UW-MADISON TECHNOLOGY TRANSFER MAY HELP SAVE TROPICAL FORESTS

by TERRY DEVITT
University News Service

MADISON--Tropical rain forests are the world's richest biological resource. They harbor almost half of all living species making them genetic reservoirs of enormous potential for medicine, agriculture and industry.

Yet these lush forests and the riches they hold are rapidly disappearing. It is estimated that of the 5.5 million square miles of tropical forest remaining in the world, over 45,000 square miles are cleared each year.

But if the work of University of Wisconsin-Madison researchers pays off, tropical deforestation could be slowed by integrating space-age technology with effective land-use planning in developing nations, countries where most of the world's tropical forests are situated.

The technology, known as remote sensing, relies on photographs, radar patterns and thermal portraits supplied by satellites and specially equipped aircraft, according to UW-Madison researcher Ralph Kiefer.

Using images of a particular area, Kiefer said remote sensing experts can coax computers into surrendering a wealth of information about the area's available resources and land-use patterns.

Collecting data of this kind is increasingly important in developing countries, according to Kiefer, a professor of civil and environmental

-more-

engineering. Overpopulation, coupled with an inadequate land-use data base, can pose serious environmental threats.

A case in point is Indonesia, a nation of many islands that straddles the western Pacific and Indian Oceans. Indonesia boasts more than 10 percent of the globe's tropical forests, but a mushrooming population, logging and shifting agriculture are beginning to erode the country's lush forests.

In an effort to provide Indonesia with the tools to better manage its resources, Kiefer and Sean Ahearn, a graduate student in the Institute for Environmental Studies (IES), have joined with Indonesian and other UW-Madison scientists to set up a remote sensing training program for the island nation.

According to Kiefer, remote sensing is the only practical way a country like Indonesia can inventory and monitor its natural resources.

"You just can't do this from the ground," said Kiefer. "Surveying 12,000 islands scattered across 3,000 miles of ocean is far too much to tackle by other methods. A few satellite images can cover the whole country."

The ultimate goal of the project is to provide the Indonesians with a means of accurately mapping all of their forests, farm lands and waterways.

This information is critical, Kiefer said, because Java, Indonesia's main island, is severely overcrowded and the government is trying to ease the problem by relocating as many as 100,000 families a year to other islands in the archipelago.

Kiefer, who also heads the IES Environmental Monitoring Program, said the relocation program has resulted in a massive loss of primary tropical forest to forms of agriculture not suited to the land.

According to Ahearn, upwards of 100,000 acres of Indonesia's tropical forests are cleared each year to accommodate relocated families. But he added that cleared forests are prone to erosion and do not maintain soil fertility for more than a few years.

Ahearn said that with information gained from remote sensing, planners can pinpoint areas better suited for the farm plots needed to support relocated families.

Funded by the U.S. Agency for International Development, the project involves a new remote sensing laboratory built with the help of UW-Madison technicians. Located at the Institut Pertanian Bogor (IPB), an Indonesian agricultural university, the lab consists of a series of small computers, an image display system and a video camera.

"Indonesia has a satellite receiving station and it receives signals from the U.S. Landsat satellite," said Kiefer. "They record satellite signals and send the tapes to IPB to be read into the system."

Kiefer, who helped set up the lab at IPB, said once the images are in the system, they can be "stretched" to provide a wider range of hues and colors which can then be interpreted by the computer or human image interpreters.

The different hues of an image indicate different surface features and interpreters can even ferret out specific details such as differences in tree species, the growth stage of crops, sediment runoff and water temperatures.

"You can program the computer to recognize a wide array of land characteristics," Kiefer said. "It can distinguish between forest land, agricultural areas, land that has been cut over or burned, and land prone to soil erosion. And once the computer has analyzed an image it can then tell you how many acres you have in each category."

With this information in hand, Kiefer said Indonesian planners can make wiser use of their resources, including better site selection for the tens of thousands of people moved each year into remote areas of the tropical forests.

WISCONSIN, INDONESIA JOIN IN REMOTE SENSING PROJECT

MADISON--A large third-world country such as Indonesia, spread out as it is over 15,000 islands, cannot even begin to locate and monitor its natural resources using traditional techniques.

But there are signs that contemporary technology, in a form called "remote sensing," is coming to Indonesia's rescue.

Using images from a plane or satellite, remote sensing experts can coax computers into surrendering a wealth of information about its available resources, information including the extent of wetlands, forests and bodies of water; tree species and disease problems; the growth stage of crops; shoreline boundaries, ocean temperatures and depths in the shallow areas; and places of potential soil erosion and sediment runoff.

The technology is now being carried halfway around the world as scientists from Indonesia and the University of Wisconsin-Madison have joined to set up a remote-sensing training program for the island nation.

Indonesian scientist Uup Wiradisastra, in Madison recently to participate in the program, noted that the fast-growing population of his country has put great demands on its natural resources.

"Indonesia has a weak land-use data base and weak data processing methods," he said, "and this results in the loss of resources such as vast forests and valuable topsoil. We need better resource management."

-more-

Add 1--Indonesian sensing

That is where UW-Madison comes into the picture. It is one of the first universities in the nation to offer interdisciplinary advanced degrees in remote sensing and its uses for resource management. It has played a significant role in advancing the technology.

"Our two universities -- IPB (Institute Pertanian Bogor) and UW-Madison -- will exchange personnel," said UW-Madison civil and environmental engineer Ralph Kiefer. "Some of our people already have been in Indonesia, and the first two (of several) Indonesians are now here taking courses, some of which they will go back and teach at home. Soon we hope to be able to establish a graduate program in remote sensing at IPB as well as improve research capabilities there."

Kiefer said remote sensing can be as simple as looking at a photograph taken from an airplane, or it can be so complex as to require a powerful computer to decipher images that the human eye can't see or interpret.

The Indonesian project, funded by the U.S. Agency for International Development, also should benefit UW-Madison researchers by "expanding the horizons" of remote sensing, Kiefer said. He added that new methods being developed as a result of the joint efforts of the two countries could constitute the "next frontier in remote sensing" and may have extensive worldwide applications in the mapping of natural and agricultural resources.

UW-MADISON HOSTS INDONESIAN PROJECT SEMINAR

MADISON--Approximately 200 Indonesian students and their families are attending an education seminar this week at the University of Wisconsin-Madison under the auspices of the Midwest Universities Consortium for International Activities (MUCIA) Indonesian Higher Education Project. The project is administered through UW-Madison's International Studies and Programs department.

The seminar, which will be conducted through Saturday, is being held in conjunction with Indonesian Independence Day, celebrated on Friday (Aug. 17). The event is being coordinated by Jean Taylor, project training advisor, and Julie Schmidt, assistant training advisor.

According to Taylor, the Indonesian students who are attending graduate school in the United States are primarily college instructors and high ranking civil servants who will serve in government positions upon their return to Indonesia. "One former student is now an advisor to the Indonesian minister of environmental affairs," notes Taylor.

During the seminar, a number of students will present papers dealing with topics of study ranging from education administration to urban and regional planning.

"One Indonesian student from the University of Chicago will present a thesis which studies the reentry problems of Indonesians who've studied in the United States. The student has done follow-up to see whether they've been able to adapt what they've learned here to life in Indonesia," says Taylor.

Tours of local industry will be conducted during the seminar.

T. M. Soelaiman, the Indonesian Education and Cultural Affairs attache, will also attend the seminar.

VILLEMONTÉ TO DIRECT INDONESIA ENGINEERING EXCHANGE

MADISON--Prof. James R. Villemonté will head the College of Engineering's consulting program with the Surabaya Institute of Technology in Indonesia next year, the college has announced.

Villemonté, 4209 Bagley Parkway, replaces Prof. Paul M. Berthouex, 533 N. Blackhawk Ave., who has coordinated the project for the past year in the Republic of Indonesia.

University of Wisconsin-Madison's engineering college is providing academic consulting services to the Surabaya Institute of Technology in a program coordinated through Indonesia's director of higher education. Services include the exchange of personnel and advice in curriculum planning and academic procedures. Several Surabaya faculty members also have entered the UW-Madison Graduate School for advanced degrees to upgrade the quality of the Surabaya faculty.

Villemonté, 66, coordinated the college's AID program to the Bengal Engineering College, West Bengal, India, in 1954-58. A member of the civil and environmental engineering department, he earned his degrees from UW-Madison and received an "Outstanding Instructor Award" in 1969. He and his wife, Helen, plan to spend about a year in Indonesia.

Berthouex, 37, has done most of his research in sanitation, waste disposal and water pollution. He received his doctorate from UW-Madison in 1969 and joined the faculty in 1971 after teaching at the State University of Iowa and the University of Connecticut. In 1969-71 he was chief research engineer for the Company for Clean Design and Water Supply Ltd., Mannheim, W. Ger.

INDONESIAN INSTITUTE TO GET EXPERT HELP FROM UW ENGINEERS

MADISON, Wis.--U.S.A.---Two members of the faculty of the Surabaya Institute of Technology, Indonesia, Dr. Oedjoe Djoeriaman (second from left), and Rector Mahmud Zaki (second from right), were at the University of Wisconsin-Madison College of Engineering recently to negotiate a four-year contract for assistance in improving the institute's engineering program.

With them in one of the college's laboratories were Prof. Camden A. Coberly (left), executive director of the college's Engineering Experiment Station, and W. Robert Marshall, dean of the College of Engineering.

If authorized by UW System regents, the college will assume major responsibilities as academic consultant to the Surabaya institute. The college has been a leader among United States schools in foreign engineering education programs for over two decades, these including agreements with India, Mexico, Germany, France, Singapore, and Egypt.

The institute's development plan is designed to ease a great shortage of engineers in Indonesia. The UW-Madison college will provide advice on a building program, development of new curricula, and improvement of teaching methods.

CONFERENCE TO ATTRACT INDONESIAN HISTORY SCHOLARS

MADISON--Modern Indonesian history will be the focus of the third Conference on Indonesian Studies to be held at the University of Wisconsin-Madison Thursday through Saturday (July 17-19).

Twelve scholars, including Dutch historian S.L. van der Wal, will address sessions at the Indonesian House, 12 Langdon st.

The conference is held in conjunction with the summer Indonesian Institute on the campus, and it is open to the public.

Lecture topics include 19th century regional Indonesian history, 17th and 18th century colonial life in Indonesia, opium farms in colonial Java, Javanese mysticism during the revolutionary period, and Dutch reactions to the Indonesian Revolution, 1945-1950.

NEWS BRIEFS FROM THE MADISON CAMPUS

MADISON--The University of Wisconsin-Madison will be host July 26-29 to the first conference in the United States for scholars interested in Indonesian history, politics, economics, anthropology, linguistics, and musicology.

Sponsored by the UW department of East Asian languages and literature, the conference will draw approximately 80 leading American and Indonesian scholars to meetings in Lowell Hall. Special topics to be discussed include the state of Indonesian studies and the problems of Indonesian cities.

Among noted speakers will be Dr. Nathan Keyfitz of Harvard University, and Mochtar Lubis, Indonesian journalist and novelist.

UW experts taking part are Profs. A.J. Little, East Asian Studies; Donald K. Emmerson, political science; Max Carbon, engineering; and J. Howard Westing, business.

An Indonesian dinner, followed by traditional dances of the islands, is scheduled for July 28 in the Center. All interested persons may attend this event, and all meetings.

Further information may be obtained by calling Jean Taylor at 263-3711.

NEWS BRIEFS FROM THE MADISON CAMPUS

MADISON--The Madison campus of the University of Wisconsin is cooperating with the Wisconsin Coalition for Balance Transportation in observance of Balanced Transportation Week Sept. 16-22.

"This is a concern of all citizens, and we are pleased to participate in the program," Chancellor Edwin Young stated.

The week was set up to promote public awareness of the impact various transportation systems have on society and the environment.

On Un-Car Day, Wednesday, Sept. 19, persons who normally drive private automobiles to reach the campus are urged to find alternate means of transportation such as walking, bicycling, car pooling, or riding the bus. Riders may transfer free from Madison Metro buses to the University bus system.

- o -

MADISON--J. Fred Weaver, professor of curriculum and instruction, University of Wisconsin-Madison School of Education, is the new editor of The Journal for Research in Mathematics Instruction.

- o -

MADISON--David A. Kay, professor of political science, has been appointed chairman of the Contemporary Trends Course Committee in the College of Letter and Sciences at the University of Wisconsin-Madison.

Contemporary Trends is a broad interdisciplinary course for second semester seniors. The topic for the 1973-74 course is "Post-Industrial Society" and lectures will center on the energy crisis, ecology, and the future of the cities.

MADISON--Eight Indonesian University faculty members are on the Madison campus of the University of Wisconsin with one goal--to write two books.

They are participating as a team in the Indonesian University Level Text-book Project during the current academic year.

According to Philip G. Altbach, associate professor of educational policy studies at Wisconsin, coordinator of the project:

"Indonesia is chronically short of indigenously-produced books of all kinds. This project is intended to fill a gap in a small way by assisting in the production of textbooks concerning Indonesian society and social structure aimed at college-level students. The books will be written in Indonesian by our guests.

"Wisconsin was selected as the site for the project because of its close ties with Indonesia, appropriate library holdings, and professional expertise, both in the Southeast Asian area and in curriculum."

The School of Education here is hosting the delegation. The project, supported by the U.S. Department of State, was initiated by the Indonesian National Academy of Sciences.

- o -

MADISON--A new student organization at the University of Wisconsin-Madison, Students for Crops, will hold a fund drive to help those people in the sub-Sahara and in Nigeria who are starving due to the recent drought there.

Students for Crops, an arm of the Church World Service, will hold its drive Sept. 15-23. In addition to booths at both student unions and dormitories, the organization will sell peanuts at the Wisconsin-Purdue football game Saturday.

The group hopes to raise \$1,000 according to co-chairmen Lee M. Swan, professor of agricultural and extension education, and Jim DeVries, a Bainbridge, N.Y. graduate student.

ATTENTION: WOMEN'S EDITORS

MADISON--Mrs. Kay Hawkins (3525 Topping Rd.), Madison, has returned from Indonesia where she was guest of honor at special ceremonies honoring her late husband, Prof. Everett Day Hawkins of the University of Wisconsin-Madison economics faculty.

Prof. Hawkins was for more than 20 years a key figure in promoting economics education in Southeast Asia, especially at Gadjah Mada University in Jogjakarta, Central Java. Gadjah Mada was therefore the setting for the ceremony when Mrs. Hawkins presented the first five Hawkins scholarships to Indonesian students. Friends, former students, and colleagues contributed to the fund from which annual scholarships will be awarded.

At the presentation, Dean Sukadji Ranuwihardjo said:

"For many Indonesians at Gadjah Mada University, the University of Indonesia in Djakarta, the National Socio-Economics Institute, the National Planning Board, Andalus University and Sjah Kuala University in Sumatra, and many others, Prof. Hawkins left a long-lasting example of hard work and devotion. Associated with Gadjah Mada University since 1955, he was the first faculty member to promote activities in research.

"He went into the field and knocked on many doors to guide the students in collecting data on the batik industry. Since that time there has been in Jogjakarta an Institute of Economic Research. Under his supervision and cooperation the Faculty of Economics produced the first Ph.D. His sudden death in August, 1970, was a great shock to many Indonesians. They lost someone who was dear and near to them."

Add one--Hawkins scholarships at Gadjah Mada

Mrs. Hawkins visited many former Hawkins students and colleagues on her way to Indonesia. In Honolulu she met Dr. Seiji Naya, professor of economics at the University of Hawaii, a recent graduate; in Manila, many students at the University of the Philippines; in Bangkok, officials at the National Institute of Development and Administration.

In Singapore she visited with Dr. Willard Hanna, director of the Singapore Center, and with Dr. Peter You, director of the Economics Center at the University. Back in the U.S.A., Mrs. Hawkins saw Dean and Mrs. James Earley, formerly of the Madison campus. Dean Earley is now at the University of California-Riverside.

Before her marriage Mrs. Hawkins was a member of the Canadian Foreign Service, stationed in Geneva as confidential secretary to the permanent Canadian delegate to the League of Nations. In 1940 she was transferred to Wellington, New Zealand, where she helped to set up the first diplomatic exchange between Canada and New Zealand, and where she served as high commissioner for six months. On her return to Ottawa she was invited to be public relations officer for the National Film Board, a post she held until her marriage.

She is now a specialist in the UW Office of International Studies and Programs.

A member of the Madison Art Guild, Mrs. Hawkins has exhibited her paintings in Indonesia and the eastern United States. She holds the M.A. degree in modern French literature from Mount Holyoke College.

3/8/71 ca

MADISON--Dr. Robert L. Clodius will resign as vice president of the University of Wisconsin March 10 to accept a unique professorship offered by the Madison campus and the administration of a university-building project in Indonesia.

On the recommendation of UW-Madison Chancellor Edwin Young, and by votes of the University Committee of the faculty and the Board of Regents, Dr. Clodius will carry the title of University Professor, the only such position on the campus not oriented to a department. He will continue as professor of agricultural economics, a position he has held during his vice presidency, and in addition he has been offered a professorship in economics in the College of Letters and Science.

He was named project administrator of the Midwest Universities Consortium for International Activities (MUCIA) Higher Agricultural Education in Indonesia in an announcement by its Board of Directors issued Monday at East Lansing, Mich.

MUCIA, representing the universities of Wisconsin, Illinois, Minnesota, Indiana, and Michigan State, provides technical assistance, developmental research, and institution-building abroad. The Indonesian project, which Dr. Clodius will administer, operates under the U.S. Agency for International Development and the Indonesian Konsorsium of Agricultural Faculties to develop a system of Indonesian universities based on agricultural instruction and development.

Dr. Clodius said he is leaving the number two position in UW administration which he has held since 1964 "with real anticipation for return to teaching, research, and program-building in the University."

He added that he will direct the Indonesian projects from a base on the Madison campus and has no plans for moving from Madison.

Add one--Clodius

University regents are expected to approve his change of status and new professorships at their March 12 meeting. In January, on the completion of his three-month service as acting president of the University between the administrations of Fred Harvey Harrington and John C. Weaver, the regents adopted a resolution praising him highly and expressing their "gratitude and the gratitude of the University and the State for this special service which reflected in full measure the wise and productive style in which he has handled every responsibility assigned him in his 20 years at Wisconsin."

In those years he rose from assistant professor in agricultural economics through the tenured ranks, through department chairmanship, deanship, vice presidency, and the acting presidency.

Pres. Weaver said "Bob has assured me that I can continue to rely on his counsel, and I am grateful for that. He has served the administration of this University long and well and, since he wishes it, deserves an opportunity to move into new challenges."

The primary focus of the Indonesian project he will head is on two "Pembina" institutions: Institute Pertanian Borogoriense and the Agrocomplex of Gadjah Mada University. Ultimately, Ph.D. programs will be developed at these institutions to provide trained personnel needed to staff the universities, private industry, and top-level government positions.

Dr. Clodius succeeds Dr. Ira L. Baldwin, also a UW vice president before he moved into new areas, who has headed the program since its inception two years ago. Dr. Baldwin is retiring.

Dr. Clodius was 43 when he was named vice president of the University in May, 1964. Two years before, he was appointed vice president-academic affairs, assuming that office when Dr. Harrington, who had held that position, became the UW's 14th president.

Add two--Clodius

Chairman of the department of agricultural economics at the time of his appointment to vice presidency, Dr. Clodius had served for several years as associate dean of the Graduate School. He came to Wisconsin in 1950 as an assistant professor, was named an associate professor in 1953, and a full professor in 1958.

During his tenure at Wisconsin, he has compiled an enviable record as a teacher, researcher, and scholar.

In 1962, when the late president of the University, C.A. Elvehjem, nominated him for the vice presidency, he said:

"Perhaps the greatest impact of Dr. Clodius's work at Wisconsin has been felt in the stimulation and development of worthwhile new programs."

Dr. Clodius has served as consultant to the Rockefeller Foundation, advisor to the University of East Africa, and a member of the Committee on Agricultural Sciences reporting to the secretary of agriculture. He has also served as lecturer for the American Council on Education, Institute for College and University Administrators, and the State Department as a specialist in South America. He was chairman of the Committee on Inter-Institutional Cooperation in 1968.

He is vice chairman of the Executive Board of the Commission on Colleges and Universities, North Central Association, served as the chairman of the Board of Directors of MUCIA, and works with the Center for Research Libraries as chairman of the board.

Dr. Clodius' memberships include American Economics Association, Econometrics Society, American Agricultural Economics Association, American Association of University Professors, Phi Beta Kappa, Alpha Zeta, and Phi Kappa Phi.

Whitman College in Walla Walla, Wash., honored Dr. Clodius with an honorary doctor of laws degree in 1970.

A prolific writer, Dr. Clodius has contributed widely to numerous journals, bulletins, and other publications in the areas of inflation, marketing, price and economic fluctuations, the dairy industry, economic development, rural business

Add three-Clodius

problems, and economics. He served as editor of the Journal of Farm Economics in 1958-59.

Active in a variety of faculty matters, he is a past president of the Wisconsin chapter of the American Association of University Professors, and a former vice president of the American Agricultural Economics Association.

Dr. Clodius was one of the first recipients of the coveted Kiekhofers Memorial Teaching Awards in 1953. At that time, and on occasions since, students and fellow faculty members characterized him as coupling "a vibrant enthusiasm for teaching with an incisive insight into economic problems."

Born March 10, 1921, and raised on a dry-land wheat farm near Walla Walla, Wash., he first worked as a field chore boy, then as a tractor driver and machine operator of a combine harvester. He attended Whitman College in Walla Walla for two years before transferring to the University of California. He was graduated with highest honors in 1942, and elected to Phi Beta Kappa.

Dr. Clodius spent four years as a torpedo and ordnance officer in the 7th Fleet, U. S. Navy, during World War II, serving on a destroyer, on the service command staff, and later on the fleet commander's staff. He received the Commendation Medal for distinguished performance in ordnance logistics decisions in the Pacific Theater.

Upon military discharge, he returned to the University of California and received his Ph.D. in 1950. His field of concentration was price analysis, with other interests concerned with economic theory, research methods, statistics, and agricultural policy.

Dr. and Mrs. Clodius have two children, Catherine and Mark. Their home is at 3435 Edgehill Parkway in suburban Shorewood Hills.

MADISON--The University of Wisconsin-Madison has been granted \$270,000 by the Ford Foundation to continue its long-time cooperation in economics education with universities in Indonesia.

The sum will be used to strengthen the economics departments of the University of Indonesia and Gadjah Mada University, Jogjakarta.

Wisconsin has been engaged in a project to expand the department at Gadjah Mada University since 1957, when economist Edwin Young, now Madison chancellor, headed the program. Additional grants by the foundation have expanded the project to include the University of Indonesia and Nommensen University.

MADISON--A memorial service for Everett Day Hawkins, University of Wisconsin professor of economics, will be held next week at the First Unitarian Meeting House, 900 University Bay Drive, at 4:30 p.m. Thursday, Sept. 24.

The 64-year-old specialist in foreign labor movements and economic development policies died suddenly Aug. 31, while vacationing in Massachusetts.

Popular with both students and educators, "Red" Hawkins was especially acquainted with the problems and peoples of Southeast Asia, but had served also as leader and consultant for economic development programs in many other areas of the East.

In keeping with his concern for people beyond American borders, the Everett D. Hawkins Memorial Fellowship Fund has been established to aid needy foreign students on the Madison campus.

"With the cost of education for foreign students at \$3,000--\$4,000 per year, it is hoped that we can find the resources to make the memorial lasting and sufficient," colleagues of Prof. Hawkins said.

Contributions to the memorial fund may be sent to Martin David, 6448 Social Science Building, University of Wisconsin, Madison, and should be made by check payable to the Everett D. Hawkins Memorial Fellowship Fund.

(FOREIGN DESK?)

RACINE, Wis.--A cautiously optimistic report on Indonesia's progress during the first year of its five-year plan, and hopeful views of its long-range economic development and future political peace were given here by top Indonesian officials and educators.

The occasion was a three-day Wingspread conference last weekend on Indonesia's plans and prospects which brought together a hundred American business leaders, educators, and students to hear Indonesian experts and leaders.

Among the Indonesians who spoke were Dr. Sumitro Djojohadikusumo, minister of trade; Dr. Soedjatmoko, ambassador to the United States; Dr. Suhadi Mangkusuwondo, dean of economics, University of Indonesia; Dr. Sukadji Ranuwihardjo, dean of economics, Gadjah Mada University; and Dr. Busono, secretary of the Agricultural Consortium, Ministry of Education.

Among the American experts on Indonesia who spoke were Stokes Tolbert, chief of the Indonesia division, International Bank for Reconstruction and Development; Edward Masters, country director for Indonesia, State Department; Prof. Daniel S. Lev, University of California; Prof. Everett D. Hawkins, University of Wisconsin.

The meeting was sponsored by the University of Wisconsin in cooperation with the Asia Society and the Johnson Foundation.

- more -

Add one--Indonesia conference

Ambassador Soedjatmoko set the mood of the conference in his opening remarks, and gave the business leaders present some advice on investments in Indonesia.

While Indonesia welcomes private foreign investments, he said, and it is the government intention to protect their future, the foreign investor can best insure his investments in Indonesia by involving Indonesians as partners in business, using Indonesian employes, and considering the developmental goals of Indonesia in business planning, even if this initially increases expenses.

In answers to questions on the political stability of Indonesia, the ambassador said his nation "currently is groping toward a modern political system, moving from religio-cultural alignments in the parties, to alignments based on economics and social development issues."

He acknowledged the groupings which Prof. Lev called "functional," --peasants, labor, youth, the army, etc.,--but said he felt that future political parties would cross these alignments. He said that the army leadership, for example, no longer is drawn exclusively from the elite, but that the "sons of the peasants and the workers see military life as a step toward upward mobility."

The Indonesian minister of trade, Dr. Sumitro, warned that long-range future planning must accommodate a number of unusual problems, notably the geography of the island nation which places a great demand upon transportation and communications, and on population distribution. He reported that Indonesia's population is expected to double by the year 2000, and that the distribution of this increase throughout the islands would depend to a great extent on how well the benefits of development could be distributed.

Dean Suhadi of the University of Indonesia, presenting a paper on the first year of the Indonesian development plan, recounted his nation's economic problems of the past, and indicated that "it feels good to be able, for once, to tell a success story about the Indonesian economy."

Add two--Indonesia conference

He said that the base for the five-year plan was laid in the three previous years of work which, for the first time after almost 30 years, restored the nation's economic stability.

He felt the present plan, covering the years 1969-70 through 1973-74, has a chance for success because of:

1. Economic conditions, notably price stability;
2. Firm government control over prices, revenues, expenditures, the volume of money and bank credits; and
3. The open government commitment to economic rehabilitation and development.

And, even more hopeful, he said, "the public seems to share the government's desire to put economic development highest in the national priority scale."

In the first year of the plan, he reported, inflation continued to slow, the revenue side of the government budget was 2.2 per cent above target, the government's development expenditures were 70 per cent above the previous year, exports increased 15 per cent.

"Nevertheless," he added, "it is a little bit disconcerting that while the focus of the plan is on agriculture, particularly rice production, the notable achievements so far have occurred in areas outside rice production."

On the whole, however, he said, the performance of the plan during the first year was successful. "Even if production in general has not yet shown a sizeable increase, it is felt that a great deal of activity is going on and significant investment being done in manufacturing, transportation, social overhead capital, agriculture, and tourism.

"Allowing some gestation period, all these investments should bear fruit in the near future."

MADISON--The University of Wisconsin in cooperation with the Johnson Foundation and the Asia Society is sponsoring a conference on "Indonesia: Plans and Prospects" at Wingspread, Racine, July 30-Aug. 1.

Indonesian and U.S. government and university representatives will meet with U.S. business and industrial leaders to discuss economic policy, international finance, education, and politics.

Dr. Edwin Young, Madison chancellor who was instrumental in launching the long-standing cooperation between Wisconsin and Indonesian universities, will be present to define the conference purpose.

Key speaker Thursday evening is Dr. Soedjatmoko, ambassador from Indonesia to the United States, who will discuss "Problems and Prospects for Development in Indonesia."

Friday speakers and topics are: 9 a.m., Prof. Daniel S. Lev, University of California, "Parties, Functional Groups and Elections"; 10:45 a.m., Dr. Suhadi Mangkusuwondo, dean of the School of Economics, University of Indonesia, "Economic Policy and the Five Year Plan";

At 2 p.m., Stokes Tolbert, chief of the Indonesia division, International Bank for Reconstruction and Development, "International Finance and Foreign Investment", and 7:30 p.m., Edward Masters, country director for Indonesia, U.S. Department of State, "American Relations with Indonesia."

Add one--conference on Indonesia

The Saturday speakers: 9 a.m., Dr. Sumitro Djojohadikusumo, Indonesian minister of trade, "The Importance of Foreign Trade in Indonesian Development"; 10:45 a.m., Dr. Sukadji Ranuwihardjo, dean of economics, Gadjah Mada University, "Indonesian Industry";

Dr. Didi Soesetiadi, associate rector, Bogor Agricultural University, "Education and Agricultural Development"; Dr. Busono, secretary of the Agricultural Consortium, summary; and 1:30 p.m., Prof. Everett D. Hawkins, UW economics department, "Prospects in Indonesia."

Since 1957 Wisconsin has helped expand the economics department at Gadjah Mada, Jogjakarta, undertaken under the director of Dr. Young, then a member of the UW economics department and director of the Industrial Relations Research Center.

In 1963 Wisconsin joined with Harvard and the University of California-Berkeley to form a consortium with Gadjah Mada, the University of Indonesia at Djakarta, and Nommensen University at Medan, North Sumatra, to expand assistance in economics education.

The program is administered by Wisconsin, which next month sends Prof. David E. Schrieber of the School of Commerce to Indonesia for two years to continue the program supported by the Ford Foundation.

CONFERENCE INFORMATION

The Johnson Foundation is pleased to welcome you to the conference to be held at Wingspread, 33 East Four Mile Road, Racine, Wisconsin, convening at 6:00 p.m. on Thursday, July 30, and adjourning at 3:00 p.m. on Saturday, August 1.

HOUSING: If you require overnight lodging, please indicate on the enclosed green form, and you will be pre-registered at the Racine Motor Inn, 535 Main Street, Racine, Wisconsin (414-633-3551). We would appreciate having this information returned to us by July 23.

Conference Information (Continued)

TRANSPORTATION: If you arrive at Mitchell Field, Milwaukee, a Foundation driver will meet you at the airline desk and bring you either to the Racine Motor Inn, or directly to Wingspread, depending upon the time of your arrival. If the driver does not contact you there, please call the Foundation collect (1-639-3211).

IT IS ADVISABLE TO CONFIRM YOUR RETURN FLIGHT UPON ARRIVAL AT THE AIRPORT. Flight changes are the responsibility of participants.

LOCAL TRANSPORTATION: A bus will be provided between the Racine Motor Inn and Wingspread during the conference. Transportation will also be provided to points of departure at the close of the conference.

MEALS: Breakfast will be available at the Racine Motor Inn. Luncheon and dinner will be served at Wingspread.

RECREATION: An outdoor swimming pool is available at Wingspread for use during the leisure period of the conference. A putting green, nature trail walks, bicycling and other forms of recreation are also on the Foundation grounds.

LUGGAGE: In order to facilitate departure and avoid delay, please bring your luggage with you to Wingspread on the day of departure.

If you have any questions concerning the conference, please write or telephone Mrs. Jayne Mason, Program Assistant at the Foundation, (414-639-3211).

THE JOHNSON FOUNDATION
RACINE, WISCONSIN 53401

July 15, 1970

We were pleased to learn that you will attend the July 30-August 1 Wingspread conference, "Indonesia: Plans and Prospects."

Enclosed are: (1) a draft of the program to date; (2) a conference information sheet; and (3) a map indicating convenient driving routes to Wingspread.

We are looking forward to joining you in what promises to be an outstanding conference.

Sincerely,

RELEASE: July 17, 1970

RACINE (WIS.) CONFERENCE TO HEAR INDONESIAN AMBASSADOR

The Indonesian Ambassador to the United States, Dr. Soedjatmoko, will be the principal speaker at a July 30-August 1 conference on "Indonesia--Plans and Prospects," at Wingspread, the conference center of The Johnson Foundation in Racine, Wisconsin.

The conference, sponsored by the University of Wisconsin, in cooperation with The Asia Society and The Johnson Foundation, will bring together Indonesian and U.S. government and university representatives with business and industrial leaders of Wisconsin and Illinois for a bilateral examination and discussion of the plans and prospects for Indonesia in the fields of economic policy, international finance, education and politics.

-more-

The University of Wisconsin has been associated with the University of California and Harvard University in this country and the University of Indonesia, Gadjah Mada University, and Nommensen University in Indonesia in an informal consortium financed by the Ford Foundation to continue the development of Indonesian economists.

Other conference speakers will include: Dr. Suhadi Mangkusuwondo, Dean, School of Economics, University of Indonesia; Dr. Sukadji Ranuwihardjo, Dean of Economics, Gadjah Mada University; Dr. Didi Soesetiadi, Associate Rector, Bogor Agricultural University; Stokes ^{Tolbert} Tolbert, Chief, Indonesia Division, International Bank for Reconstruction and Development; Edward Masters, Country Director for Indonesia, Department of State; Professor Everett Hawkins, Department of Economics, University of Wisconsin.

On behalf of the University of Wisconsin, in cooperation with the Johnson Foundation and the Asia Society, I am privileged to invite you to attend a conference on "Indonesia: Plans and Prospects," July 30-August 1, at Wingspread, the Conference Center of the Johnson Foundation in Racine, Wisconsin.

The conference will open with dinner on Thursday, July 30, and an address by Dr. Soedjatmoko, the Indonesian Ambassador to the United States.

Sessions on Friday, July 31, from 9 A.M.-9 P.M., will include presentations by: Dean Suhadi of the University of Indonesia; Stokes Talbot of the World Bank; and Edward F. Masters, Country Director for Indonesia, Department of State.

Saturday sessions, from 9 A.M.-3 P.M., will include presentations by: Dr. Sumitro Djojohadikusumo, Minister of Trade (invited), and Dean Sukadji of Gadjah Mada University. Other speakers have been invited from the University of California, Harvard University, and the Ford Foundation.

We are inviting you and other business and industrial leaders of Wisconsin and Illinois who have an interest in Southeast Asia in general and Indonesia in particular to join us in this bilateral examination and discussion of the plans and prospects for Indonesia in the fields of economic policy, international finance, education and politics.

The University of Wisconsin has been associated with the University of California and Harvard University in this country and the University of Indonesia, Gadjah Mada University, and Nommensen University in Indonesia in an informal consortium financed by the Ford Foundation to continue the development of Indonesian economists.

We sincerely hope that you will join us for the entire conference. If this is not possible, you are welcome to attend

MADISON--Representatives from Harvard University, the University of California-Berkeley, and the University of Wisconsin will meet on the UW Madison campus Tuesday to discuss the Consortium of U.S. and Indonesian Universities.

Involved in the consortium, established in 1963, are the Indonesian universities of Gadjah^{Mada}/at Jogjakarta, University of Indonesia at Djakarta, and Nommensen University at Medan, North Sumatra.

The U.S. representatives, who meet every six months, will spend the day discussing the financial report, scholarship program, Indonesian research project, resident consultant, and renewal of the supporting grant from the Ford Foundation.

Attending for Wisconsin, which administers the program, will be Dr. Edwin Young, Madison chancellor; Prof. Everett Hawkins, economics; and Mrs. Elizabeth Tarkow, project supervisor.

Since 1957 Wisconsin has been engaged in a project to expand the economics department at Gadjah Mada University. Dr. Young, then a member of the economics department and director of the Industrial Relations Research Center, was instrumental in setting up this program. The cooperation with the other universities has been undertaken since.

From The University of Wisconsin News and Publications Service, Bascom Hall, Madison 53706 • Telephone: (608) 262-3571

Release: Immediately

9/20/66 mcg

MADISON, Wis.--The department of economics at the University of Wisconsin in Madison is paying special attention this fall to two graduate students from the Philippines.

Gonzalo M. Jurado and Delano P. Villanueva, both of Manila, are the first students sent to the campus by the University of the Philippines under the University of the Philippines-University of Wisconsin project in development economics. Jurado has a fellowship and Villanueva a research assistantship under the year-old program, which has a three-year grant from the Ford Foundation.

First results of the cooperation became evident last May when 29 Philippine government officials completed the first six-month training program in development economics and began putting into practice the Wisconsin principles they had learned.

This year UW economics Prof. Robert Lampman is visiting professor at the University of the Philippines for the project. Among his Wisconsin colleagues who have taken an active part thus far are Profs. Everett D. Hawkins, Allen C. Kelley, and James S. Earley.

Immediately

MADISON, Wis.--The University of Wisconsin has been allocated \$461,000 by the Ford Foundation to help develop the School of Economics at the University of the Philippines.

The grant, to cover a three-year period, will enable the University of Wisconsin to provide foreign advisory personnel and consultants; administrative support; Ph.D. fellowships, postdoctoral, and other study abroad; books and equipment to the university in Quezon City.

Another \$75,000 was granted directly to the University of the Philippines to support local research and training programs in the economics area.

"The purpose of the project is to strengthen the school's research and in-service training of economic planners and program development officers in the Philippine government," Prof. H. Edwin Young, dean of the Wisconsin College of Letters and Science, explained.

"This also is a continuation of a long harmonious relationship between the two universities. Wisconsin has had many distinguished alumni who came to Madison from the Philippines."

The grant was made in response to a request to the foundation from Enrique T. Virata, acting president of the University of the Philippines. An agreement will be negotiated between the two universities regarding the administration of the program.

Formal acceptance of the grant is expected when the Wisconsin Board of Regents meets in Madison Aug. 20.

Add one--Philippines grant

Wisconsin Economics Prof. Everett D. Hawkins, an active participant in the project, said:

"Asst. Prof. Allen C. Kelley of our department is already at the University of the Philippines to assist in the planning of the training program and to gather data which he and others of the Wisconsin faculty will use in their research programs and those of their students.

"Several economists from here and other institutions have agreed to join the project or are considering association with it. Prof. James S. Earley, of our department, will lecture in the fall term at Quezon City.

"The University of Wisconsin has a number of scholars who have had teaching-research and/or advisory experience in Southeast Asia, including, P. T. Ellsworth, Theodore Morgan, Hans O. Schmitt, John Smail, Fred Von der Mehden, Dean Young, and myself.

"It is hoped that this association will enrich the program of studies sponsored by the East Asia Committee of the University of Wisconsin and research in the field of economic development. Wisconsin, under the direction of Theodore Morgan, already has a three-year contract with the Agency for International Development to study "Economic Interdependence in Southeast Asia."

RELEASE:

Immediately

MADISON, Wis.--The University of Wisconsin is currently the recipient of 17 different grants from the Ford Foundation totaling over \$6.3 million.

In its annual report, the foundation listed the various projects, ranging from the University's Biotron to graduate and faculty fellowships to projects in Indonesia.

The foundation provided \$1.7 toward construction of the Biotron, a new research structure designed for studies of living organisms in a full range of controlled environmental conditions. Construction began on the Biotron, located on Observatory Drive in Madison, late last fall. It is expected to be completed in 20 months.

Another \$1.5 million was allocated for specific research and advanced training in population studies.

In listing a \$260,000 grant for the Wisconsin Law School, the foundation stated that the UW is one of the few schools in the world with a tradition of scholarly attention to police and correctional phases of the law. The grant is being used to expand research and training on relations between the law, lawyers, and criminal law enforcement agencies.

A recent grant brought \$820,000 for the establishment at Madison of a research center on vocational education, the five-year program to employ resources of all University divisions to analyze the state of occupational training and to work on such problems as teacher preparation and curriculum development.

-more-

*International Program
Studies -
Indonesia*

Add one--Ford Foundation Report

The other projects involving the University of Wisconsin include:

A cooperative program in economics between American and Indonesian universities, \$155,000, and for cooperative work with the Gadjah Mada University faculty of economics in Indonesia;

A \$250,000 allocation for research and evaluation of urban community development projects, and to train urban affairs specialists; with the department of zoology, to produce new knowledge and provide training areas for future personnel in this field;

A grant of \$3.5 million, with four universities sharing, to carry on the Midwest Universities Consortium for International Activities, to expand and improve the members' international teaching, research, and service roles;

In the area of economic development and administration, \$134,000, for research on computer simulation of the national economy; and \$90,000 for a study on the use of the nation's manpower, this in the area of development of human resources.

For UW science education in Arab countries, \$141,000; graduate training in atmospheric science and oceanography, \$16,030; forgivable loans to doctoral engineering students committed to teaching careers, \$51,644; for scholarly publications in the humanities and social sciences, \$20,000;

For fellowships in economics and business studies, \$39,847; plus grants for faculty fellowships in business, economics, government, and psychology, and for doctoral candidates in economics.

Established in 1936, the Ford Foundation is a private, non-profit institution which has made total grants of \$2.2 billion to 5,261 institutions and organizations. It seeks to strengthen American society by identifying problems of national importance and underwriting efforts toward their solution.

RELEASE:

AM's of Monday, Feb. 17

MADISON, Wis.--(Advance for AM's of Monday, Feb. 17)--The University of Wisconsin has been voted \$100,000 by the Ford Foundation to continue the fruitful cooperation of UW economists with the Gadjah Mada University faculty of economics in Indonesia which has prevailed for several years.

In addition, Wisconsin will share a \$155,000 foundation grant with the University of California at Berkeley and Harvard University, to provide limited transitional assistance to faculties of economics at the University of Indonesia, Gadjah Mada University, and Nommensen University, following conclusion of the general program of support.

Since 1957, when Dr. H. Edwin Young, noted economist who is now dean of letters and science, and Prof. L. Reed Tripp of economics, arranged for the collaboration, UW economists have been stationed in Jogjakarta at the University to advise on expansion of economics study. Prof. Tripp spent two years there. Others who have taken part include Prof. Theodore Morgan, economics, and Profs. Harold G. Fraine and Edward E. Werner, commerce.

WIRE NEWS

FROM THE UNIVERSITY OF WISCONSIN NEWS SERVICE, MADISON 6, WISCONSIN

12/30/63 mcg

RELEASE:

Immediately

MADISON, Wis.--The University of Wisconsin is one of four midwest universities granted a total of \$3.5 million in a five-year grant by the Ford Foundation to form a Consortium for International Activities, Inc.

The grant, announced Monday, is expected to increase enormously the activities abroad of Wisconsin, the University of Illinois, Indiana University, and Michigan State University.

The Consortium will make it possible for member universities to render more effective technical assistance abroad; increase knowledge about significant problems in less developed areas related to economic and social developments and about the strategy of cross-cultural education; enrich campus academic programs related to various fields of international affairs; receive, hold, and administer gifts for the development of international educational activities; and enter into contracts for overseas operations.

The Consortium will maintain a roster of technically trained persons qualified for overseas projects, assist in training staff for such service, develop overseas research centers in connection with overseas projects conducted by member universities, provide graduate internships and research grants for work at overseas centers, and provide means for exploration and development of plans for overseas projects.

-more-

Add one--consortium

"All of us at Wisconsin are delighted to have this opportunity to work together. We are especially pleased at the prospect of joining with the Ford Foundation in a pioneer effort to make the internationally-oriented career more attractive to able academic people. If we can do that, we will be rendering a real service," UW Pres. Fred Harvey Harrington said of the project.

The foundation earlier granted Wisconsin \$1,200,000 to support on-campus area and language programs on Latin America, India, Russia, Africa, and the Far East; and more than \$1.5 million to establish a faculty of economics at Gadjah Mada University, Indonesia.

A continuing grant to Wisconsin from the U.S. State Department supports a chair in economics at the University of Rio Grande de Sul, Porto Alegre, Brazil. Funds from the Agency for International Development have enabled Wisconsin to carry on an intensive study of agrarian structure and land ownership and land tenure in Latin America, and have established an International Cooperative Training Center on the campus.

With the support of the Carnegie Corporation, Wisconsin has established three Junior-Year-Abroad programs, in France, Mexico, and India, and is negotiating for a fourth in Germany. Peace Corps groups have been trained on both Madison and Milwaukee campuses.

According to campus specialists, these international studies and programs will be multiplied and greatly enriched through collaboration with Illinois, Indiana, and Michigan State.

MADISON, Wis.--An Indonesian student of economics pursuing studies in the United States under sponsorship of the University of Wisconsin and Gadjia Mada University, Indonesia, has been voted outstanding foreign student at the University of Colorado.

He is Soedar Sono, now living in Madison at 509 N. Henry St., whose parents live in Soso, Indonesia. As the result of the award made to him at Boulder, he was interviewed by the Voice of America for broadcast in his own country.

Sono earned his bachelor's degree at Gadjia Mada in the economics department. Since 1959 the institution has been assisted in expanding by faculty members from the University of Wisconsin and support from the Ford Foundation.

On completing summer session at Boulder and acquiring his master's degree there, he came to Madison to take special work at the University before returning home Sept. 1.

Mrs. Elizabeth Tarkow, 4116 Paunack Ave., is campus coordinator for the project which annually sends UW personnel to teach at Gadjia Mada and brings Indonesian students to study at U.S. universities.

Indonesia*

FROM THE UNIVERSITY OF WISCONSIN NEWS SERVICE, MADISON 6, WISCONSIN

9/15/61 mcg

RELEASE:

Immediately

MADISON, Wis.--University of Wisconsin regents Friday accepted \$550,000 from the Ford Foundation, New York, to continue support of the program to assist the faculty of economics at Gadjah Mada University, Jogjakarta, Indonesia.

Of the total amount, \$140,000 is earmarked to defray some of the costs for the next seven years of supporting an additional tenure staff member to be added to the UW department of economics for continuity of the cooperation.

Wisconsin began the project with Ford Foundation support in the summer of 1957 when economics Profs. Edwin Young and L. R. Tripp went to Jojakarta to plan the project. Since that time Wisconsin has continued to administer and staff the project with UW economics and commerce faculty members and experts from other U.S. colleges and universities.

UW Profs. Tripp and Theodore Morgan of economics and Harold Fraine of commerce have lived in Indonesia for one or two-year periods. At present commerce Prof. Edward Werner is on duty there.

DR. MOHAMMAD HATTA

Dr. Mohammad Hatta was born August 12, 1902, in Bukittingi, Central Sumatra. His father was one of the region's outstanding Muslim teachers. Dr. Hatta's secondary education was acquired in Bukittingi and nearby Padang. In 1921 he left for the Netherlands and enrolled in the Commercial College of Rotterdam.

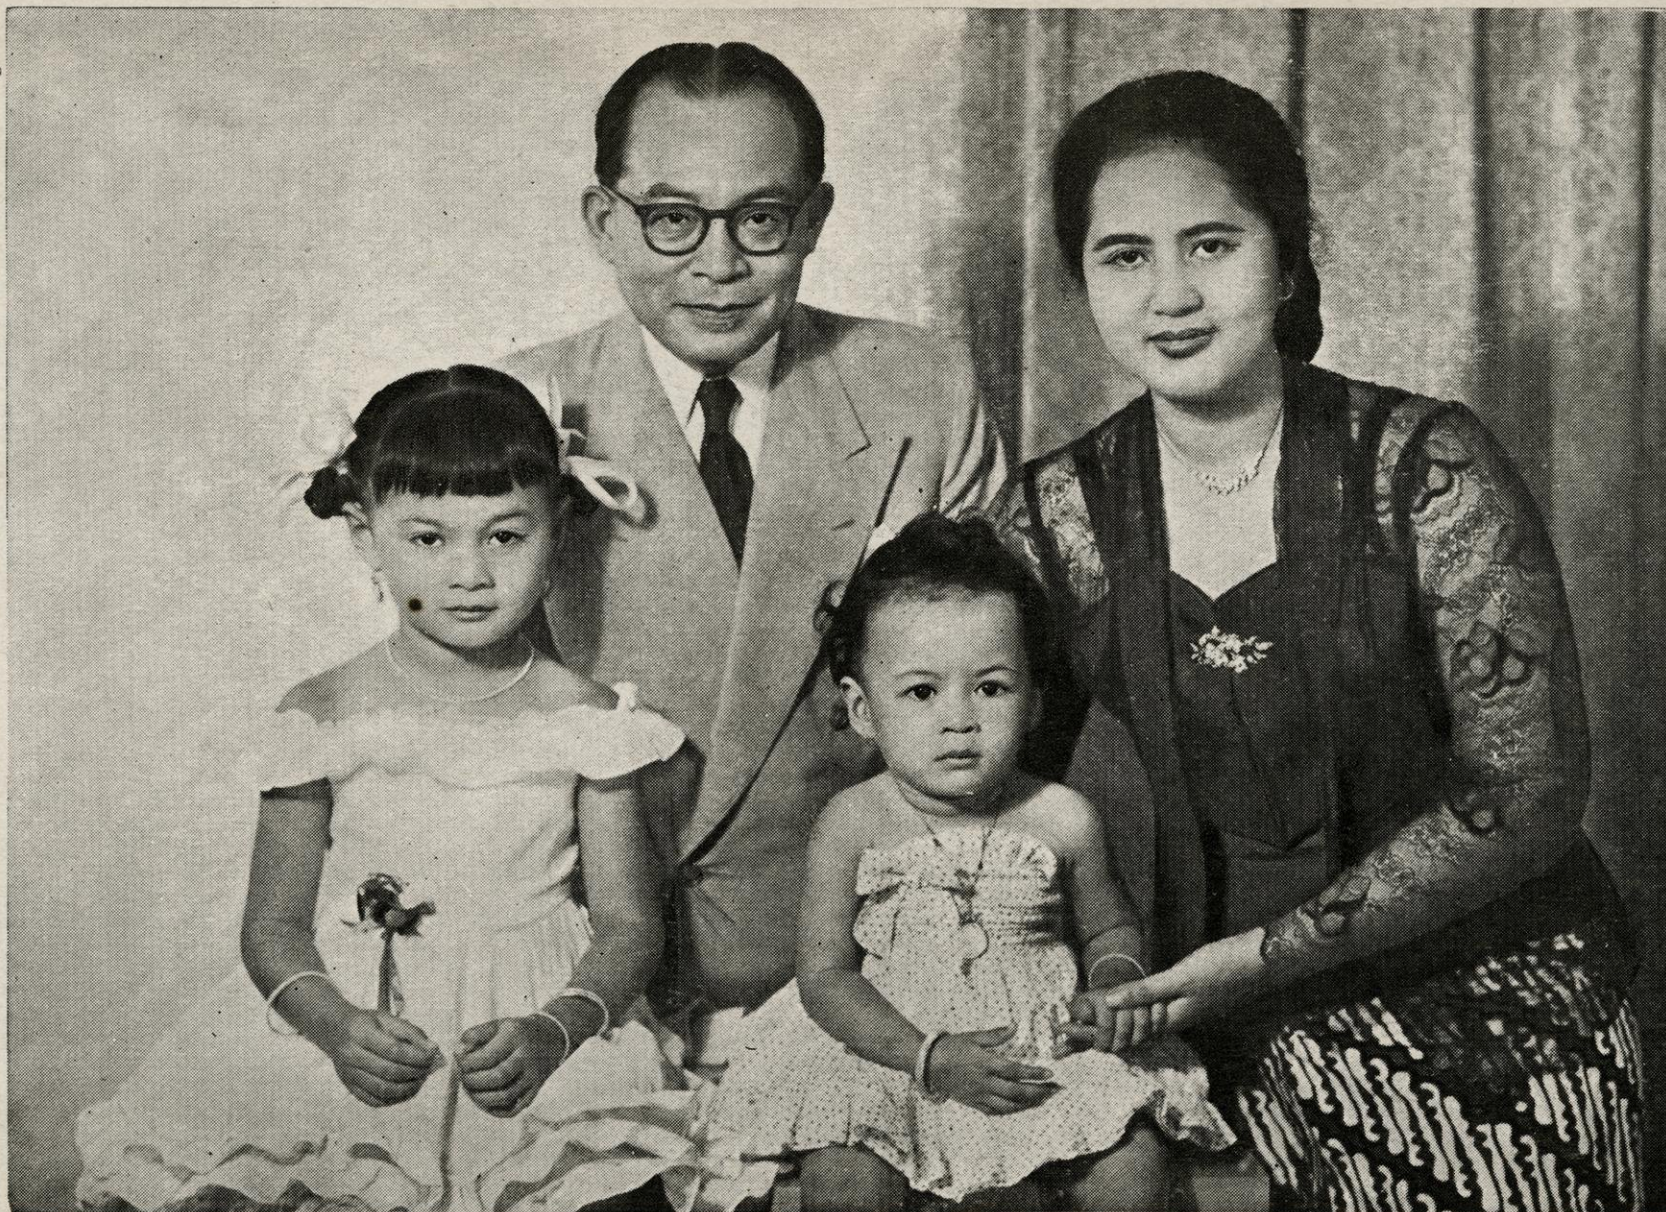

From his student days Dr. Hatta was active in the Indonesian Independence movement and devoted much time to that cause both in the Netherlands and Europe. In 1945 Dr. Hatta became vice chairman of the Indonesian Independence Preparatory Committee and, jointly with Sukarno, proclaimed the Independence of the Republic of Indonesia in August of 1945. Sukarno and Hatta became President and Vice-President respectively of the new Republic. In January of 1948 Dr. Hatta became Prime Minister of a Presidential Cabinet until August 1950 when he resumed the post of Vice-President and served in that capacity until his resignation in 1956.

Since that time he has written extensively and traveled through the main islands of the Republic delivering speeches and working with the Indonesian Cooperative movement which he was instrumental in founding. In addition to being a principal architect of Indonesia's political independence, Dr. Hatta is recognized as a leading economic theorist of the Indonesian Republican movement.

Dr. Hatta has traveled in Europe, Japan, Indochina, Burma, India at the invitation of his long time friend Prime Minister Nehru, and, in September 1957, China.

Dr. Hatta is a distinguished writer and is the author of numerous books written in Indonesian, Dutch, French and English.

Dr. Hatta is married and is the father of three young daughters.

RELEASE:

MADISON--When Dr. Sardjito, president of Gadjadara State University, Jogjakarta, Indonesia, steps off the plane in Madison Wednesday afternoon, he will be caught up in a whirl of conferences and festivities planned by University officials and Indonesian students.

Under Ford Foundation auspices, the University of Wisconsin has been cooperating with the Indonesian University to strengthen economics education there since 1957.

On Thursday at 10 a.m., Dr. Sardjito will confer with Edwin Young, chairman of the UW economics department, and at 11 he will be received by Dr. C. A. Elvehjem in his presidential office. A luncheon at the University Club with George Watson, state superintendent of public instruction, and an afternoon conference with Emeritus Pres. Edwin B. Fred will be followed by a dinner given by Prof. Young.

Meetings with Dean John Bowers of the School of Medicine and Dean L. H. Adolfson of the Extension Division are scheduled for Friday morning, to be followed by luncheon in the John R. Commons room of the University Club given by the department of economics.

Dr. Sardjito holds the degree of doctor of medicine and has requested a tour of the Morningside and Lakeview sanatoriums on Saturday morning. The rest of the day he will meet with Indonesian students, and from 7 to 11 that evening he and his wife will be guests of honor at a reception in the Memorial Union, where Indonesian dances will be featured.

Mrs. Sardjito will also follow a crowded schedule, to include a tour of UW Residence Halls conducted by George Gurda, assistant director; tea as the guest of

MADISON, Wis.--President Sardjito of Gadjia Mada State University, Jogjakarta, Indonesia, will arrive in Madison with his wife Oct. 12 for a five-day series of conferences with University of Wisconsin personnel.

Since 1957, Wisconsin has been cooperating with the Indonesian university under Ford Foundation auspices to strengthen economics education there.

Pres. Sardjito plans to confer with UW administrators and economics faculty members active in the project, study the Extension Division and Station WHA, inspect UW buildings, and meet with the nine Indonesian students now studying on the campus with project support.

Arrangements are being made to help Mrs. Sardjito learn about activities carried on at Wisconsin by faculty and student wives.

Prof. Edward Werner of the UW economics department is now in Indonesia as chairman of the project. He is assisted by faculty members from the Universities of Massachusetts, Mississippi, and Tennessee, De Paul University, and Kansas State and North Carolina State Colleges.

Dean Kertanegara of Gadjah Mada University, Jogjakarta, Indonesia, shown here, center, confers with University of Wisconsin Pres. C. A. Elvehjem, left, and Prof. Edwin Young, chairman of the UW economics department, on the educational co-operation of the two universities. This cooperation, financed by grants from the Ford Foundation, began in 1957 when Prof. Young and Prof. L. Reed Tripp of the economics department set up the program at Gadjah Mada to strengthen economics education at the Indonesian University. Since then, Prof. Tripp, economics Prof. Theodore Morgan, and commerce Prof. Harold Fraine have lived for periods varying from a year to two years in Indonesia coordinating the project. Dean Kertanegara will spend four weeks on the Wisconsin campus.

The public is invited to hear Dr. Mohammad Hatta of Jogjakarta, one of the leaders in Indonesian political and economic life, discuss "Indonesian Ideals of Democracy" at 8 p.m. Tuesday (May 24) in Room 22, Commerce Building.

Dr. Hatta has been on the University of Wisconsin campus since May 22 conferring with officials on cooperation between the University and his own Gadjah Mada University, studying midwestern college life, and visiting Indonesian students at Wisconsin.

Holder of the Ph.D. degree from the University of Rotterdam, Dr. Hatta was, from his student days, active in the cause of Indonesian independence both in Europe and at home. He was vice chairman of the Indonesian Independence Preparatory Committee in 1945, the year he proclaimed the independence of the republic jointly with Sukarno.

After serving as vice president and prime minister of Indonesia, Dr. Hatta resigned four years ago to devote himself to writing and to traveling throughout Indonesia, Europe, Japan, Indochina, Burma, China, and India. His volume, "The Cooperative Movement in Indonesia," is widely used as a textbook around the world.

MADISON--Dr. Mohammad Hatta of Jogjakarta, one of the principal architects of Indonesia's political independence, will visit the University of Wisconsin campus May 22-25, the department of economics has announced.

During his stay he will give a public lecture on "Indonesian Ideals of Democracy" at 8 p.m. Tuesday, May 24, in Room 22, Commerce Building.

Dr. Hatta studied in the Netherlands, after receiving his early education at Bukittingi in Central Sumatra, to secure the Ph.D. from the University of Rotterdam. From his student days he was active in the cause of Indonesian independence, both at home and in Europe. In 1945 he became vice chairman of the Indonesian Independence Preparatory Committee, and in August of that year he proclaimed the independence of the republic with Sukarno.

Sukarno and Hatta became president and vice president of the new Republic. In January of 1948, Dr. Hatta became prime minister of the presidential cabinet, a position he held until August of 1950 when he resumed the post of vice president to serve until his resignation in 1956.

For the past four years he has written extensively and traveled throughout the Indonesian republic to work with the cooperative movement which he was instrumental in founding. He has also traveled in Europe, Japan, Indochina, Burma, China, and India, where he was the guest of his long-time friend, Prime Minister Nehru.

Among his books, written in Indonesian, Dutch, French, and English, is "The Cooperative Movement in Indonesia," widely used as a textbook around the world.

FROM THE UNIVERSITY OF WISCONSIN NEWS SERVICE, MADISON 6, WISCONSIN

RELEASE: Immediately

MADISON, Wis.--Relations between the Republic of Indonesia and the United States are presently sound, and programs such as the University of Wisconsin shares with an Indonesian university play no small role in such friendship.

That is the opinion of Dean Sudarsana Kertanegara of the School of Economics of Gadjah Mada University in Jogjakarta, Indonesia.

Dean Kertanegara arrived here recently to help coordinate the UW's program of providing faculty members to help the Indonesian school in teaching and research in economics theory, international economics, monetary theory, public finance, statistics and quantitative research methods, industrial economics, and related fields.

Presently seven educators representing UW are teaching at Gadjah Mada. They are Prof. Edward F. Werner, Instr. George W. Betz, and Visiting Profs. Theodore Morgan, Louis K. Brandt, Clayton P. Libeau, George A. Spiva, and John A. Stovel.

Six other faculty members have served there in the past three years, and several others are slated for duty in future years.

As part of the program, six Indonesian graduate students are presently enrolled at UW.

Just exactly how is the UW-Gadjah Mada program of benefit to the Indonesians?

Replies Dean Kertanegara, "Our university is only 11 years old. It is poorly equipped, and it is difficult for us to get good teachers from our country. University of Wisconsin educators helping us at Gadjah Mada are of inestimable benefit to us, and our students being trained in America will be better teachers and administrators when they return to Indonesia.

-more-

add one--Indonesian program

"A foreign visitor to the United States immediately feels the spirit of freedom which exists here. And it exists not only in theory but in practice. He finds also that the American people, maintaining that spirit of freedom, have been able to achieve the most prosperous of countries.

"That is what we would like to have at some time--an Indonesia with a well-educated, trained, and free people, fully conscious of her responsibility for the prosperity of the country in particular and for the world in general. There is no doubt that Gadjah Mada is taking an important role in moving toward this goal.

"With continued programs like the one we have with the University of Wisconsin, we are optimistic that we are moving rapidly toward this goal."

Dean Kertanegara will leave UW Tuesday, April 12, and will visit Indonesian students and former Gadjah Mada professors in various parts of the United States before returning to his country.

MADISON--University of Wisconsin School of Commerce Prof. Edward F. Werner is trading the bad weather of Madison for the warmer climate of Indonesia.

Werner is following in the footsteps of two other UW professors, L. Reed Tripp and Theodore Morgan, in their "circuit riding" to the Gadjä Mada University, Jogjakarta, Indonesia. These men are part of the UW team guiding the Indonesian government on the economic education program in their country. The project is sponsored by a Ford Foundation grant.

Morgan relieved Tripp this fall after Tripp spent two years in Indonesia with his wife and four children.

Werner, who leaves Madison Friday, Jan. 15, said, "I'll be over there about 18 months at least, and be out of the United States about 20 months in all."

The project, designed to give the Indonesians an economics program in both undergraduate and graduate studies, is "an important one in world understanding as well as world education," Werner said.

Werner's family will accompany him.

RELEASE:

9/12/59 mcg

Saturday, Sept. 12

MADISON, Wis.--The cooperation between the University of Wisconsin and Gadjah Mada University, Jogjakarta, begun in 1957 to strengthen economics education at the Indonesian University, will continue for two more years under Ford Foundation auspices.

UW regents Saturday accepted \$610,000 from the Foundation to continue the program whereby Wisconsin "provides faculty members qualified to assist in the teaching and research program in economic theory, international economics, monetary theory, public finance, statistics and quantitative research method, industrial economics, agricultural economics and related fields."

The cooperation between the two universities was launched under Ford Foundation auspices two years ago. Prof. Edwin Young, chairman of the UW economics department, and Prof. L. Reed Tripp of the department, set up the program at Gadjah Mada.

Prof. Tripp, coordinator of the project, has returned to the campus after two years in Indonesia, leaving economics Prof. Theodore Morgan there to maintain liaison with the Wisconsin department. Prof. Harold Fraine of the School of Commerce was in Indonesia during the first year of the project.

According to Prof. Tripp, Gadjah Mada has grown in the past 10 years from 800 to more than 10,000 students under sponsorship of the new republic of Indonesia. Located in central Java, Jogjakarta is the center of Javanese culture and the seat of government.

As the result of UW-Gadjah Mada cooperation, His Highness Hamengku Buwono IX, the Sultan of Jogjakarta, visited the campus last February when he toured the U.S. under auspices of the International Educational Exchange Service of the State Department.

BY HAZEL MCGRATH

MADISON, Wis.--Travelers abroad this season are likely to rub shoulders with University of Wisconsin professors on the Spanish Steps in Rome, in the streets of Bucharest or Tel Aviv, or on the campus of Gadea Mada University in Indonesia.

They may meet them in Moscow or Munich, in Manila or Manchester, in Lisbon, Locarno, Brussels, Istanbul, Bangkok, Singapore, Panama City, New Delhi, or anywhere in the world that professional meetings, knotty research problems, or the lure of faraway places have drawn them.

Some are circling the globe in the scant weeks of summer. This small group includes Prof. Glenn Trewartha of geography and Prof. Reid A. Bryson of meteorology who are conducting research in climatology; Prof. Edwin Young of economics who is checking on the UW-Gadea Mada University economics project in Indonesia; and Miss Alma Bridgman, retired executive secretary of the economics department who, after more than 35 years of devoted service to the department, is flying around the world and finding friends at every stop.

The European delegation includes Emer. Prof. E. E. Witte of economics and his wife, who are touring the continent on funds given them for the purpose by students, colleagues, and friends on his retirement last year; Emer. Prof. Don D. Lescohier, economics, and his wife, who are traveling in eastern Europe and the Middle East; Prof. Paul G. Jones of the music faculty, who will stop at the Brussels Fair, attend a reunion with his former teachers at the American Conservatory in Fontainebleau, travel through Spain, Portugal, and Italy, and take in the Mozart Festival in Salzburg;

Indonesian Project

MADISON, Wis.--His Highness Hamengku Buwono IX, sultan of Jogjakarta, will visit the University of Wisconsin next week, Feb. 11-13, for a quick study of dairy farms, tourism, and cooperatives, Prof. H. Edwin Young, chairman of the UW economics department and Madison sponsor of the visit, announced today.

The Madison visit is part of an informal tour of the United States arranged by the Governmental Affairs Institute under auspices of the International Educational Exchange Service of the State Department.

The sultan is chief executive of Jogjakarta, a "special area" equivalent to a province in South Java, Indonesia. Born in Jogjakarta of the ancient Javanese nobility, he studied law in the Netherlands but became a general in the Indonesian army during its struggle with the Dutch, and in 1949 was made first minister of defense in the newly-sovereign nation.

He is credited with having done as much as any one person to restore order and stability in his country after that war and is known for the progressive and democratic reforms he has instituted in Jogjakarta.

He is scheduled to visit a number of farms during his Madison visit, talk with students from Indonesia, lunch with Gov. Vernon Thomson, Pres. E. B. Fred, Pres.-Elect Conrad A. Elvehjem and other state and University dignitaries, and dine with University authorities in the sultan's fields of interest.

The sultan's itinerary in the United States includes stops at San Francisco, Washington, Raleigh, N.C., New York City, Ithaca, N.Y., Madison, Phoenix, Santa Barbara, Calif., Los Angeles, and return to San Francisco.

Prof. Edwin Young and L. R. Tripp of the University of Wisconsin department of economics are in Jojakarta, Indonesia, to discuss with officials of Gadea Mada University an economics project to be carried on next year by the two universities.

The economists flew to Indonesia by way of New York, Rome, and Karachi, and expect to return to the campus in three weeks via Singapore, Hongkong, Tokyo, Honolulu, and San Francisco. They will arrange for several members of the UW. economics department and School of Commerce to spend next year advising on expansion of the economics department at the Indonesian university. The project will be supported by the Ford Foundation.
