## Acknowledgments

These two cumulative index volumes were supported principally by grants from the National Historical Publications and Records Commission, the National Endowment for the Humanities, the Lynde and Harry Bradley Foundation, and the Hamilton Roddis Foundation. A special one-time grant of \$200,000 was provided by the William and Flora Hewlett Foundation.

We thank Christopher Eck and R. Darrell Meadows of the NHPRC; William D. Adams, Peter Scott, and Jason Boffetti of the NEH; Richard W. Graber, Dianne J. Sehler, Daniel P. Schmidt, and Ingrid Gregg of the Bradley Foundation; Larry Kramer, Marlene Zapata, and Monica Ruiz of the Hewlett Foundation; and Thomas H. Roddis and Philip Hamilton Prange of the Hamilton Roddis Foundation.

A continuing debt of gratitude is owed to the administration and staff of the University of Wisconsin–Madison, especially Dean Eric Wilcots, Emerita Assistant Dean Linda J. Neusen, John G. Varda, and Kelly Mallon of the College of Letters and Science; Russell Schwalbe of the UW Graduate School; and Dawn-Marie M. Roberts and John Douglas of Research and Sponsored Programs. In the Department of History, we thank chair Leonora Neville, Todd Anderson, Michael R. Burmeister, Jana Valeo, John J. Persike, Leslie Abadie, and Sophie Olson.

These two volumes are the product of a team effort primarily between John P. Kaminski and Thomas H. Linley, who, working remotely, were in daily contact with each other via email and telephone. Early in the indexing, Christopher Cott of Grapevine Publishing Services, developed a program to merge and sort all the individual indexes into one, including the sorting of the subentries by volume indicators within each main entry. Ratification staff contributed to the effort including Timothy D. Moore, Oindrila Chattopadhyay, and Dustin M. Cohan. Four volunteers—Anna M. Biermeier, Christopher S. Berry, Daniel J. Hoefs, and Elizabeth M. Schoenleber—made significant contributions at various stages. Several years ago, David P. Fields, using a new software, transformed our Virginia Supplemental Documents from a collection of typescripts and photo facsimiles into an electronic book. Sarah K. Danforth followed through converting old supplements and creating new supplements with the techniques started by David. Because none of the supplements had been indexed, it was felt that needed to be done and then included in the cumulative indexes. This indexing was done by several staff members, in particular by Ned E. Liebl. Thus, the cumulative index is far more than a compilation of indexes of previous volumes.

These two index volumes are dedicated to Gaspare J. Saladino and Elizabeth M. Schoenleber, both long-time editors of the Ratification series whose knowledge and attention to detail contributed much to the success of this monumental effort.

## Organization

The complexity in numbering the DHRC series caused the editors to develop a new method of indexing—one that would accommodate the compilation of thousands of references from thirty-six indexes and at the same time make the cumulative index intuitively friendly for researchers. First, it was decided to have separate Name and Subject indexes. It was soon realized that the traditional use of volume numbers connected with page numbers (i.e., IV, 347) presented serious problems because of the variety of DHRC indexes: four states appear in Volume III and each has its own index; two states each appear in two full DHRC volumes; two states each appear in three full DHRC volumes; one state appears in four full DHRC volumes; and one state appears in five full DHRC volumes. The introductory volume *Constitutional Documents and Records* (Vol. I) adds to the complexity as does a later volume containing both Vermont and the Confederation Congress (Vol. XXIX), six volumes of *Commentaries on the Constitution* (Vols. XIII–XVIII), three volumes of Pennsylvania Supplemental Documents (Vols. XXXII–XXXIV), one unnumbered volume of Rhode Island supplemental documents, and digital online files of supplemental documents for all of the states some of which might be published as volumes as well. Compiling all of the indexes from these volumes was a daunting task.

Instead of using volume numbers, we developed what we call “volume indicators” (e.g., CDR, RCS VA., RCS SUPPL. VA., and CC3). All subentries in both the Name and the Subject indexes are placed under these “volume indicators.” Letters (from and to), speeches, pamphlets, and journals and diaries are listed as dashed subentries on separate lines under the person’s name. Subentries in both indexes with multiple sub-subentries also begin on a separate line and are also introduced with a “dash” to avoid a double indentation.

### *Internet Availability*

The DHRC volumes will be found on the website of “Rotunda: The American Founding Era,” maintained by the University of Virginia Press (<http://rotunda.upress.virginia.edu>), and at UW Digital Collections on the website of the University of Wisconsin–Madison Libraries (<https://digital.library.wisc.edu/1711.dl/Constitution>). The latter platform will also contain the supplemental documents for the state volumes.

## Introduction

Two cumulative indexes have been compiled for the first thirty-four volumes of the *Documentary History of the Ratification of the Constitution* and the supplemental documents for the state series. An index of *Names* appears in Volume 35; the *Subjects* (including places) appear in Volume 36. The residence of individuals appear in parentheses immediately after the name of the person. If the person relocated, or was temporarily residing elsewhere, that also appears—e.g., the residence for Thomas Jefferson is given as (“Albemarle Co., Va./France”).

In Volume 36, all states, counties, and towns are listed as individual major entries throughout the index, but lists of counties and towns without page numbers are compiled alphabetically in a group with their state so that they might all be more easily locatable throughout the index. The same process was used for “Printers, Publishers, and Booksellers” and for “Mercantile Firms” which are grouped together by category without any page numbers in Volume 36, but are individually listed alphabetically with page numbers as major entries in Volume 35, the Name index.

To aid the reader, compilations of similar items have been grouped together under a common main entry. Such compilations are listed below. In addition to being grouped together under “Pseudonyms,” pseudonymous items printed in a volume are indexed as separate major entries alphabetically arranged in Volume 36. When known, the author’s name is placed in parentheses after the pseudonym. All voters in the Rhode Island referendum of 24 March 1788 are listed as yeas or nays in their towns of residence.

Some entries and groupings in this cumulative index are so unusual that they deserve to be highlighted. The reader should be particularly aware of these entries listed below.
