The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

A NEW FEATURE IN CASE RACKS...

WE present herewith an entirely new feature in Case Racks. There has been a constant demand for a case rack that would take the old cases and utilize them in the form of a cabinet. Many printers have desired to do away with the ordinary case racks and substitute cabinets, and thus increase the life of the type by keeping it free from dust, but on account of the expense involved and the fact that their old cases could not be sold or utilized, they have hesitated in making the needed improvement. This new Case Rack solves the problem. The old cases can be used or new ones can be purchased with the racks. These roll front Case Racks are equal to cabinets in every way, and they really are cabinets and not case racks in the ordinary sense of the term. They are fitted with steel runs, and they are therefore thoroughly up to date. The roll front is of the best design, backed by canvas and easily manipulated. It goes without saying that they are thoroughly dust-proof. Each roll front is fitted with the finest brass desk lock. A single lock secures the entire tier of cases. These racks are made of ash, finished in antique oak, same as regular high grade cabinets.

No. 5, ROLL FRONT CASE RACK.
RACKS FOR 35 CASES. HEIGHT 83 INCHES.

PRICE LIST

...OF....

ROLL FRONT, STEEL RUN CASE RACKS.

(Subject to Usual Discounts.)

No. 1.—With Racks for 16 Cases.....	\$20.00	Height 45"

LAMINATED ...BACKING WOOD...

THE NEW MOUNTING LUMBER.

THIS mounting lumber has recently been placed on the market by us, and it has met with unprecedented success. Electrotypers have at once perceived its excellent qualities, and its superiority for large plates. It is a backing wood which will not warp. Being constructed of several layers of wood, in which the grain is crossed alternately, it cannot shrink, swell, crack or warp under any circumstances, and it can absolutely be depended on under the most trying conditions. An important feature of this backing wood is its ability to withstand a long and heavy run under a large plate, without giving way in the center and showing a light print. This has been thoroughly demonstrated by exhaustive experiments. We furnish this backing in standard thicknesses of $\frac{7}{8}$ or $1\frac{5}{16}$ inches, or we will plane to a sample plate so that cuts will be type high when mounted, without further dressing. The price is 20 cents per foot, net. Lots of 100 feet are delivered f. o. b. Two Rivers, at \$16.00, and at Middletown, N. Y., at \$18.00. Furnished in blocks Any size desired. Standard size is 12 x 24.

UNBREAKABLE MITER BOX.

What is more annoying than to drop a Miter Box on the floor with the almost inevitable result of breaking a piece from the side, at the ends or between the saw cuts. We offer here a Miter Box which cannot be thus broken. It is made of lumber that is built up of different layers, with the grain crossed. It can be hurled at a brick wall if the spirit moves the manipulator, or subjected to most any kind of abuse. In fact you can do almost anything with these unbreakable miter boxes, except to break them. They are sold at a mere trifle over the price for the ordinary Miter Box, but they will outwear the old kind many times. List price, $13\frac{1}{2}$ ems wide inside, 50 cents each; 3 inches wide inside, 60 cents each, less usual discounts.

HAMILTON'S UNBREAKABLE MITER BOX.

the ordinary Miter Box, but they will outwear the old kind many times. List price, $13\frac{1}{2}$ ems wide inside, 50 cents each; 3 inches wide inside, 60 cents each, less usual discounts.

LAMINATED BOOKBINDERS' PRESS BOARDS.

We are able to furnish all sizes of Bookbinders' Press Boards, either plain wood or brass bound, made of laminated stock, at regular prices as given in our catalogue, subject to usual discounts. The great advantage of this arrangement will be at once apparent to all bookbinders. These boards cannot warp, swell, crack or shrink under any circumstances.
