AWT *Complete 1961-1962 Type Catalog*

WE take great pleasure in presenting our 1961-1962 Type Catalog. This unique book was designed to present the greatest assortment and variety of printing types. Within these pages you will find type made of Wood, Brass, Magnesium, Bronze, Steel, Zinc as well as Foundry and Monotype Metal. Nowhere in the world does any firm offer such a variety of printing types.

Typographers, Publishers and Printers throughout the United States are constantly improving the appearance of ads, magazines, books and commercial printing by the use of attractive Stephenson Blake type faces. We are proud to be the sole distributors of the world famous Stephenson Blake & Caslon Letter Foundry Ltd., of England.

This AWT Type Catalog will serve you as an excellent reference book. Please take care of it.

IMPORTANT

- Cap Font Schemes and Lower Case Font Schemes are identical with this exception: Cap Fonts contain punctuation; Lower Case Fonts contain no punctuation.
- Cap Fonts, Lower Case Fonts or Figure Fonts may be purchased separately. Be sure to specify whether Caps, Lower Case or Figures are desired—also size of fonts desired.
- When ordering sorts, mention style, name or number as shown on each type page. We have many styles not shown in this catalog. For style not shown, send clear proofs of each character it is desired to match or at least clear proofs of H, R, S, A, M. Consult Sort Price List above for lowest prices in quantity.

MAGNESIUM HEADLINE TYPE

MAGNESIUM TYPE FOR NEWSPAPER HEADLINES

Available for the first time in the history of printing is a new kind of headline type that will outlast the hardest foundry type by at least 10 to 1, and wood type 15 to 1.

Magnesium large letter type is made to withstand tremendous mat pressure and thousands of mat molding impressions. Made from a magnesium alloy that is as hard as steel.

ADVANTAGES OF MAGNESIUM TYPE

✦ ✦

- STRONG AS STEEL
- ACCURATE TYPE HIGH
- WILL OUTLAST WOOD TYPE 15 TO 1
- MAKES SHARP CLEAN MAT IMPRESSIONS

✦ ✦

A MUST IN EVERY NEWSPAPER PLANT

Magnesium Headline Type will solve the problem usually encountered by newspapers, such as rounded corners, dented letters, uneven type high and shabby headlines. All of this can be immediately eliminated by using Magnesium Headline Type. Due to the remarkable strength of this type as well as its extreme accuracy, your mat impressions will be sharp, clean and uniform.

PRICE COMPARISON

A first impression may indicate that magnesium type is expensive. Actually, this type will pay for itself by outlasting wood and foundry type many times over. In the long run, Magnesium Type is actually more economical considering its lasting qualities. This type is as strong as steel. Magnesium type is now being used by several leading newspapers with very excellent results.

AVAILABLE IN MANY SIZES AND STYLES

Magnesium Headline Type can be made to match the size and style of type you are now using. All wood type faces in this catalog are available in magnesium. For a deposit of $2.00, a sample of magnesium type will be sent for the purpose of inspection. Money will be refunded upon return of the sample.

Send proof of type you want to match.

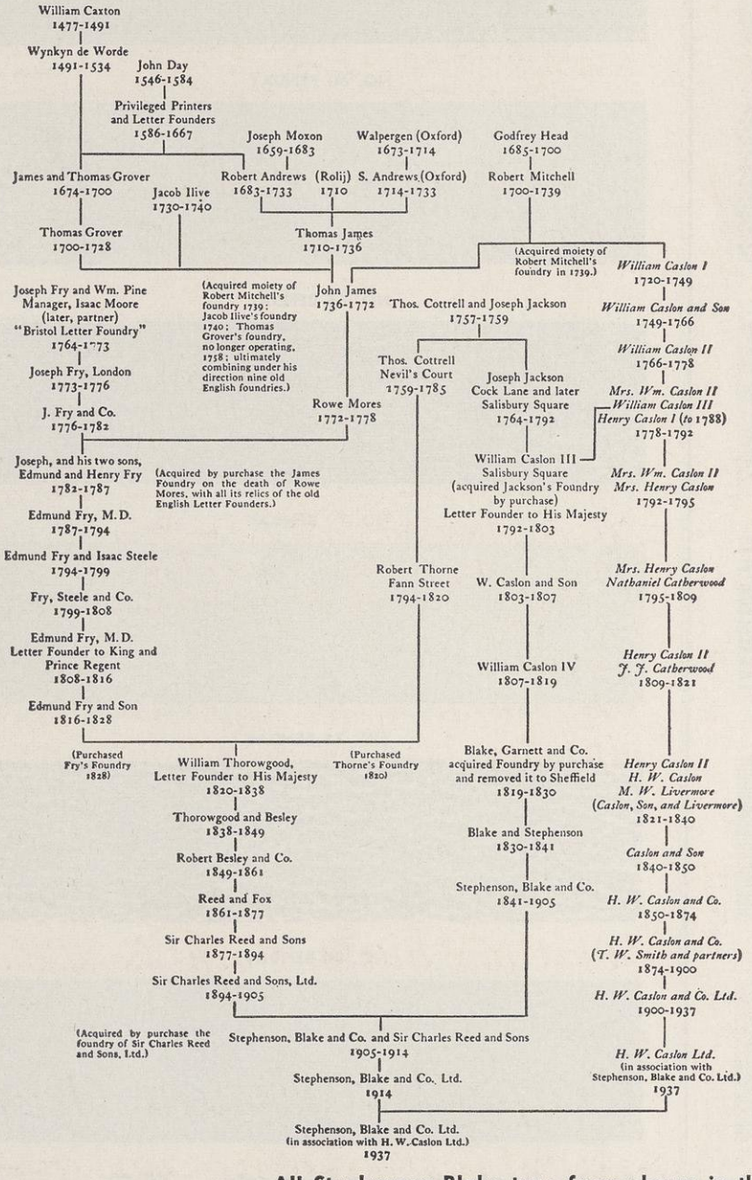
Stephenson, Blake Foundry Type

Ancestry of Stephenson, Blake & Co., Ltd.
Caslon Letter Foundry Ltd.



The Letter Foundry of Stephenson, Blake & Co., Ltd., is bound up with the earliest days of printing. It can be traced back to Wynkyn de Worde, the enterprising pupil of William Caxton, who was casting types in an adjustable mould as early as 1495. He and John Day, a practical Letter Founder of that time, were followed by the famous Polyglot Letter Founders (1637-67) who in their turn were succeeded by James and Thomas Grover in 1674.

Thomas James (1710-1736) and his son John come next and between them they purchased the matrices of nine of the Old English Foundries.

From the forerunner of the James Foundry, Robert Mitchell, 1700-1730, can be traced on one side the famous family of Caslons, whilst on the other that of the Frys. The latter came into the possession of Stephenson, Blake & Company through their purchase in 1905 of Sir Charles Reed & Sons, who had acquired the many matrices and relics of Edmund Fry & Son, 1816-1828, through William Thorowgood, Letter Founder to His Majesty 1820-1838. The Caslon Family split into two parts in 1792 and the immediate ancestors of the Stephenson and Blake Families started in Sheffield in 1819 through the acquisition of the matrices and equipment of William Caslon IV, son of William Caslon III. In 1937 they absorbed the other side of the Caslon Foundry which was trading under the original name.

The present Foundry now has nearly one million matrices, the majority of them produced from the original punches and drawings of such famous men as William Caslon I, Dr. Edmund Fry, Joseph Jackson, Thomas Cottrell, William Thorowgood, Robert Thorne, Eric Gill. Many of the more recent additions have been evolved by the firm's own typographical experts. Only a few selected faces are shown in an abbreviated form in this catalogue. Not only are many more faces available if required, but most of those faces which are shown can be seen in action in displayed booklets on request.

On the technical side Stephenson, Blake & Company have through their long experience built up a world wide reputation. The durability and accuracy of their type is second to none, the alloy formulas having been developed through many years of scientific and practical research, whilst the highest standard of craftsmanship has been constantly maintained.

All Stephenson Blake type faces shown in this catalogue printed from plates.

Unconditional Guarantee

We guarantee all foundry type made by Stephenson, Blake & Co., to be among the best made anywhere in the world. Centuries of scientific research and experience has made Stephenson Blake Foundry type world famous. All type is cast extra deep from a special hard foundry metal formula. The casting is done under tremendous pressure. As a result, the Rockwell hardness is above all other type founders.

CASLON OLD FACE

6 Point 30A-64a

At the beginning of the eighteenth century the famous James Foundry, which contained material produced by De Worde, Day, the London Polyglot Founders, Moxon, and others, was bringing types from Holland, and an account of Thomas James' negotiations there in 1710, when he went to get a supply of material for his foundry, is given in a series of interesting and unconsciously humourous letters in *Rowe Mores' Dissertation.* The Dutch type founders from whom James purchased were Athias Voskens, Cupi, and Rolu. Reed calls our attention to the intimate relations which existed

8 Point 19A-46a

Caslon was joined in his business by his son William in 1742, and they constantly added to their stock of types, both in roman and "learned." It was apropos of this expansion that a rather startling phrase is presented in Ames' *account of their foundry.* "The art," he says, "seems to be carried to its greatest perfection by Mr. William Caslon, and his son

10 Point 23A-50a

The only foundries of repute at that time were those of the Oxford Press, of Grover, and of James. During that year the Society for Promoting Christian Knowledge engaged Caslon to cut a font of Arabic of English size, for a Psalter and a New Testament for Oriental use: ultimately printed respectively in 1725 and 1727. This he carried out, and the story runs that he cut the letters of his own name in pica roman, and printed it at the bottom of a *proof of his Arabic.* This roman letter was so

12 Point 15A-32a

These efforts mark a turning point in type-founding, and this brief outline shows what he stood for in the history of English types. William Caslon was born in the year 1692 at Cradley, Worcestershire, near Halesowen in the county of Shropshire, and his baptism is entered in the *parish register of* Halesowen as "son of George Casselon"

14 Point 12A-27a

The enterprise of William Caslon the most famous of English letter-founders stopped the importation of Dutch types and changed the history of English type cutting for *after his appearance* most type faces used in England were cut by Caslon himself, or consisted

18 Point 8A-18a

Dutch type founders at this period appear to have discovered the secret of the true shape *of roman letters:* their punches were neatly finished, and their matrices well justified to

No. 3088 $6.50

This beautiful electro is one of a series recently revived. Although they were primarily designed for use in Bookwork, many of them will be found extremely useful for Commercial work. Many of the leading typographers have expressed their pleasure at the re-introduction of these works of charm and distinction.

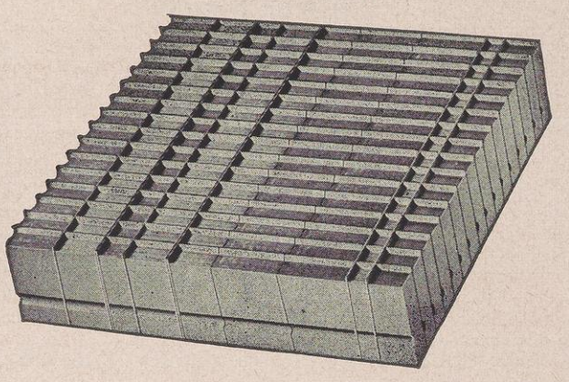
QUAD RULE — LEADERS

FOUNDRY TABULAR QUAD RULE



A practical labor saving way of setting ruled forms. Tabular Quadrules are composed more rapidly than separate materials, resulting in a more accurate and solid form. Cast from extra hard foundry metal by Stephenson Blake.

CAST ON 12 POINT, 18 POINT AND 24 POINT BODIES

12 pt. body	5-6 lb. font	$11.75
18 pt. body	5-6 lb. font	11.25
24 pt. body	5-6 lb. font	10.50

Each font contains 5 to 6 lbs. of material cast in widths of 12 pt., 18 pt., 24 pt., 30 pt., 36 pt., 48 pt., 60 pt. and 72 pt.

PRICES PER FONT

12 pt. body	27½ lb. font	$58.75
18 pt. body	27½ lb. font	56.25
24 pt. body	27½ lb. font	52.50

FOUNDRY TABULAR QUADLEADERS

The Tabular Quadleaders, for dotted rule forms, are identical with the popular Quadrules shown above, except for the face which is designed to print dots.

Cast on 12 Point, 10 Point and 24 Point bodies. Supplied in sets of 5 lbs approx.

Cast on 12, 18, 24, 30, 36, 48, 60 and 72 Points wide bodies.

PRICES PER FONT

12 pt. body	5-6 lb. font	$13.00
18 pt. body	5-6 lb. font	12.00
24 pt. body	5-6 lb. font	11.00

WHILEY BRONZE TYPE

Whiley Bronze Type is now available to the American Printer and Gold Stamper. This fine bronze type is superior to brass type in every respect because of its ability to withstand heat and pressure. Whiley Bronze Type is harder than brass type and is cut extra deep and clean. Each piece of type is cut flush for use in a hand type holder, or machine. Will outlast brass type two to one.

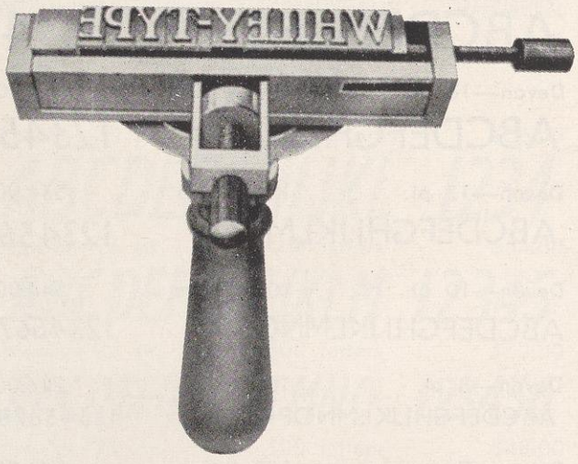
UNIVERSAL TYPE HOLDERS



This unique Type Holder is made of solid brass. There are no springs to weaken or steel sides to rust.

The outstanding features of this Holder are the wide range of adjustment for different point sizes, and the speed of changing from one size to another.

Adjustable from 6 point to 30 point. Made in two sizes: 3 inch and 4 inch.

Price $26.50

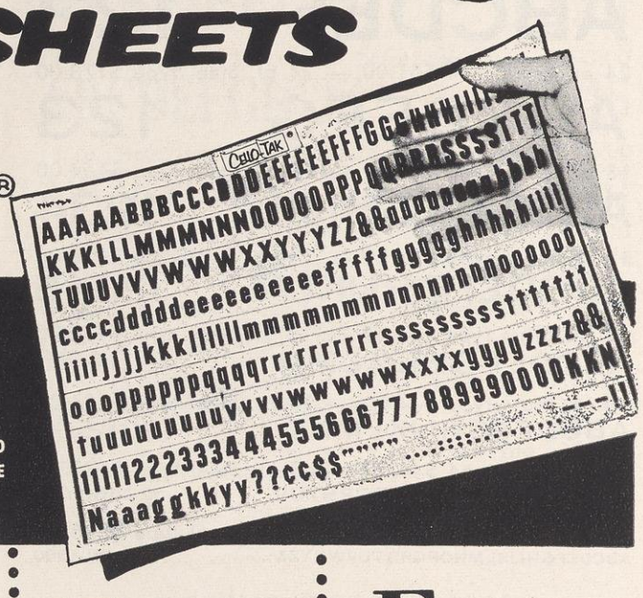
PASTE-UP

ALPHABET SHEETS

BY

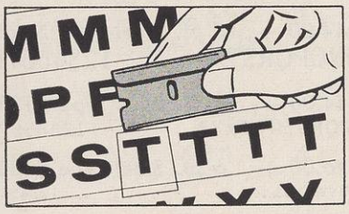
CELLO-TAK®



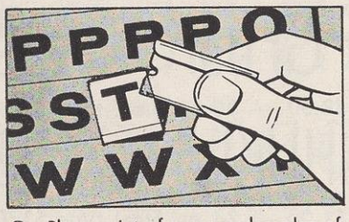
So Easy to Use!

Just 3 Simple Steps

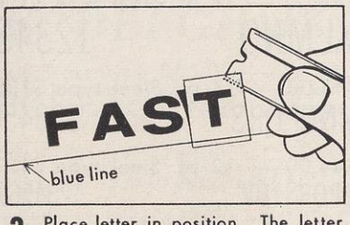
Rule a guide line with blue pencil
(Blue won't show in photography)



1. Cut around selected letters with sharp razor, include guide line. Cut thru acetate only NOT thru backing sheet



2. Place point of razor under edge of cut letter and peel away from the backing sheet. Letter will adhere to razor with slight touch



3. Place letter in position. The letter can be easily shifted as it won't stick until pressure is applied
Rub the letter down for firm contact.

Proceed with additional letters until copy is complete. Cut and peel off guide lines.

YOUR COPY IS NOW READY FOR CAMERA!

It will reproduce perfectly without touch-up

By returning the letters to the backing sheet, you can use **Cello-Tak**

Over and over again!

TRANSFER TYPE

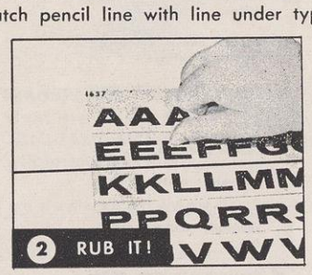
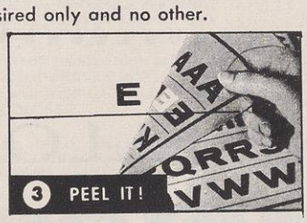
You've never seen anything like this before!

Rule pencil line on art work about ¼ inch below area required. Remove backing and place alphabet sheet on art work. Match pencil line with line under type.



Rub letter with finger nail or burnisher. If letter is too small, a pencil point can be used. Be careful to thoroughly rub letter desired only and no other.



Carefully peel off TRANSFER TYPE sheet, making sure that transfer is complete.

It can be used for...

Posters, Displays, signs, presentations, decals, labels, graphs, charts, boxes, show cards, titles, office door and window lettering, slides, home movie titles, comprehensives, TV cells, diplomas, packaging, acetate overlays, visuals, etc.

It can be applied to...

practically any smooth surface . . . such as: wood, paper, cardboard, glass, metal, etc. and if it does not come in contact with an abrasive, it will last indefinitely.

The finished copy looks and feels like part of the material it is applied to.

ALL STANDARD ENGRAVERS SCREENS and TONES

All patterns are supplied on a micro-thin, matte acetate with adhesive back. This provides for better reproduction plus the fact that its surface will take ink or water color smoothly, without crawling, either by pen, brush or ruling pen.

CELLO-TAK shading films are used in preparing artwork, lettering and unusual effects for **MAPS, GRAPHS, CHARTS, CATALOGS, BROCHURES, MANUALS, TECHNICAL ILLUSTRATIONS** and many other uses. It reproduces perfectly for **ENGRAVING, OFFSET, SILK SCREEN,** etc.

Illustrated patterns are actual size in both black and white and arranged so you can quickly select the screen and percentage of tone you wish. The patterns are so numbered for ease in ordering i.e.:

85-25 indicates a black dot 85 screen with a 25% tone. An 85-25 W indicates a white dot which when applied to a black area, would give an 85-screen with a 75% tone.

65-25 indicates a black dot 65 screen with a 25% tone — when this is reduced half size it will give a 130 screen 25% tone, etc.

CELLO-TAK COLOR-DOT

The new paste-up color acetate sheets in standard 60 line screen tones

60 DIFFERENT TRANSPARENT ACETATE SHEETS comprised of 15 different colors. All printed in standard 60 line screens with 15, 30, 60, and 100% tones. Colors you know the printer can match. All colors matched to standard printing inks including the colors recommended by THE AMERICAN NEWSPAPER PUBLISHERS ASSOCIATION and THE AMERICAN ASSOCIATION OF ADVERTISING AGENCIES ROP inks.

COLOR AREA 12" x 17" ..... $1.25 SHEET

2, 3 and 4 COLOR ⊕

With Cello-Tak COLOR-Dot overlays, you can prepare the separation copy in the same color in which it is to be reproduced. You see the art exactly as it appears in the final printing. Because the overlay is already in a dot screen, the plate can be made in line cut. By using the specified filter, the cost is brought down to about 25% of what it normally would be.

The most economical way to make color separation. This red sheet is clearly transparent and allows you to see through the overlay to work accurately in perfect register. It completely eliminates the use of black opaque for line separation overlays and it photographs as economically as black. No filters or special handling required.

The color is REMOVABLE. Vignetting, scratchboard and special effects are a simple matter of technique.

A must for everyone who works with color.

A complete visual guide. Permits you to test standard color inks on different stocks and accurately shows the effect of printing one color over another.

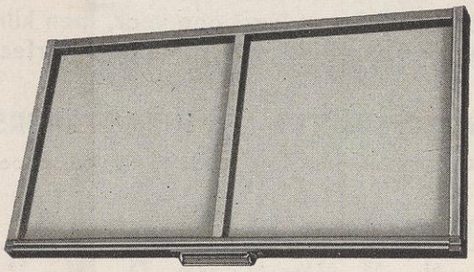
AWT TYPE CASES

Introducing the newest and strongest type cases in the world. The partitions in each case are bonded to the masonite bottom making each case a solid unit. The advantages are obvious as it prevents narrow type from creeping from one section into the other. Each case is equipped with lifetime plastic bottom slides and brass corner reinforcements.



No. 12706 Blank Case

The center bar gives added strength and carrying capacity. Fine for storage of heavy cuts. Each of the two compartments accommodates two quarter-size cases. Price $5.25
