BADGERS BOYS IN DANGER.

A Company of the Second Wis. Reg't Cut Off in the Mountains by Spanish Troops.

PONCE, Island of Porto Rico, Aug. 2.--Via St. Thomas, Aug. 3.--General Roy Stone, while reconnoitering northwards along the road leading to Arecibo, on the north coast, with a company of the Second Wisconsin regiment encountered opposition at Utuado where a small force of Spanish regiments and volunteers had been instructed by Captain General Macias to resist to the bitter end. The Spaniards refused to surrender and General Stone telephoned back to Adjuntas that he would push on, aided by a force of natives, armed with machetes. Before the messengers left Adjuntas, where twelve men had been left, a Spanish force was reported to be between General Stone and Adjuntas, picketed along the trail between Adjuntas and Utuado, in the heart of the mountains. As the troops have to move in single file, ten men can stop a regiment. General Stone's messengers rode all night.

General Stone is making a dashing reconnaissance north in the direction of Arecibo. He went into Adjuntas last night with five men correspondents and today he brought his command on along the Utuado road. The road rises west of the Cayey range, and is rough, but practicable for cavalry and infantry. If it is found possible at Utuado, a light column of troops may be pushed across to the north coast and strike in on San Juan on the left flank. But if General Brooke is successful it is probable that General Otega will find Abonito untenable in which case the whole of our army, after effecting a junction, will move on the main road.

General Stone met with a most enthusiastic welcome from the natives in the villages and towns through which he passed. Women and children strewed the streets with flowers and as he passed houses and townhalls flew home-made American flags. Behind him moved a company of the Second Wisconsin regiment under Lieutenant Bodine. The enemy, numbering about 400 preceded him. The enemy has for hours been in full retreat.

The Chicago Chronicle says that Company C of the Second Wis., Vols., under Lieut. Bodine was with Gen. Stone in his march. Company C is from Sheboygan.

NOT COMPANY G.

The Company of the Second Wisconsin said to have been caught in a Troop by Spaniards in Porto Rico was Commanded by Lieut. Bodine.

The telegraphic report that Gen. Stone with a company of the Second Wis., Reg't was caught in a mountainous region while making a dashing reconnaissance, the Spanish troops getting in the rear of them and cutting off their return, also states that the company was under command of Lieut. Bodine, of Company C, of Sheboygan, consequently our Appleton boys were not in the scrape and the apprehension of friends in their behalf has been allayed. At the point where the company was caught the passage is said to have been so narrow that the troops had to move in single file and ten men could stop a regiment. A messenger traveled all night toward the main army to secure reinforcements.

Not a Candidate.

We overheard a conversation between some prominent democrats recently, in which it was whispered that John M. Baer of Appleton, would be pitted against Hon. E. S. Minor for congress this fall. Mr.

Baer is very popular in both democratic and republican circles and if he is nominated by the democrats we republicans will have to look to our laurels. We have no fear of defeat this fall but we do not want any "close shaves."--New London Tribune.

Capt. Baer says he is not a candidate and furthermore would not accept the nomination if it were handed him.

The boat is thirty feet long and has a nine horse power, three cylinder engine, which is self starting and reversing, and which will also have Hammel's latest naphtha device, the dynamo which furnishes the spark for the ignition of the gasoline. The boat is white with mahogany inside finishing and a top of bird's eye maple. The new boat cost \$1,600 and will reach here in a week or ten days.

Messrs. Whitman and Wurl returned yesterday from Madison where they appeared before the Equalization board. They testified that village and city lots were assessed very high, and that mill property along the river assessed at \$5,000,000 was not now as valuable as it was several years ago owing to decrease of water power.

THE CLOQUET MILL.

Contracts for the Erection of the Immense Minnesota Mill Let on Plans Furnished by C. B. Pride of This City.

C. B. Pride, the Appleton mill architect, has returned from Duluth where he has been in conference with the officials of the new Northwest Paper company which is on the point of building an immense paper mill on the St. Louis river at Cloquet, Minn. He furnished plans and specifications for the proposed mill which were accepted immediately by the officials of the company and contracts were let for the construction of the mill. The work of building the mill will commence at once and the plant will be completed and ready for operation by the first of next January.

The cost of the mill will be about \$300,000 and it will consist of five buildings as follows: Pulp mill and power house, two stories high, 72x143 feet; wood mill building, three stories high, 66x82 feet; wet machine building, two stories high, 46x117 feet; beating engine building, two stories high, 43x110 feet; paper machine building, two stories high, 70x220 feet; finishing room building, 50x150 feet; boiler house, 50x70 feet. The buildings are to be the latest model paper mill structures and will be of brick and stone. The mill will be equipped with two 120-inch machines which will run 500 feet per minute.

C. B. Pride, of Appleton, architect and engineer in charge of construction, also has the contract for the carpenter and millwright work. The Hackworthy Construction Co. of Appleton, has the contract for the mason work and for the rock excavation. The Buffalo Forge Co., of Buffalo, N. Y., has the contract for the heating apparatus. Robert A. Lang, of Eau Claire, has the contract for constructing the dam to develop water power. Kinney Bros. of St. Paul, were awarded the contract for the steam boilers and Wright, Barnett & Stilwell, also of St. Paul, have the contract for the roofing.

The company will have both water and steam power with which to operate the plant. In case of failure of the water power there will be steam power in reserve. The dam that is to be constructed will develop 4,500 horse power. Mr. Pride is experienced in constructing plants for manufacturing paper and pulp and his record had much to do with his selection for the responsible work that he has before him at the Cloquet.

As soon as this mill is in operation a sulphite mill will be built, but the work on this mill will not be done till next season, probably.

HAVE ANOTHER RIOT.

Workingmen Have Trouble With Strikers at Oshkosh Today--Police Stoned and Strikers Clubbed into Submission.

The belief that the strike trouble at Oshkosh was all over was rudely dispelled this morning when a mob gathered at the Morgan mill and as a result there was a raid by the police with a total of sixteen arrests and a number of badly bruised strikers, while the police did not escape unscathed. The report of the early morning that Chief of Police Weisbrod was shot and killed is untrue as he was badly bruised but not seriously hurt, and in fact, as far as is known there were no guns shown by either police or rioters.

The trouble began when the men went to work this morning and a crowd gathered about the Morgan mill and endeavored to intimidate the strikers. The guards at the mill became involved with a crowd of 1,500 or 2,000 strikers' sympathizers and police assistance was summoned. Chief Weisbrod was on hand also and before the disturbance was finally quieted the police had been stoned by the crowd and many of them badly, though not seriously bruised. The police finally succeeded in quelling the outbreak and made sixteen arrests, of which number seven were women. Three or four of the strikers were severely clubbed but the crowd was finally dispersed and the mill continued running. Guards are still on duty at all of the mills.

Found Not Guilty.

John Hammel, who ran over a wheel ridden by John Burke of Oshkosh, was found not guilty by a jury in Justice Lennon's court yesterday of a charge of assault and battery. A Deaf and Dumb Drunk and Disorderly.

The police picked up a deaf and dumb drunk last night. He was taken into court this morning, fined and sent out of the city.

CRESCENT'S... DAILY STORY.

THE SEVENTH MAN.

Bess and Fred were actually quarreling. The blissful monotony of existence, where the hours of the first time beating as one, had been rudely awakened. And the cause of the quarrel was a mere matter of whiskers—Fred's side whiskers.

"My face is too broad, anyhow," argued Fred. "Those mutton chops must come off. If you really love me, Bess—"

"If you could I continue to love you with your face as changed that I would hardly know you," remonstrated she, half tearfully, half petulantly. "I think it was those cute little side whiskers that—that—first—well, you know what I mean, Fred."

"Then it is the whiskers you care for, after all—not me. Only your own confession would have made me believe upon the street, 'I have not confessed anything. I wonder at you, Fred. But it is better to understand things now than later on, after marriage.'"

"What a fuss about nothing, Bess. Be a good girl, dearest. All the fellows in my set laugh at those infernal side whiskers; call me 'Daddy Bull' and the first time beating as one, had been rudely awakened. And the cause of the quarrel was a mere matter of whiskers—Fred's side whiskers.

"My face is too broad, anyhow," argued Fred. "Those mutton chops must come off. If you really love me, Bess—"
