The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

MINUTES OF THE REGULAR MEETING

of the

BOARD OF REGENTS OF THE UNIVERSITY OF WISCONSIN SYSTEM

Madison, Wisconsin

Held in the Clarke Smith Room, 1820 Van Hise Hall  
Friday, November 7, 1986  
9:00 a.m.

- President Weinstein presiding -

PRESENT: Regents Clusen, Fish, Flores, Gerrard, Grover, Hanson, Hassett, Heckrodt, Knowles, Nikolay, Schenian, Schilling, Vattendahl and Weinstein

ABSENT: Regents Finlayson, Lawton and Lyon

Upon motion by Regent Fish, seconded by Regent Nikolay, minutes of the regular meeting of the Board of Regents of the University of Wisconsin System, held on October 10, 1986, were approved as mailed to the members of the board.

*Hospital - Council of Trustees - Report on patient activity, budget, housing for patients & families, presentation on reconstructive surgery, plans for 2 new modules, review of bylaws, and annual award honoring Regent Lawton, pp 1 & 2*

REPORT OF THE PRESIDENT OF THE BOARD

Report of the Vice Chairman, Council of Trustees, UW Hospital and Clinics

Reporting on the November 6 meeting, Regent Heckrodt said the council was advised that patient activity for the first quarter of the fiscal year continued to surpass the previous year, with admissions up 3.3 percent and patient days up 7.9 percent. As a result of this trend, the hospital's financial position was better than anticipated, under budget in projected losses and over budget in profits. In addition to increased activity within the intensive care units, specialties within the Department of Medicine had experienced significant increases in inpatient volume, and the recruitment of a new specialist in hematology had enabled the hospital to expand its bone marrow transplant program. Outpatient activity increased approximately 9 percent over the three-month period. Satellite clinics in DeForest and Middleton also experienced substantial growth over the past year.

*Lawton, Ben R. - Establishment by Hospital Council of Trustees of annual Ben Lawton award, p. 2*

There was a growing need to expand housing accommodations for patients and the families due in part to the trend toward outpatient surgery and shortened hospital stays, which increased demand for inexpensive, convenient housing facilities for patients. At the same time, expansion of the hospital's transplant and surgical programs increased the need for low-cost housing for relatives of patients who were hospitalized for extended periods of time. Currently, a minimum of 45 patients and family members per night required such accommodations. Because the Friedrich Center was unable to meet this growing demand, potential alternatives were being explored.

A slide presentation as made to the Council by Dr. David Dibbell and associates from the Division of Plastic and Reconstructive Surgery, considered to be one of the top such programs in the country. Using techniques unavailable ten years ago, the surgical team performed complex reconstructive surgery for patients with congenital defects, traumatic injuries and cancer, in addition to intricate reattachment procedures. This team had been featured on the television show "20-20" for the surgery they performed in Equador.

Vice Chancellor Jay Noren reported to the Council on plans for construction of the two new modules which were approved by the Board of Regents at its last meeting.

The Council approved new faculty appointments, as well as creation of a committee to review the Council of Trustees bylaws.

In a special action, the Council decided to establish an annual award in honor of Regent Ben Lawton, by a motion which read as follows:

In recognition of Dr. Ben Lawton's outstanding contributions to the University of Wisconsin Medical School and the University of Wisconsin Hospital and Clinics, as a medical student, surgical resident and leader of the University of Wisconsin Medical Alumni Association, nationally recognized spokesman for quality medical practice and medical education, member and chairman of the University of Wisconsin Hospital and Clinics Council of Trustees, member and president of the University of Wisconsin Board of Regents, be it resolved that the University of Wisconsin Hospital and Clinics Council of Trustees establish an annual Ben Lawton award. This award will be presented to the member of the surgical house staff whose dedication to teaching medical students in establishing a role model for them best embodies Dr. Lawton's energetic spirit of educational excellence.

Noting that Regent Lawton had been informed of this action, Regent Heckrodt said a suitable plaque would be presented to him and a permanent plaque, displayed in a prominent location at the hospital, would record the recipients of the annual award.

Regent Hanson added that such an award was a most fitting recognition of Regent Lawton's contributions.

VTAE Board - Report on the VTAE's 75th anniversary, commendation to UW on future study group, and report on budget, p. 3

Report of the President of the State VTAE Board

Regent Hassett reported that the VTAE System recently celebrated its 75th anniversary with a dinner at which speakers from labor and management recounted the system's history. Participants included past and current district and state board members. One speaker made a dramatic appeal for maintaining the current VTAE System rather than moving in the direction of community colleges. In February 1987, there was to be a three-day seminar on the future of the VTAE System.

Regent Hassett had delivered a letter to President Shaw from VTAE Director Robert Sorensen, commending the Regent Study Group on the Future of the UW System and asking for continued involvement of VTAE officials in further reviews. Indicating that the VTAE Board considered the Regents' study important also to the VTAE System's future, Regent Hassett remarked that in touring VTAE districts he had been impressed by the extent of cooperation between the systems. It would be helpful, he added, to have a compilation of examples of use by the two systems of each other's facilities, programs and services.

Noting that action on the 1987-89 biennial budget had been delayed until November 11, Regent Hassett said the state board was convinced that a new philosophy for funding the VTAE System was needed. It was considered necessary to seek a 50 percent aidable cost, phased in over four years, the current aidable cost being about 30 percent. The goal was to seek 35 percent aidable cost next year, 40 percent the following year, then 45 percent and finally 50 percent. While these were appreciable increases, the argument had been made by seven districts that, even with a 10 percent increase this year, they would have less money because of the declining value of real estate and the 1.5 mill limit. It would be necessary, Regent Hassett concluded, for people throughout the state to become involved in persuading legislators that the state should pay half the cost of the VTAE System.

In response to a question by Regent Weinstein, Regent Hassett said the state currently provided about \$76 million in aidable costs. The budget request would raise that amount to \$96 million in the first year and \$160 million in four years.

Chancellor - Report on Chancellor inaugurations at UW-Milwaukee & UW-Parkside, p. 3

Chancellor Inaugurations at UW-Milwaukee and UW-Parkside

President Weinstein congratulated Chancellors Sheila Kaplan, of UW-Parkside, and Clifford Smith, of UW-Milwaukee, on their recent inaugurations, the ceremonies for which were very impressive and meaningful.

UW-Milwaukee - Staff - Report on inauguration of Clifford Smith as chancellor, p. 3

UW-Parkside - Staff - Report on inauguration of Sheila Kaplan

Smith, Clifford - Report on inauguration, p. 3 as chancellor, p. 3  
Kaplan, Sheila - " " " " " "

*Finlayson, Edith - Report on hospitalization & on receipt of award from Mt. Mary College, p. 4*

Report on Regent Finlayson

It was reported by President Weinstein that Regent Finlayson was hospitalized at St. Michael's in Milwaukee. She expected to be discharged in about two weeks.

Regent Weinstein congratulated Regent Finlayson on receiving the prestigious Pro Urbe (For the City) award from Mount Mary College on October 23.

*Governor -*

Appreciation to Governor Earl/Congratulations to Governor-Elect Thompson, pp 4-5

President Weinstein made the following statement:

"Because there is a change of administrations in the Executive Branch of government, I think it is important to recognize and thank Governor Earl for his support of the UW System during the past four years, and at the same time congratulate his successor, Governor-Elect Thompson. We all know that throughout our history, the university has enjoyed strong bipartisan support from state government, and I am quite optimistic that this will continue in the future.

"I received a letter from Governor-Elect Thompson, as did all of the regents and some of the chancellors, giving us his reassurance that this tradition will be continued during his term of office. In his letter to me, he stated that he wanted me to know personally of his strong commitment to maintain the quality of the UW System. He pointed to his own record of being one of the most vocal and consistent supporters of faculty catch-up (I can attest to that because I met with him during those sessions, and he did actively and vigorously support faculty catch-up), and his active interest and participation as co-chair of the Assembly Select Committee on the Future of the University of Wisconsin System, which traveled extensively throughout the state. I had the privilege of testifying before that group, and I can reaffirm again his active participation and positive contribution to the deliberations of that group.

"He reaffirmed in his letter his belief that no campus should be closed and that any closing would have a negative impact on the communities in which they are located and on the accessibility of education to Wisconsin students. He advocated greater use of our four-year campuses and two-year centers, with which of course we all agree.

"He went on to say that the challenges in the coming years will be for the state government to work with the regents, the chancellors, administrators and faculties, to continue to provide a world-class education for students and world-class research for the benefit of our citizens, at a cost within the parameters of Wisconsin's resources. We had a chance to chat about that briefly at UW-Parkside, and he extended his hand to me and said that he looked forward to working with us in the future.

"In his letter, he then assured me that there would be no reduction in funding for the university under his administration and that he would be willing to listen as we argued our cause and our needs. He closed his letter by stating that as Governor he will continue to maintain a strong working relationship with the university and will work together with the regents to maintain its preeminence as a system.

"So I was gratified, of course, to receive that letter. I have since acknowledged it to him and have indicated my eagerness to work with him and his staff as we go forward in the next four years."

✓ Lawton, Ben

→ Establishment of the Ben R. and Ruth M. Lawton Scholarship Fund

R 3663,  
PP 5-6

✓ Noting that many regents and others had communicated their wish to recognize the great contributions that Regent Ben Lawton had made to the UW System, Regent Weinstein called on Regent Hanson for presentation of a special resolution.

Lawton, Ben R. + Ruth M. Scholarship Fund - Establishment of fund

Stating that it was her honor and great pleasure to make this motion, Regent Hanson presented Resolution 3663. The motion was seconded by Regent Schilling and carried unanimously.

R 3663,  
PP 5-6

Resolution 3663: In recognition of the profound contribution of Dr. Ben R. Lawton to the profession of Medicine and to higher education as a member of the Board of Regents of the University of Wisconsin System and as President of the Board from 1984 to 1986, the Board of Regents is establishing a scholarship fund to be known as the Ben R. and Ruth M. Lawton Scholarship Fund.

The purpose of the Fund will be to provide financial support to one or more Wisconsin students with eligibility limited to: (1) needy University of Wisconsin undergraduate students planning to apply for Medical School, and (2) needy first year medical students who have been accepted into the University of Wisconsin-Madison School of Medicine.

Annual announcement of these scholarships will be made by the Board of Regents upon the recommendation of the Ben R. and Ruth M. Lawton Scholarship Fund Committee which will be composed of faculty, selected by the UW System President.

The Scholarship Fund will provide the awardee(s) with financial support sufficient to cover tuition, fees, books, supplies and equipment required for the course of study during the year of the award.

Announcements, application forms, eligibility requirements, and selection criteria will be developed by the Ben R. and Ruth M. Lawton Scholarship Fund Committee. Recommendations from the Committee will be made to the Board of Regents for selection of the successful applicant(s).

Regent Hanson stated that Ben and Ruth Lawton had operated as partners throughout their lives. "They continue to do so, and I think it is most fitting that this scholarship be given in both their names."

She added that Regent Lawton asked her to convey his regrets that he could not be here, although his thoughts were very much with his colleagues on the board.

Implicit in the resolution, Regent Weinstein observed, was the need for a fund-raising committee which he expected to appoint in the near future. The purpose would be to let people around the state know that such an opportunity existed, so that they could express their respect and affection for Regent Lawton.

✓  
Regent Committee -

Business and Finance Committee and Board of Regents Meetings  
Scheduled for November 14, 1986, p. 6

✓ Referring to the special meeting to be held on November 14 to consider the 1987-89 biennial budget, Regent Weinstein noted that the meeting could not begin before 12:30 p.m. because there was a meeting of the Higher Educational Aids Board scheduled for that morning.

Regent Committee - Bus. & Finance - (same)

REPORT OF THE PRESIDENT OF THE SYSTEM

Report of Nonpersonnel Actions/Informational Items

Upon motion by Regent Schilling, seconded by Regent Schenian, the following resolution was adopted unanimously:

Resolution 3664: That the report of nonpersonnel actions by administrative officers to the Board of Regents and informational items reported for the record (copy on file with the papers of this meeting) be received for the record; and that actions included in the report be approved, ratified and confirmed.

*Regents Meeting Presentations*  
UW-Madison Presentation: Project Trochos

*pp 7-10*

Introducing the presentation, Chancellor Shain noted that toward the end of the last decade the development of the personal computer marked the beginning of a new era of technology in the academic process. Recognizing this trend, UW-Madison created the Office of Information Technology in an effort to coordinate and encourage computer use throughout the university. A first step was to seek outside support for getting computers into the curriculum, the budget not being sufficient to do so with state funds. Sizable grants were received, the largest of which was about a \$7 1/2 million dollar gift from IBM.

*Computers*

*- Report to Board on UW-Madison Project Trochos*

*pp 7-10*

The Chancellor then introduced Tad Pinkerton, director of the Office of Information Technology and a professor of computer science, who was instrumental in obtaining the IBM grant.

Describing Project Trochos, Professor Pinkerton explained that it began in December 1984 with an IBM three-year grant primarily for equipment, valued at \$7 1/2 million. Additional equipment provided by IBM as part of the grant was expected to bring the three-year total to more than \$9 million.

Project Trochos was one of a number of grants that IBM gave to universities throughout the country for advanced education projects. Selected institutions were invited to make proposals, and nineteen of them ultimately received large grants. Each was individually approved by the IBM board of directors and administered by IBM's Academic Information Systems Group, a special non-profit unit set up to work with universities. The purpose of the grant was to stimulate development of educational software.

Supplementing the equipment grants, IBM also provided a year of maintenance on each piece of equipment beyond the warranty period, along with technical staff to assist the university in making maximum use of the equipment. Periodic meetings were held for the nineteen institutions which received grants to facilitate sharing of ideas, along with national conferences for the grant recipients and staff from other universities. Finally, IBM gave a special grant to UW-Madison to distribute software on behalf of the nineteen institutions.

The equipment received by UW-Madison was allocated among many individual faculty members or small groups of faculty members through a series of competitions judged by a sixteen-person selection committee composed of faculty familiar with the use of computers in education and faculty with strong reputations in teaching. The selection committee worked closely with deans and departments in order to insure that the departments would support faculty receiving IBM equipment by providing space, release time and teaching or project assistants.

Noting that only about one of three faculty proposals were accepted, Professor Pinkerton added that faculty who did not succeed in getting equipment were encouraged to come back a second time and were assisted in making better proposals. An integral part of this project was a faculty support center--a group of about five academic computing staff members who helped faculty to develop proposals, showed them the

kinds of equipment available, provided technological expertise, worked with IBM staff to find answers to questions about hardware and software, helped faculty design an educational strategy for the software, and assisted in evaluating the development of software and preparing software to be shared by other faculty.

At the current time, 87 projects had received equipment consisting of about 350 computers which ranged from simple IBM personal computers to very high performance individual work stations. About 150 faculty members were involved in these projects. By the end of the third year, it was expected that more than 10 percent of the faculty would have participated in projects and that more than 500 work stations would be involved. Forty-nine proposals currently were being evaluated in the fourth round of competition. In addition to Project Trochos, there were other grants of computer equipment. In a three-year project, Apple Computers provided UW-Madison with 150 work stations involving an additional 50 faculty members on nineteen different projects. Also, equipment valued at \$1-\$2 million was received from AT & T.

One limiting factor, Professor Pinkerton noted, was lack of enough student programming help to produce software as rapidly as was desired. In the future, there would be a need for considerable modernization of classrooms to accommodate the new technology, as well as the need to provide effective linkages among computers.

Professor Pinkerton then introduced Thomas Lillesand, professor of environmental studies, civil and environmental engineering, and forestry.

Giving a faculty perspective of the impact of the \$7.5 million grant on instruction, Professor Lillesand observed that a great benefit of the new equipment was that it enabled faculty to teach entirely new material through software development.

To illustrate that point, Professor Lillesand described changes in the teaching of remote sensing, which historically dealt with analysis of black-and-white aerial photography. Today, remote sensing utilized computerized analysis of satellite data collected every 16 days on a global basis. Upper division undergraduate students and graduate students were being taught to use the work-station environment to process satellite data and to merge that data with other forms of visual resource information.

Showing a series of colored slides, Professor Lillesand noted that the computer facility was shared among the departments of civil engineering, forestry, geography, and others which articulated with the Institute for Environmental Studies. The equipment was organized in a network fashion, so the teaching environment consisted of a network of individual student work stations that articulated through a network translator. Two work stations were dedicated solely to software development. This network, in turn, eventually would be linked to other networks around the campus.

Information studied in the courses came originally from satellites which scanned the surface of the earth, picking up the signals line by line in terms of numbers. Within each line, there was a numbered

observation which the computer could translate and display in different colors. As an example, he showed the Madison areas as seen from 569 miles away. The computer could remember how various land covers appeared and could automatically map land use throughout the scene.

In the past, satellite data were of very coarse resolution, while today it was possible to focus on areas as small as 30 meters by 30 meters. The capability now existed to obtain such imagery every 16 days for the entire world and to analyze these data with a desk-top computer.

Because it now was possible to merge satellite data and digital map data, land records such as topographic maps, soils maps, and land ownership maps could be computerized. A number of departments throughout the university were cooperatively merging land records, not only in Dane County, but elsewhere in the state.

The satellite could be used to discriminate low crop, meadow, forest, water and other land uses for such purposes as assessing soil erosion potential. Although each county was mandated to do such an assessment, few had the requisite resources without application of this type of technology.

There was no reason why maps could not be made directly from satellite data, Professor Lillesand stated, showing a map of Green Bay produced by that system. Data came from the satellite, went to the microprocessor for enhancement and was put on a laser scanner in digital form. Such maps could be done for the entire world.

Computer-processed satellite data were helpful in understanding the circulation dynamics of Green Bay, analyzing water quality in Lake Michigan and detecting crop problems. This method was particularly useful because computer enhancement could show problems that the eye could not see.

In February 1986, the French launched a satellite with a 10-meter resolution, and Wisconsin was chosen as a test area for that system. As a result, the university hoped to publish an image map of Madison, the first such map in the United States.

At the other extreme were coarse resolution systems that looked at large areas, such as those done for the Lake Michigan water quality study being conducted in cooperation with investigators at UW-Green Bay and UW-Milwaukee, who were deploying vessels on the surface of Green Bay and Lake Michigan. In this study satellite data were used in conjunction with ground observations to monitor water quality.

Showing a slide of a 400 square mile clear-cut area in Indonesia, Professor Lillesand explained that the technology existed to view the whole globe on that kind of scale.

The challenge was in creating the software to make this data available not just in the instructional environment, but to natural resource agencies and others which could put it to productive use.

Regent Weinstein commented that the military implications of this technology were of concern.

Acknowledging that the implications were profound, Professor Lillesand said the challenge was in determining how to exploit them in a positive sense.

✓ President - Report on travels of System Presidents, p. 10

Report on Support for the UW System

President Shaw reported that in the last nine months, he had made more than 130 public appearances, including 13 business roundtables throughout the state. During these travels, he had learned that there was a great deal of support for the UW System. People understood the importance of having a high-quality higher educational system, and they recognized that there was a major funding dilemma to be addressed.

✓ UW-Extension

→ Report on Revitalizing Rural America, p. 10

Referring to a recent major report entitled *Revitalizing Rural America*, President Shaw noted that it represented a national cooperative extension response to the farm crisis by suggesting ways for extension, state and local governments, chambers of commerce, businesses and others to help. Recalling that 18 months ago UW-Extension created the "Strategies on Survival" program, reaching hundreds of state farm families with counseling on farm management and stress, President Shaw added that UW-Extension had contributed national leadership and vision to this important report.

✓ Budget - System president's report on budget process, pp 10-11

Plans for Budget Review

Presenting background information for the November 14 special Board of Regents meeting on the biennial budget, President Shaw outlined the process which had been followed, beginning in February 1986 when he met with the chancellors to discuss budget ideas for the coming biennium. From that meeting, he determined a set of areas to be emphasized and asked the chancellors to develop their budgets consistent with those emphases. He also placed limits on how much would be requested, as part of what was called the "constant gap" budget, which simply maintained the UW System's position but did not improve it. In the spring, he wrote a letter to the board, outlining the broad categories of emphasis and inviting comments. During the summer, there was a series of discussions with state officials. President Weinstein and he had concluded by late summer that it would be more appropriate not to complete the budget exercise until after the election in order to avoid having the budget become a political issue. In the fall, individual meetings with members of the board were held to discuss the general aspects of the budget.

Several board members had commented that the briefing sessions provided them with more information than they had ever received about the budget, and a number of regents indicated they would like to be involved earlier in the process in order to provide reactions in a more timely way regarding larger priority questions.

To accommodate that need, future biennial planning would be assumed to be a continuous process. Before notifying the institutions about planning guidelines, usually in March of the year in question, the President would seek recommendations of the Business and Finance Committee and other board members regarding overall priorities, studies they would like to have conducted, and any areas they felt required special attention. This board input would occur in December of odd-numbered years, almost a full year in advance of budget approval.

A second opportunity for board members to examine the larger issues would be in setting annual budgets. At the December 1986 board meeting, there would be a summary explanation of the annual budget process and presentation of key budget issues for discussion and reaction. Chancellors would be asked to participate in answering questions. From January through April, staff would follow up on questions that might arise as a result of the December discussion and ask the institutions to go forward in developing their annual budgets. The UW System annual budget would be brought to the board in May for a first reading, after which staff would follow up on any suggestions regents might have at that point. Final approval of the annual budget would be requested at a second reading in June.

Expressing appreciation to President Shaw, President Weinstein remarked that the process as outlined was more than responsive to the concerns he had heard expressed. He asked that those regents who had comments about broad policy issues communicate their views to President Shaw or him before December.

✓ Report of the United Council of UW Student Governments - *Thanks for being part of Regent's future study, activities of the council, and thanks for participation in systems work*  
 Bryce Tolefree, President of United Council, expressed appreciation for the opportunity given to students to participate in the Regents' study of the future in the UW System. The number of students who appeared at the November 5 hearing, he added, demonstrated that students were concerned ~~about~~ those issues and willing to participate in discussing them. *Pp 11-12*

Reporting that United Council was formulating strategies to address the Legislature in the upcoming session, he said students from around the state were involved in letter-writing campaigns, as well as in educational programs to inform themselves about the issues and the process. He was pleased that many student governments were participating in those kinds of activities and hoped the preparation would be helpful in the upcoming legislative session.

Mr. Tolefree thanked the System Office of Business and Finance and the Office of Academic Affairs for the assistance given United Council over the past months to facilitate involvement in issues of special concern to students. As an example, he cited revisions to student governance guidelines, which provided clear guidance for implementing s. 36.09(5); Wis. Stats., and also clarified the process for resolving disputes. In addition, United Council was working with the Office of Academic Affairs on revisions to student disciplinary guidelines and had presented to the Education Committee an idea for a four-year financial aid package to be developed in conjunction with Academic Affairs staff. United Council also was working with the Office of Business and Finance to resolve some concerns about segregated fees.

In conclusion, he said, "We may not agree on every issue, but when we participate in activities like this, I think this brings students and administration, regents and system, a lot closer together, so that we can be more involved in some of the things that we feel are directly going to affect us."

REPORT OF THE EDUCATION COMMITTEE

Vice Chairman Flores presented the report of the committee.

Accreditation - Committee of Vice Chancellors formed for accreditation study, p. 12  
Report of the Vice President

In his report, Vice President Trani indicated that he planned to ask the Education Committee to continue discussion of the accreditation process. A committee of vice chancellors had been formed to propose a set of principles on accreditation, and plans for accreditation of computer science programs had been suspended pending resolution of these issues.

International Education - Council created, p. 12  
 Dr. Trani was in the process of creating a Council for International Education as a follow-up to the Global Awareness Report. He also intended to appoint a committee to draft revisions to Chapter UWS 17, Wisconsin Administrative Code, concerning academic misconduct procedures.

Administrative Code - Committee to study revisions to UWS 17, academic misconduct procedures, p. 12  
 Since arriving in September, Vice President Trani had visited seven of the UW System universities, as well as some of the centers. His intention was to visit each university every six months and each center once a year.

Academic Staff - (same as above)  
Vice President - Transfer VP from Academic Affairs, p. 12  
Amendments to Articles of Faculty Governance: UW-Extension

Regent Flores reported unanimous committee approval of the proposed changes, which were discussed with the committee by Chancellor Boyle and Professor Barbara Hug, Chair of the University Committee. These

amendments involved delegation of the appointment authority of the executive committees.

It was moved by Regent Flores, seconded by Regent Schenian and unanimously carried that Resolution 3665 be adopted by the board.

Resolution 3665: That, upon the recommendation of the President of the University of Wisconsin System and the Chancellor of the University of Wisconsin-Extension, the Amendment of Chapter 3.03 of the Articles of Faculty Governance of the University of Wisconsin-Extension be approved.

*✓*  
UW-Ext - Faculty - Amendment to articles of faculty governance R 3665, pp 12-13

*→* Revision of Regent Student Guidelines in 36.09(5), Wis. Stats.

Noting that last spring system administration began a review of the 1974 Regent Policy Document 74-11, which dealt with students' rights and responsibilities for participation in institutional governance, Regent Flores reported that Vice President Trani reviewed with the committee the suggested changes which were designed to bring the document into conformity with recent court cases, as well as with standards currently in effect at a number of universities. The committee heard comments from Regent Schenian, Bryce Tolefree, President of United Council, and Michael Bachhuber, of the UW-Madison Wisconsin Student Association. After discussion, the committee unanimously approved Resolution 3666.

R 3666, pp 13-14

Upon motion by Regent Flores, seconded by Regent Schenian, the following resolution was unanimously adopted by the board:

*✓*  
Policy

Resolution 3666: Whereas, each institution shall do the utmost to implement the letter and spirit of section 36.09(5), Wis. Stats., as interpreted by the Board of Regents and Wisconsin Courts; and

Whereas, the fundamental thrust of section 36.09(5) is to insure that students are viable participants in university affairs, subject to the responsibilities of the board, the president, the chancellor and the faculty; and

Whereas, students have primary responsibility in the formulation and review of policies concerning student life, services and interests, as defined by each institution, as well as responsibility for the disposition of those segregated university fees that constitute substantial support for campus student activities; and

*✓*  
Students - (same)

Whereas, students shall have the right to select their representatives to participate in institutional governance, which means that students may choose the students who will be appointed by appropriate authorities to participate in institutional and faculty committees as determined by institutional policies and procedures and in accordance with the interpretation of the statute by the Wisconsin Courts.

Therefore, be it resolved that, upon the recommendation of the President of the System, the document entitled "Guidelines for Implementation of 36.09(5), Wis. Stats.," dated November, 1986, be approved.

✓  
North Central Assn.

Informational Reports on Institutional Accreditation by the North Central Association of Colleges and Schools, UW-Stout and UW-Whitewater, <sup>of</sup> p. 14

Informational reports were presented to the committee by the chancellors and staffs of UW-Stout and UW-Whitewater, concerning their North Central Association reaccreditation processes which recently had been successfully completed. Vice President Trani indicated that he would make available copies of the complete self-studies, as well as the final assessments made by the North Central Association, to any regents who wished to examine these or similar accreditation reviews in greater detail.

✓  
UW-Whitewater - Report on NCA accreditation, p. 14

In discussion at the board meeting, Regent Fish suggested that the entire reports be provided to the chairman of the Education Committee and Dr. Trani replied that Regent Finlayson had received the reports.

✓  
UW-Stout - (same)

Regent Hassett stated it was very impressive that both schools received accreditation without reservation for the next ten years. He also was impressed with the accreditation process.

Regent Flores added that both institutions were to be commended for receiving such favorable reports.

*Authorization to Recruit - Authorization (new)*

Authorization to Recruit: Dean, School of Education, UW-Eau Claire R3668, p.15

Regent Flores moved and Regent Hanson seconded adoption by the board of the following resolution, which was approved unanimously by the committee.

*UW-Eau Claire - Staff - Authorization to recruit Dean, School of Education, Resolution 3668* R3668, p.15

That, upon the recommendation of the President of the University of Wisconsin System and the Chancellor of the University of Wisconsin-Eau Claire, the Chancellor be authorized to recruit for a Dean of the School of Education, University of Wisconsin-Eau Claire.

In discussion at the board meeting, Regent Grover said that at one time he had intended to request regent involvement in the selections of all deans of schools of education, since several positions were opening and there was the opportunity to strengthen schools of education through the selection process. While he was not making such a request, he expressed the expectation that UW-Eau Claire would find a nationally significant educational leader for the deanship, in conjunction with the emphasis on schools of education, both nationally and in the UW System's budget.

Put to the vote, Resolution 3668 was unanimously adopted by the board.

*Financial Aid - Deferral to December of resolution on 4-yr. financial aid package, p.15*

Suggested Resolution on Four-Year Financial Aid Package Deferred to December Board Meeting

Continuing the report of the Education Committee, Regent Flores stated that Bryce Toefree, president of the United Council of UW Student Governments, and Ed Emerson, academic affairs director of the council, presented the committee with a suggested resolution, supporting in concept implementation of a four-year financial aid package for those students who showed financial need. After considerable discussion and with the understanding that the committee viewed this proposal in a very positive light, it was decided to postpone the item to the December meeting. In the interim, the students were to work with Vice President Trani's staff concerning legal and fiscal policy questions.

Following a unanimous roll-call vote, with Regents Flores, Hanson, Hassett and Schilling voting "Aye", the committee recessed into closed session to consider personnel matters, as permitted by s. 19.85(1)(c), Wis. Stats.

Named Professor: UW-Madison

Regent Flores presented Resolution 3669, which was approved by the committee in closed session, and moved its adoption by the board. The motion was seconded by Regent Schenian and carried unanimously.

Professors

Resolution 3669: That, upon the recommendation of the President of the University of Wisconsin System and the Chancellor of the University of Wisconsin-Madison, the status of J. Paul Peter ~~is~~ changed from Professor, School of Business, to James R. McManus-Bascom Professor in Marketing, School of Business, ~~University of Wisconsin-Madison, effective immediately.~~ *University of UW-Madison*

REPORT OF THE BUSINESS AND FINANCE COMMITTEE

Budget & Land - *of Bus & Finance and*  
Joint Meeting with Physical and Planning and Development Committee on  
UW-Madison Capital Fund Drive, p. 16

At the joint meeting to which all regents were invited, Chancellor Shain briefed the committees on the ~~the~~ process being followed for the UW-Madison capital fund drive. He explained that a list of major goals and projects for the drive were gathered from the operating units of the campus, using the following criteria: First, projects must contribute to the margin of excellence of the institution. Second, projects could not include those traditionally funded by the state or federal governments. In that regard, it was noted that 98 percent of all donations were given for specific projects and that donors generally wanted to support projects not traditionally funded by public monies. The total list of projects, which summed to \$285 million, was reduced by an evaluation committee to include \$180 million for academic units, \$36 million for support areas, and \$12 million for intercollegiate athletics. The purpose of the list was to serve as the basis for a feasibility study regarding the fund-raising potential of the projects. A private consultant, currently conducting the study, was expected to report findings in March 1987.

Budget - (same)

The Chancellor then reviewed the Convocation Center project, which was on the list, including dialog with the City of Madison regarding siting of the facility. Slides of an architectural model were viewed, and a City Council resolution stipulating the conditions under which the city would concur to construction of the facility was distributed.

Gary Seeman, of the UW-Madison Wisconsin Student Association, and Daniel Grossberg, a city resident, spoke in opposition to this project.

Regents expressed concern over a stipulation in the city resolution giving the city veto power over the scheduling of events in the Convocation Center.

Chancellor Shain stated that, while general fund raising would move forward, a formal effort to raise funds for specific projects would not be made until after the feasibility study had been reviewed by the regents. The committees concluded that regent action on the fund drive should await completion of the feasibility study.

Gifts & Grants - (same)

Gifts, Grants, and U.S. Government Contracts

Reporting unanimous committee approval of Resolution 3670, Regent Vattendahl noted that gifts, grants and contracts through the fifth month of this fiscal year totaled \$165 million, or \$20 million more than the same period last year (a 13.8 percent increase). The non-federal share increased 28.4 percent over a year ago, while the federal share increased 9.4 percent over the same period last year. Receipts increased in research (\$9 million), student aid (\$4.5 million), extension (\$2.9 million), miscellaneous (\$2.2 million), and physical plant (\$1.3 million).

Adoption by the board of Resolution 3670 was moved by Regent Vattendahl and seconded by Regent Knowles.

Resolution 3670: That, upon recommendation of the President of the University of Wisconsin System, the gifts, grants and contracts presented at this meeting (copy on file with the papers of this meeting) be accepted, approved, ratified and confirmed; and that, where signature authority has not been previously delegated, appropriate officers be authorized to sign agreements.

In discussion at the board meeting, Regent Fish pointed out that, although much was heard about the impact of declining federal funds, the amount of federal dollars coming to the UW System was increasing. Total extramural support was \$165 million, compared to \$144 million a year ago. Of that amount, student aid was up to \$40 million from \$35 million. The federal share of the total increased from \$111 million to \$122 million, and federal student aid was up from \$33 million to \$38 million.

Put to the vote, Resolution 3670 was adopted unanimously.

✓ Compensation  
Executive Compensation Review

Deferral to Nov. 14 of  
Executive Pay Plan review, pp 17-18

Continuing the report of the Business and Finance Committee, Regent Vattendahl summarized committee review of executive compensation.

Executive Vice President Lyall reviewed the history of assignment of UW System positions to State Executive Salary Groups, noting that the issue, as outlined in the November 5 correspondence from President Shaw to the Business and Finance Committee, was the negative impact of this salary setting system upon university positions. After discussion, the committee concluded that all regents should have an opportunity to review President Shaw's correspondence and that system administration should prepare a recommendation for statutory change to resolve the salary setting issue. It was recommended that the board consider including the statutory change request in the biennial budget to be discussed at the special meeting November 14.

✓ Executive Pay Plan - (same)

Regent Clusen commented that, since committee reports had been shortened to save time at board meetings, she felt less well informed about what had occurred at committee meetings.

✓ Salaries - (same)

With regard to the executive salary review, Regent Weinstein explained that the working document presented to the committee described the issue of compensation depression by the Executive Pay Plan and presented three options for consideration. Because the committee was not comfortable with taking action at that time, the matter was deferred to the November 14 meeting with the understanding that system administration would develop a recommendation which was both politically and fiscally possible. It was not the intent of the committee to recommend discussion of the issue at this meeting.

Regent Clusen added that she intended her comment to apply not only to the Business and Finance Committee report, but to the Education Committee report as well.

✓ Gifts + Bequests -

→ Acceptance of the Robert J. Mensel Bequest, R3671, p.18

The committee unanimously approved acceptance of the \$100,000 bequest of the late Robert J. Mensel, Miami, Florida, to establish a scholarship fund in the name of the deceased for the benefit of the UW-Madison School of Engineering.

(x ref Mensel, Robert J. - Acceptance of bequest, R3671, p.18)

Upon motion by Regent Vattendahl, seconded by Regent Knowles, the following resolution was adopted unanimously by the board:

Resolution 3671: That the bequest of the late Robert J. Mensel, Miami, Florida, be accepted by the Board of Regents of the University of Wisconsin System in accordance with the terms and conditions of his Living Trust; and that the Trust Officer or Assistant Trust Officers be authorized to sign receipts and do all things necessary to effect the transfer of the \$100,000 to establish the Robert J. Mensel Scholarship Fund for the benefit of the University of Wisconsin-Madison.

✓ Laboratories -

→ Laboratory Modernization Report, p.18

Vice President Case introduced Acting Assistant Vice President Kathleen Sell who briefed the committee on the status of the laboratory modernization program and showed slides of upgraded laboratories around the UW System. Original estimates indicated that \$100 million was needed to modernize 1,800 laboratories throughout the system, whereas the \$45 million which was made available over a ten-year period would permit upgrading of about 800 laboratories.

Projection Summary Report

In reviewing the Fiscal Year 1986-87 Projection Summary Report, Mr. Case noted that the reserve for revenue shortfall and other contingencies as of October 31, 1986 was \$1,346,956.

Legislative Audit Bureau  
Legislative Audit Report

*- Review of report on Competition with Private Sector on sale of computers and hearing aids, p. 19*

Mr. Case reviewed with the committee the recommendations of the legislative audit entitled *Evaluation of University of Wisconsin Competition with the Private Sector*. System Administration had responded to the two recommendations made in the report, which concerned sale of computers to students, faculty, and staff, and sale of hearing aids. In the case of computer sales, the Legislative Audit Bureau was concerned that the university might be unfairly competing with private enterprise by absorbing overhead costs in the budget. In the committee's judgment, however, the corrections made to the report by system administration answered that concern. With regard to hearing aids, it was agreed that they were to be dispensed in conjunction with instructional purposes and not in competition with private hearing aids vendors.

*Hearing Aids - Report on competition with private sector on sales, p. 19*  
*Computers - Report on competition with private sector on sales, p. 19*

Following a roll-call vote, with all committee members voting "Aye", the Business and Finance Committee recessed into closed session to consider trust fund matters as permitted by s. 19.85(1)(e), Wis. Stats.

REPORT OF THE PHYSICAL PLANNING AND DEVELOPMENT COMMITTEE

Chairman Nikolay presented the committee's report.

UW-Madison: Approval of Major Project Concept and Budget Report

The committee unanimously approved the concept and budget report for the UW-Madison Hydraulics Building remodeling-phase IV. The \$1,625,000 budget included an increase of \$85,000 to cover the cost of two changes made to the original project--addition of an elevator for handicapped access and an asbestos abatement program.

Regent Nikolay moved and Regent Schenian seconded Resolution 3672, which was adopted unanimously by the board.

*UW-Madison - Approval of Resolution 3672*

~~That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, the Concept and Budget Report be approved for the Hydraulics Building Remodeling-Phase IV project with a budget increase of \$85,000 and authority granted to prepare Final Plans and Specifications, bid and construct at a revised total project cost of \$1,625,000 from the following funding sources.~~

*Engineering Research Bldg - Approval of 1410 Johnson Drive  
Engineering Bldg. addition originally  
approved as Mechanical Engineering  
addition, R 3673, pp 20-21*

UW-Madison: Approval of Major Project Concept and Budget Report

Regent Nikolay reported on the second concept and budget report, which was for the 1410 Johnson Drive Engineering Building addition at a cost of \$2,535,000. This project, originally approved as an addition to the Mechanical Engineering Building, would provide 16,360 square feet of assignable space. Potential problems associated with construction at the original site, with the project budget, and with Mechanical Engineering Building security resulted in the changed location of the addition. In order to remain within the approved budget, it had been proposed in the concept and budget report that five rooms not be finished at this time. Alternate bids were to be taken so that, if favorable bids were received, it would be possible to complete all planned space.

The committee concurred with Vice President Brown's concern regarding the precedent reflected by this approach which was required by the Division of State Facilities Management. It was explained that the DSFM staff required that concept and budget reports not exceed the previously approved budget level in order to prevent "program creep" whereby funding increases would be needed to cover changes made to the program. In this instance, there were no changes in the program from what was previously approved. The initial budget was an estimate, as was the budget reflected in the concept and budget report. Further, the project would not be bid for at least a year. If the concept and budget report plan were followed and favorable bids were not received to allow the five rooms to be finished, it would be necessary for the campus to return at a later time with another request. The committee preferred to present to the Building Commission a request for funding sufficient to complete the project as previously planned and justified.

*Mechanical Engineering Bldg. - (same)*  
Therefore, the resolution was revised to recommend that the project budget be increased by \$94,000, which was the estimated cost to complete the five rooms.

Adoption by the board of Resolution 3673 was moved by Regent Nikolay and seconded by Regent Heckrodt.

Resolution 3673: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, the Concept and Budget Report be approved for the 1985-87 1410 Johnson Drive Building Engineering Addition (approved as the Mechanical Engineering Building Addition), the project budget be increased by \$94,000, and authority granted to plan, bid and construct at a revised total project cost of \$2,629,000 from General Fund Supported Borrowing.

In response to a question by Regent Fish, Vice President Brown said that if the procedures of the Division of State Facilities Management were followed, completion of the five rooms would have to be presented as a separate minor project. The committee preferred to do the entire project at once, since it did not reflect a change in program. When projects exceeded the budget because of program growth, they had been scaled back to budgeted levels.

Regent Fish inquired as to whether there had been a change in DSFM procedures on how to handle projects with budget increases.

Responding in the affirmative, Mr. Brown said it was important to raise the issue because there were at least three other projects at the present time facing the same type of problem. If budget rather than program were to be the deciding factor, it seemed to him that decision ought to be made by the Building Commission, rather than by staff.

Regent Fish expressed agreement with that view.

Put to the vote, Resolution 3673 was unanimously adopted by the board.

*Hygiene Lab - Renewal of lease of space at 979 Jonathon Drive, R 3674, pp 21-23*

UW-Madison: Approval to Renew Lease of Space

~~On a three-to-one vote, the committee approved renewal for three years of the existing lease on 9,990 square feet of space at 979 Jonathon Drive, the site of the State Laboratory of Hygiene's OSHA Consultation Laboratory. Regent Nikolay cast the dissenting vote because he opposed the escalator clause in the lease agreement.~~

Adoption by the board of Resolution 3674 was moved by Regent Clusen and seconded by Regent Schenian.

Resolution 3674: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authorization be granted to renew the lease of 9,990 square feet of space in a building located at:

979 Jonathon Drive  
Madison, Wisconsin

Daniels Building Rentals (Lessor)  
901 Stewart Street  
Madison, Wisconsin 53713

*Bldg & Land - Renewal of lease of space at 979 Jonathon Dr. for Hygiene Lab's OSHA consultation, R 3674, pp 21-23*

This lease covers a three year period from December 1, 1986 through November 30, 1989 at an annual cost of \$121,322 (\$12.14 per sq. ft.) the first year, \$126,174.88 (\$12.63 per sq. ft.) the second year and \$131,221.88 (\$13.14 per sq. ft.) the third year. All services, except custodial, are included. Rental payments will be provided from grant funds administered through the Department of Health and Social Services. The space provides facilities for the State Laboratory of Hygiene's OSHA Consultation Laboratory.

Regent Fish observed that escalator clauses were not as prevalent as they had been and that, in fact, deescalation clauses were not rare. In this case, the amount charged had increased from \$7,000 a month at the beginning of the lease to \$10,000 a month. While he intended to vote for the resolution, he felt the cost was too high.

Regent Clusen suggested that the general issue of escalator clauses should be considered as a separate matter, rather than debated when individual leases came to the board.

In response, Regent Fish remarked that it would be difficult to establish an overall policy because of the varying charges for different facilities. Noting that the property owner should receive a fair return and those who gave the university a favorable rate at the outset should not be penalized, he thought the clauses should be reviewed on a case-by-case basis.

Regent Gerrard suggested that the lease be renegotiated.

It was explained by Vice President Brown that because leases were negotiated by the State Department of Administration, the university could not determine what would be included. He had written to the Division of State Facilities Management to express the regents' dissatisfaction with having the escalator clauses set at a specific amount, rather than geared to a cost-of-living index. However, Secretary Hanson took the position that a known figure should be set forth in the budgets, rather than one tied to an index. That situation, he noted, might change in the new administration. Consideration had been given to a one-year lease in order to attempt a more favorable negotiation at that time, but it was felt that the substantial investment made in the property for laboratory functions would make finding another facility extremely difficult.

Regent Gerrard suggested that if the lease were sent back for renegotiation, the Executive Committee could act on it before the December 1 expiration date.

Noting that the laboratory was an analysis center for 32 states, Regent Clusen said she would not wish to lose so meritorious a program due to lack of facilities.

While he had reservations about the total cost of the lease and inclusion of an escalator clause, Regent Fish supported having the OSHA facility and was concerned about the consequences of failing to approve the lease.

Regent Heckrodt pointed out that funding for the OSHA laboratory came from federal monies, not state dollars.

Chancellor Shain agreed that it would be disruptive if the lease were not approved now because of the December 1 renewal date. He indicated that the escalator, which amounted to a four percent increase, was of concern to the lessor primarily because he paid all utilities and had to consider increases in fuel costs. This facility, the chancellor noted, was heavily dependent on utilities because of the laboratory equipment it utilized.

Regent Nikolay commented that fuel costs might decrease rather than increase.

Chancellor Shain added that, even at \$13 per square foot, the cost was competitive for laboratory space and that the university could not construct such space in the research park for that amount of money.

Put to the vote, Resolution 3674 was adopted, with Regent Nikolay voting "No."

President Weinstein asked that the new officials of the Department of Administration be advised of the board's concern about escalator clauses.

Regent Heckrodt pointed out one alternative was use of the type of lease whereby the university would pay utilities and other costs. That kind of lease, however, involved considerable risk, particularly if fuel costs were to rise.

*✓ Randall Tower - Renewal of lease of space for single student housing at 1314 W. Johnson St., UW-Madison: Approval to Renew Lease of Space R 3675, pp 23-24*

Continuing the report of the Physical Planning and Development Committee, Regent Nikolay presented Resolution 3675, which was unanimously approved by the committee.

It was moved by Regent Nikolay, seconded by Regent Schenian and carried unanimously that the following resolution be adopted by the board.

Resolution 3675: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authorization be granted to renew the following lease on 23,193 square feet of space used for single student housing at:

1314 West Johnson Street (Randall Tower)  
Madison, Wisconsin 53705

Eldon M. Stenjem, Jr. (Lessor)  
8402 N. 84th Place  
Scottsdale, Arizona 85258

*✓ Bledge & Land - Renewal of lease of space for single student housing at Randall Tower, 1314 W. Johnson St., R 3675, pp 23-24*

This lease covers a period from July 1, 1987 to June 30, 1990 at an annual rate of \$105,200 (\$4.54 per square foot) with no interim escalations. The University is responsible for the cost of utilities and repairs to the premises and/or furniture which cost less than \$200. Rental payments will be provided from program revenues.

Center for Space Commercialization - Amendment of lease of space at 333 N. Randall Ave. to include this new Center, R 3676, p. 24

UW-Madison: Approval to Amend Lease of Space

On a three-to-one vote, the committee approved amending the existing lease at 333 North Randall Avenue to include an additional 3,000 square feet to house the new Center for Space Commercialization, funded by a grant from NASA. Regent Nikolay cast the dissenting vote because the lease included an escalator clause.

Randall Ave. - Amendment of lease of space at 333 N. Randall Ave. to include Center for Space Commercialization, R 3676, p. 24  
Adoption by the board of Resolution 3676 was moved by Regent Heckrodt, seconded by Regent Vattendahl and carried, with Regents Fish and Knowles abstaining because of their membership of the UW Foundation Executive Committee, and Regent Nikolay voting "No" because of the escalator clause.

Resolution 3676: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authority be granted to amend the existing lease of office space at 333 North Randall Avenue to include an additional 3,000 square feet of space:

Bldg + Land - (same)

1357 University Avenue (entrance address)  
Madison, Wisconsin 53706

The University of Wisconsin Foundation (Lessor)  
702 Langdon Street  
Madison, Wisconsin 53706

This lease amendment covers a period beginning December 1, 1986 (or date of occupancy) through June 30, 1989 at a monthly cost of \$2,375 (\$9.50 per square foot) for the period from December 1, 1986 through June 30, 1987 and at an annual cost of \$29,100 (\$9.70 per square foot) and \$29,850 (\$9.95 per square foot) for each subsequent year. Rental payments will be provided by UW-Madison General Purpose Revenue (GPR) operating budget funds because the NASA grant does not provide funds to cover the cost of space to house the program.

Approval of Minor Projects: UW-Madison

~~Reporting unanimous committee approval of Resolution 3677, Regent Nikolay noted that the first request was a \$95,000 program revenue-funded project for construction of a restroom and service facility adjacent to the West Campus athletic fields to address the problem of lack of sanitary facilities in that area.~~ - R 3677, p. 25

The second project involved remodeling twelve two-bedroom apartments in Eagle Heights Apartment Building 602 at an estimated cost of \$192,000 from program revenues. Long-range plans were being developed to undertake similar work in the remaining fourteen buildings, all of which were between 20 and 30 years old. - Approval of remodeling for bldg. #602, R 3677, p. 25

The third request was for construction of a portion of the Center for Dairy Research at an estimated cost of \$244,000. This would provide a 1,350 net-square-foot deck over the north one-third of the Dairy Processing Laboratory in Babcock Hall. The funding source would be residual funds from the Emergency Farm Credit Act, as provided by the Budget Repair Bill - Approval of deck over Dairy Processing Lab in Babcock Hall, R 3677, p. 25

Upon motion by Regent Nikolay, seconded by Regent Hanson, the following resolution was unanimously adopted by the board.

Resolution 3677: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, the following minor projects be approved and authority granted to plan, bid and construct, at the budgets and from the funding sources indicated:

Budget Land

- ~~(1) West Campus Restroom/Service Facility, \$95,000, Recreational Sports Program Revenue~~
- ~~(2) Eagle Heights Apartment No. 602 Remodeling, and \$192,000, Program Revenue~~
- ~~(3) Center for Dairy Research, \$244,000 Residual Funds, Emergency Farm Credit Act [Section 51m (1985 Wisconsin Act 19) Section 3153 (1) Supplementary Funding for Dairy Center]~~

R 3677, p. 25

State Building Commission Actions

Reporting on actions of the State Building Commission at its October 22 meeting, Vice President Brown advised the committee that the three items related to modules at the Center for Health Sciences, which had been approved by the Board in October, were not on the Commission's agenda because the Division of State Facilities Management staff felt additional time was needed to review the materials. The Med-Flight helicopter hangar project was approved and favorable bids had been received to allow installation of an insulated door and a portion of the heating system. Some additional items were needed and would be requested in Phase 2.

Hospital - Bldg. Commission approval of Med-Flight helicopter hangar project, p. 25

Project Bids

Thirteen projects were bid since the last meeting, with prebid budgets totaling \$2,194,950. Bids for three of these projects totalled \$28,000 over the approved budgets and bids for ten projects totalled \$385,605 below the approved budgets. Thus, the results of the bidding were a net of \$357,605 below the authorized budgets.

Upon motion by Regent Heckrodt, seconded by Regent Clusen, the committee unanimously voted to go into closed session to consider personal histories, as permitted by section 19.85(1)(f), Wis. Stats., with Regents Clusen, Gerrard, Heckrodt and Nikolay voting "Aye".

At 11:00 a.m., the following resolution, moved by Regent Nikolay, and seconded by Regents Knowles, was unanimously adopted on a roll call vote, with Regents Clusen, Fish, Flores, Gerrard, Hanson, Hassett, Heckrodt, Knowles, Nikolay, Schenian, Vattendahl and Weinstein voting "Aye" (12), and no regents voting "No."

Resolution 3678: That the Board of Regents recess into closed session to consider personnel matters, as permitted by s. 19.85(1)(c), Wis. Stats., to consider personal histories, as permitted by s. 19.85(1)(f), Wis. Stats., and to confer with legal counsel, as permitted by s. 19.85(1)(g), Wis. Stats.

*✓ Chancellor*

CLOSED SESSION ACTION

The board arose from closed session at 11:15 a.m., at which time adoption of the following resolution was announced:

Resolution 3679: ~~That, upon the recommendation of the President of the University of Wisconsin System, Bernard C. Cohen be appointed Acting Chancellor of the UW-Madison, effective January 1, 1987, at an annual salary rate of \$88,810.~~

III. REPORT OF ACTIONS TAKEN (MEMOS OF AGREEMENT)

*UW-Superior - Agreement with City of Superior for joint use of Haugsrud Memorial Stadium, Monper. Item A*

A. An agreement has been negotiated between the Board of Regents and the School District of Superior, for joint use of the Haugsrud Memorial Stadium. The agreement is entered into under the authority of Section 66.30(2), Wisconsin Statutes. The agreement covers the one year period from September 24, 1986, and includes a formula for computing the charges to the School District for such use. [This action relates to the Board-approved (July 1986) transfer of ownership of East Boundary Avenue to the City of Superior in exchange for University control of Haugsrud Stadium.] *UW*

*UW-Stevens Point -*

~~B. Contract for Relocation Assistance Services between the Board of Regents and the Redevelopment Authority of Wisconsin Rapids, has been signed by the Assistant Secretary of the Board. The term of the contract is three years, ending September 17, 1989. The fee for services for the three-year period shall not exceed the maximum allowable amount of \$25,000. Service area: UW-Stevens Point~~
