The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

PULSE OXIMETRY ON THE MOVE

Kontron Instruments works extensively with the medical profession to produce equipment specially tailored to the needs of today's medical care. The Pulse Oximetry range is just one of many bright ideas we have developed to help ease the burden on medical staff and improve patient care.

There's a Pulse Oximeter to suit every clinical situation: the portable 7840, with high visibility red LED read-outs, plus LCD panel to call up operator prompts and full text alarm messages, the new 7845 offering an integrated recorder for comprehensive documentation, and the Minimon 7137 featuring Oximetry integrated with ECG, NIBP and Temperatures. There's even a modular version for Kontron's top of the range Kolormon and Supermon critical care monitors.

Kontron's Pulse Oximeters have the high performance, precision instrumentation you'd expect from one of the world's leading suppliers of critical care and life support equipment.

Call Kontron now for more details about the full range of Pulse Oximeters and other leading monitoring products.

For further information on the Kontron Instruments' range simply write or telephone to,
