ADVERTISE FOR BIDS THIS WEEK

In the Western Builder and Regional News you will find the advertisement for bids for the proposed Water Softening and Purification Plant.

The resolution accepting the plans and advertising for bids was passed last Friday evening by the Village Board.

YERKES OBSERVATORY

Its Architecture.

The Observatory was designed by Henry Ives Cobb from plans drawn up by Professor George E. Hale, who had visited the large observatories of America and Europe and gathered useful suggestions especially from the designs of Lick Observatory and the Astrophysical Observatory at Potsdam, Prussia.

The style of the building is Romanesque with rather elaborate details. It is constructed of brown Roman brick, with terra-cotta ornaments to match. The shape is that of a Latin cross, with three towers and the meridian room at the extremities. The long axis lies east and west, with the great dome at the west. The length of the building in this direction is 326 feet. The two smaller domes are on the north - and - south axis with their centers 144 feet apart.

The main floor contains offices for the staff, a laboratory, a computing room, a lecture room, a large reference library and reading-room, dark rooms, chemical laboratory and cabinets for instruments. The basement contains the instrument shop, the machine shop, a carpenter shop, a large physical laboratory, and several dark rooms for photographic work. The low attic is used as a stockroom for books and for the storage of photographic plates.

A large amount of marble is used in all the corridors for wainscoting and the floors are tile.

The original cost of the Observatory and its equipment was as follows: The cost of the completed object-glass of the great refractor was \$66,000; of the telescope mounting itself, \$55,000; of the dome and the rising floor, \$45,000; and of the remainder of the Observatory building, including the southeast dome and the powerhouse and its equipment, about \$150,000. The land originally given was valued at \$30,000. The instruments and equipment of the Kenwood Observatory, with its dome, the gift of Mr. William E. Hale and his son, were valued at \$30,000. The Bruce telescope and building cost about \$8,000; the Snow telescope and building \$10,000. About \$15,000 have been spent on grading and planting. The present value of the 40-inch objective can hardly be estimated, but it would almost certainly be several times more expensive than in 1897.

LAKE GENEVA YACHT CLUB WILL BE THE SCENE OF A LAUNCHING PARTY

Invitations have been issued by Mrs. A.F. Gartz for the launching of her new day cruiser, Aunt Jenny, next Saturday at the Lake Geneva Yacht Club. The cruiser will be the first one to be launched for several years on this lake. It is hoped that it will be the forerunner of many more. The cruiser is 33 feet 6 inches long and will use gasoline for fuel.

The occasion will be the opening of the Yacht Club for the season. It will be a busy season as the Inland Regatta will be held on our lake in August, with the Lake Geneva Yacht Club as host. "Bud" Gartz is Commodore and Ernst E. Schmidt, Secretary.

Mr. and Mrs. Harry M. Algeo have been back from Florida for a fortnight after a winter spent at Daytona Beach. Harry has been ill since his arrival home, as the climax of a severe cold he contracted before leaving Florida. He feels much improved already and will soon be able to be about as usual.

We know Williams Bay is a health resort as well as pleasure.

Mr. and Mrs. Carl Clauson, Chicago, spent the weekend getting their home in readiness for renters.

BAY LEAVES will be sent from now on only to those who have made subscriptions. The publisher will gladly send it to all who ask to have it continued and promise to pay for it later.

The publisher wishes that he might send it on indefinitely without some word from you but the cost of printing and mailing makes such procedure impossible.

The amount asked for subscriptions is barely enough to pay the postage and the addressing. The amount is only 50 ¢ for six months or a dollar for the year.

If your copy is addressed on the typewriter you are listed on the books as paid. If not let us hear from you this week so you will not miss the rest of the "Story of Yerkes Observatory" and the first number containing "Geneva Lake Observer".

Just send your money or a postcard saying "Keep me on your list".
