is the chance to do what you can do. The opportunity can be no greater than the man to whom it comes.

Preparation is the one thing that makes opportunity valuable. Training is another word for preparation.

Train the man, and you enlarge his opportunities. Training is secured in two places—the school of learning and the school of experience — and both kinds are necessary.

Edward H. Harriman, railroad King of America, says: "The quickest way to make a railroad president, is to choose a bright young man; make him stenographer to a good railroad man, and let him learn the rest by experience," and Mr. Harriman knows.

William Loeb served his apprenticeship under McKinley and Roosevelt as a stenographer, and will be a prominent member of President Taft's Cabinet.

George B. Courtelyou started as a stenographer, and became in a few years Secretary of Treasury.

The year 1909 will start more young men stenographers into large businesses than any other year in the history of our country.

These young men must secure their training in some good business school. We should like to send our circulars to you.

Where keys are kept—Keys to open the doors of all boxes are kept in a little box fastened to the pole by the side of the street box, the box having a glass cover.

Directions for sending in fire alarms—In case of fire go to the nearest street box, break the glass cover of the key box, take the key from the hook and place it in the door of the street box, which has a spring lock and is easily worked. The lock being released, open the door. Place the index finger over the little brass hook or lug projecting from the slot near the top of the inner door, pull the hook down quickly, but steadily, to the bottom of the slot and let go immediately. The hook will fly back to its original place and the fire department will do the rest. Persons turning in an alarm should remain at the box until the arrival of the department for the purpose of giving information as to the location of the fire.

Signals given on the fire bell—Two taps on the fire bell, after the alarm from the box has been sounded, calls for one hundred pounds direct pressure. This signal repeated calls for 125 pounds pressure. Three slow taps after the alarm means "fire out." One tap on the bell denotes broken wire. The steamer responds to alarms from boxes 65 and 67.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to **VUDOR** Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last— are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## **VUDOR Patented Re-enforced HAMMOCKS**

—the kind that last— are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations. < < < <

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations. < < < < <

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations. ♡ ♡ ♡ ♡ ♡

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last— are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last— are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last— are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR Hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.

## VUDOR Patented Re-enforced HAMMOCKS

—the kind that last—are woven with a heavily re-enforced center, and special "equalized" end cording. These features, peculiar alone to VUDOR hammocks, give them about twice the durability of other hammocks at the same price. They come at all prices, and in most desirable color combinations.
