The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

Sandvik Bioline is available
ex-stock or in specially
manufactured materials in all the
product forms you are likely to
need for permanent orthopaedic
implants, coronary stents and
fracture management systems.
There's also Sandvik Bioline strip,
wire and tube for surgical tools
and medical devices.

Sandvik Bioline[®] - uncompromising quality for implant manufacturers

Sandvik Bioline is more than a stainless implant steel, it is a branding that embraces stockholding, worldwide distribution and full technical support.

Sandvik Bioline is available in two grades, 316LVM (ISO 5832-1) and High-N (ISO 5832-9). They are both high purity stainless steels that meet the requirements of all existing standards for medical and implant materials.
