The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

LaMotte Service

IMPROVED KLINE ANTIGEN

for

PRECIPITATION TESTS FOR SYPHILIS

This improved Antigen is now being produced under an exclusive arrangement with the Mount Sinai Hospital of Cleveland, in whose laboratory the method of preparation was developed. Each lot of antigen is tested in this same laboratory and only approved Standardized Antigen is released by us for distribution.

Far superior in the sero diagnosis of syphilis.

May be used for tests on spinal fluid.

Antigen solution has excellent keeping qualities

Sensitive at low temperatures.

Prices and full information on the antigen and the new simplified compact outfits for these tests sent on request.

Your LaMotte Blood Chemistry Handbook* illustrates and describes many simple, accurate testing outfits developed by LaMotte Research Department in cooperation with recognized specialists.
