The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

CORRECTING Flat Feet *in* Children

THE TARSO SUPINATOR SHOE

®

TARSO SUPINATOR represents the successful practical completion of an accepted theory in foot dynamics, accomplished in shoes.

Features of the TARSO SUPINATOR Shoe:

1. No deforming pressure on the fifth toe.
2. Action is on the Tarsus.
3. Adducts the Tarsus by a powerful supinating action at the calcaneo-cuboid joint; bringing the tarsus into a varus position.
4. A firm counter forms a fulcrum around which the foot is swung.
5. The heel is brought forward on the medial side and raised $\frac{1}{8}$ " at its anterior border.

Despite apparent over-correction, TARSO SUPINATOR SHOES presents a normal appearance.
