MINUTES OF THE REGULAR MEETING
of the
BOARD OF REGENTS OF THE UNIVERSITY OF WISCONSIN SYSTEM

Madison, Wisconsin

Held in the Clarke Smith Room, 1820 Van Hise Hall
Friday, February 10, 1978
9:05 A.M.

President Hales presiding

PRESENT: Regents Barkla, Beckwith, DeBardeleben, Erdman, Fish, Fitzgerald, Gerrard, Grover, Hales, Johnson, Lavine, Lawton, McNamara, Neshek, Thompson, and Walter

ABSENT: None

Upon motion by Regent Neshek, seconded by Regent Fish, it was VOTED, That the minutes of the regular meeting of the Board of Regents of the University of Wisconsin System held on December 9, 1977, be approved as sent out to the Regents.

- - -

REPORT OF THE PRESIDENT OF THE BOARD

At the request of President Hales, Regent Lavine reviewed in some detail the report of the Higher Educational Aids Board Meeting held on February 3, 1978 (EXHIBIT A attached). Regent Lavine reported that during the discussion of the HEAB budget there was discussion of the disposition of approximately \$600,000 of federal monies which became available and which the Department of Administration had suggested be used for the administrative budget in place of the state support therefor. He reported the funds will be used to reduce student debt for this upcoming year, assuming that it may only be a one-time appropriation and then there will be determination as the 1979-81 biennial budget is prepared as to whether the monies might be available in the future. He reported there was a request for funding under the tuition/grant program from proprietary schools, and since there are legal questions relating thereto, the matter has been laid over. He also noted there was a change in the Minnesota-Wisconsin reciprocity agreement in terms of making it easier for students under that agreement to register and enroll. He also reported there was discussion of the out state offices of the equal opportunity program and their ability to recruit and counsel minority students. He stated the matter will be re-reviewed and input from the various schools around the state will be appreciated in order to find out if they are really being serviced by the present offices.

President Hales presented the Report of the Wisconsin Board of Vocational, Technical and Adult Education meeting held on January 24, 1978 (attached as EXHIBIT B).

Regent McNamara moved adoption of the following resolution, the motion was properly seconded, and it was voted:

Resolution 1585: That the meetings of the Board of Regents of the University of Wisconsin System approved through June 8, 1979, be held in Madison, with the following exceptions:

May 5, 1978	UW Parkside
September 8, 1978	Superior
April 6, 1979	Milwaukee

President Hales called upon Senior Vice President Smith for a report on the status of the Legislative Audit Bureau audit of Central Administration. Dr. Smith noted that as a result of the long conversation between the Legislative Audit Committee representatives and the Regents there has been a significant reduction in the scope of the proposed audit, and as now proposed, it is limited to management functions of the System administration, with some relationship involved in the data reported from the institutions to System administration which might extend its scope. He stated it is proposed that there be a pre-audit survey and that this be followed by more concrete specifications of the terms of reference for the audit itself, and that the protocol for the audit which follows the pre-audit survey would be returned for reaction by the Regents and if necessary for the re-engagement of the Regents with the Legislative Audit Bureau before the LAB proceeded. He noted a number of letters written by the Regents expressed concern about the generality of the language that was proposed and that this could lead to proceeding in ways which were not clearly circumscribed. Vice President Smith said he believed it is almost impossible to discover whether there is or is not a remaining problem until such time as the pre-audit survey has been completed and the protocol itself has been specified in some detail. He said his reaction is that while this has been a long series of discussions between Regents and members of the Legislative Audit Joint Committee, and the chairpersons of that committee, this has been an extremely useful exercise from the point of view of beginning to clarify more appropriate relationships between the interests of other state agencies and the management of the University System, which is a primary responsibility of the Board, and while we are proceeding with the probability of an audit, it proceeds in a much clearer understanding of the intense concern on the role of the Board and the responsibility for the conduct of the System administration. He said he felt this has been a very useful development and has put us in a position infinitely better than we were when all this moved over the horizon initially. He stated the speculated beginning date is sometime in April, but that is not certain as of this time. In response to Regent DeBardeleben's question, Vice President Smith assured the members of the Board that the pre-audit survey will be shared with members of the Board and will specify in detail exactly what is to be audited, and will be done before any actual audit work is performed.

President Hales called upon Regent Walter for the Report of the Residence Hall Review Panel. Regent Walter noted the panel was originally appointed because of the opposition from some student organizations to the mandatory residence requirements for freshmen and sophomores on some of the campuses. However, the charge to the panel from the Board was so broad that she decided, after consultation, that a lot more study, research, and information seeking are essential to fulfill that charge. Regent Walter reported that in voting on the recommendations the only non-unanimous vote was on the phrase "the demonstrated experiential and educational advantages of residence halls living," contained in section II.A.(1) on page 2 of the report which was approved on a 4-3 vote.

Regent Walter moved adoption of the following resolution, and the motion was seconded by Regent Erdman:

That the Report of the Regent Residence Hall Review Panel, dated November 1977, be accepted and the recommendations contained therein endorsed. (Copy on file with the papers of the meeting)

Ms. Elizabeth Wright, student panel member, stated that she wished to make it clear that the student members were not in any manner against the residence halls, but did want to minimize the university's role as a parent, noting that many people still see an eighteen year old as a child, and in fact the Regents' rule does not limit the rule to eighteen or nineteen year old freshmen and sophomores, but just says freshmen and sophomores. She stated the educational justification that the students voted against did not really surface until the final draft of the report. She pointed out that the Eau Claire report emphasized that one of the reasons it wanted freshmen and sophomores to live in dormitories was to ease them into life away from their parents and to wean them away from their parents. She said one of her major philosophies is that people do not become responsible until they are given responsibility and that maintaining a household is one of the things that most students can handle. She noted the minority report contained a cursory review of the legal aspects. She said Mr. John Tallman had given a very good review of the court's treatment of the residence halls requirements which were upheld by the courts again and again. There are one or two decisions that have come down on the side of the students who were challenging the requirements, one of which has been over-ruled. She stated she felt the University has more responsibility to consider the policy of the requirement, whereas the courts have ruled that the complaints of the students are not fundamental and their primary interest is in not interfering with state policy and to give them the greatest leeway to make sure their policies and requirements are fulfilled. She noted there are certain things that need to be done in order to enact many of the policies, programs, and improvements that the environmental and education committees put forward in their reports. She noted there are not sufficient funds at present to enact all of the proposed programs. She concluded by stating it goes against the grain to require adults to live in dormitories and hoped the Regents would consider at a minimum rescinding the requirement in the near future. She said one of the charges given by President McNamara was to look into the impact of rescinding the policy on the communities involved. She continued that it wasn't looked into very closely because it is difficult to say how very special it is. She stated she had asked the housing directors how many people had asked for exemptions from the requirement over the past year and the most was at Oshkosh where 222 applied. Other requests include 100 at Stevens Point, 99 at River Falls, 150 at Platteville. She noted that at Eau Claire and LaCrosse

any one who asks for an exception gets one as they have over-full housing and need all the space they can get. Ms. Wright stated that we should be concerned about upgrading the dorms so that people will want to live there. She said the housing directors are working very hard; yet the requirement to keep people there does not really encourage enough work to get people to come in of their own free will.

Jim Eagon, President of the United Council of Student Governments, stated the common justification for maintaining mandatory residency rules is the contention that there are educational advantages to residence halls living, including the opportunity for close association with a diverse group of individuals; increased ease and freedom with interpersonal relations; student assessment of impact of his or her behavior on others; and encouragement of values as a student checks his or her attitudes in relationship to peers. He said these observations are obviously very general and could in fact exist in any apartment house, prison, or army barracks. These qualities so relied upon to defend the mandatory dorm residency are by no means unique and should not be relied upon as the reason to continue the Regent resolution number 3763. He continued that throughout the educational community in the panel report references are made to experiences provided these students by residence halls. There is no argument on any one's part that the experiences are not educational. However, most real experiences contain educational value; so we must consider what kind of an education the student receives in the dorm and the quality of this experience. If the goals to be realized are increased self awareness, abilities and social interactions, a place to develop and test old and new values, we must consider how effectively and conclusively the residence halls fulfill these objectives. These areas of growth may be developed in the residence halls, but are also available in off-campus housing. Student type housing situations away from the main campus also provide a diversity of social interaction with different kinds of people as well as many other areas for developing social skill. He stated the residence halls provide a random selection of participants; so the quality of the student's residence halls experience is arbitrary, to say the least. He stated another argument was that students in the residence halls have a higher grade point average as shown by studies conducted on several campuses, comparing the average GPA of residence halls students with the average GPA of non-residence hall students. He noted the study shows that the GPA of the residence halls students is higher than that of off-campus students, in most cases, by a couple of tenths of one percent. He said the validity of these studies has brought serious question, however, when a total question is based on a few tenths of a point discrepancy. Mr. Eagon stated other factors besides physical location must be considered regarding the relative merits of on-campus vs. off-campus living. Large numbers of students attend college in a town where they are not residents, thus the need for student housing -- in this case residence halls. He continued the students have chosen the school which will best meet their individual vocational goal; their interest and motivation in education are high and could subsequently be reflected in their GPAs. The majority of off-campus freshmen and sophomore students live in the community where the college is located, and while there may be genuine interest and sincere motivation in their education, it may not be as great as for students who have left their home towns to attend school where their interests are met especially well. Mr. Eagon stated the argument that a student is not compelled to live in residence halls and does have a choice of going to school without parietal rules is often raised. Theoretically this may be true, but it certainly is not in reality. Academic programs differ from campus to campus, and specialty missions exist on individual campuses. If the choice of campus is predicated on determining which set of parietal rules applies, the purpose of higher education is defeated and the student's free choice of academic programs is not available. He said the question arises: in what measurable sense is mandatory dorm residency advantageous?

Is the University willing to say that those students not living in residence halls are less mature, less capable of operating in society, and less self aware than those who have lived in the dorms? Is the University willing to say that they have deprived students of advantageous experience because the student must live at home due to his or her home town campus lack of residence halls, as is the case at Green Bay and Parkside, or that the residence halls are filled to capacity as is the case on several campuses? He stated he would like to stress that the arguments today have not been to downgrade the dorms and to question their value, but we do question the effectiveness and the exclusivity of the objectives the halls are purported to achieve. The placement of off-campus students into a residence halls situation is no guarantee or means to improve either their GPA or social experience. He stated students now choose their own location, their vocational goals, and the right to choose their living situation during this effort should also be recognized.

Mr. Dave Anderson, President of the UW-Superior Student Association, stated the issue has been around for a long time and there had been a tradition on his campus for the student government to be opposed to the concept. Most recently the Student Senate endorsed the review panel minority report and its recommendations. He stated last quarter a student did a survey on the campus pertaining to residence halls as part of a class project and 67% of the students polled felt that living in a dorm is indeed an educational experience, and having lived in a dorm himself, he felt he had learned a lot from that experience. However, 84% of the students on another question said they did not feel it should be a requirement. He said there is a general feeling that there is a need to improve the conditions of housing on campus because it does have certain benefits, but it is difficult to make these improvements unless you have people living in dormitories that really want to live in dormitories. Forcing people to live in dormitories who do not wish to do so results in vandalism, and boisterous behavior, and reflects on the atmosphere of dormitory living. On behalf of the UW-Superior Student Association, he urged the Board of Regents to take a serious look at the issue of mandatory dormitory residency and possibly do away with it. He stated the major question involved in mandatory dorm residency (MDR) is obviously a financial one. If the MDR rule is discontinued, there would be a period of lower occupancy in the dorms, and although he did not have any way to substantiate it, he felt that in a period of three years occupancy would again go up because you would have people working in dormitories to make dormitories their home. He noted that presently the level of enrollments is a major concern to the students of UW-Superior, and with dormitory conditions as they are now and with mandatory dormitory residency rules, it is not felt that is a major selling point for the campus.

Regent Erdman commended Regent Walter and the members of her committee for an exceptionally good job in the preparation of the report and also praised the minority report for its thoughtful consideration of the issues. She raised the question as to how the Regents could go back on the contractual obligation undertaken when the dormitories were built in the bond indenture which provided that parietal rules would be used as needed in the financing of these dormitories to guarantee the payments. Ms. Wright responded that she felt the Regents at the very least could experiment on a couple of campuses or try suspending the rules for a couple of years, and if they have difficulty, they could again be instituted.

Regent Lawton stated that he supported the students' alternative regarding the educational value statement. He stated that he considered the studies at Stevens Point and Eau Claire to be worthless because they started out with two groups of people who had been preselected - people who want to live in dorms and people who don't want to live in dorms. Their job situations may be different,

and other factors which may affect the student's grade point averages also were ignored. He said he personally favored dorm living, and had he been able to afford it, would have lived in a dorm himself, but that we should call a spade a spade as far as financial reasons in that we must keep the parietal rule for that purpose, but that we ought to eliminate the sentence that claims educational benefit. Regent Lawton moved that the resolution be amended to accept the entire report with the exception of the language contained in Section II.A.(1) "the demonstrated experiential and educational advantage of residence halls living," which would be eliminated. Dr. Lawton's proposed amendment was properly seconded.

Regent Lavine stated that he would like more information before voting on this matter from the Council of Chancellors. He noted they knew the study effort was ongoing and about to come before the Board and we should let them have the benefit of some time to respond to the report.

Chancellor Leonard Haas, UW-Eau Claire, noted that for the past year the Eau Claire campus had operated without a requirement for sophomores to live in residence halls and was doing the same thing in the current budget request. He noted they actually have not been requiring sophomores to live in residence halls for the past five years. He stated that as far as freshmen were concerned, for the past few years all the freshmen who were able to get into the residence halls had to be in by January 31. He continued that the people who come to Eau Claire beyond the number who are accepted in residence halls are those who have been able to get very satisfactory off-campus housing, but the biggest reason for not coming to Eau Claire is that people wanted to live in the residence halls and were unable to do so.

Chancellor Lee Dreyfus, UW-Stevens Point, stated that he wished to speak for himself and not as Chairman of the Council of Chancellors, because the matter has not been taken up by the Council for over a year. He said he disagreed with Regent Lawton's analysis of the study at Stevens Point, since the students surveyed were not all students who wished to live off campus and those who wished to live on campus. He reported that for three years the campus had between 700 and 800 freshmen for whom there was not room and they lived off campus on a basis of simply not having room available. He noted that has some flaws inherent in it, and that the researcher, Dr. Clement, pointed those out in his study. He stated the preponderance of the weight of the evidence convinced him that there is clearly academic achievement value in having the students in the residence halls program. Chancellor Dreyfus stated that students, as a group and when they act in concert, constitute a wealthy class compared to renters in low-income areas and there is evidence they can drive low-income renters out of their housing within walking distance of any university, because eight students can afford a higher level of rent than can one employed person supporting a family on a low income base. He stated that if the requirements were eliminated, he would have essentially the same residence halls occupancy he now has because necessity would require somewhere between 3,300 and 3,500 students to live in the halls, unless there were some giant kind of building program in Stevens Point. He said he also believed he would rather make the choice of who lives in those halls on an educational achievement basis where it will do the most good for the student body rather than to have it settled in the market place by economics.

Regent McNamara noted that he had been involved in adult education for a great many years, as an observer in some foreign countries, and in depth in the United States, and had found great educational merit in providing residence halls for students -- mature adults ranging in age from 20 to 70. He said he had found bringing them together in a residential hall setting had almost equal educational value to the classroom instruction. He stated that in adult

education where the period of instruction ranges from three weeks or a month to three months, invariably unions, industry and other institutions opt for the residential hall approach. He said he did not consider the requirement that we presently have of requiring freshmen and sophomores to live in residence halls, except in special circumstances, as downgrading the other students or that we are considering them as children. He stated we do recognize that they are young adults. He complimented the student members of the panel for their intelligent and thoughtful approach to the problem.

Regent DeBardeleben stated that because we are dealing with a subject of educational value, and do not have the recommendation of the Chancellors, he wished to move that the matter be deferred until the next regular meeting of the Board. The motion was seconded by Regent Neshek, and it was voted.

- - -

REPORT OF THE PRESIDENT OF THE SYSTEM

Regent DeBardeleben moved adoption of the following resolution, the motion was seconded by Regent Fitzgerald, and it was voted:

Resolution 1586: That the Report of Non-Personnel Actions by Administrative Officers to the Board of Regents and Informational Items Reported for the Regent Record be received for the record; and that actions included in the report be approved, ratified, and confirmed. (EXHIBIT C, on file)

-

President Young introduced Chancellor George Field, UW-River Falls, who gave a brief report on the programs at UW-River Falls.

-

President Young introduced Mr. James Eagon, President of the United Council of Student Governments. Mr. Eagon reported that for the first time in the history of the System all campus student governments are now members of the United Council. He stated the Council has been busy coordinating efforts on the campuses dealing with some of the issues that the Board has been involved with, specifically the Residence Hall Review Panel Report, and the annual review request from the Legislature. He commended President Young for his proposals for reducing the student financial burden and hopes the Legislature sees fit to pass those necessary items. He said the Council is lobbying for the veterinary schools and are pleased with the results thus far. He noted the annual legislative conference this weekend will involve students from around the state who come to Madison to be involved in workshops dealing with these student issues. He stated they were attempting a Wisconsin student caucus, which is the bringing together of University of Wisconsin students with students from the Vocational, Technical, and Adult Education System and from private schools to act on a resolution dealing with student concerns.

Mr. Eagon referred to the situation which has developed with respect to the selection of student representatives for the search and screen committee for the chancellorship at UW-Oshkosh. He noted the student government at Oshkosh was asked to nominate four students, two of whom would be chosen by President Young to serve on the search and screen committee. The Oshkosh Student Associ-

ation forwarded two names, who were in the opinion of the body the best qualified students to serve on the committee. He stated that in the view of the United Council in its position taken at its last meeting, the Oshkosh Student Association is in a much better position to identify two students who could best represent the Oshkosh student body than an individual very involved in the University's operational system 80 miles away. He reported President Young has stated the reason for the double list of nominees is to provide the most representative and effective committee possible and has also indicated his preference for keeping balance on the committee -- balance being representation of minorities. Mr. Eagon stated it is curious that President Young requires such balance from only the students as his appointments of faculty and administrators on the Oshkosh Committee have consisted of twice as many males as females and only one of that group is from a minority group. He said the appointments to the academic affairs vice presidency screen committee are even more open to question since nine are males and four are females, two of whom are members of minorities. He said it is certainly not the intent of the Oshkosh Student Association or the United Council to unduly delay the search and screen committee from its task. He said we recognize the responsibility of the committee and feel it is of much importance that proper procedures be exercised to best fulfill those responsibilities. He continued the Regent policy is reasonable and generous in participation of faculty and students and staff participation in the search process. He noted that in the selection of Dr. Irving Shain of the Madison Campus the Wisconsin Student Association was asked to select two students for the search and screen committee -- not to nominate four students to pick from. He said what we are asking for is for those with the best knowledge of the students on the Oshkosh Campus, for those who have worked intimately with students interested in University governance, for those who are best able to evaluate the effectiveness and responsibility of those interested students, to have the selecting authority of the search and screen committee, who in this case seem to be the best qualified to make that selection.

Mr. Eagon said he hoped the Board will request the President to seat the two students chosen by the Oshkosh Student Association on the screen Committee.

Regent DeBardleben stated that, as a Regent who served on the search and screen committee and the selection committee for the presidency of the System and as one who followed, although not a member, the search, screen and selection process for the Chancellor of the Madison Campus, he felt that the procedure President Young has followed is sound. He pointed out that it is the responsibility of the Regents to make this appointment and it is therefore within the prerogatives of the Regents to devise such systems as they see fit for advice and consultation in making it. He said that in the search, screen, and selection process for the presidency of the System the students acted with extraordinary responsibility and functioned as very valuable members of that committee. In the selection of the Chancellor of the Madison Campus the search and screen process was characterized throughout with what he considered to be unseemly and damaging leaks to the newspapers about what was going on in what should have been a confidential process. He said he did not know whether it is true or not that those leaks came from student representatives, but he got the impression that they did, and the leaks were coming from students who were using that method of gaining a disproportionate voice in the affairs of the committee. He said he felt it is important that the selection process not be compromised by the presence on the committee of people who are not willing to live by the rules of the committee. He continued that until the present philosophy is changed, he felt the President is entitled to appoint people in whom he has confidence to carry out the methods that have been adopted for making search, screen, and selection effective.

Regent Neshek stated he would like to echo support of Regent DeBardeleben's position and inquired if Mr. Eagon was questioning the legal authority or the right of the President to make the selection in the manner he did. Mr. Eagon responded that he had noted Regents set up the policy. Regent Neshek noted that Section 36.09(1)(e), Wis. Stats., gives the Board the power to appoint a chancellor for each institution and this Board has acted in resolution number 325 in setting up the appointment procedure, and delegated that appointment procedure for the selection committee to the President; so there is no question of his legal authority to do it under the statute and under our resolution. Mr. Eagon stated he was not disputing any legal right, but the question had arisen from a number of students.

President Young recalled that the committee was appointed by then President Weaver, but he relied very heavily on his advice. He stated that he requested Dean Ginsberg to furnish nominations of the student members, that the students had furnished two names and Dean Ginsberg had urged him to accept them. President Young stated that he had consulted with Central Administration and very reluctantly and mistakenly it was done. President Young stated that he felt it was a mistake on his part to recommend to President Weaver to accept the advice of a dean in whom he still has a great deal of confidence, but even deans can be wrong. He continued that it turned out to be a very serious mistake because the students selected wanted to pull down the system that we have and spent a great deal of time, at least in public, arguing against the committee procedures. He noted that even with the ability to select two members from a slate of four, our selection process is limited. He noted he had a complaint from a group of faculties about one of the search and screen committees because they were not represented and the only response that he could make is that he took half the names given him by the Faculty Senate, so there is some limitation as to his choices. He said we are interested in maintaining a balance between men and women, but cannot put more women on the committee than are nominated. He said he would hope that people would not be selected to serve on the committee if they are already pledged to a particular position before they would go on the committee. He said he felt he owed the Board an apology for allowing what happened at Madison to happen rather than to defend it.

Regent Lavine stated that he felt having breadth and variety of choice is absolutely essential because he did not believe that any group can know who all the other groups are that are going to submit names and that he wanted to make certain that there are women and minorities on the committee.

Dean Paul Ginsberg, UW-Madison, stated that he happened to agree with what the United Council is proposing, as President Young and Chancellor Shain know. He said we did have a very difficult situation in the search and screen process on the Madison Campus and agreed with Regent DeBardeleben and others that much of the evidence, though never substantiated, did point to the fact that one student member of that committee was less than responsible in how he or she administered and fulfilled that responsibility. He said he did not believe as a matter of fundamental principle, that one should look at long-range policy in terms of what he believed to be variations or atypical situations. He noted that at the committee meeting on the previous day it was not a student that made the most arrogant and abusive presentation; it was a member of the faculty. He stated over the years, by and large, both student and faculty appointments are excellent, but also over the years he had seen many illustrations of faculty, staff, and students who had practiced what might be described as irresponsible behavior. Dean Ginsberg stated that we want students to be more responsible, and that involves for us the need to take some

risks to get them to be more responsible and we are a strong enough institution to survive an occasional mistake. He said it appeared to him that what is being asked by the students is to trust them and give them a chance. He stated that as he looked back over the years at the appointments that students have made on the Madison Campus, they have been excellent appointments, and that if we are going to meet both the substance and spirit of merger, we are going to have to have students that are responsible and in effect co-partners in this establishment. He said he felt we had better start taking some risks and having students appoint members to the committees as important as presidents, chancellors and deans, is not a very great risk to take.

Regent DeBardleben inquired as to the mechanics by which his recommendation could be carried into effect so as to give the President some discretion-- was he suggesting that it be a panel from which the President would choose or would they make a designation and that's it? Dean Ginsberg responded that he suggested we ask them to make a designation as we did do in the case of the Madison Chancellor committee. Regent DeBardleben inquired of Dean Ginsberg if he felt that even if his proposal were adopted, should the President have the power to make some suggestions or make different selections more in keeping with the end to be achieved? Dean Ginsberg stated there are not too many people on this campus that want to destroy the system and that the Paul Rusks and Jim Eagons of the world do not want to destroy the system -- they have a tremendous commitment to it -- and he was asking that we start taking some risks and perhaps some debate thereafter.

Senior Vice President Smith stated that although he agreed with Dean Ginsberg that the commitment of the Regents and what they have done are in line with what he said, he disagreed with him on the history, philosophy and every other point he had made. He said he felt what he is overlooking totally is the fact that since merger we have appointed every search and screen committee for chancellor of this System by receiving double lists, and have never encountered, until the Madison situation, an exception to that, and the question of whether or not the exception would occur again is irrelevant. He stated the reason for requiring a double list comes out of a tradition which is consistent with the appointment of these kinds of committees where the appointing authority is the President or the Board or whoever is doing the appointing. That is clearly designated by the resolution. He noted the Faculty Senate has never questioned this policy; they understand it totally and always cooperate. He stated the Chancellors have always cooperated in terms of the double lists of administrators which were provided, and the one thing that we probably have to consider is the asking for an even broader range selection.

Senior Vice President Smith stated that in appointing systemwide committees where we are going to have fewer members than one from each institution, we often are talking about only one or two nominees from each institution, and it is very difficult in assembling that list to be certain that you are not going to get lists that are totally redundant in terms of disciplinary background, sex, ethnic heritage, etc., and we have had on a number of occasions to return and solicit additional nominees because of the imbalance he just mentioned. No one questions the responsibility or the competence of many of the people who have been nominated, but the ability of the appointing authority to put together the kind of committee that was necessary in his or her judgment to carry out the task which was at hand was pre-empted. He said it is not fair to say that the people who were nominated by the Oshkosh Student Association would be, as was the case in the Madison committee in one instance, committed to the principle that the Regents' position on

the conduct of such committee was wrong. He said it is a serious matter to be forced to appoint someone to a committee who is pre-committed to violating the Regents' instruction about the procedures. He stated the openness of the committee to student participation is not typical of the universities across the country and is a generous and totally affirmative confirmation of the purpose of merger.

President Hales noted that he had received a mailogram from Kelly Johnson, Vice President of the Oshkosh Student Association, which charges that the process which President Young was using was illegal and unethical.

The demand made by a member of the audience that the investment policies of the System be considered at this point was ruled out of order by the President of the Board.

With respect to the status of annual review, President Young stated that he felt the Governor would not support the item in which he was most interested and enthusiastic about, namely, the program of work study and some reduction in the increase of student tuition. President Young reported the Governor gave him a great deal of time and considered it very carefully, but concluded that to make eligible students above the poverty level would be a new departure in state policy. President Young stated that he argued that any student whose income was at the level of the guaranteed student loan, which was at \$25,000, should be eligible to work and earn part of his money. He stated the Governor's advisors suggested that the students ought to be in the lower income group and already be in debt which would turn it into a program very similar to the existing program. He noted that recently the federal government has come to the conclusion that his figures are correct and is pushing to do something for the group of students whose family income is \$25,000 or below, because the burden of increasing cost is very great. He stated he hoped that everyone having occasion to talk to legislators or the Governor will point out that this is a very real problem. He stated it was his opinion that students who don't need to work will not do so and if they do not need loans, they will not take them. He said that at the same time we must say very loud and clear that we want to continue to do more for people at the lower economic end. He stated the Governor is recommending money for the extended degree program and some changes in admission fees so that we can take care of minority students and others. Senior Vice President Smith stated we have to expand our seriousness about the significant contribution work opportunities make to the education of students who have talent and aspirations to fill certain kinds of positions and that there be part of the program, not a large one, but some facet which enables the University to match talent and aspiration to opportunities for relevant educational work experience. He stated the Governor is recommending \$367,000 for the establishment of our extended degree program at Green Bay and Superior and the pilot work we have done thus far, which has been completed, will enable us to put together sufficient resources also to initiate the program at Platteville next year. He said we would have preferred the full \$515,000 so that our own pilot investment could have been continued with other kinds of preliminary and front end investments on additional programs. He said he hoped that in the next biennium we can get additional funding to develop the other programs that are being developed. He stated the Governor is recommending the full support of the proposed \$115,900 to continue our team of engineers doing work on energy conservation. They have been working in the

field of auxiliary operations based on program revenue. The work has been extraordinarily valuable and we want to continue the team and have it work on the regular operations of the university with GPR support. Our technical costs of continued adjustments, as they were recommended in Regent proposals, are being responded to. He stated he believed we were going to get affirmative support from the Governor's Office on the needed change in sabbatical leave language and help in being allowed to give exceptions to the graduate application fee.

Regent DeBardleben recalled that some years ago there was talk of the Department of Administration and the Higher Educational Aids Board cooperating in developing an economic profile of students' financial ability at given levels of income to cope with demands of the cost of higher education. He stated it would be very helpful to the pursuit of our goals in this area, in the next biennial budget, if that could be revived, and requested that the Regents' representatives request it be given consideration by the Higher Educational Aids Board. Regent DeBardleben stated he was disturbed we did not request money for the enrichment of new acquisitions for the libraries throughout the System, that there is perceived to be a great need in this area and hoped that this would be given special attention in our on-going discussions in building a new budget. President Young noted there is a library study going forward now throughout the System. He said he was convinced we have to find some way to bring recognition to the state and the Legislature that we cannot continue to cut funds when enrollments fall, which in turn will discourage incoming students.

REPORT OF THE EDUCATION COMMITTEE

The report of the Education Committee was presented by Regent Lavine.

Regent Lavine reported there had been a presentation in the Committee meeting on the previous day by Professor Paul Donhauser, Department of Art, UW-Oshkosh.

-

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent Fitzgerald, and it was voted:

Resolution 1587:

That, upon recommendation of the President of the UW System and the Chancellor of UW-Madison, the Board of Regents withdraws the request to the Trustees of the William F. Vilas Trust Estate for support of Professor Jan Vansina's proposed research expedition to Cameroon, Africa, due to a change in plans and hereby rescinds Resolution #1462 dated June 10, 1977.

-

Regent Lavine moved adoption of the following resolution, and the motion was seconded by Regent Fitzgerald:

Resolution 1588:

That, upon recommendation of the President of the UW System and the respective Chancellors, the Board of Regents approves the 1979-80 Academic Year Calendars (attached as EXHIBIT D).

Professor Robert Baruch, President of The Association of University of Wisconsin Faculties, referred to footnote d, relating to the Oshkosh Faculty contract period as being 39 weeks between June 11, 1979 and June 3, 1980. He stated there is a problem for the 1977-78 and 1978-79 calendar because at least one faculty member has initiated a grievance process and will probably initiate court action if the grievance is not resolved at the local level, and understood there might be a second similar case because they have been required to teach summer session courses. He said all of the literature available relative to ACPS-4, the academic year calendar, faculty contracts, and the Oshkosh calendar led him to the conclusion that when the Board approved the Oshkosh calendar and when the faculty at Oshkosh approved the calendar, and when ACPS-4 was adopted, any agreement would be precisely that, an agreement between the institution and the faculty member, and that no faculty member could be required to teach during the summer session. He requested that the footnote be clarified by indicating that the Oshkosh faculty period made by agreement between the institution and the individual faculty member be any 39 weeks, etc., as he believed that would be consistent with the data the faculty at Oshkosh got at the time of the calendar and with ACPS-4 and would not cause any problems for this one year. Failing that, he requested clarification as to what "may be any 39 weeks" really means.

Senior Vice President Smith stated that at the time ACPS-4 was written, the language was very carefully constructed to permit calendars such as the ones which have been developed by the University of Wisconsin-Oshkosh and if there are grievances, these grievances would not come to the Board in this form, and if there are particular interpretations which are required, they should be addressed under circumstances in which both he and the Board would have an opportunity to put together a relevant document. He stated he did not feel it is appropriate to amend the statement in this manner.

Regent Lavine urged rejection of any amendment to the proposal brought forth by the Committee as he did not feel this is the place to discuss what might be a legal matter, and would like the advice of counsel if it is. He said he would see no problem if it were scheduled for the March or some subsequent meeting, but there should be advance notice thereof. Professor Baruch inquired if there would be a problem, either in removing the Oshkosh calendar from consideration or in bringing it back to the Committee in March, and adding an amendment if it is appropriate or necessary. Regent Lavine stated the campus had notice of what the calendar process was, the Chancellor had input into it, and there was opportunity for objections, and that he did not feel that we should stop that process, because at this point he did not have the kind of material that would lead him to believe that we should do so.

The question was put on Resolution 1588, and it was voted.

Regent Lavine reported that the Committee next received the Report of the Senior Vice President. He stated Senior Vice President Smith referred to the Annual Report on 1976-77 Progress and Achievements of Goals and Plans; Re: American Racial and Ethnic Minority Students, which had been distributed to the Committee. He noted that some corrections would be needed, but they were not expected to be of a magnitude to change the overall picture. He pointed out that some institutions had exceeded their goals and that, from the point of view of actual enrollments, others had come close in terms of percentage increase. He said that Dr. Smith stated that some adjustments in goals are being made and that appropriate planning documents for updating purposes and goals will be coming to

the System Administration and to the Board. Regent Lavine reported he suggested separating the professional areas, e.g., Law and Medicine, from the general report, and also suggested that since the targets are subject to change, it would be useful to include original base-line information as a help in ascertaining the extent to which problems are being corrected or to point out problems that possibly are not being met. He said Dr. Smith observed that with the reporting system now in place it will be possible to develop graphics for showing the relationship between projections and reality. Such graphics would be kept updated and would show base lines as they originally appeared and as they subsequently may be adjusted. Regent Lavine reported there was brief discussion of the use of the reports in budget preparation. He said that in pointing out the actual level of investments being made by the institutions is often greater than the special support being received, Dr. Smith noted that the key budget question is: "What levels of investment are necessary to reach the goals that have been set?"

Regent Lavine reported Senior Vice President Smith next discussed the faculty sabbatical program and referred to the operational difficulties resulting from differing understandings concerning the intent of condition (i), of Wis. Stats. 36.11(17) on Sabbatical Awards in the UW System. Since it appears that due to the effects of condition (i), certain faculty members and departments systematically are denied the opportunity of a sabbatical award, a proposal for amending the statutes has been prepared, and circulated to Chancellors, Vice Chancellors, and faculty leaders. They have been asked for documentation of the differential impact of administering the faculty sabbatical program according to the University's understanding and according to the more narrow, literal interpretation of legislative intent.

Regent Lavine reported Senior Vice President Smith next announced the appointment by President Young of the Library Planning Study Committee to conduct necessary investigations and prepare recommendations designed to preserve the excellence of the System libraries. The need for the committee is accentuated by the exponential growth of knowledge resulting in increasing quantities of periodicals and audio-visual materials in the context of inflationary pressures and budget constraints throughout higher education. Cooperative planning, resource sharing, and physical facilities questions are among the topics to be addressed. He said Dr. Smith described the library studies as being the most serious and significant of those currently being undertaken in the System.

Regent Lavine reported the Committee received ten academic program proposals for a first reading as follows:

- (1) UW Eau Claire. BA Public Administration
- (2) UW Madison MS Preventative Medicine-Epidemiology
MS/PhD Environmental Toxicology
- (3) UW Milwaukee MFA Performing Arts
PhD Geosciences
- (4) UW Oshkosh BA/BS Computer Science
MS Accounting
- (5) UW River Falls ME Professional Development
- (6) UW Stevens Point MA Communication
- (7) UW Superior ME Professional Development

Regent Erdman noted that new programs are being proposed, yet there is no budgetary provision and inquired if this means there will be a shifting around of staff and does it mean a corresponding dropping of courses. Senior Vice President Smith stated this is a direct straightforward ongoing review on each campus of graduate and undergraduate programs and that by shifting resources within programs we can meet new needs without asking for extra funding. It is a budgeting of priorities. He stated that since merger the number of programs that have been eliminated from the catalog exceeds the number of new programs added by about 3 to 1. He noted that last year the institutions in their audit and review process eliminated more programs than were brought forward. Dr. Smith commented that the title of a particular course is not a very good indicator of whether or not it is an undergraduate or graduate course and the appearance of a particular course as a graduate offering is a process which takes place through the approval of the faculty at the particular institution. Regent Beckwith stated that he heard complaints by chancellors and staff that the product they get from secondary schools is simply not adequately trained. He said he hastened to remind them that many of the teachers that are producing the products came from the very school they are affiliated with. He said he would really encourage an indepth research leading to some indepth program content that could cope with the directing process rather than just the number of degrees added for salary qualification. Dr. Smith stated that the Task Force report which led to the development of the M.E. degrees was an effort to get at the question of responding in a more tailored fashion to the actual needs for improving faculty who are in the field, and to get a degree of flexibility in the development of the curriculum for that program which would permit that kind of modification.

-

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent Fitzgerald, and it was voted:

Resolution 1589: That, upon recommendation of the President of the UW System and the Chancellor of UW-Madison, the change of status of Emmett L. Bennett, Jr. from Professor of Classics to the Moses S. Slaughter Professor of Classical Studies, College of Letters and Science, UW-Madison, be approved, effective immediately, with no change in salary.

- - -

REPORT OF THE BUSINESS AND FINANCE COMMITTEE

The report of the Business and Finance Committee was presented by Regent Grover.

Regent Grover reported the Committee had met on the previous day at 10:00 A.M. in the Memorial Union Theatre to allow interested members of the public to address the Committee concerning the UW System's South African investment policy. During this session, which ended at 12:35 P.M., a total of twenty-five speakers made presentations, the majority supporting immediate divestiture of investments in companies doing business in South Africa. The meeting was reconvened at 1:35 P.M. in Room 1820 Van Hise Hall, with all Regents invited to attend.

Regent Grover reported there were extensive deliberations by all present regarding the resolution offered by Regent Lavine, which stated that all UW System investments in companies, corporations, subsidiaries or affiliates which practice or condone any discriminatory practice on the basis of race, religion, color, creed or sex be divested in as prudent but rapid a manner as possible. He stated essentially two views were expressed: (1) that the opinion of the attorney general is advisory only and does not have the effect of law; therefore, the Board could proceed to execute its statutory authority to manage its investments in a manner which it felt was prudent. Any challenge to its management practices in relation to the statutory language would then be resolved through the courts; and (2) that the statutory language is clear that the UW System is prohibited from investing in companies and corporations who practice or condone discrimination and that this prohibition is further clarified by the January 31, 1978 formal opinion of the Attorney General of the State of Wisconsin -- the chief legal officer of the state. Therefore the System investment counsel should be directed to proceed with the necessary divestitures. Directly related to this element of the resolution was the concern by some Regents that this did not specifically identify South African investments. He reported Regent Beckwith suggested an amendment which would have specifically directed investment counsel to divest System securities of any company doing business in South Africa. This amendment was not supported, because of the general concern that this would make the System policy too restrictive.

Regent Grover moved adoption of the following resolution, and the motion was seconded by Regent Erdman:

Resolution 1590: That in accordance with Sec. 36.29(1) Wis. Stats., all (Policy Revised) investments "made in any company, corporation, subsidiary or affiliate which practices or condones through its actions discrimination on the basis of race, religion, color, creed or sex. . . ." be divested in as prudent but rapid a manner as possible.

Regent Fish inquired if we are really saying that we are not going to invest in any company, corporation subsidiary, or affiliate that discriminates -- what are we going to invest our funds in? Regent Grover responded that we will be consulting with the Heritage Investment Advisors firm to see whether or not there are any companies left in which we can prudently invest, and if so, our investment procedures will be severely restricted.

Regent DeBardleben stated that he was going to vote against this as he had on the previous day. He said we have before us three opinions with the initial opinion of the Attorney General telling us we have to dispose of stock of corporations doing significant business in South Africa. We have a contrary opinion of Professor Baldwin of the Law School to the effect that to do what Attorney General LaFollette advised us to do would constitute a violation of the sovereignty clause of the U.S. Constitution. He pointed out Professor Baldwin stated the statute is so vague and general as to be virtually meaningless. He said we have these two opinions and that the proper and traditional method of resolving a legal issue, when there is a difference of opinion between legal experts, is to submit the matter to the courts. He said his second reason for opposing the resolution is that the approach to the problem of what is going on in South Africa was in his judgment an utterly meaningless and ineffective method of proceeding. It represents the thinnest kind of symbolism and tokenism. Even Attorney General LaFollette, who supports this and has told us we ought to do it, comes down on the side of the validity of the statute because he says

in effect, this does not accomplish anything. He says in effect that if our action would be effective in the field of international affairs, that would be a violation of the sovereignty clause, and it is only because of its meaninglessness that we are permitted to do it, but being permitted to do it, we must do it. He said he could not follow that line of reasoning and would not buy it. He said that he felt the resolution is fatally flawed by its own language, which does nothing more than quote the statute and add Regent Lavine's amending language "as rapidly as possible" or words to that effect.

Regent DeBardeleben noted we started down this road last summer and now eight or nine months later, with conflicting legal counsel's opinion, we come back to the subject, we adopt the language of the statutes, and instruct our Business and Finance Committee to try to construct an investment policy on the basis of such language. He said the forthright thing to do, if we are going to adopt a policy such as the proponents of this motion say they want, would be to say in so many words what they mean -- do they mean dispose of all stocks in South Africa? Then say it. Do they mean dispose of all stocks in corporations that have employees in South Africa? Then say that. Do they mean dispose of all stocks in every corporation in every place in the world that practices any kind of sex, race, or religious discrimination? If that is what they mean, say it in so many words. Do they mean get rid of all stocks in corporations that own stock in ARAMCO? Do they really mean that? Do they mean dispose of all bank stocks that this Board of Regents owns that loan money to corporations that are doing business in South Africa? He continued that he did not know any more about what it means now than when we started getting legal opinions and expected that investment counsel can't know what it means either. He stated that when we put in the words "rapid as possible", we are contradicting the word "prudent"-- prudent isn't to act as rapidly as possible -- prudent is prudent, and what is going to be our answer when a member of the Lawyer's Guild, whose representative spoke to us yesterday about what our legal obligations were, drags us into court and tries us for liability on the part of each Regent because we did not move as rapidly as possible, and when some stock of some corporation who does business in South Africa has declined in value following the date of this meeting. Regent DeBardeleben noted the stock market has been declining for months and months and inquired what is the prudent thing to do -- is it to dump all of our stocks at this point when we may be approaching a three or four year low -- is that the prudent thing to do -- what does the word "rapid" mean? He said the statute tells us to manage the fund prudently and if there is another statute that seems to be in conflict with it, our duty as manager of that fund is to get a court's determination of where our responsibility lies, not to be rushed headlong by a bunch of yelling students and by an Attorney General's opinion contrary to the opinion of one of our Law Professors. He said he was not trying to impugn the good faith of either one -- there is a difference of opinion here. He reiterated the responsible thing is to get a court opinion and in the meantime manage this fund in a prudent manner.

Regent Lavine stated that he was not being pushed and did not think any member of this Board should be pushed by the meeting yesterday morning or by the push of students today. He said he felt we should make the decision based on what we feel is right. He continued that he wished the Sullivan Statement had really allowed us to do what he felt would be best -- improve the lifestyle and the economics of the Blacks in South Africa and to force the government to stop what is an abhorrent policy. He stated he would not be comfortable with submitting the matter to the courts as he saw our job as one of interpreting and upholding the law. He said he put somewhat more emphasis on the opinion

of the Attorney General because he is our counsel and we must make up our minds and exercise our responsibilities. With respect to adding language relating to South Africa, he said that the problem of South Africa should be included in the resolution, but he did not want to be party to a resolution which even appears to say that the same kind of activities happening somewhere else in the world are okay and we can invest in companies that are involved in those kinds of activities.

Regent Lavine stated that he failed to understand how the Business and Finance Committee of the Board or any investment counsel could look back at this discussion and say they don't know how to proceed if we pass this resolution. He stated that if we limit the resolution, each time we do and each sentence we add will almost guarantee that the matter will be back again and again. He stated the resolution may be meaningless to the South African government, but will be very meaningful in Wisconsin and there is nothing wrong with Wisconsin, this System, setting an example in this country.

Regent Barkla stated that she could not understand why we should not follow the opinion of the Attorney General instead of that of one law professor, and if we have to go into court, we can worry about that later.

Regent Grover noted that Resolution 1538 was an attempt to respond to an informal opinion of the Attorney General, but within the policy established we said that basically the law is in conflict -- that we didn't have any legal obligation to divest, but on the other hand the University has a high moral responsibility in light of its stature in our society to respond to the situation in South Africa. He noted subsequently the chief law enforcement officer of the State of Wisconsin has again told us what our duty is, that is the bottom line as far as he was concerned. He said he viewed the matter as a political problem and a question that the state statute is telling us to do something about, and if this has to spill over into what he described as political, let the Legislature change the law. He said he was going to respond directly to the opinion of the Attorney General by adopting the resolution as it is presently stated.

Regent Beckwith stated that he would vote for the resolution because it states the law and would not want to be on record as voting against the law. He said the fact that it does not address the issue troubled him. He said if we really addressed the issue, we ought to say what we mean and when we pass this resolution, it can have as many meanings as those who will vote affirmatively for it. For example he noted that the State of Oregon voted to sell stock it holds in U.S. corporations doing business in South Africa, whereas we say we will divest ourselves of investments made in any company which discriminates, etc. -- what does that mean? Does that mean as the Attorney General says, as a basis for his opinion, -- companies which employ persons and are thereby required to discriminate in their employment practices? Does it mean companies that loan money but do not employ persons in South Africa, such as Citibank, and what about Chase Manhattan Bank, which has no employees in South Africa? Does it mean companies that import minerals from South Africa and thereby support that economy? -- southern company utilities that import coal? Does it mean companies that export technology and goods to support the government and industry of South Africa in the very gold mines that are so much criticized? He inquired why are we so afraid to address the issue and say what we mean, and give guidance to our investment counsel so that they can come back and give us portfolio advice. He said what troubled him is why we ask our investment counsel to decide the public policy for us. He said we are not responding to the unreasonable demands of the students in a reasonable way and we are not responding to our own re-

sponsibility. He stated what has changed since October is the Attorney General's opinion and that is what brings us to this matter today. If that is the basis on which we are making the decision, then let us follow the advice of the Attorney General and decide what that advice means and vote a resolution that requests that advice, and take action based upon the resolution. The fact that we say that we are going to dispose of stocks doing business in South Africa, however we define doing business, does not limit the University, and if it does, we can make it clear that it shouldn't, but frankly he felt the students have a right to clearly understand what we are doing and what we intend to do, and all the legislation in the world isn't going to solve that problem.

Regent McNamara stated that he was voting for the resolution because it is not a limiting resolution. He said it would make it clear that in addition to divesting securities of companies doing business in South Africa, we would not invest in stocks of any companies doing business in the Soviet Union, which has murdered millions and thousands of millions of its people over the past four years, and has the calculated policy of discrimination on the basis of both religion and race, and the People's Republic of China, which has also murdered tens of thousands and millions of its own people, and which destroyed the country of Tibet, a blatant racist action; Uganda, which is an avowed black racist country; all of the Arabian countries which have a policy of discrimination on the basis of race; Israel, which was cited by the President's Commission on Human Rights; Cuba, which again has a policy of interfering with the actions of its neighbors, much of which is on a racist basis, and a number of other countries. He said he felt our direction to our advisors is clear -- we will have to confine ourselves to government securities. He noted we are the only country in the world that has a positive legislative policy that says clearly that as a nation we will not discriminate on the basis of race, religion, color, creed or sex -- no other country in the world has such a forthright public policy. He stated common stocks clearly are not a hedge against inflation because every time the inflation rate goes up, the stock market goes down. He said we should divest prudently, not at the bottom of the market, and the market has been near the bottom for the past thirty days. He said it will take time, but he viewed Regent Lavine's amendment "as rapidly and prudently as possible" to mean maintain prudence but do it expeditiously. He said that if we buy stock in any corporation doing business with any country that discriminates, he was going to raise hell about it, and he saw it as a very simple matter of investing in U.S. Government Bonds.

Regent Lavine stated it was unfair to say we were only acting because of the Attorney General's opinion because at least for some of us there is more to it than that. He said the proposed amendment on the previous day was defeated, not because we wanted to buy stocks in South Africa but because we did not want to limit this resolution just to South Africa.

Regent Fish noted that with respect to the investment in U.S. Government Bonds if we are forced to invest, he would support such investment, but in so doing we would be in violation of the resolution because the U.S. Government does permit trade with South Africa and does not have a trade embargo on South Africa. Regent DeBardleben noted that the Business and Finance Committee did ask investment counsel to try and formulate some recommendations as to how the Committee should conduct investment policy if this resolution is adopted, and it was suggested by investment counsel it would be well if they could have a copy of the minutes of the Committee and Board Meeting so as to guide them with the intent of the Board with respect to this resolution. He submitted

that every person who was voting on this resolution has a different conception of what it means and asked how on the basis of the record are you going to formulate an investment policy -- the basis of instructions to the committee.

The question was put on Resolution 1590, and it was voted on a roll call vote, with Regents Barkla, Beckwith, Erdman, Fitzgerald, Gerrard, Grover, Hales, Johnson, Lavine, Lawton, McNamara, Neshek, Thompson, and Walter voting "Aye" (14), and with Regents DeBardeleben and Fish voting "No" (2).

The meeting was recessed at 12:25 P.M., and resumed at 1:30 P.M., with all Regents present except Regent Walter.

Regent Grover moved adoption of the following resolution, the motion was properly seconded and it was voted:

Resolution 1591: That Resolution 1538, concerning interpretation and application of Section 36.29(1) Wis. Stats., relating to investments of funds received by the System from Gifts, Grants, Bequests and devises, approved by the Regents on October 7, 1977, be rescinded.

Regent Grover noted the financial summary sheet for gifts, grants, and U.S. government contracts reflects a continuation of the trend which has been evident for the past several months: Instruction continues to be down nearly two million dollars from the same period last year and this is expected to continue. This is related to the elimination of the capitation grants for nurses and the phase-out of capitation grants for medical and pharmacy students over the next two years. Research is up \$4.8 million and this is expected to continue. Receipts are up \$5.2 million over all.

Regent Grover moved adoption of the following resolution, the motion was seconded by Regent DeBardeleben, and it was voted:

Resolution 1592: That, upon recommendation of the President of the System, the gifts, grants and contracts presented at this meeting (copy filed with the papers of this meeting) be accepted, approved, ratified and confirmed; and that, where signature authority has not been previously delegated, appropriate officers be authorized to sign agreements.

Regent Grover reported the late Carl A. Hoppert, Milwaukee, Wisconsin, bequeathed 30% thirty (30%) of all the rest, residue and remainder of his estate to several institutions and organizations, one of which was the University of Wisconsin Memorial Fund, Madison. He reported the Madison Chancellor recommends the proceeds of the bequest, \$941.83, be deposited in the Chancellor's Special Fund (Trust).

Regent Grover moved adoption of the following resolution, the motion was seconded by Regent Fish, and it was voted:

Resolution 1593: That the bequest of the late Carl A. Hoppert, Milwaukee, Wisconsin, to the University of Wisconsin be accepted by the Board of Regents of the University of Wisconsin System in accordance with the terms and conditions of the Last Will and Testament of Carl A. Hoppert, Deceased; and that the Secretary or Assistant Secretary be authorized to sign a receipt on behalf of the Board of Regents of the University of Wisconsin System for this bequest, and to do all things necessary to effect the transfer of this bequest to the University of Wisconsin-Madison.

Regent Grover moved adoption of the following resolution, the motion was seconded by Regent DeBardeleben, and it was voted:

Resolution 1594: That, upon recommendation of the State Laboratory of Hygiene Board, its report dated December 7, 1977, which incorporates the letter report of Center for Disease Control, dated November 23, 1977, be approved for submission to the Governor and Legislature in compliance with section 1630, Chapter 29, Laws of 1977; and that the System Administration be authorized to work with the State Laboratory of Hygiene Board, the Department of Administration and the Legislative Fiscal Bureau to implement the recommendations contained therein.

Regent Grover reported the next item represents an interest subsidy grant from the United States Government in the amount of \$2.5 million over thirty years which will reduce the effective rate of interest on the UW-Parkside Student Union from 6.26% to 3.0%.

Regent Grover moved adoption of the following resolution, the motion was seconded by Regent DeBardeleben, and it was voted:

Resolution 1595: The pending Grant Agreement numbered Contract No. H(502)6017 and relating to the erection on the campus of University of Wisconsin-Parkside an educational institution of higher learning located in Kenosha, Wisconsin, a Student Union for dining, recreation, and student services building by and between the Board of Regents of the University of Wisconsin System and the Wisconsin State Building Commission and the United States of America, is hereby in all respects approved.

The Vice President and Controller of the University of Wisconsin System is hereby authorized and directed to execute the said Grant Agreement in two counterparts on behalf of the Board of Regents of the University of Wisconsin System and the Secretary is hereby authorized and directed to impress and attest the official seal of the Board of Regents of the University of Wisconsin System on each such counterpart and to forward two such counterparts to the Department of Housing and Urban Development, together with such other documents relative to the approval and execution of such counterparts and to this Resolution as may be required by the Government.

Regent Grover moved adoption of the following resolution, the motion was seconded by Regent DeBardleben, and it was voted:

Resolution 1596:

That, upon recommendation of the Chancellor of UW-Stout and the Vice President and Controller, the Unitedbank of Menomonie, Menomonie, Wisconsin, qualified as a public depository under Chapter 34 of the Wisconsin Statutes, shall be and is hereby designated, effective February 10, 1978 until further action, a public depository for certain moneys coming into the hands of employees of the Board of Regents of the University of Wisconsin System for deposit to the appropriate account, and

That withdrawal or disbursement from said depository shall be only by check, as provided in Section 66.042(6) of the Wisconsin Statutes, and that all checks be signed by one of the persons certified by the Secretary of the Board of Regents of the University of Wisconsin System as having been authorized by the Vice President and Controller to make deposits to or sign checks drawn on the University of Wisconsin-Stout accounts held by the above bank.

Bank

Unitedbank of Menomonie
Menomonie, Wisconsin

Accounts

UW-Stout Registration Fee Change
UW-Stout Contingent Fund
UW-Stout General Account
UW-Stout Advanced Travel
UW-Stout NDSL Loan

-

Regent Grover reported the Committee next considered the first reading of a policy which would provide guidance for the manner in which common and preferred stock proxies would be voted. He requested any comments be forwarded to Vice President Lorenz for consideration in developing a revised document for the March meeting. Regent DeBardleben noted that Regent Grover inadvertently omitted to point out that the whole proxy question may be moot.

- - -

REPORT OF THE PHYSICAL PLANNING AND DEVELOPMENT COMMITTEE

The report of the Physical Planning and Development Committee was presented by Regent Gerrard.

Regent Gerrard reported the Committee deferred action on the purchase of land for the UW-Madison Arboretum pending receipt of more information on the appraisals and price prior to acting on approval.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Fish, and it was voted:

Resolution 1597:

That, upon the recommendation of the UW-Madison, Oshkosh and Stout Chancellors and the President of the University of Wisconsin System, authorization be granted to purchase the following parcels of land at the price and from the funding source indicated:

UW-Stout

One 0.20 acre parcel of land for parking purposes, \$35,000 from Parking Program Revenues

UW-Oshkosh

A 0.03 acre parcel of land needed in conjunction with the Riverfront Stabilization and Adjacent Area Development project, \$1,500 from Advance Land Acquisition Funds.

UW-Madison

A parcel at 907 University Bay Drive, Madison, required in conjunction with the Center for Health Sciences circulation plan, \$88,000 from General Purpose Revenues

Regent Gerrard stated the next resolution relates to the sale of a small parcel of land located approximately one block northwest of the Olin House. The 60 x 100 foot parcel was offered for sale by sealed bid, with a minimum bid of \$50,000 required. The property was appraised at \$47,000 in August 1977 and \$54,000 in September 1977 for an average of \$50,500. Receipts less expenses will go to the UW-Madison Physical Plan Account as a miscellaneous receipt.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Fish, and it was voted:

Resolution 1598: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authority be granted to sell the improved parcel of land located at 2102 Kendall Avenue, Madison, Wisconsin, more fully described as:

Lot 18, Block Six, University Heights,
City of Madison

for \$51,000 and that the President or Vice President and Secretary or Assistant Secretary be authorized to sign the necessary documents and deed.

Regent Gerrard reported the first item in the next resolution is a renewal at the same rate for a University Outreach Center. The second item is to provide for continued use of the Access Test and Demonstration Residence by the UW-Milwaukee School of Architecture and Urban Planning for an instructional/demonstration project for energy conservation. The third item covers a proposed lease for UW-Madison in the City of Wausau to provide for expansion of the Family Practice Residency Program as authorized in the 1977-79 Operating Budget.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Fish, and it was voted:

Resolution 1599:

That, upon the recommendation of the UW-Milwaukee and UW-Madison Chancellors and the President of the University of Wisconsin System, authorization be granted to lease the following space:

UW-Milwaukee

- (1) 2,000 square feet of space located at 2208 North Third Street, Milwaukee, Wisconsin on a month-to-month basis, beginning October 16, 1977.

Inner City Rents, Lessor (formerly JAMAR Investment Co.)
2218 North Third Street
Milwaukee, WI 53212

Monthly lease cost is \$400

- (2) 2,000 square feet of space located at 2915 North 1st Street, Milwaukee, Wisconsin for the period March 1, 1978 to February 28, 1981, with two successive three-year renewal options.

The UWM Foundation, Inc., Lessor
250 East Wisconsin Avenue
Milwaukee, Wisconsin

Annual lease cost is \$1,430 plus City of Milwaukee real estate taxes (1977 : \$365.10)

UW-Madison

- (3) 4,852 square feet of space located in the Ridgewood Building, 2700 Seventh Street, Wausau for the period March 1, 1978 to February 28, 1979 with an option to renew on a month-to-month basis thereafter.

Mr. Jack, Bartell, Executive Director, Lessor
Wausau Hospitals, Inc.
Maple Hill
Wausau, Wisconsin

The annual lease cost is \$30,325 (\$6.25 per leased square foot, including services).

Regent Gerrard reported the next item related to a parcel of property which is a part of what was formerly the University Hill Farms in the City of Madison and UW System approval is required for any change in plat and use.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Fish, and it was voted:

Resolution 1600: That, upon the recommendation of the UW-Madison Chancellor, the University Hill Farms Architectural Control Committee, and the President of the University of Wisconsin System, approval be granted for the Flad replat of Lots 1 and 3, Block 33, University Hill Farms Commercial Reserve Addition, City of Madison, Dane County, Wisconsin, as shown in the certified survey recorded as Map #2716, Volume 10, pages 385-387, Document No. 1555494.

As a condition of the replat approval, the owner of the land has recorded a Declaration of Easement, imposing an easement in favor of lot 2 over the five foot strip of lot 3 (replat), immediately adjacent to and southwest to the common line, being a strip five feet wide and 180.75 feet long, to allow for snow storage and appropriate plantings.

Regent Gerrard reported the next resolution requesting approval of the concept and budget report and the authority to plan, bid, and construct the UW-Green Bay portion of the UW System Mechanical and Electrical Monitoring System project is the first of thirteen portions of this project to be submitted to the Board. He stated it is estimated that the project, when completed, will have a payback in less than 5 years through savings in electrical and fuel costs.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1601: That, upon the recommendation of the UW-Green Bay Chancellor and the President of the University of Wisconsin System, the concept and budget report and a request to seek the release of an additional \$15,400 of Advance Planning funds be approved and authority be granted to plan, bid and construct the UW-Green Bay portion of the UW System 1977-79 Mechanical and Electrical Monitoring System project at an estimated total cost of \$314,000 from General Obligation Bonding.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1602: That, upon the recommendation of the UW-Eau Claire, Madison, Oshkosh, Stevens Point and Whitewater Chancellors and the President of the University of Wisconsin System, authority be granted to plan, bid and construct the following roof repair-replacement/handicapped access/energy-deferred maintenance projects at the cost and from the funding sources indicated:

- (1) Scott Residence Hall Roof Repair, UW-Oshkosh (\$88,300 Program Revenues)
- (2) Education Building Roof Repair, UW-Madison (\$16,060 1977-79 Minor Projects)
- (3) University Center Elevator Renovation (\$48,100 Program Revenues) and Steiner Hall Elevator (\$91,300 Program Revenues), UW-Stevens Point
- (4) Student Center Elevator, UW-Whitewater (\$91,500 Program Revenues)
- (5) Chippewa River Footbridge Painting, UW-Eau Claire (\$19,200 Prior Funding Balances--State Building Trust Funds)
- (6) Lot 62 Resurfacing, UW-Madison (\$65,000 Parking Program Revenues)

Regent Gerrard reported the next resolution allows improved access to a land-locked farm across a portion of the UW-Madison Lancaster Experiment Station. The farm owner currently has an easement across the property which he must maintain. This resolution transfers the responsibility for maintenance of the road to the town.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Fitzgerald, and it was voted:

Resolution 1603:

That, upon the recommendation of the Dean of the College of Agriculture, the UW-Madison Chancellor and the President of the University of Wisconsin System, the President or Vice President and Secretary or Assistant Secretary be authorized to execute a highway easement and right of way to the Town of Beetown, Grant County, Wisconsin, to allow improved access to an adjacent farm across a portion of the UW-Madison Lancaster Experiment Station.

The legal description of the easement is as follows:

A strip of land 66 feet, being 33 feet wide on each side of a centerline described as follows, to-wit: Beginning at a point on the section line between Sections 1 and 12, Town Four (4) North, Range Four (4) West of the 4th P.M., Grant County, Wisconsin, which is North 85° 44' West 1033 feet from the Quarter corner on said section line; thence South 19° 04' East 969 feet to a point on the centerline of University Farm Road.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Fish, and it was voted:

Resolution 1604: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authority be granted to combine the \$858,000 1977-79 Bacteriology Electrical Substation project with a revised \$1,167,000 1975-77 Bacteriology Addition project, to prepare preliminary plans and a concept and budget report for a combined Bacteriology Addition/Electrical Substation project at an estimated total project cost of \$2,025,000 from General Fund Supported General Obligation Bonding, and to prepare preliminary plans and a concept and budget report for a Bacteriology Remodeling project to be requested in the 1979-81 capital budget.

Regent Gerrard stated the consultant's report on investigation of the roof problem at the College of Creative Communication, UW-Green Bay, concluded that the polystyrene insulation specified in the plans was the primary reason for the failure. He stated the report is being referred to the Bureau of Facilities Management for additional review and consideration for appropriate legal action.

Regent Gerrard stated it was reported to the Committee that the State Building Commission substantially approved, as requested, all of the Regents' UW System Capital Budget requests submitted for inclusion in the 1978 Annual Budget Review session and they will be included, as recommended, in the Governor's budget recommendations.

Regent Gerrard moved adoption of the following resolution, and the motion was seconded by Regent Grover:

Resolution 1605: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authorization be granted to request legislative action to allow the sale of the Rieder Farm (111 acres), one small portion of the Charmany Farm (25 acres), both located in the City of Madison, and of the Foundation Potato Seed Farm (240 acres) in Three Lakes, Wisconsin and the crediting of the receipts from such sales to the nonlapsable Hill Farms account for use by the College of Agriculture and Life Sciences, UW-Madison, for replacement land and other capital facilities.

Regent DeBardleben inquired if any appraisals had been made of the property. Regent Gerrard responded that the matter is before the Board now in the hope that the Legislature might act on it during February or March; otherwise we will have to wait until next April, May, June or July. He said if we do decide to sell any of the properties, there will be appropriate appraisals at that time. Regent DeBardleben said he assumed the impetus for this comes from some proposal to buy other lands for the College of Agriculture. Regent Fish responded that approximately five or six years ago we asked the College of Agriculture for a long-range plan at the time we were expanding the Arlington Farms location, so that we could better judge what we are doing. He said, in essence we are trying to trade land. In that long-range plan was the objective of the University of Wisconsin School of Agriculture to expand at their Arlington Farm location. He said that while that is in the long-range plan, it was determined it would be better since we are asking for enabling legislation not to specify it in that way in the event some other necessity of some kind came up and we would not have to go back for additional legislation.

The question was put on Resolution 1605, and it was voted.

- - -

Regent DeBardleben moved adoption of the following resolution, and the motion was properly seconded, and it was voted, with Regents Barkla, Beckwith, DeBardleben, Erdman, Fish, Fitzgerald, Gerrard, Grover, Hales, Johnson, Lavine, Lawton, McNamara, Neshek, and Thompson voting "Aye", and with Regent Walter absent:

Resolution 1606: That, in accordance with Section 19.85(1)(c) and 19.85(1)(e), and 19.85(1)(g), Wis. Stats., a closed session be held to consider personnel matters, negotiating the terms of a proposed grant, and conferring with legal counsel.

The meeting recessed into closed session at 2:00 P.M.

The Board arose from closed session at 3:30 P.M., and immediately adjourned.

J. S. Holt, Secretary

TO: Board of Regents of the University of Wisconsin System

FROM: Regent Members of the Higher Educational Aids Board

SUBJECT: HEAB Meeting of February 3, 1978

The Higher Educational Aids Board met in Milwaukee near the location of the HEAB Educational Opportunity Program headquarters. Regent member John Lavine was present.

Report of the Executive Secretary

Executive Secretary Jung reported that the Wisconsin revenue bond issue for student loans is considered by the bonding industry as the model for other issues for similar purposes. A special HEAB meeting may be called in March to review and act on the covenants associated with the bond issue. Mr. Jung also reported that he had engaged a consultant to advise and represent HEAB as it prepares a request for proposals to install a major data processing program.

Council on Financial Aids

Phillip George, financial aid director of UW-Stevens Point and Chairman of the HEAB Advisory Council on Financial Aids, presented an oral report to the Board. He stated that UW-Stevens Point had particular problem with the WHEG II program and has been assigned the task of defining problems and suggesting solutions related to the Wisconsin Higher Education Grant Program. He reported that the Council had recommended that HEAB develop a pilot state work study program of at least \$3,760,000 for state residents in postsecondary schools from the combined \$600,000 in anticipated federal revenues to HEAB and the requests for \$2,500,000 by the UWS for Wisconsin students serving Wisconsin and the \$660,000 by VTAE for a similar program. The Council also recommended that HEAB prepare to conduct a longitudinal study of student indebtedness at an early date.

It was recommended that in the future the Council on Financial Aids prepare its own written report for inclusion with the agenda. This should be done with sufficient time to allow the HEAB staff to prepare a written response for Board consideration. There was also notation of the fact that the council should not be used as a vehicle to air a campus specific rather than a program specific problem.

EXHIBIT A

Request for Wisconsin Council for Independent Education (WCIE)

An attorney representing WCIE requested HEAB consideration of a proposal which would provide students at proprietary institutions eligibility for the Tuition Grant Program. He cited increasing concerns about growing debt burdens on students and the objective of increasing student access to educational programs as reasons for HEAB to reconsider its present policy. Board members indicated a willingness to consider opening discussions on the matter but requested the HEAB staff to obtain: (1) an Attorney General's opinion regarding the legality of the request; (2) representations of other viewpoints on the matter; (3) the projected financial cost of the proposal; (4) a report on the stability of proprietary schools in Wisconsin; (5) the extent of programming offered by proprietary schools that is available at nonprofit schools; (6) an evaluation of the accreditation process for proprietary schools; and (7) an evaluation of costs and cost containment factors in proprietary schools. Regent Lavine said he hoped these matters would come as written comment on the proposal and related issues and suggested that the Legislative Council also should examine the issue. The Board agreed to consider the request as part of the biennial budget process assuming that an opinion is received in time from the Attorney General.

1978 Annual Budget Review

The Board considered several alternatives developed by the staff for the use of approximately \$600,000 of excess federal revenues which the staff had previously recommended be used to replace administrative GPR revenues. The Board considered the alternatives of allocating available funds to supplement existing programs, to develop pilot or experimental programs, or to leave the excess funds in an unallotted reserve for distribution as part of the 1979-81 biennial budget request. The staff recommends the latter position. The Board discussed the matter and took Lavine (and Kaplan's) suggestion of making an annual review request of state government that HEAB be authorized to use the funds during 1978-79 for the reduction of student debt levels. The Board then directed the staff to prepare for Board consideration at its next meeting a plan that would use the funds for these purposes. The Chairman was requested to renew the effort to gain Governor and legislative support for the Board's request that the funds not go to replace administrative GPR but to be used to reduce the indebtedness of students.

HEAB Personnel Plan

Regent Lavine reported that the HEAB office was currently undergoing dramatic changes because of growth and the need to get on line the move to a computer. After there has been time for a shake-down to permit the staff to get a better idea of its future personnel needs, the Executive Director will bring to the Personnel Committee a long-range personnel plan.

Revision of Agency Administrative Rules

The Board approved a staff recommendation to adopt the proposed administrative rules which had been revised and updated. The Board had held a public hearing on the rules in December, 1977.

Wisconsin Higher Education Grant Program

The Board approved staff recommendations which established the WHEG program parameters for the 1978-79 academic year. The staff reported that as of January 15, 1978 96% of the regular WHEG and 65% of the TIP funds were vouchered which was an improvement over the situation of the previous year. A full review of the 1977-78 program expenditure will be undertaken after second semester vouchering is completed and a decision will be made on the need for Board action to insure full utilization of WHEG funds in 1977-78. 1978-79 allocations for expending WHEG funds are:

\$11,641,336 Regular WHEG
1,500,000 TIP Freshmen
750,000 TIP Continuing
50,000 Handicapped

Mr. Johnson requested staff attention be paid to the independent/dependent student ratio to assure an equitable distribution of WHEG funds among UW and VTAE students. The possible use of a single equity level for students of both the UW and VTAE systems was suggested by the HEAB staff. This approach would not consider tuition differences between the two systems in packaging students. Both issues were referred to the staff and the Ad Hoc WHEG Committee for further analysis and recommendations.

Minnesota-Wisconsin Reciprocity Agreement for 1978-79

The staff recommended two additions to the Minnesota-Wisconsin Reciprocity Agreement for 1978-79. Changes included: (1) a statement that the agreement is subject to modification by the executive branch and/or the legislature of either state; and (2) language indicating that students must file a 1978-79 application prior to the last day of classes of the term to be eligible for the waiver of the nonresident tuition. Regent Lavine, suggesting the changes would be in the students' interest though they would mean a change for one UW System campus, received unanimous Board support of his motion to approve the new compact.

Student Loan Servicing Programs

The Board received a status report on the development of the Lender Servicing and National Direct Student Loan (NDSL) servicing programs. The Lender Servicing Program is serving eleven new lenders, additional lenders are expressing strong interest in the program, and existing lenders appear satisfied with the program.

The interim agreement with the UW to handle NDSL accounts appears to be working as planned. The staff suggested the possibility of exchanging at no cost to either party the Lender Servicing Program for servicing guaranteed students loans developed by HEAB for the NDSL servicing expertise of the American National Bank of Chicago. Mr. Jung indicated that his staff is developing data and information for a "Request for a Proposal" to be used in selecting a software developer who can design the data processing system required by HEAB.

Educational Opportunity Program

The Board received an activity report from Paul Spraggins, Administrator of the HEAB Division of Educational Opportunity in Milwaukee. The program serves people from minority, disadvantaged, and low income backgrounds. Its function is to place eligible individuals into postsecondary institutions who would not otherwise attend. The program is also known statewide as the Talent Search Program.

Regent Lavine requested clarification of a statement in the report that indicated, "EOP's future policies will encompass retaining clients in postsecondary schools as well as recruiting them." Spraggins stated that this involvement would be indirect through a professional association of Economic Opportunity Program personnel and not a direct act by EOP to work within the higher education institutions. He also said that EOP "policies" were those of the institutions involved.

Regent Lavine questioned the need for continuing the out state EOP programs as they are now offered by HEAB indicating that the UW System, VTAE, and private institutions all had developed large programs to seek out, admit, and retain minority and disadvantaged students. He stated that the EOP program was needed in the 1960's but that in light of the institutions' effort and responsibility in this area, it appears counterproductive to what is needed in the 1970's. He stated that the responsibility for the job had properly shifted to the educational institutions and the continuation of the EOP program let institutional personnel off the hook in those cases where students continued to maintain dependence on EOP personnel rather than use available services developed specifically for them. Having polled some northern school superintendents and found statements of non-recognition on need for EOP, he felt a thorough review of the programs in northern Wisconsin was needed to determine if funds were being spent wisely.

Mr. Phillip Johnson expressed related concern about the apparent duplication of services which have been implemented by the several educational institutions and also was bothered by the potential of an outside agency overextending itself into the prerogatives of educators. He indicated that he was astounded by the lack of credit given to VTAE and others for the efforts extended on behalf of the minorities and disadvantaged.

Chairman Madison defended the need for the program as spur to the institutions which he indicated would otherwise have a tendency to do business as usual and not get the job done. He also said he felt that secondary schools were not reaching these target students and that EOP helped.

In the HEAB report 78-32 it is stated: "Traditionally the college recruiter is viewed as looking for students only to fill quotas. Contrast this with the Talent Search recruiter who is sensitive and open to the needs of non-traditional students. This makes Talent Search more than a counseling effort." Spraggins said he did not mean to indicate that Wisconsin's educational institutions were not adequately concerned about the educational problems of minorities. He stated that it takes the efforts of HEAB's EOP program along with those of the institutions. He indicated that there was as much need for the program now as in the 60's, suggesting that minority groups are facing new barriers because of a general feeling that the white middle class is now experiencing discrimination.

Wisconsin Student Support Information System 1976-77

The Board received a summary report of the state student aid data collected from all institutions in the state. In 1976-77, 47,437 Wisconsin resident undergraduates received some form of need-based financial aid for a 13 percent increase over that in 1975-76. The data indicate that 2/3 of the recipients were enrolled in the first two years of an educational program and that 34 percent of the aided students were considered independent as compared to 30 percent in 1975-76. During the period 1975-76 to 1976-77, student budgets increased 8.0 percent. Average family contributions increased from \$1,291 to \$1,402, total aid awarded increased 5.4 percent, and unmet financial need was reported to have increased 21.8 percent. Federal support provided 55 percent of all aid awarded, state support provided 36 percent, while institutional aid accounted for about 10 percent of aid awarded in 1976-77.

Wisconsin Higher Education Corporation (WHEC)

The HEAB adjourned at 12:15 p.m. and reconvened as WHEC to affirm the Executive Secretary's action of hiring the Ernst and Ernst accounting firm which will perform an in-depth financial audit of the Corporation in preparation for the sale of student loan revenue bonds.

TO: Board of Regents of the University of Wisconsin System

FROM: Regent Edward Hales

SUBJECT: January 24, 1978 WBVTAE Board Meeting

The Wisconsin Board of Vocational, Technical and Adult Education met at the north campus of Milwaukee Area Technical College on January 24, 1978. This report summarizes the agenda items I believe to be of major interest to the UW System.

Joint UW-VTAE Position on 1202 Commission

Director Lehrmann received Board approval to invite President Young to join in sending a letter to Governor Schreiber indicating that the existing state structure adequately provides for the coordination of higher education in Wisconsin and they therefore urge that he oppose the establishment of a 1202 Commission in Wisconsin.

Affirmative Action Plan

A revised Affirmative Action Plan for 1977-78 was approved by the Board with an understanding that the next VTAE Affirmative Action Plan will follow the format established by Executive Order Number Four. The essence of the plan is the commitment of the State Board to reach and maintain an employment level for women, minorities, and the handicapped which is above parity. The VTAE staff will make its own search for staff to supplement the effort of the State personnel office.

Nicolet Development Plan

The Board approved a vocational-technical program development plan for Nicolet College and Technical Institute developed in response to a 1977 legislative mandate. The plan identifies programs for the period of 1978 to 1981 which are proposed to meet the social and economic development needs in northern Wisconsin.

Admission Requirements

The Board adopted rules for admitting nondistrict residents in post-secondary and vocational adult programs which are not offered statewide. The Board requires that districts reserve a percentage of places in these programs proportional to the federal and state support provided to the districts, i.e., approximately 35 percent of the operating costs.

Iowa-Wisconsin Post High School VTAE Reciprocity Agreement

The Board received a report that the proposed reciprocity agreement presently under discussion with representatives from northeast Iowa Area One VTAE District has been approved by the Southwest Wisconsin and Western Wisconsin VTAE Districts but that Iowa has not reciprocated.

Governor's Conference

The Board received a status report on staff efforts to develop plans for a Governor's Conference on Economic Development and Vocational Education. As proposed the UW System would be involved both as a target group and a resource for the conference.

Annual Budget Review Request

The Board approved requests totaling approximately \$21 million for submission to the Governor for consideration in the 1978 annual budget review session. The following proposals were approved:

- A. Addition of \$7.9 million to provide specialized vocational education training services to employees of industries who wish to upgrade worker productivity so these businesses and industries will remain in the state or expand operations.
- B. Provide \$2.2 million in FY 1978-79 to provide incentives for VTAE contracting of high school youth.
- C. Provide \$100,000 in FY 1978-79 to develop a modeling capability producing information dealing with manpower generation and attached costs.
- D. Provide \$644,000 in FY 1978-79 to provide working opportunities for 1,400 middle income students enrolled in VTAE schools.
- E. Provide an additional \$9.9 million in FY 1978-79 to attract 6,100 additional disadvantaged students for enrollment in post-secondary programs.

Energy Audit

The Board received a report on the status of the energy audit being conducted on 43 VTAE campuses. Data are being collected to profile the system and to determine consumption and related factors for the purpose of monitoring, analyzing, and improving the utilization of energy.

Circuit Judge Jones's Opinion on the MATC Site

The Board received a copy of the opinion issued by Circuit Judge Jones in regard to the MATC site. Director Lehrmann has requested legal counsel for advice as to how this opinion affects the actions of the State Board.

III. REPORT OF ACTIONS TAKEN (MEMOS OF AGREEMENT).

- A. An agreement has been executed between the UW-Madison Department of Plant Pathology and Mrs. K. O. Rydzewski for the lease of 20-40 acres of land at the rate of \$20 per acre to be used for potato research. This is a renewal of an existing agreement and covers the period January 1, 1978 through December 31, 1978.
- B. An agreement has been signed between Mr. Steven Wykowski, Sr. for the lease of approximately 12 acres of land for potato research for UW-Madison during the next growing season. The rate will be \$20 per acre and covers a 12-month period beginning May 1, 1978.
- C. A lease has been signed by Mr. Lee A. Jensen for the Dairy Farm Residence No. 2 at the Arlington Farms, UW-Madison. The lease is at the rate of \$41.50 and covers the period December 1, 1977 to June 30, 1978.
- D. An agreement, dated September 1, 1977, between the Milwaukee Art Center and the Board of Regents of the University of Wisconsin System covering publication by the Center of the work tentatively entitled "The Von Schleinitz Collection of the Milwaukee Art Center" by Rudolf M. Bisanz was signed by the Vice President and Controller.

IV. REPORT OF ACTIONS TAKEN BY THE STATE BUILDING COMMISSION ON
20 DECEMBER 1977 AFFECTING THE UNIVERSITY OF WISCONSIN SYSTEM.

UNIVERSITY	PROJECT	ACTION
1. UW-MADISON	Requested approval of the Concept and Budget Report for the 1971-73 Pathological Waste Incinerator project, on the campus at UW-Madison, and release of an additional \$35,000 of Advance Planning Funds to prepare final plans and specifications, bid, and construct the project for a revised estimated total project cost of \$643,940.	APPROVED
2. UW-MILWAUKEE	Requested authority to increase the budget for the 1975-77 Great Lakes Research Facility - Phase II Remodeling project, at the University of Wisconsin System Center for Great Lakes Studies in Milwaukee, by \$99,926, for a revised total project cost of \$806,000.	APPROVED with the understanding that negotiated deducts will be sought from the successful bidders and the results be reported back to the Commission in January.
3. UW-SYSTEM	Requested approval of 1977-79 Major Projects to be included in the Annual Budget Review, as follows:	
La Crosse	Main Hall Remodeling	APPROVED \$2,750,000 of \$2,995,000 requested, as recommended by DOA, with provision A/E seek means of increasing seating capacity in the auditorium.
Madison	Camp Randall Sports Center Roof	APPROVED at \$650,000 as requested.
	Lakeshore Improvements	APPROVED at \$250,000 as requested, with provision that the University secure DNR approval before project is to proceed.

UNIVERSITY	PROJECT	ACTION
3. UW-SYSTEM (CONT.)		
Oshkosh	Riverfront Stabilization and Adjacent Area Development	APPROVED at \$948,000. Requested at \$894,500.
River Falls	North Hall Remodeling	APPROVED at \$1,044,500. Requested at \$999,200.
Stevens Point	Old Main Remodeling	APPROVED at \$1,830,000 as requested.
System	Alternate Sources of Fuel for Heating/Chilling Plants	DEFERRED until January 1978.
	Handicapped Accessibility	DEFERRED until January 1978.
	Telecommunications Equipment Replacement	APPROVED \$278,000 of \$300,000 requested.

V. REPORT OF ACTIONS TAKEN BY THE STATE BUILDING COMMISSION ON 10 JANUARY 1978 AFFECTING THE UNIVERSITY OF WISCONSIN SYSTEM.

UNIVERSITY	PROJECT	ACTION
1. UW-SYSTEM		
	Requested approval of 1977-79 Major Projects to be included in the Annual Budget Review, as follows:	
La Crosse	Main Hall Remodeling	APPROVED \$2,750,000 of \$2,995,000 requested, as recommended by DOA, with provision A/E seek means of increasing seating capacity in the auditorium.
Madison	Camp Randall Sports Center Roof	APPROVED at \$650,000 as requested.

UNIVERSITY	PROJECT	ACTION
1. UW-SYSTEM (cont.)		
Madison	Lakeshore Improvements	APPROVED at \$250,000 as requested, with provision that the University secure DNR approval before project is to proceed.
Oshkosh	Riverfront Stabilization and Adjacent Area Development	APPROVED at \$948,000. Requested at \$894,500.
River Falls	North Hall Remodeling	APPROVED at \$1,044,500. Request- ed at \$999,200.
Stevens Point	Old Main Remodeling	APPROVED at \$1,830,000 as requested
System	Alternate Sources of Fuel for Heating/Chilling Plants	APPROVED \$290,000 for project at UW-Platteville only.
	Handicapped Accessibility	APPROVED at \$5,500,000. Request ed at \$4,610,000
	Telecommunications Equipment Replacement	APPROVED \$278,000 of \$300,000 requested.

VI. REPORT OF ACTIONS TAKEN BY THE STATE BUILDING COMMISSION ON
18 JANUARY 1978 AFFECTING THE UNIVERSITY OF WISCONSIN SYSTEM.

UNIVERSITY	PROJECT	ACTION
1. UW-EAU CLAIRE	Requested authority to plan, bid, and construct a 1978 Tennis Courts project for an estimated total project cost of \$135,100.	APPROVED

UNIVERSITY	PROJECT	ACTION
2. UW-GREEN BAY	<p>Requested approval of the Concept and Budget Report; release of an additional \$15,500 of Advance Planning Funds; and authority to prepare final plans, bid, and construct the UW-Green Bay portion of the UW-System 1977-79 Mechanical and Electrical Monitoring project for an estimated total project cost of \$314,000.</p> <p>NOTE: Public Member Edward Prince introduced the following as an "add-on" to the Commission's approval action:</p> <p>"WHEREAS, monitoring systems have been approved at UW-Platteville and Milwaukee in the 1975-77 Building Program at an estimated cost of \$650,000 which systems are presently being installed; and in the 1977-79 Biennium \$3.15 million is authorized to provide monitoring systems at the other 11 campuses of which the Green Bay project is part.</p> <p>"WHEREAS, the degree to which these monitoring systems are effective in energy saving is dependent upon the way the campuses schedule their programs moved that each campus recognize its role in conserving energy by providing to the Building Commission a statement of endorsement of the concept of the monitoring systems and demonstrate this support by the most efficient scheduling of classes and activities and enforcement of night and weekend reductions in heating and ventilation cycles, etc. This statement should state how the campus intends to use the monitoring system to conserve energy and where the authority rests to decide on policies and schedules and changes in the monitoring cycles once they are established. This statement should be endorsed by UW Central and included in all future Concept and Budget Reports. All campuses should provide these statements to the Building Commission. After a years operation of the monitoring systems each campus should report to the Building Commission on the actual energy and dollar savings."</p>	APPROVED
3. UW-MADISON	<p>Requested release of \$3,500 of Advance Planning Funds to prepare Preliminary Plans and a Concept and Budget Report for the 1977-79 Marshfield Farm Headquarters Addition and Remodeling project for an estimated total project cost of \$237,000.</p>	<p>APPROVED as requested with a release of \$5,500.</p>

UNIVERSITY	PROJECT	ACTION
4. UW-MILWAUKEE	Requested approval of the Concept and Budget Report; release of an additional \$150,000 of Advance Planning Funds; and authority to prepare final plans, bid, and construct the 1977-79 Downer Building Complex Remodeling - Phase I project with a project budget increase of \$607,500 and for a revised total project cost of \$4,913,100.	APPROVED
5. UW-OSHKOSH	Requested approval of the Concept and Budget Report; release of an additional \$10,000 of Advance Planning Funds; and authority to prepare final plans, bid, and construct the 1977-79 Riverfront Stabilization and Adjacent Area Development project for an estimated total project cost of \$948,000.	APPROVED
6. UW-RIVER FALLS	Requested allotment of \$5,050 of State Building Trust Funds and authority to plan, bid, and construct a 1977-79 Tennis Courts/Physical Fitness Course/Pathway Connector project for an estimated total project cost of \$88,500.	APPROVED
	* * *	
	Requested allotment of \$19,600 of State Building Trust Funds to plan, bid, and construct a 1977-79 Campus Laboratory Farm Well and Water Distribution System Improvements project.	APPROVED
