The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

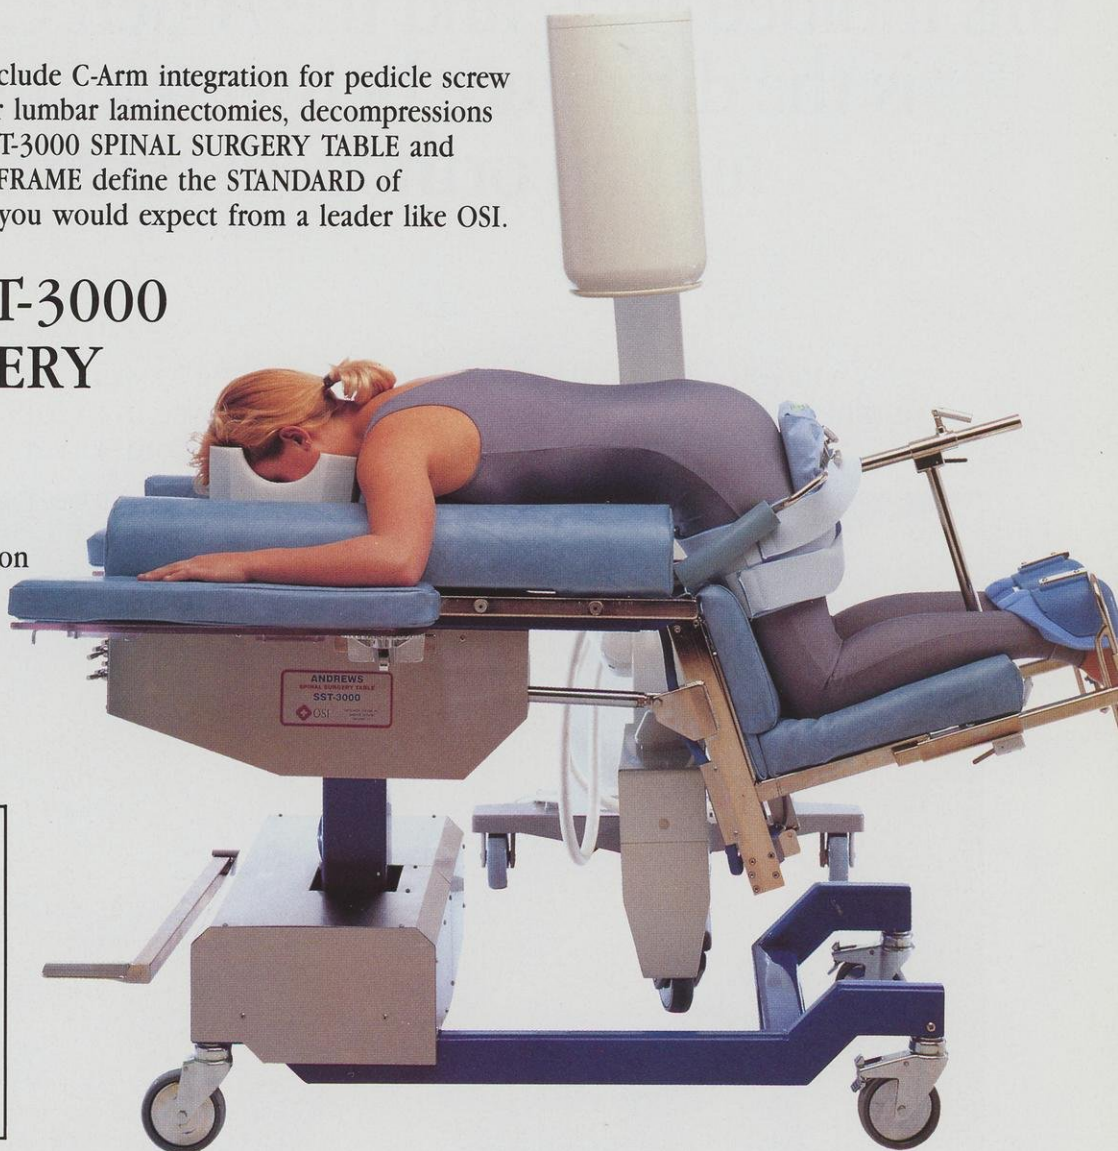

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

STATE OF THE ART SPINAL SURGERY POSITIONING

Whether your requirements include C-Arm integration for pedicle screw fixations or prone kneeling for lumbar laminectomies, decompressions and fusions, the ANDREWS SST-3000 SPINAL SURGERY TABLE and ANDREWS SPINAL SURGERY FRAME define the STANDARD of EXCELLENCE. Isn't that what you would expect from a leader like OSI.

ANDREWS SST-3000 SPINAL SURGERY TABLE

- Radiolucent Construction
- Designed for C-Arm Integration
- Built-in Torso Lift
- Silicone Gel Pad Cushions
- Knee/Chest or Prone Positioning
- No Patient Lifting Required

Both the Andrews Frame and Table are designed to eliminate vena caval compression resulting in minimal epidural venous bleeding and improved visualization.

Additionally proper ventilation and weight distribution are achieved, providing enhanced patient safety and comfort.

ANDREWS SPINAL SURGERY FRAME

- Attaches to Standard OR Tables
- Adjustable Tibial Support
- Seat with Lateral Stabilizers

- Unique Heel Cups off-load knees and redistribute the load to the pretibial area
