The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

Shapley -  
"We are dominant only  
in the current "psychologic  
era", the giant lizards  
were dominant in the meso-  
zoic era a hundred  
million years ago, the  
cockroaches in the preceding  
Permian period."

We don't have  
enough well-developed  
sense organs to tell  
us all that's going on.  
"He has no good  
physiological register  
of long electric waves,  
& to study & use them  
he must resort to gadget-

any feelers." "no organs for  
sensing directly the ultra  
violet or the infrared.  
Our sun has a great  
magnetic field (some  
stars have enormously  
strong ones) "and with  
consequence humans  
have no recognizable  
magnetic sense organs."

"As every anatomist  
knows, man is physically  
primitive to some respects,  
and in others dangerously  
specialized. His primitive  
man & his physiological  
oddities (brains, for  
instance) may create—  
ally erase him" 21  
003.19.262

2/ earth. His clinging  
to the past keeps him  
most of the time at the  
world animal level — food,  
fight, shelter, procreation.  
His current reaching for  
heaven & the stars may  
disconnect him &  
his animal sources of  
physical & neurological  
strength."

We now have only  
animal & vegetable  
Rogdons here but  
a third seems to loom:  
the psychologic. Perhaps  
the third classification  
that includes the brain  
as justified — "the

evidence is good that  
the forebrain — our  
large time-binding  
cortex — is light  
consequence <sup>is the</sup> to  
animate world...

(We want —

But we shd. keep  
in mind that this  
psychologic development,  
this glorification of the  
human psyche, this  
rising dominance of  
mind has totally long  
ago been attained  
in other inhabited worlds:  
Schwettje's "Resource  
for life" — wonderful  
but let's recognize the
