DILLINGHAM DOVETAIL CONSTRUCTION

Blind Dovetail open

Blind Dovetail closed

Visible Dovetail closed

THE exclusive use of the blind and visible dovetail joints in the construction of all Dillingham cabinets and the knowledge of perfect enameling produces a product unrivaled in quality.

In addition to added strength this construction affords, it also provides a clear, smooth surface for the white enamel finish eliminating entirely the open joints so prominent and frequently seen on cabinets of cheaper and inferior manufacture.

The line of wall and recessed cabinets is extensive and complete—offering you a wide range of styles and prices to meet all your requirements in medicine and bathroom cabinets.

DILLINGHAM POPULAR FOLDING CHAIRS

The Strongest, Most Comfortable Light Weight Folding Chairs Ever Made

IT HAS taken more than thirty-five years experience, the development of a great deal of special machinery and all the manufacturing resources of this 67 year old concern to bring the Dillingham folding chair up to its present high state of development.

Comfort, beauty and strength are built into them so that today they are the acknowledged leaders wherever comfortable, light weight, durable chairs are used or sold.

Massive steam presses, built especially for this one task, bend the back posts of birch. There is no breakage; no impairment of the perfectly shaped and finished legs. Any one of the chairs will hold the weight of two 200 pound men—and there is nothing to get out of order or to weaken as the chair undergoes useage.

Seats are curved to fit the body. So is the back. The chair is as comfortable as any ordinary chair—more comfortable, in fact, for the purposes for which it is used. The patented construction makes the pinching of ones fingers impossible. Dillingham folding chairs are light in weight too and easy to handle and pack.

Particular attention has been paid to their appearance. Finished regularly in Natural, Fumed, Antique Grey or Mahogany, they harmonize perfectly with the regular furnishings of the home.

PATENTED JUNE 14, 1922

A Section of No. 1150 Chairs

We can furnish our Nos. 1150, 1170½, 1170 and 1180 Chairs in sections of two, three, four or five as shown in above cut.
