## THE INDUSTRIES OF WISCONSIN

---

It is a matter of common observation that most of the industries which are extensively carried on in any region are dependent to a degree, at least, upon the climate, or the natural resources, or the topography, or the situation, coupled with the stage of development, of the region in which they exist. Men who live by the sea tend to become fishermen and sailors. People who live on semi-arid lands raise flocks of sheep and goats and herds of cattle; they lead a pastoral and perhaps a nomadic life. Fertile soil leads to farming, forests to lumbering, and minerals to mining. Texas grows cotton; California, oranges; Iowa, corn; Kentucky, tobacco, and Maine, potatoes, because conditions of soil and climate make the growing of these crops profitable. The ever increasing needs of a people advancing in numbers and in wealth call for manufacturing. As manufacturing develops it becomes evident that certain regions possess advantages for carrying on particular lines of manufacturing; Pennsylvania, for example, with its vast coal fields is found to be especially well suited to making iron and steel, Illinois to making farm machinery, Minnesota to grinding wheat, and Washington to producing lumber. In each state manufacturing is related to the state's natural resources, or its climate, its situation, or its topography, or all of these.

The same principle applies to the parts of a state. Certain parts of Wisconsin produce much butter and cheese; others, tobacco, and still others potatoes. One city specializes in the manufacture of paper, another in the smelting of lead and zinc, and another in the making of farm machinery. In each of these places there are favoring conditions which have led to the building up of these industries. On the other hand, there are some industries which, under good management, thrive in almost any city. It is often puzzling to know why certain manufactories exist in the places where they are found, for there seems to be no natural reason why they should be there.

This does not mean that men are actually controlled in their enterprises by their physical environment; man is a resourceful being and he sometimes accomplishes things in spite of an unfavorable environment. More commonly, however, he sees that it is better to work in harmony with natural conditions than to disregard them. Therefore, men build paper and pulpmills near forests; they engage in dairying where grass and forage crops thrive, and they raise potatoes and rye on sandy soils.

A state is seldom a natural geographic unit. Parts of its boundaries are, as a rule, merely surveyor's lines. The same geographical conditions which are found in southern Wisconsin are also found in northern Illinois. There is no

\*Part I of the Wisconsin Blue Book for 1915 is taken in whole from Bulletin XXVI (1913) of the Wisconsin Geological and Natural History survey. Ray Hughes Whitbeck, associate professor of physiography and geography of the University of Wisconsin, is the author of this bulletin. In his preface is included the following: "Modern ideals of geography require that the important facts be traced back to their causes and forward to their consequences and this ideal has been kept constantly in mind. While this bulletin is informational rather than scientific in character, a cause-to-effect method of treatment has been followed. An earnest effort has been made to secure reliable information and so far as possible only statistics from official sources have been used, but even these are not free from errors. Some of these errors have been discovered and corrected; doubtless some others have escaped. In so brief a treatise, all of the industries of the state could not be touched upon; therefore only main lines of industrial activity and some typical examples are discussed." R. H. Whitbeck, Madison, June 1, 1913.

sudden change as one crosses the boundary from Iowa to Minnesota, yet one is classed as a corn state and the other as a wheat state.

Among the older states of the east, where industrial growth has proceeded farther than it has in the west, certain geographical influences are seen to have effectively directed their development. The negative influence of a thin soil and the positive influence of abundant water power slowly led the people of New England away from general farming and toward manufacturing. Of course there were other causes. New York's physiography was, of all the eastern states, most favorable to the building of a canal which should connect the Atlantic ocean and the Great lakes, and the building of the Erie canal turned the commerce of half the nation through that state. Manufacturing in Pennsylvania has been wonderfully stimulated by the state's mineral wealth. New Jersey, one of the smallest states, ranks among the first five in manufacturing, due very largely to an exceptionally favorable position. So it is that water power in New England, physiography in New York, minerals in Pennsylvania, and situation in the case of New Jersey, have exerted a directing influence upon the development of these states.

In a relatively young state like Wisconsin, industries have not reached a permanent adjustment, and the northern and southern halves of the state are in quite different stages. From the first settlement to the present the industries have been expanding in variety and in volume and the expansion is still going on. The first settlers in Wisconsin very generally found forests covering the ground. The hunting and trapping of animals for their furs was naturally a leading pioneer industry, and several of the most important trading posts of the northwest were within the present boundaries of the state. About 1850 began the rapid growth of the great lumbering industry. In the southern half of the state, agriculture and dairying quickly followed. Today (1912) Wisconsin is the home of nearly two and a half million people. Its farm property is valued at about one and a half billion dollars,—enough to pay the national debt of the United States and build the Panama canal in addition. Its forests are still producing tens of millions of dollars worth of lumber a year. Its mines and quarries yield nearly \$20,000,000 annually. Over 8,000 miles of railroads are in operation, and its manufactures in 1909 were valued at nearly \$600,000,000. Every year the value of Wisconsin's milk and milk products about equals that of the gold produced in the whole United States.

#### CAUSES UNDERLYING INDUSTRIAL GROWTH

The causes which underlie the industrial development of a state fall into two classes which may be termed the geographic, or natural, and the non-geographic, or human.

Some of these natural influences are:

1. The climate,—mild or severe, damp or dry, variable or equable.
2. The character of the surface,—level or rolling, hilly or mountainous.
3. The quality of the soil,—sandy, loamy, stony, swampy, fertile or sterile.
4. The presence or absence of forests.
5. The nearness of important markets, usually large cities.
6. The presence of valuable minerals and ores.
7. The availability of water powers or of cheap fuel.
8. The existence of easy traffic routes either by land or water, giving cheap transportation of products to markets.

Besides these natural influences, there are others which have no direct connection with the physical geography of the region—conditions which are brought about by man or arise from what man does. These may be called non-geographic, or human, influences. For example, the forests of Wisconsin led to the great lumbering industry; the cutting of the forests caused a decline in the amount of lumber which was cut and led to more refined forms of woodworking, such as the making of doors, blinds, sash and furniture. There was a geographical reason why lumbering was a great industry. The decline of lumbering and the change to a different type of woodworking was due to causes for which man is responsible.

Again, the building of a railroad usually exerts a stimulating influence upon the growth of industries along its route. Geographical conditions largely influence the engineers in deciding where a line shall go, but man is responsible for the final building of the road.

The state may put a bounty on the raising of sugar beets and stimulate the industry, or the government may make tariff laws which encourage certain in-

Diagram showing Wisconsin's growth in population from 1800 to 1910.

dustries. These are illustrations of non-geographic influences. Natural conditions may make an industry possible in a certain locality, but of course it is man who determines whether or not it shall be built up.

Furthermore, the stage of development in which a region is, at any given period, greatly influences the character of its industries. At one stage hunting and trapping are leading occupations; later, lumbering, and then agriculture and manufacturing. During these changes the climate, soil, physiography, min-

eral resources and geographical position of the state have not changed, but the industries have changed because of changing stage.

The industries at any given time depend

1. Upon the stage of development in which the region is at any time.
2. Upon the various natural conditions which prevail.
3. Upon what has been called "The purposeful activities of man."

Briefly stated, the chief natural conditions which have been influential in the industrial development of Wisconsin are:

1. Its northerly position and the consequent effect upon climate, crops and settlement.
2. The geological formations or the character of the bed rock and the consequent effect upon soil and topography.
3. The natural resources—such as soil, minerals, forests and water powers.
4. Its situation on the Mississippi river and Lakes Superior and Michigan, particularly the last.
5. Its position between Chicago and the northwest.
6. The regular topography of the land and the favorable effect of this upon agriculture and transportation.
7. The dense forests and their retarding effect upon the agricultural development of northern Wisconsin.

Each of these conditions has played some part—usually a decidedly important part—in the growth of Wisconsin's industries. What the part has been, we shall see as we progress.

#### MINERAL INDUSTRIES

While the mineral industries of Wisconsin are varied, and the output runs as high as \$20,000,000 a year, yet the state does not rank high as a mineral producer; less than one per cent of the nation's mineral output is produced in Wisconsin. The value of the mineral products falls far below that of farm products, forest products or factory products. Pennsylvania easily outranks all other states in the value of its minerals, chiefly because of its wonderful coal deposits. If we look for the reasons why certain states have great mineral wealth, we shall find that, as a rule, at least one of the three following conditions exists:

1. The state is mountainous. The depositing of metallic minerals quite commonly, though not invariably, accompanies mountain-building. Examples of these are California and Colorado, rich in the precious metals; or
2. The state is underlain by rocks of medium age, rocks deposited during some of the great coal-forming periods; Pennsylvania and Illinois are examples; or
3. The state contains rocks of very great age; such states, for example, are Minnesota and northern Michigan, the richest of the states in iron ores.

These are not the only conditions under which minerals are formed; the lead and zinc deposits of southwestern Wisconsin, for example, are an exception.

Wisconsin is not now a mountainous state, though it was far back in the early geological ages. The underlying rocks of the state are old, and were all deposited before the coal-forming periods, so we cannot expect to find coal in Wisconsin. While the state does have a large area of extremely ancient rocks, including formations which are frequently found to contain rich deposits of iron ore, yet when the northern boundaries of the state were fixed, it happened that what are now the most valuable iron ore beds, then unknown, fell to Minnesota and Michigan. Nevertheless, the mineral industries are of importance in portions of the state; for example, they played a large part in the development of the southwestern section, and present and future development of iron deposits in the northern part is likely to have an important influence in settling up that region.

The chief mineral industries are:

1. The mining of ores, such as iron, zinc, and lead.
2. The quarrying of stone, such as granite, sandstone, and limestone.
3. The digging of clay for making brick, tile, etc.
4. The bottling and sale of mineral waters.

## IRON MINING

The presence of metallic ores in the rocks arises from both the character and composition of those rocks and the geological experience through which they have passed. Iron, for example, is found in minute quantities in nearly all rocks. In some igneous rocks it forms as high as six to ten per cent. Iron gives the yellow, brown and reddish colors to soils, and it causes the rust-colored stain on rocks which have been exposed to the weather. In fact, the rocks, the soil and the underground water all contain iron. At times in the past, conditions have been right for the slow accumulation of this iron in beds, and for its further concentration through the work of underground water in carrying away other parts of the rocks until an ore is left in which iron makes up 50 to 70 per cent of the weight.

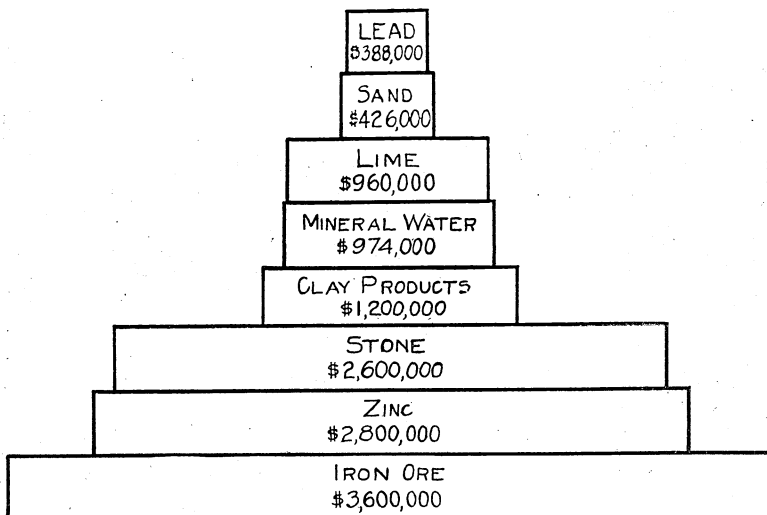

Diagram showing the relative value of the chief mineral products of Wisconsin in 1910.

The region about Lake Superior produces more than three-fourths of the iron ore mined in the United States. The ore is not uniformly distributed through the rocks but is concentrated in certain districts called ranges. At present the Mesabi range in Minnesota is the greatest producer, yielding over 50% of the iron ore mined in the United States. Two of the ranges extend into Wisconsin, though the richer part of each is in the upper peninsula of Michigan. The Wisconsin portion of the Penokee-Gogebic range is in Iron county; and a little of the Menominee range extends from Michigan across the state line into Florence county.

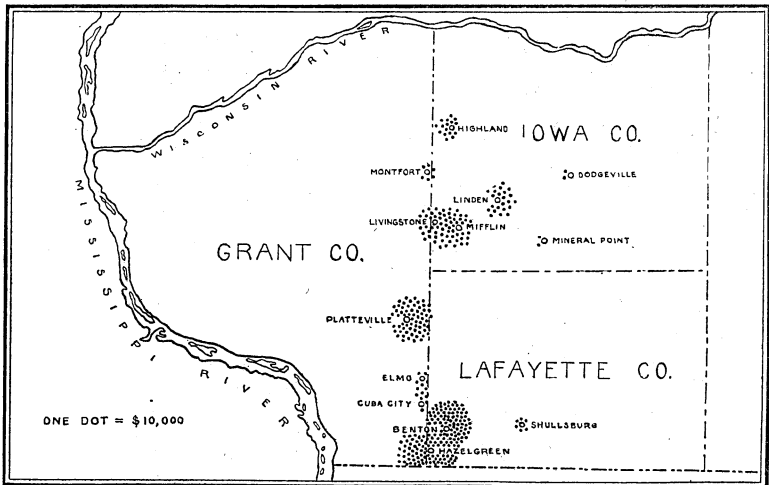

From three to four million dollars' worth of iron ore is taken from Wisconsin mines annually, the major part coming from Iron county. This goes to Ashland, whence most of it is taken east by the lake steamers; some of it, however, is smelted at Ashland. Besides the ores mined from the ancient rocks of the north and from the Baraboo range in Sauk county, a variable amount, averaging about 100,000 tons a year, is produced from two mines in younger rocks at Iron ridge in Dodge county.

Among the states, Wisconsin ranks fifth in the value of iron ore produced (Minnesota, Michigan, Alabama, New York, Wisconsin). Smelting, or the separation of the metallic iron from the rock in which it occurs, is done by heating

the ore. Coal, coke or charcoal is used for fuel. Coke, made from coal, is most largely employed. As Wisconsin has no coal beds, it is at a disadvantage in the smelting of iron ores, and comparatively little smelting is done. The earlier furnaces in Dodge county and elsewhere used charcoal, for wood was then abundant and cheap in Wisconsin. A smelter in Ashland now uses charcoal. Furnaces at Milwaukee and Mayville use coke. Although Wisconsin does not take high rank as a producer of iron ores, yet one of its cities, Superior, stands among the foremost ports on the lakes in the shipping of ore, all of which is mined in Minnesota. The ore is brought to the Lake Superior ports in trains which are run out over the lake on trestles, each a half-mile or so in length and containing hundreds of hopper-shaped bins under the railway tracks. Into these bins the ore cars are dumped, and from the bins long chutes deliver the ore to the great steamers, which carry it to various cities on the shores of Lakes Michigan and Erie, whence it is taken to the furnaces to be smelted. Ore steamers specially built for the purpose carry as high as 12,000 and 14,000 tons. So quickly are the boats loaded, and so cheaply are they unloaded by powerful machinery, and so large is the amount carried by a boat, that the freight rate is very low, being, in 1912, as low as 40 cents a ton from the head of Lake Superior to Lake Erie ports. The trip from Superior to, say, Cleveland, Ohio, and return requires from seven to ten days. This includes the loading and unloading of the ore.

#### LEAD AND ZINC MINING

The bed rocks of southwestern Wisconsin are made of sediments which were long ago laid down in the sea. In various layers of these rocks, and especially in one of the limestone layers (about 230 feet thick), lead and zinc ores are found. All of the Wisconsin mines are in the three southwestern counties, Grant, Lafayette and Iowa.

Map showing the chief lead and zinc producing districts in 1911. The five dots around Montfort, for example, indicate that about \$50,000 worth of lead and zinc was mined in that district in 1911, while near Platteville 60 dots indicate over \$600,000 worth mined in that district.

Lead ore was mined in Wisconsin by white men at least as early as 1827, and probably earlier. It lay nearer the surface than the zinc ore and was then more useful. The mining of zinc did not begin until about 1860. The early mining of lead was done by individual mine-owners or by companies with small

capital. In many cases farmers opened "holes" on their land and in winter took out small quantities of ore and in summer worked their farms. There was no railroad in the district until 1854. For a number of years the lead was laboriously dragged over almost impassable roads to the Mississippi river and sent to St. Louis and New Orleans, and thence much of it went by water to New York and other eastern cities. Sending lead from Wisconsin to New York by way of New Orleans was a slow process and cost \$30 a ton. After traffic through to New York city by the Great Lakes and the Erie canal was established, loads of lead, drawn by twelve to sixteen oxen, went all the way across Wisconsin to Milwaukee to be sent east. It cost in the neighborhood of \$10.00 a ton, even in those days of cheap labor, to haul the ore to Milwaukee. Now iron ore is taken by lake steamers from Superior to Buffalo for 40 to 70 cents a ton. Lead was also sent to New York by way of the Fox-Wisconsin water route, the Great Lakes and Erie canal. By this route the transportation cost was about \$18.00 a ton.

Lead is easily smelted and all of the ore was reduced to pig lead in the district. In 1840 there were 49 lead smelting plants in the state. About 1845 the district produced annually some 30,000,000 pounds. In 1833 a shot tower was built at Helena, near the Wisconsin river, and here a considerable amount of lead was made into shot. At present from 3,000 to 4,500 tons of metallic lead, worth from \$300,000 to \$400,000 is obtained yearly. In 1860 the district sent out 160 tons of zinc. In 1872 the output rose to 5,000 tons. From 1875 to 1900, the output usually ran below 5,000 tons annually. In recent years the amount mined has rapidly risen, and in 1911 exceeded 28,000 tons, valued at \$3,280,000. In the production of zinc Missouri ranks first, Colorado second, and Wisconsin third or fourth. For the most part, mining on a small scale has given place to mining by companies with large capital. Wisconsin produces about 1/12 of the zinc, 1/100 of the lead and 1/50 of the iron ore mined in the United States.

#### THE QUARRYING INDUSTRY

Because the region including Wisconsin has passed through a long and varied geological history, and because a variety of geological formations occur within the state, many kinds of rock are found. Rocks of each of the three great classes, igneous, metamorphic and sedimentary are quarried; some for building purposes, some for monuments and ornamental work, others for making lime, for paving blocks, for crushed stone and for other purposes. In a section where rock or stone is easily obtained people do not appreciate its usefulness. There are parts of our prairie states and parts of foreign countries where a rock or a large stone is not to be found, but must be brought long distances at a considerable cost. The presence of suitable stone near at hand for buildings, for foundations of houses, for making concrete, etc., is a greater advantage than we are likely to think. The building of good macadam, or crushed stone, roads is one of the greatest benefits to a region, and is done much more cheaply when stone does not have to be shipped great distances.

#### GRANITE

This is an igneous rock, that is, rock that has cooled from a molten state. At least thirteen differently colored and textured granites are quarried in Wisconsin, ranging from beautiful red to somber gray and from fine-grained rock to rock with crystal faces as large as a half dollar. The beauty of some of these granites, and their durability, place them among the finest granites produced anywhere. The splendid sarcophagus in which the body of General Grant lies, in his tomb by the Hudson river, is carved from granite quarried at Montello, Marquette county.

There are scores and perhaps hundreds of places in the northern half of the state where granite may be quarried. The supply is almost inexhaustible. The principal producing areas are in the vicinity of Montello, Berlin, Utley, Marquette, Red Granite, Waupaca, Wausau, and Amberg. Much the larger part of the granite quarried in the state is used for paving blocks. Wisconsin ranks fourth or fifth among the granite producing states.

## SANDSTONE

This is a sedimentary rock, formed by the natural cementing of sand. Sandstone is the bed rock over a considerable part of the state. Practically all of the sandstone in the state which is now used for building purposes belongs to what is known as the Potsdam formation. Along the shore of Lake Superior is an older sandstone which is colored a deep red or brown by iron oxide. In the central and south central part of the state the sandstone is usually, though not always, light yellow. The brown stone quarried near Bayfield, Washburn and other points on or near Lake Superior was formerly much sought and was sold widely. Many of the beautiful public buildings of Wisconsin and neighboring states are built of it, e. g. the Central High school of Duluth, the law school building of the University of Wisconsin at Madison, and the Lumber Exchange building of Minneapolis. The change of style to light colored stone has in recent years practically destroyed the market for the brown stone of the Lake Superior region.

The Potsdam sandstone, quarried at various places in the southern half of the state, is mostly used in the locality where it is quarried, for the foundations of buildings, piers of bridges, etc. A variety known as Madison sandstone is quarried near that city and has been used in the construction of several of the state university buildings. The quarry at Colfax sends considerable stone to St. Paul, the nearest large city.

## LIMESTONE

This is also of sedimentary origin and forms the bed rock over more than a third of the state. There are more limestone quarries in Wisconsin than any other kind, though the stone is not widely used for buildings. However, the old state capitol, now torn down, was built of limestone from the Bridgeport quarry in Crawford county.

The limestones of Wisconsin are chiefly used for three purposes:

1. For foundations, piers, arches, etc.
2. For crushed stone to be used in making concrete, for railroad ballast, or for macadam roads.
3. For making lime.

No other kind of rock quarried in the state is so widely useful. Two million dollars, the amount reported, does not by any means measure the annual value of this stone to the people of the state, for much that enters into local use is never taken into account in the state or government reports.

## LIME

The burning of limestone to make lime is common in the eastern counties and the value of the lime amounts to about a million dollars annually. Wisconsin is one of the leading producers.

## OTHER KINDS OF ROCK

Granite, sandstone and limestone make up more than nine-tenths of the rock quarried in the state. A few other kinds, such as quartzite, rhyolite, greenstone and gneiss are quarried in limited quantities, but their use is not large.

## CLAY PRODUCTS

Kaolin, the chief ingredient of clay, results from the decay of certain minerals, particularly feldspar. Clay is one of the most indestructible of substances. It is so exceedingly fine that it floats for a long time in water before it settles, and when washed into lakes or into the sea, it sinks very slowly to the bottom,—usually where the water is relatively quiet. The fine clay sediments thus deposited may afterwards be compressed into a shale rock or they may remain as beds of clay which may eventually become parts of the dry land.

Shale may be ground up by glaciers, or other agencies, or it may weather back into clay and again be deposited in beds. Because clay and quartz sand are so indestructible they constitute the greater part of all soils. It is only by the thorough washing out, by natural processes, of other substances usually mixed with it that clay becomes pure enough to be used in the manufacture of finer grades of clay products, like pottery. But in hundreds of places in the state clay is found which is suitable for making brick and tile. The total value of the clay products of the state amounts to over one million dollars annually.

MINERAL WATERS

The mineral springs of Waukesha have attained a nation-wide reputation. Much the larger part of the state's mineral waters that are bottled for sale comes from this city. Over 6,000,000 gallons, (nearly 50,000,000 pints) are

Map showing location of mineral springs producing and selling mineral waters. The number enclosed in a circle indicates the number of springs at that place. Wisconsin leads in the annual value of mineral waters produced.

sold annually. These mineral springs have been an important influence in the growth of the city of Waukesha. The hotels and sanitariums which were built because of the mineral waters attracted thousands of people yearly.

In the annual value of commercial mineral waters (about \$1,000,000) Wisconsin is foremost among the states.

## SUMMARY

While Wisconsin does not rank high in the value of mineral products, yet its mineral industries are important. Since its bed rocks were all laid down before the coal-forming periods, Wisconsin has no native coal. Although the ancient rocks around Lake Superior contain exceedingly rich deposits of iron ore, the richest beds now known lie outside the boundaries of the state, but further exploration may reveal abundant ores in regions as yet unworked. The most productive of the iron mines at present are in Iron county. In one of the thick limestone formations of southwestern Wisconsin are deposits of lead and zinc ore. The lead was mined first and the deposits which were worked in the early days are exhausted, the lead now being obtained as a by-product of zinc mining. Zinc is actively mined, and Wisconsin ranks third or fourth among the states in the production of this ore. Granites of large variety and high quality are quarried in the central part of the state; red and brown sandstone are found near Lake Superior; buff sandstone is quarried in the south-central and western counties, especially at Madison; limestone is quarried at many places, particularly in the eastern part of the state. The clay products, the lime, and the mineral waters of the state each yield in the neighborhood of a million dollars annually. In the years around 1911, the total reported value of all minerals produced in the state was nearly \$20,000,000.

## FOREST INDUSTRIES

## UNDERLYING CAUSES AND INFLUENCES

For some reason, not fully understood, the prairies of the United States, excepting along the streams, did not have a forest covering when the white man came. A part of southern Wisconsin was included in the prairie belt, but most of the state was covered with timber, the most valuable of which was the white pine of the north. The pine forests of Wisconsin were a part of the long belt that extended through New England, New York, Lower Canada, Michigan, and Minnesota.

Trees are one of nature's crops and marked differences in soil and climate give rise to differences in kinds of trees. Pines are easily masters in poor, sandy soils. Not that pines prefer poor soil; they grow taller and harder in loamy soil. The growth of a forest is a struggle among the trees for existence, and those that are fittest to survive in that particular place, crowd out others and gain possession of the land, although one kind of tree is never able to gain a complete monopoly. On the poorest forest soils in Wisconsin, the jack pine usually predominates; on the medium grade of sandy soil, the Norway pine, and on the better of these soils the valuable white pine. On the mixed soils, mixed forests of pine and hardwood grow.

Following are the chief forest trees of northern Wisconsin: It will be noted that each kind of tree has its favorite habitat.\*

White Pine was found in all parts of Northern Wisconsin as scattering mixture in the better hardwood mixed forests of the heavy soils, predominant on lighter sandy and gravelly loams, and as pinery proper on the extensive loamy sand areas. It is the largest and most valuable tree of the region.

Red Pine (Norway pine) grew on all sandy pinery areas.

Jack Pine, either pure or mixed, stocked all poor sandy lands.

Hemlock grew on all clay and loam lands of the eastern half of northern Wisconsin. It was mixed with hardwoods or predominated in bodies of variable extent. Much still remains.

Cedar grows in the swamps and on moist lands.

Tamarack is the common tree in the northern swamps.

\*See Roth, Filibert, Forestry Conditions of Northern Wisconsin, Bulletin No. 1, Economic Series No. 1 of the Wis. Geol. & Nat. Hist. Sur. (1898). This bulletin contains a detailed forest map, statistical tables and an excellent account of forest conditions up to 1897.

Spruce is a small tree on the moss-covered bogs and a medium-sized tree on the more humid portions of the loam and gravel land of mixed forests.

Basswood is common in all hardwood forests.

Birch is predominant in the hardwood forests within the hemlock area, but rarely is found in the regular pinery.

Elm and Maple are common in all hardwood forests.

Red Oak is common on both sandy and clay soils, but white oak is scarce.

Ash is generally restricted to the swamps.

Aspen (commonly called poplar) is common on nearly all soils.

## THE RISE AND DECLINE OF LUMBERING

When Jean Nicolet came to Wisconsin in 1634, more than one hundred billion feet (board measure) of white pine stood in its splendid forests. Today these white pine forests are scarcely more than a memory; but for forty years lumbering was the dominant interest in the northern half of the state. Into the pineries every winter went small armies of men. Down its rivers every spring the river-men drove thousands upon thousands of pine logs. Along these rivers were hundreds of sawmills. Around the mills grew up the lumbering towns, many of them the cities of today. Almost every city north of a line drawn from Fond du Lac to La Crosse grew up as a lumber town. When lumbering was at its height, a single mill at Chippewa Falls cut 65,000,000 feet annually and one company cut and drove down the Chippewa river 400,000,000 feet in a single season. In some of the best areas, a million feet of pine was cut from a forty-acre tract. It is said that a single tree cut on the Jump river scaled 7,000 feet of lumber which, at the present retail price of finished white pine would be worth \$250. Yet the land upon which such timber stood not infrequently was purchased for a few dollars an acre.

Diagram showing the rise and decline of lumber production in Wisconsin, 1850 to 1910. Figures refer to rough lumber only.

Naturally the trees near the rivers were cut first, for the principal method of transporting the logs to the mills was by floating them down the rivers. At first only the best parts of the choice trees were taken. Each season the logging camps pushed farther up the streams and farther back from the banks as the timber was cut away. The logs were hauled by horses or by logging railroads to the rivers, and by thousands were piled on the ice and along the banks, awaiting the spring break-up, when the melting snow turned the river into a torrent.

The sawmills were practically always built on the banks of some river or creek. The logs came down the river and were held in the boom, and during the spring and summer were cut into lumber.

Like all of our great industrial movements in the United States, the lumbering industry moved from east to west. It did not assume large proportions in Wisconsin until 1870. In 1900, Wisconsin passed Michigan and took first rank among the lumber-producing states, a place which it held until 1905, when it yielded the place to Washington. At the industry's height, the value of the

lumber produced reached well towards \$70,000,000 a year, or more than the average annual value of the gold mined in the entire United States.

The United States Census Bureau gives the following as the annual value of the rough lumber cut in Wisconsin in the different census years. It must be borne in mind that these figures represent value at the mills. The lumber was finally sold to the consumer for much more than this.

1850	about	\$1,250,000	1890	about	\$61,000,000
1860	about	4,500,000	1900	about	58,000,000
1870	about	15,000,000	1905	about	44,000,000
1880	about	18,000,000	1910	about	30,000,000

There were upwards of a thousand lumber mills in the state during the years of greatest activity. Many of these were very large, cutting many millions of feet of lumber annually. Some of these great mills still exist. The present tendency is toward fewer mills and larger ones, for in most cases the logs must now be brought to the mills by railroads, and it is economical to concentrate the work at points with good railway facilities. The output per mill averaged 35 per cent greater in 1905 than in 1900.

At some time in the past, if not at present, practically every village and city in the timbered parts of the state, had one or more sawmills; some had a dozen. But those places which were selected for the mills of the great lumber companies became centers of a vast business.

During the most active logging years, 1895 to 1900, there were invested in the sawmilling industry more than \$100,000,000, a sum equal to one-third the assessed value of all the land in the state. The lumber companies paid out in wages from fifteen to twenty million dollars annually.

#### EVOLUTION OF WOODWORKING INDUSTRIES

In an expanding nation like the United States industries are constantly undergoing a process of evolution. This is conspicuously true of lumbering and wood-working in Wisconsin. The early mills, as a rule, simply cut the logs into rough lumber and sent it to market in this form. The enormous quantity of

Diagram showing the amount of pulp wood consumed, by states, 1909. (From Bull. U. S. Forest Service)

logs which poured into the mills left them little time to do more. As long as the supply of logs kept the mills employed in cutting rough lumber, there was no pressing reason for carrying the operations beyond that stage. But when the supply of logs began to diminish, many mill owners added machinery for planing, matching, or otherwise finishing the lumber. In this way they kept their plant employed, utilized waste products and made use of other kinds of wood than pine. As time went on many mills found it impossible to get sufficient

logs, and some shut down entirely and were dismantled. Other sawmills that were favorably located for securing logs or for marketing their products, became also planing mills; some carried the process of manufacture still further and made doors, blinds, sash, moldings and all kinds of shaped lumber for interior and exterior finishing. Thus, by combining in one mill phases of the business which had formerly been done in two or three mills, the mill owners were enabled to continue operations, and much less of the timber went to waste. In fact, the price of wood has so advanced that very little indeed is now allowed to go to waste.

In other instances the evolution progressed in another direction. At certain places men or companies owned dams, had valuable water rights, and owned a large amount of other property, much of which could not be moved or disposed of to advantage; yet they could no longer get sufficient logs to continue their sawmilling operations. Scores of men and companies came to face this condition in the years following 1905. These men were familiar with lumber and they knew its sources, qualities and markets. Quite naturally they turned to some line of manufacturing in which their accumulated experience and knowledge could be employed. The chief raw material of the vast region lying north and northwest still was wood. The white pine was disappearing, but spruce, hemlock, basswood, maple, birch and other woods remained. Out of these conditions almost inevitably grew the varied forms of woodworking which constitute a large part of the manufacturing of the northern half of the state.

In these establishments some forty different kinds of wood are used, not all of which, however, come from Wisconsin. Most of these establishments originally got their lumber from Wisconsin but at present half of it comes from outside the state.

Our state board of forestry lists twenty-one different classes of wood-using industries. So extensive is the industry that in 1900 one-fourth of all the wage earners reported for all lines of manufacturing were engaged in the manufacture of lumber and timber products, and nearly one-fifth of them in 1905.

In 1900, 18 per cent of the value of all manufactures in the state was lumber and timber products. Despite the decline of logging, the woodworking industry as a whole is still on the increase. There were twenty-six more planing mills and twenty-two more furniture factories reported in 1905 than in 1900. The number of sawmills is, of course, declining. White pine ceased to be the leader in 1910 and hemlock took its place.

Closely associated with the production of hemlock lumber is the production of hemlock bark, used in the tanning of leather. More than a million dollars' worth of this bark is used annually in the state.

Lumbering has passed its zenith in Wisconsin. The finest of the white pine has been cut. Vast areas have been cut over and burned over and now yield no merchantable timber. Yet the forest resources of the state are far from exhausted. It is estimated that 45 per cent of the area of Wisconsin is still woodland of some sort. Good timber still remains and for a long time the forests will yield an annual income measured in millions of dollars.

#### SUMMARY.

Originally nearly all of Wisconsin was covered with forests, only a few thousand square miles in the south being in the treeless prairie region. The heaviest forests were in the northern half of the state. The most valuable timber was the white pine which is now nearly exhausted. Several million acres of mixed hardwoods, hemlock and inferior pine remain. Nearly half of the area of the state is still in some sort of woodland. The character of the forests depended upon the conditions of the soil and climate; the pines predominated in the sandy soils and the hardwoods in the clay loam soils. Logging culminated in the years between 1890 and 1900. From 1900 to 1905 Wisconsin stood first as a lumber producing state; the value of the rough lumber reached nearly \$7,000,000 a year, four or five times the value of mineral products, but somewhat less than the present value of dairy products. In these years lumbermen had more than \$100,000,000 invested in the industry and yearly paid out the great sum of fif-

teen to twenty million dollars in wages. For many years the annual value of lumber produced in Wisconsin exceeded the annual value of the gold produced in the entire United States. The present output of rough lumber is about \$30,000,000 a year. Most of the desirable timber near the rivers or railroads has been cut. The present tendency is toward fewer sawmills and larger ones, situated at advantageous points. Log-driving on the rivers is practically past, railroads now doing about all of the hauling. Wisconsin's many rivers, fairly even topography, and nearness to the Great Lakes and Mississippi, favored the rapid exploitation of its forests. With the decline of logging there has come an evolution in the woodworking industry. All kinds of wood are being utilized; waste is more and more carefully avoided; instead of merely sawing rough lumber, many mills carry the manufacturing process farther, and make doors, sash, blinds, all kinds of finished lumber and millwork, packing boxes, veneer, etc. There has come a marked development of pulp and paper making, furniture manufacturing, and leather tanning. Manufacturing of wood products is the largest single line in the state and nearly a fifth of all the wage earners engaged in manufacturing are engaged in the wood-using industries. These mills are, of course, most largely found in the northern half of the state.

#### AGRICULTURE

The upper Mississippi valley is a region of unusual fertility; one of the garden spots of the world. Wisconsin is included in this area. In the southern and eastern parts of the state, practically the whole area is farm land. In

productiveness and value the land of this region ranks with the best in the United States. In the central part of the state is an area of sandy soil of much lower productivity, while in the northern part there are several million acres that are still in the condition of cut-over, burnt-over and forest-covered land, awaiting development. Hence, when the whole state is taken into account, Wisconsin is outranked by such prairie states as Illinois and Iowa, and by some of the eastern states that have been settled longer. Among the states Wisconsin ranks about tenth in the annual value of farm products.

The following facts are here presented to give a basis for understanding agricultural conditions in the state:

1. As yet, only 60 per cent of the land is actually in farms. The remainder is chiefly wild land owned by lumber companies and land companies, by railroad companies, by the state, by the United States (Indian reservations), or is otherwise held by people who do not use it for farming.

2. About three-fifths of the area which is classed as farm land is tilled or is cut for hay. This means that not over 4 acres in every 10 of Wisconsin lands are devoted to field crops but much of the unimproved land in farms is used for grazing.

While this ratio of improved land to total area is nearly double that of the United States as a whole, it is less than half that of the states of Illinois or Iowa.

3. About one-half of Wisconsin is woodland and a considerable portion of this still consists of valuable forests.

4. Yet, the amount of land actually under cultivation in Wisconsin is greater than the total area of some of the eastern states and greater than the area of some European nations.\*

6. The value of the farm land of the state was about a billion dollars in 1910—enough to pay the entire interest bearing debt of the United States—while the farm buildings, machinery and live stock had a value of nearly 500 million dollars in addition. In this connection see United States census tables in this volume on value of farm property in Wisconsin.

8. Taking all of the farms together, the average size in 1910 was 119 acres, and the average value about \$8,000.

9. The farm lands of the state nearly doubled in value during the decade between 1900 and 1910.

10. The average yearly value of farm products is about 20 times that of the mineral products; it is also more than that of manufactured goods, when the value of the materials used in making those goods is deducted from the value of the finished product.

SOIL BELTS

The origin of Wisconsin soils will be better understood if it is remembered that there are three main geological divisions of the state. These are,

1. The ancient crystalline rocks of the northern part,—somewhat more than one-third of the total area of the state. Most of the ancient crystalline rocks

of the north are covered with a mantle of glacial drift, in some places sandy and poor; elsewhere, composed of a mixture of clay and sand, forming a fertile loam.

2. The sandstone rocks of the central portion,—less than one-third of the total area. The eastern half of the sandstone belt is mantled with glacial drift and is decidedly better than the driftless half which is largely sand, in which many crops will not thrive.

3. The third portion of the state, the limestone region, is the most fully developed and most productive part of Wisconsin. Whether the soil is glacial or residual, it is fertile. The undeveloped condition of the northern counties makes it impossible to compare them fairly with the well developed, thickly settled southern counties. From 90 to 100 per cent of the land of the limestone region is in farms; the value of this land is highest in the east and southeast, where it averages from \$50 to above \$125 per acre. In the sandstone area only about half of the land is in farms, the remainder being woodland, marsh or other uncultivated land. The eastern or glaciated portion of the sandstone area, into

which considerable clay was carried by the glacier, is the more advanced part agriculturally. There are portions of the northern third of the state, in which only 14, 10, 5 and even 3 per cent of the land is in farms, the remainder being largely timberland, and cut-over land.

#### NORTHERN WISCONSIN

Why is northern Wisconsin so largely undeveloped?

The main reasons are the situation of this part of the state, and the heavily forested condition of the land, requiring time to remove the timber and large expense to put it in condition for farming.

The following digest of farming conditions in Northern Wisconsin is found in Bulletin No. 196 of the agricultural experiment station of the University of Wisconsin, *Opportunities for Profitable Farming in Northern Wisconsin*, by E. S. Delwiche (1910).

The farm land of Northern Wisconsin is still to a great extent undeveloped but farming in this section has passed beyond the experimental stage. Not all of the land in this section is suitable for farms. Much of it should be left for forest reserves but the larger part of this region, including about 10,000,000 acres, is available for farming. The soils of these lands are mostly fertile and well adapted to a variety of crops.

The climate is favorable to the rapid development of vegetation since the rainfall is well distributed through the growing season and unseasonable frosts are rare, due to the moderating influence of the Great Lakes. A variety of crops may be grown, including grasses, clovers, corn, small grains, potatoes, garden vegetables, small fruits and, in certain sections, the hardy tree fruits.

The leading type of farming for this section seems destined to be dairying, owing to the natural advantages of good grazing lands, favorable markets for dairy products, etc. Sheep raising will undoubtedly increase in extent as an aid in clearing land and in combination with the growing of such crops as peas and clover.

Fruit growing is a paying industry in some sections and is being rapidly extended, particularly in the vicinity of Superior and Duluth. Strawberries have proved profitable as the crop ripens later than in regions farther south and reaches the market at a favorable time. Trial orchards conducted by this Station have shown that selected varieties of apples yield well under good care.

The growing of special crops is profitable in certain sections upon soils particularly suitable to these crops. Field peas for feed and canning purposes give profitable returns upon the heavy clay soils. Potato raising is a paying industry in a large part of the sandy and sandy loam sections. The raising of clover for seed has given good returns in several localities. Sugar beets yield well on the loam soils and are above the average in sugar content, and wheat does well on the heavy clay lands near Lake Superior, yielding grain of high quality.

The experience of older settlers shows that farmers in this region should practice rotation of crops and grow clover to increase the humus and nitrogen in their soils. The greater part of the produce raised should be fed to live stock and the manure carefully returned to the fields. Small, well cultivated farms operated intensively are advocated as the most profitable.

1. Its northerly situation gives it a shorter growing season and long, cold winters. A portion of northern Wisconsin has a growing season of 100 to 120 days, while southeastern Wisconsin has from 140 to 150 days. The longer the growing season, the greater the variety of crops that can be successfully grown and the greater the certainty that these will mature.

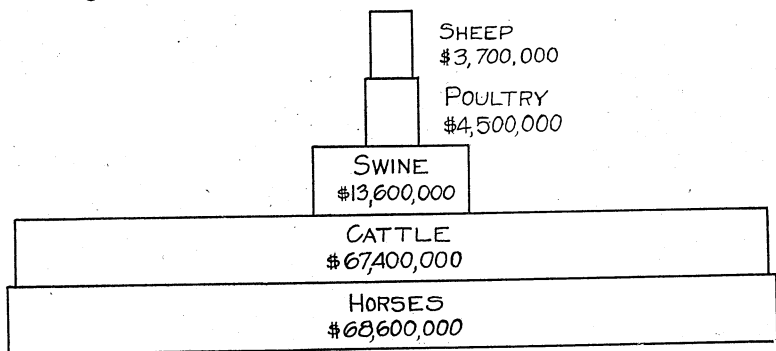

Diagram showing the value of different classes of farm animals, U. S. census of 1910.

2. It is much more difficult, and hence more expensive, to clear pine land than hardwood land, because pine stumps decay very slowly and are removed only with much labor.

3. Settlement and development proceeded from the southern and eastern part of the state, the part first reached by settlers.

4. The peculiar position of the northern part of the state, partly enclosed by two of the great lakes, removed it from the territory traversed by the earlier

trunk line railways between the east and west or between the Northwest and Chicago, while the southern half of Wisconsin lies directly in the natural path of the great traffic lines toward the Northwest.

Certain sections of the United States, like Ohio and Indiana for example, have profited enormously by their position. They lie athwart the natural arteries of the nation's trade. The trunk railways from east to west must pass through them. But regions which, like northern Wisconsin, do not lie athwart these natural routes, must wait until their own resources attract capital, settlers and railways.

#### THE SANDSTONE BELT

Since the farming conditions of the sandstone belt are generally below those in the limestone belt, there must be a reason. That reason is the character of the soil.† The eastern part of the sandstone area was glaciated and here the

average value of the land is about \$30 an acre,\* while the average value of the land in the unglaciated portion is about \$24.00 an acre.\* In one county it is

\$17.25 an acre, but this county had no railroad up to 1911. The limestone land which lies immediately east of the sandstone belt is valued at an average of \$61 an acre, or twice as much as the average glacial soil of the sandstone region, and two and one-half times as much as the average driftless soil of the sandstone region.

There are approximately 3,000,000 acres of sandy soil in this belt. These soils have three drawbacks:

1. Their low water-holding capacity,
2. The readiness with which they are blown by the wind,
3. Their general lack of fertility.

Map showing where the hay crop of Wisconsin is grown. Figures from census of 1905. Map furnished by the College of Agriculture.

Of the three important elements of fertility, phosphoric acid, nitrogen and potash, these sandy soils possess, on an average, one-half or one-third as much as the clay and loam soils. Yet, sandy soils have some advantages. They become dry and warm earlier in the spring, and hence are suited to early vegetables and small fruits. Certain crops which require frequent cultivating, like potatoes, thrive in sandy soils. The chief potato-growing counties of Wisconsin are in the sandstone belt. Rye grows well in sandy soil, and the leading rye-producing counties are in the sandstone area, and along the shore of Lake Michigan.

Buckwheat, a quick-maturing crop, is grown more extensively in the sandstone belt than in any other part of the state. On the whole, however, this middle belt of Wisconsin produces a limited variety of crops and the major part of the land is, as yet, producing almost no commercial crops at all.

#### THE LIMESTONE BELT

About two-thirds of this area has a glacial soil and the remaining third has a residual soil with alluvium in the main valley bottoms; there are also regions where loess covers the surface.\*

About one-tenth of the substance composing the Wisconsin limestones is clay,

which is practically insoluble in the underground water. The remaining nine-tenths of these surface rocks are slowly dissolved and carried away by the waters which come in contact with them. The soluble portions of the rock

\* Loess is a very fine, rich soil, believed to have been carried and deposited by the wind.

are leached out, leaving the less soluble and the insoluble parts to make up the soil. This residual material of the driftless limestone area is of varying depth.†

While it is true that most of the lime has leached out of these surface soils, enough remains to prevent acidity and keep the soil sweet. The exceedingly fine-grained texture of these clay loams gives them a high capacity for holding moisture, and this quality makes them excellent soils for grass, pasture land, and most grains. The extensive development of dairying and stock raising in southwestern Wisconsin is closely connected with this grass-producing quality of the

residual clay soils. In this respect it resembles the famous blue grass region of Kentucky.

There is in this belt another geographical condition which has a marked in-

† Professors Chamberlin and Salisbury report that: "Of about 1,000 measurements on slopes, steep and gentle, the average depth is 4.61 feet. On ridges, not including broad tracts of upland, the average as shown by 360 measurements is 8.06 feet. Two hundred and nineteen measurements on broad upland tracts give an average of 13.55 feet. The average for broad ravine bottoms, or short, wide valleys unoccupied by streams is 6.93 feet as indicated by 123 measurements. The average of 55 valley measurements is 18.17 feet." *Sixth Ann. Report, U. S. Geol. Survey, 1884-5, p. 254.*

fluence upon farming, perhaps as much effect as the quality of the soil itself, namely, the topography. Southwestern Wisconsin is hilly. The streams have eroded their valleys deeply into the limestone and in many cases entirely through it into the softer sandstone below. The hills are steep, and many of the slopes cannot be cultivated, for if they were plowed, the soil would rapidly wash away. So the farmers leave them in pasture land and woodland. Such conditions quite naturally give rise to dairy farming and to sheep and cattle

raising. Not that more cattle are raised on these hills than upon the level land, but that a larger proportion of the land is given over to grazing, while the raising of crops claims a smaller proportion.

However, in the region south of the Military ridge, excepting near the Mississippi river in Grant county, the streams do not flow in deep and narrow valleys: many of the valley sides have gentle slopes. Here most of the lands may be plowed, and here are found some of the best farms in Wisconsin. Great numbers of beef cattle and dairy cattle are also raised. In fact, the southern counties in the driftless area are noted for their dairying and stock raising.

## GLACIATED PART OF THE LIMESTONE BELT

The greater part of the limestone belt was covered by the glacier and this has modified the soil, the drainage, and the topography, and all of these changes have affected farming. In this belt the glacial soil is largely clay loam, with a mixture of ground-up limestone. It is of variable character from place to place, of greatly varying depth and often imperfectly drained. In productivity, this glacial soil does not differ greatly from the good residual soils of the same belt.

In many cases the natural course of the streams was obstructed by the hills and ridges of drift which were left when the ice melted away. This difference is illustrated in the Rock river basin, the western part of which is in the driftless area, and the eastern part in the drift-covered area. In the driftless portion, the streams divide and subdivide into a perfect and symmetrical network of branches, completely draining all of the land. In the drift-covered portion the streams branch in the most disordered way, drainage is imperfect and marshes are numerous.

From the standpoint of agriculture, then, two significant changes, besides the effect upon the soil, were introduced by the glacier:

1. The partial and irregular filling of valleys by the glacial drift. Where the surface was hilly, glaciation made it more even, while on level lands the glacier added new hills of drift, and made the surface more uneven.

2. By obstructing the valleys with drift, the glacier produced a very great number of lakes and swamps. Many of the shallowest lakes have since slowly changed to swamps, partly due to filling by sediment washed in by the streams, and partly due to the growth and partial decay of vegetation, making peat and muck. Some of these marshes are worthless or worse than worthless to the farmer. Some of them have been drained, and where the land is muck and not peat, it is often exceedingly productive.

The net results of the glaciers' visits have proved distinctly beneficial to agriculture, though a large part of the two and a half million acres of marsh land in Wisconsin must be charged to the work of glaciers.

## MARSH LANDS

In the digest of Bulletin 205 of the University of Wisconsin Agricultural Experiment Station, *The Development of Marsh Soils* (1911), Professors Whitson and Sievers say:

Wisconsin marsh lands comprise 2,500,000 to 3,000,000 acres, some of which lies in large marshes of 25,000 to 50,000 acres, but a large part is in small tracts. Through proper drainage and soil management much of this land can be made very productive and will add greatly to the farm area of the state.

The chemical composition and the possibility of thorough drainage are the chief factors which determine the value of marsh lands for cultivation.

The drainage of marshes is the first step toward improvement. On large marshes the organization of drainage districts and the coöperation of a number of adjoining land owners is necessary, but thousands of farms include some marsh land which can be readily drained by the owners without legal difficulties.

Fertilization of marsh soils is important on account of the unbalanced condition of the elements which they contain.

Acidity develops in marsh soils quite commonly where lime carbonate is not brought in from surrounding higher land. This acidity, however, does not interfere with the growth of crops provided the soil is properly fertilized. The acidity of marsh soils in the southeastern part of the state is very generally neutralized by the lime carbonate in the water seeping in from the surrounding higher lands of this limestone section.

The crops best adapted to marsh lands include corn, potatoes, cabbage, buckwheat, and timothy and alsike clover for hay.

## THE CHIEF CROPS OF WISCONSIN

The same progressive change which is going on in all other industries in the state is going on in farming. When Wisconsin had a virgin soil and a small population, wheat was a leading crop, and a surplus was produced. Now not

Diagram showing the value of leading crops grown in Wisconsin in 1909.

enough wheat is grown in the state to supply our own needs. Wheat is most profitably grown on new, low-priced land. As population increases and cities grow, land advances in value, taxes increase, and the farmer must get a higher return per acre in order to make farming pay. The average yield of wheat in the United States gives the farmer only a gross annual return of \$12 to \$15

an acre. The need of a larger return from the land and the growing demands of the cities lead to diversified farming, to poultry raising, garden farming, fruit growing, etc. Agriculture becomes more varied and more intensive. Over eight million acres, two-thirds of the improved land of the state, were devoted to seven crops in 1909. These crops, in order of value, were hay, oats, corn, barley, potatoes, tobacco and rye. Five million acres were devoted to the cereals and three million acres to hay and forage. Some crops, such as hay and potatoes, are raised by nearly all farmers. Other crops, such as tobacco and sugar beets, are raised by comparatively few. The extent to which certain crops are grown is shown by the following:

There were 177,127 farms in the state in 1909.

161,248 of these farms in 1909 raised hay as one crop.

158,658 raised potatoes as one crop.

136,670 raised oats as one crop.

129,335 raised corn as one crop.

87,540 raised barley as one crop.

40,170 raised rye as one crop.

9,390 raised tobacco as one crop.

The raising of live stock and poultry is another important phase of agriculture. In 1910 Wisconsin farmers had nearly 2,700,000 cattle, somewhat more than the total number of people (2,333,860), in the state. There were also 600,000 horses, nearly 2,000,000 swine, a million sheep and nine and a half million poultry.

Wisconsin devotes 40,000 acres to tobacco, divided as follows: Dane, 14,000; Vernon, 6,317; Rock, 6,270; Columbia, 2,920; Crawford, 2,228; other counties, 6,500.

Tobacco growing began in Wisconsin some fifty years ago. The annual crop amounts to about 50,000,000 pounds, worth from \$5,000,000 to \$6,000,000. Sandy loam is the best soil for tobacco; light clay loam and prairie soil are next best.

#### DAIRYING AND DAIRY PRODUCTS

The most notable development in agricultural lines in Wisconsin during the last decade has been in dairying. The state now stands at the head of the dairying states of the union. In 1912 there were over 3,000 cheese factories and creameries in the state, and the shipping of milk to cities is rapidly increasing in southeastern Wisconsin, due especially to the growing demands of Chicago and Milwaukee. The production of condensed milk is largely confined to the southeastern part of the state.\*

In Experiment Station Bulletin 210, (1911) on "The Progress of the Dairy Industry in Wisconsin," Professors C. E. Lee and H. C. Taylor say, "The dairy industry has become the most important branch of agriculture in Wisconsin. The changes which have occurred during the period, 1905 to 1910, show that both dairy farming and dairy manufacturing are securing a firm footing in the newly developed regions of the north. This, together with an increase in production in the older dairy regions, indicates a stable and permanent industry. Dairying as a farm industry is adjusting itself to the influences of the various factors, —soil, climate, competing enterprises, and location with respect to the markets." The following condensed statements give the chief facts concerning this great industry in 1910-12:

1. There are as yet relatively few factories or creameries in the northern part of the state, due to undeveloped agricultural conditions.
2. Cheese factories and creameries are few in seven counties in the central portion of the state—largely due to the sandy character of the soil, unfavorable to pasturage.
3. Practically all of the 3,000 cheese factories and creameries are in the region of clay soils whose water-retaining capacity favors pastures and meadows.
4. The creameries are most numerous in the corn belt; butter making is a response to winter as well as to summer dairying; corn, in the form of ensilage,

\*These condenseries handled 115,000,000 quarts of milk in 1909.

is the economical winter feed for cows; the corn belt closely coincides with the region of 150-day growing season, and in this belt cheese factories seem unable to meet the competition of butter factories.

5. The cheese factories almost monopolize a region near Lake Michigan and another in the rougher and higher lands of the southwest; for cheese making is a response to summer dairying, prospers where the weather, especially the nights, are cool, and hence where corn growing is less important.

6. Wisconsin leads in the making of Swiss cheese, chiefly carried on in the Swiss settlements in the southern part of the state. This cheese is more sensitive to soil and climatic conditions than any other kind; the Swiss factories are nearly all on land 900 to 1000 feet in altitude, and 95 per cent of the 275 factories are on limestone land, while 70 per cent of the 106 factories making Limburger cheese are grouped in the low valleys on sandstone land.

7. Northern Wisconsin, with its clay soil and cool climate, promises to develop into another great cheese making section.

8. Wisconsin's dairy products now amount to over \$80,000,000 annually, have doubled in ten years, and are greater than those of New York, heretofore the leader.

9. This trend toward dairy farming is most beneficial to the agricultural interests of the state.

The great prosperity and the rapid development of the dairy industry in Wisconsin cannot be explained alone on the basis of geographic causes. A far-sighted man, ex-Governor Hoard, and an institution, the College of Agriculture of the State University, through their continuous campaigns of education, have been significant factors in the growth of this industry. Natural conditions made profitable dairying possible; a well directed policy of education brought it to its present high development.\*

#### SUMMARY OF AGRICULTURE AND DAIRYING

Wisconsin is grouped with the agricultural states, although the gross annual value of its manufactures exceeds that of its farm products. About 60 per cent of the land area of the state is in farms. Nearly all of the southeastern third is improved; but eleven counties in the northern part of the state had, in 1910, only about one-tenth of their land in farms. About 36 per cent of the land area of the state is improved farm land, and the farm property is valued at over one and a half billion dollars. In the southeastern third of the state the average value of land is around \$100 an acre.

Speaking in very general terms, there are three soil belts in the state, based upon the character of the underlying rock:

1. The glacial soils on the crystalline rocks of the north, both sand and clay.
2. The light soils on the sandstone rocks in the middle belt, both glacial and non-glacial.
3. The clay-loam soils on the limestone rocks in the southern belt, both glacial and non-glacial.

Over four-fifths of the soil of Wisconsin is glacial, and it is, as a whole, somewhat better than the average soil of the driftless region, though one of the best farming regions in the state is found in the driftless area in the southern tier of counties. The wide difference between the well developed farming conditions in the southern half of the state and the partially developed condition of the northern half is due chiefly to three causes:

1. A milder climate and a longer growing season in the south,
2. The greater ease with which the hard wood lands were cleared,
3. Earlier and better transportation facilities,
4. A longer period of settlement due to the fact that the settlement of the

\*For a large part of the data on dairying, the writer is indebted to O. E. Baker formerly of the Agricultural College. For reviews of the growth of dairying see the following bulletins of the Wis. state proceeded from the south and east, and that the densest forests were in the north.

The northern half of the state is developing steadily and it is proving to be well adapted to farming, and especially to dairying. The sandy soils in the central part of the state are less productive than the clay soils, because of (1) their low water-holding capacity, (2) the readiness with which they are blown by the wind and (3) their lower degree of fertility. Rye, buckwheat, and especially potatoes are the profitable crops of the sandy soils.

Map showing where the corn crop of Wisconsin is grown. Based upon census of 1905. Map furnished by the College of Agriculture.

The glacial till and the residual loam of the limestone belt are largely clay. These soils hold water, contain considerable lime; and are the most productive.

The hilly character of the southwestern part of the state has led to dairying and stock raising. The clay soils favor the production of grass and hay and also lead to grazing. Cheese factories are particularly a response to summer dairying and are most numerous in the cooler parts of the dairying region. Creameries are a response to winter as well as summer dairying and are most numerous in the corn belt of the state.

In order of value, the leading crops of Wisconsin are, (1) hay, (2) oats, (3) corn, (4) barley, (5) potatoes, (6) tobacco, (7) rye, (8) wheat. The total

value of dairy products is greater than any of these; equal, in fact, to the leading two. Fig. 24.

#### FRUIT GROWING

Southern Wisconsin is in the same latitude as the famous fruit belts of New York, Ontario, and Michigan, but a significant climatic difference exists. The influence exerted upon climate by the Great Lakes is most effective on the lands which lie immediately east of these lakes, because the prevailing winds come from the west. Large bodies of water warm slowly in the spring and cool off slowly in the fall. Winds blowing over water-bodies, such as the Great Lakes, are cooled or warmed according to the temperature of the water over which they blow. The climatic effect of the Great Lakes, especially upon the lands lying immediately east of them, is to hold back the warm temperature of spring and thus to retard the opening of the sensitive buds of the fruit trees; thereby they are saved from injury or destruction from belated spring frosts. In the fall, the lakes have the opposite climatic effect. Their stored-up heat is given off to the passing winds and prolongs the summer temperatures in their immediate neighborhood; this makes a warmer autumn and permits the maturing of the fruit.

Lake Superior and Lake Michigan exert a beneficial climatic influence upon fruit growing in parts of Wisconsin, but it is less marked than it is in Michigan, because the prevailing direction of the wind is from the west. In Wisconsin the influence of the water is particularly effective in the Door county peninsula, situated between Green Bay and Lake Michigan, for this narrow strip of land has water on both sides. The Bayfield peninsula projecting into Lake Superior, is similarly though less influenced by the waters of Lake Superior. These two peninsulas are becoming important producers of fruits. Door county in 1911 had 2,000 acres of cherry orchards, a quarter of a million trees, mostly on the northern side of Sturgeon Bay. The success of fruit growing in this region will inevitably lead to its extension. Successful cherry orchards have yielded several hundred dollars an acre a year. The raising of strawberries in this region is also a profitable and growing industry.

Most of the counties bordering on Lake Michigan produce fruit successfully. In the region about Sparta, Monroe county, the production of small fruits, especially berries, has become a conspicuous industry; this is one of the leading small-fruit sections of the state. Here hundreds of acres are devoted to strawberries. The higher lands extending from the Baraboo ranges in Sauk county westward to the Mississippi produce apples abundantly. A region extending westward from Dane county and another made up of parts of Waupaca, Outagamie and Winnebago counties are also producing apples in considerable quantities. Experience seems to show that limestone soil and an upland topography are favorable to fruit trees and that sandy soil, muck soil or low-lying land is not favorable. It is now known that, during cool nights, the cooler and heavier air flows down the slopes of the hills into the valleys, making them colder than the slopes and thus sometimes causing the low valley lands to have frost when the higher lands escape. The fruits most successfully produced are apples, such as the Dutchess, McMahon and Wealthy, cherries, berries and plums. Cranberries will be spoken of separately. Pears, peaches, winter apples and grapes are grown, but scarcely as yet on a commercial scale. Berries of nearly all kinds can be successfully grown in all parts of the state.

#### CRANBERRIES

Wisconsin is one of the few states in which cranberries are grown on a commercial scale. During the decade from 1890 to 1900, the state produced approximately one-eighth of the cranberries grown in the United States or over 100,000 bushels annually. Connecticut, New Jersey and Cape Cod are still larger producers. Cranberries grow in marshy soil, or bogs. The best type is a peat bog with an acidic soil, capable of being thoroughly flooded with soft water when flooding is desired, and capable of being readily drained when desired.

There are thousands of acres of marsh lands suited to cranberry-growing in Wisconsin; about 2,500 acres are now producing. The chief cranberry region is the extensive marsh lands of Jackson, Juneau, Wood and Monroe counties, in the region of the residual sandy soils of the driftless area. The cranberry industry requires that an abundance of sand be available for sanding the bog.

## MANUFACTURING

## CONDITIONS AFFECTING MANUFACTURING IN WISCONSIN

Manufacturing in a small way takes place even in a frontier community, but manufacturing on a large scale takes place only in the developed, thickly populated, and wealthy parts of a country. In the United States, development began in the east and has moved westward. Massachusetts and New York, for example, have had time to build up manufacturing more extensively than Ohio or Illinois, and Ohio and Illinois have had a longer time than Wisconsin or Minnesota. A state's development along industrial lines is affected by a variety of influences. •

Diagram showing the growth of manufacturing in Wisconsin from 1850 to 1910.

Manufacturing is one of the forms of activity in which men engage for profit. We sometimes speak of the growth and decline of a certain industry, say the sawing of lumber, as if it came into being, grew, and declined because of some power inherent in itself—as if it were a kind of organism. The fact, of course, is that the growth of an industry is the result of man's work, directed by his intelligence and succeeding or failing largely as he is wise or unwise in what he does. While the impelling force behind industries is man, yet man can make an industry successful and profitable only as he works in harmony with the natural conditions around him. Rarely can he arbitrarily declare that this industry or that shall be developed in a given place. For example, he cannot successfully manufacture cotton goods where raw cotton is very difficult to secure, or silk goods in remote parts of the country far from the centers of wealth and population. He cannot operate cheese factories or creameries in sections where grass does not thrive. He cannot make iron smelting profit-

able in a place far removed from both the coal and iron ore-regions. In short, man must take account of a variety of considerations when he is about to enter upon an important industrial undertaking. Since manufacturing is carried on for profit and the products must be sold in a competitive market, men find that a profit can be made only when the articles or goods are produced under favorable conditions; conditions which make many economies possible. In so far as he is shrewd in selecting a phase of industry which fits the environment in which it is to be conducted, in just so far man has taken the first steps toward success in his enterprise. His undertaking is not likely to prosper unless it is well suited to its location, but it is not sure to succeed even though it is thus well suited. In other words, the location may prevent, but it cannot insure success. Recognizing the importance of wise and efficient direction on man's part, we shall discover that the manufacturing industries of Wisconsin, as of any other state, are to a large degree an outgrowth of certain natural or geographical conditions which prevail there; the industries are a response to their geographical environment.

The earlier the stage of development in which a state or a region is, the more fully its industries are shaped by natural conditions. The early manufacturers in Wisconsin had a limited choice among the lines in which they might engage. There were sawmills, planing mills, tanneries and woodworking factories because the country had forests. Only industries which utilized the raw materials obtainable near by could succeed. As time went on, and more people came, and railroads furnished better transportation, men had larger choice among the lines of manufacturing which they might carry on. Yet it is still true that manufacturing in Wisconsin is prevailingly shaped by the natural resources of the state. With occasional exceptions, one can discover why a certain phase of manufacturing exists in a certain place. This is not true to the same extent in the older states of the east. For the more advanced the stage of industrial development, the less simple are the causes which determine men's choice of the enterprises in which they engage. Where population is dense and transportation facilities are ample, there is a market for everything, and a person may pursue any one of several lines of manufacturing with almost equal advantage. The cities of the North Atlantic states may manufacture hundreds of kinds of things at a profit, even though the raw material may be brought long distances. The dense population of these states provides a ready market. For example, of some twenty-four leading lines of manufacturing carried on in New Jersey, only two or three use raw materials produced to any considerable extent in the state. Much the same is true of three of the New England states. But in a state like Wisconsin, whose population is still rather small and scattered, whose northern half is just passing from the lumbering to the farming stage and most of whose southern half is in the agricultural stage, the prominent lines of manufacturing are usually based upon the natural resources of the regions in which they exist. The chief exception to this will prove to be Milwaukee, for Milwaukee has passed the stage of industrial development which prevails elsewhere in the state. To a certain extent it will also be true of other cities in the southeastern counties.

#### IMPORTANCE OF TRANSPORTATION

Manufacturing involves the bringing together of raw materials and the distribution of finished products, and means of transportation are an all-important factor. Water transportation is cheaper than rail, and cities which can offer both rail and water transportation have an advantage. The long line of cities on the shore of Lake Michigan exemplifies this principle. These cities do not make use of water transportation so much as they do of rail transportation; but the fact that, if railroad rates are not reasonable, shippers can use the lakes, tends to keep railroad rates lower.

#### IMPORTANCE OF FUEL AND POWER

Another factor of primary importance is the cost of power for running machinery. To a large extent this depends upon the cost of coal, delivered at the

factory. Other kinds of power, as electric power and water power, are used, and the latter is growing in importance in Wisconsin. In fact, the state is among the foremost in available water powers. Steam power now constitutes three-fourths of all the power used in the mills of the state.

#### INFLUENCE OF WISCONSIN'S SITUATION

One geographical factor which has steadily influenced the industrial expansion of Wisconsin is its northerly location. This is notably true of Northern Wisconsin. The center of population and manufacturing in the United States has moved westward along the 39th parallel of latitude; while middle Wisconsin is 300 miles north of this. The colder climate of the northern border states and their dense forests naturally hindered the rapid settlement and industrial growth which went on in the next tier of states to the south.

The larger part of Wisconsin was densely wooded. Clearing the forests, getting rid of the brush, removing the stumps and putting the land in shape for cultivation is a tremendous task. This is particularly true of the land on which the pine forests grew. Pine stumps decay very slowly, and they are pulled or dug out with difficulty. On such lands it frequently costs a settler more in labor or money to clear the land of brush and stumps than the original price of the land. This is one of the reasons why northern Wisconsin develops slowly.

The position of the state with respect to two of the great lakes, especially Lake Michigan, has also affected its industrial growth. On the one hand, these lakes have materially benefited the state. On the other hand, Lake Michigan cuts Wisconsin off from direct land connection with states east of it. The early trunk line railways were built west from the Atlantic ports. The Great Lakes forced them to keep to the south, and they converge upon Chicago, whence they radiate like a great fan northwest, west and southwest. The railroad centers of the immediate northwest are St. Paul and Minneapolis. The trunk lines seek short-cuts between great commercial centers, while branch lines serve the outlying territory. The trunk lines run between Chicago or Milwaukee and the Twin Cities or Duluth; this means that a part of northern Wisconsin was compelled to wait for adequate railway service. Several railway lines save time by transferring cars bodily across Lake Michigan by means of car ferries.

That Wisconsin's situation on Lake Michigan has been a very great advantage to the development of the eastern part of the state may be seen from these facts:

1. Both the largest city of the state and the next largest in manufacturing are on this lake, and one of these cities manufactures goods whose value is nearly ten times that of any other city in the state.
2. There are eleven manufacturing cities on the shore of Lake Michigan and Green Bay, as against two on the Mississippi river.
3. The population of the eleven counties touching on Lake Michigan is greater than that of any thirty other counties in the state.

#### LACK OF COAL MINES

Wisconsin produces no coal, a fact which might be expected to operate unfavorably upon manufacturing. Possibly it does, though only to a limited extent. A comparison with other states of the middle west will aid in forming an estimate of the probable effect of Wisconsin's northerly location and of its lack of coal upon the state's growth in manufacturing. Indiana lies directly in the trunk line territory. It is crossed by the 39th and 40th parallels, along which the centers of population and of manufacturing have moved. It has a milder winter climate, was more readily cleared of forests, was settled earlier and has abundance of coal. Yet the value of manufacturing per capita in 1910 was \$215 as against Wisconsin's \$254. Missouri has coal, lies directly in important trunk line territory, and has a mild climate, yet the per capita value of manufactures in 1910 was only \$177. The per capita value in Michigan the

same year was \$245, and in Illinois \$206. Thus, Wisconsin leads all of the states west of Ohio in value of manufactures in proportion to population.

It seems evident that, whatever small disadvantage arises from its northerly location or whatever handicap may be imposed by the lack of native coal, there are in Wisconsin other advantages favorable to manufacturing which have more than offset these.

Of nine important branches of manufacturing in Wisconsin, six may be regarded as diffused and three as concentrated. There are, of course, varying degrees of diffusion or concentration shown by the different branches. The lines of manufacturing which are widely or considerably diffused are (1) butter and cheese, about 3000 factories; (2) lumber and timber products, about 1000 mills; (3) flour and grist mills, over 300; (4) malt liquors, about 140 brew-

eries; (5) furniture, about 100 factories; (6) metal working, chiefly iron and steel products, about 300 plants, not counting railroad roundhouses or places which regularly employ less than ten men. Nearly one-half of the metal working plants are in Milwaukee and approximately 80 per cent are in the southeastern quarter of the state. Metal working is, then, a diffused industry from one standpoint and a somewhat concentrated industry from another.

The manufacture of paper-pulp and paper and of leather, and the packing of meat on a large scale are carried on in a relatively small number of plants, of large output and not widely scattered. Of fifty-seven paper and pulp mills, more than thirty are along the lower Fox river between Lake Winnebago and Green Bay. Of 32 tanneries, 12 are in Milwaukee.

The three thousand butter and cheese factories are widely scattered over the state, but they are by no means uniformly scattered. Since their raw material

is milk or cream, which is produced on the farms and which must be made into butter or cheese without delay, the factories are scattered among the dairy farms at frequent intervals. This means many small factories. In the manufacture of butter, the use of the home cream separator and the practice of sending the cream by haulers or railways to central points, is tending to enlarge the output of such creameries. The making of butter and cheese must, however, remain a diffused industry. In the value of its products, this is one of Wisconsin's leading branches of manufacturing.

Map showing the distribution of woodworking mills. Based upon the Annual Report of the State Factory Inspector 1910. Mills which employ less than 20 men not considered.

The forests yield the raw material for the lumber mills and other wood using establishments. The timber is scattered over the entire northern half of the state and this has naturally led to a diffusion of sawmills, planing mills and other woodworking establishments. In this branch of manufacturing there is a tendency toward concentration, as the forests grow thinner. The number of sawmills is declining, but the number of big mills increased from 1900 to 1905. Because of the wide distribution of the raw material, woodworking establishments of various kinds, including furniture factories, are likely to continue to be numerous and scattered. The tendency of the age is, however, toward concentration wherever profits may thereby be increased.

Throughout farming communities there is a demand for flour and feed mills. Once it was more common than it is now for the farmer to depend upon his own wheat and other grain, which he took to the neighboring mill to be ground into flour for his family and feed for his stock. Then every community had its flour and grist mill. Over 300 of these mills are still scattered over the state, but more and more the great mills like those at Minneapolis are supplying the farmers with flour and feed, and many of the village mills have been abandoned. This branch of manufacturing also is tending toward concentration.

The local flour and grist mills and many of the sawmills existed because there was in every community a market for their products. The same explana-

Diagram showing the value in millions of dollars of flour and grist mill products in Wisconsin from 1860 to 1910.

tion accounts for the wide distribution of breweries. Most of the cities and large towns in the state have one or more breweries. In many instances they sell the bulk of their product near home, and are merely local industries. To this extent they belong in the class of diffused industries. Milwaukee, however, has become a brewing center and its products are sent throughout the United States and to foreign countries. The output of Milwaukee's nine breweries exceeds that of all the rest of the state, and to this extent brewing belongs to the class of concentrated industries.

Metal working is both diffused and concentrated, and for much the same reasons as those which apply to the industries just discussed. There is a demand in every community for iron and steel products and local establishments are sure to spring up to supply this demand. Some of these establishments will grow and will send their products to an ever-widening circle of markets and will take on a national or even an international character. Then there comes concentration, as in the case of the great plants in Milwaukee, West All's, South Milwaukee and Racine.

In the earlier stages of a state's development small mills or factories, largely local in character, are the rule. Since Wisconsin is not in an advanced stage of industrial growth, the majority of her manufactures are diffused, and to a considerable extent, they use raw materials produced in the state. This condition is passing and many plants of large capacity making textiles, knit goods, and boots and shoes have already been established, mostly in the southeastern part of the state. The following cities are reported (1910) by the State Fac-

tory Inspector as having one or more manufacturing establishments employing 1,000 or more persons; Beloit, Cudahy, Kenosha, Menasha, Milwaukee, Oshkosh, Racine, South Milwaukee, and West Allis. This is probably an incomplete list, but it indicates how fully the large plants are as yet confined to the southeastern part of the state.

The reasons for the concentration in one region of plants engaged in the same branches of manufacturing are usually the following:

1. Because the raw materials are most economically assembled there. This may be either because they are produced in the neighborhood or because transportation facilities make it easy to assemble them there. This is one of the causes of the concentration of pulp and paper mills in the Fox River Valley.

2. Because the products may be most economically marketed in or from this particular region. This may be due either to a large demand for the products in the region or to central location and excellence of shipping facilities. The concentration of tanning, brewing, meat-packing and the making of heavy machinery in and near Milwaukee, is chiefly due to this cause.

3. Because of cheap fuel or the presence of water power. A region that has means of securing coal cheaply, as is true of the cities on Lake Michigan, or

Map showing the distribution in 1910 of metal working establishments employing an average of ten or more men. The number in a circle indicates the number of such establishments in that place.

that offers abundant water power, as is the case in the valley of the lower Fox, attracts industries which require a large amount of power. The paper making industry is an illustration. It is particularly dependent upon water power. Nearly 75 per cent of the utilized water power of the state is employed by the pulp and paper mills, and these mills are notably concentrated in the Fox river valley.

4. Because of what is called "the momentum of an early start." It often happens that an industry is started in a certain place as an experiment. If it proves profitable to its owners, its success tempts other men to take up the same line. The expansion of the original plant and the establishment of new plants which are off-shoots of the original one may eventually make the region a center of this particular branch of manufacturing. A case in point is the

making of aluminum articles in Manitowoc, Two Rivers, and vicinity. Perhaps the most interesting instance of this kind in the United States is found in the city of Troy, New York, where 80 to 90 per cent of the collars, cuffs, and dress shirts of the United States are made.

#### WATER POWER AND ITS RELATION TO MANUFACTURING

In a state that has no coal, water power is particularly important. Only three states in the Union have developed more water power than Wisconsin; they are New York, Maine, and Massachusetts, all of them long-settled states. No state west of the Appalachians has developed so much water power as Wisconsin, which has three times as much as Michigan, and twice as much as Minnesota. The total water power in use in the state in 1911 was about 180,000 horse power, but this is only a small part of that which can be developed by building dams at scores of other places. Only one river in the state, the Fox, has anything approaching its total available power developed. It is estimated that Wisconsin rivers can supply a million horse power, or nearly twice the total mechanical power now used in all of the mills of the state.

Before the days of electricity, it was necessary for a factory or mill that used water power to locate on the bank of the river where the power was to be obtained. In many cases these water power sites were in out-of-the-way places, perhaps far from railroads and cities, and hence were unfavorable locations for manufacturing plants. Now, however, the water power may be turned into electricity and then sent by wires to places miles away. The water power developed at the Dalles of the Wisconsin at Kilbourn is sent to Watertown and Milwaukee, more than a hundred miles away. The ability thus to generate the power at one place and then transmit it to places where it is convenient to use it, is making water power, the world over, of greater value than it ever was before.

Why has Wisconsin extensive water powers? It is largely a matter of the topography of the state. The highest part of the state is the extreme north. Here in some 1400 glacial lakes a number of rivers take their rise and flow down the slopes to the Mississippi, Lake Michigan or Lake Superior. In many places, glacial deposits have turned rivers out of their old channels and have forced them to flow in new courses which the rivers have not yet had time to reduce to grade, and so they contain rapids and falls. At other places, the rivers flow from the hard crystalline rocks, which form the northern half of the state, out upon the softer sedimentary rocks which underlie the southern half of the state, and at these places rapids naturally occur. Wisconsin rivers have a "fall line" not unlike the fall line of the Atlantic states, along which so many important eastern cities have grown up. Chippewa Falls, Black River Falls and Grand Rapids are on or near Wisconsin's fall line.

Because the grade of the streams is greater in the northern half of the state, giving rise to more rapids and falls, the majority of the water powers are located there. In the Driftless Area, the streams have well-graded courses while in the eastern counties, glacial deposits have seriously clogged and obstructed the streams, so that throughout the whole southern half of the state relatively few good water power sites exist. Such sites exist, however, as at Kilbourn, Prairie du Sac and Janesville.

In the days when hundreds of logging camps were busy along Wisconsin's rivers, the lumbermen objected to having many dams on the rivers for they interfered with log-driving. The sawmills were built along the streams. Around these the manufacturing towns and cities of the north have grown up. At nearly a score of points along the upper half of the Wisconsin river, valuable waterpowers have been developed. Such, for example, are Nekoosa, Port Edwards, Grand Rapids, Stevens Point, Mosinee, Wausau, Merrill, Tomahawk and Rhinelander. A still greater number of undeveloped powers exist.

The lower Fox from Appleton to Green Bay, thirty-five miles, has 32,000 horse power now in use. This is the region of greatest concentration of water powers and likewise one of the chief manufacturing sections. The Chippewa, St. Croix, Menominee, Black, Oconto, Peshtigo, Flambeau, and many others have water powers both developed and undeveloped. All these rivers have been important factors in the great lumber industry. Practically every paper and pulp mill in the state uses water power. In fact, about three-fourths of all the water power used in Wisconsin is used by the pulp and paper mills. No other line of manufacturing is so dependent upon water power. Wisconsin's high rank as a paper-making state is as much due to available water power as to the forests which supply the pulp wood. The use of water power is steadily increasing as is shown by the following figures:

In 1870 the waterpower developed was 33,700 horse power,  
 in 1880, 45,300 horse power,  
 in 1890, 56,700 horse power,  
 in 1900, 99,000 horse power,  
 in 1910, 129,500 horse power.†

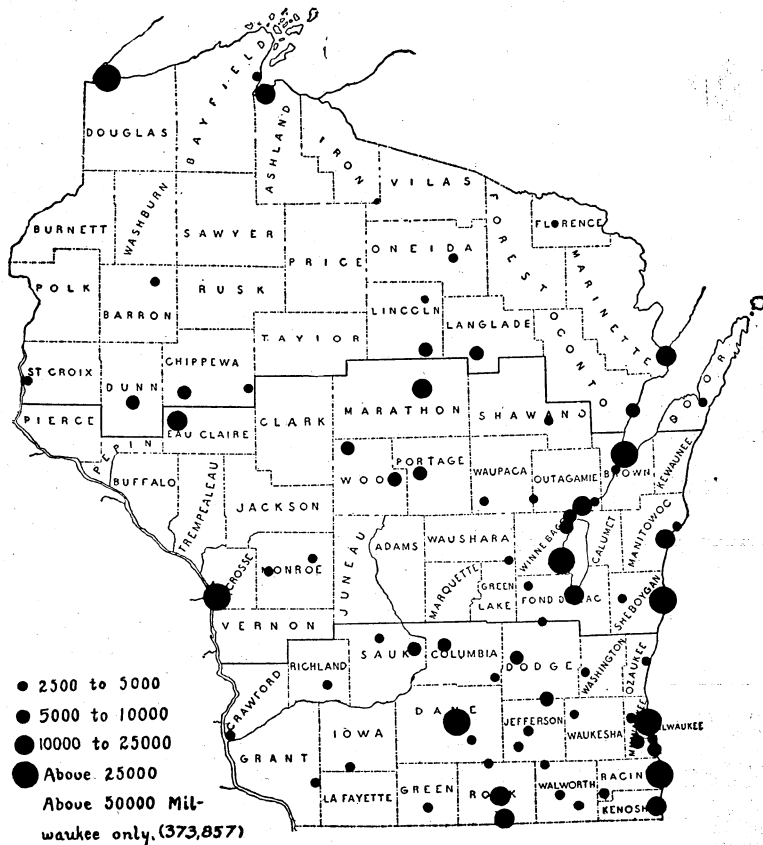

In 1909 the total horsepower used in Wisconsin manufacturing was about 550,000 of which 337,000 was derived from steam and 129,550 from water wheels.\*

† These figures are from the U. S. census of 1910. Prof. L. S. Smith, in the *Wisconsin Engineer*, June, 1909 states that the developed water power of the state was 183,105 h. p.

\* New York leads in water power with 394,221 h. p. Maine has 254,000 h. p. Massachusetts, 186,000 h. p. (1909).

CITIES

As a rule, manufacturing on a large scale is most advantageously carried on in cities. There, new manufacturing are likely to locate, while large and long-established plants may cause towns or even cities to grow up around them, as in the case of Racine or Oshkosh. Wisconsin has few large cities, but the small cities of this half-century are the beginnings of the large ones of the following half-century. Since the growth of cities and of manufacturing is almost one

Map showing the distribution of places having a population of 2,500 or more in 1910. There are 46 such places in the southeastern fourth of the state, and 27 in the remaining three-fourths.

and the same thing, it is a matter of interest to note where Wisconsin's cities or manufacturing centers are located, and to consider why they are there. An accompanying diagram shows the location of the cities of 2,500 or more people in 1910. The geographic influences which determined their location are very clear. The Mississippi river, strangely enough, has called forth only one large city, La Crosse (population 30,417). The Chippewa valley has given us Eau Claire. Lake Superior has two, Superior and Ashland, both of them owing their location to excellent harbors and both of them outlets of iron mining regions. It seems unusual that the entire length of the main river of the state—

the Wisconsin—has only one city, Wausau, of over 10,000 population. The reason for this is evident. The lower half of the Wisconsin was not in the white pine area; and important lumber centers did not grow up. The lower river had few places where water power was available and the region developed as an agricultural, not as a manufacturing section; hence there are no cities of large size. Quite different was it farther up the river where the pine forests were: water power is available and six fair sized cities are located along this part of the river. Only one of these cities is as yet in the 10,000 class. The Rock river basin has developed three good sized cities, Madison, Janesville, and Beloit. The river has not been the important factor; it is the valley, which offered a natural route for two of the leading railroads, giving these cities exceptional transportation facilities and making them the railroad centers of a very rich farming country.

The most notable concentration of manufacturing cities and towns on any river of Wisconsin is in the Fox river valley, including the shore of Lake Winnebago. Here are Oshkosh, Fond du Lac, Appleton and Green Bay, and four other small but vigorous manufacturing cities. Most of their manufacturing arose from the vast wealth of timber which poured into the valley, and supplied the materials for the wood-using industries which now center there.

By far the most effective geographic influence in promoting the growth and fixing the location of cities in Wisconsin has been Lake Michigan, including Green Bay. The number of cities which are located here shows how effective deep-water transportation is in encouraging the growth of commercial and industrial centers. Here are Milwaukee, the chief city of Wisconsin, and Racine, the second city in manufacturing; Kenosha, Sheboygan, Manitowoc, Marinette, and we might add Green Bay which we placed in the Fox river valley group. All are distinctly manufacturing cities, though Milwaukee is a mercantile and shipping center as well.

In addition to the facts shown by the foregoing table, it is worthy of note:

1. That Milwaukee manufactures more goods in value than all of the remaining seventeen cities combined, and has nearly doubled its output in ten years.
2. That Racine ranks second and has more than doubled its manufacturing output in ten years.
3. That Kenosha has nearly overtaken Racine and has more than tripled its output in ten years.
4. That Manitowoc and Fond du Lac have tripled their output and that Beloit, Green Bay and Madison have doubled theirs in the same period.

Milwaukee, the largest city in the state, shows an increase of 51 per cent in value of manufactured products between 1904 and 1909. The city ranked eleventh among the cities of the United States in value of manufactured products in 1899, twelfth in 1904, and tenth in 1909. In 1910 it reported 35.3 per cent of the total number of wage earners of the state; over one-third of the

Diagram showing value of manufactures produced in cities of 10,000 or more people, U. S. census of 1910.

total value of the foundry and machine shop products of the state; about three-fifths of the value of products for the leather, brewery, and printing and publishing industries; nine-tenths of the fur-goods and of the paint and varnish products. The larger part of the products of the steel works and rolling mills also was made in Milwaukee.

Figure 39 shows the distribution of cities or villages of 2,500 or more people. A line drawn across the state from the northeast to the southwest corner so divides the state that about one-fourth of the total area is southeast of this line and about three-fourths is northwest. In the one-fourth there are 46 places having 2,500 or more people, while in the remaining three-fourths are 27 such places (1910). In other words, there are, in proportion to area, five times as many cities and villages of 2,500 or more people in the southeastern quarter as

there are in the remainder of the state. The explanation is not difficult to discover:

1. This quarter of Wisconsin was settled early.
2. The farm land is especially fertile.
3. The best of railroad facilities are available.
4. The long shore line of an important water way, Lake Michigan, is in this quarter of the state.
5. The best markets are in this section of the state, and Chicago, the nation's greatest interior market, is near by.

These are all conditions favorable to manufacturing and commerce, the food upon which cities grow. The line of manufacturing cities along the Fox river and the upper Wisconsin brings out forcibly the importance of water power in developing industrial centers.

#### SPECIALIZATION IN MANUFACTURING

Many of the cities of the state have developed specialized lines of manufacturing. The U. S. census of 1910 shows that about 60 per cent of the manufactures of Appleton was made up of wood pulp and paper. Eighty per cent of the manufactures of Beloit was foundry and machine shop products. The blast furnaces constituted the most important industry of Ashland, while in Eau Claire the lumber and timber products and the paper and wood-pulp industries predominated. The chief industry of Fond du Lac was the tanning, currying, and finishing of leather; in Green Bay the flour mills and gristmills and the paper and pulp mills were most important; and in Janesville the manufacture of agricultural implements was the leading industry. The principal industries in Kenosha were the tanning, currying and finishing of leather and the manufacture of furniture and automobiles; in La Crosse, flour mills and gristmills and breweries; in Madison, the foundry and machine shop industries; in Manitowoc, the malt industry; in Marinette, the lumber and timber products industry; in Oshkosh, the lumber and timber products and the match industries; in Racine, the manufacture of agricultural implements, automobiles, carriages and wagons; in Sheboygan, the manufacture of furniture and the tanning, cur-

rying, and finishing of leather; in Superior, flour mills and gristmills; and in Wausau, the lumber and timber products and flour mill and gristmill industries.

## SUMMARY PERTAINING TO MANUFACTURING

1. By far the most important branch of manufacturing in the state has ever been the woodworking industries. Down to the present, the value of the lumber cut in Wisconsin mills totals some two billions of dollars, equal to the value of all the gold mined in the United States since 1873. The gold of California is a minor item when compared with Wisconsin's lumber. There are more than a score of different branches of the woodworking industry in the state, among which the making of wood-pulp and paper, of furniture, of doors, sash and finishing lumber, of woodenware, and of parts of vehicles and of farming machinery, are most important. The total value of the wood products of Wisconsin exceeds \$100,000,000 a year, made up of lumber, rough and finished, \$58,000,000; pulp and paper, \$26,000,000; furniture, \$19,000,000.

Diagram showing the growth in million dollars of the manufacture of wood-pulp and paper in Wisconsin from 1860 to 1910.

2. In point of value to the state, the manufacture of butter and cheese is probably second to the woodworking industry. Three thousand factories and creameries are producing about \$60,000,000\* worth of butter, cheese, and condensed milk annually. The industry has made phenomenal progress in recent years, the value of the product having tripled during the last decade. The reason for placing the manufacture of butter and cheese ahead of the manufacture of iron and steel in point of value to the state is that butter and cheese making require dairy farming and dairy farming materially helps in maintaining the fertility of the soil.

3. There has been a remarkable growth in the manufacture of iron and steel products in the state in recent years. According to the U. S. census figures of 1910, foundry and machine shop products rank second among the manufactures. The making of many kinds of machinery in Milwaukee and other cities in the southeastern counties has become a very important branch of manufacturing. The total value exceeded \$54,000,000 in 1909.

\* \$54,000,000 worth in 1909.

4. The tanning of leather is the fourth most valuable branch of manufacturing. Milwaukee leads all of the cities of the Union in this industry, having doubled the value of its output in the past decade. It owes its beginning and

growth to the abundance of hemlock and oak bark in the Wisconsin forests. Formerly the tanneries were scattered but now they are largely located in Milwaukee and a few other cities in the eastern part of the state; the total output reaches \$45,000,000 a year.

Diagram showing the increase in the value in millions of dollars of the products of foundries and machine shops from 1840 to 1910.

5. The brewing of malt liquors is especially prominent in Milwaukee, where nine breweries make a greater product than all the rest of the state, and give the city third rank in the United States as a brewing center. This is not, how-

ever, the largest industry of the city, and it ranks fifth among the manufactures of the state, having a value of over \$32,000,000 a year.

6. The manufacture of flour and feed, sixth in rank, is nearly stationary. This is largely due to the decline in wheat-growing in the state. The value is about \$30,000,000 a year.

7. Slaughtering and meat packing has grown very rapidly in recent years; the major part of this work is carried on in Milwaukee and nearby cities; this industry ranks seventh, with a value of \$27,000,000 a year.

8. The four regions of Wisconsin where manufacturing cities have become most numerous are (1) along the shore of Lake Michigan, (2) in the Fox river valley, (3) in the Rock river valley including Madison, (4) in the valley of the upper Wisconsin river.

Diagram showing the growth in millions of dollars of the tanning, currying and finishing of leather in Wisconsin from 1840 to 1910.

9. Over one-third (in value) of the manufactured products of the state are made in Milwaukee and fully 80 per cent are made in the southeastern quarter of the state.

10. The southwestern quarter of the state is almost wholly agricultural, La Crosse being the only city with large manufacturing interests.

11. In 1840 Wisconsin ranked 19th among the states in manufacturing, and in 1909 it ranked eighth, but in proportion to population it leads all of the states west of Ohio, surpassing even Michigan and Illinois.

12. Down to recent years, the manufacturing industries have been closely related to the natural resources of the state, deriving the larger part of the raw materials from the state. There is now a lively growth of manufacturing which is quite independent of the state's natural products; for example, the iron and steel and the textile industries. With the growth of population in the middle west, Wisconsin is absorbing a large share of the increased manufacturing required by increasing population.

13. Aside from the natural resources, the Lake Michigan water-front seems to be the state's greatest geographical asset. This is evidenced by the large number of manufacturing cities on the shore of the lake.

14. There were nearly 10,000 manufacturing establishments in Wisconsin when the U. S. Census of 1910 was taken, but 9,000 of these were relatively small; that is, the entire product of the largest one of these 9,000 factories

did not amount to \$100,000 a year, and the vast majority of them manufactured much less than that.

15. Three-fourths of the manufactured goods made in Wisconsin were produced in less than 1,000 mills, (less than one-tenth of the total number) and 86 of the largest establishments turned out over one-third (in value) of all the goods manufactured.

16. While there were 322 flour and gristmills in the state, seven of them ground more flour and feed than the remaining 315. There were 444 foundries and machine shops, but ten of them turned out nearly as great a product as the remaining 434. Of 136 breweries in the state, five made two-thirds of the total product. There were 48 establishments engaged in wholesale slaughtering and meat packing, but four of them did about six-sevenths of the total business.

### TRANSPORTATION

The first rails for a railroad in Wisconsin were laid in 1851, the road extending twenty miles from Milwaukee to Waukesha. In 1854 the line was built as far west as Madison and in 1857 it reached the Mississippi at Prairie du Chien. The Chicago and Northwestern reached Janesville in 1855 and Fond du Lac in 1858. Thenceforward, railway building has gone on steadily; the latest important addition being the new Northwestern line between Milwaukee and Sparta. In the earlier days, it was believed that the important traffic routes must necessarily extend east and west between the two great waterways—Lake Michigan and the Mississippi river. With the growth of railways, the Upper Mississippi has declined very greatly in importance as a water route. At the same time, the growth of Chicago and Milwaukee which lie near the southern end of Lake Michigan, and of St. Paul-Minneapolis on the upper Mississippi, has given a pronounced northwest-southeast trend to the main transportation lines. Whether we consider the early transportation routes east and west between the lake and the Mississippi or the later railway routes northwest

and southeast between great urban centers on these waters, it will be seen that Wisconsin's geographical position has given the state exceptional importance as one of the railway thoroughfares of the nation.

Railway building in the Middle West was relatively easy because of the general levelness of the land. There were no mountains or other serious difficulties to prevent the building of a railroad in almost any direction in Wisconsin; nevertheless the topography of the various parts of the state has determined the routes which the railroads could most advantageously follow. Because of the expense of hauling trains up grade, routes of proposed railroads are carefully surveyed and are finally adopted only after careful consideration. One aim is to touch as many large towns as possible, yet the securing of a direct line between important cities and the securing of easy grades are even more important considerations. In most parts of the state, railroad builders had little difficulty in finding practicable routes. The only really rugged surface is in the southwestern quarter and here the country is so hilly that topography exerted a very direct control over the routes which railroads might follow. In a hill-and-valley country a railroad usually follows the valleys and thus secures a gentle grade. However, one of the east-west lines in southwestern Wisconsin, since it could not follow a valley, follows the crest of a continuous ridge, the so-called Military ridge. By doing this, bridges were largely avoided, for the ridge is a water parting away from which the streams flow in both directions, and an approximately level grade is secured for fifty miles. A branch of this line running south into the lead and zinc region also follows a ridge. Some miles north of Military ridge is the broad, open valley of the Wisconsin river which leads to the Mississippi at Prairie du Chien. A branch valley, the Black Earth valley, leads off from this toward Madison and Milwaukee. These valleys form an easy and direct route from Madison to the Mississippi river, and it was only natural that they should be adopted as a part of the route of the first railway across the state. Still further north, on the western side of the state, is another broad, open depression leading to the Mississippi river at La Crosse. This lies more directly in the route of the main lines than does the Wisconsin river valley, and some of the most important railways in the state use this opening to get into Minnesota on their way to the west and northwest.

Another of the important trunk lines, the Burlington (C. B. & Q.) follows the Wisconsin side of the Mississippi channel as a part of its route between Chicago and St. Paul.

The surface features of the state lead several railroads to converge upon Portage at the great bend of the Wisconsin river, and also upon Fond du Lac at the south end of Lake Winnebago. The basin of the Rock river directs important parts of the Chicago, Milwaukee & St. Paul and of the Chicago & Northwestern, and makes Janesville and Madison natural railway centers.

In the northern part of the state the topography presents few obstructions. There are no pronounced valleys anywhere. There are, however, many lakes and swamps and ranges of hills built of glacial drift. Within any given township these lakes, swamps and morainic hills have influenced the courses of the railroads; they have caused the road to swerve a few miles this way or that way, but an examination of a railroad map will show that the main railroads in the northern part of Wisconsin are notably direct. Nowhere in the state did any railway find difficulties at all comparable to those which roads had to surmount in the east and in the west. Yet it would be a mistake to think that any railway built in Wisconsin was not materially influenced by the topographic features of the regions through which it runs.

## STATE ORGANIZATION.

*First Session*—The first session of the State Legislature was held at the Capitol at Madison, on Monday, the fifth day of June, A. D. 1848, pursuant to the **Constitution**, which had been adopted by a large majority of the people. The apportionment of Senators and Representatives was under Constitutional provisions, until otherwise declared by law. It convened June 5, 1848, and adjourned August 21, 1848, seventy-eight days. There were eighty-five members.

*Second Session*—Convened on the 10th of January, 1849, and adjourned April 2, 1849, eighty-three days, eighty-five members.

- Third Session*—Convened January 9, and adjourned February 11, 1850, thirty-four days, eighty-five members.
- Fourth Session*—Convened January 8, 1851, and adjourned March 17, 1851, sixty-nine days, eighty-five members.
- Fifth Session*—Convened January 14, 1852, and adjourned April 19, 1852, ninety-seven days, eighty-five members.
- Sixth Session*—This legislature convened on the 12th of January, 1853, and adjourned on the 4th of April, 1853, until the 6th day of June following, for the purpose that the Senate might sit as a Court of Impeachment, and the Assembly be present to prosecute the trial of Levi Hubbell, Judge of the Second Judicial Circuit, against whom Articles of Impeachment had been exhibited charging him with acts of corrupt conduct and malfeasance in office. For this purpose the Legislature again convened on the 6th day of June, and adjourned finally on the 13th of July, 1853. The legislative session amounted to one hundred and twenty-one days, with one hundred and seven members.
- Seventh Session*—Convened January 11, 1854, and adjourned April 3, 1854, eighty-three days, one hundred and seven members.

# DECLARATION OF INDEPENDENCE.

---

UNANIMOUSLY PASSED BY THE CONGRESS OF THE THIRTEEN UNITED STATES OF AMERICA, JULY 4, 1776.\*

When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the Powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their Public Records, for the sole purpose of fatiguing them into compliance with his measures.

---

\*The following text and its appended historical note are reprinted from the United States Revised Statutes, 2d ed., 1878.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the legislative Powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the mean time exposed to all the dangers of invasion from without, and convulsions within.

He has endeavoured to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harrass our People, and eat out their substance.

He has kept among us, in times of peace, Standing Armies without the Consent of our legislature.

He has affected to render the Military independent of and superior to the Civil Power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his Assent to their acts of pretended Legislation:

For quartering large bodies of armed troops among us:

For protecting them, by a mock Trial, from Punishment for any Murders which they should commit on the Inhabitants of these States.

For cutting off our Trade with all parts of the world:

For imposing taxes on us without our Consent:

For depriving us in many cases, of the benefits of Trial by Jury:

For transporting us beyond Seas to be tried for pretended offences:

For abolishing the free System of English Laws in a neighbouring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Government:

For suspending our own Legislature, and declaring themselves invested with Power to legislate for us in all cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large armies of foreign mercenaries to compleat the works of death, desolation and tyranny, already begun with circumstances of Cruelty & perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavoured to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare, is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these Oppressions We have Petitioned for Redress in the most humble terms: Our repeated Petitions have been answered only by repeated injury. A prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free People.

Nor have We been wanting in attention to our British brethren. We have warned them from time to time of attempts by their legislature to

extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which, would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

We, therefore, the Representatives of the United States of America, in General Congress, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by Authority of the good People of these Colonies, solemnly publish and declare, That these United Colonies are, and of Right ought to be Free and Independent States; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain, is and ought to be totally dissolved; and that as Free and Independent States, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which Independent States may of right do. And for the support of this Declaration, with a firm reliance on the Protection of Divine Providence, we mutually pledge to each other our Lives, our Fortunes and our sacred Honor.

(Signed)

JOHN HANCOCK.

And by the delegates from New Hampshire, Massachusetts Bay, Connecticut, Rhode Island, etc., New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, and Georgia.

# CONSTITUTION OF THE UNITED STATES.

---

## PREAMBLE.

We the people of the United States, in order to form a more perfect union, establish justice, insure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution for the United States of America.

## ARTICLE I.

SECTION 1. All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

SECTION 2. The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature.

No person shall be a Representative who shall not have attained to the age of twenty-five years, and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

\* [Representatives and direct taxes shall be apportioned among the several states which may be included within this Union, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons.] The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of *New Hampshire* shall be entitled to choose three, *Massachusetts* eight, *Rhode Island and Providence Plantations* one, *Connecticut* five, *New York* six, *New Jersey* four, *Pennsylvania* eight, *Delaware* one, *Maryland* six, *Virginia* ten, *North Carolina* five, *South Carolina* five, *Georgia* three.

When vacancies happen in the representation from any State, the executive authority thereof shall issue writs of election to fill such vacancies.

The House of Representatives shall choose their Speaker and other officers; and shall have the sole power of impeachment.

SECTION 3. The Senate of the United States shall be composed of two Senators from each State, chosen by the legislature thereof, for six years; and each Senator shall have one vote.

Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the

---

\* The clause included in brackets is amended by the fourteenth amendment, second section.

Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the legislature of any state, the executive thereof may make temporary appointments [until the next meeting of the legislature, which shall then fill such vacancies.]

No person shall be a Senator who shall not have attained to the age of thirty years and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

The Vice President of the United States shall be President of the Senate, but shall have no vote, unless they be equally divided.

The Senate shall choose their other officers, and also a President *pro tempore*, in the absence of the Vice President, or when he shall exercise the office of President of the United States.

The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President of the United States is tried, the Chief Justice shall preside: And no person shall be convicted without the concurrence of two-thirds of the members present.

Judgment in cases of impeachment shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust or profit under the United States: but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment and punishment, according to law.

SECTION 4. The times, places and manner of holding elections for Senators and Representatives, shall be prescribed in each State by the legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators.

The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

SECTION 5. Each house shall be the judge of the elections, returns and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner, and under such penalties as each house may provide.

Each house may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member.

Each house shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secrecy; and the yeas and nays of the members of either house on any question shall, at the desire of one-fifth of those present, be entered on the journal.

Neither house, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two houses shall be sitting.

SECTION 6. The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the Treasury of the United States. They shall in all cases, except treason, felony and breach of the peace, be privileged from arrest during their attendance at the session of their respective houses, and in going to and returning from the same; and for any speech or debate in either house, they shall not be questioned in any other place.

No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof should have been increased during such time; and no person holding any office under the United States, shall be a member of either house during his continuance in office.

SECTION 7. All bills for raising revenue shall originate in the House of Representatives; but the Senate may propose or concur with amendments as on other bills.

Every bill which shall have passed the House of Representatives and the Senate, shall, before it become a law, be presented to the President of the United

States; if he approve he shall sign it, but if not he shall return it, with his objections to that house in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration two-thirds of that house shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered, and if approved by two-thirds of that house, it shall become a law. But in all such cases the votes of both houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each house respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it, unless the Congress by their adjournment prevent its return, in which case it shall not be a law.

Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the same shall take effect, shall be approved by him, or being disapproved by him, shall be repassed by two-thirds of the Senate and House of Representatives, according to the rules and limitations prescribed in the case of a bill.

SECTION 8. The Congress shall have power to lay and collect taxes, duties, imposts and excises, to pay the debts and provide for the common defence and general welfare of the United States; but all duties, imposts and excises shall be uniform throughout the United States:

To borrow money on the credit of the United States;

To regulate commerce with foreign nations, and among the several States, and with the Indian tribes;

To establish a uniform rule of naturalization, and uniform laws on the subject of bankruptcies throughout the United States;

To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures;

To provide for the punishment of counterfeiting the securities and current coin of the United States;

To establish post offices and post roads;

To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries;

To constitute tribunals inferior to the Supreme Court;

To define and punish piracies and felonies committed on the high seas, and offenses against the law of nations;

To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water;

To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years;

To provide and maintain a navy;

To make rules for the government and regulation of the land and naval forces;

To provide for calling forth the militia to execute the laws of the Union, suppress insurrections and repel invasions;

To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively, the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress;

To exercise exclusive legislation in all cases whatsoever, over such district (not exceeding ten miles square) as may, by cession of particular States, and the acceptance of Congress, become the seat of the government of the United States, and to exercise like authority over all places purchased by the consent of the legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dockyards, and other needful buildings; and

To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

SECTION 9. The migration or importation of such persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

No bill of attainder or ex post facto law shall be passed.

No capitation, or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

No tax or duty shall be laid on articles exported from any State.

No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another: nor shall vessels bound to, or from, one State, be obliged to enter, clear, or pay duties in another.

No money shall be drawn from the treasury, but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

No title of nobility shall be granted by the United States: And no person holding any office of profit or trust under them, shall, without the consent of the Congress, accept of any present, emolument, office, or title, of any kind whatever, from any king, prince, or foreign State.

SECTION 10. No State shall enter into any treaty, alliance, or confederation; grant letters of marque and reprisal; coin money; emit bills of credit; make anything but gold and silver coin a tender in payment of debts; pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

No state shall, without the consent of the Congress, lay any imposts or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws: and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

No state shall, without the consent of Congress, lay any duty of tonnage, keep troops, or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

## ARTICLE II.

SECTION 1. The executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice President, chosen for the same term, be elected as follows:

Each state shall appoint, in such manner as the legislature thereof may direct, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the congress: but no Senator or Representative, or person holding an office of trust or profit under the United States, shall be appointed an elector.

\*The electors shall meet in their respective States, and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each; which list they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed; and if there be more than one who have such majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose

shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice President.]

The Congress may determine the time of choosing the electors, and the day on which they shall give their votes; which day shall be the same throughout the United States.

No person except a natural born citizen, or a citizen of the United States, at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States.

In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice President, and the Congress may by law provide for the case of removal, death, resignation or inability, both of the President and Vice President, declaring what officer shall then act as President, and such officer shall act accordingly, until the disability be removed, or a President shall be elected.

The President shall, at stated times, receive for his services, a compensation, which shall be neither increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

Before he enter on the execution of his office, he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will to the best of my ability, preserve, protect and defend the constitution of the United States."

SECTION 2. The President shall be commander in chief of the army and navy of the United States, and of the militia of the several States, when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments, upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offenses against the United States, except in cases of impeachment.

He shall have power, by and with the advice and consent of the senate, to make treaties, provided two-thirds of the Senators present concur; and he shall nominate, and by and with the advice and consent of the Senate, shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States, whose appointments are not herein otherwise provided for, and which shall be established by law: but the Congress may by law vest the appointment of such inferior officers, as they think proper, in the President alone, in the courts of law, or in the heads of departments.

The President shall have power to fill up all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of their next session.

SECTION 3. He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them, with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

SECTION 4. The President, Vice President and all civil officers of the United States, shall be removed from office on impeachment for, and conviction of, treason, bribery, or other high crimes and misdemeanors.

---

\* This clause has been superseded by the twelfth amendment.

## ARTICLE III.

SECTION 1. The judicial power of the United States, shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the supreme and inferior courts, shall hold their offices during good behavior, and shall, at stated times, receive for their services a compensation which shall not be diminished during their continuance in office.

SECTION 2. The judicial power shall extend to all cases, in law and equity, arising under this Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States; between a State and citizens of another State; between citizens of different States; between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign States, citizens or subjects.

In all cases affecting ambassadors, other public ministers and consuls, and those in which a State shall be party, the Supreme Court shall have original jurisdiction. In all the other cases before mentioned, the Supreme Court shall have appellate jurisdiction, both as to law and fact, with such exceptions, and under such regulations as the Congress shall make.

The trial of all crimes, except in cases of impeachment, shall be by jury; and such trial shall be held in the State where the said crime shall have been committed; but when not committed within any State, the trial shall be at such place or places as the Congress may by law have directed.

SECTION 3. Treason against the United States, shall consist only in levying war against them, or, in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood, or forfeiture except during the life of the person attainted.

## ARTICLE IV.

SECTION 1. Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records and proceedings shall be proved, and the effect thereof.

SECTION 2. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall on demand of the executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

No person held to service or labor in one State, under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

SECTION 3. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State; nor any State be formed by the junction of two or more States, or parts of States, without the consent of the legislatures of the States concerned as well as of the Congress.

The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

SECTION 4. The United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion; and on application of the legislature, or of the executive (when the legislature cannot be convened) against domestic violence.

ARTICLE V.

The Congress, whenever two-thirds of both houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the ninth section of the first article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

All debts contracted and engagements entered into, before the adoption of this Constitution, shall be as valid against the United States under this Constitution, as under the Confederation.

This Constitution, and the laws of the United States which shall be made in pursuance thereof; and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land; and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

The Senators and Representatives before mentioned, and the members of the several State legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation, to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

The ratification of the conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

Done in convention by the unanimous consent of the States present the seventeenth day of September in the year of our Lord one thousand seven hundred and eighty-seven and of the Independence of the United States of America the twelfth. In witness whereof we have hereunto subscribed our names,

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of grievances.

### ARTICLE II.

A well regulated militia, being necessary to the security of a free State, the right of the people to keep and bear arms, shall not be infringed.

### ARTICLE III.

No soldier shall, in time of peace be quartered in any house, without the consent of the owner, nor in time of war, but in a manner to be prescribed by law.

### ARTICLE IV.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

### ARTICLE V.

No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life and limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

### ARTICLE VI.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the state and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation, to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

### ARTICLE VII.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury, shall be otherwise re-examined in any court of the United States, than according to rules of the common law.

### ARTICLE VIII.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

## ARTICLE IX.

The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

## ARTICLE X.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

## ARTICLE XI.

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by citizens of another State, or by citizens or subjects of any foreign State.

## ARTICLE XII.

The electors shall meet in their respective States and vote by ballot for President and Vice President, one of whom, at least, shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice President and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice President, and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate;—the President of the Senate shall, in presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted;—the person having the greatest number of votes for President, shall be the President, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then from the persons having the highest numbers not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice President shall act as President, as in the case of the death or other constitutional disability of the President.—

The person having the greatest number of votes as Vice President, shall be the Vice President, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list, the Senate shall choose the Vice President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice President of the United States.

## ARTICLE XIII.

SECTION 1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

SECTION 2. Congress shall have power to enforce this article by appropriate legislation.

## ARTICLE XIV.

SECTION 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State

wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

SECTION 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such state, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

SECTION 3. No person shall be a Senator or Representative in Congress, or elector of President and Vice President, or hold any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may by a vote of two-thirds of each House, remove such disability.

SECTION 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations and claims shall be held illegal and void.

SECTION 5. The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

#### ARTICLE XV.

SECTION 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

SECTION 2. The Congress shall have power to enforce this article by appropriate legislation.

#### ARTICLE XVI.

The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

#### ARTICLE XVII.

The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: *Provided*, That the legislature of any State may empower the executive thereof to make temporary appointment until the people fill the vacancies by election as the legislature may direct.

This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

# CONSTITUTION OF THE STATE OF WISCONSIN.

---

[The text of the State Constitution given below follows the original certified copy on file in the Department of State, except those portions that have been amended. The use of capital letters and punctuation marks conforms with the original.]

## PREAMBLE.

We, the people of Wisconsin, grateful to Almighty God for our freedom; in order to secure its blessings, form a more perfect government, insure domestic tranquility and promote the general welfare; do establish this Constitution.

## ARTICLE I.

### DECLARATION OF RIGHTS.

SECTION 1. All men are born equally free and independent, and have certain inherent rights; among these are life, liberty, and the pursuit of happiness: to secure these rights governments are instituted among men, deriving their just powers from the consent of the governed.

SECTION 2. There should be neither slavery, nor involuntary servitude in this state, otherwise than for the punishment of crime, whereof the party shall have been duly convicted.

SECTION 3. Every person may freely speak, write and publish his sentiments on all subjects, being responsible for the abuse of that right, and no laws shall be passed to restrain or abridge the liberty of speech, or of the press. In all criminal prosecutions, or indictments for libel, the truth may be given in evidence, and if it shall appear to the jury, that the matter charged as libelous be true, and was published with good motives and for justifiable ends, the party shall be acquitted; and the jury shall have the right to determine the law and the fact.

SECTION 4. The right of the people peaceably to assemble, to consult for the common good, and to petition the government, or any department thereof, shall never be abridged.

SECTION 5. The right of trial by jury shall remain inviolate; and shall extend to all cases at law, without regard to the amount in controversy; but a jury trial may be waived by the parties in all cases, in the manner prescribed by law.

SECTION 6. Excessive bail shall not be required, nor shall excessive fines be imposed, nor cruel and unusual punishments inflicted.

SECTION 7. In all criminal prosecutions, the accused shall enjoy the right to be heard by himself and counsel; to demand the nature and cause of the accusation against him; to meet the witnesses face to face; to have compulsory process to compel the attendance of witnesses in his behalf; and in prosecutions by indictment, or information, to a speedy public trial by an impartial jury of the county or district wherein the offense shall have been committed; which county or district shall have been previously ascertained by law.

[Section 8, as amended by a vote of the people at the General Election, November 8, 1870.]

SECTION 8. No person shall be held to answer for a criminal offense without due process of law, and no person for the same offense shall be put twice in jeopardy of punishment nor shall be compelled in any criminal case to be a witness against himself. All persons shall before conviction be bailable by sufficient sureties except for capital offenses, when the proof is evident or the presumption great and the privilege of the writ of habeas corpus shall not be suspended unless when in cases of rebellion or invasion the public safety may require it.

SECTION 9. Every person is entitled to a certain remedy in the laws, for all injuries, or wrongs which he may receive in his person, property, or character; he ought to obtain justice freely, and without being obliged to purchase it, completely and without denial, promptly and without delay, conformably to the laws.

SECTION 10. Treason against the State shall consist only in levying war against the same, or in adhering to its enemies, giving them aid and comfort. No person shall be convicted of treason, unless on the testimony of two witnesses to the same overt act, or on confession in open court.

SECTION 11. The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures shall not be violated; and no warrants shall issue but upon probable cause, supported by oath, or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

SECTION 12. No bill of attainder, ex-post facto law, nor any law impairing the obligation of contracts shall ever be passed, and no conviction shall work corruption of blood, or forfeiture of estate.

SECTION 13. The property of no person shall be taken for public use without just compensation therefor.

SECTION 14. All lands within the State are declared to be allodial, and feudal tenures are prohibited; leases and grants of agricultural land, for a longer term than fifteen years, in which rent, or service of any kind shall be reserved, and all fines and like restraints upon alienation, reserved in any grant of land, hereafter made, are declared to be void.

SECTION 15. No distinction shall ever be made by law, between resident aliens and citizens, in reference to the possession, enjoyment, or descent of property.

SECTION 16. No person shall be imprisoned for debt arising out of, or founded on a contract, expressed or implied.

SECTION 17. The privilege of the debtor to enjoy the necessary comforts of life, shall be recognized by wholesome laws, exempting a reasonable amount of property from seizure, or sale for the payment of any debt, or liability hereafter contracted.

SECTION 18. The right of every man to worship Almighty God, according to the dictates of his own conscience, shall never be infringed; nor shall any man be compelled to attend, erect, or support any place of worship, or to maintain any ministry against his consent; nor shall any control of, or interference with, the rights of conscience be permitted, or any preference be given by law to any religious establishments, or modes of worship; nor shall any money be drawn from the treasury for the benefit of religious societies, or religious, or theological seminaries.

SECTION 19. No religious test shall ever be required as a qualification for any office of public trust under the State, and no person shall be rendered incompetent to give evidence in any court of law, or equity, in consequence of his opinions on the subject of religion.

SECTION 20. The military shall be in strict subordination to the civil power.

SECTION 21. Writs of error shall never be prohibited by law.

SECTION 22. The blessings of a free government can only be maintained by a firm adherence to justice, moderation, temperance, frugality and virtue, and by frequent recurrence to fundamental principles.

## ARTICLE II.

## BOUNDARIES.

SECTION 1. It is hereby ordained and declared, that the State of Wisconsin doth consent and accept of the boundaries prescribed in the act of Congress entitled "An act to enable the people of Wisconsin Territory to form a Constitution and State government, and for the admission of such State into the Union," approved August sixth, one thousand eight hundred and forty-six, to wit: Beginning at the northeast corner of the State of Illinois—that is to say; at a point in the center of Lake Michigan, where the line of forty-two degrees and thirty minutes of north latitude crosses the same; thence running with the boundary line of the State of Michigan, through Lake Michigan, Green Bay, to the mouth of the Menominee river; thence up the channel of the said river to the Brule river; thence up said last mentioned river to Lake Brule; thence along the southern shore of Lake Brule in a direct line to the center of the channel between Middle and South Islands, in the Lake of the Desert; thence in a direct line to the head waters of the Montreal river, as marked upon the survey made by Captain Cramm; thence down the main channel of the Montreal river to the middle of Lake Superior; thence through the center of Lake Superior to the mouth of the St. Louis river; thence up the main channel of said river to the first rapids in the same, above the Indian village, according to Nichollet's map; thence due south to the main branch of the river St Croix; thence down the main channel of said river to the Mississippi; thence down the center of the main channel of that river to the northwest corner of the State of Illinois; thence due east with the northern boundary of the State of Illinois to the place of beginning, as established by "an act to enable the people of the Illinois Territory to form a constitution and State government, and for the admission of such State into the Union on an equal footing with the original States," approved April 18th, 1818. [Provided, however, that the following alteration of the aforesaid boundary be, and hereby is proposed to the Congress of the United States as the preference of the State of Wisconsin, and if the same shall be assented and agreed to by the Congress of the United States, then the same shall be and forever remain obligatory on the State of Wisconsin, viz.: Leaving the aforesaid boundary line at the foot of the rapids of the St. Louis river; thence in a direct line, bearing south-westerly, to the mouth of the Iskodewabo, or Rum river, where the same empties into the Mississippi river, thence down the main channel of said Mississippi river as prescribed in the aforesaid boundary.]

SECTION 2. The propositions contained in the act of Congress are hereby accepted, ratified and confirmed, and shall remain irrevocable without the consent of the United States; and it is hereby ordained that this State shall never interfere with the primary disposal of the soil within the same by the United States, nor with any regulations Congress may find necessary for securing the title in such soil to bona-fide purchasers thereof; and no tax shall be imposed on land, the property of the United States; and in no case shall nonresident proprietors be taxed higher than residents. Provided, that nothing in this Constitution, or in the Act of Congress aforesaid, shall in any manner prejudice, or affect the right of the State of Wisconsin to five hundred thousand acres of land, granted to said state, and to be hereafter selected and located by and under the Act of Congress entitled "An act to appropriate the proceeds of the sales of the public lands, and grant pre-emption rights," approved September fourth, one thousand eight hundred and forty-one.

\*The proposal contained in the bracket was rejected by the Act of May 29, 1848, admitting the State.

## ARTICLE III.

## SUFFRAGE.

[Section 1, as amended by a vote of the people at the General Election, November 7, 1882, and November 3, 1908.]

SECTION 1. Every male person of the age of twenty-one years or upwards, belonging to either of the following classes, who shall have resided in the State for one year next preceding any election, and in the election district where he offers to vote, such time as may be prescribed by the Legislature not exceeding thirty days shall be deemed a qualified elector at such election.

1. Citizens of the United States.

2. Persons of foreign birth who, prior to the first day of December, A. D. 1908, shall have declared their intentions to become citizens conformable to the laws of the United States on the subject of naturalization, provided that the rights hereby granted to such persons shall cease on the first day of December, A. D. 1912.

3. Persons of Indian blood who have once been declared by law of congress to be citizens of the United States, any subsequent law of congress to the contrary notwithstanding.

4. Civilized persons of Indian descent not members of any tribe; provided that the legislature may at any time extend, by law, the right of suffrage to persons not herein enumerated, but no such law shall be in force until the same shall have been submitted to a vote of the people at a general election, and approved by a majority of all the votes cast at such election; and provided further, that in incorporated cities and villages, the legislature may provide for the registration of electors and prescribe proper rules and regulations therefor.

SECTION 2. No person under guardianship, non-compos mentis, or insane, shall be qualified to vote at any election; nor shall any person convicted of treason, or felony, be qualified to vote at any election, unless restored to civil rights.

SECTION 3. All votes shall be given by ballot, except for such township officers as may by law be directed, or allowed to be otherwise chosen.

SECTION 4. No person shall be deemed to have lost his residence in this State, by reason of his absence on business of the United States, or of this State.

SECTION 5. No soldier, seaman, or marine in the army or navy of the United States shall be deemed a resident of this State, in consequence of being stationed within the same.

SECTION 6. Laws may be passed excluding from the right of suffrage all persons who have been or may be convicted of bribery, or larceny, or of any infamous crime, and depriving every person who shall make, or become directly, or indirectly interested, in any bet or wager depending upon the result of any election, from the right to vote at such election.

## ARTICLE IV.

## LEGISLATIVE.

SECTION 1. The legislative power shall be vested in a Senate and Assembly.

SECTION 2. The number of the members of the Assembly shall never be less than fifty-four, nor more than one hundred. The Senate shall consist of a number not more than one-third, nor less than one-fourth of the number of the members of the Assembly.

[Section 3, as amended by a vote of the people at the General Election, November 8, 1910.]

SECTION 3. At their first session after each enumeration, made by the authority of the United States, the legislature shall apportion and district anew the members of the Senate and Assembly, according to the number of inhabitants, excluding Indians not taxed, and soldiers and officers of the United States Army and Navy.

[Section 4, as amended by a vote of the people at the General Election, November 8, 1881.]

SECTION 4. The members of the assembly shall be chosen biennially, by single districts, on the Tuesday succeeding the first Monday of November, after the adoption of this amendment, by the qualified electors of the several districts, such districts to be bounded by county, precinct, town or ward lines, to consist of contiguous territory, and be in as compact form as practicable.

[Section 5, as amended by a vote of the people at the General Election, November 8, 1881.]

SECTION 5. That senators, shall be elected by single districts of convenient contiguous territory, at the same time and in the same manner as members of the assembly are required to be chosen, and no assembly district shall be divided in the formation of a senate district. The senate district shall be numbered in the regular series, and the senators shall be chosen alternately from the odd and even-numbered districts. The Senators elected or holding over at the time of the adoption of this amendment shall continue in office till their successors are duly elected and qualified; and after the adoption of this amendment all senators shall be chosen for the term of four years.

SECTION 6. No person shall be eligible to the Legislature, who shall not have resided one year within the State, and be a qualified elector in the district which he may be chosen to represent.

SECTION 7. Each house shall be the judge of the elections, returns and qualifications of its own members; and a majority of each shall constitute a quorum to do business: but a smaller number may adjourn from day to day, and may compel the attendance of absent members in such manner and under such penalties, as each house may provide.

SECTION 8. Each house may determine the rules of its own proceedings, punish for contempt and disorderly behavior, and with the concurrence of two-thirds of all the members elected, expel a member; but no member shall be expelled a second time for the same cause.

SECTION 9. Each house shall choose its own officers, and the Senate shall choose a temporary president, when the Lieutenant-Governor shall not attend as president, or shall act as Governor.

SECTION 10. Each house shall keep a journal of its proceedings and publish the same, except such parts as require secrecy. The doors of each house shall be kept open except when the public welfare shall require secrecy. Neither house shall, without consent of the other, adjourn for more than three days.

[Section 11, as amended by a vote of the people at the General Election, November 8, 1881.]

SECTION 11. The legislature shall meet at the seat of government at such time as shall be provided by law once in two years, and no oftener, unless convened by the Governor, in special session, and when so convened no business shall be transacted except as shall be necessary to accomplish the special purposes for which it was convened.

SECTION 12. No member of the Legislature shall, during the term for which he was elected, be appointed or elected to any civil office in the State, which shall have been created, or the emoluments of which shall have been increased, during the term for which he was elected.

SECTION 13. No person being a member of Congress, or holding any military or civil office under the United States, shall be eligible to a seat in the Legislature, and if any person shall, after his election as a member of the Legislature, be elected to Congress, or be appointed to any office, civil or military, under the government of the United States, his acceptance thereof shall vacate his seat.

SECTION 14. The Governor shall issue writs of election to fill such vacancies as may occur in either house of the Legislature.

SECTION 15. Members of the Legislature shall in all cases, except treason, felony and breach of the peace, be privileged from arrest; nor shall they be subject to any civil process, during the session of the Legislature, nor for fifteen days next before the commencement and after the termination of each session.

SECTION 16. No member of the Legislature shall be liable in any civil action, or criminal prosecution whatever, for words spoken in debate,

SECTION 17. The style of the laws of the State shall be "The people of the State of Wisconsin, represented in senate and assembly, do enact as follows:" and no law shall be enacted except by bill.

SECTION 18. No private or local bill which may be passed by the Legislature shall embrace more than one subject, and that shall be expressed in the title.

SECTION 19. Any bill may originate in either house of the Legislature, and a bill passed by one house may be amended by the other.

SECTION 20. The yeas and nays of the members of either house, on any question shall, at the request of one-sixth of those present, be entered on the journal.

[Section 21, as amended by a vote of the people at the General Election, November 8, 1881.]

SECTION 21. Each member of the legislature shall receive for his services, for and during a regular session, the sum of five hundred dollars, and ten cents for every mile he shall travel in going to and returning from the place of meeting of the legislature on the most usual route. In case of an extra session of the legislature, no additional compensation shall be allowed to any member thereof, either directly or indirectly, except for mileage to be computed at the same rate as for a regular session. No stationery, newspapers, postage or other perquisite except the salary and mileage above provided, shall be received from the state by any member of the Legislature for his services, or in any other manner as such member.

SECTION 22. The Legislature may confer upon the boards of supervisors of the several counties of the State, such powers of a local, legislative and administrative character, as they shall from time to time prescribe.

SECTION 23. The Legislature shall establish but one system of town and county government, which shall be as nearly uniform as practicable.

SECTION 24. The Legislature shall never authorize any lottery, or grant any divorce.

SECTION 25. The Legislature shall provide by law, that all stationery required for the use of the State, and all printing authorized and required by them to be done for their use, or for the State, shall be let by contract to the lowest bidder, but the Legislature may establish a maximum price; no member of the Legislature, or other state officer, shall be interested, either directly or indirectly, in any such contract.

SECTION 26. The Legislature shall never grant any extra compensation to any public officer, agent, servant, or contractor, after the services shall have been rendered, or the contract entered into; nor shall the compensation of any public officer be increased, or diminished during his term of office.

SECTION 27. The Legislature shall direct by law in what manner and in what courts, suits may be brought against the State.

SECTION 28. Members of the Legislature, and all officers, executive and judicial, except such inferior officers as may be by law exempted, shall before they enter upon the duties of their respective offices, take and subscribe an oath, or affirmation to support the Constitution of the United States, and the Constitution of the State of Wisconsin, and faithfully to discharge the duties of their respective offices to the best of their ability.

SECTION 29. The Legislature shall determine what persons shall constitute the militia of the State, and may provide for organizing and disciplining the same in such manner as shall be prescribed by law.

SECTION 30. In all elections to be made by the Legislature, the members thereof shall vote viva voce, and their votes shall be entered on the journal.

[Sections 31 and 32, as amended by a vote of the people at the General Election, November 7, 1871, and amendment to section 31, adopted November 8, 1892.]

SECTION 31. The Legislature is prohibited from enacting any special or private laws in the following cases: 1st. For changing the name of persons or constituting one person the heir-at-law of another. 2d. For laying out, opening or altering highways, except in cases of state roads extending into more than one county, and military roads to aid in the construction of which lands may be granted by Congress. 3d. For authorizing persons to keep ferries across streams

at points wholly within this state. 4th. For authorizing the sale or mortgage of real or personal property of minors or others under disability. 5th. For locating or changing any county seat. 6th. For assessment or collection of taxes or for extending the time for the collection thereof. 7th. For granting corporate powers or privileges, except to cities. 8th. For authorizing the apportionment of any part of the school fund. 9th. For incorporating any city, town or village, or to amend the charter thereof.

SECTION 32. The Legislature shall provide general laws for the transaction of any business that may be prohibited by section thirty-one of this article, and all such laws shall be uniform in their operations throughout the state.

## ARTICLE V.

### EXECUTIVE.

SECTION 1. The Executive power shall be vested in a Governor, who shall hold his office for two years; a Lieutenant-Governor shall be elected at the same time, and for the same term.

SECTION 2. No person except a citizen of the United States, and a qualified elector of the State, shall be eligible to the office of Governor, or Lieutenant-Governor.

SECTION 3. The Governor and Lieutenant-Governor shall be elected by the qualified electors of the state, at the times and places of choosing members of the Legislature. The persons respectively having the highest number of votes for Governor and Lieutenant-Governor, shall be elected; but in case two or more shall have an equal and the highest number of votes for Governor, or Lieutenant-Governor, the two houses of the Legislature, at its next annual session, shall forthwith, by joint ballot, choose one of the persons so having an equal and the highest number of votes, for Governor, or Lieutenant-Governor. The returns of election for Governor and Lieutenant-Governor, shall be made in such manner as shall be provided by law.

SECTION 4. The Governor shall be Commander-in-Chief of the Military and Naval forces of the state. He shall have power to convene the Legislature on extraordinary occasions, and in case of invasion, or danger from the prevalence of contagious disease at the seat of government, he may convene them at any other suitable place within the State. He shall communicate to the Legislature, at every session, the condition of the state; and recommend such matters to them for their consideration as he may deem expedient. He shall transact all necessary business with the officers of the government, civil and military. He shall expedite all such measures as may be resolved upon by the Legislature, and shall take care that the laws be faithfully executed.

[Section 5, as amended by a vote of the people at the General Election, November 2, 1869.]

SECTION 5. The Governor shall receive, during his continuance in office, an annual compensation of five thousand dollars which shall be in full for all traveling or other expenses incident to his duties.

SECTION 6. The Governor shall have power to grant reprieves, commutations and pardons after conviction, for all offenses, except treason and cases of impeachment, upon such conditions and with such restrictions and limitations as he may think proper, subject to such regulations as may be provided by law relative to the manner of applying for pardons. Upon conviction for treason, he shall have the power to suspend the execution of the sentence, until the case shall be reported to the Legislature at its next meeting, when the Legislature shall either pardon, or commute the sentence, direct the execution of the sentence, or grant a further reprieve. He shall annually communicate to the Legislature each case of reprieve, commutation or pardon granted, stating the name of the convict, the crime of which he was convicted, the sentence and its date, and the date of the commutation, pardon or reprieve, with his reasons for granting the same.

SECTION 7. In case of the impeachment of the Governor, or his removal from office, death, inability from mental or physical disease, resignation, or absence

from the state, the powers and duties of the office shall devolve upon the Lieutenant-Governor, for the residue of the term, or until the Governor, absent or impeached, shall have returned, or the disability shall cease. But when the Governor shall, with the consent of the Legislature, be out of the State in time of war, at the head of the military force thereof, he shall continue Commander-in-chief of the military force of the state.

SECTION 8. The Lieutenant-Governor shall be President of the Senate, but shall have only a casting vote therein. If, during a vacancy in the office of Governor, the Lieutenant-Governor shall be impeached, displaced, resign, die, or from mental, or physical disease become incapable of performing the duties of his office, or be absent from the State, the Secretary of State shall act as Governor, until the vacancy shall be filled, or the disability shall cease.

[Section 9, as amended by a vote of the people at the General Election, November 2, 1869.]

SECTION 9. The Lieutenant-Governor shall receive, during his continuance in office an annual compensation of one thousand dollars.

[Section 10, as amended by a vote of the people at the General Election, November 3, 1908.]

SECTION 10. Every bill which shall have passed the Legislature shall, before it becomes a law, be presented to the Governor; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that house in which it shall have originated, who shall enter the objections at large upon the journal and proceed to reconsider it. If, after such reconsideration, two-thirds of the members present shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered, and if approved by two-thirds of the members present it shall become a law. But in all such cases the votes of both houses shall be determined by yeas and nays, and the names of the members voting for or against the bill shall be entered on the journal of each house respectively. If any bill shall not be returned by the Governor within six days (Sundays excepted) after it shall have been presented to him, the same shall be a law unless the Legislature shall, by their adjournment, prevent its return, in which case it shall not be a law.

## ARTICLE VI.

### ADMINISTRATIVE.

SECTION 1. There shall be chosen by the qualified electors of the State, at the times and places of choosing the members of the Legislature, a Secretary of State, Treasurer and Attorney General, who shall severally hold their offices for the term of two years.

SECTION 2. The Secretary of State shall keep a fair record of the official acts of the Legislature and Executive department of the State, and shall, when required, lay the same and all matters relative thereto, before either branch of the Legislature. He shall be ex-officio auditor, and shall perform such other duties as shall be assigned him by law. He shall receive as a compensation for his services yearly, such sum as shall be provided by law, and shall keep his office at the seat of government.

SECTION 3. The powers, duties and compensation of the Treasurer and Attorney General shall be prescribed by law.

[Section 4, as amended by a vote of the people at the General Election, November 7, 1882.]

SECTION 4. Sheriffs, coroners, registers of deeds, district attorneys, and all other county officers, except judicial officers shall be chosen by the electors of the respective counties, once in every two years. Sheriffs shall hold no other office and be ineligible for two years next succeeding the termination of their offices; they may be required by law to renew their security from time to time, and in default of giving such new security their office shall be deemed vacant, but the county shall never be made responsible for the acts of the sheriff. The governor may remove any officer in this section mentioned, giving to such a copy of the charges against him and an opportunity of being heard in his de-

fense. All vacancies shall be filled by appointment and the person appointed to fill a vacancy shall hold only for the unexpired portion of the term to which he shall be appointed, and until his successor shall be elected and qualified.

## ARTICLE VII.

### JUDICIARY.

SECTION 1. The court for the trial of impeachments shall be composed of the Senate. The House of Representatives shall have the power of impeaching all civil officers of this State, for corrupt conduct in office, or for crimes and misdemeanors; but a majority of all the members elected shall concur in an impeachment. On the trial of an impeachment against the Governor, the Lieutenant-Governor shall not act as a member of the court. No judicial officer shall exercise his office, after he shall have been impeached, until his acquittal. Before the trial of an impeachment, the members of the court shall take an oath or affirmation, truly and impartially to try the impeachment according to evidence; and no person shall be convicted without the concurrence of two-thirds of the members present. Judgment in cases of impeachment shall not extend further than to removal from office, or removal from office and disqualification to hold any office of honor, profit or trust under the state; but the party impeached shall be liable to indictment, trial and punishment according to law.

SECTION 2. The judicial power of this State, both as to matters of law and equity, shall be vested in a supreme court, circuit courts, courts of probate, and in justices of the peace. The legislature may also vest such jurisdiction as shall be deemed necessary in municipal courts, and shall have power to establish inferior courts in the several counties, with limited civil and criminal jurisdiction. Provided, that the jurisdiction which may be vested in municipal courts, shall not exceed, in their respective municipalities, that of circuit courts, in their respective circuits, as prescribed in this constitution: And that the Legislature shall provide as well for the election of judges of the municipal courts, as of the judges of inferior courts, by the qualified electors of the respective jurisdictions. The term of office of the judges of the said municipal and inferior courts shall not be longer than that of the judges of the circuit court.

SECTION 3. The supreme court, except in cases otherwise provided in this constitution, shall have appellate jurisdiction only, which shall be co-extensive with the state; but in no case removed to the supreme court shall a trial by jury be allowed. The supreme court shall have a general superintending control over all inferior courts; it shall have power to issue writs of habeas-corpus, mandamus, injunction, quo warranto, certiorari; and other original and remedial writs, and to hear and determine the same.

[Section 4, as amended by a vote of the people at an election held April 7, 1903.]

SECTION 4. The chief justice and associate justices of the supreme court shall be severally known as justices of said court, with the same terms of office of ten years respectively as now provided. The supreme court shall consist of seven justices, any four of whom shall be a quorum, to be elected as now provided, not more than one each year. The justice having been longest a continuous member of said court, or in case two or more such senior justices shall have served for the same length of time, then the one whose commission first expires shall be ex officio, the chief justice.

SECTION 5. The state shall be divided into five judicial circuits, to be composed as follows: The first circuit shall comprise the counties of Racine, Walworth, Rock and Green; the second circuit the counties of Milwaukee, Waukesha, Jefferson and Dane; the third circuit, the counties of Washington, Dodge, Columbia, Marquette, Sauk and Portage; the fourth circuit, the counties of Brown, Manitowoc, Sheboygan, Fond du Lac, Winnebago and Calumet; and the fifth circuit shall comprise the counties of Iowa, LaFayette, Grant, Crawford and St. Croix; and the county of Richland shall be attached to Iowa, the county of Chippewa to the county of Crawford, and the county of La Pointe to the county of St. Croix for judicial purposes until otherwise provided by the Legislature.

SECTION 6. The Legislature may alter the limits, or increase the number of circuits, making them as compact and convenient as practicable, and bounding them by county lines; but no such alteration or increase shall have the effect to remove a judge from office. In case of an increase of circuits, the judge or judges shall be elected as provided in this Constitution and receive a salary not less than that herein provided for judges of the circuit court.

[Section 7, as amended by a vote of the people at an election held April 6, 1897.]

SECTION 7. For each circuit there shall be chosen by the qualified electors thereof, one circuit judge, except that in any circuit composed of one county only, which county shall contain a population, according to the last state or United States census, of one hundred thousand inhabitants or over, the Legislature may from time to time authorize additional circuit judges to be chosen. Every circuit judge shall reside in the circuit from which he is elected and shall hold his office for such term and receive such compensation as the Legislature shall prescribe.

SECTION 8. The circuit courts shall have original jurisdiction in all matters civil and criminal within this state, not excepted in this constitution, and not hereafter prohibited by law; and appellate jurisdiction from all inferior courts and tribunals, and a supervisory control over the same. They shall also have the power to issue writs of habeas corpus, mandamus, injunction, quo warranto, certiorari, and all other writs necessary to carry into effect their orders, judgments and decrees, and give them a general control over inferior courts and jurisdictions.

SECTION 9. When a vacancy shall happen in the office of judge of the supreme or circuit courts, such vacancy shall be filled by an appointment of the Governor, which shall continue until a successor is elected and qualified; and when elected such successor shall hold his office the residue of the unexpired term. There shall be no election for a judge or judges at any general election for state or county officers, nor within thirty days either before, or after such election.

SECTION 10. Each of the judges of the supreme and circuit courts shall receive a salary, payable at such time as the Legislature shall fix, of not less than one thousand five hundred dollars, annually; they shall receive no fees of office, or other compensation than their salaries; they shall hold no office of public trust except a judicial office, during the term for which they are respectively elected and all votes for either of them for any office, except a judicial office, given by the Legislature or the people, shall be void. No person shall be eligible to the office of judge who shall not at the time of his election, be a citizen of the United States and have attained the age of twenty-five years, and be a qualified elector within the jurisdiction for which he may be chosen.

SECTION 11. The supreme court shall hold at least one term, annually, at the seat of government of the state, at such time as shall be provided by law, and the Legislature may provide for holding other terms, and at other places when they may deem it necessary. A circuit court shall be held, at least twice in each year, in each county of this State organized for judicial purposes. The judges of the circuit court may hold courts for each other, and shall do so when required by law.

[Section 12, as amended by a vote of the people at the General Election, November 7, 1882.]

SECTION 12. There shall be a clerk of the circuit court chosen in each county organized for judicial purposes, by the qualified electors thereof who shall hold his office for two years, subject to removal as shall be provided by law, in case of a vacancy, the judge of the circuit court shall have power to appoint a clerk until the vacancy shall be filled by an election, the clerk thus elected or appointed shall give such security as the legislature may require. The supreme court shall appoint its own clerk, and a clerk of the circuit court may be appointed a clerk of the supreme court.

SECTION 13. Any judge of the supreme or circuit court may be removed from office, by address of both houses of the legislature, if two-thirds of all the members elected to each house concur therein, but no removal shall be made by virtue of this section, unless the judge complained of shall have been served with a copy of the charges against him, as the ground of address, and shall have had an opportunity of being heard in his defense. On the question of removal, the ayes and noes shall be entered on the journals.

SECTION 14. There shall be chosen in each county, by the qualified electors thereof, a Judge of Probate, who shall hold his office for two years, and until his successors shall be elected and qualified, and whose jurisdiction, powers and duties shall be prescribed by law. Provided, however, that the legislature shall have power to abolish the office of judge of probate in any county, and to confer probate powers upon such inferior courts as may be established in said county.

SECTION 15. The electors of the several towns, at their annual town meeting, and the electors of cities and villages, at their charter elections, shall in such manner as the Legislature may direct, elect justices of the peace, whose term of office shall be for two years, and until their successors in office shall be elected and qualified. In case of an election to fill a vacancy, occurring before the expiration of a full term, the justice elected shall hold for the residue of the unexpired term. Their number and classification shall be regulated by law. And the tenure of two years shall in no wise interfere with the classification in the first instance. The justices, thus elected, shall have such civil and criminal jurisdiction as shall be prescribed by law.

SECTION 16. The legislature shall pass laws for the regulation of tribunals of conciliation, defining their powers and duties. Such tribunals may be established in and for any township, and shall have power to render judgment to be obligatory on the parties, when they shall voluntarily submit their matter in difference to arbitration, and agree to abide the judgment, or assent thereto in writing.

SECTION 17. The style of all writs and process shall be, "The State of Wisconsin;" all criminal prosecutions shall be carried on in the name and by the authority of the same; and all indictments shall conclude against the peace and dignity of the state.

SECTION 18. The Legislature shall impose a tax on all civil suits commenced, or prosecuted in the municipal, inferior, or circuit courts, which shall constitute a fund to be applied toward the payment of the salary of judges.

SECTION 19. The testimony in causes in equity shall be taken in like manner, as in cases at law, and the office of master in chancery is hereby prohibited.

SECTION 20. Any suitor, in any court of this state, shall have the right to prosecute or defend his suit either in his own proper person, or by an attorney or agent of his choice.

SECTION 21. The legislature shall provide by law for the speedy publication of all statute laws, and of such judicial decisions, made within the state, as may be deemed expedient. And no general law shall be in force until published.

SECTION 22. The legislature at its first session, after the adoption of this Constitution, shall provide for the appointment of three commissioners, whose duty it shall be to inquire into, revise, and simplify the rules of practice, pleadings, forms and proceedings, and arrange a system, adapted to the courts of record of this state, and report the same to the legislature, subject to their modification and adoption; and such commission shall terminate upon the rendering of the report, unless otherwise provided by law.

SECTION 23. The legislature may provide for the appointment of one or more persons in each organized county, and may vest in such person such judicial powers as shall be prescribed by law. Provided, that said power shall not exceed that of a judge of a circuit court at chambers.

## ARTICLE VIII.

## FINANCE.

[Section 1, as amended by a vote of the people at the General Election, November 3, 1908.]

SECTION 1. The rules of taxation shall be uniform, and taxes shall be levied upon such property as the legislature shall prescribe. Taxes may also be imposed on incomes, privileges and occupations, which taxes may be graduated and progressive, and reasonable exemptions may be provided.

[Section 2, as amended by a vote of the people at the General Election, November 6, 1877.]

SECTION 2. No money shall be paid out of the treasury, except in pursuance of an appropriation by law. No appropriation shall be made for the payment of any claim against the state, except claims of the United States and judgments, unless filed within six years after the claim accrued.

SECTION 3. The credit of the state shall never be given, or loaned, in aid of any individual, association, or corporation.

SECTION 4. The State shall never contract any public debt, except in the cases and manner herein provided.

SECTION 5. The legislature shall provide for an annual tax sufficient to defray the estimated expenses of the state for each year; and whenever the expenses of any year shall exceed the income, the legislature shall provide for levying a tax for the ensuing year, sufficient, with other sources of income, to pay the deficiency as well as the estimated expenses of such ensuing year.

SECTION 6. For the purpose of defraying extraordinary expenditures, the state may contract public debts (but such debts shall never in the aggregate exceed one hundred thousand dollars). Every such debt shall be authorized by law, for some purpose or purposes to be distinctly specified therein; and the vote of a majority of all the members elected to each house, to be taken by yeas and nays, shall be necessary to the passage of such law; and every such law shall provide for levying an annual tax sufficient to pay the annual interest of such debt, and the principal within five years from the passage of such law, and shall specially appropriate the proceeds of such taxes to the payment of such principal and interest; and such appropriation shall not be repealed, nor the taxes be postponed, or diminished, until the principal and interest of such debt shall have been wholly paid.

SECTION 7. The Legislature may also borrow money to repel invasion, suppress insurrection, or defend the State in time of war; but the money thus raised shall be applied exclusively to the object for which the loan was authorized, or to the repayment of the debt thereby created.

SECTION 8. On the passage in either house of the legislature, of any law which imposes, continues or renews a tax, or creates a debt, or charge, or makes, continues, or renews an appropriation of public, or trust money, or releases, discharges, or commutes a claim, or demand of the state, the question shall be taken by yeas and nays, which shall be duly entered on the journal; and three-fifths of all the members elected to such house shall, in all such cases be required to constitute a quorum therein.

SECTION 9. No scrip, certificate, or other evidence of state debt, whatsoever, shall be issued, except for such debts as are authorized by the sixth and seventh sections of this article.

[Section 10, as amended by a vote of the people at the General Election, November 3, 1908.]

SECTION 10. The state shall never contract any debt for works of internal improvement, or be a party in carrying on such works, but whenever grants of land or other property shall have been made to the state, especially dedicated by the grant to particular works of internal improvement, the state may carry on such particular works, and shall devote thereto the avails of such grants, and may pledge or appropriate the revenues derived from such works in aid of their completion.

Provided that the state may appropriate money in the treasury or to be thereafter raised by taxation for the construction or improvement of public highways.

[Further amended November, 1910, by adding thereto the following:]

Provided, that the state may appropriate moneys, for the purpose of acquiring, preserving, and developing the water power and the forests of the state; but there shall not be appropriated under the authority of this section in any one year an amount to exceed two-tenths of one mill of the taxable property of the state as determined by the last preceding state assessment.

## ARTICLE IX.

### EMINENT DOMAIN AND PROPERTY OF THE STATE.

SECTION 1. The state shall have concurrent jurisdiction on all rivers and lakes bordering on this state, so far as such rivers, or lakes shall form a common boundary to the state, and any other state or territory, now or hereafter to be formed, and bounded by the same: And the river Mississippi and the navigable waters leading into the Mississippi and St. Lawrence, and the carrying places between the same shall be common highways and forever free, as well to the inhabitants of the state, as to the citizens of the United States, without any tax, impost or duty therefor.

SECTION 2. The title to all lands and other property which have accrued to the territory of Wisconsin by grant, gift, purchase, forfeiture, escheat, or otherwise, shall vest in the state of Wisconsin.

SECTION 3. The people of the state, in their right of sovereignty, are declared to possess the ultimate property, in and to all lands within the jurisdiction of the state; and all lands the title to which shall fail from a defect of heirs, shall revert or escheat to the people.

## ARTICLE X.

### EDUCATION.

[Section 1, as amended by vote of the people at the General election, November 4, 1902.]

SECTION 1. The supervision of public instruction shall be vested in a state superintendent and such other officers as the legislature shall direct; and their qualifications, powers, duties and compensation shall be prescribed by law. The state superintendent shall be chosen by the qualified electors of the state at the same time and in the same manner as members of the supreme court, and shall hold his office for four years from the succeeding first Monday in July. The state superintendent chosen at the general election in November, 1902, shall hold and continue in his office until the first Monday in July, 1905, and his successor shall be chosen at the time of the judicial election in April, 1905. The term of office, time and manner of electing or appointing all other officers of supervision of public instruction shall be fixed by law.

SECTION 2. The proceeds of all lands, that have been or hereafter may be granted by the United States to this state for educational purposes (except the lands heretofore granted for the purposes of a University) and all monies, and the clear proceeds of all property that may accrue to the state by forfeiture or escheat, and all monies which may be paid as an equivalent for exemption from military duty; and the clear proceeds of all fines collected, in the several counties, for any breach of the penal laws, and all monies arising from any grant to the state where the purposes of such grant are not specified, and the five hundred thousand acres of land, to which the state is entitled by the provisions of an act of congress, entitled "An Act to appropriate the proceeds of the sales of the public lands, and to grant pre-emption rights," approved the fourth day of September, one thousand eight hundred and forty-one; and also the five per-centum of the net proceeds of the public lands, to which the state shall become entitled on her admission into the Union (if congress shall consent to such appropriation of the two grants last mentioned) shall be set apart as a separate fund, to be called

"the school fund," the interest of which and all other revenues derived from the school lands, shall be exclusively applied to the following objects, to wit:

FIRST. To the support and maintenance of common Schools, in each school district, and the purchase of suitable libraries and apparatus therefor.

SECOND. The residue shall be appropriated to the support and maintenance of academies and normal schools, and suitable libraries; and apparatus therefor.

SECTION 3. The legislature shall provide by law for the establishment of district schools, which shall be as nearly uniform as practicable; and such schools shall be free and without charge for tuition, to all children between the ages of four and twenty years; and no sectarian instruction shall be allowed therein.

SECTION 4. Each town and city shall be required to raise, by tax, annually, for the support of common schools therein, a sum not less than one-half the amount received by such town or city respectively for school purposes from the income of the school fund.

SECTION 5. Provision shall be made by law, for the distribution of the income of the school fund among the several towns and cities of the state, for the support of common schools therein, in some just proportion to the number of children and youth resident therein, between the ages of four and twenty years, and no appropriation shall be made from the school fund to any city, or town, for the year in which said city or town shall fail to raise such tax; nor to any school district for the year in which a school shall not be maintained at least three months.

SECTION 6. Provision shall be made by law for the establishment of a state university, at or near the seat of state government, and for connecting with the same, from time to time, such colleges in different parts of the state, as the interests of education may require. The proceeds of all lands that have been, or may hereafter be granted by the United States to the state for the support of a university, shall be and remain a perpetual fund, to be called "the university fund," the interest of which shall be appropriated to the support of the state university, and no sectarian instruction shall be allowed in such university.

SECTION 7. The secretary of state, treasurer and attorney general, shall constitute a board of commissioners for the sale of the school and university lands, and for the investment of the funds arising therefrom. Any two of said commissioners shall be a quorum for the transaction of all business pertaining to the duties of their office.

SECTION 8. Provision shall be made by law for the sale of all school and university lands, after they shall have been appraised; and when any portion of such lands shall be sold and the purchase money shall not be paid at the time of the sale, the commissioners shall take security by mortgage upon the land sold for the sum remaining unpaid, with seven per cent interest thereon, payable annually at the office of the treasurer. The commissioners shall be authorized to execute a good and sufficient conveyance to all purchasers of such lands, and to discharge any mortgages taken as security, when the sum due thereon shall have been paid. The commissioners shall have power to withhold from sale any portion of such lands, when they shall deem it expedient, and shall invest all monies arising from the sale of such lands, as well as all other university and school funds, in such manner as the legislature shall provide, and shall give such security for the faithful performance of their duties as may be required by law.

## ARTICLE XI.

### CORPORATIONS.

SECTION 1. Corporations without banking powers or privileges may be formed under general laws, but shall not be created by special act, except for municipal purposes, and in cases where in the judgment of the legislature, the objects of the corporation cannot be attained under general laws. All general laws or spe-

cial acts, enacted under the provisions of this section, may be altered or repealed by the legislature at any time after their passage.

SECTION 2. No municipal corporation shall take private property for public use, against the consent of the owner, without the necessity thereof being first established by the verdict of a jury.

[As amended Nov. 1912.]

SECTION 3. It shall be the duty of the legislature, and they are hereby empowered, to provide for the organization of cities and incorporated villages, and to restrict their power of taxation, assessment, borrowing money, contracting debts, and loaning their credit, so as to prevent abuses in assessments and taxation, and in contracting debts by such municipal corporations. No county, city, town, village, school district, or other municipal corporation shall be allowed to become indebted in any manner or for any purpose to any amount, including existing indebtedness, in the aggregate exceeding five per centum on the value of the taxable property therein, to be ascertained by the last assessment for state and county taxes previous to the incurring of such indebtedness. Any county, city, town, village, school district, or other municipal corporation incurring any indebtedness as aforesaid, shall, before or at the time of doing so, provide for the collection of a direct annual tax sufficient to pay the interest on such debt as it falls due, and also to pay and discharge the principal thereof within twenty years from the time of contracting the same; except that when such indebtedness is incurred in the acquisition of lands by cities, or by counties having a population of 150,000 or over, for public, municipal purposes, or for the permanent improvement thereof, the city or county incurring the same shall, before or at the time of so doing, provide for the collection of a direct annual tax sufficient to pay the interest on such debt as it falls due, and also to pay and discharge the principal thereof within a period not exceeding fifty years from the time of contracting the same.

[Added November 1912.]

SECTION 3a. The state or any of its cities may acquire by gift, purchase, or condemnation lands for establishing, laying out, widening, enlarging, extending, and maintaining memorial grounds, streets, squares, parkways, boulevards, parks, playgrounds, sites for public buildings, and reservations in and about and along and leading to any or all of the same; and after the establishment, layout, and completion of such improvements, may convey any such real estate thus acquired and not necessary for such improvements, with reservations concerning the future use and occupation of such real estate, so as to protect such public works and improvements, and their environs, and to preserve the view, appearance, light, air, and usefulness of such public works.

[Sections 4 and 5, as amended by a vote of the people at a General Election, November 4, 1902.]

SECTION 4. The legislature shall have power to enact a general banking law for the creation of banks, and for the regulation and supervision of the banking business, provided that the vote of two-thirds of all the members elected to each house, to be taken by yeas and nays, be in favor of the passage of such law.

## ARTICLE XII.

### AMENDMENTS.

SECTION 1. Any amendment, or amendments to this constitution may be proposed in either house of the legislature, and if the same shall be agreed to by a majority of the members elected to each of the two houses, such proposed amendment, or amendments, shall be entered on their journals, with the yeas and nays taken thereon, and referred to the legislature to be chosen at the next general election; and shall be published for three months previous to the time of holding such election, and if, in the legislature so next chosen, such proposed amendment, or amendments, shall be agreed to by a majority of all the members elected

to each house, then it shall be the duty of the Legislature to submit such proposed amendment, or amendments, to the people in such manner, and at such time, as the legislature shall prescribe; and if the people shall approve and ratify such amendment or amendments, by a majority of the electors voting thereon, such amendment, or amendments, shall become part of the constitution; provided, that if more than one amendment be submitted, they shall be submitted in such manner that the people may vote for or against such amendments separately.

SECTION 2. If at any time a majority of the senate and assembly shall deem it necessary to call a convention to revise or change this constitution, they shall recommend to the electors to vote for or against a convention at the next election for members of the legislature. And if it shall appear that a majority of the electors voting thereon, have voted for a convention, the legislature shall, at its next session, provide for calling such convention.

### ARTICLE XIII.

#### MISCELLANEOUS PROVISIONS.

[Section 1, as amended by a vote of the people at the General Election, November 7, 1882.]

SECTION 1. The political year for the State of Wisconsin shall commence on the first Monday in January in each year, and the general elections shall be holden on the Tuesday next succeeding the first Monday in November. The first general election for all state and county officers, except judicial officers, after the adoption of this amendment, shall be holden in the year A. D. 1884, and thereafter the general election shall be held biennially. All state, county or other officers elected at the general election in the year 1881, and whose term of office would otherwise expire on the first Monday of January in the year 1884, shall hold and continue such offices respectively, until the first Monday in January in the year 1885.

SECTION 2. Any inhabitant of this state who may hereafter be engaged, either directly or indirectly in a duel, either as principal or accessory, shall forever be disqualified as an elector, and from holding any office under the constitution and laws of this state, and may be punished in such other manner as shall be prescribed by law.

SECTION 3. No member of congress, nor any person holding any office of profit or trust under the United States (postmasters excepted) or under any foreign power; no person convicted of any infamous crime in any court within the United States; and no person being a defaulter to the United States, or to this state, or to any county, or town therein, or to any state, or territory within the United States, shall be eligible to any office of trust, profit, or honor in this state.

SECTION 4. It shall be the duty of the legislature to provide a great seal for the state, which shall be kept by the secretary of state, and all official acts of the governor, his approbation of the laws excepted, shall be thereby authenticated.

SECTION 5. All persons residing upon Indian lands, within any county of the state, and qualified to exercise the right of suffrage under this constitution, shall be entitled to vote at the polls which may be held nearest their residence, for State, United States or county officers. Provided, that no person shall vote for county officers out of the county in which he resides.

SECTION 6. The elective officers of the legislature, other than the presiding officer shall be a chief clerk and a sergeant-at-arms, to be elected by each house.

SECTION 7. No county with an area of nine hundred square miles, or less, shall be divided, or have any part stricken therefrom, without submitting the question to a vote of the people of the county, nor unless a majority of all the legal voters of the county, voting on the question, shall vote for the same.

SECTION 8. No county seat shall be removed, until the point to which it is proposed to be removed shall be fixed by law, and a majority of the voters of the county, voting on the question, shall have voted in favor of its removal to such point.

SECTION 9. All county officers whose election, or appointment is not provided for by this constitution, shall be elected by the electors of the respective counties, or appointed by the boards of supervisors, or other county authorities, as the legislature shall direct. All city, town and village officers, whose election or appointment, is not provided for by this constitution, shall be elected by the electors of such cities, towns and villages, or of some division thereof, or appointed by such authorities thereof, as the legislature shall designate for that purpose. All other officers whose election or appointment is not provided for by this constitution, and all officers whose offices may hereafter be created by law, shall be elected by the people, or appointed, as the legislature may direct.

SECTION 10. The legislature may declare the cases in which any office shall be deemed vacant, and also the manner of filling the vacancy, where no provision is made for that purpose in this constitution.

[Article XIII, as amended by addition of Section 11, by a vote of the people at the General Election, November 4, 1902.]

SECTION 11. No person, association, co-partnership, or corporation, shall promise, offer or give, for any purpose, to any political committee, or any member or employe thereof, to any candidate for, or incumbent of any office or position under the constitution or laws, or under any ordinance of any town or municipality, of this state, or to any person at the request or for the advantage of all or any of them, any free pass or frank, or any privilege withheld from any person, for the traveling accommodation or transportation of any person or property, or the transmission of any message or communication. No political committee, and no member or employe thereof, no candidate for and no incumbent of any office or position under the constitution or laws, or under any ordinance of any town or municipality of this state, shall ask for, or accept, from any person, association, co-partnership, or corporation, or use, in any manner, or for any purpose, any free pass or frank, or any privilege withheld from any person, for the traveling accommodation or transportation of any person or property, or the transmission of any message or communication. Any violation of any of the above provisions shall be bribery and punished as provided by law, and if any officer or any member of the legislature be guilty thereof, his office shall become vacant. No person within the purview of this act shall be privileged from testifying in relation to anything therein prohibited; and no person having so testified shall be liable to any prosecution or punishment for any offense concerning which he was required to give his testimony or produce any documentary evidence. The railroad commissioner and his deputy in the discharge of duty are excepted from the provisions of this amendment.

## ARTICLE XIV.

### SCHEDULE.

SECTION 1. That no inconvenience may arise by reason of a change from a territorial to a permanent state government, it is declared, that all rights, actions, prosecutions, judgments, claims and contracts, as well of individuals, as of bodies corporate, shall continue as if no such change had taken place; and all process which may be issued under the authority of the territory of Wisconsin previous to its admission into the union of the United States, shall be as valid as if issued in the name of the state.

SECTION 2. All laws now in force, in the territory of Wisconsin, which are not repugnant to this constitution, shall remain in force until they expire by their own limitation, or be altered or repealed by the legislature.

SECTION 3. All fines, penalties, or forfeitures, accruing to the territory of Wisconsin, shall inure to the use of the state.

SECTION 4. All recognizances heretofore taken, or which may be taken before the change from territorial to a permanent state government, shall remain valid, and shall pass to, and may be prosecuted in the name of the state; and all bonds executed to the governor of the territory, or to any other officer, or court, in his, or their official capacity, shall pass to the governor or state authority, and their successors in office, for the uses therein respectively expressed, and may be sued for and recovered accordingly; and all the estate, or property, real, personal, or mixed, and all judgments, bonds, specialties, choses in action, and claims or debts of whatsoever description, of the territory of Wisconsin, shall inure to and vest in the state of Wisconsin, and may be sued for and recovered, in the same manner and to the same extent, by the state of Wisconsin, as the same could have been by the territory of Wisconsin. All criminal prosecutions and penal actions which may have arisen, or which may arise, before the change from a territorial to a state government, and which shall then be pending, shall be prosecuted to judgment and execution in the name of the state. All offenses committed against the laws of the territory of Wisconsin, before the change from a territorial to a state government, and which shall not be prosecuted before such change, may be prosecuted in the name and by the authority of the state of Wisconsin, with like effect as though such change had not taken place; and all penalties incurred, shall remain the same as if this constitution had not been adopted. All actions at law and suits in equity, which may be pending in any of the courts of the territory of Wisconsin, at the time of a change from a territorial to a state government, may be continued and transferred to any court of the state, which shall have jurisdiction of the subject matter thereof.

SECTION 5. All officers, civil and military, now holding their offices under the authority of the United States, or of the territory of Wisconsin, shall continue to hold and exercise their respective offices, until they shall be superseded by the authority of the state.

SECTION 6. The first session of the legislature of the state of Wisconsin, shall commence on the first Monday in June next, and shall be held at the village of Madison, which shall be and remain the seat of government, until otherwise provided by law.

SECTION 7. All county, precinct and township officers shall continue to hold their respective offices, unless removed by competent authority, until the legislature shall, in conformity with the provisions of this constitution, provide for the holding of elections to fill such offices respectively.

SECTION 8. The president of this convention shall, immediately after its adjournment, cause a fair copy of this constitution, together with a copy of the act of the legislature of this territory, entitled "An act in relation to the formation of a state government in Wisconsin, and to change the time of holding the annual session of the legislature," approved October 27th, 1847, providing for the calling of this convention, and also a copy of so much of the last census of this territory, as exhibits the number of its inhabitants, to be forwarded to the President of the United States, to be laid before the congress of the United States, at its present session.

SECTION 9. This constitution shall be submitted at an election to be held on the second Monday in March next, for ratification or rejection, to all white male persons of the age of twenty-one years or upwards, who shall then be residents of this territory, and citizens of the United States, or shall have declared their intention to become such in conformity with the laws of congress on the subject of naturalization, and all persons having such qualification shall be entitled to vote for, or against the adoption of this constitution, and for all officers first elected under it. And if the constitution be ratified by the said electors, it shall become the constitution of the state of Wisconsin. On such of the ballots as are for the constitution, shall be written or printed the word "YES", and on such

as are against the constitution, the word "no." The election shall be conducted in the manner now prescribed by law, and the returns made by the clerks of the boards of supervisors or county commissioners (as the case may be) to the governor of the territory, at any time before the tenth day of April next. And in the event of the ratification of this constitution, by a majority of all the votes given, it shall be the duty of the governor of this territory to make proclamation of the same, and to transmit a digest of the returns to the senate and assembly of the state, on the first day of their session. An election shall be held, for governor, lieutenant-governor, treasurer, attorney general, members of the state legislature, and members of congress, on the second Monday of May next; and no other or further notice of such election shall be required.

SECTION 10. Two members of congress shall also be elected, on the second Monday of May next; and until otherwise provided by law, the counties of Milwaukee, Waukesha, Jefferson, Racine, Walworth, Rock and Green, shall constitute the first congressional district and elect one member. And the counties of Washington, Sheboygan, Manitowoc, Calumet, Brown, Winnebago, Fond du Lac, Marquette, Sauk, Portage, Columbia, Dodge, Dane, Iowa, La Fayette, Grant, Richland, Crawford Chippewa, St. Croix, and La Pointe, shall constitute the second congressional district, and shall elect one member.

SECTION 11. The several elections, provided for in this article, shall be conducted according to the existing laws of the territory, provided that no elector shall be entitled to vote except in the town, ward or precinct where he resides. The returns of election for senators and member of assembly, shall be transmitted to the clerk of the board of supervisors, or county commissioners, as the case may be; and the votes shall be canvassed, and certificates of election issued as now provided by law. In the first senatorial district, the returns of the election for senator, shall be made to the proper officer in the county of Brown; in the second senatorial district, to the proper officer in the county of Columbia; in the third senatorial district, to the proper officer in the county of Crawford; in the fourth senatorial district, to the proper officer in the county of Fond du Lac; and in the fifth senatorial district, to the proper officer in the county of Iowa. The returns of election for state officers and members of congress, shall be certified and transmitted to the speaker of the assembly, at the seat of government, in the same manner as the vote for delegate to congress are required to be certified and returned by the laws of the territory of Wisconsin, to the secretary of said territory, and in such time, that they may be received on the first Monday in June next; and as soon as the legislature shall be organized, the speaker of the assembly, and the president of the senate shall, in the presence of both houses, examine the returns, and declare who are duly elected to fill the several offices hereinbefore mentioned; and give to each of the persons elected, a certificate of his election.

SECTION 12. [*Section 12 of this article apportioned the state temporarily into senate and assembly districts and is omitted as obsolete.*]

SECTION 13. Such parts of the common law as are now in force in the territory of Wisconsin, not inconsistent with this constitution, shall be and continue part of the law of this state, until altered, or suspended by the legislature.

SECTION 14. The senators first elected in the even numbered senate districts, the governor, lieutenant governor, and other state officers first elected under this constitution, shall enter upon the duties of their respective offices on the first Monday of June next, and shall continue in office for one year from the first Monday of January next; the senators first elected in the odd-numbered senate districts, and the members of the assembly, first elected, shall enter upon their duties respectively on the first Monday of June next, and shall continue in office until the first Monday in January next.

SECTION 15. The oath of office may be administered by any judge or justice of the peace, until the legislature shall otherwise direct.

## RESOLUTIONS.

*Resolved.*—That the congress of the United States be and is hereby requested, upon the application of Wisconsin for admission into the Union, so to alter the provisions of an act of congress entitled “an act to grant a quantity of land to the territory of Wisconsin, for the purposes of aiding in opening a canal to connect the waters of Lake Michigan with those of Rock river,” approved June eighteenth, eighteen hundred and thirty-eight, and so to alter the terms and conditions of the grant made therein, that the odd-numbered sections thereby granted and remaining unsold may be held and disposed of by the state of Wisconsin as part of the five hundred thousand acres of land to which said state is entitled by the provisions of an act of congress, entitled “an act to appropriate the proceeds of the sales of the public lands, and to grant pre-emption rights,” approved the fourth day of September, eighteen hundred and forty-one; and further, that the even-numbered sections reserved by congress, may be offered for sale by the United States for the same minimum price, and subject to the same rights of pre-emption as other public lands of the United States.

*Resolved.*—That congress be further requested to pass an act whereby the excess price over and above one dollar and twenty-five cents per acre, which may have been paid by the purchasers of said even-numbered sections which shall have been sold by the United States, be refunded to the present owners thereof, or they be allowed to enter any of the public lands of the United States to an amount equal in value to the excess so paid.

*Resolved.*—That in case the said odd-numbered sections shall be ceded to the state as aforesaid, the same shall be sold by the state in the same manner as other school lands, provided that the same rights of pre-emption as are now granted by the laws of the United States, shall be secured to persons who may be actually settled upon such lands at the time of the adoption of this constitution; and provided further, that the excess price, over and above one dollar and twenty-five cents per acre, absolutely or conditionally contracted to be paid by the purchasers of any part of said sections which shall have been sold by the territory of Wisconsin, shall be remitted to such purchasers, their representatives or assigns.

*Resolved.*—That congress be requested, upon the application of Wisconsin for admission into the Union, to pass an act whereby the grant of five hundred thousand acres of land, to which the state of Wisconsin is entitled by the provisions of an act of congress entitled “an act to appropriate the proceeds of the sales of the public lands, and to grant pre-emption rights,” approved the fourth day of September, eighteen hundred and forty-one, and also the five per centum of the net proceeds of the public lands lying within the state, to which it shall become entitled on its admission into the Union, by the provisions of an act of congress, entitled “an act to enable the people of Wisconsin territory to form a constitution and state government, and for the admission of such state into the Union,” approved the sixth day of August, eighteen hundred and forty-six, shall be granted to the state of Wisconsin, for the use of schools, instead of the purposes mentioned in the said acts of congress respectively.

*Resolved.*—That the congress of the United States be and hereby is requested, upon the admission of this state into the Union, so to alter the provisions of the act of congress entitled “an act to grant a certain quantity of land to aid in the improvement of the Fox and Wisconsin rivers, and to connect the same by a canal in the territory of Wisconsin,” that the price of the lands reserved to the United States, shall be reduced to the minimum price of the public lands.

*Resolved.*—That the legislature of this state shall make provision by law for the sale of the lands granted to the state in aid of said improvements, subject to the same rights of pre-emption to the settlers thereon, as are now allowed by law to settlers on the public lands.

*Resolved.*—That the foregoing resolutions be appended to, and signed with the constitution of Wisconsin, and submitted therewith to the people of this territory, and to the congress of the United States.

We, the undersigned, members of the convention to form a constitution for the state of Wisconsin, to be submitted to the people thereof, for their ratification or rejection, do hereby certify that the foregoing is the constitution adopted by the convention.

In testimony whereof, we have hereunto set our hands at Madison, the first day of February, A. D. eighteen hundred and forty-eight.

## GRAND ARMY OF THE REPUBLIC.

The objects of this order are (1) to keep green the memory of the events and associations of the Civil War; (2) to aid unfortunate comrades, and (3) to keep alive and active the spirit of patriotism. The first post was organized April 6, 1866, at Decatur, Ill. The first National Encampment was held November 20, 1866, at Indianapolis.

### THE WISCONSIN DEPARTMENT.

The Department of Wisconsin was organized June 7, 1866, and the first Wisconsin post was chartered at Madison, June 10, 1866. This post, now known as Lucius Fairchild, No. 11, is still active and has 145 members. Post No. 4, of Berlin, was chartered Sept. 8, 1866, and has maintained ever since an unbroken organization. It is said to be the oldest Post in existence with an unbroken record.

General James K. Proudfit was the leading spirit in the organization of the Grand Army of the Republic in Wisconsin and became the first department commander. He is now the oldest past department commander living. The following is the list of all department commanders up to the present:

\* Deceased. † Elected commander-in-chief.

The department reached its largest membership in 1889, when it was 13,944. Dec. 31, 1914, there were 202 posts, with 5,198 members.

The legislature of 1901 established in the capitol a permanent G. A. R. memorial hall for the preservation of relics and books commemorative of the war, pictures of war scenes, and portraits of men and women who did good service in war times. This hall was to be maintained by the state. It was made the headquarters of the Department of Wisconsin and was well equipped by the state for that purpose. It was the finest department headquarters in the United States. When, Feb. 27, 1904, fire broke out in the capitol, this hall

with all it contained, was completely destroyed; but on the upper floor in the north wing of the new capitol there will be elegant rooms, well equipped. H. W. Rood, Company E, 12th Wisconsin, is custodian of the Memorial hall. This hall now contains about 1,200 books, 200 pamphlets, 350 pictures and many war relics. At present the department headquarters are in a hall rented by the state at 118 Monona Ave. Wisconsin is generous in her attitude toward the old soldiers.

At the last department encampment, held at Madison, June 10-11, 1914, the following named officers were chosen: Commander, Samuel A. Cook, Neenah; assistant adjutant and quartermaster general, Frederick A. Bird, Madison; senior vice commander, Walter O. Pietzsch, Baraboo; junior vice commander, H. L. Farr, Madison; medical director, B. C. Brett, M. D., Green Bay; chaplain, A. J. Hood, Muscoda; chief of staff, Frank A. Walsh, Milwaukee; patriotic instructor, Hosea W. Rood, Madison; master of transportation, Robert Law, Neenah; judge advocate, E. Q. Nye, Milwaukee; chief mustering officer, F. S. Veeder, Mauston; inspector, J. M. Whitley, De Pere.

The next department encampment will be held at Wausau, the third Tuesday in June, 1915.

*Vicksburg Monument Commission*—A. G. Weissert, Milwaukee; O. J. Burnham, Richland Center; Hosea W. Rood, Madison.

*Camp Randall Memorial Park Commission*—Colonel J. A. Watrous, Milwaukee; Colonel C. E. Warner, Windsor; W. J. McKay, Madison.

## LADIES OF THE GRAND ARMY OF THE REPUBLIC.

This society of loyal and patriotic women is said to have had its origin in Portland, Maine, in 1867, under the name of the Loyal Ladies' League. The first organized Department was that of New Jersey, 1881, with eight subordinate Leagues. Mrs. Carrie M. Burge, of Vineland, was the first Department President. The following were the stated objects of the order:

"To unite with loyalty, love for one another; to practice precepts of true fraternity of feeling toward all the sisters of our order, thus emulating the spirit that unites our fathers, husbands and brothers; to honor the memory of our fallen heroes; to perpetuate and keep forever sacred Memorial Day; to assist the Grand Army of the Republic in its high and holy mission—aid, encourage and sympathize with them in their noble work of charity; to extend needful aid to members in time of sickness and distress; to aid sick soldiers, sailors and marines, and do all in our power to alleviate suffering."

Eligibility to membership required an applicant to be of good moral character, and the mother or wife, sister or daughter of an honorably discharged soldier, sailor or marine who served in the Union Army during the Civil War of 1861-65. These requirements differed from those of the Woman's Relief Corps, which organization decided at its national convention in Denver, in 1883, to admit to membership any loyal woman of worthy character.

The Wisconsin department was organized in 1893. The names of the present officers are as follows: President, Mrs. Martha E. A. Merriam, West Bend; senior vice president, Mrs. Frances Lund, Madison; junior vice president, Mrs. Emogene Hatch, Eau Claire; secretary, Olga Schaffer, Fond du Lac; treasurer, Adaline V. Bell, Milwaukee; chaplain, Mrs. Charlotte Stevens, Beloit; patriotic instructor, Mrs. Maude Meeker, Appleton.

The next department meeting will be held at Wausau the third Tuesday in June, 1915.

## WOMAN'S RELIEF CORPS.

In 1881 the society received the official recognition of the G. A. R., and then took the full title, "Woman's Relief Corps, Auxiliary to the Grand Army of the Republic." The first national gathering was at Denver, Col., July 25, 1883. It was there decided that all loyal women, whether of kin to soldiers of the war or not, should be eligible to membership. Those positively in favor of admitting only women of the families of soldiers withdrew and organized the "Ladies' Loyal League," now "Ladies of the Grand Army of the Republic." Department and national conventions are held at the same times and places with encampments of the G. A. R. The objects of the society are: "To specially aid and assist the Grand Army of the Republic and to perpetuate the memory of their heroic dead. To assist such union veterans as need our help and protection, and to extend needful aid to their widows and orphans. To find them homes and employment, and assure them of sympathy and friends. To cherish and emulate the deeds of our army nurses and of all loyal women who rendered loving service to their country in her hour of peril. To inculcate lessons of patriotism and love of country among our children, and in the communities in which we live. To maintain true allegiance to the United States of America. To discountenance whatever tends to weaken loyalty, and to encourage the spread of universal liberty and equal rights to all men."

Amount expended in Wisconsin for relief work for the year ending June 30, 1914, \$8,857.61.

The Department of Wisconsin was organized at La Crosse, June 26, 1884. Seven local corps were there represented, and, if the records are correct, there were eleven voting members present. The order has grown steadily since then, and now has 150 corps in Wisconsin, with 8,108 members.

The present department officers elected July 1, 1914, are as follows: President, Amanda Wettig, Milwaukee; senior vice president, Lucina Smith, Madison; junior vice president, Helen Chatterton, Belleville; secretary, Mary Ellison, Milwaukee; treasurer, Mrs. Ella M. Bresee, Madison; chaplain, Helen B. Cole, Sheboygan Falls; patriotic instructor, Henrietta Pease, Lowell; inspector, Geraldine Fenlon, Milwaukee; instituting and installing officer, Emma E. Grinnell, Beloit; counselor, Laura E. Maloney, Fond du Lac; press correspondent, Annie E. Noyes, Madison; chief of staff, Ida Laur, Milwaukee.

The next department convention for Wisconsin will be held at Wausau on the third Tuesday in June, 1915.

 THE SONS OF VETERANS.

One of the most active organizations auxiliary to the Grand Army of the Republic is the Sons of Veterans of the United States of America. The order was established Nov. 12, 1881, at Pittsburg, Pa., and it has grown rapidly. It is based upon the following principles:

(1) A firm belief and trust in Almighty God, and a realization that under His beneficent guidance the free institutions of our land, consecrated by the services and blood of our fathers, have been preserved, and the integrity and life of the nation maintained.

(2) True allegiance to the government of the United States, based upon a respect for, and devotion and fidelity to, its constitution and laws, manifested by discountenancing anything that may tend to weaken loyalty, incite to insurrection, treason or rebellion, or in any way impair the efficiency and permanency of our national union.

Objects.—To keep green the memories of our fathers and their sacrifices for the maintenance of the Union; to aid the members of the Grand Army of the

Republic in caring for disabled and helpless veterans; to extend aid and protection to their widows and orphans; to perpetuate the memory and history of their heroic dead, and maintain the proper observance of Memorial Day; to aid and assist worthy and needy members of our order; to inculcate patriotism and love of country, not alone among our members, but among all people of our land; and to spread and sustain the doctrine of equal rights, universal liberty and justice to all.

**Membership.**—Members must be at least eighteen years old, and the sons of deceased or honorably discharged Union soldiers. The sons of members of the order are eligible to membership on becoming twenty-one years of age.

The present officers elected July 1, 1914, of the Wisconsin division are as follows: Commander, E. T. Fairchild, Milwaukee; senior vice commander, Glenn E. Pelton, Baraboo; junior vice commander, L. W. McComb, Stoughton; secretary-treasurer, C. H. Hudson, Madison; staff:—Patriotic instructor, F. A. Kremer, Madison; chaplain, the Rev. Frank L. Roberts, Eau Claire; counselor, J. H. Schmidt, Manitowoc; organizer, H. S. Siggelko, Madison; assistant organizer, Otto F. Berner, Antigo.

The first camp of the Division was organized at Waukesha in 1883, the first annual encampment was held in Oshkosh in 1884, and the first Division Commander was Dr. John Finney, Clintonville. December 31, 1914, there were 49 camps and 1,657 members.

The annual encampments of the Sons of Veterans are held at the same time and place with those of the Grand Army of the Republic. The next division meeting will be held at Wausau, the third Tuesday in June, 1915.

### POLITICAL PARTY PLATFORMS.

---

#### PROHIBITION STATE PLATFORM.

The Prohibition party of Wisconsin, assembled in convention at Madison, this fifteenth day of September, 1914, asking for the blessing and direction of Almighty God in this campaign, make the following declaration of principles:

I. (a) That the liquor traffic is a crime and not a business and to destroy such a traffic, a political party must be elected to power that will interpret the laws and the constitution, and administer the government in such a way as to absolutely prohibit the manufacture and sale of intoxicating liquors as a beverage.

(b) The enactment and enforcement of efficient laws for the destruction of the liquor traffic, with the repeal of all tax and excise laws as the first act, and if it then seems advisable, the adoption of a prohibitory amendment.

II. A uniform marriage and divorce law. The complete suppression of the traffic in girls and the social evil.

III. The right of suffrage to women on the same conditions and terms as to men.

IV. Court review of post office department decisions.

V. We believe in good roads, but favor a more economical, efficient and conservative policy of construction to lessen the burden of expense to the taxpayers.

VI. For the purpose of stimulating the "Back to the Land" movement and to encourage the further settlement of farm lands in Wisconsin, we favor the exemption to actual settlers on the cut-over lands of the state from the payment of state tax on such lands for a period of five years.

VII. We believe that commissions and inspectors serve a useful purpose and help to efficiently and economically administer certain governmental affairs. We recommend, however, in the interest of economy, that useless commissions and inspectors be eliminated, and that the salaries be lowered generally.

VIII. We direct attention to the increasing cost of state charities and corrections for which the increasing consumption of alcoholics is largely responsible. We main-

tain that this growth from \$916,340.33 in 1903 to \$1,920,938.16 in 1913, over 100 per cent with only 12 per cent increase in population, is indicative of other costs that come out of the traffic in drink and is a definite and undisputed cause of increase in taxes.

IX. We favor legislation that will encourage the formation and growth of political parties and declare that every party which has its ticket upon the official ballot should be represented on the election board in every precinct where such party is organized.

We invite all citizens to cooperate with us in bringing about the speedy and complete triumph of the foregoing fundamental principles.

---

### REPUBLICAN STATE PLATFORM, 1914.

We, the Republicans of Wisconsin, in convention assembled, record our devotion to Republican principles and renew our adherence to the Republican party, as the party of progress, which has gone from the fulfillment of one great pledge to the fulfillment of another in response to the public need and the will of the people. Our greatest advances in the state and the nation have been made during the years of its ascendancy.

We approve the work of Wisconsin's Republican representatives in both houses of congress, and we commend the present state administration.

The Republican party in the state has never failed in its promises to the people, and a faithful performance of its pledges has been one of its traditions since its advent into the political life of the commonwealth, three score years ago.

Its achievements have been the beacon lights of legislation and human advancement, and among the many of recent years the following are a few:

A stringent corrupt practices act.

A railroad commission.

A strict dairy and food law which protects both the producer and the consumer.

Wise legislation for the better protection of health and sanitation, which, with the aid of medical science has confined contagious diseases to isolated cases, and has made epidemics a thing of the past.

A two cent passenger fare on railways.

A law providing shorter hours for railway employes.

An eight hour labor law on public buildings and on public works.

A reasonable child labor law.

A law which makes it mandatory for minors engaged in manual labor to receive a certain amount of educational instruction.

A public utility law, which regulates the rates and manner of service of gas and electric light companies, and other similar agencies.

A workmen's compensation law, and an industrial commission to enforce and carry out its provisions.

Advanced legislation for the protection of labor engaged in the industries, against accidents by dangerous machinery and dangerous surroundings.

Legislation protecting the health and sanitation of those employed in industrial and mercantile pursuits.

Laws limiting the hours of female labor.

Legislation to conserve our natural resources, and the propagation of fish and game.

An effective weights and measures law, protecting the consumer in his just rights.

Legislation authorizing cooperative societies.

Legislation regulating the issuance and sale of corporate stock, thereby protecting the manufacturer and merchant seeking capital, as well as protecting the innocent investor.

Beneficial agricultural and dairy education which now places Wisconsin in the position of producing more cheese than any other state in the Union.

Humane legislation to aid dependent mothers.

Legislation permitting the employment of prison labor on highways.

Reasonable and efficient insurance legislation providing for supervision.

Unfair trade legislation which seeks to prohibit the destroying of competition.

#### The Tariff.

Business is stagnant. Thousands of workmen are out of employment. A still larger number of laborers are working but a few hours a day and consequently at greatly reduced earnings. The cost of living is increasing. Though they now need protection the farmers of Wisconsin are exposed for the first time in half a century to competition from Canada, Australia, Argentina and China. The revenues of the general government have fallen off so that special war taxes have been proposed. All this has been brought about principally by unwise tariff legislation.

We therefore reaffirm our belief in a protective tariff, limited to the difference in the cost of production here and abroad, to the end that business may be encouraged, our workmen protected, agricultural interests safeguarded and prosperity again restored upon a safe and firm basis.

To accomplish these results we favor the establishment of a scientific, nonpartisan tariff commission.

#### Business.

That state regulation constitutes a great business asset, as well as a protection to the public, now is recognized by many business interests which hitherto have regarded all public supervision as mere interference with private initiative. If regulation has operated to reduce the extraordinary profits which were possible before the days of public control, it also has operated to reduce the risk to investors. It has given stability to all public service enterprises. If the plunging speculator has cause to complain, the careful investor has reason to rejoice.

Proper supervision of land mortgage associations by the banking department of the state has made it possible for Wisconsin to secure money for agricultural development on the same advantageous terms and by methods similar to those by which railroads and other large corporations have secured funds for their vast undertakings. By authorizing bond issues based upon farm mortgages the legislature of 1913 placed the land mortgage on a par with other attractive securities. We believe that this plan will prove a powerful factor in the development of the agricultural interests of the state.

The legislature of 1913 also passed a law covering every form of corporate organization and promotion for the protection of innocent investors against the purchase of fraudulent and worthless stocks.

#### Labor.

The enactment of enlightened laws dealing with labor conditions has placed Wisconsin in the van of progressive states, and we point with pride to the workmen's compensation act, the child labor law, the law regulating the hours of labor for women, the laws prescribing a minimum wage for women, providing pensions for mothers, creating the industrial commission, and many other good and efficient laws.

#### Education.

We favor the placing of all state educational institutions on a strictly business basis, to the end that all moneys available for their support may be equitably distributed, and that economical management of these institutions may be promoted.

We believe that in matters of education the principal concern of the state should be the common schools. These schools should be given first consideration in the educational program of the state.

We are proud of the university and wish to maintain it as an educational institution of the highest standard. The expense of its maintenance, however, has become large and must be limited to a sum the people can afford to pay. We favor the establishment of a plan under which nonresident students shall pay a tuition fee that represents the amount expended by the people of this state for their education.

#### State Boards.

We believe in constitutional government and in concentrating responsibility for government in the hands of the constitutional officers of the state, who are elected by the

people and are directly responsible to the people. We promise the abolition of all commissions that can be dispensed with, retaining only such as experience has proven are essential to the welfare of the people.

#### Good Roads.

We are in favor of good roads. The amount of money expended for that purpose should not be so large as to become burdensome to the taxpayers. The present large sums appropriated for state highway aid have put at the disposal of the highway commission annually more money than should be expended. These appropriations must be reduced and greater control of the levying and expending of highway funds given to local communities. Cost of supervision should be reduced and the actual work of constructing highways be placed in charge of local authorities, the state supplying engineering skill and supervision in order to preserve uniformity in road building.

#### Water Powers.

Water power is conserved by being used. The Republican party believes in the development and utilization of this great natural resource. Any further legislation needed to encourage this development should be enacted, conserving, however, the interests of the people therein.

#### Reforestation.

We are opposed to the enlargement of the forest reserve area at state expense. Only nonagricultural lands should be retained for reforestation purposes.

We appeal to the electorate of Wisconsin upon the record of the Republican party, and upon this declaration of its principles and purposes. We are confident that under the leadership of the candidates nominated our appeal will not be in vain; that the Republican party will meet every just expectation of the people whose servant it is; that under its administration and its laws our state will continue to advance; that peace and prosperity will abide with the people and that new glory will be added to our great state.

### SOCIAL-DEMOCRATIC STATE PLATFORM, 1914.

The Social-Democratic party is the American political expression of the international movement of the modern working class for better food, better houses, sufficient sleep, more leisure, more education and more culture.

Under the present system, society is rapidly dividing into two classes the rich and poor, the capitalist class and the proletariat. The one toils without enjoying, the other enjoys without toiling.

The wage earners of the cities and the farmers are the principal producers of this country. Under our present economic system both are exploited for the benefit of the capitalist class, the laborer on the sale of his labor power and the farmer on the sale of his products. Both are exploited in the purchase of practically all necessities of life.

The final aim of the Social-Democratic party is the emancipation of the producers and the abolition of the capitalist system. For that purpose we organize the producing classes in city and country into a political party to take control of the powers of government.

The most characteristic expression of the present economic system is the trust and the monopoly.

Electricity, steam and modern invention have struck a death blow at production on a small scale. Competition has wiped out competition. Manufacture on a large scale makes monopoly an inevitable condition. The trust and the monopoly are here, whether we wish it or not. The only question is, shall they be public or private monopolies?

## Monopolies—What Kind ?

Private monopoly is a curse to the nation. Capitalism, the mother of present day monopoly, has forced the cost of living to a point where it has become unbearable. Thus we see the coal trust making untold millions out of the suffering of the poor; the oil trust piling up the greatest fortune the world has ever seen upon the ruin of innumerable small dealers and heaping up millions. Similar statements could be proven against all the other trusts.

## Masters of Our Bread.

The trusts have proved that nowadays a small group of capitalists have it in their power to decide how much meat and how much bread we shall eat; how much we shall spend for coal and how much for oil; how nicely or how poorly we shall be clad and housed; what kind of furniture we are permitted to use; and in what kind of a coffin we are to be buried. They can do this by fixing the price of everything. In short, the trusts decide how well or how ill, how long or how short a time we shall live.

The proposition to solve the trust question by regulation is impossible. It has been a miserable failure in every country where tried, and is being abandoned for government ownership. Private interests dominate congress, the legislatures, the courts and the executive and administrative officers to a degree that makes so-called governmental control a farce. The only solution is that private monopoly must be changed to public ownership democratically controlled, which is Socialism.

The inability of the present economic system to keep all willing workers employed at all times is its greatest curse. This fact condemns it as unfit to meet the demands of a modern civilization. Just at present an industrial crisis hangs like a cloud over the world. It is threatening the business interests of the nation as well as the workers, with destruction. We witness the cruel and grotesque spectacle of millions of men, women and children suffering for the necessaries of life—in a country with boundless resources.

The capitalist system has failed even to keep its own machinery going. The Social-Democratic party demands that the production of this country shall be taken away from the control of a small number of irresponsible men, whose only aim is to exploit us to the last limit of our endurance, without regard to human life or welfare.

## Sham of Old Parties.

We denounce the hypocrisy of the capitalist political parties, who still pretend that they differ in principle. They have wiped out all legal distinctions between themselves in city governments. They have degenerated into a mad scramble for public office and plutocratic favors. They have no claim upon the confidence of the workers, whom they have shamefully betrayed.

With these things in view, the Social-Democratic party of the state of Wisconsin reaffirms its allegiance to the principles and platform of the Socialist Party of America, and proposes at this time the following program for political action in this state:

## State and City Program.

1. We stand for the largest possible degree of municipal home rule and will support all measures to that end.

We approve all the constitutional amendments to be submitted to the people at the fall election and advise all persons to vote for them.

2. We demand the abandonment of the regulation policy of Wisconsin, and in its place urge laws which shall promote public ownership.

3. We demand a new system of taxation for the state which shall include only:

(a) Assessment and taxation of all land at its full value exclusive of improvements.

(b) Increased inheritance tax on large inheritances.

(c) An income tax graduated so as to increase the return to the state from the large incomes and favor the exemption of incomes to \$2,000.

(d) Provided, however, that we favor the exemption of all property used solely for worship, school or wholly charitable purposes, but not the exemption of property held

by religious associations for speculation or increase of value, or for drawing an income, or for the conduct of an industry.

4. We recommend the constitutional provision for the popular initiative and referendum, permitting the people to propose laws as well as to pass judgment on the acts of the legislature.

#### Recall of Judges.

5. We favor the inclusion of the judiciary in the recall of public officials and regard as ridiculous the assumed sanctity and superior wisdom of persons who may happen to hold the office of judge.

6. (a) No more franchises to be granted for the development of water powers to private enterprise. All water power franchises subject to repeal to be repealed and the water powers to be placed under the direct control of the state.

(b) The ownership and development of all natural resources, including water powers, head water reservoirs and ore deposits, by the state directly, to the end that the energy and products thereof may bring the largest possible returns to the people as a whole.

(c) That all mineral rights reserved in title deeds be acquired by the state, exercising the right of eminent domain.

#### No Land to Be Sold.

(d) That no land belonging to the state shall be sold, and that all land sold for taxes shall be bought by the state.

(e) The extension of the forest reserve; the erection and operation of state mills for handling the timber products, to the end that the cost of lumber to actual settlers and home owners may be reduced to the cost of production.

#### Adequate Pay.

7. We demand adequate pay for members of the legislature.

8. We hold that intemperance in the use of liquor is largely the result of the present enervating economic conditions. With the growth of a people in physique, intellect and morals, intemperance will gradually disappear and temperate habits in all things prevail. Until the profit system has been abolished and a more harmonious economic order has been established, the attempts of well meaning people to introduce temperate habits by law will prove only an evasion of the real issue.

9. Pending the establishment of a national system of insurance we favor state insurance for fire, accident, tornado, old age pensions, accident and health insurance.

10. We demand the submission of a proposition to the voters of Wisconsin, giving equal suffrage regardless of sex.

#### The Industrial Program.

1. Limit the working hours of all wage earners to eight hours per day.  
 2. Secure payment of wages in lawful money, not less than once a week.  
 3. Furnish employment for the unemployed by emergency appropriations to be used to hasten public improvements of every description.

4. Wages and labor conditions—including the right of the workers to organize, to be the paramount consideration in the present regulation policy for railroads and all public utilities, while that policy continues.

5. The importation of strike breakers and of private detectives in case of strike to be prohibited by law.

6. The payment of a fair wage to all persons restrained of their liberty and employed by public authority and a complete reform of the penal system.

7. We approve the principle of the workmen's compensation act. However, among other defects the scale of compensation under the existing law is wholly inadequate, and we demand a substantial increase thereof, particularly as to specific injuries and death.

## Education.

8. We demand a reconstruction of the educational system of the state, so that there may be education for all which shall combine culture with social efficiency. We also demand that the state shall provide for free textbooks and school utensils for all pupils in the public schools.

## Farmers' Program.

In order to improve the condition of the farmers, stop landlordism and land speculation and facilitate the settlement of the waste land, we propose the following measures:

1. Erection and management by the state of grain elevators, cold storage plants and warehouses for the storage and marketing of farm products.
2. Organization of free agricultural education and the establishment of model farms.
3. Encouragement by the state of coöperative societies.
4. Organization by the state for loans on mortgages and warehouse receipts, the interest to cover cost only.
5. State insurance against diseases of animals, diseases of plants, insect pests, hail, flood, storm and fire.

## Land.

We see in the private ownership of gigantic tracts of land by land companies and speculators the principal reason why millions of acres of tillable soil lay idle in this state. The following measures are intended to eliminate this class of land ownership and to assist the actual settlers.

1. Exemption from taxation of all improvements on land and personal property.
2. A graduated and progressive tax on idle land held for speculation.
3. Absentee landowners to assess their own lands, the state reserving the right to purchase such land at their assessed value plus 10 per cent.
4. Land now in the possession of the state or hereafter acquired through purchase, reclamation, tax sales or condemnation, shall be divided into agricultural and forestry land by a joint commission composed of members of the agricultural and forestry departments. The state to bear its share of public improvements.
5. Issuance by the state of improvement bonds for the purpose of establishing village settlements and the clearing of land under the supervision of the agricultural department. Employment of settlers for such work at prevailing wages. The bonds to constitute first lien on such land and to be redeemed in small payments extending over a long period.
6. Use and occupancy by owner shall constitute the only title to land redeemed or settled with state help.

## The People to Own.

The Social-Democratic party also stands for every other radical change that will bring more wealth, more culture and more security to the masses of the people. But we call attention to the fact that the measures we urge are not a cure for all the existing evils, nor are all of them Socialist measures. They are to be viewed rather as mere palliatives capable of being carried out even under the present conditions. Under no circumstances should the people rest content with palliatives of this kind. The people should move onward to the conquest of all public powers, to an entire change of the present system for one which will secure to the people collectively the ownership of the means of production and distribution and thereby the blessings of our modern inventions, and a standard of civilization and culture hitherto unknown in history.

This is the program of the Social-Democrat party of Wisconsin. We call upon every intelligent voter of this state, regardless of race, nationality or religion, to join the Social-Democratic party, vote its ticket, build up its organization and stand shoulder to shoulder for a better order and a higher civilization. And especially to the economically oppressed we call, in the words of the immortal Karl Marx:

"Proletarians of all countries, unite! You have nothing to lose but your chains and a world to gain!"

## DEMOCRATIC STATE PLATFORM, 1914.

We, the Democrats of Wisconsin, assembled, pursuant to law for the formation of and declaration of principles, do declare that we are in entire accord with the administration of Woodrow Wilson and his principles. We are justly proud of his many meritorious achievements, masterful leadership, wise statesmanship and thorough understanding of the needs of the people, the regulation of banks and banking currency, a delicate subject for legislative action avoided by his predecessors for years because of fear of disturbing the great financial interests of the country was taken up by him without trepidation. Conflicting, hostile and apparently irreconcilable interests were brought together and fused into a sensible, harmonious and consistent banking law now universally admitted to be a perfect defense against purely monetary panics, such as swept our country in 1907 and all but prostrated its industries.

Tariff reduction, long promised and longer deferred, was accomplished without the aid of dilatory and useless scientific boards and investigators and the country is now enjoying the first honest tariff reform law it has had in half a century. If President Wilson had done no more than cause one of these measures to be enacted into law he would be justly entitled to the confidence and respect of all people and considered the greatest constructive statesman of the age.

He has not been content with the passage of these laws but has, through his cabinet, looked after the distribution of public money not needed for immediate use and caused it to be distributed among the banks of all the states where it has been available as working capital for the moving of crops instead of depositing it in favorite Wall street institutions for use by stock gamblers and railroad wreckers as was the practice, under the Republican regime.

## Income Tax Approved.

We approve the national income tax law which shifts the burden of taxation from the back of labor to that of capital and makes it easier for the working man to support wife and children.

We are in hearty sympathy with the objects and purposes of the measure now pending in congress for the regulation of trusts. The trusts and monopolies are un-American institutions, insuperable barriers to individual success. The man, who by sheer power of wealth, crushes the life out of his competitor's business, is one whose cold blooded and brutal tendencies must be checked, or if not, the door of opportunity for the enterprising American with limited capital is forever barred, and the laboring man, regardless of talent, aims or ambition, is condemned to remain with his shovel his natural life.

Extraordinarily great as have been Woodrow Wilson's achievements in legislation, they are surpassed by his achievements in diplomacy, where he has won the confidence of all nations and especially our neighboring republics in South America, whose suspicion he turned into friendship and thereby opened up opportunities for profitable trade and commerce which had been estranged through the inconsiderate, intemperate and belligerent attitude of former Republican presidents.

Greater than his achievements in broadening markets for our products are his pacific achievements which have kept our country at peace with the nations of the world, including Mexico; a president less inclined to peace might have plunged our country into a bloody war with our sister republic, which, while it would have glorified our army would have greatly injured our country.

In specially referring to certain of President Wilson's accomplishments we have not overlooked many things which history will record with unstinted approbation, for he is a man in whose public life little, if anything, will be found to condemn and much to commend. If he yields to public sentiment now almost universal in favor of his re-nomination and election to the office of president, as we sincerely hope he will, Wisconsin Democrats will rally to his standard as one man and give such support as they have never before given a candidate for president of the United States.

We return our sincere thanks to the Democratic congress for its fearless and patriotic support of the president and for its complete redemption of Democratic pledges even

at the expense of personal interest and we appeal to the people of Wisconsin to elect Democratic representatives in congress and a Democratic United States senator who will support President Wilson in his struggle in behalf of the people.

Our state taxes are indefensibly high, due to maladministration of the business of the state. We pledge our every effort to reduce our state taxes to the lowest minimum consistent with good government and will work to the end that the expenses of government may be kept within the revenues of the state derived from corporation, inheritance and income taxes and license fees and other sources so that by so doing it shall become unnecessary to levy any state taxes whatsoever.

In order to reduce the expenses of the state we propose to abolish every unnecessary board and commission and consolidate and remodel these that shall be left.

#### Too Many Offices.

We are in favor of abolishing the offices of state game warden and state treasury agent and transferring their duties to the sheriffs, constables, marshals and police departments of the state under supervision of the state treasurer; abolish the office of state oil inspector and transfer his duties to municipal officers; transfer the powers and impose the duties of the tuberculosis commission, board of pharmacy, sanatorium commission and department of hotel inspection to the state board of health; abolish the office of claims attorney; discontinue all other legal advisors to the various departments and boards and assign all such work to the attorney-general's office, and abolish the senseless, expensive and useless board of public affairs.

Make the reference library a purely reference library for reference use by the legislature and other public officials and prohibit every officer and employe thereof from directly or indirectly initiating, preparing, drawing, recommending or assisting in passing any legislative bill.

There is no necessity nor reasonable demand that the state engage in life, fire or accident insurance and we are opposed to placing upon the taxpayer the burden of installing, promoting, maintaining and conducting such business.

There are now more than 1,300 nonresident students in attendance at the university. We favor the enactment of a law which will provide for a sufficient resident tuition fee to cover the additional cost of instruction caused by the attendance of such nonresident students. Remove the state university from the domain of politics, provide sufficient revenue to maintain a high standard of educational excellence and make it subservient to the people who support it.

Believing in the principles of Democracy that the will of the majority is supreme, the people having rendered their verdict upon the question of state income tax, we accept that verdict.

#### Change for Primary Law.

We favor an amendment to the primary election law compelling the calling of party conventions for the purpose of adopting platforms and perfecting party organization.

We favor the conservation of the natural resources of the state for the use and benefit of the people, but we condemn the wasteful, oppressive and impractical administration of the present law.

We demand that the several municipalities of the state shall be given the right of absolute home rule in respect to all matters of purely local concern.

We most heartily approve of the building of good roads and as rapidly as the resources of our people will permit. We also approve of thorough supervision in the building and construction of highways throughout the state, but we condemn the present system of state appropriation and supervision as being too expensive and inequitable, and ask a thorough revision of existing laws on the subject.

For the purpose of assisting the rapid growth and development of the agricultural and horticultural resources of the state, we favor the judicious loans of surplus funds to the pioneer farmers of the state when such loans may be made upon safe real estate securities and at rates of interest not to exceed those paid by municipalities upon their bonded indebtedness.

We demand that our public officials and state legislature shall practice strictest economy in administering the affairs of the state and in making appropriations, believing that the state will profit by a policy which will keep in the state the capital that we now have and that will attract capital to come into the state for investment.

## Shorten Legislative Sessions.

We favor the enactment of laws and an amendment to the state constitution, if necessary, which will limit each session of the legislature to not to exceed ninety days in duration, and to provide that all bills shall be introduced within the first thirty days of the session except such as are known as emergency bills and that all appropriations for state institutions shall be made by separate enactments.

We favor the repeal of the "Mary Ann" law.

We favor the repeal of the eugenic marriage law.

We favor the enforcement of existing laws and the enactment of such others as may be necessary to promote the welfare, safety and health of the laboring men and to justly compensate them for injuries sustained by them while in the line of their employment.

We denounce the present Republican state administration for its reckless extravagance in the appropriation and expenditure of the public funds, the creation of unnecessary boards and commissions to oppress the people and deprive them of their prerogatives, the employment of a useless army of employes for political machine work, and we challenge explanation or excuse for the enormous increase in our state taxes and we ask our opponents to inform the voters of Wisconsin, if they can, why our taxes have leaped from \$4,000,000 to \$16,000,000 per year within ten years without any visible advantage to the state.

We feel a special pride in the work of the Democratic members of the last legislature in making possible the enactment of the present water power law which conserves the rights of the people in all navigable waters of the state and which ensures the development and use of the water powers of Wisconsin for the benefit of the people generally and not for the special benefit of the privileged few, and we commend this great conservation act to the Democrats in Wisconsin's sister states as fundamental in this respect in carrying out the Democratic principles of special privileges to none.

We commend the corrupt practice act which prohibits and prevents the corrupt use of money in elections and which was passed as a result of the Stephenson senatorial investigation, initiated and brought about by the Democratic members of the legislature.

## POLITICAL DISTRICT APPORTIONMENTS, 1911.

### CONGRESSIONAL DISTRICTS.

In accordance with provisions of the Sixty-second congress providing for eleven congressmen from Wisconsin, the legislature of 1911 reapportioned the state into eleven congressional districts. The total population of the state is 2,333,860, and the average population per congressional district is 212,169 and 1-11 persons, practically 212,169. By the new apportionment there are four districts with population below the normal, the Second, Seventh, Eighth and Ninth. The population of the other seven districts is above normal. The Eighth district has the least population, 200,134 or 12,035 below normal. The Ninth has the largest population, 225,389, or 13,220 above normal, a total difference of 25,255 between the lowest and highest in point of population. In point of population the First district is closest to the normal figures, being but 436 above. The apportionment into congressional districts follows: [See map, back of book.]

SENATORIAL DISTRICTS.

[Average population per district, 70,723. See map, back of book.]

The apportionment of the state, by the legislature, into thirty-three senatorial districts, following each federal census of population, is in accordance with constitutional provision. By the census of 1910 the total population of the state is 2,333,860. Hence the unit, or normal for senatorial districts is 70,723 and 1-33 or practically 70,723. In the following table the districts as numbered in the apportionment act, and the actual population of each is given, also the excess of population above the normal figure in those districts having an excess, and the deficiency, or number under the normal, in those below the normal figure. The basis for this figuring is 70,723 even, not taking into account the fraction of one thirty-third of a person to each district. This prohibits an exact balancing of the totals in the excess and deficiency columns by 1, the total of one thirty-third of a person to each district.

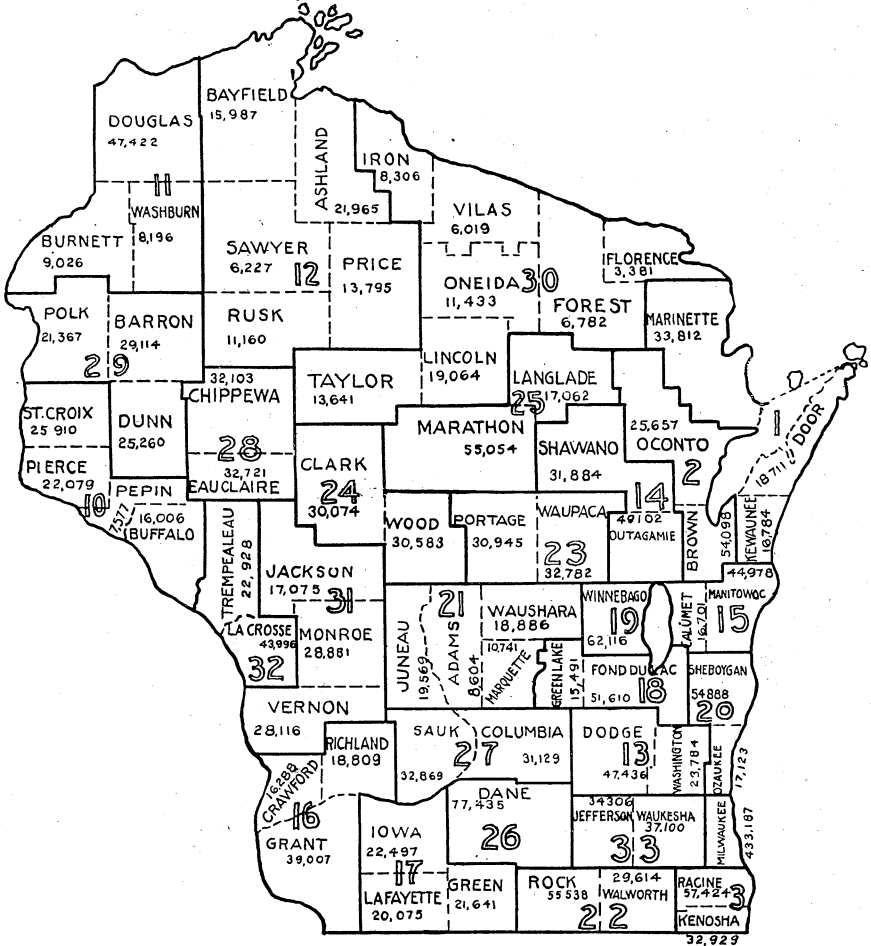

The table shows a total of sixteen districts, each having an excess above the normal, and seventeen each below the normal. The greatest difference in population of any two districts is between the Third, Racine and Kenosha, with 90,353, an excess of 19,630, and the Twenty-first, Waushara, Adams, Juneau and Marquette with a total population of 57,800, or 12,923 below normal, a total difference between them of 32,553. The table shows the excess or deficiency in each district, the list of districts, as constituted, following the table:

## ASSEMBLY DISTRICTS.

[Average population per district, 23,338 6-10. See map, back of book.]

The apportionment of the state into 100 assembly districts on a basis of the population of the state, as ascertained by the Federal census of 1910, is in accordance with constitutional provisions. The total population as a basis is 2,333,860, hence the normal average of population per district is 23,338 6-10 persons. The assembly districts, numbered as to population, follow:

JUDICIAL CIRCUITS

In the apportionment adopted there are forty-seven districts, each with a population above the normal and fifty-three each with population below normal. The forty-seven above normal have a total population of 1,326,080, a total of 159,150 above normal. Their average population is 28,214 22-47 each, or an average of 4,876 each above normal. The other fifty-three districts have a total of 1,007,780 population. Their average population per district is 19,015, an average of 4,323 each below normal. Under this apportionment forty-seven members of the assembly will represent 56 82-100 per cent of the people and fifty-three members will represent 43 18-100 per cent of the people of the state. The district with the highest excess above normal is that constituted by Marinette county with an excess of 10,474. The one least above is the second district of Dane county, with an excess of only 128. The second district of Manitowoc county is 302 below normal, while Taylor county is 9,697 below normal. There are fifteen districts practically within 1,000 of the normal figure, numbers 38 to 52, inclusive, and nineteen are within 1,500 of the normal figure. A complete list of the assembly districts as constituted by the apportionment of 1910 is as follows:
