The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

C.P. Snow. (on illiteracy  
of scientists & non-scientists &  
far as science is concerned)  
his test question about  
scientific literacy was  
What do you know of the Second  
Law of Thermodynamics?  
"It is a good question. Many  
physical scientists wd. agree  
that it is perhaps the most  
poetical question. It has its  
own sombre beauty: like  
all the major scientific  
laws, it evokes ~~beauty~~:  
reverence." says it can't  
be understood by the non-  
scientist - unless one has  
learnt some of the language  
of physics. "The Second Law  
is a generalization which covers  
the cosmos."
