The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

Cornell Medical Center
New York, NY

Richard A. Schatz, MD

Heart, Lung and Vascular Center
Scripps Clinic and Research Foundation
La Jolla, CA

For expert opinion on new procedures and equipment, read the **Interventional Cardiology Newsletter**. Elsevier, the publisher of top-rated clinical journals such as *Journal of the American College of Cardiology*, *International Journal of Cardiology*, *American Journal of Hypertension*, and *Annals of Thoracic Surgery* is pleased to introduce a unique newsletter for the cardiologist: **Interventional Cardiology Newsletter**.

Each issue of this practical bimonthly newsletter provides a complete evaluation and overview of an important type of procedure relevant to the current practice of interventional cardiology. The newsletter features information not available anywhere else, in the form of editorials, survey results, interviews and analyses. In addition, you'll receive expert opinion on the economic considerations relevant to the equipment being analyzed.

The first issue of the **Interventional Cardiology Newsletter** covers laser angioplasty and features the results of a detailed coronary excimer laser angioplasty survey representing approximately 3,000 excimer laser cases. Available November 1992, the premier issue also includes an interview with Frank Litvack, MD, Co-Director, Cardiovascular Intervention Center, Cedars Sinai Medical Center, Los Angeles. Future issues will cover such topics as: atherectomy, stents, intracoronary ultrasound, as well as other diagnostic machines and interventional devices that have a clear influence on the practice of cardiology.

Interventional Cardiology Newsletter provides essential information for cardiologists who want to keep informed of the development of new procedures and devices that have a direct impact upon their practices. Take advantage of Elsevier's Charter Subscription Rate by entering your subscription now.
