue, drew him recognition. Wisconsin loses three great basketball players by the graduation of Chub Poser, Gilly McDonald and Ray Hammann.

National Champions

WISCONSIN'S undefeated boxing varsity, following the great 1935 season, lays claim to the national intercollegiate championship on reasons which have mounted with three years of competition in College fistiana.

It was not until the Badgers invaded the East for the first time in amateur ring history on March 2, to defeat Pittsburgh university, $5\frac{1}{2}-2\frac{1}{2}$, that the sideliners began to take notice of this savage, cleancut fighting squad. Despite the exhausting trip, three Badgers found enough kick in their mitts to knock out three of the more prominent Panthers. Russell, Harmon, and Wright all put their men to sleep . . . with the latter's win coming as the surprise of the trip. Stupar, who has beaten everything in the lightweight class in two years, was the victim of one of those home-town decisions to Capt. Tony Giannatti, Pitt ace. The other loss was chalked against Nick Deanovich in the light heavy class. Didier pummelled his man with obvious consistency, but was handed a draw . . . which in Eastern boxing gives each team one-half point.

In the season's opener at the fieldhouse March 8, the Badgers upset a strong Michigan State team, 6–2, before 5,200 fans.

The losses were handed to Ralph Russell who,

under the handicap of a painful broken nose, barely was beaten by State's rangy flyweight, Wendell Genson, and Deanovich, who dropped a close decision to Jack Vecerrelle. Heavyweight Jim Wright stole all the honors in this match, winning his second straight with a driving win over an experienced pachyderm.

Running true to form, the Badgers then swamped the Haskell Indian representa-

HARMON

RUSSELL

Didier

STUPAR

WALSH

tives, 7-2; this time before a frenzied crowd of 6,900. Knockouts were the rule for the evening, four Indians hitting the resin during the card. Stupar, Didier, Zynda, and Deanovich scored by the knockout route.

When Syracuse university, three year National Intercollegiate champions, became the fourth victim of Wisconsin on March 22, Manager George Downer immediately put in a mythical claim for general recognition. Wins by Zynda and Didier over their champion opponents, were the deciding bouts of the night. Both the losers, George Negroni and Art McGivern, respectively, were titleholders in the Eastern tournaments. Before 8,000 customers the Badgers let themselves go and literally tore the visitors off their feet. Again six bouts went to the Badgers and two to Syracuse.

All sorts of records fell when Wisconsin made it five straight by outpunching West Virginia, Eastern conference kings for four straight years, 6–2. The crowd of 9,200 broke all existing records for attendance at a college ring show, smashing the local fieldhouse mark of 8,735, and definitely marking Wisconsin as the strongest center in college fighting. The Badgers won the first five bouts; then, for the first time this year one of them was knocked off his feet when Ashby Dickerson, Mountaineer heavy, knocked Jim Wright off his feet and out. Thereafter, it was still Wisconsin's night, with one exception . . . Capt. Pete Puglia repeated his 1934 performance by defeating Russell.

In the season's windup, 6–2 was again the count over the Northwest Golden Gloves champion, the University of North Dakota. The Nodaks fought much the same style as the Badgers and they brought with them two three-year Golden Gloves champs, Owen Trickey, lightweight, and Ken Brown, 155 pounds. Both were upset by Stupar and Harmon, pride of Badger partisans. The capacity of the fieldhouse was again taxed with 9,100—ending the most successful year boxing has ever enjoyed in any university.

ZYNDA

WINTER SPORTS . . .

Indoor Track

WINNING every dual and triangular meet in which they participated and placing third in the Big Ten indoor track meet, Wisconsin's tracksters completed a very successful indoor campaign under the effective coaching of Tom Jones, veteran Badger mentor.

Opening the season with a 47-39 victory in the annual meet with Marquette, the Badger trackteam gave notice of being one of the outstand-

ing aggregations in the Big Ten. Karl Kleinschmidt led the Cards to their initial win by scoring firsts in the mile and half mile runs after exhibiting a last lap kick that was to aid him in concluding the season undefeated. Four other first places out of ten events were garnered by the Badgers in defeating the strong Hilltop contingent. In the shot put, Irv Rubow, consistent weight man, broke the meet record with a heave of 46 feet 5 inches, to win his specialty. Captain Bobby Clark, veteran timber-topper, won the high hurdle race, while Carleton Crowell took a first place in the 440-yard dash, upsetting

the Marquette favorite. The Badgers swept the pole vault through the efforts of their sophomore vaulters, Al Haller, Lou Hirschinger and Sam Scharff.

The second victory of the campaign was earned in a triangular run at the expense of Northwestern and Purdue, as the Cardinal thin-clads garnered five firsts and placed in every one of the remaining five events. By virtue of their well balanced scoring power the Badgers amassed a total of 57²/₃ points, while the Boilermakers came second with 38 and the Wildcats third with 31¹/₃. Once again Karl Kleinschmidt, diminutive Badger middle distance man, spurred the Cards on by his last lap spurt in winning the mile run. Irv Rubow also repeated his previous performance by winning his event, the shot put, with a throw of 46 feet 9¹/₂ inches,

while Al Haller cleared the bar at 13 feet to win the pole vault event. Other contests in which Wisconsin took first place were the two-mile run, in which Jerry Mohrhusen was the winner, and the high jump, in which Lew Dorrington leaped 6 feet to gain high honors.

Sweeping four events and scoring first places in six of the remaining seven contests, Wisconsin overwhelmed Minnesota by a score of 75–20 in a dual meet held at the field house. Outstanding features of the engagement were the double wins of Captain Bobby Clark, in the high and low hurdles, and Karl Kleinschmidt in the mile and half

mile events, the line Gopher win by Wayne Slocum, in the two-mile run, and the breaking of three meet records in the half mile, 60-yard dash and 60 yard high hurdle event. Wisconsin vaulters again dominated their event when Al Haller, Lou Hirschinger, Sam Scharff and Ward Parker finished in a tie for first place at 12 feet 6 inches. With Crowell, Stiles and Albright finishing in one, two, three order, the Cards also shut

the Gophers out of the scoring in the quarter mile run.

Traveling to Chicago to take part in two invitation meets, the Central A. A. U. meet and the Armour Tech Relays, the Badger thin-clads acquired new laurels. In winning the former engagement the Cards pulled a surprise victory by a half point margin. Wisconsin won four events, the shot put, 1000 meter run, 65 meter high hurdles and the 1600 meter relay. The Armour Tech encounter was not as successful but the Cards nevertheless made a creditable showing. Karl Kleinschmidt continued his fine running in this meet to garner a victory in the 880 yard run.

The Big Ten indoor meet was the climax of the season as Wisconsin, slated

CLARK

for a low standing, came through to place third with 181/2 points. Michigan, overwhelming favorite to gain its second consecutive title, rolled up a total of $49\frac{1}{2}$ to set a new record for points scored in a conference meet. Ohio State placed second with 22 markers, while Iowa took the fourth position by virtue of its 17 points. Kleinschmidt once more showed great ability to score a first place in the half mile run in the fine time of 1:56.5. Other scorers for the Badgers were Rubow, with a second in the shot put, Clark with a third in the 70-yard high hurdles, Scharff with a fourth in the pole vault, and a second by the mile relay team of Albright, Stiles, Kay and Crowell.

Piling up a remarkable total of 501/2 points by virtue of taking six of a possible ten events, the Badger tracksters closed their indoor campaign in a triangular run against Iowa and Northwestern. The Hawkeyes took second place with 3916 points while the Wildcats earned 181/2 Karl Kleinschmidt and Jerry Mohrhusen paced the Cards with 71/2 points each. The Badger stars locked arms to tie for first place in the mile run, several yards ahead of the field. Kleinschmidt also won the half mile run, when he set a new meet record of 1:58.6, while Mohrhusen duplicated this feat when he eclipsed the previous mark by completing the two mile run in fine time of 9:55.9. The Cards also garnered wins in the shot put, 440-yard run and the pole vault.

The 1934-35 season marked one of the most successful campaigns that Coach Tom Jones had experienced in several years. It was a good indication that Wisconsin's cindermen will once again attain former heights.

This Matter of Ice

HOCKEY became a sore spot to Coach Art Thomsen during the 1934-35 season. The very mention of the word at present is apt to stir him to the heights of oratorical fuming attainable by only the more vitrolic sportsmen. Not that Art has anything against the grand old puckshooting game; on the contrary, there's nothing he likes more than to get out on the ice and shove the little old puck around. But that's the catch . . . the ice.

For years the University of Wisconsin has been accorded the title of the "Winter Sports Center of the West" . . . But in spite of the packs of snow on Madison hills it is very rarely indeed that Hockey Coach Thomsen has gained anything at all out of the wintry winds. For just as quickly as the snow and cold come, the sun comes along and wipes out all the ice of the night before.

The 1934–35 season was a peculiar collection of headaches and surprises for the pucksters. They couldn't persuade the weather man to leave enough ice on the lower campus rink for a single real practice session before their opening games during the Christmas holiday period. And considering these limitations, their record against up-state Wisconsin teams was more than fair showing, the boys managing to gain better than an even break against such sextets as Wausau and Green Bay.

But when the time came for their annual contests with Michigan and Minnesota, "the jig was up" . . . The weatherman just wouldn't cooperate and the Badgers went down to Ann Arbor hardly knowing what it felt like to hold a hockey stick again.

The rest is easy to guess, and the boys were to be commended for holding the powerful Wolverine sextet to a 2-1 score in the second game.

Minnesota was just another nightmare. This time they had a riot thrown in. The score was 9–0, Minnesota.

Chuck Heyer and Ed Gillis particularly stood out. Both boys received places on the All-West team and if such an accomplishment in the face of those odds doesn't deserve some sort of recognition, Art Thomsen misses his guess.

---And Water

A LTHOUGH Badger swimmers failed to win a conference meet, they displayed their best form in the past three years by annexing seventh with a two man team at the Big Ten meet at Urbana.

Several elements combined to make the 1935 season another lean year. The most important, was lack of facilities and backing.

Eddie Kirar, ace dash man, was the most consistent performer and individual high scorer. Undefeated in the 60-yard dash throughout the entire season, Kirar was barely nosed out by Flockman of Illinois in the 50-yard dash in the conference meet. Tony Traskell followed Kirar to the tape to complete the Badger score of seven points. Although Carl (Ike) Simonsen was a consistent point winner throughout

SIMONSEN

the season, he failed to qualify in the dives in the conference tilt.

Completing the Wisconsin roster were Roger Pryor and Bill Curkett, dash men; Captain John Hickman, long distance man; Dick Marcus and Norm Westerhold, breast stroke; Tom Ockerhauser and Vince Grudzina, back stroke; and Dave Van Epps, dives.

Wrestling

A LTHOUGH winning 16 individual bouts during the season, the second under the tutelege of Coach Paul Gerling, Wisconsin wrestlers were unable to gather more than four victories at one encounter and failed to win a single dual meet during 1934–35. Heading the scanty list of winners was Rudolph Haase, plucky 118 pounder, who won six of eight matches. Against Minnesota and Northwestern he accounted for lone Badger wins.

Second was Fred Wenzel, capable 175 pound sophomore, who turned in four victories, three by the fall route. Other winners were Captain Matt Regner, Dean Mory, Louis Popuch, and Dave Mesiroff.

Perpetually powerful Purple Panthers from Iowa State Teachers' College opened the season December 21 by swamping the Cardinal 55 to 6. Mory scored all of Wisconsin's points. A disastrous weekend road trip January 11, saw Wisconsin lose to Northwestern 54 to 20, to Illinois 74 to

o, and to Wheaton 21 to 9. Wenzel and Haase each won two over the weekend, while Regner and Mory took one each.

Wheaton, Little 19 champions, edged Wisconsin at Madison 40 to 37 to start the second semester, with Haase, Mesiroff, Wenzel and Moore scoring. Chicago's first conference victory was at Wisconsin's expense 38 to 30. Again Haase and Wenzel scored victories with Popuch providing the third win.

Minnesota triumphed at Minneapolis 29 to 3, Haase saving the Badgers from a

Broming

shut-out. For the first time Northwestern defeated Wisconsin at Madison, turning the trick 55 to 14 to end the season March 2. Haase's fall over DeCaprio was good for 10 of Wisconsin's few points.

A two man team of Haase and Wenzel represented Wisconsin at the Big Ten championships at Chicago, March 8 and 9, where Haase placed third. Easy decisions over DeCaprio, Northwestern, and Ware, Chicago, in his bracket, put Haase into the finals. Fauver, Ohio State, won the crown. The Scarlet and Grey grappler was the first in 11 bouts to win Haase. In the consolations Ledbetter, Illinois, won a decision to put Haase in third.

Wenzel fell before Silverstein, 175 pound Big Ten champion, after a skillful battle in the first round. In the consolation match Wenzel lost to Stanul, Northwestern. (Not since the days of Jack Scott, 1931, has a Wisconsin wrestler placed at the conference.)

> Winners of 1938 numeral awards were Mead, Hauser, Beecher, Lederman, Rodd, Moore, O'Connell, Feinberg, King and Rothstein.

> George Broming, captain, who graduated at the end of the first semester, was handicapped by injuries and competed in only one meet. Members of the varsity squad who saw action during the season were Feinberg, Ray Christensen, Dettwiler, Lee Sharff, Ed Walsh, Pentler, Cole, Schiesl, Terwilliger, Paulson, Bloedorn, and Schultz.

SPRING SPORTS . .

.g.

Baseball 1934

Wegner Brilty Capicek Schoenfeld Ross Williams Wolk Heyer Baer Poser Church Carlson Schilling Tomek Uteritz (Coach) Gerlach Nordstrom Klink DeMark Vaicek Krause

A FTER a slow start which resulted in losing six of its seven conference games, Wisconsin's 1934 baseball team gathered momentum and won the last five Big Ten engagements to end its season with a percentage of .500 in a tie for third place with Michigan.

Opening the campaign on the spring vacation road trip, the Badger nine encountered Illinois Normal, Bradley Tech and De Kalb Teachers College in five games with a net result of two victories and three defeats.

Boasting of a slugging team in comparison to the weak showing, Coach Irv Uteritz's charges had made with their bats, Illinois came to Madison to engage the Badgers in their Big Ten opening game with one conference victory already under its belt. The starting infield of Church, Heyer, Nordstrom and Klink, functioned in errorless fashion behind the pitching of Carl Vaicek for six innings, but cracked toward the end to give the Illini a 5–1 victory. Minnesota, 1933 conference champions, then encountered the Wisconsin nine in a two-game series, which resulted in a split series. The Cards lost the initial engagement by a 7–6 margin, and came back the next day behind Carl Vaicek's six hit twirling and the timely hitting of Chuck Gerlach, to blast out an 8–5 triumph.

Revising the lineup for the Notre Dame game by putting Chet Carlson in left field and Woodrow Schilling on third base, Coach Uteritz presented a team that beat the Ramblers 6–4. Chub Poser's pitching baffled the Irish for eight frames, but it took the combined hitting of Church and Heyer to break a 4–4 tie and put the game on ice.

Jointly occupying (ninth place in the Big Ten standing, Northwestern encountered the Badgers in a single game and emerged the victor by an 11–4 score. The Card bats were conspicuously weak and the combination of the heat and the Wildcat hits caused Vaicek to allow Northwestern to score freely.

In the rubber game with Bradley Tech, the Cards turned loose a barrage of base hits, which combined with the good pitching of Poser, gave them a 10-5victory. Wisconsin shook itself from its batting slump and collected 17 blows of which Gerlach and Heyer made three each.

Leaving Camp Randall, the Badgers met Chicago and Illinois on successive days. The Maroon fray was a wild hitting affair which coupled with erratic fielding by both teams resulted in a 13–10 victory for Chicago. The Illini engagement was more closely fought with Chub Poser giving them only seven hits, but nevertheless going down to a 4–2 defeat.

Wisconsin's 3-2 defeat of Western State Teachers ended the latter's 16-game winning streak and started an uptrend in the brand of baseball played by the Cards. On the following day Waukesha's American Legion team engaged the Cards and were defeated when Nordstrom hit a home run with a man on base to make the score 7-6.

A Minnesota rally, coupled with a Badger error, served to give the Gopher a 9–8 win, when the Cards traveled to Minneapolis to play a two-game return series. Wisconsin came back the next day to even up the series with a 9–7 victory.

Hitting its stride as the season's end grew near, the Badger nine took two contests from a highly touted Iowa team, 9–2 and 8–5, by virtue of home runs by Vaicek, Ross and Gerlach and the close pitching of Vaicek and Poser.

Thanks to Church's long home run with two men on base and Vaicek's fine twirling, Wisconsin defeated Northwestern 5-2 and rose to a tie for fourth in the Big Ten standing. The return contest against Notre Dame resulted in a 5-4 defeat, when a tenth inning triple broke a New Coach

"BOBBY" POSER

tie, which the Ramblers had created by scoring three markers in the ninth frame.

In the final encounter of the season the Badgers swamped the Chicago nine by a score of 18–5, in a slugfest, in which Vaicek, Nordstrom and Gerlach collected three safe blows each, the Cards thereby improving their standing from fourth to a tie for third.

With the departure of Coach Uteritz for the University of California, Athletic Director Meanwellappointed Bobby Poser, former conference baseball and basketball star, as the new coach of the nine. Coach Poser attends the medical school and is one of the youngest men ever to hold a Big Ten coaching position.

Outdoor Track 1934

THE 1934 outdoor track season, due to the lack of sufficient high class material, as well as the handicap of working under adverse weather conditions during the early part of the campaign, was a mediocre one and boasted of only one dual meet victory, against Minnesota. The record that the Badgers compiled was not an enviable one and consisted of a fifth place in the Big Ten meet in addition to the other fair showings that Coach Tom E. Jones' charges made.

Opening the campaign against a strong Marquette squad, after having previously defeated the Hilltoppers in the indoor meet, the Card cindermen went down to a 73–58 defeat at Milwaukee. The Blue and Gold trackmen scored heavily in the dash, 440-yard run, broad jump and javelin, while most of the Badger strength lay in the middle distance events. Paul Kreuger, Card senior, won both the half mile and mile runs to take high scoring honors for the Jonesmen. Other firsts were garnered by Irv Rubow in the shot put, Bobby Clark in the hurdle event, and Rudy Rotter in the discus.

Entering a four-mile relay team in the Drake Relays, on the following Saturday, the Badger quartet of Paul Kreuger, Karl Kleinschmidt, Bob Lange and Jimmy Schwalbach, placed

fourth.

While the best middle distance and distance men were competing in this meet, the remainder of the squad, led by Ward Parker, who captured three contests, encountered Milwaukee State Teacher's College in a dual meet and emerged the victor by an 89^{3}_{4} to 50^{1}_{4} score. Parker, versatile field event star.

KRUEGER

turned in the most brilliant performance of the afternoon, winning the broad jump, shot put and tying for first in the pole vault.

Still seeking their first Big Ten victory, the Jonesmen encountered Northwestern and Iowa in a triangular run, which

SMITH

ALBRIGHT

proved to be the closest meet ever run in Camp Randall. Iowa won the engagement by virtue of its 55 points, while Wisconsin and Northwestern were tied with 54 each. Scoring honors in this meet went to Irv Rubow, sophomore weight star, who garnered ten points in the shot put and the discus. First places were also earned by Jimmy Schwalbach, in the two-mile, Eldon Ledman, in the pole vault, and Paul Krueger, in the half-mile run.

Scoring nine first places and tying for first in another, the Wisconsin trackmen overwhelmed Minnesota, 84–46, for its first victory of the outdoor season. Krueger and Kleinschmidt accounted for twenty points between them, when the former won the half-mile and tied with the latter for first place in the mile. Captain Bert Smith and Lew Dorrington tied for first place in the high jump with a leap of six feet, while the trio of Badger javelin throwers, Schlanger, Kabat and Zynda, swept their event. Bobby Clark and Herb Sruewe, Wisconsin's premier hurdling duo, placed one-two in both the 120-yard high and 220-yard low hurdles.

By virtue of scoring 17 points the Wisconsin track team tied Ohio State and lowa for fifth place in the 34th annual Western conference track and field meet, thus scoring the biggest upset of the 1934 outdoor season. Irv Rubow, rated high scoring honors for the Badgers by placing third in the shot put and the discus. Bobby Clark, ace Card timber topper, scored five points, taking third in the low and fourth in the high hurdle events.

Closing the outdoor campaign in a quadrangular meet with Northwestern, Ohio State and Chicago, the Badger thinclads garnered $41\frac{1}{2}$ points to take third

STEUWE

place behind the Wildcats, with 5234 and the Buckeyes with 51³/₄. Chicago placed fourth with 18 points. The Cards could win only two firsts in this meet although many minor places served to swell their total. Irv Rubow, with a victory in the shot put and a third in the discus, and Bobby Clark with a win in the high and a third in the low hurdles led the Badgers.

Crew

FIVE years in the doldrums was enough for Wisconsin's crew advocates, and in March, Dr. Walter E. Meanwell and Coach Ralph Hunn, successor to the resigned Mike Murphy, got together and drew up the most vigorous water program in Badger rowing history. Coach Hunn, who has been related almost to boats since he was 10 years old, has developed one of the strongest eights to splash Lake Mendota in his first year as coach.

Although the season of 1934 was exceptionally lean—only one varsity race and two freshman pulls run off—the material was graded very high. Most of the oarsmen were veterans with four and five years of experience and to further the testimonial, Coach Hunn organized Wisconsin's and the nation's first summer school crew with the residue of the official squad. Three races took up the schedule: decisive wins over a Green Bay shell at Green Bay, and two victories over the Milwaukee Boat club.

In the fall of 1934, the varsity, under the hand of Hunn, ran up a five-length win in the third Milwaukee Boat club meeting. The frosh were nosed out by the St. John's varsity by 10 feet. Crew prospects for 1935 are high. The schedule calls for at least four varsity races, two for the jayvees, and five for the freshmen. The top races include entry in the Marietta regatta on the Ohio River, June 1, and a tentative pull with the Poughkeepsie champions, the University of Washington, on June 8 or 10.

The season opens officially against Marietta College on Lake Mendota, May 18. Frosh and jayvee races will also be run off.

1935 Crew Schedule (Tentative)

- May 18—Wisconsin Varsity vs. Marietta Varsity, Marietta Frosh, St. John's Varsity, Wisconsin Frosh. Semi-finals: Intramural crew. All races on Lake Mendota.
- May 25—Varsity, open date. Jayvee vs. Milwaukee Boat Club. Frosh vs. St. John's Varsity. Finals: Intramural Crew.
- May 30—Wisconsin Frosh at Culver Military Academy.
- June I-Marietta Regatta at Marietta. Crews entered are Wisconsin, Marietta, Pennsylvania, Syracuse (tentative), Manhattan, Rollins, and Rutgers.
- June 8 or 10—University of Washington, Wisconsin Varsity, St. Louis Boat Club. Frosh—Wisconsin and Washington. Jayvees—Wisconsin and Washington.

"W" Club

NOT to be outdone by the scholars who have made Phi Beta Kappa, the athletes in the university have an honorary society all their own. Known as the "W" Club, it is composed of all major letter winners in school. Under President Gil McDonald, the club has been exceedingly active during the past year. In directing the affairs of the "W" Club, McDonald was assisted by Chub Poser, Vice-President; Bob Knake, Secretary; Milt Kummer, Treasurer and Dr. Walter E. Meanwell, advisor. This is the first year that the club has had an adviser and experience has shown that the club has enjoyed the advantage of continuity of policy secured through the service of an advisory officer. When the matter was discussed, Dr. Meanwell was the unanimous choice and his cooperation with the club has proved invaluable.

The club assisted John Hickman, homecoming chairman, in officially welcoming Pat O'Dea back to the campus. Half of the proceeds from the week-end's student activities, including the "W" Club ball, at which Bernie Cummins played, accrued to the club's treasury. The lot of the athlete, with his many long hours of practice is not as glamorous as it looks to the outsider. The club seeks to reward these tedious hours by furnishing the athletes with entertainment and refreshments at each meeting from the proceeds of these homecoming activities. The proceeds also finance the club's annual banquet in the spring.

Increased interest in "W" club activities was noted during the past year, with a regular attendance of fifty members doubling the usual turnout of any of last year's meetings. The meetings were held every other Tuesday in the Beef-eaters' Room at the Union.

When the club first met in the fall it was decided that a constructive program would be established, and in each succeeding meeting the evening was given over to the discussion of one main topic.

One has only to peruse the list of activities of the group to realize that here is a live-wire, up-and-coming organization. The club assisted in the promotion of all phases of homecoming week-end; it made recommendations to the athletic board concerning regulations governing complimentary tickets to "W" men, and it went out of its way to make high school athletes here feel at home. The final event on the year's program was the sponsoring of the annual "W" club banquet.

Nominations for officers for next year include Ward Parker, Herb Stuewe, Lynn Jordan, Leonard Lovshin, Howard Huen, Ed Stege, Karl Kleinschmidt, Fred Wegner, Charles Heyer, and Nick DeMark.

Intramural Sports

BACKED by student sentiment and markedly extended, Intramurals, un' der the guidance of Prof. Guy S. Lowman, director, and Art Thomsen, assistant, reached a high peak in both participation and keenness of competition during the 1934-35 season.

A total of 2,860 athletes responded to the call of "sports for all" during the past fall and winter seasons—an increase of 444 over the same period of time for the preceding season. Of this large and ever increasing number, the independent ranks have been swelled most with approximately 330 more intramuralists than last year.

With the addition of six new tennis courts at the intramural field, came the announcement that independent tennis would be added this spring to the roster of activities for that league. Other sports which are to be played and some that have already been played for the first time in the independent league this season are golf, hockey, water polo and volleyball. Crew might be inaugurated in the dormitory league if sufficient interest for that sport is shown there this spring. At present only the Greeks enjoy shell competition.

The fraternity sports of winter and fall included slightly more participants than the preceding season, but indications point to a general increase this year.

Not satisfied with its second position in the 1933 touch football race, the Pi Kappa Alpha squad recruited enough reserve strength to come back and win the title in the 1934 season. The Sig Chis were second.

In the cross country race the Sigma Alpha Epsilons found themselves likewise favored when they finished with championship honors—after getting only the second spot last year. Alpha Gamma Rho was the runner-up for the crown. The Swimming title in the meet in which the numbers of entries reached a new peak went to the Phi Gamma Delta mermen, who dethroned the A. E. Pis, champs of last year; the Pis were forced to take the second best honors.

Contrary to expectations, a fighting Alpha Chi Rho volleyball team surprised the Phi Gams to win three tilts in the championship encounter and the subsequent crown. In order to play the final match in the hockey competition, the pucksters were forced to get up at 6:00 in the morning. The Madison weather was just too fickle to be depended on! Delta Upsilon retained its crown, defeating the Chi Phis for the second time to do so.

The 1934 cage titlists, Sig Phi Eps, were dethroned in the 1935 tourney by a game Sig Chi five, which had to stage a fast last minute rally in the title tilt to take the championship. Sigma Alpha Epsilon was conceded king of the cinders for another season at the Greek indoor track meet, with the Delta Sigma Pi thin-clads occupying the second berth.

In the bowling playoff the Phi Kappa Sigma keglers took first honors from the Sig Chis, who again finished in the second position. Repeating a previous last year's performance, the Sig Chis took the water polo title after a season marked with many forfeits. Beta Theta Pi took second honors.

The dormitory league also showed but a slight increase in participation in the 1934-35 fall and winter seasons, but the same keenness in the supremacy race again predominated.

The title in the touch football race was copped by Noyes' strong squad, while the Ochsner gridders finished in the second spot. Gregory came through for a championship in the cross country competition. with the Tarrant runner crossing the finish line in the second rank.

With a perfect slate of 13 wins in as many tries the Tarrant quint assumed first place in the cage tourney, while Frankenburger, though with but one loss, had to be content with the second position. The Frankenburger swimmers splashed their way to a victory in the annual meet, with the Noyes' mermen coming through for the second berth.

Gregory was conceded the top position in the indoor track meet, while Noyes again could only finish in the second position. Water polo found the Botkin poloists in possession of the title by virtue of its percentage of games won; Noyes ended in the second place, a position it occupied in the last three contests.

With an increase of 330 contestants, the independent league play was marked with the same high degree of competition, characteristic of that league. The cage loop showed the greatest increase when the number of teams in this season's play numbered 57 as compared with 28 for last year.

The Hockey squad copped the cross country title, while the Madison Stars took their first second place in this series of competition. The touch football crown went to the well organized Madison Stars, who had to defeat the Presby gridders to attain it.

Volleyball was inaugurated at this time, and the Wesley Foundation had the honor to be the first titlists. The Madison Stars ended in the second berth. Hockey was also a new sport, and the privilege of being the first champions went to the Copperheads, while the Presby skaters occupied the second position.

The Non-Stars, who decisively proved to be otherwise, entered into intramural competition with the swimming meet and garnered the top honors in it. Presby splashed its way to the second spot.

By leading a field of 57 teams, the Madison Stars duplicated its cage championship of 1934 by defeating the Presby-Allison Club in the finals by the narrow margin of two points. The winners then went on to defeat the Frosh cagers in the season's windup.

The Non-Stars ended the winter season with a dazzling finish by taking both the track honors and the water polo crown. The Madison Star thin-clads were second in the track tourney.

Conference Medal Award

ROBERT ALFRED SCHILLER, better known as "Bobbie" to Badger football fans, received the 1933–34 conference medal award for outstanding ability, both athletically and scholastically.

Serving in the first string Badger backfield for three years, Schiller earned a major "W" for every year of service. He also received a minor "W" in wrestling during his senior year. He was voted the most valuable man on the football team in 1933 by his team mates, and was also the recipient of the Harlan B. Rogers athletic scholarship for 1933-34.

A member of Beta Theta Pi fraternity, Schiller distinguished himself in the lecture hall, as well as on the gridiron. Receiving his degree from the College of Engineering, he maintained a 2.17 average during his four years at the university.

Most Valuable Player

THE election of Milt Kummer for the most valuable player award by the 1934 football squad did not come as a surprise to the Badger campus. A small but powerful guard, Kummer had fought his way to a first string position in his junior year during the luckless 1933 campaign, when he distinguished himself against such powerful foes as Purdue, Ohio State and Minnesota.

During the 1934 season he again displayed the bull-dogged tenacity in the guard position which earned the respect of opposing linesmen, not excluding Minnesota's All-American array. He joined with his team mates in stopping the aweinspiring "trick" attack of Illinois during the Homecoming game, helping the Badgers to earn an unexpected 7 to 3 victory.

Kummer was enrolled in the chemical engineering course of the College of Engineering. He is a member of Delta Kappa Epsilon and his home is Sheboygan.

MILITARY . . .

Instructional Staff

Capt. Nelsen Capt. Orsinger

Capt. Rogers

Lieut. Kunesh Capt. Dalton

WHEN Commandant Major Gustave J. Gonser died suddenly here last fall, the Wisconsin Regiment of R. O. T. C. lost one of its best friends and supporters. While Major Gonser was here the

COMMANDANT

CAPTAIN REMINGTON ORSINGER

corps increased and became one of the most efficient in drill and maneuvers among the Big Ten universities.

To fill Major Gonser's position, Capt. Remington Orsinger was appointed commandant of the university corps and has carried on the good work of his predecessor. Under Captain Orsinger, the corps has increased more rapidly than has the total male enrollment of the university and it now has an enlistment of 610 students as compared with 483 last year.

Also lost to the corps last year was Capt. George F. Fingerson, adjutant to the commandant, who was transferred to active service in the Hawaiian islands. Capt. Wm. F. Dalton was appointed adjutant to Capt. Orsinger. To replace Captain Fingerson, Capt. Norman Nelsen was transferred from active service at Ft. Niagara, N. Y. to the university and he now is instructor of the seniors in the advanced course.

The Wisconsin regiment is made up of three battalions of infantry and three companies in the Signal corps. The entire military training course is divided into two divisions; the basic course and the advanced course. Both are made up of voluntary enlisted students, but a student must have completed his basic course with high grades to be eligible for the ad-

Page 236

Cadet Staff

Haight Van Ryzin Maaser Schultz Etzler Pike

vanced course which is limited to 130 by the Sixth Army Corps Area headquarters.

The Instructional staff of the Wisconsin Regiment of R. O. T. C. is composed of Commandant Capt. Remington Orsinger; Capt. Wm. F. Dalton, adjutant to the commandant; Capt. Norman Nelsen, who is also coach of the drill team; Lieut. Harry L. Rogers, Jr., coach of the rifle team; and Lieut. Fred W. Kunesh, coach of the pistol team. All of these men are officers in the United States Army on detached service and are well qualified to teach Military Science and Tactics. Besides the above commissioned officers two non-commissioned officers, Sgt. W. Eslinger and Sgt. H. J. McGrath help with the instruction.

Cadet Regimental Staff

Appointed by the Commandant and the instructional staff of the university R. O. T. C., the Cadet Regimental Staff is made up of students in the advanced course.

Only students in their fourth year of military training are eligible for appointment to this staff and they are chosen on the basis of proficiency and leadership. The excellent morale of the Cadet Corps and the high efficiency rating given to the Wisconsin regiment by the War Department has been largely due to their influence and the example they have set.

This staff, which consists of the Cadet

Colonel, the Lieut. Colonel, the Regimental Adjutant, and the four Majors of the battalions, has charge of all parades and government inspections.

Rifle Team

VICTORS in either shoulder to shoulder or correspondence matches over every Big Ten rifle team, except the Minnesota championship outfit; winners of the runner-up's cup in the Hearst trophy corps area competition; conqueror of its state rival, Ripon College, in home-andhome engagements; masters of the alumni representatives in two out of three meets; and holder of fourth place in the Sixth Corps Area competition, the Wisconsin R. O. T. C. rifle team has completed one of its most successful seasons.

Final tabulations in the Western conference league standings show the Badgers in fourth place with wins over Ohio, Indiana, and Northwestern. Losses were sustained at the hands of Minnesota, Illinois and Iowa. The Minnesota match was fired at Minneapolis, the Badgers stopping at Fort Snelling en route only to suffer a two point defeat by a company there.

The annual shoulder-to-shoulder national sectional meet at Champaign, Ill., found the Wisconsin sharpshooters again placing fourth, this time, however, ahead of Illinois and Iowa, which teams had eked out wins over the Badgers in league matches. Lieut. Harry L. Rogers' able coaching found fruition in the individual shoots at Champaign, when Norbert Hennen won a first in the prone shot competition with 199 out of 200, and Captain Leslie Brackey placed third in the standing match with 172 out of 200.

Scores of Big Ten league matches and other dual meets: Wisconsin 1364, Ohio 1358; Wisconsin 1354, Indiana 1342; Wisconsin 1361, Illinois 1363; Wisconsin 1353, Northwestern 1306; Wisconsin 924, Ripon 885; Wisconsin 1252, Ripon 1228; Wisconsin 1319, Iowa 1322; Wisconsin 1338, Minnesota 1367; Wisconsin 1068, Alumni 1061; Wisconsin 881, Alumni 918; Wisconsin 1335, Alumni 1291.

The team tallied exactly 900 in the Hearst trophy shoot and totaled 1310 on the Champaign trip.

Drill Team

Hobbs

Haight

COMPOSED of two squads, two guides, and a team captain, the Wisconsin varsity drill team is an honorary organization and is made up of men picked for their proficiency in drill. The high efficiency of the men who competed for positions on the team necessitated an increase in the number of drill team members this year to 25 men. For the past two years this drill team has won first place in the the Wisconsin Reserve Officers spring roundup, competing against crack drill squads from throughout the Sixth Corps Area.

Pistol Team

THIS year's pistol team, under the proficient coaching of Lieut. Fred W. Kunesh and Sgt. Eslinger has won over three-fourths of its matches. Although it does not compete in any Corps of Conference matches, it has shot against practically all the leading universities and colleges in the United States. Some of the scores are: Wisconsin 1310, Princeton 1218 and V. M. I. 1308; Wisconsin 1307, Iowa State 1342, and Harvard 1264; Wisconsin 1351, Illinois 1329, and Texas A. & M. 1172; Wisconsin 1354, Oklahoma 1355, and Missouri 1365.

Omicron Nu is a national honorary fraternity, founded in 1912, at Michigan State College, East Lansing, Michigan, to sponsor scholarship and leadership in Home Economics. Eta chapter was established at the University of Wisconsin in May, 1915.

The activities with which the local chapter attempts to further its ideals consist in the annual award of a silver loving cup to the freshman home economics student having the highest scholarship average, in the presentation of a yearly scholarship to an advanced senior or graduate student, and in the tutoring of home economics freshmen.

When Alpha Zeta, the national honorary agricultural fraternity was founded, in 1897, its organizers decided that the purpose of the organization should be to promote the profession of agriculture; to establish, foster, and develop high standards of scholarship, character, leadership, and a spirit of fellowship among all its members; to create and band together a group of outstanding technical men who by scholarly attainment, faithful service, and maintenance of ethical ideals and principles, have achieved distinction.

Members of Alpha Zeta are selected from the Junior and Senior classes on the basis of the above mentioned qualities by the active chapter in cooperation with a faculty committee.

Present members of the group point with pride to the great number of alumni of the local chapter who have achieved distinction in the field of agriculture, with particular emphasis upon governmental administration.

Founded as an honorary economic brotherhood composed of men chiefly interested in the promotion of a more universal and accurate understanding of the fundamental economic concepts, election to Artus has come to be a coveted honor for "econ" majors at Wisconsin. The primary purpose of Artus is to stimulate sound and clear thinking in the field of economics and political science.

Members of Artus on the faculty are John L. Bergstresser, John R. Commons, Martin G. Glaeser, H. M. Groves, Harry Jerome, Chester Lloyd-Jones, George Keith, W. H. Kiekhofer, D. D. Lescohier, W. A. Morton, Selig Perlman, W. A. Scott, Nathan Silverstein, W. B. Taylor, H. B. Trumbower, and E. E. Witte.

Beta Gamma Sigma, national honorary commerce fraternity, was formed February 26, 1913, through a consolidation of three local honorary fraternities located at the Universities of California, Illinois, and Wisconsin. It was at Madison, however, that the decision to make election to the fraternity based on scholarship, personality, and potential capacity in business, was made.

A significant event in the history of Beta Gamma Sigma was its absorbing in the spring of 1933 of Gamma Epsilon Pi, a similar honorary for women. Since its inception, Beta Gamma Sigma has had a phenomenal growth, as forty universities now sponsor chapters.

By increasing the scope of its activities which have long been traditions at Wisconsin, Sigma Delta Chi, honorary journalism fraternity, this year proved itself one of the most progressive organizations on the campus. Its annual Gridiron Banquet and Gridiron Ball have become two of the campus' best established traditions.

At the Gridiron Banquet, the motif of which was the "Red Menace," a nationally known speaker and satirical skits covering a wide range of university and national activities provided the entertainment. Prof. John D. Hicks, of the history department, received the "Red Derby," each year awarded to an outstanding personality on the faculty.

A unique feature of Sigma Delta Chi meetings are the forum discussions conducted by speakers who have made their mark in the profession. Equally unique is the annual "mailing stunt" of the fraternity.

Haase Bridgman Gibson Fromer Jacobs Starch Nafziger Bernhard Bell

Weinberg Golz Betts Benowitz Fromme Hess Haines Hennen Liberty Theta Sigma Phi, national honorary Journalism sorority, is known on the campus as the organization which sponsors the annual Matrix Table banquet, a formal dinner, uniting women of town and gown, to which is brought an outstanding woman writer as guest speaker. Mrs. Mary Hastings Bradley, nationally recognized for her scientific writings on her African explorations and as a novelist, this year made the roth Matrix Table a memorable event. From the proceeds of the banquet the sorority maintains the Theta Sigma Phi Journalism Loan Fund.

The Wisconsin chapter is Beta, established in 1910, a year after the founding of the sorority, at the University of Washington. With a membership based on scholastic achievement, the sorority exists to further the interests of women in journalism and to encourage high standards of achievement in the profession. Membership is restricted to upperclass students.

Dr. Willard G. Bleyer, director of the School of Journalism, is an honorary member of Beta chapter, and the only male member of the sorority. Miss Helen Patterson, faculty advisor, is an alumna of the University of Kansas chapter. Honorary members of Beta are such noted writers as Edna Ferber, Zona Gale, Harriet Monroe, Aubertine Woodward Moore, W. G. Bleyer, and Honore Willsie Morrow.

Delta Phi Delta, national honorary art fraternity, exercised considerable influence in the stimulation of interest in art on the campus during the past year. This was accomplished by the sponsoring of several art exhibits in which both competition and attendance were commendable.

The aims of the society are to promote art interests among college students, to stimulate higher student scholarship, and to recognize potential professional ability.

In addition to the supervision of art exhibits, the society conducted receptions for famous artists who visited the campus during the past year. Delta Phi Delta points with pride to the membership of such laureate members as Lorado Taft, Birger Sandzen, and Levon West.

This spring the fraternity pledged fifteen new members, the largest group of pledges that the society has ever taken in at one time.

Honorary and faculty members include William H. Varnum, Alfred G. Pelikan, Roland S. Stebbins, Wayne L. Claxton, Della F. Wilson, and Helen W. Annen.

The national association of Eta Kappa Nu was founded at the University of Illinois, in 1904. The organization was founded by a group of Electrical Engineering students to unite those men, who, either in college or practice, had shown exceptional ability and great interest in the field of Electrical Engineering, into a unified group for the common good.

Theta chapter of this national honorary fraternity was founded here in 1910, and is one of twentythree composing the national membership. Since 1910, it has been growing steadily both in numbers and in spirit. The local organization started by instituting the policy of developing and following a constructive program each year. During recent years, projects of value to the department of electrical engineering have been started by the chapter. The past year's program included dinner meetings, with faculty members present, for the purpose of discussing problems of mutual interest.

During the past year Albert Vollenweider acted as president. Faculty members who are honorary members of Eta Kappa Nu are Edward Bennett, John R. Price, and James W. Watson. Other members of Eta Kappa Nu on the faculty include Royce E. Johnson, Grover C. Wilson, Ludvig C. Larson, R. Ralph Benedict, Frederick A. Maxfield, Vernon M. Murray, and James G. Van Vleet.

Pi Tau Sigma is an honorary national fraternity for students of Mechanical Engineering and others practicing that profession. The object of the organization is to foster the high ideals of the engineering profession, to stimulate interest in mechanical engineering departmental activities, and to promote the mutual professional welfare of its members in college and in practice.

Early in 1915, simultaneously, and unknown to each other, local honorary mechanical engineering fraternities, were organized at the University of Wisconsin and at the University of Illinois. On March 12, 1916, in Chicago a meeting of honorary and active members of both Wisconsin Alpha and Illinois Alpha resulted in the joining of the two local brotherhoods into a national organization under the name of Pi Tau Sigma.

Pi Tau Sigma now has 15 active chapters with a total membership of 1,775 on September 1, 1934.

Johnson Van Ryzin The Wisconsin chapter, Company A, 1st Regiment, of Scabbard and Blade, national honorary military society, not only led the way in forming the national organization, but has been a leader among the many chapters ever since the order started. This year the local chapter was especially active and completed the most successful year of its career. A basic drill team was inaugurated under the supervision of Dorr H. Etzler and John W. Barber. Both the pistol and the rifle team entered national competition with the other chapters and finished first and third respectively.

Officers of the society are: William J. Van Ryzin, captain; Donald K. Herbst, 1st Lieutenant; Everett N. Eastman, 2nd Lieutenant; Donald K. Gehrz, 1st Sergeant; and John W. Barber, social chairman.

Members who are active in both the society and other military affairs include: Gaylord W. Schultz, who is colonel in the corps; Dorr H. Etzler, who represented the society at the national convention at Cincinnati; and John W. Barber, who, besides sponsoring many successful parties and luncheons, was Assistant General Chairman of the Military Ball.

Chi Epsilon was founded in 1922, at the University of Illinois as a national honorary civil engineering fraternity. The purpose of the fraternity, according to its constitution, is "to place a mark of distinction upon the undergraduate who has upheld the honor of the department by high scholastic ability, and to provide him with an incentive to greater achievement in the Civil Engineering profession."

The society has co-operated with other engineering groups in instilling in the minds of new students entering the College of Engineering the value of the pursuit of scholastic distinction. One of its most valuable functions is the practice of maintaining a critical survey of the civil engineering school curriculum.

The local chapter, founded in 1925, carries out an active program to stimulate interest in engineering activities. This program includes inspection trips to points of professional interest and monthly discussion groups.

During the past year, William O. Ree acted as president of the fraternity.

Shipman Cornelius C. Siettmann Arthur F. Sperling The local A. S. C. E. is a student chapter of the national American Society of Civil Engineers, which was founded in 1852 for the purpose of stimulating and supporting research and guarding professional interests. The Wisconsin chapter is the second largest of the 106 student chapters of this society. It offers civil engineering students an outlet for writing and public speaking; an opportunity to form friendships between the classes; and an easy transfer, upon graduation, to the natural organization, which means engineering recognition.

In the past year the chapter has enjoyed talks by Walter Jessup, field secretary of the organization, L. F. Van Hagan, Lee Crandall, and a talk on China, by Earl K. Loverud, accompanied by moving pictures. Through the courtesy of John L. Savage, the group was able to see motion pictures of the construction of Boulder Dam. The members have been active in the affairs of Polygon and have contributed materially to the success of the St. Pat's day Parade.

The American Institute of Chemical Engineers is a national society of high standing. It has grown rapidly in spite of the fact that this is the youngest of the engineering societies. The requirements for active membership are extremely rigorous and there are only about a thousand such members in the United States. From the start the institute has been chiefly interested in fostering and improving chemical engineering education in the United States. To further this aim, student chapters have been established at many of the leading engineering schools.

The local chapter has been in existence since June 27, 1923 and its membership includes with only a few exceptions, all of the students in the chemical engineering course. The institute has conducted meetings at which speeches of a highly informative character have been given.

The aim of the American Institute of Chemical Engineers is primarily to demonstrate to the undergraduate chemical engineer just what sort of a profession he is seeking to enter. It is with this aim in mind that the society has chosen the speakers for its meetings. They have been successful young men; in industry long enough to achieve something, but not too long to have forgotten what the start was like.

Neal P. Olson and Willis F. Parrott, Sophomores, tied for the highest scholarship in the course in their Freshman year, were awarded certificates and badges by the society.

The American Society of Mechanical Engineers was founded in 1880. It was soon found that a link between the practicing engineers and engineering students was needed, and it was with this in mind that the national society undertook the formation of student branches. The plan was distinctly successful from the start.

The Wisconsin student branch of A. S. M. E. had its inception in 1909. The group has been exceedingly active this year, and has had bimonthly meetings at which talks and films of technical interest have been presented. Last fall the Wisconsin Franch held a joint meeting with the Marquette branch. On April 16, the society heard a talk by the chief engineer of the Union Pacific Railroad. The meetings aren't entirely technical, however, for the members of the mechanical engineering school have been invited to the society's smokers.

C. Bradford Kniskern acted as president during the past term. Other officers were: Reginald T. Saue, vice-president; Alexander F. Robertson, secretary; Roald H. Amundson, treasurer.

The American Institute of Electrical Engineers was founded in the year 1884 for the purpose of bringing together, for the mutual benefit of all, members of the electrical engineering profession. In 1903, provisions were made under which student branches could be established throughout the country. These branches were established for the purpose of aiding in the development of the latent abilities of students by encouraging their participation in the branch meetings. It was under this plan that the University of Wisconsin student branch came into existence.

Under the new plan inaugurated by the Polygon club which assesses a blanket fee of one dollar upon each engineer, entitling him to membership in the society, which carries on its activities in his respective course in engineering, the institute has been able to increase the scope of its activities, in addition to making the organization financially more stable.

As an integral chapter of the national group, it functions as a distinct and separate unit for the benefit of its student members. During the past year activities of the society were more diversified than those of any previous year. They included the presentation of papers and treatises of interest

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS

to the profession and the addresses of well-known speakers on subjects pertinent to the aims of the society. Most of the programs were augmented by moving pictures and slides as well as informal discussions entered into by the students.

The inspection trips made to power plants, laboratories, and manufacturing plants given at periodic intervals proved to be of a highly informative nature.

The activities of the institute are not entirely technical, however. The society lent valuable assistance in making the St. Pat's Day Parade a success this spring, as well as the social activities sponsored by the Polygon Club during the year.

Albert Vollenweider acted as president of the institute during the past year.

The Agricultural Council serves to integrate the activities of the ten organizations which carry on their work on the Agricultural College campus.

The council is a body comprised of two representatives from each of various organizations on the "Ag" campus. The groups represented are Euthenics Club, Saddle and Sirloin Club, Wisconsin Country Magazine, University 4-H Club, Blue Shield Country Life Club, Short Course, Omicron Nu, Alpha Zeta, Phi Upsilon Omicron, Alpha Gamma Rho, and Delta Theta Sigma.

The council's primary interest is to promote student interests and effect a spirit of mutual understanding between students and the faculty. During the past year the Council has sponsored the Annual Agricultural-Home Economics Walk Around, Harvest Ball, Mid-Winter Ball, and the Agricultural College Banquet.

Officers of the council are: Olav Anderson, President; Helen Caldwell, Vice-President; Florence Marks, Secretary; Elizabeth Jensen, Treasurer; I. L. Baldwin, Faculty Advisor.

The latest move of the council was to erect a memorial in memory of the late Professor George B. Mortimer, of the College of Agriculture.

One of the oldest and largest of the professional Commerce fraternities, Alpha Kappa Psi, was founded at New York University, in 1904, and came into existence at Wisconsin in 1923. The purpose of Alpha Kappa Psi is "to further the individual welfare of its members, to foster scientific research in the fields of commerce, finance, and accounting, and to educate the public to demand higher ideals therein; to promote and advance in institutions of collegiate rank, courses leading to degrees in business administration."

Alpha Kappa Psi is active in the interests of commercial training at the University, and was instrumental in the agitation which resulted in the segregation of the School of Commerce from the department of Economics. The members gather for weekly meetings with prominent commercial authorities as speakers. Each year the fraternity sponsors a Homecoming program on the week-end of university homecoming, at which time promi nent speakers are brought to meetings which are open to the student body. Members on the faculty are F. H. Elwell and W. B. Taylor.

Among the several national organizations founded on the University of Wisconsin campus is Coranto, which was founded in 1924, and became national in 1925. Its purpose, according to the intentions of its founders was to be of "service in journalistic fields, to the college, to the individual, and to the profession."

Coranto holds regular meetings at which prominent speakers present their views to the embryonic journalists. During the past year the club listened to talks by Mrs. H. H. Brockhausen, publicity writer for women's clubs and former society editor of the Wisconsin State Journal; Mrs. J. T. Salter, writer of articles and verse; and Wyman Smith, editor of the Wisconsin department of Agriculture and Markets, and publicity director for the state fair. Late this spring Coranto pledged one of the largest groups in the history of the fraternity.

Josephine Pearson acted as president during the past year, and was assisted by Viola Hellerman, Dana Evans, Dorothy Staples, Shirley Tollefson, Elaine Miner, Josephine Quann, and Edna Evanstad.

Members of the fraternity on the University faculty are Willard G. Bleyer, Grant M. Hyde, Helen Patterson, Ralph O. Nafziger, and Bruce R. McCoy.

Founded in 1010, the object of the Euthenics Club, according to the club constitution, is "to study home economics problems and matters relating thereto, and to create a social life in the home economics groups of departments."

Meetings of the organization, which are open to all home economics students, were held twice each month at the Memorial Union this year. At these meetings, the divers phases of problems confronting home-makers were presented, either by members of the group or an outside speaker from the practicing field who explained its opportunities. Each business meeting, in order to conform to the aims for which the club was founded, was followed by social entertainment consisting of games, dancing, and refreshments. In the promotion of social activities, the Euthenics Club cooperated with the various other groups on the Ag campus.

Euthenics Club, its officers state, affords an excellent means of meeting and learning to know other girls in the home economics department in a way which is not possible in ordinary scholastic association.

If there is a "400" in the university, the University Hunt Club claims a more abundant sprinkling of its members than any other campus group.

The aim of the club is a distinctly social one, that of bringing together people who are interested in horseback riding to provide them with social entertainment through the medium of their favorite sport.

While the wherewithal is important in an activity of this sort, equestrian skill is also a requisite for membership in the club. Aspirants for membership must receive formal invitations to be present at tryouts where they are judged on their ability to ride and their knowledge of other phases of the sport. Those who qualify on this basis are then selected for membership on the same qualities that any other social organization accepts its members.

Albert McCurdy was president of this rapidly growing club during the past year, while Clarence Mueller acted in the capacity of vice-president, and Dorothy Dunn, as secretary and treasurer.

McCurdy Arnold Imig McNeil Dunn Montgomery Wollaeger Wamser Paunack Brewer Turner Quarles Jane Fisher Fulfilling the religious needs of a large portion of the University enrollment constitute the varied activities carried on under the direction of St. Paul's Catholic Chapel.

The first student chapel of any denomination on the campus of a state university, it was dedicated in 1910, under the supervision of Rev. Father Harry C. Hengell, who was placed in charge of the project by Archbishop Messmer four years before, and who is at present the Rector in charge. On January 27, of this year, the chapel observed its 25th anniversary. In September, 1032, the Rev. John B. Grellinger was appointed assistant to Father Hengell, and has been acting in the capacity of active director.

The chapel encompasses a number of student organizations. The large all-inclusive organization is the Newman Club, to which all of the approximately 1,400 Catholic students belong. The club sponsors many activities; dances and other parties as well as study groups and athletic teams competing in intra-mural leagues. The Rev. Charles Killeen is president of the Newman Club.

The Holy Name Society is an organization for young men, who receive Holy Communion in a body on the first Sunday of each month in public profession of their faith. After each meeting, a

ST. PAUL'S CATHOLIC CHAPEL

breakfast meeting is held in Newman Hall, beneath the Chapel, at which some prominent speaker is regularly present. Organized along military lines, James Feeney is president; while the majors are Joe Werner, George Redmond, Don Keyes, and Paul Hobbs. Gerald Jolin is the secretary and treasurer.

A similar organization of girls, is the Catholic Daughters of the University, headed by Mary Jacobson, which provides religious, athletic and social activities for its members. Helen Esser, Marie Kiley, and Mercedes Schmidt also fulfill responsible positions.

A third organization, the Saint Vincent De Paul Society, has a different purpose, that of engaging in welfare work among students. Its objective is to aid needy students, regardless of creed, by providing free tutoring classes in both academic and technical subjects, by supplying clothes to students in need, and extending financial help to the same.

The facilities of the chapel have been increased by the completion of the beautiful new student room, Newman Commons, the past fall. It offers facilities for reading, study and relaxation, as well as serving as the meeting place for the various Catholic student organizations.

Without doubt the most compact group on the campus consists of residents of the Nurses' Dormitory who are enrolled in the School of Nursing.

Organized in the fall of 1924, the School of Nursing was made a subsidiary of the Medical School of the University and the State of Wisconsin General Hospital. The coordinating committee of the School of Nursing is composed of the dean of the medical school, the superintendent of the hospital, and the director of the School of Nursing, who has immediate charge of its administration.

The aims of the School of Nursing are:

1. To give adequate training in the sympathetic care of the sick.

2. To promote academic education as an aid to professional experience.

3. To stimulate advanced training and research in special fields of work within the realm of nursing.

The nursing students are at home in their beautiful dormitory on University Avenue. When the nurses are allowed to relax from their exacting schedule of duties, they find time to have an occasional dance.

Taking an active interest in the promotion of speech and dramatic events, the influence of Phi Beta made itself strongly felt during the past year.

The professional knowledge of the members was put to advantageous use when they assisted in the judging of the plays presented by the Wisconsin Theater Guild during the month of March. To the best rural play given in this tournament the Phi Beta prize was awarded.

In April the group participated in the Poetry Reading festival conducted by Prof. Gertrude Johnson.

The aim of Phi Beta is "to promote the best in music and drama, to live a life of service, and to seek and develop the highest type of womanhood."

One of its members, Marie Felzo, received the distinction of being featured alone on one of Miss Johnson's popular reading hours at the Union.

Honorary members of Phi Beta on the faculty include Harry L. Ewbank, J. Russell Lane, Gertrude Johnson, R. W. West, Andrew T. Weaver, Gladys Borchers, and Ethel Rockwell.

Iota Chapter of Phi Chi Theta was founded on the University of Wisconsin campus for the purpose of promoting the cause of higher business education training for all women; fostering high ideals for women in business careers, encouraging fraternity and cooperation among women preparing for such careers; and stimulating the spirit of sacrifice and unselfish devotion to the attainment of such ends.

Iota was one of the first chapters in the national organization, which was founded in 1924, the Wisconsin chapter being established one year later.

On the campus Phi Chi Theta is active in sponsoring the All-Commerce-Economics Banquet. It also gives a National Key award each year. This Key is awarded on the basis of scholarship, activities, and leadership to the woman students in the School of Commerce who best fulfills these requirements at the completion of her junior year. Each year Phi Chi Theta has a joint dinner with the Women's Commerce Club and the Alpha Kappa Psi, professional commerce fraternity, for the purpose of promoting friendship and fellowship among those preparing for professional business careers.

The officers for the past year were Stella Femrite, president; Catherine Jensen, vice-president; Rose R. Penn, secretary; Glacia Rogge, treasurer; Ruth Warnke, hostess.

Penn Henry Weber Jensen Femrite Rogge

Nu Chapter of Phi Upsilon Omicron is the Wisconsin branch of the rapidly growing national professional fraternity whose purpose is to advance and promote Home Economics. The Wisconsin chapter, founded in 1925, is one of twenty-one in the national organization which had its inception on the University of Minnesota campus in 1900.

In addition to having meetings at which technical aspects of the culinary and dress-making arts are discussed, the group occasionally gets together for social purposes to cooperate with other professional organizations in activities on the Ag campus.

Officers during the past year were: Florence Marks, president; Mrs. Julia Hill, vice-president; Mary Jansky, secretary; Marion Wartinbee, corresponding secretary; Elizabeth Jensen, editor; Irene Schlafer, chaplain; June Reif, social chairman; Clarice Ballinger, historian; Mrs. Mildred Sayre, treasurer; Henrietta Heezen and Sadie Stolen, librarians.

Honorary members on the faculty are: Abby Marlatt, Hazel Manning, May Cowles, Helen Parsons, and Jean Krueger.

If there is a single group on the campus that remains distinctly homogeneous in all of its endeavors, it is the Engineers. Responsibility for that solidarity of feeling can in a large way be attributed to the organization known as Polygon Club.

The society started as a central committee a number of years ago with the purpose of coordinating the various groups in the engineering colleges, and forming a closer union between the students and faculties.

An unusual experiment was attempted last fall and to all appearances has proved the success that was anticipated. The plan involves the assessing each engineer a dollar fee which is put in a central fund controlled by the Polygon Club. Polygon thus acts as a coordinating agency and allots funds to the various engineering societies in order that they may carry on their activities more efficiently. Besides entitling each engineer to become a member of his respective engineering group, his dollar also brings him a subscription to the Wisconsin Engineer. The new plan has stimulated interest in engineering organizations to great heights.

During the year the Polygon Club undertook the active direction of two dances, two smokers, and the colorful St. Pat's Parade. Under centralized supervision such as existed during the past year, these activities proved unprecedented successes.

Gilbert Nieman acted as president of Polygon during the past year, assisted by John Smithwick, secretary; and Ernest Ziehlsdorff, treasurer.

Rho of Sigma Alpha Iota was founded on the Wisconsin campus in 1921. The national organization came into existence in 1903.

The purpose of Sigma Alpha Iota is "to form groups of representative women, who, by their influence and musical interest, will uphold the highest ideals of a musical education, raise the standards of productive musical work among the women students in colleges, conservatories, and universities; promote and dignify the musical profession, further the development of music in America, and assist in forming a stronger bond of musical interest and understanding between America and foreign countries."

Among the outstanding activities of this music fraternity during the past year were the Founders' Day program on December 4, the MacDowell benefit bridge on March 23, and the annual spring recital on March 28.

Members on the faculty who are members of the fraternity are Florence Bergendahl, Louise Lockwood Carpenter, Irene B. Eastman, Helen Rector, and Helen S. Thomas.

Ruth Solie Florence Urbahns Lillian Wong Sigma Lambda is a steadily growing professional sorority for students in the school of art education.

Its purposes, to quote the officers, are "to promote the good of the art department; to inspire a higher professional standard, to bring together those vitally interested in art in a social atmosphere, and to further their interest in art, and to develop casual acquaintanceship into strong friendships; and to act as a bureau of art employment for its alumnae as well as its active members."

During the past year, personages prominent in the field of art have addressed the group from time to time. In addition the sorority has done much to stimulate interest in art by cooperating in the staging of periodic exhibits.

Socially, Sigma Lambda has no Beaux Arts ball, but there is plenty of opportunity for social intercourse. Several benefit bridges were conducted in order to raise money for the maintenance of a scholarship fund.

During the past year the activities of Sigma Lambda were supervised by its president, Kathleen Meier.

Organized in the spring of 1917, with a comparatively small membership, increased interest on the part of women in the commercial professions has brought about sizable growth in the strength of the Women's Commerce Club.

The club is one of the few professional organizations that lay equal emphasis upon the social factor, one of their two meetings a month being entirely of a social nature, at which speakers drawn from diverse fields give talks. The other meeting is a business meeting at which some person prominent in commercial fields appears on the program.

Two main functions have been sponsored by the club the past year. The first of these was the Commerce Club-Faculty banquet, held last October, at which Frances Schmidt won the scholarship cup for being the outstanding pre-commerce freshman. Mae Mauer was awarded the Phi Chi Theta scholarship key presented to the senior who during her first three years in the commerce school has distinguished herself scholastically and in other fields of activity. The second function was the annual alumnae party of Commerce Club members held in February.

Maxine Plate acted as president, and upon her graduation in February, was replaced by Vivian Holland.

Class of 1937 Mary Jane Sanderson

Class of 1938 Avis Zentner Organized in 1893, to promote individually and as a group all worthy ends in speech activities, Zeta Phi Eta is one of the newer professional societies on the Wisconsin campus, having received its charter in 1932.

The number of Zetas whose names appear in Bascom play productions, acting, directing, and backstage work alike; in varsity debating, in presentational reading at the semi-weekly reading hours, and other activities, is legion.

Although rendering valuable service in the sponsoring of the reading hours, in bringing the reader, Juanita Bauer here for a public presentation, and in working with the directors of the Poetry Reading Festival, Zeta Phi Eta feels that its most cherished project is the inauguration of a children's theater in Madison. The first play in this attempt, "The Silver Thread," was produced last May; the second, a puppet show, "The Sleeping Beauty," in October; and the third, "The Emperor's New Clothes," in March. The first and last were entirely directed and produced by members of the active chapter, and the second sponsored and business managed by the active chapter, but directed by an alumni member who brought a group of high school puppeteers from Janesville. It is believed that in this project, a long felt need in Madison is being filled, and it is therefore to this enterprise that the local chapter of Zeta Phi Eta is devoting its group efforts.

Alpha Chi Omega is getting this page free of any charge due to the efforts of Catherine Ann Kelley, who received it as a reward for winning the Badger sorority sales contest. Another winning Alpha Chi Omega is Marion Bachhuber, who was among those present in the court of honor at prom this year. Committees and Cardinal Board activities claim her attention as well. Twin Jane Bond is the new President of Y. W. C. A. The other twin, Eleanor, is Recording Secretary of W. A. A. Y. W. C. A. seems to be the vogue at the Alpha Chi O house, for Harriet Oldenburg has the office of Secretary for next year and was in charge of membership this year. A word for Virginia Lee Horne, Vice-President of W. A. A. who, according to reports, "practically runs Lathrop." The house as a whole is interested in athletics. This year the girls walked off with first place in the second flight of the golf tournament and won the sorority swimming and basketball titles.

The annual fraternity upset caught the A. E. Phis this year. They stepped into the house vacated by the Theta Delts which, supposedly, is one of the many "governor's mansions." Besides being busy with their new house, the girls are represented on campus. Cyril Barnett has made a remarkable record scholastically. She won the Freshman women's Scholarship cup and was in Sigma Epsilon Sigma. Sophomore High Honors came her way and then she was elected to Phi Beta Kappa and Phi Kappa Phi. Dolphin Club and Orchesis interest several girls. Four or five worked on Orientation committees. Several are actively interested in the work at Hillel and Martha Voice is Vice-President of that group. Sorority activities for the entire group consist mainly of intra-mural athletics. They always have a team in every contest.

The sorority crew races brought glory to the Alpha Gams last spring when their crew walked off with the title by sliding in ahead of the Kappas by a good sized margin. Betsy Walbridge leads the list of girls that are active in Y. W. She has been Vice-President and Field Representative. Incidentally, she is a Mortar Board choice. Fay Hickey is to take her place next year as Vice-President. One of the four women on Senior Council, is Virginia Tourtellot, who is also busy on the Octopus and Cardinal staffs. Varsity debate is the choice of Mildred Templin. Numerous officers in physical education clubs are held by Alpha Gams. For example, Margaret Elliott is on W. A. A. Board and President of Hockey Club. Margaret Ankerson is the Senior member of Physical Education Club and President of Basketball Club.

The A O Pis have the sorority house nearest to the hill and consequently have no excuse for ever being late to classes. That big fence that shields them from the rude gaze of the public doesn't keep the inmates from getting out and about. There is, for example, Jean Lackey who sings at the 770 Club. Romance Cowgill had the distinction of being Forensic Ball Queen last fall. Other activities such as Badger, Cardinal, Wisconsin Players and Pythia have also claimed her time. The chapter was proud when Vivienne Wetter was voted one of the best dressed girls on the campus in a recent campaign. When the inter-sorority swimming contest came along, the A O Pis walked off with the cup which was immediately added to their collection. Josephine Pitz and Merceina Weiss received berths on the Varsity Bowling team. So the Alpha Omicron Pi girls have been busy.

The Alpha Phis whose location affords a royal view of the lake can be justly proud of their property. The porch, which figures so prominently in rushing and is the envy of all the Greek ladies, extends across the back of the house. It looks out on a lawn that slopes down to the lake - - - a truly ideal site for a sorority house. They live so far down Langdon that it is a surprise to all that they get up around the Union way to participate in their favorite activities. But they do and we constantly see Jean Campion, new Vice-President of W. S. G. A. and President of Castalia Lite ary Society, busily occupied at the Union; Monica Clark, Co-Chairman of the Invitations Committee for Mothers' and Fathers' Week-end this spring, a member of Union Council, and head of the Union Library Committee is also seen and heard in that neighborhood. Last fall, Louise Langemo headed Pan-Hellenic Ball, which organization, incidentally, was called together by Alpha Phi in 1902, under the name of Inter-sorority Council.

If some inquisitive soul would follow a certain long driveway that leads from Langdon Street toward Lake Mendota, he would find the Alpha Xi Delta house right at the lake shore. The fact that they live far below the level of the street and seem a little away from the heart of activities detracts not at all from their interest in University affairs. Among their number are found three Phi Kappa Phi members, Lois SeCheverell, Betty Lamoreaux, and Betty Krauskopf, the last mentioned also a Phi Beta Kappa. Last spring Lois SeCheverell and Betty Lamoreaux were elected to Mortar Board. This spring, sister SeCheverell has been occupied with the position of Co-Chairman of Mothers' and Fathers' Week-end in addition to her post as Secretary of Y. W. C. A. Frances Schmidt who has given up her office as Sophomore Representative on W. S. G. A. Council has taken on the greater task of being Treasurer of the council for the coming year. She has also been chosen for membership to Sigma Epsilon Sigma. Lorraine Fessenden, a member of Wisconsin Players, represented Alpha Xi in dramatics this season.

Chi Omega is the sorority which each year gives a national achievement award to an outstanding woman in the field of art, letters, professions, economics or politics. The award this year went to Frances Perkins and was presented by Mrs. Roosevelt. This chapter doesn't confer medals for everything, but like all Chi O. Chapters, awards a sociology prize to an outstanding woman in sociology. The chapter has several members whose laurels are worth mentioning. Caryl Morse, for instance, was elected to Crucible and worked for the women's varsity debate team, of which she was a member. She and two other sisters, Elenore Edwards and Violet Pfleuger, were awarded Sophomore Honors and thus raised the chapter scholastically. Rachel Woodhouse, a member of Sigma Epsilon Sigma, is another scholastic asset. There are a number of Chi O. names on the Mothers' and Fathers' Week-end committees as well as on Orientation Week committees last fall. Zeta Phi Eta, national speech sorority, claimed Caryl Morse, Sarah Robbins and Doris Ward for membership, thus carrying on the tradition of Bonnivere Marsh, who brought glory to the chapter last year

Although their slogan at Homecoming played on the word defeat (defeat of Illinois), it can hardly be said that the aforementioned word actually applies to them. Not while Mary MacKechnie is still busy with various presidencies which are her long suit; Y. W. C. A. and Mortar Board, for example. Phi Kappa Phi elected her to membership, too. Ethel Webster has contributed to her bit to the group by being on the Y. W. C. A. Counc.l and one of the few women of President Klode's Senior Council. La Vergne Cooke, active in Y. W. along with her sisters Mac lechnie and Webster is on the Women's Affairs committee of the Union and busy with various other committees around there. The job of Census chairman of W. S. G. A. has been performed this past year by Janet Benkert, who is well known as the hostess of Georgian Grill. Among the four Tri Delt members of Sigma Epsilon Sigma, three hold the offices in that organization: Betty Ransom, President, Lucille Ransom, Vice-President, Margaret Halbert, Secretary, and Ruth Solie.

It would be hard to adequately describe the Delta Gamma house down at the end of Langdon Street. Low and rambling, it is equally attractive inside and out. It is interesting to point out that the Lewis School at which Delta Gamma was founded was formerly known as the Oxford Female Institute. Equally interesting to know is that Ruth Bryan Owen is one of the outstanding names in the D. G. alumnae files. Though this was the Delta Gamma's year to crown a queen at prom, something went hay-wire and they conceded the honor to the Kappas. However, Margaret Stedman was elected to the Court of Honor of that affair, thereby keeping a sister in the field. Athletics seem to have kept the D. Gs quite occupied this past year. Their teams reached the finals in the intra-mural swimming and basketball races. Florence Riddle was elected to the Midwest Field Hockey team. They are also proud of Cecelia McClaren, a pledge, who is the Midwest Champion in junior women's tennis and is ranked tenth best player nationally.

To Delta Zeta goes the first place along lines of sorority scholarship. They headed the list this year with a chapter average of 2.122. The local chapter helps to support the project of a community center at Vest, Kentucky, which the sorority as a whole sponsors. Y. W. C. A. officers have always been present in this group. The current year finds Ruth Hammerstrom, treasurer, and Lucile Vetting, both on the Y. W. cabinet. The group was represented in this year's court of honor at prom by Harriet Quall, something of which the group can be justly proud. Other interests in the house are diversified. Cardinal, Pythia, Castalia, and University Singers hold the interest of several members. Their present house, which was built in 1926, is situated down at the end of one of the well-known courts, surrounded by several fraternity houses.

Langdon and Francis Streets lives Gamma Phi Beta, the third social sorority to be established on this campus. Besides the aforesaid blue door they are most proud of their upstairs penthouse sun porch arrangement where the sisters are wont to gather any warm day to imbibe the sun. On the hill in various and sundry activities, the Gamma Phis have a pretty fair hold. Marylois "On Wisconsin" Purdy represents them in Mortar Board, on the Union House Committee and in Phi Kappa Phi. Y. W. C. A. Vice-Prexy Joan Buchholz joins her in Phi Kappa Phi. Mary Bossort held forth all year as the impressive head of the Judiciary Committee and therefore was a member of W. S. G. A. Council. Elsie Lunde, a member of Crucible and newly elected W. A. A. Vice-President, has held the unique position of President of the Norse Club. Mary Belle Lawton, also in Crucible, acted as Chairman of the Invitations and Reception Committee for King Brazeau's prom. This spring she won the election to the position of Senior Representative on W. S. G. A. Council for the ensuing year. Jessie Lou Davis covered herself and the sorority with glory by managing Matrix and receiving Walter Winchell's orchid for doing it so well.

The Thetas hold forth down in the middle of a group of fraternities on Lake Lawn Place, that narrow street on which cars have difficulty passing. Is it going to be a tradition · · · this military ball queen business? For two years now the queen of the army ball has come from the ranks of the Thetas, last year Dorothy West and this season it was Agnes Ricks. That recalls the fact that Katherine Halverson was selected as one of this year's crop of beauties in the Court of Honor for prom. Another feather in the Theta cap was Evelyn Schilling's selection for co-queen of the Sophomore Shuffle Frosh Frolic dance. Frances "Peg" Stiles heads the activities list. Mortar Board and Phi Kappa Phi chose her for membership. She was elected to Badger Board and became its President, and to W. S. G. A. Council, on which she served in the capacity of Senior Representative on Union Council and was in charge of Women's Affairs. This year the March elections voted another Theta, Margaret Pelton, to W. S. G. A. as Census Chairman. Wisconsin Players hold the interest of Marion Dakin, who presides as Theta president.

Virginia, Julia Tyler, granddaughter of President John Tyler was one of its founders. This is a distinction of which Kappa Delta is justly proud. When Bernice Butters was selected for Court of Honor for Prom last winter the sisters in Kappa Delta were still more proud. Jane Musselman, earning High Sophomore Honors, won recognition for the sorority. In an exhibit at the Union, Carrol Bailey was awarded honorable mention for her oil painting. She was the only woman to receive that honor. Pythia members have recently elected Esther Ferson as their Prexy for the coming year. Although the girls are no doubt tired of having Pearl Buck continually referred to as one of the most outstanding alumnae, they are probably still proud.

When Kappa Delta was organized at Farmville,

These are the girls that dwell within the thick walls of the big stone mansion on Henry and Langdon. Their chief duty is to keep the school supplied with queens. For example, former Queen Baillie of the '34 prom, Queen Wheary who, with Dick Brazeau, presided over the 1935 prom and Martha Jackson, ex-Frosh Frolic queen, who again officiated . . . this year at Soph Shuffle. On the other hand, the Kappas do give us campus highlights other than royalty. Lois Montgomery of Crucible, heads the new W. S. G. A. Council according to spring elections. Sisters Patricia Graney and Carol Wagner join her on the new council and Patricia Graney is also occupied with Badger Board and Octy business. Florence Lloyd-Iones led Pan-Hellenic council this year, while Helen Stautz is a member of the Women's Affairs Committee. Jean Fisher as chairman of the Public Relations Committee is our champion barn-stormer. As for scholarship, Mary Stophlet, Ruth Fazen, and Barbara Barnes received Sophomore Honors in addition to Sigma Epsilon Sigma membership.

Phi Mu, the sorority dwelling within the red brick house midway down Langdon, claims to be the second oldest secret organization for women. In its early days, the groups selected Robert E. Lee. "Stonewall" Jackson, and Jefferson Davis as honorary members. Among the members of Phi Mu are found several well known campus leaders. Floretta Maneval, who was elected to Crucible and Mortar Board, has presided over W. A. A. this past year. She has served on the Women's Affairs Committee of the Union and was selected for membership in Phi Kappa Phi. Also deserving of mention is Alice Krug, who is Co-Chairman of the Contacts Committee for Mother's and Father's Week-end. She also served as Co-chairman of the First Wisconsin Salon of Art. In her second year Sister Krug received Sophomore Honors. Mary Febock, a past President of Castalia, keeps busy on the Y. W. C. A. Cabinet as Publicity Chairman. Ina Mary Frederici represented Phi Mu in the Court of Honor at Prom this year. This chapter, and the sorority as a whole, supports the Phi Mu Healthmobile which tours Georgia, giving medical attention to 9,000 needy children. Completely equipped, it carries several doctors and nurses. Last summer the local chapter was awarded the national scholarship cup at the Phi Mu convention.

Class of 1938

The Pi Phi chapter boasts of having a house free from the overhanging mortgage. Incidentally, Pi Beta Phi is the oldest national fraternity for women according to the Pan-Hellenic rating. W. S. G. A. has been guided ably this past year by Jean Charters, who has not confined her activities to that office. Hannah Greeley, Vice-President, and Marion Bradley, Freshman Representative, have officiated on the council this past year too. The year 1036 will see Avis Zentner active as Sophomore Representative and Kathryn Narr as Chairman of the Judiciary Committee on W. S. G. A., thereby filling the graduating sisters' shoes. Jean Charters, who with Hannah Greeley is a member of Mortar Board, held the position of Secretary of Cardinal Board this year. Dorothy Teeple, newly elected Cardinal Board member, will carry on in that field next year. Rated third scholastically among women's organizations, Pi Phi is proud of its five Phi Kappa Phi members: Jean Eilenberger, Jean Charters, Hannah Greeley, Betty Daniel, and Margaret Simpson, the last named young lady was elected to Phi Beta Kappa her junior year.

When it was founded, Sigma Kappa desired to establish chapters only in New England schools. But with the turn of the century, Middle-western and far-western schools finally received charters. For its national philanthropy, Sigma Kappa is the guardian angel of the Maine Sea Coast mission, which cares for the proud and dying race of real Yankees that refuse to leave their homes on the islands off Maine's rockbound shore line. In the local chapter, Mary Kirsten heads the activities list. She has held the position of treasurer on the W. S. G. A. Council and was elected to both Mortar Board and Phi Kappa Phi. Jane Greer, who was the Sigma Kappa member in the Court of Honor at prom, was the Sophomore Representative on the Judiciary Committee this year. Mildred Allen, Lois Roehl, and Mildred Lueck, are on the Badger Staff, Mildred Allen being on the Editorial Staff. Both she and Rose Wichert contribute to the Cardinal.

SOCIAL FRATERNITIES

INTER-FRATERNITY BOARD

Introducing four definite new objectives, the Inter-fraternity Board went through its third year with marked success and purpose. The first of their accomplishments was the new preferential rushing system which was tried for the first time last fall, and met with general approval. A revision of the rules has been made in an effort to iron out a few minor defects and it is expected that these changes will make for a more efficient system. In an effort to help defray the costs of the new method of rushing, the profit derived from the annual Inter-fraternity Ball was turned into this channel.

The automatic depledging rule was also inaugurated; in accordance with these regulations a pledge will be dropped if he fails for a period of two consecutive semesters to make a C average. This system will eliminate men who are scholastically unfit for fraternity material and should bring up the all-fraternity average.

Another accomplishment was the modification of "Hell Week," an effort to do away with much of the prevalent hazing that is still carried on by many fraternities. This action came about as a result of action on the part of many fraternity men who believed that a revision of rules regarding "Hell Week" was necessary and through the cooperation of the Board and members of organizations it is hoped to bring about a needed reform.

A survey conducted by the board in regard to financial, scholastic, and chapter operation is another achievement and culminates the efforts of Greek letter men to get a uniform plan of operation as to finances and means of running a house in a manner beneficial to the University, the fraternities and the individuals.

The manual sent out to all new freshmen last fall, and which met with success, again will be mailed to all prospective University men. This will be the second year for the booklet and it is hoped that cooperation will be such that it shall be continued in the future.

Robert Putnam Roger Schmuck Open to Masons, sons of Masons, De Molays, or men recommended by two Masons, Acacia stands as the one Masonic fraternity on the Wisconsin campus. It was founded in 1904 at Ann Arbor, Michigan and made its appearance here in 1906, as one of the twenty-nine chapters that are located at various universities throughout the country.

Residing in their large house at 108 Langdon, next to Lake Mendota, Acacia men find time to enter into extra-curricular activities throughout the university - - - athletes are in a majority and the past year saw every chapter officer a "W" winner in some sport. Publications and politics are participated in with considerable success.

Acacia has more members in the University faculty than any other Greek group on the campus. Among these are Tom E. Jones, Coach of Track and Cross-country; Professor C. K. Leith of the Geology Department; Professor C. H. Mills, Director of the School of Music; Professor R. A. Owen of the Engineering School; and Arlie Mucks, one time holder of the world short-put record, in the College of Agriculture.

In 1922 Phi Omicron chapter of Alpha Chi Rho made its debut on the Wisconsin campus and though considerably younger than most Greek groups, it has steadily forged forward and today is among the leaders of fraternities. The national organization was founded thirty-nine years ago at Trinity College, Hartford, Connecticut, and since there have been nineteen chapters established at various colleges in the nation.

Although there are seldom many varsity athletes in the house, there is no lack of interest in sports around the chapter as can be indicated by the trophies adorning the mantlepiece. The volley ball championship was added to the awards during the past winter term and there has been a credible showing made in most other sports.

Members of the Union Board, committee-men for Prom and Inter-fraternity ball, and a man in Coif constitute some of the other Alpha Chi Rho activity participants.

Famous alumni are numerous and one man, Paul Seeple, carried the Alpha Chi Rho standard to the South Pole with two of Byrd's expeditions. Orchestra leader, Fred Waring and announcer John S. Young, are also members of Alpha Chi Rho.

Founded at the University of Wisconsin in 1902, Alpha Chi Sigma has grown rapidly and today there are forty-eight collegiate and twenty-four professional chapters in the United States.

With the main object being the advancement of chemistry as a science and profession, Alpha Chi Sigma does many things to accomplish this end, such as sponsoring lectures and exhibitions in chemistry and awarding annually a membership in the American Chemical Society to the highest ranking freshman in chemistry and chemical engineering courses.

Twenty-eight members in the Departments of Chemistry, Chemical Engineering, Bacteriology, and Mining and Metallurgy gives this group a large faculty representation. There are twenty-six men in the graduate school, thirteen under-graduates and seven pledges who comprise the chapter roll.

Besides devoting much of their time to studying, the members of Alpha Chi Sigma also find time to participate in campus activities to some extent, although not as much as some of the Langdon Street organizations.

Starting as a literary organization at Hamilton College, New York, Alpha Delta Phi was founded in 1832, thus ranking as one of the pioneer fraternities. There are twenty-four chapters of Alpha Delt spread throughout the United States, and three in Canada.

Alpha Delta Phi boasts of many prominent alumni, including President Franklin D. Roosevelt. Theodore Roosevelt is also in the fraternity annals along with Justices Harlan F. Stone and the late Oliver Wendell Holmes. Robert M. Hutchins, President of the University of Chicago and Charles W. Elliot, President of Harvard, are also Alpha Delts.

The Wisconsin chapter was founded in 1902 and after a period of expansion moved into the present chapter house at the foot of North Henry Street, next to Lake Mendota.

Activity men are numerous in the Alpha Delt chapter and this year saw one Junior Phi Beta Kappa, two Phi Kappa Phi's and one man in White Spades and Iron Cross. Other members have gained recognition in fields varying from Union Board to Football.

Limiting its membership to agricultural students only, Alpha Gamma Rho is entitled to the distinction of being the only agricultural fraternity on the campus that owns a chapter house and plays an active part in social affairs of the campus. The Iota chapter is known for the high grades that are invariably produced by members. Many of the men are elected annually to Alpha Zeta, honorary agricultural fraternity. Along with high grades, politics and athletics come in for their share of attention. Varsity sports claim their share of athletes, while in intra-murals the house is represented by teams that are better than average.

Alpha Gamma Rho was founded at the Universities of Ohio and Illinois in 1908 and has since expanded until there are now thirty-two chapters located at the leading agricultural colleges in the United States, thus stamping it as one of the foremost national Agricultural fraternities. Nineteen men are enrolled in school from this organization and eighteen members of the Agricultural Faculty are affiliated.

Class of 1938 FRANK G. UPJOHN Producers of high grades and activity men, Alpha Kappa Lambda lives over on East Gilman Street, where their vine-covered chapter house overlooks Lake Mendota and the Governor's Mansion.

In scholarship, this fraternity usually leads all others and has held scholastic honors for as many as five semesters in a row. The house president is a Phi Beta Kappa and other members have been elected to various honorary groups. Besides excelling in scholarship, A. K. L. has had men on publications and for the last two years the Editor of the Wisconsin Engineer has been an Alpha Kappa Lambda. Having five men in University Singers and Glee Club shows their interest in Music and last spring they won the revived Interfraternity Sing held on Union Terrace.

Founded at the University of California, this group has the honor of being the first fraternity having its origin on the Pacific coast. At present there are ten chapters, the local Epsilon chapter being founded in 1923, and the last one installed at Purdue, in 1934.

In the very heart of fraternity row one finds the spacious, well-kept home of the Gamma Tau chapter of Alpha Tau Omega, one of the ninetyfour chapters that has been organized since the founding of the national brotherhood immediately after the close of the Civil War, in 1865. Starting at Virginia Military Institute, Lexington, it culminated the efforts of many young men to bring about a spirit of friendliness between the students of the North and those of the South, who had been recently engaged in battle with one another.

The year 1907 saw the admission of the local brotherhood into the national fraternity. Since then, A. T. O. men have entered into the various phases of campus activities and today one sees wearers of the cross-shaped Alpha Tau Omega pin in Wisconsin Players, Scabbard and Blade, on various publications and occasionally in student politics.

John Bergstresser, assistant Junior Dean at the University and Walter Hines Page, ambassador to the Court of St. James are among the many alumni of this organization.

Characterized by the cosmopolitan nature of its members, among whom are included boys from the Hawaiian Islands, Mexico, and such distant states as New York, California, Missouri, and Nevada, Beta Theta Pi stands as the second oldest fraternity on the campus and one of the famous Miami Triad. Coming to Wisconsin in 1873, thirty-four years after the first chapter was started, the local group has a large alumni group among whom are included both Senator and Governor LaFollette, Pat O'Dea, legendary football star of the nineties, and former President of the University, John Bascom.

Living in an imposing structure on Mendota Court next to the lake, the Betas enjoy an ideal location in relation to the campus and to the houses of other fraternities and sororities.

Representatives of Beta are found in high places among the varied activities of the campus. In sports, wrestling, football, crew and track claim their men. The rosters of the Glee Club, Haresfoot, and Dramatics also include Betas.

Absorbing a local group known as the Red Triangles, Kappa chapter of Chi Phi was installed on the Wisconsin campus in 1916. Originally founded in 1824, by a group of professors and students at the College of New Jersey (now Princeton), it represents the union of three organizations of the same name, known as the Princeton, Southern, and Hobart orders; since that time it has granted new charters until there are thirty-five chapters today.

Varsity athletics do not claim many of the Chi Phi's but in intra-murals they invariably turn out good teams. The past year saw them place second in hockey, third in swimming, and in football they reached the quarter finals. Other campus activities engaged in by their men include Varsity Debate, Haresfoot, Daily Cardinal, Octopus, and the Concert Band.

Prominent alumni of the national are Senator Hiram W. Johnson; W. W. Atterbury, Fresident of the Pennsylvania railroad; S. M. Felton, President of the Chicago and Great Western railroad; Mark A. D. Howe, editor of the "Atlantic Monthly;" and Newcombe Carleton, President of Western Union.

A group of twenty-five chapters forms one of the oldest of college fraternities, Chi Psi, which was founded at Union College in 1841. Twelve chapters in the east, five in the mid-west, three in the south, and five in the west, comprise the list. In 1878 the Wisconsin charter was granted, making Chi Psi the fourth national fraternity to appear here.

Since 1914 the Chi Psi's have been living in their imposing lodge at the end of Iota Court, where they command an unexcelled view of the lake. From here their men go into many activities; some into basketball, crew or tennis; others participate in politics, and this years' Senior Class President is a Chi Psi. Union activities, Y. M. C. A. work, and publications are important parts of the extra curricular program of this organization

Three men in Phi Eta Sigma, a Tau Beta Pi, and a man in Phi Kappa Phi, furnish proof that Chi Psi's are scholars as well as campus figures.

The efficiency of their national administration and the strong support of their alumni give them ample reason to be proud of their fraternity.

Class of 1937

A total of eleven thousand men form the national fraternity of Delta Chi, a brotherhood founded at Cornell University, Ithica, New York, in 1890, in an effort to promote friendship and the acquisition of sound education among its members.

Delta Chi was among the first of the fraternities on a national basis to abolish "Hell Week," to administer budgetary control of chapter finances through an alumni board of control, and to establish a scholarship advisor system.

President C. R. Marvin, of George Washington university, Brigadier General W. K. Taylor, Assistant Attorney General of the United States Miller, and the Great Commoner, William Jennings Bryan, are all members of the fraternity.

Today forty active chapters of Delta Chi are located at various colleges from the Atlantic to the Pacific coasts, both in the United States and Canada.

Yale University, in 1844, saw the founding of the national organization of Delta Kappa Epsilon, a group which made its appearance at Wisconsin in 1906 as the Rho chapter.

Possessed of versatility and energy, the Dekes can be found in numerous extra curricular fields and the past year saw five of their men on the football squad. A member of the swimming team and the Business Manager of the Octopus constitute some of the other activity men.

Although there are several men in the house having averages of two grade points per credit, as a whole the group does not come in the upper bracket scholastically. In social prestige, however, the Dekes rank higher than many groups on the campus, and at their parties many campus luminaries can be found.

Two former United States Presidents, Theodore Roosevelt and Rutherford B. Hayes were D. K. E.'s as are Phillip Lord and Jimmy Gleason of radio and screen fame. Dr. Clarence Spears, Johnny Doeg and George Lott, tennis stars, and golfers Charles Saver and Johnny Armstrong are members of Delta Kappa Epsilon who have enscribed their names in the sports hall of fame.

Overlooking Camp Randall from Breese Terrace is the Delta Sigma Pi house, built in 1924, just one year after the Psi chapter was installed on this campus. Although the fraternity does not enjoy the usual close proximity to the University, it is not too far removed to enter into all phases of student life on the hill. Each year the Delta Sigs help sponsor the Commerce banquet and play an important part in all of the activities of the School of Commerce.

Although they get good grades and have an award known as the Delta Sigma Pi Scholarship Key, which is presented to the graduating senior in the School of Commerce attaining the highest grades, they are not "grinds" as can be shown by the number of men that enter into athletics, Haresfoot, Artus and campus publications. In intra-murals they have been winners of the Badger Bowl and turn out teams on a par with other Greek squads.

Delta Sigma Pi was founded at New York University in 1907 and has since grown rapidly to a roll of fifty-three chapters at universities throughout the United States and Canada.

Formally adopting a constitution and motto early in 1859, Delta Tau Delta fraternity came into being at Bethany College in Virginia. Twentyseven years later, a union with the Rainbow Fraternity, an old and aristocratic southern organization, was arranged, greatly increasing the number of chapters. Since that time seventy-three chapters have been authorized; the latest addition is Delta Iota of Lawrence College, Appleton, Wisconsin.

In 1888, the local chapter was founded, but left the campus shortly after only to make its appearance again in 1892, when the charter was re-issued. Five hundred and fifty men have gone through the initiation since that time, among them Michael J. Cleary, President of the Northwestern Mutual Life Insurance Company and Charles Dunn, Vice-President of the Chicago Title and Trust Company.

The Captain of the Golf team, a varsity boxer, Phi Beta Kappa and Phi Eta Sigma men, and men in Haresfoot and on the Cadinal Business Staff are all brothers in Delta Tau Delta.

A group that made its appearance on the campus over half a century ago is Delta Upsilon. The national organization was founded at Williams College in 1834, where it was first an anti-secret organization. Later it changed to non-secret and remains as such today. Since their appearance on the campus the D. U.'s have fared well in most fields of endeavor, scholastically, athletically and socially.

Numerous activity men are listed on the chapter roll such as two members of the Union Board, two men on the Interfraternity Board, the President of the Y. M. C. A. and two Varsity debaters. Honorary societies also draw men from the fraternity as is indicated by four men in Phi Eta Sigma, one man in Phi Kappa Phi, and a member of Iron Cross. The Forensic Board has three D. U.'s and the assistant News Editor of the Daily Cardinal is a Delta Upsilon.

In intra-mural sports, their hockey team this year won its second consecutive championship and good teams in other sports have ranked them among the leaders in the Badger Bowl race.

Chief among their famous alumni are Chief Justice Hughes, President Garfield, the Dawes brothers and John Erskine.

\$

Duggar Whitney Burnham Grady Streckewald Neller Pease Cady Petri J. Wilkie Mortell Terwilliger Brown Schlitz Richardson Mueller Van Hagen E. Wilkie Gilbert Forester Minahan Puls Johnson Bradley With an enrollment of over forty thousand members, Kappa Sigma leads all national fraternities in numbers, as well as in age. The foundation of the brotherhood dates back to the early fifteenth century when, at the University of Bologna, there was formed a secret order which has continued to the present day. Now there are one hundred and eight chapters spread throughout the United States and the Dominion of Canada.

Harold "Bud" Foster, basketball coach, and Guy Sundt, assistant football coach, are both members of the local chapter, giving the house two key men in important campus positions. Among other prominent alumni are listed three United States Senators, twelve Congressmen, seven Justices of Supreme Courts, twenty-four college presidents, six state attorney-generals and three governors.

In athletics nine of the last ten captains of the swimming team have been Kappa Sigs; in other undergraduate activities men are on publications, in politics and in military organizations.

Founded at Boston University in 1909, Lambda Chi Alpha has grown rapidly and today twenty-six years after its founding, there are eighty-four active chapters in existence with a total of over 17,000 members. Alpha Beta Zeta chapter was chartered here in 1017 and has since enjoyed an increasingly

favorable position on the campus.

The fraternity is fast acquiring a significant alumni body which is establishing scholarships and carrying on work along humanitarian lines. The Christian ideals of the group are exemplified in the rituals and the insignia which are historically correct.

Prominent alumni of their brotherhood include the well known Gordon "Mickey" Cochrane, manager of the Detroit Tigers and James V. Allred, Governor of Texas.

Twenty-two men enrolled in the various colleges of the University comprise the fraternity, along with seven graduate students and three professors on the faculty.

3

Class of 1937

One of the oldest of national fraternities and one of the first on the campus is Psi Upsilon. Originally founded at Union College, Schenectady, New York, their policy of expansion is somewhat conservative and at present there are twenty-eight active chapters; the local group founded in 1896, has the Rho charter.

The Psi U's are well represented in campus activities; on publications during the past year they had the Executive Editor and the Business Manager of the Daily Cardinal. In politics the Prom King was a Psi U., and athletics such as track, football, and crew also saw participants; others are in Tumas and Cardinal Key. In intramural competition they won the crew race and were possessors of good teams in basketball and football.

Among the prominent members of this fraternity are two former United States Presidents, Chester A. Arthur and William H. Taft, the latter also a Chief Justice of the United States Supreme Court. Henry L. Stimson, Secretary of State, and Nicholas Murray Butler, President of Columbia University are also on the membership list of Psi Upsilon.

Founded in 1857, fifteen years before any other fraternity at this university, Phi Delta Theta ranks as the oldest organization of its kind on the campus

Ranking sixth in scholarship, Phi Delt also has

an enviable record in activities. Three of the twelve members of Union Board during the past year were Phi Delts as were the editor of the 1935 Badger, the chairman of Orientation Week ac-

tivities and the chairman of Mother's and Father's

weekend. The house is well represented in Iron

Cross and White Spades as well as in Phi Kappa

Among the prominent alumni of Phi Delt are William F. Vilas, former United States Senator and

one of three founders of the local chapter, three

Senators and five members of the present House of

Representatives as well as numerous other lumina-

ries in the world of business, sports, journalism and

politics. With 106 chapters, Phi Delt ranks as one of the largest national fraternities in the country.

At 16 Langdon Street stands one of the five most beautiful fraternity houses in the United States - - - it is the home of Mu chapter of Phi Gamma Delta. This organization appeared on the campus in 1893 and after a period of expansion moved into its present abode, which was built in 1927 by the alumni.

The national chapter was founded in 1848, at Jefferson College, Canonsburg, Pennsylvania, and expanded to other colleges until there were seventythree charters granted to groups in the United States and Canada.

National and local alumni include the deceased ex-President Calvin Coolidge, Newton D. Baker, Stuart Chase, Governors Langdon of Kansas and Lehman of New York, and Fred Clausen, President of the Board of Regents.

Always active in student affairs, the Phi Gams this year produced many well-known campus figures. The President of the Inter-fraternity board, the President of Haresfoot, Business Manager of the Badger, leaders of the Military and Interfraternity Balls, the Coach of the University boxing team, and men in varsity athletics and honorary societies are all wearers of the Fiji pin.

Founded by a group of Catholic men as a fraternity for Catholics, Phi Kappa stands as the only denominational fraternity on the campus. The national chapter of Phi Kappa was founded at Brown University, Providence, Rhode Island, in 1889; since that time it has spread to other colleges and now there are twenty-one active chapters in the United States, all of which come under the directorship of the national at Dover, Ohio.

Lambda chapter was granted at Wisconsin in 1922 and has initiated many important Dane County and Madison men. Some of whom are Leo Crowley of F.D.I.C. fame; John Mackin, Superintendent of the Madison Sanitation staff; John Cavanaugh, local attorney, and Gregory Buenzli of the State Banking Commission.

Scholastically this organization has usually stayed in the upper division and they have men in several honorary and professional groups. In extracurricular activities, they also have representatives. In intramural sports they enter teams that make a creditable showing as can be indicated by the trophies adorning their chapter house at the end of Langdon Street.

National alumni of prominence include Alfred E. Smith, one time Democratic Presidential Nominee, Fred Norton, and the deceased Senator Walsh.

Burth Drobpa Hitchler Bauer Smergalski Schils Blong Schleck L. Walch Frve McGinus H. Buenzli McCarthy W. Buenzli F. Walch Cotter Smith Beck

Washington and Jefferson College saw the beginnings of Phi Kappa Psi fraternity in 1852, an organization which has since expanded into fiftytwo different colleges and universities.

The year 1875 marked the date for the appear. ance of this group on the Wisconsin campus as the third national fraternity to be chartered here. The captain of the varsity crew, two regulars on the baseball team, a Sophomore Class Director, a center on the basketball team, one member of the Interfraternity Board and the Vice-President of the Badger Board constitute some of the activity men of the brotherhood.

Living on State Street, across from the University Library, gives them the advantage of being closest to the campus, yet still not too far removed from the fraternity district to hamper their activities, social or extra-curricular.

Woodrow Wilson and Walter Hampden, actor, include some of the famous alumni of Phi Kappa Psi.

The twelfth national fraternity to appear on the Wisconsin campus was Alpha Theta of Phi Kappa Sigma, in 1900, fifty years after the founding of the national organization. In the fall of 1924 the Phi Kappa Sigs opened their new English Georgian style house on the shore of Lake Mendota.

Phi Kappa Sigma boasts of many prominent local alumni such as: Warren Persons, noted New York economist; Judge Frank Bucklin; George Bresnahan, University of Iowa track coach, and Warren Weaver of the Rockefeller Foundation. And there are such outstanding characters as Claude Swanson, Secretary of Navy; Justice George Orlady of the Pennsylvania Supreme Court; Bishop James DeWolf Perry of Rhode Island, and Frank D. Fitzgerald, Governor of Michigan, listed on the national roll.

Phi Kappa Sigma has played a large part in campus activities since its installation on the campus and in the last ten years there have been seven class presidents in the house. One of the leading shot-putters in the Big Ten is at present a brother in the organization.

Forty-three chapters located throughout the United States from coast to coast, comprise the national brotherhood of Phi Kappa Tau, a fraternity dedicated to the scholastic, moral and social achievement of the college man. It endeavors to obtain real fellowship, a respect for learning and clean living and it attempts to make the life of each member more worthwhile by his association in the brotherhood.

A definite night of every week is set aside when information and scholarly talks are given to the chapter by prominent faculty men in an effort to give a better conception of college life and its related problems.

Of all the chapters founded there is not one inactive, thus giving Phi Kappa Tau the distinction of being the largest national fraternity without inactive charges. Its eight thousand members give it a ranking of twentieth in size in comparison to the other eighty-two college Greek letter societies.

Many Pi K. A.'s have participated in the athletics and the past year saw one of their number on the varsity football team and another, one of the leading hitters and Captain of the baseball nine. In intramurals they won the football championship and turned out average teams in other sports to put them up among the leaders in the Badger Bowl race.

Although founded in the south in 1868, it was not until 1900 that they installed a chapter north of the Mason and Dixon line. Now there are seventy-eight charges of this group scattered among the different colleges and universities.

Pi Kappa Alpha was one of the first fraternities to abolish "Hell Week" and in order to encourage their men scholastically, they give an award annually to the highest ranking man. Their members are also urged to take a part in campus life, and men on the Daily Cardinal and the Octopus staffs as well as in numerous other positions show that they truly enter into it.

The year 1855 saw the founding of the third member of the local Miami Triad, Sigma Chi. It was the nineteenth college fraternity to be organized and started with a group of young men who had withdrawn from a similar society. From this founding, Sigma Chi has grown until now there are ninety-four chapters in the United States.

In the local Sig Chi chapter one sees a typical athletically minded group of young men. Their proficiency extends into all varsity athletics, since a Sig Chi can be found in practically any sport from football to water polo. In intramurals, the basketball team won the inter-fraternity title, their water polo squad placed first, the indoor track team annexed a third, and they reached the finals in bowling, giving them a substantial lead in the Badger Bowl competition for the past year.

Both the captains of football and basketball squads were members, as were two men in Iron Cross, and another elected Freshman Class Director.

Founded in 1860 at Virginia Military Institute. Sigma Nu today has ninety-six scattered chapters in forty-six states of the Union, with a total of thirty thousand brothers, thus ranking fifth among all college fraternities in total membership.

Under the guidance of Professor Holt, of the French Department, the local organization was founded in 1902 as the fifty-fourth chapter and the first to come into existence as an original Sigma Nu chapter without absorbing some older, established group.

A group of varied and distinguished alumni include Zane Grey, noted author, Ellsworth Vines, tennis player, Charles "Chic" Sale, actor and Richard "Skeets" Gallagher. Kay Kyser, famed orchestra leader, is also listed in the fraternity annals and is probably the most popular Sigma Nu among college students.

"W" winners are not uncommon in the house and Wisconsin teams regularly benefit by men drawn from the ranks of this organization.

Robert C. Clark William R. Jones Holgar Hagen John W. Pope William O. Schilling

Class of 1936

Delevin B. Deusenbury Frank L. Greer Richard C. Lintleman A highly selective system of rushing and pledging is the boastful feature of Sigma Phi. With a membership limit of twenty men at one time, they claim quality rather than quantity as may well be shown by the type of men that engage in outside activities. Around the famous round table one sees a fraternity which has a high proportion of men in extra-curricular work. The Captain of the track team, the President of Union Board, a Phi Kappa Phi, last years "leading lady" in Haresfoot, men in University Theatre work, a columnist for the Daily Cardinal, and a Y. M. C. A. man all seat themselves at the famed board.

Sigma Phi was founded at Union College, Schenectady, New York, in 1827, one of the first Greek letter organizations in the United States, and the first to expand to a second college. The number of chapters was limited to ten and this quota is filled with seven in the east, two in the middle west, and one at the University of California.

3

Merriman Hardy Lintleman Gilson Pope Fazen Hardy Johnston Griswold Kissel Greer Schilling Hagen Clark Cate Jones

Winners of the Badger Bowl, producers of activity men, and material for honorary fraternities, Sigma Phi Epsilon makes its home at 146 Langdon, next to Lake Mendota. Although a younger national and local fraternity, its growth has been rapid since the induction of the first Sig Ep chapter in 1901, at Richmond, Virginia. Since 1921, Sig Eps have attained numerous campus honors; editors of the Daily Cardinal and the Badger, and "W" men in track, football, and baseball are wearers of the Sig Ep heart.

The News Editor of the Daily Cardinal, editorial chairman of the Badger, assistant director of the University Band, members in Glee Club and University Singers, the Elections Chairman, staff men of the Daily Cardinal and the Badger, and two in Haresfoot include some of the activity men.

In honoraries men are in Iron Cross, Sigma Delta Chi, Beta Gamma Sigma, Phi Kappa Phi, Alpha Kappa Psi, Phi Eta Sigma, Tau Beta Pi and Chi Epsilon. Scholastically one man was the recipient of an assistantship to study in Sweden, while the house as a whole ranked ninth this year.

A chapter characterized by its youthfulness, due to the small number of graduating seniors, and prominent in campus affairs, Theta Chi ranks well in the fraternity world. Placing an emphasis on the more serious factors of college life probably accounts for this as do the basic ideals of the brotherhood: active, working loyalty to the university and lifelong devotion to the fraternity.

After existing for five years as a local group it was admitted as the Psi chapter of Theta Chi in 1917 and developed rapidly until, in 1925, a new house was constructed, and here the Theta Chi's hold forth today. Located in the center of the fraternity region and near the lake, it offers an ideal spot and the colonial simplicity of the house's construction sets it off from the other nearby structures.

Expanding to fifty active chapters since its founding, at Norwich University, Norwich, Vermont, in 1856, Theta Chi has initiated over eleven thousand men into the brotherhood, and its growth is continuing, even though slowed by the depression.

May fifteenth saw the celebration of the fortieth anniversary of the Sigma Deuteron charge of Theta Delta Chi, a fraternity founded in 1847, in an endeavor to encourage scholarship among its members. The granting of the interest from a scholastic trust fund to the chapter having the highest average is one of the incentives that is offered by the national organization.

Theta Delt activity men are not numerous, but a few of the fellows break into politics and athletics. The president of Phi Delta Phi, a Military Ball chairman, and a Parent's Week end chairman are included in the chapter roll, as is a member of the varsity crew.

Since the founding of Theta Delta Chi, at Union College, Schenectady, New York, there has been in effect a conservative system of expansion which has brought into being twenty-nine chapters, just one short of the set limit of thirty. Educators, legislators, and ministers can be found in the fraternity annals, along with prominent business men.

In the newest chapter house on the campus lives Theta Xi, one of the younger fraternities yet far from the most inactive. In the last few years they have won the Badger Bowl twice in succession and have produced varsity athletes invaluable to their respective sports. During the past nine years there have always been major letter winners in the house. Of the 1933 letter men, four of them are in organized baseball; one with the White Sox, one with the Chicago Cubs and two men in American Association clubs.

Founded in 1864, as an engineering fraternity, at Rensselaer Polytechnic Institute of Troy, New York, Theta Xi has established thirty-five chapters, all of which are active. Locally, they were organized in 1917 as the Phi chapter.

Eight deans of engineering colleges head the list of important alumni, and there are included in the chapter roll United States Senator Adams of Colorado, Congressmen Ames of Massachusetts, Aldrich of Alabama and Thomas of Ohio.

Triangle enjoys the unique position of a social fraternity, enjoying all the advantages of a professional group in so far as its men are all students in the engineering college. When it started, it was limited to civil engineers only, but this has been changed to admit all men classified as engineers.

Founded at the University of Illinois, in 1907, the fraternity has added chapters with extreme conservatism and there are now fifteen chapters, five of which are in Big Ten schools, the others in mining schools, and state colleges. In 1913 the Wisconsin group was organized and since that time has maintained an enviable scholastic record. This, however, has not deterred the brothers from following out a moderate program of athletic and social activities.

Arthur C. Willard, President of the University of Illinois, is the best known alumnus, and there are such notable engineers as Daniel Mead, and Arthur N. Talbot who have made notable contributions in the field of technical achievement.

David L. Blaushild Jerome B. Kumin Ralph V. Guinzburg James A. Rosenthal Howard M. Teichmann In 1916, a local organization known as the Octosa Club, was granted the Alpha Kappa charter in the national organization of Zeta Beta Tau. Oldest of the national Jewish fraternities, Zeta Beta ranks also as one of the best. The national organization was founded at the College of the City of New York in 1898, and grew conservatively until today, there are thirty-four active chapters and twentyeight alumni clubs in the United States.

The Zeta Betes moved from their old house on North Lake Street to a new home on Langdon last year. The new residence is headquarters for men in almost all phases of campus activity. During the past term there were men on the Daily Cardinal, in Haresfoot, Wisconsin Players and freshman and varsity track. Union Board work claims men from the house as did committees for Homecoming and Parents' Week-end. A dormitory fellowship, committee men in class functions, and men on the Wisconsin Law Review, help swell the activity record of Zeta Beta Tau.

DORMITORIES

ADAMS HALL

Men's Dormitory

MILTON LOZOFF President FREDERICK VAN SICKLE . . Business Manager THEODORE PAULLIN Head Fellow

Occupying one of the most charming sites of the campus, Adams Hall has completed its tenth year as a men's dormitory. Flanked on one side by Lake Mendota and on the other by tennis courts and athletic fields, in a predominantly studious atmosphere, its residents find nothing lacking for an active, well rounded existence.

Besides many individual house parties, Adams enjoyed a number of group functions climaxed by the Tripp-Adams dance which was attended by over 100 couples. These affairs were skillfully managed by the elected social committee. In the way of athletics, the intra-mural competition for the supremacy cup continued. Round robbins were held in touch-football, basketball, track, volleyball, water-polo, cross-country, and baseball. Noyes House and Tarrant led in number of victories.

Competition took place also in scholastic achievement. LaFollette House proved to be the most studious.

Administration of the Hall is in the hands of the Fellows and the Quad council, a legislative body composed of the House Presidents.

TRIPP HALL

Men's Dormitory

Second Semester President Head Fellow FREDERICK REEL HERBERT ALBRECHT

Tripp Hall is located on the shore of Lake Mendota at the foot of Observatory Hill. In this beautiful secluded spot, Tripp is remarkably well situated, a few steps to the lake, a short walk to the intra-mural athletic fields, and only eight or ten minutes from Bascom.

Tripp, like its neighbor Adams, is divided into eight units or "houses" which compete with each other and with the Adams units in athletics and other house activities. In 1924-35, Tripp and Adams fared about equally well, Frankenburger house of Tripp winning the dorm volleyball championship and Botkin the water-pole crown. Scholastically Botkin led both dorms with 1.882, and the same house won the Phi Eta Sigma cup for the second successive year. This cup is awarded to the dormitory house having the most men initiated into the freshman honor society.

A social program is another of Tripp's activities, several dances and a spring formal featuring this year's dormitory program, in addition to the social functions carried on by the individual units.

How to Found a Dating Bureau

Every year some enterprising soul, usually safe in the inner fastnesses of Tripp or Adams Hall, announces that he has established something new, something different—a dating bureau. For a nominal charge, he supplies all sorts and conditions of guys to all sorts and conditions of gals—for a nominal charge.

The way the dating bureau works is this:

The boys who stutter when they meet a lovely lady and the girls who aren't quite sure what to say are registered with a careful list of their characteristics. Anyone with the required two bits can have his choice, but no guarantee of results is given.

Actually, no such scheme has ever worked at Wisconsin. The lads have accumulated long lists of guys, but the gals just won't come around. However, there must be some solution to this problem. Some bright young man is going to make himself a pile of dough and it may be you.

Here are some suggestions:

Offer a prize of a bicycle or a Shetland pony to the boy who makes most dates through your agency.

Lift the mortgages on some of the bigger sorority houses in payment for glowing testimonials, such as "Popular Tri-Kappas Endorse Weems Dates—'We want Weems', Coeds Shout."

This Year it was

How to be an Eligible Bachelor Are you a smoothie?

If the girls get out their compacts at your approach, start to comb their hair, and make sure that their eyebrows are arched in the proper manner, then you are, and Wisconsin is your school.

Wisconsin, you see, is an institution where women pick their men and pick the good ones. Some organization starts an election and, lo and behold, the next day you find yourself in the headlines. You have been officially designated Public Heart-Throb One, Two, or Three, and you will never be anything else.

Requisites for this proud position are varied. You may make it by virtue of a catchy name. You may be a all-conference basketball player or you may have some deadly enemy who is seeking revenge.

Perhaps you don't regard yourself as one of the three most eligible bachelors. Perhaps you will never get eligible. Perhaps you aren't even a bachelor. But things like this make no difference. When the Great American Coed makes her choice, there is no chance to alter it. And even third in this election is no empty honor.

Arriving in Madison, let the whole world know of your presence. Fire a twenty-one gun salute, ride down Langdon Street in an open barouche, crack up your Packard coupe in the Pi Phi front yard.

And then, if you are successful, some day you may be most eligible for just what, we couldn't say.

How to be a Rank Militarist

There are undoubted advantages in being a Militarist rather than a Red. First, you need not spend any money on clothes. Second, you can draw money as a member of the R. O. T. C. Finally, if you are a good boy, you may be Military Ball chairman some day. Wouldn't that be nice?

As a matter of fact, the R. O. T. C. is a fine training ground for patriots. Are you a subversive influence? Are you a tool of Moscow? Do you run and hide under the bed when the legislature begins to investigate? The R. O. T. C. will help you snap out of all that foolishness if they have to shoot you to do it.

There can be no doubt of the romantic appeal of a nice khaki uniform with putties, Sam Brown belt, and saber. Of course, the coat doesn't match the breeches, the putties make your legs swell, and you trip on the saber, but there is still a great deal of glamour in a uniform.

There are a few objections to taking the Army courses. The basic course trousers, for instance, have no cuffs on them. You will realize what a lack this is, for where would you put cigarette ashes? Also, the drill grounds are either ankle-deep in mud or covered with a choking layer of dust every day. But, after all, these are minor troubles, and they shouldn't deter you from becoming an influence for the Preservation of Americanism. Ziegler's

How to Paint a Wall

In the deep of night, with lookouts posted to watch for the police, you creep down Langdon to Paint the Wall.

You are a big shot, you understand, a member of an organization that seeks to maintain Wisconsin spirit, so it is up to you to subject this wall to its annual redecorating. And you, too, are an artist with paint-pot and brush.

That is, it is up to you if a certain economics professor continues his subsidy of an organization whose sole purpose it is to apply paint to the wall annually. This is an economic good, for it keeps it from falling into a hopeless mass on lower Langdon.

The means of applying the annual shower to the famous heap of bricks entails three operations-the Preparation, the Onslaught, and the Retreat. The exact routine of the Preparation varies from year to year, but it involves much deliberation and thought to find a proper motto. The Attack is made from as many cars as the group can muster, and is done silently (relatively) and stealthily (absolutely). The Retreat is begun immediately, but is usually interrupted by the Madison police and continued after the paying of bail in the morning.

The net result of the whole adventure is the satisfaction that you are becoming a college boy, just like in the movies, and you get your name in the Daily Cardinal.

How to Write a Thesis

By the time you are a senior—if you ever are a senior—you will have decided to write a thesis. Worth three credits a semester, it looks like an easy way of finishing the year, so you sign up for Course 100—Thesis.

Your thesis adviser, of course, is the one person in school who knows less about the subject than you do. That is why he is your adviser. He helps you to choose a topic something like "The Substitution of Integral Calculus for Vitamin D in the Manufacture of Cast-Iron Post-Holes," slaps you on the back, and wishes you farewell until a week before Commencement.

You do the same to the idea. It slowly gathers dust in the innermost recesses of your mind. You take seven large and impressive books on home for Christmas recess, but they do little but lie on your bureau as mute witnesses of why you got that D in History.

The same process is repeated between semesters and in spring vacation. You begin to worry about the content, but decide that first you should get an estimate on the cost of typing. When the check comes naturally, you have enlarged upon the amount just to have a fund for special emergencies—you begin to wonder if it isn't a lot of money to spend on the sort of thing you intend to compose.

The last episode comes when you make up your mind that, since the dough is gone, you might as well get your degree after summer school.

How to Peddle Peanuts

Perfect coordination marks his every move, as he poises himself on the lap of the lady from Mukwanago and prepares to cast his missile.

He aims. He fires. A round of applause greets his perfect shot as the peanut bag lands with a thud upon the upturned countenance of a man three rows down and two to the left of his customer. Peanuts are showered in all directions, and he bows in recognition of the paeans which bursts from his admirers.

Tall, bronzed by the summer sun, every nerve and every muscle keyed to the supreme efforts of his career, the football peanut salesman is making a mark for himself in this world. Wearing a white coat with red letters across his back, he thrills to the thought that he bears the colors of his Alma Mater. Worthy of all the encomiums piled upon him, he walks with magnificent disregard of the shouting of the ushers and the corns of the cash customers in the front row.

He did not reach this pinnacle in a day. No, indeed, long months of training have perfected him in his profession, until there are few indeed, who can challenge his supremacy. He is an expert in his field.

But you, too, can be a peanut seller. You, too, can wear a canvas apron full of change and match nickels between halves. Practice makes perfect, and who knows but what there will come a day when you can retort to the cream of the crop—

"Nuts to you!"

How to Be a Campus Red

At first thought it may seem a little difficult for the average student to become a Campus Radical, but it is really not as hard as it seems. To begin with, there are two types of Reds, those that are allied with organizations and those who prefer to be alone.

The Lonely Red is a rare species, seldom found since the depression, for retrenchment is the rule and it is altogether impractical to suppose that everyone can blow up the state capitol. There just aren't enough to go around, and the price of bombs and bushy beards is almost too much for the average student. However, some of the Madison Communist Supply stores have very reasonable combinations at \$79.95, including wood coffin. However, it is the Lonely Red which you no doubt wish to be, so The Badger Correspondence School will give instructions for becoming one.

First, you must look the part. Did you ever see any kind of a Red in a blue serge suit with a black bow tie? Of course not. There is specified equipment for this sort of thing, and you should have a pair of corduroy slacks (much worn); a black, crew-neck sweater with shiny leather on the elbows; a horse-hide jacket with buttons (not zipper) down the front; and a grey flannel shirt. No neck-tie allowed.

As for conduct—take remote courses in philosophy, sociology, economics, and political science. Sneer audibly whenever Henry Ford is mentioned, write bombastic letters to the Cardinal, and carry a worn copy of Karl Marx wherever you go, always making sure it is the top book when you set the pile down.

Although there is a certain school of thought which denies the wisdom of waving a red flag in classes, in certain lectures it is quite the thing for the earnest young man or woman to do. Since this is so, no Lone Red should be without our special offer No. 3827B. This is in two parts; (a) a lovely red flag with white hammer and sickle; and (b) an R. O. T. C. uniform behind which to hide in case you have chosen the wrong class.

There are two things you must not do. First, don't wear a tie or shave more than once a week. And second, when in doubt, disapprove in silence.

How to be a Power Behind the Throne

The first day you get to Madison, make up your mind to assert yourself. Are you vigorous, forceful, dynamic? Are you used to bending men like blades of grass about your little finger? If so, you should be a Brain Truster instead of a student.

But suppose you are one of these. Suppose you are dynamic. Men quail at your approach, and dogs scuttle off down the road with their tails between their legs. You, then, are a man of destiny, a power behind the throne.

You are dynamic.

The first thing to do is to either pledge a fraternity or not pledge a fraternity. If you want to be head of the "old Langdon Street machine," as the Daily Cardinal calls it, pledge. But if you want to be the man who cracks the whip over the independants, don't.

Next, find a throne to be a power behind, and keep it filled with personality boys who smoke briar pipes and talk wisely of deep, dark political plots. Promise them whole blocks of votes—the Dayton Street houses, the Big Six, the Miami Triad, anything, just so it sounds big enough. In return, you are to be the mystery man who pours oil on the troubled waters of factional dispute.

Of course, you are a clean politician. Of course. But circulate rumors that even you have your price. Who knows but that someone may offer you a price; you never can tell.

You may even get a pass for Prom some day.

MEMORIAL UNION - UNIVERSITY OF WISCONSIN - MADISON

RICHARD S. BRIDGMAN EDITOR

JOHN K. WOOD BUSINESS MANAGER

May 10, 1935

Brock Engraving Company, 115 South Carroll Street Madison, Wisconsin.

My dear Mr. Brockhausen:

The 1935 Badger is published and your work in the 50th volume is completed, a task eminently worthy of your speedy and skillful workmanship and of the golden anniversary which it celebrates. With the tradition of Wisconsin's oldest publication behind us, we were naturally anxious to secure that engraver who would best uphold the standards of that tradition.

Rush orders, misplaced cuts and the thousand and one details attendant on annual publication, you have not neglected.

Your unfailing enthusiasm and master craftsmanship we have relied upon at all times to make of our book a harmonious entity and an artistic production.

To say that your help has been invaluable would be to say the superfluous, but the best proof of our thanks lies in the satisfaction of a job well done.

Thanks again for your cooperation on this 50th Badger and come again!

Sincerely,

Richard S. Bridgmun Editor-in-Chief John K. Wave Business Manager

JOHN K. WOOD BUSINESS MANAGER

Mr. William J. Meuer The Photoart House 413 State Street Madison, Wisconsin

Dear Mr. Meuer:

This is the culmination of a year that has been pleasant largely due to the whole-hearted consideration on your part. As the official photographer for the 1935 Badger senior section, you have given us thoughtful and able workmanship.

Isabelle deserves a vote of thanks for her most courteous and friendly work with us. She was always ready to look up some small detail that we might call for; it has been a pleasure to put out the senior section with such unselfish and good-natured aid. The high quality of your workmanship speaks for itself.

The numerous pictures in the special occasion and publication sections of the book we also wish to thank you for.

You have tried to help us in every way. We hope that this letter is at least a sincere expression of appreciation and gratitude.

Sincerely yours,

Richard S. Bridgman Editor John K. Wood Business Manager
