# The Madison Park and Pleasure Drive Association

ANNUAL REPORT FOR 1911

CITY OF MADISON AND UNIVERSITY BAY

## Annual Reports

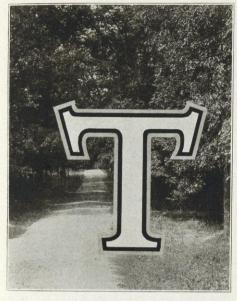

of the

Officers of the

# Madison Park and Pleasure Drive Association

For the Bear Ending April 18, 1911

With Report of Annual Meeting Held April 18, 1911 CANTWELL PRINTING COMPANY MADISON WIS.

HE annual meeting of the members of the Madison Park and Pleasure Drive Association was held at the gymnasium of the high school on Tuesday evening, April 18, 1911, at 8 o'clock P. M., following the annual dinner.

The meeting was called to order by Joseph E. Davies, who acted as chairman for the evening.

On motion of Mr. Hopp-

man the chairman appointed a nominating committee consisting of A. C. Hoppman, E. R. Maurer and Charles O'Neill to present nominations for officers for the ensuing year.

The treasurer's report with the report of the auditing committee was read and on motion was received and placed on file.

The report of the directors was then read by the secretary.

At the conclusion of the secretary's report the nominating committee recommended the election of the following officers:

President, J. C. Schubert.

Vice-President, A. S. Brown.

Secretary, Charles N. Brown.

Treasurer, Frank W. Hoyt.

Directors, F. W. Cantwell, W. D. Curtis, Frank W. Hoyt, Fred M. Schlimgen and Ernest N. Warner.

On motion the secretary was instructed to cast the ballot of the members for the persons named for the respective offices. The secretary having reported the ballot cast the chairman declared the officers elected.

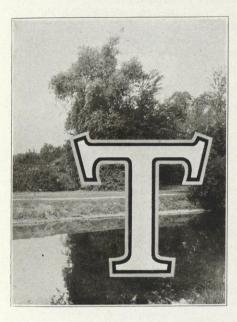

Mayor Schubert then gave an address, "The Use of Our Present Parks."

Under the title, "Looking Forward," T. C. Richmond addressed the members in favor of the project of securing the Monona Lake Assembly Ground as a public park. Mr. Richmond having stated that he thought he would be able to find ten men who would be willing to advance the payment necessary to secure the land, Mr. Olin at the close of his address moved that the ten men together with the officers of the association be directed to use all reasonable efforts to secure the land in question for park purposes, which motion was unanimously adopted.

Under the title, "Looking Around," Mr. Charles N. Brown showed lantern slides of views along the driveways and in the parks.

On motion adjourned.

### Annual Report of the Directors

O THE members of the Madison Park and Pleasure Drive Association:

This meeting is the nineteenth anniversary of the inauguration of continuous organized effort for the improvement of Madison by means of parks and pleasure drives.

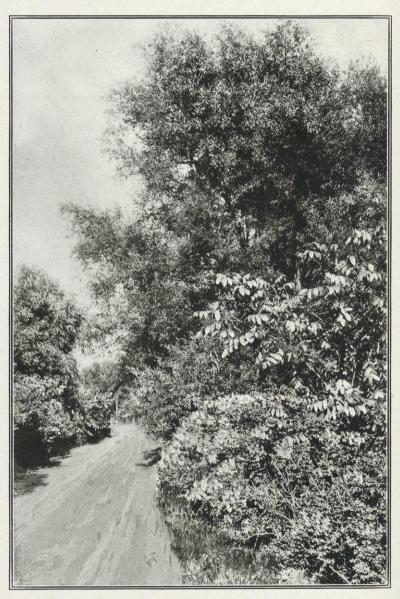

Following a time honored custom, we present herewith a summary of the contributions made from the beginning of the work.

### Total Amount Contributed, Excluding 1911

For the years 1892 and 1893	\$6,888	86
Amount contributed by Prof. Owen in 1892, in ad-		
dition to above	3,000	00
For the year 1894	655	00
For the year 1895	995	00
For the year 1896	1,580	00
For the year 1897	10,160	23
For the year 1898	2,171	32
For the year 1899, excluding gifts for		
Tenney Park \$3,231 50		
Gifts for Tenney Park, exclusive of the		
\$1,500 appropriated by the city 5,778 00		
	9,009	50
For the year 1900	5,313	20
For the year 1901	5,286	00

For the year 1902	5,409 00
For the year 1903, for the general work of the association \$5,036 75	
For the year 1903, for the Yahara River improvement 20,621 24	25,657 99
For the year 1904, for the general work of the association \$5,665 50	20,007 00
For the year 1904, for the Yahara River improvement 4,658 50	10 224 00
For the year 1904, gift of Mr. and Mrs. William F.	10,324 00
Vilas for the purchase of Henry Vilas Park For the year 1904, special subscription for im-	18,000 00
proving Henry Vilas Park	10,171 00
For the year 1904, special subscription for improving Monona Lake Park	1,100 00
Amount contributed by D. K. Tenney for con-	-,
structing foot bridge in Tenney Park	368 00
Amount contributed by Julius Zehnter for same	50 00
Amount contributed for all purposes	00 00
for the year 1905, as follows:	
For the general work of the associa-	
tion \$5,663 25	
For the extra work of the association 5,338 00 For securing the addition to Tenney	
Park 5,600 00	
For improving Henry Vilas Park,	
contributed by William F. Vilas 10,000 00	
For improving Brittingham Park. contributed by T. E. Brittingham 8,000 00	
	34,601 25
Amount contributed for all purposes for the year 1906, as follows:	
For the general work of the associa-	
tion \$7,841 08	
For improving Henry Vilas Park, contributed by William F. Vilas 5,000 00	
For improving triangle, contributed	
by T. E. Brittingham 4,000 00	
Legacy of Mary C. Stewart for con- structing drinking fountain 2,000 00	
structing drinking fountain 2,000 00	18,441 08
	The state of the s

Amount contributed for all purposes for the year 1907, as follows:  For the general work of the association	\$8,741 2,000 5,000	00	15,741	25
Amount contributed for all purposes for the year 1908, as follows:				
For the general work of the associationAmount contributed by D. K. Tenney	\$8,066	32		
<ul> <li>five lots which were sold by the association for \$5,000—for improving addition to Tenney Park.</li> <li>Amount contributed by association for improvement of addition to Tenney Park, being the excess real-</li> </ul>	5,000	00		
ized on sale of fifteen lots over and above the \$5,000 heretofore stated as paid for the land for this addition to the Park	9,400 7,500

### Other Contributions

Total to date

This summary includes only the voluntary contributions made to the association and is exclusive of contributions made directly to the city of Madison. It does not take into account about eighty acres of land outside the city used for parks and driveways which has been given to the association and is held, as all our lands are held, in trust for the city, nor does it include the land in the parkway between Lakes Wingra and Monona, or lands given for park purposes along the Yahara. If the value of the lands donated to the association for park

and driveway purposes in and outside the city should be added at their present value the total would be enormously increased. The donations of Judge Carpenter and Mr. Jones direct to the city amount to at least \$8,500 and Mr. Steensland paid \$10,000 for the memorial bridge which bears his name. It should be mentioned also that the two railroad companies affected by the improvement of the Yahara and Wingra Creek were forced to make expenditures to the amount of \$56,000 in raising their tracks and in constructing new bridges. It is only fair to them to say that these expenditures were made voluntarily and cheerfully on their part.

### City Aid

The city has aided generously in the work. It has issued bonds to the amount of \$84,500 for the purchase and improvements of lands for park purposes, its total expenditure excluding the half mill tax being \$121,595.12, as appears from the following statement:

Bonds issued July 1, 1903	\$35,000	00		
Bonds issued July 1, 1905				
Bonds issued Oct. 1, 1908				
			\$84,500	00
Amount levied as direct taxes to secure	park la	nds		
in addition to the bonds issued, app			8,000	00
Amount expended for permanently im-				
proving and macadamizing streets				
occasioned by the ownership by				
the city of park lands adjoining				
such streets as follows:				
Main street	\$1,875	00		
Washington avenue	1,500	00		
Drake street		00		
Johnson street	2,500	00		
Brittingham Boulevard	2,326	00		
Brittingham Place				
Marston avenue		00		
			14,776	00

Amount expended in improving streets		
within parks as follows: Burr Oak Drive, Henry Vilas Park	\$2,900	00
Bay View Drive, Brittingham Park	7,153	06

Total amount expended by the city for permanent improvements \$121,595 12

This does not take into account the amount expended by the city upon the roadway in that portion of Brittingham Park lying north of the Chicago, Milwaukee & St. Paul Ry. Company. This work is not yet completed. The completion of this piece of roadway will finish the improvement of all of the streets in and abutting all the parks except the driveway to and around the island in Henry Vilas Park. It is well to note in passing that the amount thus expended by the city, large as it is, amounts to only a trifle over twenty per cent of the total amount expended for park and driveway purposes.

### Half Mill Tax

In 1908 the council included in the annual budget a tax levy of one-half a mill for park purposes. This realized \$12,460. This was again levied in 1909 and the amount realized was \$14,750. It was levied again in 1910 and the amount which will be realized this year is \$15,700. There was considerable opposition to the original levy and there was some talk of opposition to the levy of 1909 but the continuation of the appropriation now seems to be assured. This will provide for the maintenance of the parks but will leave very little for permanent improvements. If it were possible for the city to give to the association a larger appropriation the association would be able to construct each

BURR OAK DRIVE, HENRY VILAS PARK

year some bridge or building imperatively required and it would not be necessary to be continually urging upon the council the necessity of making special appropriation for much needed improvements.

That the city could well afford to do this was conclusively shown by the report of the special committee appointed by the common council in 1908 to investigate "how much, in their best judgment, the present assessed value of the entire property of the city of Madison has been increased by reason of the work that has been carried on . . . by the Madison Park and Pleasure Drive Association in conjunction with the city in securing for the city, parks and drives outside the city limits, and parks, play grounds and open places within the city limits." That committee, of which Mr. T. G. Murray, president of the Commercial Club, was chairman, and which included Justice Siebecker of the Supreme Court and Mr. George Curtis, Jr., of the Tax Commission, reported that from ten to fifteen per cent of the increase in the assessed value of the city was due to this work. The committee reported that in 1908 the increase in assessment had amounted to about \$12,000,000. Since that time it has increased \$6,500,000, so that the total increase at this date would be over \$18,500,000. that 12½ per cent of this increase, or \$2,300,000, is due to this work. How many manufacturing establishments, how many wholesale houses, how many interurban railroads and how many steam roads would have been required to produce such a result?

This increase brings into the city treasury at the present rate of taxation \$36,750. Deducting interest paid on city bonds and interest at a like rate on all other moneys expended by the city, and there still remains at least \$30,000 or practically twice the amount which we are receiving from the city. To put it in another

way: there has been expended in the park work in round numbers, as follows:

Contributed to the association	\$275,000
Gifts of Judge Carpenter, Mr. Jones and Mr. Steens-	
land	18,500
Expended by railway companies	56,000
By the city of Madison	121,500
Half mill tax to date	

A total of \$498,500

This investment during a period of 18 years has increased more than four and one-half fold. This has added that much to the collective wealth of our citizens, even if has not actually reduced the burden of taxation by this increase of taxable property. Common business sagacity requires that the work should be supported both loyally and generously.

### Method of Securing Subscribers

As in several former years the directors have sought to minimize the labor of securing subscriptions by means of the postal card subscription. In January the directors invite a number of representative citizens to meet with them to go over the list of subscribers for the past year and to add to it the names of persons who have not been subscribers. This committee then decides what sum it is thought proper to ask from each individual in view of his circumstances and of the amount which it seems necessary to secure. A circular is then sent to each person on the list explaining the purpose of the directors in adopting this method of solicitation and explaining that it is hoped that the person addressed will feel perfectly free to change the amount, either to decrease it or to increase it and that he may also feel perfectly free to decline if for any reason he did not wish to contribute. Where these circulars are

sent to persons who have not been subscribers and especially to persons who have not long been residents of the city, a copy of the last annual report is sent with the circular in order that the person addressed may know of the character and extent of the work. A few weeks after the first circular is sent out a printograph circular addressed to the individual and signed by the secretary is sent to all those from whom contributions had not been received. We find that contributions continue to come in for weeks after these circulars are sent. This is not, perhaps, the ideal method of securing subscriptions, but so far as it goes it economizes time, both of the solicitor and of the solicited. The presentation of a subscription list consumes some of the time of the person to whom it is presented and a great deal of the time of the person presenting it, especially when it is considered that many of the persons called upon are not in when the solicitor calls and that it is necessary in order to make a thorough canvass to go over the ground many times. It is not improbable that persons receiving the circular for the first time may think that the directors were taking an unwarranted liberty in dictating the amount which they should be requested to give, but great pains have been taken in framing a circular so that a person reading it could not reasonably take offense and so far as the directors know very few have taken exception to this method of canvassing. Indeed, many subscribers have warmly recommended it as saving not only the time of the association but their time as well.

### Contributions for the Present Bear

From the result of the postal card canvass reported above it will be seen that there has been a very considerable falling off in the postal card contributions from

YAHARA PARKWAY OPPOSITE TENNEY PARK

the amount reported at the last annual meeting. that time the contribution had reached the sum of \$4,143. This is due to several causes and particularly to the great number of objects for which contributions have been solicited since the beginning of this year. The Madison General Hospital Association has secured donations amounting to more than \$26,000 for the benefit of the city hospital. Contemporaneous with this was the campaign to raise \$25,000 for the new St. Mary's hospital and a trifle later the campaign of the Y. W. C. A. to raise \$50,000. This does not take into account the subscriptions to the University Y. M. C. A., to the shirt waist strikers in Chicago or the famine sufferers in China, nor the appeal for \$10,000 for the working girls' home. These are what may be called public enterprises and there are doubtless scores of church and other subscriptions which are not brought to the attention of the general public. It is certain that Madison is a city of liberal givers. It is equally certain that the Park and Pleasure Drive Association is one of the institutions which Madison givers feel should be supported. Otherwise it would have been impossible without other solicitation than postal cards to have secured so large a subscription. It will be necessary as in former years to supplement the postal card canvass, but it seems likely that there will be a falling off from last vear.

### Drives

But little work has been done upon the Farwell Drive during the past season. Some improvements have been made but at a very slight cost. The owners of lots at Woodard Grove and other parties who are interested in that vicinity are very desirous that the driveway leading from the highway to the lake shore drive over the high bridge should be macadamized the coming season and have promised considerable subscriptions in the event that that work is done. If sufficient subscriptions can be raised so that funds are available the work will be undertaken the present season.

### Take Mendota Drive

A very considerable improvement in the Lake Mendota Drive was undertaken during the past year. As indicated in the last report Mr. Ernest N. Warner and other property owners undertook during the past season to improve the whole of the marshy area lying between Spring Park and Mendota Beach by widening the creek so as to make a spacious lagoon or harbor and filling the remaining area to about eight feet above the lake level. This work was substantially completed during the past season. As originally constructed the Lake Mendota Drive occupied a strip fifty feet in width and about fourteen hundred feet in length in the rear of a row of lake shore lots. A little more than half this distance was across a marshy area through which the creek meandered. The bridge over this creek was a cheap structure of wood which would soon have to have been replaced. Mr. Warner proposed to the association that the roadway be relocated upon higher ground which would make the grade very much easier and make a very much pleasanter road and agreed that if the association would relinquish the old road to him that he would give the association a sixty-six foot rightof-way instead of the fifty foot strip which it occupied. He agreed further that if the association would macadamize the substituted strip that he would convey to the association a lot with a water frontage of two hundred feet, extending from the driveway to the lagoon. The matter was brought before the directors who in person

examined the location and referred the matter to Mr. Nolen. After careful consideration and acting upon Mr. Nolen's advice the directors decided to accept Mr. Warner's proposition and the old road was abandoned and the new road laid out, graded and macadamized from its eastern end to the filled area. The relocation of the road involved the construction of a new bridge and during the fall the cement abutments of a new bridge were constructed. The new bridge will be of reinforced concrete with side walls and wings of split granite boulders. It will have sufficient span and sufficient elevation so that boats may readily pass under it in case the creek above the road shall be improved.

In addition to the lot mentioned there are two small tracts at street intersections which have been conveyed to the association by Mr. Warner and which will be planted and improved by the association. There was an understanding at the time the agreement was made with Mr. Warner that if he could satisfactorily rearrange lot lines between himself and other adjoining lot owners, he would convey what for years has been known as the "Big Spring" to the association for the use of the public. Happily for the association he was able to make such arrangements with adjoining lot owners and has conveyed to the association in trust for the use of the public a strip of land seventy feet in width along the lake shore which includes the "Big Spring" and its outlet. It is a source of congratulation to the association that it has thus been able to secure this well known land mark for the enjoyment of the public. By means of paths and roads this spring is now accessible from the driveways as well as from the lake. The value of the property acquired by the association is not less than \$3,500. The great advantage which the association gains by the change is that it acquires a public

LAKE MENDOTA DRIVE

landing place upon a commodious harbor where boats and launches may safely ride out the wildest gale. This is an advantage which boatmen will not be slow in realizing. Up to this time there was no landing place upon this portion of the lake except upon private property or upon some street end.

The work of filling was necessarily attended with some inconvenience to the property owners in Mendota Beach by reason of the construction of the lagoon across the course of the old road and also by the destruction of the temporary bridge by an unprecedented flood. The directors believe, however, that the improvement in the driveway by reason of easier grades and better construction will compensate the lot owners for the annovance necessarily caused during the performance of the work. The top of the bridge was put on early this spring, stone for the road across the filled portion was hauled during the winter and the road will be put in shape for travel very early this season. During the summer the filled portion of the driveway and the park areas will be covered with good soil and will be planted during the coming season according to plans already prepared.

### Tenney Bark

The addition to Tenney Park was practically completed during the past season with the exception of the seeding and planting. The area between Sherman avenue and the lake was covered with good soil taken from Burrows Park with the exception of a portion left for a children's sand garden. Trees and shrubbery for the planting have been ordered and when the planting and seeding is done the work will be completed so far as the ground is concerned. It still lacks, however, anything in the way of a shelter or a pier. It also lacks the

three bridges which are necessary to its completion and its proper enjoyment. The meager funds at the disposal of the association make it impossible for the association itself to pay for the construction either of the shelter or of the bridges and it will be necessary for the city to come to the aid of the association in this matter. The total cost of the park up to this time is \$78,647.82. Of this sum, the city contributed \$32,270.50 for purchase of lots and \$6,887.58 for construction. Mr. Tenney contributed \$12,968. The remainder has been largely contributed by private individual subscribers for the work. It is unfortunate that after the expenditure of nearly \$79,000 that the city should not be in the situation to spare the sum necessary to complete the park so that it may adequately and conveniently serve its purpose.

Mention should here be made of a circumstance which has caused the directors of the association the keenest regret. While the construction of the addition to Tenney Park was in progress and it had become apparent that the bridges above referred to would be necessary, Mr. Olin, the then president of the association, interviewed Mr. Tenney, in whose honor the park was named, and stated to him the necessity for the construction of bridges. A difference of opinion arose between Mr. Olin and Mr. Tenney as to the number, location and style of the bridges. He verbally offered to Mr. Olin to donate a steel bridge to be located at a point designated by him. The matter was considered by Mr. Olin and referred to Mr. Nolen, our landscape architect, and was brought up before the board of directors. Mr. Nolen advised the board that a steel bridge would not be in keeping with the park and would be an evesore and Mr. Olin and the directors of the association heartily concurred in his opinion. The directors felt

that the association was under many obligations to Mr. Tenney and in order that no unpleasantness should result from the rejection of his offer no formal action was taken by the board of directors but the matter was allowed to sleep quietly. Some months afterwards the project was revived, apparently at the request of one of the members of the common council and a letter addressed to the alderman in question was presented to the council. The letter contained the offer by Mr. Tenney that he would erect a steel bridge across the lagoon to the island, provided that the city would agree never to consider the matter of the erection of further bridges by public taxation. At the time the letter was presented representatives of the association were present in the council chamber and made strenuous objections to the acceptance of the offer, stating the fact that they believed that such a bridge as contemplated would be a serious disfigurement to the park. The matter was referred to a committee of the council but was never considered by the committee. Some months afterwards at the request of the alderman to whom the letter was addressed the matter was recalled from the committee and a vote taken upon the question, eight aldermen voting for the unconditional acceptance of the offer, one alderman voting for it conditionally and eight aldermen voting against it. At the next meeting of the directors of this association the matter was very carefully considered. The opinion of the city attorney was obtained and that together with a communication signed by the directors was presented to the common council. In that communication the directors represented that they were advised by Mr. Nolen, the landscape architect employed by the city, that the erection of such a bridge would be a serious injury to the park. The communication further stated that the association

TENNEY PARK

was the owner of the property, holding it in trust for the city, and that so long as it was acting as such trustee it had the absolute right to say what structure should be erected in the park. This was in accordance with the opinion given by the city attorney. The directors stated in the communication that they felt the kindest regard for Mr. Tenney and that they fully appreciated that it was his generosity to which the city owed the park but that they felt that as a matter of principle they could not allow anyone to dictate what should or should not be erected in the parks under their control because of the dangerous precedent which it would establish. After the presentation of the communication a motion was made to reconsider the vote accepting the gift and this motion prevailed. As before stated, the directors regret that the issue should ever have been forced upon them and regret it particularly because of the source from which the offer came. Mr. Tenney has ever been the good friend of the association and he was the first person to come forward with a contribution which made a park possible within the city limits. They feel that it is most unfortunate that they were obliged to oppose the wishes of one for whom they had such kindly feelings and to whom they felt such a burden of obligation. They felt, however, that the interests of the public demanded that they should resist with firmness an attempt which seemed to them fraught with the gravest dangers to the welfare of the system of city parks. They felt that it was time that they should let the public understand that nothing could be erected in any park, so long as it was under their control, which they were advised and themselves believed to be a menace to its beauty and to its usefulness.

### Genry Vilas Park

The amount expended in Henry Vilas Park for the past season was \$1,977.65, and with the exception of \$461.78, this sum is properly chargeable to maintenance. The total cost of the park to date is \$67,357.37, of which the city contributed \$5,900, including the cost of macadamizing Burr Oak Drive, and Senator and Mrs. Vilas \$35,000. This statement does not include the \$25,000 given by Mrs. Vilas to purchase land for an addition to the park.

### Addition to Henry Bilas Park

At the last annual meeting Mr. Olin read a letter from Mrs. Vilas in which she offered to contribute \$25,000 for the purchase of additional land for Henry Vilas Park. This gift was accepted by the association at its annual meeting and was also accepted by a vote of the common council on the 17th of May, 1910. The gift provides that Erin street should be extended through to Warren street and that the lands shall be improved by the association in accordance with plans and designs furnished by some competent landscape architect approved by the directors of the association. Nearly all the land necessary for the extension of the street and

ADDITION TO HENRY VILAS PARK

for the addition to the park has been acquired and would all probably have been acquired but for the impossibility of acquiring a tract except by condemnation proceedings.

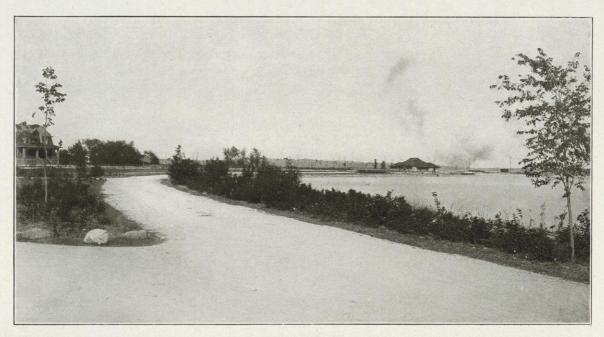

The association has procured and adopted plans for the improvement of the park and proposes to go ahead and do the necessary grading during the coming season.

### Animals in Henry Vilas Park

During the past winter Mr. Thomas C. Richmond offered to give to the association a herd of five deer which he had had at his home in South Madison. The association accepted the offer and after consulting with Mr. Nolen decided to place them in Henry Vilas Park. A neat and attractive house or stable was constructed and a large area was enclosed with a high wire fence on the south slope of the ridge a little west of Warren street. Another deer was acquired by the association through the efforts of Mr. W. A. Oppel. One of the deer died but the association now possesses a fine herd of young deer which will undoubtedly be a great attraction. The association hopes to add water fowl in Tenney Park and in Henry Vilas Park.

### Brittingham Park

The total amount expended by the association in Brittingham Park during the year was \$10,282.01. Of this amount, \$2,200 was contributed by Mr. Brittingham for the completion of the bath house. This makes the total amount contributed by Mr. Brittingham \$24,500. The total cost of the park, excluding maintenance and not counting streets constructed by the city, but including the bath house, is \$63,783.00.

BRITTINGHAM PARK

### Bath House

The bath house was completed in time for the opening of the bathing season last year. The total cost was \$7,651.27. For equipment the association expended an additional sum of \$62.97. The total operating expenses of the bath house for the season were \$638.37, which includes supervision, water, telephone and lights as well as bathing suits and towels. The bath house proved to be the attractive feature of Brittingham Park. During the season the total number of baths exceeded 50,000. It is doubtful if the bathing suits were dry from the beginning of the season until its end. Most of the time, although we purchased more than three hundred suits, there was a line waiting to take the wet suits as soon as the wearers came out of the water. The board of education paid the expense of an instructor in swimming and swimming lessons were given during almost the entire season. The bath house was patronized not only by boys and girls but by very many men and women. We were fortunate in getting a competent custodian who with his wife and other members of his family looked after the bath house in a very satisfactory manner. No rowdyism or objectionable conduct was permitted and many people frequented the place who would not ordinarily patronize public bath houses.

### Play Grounds

With the sanction of the association a large open space near the bath house was used as a play ground and some simple apparatus was erected, one of the features being a merry-go-round given to the association by Prof. Kehl. The space was large enough so that baseball could be played. Although the turf suffered considerably, the directors felt that the innocent

fun and harmless recreation which the boys and girls were able to get much more than compensated for the necessary and inevitable disfigurement. It seems that a bath house and a play ground are intimately and naturally connected and that the use of this portion of the park for play ground purposes was not only justified but desirable.

### Boat House

The boat house in the triangle in Brittingham Park was in operation during the past season. As stated in previous reports the boat house was built in compliance with the conditions imposed by Mr. Brittingham at the time of making the donation for the bath house. It was to cost \$5,000. As shown by the treasurer's report the rent received from the boat house was \$125. The cost of maintenance, including telephone, electric

BATHERS, BRITTINGHAM PARK

light, city water and the custodian has amounted to \$288.78. It is certain that the revenue for next year will be considerably increased, although the rent charged by no means covers the expense of operation. It is quite possible that the directors may be obliged to increase the charge until it is somewhere near the actual cost of the service rendered.

### Boulevard to South Madison

The Boulevard from Brittingham Park to South Madison has not vet been completed, although the time has expired within which the abutting property owners agreed to have the work completed. A cement sidewalk has been constructed the greater portion of the distance but nothing has yet been done toward the construction of the macadam driveway along the shore. The association has repeatedly urged upon the property owners and those interested the desirability of completing the work at the earliest possible moment so that the association may complete the seeding and planting and so that the driveway may be available for the use of the public. It is confidently expected that the work will be done early this season. So many different property owners are interested and so many are to be consulted before anything can be done that it seems very difficult to get results.

### Annie C. Stewart Drinking Fountain

As has been stated in previous reports Mrs. Mary C. Stewart devised to the association the sum of two thousand dollars to be used in the construction of a drinking fountain in memory of her deceased daughter. On receiving this money from the executor of the will it was placed at interest and the fund now amounts, according to the report of the treasurer, to \$2,272.66.

LAKE MENDOTA DRIVE

There have been two reasons why the fountain has not been already erected. The first was the difficulty of securing a suitable site. The second was the difficulty in selecting a really suitable memorial. The directors have given it very serious consideration and have taken the advice of Mr. Nolen. The only site which he has been able to suggest and the only site that has seemed at all appropriate is the plaza in front of the proposed casino upon the summit of the addition to Henry Vilas Park purchased by the gift of Mrs. Vilas. This is a commanding elevation from which there is a very extensive view to the south and west and it will be the center of interest in this park. There is an especial fitness in locating the memorial within this park on account of the intimacy which existed between the Vilas and the Stewart families. An original design is now under consideration, which, if it is found acceptable, will not be beyond the limits of the fund at the disposal of the association. If the design proves acceptable it is likely that the work will be well under way before the end of the present year.

# Gatherings in the Parks

As in the previous year several concerts were given on alternate Sundays in Henry Vilas Park and in Tenney Park. These proved to be very popular. A public picnic was held in Henry Vilas Park on July 4th, which was attended by a very large crowd. The Socialists also were permitted to hold their annual picnic in Henry Vilas Park. Aside from these public gatherings the use of the parks has been much more general than in previous years. The association encourages the use of the parks in all proper ways. We have eliminated all "Keep off the Grass" signs and permit the utmost liberty to picnickers. Our men cheerfully clean up

the scattered papers and other rubbish. No one can observe the family and neighborhood groups enjoying their Sunday picnic dinner or supper with the happy children scattered about on the grass without a feeling that the little injury to the grass is more than offset by the pleasure enjoyed by the visitors.

#### Monona Lake Park

The officers of this association have for many years urged the necessity for prompt action in the matter of the condemnation of the lands on the shore of Lake Monona upon which for many years it has been proposed to construct Monona Lake Park. Some years ago the city acquired a portion of the land by an expenditure of \$5,500. Condemnation proceedings were started after vain negotiations but were dismissed upon a technicality. Since that time nothing has been done. The

HENRY VILAS PARK

fact of the delay has seriously prejudiced the association in the minds of the residents in that portion of the city. As a matter of fact it is nothing for which the association is responsible. The matter of the condemnation of the land or the purchase of the land in case a price can be agreed upon is and has been for several years in the hands of the legal department of the city, and the association cannot move in the matter until title shall be obtained.

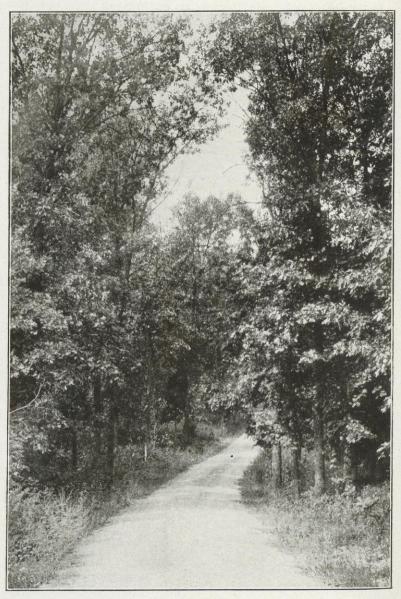

#### Burrows Park

The association does not contemplate doing any work in Burrows Park during the coming season. A plan, however, for the park has been prepared by Mr. Nolen, who is also advising the owners of adjacent property in reference to platting the same. But little needs to be done to make the park available except the filling of the portion lying next to the lake. This cannot be economically done except in connection with the improvement of the adjacent lands. There is not yet any particular need of a park in that locality and the association will do all that it can reasonably be required to do as soon as the necessity for it is felt by the residents of the vicinity.

# Death of Mr. Steensland

In August last we lost by death Hon. Halle Steensland, who had served as a director for more than eight years. At the first meeting after his death the board adopted the following memorial:

"The association having lost by the death of Honorable Halle Steensland, the director who has served the longest upon its board, the surviving members of the board desire to place upon the permanent records of

IN OWEN PARK

the association their public and grateful acknowledgment of their appreciation of his services.

From the time of his election at the annual meeting of the members of the association in 1902 no one was more faithful or prompt in his attendance upon the meetings of the directors or more attentive or painstaking in the consideration of matters under discussion. His ripe business experience and matured judgment were freely placed at the service of his associates, and the work undertaken was carefully and intelligently watched as it proceeded to completion. The success attained by the association in its undertakings has in no small degree been due to his efforts in its behalf and to the confidence inspired by the fact of his connection with it.

The directors desire further to place upon record their feeling of personal loss and of their personal appreciation of the splendid qualities of mind and heart which they have come to know and appreciate while engaged with him in work for the public good. The directors feel that while the community has lost a high minded, generous and patriotic citizen and the association a faithful and efficient officer, they have each lost a cherished friend."

#### Death of Colonel Hollister

One year ago tonight our meeting was presided over by Colonel Albert H. Hollister, one of Madison's oldest merchants, a man who was interested and active in everything tending to promote the welfare and the beauty of his adopted city. You will all recall the ringing words with which you have repeatedly heard him advocate plans looking to the financial, moral or industrial advantage of Madison. The warm friendship which he had always displayed in his lifetime for the association was also manifested in his will. He makes the association one of his three residuary beneficiaries. Under his will Mrs. Hollister is to have the income from the property so long as she shall live. Upon her death and the death of certain relatives who are entitled to the income of the property, after setting aside a certain sum for the establish-lishment of a pharmaceutical fellowship at the State University, the remainder of the fund is to be divided equally between the State Historical Society and the association. As Mrs. Hollister is entitled to use as much of the principal as may be necessary during her lifetime and as the estate is not yet settled, it is impossible to make any accurate estimate of the amount which

YAHARA RIVER, TENNEY PARK

the association will ultimately receive. It would seem altogether likely, however, that there will be several thousand dollars of which the association will have the income in perpetuity. Such bequests as this seem eminently fitting. Certainly no disposition of one's property could be surer to yield a larger return in health or happiness to all generations to come.

#### The Nolen Report

The report of Mr. John Nolen for the future development of Madison, "A Model City," was completed late in the last season and was put in print and ready for distribution early in February. Mr. Nolen's recommendations as to the improvement of the approaches to the capitol were substantially set forth in the report issued by this assocation two years ago and have been somewhat amplified in the published report. His recommendations as to the necessity of acquiring additional land for the University seemed to have been favorably received by the regents of the University and the matter is now pending in the legislature.

For the benefit of the state at large it is earnestly to be hoped that the present opportunity to secure the Raymer, Olin and Stevens lands for the University will not fail. It is absolutely certain that unless the land is acquired at this time it never can be acquired at all except at an enormously increased expenditure. If not taken now the land will be placed upon the market for division into suburban lots and the opportunity to acquire a piece of land with unrivaled advantages will be gone forever.

#### Additional Park Lands

There is another recommendation in Mr. Nolen's report to which attention should be especially called and that is the recommendation in reference to the imme-

BIG SPRINGS, LAKE WINGRA

diate acquirement of additional lands for park pur-Mr. Nolen's report recommends a chain of small centrally located open spaces or squares, a series of playgrounds and at least one large park with a system of connecting parkways or parked avenues. His recommendation is that land should be acquired in the neighborhood of railroad stations, both in East and West Madison, that the triangle at State and Gorham streets should be acquired and the lake frontages at the foot of North and South Hamilton streets. He recommends also a park about the size of Tenney Park at the Lake Monona end of the Yahara river, the purchase of the remainder of the block on which Kendall Field is located, with perhaps another full block of marsh land adjoining it, the acquiring of all the low land between Mills and Park street extending from the railroad tracks to Washington street, and one really large park, say 500 to 1,000 acres, around Lake Wingra connecting with Henry Vilas Park and completely encircling the lake. This may seem really a large program but the arguments with which the necessity for these parks enforced are convincing. No one of us who have not considered the matter carefully realizes the possibilities of the growth of our city. Few cities in the country of the age of Madison have had a growth at all comparable to it. Cities in which great manufacturing plants have been established or which have developed into great industrial centers have had a larger growth but no city, so far as I am aware, has increased so rapidly without some such special incentive. Mr. Stewart, an engineer employed by the water works, has estimated that at the present rate of increase the population of Madison, including Fair Oaks, South Madison and the outlying suburbs, will be 48,000 in 1920, 75,000 in 1930 and 120,000 in 1940, or that in thirty

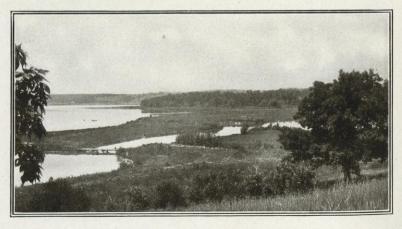

BIG SPRINGS, LAKE WINGRA

years more the population will be four times what it is today. Perhaps these figures are too great. It is easy to prophecy and it is easy to be too optimistic, but the fact remains that with anything like the present rate of increase very large additions to our park area will be required if the per capita average is to be maintained. We have added several thousand to our population since we have added anything to our park areas within the city limits. Already the city is extending far beyond the city limits in every direction. Almost all the land around Lake Monona is platted and almost all the available land around Lake Mendota. have already been made extending to within half a mile of the village of Middleton. A suburban plat on the Illinois Central, five miles from the city, is being rapidly disposed of. Plats have been made along the Oregon Road three miles from the city. Houses are being built in all these plats and the population of the city is spreading out in all directions. This means that land adjacent to the city is rapidly increasing in price and that if park areas are to be acquired they must be acquired soon if they are to be acquired economically. It ought to need no argument to convince any one that it is the part of wisdom to anticipate the advance of population and to secure park lands in advance of settlement. Of the areas which Mr. Nolen mentions the one which is the cheapest, for the reason that population has not yet encroached upon it, is the large area surrounding Lake Wingra. This is still cheap property and it is cheap because it does not lie immediately upon lines of transportation and because its character is such that without considerable expense it cannot be made available for residence purposes. Nearly the whole shore of Lake Wingra is marshy and not suitable, without dredging or draining, to be occupied for

residence purposes. The city should take measures at once to acquire all of the shore of Lake Wingra with all the high wooded ground lying south of it, carrying the line easterly to the fish hatchery road.

This would give a park of 600 or 700 acres which would have in it unequaled possibilities of beauty and The south shore of this lake is occupied enjoyment. by two elevations covered with a dense growth of timber. There are several springs, which in beauty and in volume of water discharged, are fully equal to the so-called Merrill Springs upon Lake Mendota and are as fine as the springs on the east shore of Monona. This territory is almost unknown to the citizens of Madison by reason of its inaccessibility. These woods and springs, which furnish unequaled picnic grounds, cannot now be reached either from the west or from the east and they are a long distance from the highway on the south. They can only be reached by boat with considerable difficulty. Between these two wooded elevations spoken of there is a small creek flowing into the lake from the south. For a few hundred dollars

HENRY VILAS PARK FROM ADDITION

spent in deepening the channel of the big spring and removing the underbrush and building a simple bridge across the little creek between the two wooded knolls. a hundred acres or more of a beautiful natural park could be enjoyed without further expenditure for many years. If not immediately secured the opportunity to acquire the lands at a reasonable price will be gone forever. If secured it will give us a park unique in character and of unusual possibilities for quiet beauty. Public spirited citizens have given us beautiful neighborhood parks but their generosity should not seduce us into relying upon private generosity in the future. The city should show that it appreciates what others have done for it in a small way by doing something for itself in a large way by acquiring a park that shall be a city park. It will pay in dollars and cents as surely as our small parks have already paid, and will give that taste and appreciation of nature that our small parks can no longer furnish when they have been compactly built around. The present generation has built the parks which we now have for the enjoyment of the future. Let us issue long time bonds to acquire this beautiful and unique tract and let the future generation pay the bill. It will be so slight, in comparison with the benefits, that it will be esteemed a privilege instead of a burden.

In behalf of the Directors,

CHARLES N. BROWN,

Secretary.

SPRING. SOUTH SHORE, LAKE WINGRA

# The Uses of Our Present Parks

JOSEPH C. SCHUBERT.

I feel that a few words should be said in reference to the parks and to the use that is being made of them, other than the report made by the secretary, and looking somewhat to the future. But before going on, I wish to read what the secretary said in last year's report: "It is certain that the use of the parks is rapidly increasing. Each pleasant summer afternoon and evening and every Sunday, the parks are thronged with visitors, especially families with children. There can be no doubt that the parks are becoming better appreciated and more generally used. The drives are more for those who ride, but the parks are for the masses who have no carriages. The automobilist can get his fresh air and his wider outlook in the country, but the men and women with no vehicle but the baby carriage must rely upon the parks for their glimpse of nature. It is highly gratifying that the parks seem to be serving this class more and more."

When the matter of parks was first brought before the citizens of Madison, and it was suggested that a park be made of the marsh then known as the Thornton marsh, it looked as though we were overdoing the matter of parks right from the start, and that it was not necessary to have so large a piece of ground for this purpose, but after the development of that piece of marsh and later the first addition, and still later the second addition, which brought the park to its present size, we all felt that we would have a large park for Madison. Later when we thought of that large tract on the west end of the city, Henry Vilas Park, and now also

with the first addition thereto, we almost banished the thought from our minds as to the future need of more parks.

But, as these several pieces of park land, including Brittingham Park, were brought into use by the people, with the increase of population year by year of the city, a few changes are very noticeable to those who observe closely the use of the parks, and I am beginning to be convinced that when our expert park men such as Emil T. Mische and John Nolen said that as Madison grew in size these parks would simply be nighborhood gathering places and playgrounds, they were right, and so just let us stop and see if to a limited degree this is not already true.

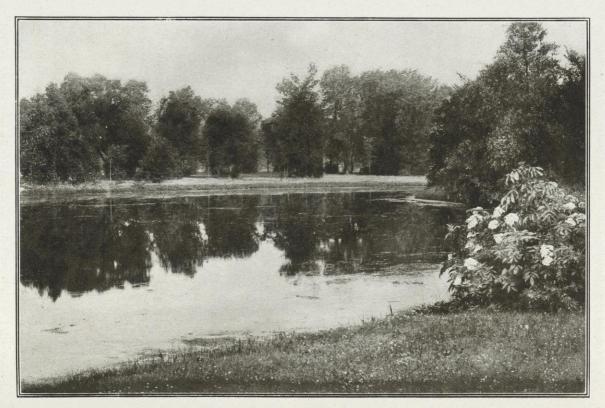

Tenney park used to be used, for instance, on a Sunday as a picnic ground by small parties and a somewhat scattered people walking along its winding paths with here and there a few benches occupied, but last season saw a great change in its uses. There was no more room for picnic parties at times but instead, thousands of people surged around and thronged every part of the park with the river full of boats until it almost became dangerous without special guards, and so they, too, were provided at other times. The large turf areas were used by children and adults at various games, with scarcely room enough at times, and also a fair patronage of the wading pool that had been put into operation, and so in the final plans for the second and last addition to this park, a sand area of about 100 square feet is also provided and will be in use for the little children. Now, the only incentive for all this change was a little music on a Sunday afternoon a few times during the season.

And so, just imagine what the condition would be when, after a few years years and this park is completed, and we should want to make the park popular. Then let us go over to Brittingham Park, with its beautiful and useful bath house and, a little further down the shore, the boat house. The drive along the water's edge, winding in its way for about three-quarters of a mile, its walks and magnificent planting of flowering shrubs, were to be its strong attractions, and so they are. But what of its real use and that which stood out so plainly last season, its playground at the foot of Monona street, and its ten to fifteen hundred bathers every fine day, both young and old, with the many boys who play ball, and all this where Monona street would have cut through the park had not the council acted wisely.

And now to Henry Vilas Park, and today our only hope for enough ground so as to enable us to have enough to spare for a few wild deer, kindly given to the association by Mr. T. C. Richmond, and then perhaps a few sheep to graze upon its beautiful meadows and a place for perhaps a very few years for those small picnic parties that used to occupy Tenney Park on Sunday.

So the use of Madison parks and the thought of a much diminished capitol park brings us only too soon to a realization that this work was begun none too soon and that a most serious consideration must be given to the uses of these various parks and unless the city will soon provide more playgrounds in other parts of this city, more and more of this park area must be used for playground purposes.

It must be remembered that our parks are not as yet finished products, and the use that is being made of them today is only a mere intimation of what is in store for the future; and even in their rough form, with no shelter, bridges or piers, it is sometimes hard to know just which way to turn. And at this point I want

LAGOON IN TENNEY PARK

to call your attention to the fact that with the action of the council at its February meeting, in taking away the money necessary with which to keep Mr. John Nolen to advise with us, we shall be handicapped in such a way that it will be felt by all who are interested in the parks and in the city, for at no time was the services of experts more needed than at a time when we are compelled to shift from side to side to meet the increasing demands of a growing city. Now just a word as to the use of the waters of the parks and the Yahara river. No place affords better shelter and fishing than do these waters and one has but to walk along the banks of the Yahara to be convinced of this fact.

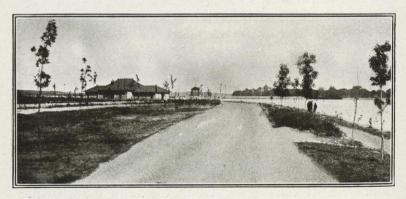

If we are to meet the growing use of these waters, much must be done and done soon in order to keep pace. We must open up the lagoons of Tenney Park to admit of free passage to and from the waters of the Yahara and we must create more frontage on the river by widening at some points and by dredging a loop between the Steensland bridge and the bridge of the Chicago, Milwaukee & St. Paul railway and into the property now owned by the city and unused at the present time; this would then make it possible for many more boats and would also improve the travel of boats up and down the river.

The more waterways we improve the more boats of all kinds will come into use. The dredging of the Yahara between Lakes Monona and Waubesa will act as an incentive, and by the time this work is done, which will be about two years, the number of boats will have increased about one-third, meaning a proportional increased use of the Yahara between Lakes Mendota and Monona. We must also take notice of the fishing within our parks; and to me this is very important, not alone that it adds to the use that is being made of the

parks. Every day from sunrise until sunset you will see men, women and children fishing from the banks of the lagoons and river, and all along the water front of Brittingham Park and Henry Vilas park; not only for amusement but to provide themselves with fish for food. This good fishing was brought about by the deepening of the water in taking out the materials for filling.

If we could get the combined weight of these fish, the catching of which was made possible by the building of the parks and the improving of our waterways, you would find that they would amount to several tons; thus a use of our parks by the people of the city who need it most, which is represented in dollars. Putting the average value of fish per pound at eight cents would mean a few thousand to say the least.

Now, in conclusion, let me urge the unanimous support, by every patriotic citizen, of the work of the Madison Park and Pleasure Drive Association. Let us observe closely the use of our parks and drives, that we may be able to work this problem out to the best possible advantage of all concerned.

BRITTINGHAM PARK

# Treasurer's Report

To the Members of the Madison Park and Pleasure Drive Association:

The following is a statement of the receipts and disbursements of the association for the past year.
