INTRODUCTORY.

By chapter 390 of the laws of 1905, provision was made for the addition of ten members to this Commission. On July 12, the following appointments were duly made with the consent of the Governor:

James G. Moore, 2d Assistant Commissioner; F. E. Carswell of Richland Center, E. L. Aderhold of Neenah, J. D. Cannon of New London, and Fred Marty of Monroe, as Cheese Factory, Dairy and Food Inspectors; Thomas Corneliuson of Evansville, and H. C. Larson of Dodgeville, as Creamery, Dairy and Food Inspectors. On the same date, Will McAdam of Waukesha, was appointed Creamery, Dairy and Food Inspector, under authority of section 1410, statutes of 1898; and James Van Duser of Hebron, Creamery, Dairy and Food Inspector, under authority of chapter 144, laws of 1903. December 4, F. M. Buzzell of Chippewa Falls, was appointed Chief Food Inspector, under authority of chapter 390, laws of 1905; W. F. Scott of Mount Horeb, was appointed Food Inspector, under authority of chapter 144, laws of 1903; and Ethel D. Thomas of Madison, was appointed Stenographer and Confidential Clerk under authority of section 1410, statutes of 1898; December 14, P. A. Larson of Holmen, was appointed Creamery, Dairy and Food Inspector under authority of chapter 390, laws of 1905.

Many people throughout the state who have something "curious" that they would like to have analyzed, and manufacturers of and jobbers and dealers in food products are submitting samples of such products to this Commission for analysis. That work is not a legal function of this Commission and

it is impossible to do such work in the business interests of dealers and at the same time fulfill the legal duties of the Commission. The theory of the Wisconsin Food Laws is that the dealer is responsible for the purity and soundness of what he sells and the law requires him, at his own expense, to know and be certain.

The laboratory of the Dairy and Food Commission is maintained at the expense of the state for the purpose of making analyses of samples of foods which the State Dairy and Food Commissioner may suspect or have reason to believe to be adulterated and which he, by himself or his assistants or inspectors, is authorized to seize for the purpose of having analyzed with a view to prosecuting violators of law. The law also authorizes the state board of health, town or village boards or common councils to submit samples of water or other drinks, of food or drugs for analysis. The work thus imposed upon the Commission by law is in excess of what can be done by the one Chemist and two assistants, which the Legislature has provided, and precludes the possibility of continuing granting requests of dealers to make analysis of samples of foods for them.

This bulletin is issued under authority of Section 1, chapter 131, laws of 1903, which authorizes the Dairy and Food Commissioner, with the consent of the Governor, to prepare, print, and distribute to such persons as may be interested, or may apply therefore, a quarterly bulletin or semi-annual bulletin, containing results of inspections, results of analyses made by the chemist of the Dairy and Food Commission, with popular explanations of the same and such other information as may come to him in his official capacity, relating to the adulteration of food, drug and drink products, and of dairy products, so far as he may deem the same of benefit and advantage to the public. The publication of these bulletins and their general distribution among dealers, giving results of the analyses by the chemist of the samples procured by the inspectors of this Commission upon the open market, is on the whole, the fairest method of furnishing to all dealers alike the benefits of the results of the chemist's work of analyzing samples of food products.

In this bulletin, there is published a complete and accurate list of all the cheese factories, creameries, skimming stations and milk condensing factories in this state, a total of 2,855. There are 1,604 cheese factories, 978 creameries, 270 skimming stations and three milk condensing factories. Within the period of time included in this bulletin all of these cheese factories, creameries and skimming stations have been inspected by some member of this Commission. In some cases several inspections have been made of the same factory. The number of these cheese factories, creameries and skimming stations is so large that it is wholly impracticable to publish in this bulletin the comments made by the inspectors in the reports made to the Commissioner of their inspections, as has been done in the bulletins heretofore. Reports of the inspectors made on each of these factories, however, have been made to the Commissioner and are on file in his office. The following are the particulars on which the inspectors are required to report:

Report of Inspection of Cheese Factories.

Date; Name of factory; Location; Town; County; Owner or manager; P. O. address; Name of maker; P. O. address; Has he attended dairy school at Madison; No. of patrons; No. of cows; Pounds of milk daily; pounds of cheese daily; Style of cheese; Quality of cheese; Brands used; Is the Babcock Test used; Is the Wisconsin Curd Test Used; How are payments made; Weight of milk, average test, and pounds of cheese at last payment; Steam or self-heating vats used; Were there screen doors and windows; Describe drainage; Location and condition of whey tank; Condition of building; Condition of surroundings; Condition of apparatus; Condition of patrons' milk cans; Condition of milk in cans; Is building painted outside; Remarks: Note.—Inspector will report here and on the back of this sheet everything of importance not fully stated in reply to the specific inquiries, particularly as to any violations of the dairy laws.

Report of Creamery Inspection.

Date; Name of creamery; Location; County; Town; Co-operative or proprietary; Owner or manager; P. O. address; Name of butter-maker; P. O. address; Has he attended dairy school at Madison; No. of patrons, milk, cream; No. of pounds of milk daily; No. of pounds of cream daily; No. of pounds of butter daily; Average test, butter yield, and overrun at last payment; Quality of butter; Sampling and testing; Loss of fat in skim milk; Loss of fat in buttermilk; What starter is used; Were there screen doors and windows; Was cream vat covered, and how; Condition of glass-

ware; Condition of tester; Describe drainage; Any bad odor; Condition of skim milk tank; Condition of buttermilk tank; Condition of apparatus; Condition of surroundings; Condition of patrons' milk cans; Condition of milk in cans; Condition of building; Is building painted outside; Remarks: The inspector will report here everything of importance not fully stated in reply to the specifications, particularly as to any violations of the dairy laws.

This bulletin shows quite a large number of "convictions" for maintaining unclean cheese factories or creameries. It has not been the practice to prosecute the manager of a cheese factory or creamery on the first inspection, but in the bad cases to give special warning as to the provisions and penalties of the law. Then on a subsequent inspection made within a reasonable time, and where improvement in sanitary conditions had not been made, prosecutions were brought. For many years, public opinion has been practically unanimous that a greater degree of cleanliness is required in our dairy practices and products. That public opinion has been crystalized into law and it is the legal duty of this Commission to enforce the provisions of the dairy as well as the food laws of the state.

Among the list of convictions there is a conspicuously large number of butchers or meat dealers for the selling of chopped meats or sausages containing chemical preservatives or artificial coloring in violation of law. The use of artificial coloring has the effect to make stale meat appear as fresh. An effect of chemical preservatives may be either to embalm or deodorize.

All whose business brings them within the scope of the dairy and food laws of the state should promptly and thoroughly inform themselves as to these laws and bring their business transactions within the legal requirements of the same.

In this work of the dairy and food commission, as in most other cases, there is the spirit which permeates and actuates as well as the law that determines. It is the desire and purpose of the commission to be helpful to all producers and dealers in efforts to furnish the consuming public pure unadulterated foods while safe-guarding the interests of the consuming public.

J. Q. EMERY,
Dairy and Food Commissioner.
