MINUTES OF THE REGULAR MEETING

of the

BOARD OF REGENTS OF THE UNIVERSITY OF WISCONSIN SYSTEM

Oshkosh, Wisconsin

Held in the Reeve Memorial Union Lounge
748 Algoma Boulevard, UW-Oshkosh
Friday, October 10, 1980
9:00 a.m.

UW-Oshkosh ²¹ - Regent mty held at UW-Osh -
✓ c x-ref - Regent Meetings
President Erdman Presiding

PRESENT: Regents Beckwith, DeBardleben, Erdman, Finlayson, Fitzgerald, Fox, Gerrard, Grover, Hendrickson, Knowles, Lawton, O'Harrow, Veneman and Walter

ABSENT: Regents Majerus and Thompson

Upon motion of Regent Veneman, seconded by Regent Fitzgerald, it was VOTED that the minutes of the regular meeting of the Board of Regents of the University of Wisconsin System, held on September 5, 1980, be approved as mailed to the members of the Board.

- - -

REPORT OF THE PRESIDENT OF THE BOARD

The report of the September 30, 1980 meeting of the Wisconsin Board of Vocational, Technical and Adult Education was ordered filed with the papers of this meeting (EXHIBIT A).

-

President Erdman welcomed to the meeting State Representative Lary Swoboda, Mr. Al Johnson, of Sister Bay, and Mr. George Erickson, of the Gibraltar School District.

Representative Swoboda stated that the University calendar for registration and the beginning of first semester classes has created problems for the tourism-oriented area which he represents, in that students have been leaving their summer employment at the busiest time of year for the area's economy. He noted that new personnel could not be hired and trained rapidly enough to replace them.

✓ Calendar - Disc. abt beginning
classes before Labor Day: Presentation
by Rep. Harry Swoboda p. 1-2
Regular Board 10-10-80

2

Mr. Al Johnson, who owns a restaurant in Sister Bay, indicated that he was speaking on behalf of most of the employers in the northern part of Door County. Commenting that they have been losing student employees earlier each year, he said that, during the current year, they had left as early as August 18, returned for Labor Day, and then went back to school. Noting that 86 of his employees, representing 92% of his payroll, are students and, mentioning one business which had stopped serving food after Labor Day due to lack of staff, he indicated that he and several other employers were seriously thinking of turning to Minnesota for student help, since universities in that state begin the fall semester on the last Monday in September. He felt that extra month of work not only would be greatly helpful to business, but would benefit students as well, in that, for example, a waiter or waitress could earn during that period enough money to pay for one year's studies. Suggesting that the ending date for the spring semester could be extended and that the break between semesters could be shortened, he urged the Regents to consider means of alleviating the problem he had described.

In response to an inquiry by Regent Gerrard, Mr. Johnson recommended a calendar similar to that used in Minnesota, in light of the need for student employees during the month of September. Regent Gerrard told Mr. Johnson that he would "endorse your thoughts 100%."

Regent Beckwith asked about the importance of having student help available by Memorial Day, to which Mr. Johnson replied that fewer employees were needed for that weekend but that he must be completely staffed by June 10 or 15. Regent Beckwith then inquired as to whether the preference for having students available from mid-June through September would be shared by tourism businesses in areas of northern Wisconsin outside of Door County; and Mr. Johnson expressed his belief that 90% of them would support that position, since the largest volume of business begins about the 20th of June.

Replying to questions by Regent Gerrard, Mr. Johnson said that his business earns more dollars during September than during July, and that it is very difficult to serve customers well after trained personnel have left.

Stating his agreement with Regent Gerrard, Regent Veneman indicated that he also was very sympathetic to the concerns that had been expressed.

Regent Gerrard thought that the Regents should work with tourism businesses to solve the problem, pointing out that, if they did not, employers would have to recruit students from other states.

Mr. George Erickson said that, as guidance counselor at Gibraltar High School, he had been placing students in summer jobs and helping them to obtain financial aid for approximately 20 years, and that he could address the issue from their point of view. Believing that students are becoming increasingly concerned about financing their educations and that sources of financial aid could become less available to some of them, he considered the opportunity for summer work to be "an absolute necessity; and they want to do it." He urged the Board to act on Mr. Johnson's request.

President Erdman asked System Administration to look into the matter and report to the Regents at the November, 1980 meeting.

✓ Regent Commmo: Comm. to Review UW System Practices Related
to Political Broadcasts - "UW System Broadcast Stations
Regular Board 10-10-80 Procedure for Handling Complaints" adopted
R. 2250, p. 3. (X-ref Broadcasting)

Reporting for the Regent Committee to Review UW System Practices Related to Political Broadcasts, Chairman DeBardleben read a statement regarding complaint procedures, which had been approved by the Committee.

Noting that it would be beneficial to have these procedures in effect during the current campaign period because of the possibility of complaints, Regent DeBardleben moved adoption of that statement; and the motion was seconded by Regent Fox:

Resolution 2250: That the paper entitled University of Wisconsin System Broadcast Stations Procedures for Handling Complaints (EXHIBIT B) be adopted.

In response to Regent Erdman's inquiry as to how the statement would be disseminated, Regent DeBardleben said that it would be made available at each broadcast facility for which the Board of Regents holds the license and would be provided to anyone having a complaint.

Regent Lawton asked if it would replace any prior policy statement or conflict with local policies, to which Regent DeBardleben replied that it would not, since, to his knowledge, the procedure that was followed previously had not been codified.

Put to the vote, resolution 2250 was adopted.

Regent DeBardleben then reported that the Committee would hold a hearing on December 4, 1980 regarding the following questions: What should be the policy of the Board of Regents in regard to accessibility to University of Wisconsin System broadcast facilities by proponents of varying political viewpoints upon an equal opportunity basis? And what rules or means are appropriate for implementing such a policy under existing law? He pointed out that the fact that a hearing was being scheduled should not be interpreted to mean that the Committee had decided that there should be any policy different from that which exists and that which is required by the law and by regulations. The Committee intended to invite representatives of the Educational Communications Board, the Wisconsin Civil Liberties Union and the WHA Faculty Advisory Policy Committee and to publicize the hearing among media people who might be interested.

- - -

REPORT OF THE PRESIDENT OF THE SYSTEM

UW-Oshkosh Chancellor Edward Penson made a presentation to the Board, which is included with these minutes as EXHIBIT C.

President Erdman thanked Chancellor Penson, on behalf of the Board, for his statement and for the gracious hospitality displayed by UW-Oshkosh in hosting this meeting. "The faculty, the students, the legislators, the alumni and your associates have given evidence of the very strong support that UW-Oshkosh has gained in this community."

✓ UW-Oshkosh - Statement by Chancellor Penson, p. 4 & 5
& Exh. C.

UW-Oshkosh - Regent Mtg held at UW Oshkosh.
X-ref

President O'Neil also expressed appreciation to Chancellor Penson on behalf of the System Administration staff, adding that, at the opening assembly of the school year, Chancellor Penson had received "a quite spontaneous standing ovation from his colleagues within the University community for his exhortation to them to press on to new goals and objectives in the year that was just beginning. I think some of the same feeling that must have pervaded that gathering and brought forth the standing ovation was certainly present as we listened this morning."

Adoption of Resolution 2251 was moved by Regent Beckwith, seconded by Regent Fitzgerald and voted:

Resolution 2251: That the Report of Non-Personnel Actions by Administrative Officers to the Board of Regents and Informational Items Reported for the Regent Record (EXHIBIT D) be received for the record; and that actions included in the report be approved, ratified and confirmed.

Ms. Kim Kachelmyer, President of the United Council of Student Governments, reported the following:

- (a) Most of the monies collected through the United Council funding formula had not been received to date.
- (b) Referenda on participation in the United Council fee program had not yet been held on four campuses, while a referendum on October 9, 1980, at UW-Stout, approved participation.
- (c) A motion concerning the establishment of a School of Veterinary Medicine, which has been strongly supported by United Council, was to be considered at its October 11, 1980 meeting.
- (d) Budget recommendations would be provided to the Regents before the Board's November, 1980 meeting.
- (e) The Council adopted a resolution opposing further tuition increases as a means of responding to the UW System's budget reduction and pledging its best lobbying efforts to aid the System in dealing with the budget cut.
- (f) A five-year planning committee has been established to provide the Council with continuity in several areas.

Ms. Kachelmyer then introduced Bob Kranz, President, and Kate Ferris, Vice President, of the Oshkosh Student Association.

REPORT OF THE SECRETARY OF THE BOARD

Secretary Temby reported that C. Philip Johnson, who had served on the Board of Regents from 1976 to 1978 as President of the Wisconsin Board of Vocational, Technical and Adult Education, had not received the designation of Regent Emeritus upon completion of his term of service.

It was moved by Regent DeBardleben, seconded by Regent Fox and unanimously carried, that the following resolution be adopted:

Resolution 2252: That Regent Emeritus status be granted to C. Philip Johnson.

*Johnson, Regent C. Philip - granted status of Regent Emeritus
- Res 2252, p 5.*

REPORT OF THE EDUCATION COMMITTEE

UW-Osh - Academic Progress Days - Chairman Beckwith reported for the Education Committee.

*presentations made on geology, MBA and Bach of liberal studies programs
p. 5*

Presentations concerning three academic programs at UW-Oshkosh were made to the Committee.

Dr. James Hoffman, Associate Professor of Geology and Associate Dean, College of Letters and Sciences, described the University's undergraduate Geology program, noting that it is currently the largest in the state. He informed the Committee that emphasis is placed on field geology and observed that one indication of the program's quality is that 60% of its graduates continue their studies at the graduate school level.

Dr. C. Burk Tower, Professor in the Master of Business Administration program, stated that it has a current faculty of 38 and an enrollment of more than 550 students at three locations: Oshkosh, DePere and Stevens Point. Established in 1969, it received accreditation by the American Association of Collegiate Schools of Business (AACSB) in 1978--one of only four schools in Wisconsin so accredited and the first part-time program in the nation to achieve that status.

Dr. James Schmidt, Assistant Vice Chancellor, spoke about the innovative Bachelor of Liberal Studies program, the only "weekend college" program leading to a degree in the UW System. He noted that, of the 125 students enrolled, 65% are women, 15% are single parents and 5% represent minority groups. The age range extends from the mid-twenties into the sixties.

A five-year Plan for Computing (copy filed with the papers of this meeting), developed by the system-wide Computing Planning and Coordination Group (CPCG), was outlined for the Committee. The Chairman of the CPCG, Dr. Russell Fenske, Associate Vice Chancellor and Professor in the School of Business, UW-Milwaukee, noted that the group had been charged with developing a plan that would encompass the state of the art in computing, while recognizing the resource limits faced by the universities in the System. He highlighted the plan's emphasis on management information systems and on the development of "distributed computing," using teletypes,

✓ Computing
"Plan for Computing", developed by System Computing
Planning and Coordination Group, presented.

Regular Board 10-10-80

P. 5 & 6.

- 6

video display terminals, and personal computers so that institutions could provide a high degree of "computer literacy" to a large number of students and faculty. Dr. Fenske also discussed the costs of computing in an era of inflation and limited resources.

The interest of Committee members in the report was indicated by their questions and comments dealing with the topics of "computer literacy" on the part of University faculties, a working understanding of computer science as a basic skill of students, and the preparation of teachers of computer science at the pre-college level. Concern was expressed regarding confidentiality of data files and it was suggested that the System undertake a study of that issue as well as computer-assisted instruction and the provision of incentives for faculty to achieve competence in the use of computers.

UW-LaCrosse - agreement for exchange of students w/ Viterbo
College extended - R. 2253, p. 6-8

Regent Beckwith reported that UW-LaCrosse Chancellor Noel Richards had reviewed for the Committee the history of the University's cooperative agreement with Viterbo College, which had been in effect since 1974. The agreement, under specified conditions, provided for the exchange of limited numbers of students between the two institutions, while involving no exchange of fees. Chancellor Richards had stated that the only change requested in extending the agreement through June 30, 1982 would be an adjustment in the flow of students in order to eliminate an imbalance of fees.

It was moved by Regent Beckwith and seconded by Regent Fitzgerald that the following resolution be adopted:

Resolution 2253: That, upon the recommendation of the Chancellor of the University of Wisconsin-LaCrosse and the President of the University of Wisconsin System, the "Agreement for Inter-Institutional Cooperation" between the UW-La Crosse and Viterbo College, to enhance educational opportunities for students of both institutions and to make optimal use of personnel and financial and physical resources, be extended as revised for the period January 1, 1981 through June 30, 1982.

Regent DeBardeleben stated that he had voted against the resolution in Committee and intended to vote against it at this meeting. Commenting that Chancellor Richards' report to the Education Committee had disclosed that the benefits of the arrangement are overwhelmingly in favor of Viterbo College students, he felt that, in practical application, the agreement has worked to the advantage of the private college and at the expense of the UW-La Crosse. "It is improper to use public funds for the benefit of private institutions or their students. If these students want to use the facilities of the University of Wisconsin System, they should enroll in an institution of the University of Wisconsin System--namely, La Crosse." He urged the Board to oppose the resolution.

At the request of Regent Fox, Chancellor Richards responded that UW-La Crosse and Viterbo College have cooperated in a number of areas, including outreach and the scheduling of fine arts programs. Acknowledging that previous agreements contained no safeguards in terms of the number of students that were accepted at either school, he emphasized that no Viterbo student could take a course at UW-La Crosse if that course were filled and that the revised agreement

would control the flow of students to create a balance between the two institutions. "I think it has been very beneficial for the community of La Crosse and certainly beneficial for the individual students who have availed themselves of the opportunities."

Asked by Regent Erdman if he could estimate the cost of the program to UW-La Crosse, Chancellor Richards replied that, since no Viterbo student could take a course unless there was an opening, the argument could be made that there would be no cost, adding that there is no monetary exchange between the institutions. Regent Erdman then asked if the faculty favors the agreement, to which he responded that the faculty had concurred with its origination in 1974.

Because it seemed to Regent Walter that the benefactor would be the community of La Crosse, she stated her strong support for the agreement.

In answer to inquiries by Regents Veneman and Beckwith about the number of students involved in the exchange, the Chancellor stated that, during the second semester of the previous academic year, there were 18 Viterbo students attending UW-La Crosse for a total of 62 credits and 11 UW-La Crosse students attending Viterbo for a total of 28 credits. Since 1974, 260 Viterbo students had taken courses at UW-La Crosse, for a total of 912 credits, and 74 UW-La Crosse students had attended Viterbo for a total of 207 credits.

Regent DeBardleben did not think the significant point was whether or not the agreement is beneficial to the community of La Crosse. "That is not the reason we are put on this Board. We are put on this Board to administer taxpayers' funds for the taxpayers of the State of Wisconsin." Acknowledging that it would not be possible to determine the number of Viterbo students who would have enrolled at UW-La Crosse if the agreement did not exist, he calculated that, if all those attending under its terms had done so, revenues generated would have been in excess of \$130,000 at current rates. The important issue, he felt, was that of public money being used for a private purpose; and "no amount of saying how nice it is or how good a relationship we have with Viterbo can gloss over that fact. I think it's wrong in principle."

Referring to Regent DeBardleben's previous service on the Higher Educational Aids Board, Regent Erdman asked if that Board did not use public funds to support students attending private colleges. Regent DeBardleben replied that, although public funds were used for that purpose by HEAB, he did not endorse the policy and did not consider that to be a reason for extending it into another area.

Regent Beckwith pointed out that the number of students involved was relatively small and that, without the agreement, UW-La Crosse students would have to pay approximately \$88 for each credit taken at Viterbo, while Viterbo students would pay about \$23 per credit at UW-La Crosse. Since the modified agreement would provide for some equality in the flow of students, it seemed to him that UW-La Crosse students would be benefited by giving them an opportunity to take courses not offered at the University without having to pay the higher per credit charge. "I don't know that we can say that the net benefit is to private education at Viterbo. Maybe the net benefit is to students enrolled at UW-La Crosse."

Regent DeBardleben responded that, although the rate charged students at UW-La Crosse is less, the taxpayers subsidize the rest of the cost. While credits taken at Viterbo count toward a degree from UW-La Crosse, he added, the University has no control over the quality of those courses. Regent Beckwith noted that statement would apply to any transfer of credits to the University from institutions outside the System, to which Regent DeBardleben replied that such credits are examined for acceptability, while he did not know if that would be true of credits received at Viterbo.

Put to the vote, Resolution 2253 was adopted, with Regents DeBardleben and O'Harrow voting "No."

✓ Academic Staff - Disc. of "Guidelines on Staffing a Teaching Position by Appointment of an Instructional Academic Staff Member" by App. of an Instructional Academic Staff Member - P. 8.

Continuing the report of the Education Committee, Regent Beckwith reviewed discussion of Supplement #1 to Unclassified Personnel Guideline #1, entitled: Guidelines on Staffing of a Teaching Position by Appointment of an Instructional Academic Staff Member (copy filed with the papers of this meeting). In Committee, Acting Executive Vice President Joseph Kauffman noted that the document was the fifth draft of a November, 1979 paper, and that it embodied the comments, criticisms and suggestions of the academic staff advisory committee chairpersons, faculty representatives, vice chancellors and chancellors of the various institutions.

Edward Musik, Executive Secretary of The Association of University of Wisconsin Faculties (TAUWF), spoke to the Committee regarding loss of quality in the institutions should too great a proportion of instructional staff be in the category of academic staff. In his view, instructional staff should participate in the full range of responsibilities--teaching, research and public service--and not be limited solely to teaching. Dr. Musik, UW-Superior Professor Ronald Mershart, President of TAUWF, and UW-Madison Professor Anatole Beck also expressed concern about the effects on job security and academic freedom of employing high proportions of instructional academic staff.

Citing the occasional use of practicing lawyers in teaching capacities at the Law School, Regent Beckwith questioned Dr. Musik during the Committee meeting as to the fundamental educational problem of a fixed-term appointment to a long-term position. Regent DeBardleben mentioned the possibility that a fixed-term appointment might be appropriate, pending the opportunity to recruit an extraordinarily qualified candidate who would be available at a later time. Because of the many ramifications of the issue, Regent Beckwith indicated that it would be useful to have the views of TAUWF in writing; and Dr. Musik replied that such a report would be disseminated to the Regents prior to the November or December, 1980 meeting.

It was Regent Lawton's suggestion that the matter not be considered again by the Education Committee until after the report of the Faculty Governance Committee, expected in February, 1981.

Regent Beckwith added that "the discussion of these Guidelines is a sort of snapshot of the 'tip of the iceberg.'" Pointing out that there are many other questions associated with the appointment of academic staff to teaching positions, he said that TAUWF had been encouraged to provide specific, written information about any problems which were believed to be occurring.

Acting Executive Vice President Kauffman informed the Committee of a recently approved change in the 1980-81 UW-Madison academic year calendar, which would shorten the period between semesters by advancing the beginning of registration for the second semester from Wednesday, January 14, to Monday, January 12. The final examination period would be similarly advanced.

It was moved by Regent Beckwith, seconded by Regent Finlayson, and carried, that the following resolution be adopted:

Resolution 2254: That, upon the recommendation of the Chancellor of the University of Wisconsin-Stevens Point, the request for Authorization to Recruit for a Dean, College of Letters and Science, UW-Stevens Point, be approved.

✓ UW-SP-Staff - Auth. to
Recruit for Dean,
College of L & S,
R. 2254, p. 9.

REPORT OF THE BUSINESS AND FINANCE COMMITTEE

Chairman Fox reported for the Business and Finance Committee.

He summarized discussion which had taken place during the Committee meeting, to which all Regents had been invited, regarding the 1981-1983 biennial budget proposal (copy on file with the papers of this meeting), noting that action on the budget would be taken at the November, 1980 meeting. System President Robert O'Neil had stated that general purpose revenue funds requested for the two-year period totaled \$972.5 million, amounting to \$47.5 million more than the current operating level--an increase of five percent. Describing the budget proposal as realistic and prudent, President O'Neil added that the attempt had been to strike a reasonable balance between institutional needs and the realities of the state's economic situation and that, in UW System Administration's judgment, the dollar request could not be lower and remain responsible to the University community. He noted that three-fourths of the proposed increase would be needed to continue current services and that one-quarter would be used to respond to changing needs.

In Committee, President O'Neil reviewed individual sections of the budget document, beginning with Cost to Continue Adjustments. Referring to three requests concerned with inflation and its impact on supplies and expenses, library acquisitions and capital equipment replacement, he pointed out that the proposal would include only prospective inflation. Chancellors Frank Horton, UW-Milwaukee, Edward Penson, UW-Oshkosh, and Robert Swanson, UW-Stout, identified specific campus problems associated with the losses in purchasing power; and UW-Madison Chancellor Irving Shain described the effects on library acquisitions of both inflation and the 4.4% budget reduction. In view of repeated emphases on problems relating to library purchases, System Administration was asked to provide the Regents with several alternatives which would address these difficulties. Commenting on the Workload Adjustments section of the budget, President O'Neil stated that the estimated enrollment funding request was based on the proposed formula, resulting in a request for more than \$3 million less than the current formula would allow.

Consideration during the Committee meeting of the budget section entitled Ensuring Effective Educational Opportunities included extensive discussion of the Basic Skills Improvement proposal, with UW-Madison Professor William Lenehan, Chairman of the System Basic Skills Task Force, responding to Regents' questions. It was indicated that the request did not include background information concerning current levels of support and institutions which offered English and mathematics credit toward a degree for basic skills remedial work. Professor Lenehan said that the last full survey covered 1978-79 data, current information not yet having been developed. In the budget section, Responding to Changing Educational Conditions and Needs, President O'Neil highlighted the proposed Regents Academic Investment Fund. Asked if that fund could be used for basic research, Acting Executive Vice President Kauffman replied that it was intended for new and innovative instructional programs that would not be supported adequately through the enrollment funding formula. Regent DeBardeleben requested that, for the following month's meeting, the administration provide information regarding funding for basic research. President O'Neil concluded his presentation of Volume I of the budget by summarizing two items concerning applied research.

In Committee, Chancellor Shain elaborated on the UW-Madison proposal entitled "Preservation of Quality." Pointing out that productivity cuts and suspension of the enrollment funding formula had resulted in a substantial funding deficit for UW-Madison, he said that, if inflation losses also were considered, the figures would be so astounding as to lack credibility. To his suggestion that a task force be established to review the alternatives outlined in the proposal, President O'Neil responded that the administration had been considering the preservation of quality recommendation from a system-wide standpoint, and that a task force study would be undertaken.

Regent Fox noted that members of the Board were urged to communicate to System Administration proposed amendments to the recommended budget in order to facilitate consideration of the final proposal.

Continuing the report of the Business and Finance Committee, which had reconvened following conclusion of the budget discussion, Regent Fox said that the monthly list of gifts, grants and U.S. Government contracts had been reviewed by System Vice President Reuben Lorenz. Included among 45 research grants for UW-Madison from the National Institutes of Health was a new grant to the Waisman Retardation Center for \$1,036,794, with other grants during the month from a variety of sources providing more than \$8-1/4 million for research at UW-Madison. Current grant acceptances were listed for all but two institutions in the System; and overall totals to date were \$3 million more than the previous year, the largest increase being \$6 million in research. Student aid continued to lag, with the current total being \$2.5 million less than the previous year. Regent Fox noted that the summary included a gift of \$2,000 from Jacqueline Kennedy Onassis to the Wisconsin Clinical Trust Fund at the Department of Oncology, UW-Madison, one of several gifts she had given.

It was moved by Regent Fox, seconded by Regent Finlayson and carried, that the following resolution be adopted:

Resolution 2255: That, upon recommendation of the President of the University of Wisconsin System, the gifts, grants and contracts presented at this meeting (copy filed with the papers of this meeting) be accepted, approved, ratified and confirmed; and that, where signature authority has not been previously delegated, appropriate officers be authorized to sign agreements.

-

A status report on implementation of reporting requirements for the State Personnel Management Information System (PMIS) was received by the Committee. The Legislature had specifically mandated that the UW System be included in the state PMIS and the Joint Committee on Finance had agreed to receive and file the report submitted by Department of Administration Secretary Kenneth Lindner (copy on file with the papers of this meeting). With the exception of tracking vacant positions, all the necessary data elements were in computerized data bases. A task force, working on required modifications to implement reporting by the following July, would be developing alternatives for vacancy tracking to provide the required information from data already in the payroll and budget systems.

✓ Personnel Management Information System - report on system inclusion in State PMIS. , p. 11

The Committee was advised by Vice President Lorenz that, consistent with fall enrollment increases, dormitory occupancy had reached an all-time high, with vacancies only at UW-Oshkosh and UW-Superior.

✓ Res. Halls - report of record occupancy. , p. 11

- - -

REPORT OF THE PHYSICAL PLANNING AND DEVELOPMENT COMMITTEE

Chairman Gerrard reported for the Committee.

The Committee considered the release of advance planning funds for two major projects, the first being the Davies Center Remodeling and Addition at UW-Eau Claire. Budgeted at \$1.2 million from Student Center facility reserves, the request had been approved by UW-Eau Claire students. The second project involved advance planning for a library addition and remodeling at UW-Stevens Point, the System's Library Planning Study Committee Report having identified that campus as the one most urgently needing additional library space. It was estimated that, if advance planning funds were approved, costs could be reduced by \$600,000. UW-Stevens Point Chancellor Philip Marshall appeared before the Committee to speak in favor of the request, which would be funded with tax-supported bonding.

The following resolution was adopted upon motion by Regent Gerrard, seconded by Regent Hendrickson:

Resolution 2256: That, upon the recommendation of the UW-Eau Claire Chancellor and the UW-Stevens Point Chancellor and the President of the University of Wisconsin System, authority be granted to request the release of advance planning funds for the following two projects, in the amount and from the funding sources indicated:

UW-Eau Claire - Bldgs & lands

✓ Advance Plng funds approved for →

1981-83 Davies Center Remodeling and Addition Project, \$24,000 from Program Revenues (Non-GPR)

UW-Stevens Point - Bldgs

✓ Advance Plng funds approved for →

1981-83 Learning Resources Center Remodeling and Addition, \$118,000 from State Building Trust Funds (GPR)

R. 2256, p 11 & 12

Purchase of a parcel of land at UW-Eau Claire, appraised at \$14,800 and \$20,000, and optioned for \$17,400, was approved by the Committee.

Regent Gerrard moved, Regent Veneman seconded, and it was voted that Resolution 2257 be adopted:

Resolution 2257: That, upon the recommendation of the UW-Eau Claire Chancellor and the President of the University of Wisconsin System, authorization be granted for the purchase of one 0.13 acre parcel of land at UW-Eau Claire, at a total cost of \$24,700, from Program Revenue funds.

✓ UW-EC - Bldgs & lands

Auth. to purchase 0.13 acre parcel.

R. 2257, p 12.

Regent Gerrard then presented a request for approval to sell a small parcel of unimproved land at UW-Green Bay for the purpose of street development in order to provide access to a residential area, the proposed sale price representing the average of two appraisals made in September, 1980.

It was moved by Regent Gerrard, seconded by Regent Hendrickson, and carried, that the following resolution be adopted:

Resolution 2258: That, upon the recommendation of the UW-Green Bay Chancellor and the President of the University of Wisconsin System, authorization be granted to sell a 14,000 square foot (0.32 acre), 35' wide x 400' long strip of unimproved land for \$2,550, on the site of the campus central heating/chilling plant and electrical substation, with the proceeds to be reverted to the State of Wisconsin General Fund.

✓ UW-GB - Bldgs & lands

Auth. to sell

0.32 acre parcel.

R. 2258, p 12.

The Committee considered a concept and budget report for remodeling of the physical plant garage at UW-Madison and authority to plan, bid and construct the project at a total estimated cost of \$240,000 from tax-supported bonding.

Resolution 2259 was adopted upon motion by Regent Gerrard, seconded by Regent O'Harrow.

Resolution 2259: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, the concept and budget report for the Physical Plant Garage Remodeling Project be approved and authority be granted to plan, bid and construct this project at a total estimated cost of \$240,000, from 1977-79 General Fund Supported Bonding - GPR.

(X-Ref. Physical Plant Garage)

Authority was requested by UW-Madison for purchase of the Northeast Family Practice Clinic, at a cost of \$790,000 from self-amortizing bonding, and remodeling of the building at a cost of \$190,000, the property having been appraised at \$812,000 and \$810,000. Regent Lawton, along with UW-Madison staff, spoke to the Committee in support of the project.

Regent Gerrard moved and Regent O'Harrow seconded the following resolution, which was adopted:

Resolution 2260: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authorization be granted to purchase the Northeast Family Practice Clinic, Madison, at a cost of \$790,000 and to remodel the facility at an estimated project cost of \$190,000.

UW-Mdn Bldgs -
 Auth to purchase
 Northeast Family Practice
 Clinic, R. 2260, p 13.

(X-ref. Northeast Family Practice Clinic)

A request to grant the City of Platteville authority for conveyance of Rountree Hall, UW-Platteville, to a private developer was presented by Regent Gerrard. The Committee was supportive of the motion, he said, since the purchaser would be required to maintain the historical appearance of the building and because the need for continued maintenance of the unused building would be important with winter approaching. Regent Fitzgerald had indicated to the Committee her support for the resolution. Because of concern expressed by former Regents Kopp and Fish, Regent Erdman had asked that action be deferred for one month to allow System staff to study the issue in more detail.

The following resolution was moved by Regent Gerrard and seconded by Regent O'Harrow:

UW-Platteville-Bldg & land
Auth for City of Platteville
to convey Rountree Hall
to another owner.
R. 2261, p 13-16

Resolution 2261: That, upon the recommendation of the UW-Platteville Chancellor and the President of the University of Wisconsin System, authorization is granted to the President or Vice President and Secretary or Assistant Secretary of the Board of Regents to execute the Consent to Conveyance, authorizing the City of Platteville to convey the following property (also known as Rountree Hall) to another owner who will preserve the exterior of the property in substantially its present form:

All of Block No. Sixteen (16) in the Village of Platteville according to the recorder map and plat thereof, together with other adjacent lands conveyed by the Trustees of Platteville Academy by deed dated December 5, 1872, in Volume 75 of Deeds, on page 318 (also known as the Rountree Hall property).

Referring to her "No" vote in Committee, Regent Erdman felt that there was no great urgency to act and that the Board should accede to the request for postponement by former Regents, both of whom had been involved in the transfer of the property to the city.

In explanation of the Committee's favorable vote, Regent Gerrard pointed out that the city's records showed income from the building of \$44,000 and expenditures of \$120,000, most of which were incurred to heat the building. Those figures had been presented in response to his suggestion that profits from the sale be shared with the University, since the property had been deeded to the city for \$1 and other considerations, the contemplated sale price being \$50,000. If Rountree Hall were deeded back to the University, he thought it possible that an individual currently interested would not buy it because the city might not grant needed zoning requests. A delay of action, he added, could result in the University having to take responsibility for heating the building.

Regent Hendrickson commented on the University's need to work harmoniously with the city in the future and the importance of maintaining good relationships.

Responding to a question by Regent Veneman, Regent Gerrard said the Committee had decided that nothing could be gained by deferring action.

Regent Erdman understood that negotiations had not been conducted with the City Manager or the Mayor of Platteville, and that there was some question about the Board's right to approve the conveyance, since former Regent President Kopp had suggested that an Attorney General's opinion be obtained.

Regent Fitzgerald thought that postponement of action would be harmful as far as the city was concerned. "When the property was deeded to the city for \$1 it was not a kind gift. The University System could not keep it up. The city said they would try to keep it up but can do so no longer because of the tremendous expense of heating it." Noting that, in a letter from an interested

party to former Regent Kopp, it was asked that the building's exterior be kept intact since it is on the Historic Register, she pointed out that the consent to conveyance would provide for that explicitly. "I think you are doing precisely what they asked you to do." If action were to be delayed, she added, the Platteville City Manager had said that the city would like to return the property to the University, since it would have to be heated and the city could not afford to put any more money into it.

Regent DeBardleben felt that, if there were some reason advanced by former Regents Fish or Kopp for not following the Committee's recommendation, the Board should be made aware of it. Absent that, he thought action should be taken at this meeting and the Committee's recommendation should be approved. In response, Regent Erdman said that one of the reasons put forth by former Regent Fish was that the University could put the property on the market and use proceeds from the sale for educational purposes. "This was a gift to the City of Platteville because, at the time, the city had plans to use Rountree Hall as a municipal city hall and as a library. As it turned out, they changed their plans. Personnel changed, people changed, and their goals for the future changed. The city now feels the building is a white elephant and they wish to sell it." Regent DeBardleben asked if the point was that no one really wanted the building, to which Regent Fitzgerald replied that he was correct.

Regent Lawton expressed his inclination toward former Regent Fish's view.

Inquiring about the possibility of some kind of compromise, Regent DeBardleben reasoned that the city would not abandon easily the potential of \$50,000 in proceeds from the sale by simply returning the property to the University. He asked if any attempts had been made to determine whether a division of those funds might be possible, to which Regent Erdman answered that she did not believe negotiations had been pursued thoroughly. If the city gave it back, she did not know why the University could not sell it, and she felt "there's a certain amount of 'gun at our backs' on the issue." System Vice President Robert Winter recalled that, at the previous month's Committee meeting, Regent Gerrard had specifically suggested splitting proceeds but that the city was not really interested in doing so, pointing out that they had lost a considerable amount of money by utilization of the building during the past five years. Regent DeBardleben commented that the city would receive no money if the Board did not approve the conveyance.

Regent Fitzgerald cautioned that, if the building stood unattended for another six months, serious problems could develop.

Regent Grover, pointing out that the city controlled zoning of the property, thought that a question of good faith was involved and that the amount of money being considered was not greatly significant, particularly in light of the city's expenses in maintaining the building. "I think it is important for the Board and the institution to consider community relations. We have heard a lot about that here in Oshkosh. I think we are attuned to that kind of initiative in terms of its impacts on the institution in a community setting, and we might be 'penny-wise and pound-foolish'" in failing to adopt the resolution.

The questions of splitting the proceeds of a sale and including a reversion clause in the deed, Regent Gerrard felt, should have been addressed at the time the property was transferred to the city. "Now, five years later, when they maintain that they have had income of \$44,000 and expenses of \$120,000, they want to get some of that money back. Regent DeBardeleben is right; it is possible that, if we don't consent, they won't get any. And then the building can stand there and eventually deteriorate further." Believing the Board's credibility to be at stake, he saw no alternative to approving the conveyance.

Put to the vote, Resolution 2261 carried, with Regent Erdman voting "No."

Regent Gerrard continued the report of the Physical Planning and Development Committee, presenting a request for authority to lease one-half acre of land on the UW-Platteville Mound to a private cable TV service for construction of an antenna and a small service building, with the leased area to be used for extension of cable TV service to eight area cities and villages. He noted that the Board has a comparable lease with the Platteville Cable TV Corporation that provides service in the City of Platteville.

Upon motion by Regent Gerrard, seconded by Regent Fitzgerald, the following resolution was adopted:

Resolution 2262: That, upon the recommendation of the UW-Platteville Chancellor and the President of the University of Wisconsin System, authority be granted to the NIALL Southwest Communications, Inc., Belmont, Wisconsin to lease a portion of land on the Platteville Mound for the purpose of erecting television antenna towers and a service building. The parcel of land is more fully described as follows:

UW-Platteville-Bldg & Hand
Auth. for NIALL
Southwest Communi-
cations, to lease
land on Platteville Mound
for cable TV service
R 2262, P 168/17.

✓ X-Reg. - NIALL Southwest
Communications, Inc.

Commencing at the 1/4 Section Corner between Sections 5 and 6, T3N, R1E of the 4th P.M., Lafayette County, Wisconsin; thence N. 32° 00' E. 689.3 ft.; thence N. 72° 42' E. 100.0 ft.; thence N. 00° 38' W. 100.0 ft. to a point on the southerly line of the land being described and the point of beginning; thence S. 89° 22' W. 100.00 ft.; thence N. 00° 38' W. 150.00 ft.; thence N. 89° 22' E. 150.00 ft.; thence S. 00° 38' E. 150.00 ft.; thence S. 89° 22' W. 50.00 ft. to the point of beginning, containing 0.52 acres, more or less, the described tract being located in the S.W. 1/4 of the N.W. 1/4 of Sec. 5, T3N, R1E of the 4th P.M., Lafayette County, Wisconsin.

The initial term of the agreement shall be for the fifteen-year period from October 1, 1980 through September 30, 1995, and provides for an annual payment to the UW-Platteville of \$2,500 and a designated University channel on each of the community systems identified in the agreement. The rental payment amount will be subject to adjustment at five-year intervals and will be adjusted upward or downward by an amount equal to the fluctuation of the Consumer Price Index during that five-year period.

The Committee then considered preliminary approval of a plan involving the sale of about 38.2 acres of the North Campus area at UW-La Crosse to the Department of Natural Resources and retention of 8.3 acres for use as outdoor education and recreation space. Approval would be subject to the City of La Crosse closing Gorder Road, the granting of a permit to fill by the Corps of Engineers, and completion of an Environmental Impact Statement. It would be expected to take about one year for all necessary approvals to be obtained so that the sale could be made. It was understood that the DNR had approved the proposed plan, which also had the support of Secretaries Lindner (Department of Administration) and Earl (DNR), Chancellor Noel Richards (UW-La Crosse) and President O'Neil. Mr. Carroll Besadny of the DNR was present at the Committee meeting and, in response to Regent Gerrard's questions, indicated that the 8.3 acres was a negotiated amount of land and that there would be no prospect for increasing it to the 11 acres originally requested by UW-La Crosse.

The following resolution was moved by Regent Grover and seconded by Regent O'Harrow:

Resolution 2263: That, upon the recommendation of the UW-La Crosse Chancellor and the President of the University of Wisconsin System, preliminary approval be granted to sell approximately 38.2 acres of the North Campus area at UW-La Crosse to the Department of Natural Resources and retain approximately 8.3 acres for the development of outdoor education and recreation space subject to the following conditions:

- (1) That the City of La Crosse close Gorder Road and adopt a bulkhead line around the land area to be retained by the Regents for development of outdoor education and recreational space.
- (2) That the DNR Secretary, with the written recommendation of the DNR District Director, will notify the U. S. Army Corps of Engineers in St. Paul, Minnesota that a 404 Permit to Fill be granted.
- (3) That an Environmental Impact Statement be completed by the Corps of Engineers, with the cooperation of the DNR, the Board of Regents, Fish and Wildlife, EPA, etc.

 Conditional approval
 to sell 38.2 acres
 of Marsh land to
 DNR. -
 R-2263, p. 17-20

✓ Ex-ref. Natural
Resources, Dept of

In response to Regent Beckwith's request, Regent Gerrard explained his "No" vote in Committee. Because 11 acres would have provided the University with all the intermural space it needed, he had urged a settlement whereby the University would retain that amount of land, rather than 8.3 acres. The additional space, he added, could also have been made available to La Crosse area young people when not being used by the University. Given the large area involved, he could not understand why the DNR would not allow development of 2-1/2 more acres, believing that the Department should demonstrate greater flexibility than it did in dealing with another agency of state government. "We are not talking about taking 40 acres of somebody's farm. We were going to take a little two-acre piece of land which thousands of kids could use; and we cannot have that." Believing the Department had become too powerful, he thought the Legislature should address itself to that matter.

Replying to questions by Regent Beckwith, Regent Gerrard indicated that land to the north of Gorder Road was marsh and that the Oak Grove Cemetery property, to the south, would not be available for acquisition, adding that other land available to the south was in the flood plain. He explained that, with the vacating of Gorder Road, the fill from the road would be moved into the area retained by the University in order to raise the level of the land. Regent Beckwith asked if that would have the effect of turning Gorder Road into marsh, to which Regent Gerrard replied that it would, adding that the amount of land involved would be 2.3 acres.

It was suggested by Regent Beckwith that "etc." be deleted from the last line of the resolution and that "other state and federal agencies whose approval is required" be substituted. The amendment was accepted by those who had made and seconded the motion.

Regent Beckwith felt that negotiations should be pursued. "I am really distressed that they are going to turn a road into a marsh." It seemed to him that little would be lost by trying to acquire it.

Regent Fox believed that the City of La Crosse would be willing to close the road, since it has carried little traffic. Because it would no longer be a through-way, the potential for littering would be reduced; and the fill from the vacated area could be used for the UW-La Crosse project.

Regent Grover noted that the situation reflected a conflict in the expectations of two public agencies. Pointing out that the University has a moral obligation to be concerned about the condition of the environment, he thought that many of the professionals in the institutions would support preservation of wetlands. If the site were to be developed at all, he felt that the Board would have to recognize that the DNR's position was firm and probably would not change. "In my estimation, if you defeat this resolution, what you are saying, in fact, is that the UW-La Crosse will not have any of that land to develop for its needs. I cannot imagine that 2 acres as opposed to 8.3 is going to substantially alter the opportunity afforded the community and the University in terms of its recreational potential." Considering the resolution's terms a compromise between two equal forces, he thought that, although it clearly would not please everyone, it merited the Board's support.

Although he agreed that the road should be closed if the city wished to do so, Regent Beckwith did not understand why it should be converted to wetlands. "If you are going to use some of the fill from the road, so be it. But, if that represents two more acres that the University could use, why not try to negotiate a deal that would include that land within the area to be developed?"

System Vice President Robert Winter said that the city would be willing to have Gorder Road closed because Lange Drive, which intersects with Gorder Road, was going to be improved; and Gorder Road serves only a park area, with no residences in the vicinity. It would be economically advantageous to utilize the fill from the road, he added, since it would cost much more to purchase it at another location.

Regent Veneman did not consider the DNR's position to be reasonable. "I believe a negative vote by this Board might provide the leverage to improve our negotiating posture."

Regent Fox pointed out that the proposed agreement was supported by the Chancellor of UW-La Crosse, the Secretary of the Department of Administration, who was the former Chancellor of the institution, and the Department of Natural Resources Board. "It has been a process of negotiation; and, because the result is not exactly what you want, to say that it is unreasonable does not make much sense to me. Many of the people involved seem to be willing to try this solution, and I think it would be a step backward to postpone it any further."

Regent Beckwith suggested that a three-party negotiation be arranged for the purpose of adding the road right-of-way to the acreage retained by the University, thereby increasing the total to more than 10 acres.

Regent Fox thought that there had been strong participation in the negotiations from a number of sides but that the process had not reached a point at which approval by the City of La Crosse could be assured.

President O'Neil was not sure anything would be gained by considering any part of Gorder Road other than that immediately adjacent to the 1100 foot frontage of the parcel to be developed, which he thought would be a rather small portion of the total 2.3 acres. The rest of the road area, he said, would simply be a thin strip, the surface of which is in poor condition. Calculating that the tract in question probably would be the size of ten football fields set side by side, he pointed out that it is a fairly substantial parcel which would meet much more than the immediate need for a track area. It seemed to him that the opportunity to reach an agreement concerning that land might not present itself again, and he expressed his hope that advantage could be taken of it at this time.

Regent Erdman added that, by approving the resolution, the Board would not be precluded from future negotiations with the DNR, should favorable conditions arise.

Regent Lawton recalled that it was his feeling in 1978, when the Board adopted the resolution requesting the DNR to make an offer to purchase the marsh area, that development plans for the entire tract had been abandoned. He thought the Board should approve the proposal since, "as Regent Fox mentioned, there apparently has been some hard-nosed negotiating done to produce this result."

Regent Grover asked Chancellor Richards to explain the benefit of adding two more acres to the 8.3 which the University would retain. Chancellor Richards replied that 8.3 acres would provide space for an all-weather track, with land around it for other activities, and that 10 or 11 acres would allow room for a soccer field (or another full-length field) in addition to a track, if the two acres were properly situated. "If we gained that kind of land down Gorder Road--no, that would not do us any good at all."

In response to Regent DeBardeleben's inquiry as to whether the DNR had made a commitment to accept the proposed agreement, Regent Erdman said that Mr. Besadny had given such a commitment to the Committee on the previous day.

Regent DeBardeleben pointed out that, although the issue could be discussed with the DNR, the Department does have jurisdiction over the development of the land. "It is a rather unusual tract that we are getting, and I think that, if we can get it, we ought to take it."

Resolution 2263 was adopted on a roll call vote, with Regents DeBardeleben, Erdman, Finlayson, Fox, Grover, Hendrickson, Knowles, Lawton, O'Harrow and Walter voting "Aye" (10), Regents Beckwith, Fitzgerald, Gerrard and Veneman voting "No" (4), and Regents Majerus and Thompson absent (2).

Regent Gerrard reported that the Physical Planning and Development Committee had approved purchase of a parcel of land at UW-La Crosse at a cost of \$32,000. It was appraised at \$28,500, \$27,750 and \$33,000 and had been optioned for \$30,375.

It was moved by Regent Gerrard, seconded by Regent O'Harrow and voted that the following resolution be adopted:

Resolution 2264: That, upon the recommendation of the UW-La Crosse Chancellor and the President of the University of Wisconsin System, authorization be granted to purchase the following parcel of land, at the price indicated, from General Obligation Bonding authority (GPR):

627 East Avenue North
La Crosse, Wisconsin \$32,000

Regent Gerrard presented requests for approval of four minor projects: one at UW-Platteville and three at UW-Madison. Two were concerned with special maintenance and two involved remodeling of rooms, one for an intensive care unit in the University Hospital and one to provide space for a major federal grant in speech research at UW-Madison.

Resolution 2265 was adopted upon motion by Regent Gerrard, seconded by Regent Hendrickson.

UNFINISHED AND MISCELLANEOUS BUSINESS

In response to an inquiry by Regent DeBardleben as to the status of proposed amendments to Chapter UWS 8, Faculty/Academic Staff Code of Ethics, Vice President Lorenz stated that comments which had been received were being reviewed and would be brought to the Board upon completion of that process. Regent DeBardleben requested that proposed changes be integrated within the text of existing rules.

Admin Code - report on status of proposed amends to Ch. UWS 8.

- - -

At 11:35 a.m., the following resolution, moved by Regent DeBardleben and seconded by Regent Fox, carried on a unanimous roll call vote, with Regents Beckwith, DeBardleben, Erdman, Finlayson, Fitzgerald, Fox, Gerrard, Hendrickson, Knowles, Lawton, O'Harrow and Walter voting "Aye" (12) and Regents Grover, Majerus, Thompson and Veneman absent (4):

Resolution 2267: That the Board of Regents convene in closed session to consider personnel matters, as permitted by s. 19.85(1)(c), Wis. Stats.

The Board arose from closed session at 12:40 p.m.

The Wisconsin Board of Vocational, Technical and Adult Education met at Northeast Wisconsin Technical Institute, Green Bay, on September 30, 1980. This report summarizes agenda items that may be of interest to Regents of the University of Wisconsin System.

Federal Legislation

Several pieces of federal legislation that would affect vocational education significantly may not pass before Congress adjourns. Versions of the Private Sector Initiative Program (Title VII of CETA) have passed both houses with an authorization level of around \$100 million. A Senate move to add PSIP to the Youth Employment bill is expected to complicate its possibility of passage. The House has passed a Youth Employment bill but the Senate bill has just cleared Committee. Title II of the bill authorizes \$900 million for educational purposes. There is a 25% allocation for vocational training but the two versions differ in the manner in which the money will be allocated.

Lease of Land to University of Wisconsin Clinical Services

The Board approved a resolution granting permission to North Central VTAE District to lease 1.93 acres of land to the State of Wisconsin Department of Administration for the term of 60 years for the sum of \$1.00 for construction of a Family Practice Clinic for the UW College of Medicine. This resolution is an excellent example of VTAE-UW cooperation.

Madison Area Technical College Environmental Impact Analyses

The Board accepted a preliminary draft environmental impact statement for the redevelopment of the Madison Area Technical College. Much discussion preceded passage concerning the cost and necessity of the controversial statement.

Oshkosh Skill Center Bid

It was reported that bids were opened on September 4, 1980 on the Oshkosh Skill Center. There has been concern expressed concerning the approval of the Witzel Avenue site in lieu of UW-Oshkosh's empty River Commons. The decision was based on location of the sites, parking space, and room for future expansion.

10/10/80

EXHIBIT A

1981-83 Biennial Budget

The Board adopted the 1981-83 Biennial Budget as presented. The \$171.8 million budget represents nearly a 20% increase over the current biennium. State VTAE Director, Robert Sorensen, expressed pleasure with the DOA's consideration of full funding of 35% of district operational costs. State aids will increase by \$16 million. Mr. Joseph Noll noted that the DOA is very generous with the VTAE. He said, "DOA has really gone overboard for the Vocational Technical System. I bet there is no agency in the state that will show this kind of increase." The budget contains \$2.5 million for basic skills training.

Program Development

The Board approved the Education Committee's report on program development, discontinuance and title changes.

New Program Development

<u>District</u>	<u>Title</u>
Western Wisconsin	Respiratory Therapy Technician
Southwest Wisconsin	Machine Tool Operation
4 (Madison)	Recreation Resource Associate
4 (Madison)	Tourism Recreation Associate
6 (Gateway)	Farm Operation
Mid-State	Supermarket Management
17 (Wisconsin Indianhead)	Advertising Sales
17 (Wisconsin Indianhead)	Data Processing-Computer Operations
Blackhawk	Homemaker/Home Health Aide
Gateway	GOAL Oriented Adult Learning
Milwaukee Area	Ward Clerk
Northeast Wisconsin	Child Day Care
Nicolet	Goal Oriented Adult Learning

Program Discontinuance

1 (Eau Claire)	Fire Science
Western Wisconsin	Fire Science
Gateway	Production Agriculture

Highlights of 1978-79 Graduate Follow-up Study

The Education Committee reported the following highlights from the 1978-79 graduate follow-up study: 96% were satisfied or very satisfied with their training; 91% are employed within Wisconsin; 71% are employed in the district where they attended school; 93% of those in the labor force are employed; 84% are employed in jobs related to their training and the average starting monthly salary was \$928. These data reflect a general improvement in most areas over prior years.

Basic Education Report

A task force has been named to address the problem of basic skills education for adults. The charge to the task force is to (1) describe the problem from the standpoint of the system; (2) describe the dimensions of the

problem; (3) assess the current status of the problems in terms of educational assessment, guidance, counseling and programming; (4) identify needs for additional services consistent with the VTAE mission. Charlotte Martin, Co-chairperson of the Committee, is also a member of the UW System Basic Skills Council.

Report on Energy Education in Wisconsin

This report highlighted coordinated efforts of the Department of Public Instruction, UW System, and VTAE System in promoting the Task Force goal of providing people with the knowledge and skills necessary to make informed choices regarding energy issues, and a willingness to act on these choices. Recommendations for the WBVTAE were listed in terms of needs for staffing, programs, publicity, staff development and energy projects.

VTAE Goals for 1980-81

The primary goals for the 1980-81 year were identified as follows: "Marketing--Develop and implement a comprehensive plan to enhance public perceptions about VTAE and to increase student recruitment. Financing--Develop state and local policies on financing vocational education which consider all sources of revenue and at the State level to ensure the equitable distribution of funds by formulas which reflect the most pertinent educational/economic factors. Legislative Program--Promote and support effective program which expands communications, enhances relationships, and positively influences local, state and federal officials. Planning--Improve VTAE long-range planning through the development of processes and capabilities which systematically integrate state and district needs, resources, educational goals, forecasts, and fiscal considerations. Economic Development--Establish VTAE's economic development role through amplified emphasis on human and program development to meet the economic needs of the state. Articulation--Expand articulation efforts among the secondary and postsecondary educational institutions to clarify roles and missions, avoid program duplication, and coordinate community education. Adult Education--Intensify VTAE's continuing education efforts through the establishment of innovative programs and service delivery to students. Management Information--Utilize the Vocational Education Planning, Analyzing and Costing System to improve VTAE planning and management decision making."

Report on Policies and Expenditures

President Hendrickson requested the State Director to prepare a report for presentation to the State Board Executive Committee on November 3. The report will address the following:

1. An analysis and review of travel and expense policies and expenditures at selected VTAE districts.
2. Recommendations to be considered by the State Board.

University of Wisconsin System Broadcast Stations
Procedures for Handling Complaints

I. Introduction

Broadcast stations of the University of Wisconsin System are committed to providing service in the public interest, and access to broad-ranging opinions and ideas. As disseminators of information, cultural and public affairs programs, these stations operate under provisions of the Communications Act of 1934 as amended, and rules of the Federal Communications Commission, in consonance with policy parameters established by the Board of Regents, which holds license for the stations.

In further recognition of their obligation to assure critical examination of ideas and issues, broadcast stations of the University of Wisconsin System welcome comments from their audiences. Some comments may take the form of complaints.

This statement provides guidance for the procedures to be followed in processing complaints directed to a station or its personnel.

Any person who wishes to file a complaint about program standards, practices, policies or procedures at a University of Wisconsin System broadcast station; or about the conduct of a member of the staff which the person believes violates university rules or policies, or is not in keeping with proper discharge of the staff member's professional duties, should send a written complaint to the General Manager of the station in question. A list of names and address of General Managers is attached.

Depending on the nature of the complaint, the General Manager will handle the complaint as follows.

II. Complaints about program standards, practices, policies or procedures

If a broadcast station licensed to the University of Wisconsin System Board of Regents receives a complaint which involves program standards, practices, policies or procedures, the General Manager or his/her designee will investigate the complaint and respond in writing within five working days of receipt of the complaint.

If the complainant is not satisfied with the response, he or she may appeal in writing to the Chancellor of the institution where the station is located. A list of names and address of Chancellors is attached.

In responding to the complaint, the Chancellor shall seek the advice and counsel of the appropriate standing faculty committee. The Chancellor shall subsequently communicate in writing with the complainant within three weeks, to report a response to the complaint or the status of investigation into the matter, with a completed response to be provided in writing as soon as possible thereafter. In those instances where the complaint is found to be valid, the Chancellor's response shall indicate corrective action to be taken.

The decision of the Chancellor shall be final, except that the Board of Regents of the University of Wisconsin System, at its option, may grant a review on the record.

In a matter of exigency, where time is of the essence and the complaint is of a substantive nature, the Chancellor, on sufficient showing by the complainant, may grant immediate review and temporary relief. Subsequent ultimate resolution of such a complaint, on merit and in principle, will be pursued under ordinary procedures of this section.

III. Complaints about the conduct of a staff member--faculty or academic staff

If the General Manager receives a complaint which contains allegations concerning conduct by a faculty member or an academic staff member which the person believes violates university rules or policies, or is not in keeping with proper discharge of the staff member's professional duties, the General Manager shall refer the complaint immediately for review by the Chancellor or his/her designee.

Upon review of the allegations, the Chancellor or his/her designee may direct that the complaint be processed under appropriate Faculty Personnel Rules or Academic Staff Policies and Procedures of the institution in accordance with Wisconsin Administrative Code section 6.01 or 13.01, "Complaints." The Chancellor shall notify the complainant within five days of the settlement or referral action taken and shall indicate that a completed response in writing will be made as soon as possible.

The decision of the Chancellor under procedures of this section shall be final, except that the Board of Regents, at its option, may grant a review on the record.

October 1980

PRESENTATION TO THE BOARD OF REGENTS

AT ITS OCTOBER 10, 1980 MEETING

BY

CHANCELLOR EDWARD M. PENSON

UW-OSHKOSH

President Erdman, members of the Board of Regents, President O'Neil, Vice President Kauffman:

Thank you for the courtesy of these minutes today. When the subject is large and the time is short, a presentation such as this must necessarily be designed, in Bacon's words: "To excite the judgment briefly, rather than to inform it tediously." Yet, with this objective, so palpable are the dangers of gross oversimplification that one senses a rather uneasy kinship with those late 19th century statisticians whose antics provoked Oscar Wilde to comment acidly that these were men who moved with "illogical alacrity from unwarranted assumptions to forgone conclusions." Conjoining these two pithy observations serves as a convenient way both to introduce the usual caveats regarding our generalizations and to note the unstated, but hopefully warranted, assumptions about the present and future status of the University of Wisconsin-Oshkosh.

I would draw your attention today to three major categories of information: first, a review of the present state of the University with respect to its students, instruction and its progress; second, a reference to the impediments and problems which must concern us; and, third, a synoptic description of implementations of our mission as a regional public service University into that which is special, if not unique.

The University setting and locale is important to consider in that the locus of the people within it drives much of what we do. While the University is located almost in the center of the City of Oshkosh, Oshkosh itself is located almost in the center of the Fox River Valley, a population area of approximately 500,000 people. Within a 65-mile radius of Oshkosh and the University, there is a population of approximately 750,000 people. The area is almost equally represented by small town, rural and middle urban environments which reflect the profile of this nation's heartland. So, this is an almost perfect place to find cross-section, typicality and stereotyping. The economy of the area is essentially sound with greater stability than most parts of the State of Wisconsin. There is sufficient diversity of industry to insure against sudden excursions downward in employment and family income.

New freshmen entering the University have increased 11% between 1977 and 1979, an increase of 1,577 to 1,752 students. We expect our 1980 total to surpass our 1979 experience. We had more than 10,300 students in 1979; we shall, by the end of our counting period, have achieved 10,400 students. Fall semester transfers to the University of Wisconsin-Oshkosh increased from 792 in 1977 to 855 in 1979--an increase of approximately 8%. The total freshmen and sophomore enrollments increased more than 7% between the fall of 1977 and the fall of 1979, pointing to larger junior and senior classes in the future. The number of graduate students increased 18% between 1977 and 1979. The University's total FTE enrollments increased 3.4% between 1977 and 1979.

A demographic analysis of our student enrollment (attached) reveals that, in 1969, 82% of our students were 22 years old or younger; now, 58% of our graduate students are 30 or above. An extremely important statistic for us relates to the quality of students we are now serving. In 1976, the percentage of freshmen from the upper one-fifth of high school graduating classes was 26.9%. We have experienced the change from 26.9% in the upper quintile of our entering class in 1976 to 30.5% and 30.6% in 1979 and 1980, respectively. I would speculate that there are three factors involved in this important change. The chief factor is the very real effort that many of our faculty and administrative staff have made to provide an appropriate academic climate for meritorious students as well as needy and disadvantaged students. A second speculation is that the number of University scholarships and honor scholarships provided by the Oshkosh Foundation and the University of Wisconsin-Oshkosh Foundation, producing somewhat over 260 scholarships a year, has also helped to augment this part of our student population. A third speculation is that the announcement--just the fact of the announcement--of establishment of admission standards where there earlier had been none also affected this outcome.

While I am on the subject of faculty, I should mention that over 75% of our faculty have their terminal degree, over 90% in Education, 73% in Letters and Science, 85% in Nursing, 72% in Business. With respect to the productivity of our faculty in scholarly works in the last year for which we have completed data, 1978 through 1979, our faculty: first, presented more than 300 papers or major performances to regional, national and international audiences; second, published more than 260 articles and books; and, third, were awarded over 46 grants totaling to more than \$1,800,000. We do know that during the current academic year we will be funded at more than \$2 million of extramural funding.

In 1978, soon after I arrived on campus, we began an analysis of student retention. I noticed upon arrival that, in the fall of 1977, the University had retained 59% of those who had been freshmen in the fall of 1976. That was about 2 percentage points below the average for the System in that year, and it seemed several percentage points below an acceptable retention rate. This could have been a sign that we were not satisfying student needs in any number of ways. In other words, it could have been a serious educational problem. Moreover, it was clear, from the enrollment projections produced by System, that, if the University was able to improve its retention rate by 1-1/3% per year for each of the next three years starting in 1979-80, our enrollment would be essentially stable through the first five years of projected decline. As a consequence, we looked for the ways and means of ascertaining the true causes of attrition. This work led to the creation of a special program aimed at improving our retention figures while encouraging the appropriate transfer or non-matriculation of students whose needs would be best answered by those decisions. Dean William Leffin, of our College of Letters and Science, is heading this new task force. And I am proud to point out that, in the process of seeking help from faculty members to deal with students who seem to be having difficulty and to get our professional people in direct contact with them when the students first gave warning that they were in difficulty, Dean Leffin asked for faculty and staff volunteers. Looking for approximately 100 people, he ended up with over 300 faculty and staff volunteers. There seems to be a recognition here that we are all in this together. We know we do not create our mission or our public or our students; they create us. So the continued effort last year and this year on the part of our professionals makes me feel as good as I do and makes me as optimistic as I am.

Normally, as you know, mission statements provide the framework for development of statements of goals; and goals must comport well with missions. Until recently, the University of Wisconsin-Oshkosh was rich in missions; but it was very poor in goal statements--there were none. A year ago this past September, when meeting with our faculty and staff at the opening of the school year assembly, I indicated that one of our prerequisites as a mature University would be the achievement through broad-based participation of a clear statement of University goals. In early winter, I invited all of the then members of the Board of Regents to visit us during the goal-setting efforts. Since that time, approximately 150 faculty members, staff members, and students have participated in the voluminous information-sharing, discussions, plenary sessions, surveying and planning necessary to see that job through to completion. I did not want to hand these goals down as though from the mount. It was terribly important that the faculty, students and staff--and predominantly faculty--tell me where they feel we should be going. They have done this. The Faculty Senate then reviewed, provided suggestions and recommended approval of the goal statements. All governance groups have had a hand in the process and many more individuals, including virtually all of the faculty, have been twice surveyed to arrive at priorities among the goals.

Now, to walk the very last mile, there was a public hearing on the goal statements on September 24. We invited questions and elicited comments or suggestions from anyone who cared to express themselves at that meeting. At this point, the goals deal both with quantity and with quality, with attitudes and values. They deal, likewise, with direction and character, and they are not the usual abstractions so often seen in institutional statements of goals. There is very little in the way of "wild blue yonder" or "pie in the sky" thinking in them. All of the goal statements meet four additional criteria of effective goals. First, they are amenable to evaluation--if not measurement--six years from now or at any point before six years from now. Second, they came into being after careful and extensive scrutiny by those most concerned. Third, they are now subject to implementation through programming; and that I would give emphasis to. Fourth, these goals support our mission and reflect so well our real capability and our motives, our ambition and our potential. I feel confident that we will be able to design programs which will lead to implementation and subsequent evaluation. This six-year planning effort will aid us greatly in our planning efforts with the System.

One of our unfinished tasks of last year and of several years before that was the preparation of the Faculty Senate's new constitution. This past year's Faculty Senate did arduously and carefully pursue that matter, and the Senate members reviewed and labored over literally every line and every word. The Executive Committee of the Senate met often and protractedly with Vice Chancellor James and me and, occasionally, with other administrators, to resolve differences. A final draft has been approved by the Faculty Senate, and that draft will soon be presented to the faculty for ratification. In my own opinion, it is a strong document. It not only comports well with Chapter 36 of State Statutes, but it provides the Faculty Senate and the faculty with a comparatively clear statement of its rights and its responsibilities. I do not believe it is a perfect document; no new constitution ever is. It will require working with and occasionally we may have to smooth out a passage or two. But it is eminently worthy of being worked with.

Also agreed upon within recent months was a new set of personnel rules and regulations for academic staff. This new document provides just about every possible due process safeguard for academic staff.

Up to this point, members of the Board, I have regaled you with facts and figures concerning a very few points of pride. There are, in fact, many more points of pride. However, at the outset, I had promised I would also refer you to some impediments, problems, threats and concerns. We have not yet reached nirvana and we do have some negatives to overcome. I would draw your particular attention to a document included with the statement of goals (attached). You will find a list, first, of strengths of this University as described by the more than 150 people participating in our goal-setting exercise. These strengths, I believe, are real and they are important. But there are also listed some twelve hurdles or barriers which might be viewed in another language as problems and impediments. They merit your attention as well as ours.

Of the twelve hurdles or impediments listed, the numbers with asterisks--1, 2, 6, 8, 10, 11 and 12--are items with which this University can largely deal, if all of its elements work together; and these matters I feel confident will be addressed. Several of them are already being addressed. Items 3, 4, 5, 7 and 9 are items which we cannot resolve by ourselves. It is my intention to address these matters with President O'Neil and appropriate System staff in the months ahead. There is much work to do to overcome these hurdles.

One of our very particular problems, not surprisingly, has to do with our financial status. I have already discussed much of this concern with you yesterday and I shall not repeat. I would add only one other note to yesterday's presentation on the subject of the budget. And that is that I am reassured by the opportunity my colleagues and I will have to confer with President O'Neil with respect to our budget situation and its ramifications. These iterative processes are essential, to my way of thinking, to our kind of System, and we should not try to manage without them.

An additional continuing concern is recruitment of members of minorities as faculty and staff. It was my impression, when I first arrived in Oshkosh, that it would be difficult for the University to recruit minority staff and faculty. The statistics at the time suggested that such recruitment was, in fact, not easy. I still have that impression. However, we have significantly improved our situation and our performance exceeds that of the System as a whole. From 1977 through 1979, we have increased our minority staffing 16%. Minority representation on the faculty was increased from 3.8% to 7.7%; representation of women on the faculty was increased from 26.6% to 31%; and representation of both of the above groups in the executive, administrative and managerial categories was markedly increased. This is a matter which continues to draw our attention, and it is my conviction, as was reported by our resource committee to the Task Force on the Status of Women, that the University community is alert to the problem; it is interested in solving it; and we are working on it together.

In the core mission of the University Cluster, there are missions which generally describe the importance of the baccalaureate degree and selected graduate programs. Now, if one pursued all of these missions, one would be pursuing the missions of most universities within the United States and, certainly, most of the universities in the Midwest. However, the statement of core missions goes on to describe specific additional missions, virtually all of which might be termed public service.

At the outset of this presentation, I mentioned the importance of location, geography, demography and the economy of the region we serve. We serve several cities and many towns. The area is urban, suburban and rural. And, we have frequent occasion to interact with a variety of publics including farm, school, health, government, business and labor. Our students and faculty interact with over 500 agencies and organizations of all kinds and varieties throughout the corridor, including schools, hospitals, clinics, government agencies, businesses, care centers, nursing homes and other colleges and universities. When we talk about public service at the University of Wisconsin-Oshkosh, we are not talking about cooperation with the local United Way which we do as part of our citizenship; we are not talking about participating in local civic organizations which we also do as part of our citizenship; but we are talking about an active, responsive outreach on the part of the University which does not choose to sit like some lazy Susan holding a smorgasbord of various educational tidbits for selected epicureans to come to nibble at. The day of the public university as cloister or enclave may not be entirely over, but it is over at this University. The reality is not lip-service; the reality is public service. We fully recognize that we cannot be all things to all people, but almost every department in this University has a very impressive public service record. I do want to draw your specific attention, briefly, to a few of our public service projects, so you can capture at least the concept--the special sense of this special effort and function on the part of the University.

The College of Education and Human Services projects for Indo-Chinese students is one to which I would draw your particular attention. In mid-year of 1979-80, the federal government relocated approximately 150 Indo-Chinese families into the City of Appleton. Because the community had very little opportunity to prepare for the relocated families, the result was a very sudden and dramatic educational, cultural, sociological, language and economic problem. Several teachers in the Appleton School System became aware of the almost crisis situation and conversed with members of our College of Education and Human Services staff and faculty. This led to discussions among members of the Appleton School System, the Department of Public Instruction and this University through its College of Education and Human Services. The effort was made to determine the needs and the feasibility of a program which might help with the problems that were experienced. Out of these discussions emerged the structure of a project which was then submitted to the Department of Public Instruction for funding under Title IV-C. The project has several key features: Assessment of both language and social integration has been made on a before/after basis to determine program effects; Appleton area school personnel are identified who have both an interest in working with Indo-Chinese students and who will be having them in classes during the next school year; and teachers who were teaching English as a second language to Indo-Chinese students, all of whom are interested in being certified as ESL teachers, were then identified. Approximately 150 Indo-Chinese students, ranging in age from 4 years to over 18 years of age, were involved, then, in a program this past summer; and an ongoing in-service program for interested Appleton area school district personnel is being conducted by our college. I understand, because of the effective work of our faculty and staff in the Appleton project, the University is to be designated as a center for aiding resettlement families. And, if these projects of relocation are to be moved also to Oshkosh and West Bend, as seems likely, we will become the model program for that project.

The Community Restorative Care project for the elderly is conducted in conjunction with nursing homes and, particularly, Evergreen Manor. It is designed to serve the elderly who are not so severely disabled that nursing home care is necessary and, yet, disabled enough to experience difficulty in living independently. The goal is an important one--to avoid premature institutionalization for the chronically impaired elderly.

A composite of regional service activities of the Department of Geology had been presented to you earlier. That Department is involved in approximately a dozen major service activities. One that had not been mentioned includes an hydro-geochemical study of northwestern Winnebago County. In a similar way, a sedimentation study of Fond du Lac harbor is being conducted by Dr. Brian McKnight. Because of the accumulation of sand and silt around the harbor entrance, periodic dredging is necessary to maintain a navigation channel. So, the purpose of this study is to locate the source of the sediment and the direction of that current so that preventive measures can be taken to ameliorate the siltation of the harbor. A major project of the Geology Department, together with colleagues in the Biology and Chemistry Departments, has been in the area of water quality improvement in the Fox River and Lake Winnebago.

There are additional projects undertaken, one by C. W. Fetter, involving hydro-geological studies and geochemical studies to establish the feasibility and design for seepage beds for sewage effluent seepage basins in the Kettle Moraine. This project received several state and national awards for engineering excellence.

High school visits and presentations are made by the Chemistry and other Departments. Each year, prototypical of this project, the Chemistry Department sends a list of faculty speakers and topics to all the high schools in the state. Time and schedules permitting, presentations are arranged throughout the year. In the 1978-80 period, 37 presentations were given at 26 high schools on chemistry related topics. That Department's effort is now replicated by over a dozen other units within the University.

You have heard previously a considerable amount about the College of Business Administration, and you have heard a report of some of the work of this College. It should suffice to report here that the College, working with Extension, provides regional small businesses with counseling through the Center for Small Business Service. The Center operates over 60 non-credit business seminars serving over 2,000 people each year. As of this semester, that Center for Business Services at the College of Business Administration and University Extension is the most active of all of those centers throughout the state in terms of programming and in terms of numbers of clientele served.

The College of Nursing, likewise, is involved with 20 area hospitals and other clinical sites in the region to place 300 baccalaureate students, student interns, each year in clinical settings.

The College of Education and Human Services involves 350 students each year in nine area school districts. It operates a special education diagnostic service center that serves about 400 children and adults each year from our service area. It operates a career assessment and employability center that serves over 400 adult clients each month. In addition, the center's program serves over 150 high school students in career-related decisions each month.

In the area of computer services, computer files are maintained on over 4,000 CETA workers in training. Testing services are provided for about 150 referrals from regional agencies per year.

The publications of Economic Trends, produced by our Economics Department, are well regarded by both regional business people and lay-people.

At the Winchester Academy, the English Department's Neil Eckstein preserves and transmits the region's major ethnic heritages and fosters American studies, including the preservation of documents left by immigrants to Wisconsin.

There are, literally, hundreds of these examples. I would draw your attention to one last one. On Tuesday of this week the University held its third annual convocation, with our guest speaker being Edward Albee who discussed the state of the arts in this country and expressed his view of the development of regional arts. This was a moment of major importance for this University for, at the convocation, I was privileged to announce the formation of a new regional council consortium in support of the arts. Sharing the platform with us as our guests were the President of Ripon College, Dr. Bernard Adams, and the President of Lawrence University, Dr. Richard Warch, both of whom I had approached during the summer to explore the possibilities of such a consortium. It has been clear to me that, only through the development of a completely coequal and voluntary consortium of the major stable, mature public and private institutions in the region, and of the several foundations which share the same commitment, could any significant impact on the future cultural development of the region be achieved. The resources just do not exist and will not soon exist for any of us to do alone what we can do in concert. Involved in this consortium, in addition to Ripon College, Lawrence University and this University, are the Bergstrom Art Center in Neenah, the Paine Art Center and Arboretum, and the Oshkosh Public Museum. We have also had the interest and support of Miles Kimball Company and the Kimberly-Clark Foundation, as well as the support of Mr. John Torinus of the Post Corporation. It is a very encouraging development for us and for this region.

Virtually all of the activities and programs I have described emanate from this University, its faculty and its staff; and virtually all the projects are at least initiated "out of hide." They are developed through faculty and staff initiative. I hope I can make clear the point that of all of the service this University produces, of all of those projects and the many more I did not describe, not a single, solitary one of them is affected in a beneficial way by the CSI formulation or the enrollment funding formula affecting this University. They are clearly a part of our mission--System mission, core mission and institution-specific mission. But we do these things in spite of, not because of, the enrollment funding formula and CSI formulas; nor are we funded for these activities through Extension, although many of these functions, in another System, traditionally would be Extension funded. I almost never use the word "excellent," but our public service work at this University deserves that description.

In other words, our present method of funding universities in this state is not considerate of an essential major mission of a modern, progressive university--public service. The paradox, and it is a painful paradox, is that we may begin to strangle the important and valuable public service mission and its implementation at this University because of the continued erosion of our

resources through strict enrollment counts, funding formulas and CSI. That situation is a desperate one for us, and our ability to serve the public is going to be terribly circumscribed if a new approach to funding is not taken. I have to believe that this system, of all systems, a system that came from the Wisconsin Idea, can rethink its method of resource allocation. Certainly, numbers must be involved, but so must service; and so must an assessment of mission success be a crucial factor of funding. Difficult to do? Yes; but I think, needed. I am sometimes asked if it is not too painful to make difficult, erosion related budget decisions. It is painful; but, actually, it could get too easy to think of the difficult management decisions that need to be made in a time of declining resources. Because we know reality, we know loss and erosion and we know reduction, we are conditioned to think that way. The big challenge, it seems to me, to an educator, at this stage of our existence, is not to succumb to the mentality of decline. The trick is to make those painful decisions as artfully as possible; but then we should try not to get stuck in their mud, in their quicksand. Troubled institutions are made, in part, by troubled leaders. Instead, we have to keep our eye on reality and potential, move toward that potential, see the promise and move to implement it. That is a high challenge and it is an easy one to accept at the University of Wisconsin-Oshkosh because the potentials of the people and the place are so great.

I have very much enjoyed your visit; I hope you will come back soon and often. I thank you for your courtesy.

January, 1980

UNIVERSITY OF WISCONSIN-OSHKOSH

MAJOR STRENGTHS AND HURDLES/BARRIERS AFFECTING GOAL ACHIEVEMENTS

STRENGTHS

1. UW-Oshkosh has a diversified range of strong academic programs, both graduate and undergraduate, which attracts students and provides them with assistance in combining various program alternatives to suit their individual goals for intellectual and career development. It has the largest graduate enrollment among institutions in the UW System University Cluster. At the same time, UW-Oshkosh is a small enough campus to allow effective communication among students, faculty, and administration.
2. UW-Oshkosh has a well-credentialed, stable, and experienced faculty to accomplish the mission and purposes of a regional university: teaching, research, and public service. This strength is enhanced by the opportunities afforded by the University's Faculty Development Program, academic support services, and grants program.
3. A strength of UW-Oshkosh is its location in an environmentally attractive area in the center of an urban-industrial-agricultural area. The Fox Valley provides a diverse population of traditional and adult students that stimulate and receive unique services from the University.
4. UW-Oshkosh has a wealth of physical resources in the arts, sciences, library, housing, and computing capacity that is enhanced by programs and faculty for serving the needs of all students. It is also one of the most advanced campuses in the state in the matter of providing the physically handicapped with access to its facilities.
5. The University has played a significant role in the cultural and economic development of the region, serving as a resource through its expertise, materials, equipment, and facilities. The faculty has a strong record of community service.
6. In general, the University has an excellent array of student support services.
7. In dealing with the enrollment declines in the 1970's, the University has acquired experience in new program development designed to serve new and changing student populations. The experience provides the University with the sensitivities and confidence to deal effectively with the changing enrollment patterns of the 1980's.
8. The scheduling options of the Oshkosh Calendar allow the University to provide for the various educational needs of older and part-time students, and the professional needs of faculty.

9. The University has an established reputation for producing outstanding graduates in many academic programs.
10. A strength of UW-Oshkosh is that it is a major employer in the community and, therefore, a major economic factor in the region.

HURDLES/BARRIERS

- *1. Increasing tenure density coupled with a decline in real resources may lead to staffing inflexibility, limited new program development, a reduction in the hiring of new women and minority faculty, and an increase in academic staff appointments. These developments would reduce our ability to respond to changing societal needs and may result in a decline in campus morale.
- *2. The University has a less than optimal self-image and reputation in the community because:
 - some faculty and students fail to live up to the teaching and learning standards of an academic community;
 - UW-Oshkosh does not have adequate mass media representation;
 - we have lacked an effective system of internal communication (although this is being addressed now);
 - some of the UW-Oshkosh campus and physical facilities still have an unattractive appearance (although this is changing for the better);
 - in some cases existing facilities are under-utilized, and there is inadequate procurement, maintenance, and replacement of permanent equipment;
 - many of our students have not developed a sense of belonging to the University community.
3. Present funding from Central Administration does not adequately support non-credit producing activities such as research, services to the region, workshops, and other activities, which are an integral part of our mandated mission. As a result, we may focus too narrowly upon student credit hour production to the detriment of other important University goals.
4. As a response to demographic pressures, there is a danger that increased competition for students among peer institutions and technical schools may contribute to a lowering of academic standards, an over-emphasis on careerism, and unhealthy rivalries. In addition, many of the University's academic programs are threatened by duplicate

program offerings from competing state institutions in the region, all of which were constructed long after UW-Oshkosh.

5. Continued inflation will make it increasingly difficult for the University to acquire resources to meet its program and service needs.
- *6. There is a lack of cooperation and understanding between units which often leads to feelings of territoriality and unhealthy rivalry. There are also anxieties involved in the allocation of limited human and fiscal resources between existing and new programs.
7. Current state tuition policy regarding out-of-state students makes it increasingly difficult to recruit a student population of adequate diversity. In-state tuition is increasing rapidly to the point that during the next six years, students from middle-income families may find the cost of higher education beyond their financial capabilities.
- *8. The University does not have a sufficient level of scholarship and financial aid resources that can be allocated to students on the basis of academic merit.
9. Increasing government regulation will require increased nonproductive investments of institutional time and resources.
- *10. The University has lacked an adequate level of political influence at local, regional, and state levels.
- *11. Current campus systems of applying merit in faculty evaluation matters are ineffective and divisive.
- *12. The alternative scheduling options associated with the Oshkosh Calendar continue to pose curricular, extra-curricular, administrative, scheduling, and academic problems.

*Hurdles, or barriers, or impediments which can and will be addressed by the University community.

UW-OSHKOSH STUDENT PROFILE

ENROLLMENTS AND RETENTION: Two-Year Comparison, 1977 - 1979

<u>SELECTED ENROLLMENT STATISTICS</u>	<u>1977</u>	<u>1979</u>	<u>CHANGE</u>

to the
BOARD OF REGENTS
AND INFORMATIONAL ITEMS REPORTED FOR THE REGENT RECORD
10 October 1980

I. CONTRACTS AWARDED.

A. UW-EAU CLAIRE

1. 1977-79 Mechanical/Electrical Monitoring System (7806-16)
 - a. Computerized Automation Center
Hooper Construction Corporation - Madison \$336,830.00
2. 1979 University Center Electrical Service Improvements (7908-29)
 - a. Electrical
C. R. Stocks Electric Company, Inc. - Eau Claire \$ 25,674.00
3. 1980 Physical Fitness Course (8004-56)
 - a. All Work
Dasha Landscaping - Eau Claire \$ 14,500.00
4. 1980 Murray Hall Service Access and Parking Improvements (8007-01)
 - a. All Work
Pember Excavating, Inc. - Menomonie \$ 22,983.00
5. 1980 Structure Removal - North Campus Parking Lot (8009-14)
 - a. All Work
Devney Construction Company, Inc. - Altoona \$ 4,899.00

B. UW-GREEN BAY

1. 1979-81 Boilers/Storage Oil Fuel Conversion (8003-19)

a. Mechanical

Hennes Erecting Company, Inc. - Appleton \$ 45,000.00

C. UW-MADISON1. 1979-81 School of Veterinary Medicine (7911-53)
(Madison Campus Replacement Parking Facility)a. General Construction & Plumbing

Payne & Dolan, Inc. - Waukesha \$137,490.00

b. Electrical

Robert Nickles, Inc. - Madison \$ 30,985.00

TOTAL CONTRACT AWARDS: \$168,475.00

D. UW-MILWAUKEE1. 1979-81 Six Building Insulation (7912-11)
(Sabin Hall/Engelmann Hall/East Annex/Kenwood
Conference Center/Marietta House/Shepard House)a. Insulation

DISCO of Madison - Madison \$ 69,974.00

2. 1979-80 Harnischfeger House Boiler/Expansion
Tank Replacement (8003-28)a. Boiler & Expansion Tank Replacement

Zien Mechanical Contractors - Milwaukee \$ 4,480.00

3. 1979-80 Heating Plant Feed Water Pump Replacement
(8003-30)a. Boiler Feedwater Pumps, Bases

J. M. Brennan, Inc. - Milwaukee \$ 18,000.00

4. 1979-80 Lapham Hall Heating Coils Replacement (8003-33)

a. All Work

Mared Mechanical Contractors Corporation - Milwaukee \$ 11,000.00

5. 1980-81 Asphaltic Concrete Track Removal (8008-13)

a. General

Earl Wiggins Landscape Contractor, Inc. - Milwaukee \$ 12,893.00

E. UW-PARKSIDE1. 1979-81 Energy Modifications - Steam Distribution
Insulation (8004-47)a. All Work

Sprinkmann Sons Corporation - Milwaukee \$ 59,796.00

2. 1980 Three Parking Areas Improvements and Repair (8007-31)

a. All Work

A. W. Oakes & Son, Inc. - Racine \$ 23,000.00

F. UW-PLATTEVILLE

1. 1979-80 PE Building Public Address System (7910-43)

a. Public Address System

ASTEC Corporation - Onalaska \$ 22,695.21

G. UW-RIVER FALLS

1. 1979-81 Fine Arts Building Improvements (8004-40)

a. General

A. A. Hoehn, Inc. - Eau Claire \$ 9,593.00

b. Heating-Ventilating

Badger State, Inc., Plumbing & Heating - Eau Claire \$ 20,150.00

c. Electrical

Sherman Electric Service, Inc. - Eau Claire \$ 2,000.00

TOTAL CONTRACT AWARDS: \$ 31,743.00

H. UW-STEVENS POINT

1. 1979-81 Microenvironmental Study Plot (8004-41)

a. Chain Link Fence

Struck & Irwin, Inc. - Madison

\$ 9,650.00

I. UW-STOUT

1. 1979-81 Heating Plant Oxygen Analyzers (8004-22)

a. Control Work

Power Process Equipment, Inc. - Minneapolis, MN

\$ 27,698.00

2. 1979-81 Outdoor Running Track Sealing and Striping
(8006-14)

a. All Work

Action Courts, Inc. - Eagan, MN

\$ 11,499.00

J. UW-SUPERIOR

1. 1977-79 Gates PE and Erlanson Hall Handicapped
Accessibility (7905-26)

a. General Work

Ray Risberg, Inc. - Duluth, MN

\$266,886.00

b. Heating, Ventilating & Plumbing

Shorty & Sons Mechanical Contractors, Inc. - Superior

\$ 18,480.00

c. Electrical Work

Belknap Electric, Inc. - Superior

\$ 24,760.00

TOTAL CONTRACT AWARDS:

\$310,126.00

II. CONTRACT CHANGE ORDERS IN EXCESS OF \$15,000.

There are none to report this month.

III. REPORT OF ACTIONS TAKEN (MEMOS OF AGREEMENT).

- ✓ Brookfield Community Band - agree for use by Brookfield Community Band of Civil War Music in collection of Memorial Library ✓
- A. An Agreement between Gordon Klope on behalf of the Brookfield Community Band covering the use of American Civil War music which is part of the Collection of the University's Memorial Library has been signed August 19, 1980, by the UW-Madison Vice Chancellor for Administration. Memorial Library ✓

- Heritage Military Music Found. - agree for use of Am. Civil War Music in collection of Memorial Library ✓
- B. An Agreement between the Heritage Military Music Foundation covering the use of American Civil War music which is part of the collection of the University's Memorial Library and the Board of Regents of the University of Wisconsin has been signed June 12, 1980, by the UW-Madison Vice Chancellor for Administration. Heritage ✓

- ✓ Milwaukee County - agree with UW-Milw for use of McKinley Marina Parking lot. CK-ref - UW-Milw
- C. An Agreement between Milwaukee County, through its Director of Parks, Recreation, and Culture and the Board of Regents of the University of Wisconsin System for use of the McKinley Marina parking lot for the period September 2, 1980 to May 15, 1981, has been signed July 22, 1980, by the UW-Milwaukee Assistant Chancellor.

✓ Energy, U.S. Dept. of - amendment to basic agreement with BOR.

- D. An amendment to the basic agreement between the Board of Regents of the University of Wisconsin System and the U.S. Department of Energy has been signed August 22, 1980, by the Vice President and Controller. ✓

✓ UW-Stout - agreement with Emil Gluck for rental of parking lot.

- E. An Agreement between UW-Stout and Mr. Emil Gluck for rental of a parking lot for university students, located in Block 52, Lots 2 and 3, 817 South Broadway, Menomonie, has been signed by the Vice President for General Services. The agreement covers the period August 15, 1980 to August 15, 1981. ✓

- ✓ Spooner Experimental Station - agreement for rental of residence (Cadwallader) ✓
- ✓ Ashland Experimental Farm - agree with Donald Tanner for rental of residence. ✓
- F. Rental agreements for UW-Madison Experimental Farms Residences have been signed by the Vice Chancellor for Administration with the following individuals:

- | | |
|------------------------|------------------------------------------------------|
| (a) Thomas Cadwallader | Farmstead #2 Residence, Spooner Experimental Station |
| (b) Donald Tanner | Herdsman's Residence, Ashland Experimental Station |

The term of the agreements is July 1, 1980 through June 30, 1982.

✓ UW-Superior - agreement with Northwest Wis. Community Services Family Planning Program for services on campus. ✓

- G. An Agreement between the Northwest Wisconsin Community Services Family Planning Program and UW-Superior to provide a clinical setting for the Family Planning Services on the campus of UW-Superior has been signed by the Chancellor. The agreement, which involves providing the Student Health Service facility and its existing equipment one day per week between the hours of 12:00 and 4:00 p.m., is for the term September 3, 1980 through September 3, 1981. It is renewable annually or at any mutually agreeable time to the Douglas County Board of Health and the University of Wisconsin - Superior. ✓

✓ UW-Platteville Bldgs & hands - easement to city for sewer & water mains

- H. Under authority granted by Board Resolution 518 (June 8, 1973), an easement was granted to the City of Platteville for installation of a sanitary sewer and water mains across a portion of university lands, with the agreement signed by the President and Secretary of the Board.

✓ UW-River Falls - agree with Tri-County Council on Alcoholism & Drug Abuse.
 ~~the Halfway House~~

- I. An extended contractual agreement between the Tri-County Council on Alcoholism and Drug Abuse and UW-River Falls relative to the Halfway House on the UW-River Falls campus has been signed by the Vice President for General Services. The term of the agreement is September 1, 1980 through July 31, 1981, with the option of the university to renew for four additional one-year periods. This agreement was initially approved by the Board on June 10, 1977 (Resolution 1481) and the extension of the agreement reported to the Board in September 1978.

✓ UW-Superior - Agree with Dept of Transportation for lease of space in ~~Bldgs & hands~~
 ~~Hawkes Hall~~

- J. An Agreement between the University of Wisconsin - Superior and the Department of Transportation for the lease of 12,520 square feet of space in Hawkes Hall has been signed by the Chancellor. The term of the agreement is from November 1, 1980 through October 31, 1981, at an annual rate of \$68,860. Monthly extensions beyond that date are included, at the option of UW-Superior.

- K. The following agreements between UW-Madison and the designated agency for the leases of specified amounts of space in the Annex Building (former Neurological and Rehabilitation Hospital), 1954 East Washington Avenue, Madison, have been signed by the Vice Chancellor for Administration:

Wisconsin Disability Coalition, Inc.: 197 net assignable square feet (\$6.30 per square foot, \$1,241.04 annually) for the period June 1, 1980 to May 31, 1981.

Access to Independence, Inc.: 1,070 net assignable square feet (July 1, 1980 to June 30, 1981) and an additional 401 net assignable square feet (September 1, 1980 to June 30, 1981) (\$6.30 per square foot, \$561.75 per month for July and August; \$772.27 from September 1 through June 30).

Retardation Facilities Development Foundation, Inc.: 256 net assignable square feet (\$6.30 per square foot, \$134.40 per month), for the period June 1, 1980 through September 30, 1980.

City of Madison Public Health Department: 704 net assignable square feet (\$6.90 per net assignable square foot per year, \$404.80 per month; said rental to increase by 10% per year for each year of occupancy.) Rental period is July 16, 1980 through May 31, 1984. (This agreement expands the amount of space originally leased to this agency under an agreement reported to the Board of Regents in September 1979).

UW-La Crosse - Bldgs & hands - agree with City for
rental of parking space.

- L. A parking agreement between the City of La Crosse and UW-La Crosse for rental of a small parcel of land for university parking has been signed by the Vice President for General Services. A continuation of an existing arrangement, the annual rate has been increased from \$125 to \$150, for the period from October 15, 1980 to October 14, 1981.

UWC-Barron Co - agree with Wis. Gas Co. for gas service

- M. An Agreement between Wisconsin Gas Company, Milwaukee, and UW Center - Barron County has been signed by the Vice President for General Services and provides gas service at the Center for the period November 1, 1980 to September 1, 1982 and, thereafter, from year to year until terminated at the end of any such year by either party upon 45 days prior written notice to the other. The conditions are recorded in Contract No. 32-8658, dated September 10, 1980.

Day Care Program - agree with Child Development, Inc. for operation of program. (X-ref Child Development, Inc.)

- N. An Agreement between UW-Madison and Child Development, Inc., for the operation of a day care program has been renewed for the period September 1, 1980 through September 30, 1983. This agreement operates in conjunction with a special use permit between the USDA's Forest Service for the use of two buildings, located on the UW-Madison campus, south of Parking Lot 60, as a day care program setting. Both agreements were initially reported to the Board in November 1979.
