THE SPASTIC CHILD

*A Record of Successfully Achieved Muscle
Control in Little's Disease*

By Marguerite K. Fischel, St. Louis. Introduction by Dr. George Gellhorn, Professor of Clinical Obstetrics and Gynecology, Washington University School of Medicine.

97 pages, with illustrations. Cloth binding, with special jacket. Price, postpaid, \$1.50.

Here is a little book which combines the character of a personal essay or autobiography with medical information, and presents both with an honesty which is in itself a rare quality. If it occasionally stresses, from a lay point of view, certain shortcomings of the medical practitioner when faced with a discouraging medical problem, it nevertheless amply justifies itself as a valuable voyage of personal exploration in the field of a little understood disease.
