WOOD TYPE GIVES BIG HEADLINES AT LOW COST

BIG HEADLINES at small cost . . . that's the advantage of Hamilton Wood Type. Made in sizes larger than any foundry type, they can be used directly in the form . . . or type high casts made and the separate characters sawed apart. This latter method is quite common practice with many papers, requiring the purchase of single alphabets only. This folder shows just a few of our many popular faces.

**GENERAL
INFORMATION
ON HAMILTON
WOOD TYPE**

Hamilton Wood Type prints equally as well as metal type . . . because the face is polished as smooth as glass, and only the finest and hardest, seasoned endwood maple is used. The individual characters remain straight and true indefinitely, due to the special protective finish given each piece.

Wood type is priced by the character, and can be bought either in regular fonts or in single alphabets. The schemes of the two smallest fonts are shown below, with prices. Figures in fonts, are sold separately from alphabet fonts. The price of single alphabets with points and figures are also shown.
