# CONTENTS.

INTRODUCTION.....Page 11

## CHAPTER I.

Information about Khiva.—Cold in Russia.—East Wind.—Russian Authorities.—Count Schouvaloff.—General Milutin.—Christianity and Civilization.—Anglo-Russian Railways in Central Asia.—Preparations for the Journey.—The Sleeping Bag.—Cockle's Pills.—Arms.—Instruments.—Cookery Apparatus..... 17

## CHAPTER II.

Waist-belt for Gold.—A Servant an Incumbrance when Traveling.—Cologne.—Russian Diplomatic Agent.—The *Nord* Newspaper.—The Disraeli Suez Canal Shares.—Baron Reuter.—Strausberg.—Examination of Passports and Sleeping-bag.—Railway Traveling in Russia.—Refreshment-rooms.—Russian Disregard of Time.—Officials easily Suborned.—St. Petersburg.—Sleigh-drivers.—The Russian Piece in any Theatre.—A Russian's Dislike to his Own Language.—His Contempt for any thing purely Russian.—Military Rank at Village Drinking Establishments.—Jonka.—Table-d'hôte.—Fish Soups.—India and Education.—Agitators.—Our Military Attachés very Industrious.—General Kauffmann's Dislike to Publicity.—Mr. Schuyler.—Bismarek and the Russian Language.—All have their Price.—Gold an Open Sesamé.—Letter to General Milutin.—Count Schouvaloff's Brother not in St. Petersburg..... 24

## CHAPTER III.

The Volga frozen.—Navigation stopped in the Caspian.—The Russian Boundary-line in the East.—Reports are rife in Russia.—The Press is gagged.—General Milutin's Regard for my Safety.—Ignorance of Clerks at Railway Station.—Cartridge-case.—Insurgents in Herzegovina.—Subscriptions.—England bent upon Money-making.—Austria allied with England.—The Baltic Provinces.—The Russians' Hatred of Austria and Germany.—Bismarek's Policy.—Mr. Leslie, our Consul in Moscow.. 36

## CHAPTER IV.

Railway Officials.—Unpunctuality of Trains.—Frauds on the Railway Companies.—Old Spirit of Serfdom.—Socialistic and Nihilist Tendencies.—

The Emperor Alexander, and the Religious Influence in Russia.—The Ecclesiastical Hierarchy more Powerful than the Tzar.—Waiting-rooms at Riajsk.—Superstition and Dirt.—Sizeran . . . . . Page 43

#### CHAPTER V.

Twenty Degrees below Zero.—Provisions.—Wolves in the Neighborhood.—Our Troika.—Driving along the Volga.—Price of Corn.—Bridge being built over the River.—The Sterlet.—The Cossacks of the Ural.—How to catch Sturgeon.—The Three Kinds of Caviare. . . . . 48

#### CHAPTER VI.

A Hole in the Ice.—The two Alternatives.—Being Dragged through the Water.—Preparing for the Leap.—Price of Land.—Our First Halting-place.—Winnowing Corn.—Russian Idols. . . . . 54

#### CHAPTER VII.

Pins-and-Needles.—Spoiled Horses.—Driver's Idea of Distance.—The Halting-place.—Our Fellow-travelers.—A Devout but Unwashed Peddler.—A Glorious Sunrise.—A Bargain is a Bargain. . . . . 59

#### CHAPTER VIII.

The Guardian of the Forests.—No Sleigh-bells allowed in the Town.—Hotel Anaeff.—A Coffin-shaped Vehicle.—Law about Libel.—Price of Provisions at Samara.—Rate of Mortality among the Infantine Population.—Podorojnayas, or Road Passports.—The Grumbler's Book.—Difference of Opinion between my Horses and the Driver. . . . . 65

#### CHAPTER IX.

Delayed by a Snow-storm.—Tchin.—Russian Curiosity.—A Conservative Inspector.—General Kryjinovsky.—He tells me that I speak Russian.—The Interest the Paternal Government takes in my Movements.—Russia and China.—A Newly-married Sleigh-driver.—A Camel in Love . 71

#### CHAPTER X.

Sleigh Sickness.—A Happy Family.—Orenburg.—Nipping.—Gas from a Charcoal Stove.—A Professor of Eastern Languages.—The Chief of the Police.—Special Order prohibiting Foreigners from traveling in Turkistan.—Messrs. MacGahan and Schuyler.—In Search of a Servant.—Friendly Interest Russian Officers take in India.—Exhibition of Maps.—Map of Punjaub.—March Routes.—General Bazoulek. . . . . 78

#### CHAPTER XI.

The Ural Cossacks.—Dissenters.—Two Thousand Five Hundred Men Banished.—Exiles Flogged.—A Battue.—Reports about General Kauffmann.—The Tzar's Officers in Turkistan. . . . . 85

## CHAPTER XII.

A Supply of Provisions.—A Grocer's Shop.—An Elastic Piece of Goods.—Schuyler and MacGahan.—A Russian Bank.—Gold and Paper.—Coutts's Circular Notes.—Cox's Letter of Credit.—What is the Paper Value of a Half-imperial?—Russia on the Verge of Bankruptcy.—A Dinner Party.—German Military Railway Carriages.—The Russian Railway Gauge.—Christmas-day.—The Chief of the Police.—An Intelligent Thief-catcher.—A Podorojnaya.—Arrival of the Prisoner.—“Women, Women!—there were two with him” . . . . . Page 91

## CHAPTER XIII.

A Sheep-skin Suit.—Servant Hunting.—A Tartar Dwarf.—Nazar.—Packing the Sleigh.—Kirghiz Camels.—Ural Mountains.—Krasnogorsk.—Bouran.—Off the Track.—Harness broken.—Driver loses his Way.—Nazar Famished.—Keeping Awake under Difficulties.—The Rescue.—Nazar's Culinary Composition.—Benighted Travelers.—The Courier.—An Officer and his Wife.—The Doctor.—Bleeding.—Curiosity.—Tropical Heat or Extreme Cold, which is the Worst to Bear? . . . . . 98

## CHAPTER XIV.

A Start with the Courier.—Tea-money.—A Breakdown.—The Book for Complaints.—Improvement in Scenery.—Trade in Shawls.—An Eastern Tale.—Podgornaya.—A Precipice.—Oura.—The Inn at Orsk.—A Basin and a Table Napkin.—A Servant with a Joyful Countenance.—No Horses at the Stable.—A Man who has Horses for Hire.—You have a Grandmother.—A Blue-eyed Siren. . . . . 107

## CHAPTER XV.

Nomad Tribes.—A Picture of Desolation.—Nazar is worn out.—The Inspector.—Price of Land, Cattle, and Provisions.—The Cattle-pest.—Vaccinating the Animals.—The Kirghiz do not believe in Doctors.—Small-pox.—Strict Orders to Prevent Englishmen traveling in Russian Asia.—The Cost of Post-horses.—Robbing Peter to pay Paul.—Postal Track let out to Contractors.—Fort Karabootaok.—Filthy Stations.—Horses wanted.—Whipping the Order of the Day.—The Emperor Nicholas.—A Snow-storm.—Asleep in the Sleigh.—Frost-bites.—Physical Pain.—Mental Agony.—Cossack Soldiers.—Brothers in Misfortune . . . . . 116

## CHAPTER XVI.

Kashgar.—English Officers drilling the Inhabitants.—Yakoob Bek's Envoys.—Perfidious Albion.—Tashkent.—Commerce with Bokhara.—A Railway to Tashkent.—Irghez.—A Wolf.—Terekli.—The Boundary-line.—How Far does Russia extend?—Uncivil Inspector.—Bottles broken by the Frost.—Passengers' Necks.—Tartar Sleigh-drivers.—A Ruined

Contractor.—Team of Camels.—Head over Heels in the Snow.—The Kirghiz Horses.—A Hundred Miles' Ride.—Two Hundred Miles in Twenty-four Hours (on two Horses).—Two Extraordinary Marches. . . . Page 123

## CHAPTER XVII.

Breakdown of the Sleigh.—Fresh Vehicles.—The "Scavenger's Daughter."—The Sea of Aral.—A Salt Breeze.—Less Snow.—Christmas-day in Russia.—Amorous Females in Search of a Husband.—Supper for Two.—Kasala, or Fort Number One.—The Garrison.—The Aral Fleet.—The Inn of Morozoff.—Comparisons in Dirt.—In Search of a Lodging.—Go with God, Brother.—The Jews' Quarter.—A Commandant. . . . 132

## CHAPTER XVIII.

Hospitality.—An English Engineer Officer at Kasala.—A Russian Scientific Expedition.—Surveying the Oxus.—The Rapidity of the Stream.—A Future Fleet.—Transport and Fishing Barges.—Lady Smokers.—Disturbances in Kokan.—The *Invalide* Newspaper.—Abuse of Yakoob Bek.—Dinner.—Any Thing you ask for.—Cabbage-soup and Cold Mutton.—Colonel Goloff.—His Residence.—An Assembly.—The Beauty and Fashion of Kasala.—Steamers.—Wood instead of Coal.—Great Expense to Government.—When we Fight you Fellows in India.—Zakuski.—Russian Linguists.—System of Teaching Languages.—Public Schools in England.—Latin and Greek, or French and German.—A Foundation, or a Two-storied House. . . . . 139

## CHAPTER XIX.

Ablutions under Difficulties.—The Turkomans.—An Escort of Cossacks.—The Khan and his Executioner.—In Search of Horses.—Provisions for the March.—Snow instead of Water.—Exceptional Winter.—Frozen to Death.—The Unclean Animal.—Kirghiz Amazons.—Ural Cossacks.—Dissenters and the Tzar.—The Town of Kasala and Fever.—Kibitkas.—Mr. MacGahan and the Fair Sex.—A Wife for One Hundred Sheep.—The Matrimonial Lottery.—A Russian Officer.—Liquor is the only Thing worth living for.—Shadows of War. . . . . 147

## CHAPTER XX.

A Priest.—Only one Wife allowed.—Russian Bread.—The Telegraph in Turkistan.—General Milutin might change his Mind.—Horse-dealing.—Five Pounds for a Horse, Saddle and Bridle, etc.—A Guide.—The Expedition to Khiva.—The Russian Troops on the March.—Forty Degrees below Zero, Fahrenheit. . . . . 156

## CHAPTER XXI.

Water Route from Kasala to Petro-Alexandrovsk.—The Irkibai Route.—The Winter-march Route.—General Perovsky.—His Expedition.—Loss

of Nine Thousand Camels.—New-year's-day.—Two out of Ten Cossacks Frozen to Death.—Major Wood and the Survey of the Oxus.—Struggling into the Saddle.—Your Horse is Tough.—Ophthalmia.—Cotton Bales.—The Mohammedans and the Deity.—Fatalism.—The Will of Allah . . . . . Page 162

## CHAPTER XXII.

Camels.—Their Rate of March.—How to divide the Marches.—The Kibitka.—Better be Cold than Blind.—A Tartar Cook.—The Turkoman's Appetite.—A Khivan Caravan.—Main Road goes to Khiva.—The Branch Road to the Fort.—Drinking Tea with the Khivans.—Sheltering the Camels. . . . . 170

## CHAPTER XXIII.

A Lazy Guide.—A Cold Pig.—Insubordination.—How to awake Arabs.—Hot Embers better than Cold Water.—Power of Camels to carry Burdens much Exaggerated.—Quickest Road to a Tartar's Affections.—Sores from Frost-bites. . . . . 176

## CHAPTER XXIV.

The Guide's Retaliation.—Horses' Nostrils stuffed up with Icicles.—Endurance of the Horses.—The Brother-in-law's Horses.—Kalenderhana.—A Sudden Thought.—Stchi.—The Women expose their Faces.—The Kirghiz Poetry.—Sheep.—A Sign of Manhood in the Bridegroom.—Jealous Females.—Feasting.—A Peculiar Pocket.—Games.—Horse-races.—The Girls and their Admirers.—The Prettiest Girl in the Tribe.—A Simple Marriage Ceremony.—But supposing she would not have you? . . . . . 181

## CHAPTER XXV.

Disobedience of Orders.—A Lesson.—A Song about a Sheep.—The Importance of a Traveler gauged in Russia by his Furs, in Asia by his Retinue.—Worn out.—The Pretty Ice-bearer.—Moon-faced Girls.—Seville.—Gitanas.—Buying a Sheep.—"Fat!"—A Beautiful Butcher.—Disillusion.—A Kirghiz Pipe.—Kirghiz Tobacco.—Heart Disease.—Desultory Warfare.—Progress of Russia.—The Sword and the Gibbet.—Christianity and the Bible.—A Filthy Habit.—Snow for Horses instead of Water.—In the Misty Gloom of Awakening Day.—Stretching a Point.—We will go to Kalenderhana.—Ootch Ootkool.—Tan Sooloo.—Tooz.—A Small Salt Lake . . . . . 189

## CHAPTER XXVI.

The Turkoman on his Donkey.—Jana Darya.—A once Fertile Country.—A Barren Waste.—The Grandfather of the Khan.—English Horses and Kirghiz Horses.—Russian Cavalry.—A Sea of Molten Gold.—Silver

Isles.—A Fresh-water Pond.—The Camel-driver is taken Ill.—The Moulahs.—Conjuring the Evil One.—A Dog of an Unbeliever.—The Guide's Fight with the Khivan.—A Revolver is sometimes a Peacemaker.—Deep Chasms.—The Vision of the Kirghiz.—The Kazan-Tor Mountains.—Auriferous Nature of the Soil. . . . . Page 198

## CHAPTER XXVII.

Villages Fortified.—The Turkoman Raids exaggerated.—Peter the Great's Idea about Khiva and India.—Prince Bekovitch.—Careful Preparations for the Expedition.—March across the Ust Urt.—Destruction of the Russians.—Expedition in 1859.—Chikishlar taken.—Russian Statement about the Shah's Recognition of the Tzar's Claim to Ashourade.—Russians Established at Four Points of Turkoman Territory.—The Adayefs.—Forced Contributions.—Dissatisfaction.—Letter from the Khan.—The Khan's Letters to the Emperor and to the Viceroy of the Caucasus.—The Russian Chancellor's Perfect Understanding with Mr. Gladstone's Government.—Count Schouvaloff's Statement to Lord Granville.—Positive Assurances to Parliament about Khiva.—The Force employed by Kauffmann in his Advance upon Khiva.—Capture of Khiva.—Markosoff's Failure.—War Indemnity.—Treatment of the Turkomans.—Russian Treaty with Khiva.—Khivan Territory given to Bokhara. . . . . 207

## CHAPTER XXVIII.

The Guide's Kibitka.—Why not go to Khiva?—Domestic Pressure.—Letter to the Khan.—The Moulah.—Kapitan or Polkovnik.—A Letter in Russian.—Horse-dealing.—A Horse with one Eye.—Canals from the Oxus.—Jougouroo.—The Gray Horse.—A Purchase. . . . . 221

## CHAPTER XXIX.

The Oozek.—The Oxus.—Khivan Taxation.—The Traders.—Khivan Horses.—Salam Aaleikom.—Quarters for the Night.—Hospitality.—A Khivan House.—Melons.—Hindoostan and England.—Railways.—An Iron Horse.—Five Hundred Versts in Twenty-four Hours. . . . . 229

## CHAPTER XXX.

Oogentch.—The Town.—The Bazaar.—A Barber's Shop.—Breakfast with a Khivan Merchant.—India a Mine of Wealth in the Eyes of the Russians in Tashkent.—There are Many Roads to India.—A Fort at Merve.—Shabbatat Canal.—The Bridge.—The Cemetery.—The Tombs.—Fearful Scenes.—The Kazabat Canal.—Shamahoolhoor.—A Sportsman.—A Breech-loader.—“The Khan has now no Soldiers.”. . . . . 236

## CHAPTER XXXI.

The Messenger.—Two Khivan Noblemen.—Minarets.—Orchards.—Mulberry-trees.—Khiva.—The Fortifications.—The Market-place.—The

Gallows.—How Murderers are put to Death.—Capital Punishment rarely inflicted.—The Population.—The Schools.—The Khivan's House.—A Bath in Khiva.—The Bathing Establishment.—The Belt which contained my Gold.—The Moullah.—Captain Abbot.—The Khan's Treasurer.—Distinguished Foreigners.—Ink Frozen.....Page 245

## CHAPTER XXXII.

Breakfast in Khiva.—Decorations or Orders.—How to obtain them in Russia.—The Procession through the Streets.—The Khan's Palace.—Effeminate Boys dressed a Little like Women.—The Treasury.—Khivan Tribute to the Tzar.—The Executioner.—Nazar's Trepidation.—The Reception Hall.—The Audience.—The Khan.—His Description.—The Interpreters.—Englishmen and Germans.—Wyld's Map.—A Compass.—An Infernal Machine.—Afghanistan.—China.—War with Russia.. 253

## CHAPTER XXXIII.

The Present Khan.—The Law of Succession.—The Turkomans and their Tribute.—How the Sovereign administers Justice.—The Prison.—The Schools.—The Moullahs.—Reading, Writing, and the Koran.—How School-masters are remunerated for their Trouble.—Preparations for a Start to Bokhara.—*L'homme propose, mais Dieu dispose.*—A Letter.—It must have cost a Large Sum of Money sending that Telegram.—General Milutin.—Count Schouvaloff's Brother.—The Bazaar.—The Unclean Animal.—A Present from the Khan.—His Hospitality..... 262

## CHAPTER XXXIV.

Departure from Khiva.—The Khan's Brother.—His Rumored Intention of visiting St. Petersburg.—The Governor of Anca.—Lord Northbrooke.—Herat.—Lahore.—Lucknow.—Calcutta.—Our Soldiers in India.—The Cossacks.—Indian Teas.—The Amu Darya.—Lager.—Three Squadrons picketed out in the Open.—The Telegram from H.R.H. the Duke of Cambridge.—Colonel Ivanoff.—Misunderstanding between Major Wood and Colonel Ivanoff.—Atmosphere of Central Asia, and the Colonel's Memory.—Letter to General Kolpakovsky.—Dinner at Ivanoff's.—Russia and England.—Court-martial upon the Turkomans.—Turkistan a Source of Loss to the Exchequer.—Troops at Petro-Alexandrovsk.—Ivanoff would shortly receive his Promotion.—The *Russki Mir* (*Russian World*).—Article on the Large Number of German Officers in the Russian Army.—Marked Antipathy to the Germans.—The New Military System in a Transitory State.—Contempt expressed for Austria.—The Ladies at Petro-Alexandrovsk..... 269

## CHAPTER XXXV.

The Meet.—Bokharan and Kirghiz Sportsmen.—A Club-house.—A Ball.—The Way of Dancing Quadrilles.—Valses.—A Mazurka.—Osbalde-

stone's Feat.—The Khan's Treasurer.—An Envoy from the Emir of Bokhara.—A Russo-German Scientific Expedition.—Nazar and Ivanoff's Servants.—Captain Yanusheff.—Shurahan.....Page 281

#### CHAPTER XXXVI.

The Tarantass.—The Last Adieux.—A Night in the Cold.—The Cossacks: their Arms, Weight, etc.—How they Bivouac.—The Emir of Bokhara.—The Sentry.—His Punishment.—The Kirghiz Postman.—A Race back to Kasala.—Three Hundred and Fifty-nine Miles in Nine Days and Two Hours.—Mutiny of the Uralsk Cossacks.—The Tzarevitch.—A Re-enforcement of 10,000 Men from Orenburg..... 288

#### CHAPTER XXXVII.

The District Governor.—A Cossack Colonel's Funeral.—The Island in the Sea of Aral.—How to join the Amu Darya and Syr Darya Rivers.—My Quarters in Morozoff's Inn.—Letter from General Kolpakovsky.—Changing Money.—English Sovereigns.—A Jew and a Greek.—Sympathy between the Russians and the Greeks.—A Rich Young Kirghiz Widow.—A Boy-husband.—Cossacks marching from Orenburg.—Nazar's Father-in-law.—Dispatches sent from Tashkent to St. Petersburg in Twelve Days..... 298

#### CHAPTER XXXVIII.

An Inquisitive Inspector.—The Fortress Afghan.—The Bath in Uralsk.—No one washed on a Friday.—Chief of the Police.—A Murderer.—His Punishment.—The Ural Cossacks.—Sizeran.—Good-bye to Nazar.. 305

# A RIDE TO KHIVA.

---

## INTRODUCTION.

A LOW room, with but little furniture, and that of the simplest kind; a few telegraphic instruments scattered about here and there in out-of-the-way corners, and mixed up promiscuously with rifles and wooden boxes, some filled with cartridges, others containing provisions for a journey; two or three bottles, labeled "Quinine," on a rickety wooden table; several men of various nationalities all talking at the same time, and a Babel of different languages going on around the writer of this work, who was leaning against the window-sill and glancing from time to time at an old number of the *Pall Mall Gazette*.

The host was a German gentleman, now several thousand miles from the fatherland, which he had been induced to leave by an offer of the post of superintendent and general manager on a long and important line of recently constructed telegraph. A graceful girl, with large dark eyes and pearl-white teeth, but whose olive complexion and Oriental dress showed that she was in no way akin to the fairer beauties of Europe, was engaged in handing round small cups of coffee to the most excited talkers of the party—an Italian, Arab, and Englishman—the former gesticulating wildly in an endeavor to interpret between his two companions, who were evidently not at all in accord about the subject of conversation. A bright sun, its rays flashing down on a broad stream, nearly the color of lapis lazuli, which flowed hard by the dwelling, had raised the temperature of the room to an almost unbearable heat, though it was the month

of February, when in England people are shivering beside their fires, or walking in slush or snow. I was at Khartoom, having just returned from a visit to Colonel Gordon, Sir Samuel Baker's successor, on the White Nile.

It may seem strange thus to commence the narrative of a journey to Central Asia in Central Africa; and yet, had it not been for a remark made by one of the men in the low square room to which I have just referred, in all probability I should never have gone to Khiva. The conversation had lulled; the Arab and Englishman having, by means of the Italian, settled the knotty point as to whether the son of Albion, an officer late in the Khedive's service, was to receive the salary due to him in its entirety or not; the Mohammedan being of opinion that the Christian ought to be paid the amount, subject to a deduction, the native Egyptian officials having always to submit to this system of taxation. However, my English friend did not see it in this light: he had agreed to serve for a certain sum; that sum he must receive; and if the Arab did not pay, why, he would complain to the Khedive. This last remark having been at length translated to the official, the latter succumbed, when my compatriot, the question being settled to his satisfaction, came and looked out of the window by my side.

It was, indeed, a picturesque scene. The Blue Nile, here nearly half a mile from shore to shore, lay smooth and unrippled, like a sea of glass, almost at our feet. On its vast surface were barges and native boats innumerable, while many *nuggers*—the huge sailing-barks of the Arabs, and much used by them in former years when engaged in the slave-trade—were anchored here and there. Gangs of workmen, black as ebony, and stripped to the waist, their well-developed muscles standing out like knotted cords, were busily engaged unloading a freight of ivory bound for Cairo. An enormous *saquieh*, or water-wheel, for irrigation purposes, was slowly revolving, put in motion by the united exertions of a bullock and a donkey, while the wild yells of a negro lad, whose duty it was to goad the animals should they ever flag, mingled strangely with the creaking sounds of the ponderous wood-work.

“I wonder where we shall all be this time next year,” sud-

denly remarked my companion. "God knows," was my answer, "but I do not think I shall try the White Nile again: if I come to Africa another time, I shall select a new line of country." At that moment my eye fell upon a paragraph in the paper. It was to the effect that the Government at St. Petersburg had given an order that no foreigner was to be allowed to travel in Russian Asia, and that an Englishman who had recently attempted a journey in that direction had been turned back by the authorities. I have, unfortunately for my own interests, from my earliest childhood, had what my old nurse used to call a most "contradictorious" spirit, and it suddenly occurred to me, Why not go to Central Asia? "Well, I shall try it," was my remark. "What! Timbuctoo?" said my friend. "No—Central Asia;" and I showed him the paragraph. "You will never get there; they will stop you." "They can if they like, but I don't think they will." And this trifling incident was the first thing which put the idea into my head of again attempting to reach Khiva.

I had intended to go there some few years ago, when the Russians were about to invade the country, and had even started on my journey, meaning to try and find a way into Khiva, *via* Persia and Merve, and, if possible, be with the Khivans at the time of the Russian attack. But this project was never realized, as a typhoid fever, caught as I was rapidly traveling through Italy, laid me for four months on a bed of sickness. My leave thus was spent in a very different manner from that originally intended, and I had, as it is commonly termed, a much closer shave for my life than I believe would ever have been the case even if I had been taken prisoner by the most fanatical Turkomans in Central Asia. But the campaign was over, and there would be no fighting to see. Our statesmen had learned how to appreciate a Russian's promises at their true value. Samarcand had been annexed to the Tzar's dominions, the Black Sea Treaty had been repudiated, and Russian troops were quartered in Khivan territory.\*

According to some politicians, Khiva was a long way from

---

\* See Appendix A—The Russian Advance Eastward.

India, and it really did not signify to England whether Russia annexed it or not. Again, it was urged by others, if Russia does eventually reach our Indian frontier, so much the better for England. We shall then have a civilized nation as a neighbor instead of the barbarous Afghans. A third argument brought forward to defend the action of that Government, which allowed our country's honor to be trifled with at the caprice of a Russian statesman, was that India did not signify so much to us, after all—that she was a very expensive possession, and one which we should very likely have taken from us, but one certainly not worth fighting for; and this was the opinion of some men who were high in office, and who thus lightly valued one of the brightest jewels in the British crown. The majority of our rulers, however, did not trouble their heads much about the matter. “India will last my time,” was the remark; “Russia is still a long way off; and our grandchildren must look after themselves. Sufficient for the day is the evil thereof; and after me the Deluge.” Thus the question was allowed to drop, and the minds of our legislators were speedily engrossed in studying the important question as to which would be the better course to pursue—to allow Englishmen to go into public-houses after eleven o'clock at night, or to send them, thirsty and supperless, to bed.

The following autumn the Carlist war was going on, so I went to Spain. After a time my thoughts were no longer occupied with the state of affairs in Central Asia, and it was only when my friend, in reply to my observation, had observed, “You will never get there; they will stop you,” that it occurred to me to ask what possible reason the Russian Government could have for pursuing a line of policy which, easily understood when adopted by a barbarous nation like China, was a singular one for even a semi-civilized power. It was the more remarkable, as, from the days of Peter the Great, the regenerator of Russia, his successors have invariably encouraged the inhabitants of Western Europe to visit and freely circulate throughout the imperial dominions; and if it were not for the German element, which is so largely diffused throughout the governing classes, Russia would never have arrived at even her

present state of advancement. Of all the Tzars of Muscovy during the last two hundred years, the present emperor is perhaps the sovereign most keenly alive to the advantage of raising the standard of civilization throughout his dominions, by admitting foreigners, particularly Germans, to every office in the empire; and the repressive order to which I have alluded, thus absolutely cutting off Asiatic Russia from almost all contact with the more civilized inhabitants of Europe, was in striking contrast to the line of conduct which had previously characterized his government.

There was, then, something behind the scenes—something that it was desired to hide from the eyes of Europe.

What could it be?

Were the generals in Central Asia treating the inhabitants of the conquered districts so cruelly, that the fear of this reaching the emperor's ears—not through Russian sources, as this would be impossible, but through the medium of a foreign press—was the origin of the order? Or could it be that though no absolute cruelty had been shown to the people in the recently acquired territory, they were being badly governed, and that the bribery and corruption which goes on in Western Russia had taken deeper root when transplanted to the far-off East? Or was it that the authorities in Turkistan, the enormous territory acquired by Russia within the last few years, were afraid of letting Europe know that instead of having raised the tone of morality amidst the inhabitants of Central Asia, the latter had in many instances brought the Russians down to their own level, and that the vices and depraved habits of the East were actually being acquired by some of the conquerors?

Judging from the accounts\* of the few travelers who have succeeded in making a way into this comparatively speaking unknown country, any of the hypotheses above alluded to might have been the origin of the order. But I could not help thinking that there was something more behind the scenes than the mere wish to blind the eyes of Europe to these matters, or to appear as the apostles of Christianity—one of the

---

\* See Appendix B—Report of Mr. Schuyler, etc.

pleas put forward by the Russian Press to defend the system of annexation so steadily persevered in by the Government. There was something beyond all this; and in that something I felt convinced that the interests of Great Britain had a share. Peter the Great's will, or rather wishes, have not been forgotten by his successors, and the proof of it is best shown by looking at a map of Russia as it was in his days and as it now exists; while in a recent staff map of Turkistan (1875), the compiler has not even dotted in the boundary-line from N. lat.  $39^{\circ} 2'$ , E. long.  $69^{\circ} 38'$ , to N. lat.  $44^{\circ} 40'$ , E. long.  $79^{\circ} 49\frac{3}{4}'$ : thus showing that the boundary-line, in his opinion, has not yet been reached. When will that limit be attained? When is the Russian advance to be barred, and where—by the Himalayas, or by the Indian Ocean? This is a question, not for our grandchildren, nor our children, but for ourselves.

## CHAPTER I.

Information about Khiva.—Cold in Russia.—East Wind.—Russian Authorities.—Count Schouvaloff.—General Milutin.—Christianity and Civilization.—Anglo-Russian Railways in Central Asia.—Preparations for the Journey.—The Sleeping Bag.—Cockle's Pills.—Arms.—Instruments.—Cookery Apparatus.

HAVING once resolved to go to Central Asia, the next question was how to execute my intention, and, on returning to England from Africa, I eagerly read every book that could be found, and which seemed likely to give any information about the country which I proposed to visit. Vambéry's "Travels," Abbott's "From Herat to Khiva," and MacGahan's "Campaigning on the Oxus," were each in turn studied, and, judging by the difficulties that the gallant correspondent of the *New York Herald* had to overcome before he carried his project of reaching Khiva into execution, I felt convinced that the task I had laid out for myself was any thing but an easy one.

The time of year in which I should have to attempt the journey was another obstacle to the undertaking, for my leave of absence from my regiment would only commence in December. I had already, in previous journeys through Russia, discovered what the term "cold" really means in that country, and, judging from the weather experienced by Captain Abbott when traveling in the month of March, in a latitude a good deal to the south of that which seemed to me the most practicable, I felt convinced that careful preparations must be made for a ride through the steppes in mid-winter, or that I should inevitably be frozen. The cold of the Kirghiz desert is a thing unknown, I believe, in any other part of the world, or even in the arctic regions. An enormous expanse of flat country, extending for hundreds of miles, and devoid of every thing save snow and salt lakes, and here and there *saksaool*, a species of

bramble-tree, would have to be traversed on horseback ere Khiva could be reached. The winds in those parts of Asia are unknown to the inhabitants of Europe, who, when they grumble at the so-called east wind, can little imagine what that wind is like in those countries which lie exposed to the full fury of its first onslaught. For there you meet with no warm ocean to mollify its rigor, no trees, no rising land, no hills or mountains to check it in its course, and it blows on uninterruptedly over a vast snow and salt covered track, until, absorbing the saline matter, it cuts the faces of those exposed to its gusts with a sensation more like the application of the edge of a razor than any thing else to which it can be likened.

There was, besides this, something else to be taken into consideration. I was well aware that no assistance could be expected from the Russian authorities, who might not content themselves by indirectly throwing obstacles in my way, but might even stop me by sheer force if they found all other ways fail. The account of the prohibitory order which I had seen published in the *Pall Mall Gazette* was, I had every reason to believe, correct; and should I not find, after crossing the Ural River, and entering Asia, that my long sleigh journey had been all to no purpose, and have to retrace my steps through European Russia? These were my first impressions on arriving in England; but on talking the matter over with some Russians of my acquaintance, they assured me that I was entirely mistaken; that, on the contrary, the authorities at St. Petersburg would readily permit English officers to travel in Central Asia; and it was observed that the order to which I had alluded referred only to merchants or people who tried to smuggle contraband goods into the recently annexed Khanates.

A few months later I had the honor of making the acquaintance of his Excellency Count Schouvaloff, the Russian ambassador in London, and formerly the head of the secret police at St. Petersburg. He was excessively kind, and promised to do what he could to further my plans; but in an answer to a straightforward question as to whether I should be permitted to travel in Russian Asia or not, his reply was, "My dear sir, that is a subject about which I can not give you any answer;

but on arriving at St. Petersburg the authorities there will be able to afford you every possible information." It was a diplomatic answer—one which bound the count to nothing, and I went away charmed with the tact and affability of the Russian ambassador. Apparently there was nothing to be learned officially from Russian sources; but unofficially, and one by one, many little bits of information crept out. I now first learned that General Milutin, the Minister of War at St. Petersburg, was personally very opposed to the idea of an English officer traveling in Central Asia, particularly in that part which lies between the boundaries of British India and Russia. According to him, a Russian traveler, a Mr. Pachino, had not been well treated by the authorities in India, and this gentleman had not been permitted to enter Afghanistan; and, in consequence, General Milutin did not see why he should allow an Englishman to do what was denied to a Russian subject.

Another peculiarity, which I remarked in several Russians whose acquaintance I at that time had the honor of making, it may here be not out of place to mention. This was their desire to impress upon my mind the great advantage it would be for England to have a civilized neighbor like Russia on her Indian frontier; and when I did not take the trouble to dissent from their views—for it is a waste of breath to argue with Russians about this question—how eager they were for me to impress their line of thought upon the circle of people with whom I was the more immediately connected. Of course, the arguments brought forward were based upon purely philanthropic motives, upon Christianity and civilization. They said that the two great powers ought to go together hand in glove; that there ought to be railways all through Asia, formed by Anglo-Russian companies; that Russia and England had every sympathy in common which should unite them; that they both hated Germany and loved France; that England and Russia could conquer the world, and so on.

It was a line of reasoning delightfully Russian; and though I was not so rude as to differ from my would-be persuaders, and lent an attentive ear to all their eloquence, I could not help thinking that the mutual sympathy between England and

Germany is much greater than that between England and Russia; that the Greek faith, as practiced by the lower orders in Russia, is pure paganism in comparison with the Protestant religion which exists in Prussia and Great Britain; that Germany and Great Britain are natural allies against Russia, or any other power aggressively disposed toward them; that Germans and Englishmen who are well acquainted with Russia, understand by the term "Russian civilization" something diametrically opposite to what is attributed to it by those people who form their ideas of Muscovite progress from the few Russians whom they meet abroad; and that the Honduras Railway would be a paying concern to its English share-holders in comparison with an Anglo-Russian line, to be constructed in Central Asia with English capital and Russian directors.

The time was wearing on, November was drawing to a close, my leave of absence would begin on the first of the following month, and on that day I must commence my travels. Preparations were rapidly made. Under the advice of Captain Allen Young, of arctic fame, I ordered a huge water-proof, and, consequently, air-proof, bag of prepared sail-cloth. The bag was seven feet and a half long, and ten feet round. A large aperture was left on one side, and the traveler could thus take up his quarters inside, and sleep well protected from the cold winds. The bag would also be useful in many other ways; and I found it of great convenience for every purpose save the one for which it was originally intended. The manufacturer, not calculating on the enormous dimensions an individual assumes when enveloped in furs, had not made the aperture large enough, and the consequence was that the difficulties, when I attempted to take a header into the recess of my sleeping-apartment, were almost insurmountable; and only on one occasion, and when clad somewhat more lightly than usual, I succeeded in effecting an entrance. Four pairs of the thickest Scotch fishing stockings were also ordered, and jerseys and flannel shirts of a texture to which people in this country are but little accustomed. Then came a suit of clothes, made by Messrs. Kino, of Regent Street, and in which they assured me it would be impossible to feel cold. The clothes, I must admit,

were exceptionally well made, and well suited to be worn under a sheep-skin attire; but I can not wish my worst enemy a greater punishment than forcing him to sleep out on the steppes in winter-time with mere cloth attire, no matter how thick. Fur or skins of some kind must be worn, or, without this precaution, the traveler, should he once close his eyes, will undergo a great risk of never opening them again. Two pairs of boots lined with fur were also taken; and for physic—with which it is as well to be supplied when traveling in out-of-the-way places—some quinine, and Cockle's pills, the latter a most invaluable medicine, and one which I have used on the natives of Central Africa with the greatest possible success. In fact, the marvelous effects produced upon the mind and body of an Arab sheik, who was impervious to all native medicines, when I administered to him five Cockle's pills, will never fade from my memory; and a friend of mine, who passed through the same district many months afterward, informed me that my fame as a "medicine-man" had not died out, but that the marvelous cure was even then a theme of conversation in the bazaar.

So far as I could learn from the books which related to Central Asia, there would be but little game, and nothing particular in the shape of sport; so I determined not to take a rifle, when the cartridges would have considerably added to the weight of my luggage, the prime object being to travel as light as possible. However, as it was as well to have some sort of a gun in the event of falling in with wild fowl, which I had been told abounded in some places, I took a favorite old No. 12 small-bore, and some cartridges made up with No. 5 shot and ball, in the event of falling in with any bears or wolves; while a regulation revolver, with about twenty cartridges, made up my defensive arsenal in the event of an attack from the Turkomans.

The next thing to be thought of was a cooking apparatus; and if I had taken the advice of many kind friends, I should have traveled with a *batterie de cuisine* sufficient for the wants of M. Soyer himself. But canteens could not be thought of for a moment, on account of the extra weight, so I limited myself to two soldiers' mess tins; and admirable little utensils

they are too, whether for cooking over a spirit-lamp or on a fire, and far superior to any of the more costly and cumbersome articles especially invented to get out of order and perplex the traveler. A trooper's hold-all, with its accompanying knife, fork, and spoon, completed my kit; and with a thermometer, barometer, and pocket sextant by way of instruments, I was ready to start. Even this amount of luggage was much more than was desirable; and when placing the baggage for my journey—consisting of the sleeping-sack, a pair of saddlebags, railway bag, and gun—into the scales, I found that it weighed exactly eighty-five pounds. An officer in the Footguards, my friend K——, wished very much to accompany me in my journey; and he would have been a most cheery and agreeable companion, as he was accustomed to travel, and capable of roughing it to any amount; but as he was ignorant of Russian, and by this time I was thoroughly aware of the difficulties that would most likely be thrown in my way, and of the little chance I had of getting to Khiva alone, I was compelled at the last moment, to my great reluctance, to decline his proposal.\*

The day before my departure from London I received a very courteous letter from Count Schouvaloff, in which he said that, as I was provided with letters to General Milutin, the Russian Minister of War, and to General Kauffmann, the commander-in-chief of the forces in the Government of Turkistan, it only remained for him to give me a letter of introduction to his brother at St. Petersburg, and to wish me godspeed on my journey. He also added that he had sent off a dispatch to the Minister of Foreign Affairs at St. Petersburg, asking him to do every thing he could to aid me in my proposed journey. And so, at the last moment, I began to flatter myself things looked a little brighter; but some observations from Mr. MacGahan, whose acquaintance I was so fortunate as to make at the house of a mutual friend, a few evenings previous to my departure, made me

---

\* K—— was determined not to be idle during his leave, and, as he could not go with me to Russia, went, by way of a change, to Abyssinia, where, I believe, he had some interesting adventures.

still rather doubtful of success. "You will get on very well as far as Fort Number One," had been the remark; "and then you will have to pull yourself together and make your rush, and again in the same way when you leave Russian territory for India; but it is to be done, though the odds are rather against you." He had also given me some valuable hints about acquiring a knowledge of the Tartar language, and traveling as light as possible.\*

---

\* To Mr. MacGahan, and subsequently to Mr. Schuyler, First Secretary at the Russian Embassy at St. Petersburg, I am greatly indebted for much valuable information with reference to my route.

## CHAPTER II.

Waist-belt for Gold.—A Servant an Incumbrance when Traveling.—Cologne.—Russian Diplomatic Agent.—The *Nord* Newspaper.—The Disraeli Suez Canal Shares.—Baron Reuter.—Strausberg.—Examination of Passports and Sleeping-bag.—Railway Traveling in Russia.—Refreshment-rooms.—Russian Disregard of Time.—Officials easily Suborned.—St. Petersburg.—Sleigh-drivers.—The Russian Piece in any Theatre.—A Russian's Dislike to his Own Language.—His Contempt for any thing purely Russian.—Military Rank at Village Drinking Establishments.—Jonka.—Table-d'hôte.—Fish Soups.—India and Education.—Agitators.—Our Military Attachés very Industrious.—General Kauffmann's Dislike to Publicity.—Mr. Schuyler.—Bismarck and the Russian Language.—All have their Price.—Gold an Open Sesamé.—Letter to General Milutin.—Count Schouvaloff's Brother not in St. Petersburg.

THE 30th of November, 1875, broke cold and damp. It was one of those disagreeable days that depress and lower the barometer of the human spirit to a semi-despondent level; but I had finished all my regimental duty, and having provided myself at Thornhill's with a strong waist-belt to contain the amount of gold I thought necessary for my journey, and which, by-the-way, was a most uncomfortable bed-fellow, I drove to the Victoria Station, to start by the night mail.

I had determined not to take a servant—they are generally in the way, unless they know something of the country traveled in: under other conditions, master and man have to change places. I must say, however, that I was sorry to leave behind my faithful fellow. He had been with me in several parts of the world, and was able to make himself understood by signs and the few broken words of the language he might pick up, in a manner to me quite incomprehensible; but Russian *moujiki* (peasants) and Tartar camel-drivers would have been too much even for him. Besides, he was a married man, and I did not wish to be saddled with his wife and family in the event of a disaster.

Our iron horse galloped merrily over the distance between London and Dover. The passage to Ostend was a favorable one; and the following afternoon at 4 P.M. I found myself once again in the familiar old station of Cologne.

Two or three hours' delay waiting for the night express to Berlin, and once more *en route*. The capital of the empire was reached the following morning, but I had no time to stop, much as I should have liked to visit the many well-loved old nooks and corners familiar to me in my student days. As it was, I could barely catch the train for St. Petersburg, when I found the carriages very much overcrowded, and with difficulty secured a place.

Two Russian gentlemen were in the same carriage; and in the course of conversation I found that one had been employed in the diplomatic service in Italy. He said that he had suddenly received a telegram from Prince Gortschakoff, at that time at Berlin, requiring his presence there immediately. The clothes worn in Italy, even in winter, are not necessarily of the warmest texture; and my fellow-traveler, who, by-the-way, looked in very delicate health, found his journey northward any thing but a pleasant one. But his troubles, on arriving at the capital, were only beginning, for the prince said to him, "I am going to St. Petersburg, and will give you your orders there: leave by the next train." It was very cold weather; and the unfortunate secretary, unprovided with the necessary wraps, was miserable at the way the fates had served him. He was an Anglophobist, and much chuckled as he told his companion that a violent article against England had appeared in the *Nord*—a paper which, according to him, is inspired by the ministry at St. Petersburg—with reference to Mr. Disraeli having purchased the Viceroy of Egypt's Suez Canal shares.

"The English are a great nation, but very mad," observed another Russian. "They are sufficiently sane when their interests are concerned," said the secretary, "for they have bought these Suez shares, which they will make pay, financially as well as politically speaking. Two years ago they nearly inveigled the Shah into a treaty with Baron Reuter, and that would have given them the control of the whole of Persia; but, thank

goodness, our people checkmated them there, and I do not think England will try that game on again just at present; as to Strausberg, he is a joke to that fellow, Reuter. A nice business the latter would have made out of it, and the English too, for the matter of that."

The day wore away, and the night came on cold and bleak, as we rattled northward on our course. The secretary sat shivering in the corner, and the rest of us, enveloped in furs, sought the arms of Morpheus. It was an unusual thing to experience such cold in a North German railway-carriage, as generally they are well warmed by means of stoves, and the more frequent fault to find with them is overheating and stuffiness; but, for some reason or other, the stupid attendant had let the fire out, and the result was any thing but an agreeable night. Presently we reached the boundary limit between Germany and Russia, when, a few minutes later, I found myself, with the rest of the passengers, in a large high hall, set aside for the examination of luggage and inspection of passports.

It was not a pleasant thing to be kept waiting in a cold room for at least three-quarters of an hour, while some spectacled officials suspiciously conned each passport. The Russian secretary himself was not at all impressed with the wisdom of his Government in still adhering to this system, which is so especially invented to annoy travelers. "What nonsense it is!" he remarked; "the greater scoundrel a man is, the greater certainty of his passport being in the most perfect order. Whenever I go to France, and am asked for my passport, I avoid the difficulty by saying, 'Je suis Anglais; no passport;' and the officials, taking me for an Englishman, do not bother me, or make me show it."

I was myself a little uneasy about my own pass, as it was one which had done service about five years previously, and I had forgotten to send it to the Russian Consulate previous to my departure from London. However, after looking at the document for some time, and scrutinizing its owner very carefully, the official returned it to me.

The customs examination was easily got through, and the only part of my luggage which puzzled the *douane* officer was

the sleeping-bag. He smelled it suspiciously, the water-proof cloth having a strong odor. "What is it for?" "To sleep in." He put his nose down again, and, apparently uncertain in his own mind as to what course to pursue, called for another official, who desired me to unroll it. "And you sleep in that big bag?" was the question. "Yes." "What extraordinary people the English are!" observed the man who had inspected my passport, and, *sotto voce*, "He must be mad," when the other by-standers drew back a little, thinking that possibly I was dangerous as well.

Forward again, in a most commodious and well-arranged carriage—well warmed, fairly lighted, and containing every convenience the traveler could require during the journey. The Russian trains are constructed on the American principle, and you can walk from one end to the other, if you like, while two attendants in each carriage supply every want of the traveler. I must say that in this respect railway traveling in Russia is far better arranged than in England, and the refreshment-rooms are unequaled by any in this country. Every thing you ask for is ready at a moment's notice; the dishes are hot and good, while the attendance and the bill—a very important adjunct to a traveler's pleasure—leave nothing to be desired, the charges being exceedingly moderate. But, with all these advantages, there is one great drawback, and that is the slowness of the pace, which, when traveling through a vast country like Russia, is a matter of considerable importance. Extreme cold would seem to have the same effect upon the human mind as extreme heat; and the indifference to time which characterizes the Russian is only equaled by the low estimation in which it is held by the Spaniard; while the word *zavtra* and *mañana*, the "tomorrow" in the two languages, is used as frequently by the Muscovite as by the inhabitant of the Peninsula. But there is something else which may account for the slowness of pace of the trains in Russia, and that is the careless way in which the lines have been constructed. The Government inspectors, by all accounts, are easily suborned. The golden metal has charms for them greater than the lives of their countrymen; and if the engines were to attempt even a moderate rate of speed, the

sleepers and rails would inevitably give way. Such was the explanation given me by a fellow-traveler, when referring to this subject.

St. Petersburg was at last reached, the journey having been accomplished in three days and a half from Charing Cross. I had but little delay in obtaining my luggage, for in this respect things are well managed in the Russian stations, and I shortly found myself comfortably ensconced in Demout's Hotel. The day was still young; and determining to take advantage of the early hour, I took a sleigh and proceeded to call upon General Milutin, the Minister of War.

The foreigner unaccustomed to St. Petersburg is at first a little astonished at the way he is beset, on leaving the portico of his hotel, by the numerous sleigh-drivers who are congregated outside. "Where to? where to?" they cry: when, hearing the stranger stammer out the name of the street, and the name of the person to whom the house belongs—for in Russia, as a rule, houses are known by the name of their proprietors, and are not numbered, as elsewhere—a brisk competition ensues. "I will take you for a rouble, sir. Look what a beautiful sleigh I have, and what a fine trotting-horse!" "He knows nothing about it!" shouts another; "I will take the gentleman for sixty copecks!" and his face assumes an expression as if by his offer he had conferred on you a favor unequalled in the annals of sleigh-drivers. The other fellows then wait a few seconds to see if the stranger will succumb to the offer; but if not, and you walk forward two or three steps, the drivers change their tone from sixty to forty, and from that to twenty copecks (about sixpence in English money), this being about the value of an average "course" in St. Petersburg, for there is no established tariff; and the result is that foreigners are more robbed by the sleigh-drivers in that city than even by our London cabmen.

General Milutin was not at home, so I was informed by a tall Swiss, the hall porter, when, leaving the letter of introduction and my card, I returned to the hotel. There was no Russian piece going on in any of the theatres that evening, although there were French and German plays, besides an Italian

opera. In St. Petersburg there is one capital Russian theatre, the Alexandrensky, and also a national opera-house, the Marinsky; but the Alexandrensky is often used for German plays, and thus it sometimes occurs, as on the day when I arrived, that there is no performance going on in the national idiom in any theatre in the capital; but, after all, this can be easily explained by the intense dislike many apparently well-educated Russians have to their own language. I have often heard them say, "It does very well for the *moujiki* [peasants], but the language for society is French;" and these remarks have been uttered by Russians from the provinces of the interior, whose knowledge of French was so imperfect, and their accent so atrocious, that it jarred on the ear when listening to them. There is no doubt that there is an intense contempt among the higher circles throughout the empire for every thing purely Russian: it must be foreign, to be eagerly sought after. This weakness on the part of the well-to-do classes has a very discouraging effect on the industries of the nation. It would rather surprise people in this country if an Englishman were to address his wife in a foreign language, and if the correspondence between members of the same family were never carried on in English; or should the daughter of the house be unable to write a letter, save in French, without making the most outrageous faults in grammar as well as spelling. But this surprises no one in Russia. There is not that love of every thing national amidst the higher classes; and to study the real Russ you must not visit St. Petersburg; for there the native is so venerated over with foreign polish, that it is impossible to discover what exists below the surface; and a French fencing-master is infinitely preferred to a Russian Socrates. The present emperor, it is said, has done every thing in his power to check this weakness on the part of his subjects, for he is a far-seeing man, and the empire owes more to his beneficent rule than to any of his predecessors; but a deep-rooted custom can not be ousted in one generation, and it will take many years to teach the inhabitants of the capital that this running after every thing foreign, to the detriment of national enterprise, will never add to the prosperity of Russia. Another influence which

has a deterrent effect on the development of the commercial and agricultural interest throughout the country is the high importance given to military rank: as a Russian country gentleman once bitterly remarked to me, "In my country a man is nobody unless he eats the bread of the State. He must wear a uniform, he must have a *tchin*—military rank—or its equivalent, should he serve in the civil service. He must be a consumer instead of a producer; and then, and then alone, is he a man to be respected and looked up to." The result is, that all the energies of the nation are expended in what will never bring grist to the mill; but, if this system be persisted in, it will eventually cause a national bankruptcy.

As I was reading a Russian newspaper that evening, I came upon a short paragraph, which so eminently characterizes the weakness for strong liquors which prevails throughout the empire that I am tempted to reproduce it.

It appeared that in a certain large village a spirit merchant wished to open a drinking establishment; to do this, he had to obtain the consent of the inhabitants. It was determined to put up to auction the right of establishing a house of that sort, which fetched the sum of 3500 rubles; and this, divided among the population, made exactly  $7\frac{1}{2}$  rubles a head.

The money was paid, and, according to the correspondent, the proprietor must have got back the amount he had given in the first three days, as unusual drunkenness prevailed during all that time, when, the money being spent, things once more took their usual course.

Drunkenness is not looked upon with nearly the same feelings of abhorrence in Russia as in England, among the military class especially; and an officer who can drink all his comrades under the table is looked upon as a hero. The climate undoubtedly has a great deal to do with these ovations to Bacchus; and when the thermometer is below zero, the body requires much more caloric, both externally as well as internally, than in more temperate zones.

The Russian officers, by way of thoroughly keeping out the cold, have invented a singular drink. They call it *jonka*. After dinner, and when Champagne, claret, and liquors have been

drunk to an extent of which people in this country have no conception, a huge silver bowl is produced; brandy, rum, spirits, and wines of all kinds are poured in promiscuously; apples and pears, with all the fruits on the dessert-table, are cut up and tossed into the liquid, which is then set on fire, and when in this state the flaming mixture is poured out into large goblets, which are handed round the table. It is a high trial if the drinking-bout has been persisted in for several hours, and it is one calculated to try the stomachs as well as the heads of the guests; but we are in Russia, *et à la guerre comme à la guerre*; and until this excess of drinking goes somewhat out of fashion with the upper circles, we can not be surprised if the lower ones remain equally addicted to it.

That evening I dined at the *table-d'hôte*, a comparatively speaking new institution in Russia, where to dine *à la carte* is generally preferred. For any one not accustomed to them, Russian dinners are somewhat remarkable. Previously to sitting down at table, the guests are taken to a side buffet; here in profusion are sardines, caviare pressed and fresh—a delicacy unknown in this country, where the so-called fresh caviare is invariably a little salted—anchovies, and every conceivable relish; cigarettes are now smoked, a glass or so of liquor drunk, and the party adjourns to the dinner-table. Here, with the soup, little *patés*, made of meat and rice, are eaten in lieu of bread. The soups, particularly those made of fish, such as the sterlet, are excellent, and well suited to a Russian climate, where an enormous quantity of nitrogen must be consumed to keep up the animal heat.

I found myself seated next to a Russian officer, a general in the Engineers, and had a long conversation with him about India. "You English," he said, "are always thinking that we want India; but you are apt to forget one equally important point, which is, that some day the natives of that country may wish to govern themselves. I study the course of events in India very closely; and what do I see? why, that you are doing every thing you possibly can to teach the inhabitants their own strength. You establish schools; you educate the people; they read your language—many of them even your news-

papers; and the leading men know what is going on in Europe just as well as you yourselves. But the day will come when some agitators will set these thinking masses in motion; and then what force have you to oppose to them? If ever there was a nation determined to commit suicide, it is England. She holds India, as she herself allows, by the force of arms; and yet she is doing every thing in her power to induce the conquered country to throw off the yoke.

“But do you not think,” I observed, “that when our frontiers touch, as your statesmen wish, there will be more agitators than even now in India?”

He did not reply to this question, but lighted a cigarette and turned the conversation. There was a great deal of reason undoubtedly in what he had urged. However, there is one argument in favor of further education in India, which is, that the better educated the natives of India become, the greater probability of their seeing that their own interests are far more likely to be cared for under a British than a Russian rule. But this still leaves open the question of whether they might not prefer to govern themselves, which undoubtedly will some day be the case.

I remember once meeting a highly educated Hindoo on board a Peninsular and Oriental steamer, and having a long conversation with him. He had traveled in England, where he had been extremely well received; and on my asking how the English were liked in India, he simply replied, “You are a great nation, and no people are more devoted to their own institutions than the English. How should you like a foreign ruler to establish himself in your country?”

The following day I called at the British Embassy, but there was no one at home save the military attaché, and he was so engaged in having a lesson that he had no time to see me. Later on in the day I met some old friends, and conversed with them about my proposed journey. They all took a pessimist view of the case. “Get to Khiva!” said one man. “You might as well try to get to the moon. The Russians will not openly stop you, but they will put the screw upon our own Foreign Office, and force the latter to do it. Why, the Rus-

sians are as suspicious as Orientals, and they will imagine you are sent by your Government to stir up the Khivans. They will never believe that an officer, for the mere sake of travel, and at his own expense, would go to Khiva." "Why," observed another, "only a short time ago an officer who was about to start for Turkistan wanted to take an English servant with him. The man, I believe, had been a private in the Second Life-guards: somehow or other, this got to the ears of a Russian general. He sent for the servant, and said, 'Did you ever correspond for the *Times*?' The man, who looked upon the question as one put to prove his capabilities, answered, 'Never did, sir; but have no doubt I could, if you wish it.' 'I tell you what it is,' said the general, 'if I catch you writing a line to England about what you see when you are with us, I will have you hanged.' The man became alarmed. He could clean a horse, and his ideas did not soar above that calling; but to be told that he was to be hanged if he wrote a letter! Why, he might want to write home to his friends! And he went to some authorities at St. Petersburg, and asked them their advice. The result was, he started with his master, but only got as far as Kazan; for, on arriving at that point, an order was sent to have him turned back."

The Russian soldiers, it seems, are not very particular what they do in Central Asia, and General Kauffmann greatly dislikes publicity. Judging from accounts subsequently given me by eye-witnesses of what has taken place, I can not help thinking that the general is wise in his generation.

In the afternoon I called upon Mr. Schuyler, the United States Secretary of Legation at St. Petersburg. He had been to Tashkent and Bokhara, having traveled as far as Fort Number One with Mr. MacGahan, the energetic correspondent of the *New York Herald*. Mr. Schuyler had been able to gather a great deal of most valuable information in the course of his travels. He is the only diplomate the Russians have ever permitted to visit their Eastern possessions, and is a very keen observer, besides being a thorough master of the Russian language. He had been able to dive considerably below the surface, in his endeavors to master the state of affairs in Turkis-

tan. His report was forwarded to Washington, and subsequently published in a blue-book; the authorities in Turkistan not being very pleased at the way he exposed their administration. Mr. Schuyler gave me some very valuable hints as to what I should require, and was himself engaged in writing a book on his travels. From the first day of his arrival at St. Petersburg he had studied hard to master the Russian language, probably feeling that a diplomate in a land where he can not read the newspapers, or converse with all classes of society, if necessary, is rather like a fish out of water, and receiving a salary which he has not fairly earned.

The German chancellor showed what he thought of this matter; for the very first thing he did, many years ago, when at the Russian Embassy in St. Petersburg, was to study the Russian language, which he eventually mastered. Bismarck's example is not a bad one to follow; but until the language be made a compulsory one at the examination of candidates for our Foreign Office, I fear that the business of the British Embassy at St. Petersburg will continue to be transacted through an interpreter.

Later on I called upon Count Schouvaloff's brother, to whom the count had so kindly given me a letter of introduction; but he was abroad, so I was informed by the servant, and consequently the letter was of no use.

I began to be a little anxious about the letter which I had left at the house of General Milutin, the Minister of War, particularly as I had omitted to fee his hall porter—a great omission on my part, as I was informed by an Englishman, an old resident at St. Petersburg; and he added, "Nothing whatever can be done in Russia without a judicious disposal of presents, from the hall porters to the mistress of the minister, who gives out the railway contracts. All have their price, and you will find gold, or rather its equivalent in ruble paper, an open sesame throughout the Russian Empire."

I must say that, for my part, I did not share this opinion about the porter's venality. However, as I had written to ask the general if I could have the honor of an interview, and no reply had been sent, I determined to write another letter, which was couched in the following terms:

*To General Milutin, the Minister of War.*

✓ SIR,—I trust that you will pardon the liberty I am taking in writing to you without having the honor of your personal acquaintance.

I wish to have the permission to go to India, *via* Khiva, Merve, Kabul. But as I had read in some English papers, previous to my departure from London, that the Russian Government has issued an order forbidding Englishmen to travel in Russian Asia, I thought that I ought to address myself to Count Schouvaloff, the Russian ambassador in London. He said to me, "I can not personally answer your question; but when you arrive at St. Petersburg, the authorities there will give you every information." Before I quitted London, I received a letter from Count Schouvaloff informing me that he had written officially to the Minister of Foreign Affairs at St. Petersburg with reference to my journey, while the count inclosed me a letter of introduction to his brother, and concluded by wishing me a happy journey. Now, sir, I should much like to know if I can have this permission. If it can not be granted me, will you do me the honor of writing two lines and tell me frankly, Yes or No. If the answer is No, I shall leave St. Petersburg immediately, because my leave of absence will soon be over, and I do not wish to remain here longer than it is necessary to receive your answer. I have the honor to be, etc.

Having dispatched this letter, I began to be a little easier in my mind. I did not think that the general, who, by all accounts, is a most gentleman-like man, would purposely delay replying to my note; nor was I wrong in my surmises. In the mean time I was trying to get all the information I could about the route to Khiva.

## CHAPTER III.

The Volga frozen.—Navigation stopped in the Caspian.—The Russian Boundary-line in the East.—Reports are rife in Russia.—The Press is gagged.—General Milutin's Regard for my Safety.—Ignorance of Clerks at Railway Station.—Cartridge-case.—Insurgents in Herzegovina.—Subscriptions.—England bent upon Money-making.—Austria allied with England.—The Baltic Provinces.—The Russians' Hatred of Austria and Germany.—Bismarck's Policy.—Mr. Leslie, our Consul in Moscow.

MR. SCHUYLER thought that the best way to go to Khiva would be by Astrakhan and the Caspian to Krasnovodsk, and from there across the steppes on horseback to Khiva. This, undoubtedly, would have been the shortest and easiest journey; but a paragraph which I read in a paper that afternoon showed me that this route was out of the question. The paragraph was to the effect that the accumulation of ice had already prevented navigation in the Caspian, and that the Volga was frozen.

I tried to get some information from a few Russian officers whose acquaintance I accidentally made, but all to no effect. They did not know themselves. They believed that there was a post to Khiva, and that the Tartars had carried letters there on horseback; but whether from Orenburg or from Tashkent no one knew.

I now determined, should the reply to my letters to General Milutin be in the affirmative, to go down to Orenburg and seek for further information in that town. In the event of General Milutin's answer being in the negative, I had made up my mind to go straight to Persia, and then, skirting the Russian boundary-line, pass *via* Merve and Bokhara to India.

It would have been an interesting journey, though very difficult to know the exact boundary-line in some parts; for, as I have noticed before in the last Russian staff map of Turkistan, dated 1875, the boundary-line, extending over a large tract of

country, is not marked by a dotted line, as in other parts of the map; thus showing that there is a doubt in the mind of the officer by whom it was compiled as to how far Russia extends in that direction.

All sorts of reports were circulating with reference to General Kauffmann, the Governor-general of Turkistan—some to the effect that he had sent in his resignation. Again, it was said that he had only received a jewel-mounted sword in return for his services, and that one of his subordinates had been similarly rewarded. One thing, however, seemed very certain, which was, that the general had left Tashkent, and was on his road to St. Petersburg; but whether on account of the recent disturbances in Kokan, or for General Milutin to consult him with reference to a farther advance upon Kashgar, were mooted points, and to which no one could give an answer. In fact, there is no country, perhaps, in the universe where reports are so rife as in Russia. The press is gagged, owing to the strict system of censorship which prevails; and the result is that gossip runs rampant, each man embellishing the story he has heard from his neighbors, when it eventually acquires greater dimensions, if possible, than that of the three black crows so happily told by Smollett.

The letter to General Milutin produced the effect I anticipated, and the result was a reply, directed, singularly enough, to the British Embassy, although I had in my own letter distinctly written my address as Demout's Hotel. The communication was to the effect that the commandants in Russian Asia had received orders to aid me in my journey through the territory under their command; but that the Imperial Government could not give its acquiescence to the extension of my journey beyond Russian territory, as the authorities could not answer for the security or the lives of travelers beyond the extent of the emperor's dominions.

Now this was so self-evident a statement that I was much surprised at General Milutin for making it. Of course, the Russian Government could not be responsible for my safety beyond the emperor's dominions, any more than could Her Majesty's Government be responsible for the life of a traveler passing through Natal to Central Africa.

Merve and Herat no more belong to the Emperor of Russia than Central Africa to the Queen of Great Britain; then how could the Imperial Government at St. Petersburg imagine itself liable for any thing happening to me outside Russian territory?

There were only two inferences to be drawn from the letter—either that the general, who is by all accounts a most kind-hearted man, valued my life at a greater price than I did myself—which was exceedingly amiable on his part—or that, for certain military and political reasons, he did not wish me to go to Central Asia.

I must say that I was very much surprised at the way he endeavored to deter me; and Russian officers must be very different to English ones, if the mere fact of there being a little risk is sufficient to stop their traveling.

I should have much liked to ask General Milutin one question, and to have heard his answer—not given solemnly, as the Russian chancellor makes his promises, but face to face, and as a soldier: Would he, when a captain, have turned his face homeward to St. Petersburg simply because he was told by a foreign government that it could not be responsible for his safety? I do not think so; and I have a far higher opinion of the Russian officers than to imagine that they would be deterred by such an argument, if used to them under circumstances similar to those in which I found myself.

However, there was the letter in black and white. The only thing left for me to do was to write and thank the general for permitting me to travel in Russian Asia, adding in a final postscript that I should probably return either by Tashkent or Teheran; my intention being to go from Khiva to Merve, and so on to Meshed, when I should have been in Persian territory. I could have then gone *via* Herat and the Bolan pass to Shikarpoor, and returned either through Cachemire, Kashgar, and Tashkent, or by Kabul, Bokhara, and Kasala to European Russia.

The final preparations for the journey were soon made; all my superfluous clothes sent back to England; a pair of high cloth boots, commonly known as valenki, bought to keep out

the cold; and the following evening at 8 P.M. I found myself at the railway station, *en route* for Orenburg. A marvelous ignorance seemed to exist amidst the clerks at the booking-office when I asked them how far the line extended in the direction of that town. Did it go to Samara? No. Could I take my ticket to Orenburg? No. Well, how far could I book? None of them could tell me; so, taking a ticket as far as Penza, which I knew was on the line, I proceeded to register my luggage.

The box containing my cartridges struck the attention of an official who was standing beside the scales; and "Pray what may this be?" he observed, looking suspiciously at the case. "It is very heavy."

He was quite right; cartridges are heavy, and the four hundred which made up my ammunition—and which traveled to Khiva and back again—were often a source of great annoyance to myself as well as my camels.

"They are little things which contain some lead," I answered. "Oh! instruments which contain lead," he said. "Yes," I replied; "very useful instruments; pray be careful with them." Upon which he gave me the receipt.

The carriages between St. Petersburg and Moscow are, if possible, more commodious than those which run from the capital to the German frontier. They are also well supplied with sleeping compartments; so the journey can be performed as comfortably as if traveling in a Cunard's steamboat.

Upon taking my seat, two ladies, dressed in the deepest black, entered the carriage and solicited subscriptions from the different passengers for the wounded insurgents in Herzegovina.

"I suppose some of this money will go to the maintenance of the hale as well as the sick," observed a fellow-traveler. "Poor fellows, they want arms very badly."

"I would give any thing to drive out those Mussulmans," remarked his companion, producing a well-filled purse, and making a large donation to the fund.

His example was followed by all the other Russians in the carriage; and, not wishing to appear conspicuous by not sub-

scribing, I added a trifle, my *vis-à-vis* saying, "Thank you, brother—it will help to keep the sore open: the sooner the Turk falls to pieces, the better. What is the good of our having a fleet on the Black Sea unless we can command the Dardanelles? And the longer this affair continues in Herzegovina, the more likely we are to reach Constantinople."

"What will the English say to this?" I inquired. "Oh, England! she goes for nothing now," he replied. "She is so bent upon money-making that it will take a great deal of kicking to make her fight. Why, she did not do any thing when Gortschakoff repudiated the Black Sea treaty."

"He [Gortschakoff] chose the right time for this," added a fellow-traveler: "it was just after Sedan."

"After Sedan or before Sedan," continued the first speaker, "it would have been all the same. England is like an overfed bull: she has lost the use of her horns."

"What of her fleet?" I inquired. "Well, what can she do with it?" was the answer. "She can block up the Baltic—but the frost does that for six months in the year; and she can prevent the corn from our Southern provinces reaching her own markets: bread will be dearer in London, that is all. England will not land troops in the Crimea again."

"God grant that she may," said another; "our railway to Sevastopol is now open."

I here remarked that England was not likely to declare war without having an ally. "But what if Germany or Austria were to join her?"

"As for those pigs of Germans, we must fight them some day or other," replied the previous speaker; "and when the Tzarevitch is emperor, please God we will beat them well, and drive every German brute out of Russia: they fatten on our land at the expense of our brothers."

"But supposing they get the best of it?"

"Well, what can they do? They can not stop in Russia, even if they should be able to assail us. We can play the old game; keep on retiring. Russia is big, and there is plenty of country at our back."

"They might take the Baltic provinces," I remarked.

“Take them! I hope Gortschakoff will give them to Bismarck before long, and arrange that Germany does not interfere with us when we march upon Constantinople,” said another of the travelers.

“Arrange with Bismarck! You might as well arrange with the devil!” said the first speaker. “He will take every thing he can, and give us nothing. He is the greatest enemy we have—except, perhaps, the people at Vienna! However, they do not count for much; as, with the Gzechs and Hungarians, they have plenty on their hands: but we must give those Austrians a beating before long.”

“Which would be most popular—a war with Austria, or one with Germany?” I inquired.

“With Austria,” was the unanimous reply; “because we know that we can march to Vienna without any difficulty. We are not prepared for Germany; our army is not yet sufficiently organized to compete with Moltke’s forces. We must bide our time. Besides this, the emperor likes his uncle too much. When the Tzarevitch is on the throne, then we shall have a war. Bismarck, too, does not want to fight at present. He would like to see Russia fight England, Austria, and Turkey. The old fox would sit still himself, and do nothing. But if we got the best of Austria, he would take Vienna and Holland as his share of the spoil, and as a reward for his exertions; while, if we were beaten, he would take the Baltic provinces. But perhaps you are a German,” said one of the travelers. “No, I am an Englishman,” was my answer, “and I am very much obliged to you for this interesting conversation.”

Moscow was reached early the following morning; when, finding that there would be no train till the afternoon to Penza, I took a sleigh, and drove to call on Her Majesty’s consul, a Mr. Leslie, whose acquaintance I had made during a previous visit to Moscow. His post is a purely honorary one, but perhaps in no other consulate in Europe is so much hospitality shown to Englishmen. Mr. Leslie, from his long residence in Russia, is well acquainted with the character of the people with whom he has to deal, and is a very valuable member of our Foreign Office.

Moscow, with its wide streets, its long distances from one part of the city to another, its world-renowned Kremlin, the palaces of its nobles, embracing vast suites of apartments, parquet floors, and almost Oriental magnificence, has so often been described by travelers that I will not trouble my reader with a description. If I were to do so, it would be the account of what I had seen during previous visits, and not the experiences of my present journey. As it was, I had barely time to pay a rapid visit to my friends at the consulate, drink a glass of tea in the Moscow Traktir, and hear a well-remembered tune from the old organ in that time-honored restaurant, when I was once more dashing through the streets to the station, my half-drunk-en Jehu shouting out at the top of his voice, "*Beregi, beregi!*" (take care). He generally contrived to utter the warning sound just after he had driven into the sleigh of some fellow-Jehu, who, in return for the collision, used that peculiar class of language which is not confined to Russian drivers, but is frequently made use of by cabmen in our London streets.

## CHAPTER IV.

Railway Officials.—Unpunctuality of Trains.—Frauds on the Railway Companies.—Old Spirit of Serfdom.—Socialistic and Nihilist Tendencies.—The Emperor Alexander, and the Religious Influence in Russia.—The Ecclesiastical Hierarchy more Powerful than the Tzar.—Waiting-rooms at Riajsk.—Superstition and Dirt.—Sizeran.

On the track again, but this time alone in my compartment till I was joined by an official whose business it was to inspect the line between Moscow and Riazan. His chief object was to find out if any unnecessary delays took place at the different stations on this railway, a number of complaints having been lately made about the unpunctuality of the trains. It was supposed to be the station-master's fault, and that these officials, being slack in the performance of their duty, were the main cause of the delay. "I could easily find them out," remarked the inspector, "if it were not for the confounded telegraph, but that beats me; for the rogues are all in collusion the one with the other, and as soon as ever they see me on the platform they telegraph the intelligence to their brethren down the line."

It appeared that there used formerly to be a great deal of fraud committed on the railway companies in Russia by the guards of the trains, who would ask a passenger, when about to take his ticket at the booking-office, "What class are you going by?" If by the first or second, the guard would say, "Take a third-class ticket; give me a few rubles, and I will let you go first class, as I am guard of the train by which you will travel." But, according to the inspector, this system of roguery has now been put down, and the result is a better return on the railway capital, although up to the present time the lines have been any thing but remunerative to investors. From the inspector I found out that I ought to have taken my ticket to Sizeran, which was the terminus of the line in the

direction of Orenburg, but that it was too late now to pay the difference, and that I must wait till we arrived at Penza, when I should just have time to get a new ticket, and re-label my luggage.

It was a bitterly cold night, in spite of all our furs; and at Riazan, where it was necessary to wait an hour, and to change trains, a fellow-traveler, a Russian nobleman, who had got into the carriage at an intermediate station, was very indignant with the stoker whose business it was to keep up the fire, and repeatedly called him a son of an animal, the culprit trembling and crying out as if he were under the lash of a whip.

It will take a good many more years to thoroughly eliminate the old spirit of serfdom in Russia, although the law has long ceased to exist, and the men who have been brought up as slaves find it difficult to get rid of a feeling of awe when they are in the presence of their superiors. Perhaps it is as well that things follow on in this groove, for it would be a bitter day for Russia should the socialistic and Nihilist tendencies which are being developed in her larger towns become extended amidst her rural population. At the present moment the love for the emperor predominates over every feeling but one amidst the peasantry; and this devotion to their Father, as he is termed, is well deserved, for the Emperor Alexander underwent an enormous personal risk when, at one stroke of the pen, he did away with slavery in his dominions. It was a step which required great moral courage on the part of its originator, and few emperors would have risked mortally offending the upper classes of the country, even to do an act of justice to the lower.

Probably the only influence which could be brought to bear upon a peasant's mind, to such an extent that I believe it would counterbalance his affection for the Tzar, is the religious one. In perhaps no country in the world has this element so powerful a sway as in Russia. In religion, coupled with superstition, lay a power which could even thwart the wishes of the Emperor Nicholas himself; and the ecclesiastical hierarchy is certainly more powerful than the Tzar. Hitherto the two dominant influences have gone hand in glove together; and it is as well

that it should be so, for any rupture between them would inevitably lead to a revolution.

In the waiting-room at Riajsk waiters were hurrying about with glasses of scalding tea, which were eagerly called for by the traveler. In fact, the amount of this beverage that a Russian can drink is somewhat astonishing to the stranger; and the traditional washer-woman of our country, whose capabilities in this respect are supposed to be unrivaled, would have no chance whatever if pitted against a subject of the Tzar. A large *samovar* (a brass urn) stood on the refreshment-table, the water being kept to boiling-point, not by a spirit-lamp, as in England, but by a funnel, which fitted into the centre of the urn, and was filled with red-hot charcoal. Economy was evidently the order of the day with some of the travelers; for, instead of putting the sugar in their glasses, they would take a lump in their mouths, and thus sweeten the scalding draught.

I took advantage of our delay at Riajsk, and walked through the other waiting-rooms. These were crammed with third-class passengers. It was a strange sight to see the mixture of different nationalities, which, huddled together like sheep, lay in different attitudes on the floor. Here a Tartar merchant, his head covered with a small yellow fez, while a long party-colored gown and pair of high boots completed his attire, was fast asleep in a corner. A woman, her face covered with a thick white veil, lay folded in his arms; while a child, enveloped in a bundle of rags, was playing with the fur cap of its parent. Next to them a man, whose peculiarly shaped nose showed a distinct relationship to the tribe of Israel, was breathing hard through his nasal organ. From time to time he clutched convulsively at a small leather bag, which, half hidden beneath a greasy-looking black coat, was, even in his dreams, a source of anxiety. Peasants in every posture, their well-knit frames clad in untanned leather, which was tightly girt about their loins with narrow leather belts studded with buttons of brass and silver, re-echoed the Hebrew's melody. An old Bokharan in flowing robes sat listlessly, with his legs twisted up under him, beside the stove. He appeared to be under the influence of opium, and was possibly dreaming of celestial houris

and bliss to come; while a smart-looking lad—perhaps his son, judging from the likeness between them—had withdrawn a little from the rest of the throng, apparently not very well pleased by his vicinity to the Russian peasants.

The Mohammedans of Central Asia have certainly one great advantage over the moujik, and that is in their love for water; indeed, if the Russian peasant could only be persuaded to be a little more particular in his ablutions, it would be conducive, if not to his own comfort, at least to that of his fellow-travelers. Superstition and dirt are twin brothers in Russia; and I have frequently observed that the more particular a peasant is in his adoration of the various idols (*obrazye*) which are prominently displayed on the threshold of every cottage, the more utterly he is forgetful of the advantages of soap and water.

At Penza I had barely time to secure another ticket on to Sizeran, where my railway traveling would terminate, and presently found myself in a large saloon carriage. Here almost every seat was taken, and the porters had piled upon them some railway bags and parcels belonging to passengers traveling in another carriage. These articles had been put in while the owners were in the waiting-rooms, the object being to diminish the length of the train. This was attained, but at the cost of considerable discomfort to the travelers, who were eagerly searching for their lost property by the dim light of a smoky tallow-dip.

In the course of conversation with one of the party, a tall and very stout middle-aged man, I discovered that my shortest route to Orenburg would be through Samara. He said that he was going to the last-mentioned town, and proposed that we should hire a *troika*—a three-horse sleigh—and travel together. I readily embraced the offer, when after a few hours' more traveling we stepped out on the platform of the station at Sizeran. Here my companion was evidently well known, for the railway officials and porters respectfully saluted him, and hastened to bring our luggage to the waiting-room. I must say that I was surprised to find so good a refreshment-room so far from the capital, as, with but very short halts for the purpose of changing trains, we had been traveling for more

than sixty hours, and all this time in the direction of Asia, on nearing which you expect at each stride to leave civilization farther and farther in your wake. But the buffet at Sizeran left nothing to be desired; and in a very short time as good a breakfast was supplied as could be obtained in any French restaurant.

We now had to think over the preparations for our sleigh journey, and after a little bargaining my companion made arrangements with a farmer in the neighborhood to supply us with a sleigh and relays of horses as far as Samara. The distance is about eighty-five miles, and there is no regular government postal station between the two towns.

## CHAPTER V.

Twenty Degrees below Zero.—Provisions.—Wolves in the Neighborhood.—Our Troika.—Driving along the Volga.—Price of Corn.—Bridge being built over the River.—The Sterlet.—The Cossacks of the Ural.—How to catch Sturgeon.—The Three Kinds of Caviare.

“You had better put on plenty of clothes,” was the friendly caution I received from my companion as I entered the dressing-room, “for the thermometer marks twenty degrees below zero, Reaumur, and there is a wind.” People in this country who have never experienced a Russian winter have little idea of the difference even a slight breeze makes when the mercury stands low in the thermometer, for the wind then cuts through you, furs and all, and penetrates to the very bones. Determining to be on my guard against the frost, I dressed myself, as I thought, as warmly as possible, and so as to be utterly impervious to the elements.

First came three pairs of the thickest stockings, drawn up high above the knee, and over them a pair of fur-lined low shoes, which in their turn were inserted into leather galoches, my limbs being finally deposited in a pair of enormous cloth boots, the latter reaching up to the thigh. Previously I had put on some extra thick drawers and a pair of trousers, the astonishment of the foreman of Messrs. Kino’s establishment, “Lord love you, sir,” being his remark when I tried them on, “no cold can get through them trousers, anyhow!” I must confess that I rather chuckled as my legs assumed herculean proportions, and I thought that I should have a good laugh at the wind, no matter how cutting it might be; but Æolus had the laugh on his side before the journey was over. A heavy flannel under-shirt, and shirt covered by a thick wadded waistcoat and coat, encased my body, which was further enveloped in a huge shuba, or fur pelisse reaching to the heels, while my head was protected with a fur cap and vashlik, a sort of cloth

head-piece of a conical shape made to cover the cap, and having two long ends which tie round the throat.

Being thus accoutred in all my armor, I sallied forth to join my companion, who, an enormous man naturally, now seemed a very Colossus of Rhodes in his own winter attire. How people would have laughed if they could have seen us in Piccadilly in our costumes! "I think you will do," said my friend, scanning me well over; "but you will find your feet get very cold, for all that. It takes a day or so to get used to this sleigh traveling; and, though I am only going a little beyond Samara, I shall be uncommonly glad when my journey is over."

He was buckling on his revolver; and as we were informed that there were a great many wolves in the neighborhood, I tried to do the same; but this was an impossibility; the man who made the belt had never foreseen the gigantic proportions my waist would assume when clad in this Russian garb. I was obliged to give it up in despair, and contented myself by strapping the weapon outside my saddle-bags.

For provisions for possibly a thirty-six hours' journey, and as nothing could be bought to eat on the road, I provided myself with some cutlets and chicken, which fitted capitally into the mess tins, while my companion agreed to furnish the tea and bread, the former an article without which no true Russian will ever travel. He had not much baggage with him, and my own was reduced to as little as possible; but we soon discovered that it was impossible to stow away the luggage in the first sleigh that had been brought for our inspection, for when my railway bag, saddle-bags, cartridge-box, gun, and sleeping-sack had been put inside and were well covered with straw, I essayed to sit upon them, but found that there was too little distance from the improvised seat to the roof, and my back was nearly bent double in consequence.

"Bring out another sleigh," said my friend. "How the wind cuts! does it not?" he continued, as the breeze, whistling against our bodies, made itself felt in spite of all the precautions we had taken. The vehicle now brought was broader and more commodious than the previous one, which, somewhat in the shape of a coffin, seemed especially designed so as to tort-

ure the occupants, particularly if, like my companion and self, they should happen to be endowed by nature with that curse during a sleigh journey—however desirable appendages they may be when in a crowd—long legs. Three horses abreast, their coats white with pendent icicles and hoar-frost, were harnessed to the sleigh; the centre animal was in the shafts, and had his head fastened to a huge wooden head-collar, bright with various colors. From the summit of the head-collar was suspended a bell, while the two outside horses were harnessed by cord traces to splinter-bars attached to the sides of the sleigh. The object of all this is to make the animal in the middle trot at a brisk pace, while his two companions gallop, their necks arched round in a direction opposite to the horse in the centre, this poor beast's head being tightly reined up to the head-collar.

A well-turned-out troika with three really good horses, which get over the ground at the rate of twelve miles an hour, is a pretty sight to witness, particularly if the team has been properly trained, and the outside animals never attempt to break into a trot, while the one in the shafts steps forward with high action; but the constrained position in which the horses are kept must be highly uncomfortable to them, and one not calculated to enable a driver to get as much pace out of his animals as they could give him if harnessed in another manner.

Off we went at a brisk pace, the bell dangling from our horse's head-collar, and jingling merrily at every stride of the team.

The sun rose high in the heavens: it was a bright and glorious morning in spite of the intense cold, and the amount of oxygen we inhaled was enough to elevate the spirits of the most dyspeptic of mankind. Presently, after descending a slight declivity, our Jehu turned sharply to the right; then came a scramble and succession of jolts and jerks as we slid down a steep bank, and we found ourselves on what appeared to be a broad high-road. Here the sight of many masts and shipping which, bound in by the iron fetters of a relentless winter, would remain imbedded in the ice till the ensuing spring, showed me that we were on the Volga. It was an ani-

mated spectacle, this frozen highway, thronged with peasants who strode beside their sledges, which were bringing cotton and other goods from Orenburg to the railway. Now a smart troika would dash by us, its driver shouting as he passed, when our Jehu, stimulating his steeds by loud cries and frequent applications of the whip, would vainly strive to overtake his brother coachman. Old and young alike seemed like octogenarians, their short thick beards and mustaches being white as hoar-frost from the congealed breath. According to all accounts the river had not been long frozen, and till very recently steamers laden with corn from Southern Russia had plied between Sizeran and Samara. The price of corn is here forty copecks the pood of forty pounds, while the same quantity at Samara could be purchased for eighteen copecks. An iron bridge was being constructed a little farther down the Volga. Here the railroad was to pass, and it was said that in two years' time there would be railway communication, not only between Samara and the capital, but even as far as Orenburg.

Presently the scenery became very picturesque as we raced over the glistening surface, which flashed like a burnished cuirass beneath the rays of the rising sun. Now we approach a spot where seemingly the waters from some violent blast or other had been in a state of foam and commotion, when a stern frost transformed them into a solid mass. Pillars and blocks of the shining and hardened element were seen modeled into a thousand quaint and grotesque patterns. Here a fountain, perfectly formed with Ionic and Doric columns, was reflecting a thousand prismatic hues from the diamond-like stalactites which had attached themselves to its crest. There a huge obelisk, which, if of stone, might have come from ancient Thebes, lay half buried beneath a pile of fleecy snow. Farther on we came to what might have been a Roman temple or vast hall in the palace of a Cæsar, where many half-hidden pillars and monuments erected their tapering summits above the piles of the débris. The wind had done in that northern latitude what has been performed by some violent pre-adamite agency in the Berber desert. Take away the ebon blackness of the stony masses which have been there cast forth from the bowels of

the earth, and replace them on a smaller scale by the crystal forms I have faintly attempted to describe, and the resemblance would be striking.

Now we came to some fishing-huts, which were constructed on the frozen river, the traffic in the finny tribe which takes place in this part of Russia being very great, the Volga producing the sterlet (a fish unknown in other rivers of Europe) in large quantities. I have often eaten them, but must say I could never appreciate this so-called delicacy. The bones are of a very glutinous nature, and can be easily masticated, while the taste of a sterlet is something between that of a barbel and a perch, the muddy flavor of the former predominating. However, they are an expensive luxury, as, to be in perfection for the table, they should be taken out of the water alive and put at once into the cooking-pot. The distance to St. Petersburg from the Volga is considerable, and a good-sized fish will often cost from thirty to forty rubles, and sometimes even a great deal more.

In most of the restaurants in the capital the proprietors keep sterlet alive in small ponds. The intending purchaser goes there to select a fish for his dinner, the owner of the restaurant dragging it out of the water with a landing-net for his customer's inspection.

"The Cossacks of the Ural have a singular way of catching sturgeon," observed my companion, "and it is a method, I believe, unknown in any other part of Europe. At certain times in the winter, the men assemble in large numbers by the side of the river, and, dismounting from their horses, cut a deep trench across the stream from one of its banks to the other. They then lower their nets into the water, and arrange them so as to block up the entire channel, when, getting on their horses, they will ride for seven or eight miles along the banks. They then form a line of horsemen reaching from shore to shore, and gallop down in the direction of the nets. The fish, hearing the clatter of a thousand hoofs, swim away from the sound, and dart like lightning in the opposite direction. Here their course is at once arrested, and they become entangled in the trammels. The quantity of sturgeon is at times so large," he con-

tinued, "that the sheer weight of the fish is sufficient to force a passage through the nets, a blank day being the result to the fishermen."

In England the sturgeon is looked upon as being rather coarse eating, and as unfit for the table, but in Russia it is highly appreciated; and when served up in cold slices with jelly and horse-radish sauce, it is by no means to be despised, and I have eaten many a worse dish on this side the Channel. The part of the sturgeon most liked by the Russians is the roe (the far-famed caviare), and a Russian will take this out while the fish is almost alive, and devour it with the greatest gusto, for the fresher the caviare is, the more it is liked. There are three kinds of caviare in Russia—the quite fresh, when no salt whatever has been added; then the slightly salted, which is the caviare generally exported to this country and to other parts of Europe; and finally the pressed caviare, which is the second quality pressed into cakes. This is used for sandwiches and other relishes. A little pressed or fresh caviare and a glass or so of Russian vodki, taken a minute before sitting down at the dinner-table, gives a wonderful stimulus to the appetite, and a strong incentive to thirst.

## CHAPTER VI.

A Hole in the Ice.—The two Alternatives.—Being Dragged through the Water.—Preparing for the Leap.—Price of Land.—Our First Halting-place.—Winnowing Corn.—Russian Idols.

THE road now changed its course, and our driver directed his steeds toward the bank. Suddenly we discovered that immediately in front of us the ice had broken beneath a horse and sleigh, and that the animal was struggling in the water. The river here was fortunately only about four feet deep, so there would not be much difficulty in extracting the quadruped; but what to ourselves seemed far more important, was to solve the knotty problem of how to get to land; for between our sleigh and the shore was a wide gulf, and there seemed to be no possibility of driving through it without a wetting. "Pleasant," muttered my companion, "pleasant, very! Let us get out and have a good look round, to see if we can not find a place where we can get across in safety."

"I will pull you through," observed our Jehu, with a broad grin on his lobster-colored countenance, and apparently much amused with the state of things.

"No, O son of an animal," retorted my companion; "stay here till we return."

After considerable search we found a spot where the water channel was certainly not much more than twelve feet across, and some peasants who were fishing in the river came up and volunteered their assistance. One of them produced a pole about eight feet long, with which, he said, we could jump the chasm. My companion looked at me with a melancholy smile, in which resolution and caution struggled for the mastery. "It is very awful," he said, "very awful; but there is no other alternative, and I much fear that we must."

With these words he seized the pole, and carefully inserted

one end of it in the muddy bottom. "If the ice gives way when I land on the other side!" he suddenly observed, releasing his hold of the leaping-bar. "Why, if it does, you will get a ducking," was my remark: "but be quick; the longer you look at it, the less you will like it; and it is very cold standing here: now then, jump over."

"I have been just thinking," went on my companion, "whether it would not be better to be pulled through in the sleigh, for then I shall only get the bottom part of my body wet; but if the confounded ice breaks—which must also be taken into consideration, for I am not at all light" (this was certainly the case, as with his furs and other clothes he must have weighed at least twenty stone), "nor am I so active as I was: why, I shall get in, and very likely be frozen to death in consequence."

At this moment his apprehensions were very nearly realized; for the ice, giving way under one of his feet, let it in to about a foot of water, when, retracing his steps rapidly, my companion remarked, "I shall be dragged through, and not for all the joys of Paradise will I intrust myself to that confounded pole."

It was an awful moment, and I can not say that I relished the situation. There are minutes in a man's life when the heart has a strong inclination to jump into his mouth. It is a very disagreeable sensation, and one which I have sometimes experienced when riding at a Leicestershire so-called bullfinch, not being quite aware of what was on the other side; but then there was a gallery of other men looking on—a wonderful incentive—while this time there were no spectators save a few grinning moujikis and my companion, who, as he had not faced the obstacle himself, thought that it would be better and more dignified if I were to follow his example.

Dignity appeared to me to be out of the question, particularly when placed between the two alternatives of being dragged through the water or risking a jump into the channel. It was a disagreeable choice, but I selected the latter, at the same time being a little annoyed at the chaffing remarks of the grinning peasants, who, greatly enjoying our discomfiture, were passing *sotto voce* observations on the size of my companion and myself, eminently true but highly disrespectful. "How fat they

are!" said one. "No, it's their furs," observed another. "How awkward he is!" continued a third; "why, I could jump it myself." "I tell you what it is, my friend," I at length observed, "if you continue this conversation, I think it very likely you will jump either over or in, for I want to find out the exact distance, and am thinking of throwing you over first, in order to satisfy my mind as to how wide it is, and how deep."

This remark, uttered in rather a sharp tone, had the desired effect, and, seizing the pole convulsively, I prepared for the leap, which, nothing to a man not clad in furs, was by no means a contemptible one in my sleigh attire. One, two, three! a bound, a sensation of flying through the air, a slip, a scramble, and I found myself on the other side, having got over with no more damage than one wet leg, the boot itself being instantly covered with a shining case of ice.

"Come along quick!" cried my friend, who by this time had been dragged through; "let us get on as quickly as possible;" and without giving me time to see if my cartridges or other baggage on the bottom of the sleigh had suffered from the ducking, we rattled off once more in the direction of Samara.

Estates have become much dearer in the neighborhood of Sizeran since the railway has been opened up to that town, and a *desyatin* of land (2700 acres) now costs twenty rubles, while in Samara it can be purchased for half that price. Land gives a good return for the capital invested upon it in Russia, and a proprietor thinks that he has reason to grumble if he does not receive from six to eight per cent. on the purchase-money, clear and free from any deductions.

An English gentleman, a well-known M.P., foreseeing the rise which will take place in the value of property near Samara, has bought a large and beautiful estate in that neighborhood. According to my companion, he will double the capital invested should he in the course of two or three years wish to part with his purchase.

We were now gradually nearing our first halting-place, where it was arranged that we should change horses. This was a farmhouse known by the name of Nijnege Pegersky Hootor, twenty-five versts distant from Sizeran. Some men were engaged in

winnowing corn in a yard hard by the dwelling; and the system they employed to separate the husks from the grain probably dates from before the flood, for, throwing the corn high up into the air with a shovel, they let the wind blow away the husks, and the grain descended on to a carpet set to catch it in the fall. It was then considered to be sufficiently winnowed, and fit to be sent to the mill. The farm-house was fairly clean, and, for a wonder, there were no live animals inside the dwelling. It is no uncommon thing in farm-houses in Russia to find a calf domesticated in the sitting-room of the family, and this more particularly during the winter months. But here the good housewife permitted no such intruders, and the boards were clean and white, thus showing that a certain amount of scrubbing was the custom.

The habitation, which was of a square shape, and entirely made of wood, contained two good-sized but low rooms, a large stove made of dried clay being so arranged as to warm both the apartments. A heavy wooden door on the outside of the building gave access to a small portico, at the other end of which there was the customary obraz, or image, which is to be found in almost every house in Russia. These obrazye are made of different patterns, but generally take the form of a picture of saints or of the Trinity. They are executed in silver-gilt or brass relief, and adorned with tawdry fringe or other gewgaws. The repeated bows and crosses made by the peasantry before these idols is very surprising to an Englishman, who may have been told that there is little difference between the Greek religion and his own; but if this is the case, the sooner the second commandment is omitted from our service, the better. It may be said that the Russian peasantry only look upon these images as symbols, and that in reality they are praying to the living God. Let any one who indulges in this delusion travel in Russia and talk to the inhabitants with reference to the obrazye, or go to Kiev at the time of a pilgrimage to the mummified saints in that sanctuary, and I think he will then say that no country in the world is so imbued with superstitious credences as Russia.

Above the stove, which was about five feet high, a platform

of boards had been erected at a distance of about three feet from the ceiling. This was the sleeping resort of the family, and occasionally used for drying clothes during the day. The Russian moujik likes this platform more than any other part of the habitation, and his great delight is to lie there and perspire profusely, after which he finds himself the better able to resist the cold of the elements outside. The farm-house in which I now found myself had cost in building two hundred rubles, about twenty-six pounds of our money, and her home was a source of pride to the good housewife, who could read and write, an accomplishment not often possessed by the women of this class in the provinces of Russia.

By this time our former team had been replaced by three fresh horses, and the driver who was to accompany us had nearly finished making his own preparations for the sleigh journey. Several long bands of cloth, first carefully warmed at the stove, were successively wound round his feet, and then, having put on a pair of thick boots and stuffed some hay into a pair of much larger dimensions, he drew the latter on as well, when, with a thick sheep-skin coat, cap, and vashlik, he declared that he was ready to start.

The cold was very intense when we quitted the threshold, and the thermometer had fallen several degrees during the last half-hour; the wind had also increased, and it howled and whistled against the eaves of the farm-house, bearing millions of minute snowy flakes before it in its course. Presently the sound of a little stamping on the bottom of the sleigh announced to me that the cold had penetrated to my companion's feet, and that he was endeavoring to keep up the circulation.

## CHAPTER VII.

Pins-and-Needles.—Spoiled Horses.—Driver's Idea of Distance.—The Halting-place.—Our Fellow-travelers.—A Devout but Unwashed Peddler.—A Glorious Sunrise.—A Bargain is a Bargain.

VERY soon that so-called "pins-and-needles" sensation, recalling some snow-balling episodes of my boyish days, began once more to make itself felt, and I found myself commencing a sort of double-shuffle against the boards of the vehicle. The snow was falling in thick flakes, and with great difficulty our driver could keep the track, his jaded horses sinking sometimes up to the traces in the rapidly forming drifts, and floundering heavily along the now thoroughly hidden road. The cracks of his whip sounded like pistol-shots against their jaded flanks, and volumes of invectives issued from his lips.

"Oh, sons of animals!"—[whack].

"Oh, spoiled one!"—[whack]. This to a brute which looked as if he had never eaten a good feed of corn in his life.

"Oh, woolly ones!"—[whack! whack! whack!].

"O Lord God!" This as we were all upset into a snow-drift, the sleigh being three-parts overturned, and our Jehu precipitated in the opposite direction.

"How far are we from the next halting-place?" suddenly inquired my companion, with an ejaculation which showed that even his good temper had given way under the cold and our situation.

"Only four versts, one of noble birth," replied the struggling Jehu, who was busily engaged endeavoring to right the half-overturned sleigh. A Russian verst about night-fall, and under such conditions as I have endeavored to point out to the reader, is an unknown quantity. A Scotch mile and a bit, an Irish league, a Spanish legua, or the German stunde, are at all times calculated to call forth the wrath of the traveler, but in no way

equal to the first-named division of distance. For the verst is barely two-thirds of an English mile, and when, after driving yet for an hour, we were told that there were still two versts more before we could arrive at our halting-place, it began fully to dawn upon my friend that either our driver's knowledge of distance, or otherwise his veracity, was at fault.

At last we reached a long, straggling village, formed of houses constructed much in the same way as that previously described, when our horses stopped before a detached cottage. The proprietor came out to meet us at the threshold. "Samovar, samovar!" (urn), said my companion. "Quick, quick! samovar!" and hurrying by him, and hastily throwing off our furs, we endeavored to regain our lost circulation beside the walls of a well-heated stove.

In a few minutes, and when the blood had begun once more to flow in its proper channels, I began to look round and observe the other occupants of the room. These were for the most part Jews, as could easily be seen by that peculiarity of the nose which unfailingly denotes any member of the tribe of Israel. Some half-open boxes of wares in the corner also showed their trade. The men were hawkers of fancy jewelry and other finery calculated to please the wives of the farmers or better-to-do peasants in the neighborhood.

The smell was any thing but agreeable, and the stench of sheep-skins, unwashed humanity, and some oily cooking going on in a very dirty frying-pan, at last caused my companion to inquire if there was no other room vacant. We were shown into a small adjoining apartment, where the smell, though very pungent, was not quite so disagreeable as in the one inhabited by the family. "This is a little better," muttered my companion, unpacking his portmanteau, and taking out a tea-pot, with two small metal cases containing tea and sugar. "Quick, Tëtka, Aunt!" he cried (this to the old woman of the house), "quick with the samovar!" when an aged female, who might have been any age from eighty to a hundred, for she was almost bent double by decrepitude, carried in a large copper urn, the steam hissing merrily under the influence of the red-hot charcoal embers.

By this time I had unstrapped the mess tins, and was extracting their contents. "Let me be the carver," said my friend, at the same time trying to cut one of the cutlets with a knife; but he might as well have tried to pierce an iron-clad with a pea-shooter, for the meat was turned into a solid lump of ice. It was as hard as a brickbat, and when we tried the bread it was equally impenetrable; in fact, it was only after our provisions had been placed within the stove for about ten minutes that they became in any way eatable. In the mean time my companion had concocted a most delicious brew, and with a large glass of pale or rather amber-colored tea, with a thin slice of lemon floating on the top, I was beginning to realize how pleasant it is to have been made thoroughly uncomfortable, for it is only after having arrived at this point of misery that you can thoroughly appreciate what real enjoyment is. "What is pleasure?" asked a pupil of his master. "Absence of pain," was the philosopher's answer; and let any one who doubts that a feeling of intense enjoyment can be obtained from drinking a mere glass of tea, try a sleighing journey through Russia with the thermometer at 20° Reaumur and a wind.

In almost an hour's time we were ready to start, but not so our driver, and to the expostulations of my companion he replied, "No, little father, there is a snow-storm; we might be lost, and I might be frozen. O Lord God! there are wolves; they might eat me: the ice in the river might give way, and we might all be drowned. For the sake of God, let us stop here!"

"You shall have a good tea present,"\* I observed, "if you will drive us."

"Oh, one of noble birth," was his answer, "we will stop here to-night, and Batooshka, little father, also," pointing to my companion; "but to-morrow we will have beautiful horses, and go like birds to the next station."

It was useless attempting to persuade him. Resigning ourselves to our fate, my companion and self lay down on the

---

\* A Russian term for a money gift to an inferior.

planks to obtain what sleep could be found, notwithstanding the noise that was going on in the next room, the Jew peddlers being occupied in trying to sell some of their wares, and drive a bargain with the antique mistress of the house. Notwithstanding her age, she was keenly alive to her own interests, and the shrill female accents mingling with the nasal ejaculations of the Hebrews were not at all conducive to slumber.

Presently another peddler, enveloped in sheep-skins and covered with snow, strode into our room, where he began to cross himself and perform his devotions before an obraz which was attached to one of the walls. As soon as this act of worship was finished, he commenced bargaining with the owner of the house, trying to persuade the man to let him have a horse to drive to the next station at a lower rate than the one ordinarily paid. But the proprietor was proof against all this kind of eloquence, and the peddler, finding that his entreaties were useless, returned once more to our room, and, kicking off his boots by the side of my companion's head, announced his intention of passing the night there. This the Russian gentleman objected to in very strong terms, for in addition to the smell of the peddler's body and his garments, there was good reason to believe that a vast amount of what it is not necessary here to mention inhabited his beard and clothes. "No, brother," said my companion firmly, at the same time taking up the peddler's sheep-skin between his finger and thumb, when, holding it at arms-length before him, he deposited the filthy garment in the other room. "Go there, brother, for the sake of God, and pass the night with your fellows."

It was in vain attempting to sleep; the new arrival had brought a still further element of discord amidst the assembled peddlers. They were a strange party in that room—the proprietor, his mother, his wife, and her sister, two or three children, and five peddlers, all huddled together promiscuously, and adding by their number to the foul air which poisoned the interior of the dwelling. What surprised me most was to see how healthy the children looked. I should have imagined that they would have been poor, weak, delicate little things, but no; and the eldest, a chubby lad about ten years old, ap-

parently the picture of health, looked as if bad smells and want of ventilation decidedly agreed with him.

The Russian peasants are not ignorant of the good old maxim that the early bird gets the worm, and the few hours' daylight they enjoy during the winter months makes it doubly necessary for them to observe this precept. We were all up a good hour before sunrise, my companion making the tea, while our driver was harnessing the horses, but this time not three abreast, for the road was bad and narrow; so we determined to have two small sleighs with a pair of horses to each, and put our luggage in one vehicle while we traveled in the other.

Off we went, a motley crew. First, the unwashed peddler who had wished to be my companion's bedfellow the night before; then our luggage sleigh; and, finally, my friend and self, who brought up the rear, with a careful eye upon our effects, as the people in that part of the country were said to have some difficulty in distinguishing between *meum* and *tuum*.

The sun was bright and glorious, and in no part of the world hitherto visited have I ever seen aurora in such magnificence. First, a pale blue streak, gradually extending over the whole of the eastern horizon, arose like a wall barring the unknown beyond; then, suddenly changing color until the summit was like lapis lazuli, and its base a sheet of purple waves of gray and crystal, radiating from the darker hues, relieved the eye, appalled by the vastness of the barrier; the purple foundations were in turn upheaved by a sea of fire, which dazzled the eye with its glowing brilliancy, and the wall of colors floating in space broke up into castles, battlements, and towers, which were wafted by the breeze far away from our view. The sea of flame meanwhile had lighted up the whole horizon; the eye quailed beneath the glare. The snowy carpet at our feet reflected like a camera the wonderful panorama overhead. Flakes of light in rapid succession bound earth to sky, until the globe of sparkling light arising from the depths of this ocean of flame dimmed into insignificance the surroundings of the picture.

Presently a sudden check and exclamation of our Jehu told us that the harness had given way, and a conversation, freely

interlarded with epithets exchanged between the driver and the peddler, showed that there was decidedly a difference of opinion between them. It appeared that the man of commerce was the only one of the party who knew the road, and having discovered this fact, he determined to make use of his knowledge by refusing to show the way unless the proprietor of the horses who drove the vehicle containing our luggage would abate a little from the price he had demanded for the hire of the horse in the peddler's sleigh. "A bargain is a bargain!" cried our driver, wishing to curry favor with his master, now a few yards behind him. "A bargain is a bargain. Oh, thou son of an animal, drive on!" "It is very cold," muttered my companion. "For the sake of God," he shouted, "go on!" But neither the allusion to the peddler's parentage nor the invocation of the Deity had the slightest effect upon the fellow's mercenary soul.

"I am warm, and well wrapped up," he said; "it is all the same to me if we wait here one hour or ten;" and with the most provoking indifference he commenced to smoke, not even the manner in which the other drivers aspersed the reputation of his mother appearing to have the smallest effect. At last the proprietor, seeing it was useless holding out any longer, agreed to abate somewhat from the hire of the horse, and once more the journey continued over a break-neck country, though at any thing but a break-neck pace, until we reached the station—a farm-house—eighteen versts from our sleeping quarters, and, as we were informed, forty-five from Samara.

## CHAPTER VIII.

The Guardian of the Forests.—No Sleigh-bells allowed in the Town.—Hotel Anaeff.—A Coffin-shaped Vehicle.—Law about Libel.—Price of Provisions at Samara.—Rate of Mortality among the Infantine Populace.—Podorojnayas, or Road Passports.—The Grumbler's Book.—Difference of Opinion between my Horses and the Driver.

THE Guardian of the Forests stepped into the dwelling while we were waiting for fresh horses, and said that there were many wolves in the neighborhood, and that they did a great deal of damage to the flocks; at the same time informing us that he had shot several wolves that winter, and one only two days before. The keeper was a well-built, sturdy fellow, and, seeing my gun, proposed that we should stop a day or so, remarking that he could show us some capital sport. But my companion was obliged to hasten to his property; and as for myself, the 14th of April—the termination of my leave of absence—rose up like a bugbear in my mind's eye.

Every day was precious, and I had no time, much as I should have liked to accept the invitation. About six hours more brought us to the river Samara—here a broad stream which runs into the Volga. We dashed over a road made on its glistening surface, when the driver, pulling up his horses and getting down to tie up the bell on the head-collar, informed us that we were about to enter the town, no bells being allowed within the suburbs, for fear of frightening any horses unaccustomed to the tinkle.

A rapid drive through some fine broad streets—the well-built houses announcing that the inhabitants were comfortably off in this world's goods—and five minutes later I found myself beneath the roof of the Hotel Anaeff, a much better hostelry than I should have thought to encounter so far from a railway.

There was no time to be lost, for the day was well advanced, and we at once commenced making preparations for our jour-

ney onward, my fellow-traveler leaving me at this point, as his estate was not on the road to Orenburg. I was sorry to shake hands with him and to say good-bye. He was a very cheery companion, and a drive over the steppes alone, and without a soul to speak to for several hundred miles, was not an inviting prospect. *Mais à la guerre comme à la guerre*, and the same saying equally applying to a winter journey through Russia, I resigned myself to the situation, speedily forgetting all cares in the bustle of laying in a stock of provisions for the road, and in the search for a sleigh, which I had here to buy to convey me and my fortunes to Orenburg, or perhaps to Khiva.

Presently a coffin-shaped vehicle was driven up for my inspection, when I discovered that one of the runners was cracked, and not in a fit state for the journey. The owner of the sleigh used all his eloquence to persuade me that there was an advantage in having a damaged runner, and seemed much surprised when I informed him that I did not share this opinion; however, seeing me obdurate, he promised to have the vehicle repaired, and ready to start by the break of day.

The law of libel is stringently applied in Russia, judging by a paragraph which I saw in a newspaper that evening. It appeared that the editor of the magazine *Dalo* had been summoned by a Mr. Weinberg for calling him a beggar. The editor, according to the evidence, had previously asked the plaintiff to translate a work. On its completion, Mr. W. wrote to his employer requesting the payment of fifty rubles, which would make up the difference of the amount due. No answer being returned, he called in person, and said he would not leave without the money. Upon this, the editor sent him down a ruble note, wrapped up in a piece of paper, on which was written, "I give you this for your begging," or words to that effect. The advocate for the defense apologized for his client, who, he said, was an old man; but the court, not seeing the point of the argument, sentenced the editor to two weeks' imprisonment—undoubtedly a well-merited punishment; though in England I much doubt if the offender would have even been mulcted in damages for the expression. The Russian law for libel, or rather insult (*oskorblenie*), is very voluminous, and

many words which in this country would not come within the statute for libel are followed by a heavy punishment in the Tzar's dominions.

The people at Samara were looking forward to the rapid completion of the railway from Sizeran to that town—the proprietors of land being the most interested in the matter, as then they would be able to obtain a better market for their corn. Provisions were very cheap, the best beef only costing seven copecks per pound, and bread two and a half copecks, while twenty bottles of vodki could be purchased for four rubles; thus enabling the inhabitants of that highly favored community to get drunk, if they wished, at even a lower rate than that announced on a placard hung some years ago outside a public-house in Ratcliff Highway, and couched in the following terms: “Take notice.—Get drunk and be made happy, all for a penny.”

Mutton was even cheaper than beef, and to be bought for six copecks a pound; while a first-rate cow could be readily purchased for thirty rubles, and a hundred fresh eggs for one ruble and a half. When I jotted down the list of prices, which was furnished me by the polite secretary at Anaeff's Hotel, I began to think that what I had read in my boyhood about the latitude and longitude of the Promised Land must be a myth. Samara was evidently that much-desired region, and would be an abode of bliss to all those melancholy and matrimony-in-search-of young bachelors who occasionally forward a mournful dirge to our daily press, and inquire if a man can marry on a hundred a year. Why, of course he can! Only let him go to Samara, and he can keep a seraglio into the bargain, provided he feeds the ladies on beef and mutton.

The only country I have ever been in where provisions cost less than in Samara was in the Soudan, in Africa. There a fat sheep could be purchased for four shillings—a hundred eggs for the same price; while on the White Nile the value even of human beings was so depreciated as to be almost incredible; and many people in this country will utterly disbelieve that a mother could sell her own child for a small quantity of corn. The lad himself had not a high opinion of his paternal roof;

for later on, when his master, an Englishman, who was passing by the lad's village, told him to go back to his mother, the boy began to cry, and then said, in broken Arabic, "No, sir, mother has no clothes; you have given me clothes. Mother gave me nothing to eat, here there is plenty. Father gives me stick, and here nothing to do but eat, drink, and cook. Please let me stop!" Poor little Agau! he afterward returned with me to Cairo, and, I have no doubt, by this time has quite forgotten his father, mother, and the domestic fetish, in the virtues and vices of Pharaoh's capital.

But although Samara, and, in fact, all the south-eastern part of Russia, offers many inducements to the settler on account of the low value of land and the cheapness of provisions, there is, in spite of these advantages, one great drawback to the country, and this is the rate of mortality, the more particularly among the infantine population. Out of 1000 children born, 345 die in the first five years, 40 in the next five, 19 in the subsequent term, and the same number ere two decades have been completed. Thus, out of 1000 children, 423 will not reach their twentieth birthday. From another table of statistics I took the following figures: Out of 10,000 children born, 3830 die the first year, 975 in the second, and 524 in the third. Whether this excessive mortality is caused by the extreme rigor of the winter months, or by the love of spirit-drinking on the part of the parents, which causes them to neglect their offspring, is a difficult question to answer; although, probably, both these influences have a good deal to do with the matter. I have frequently heard educated Russians defend this theory, and curse the foundling hospitals, which, originally started to diminish the evil, have, in their opinion, only succeeded in augmenting immorality, while they have greatly added to the mortality throughout the empire.

There is a regular postal road which goes from Samara to Orenburg, and the authorities have recently established a new system along this route, which has superseded the old order of things with reference to *podorojnayas*, or passports. Formerly the traveler, previously to starting, had to visit the police, tell them where he was going, and the number of horses he re-

quired for his sleigh. They would then give him a printed document, containing his description and an order to the postmasters of the different stations to forward him on toward his destination. But now all this antiquated system has been abolished, and a *volnaya potchta*, or free post, established between Samara and Orsk, a town about one hundred and forty miles beyond Orenburg.

All the traveler has to do is to demand at the different post-stations the necessary horses, when they will be immediately furnished him, or as soon as possible after the order has been given; the traveler paying in advance four copecks per horse for each verst traveled.

I was called at day-break the following morning. The few preparations required to be made were soon finished, and I found myself in my newly purchased sleigh, which had been thoroughly repaired, driving along in the direction of Smweshlaevskaya, the first station arrived at when traveling toward Orenburg, and about twenty versts from Samara. The country was a dead flat, and of a most uninteresting description, during the whole way; a few trees scattered here and there making, by their scarcity, the bleak and naked appearance of the adjacent surroundings the more conspicuous. Naught save snow here, there, and everywhere; no signs of life save a few melancholy crows and jackdaws, which from time to time made a short flight to stretch their pinions, and then returned to perch by the side of some kitchen chimney, and extract from the rapidly rising smoke as much warmth as possible. The route much resembled the road between Sizeran and Samara; for, indeed, in winter-time every thing in Russia is either alike or hidden from view, buried beneath its blanch-white pall of snow.

The station-houses along the line of road I was then traveling were fairly clean, the furniture consisting generally of a horse-hair sofa and some wooden chairs, while a few colored prints of the emperor and other members of the royal family of Russia were hung about the walls and made up the attempt at decoration. A book in which to inscribe complaints was also kept, and any traveler who felt himself aggrieved could

write down his grievance, which would be subsequently investigated by an inspector, whose duty it was to perform this task once a month. I sometimes used to while away the time, while waiting for fresh horses, by turning over the pages of the grumbler's book—occasionally, indeed, having to add my own grievance to the list—the badness of the horses being a frequent source of annoyance to the passengers.

I reached Bodrovsky, the next station, a little after sunset, only halting sufficient time to drink a few glasses of tea, in order the better to resist the rapidly increasing cold, the thermometer having fallen to  $20^{\circ}$  below zero, Reaumur, when I started again for Malomalisky, about  $26\frac{1}{2}$  versts distant. I hoped to reach this point about 9 P.M., and there refresh the inner man before proceeding on my journey. It is hungry work, sleigh-driving in the winter, and the frame requires a good deal of support in the shape of food in order to keep up the vitality. However, it is no good forming any plans in which time is concerned in Russia. The natives have a Mohammedan-like indifference to the clock, and travelers must succumb, however unwillingly, to the waywardness of the elements.

Presently I became aware, by some pistol-like cracks—the sounds of the whip reverberating from the backs of my horses—that there was a difference of opinion between them and the driver. A blinding snow had come on; the darkness was so great that I could not distinguish the driver. Our jaded animals were floundering about in all directions, vainly endeavoring to hit off the original track, from which it was evident that they had strayed. The man now got down from his box, and, leaving me in charge of the horses, made a wide cast round on foot, hoping to discover the road.

## CHAPTER IX.

Delayed by a Snow-storm.—Tchin.—Russian Curiosity.—A Conservative Inspector.—General Kryjinovsky.—He tells me that I speak Russian.—The Interest the Paternal Government takes in my Movements.—Russia and China.—A Newly-married Sleigh-driver.—A Camel in Love.

THE SNOW all this time was falling in a manner unknown to people in this country, and was piling itself up against the sleigh in such volumes that I foresaw, if we could not speedily reach the station, we should inevitably be buried alive. After about half an hour's search the driver returned, and said to me, "O Lord God!—you are a misfortune. Let us turn back." I replied, "If you have lost the way, how can you turn back? Besides, if you know the road, we are now half-way, so it is just as easy to go forward as to return."

He had found the track, but by this time the sleigh was so buried in the snow that the horses could not stir it. There was only one thing to do, which was for me to get out and help him to lift the vehicle, when we eventually succeeded in regaining the path.

The fellow was a good deal surprised at this action on my part, for Russian gentlemen, as a rule, would almost prefer to be frozen to death than do any manual labor. Presently he said, "One of noble birth, what shall we do now?" "Go on." But at last, finding that it was no use, and that the snow in front of us had drifted over the track to a much greater extent than over that part of the road which we had left behind, I was reluctantly obliged to give the order to return. This he obeyed with the greatest alacrity, the horses, as well as the driver, showing, by their redoubled exertions, that they were well aware of the change of direction.

There is nothing so disheartening to a traveler who wishes to get forward rapidly as the frequent snow-storms which occur

in winter in this part of Russia. Days upon days of valuable time are thus lost, while any attempt to force a way through at all hazards will only lead to the extreme probability of your being frozen to death, without enabling you in any way to accelerate your arrival. The inspector at the station laughed heartily when we returned, and said that it was very fortunate I had not to pass the night out in the open. He had previously advised us not to attempt the journey that evening, but wait for daylight. However, I did not believe him, and consequently had to buy my experience.

He was very anxious to know what my *tchin* (rank) was; whether I was *voennye* (military) or *statsky* (a civilian); and the spelling of my name caused him a good deal of perplexity.

Of all the countries in which it has been my fate to travel, the land where curiosity is most rampant is decidedly Russia. Whether this comes from a dearth of public news and subjects for conversation, or from something innate and specially characterizing the Slavonic race, it is difficult to say. The curiosity of the fair sex, which in other countries is supposed to be the *ne plus ultra* of inquisitiveness, is in the land of the Tzar far outstripped by the same peculiarity in the male inhabitants. Of course I am alluding the more particularly to the lower orders, and not to the upper classes, though even with the latter it is a feature that can not help striking the foreigner.

The inspector was a thorough old conservative, and greatly mourned the new order of things, and that he could no longer demand the traveler's *podorojnaya*, or pass. "Why," he said, "I do not know who I am addressing; I may be talking to a shop-keeper, and call him Your Excellency, or address a grand duke as simply one of noble birth." "Yes," chimed in some travelers who were benighted like myself, "and rogues can travel now, for they are not obliged to go to the police." I was rather amused at this. There was decidedly a wish on the part of the other wayfarers to know who I was; so, pulling my English passport out of my pocket, I said to the inspector, "There, you can look at my *podorojnaya*." He turned it upside down; and then said, "Ah yes! you are a Greek; but what a beautiful crown that is on it! You must be some great per-

sonage going to Tashkent." "Perhaps so," I replied, assuming an air of importance. "There is a royal highness coming through soon," said the inspector; "I heard it from a peddler who went by yesterday; and one of his officers is traveling on in front to make preparations. Perhaps his excellency," turning to me, "is that gentleman." "No," was my answer, when one of the company, who appeared a little annoyed at my evident unwillingness to undergo this process of pumping, remarked that there had been several robberies in the neighborhood. "Yes, there have," said another, and the assemblage all looked at me, as much as to say, "You are the man; now, do not deny it; we shall not believe you."

So the evening wore on, till one by one we laid ourselves down to rest, when a sound very suggestive of a pig-sty awoke the echoes of the night. On looking out at day-break, I found that the wind had subsided, and the thermometer had risen to within a few degrees of freezing-point. There was no time to be lost, particularly as I could not tell how long this exceptional order of things would last; so, ordering fresh horses, I recommenced the journey. A great deal of snow had fallen during the night, and it was fortunate that we had returned to the station, as in some places, only a little distance beyond the spot from which my driver had retraced his steps, were drifts eight and ten feet deep. "Praise be to God that we did not fall in!" said my Jehu, pointing them out to me as he drove by; "I might have been frozen."

A single line of telegraph ran along the side of the road, being part of the wire which connects the capital with Tashkent. The high poles from which the line was suspended served as a capital landmark to point out the route which we must follow. Presently the scenery changed, and some plantations here and there relieved the eye, tired by continually gazing over the endless waste. Low trucks on wooden runners, drawn by two or four horses, and laden with iron rails for the construction of the railway, encountered us on the path; while in many places we had great difficulty in passing, owing to the narrowness of the road, my Jehu's vocabulary of expletives being more than once thoroughly exhausted upon the heads of the sleighmen,

they having, as it appeared, purposely tried to upset our sleigh by charging it with their heavily laden vehicles.

A few stations farther on the road I met General Kryjinovsky, the governor of the Orenburg district, who was on his way to St. Petersburg, accompanied by his wife and daughter. He had highly distinguished himself in his earlier career in Turkistan, and to this he owes the important post intrusted to his charge. He is a little, spare man, with a keen glance and determined eye, and, if I might be allowed to judge from our brief interview, he was not the sort of individual who would care to give me much information about my journey, of which he did not seem to approve.

"You must remember," he said, "on no account are you to go to India or to Persia. You must retrace your steps to European Russia along the same road by which you go. You speak Russian, I hear," he suddenly remarked, looking fixedly at me, our conversation having been up to that time carried on in French.

"Yes," I replied; "but how clever you are to have made this discovery, considering that we have not spoken one word in your language, and you have never seen me before!" This took the general a little aback, and he slightly changed color.

He had evidently received a communication from some authorities at St. Petersburg, to the effect that I was acquainted with Russian, generally an unknown tongue to foreigners, and to a certain extent had let the cat out of the bag. He now observed, "Oh, I only supposed you did so." In the mean time, his wife and daughter were taking off their furs in the same apartment, the accommodation for ladies being of the most meagre kind in these road-side stations, there being no retiring-rooms whatever; and the fair sex have in this respect to put up with much more discomfort than the men.

As I drove away, after our interview, I pondered the general's words well over in my mind—"You must not go to India; you must not go to Persia; and you must retrace your steps exactly by the same route you go." It was really very extraordinary to see how much interest this paternal government in St. Petersburg took in my movements. Here I was traveling

in a country where the rulers defend the despoliation of the inhabitants in Central Asia, and the annexation of their territory, on the ground that it is done for the purpose of Christianity and civilization. And yet the Government of this civilized nation made more fuss about my traveling in Central Asia than any mandarin at Peking whose permission I might have had to ask for a journey through the Celestial Empire.

It will take the Russians a long time to shake off from themselves the habits and way of thought inherited from a barbarous ancestry; and the veneer of polish laid on by a two hundred years' intercourse with Europe requires but little rubbing to disclose the Tartar blood so freely circulating through their veins.

Some distance farther on the road I observed a strong disinclination evinced by the man whose business it was to drive me to the next halting-place. He was a fresh-looking, sturdy fellow, and I could not understand the evident dislike he had for his fare, the more particularly as I had made a point of well tipping the respective drivers in order to get on as fast as possible. "What is it?" I inquired of the station-master. "Is he ill?" "No," was the reply; "he was married yesterday, that is all." It seemed somewhat cruel to tear away the poor fellow from the conjugal bliss that awaited him in the next room, but there was no help for it. No other driver could be procured, and the duty must be performed, while, if I had not before remarked that there was something amiss with the fellow, I should very soon have found it out by the extraordinary motions his horses imparted to the sleigh.

He lashed the animals, which kicked and jumped, performing antics which slightly resembled the convulsive twitchings of an individual suffering from St. Vitus. I was thrown in the air and caught again by the rebound; upset, righted, and upset again, without having had time to realize the first disaster; cartridge-cases, gun, saddle-bags, and self all flying in the air at the same instant; the enamored driver forgetting every thing, in the absorbing influence of his passion, save the desire to return to the side of his adored Dulcinea.

I once rode a camel in love. This was in the Great Korosko

desert. He was known by the name of the Magnoon, or the Mad Camel; but whether on account of his susceptible heart or not, I can not say. I shall never forget on one occasion, when the amorous quadruped had accidentally become separated from the Juliet of his affection, a sweet creature that carried the sheik of our party. She was very old, but this was no deterrent in the eyes of her ardent admirer, who was miserable when not at her side. I had ridden on a little ahead of the party, when the voice of Juliet, who was being saddled in the desert, and who vented her woes in weird squeals and sounds appropriate to her race, was wafted by the breeze to the attentive ears of her admirer. He was a very long and a very tall camel, and in an instant he commenced to rear. My position became both ludicrous and precarious—ludicrous to every one but myself, who was interested in the matter more than any one except Romeo—and I found that I was, as it were, slipping down the steep roof of a house, with nothing to hold on by but a little peg about four inches long, which projected from the front part of the saddle.

It was an awful moment, but he did not keep me long in suspense; and performing an extraordinary movement, he suddenly swung himself round on his hind legs, and ran as fast as ever he could in the direction of the fair enticer. A camel's gait is a peculiar one; they go something like a pig with the fore, and like a cow with the hind legs. The motion is decidedly rough, and at this moment my steed was seized with a strange and convulsive twitching which threatened to capsize the saddle. My position became each second more ridiculous and appalling. I was a shuttlecock; Romeo's back was the battledoor. At every moment I was hurled into the air, the fear of missing the saddle and falling on the ground being continually in my mind. The little projecting knob, which seemed an instrument of torture like the impaling sticks used to punish the unfaithful in China, was also a source of consternation, and I do not think I had ever felt a more thorough sensation of relief than when, on arriving at our encampment, Romeo halted by the side of his Juliet.

The episode with Romeo had been an alarming one, but it

was nothing to being driven by this amorous young Russian as a charioteer; and at last, after having been deposited with all my luggage for the third time in the snow, I resolved to appeal to his feelings by a sharp application of my boot. "Why do you do that?" he said, pulling up short; "you hurt; you break my ribs."

"I only do to you what you do to me," was my reply; "you hurt, you break my ribs, and property besides."

"Oh, one of noble birth," ejaculated the fellow, "it is not my fault. It is thou, O moody one!"—to his off-side horse, accompanied by a crack from his lash. "It is thou, O spoiled and cherished one!"—to his other meagre and half-starved quadruped. (Whack!) "Oh, petted and caressed sons of animals" (whack, whack, whack!), "I will teach you to upset the gentleman!"

## CHAPTER X.

Sleigh Sickness.—A Happy Family.—Orenburg.—Nipping.—Gas from a Charcoal Stove.—A Professor of Eastern Languages.—The Chief of the Police.—Special Order prohibiting Foreigners from traveling in Turkistan.—Messrs. MacGahan and Schuyler.—In Search of a Servant.—Friendly Interest Russian Officers take in India.—Exhibition of Maps.—Map of Punjab.—March Routes.—General Bazoulek.

It was hard work, this perpetual traveling, for wherever the roads were passable I kept steadily journeying onward, and gradually diminished the distance that lay between myself and Orenburg.

For the last hundred versts there were hardly any travelers save at one station, where I met a few officers who were on their way to Samara. They did not much fancy the piece of road which lay before them, and told me that the winter we were having was the most exceptionally cold season they had ever experienced in those latitudes. Occasionally the road for a few miles would take quite a different aspect, a succession of ridge and furrow having been formed by the wind, which had billowed up the snow in this strange manner. The motion my sleigh would then assume was any thing but of an agreeable character, and any person who suffers from crossing the Channel would have found that a journey in a sleigh can, under certain circumstances, be quite as disagreeable. On the evenings when there was no storm, when the roads were smooth and the horses good, it was very agreeable traveling, the stars and other constellations lighting up the heavens with extraordinary brightness, and making the night as clear as day, while the "tinkle, tinkle, tinkle" of the sleigh-bells, changing time as the horses changed their pace, now ringing fast and furiously, then dying away as our animals struggled up some eminence, helped to while away the hours. When about sixty versts from Orenburg, I was told that a short cut off the road would

diminish the distance considerably. I determined to avail myself of this information, and take the risk of not being able to find horses at the farm-houses on the road, where the farmers, if they have any animals in their stables, are only too glad to let them out to the travelers.

Presently we arrived at a cottage the fac-simile of an Irish hovel. Here were some unclean four-footed ones, sharing the habitation with the two-legged inmates. Pigs, calves, men, women, and children were huddled together round a huge stove, which barely warmed the ill-built and wretched hovel. But the horses supplied me were good, and finally we crossed the Samara River. Once more some signs of cultivation, for a few brick houses were to be seen: my driver leaped from his seat and tied up the bell on the horse's head-collar. We were approaching a town, and shortly afterward we dashed up the principal street at a good swinging gallop, my sleighman shouting cheerily, and cracking his whip at every bound. Orenburg was reached, and a few minutes later I found myself in a well-warmed room, enjoying a wash, the luxury of which can only be appreciated by those who have driven four hundred versts through Russia in the winter, and who have thus practically become acquainted with the slight respect the Russians show to the good old maxim, "Cleanliness is next to godliness," the latter quality, as displayed in a Russian devotee, being more allied with dirt than any thing else I can mention.

It was evident that I was rapidly leaving civilization behind me. No bed-linen could be procured, and on my asking for a towel, the nearest approach to this commodity which could be obtained was a table-napkin. Russians when journeying in these regions carry about their own bed-linen, pillow-cases, etc., and either dispense with sheets altogether, or are contented with a rug. The architect who had designed this hotel was evidently a stranger to comfort, as this is understood in other countries. To go from the dining-rooms to the bedrooms, it was necessary to pass through an open court-yard, which, as the thermometer was at that time occasionally  $30^{\circ}$  below zero, Reaumur, did not conduce to the traveler's comfort. The people staying in the inn were chiefly officers, and a well-worn bill-

iard-table in a room down-stairs was being played on incessantly night and day ; while the attendant at a bar, where *caviare*, salt-fish, anchovies, sour-kROUT, and all kinds of relishes, with spirits and liquors, could be procured, had not a spare moment to himself.

In fact, there is no country in the world, not even the United States, where so much of what is commonly termed nipping goes on as in Russia. Probably the extreme cold, to a certain extent, permits the inhabitants to take such liberties with their stomachs ; but the increasing numbers of Russian visitors who are each summer to be seen at Carlsbad, and their general complaint—liver—is a good sign that this dram-drinking, if persisted in, eventually sows the seed of disease.

When I awoke the following morning, it was with a splitting headache and a feeling of oppression, which, except when once half suffocated by the gas out of a balloon, I can not remember to have ever before experienced. It was with a good deal of difficulty that I could raise myself from my bed, and, on opening the door of the room and breathing the cold but pure air, my legs gave way under me, and, staggering, I fell down. It then flashed across my mind that the stove had been shut up too soon the previous evening, the consequence being that the poisonous gas from the charcoal had escaped into the sleeping-apartment. Luckily, however, for myself, the room which had been given me was a large one. The stoves in Russia, though admirably arranged so as to keep up a due degree of warmth in the house, require considerable care, and any neglect in this respect will lead to disagreeable consequences. Indeed, seldom does a winter pass without some traveler or other falling a victim.

Later in the day I drove to the house of an American gentleman, a Mr. G——, for whom I had a letter of introduction. He received me with the usual hospitality of his nation, and promised to do every thing he could to further my views. But as for information about the road to Khiva, he could give me none. All the news and gossip about Tashkent, Samarcand, and the recent disturbances at Kokan he had, so to speak, at his fingers' ends ; but Khiva was a sealed book to him, and he

recommended me to call upon a Mr. Bektchourin, a Tartar gentleman, and the Professor of Eastern Languages at the Russian Military Academy, who, he said, knew more about the subject than any other man in Orenburg.

On returning to my hotel, the waiter informed me that the chief of the police had sent an order that I was to attend the police-office immediately. It seemed a little strange his forwarding me this communication through a servant at the inn, and not through some more official channel. However, at once obeying the command, I proceeded to the residence of the police-officer, and shortly afterward was shown into the chief's room. He held, it appeared, the rank of a colonel in the army, and said that he wished to know why I had come to Orenburg. I replied that "I was going to Russian Asia;" when he remarked, "Well, I can not allow you to do this, unless you have permission from the authorities in St. Petersburg. There is a special order prohibiting foreigners from traveling in Turkistan." I then showed him the letter I had received from General Milutin, which was written in French. He perused it with difficulty, and to all appearance was not well acquainted with that language. He then said, "By what route do you propose to go?" I replied by Kasala, and perhaps from there to Tashkent, and so on to Khiva . . . . anyhow, first of all to Kasala. "Yes," he said, "that is your best plan; for there you will be able to obtain information which no one can here give you." From the police-office I drove off to call upon Mr. Bektchourin, the Tartar gentleman.

On my ringing the bell, Mr. Bektchourin opened the door himself. He was a tall, noble-looking old man, in a long Eastern dressing-gown, which was fastened around his waist with a sash, while a fez cap on his head betokened an allegiance to the faith of Islam. He was a little surprised to see a stranger, but courteously invited me to enter his abode; and when I had explained the object of my visit—which was, first, to know if he could give me any information about the route to Khiva, and, secondly, if he would recommend me a Tartar servant who could speak Russian—he said, "My good sir, I will do every thing I can; but first of all you must drink some tea," and a servant

entering with some glasses of this beverage, Bektchourin, handing me a cigarette, lighted one himself, and slowly sipped the thought-inspiring liquid.

Presently he remarked, "First of all, my good sir, as to going to Khiva, it is winter; the Syr Darya [Jaxartes] and Amu Darya [Oxus] rivers are frozen up. The difficulties and hardships will be immense. You will have to ride on horseback over five hundred versts of snow-covered steppes. If it had been summer you would have had no difficulty whatever, for, once arrived at Kasala, better known as Fort Number One, you could have gone in a steamer, and have been landed within a few miles of Petro-Alexandrovsk, our fort in Khivan territory, without any fatigue or danger. In winter, however, it is very different, and I sincerely advise you to give up the idea altogether, or to come back in the summer and then perform the journey." I here remarked that it was not likely that I should have taken the trouble to travel even so far as Orenburg in the winter without having made up my mind, previously to leaving London, as to what my intentions were. "Quite right, my good sir," continued the kind old gentleman, "quite right; if you mean to go, I will help you; but at the same time it was only right of me to say what my opinion is about the matter; and indeed," he added, "I really can not give you any information as to the routes, for at this time of the year all will depend upon how much snow has fallen upon the steppes, and this you can only find out at Kasala. As to recommending you a servant," he added, "I do not know of one at present, but will make every inquiry. Not that I much care about the task," he continued, "for there was an American gentleman here not long ago with the secretary of the United States Legation at St. Petersburg—Messrs. MacGahan and Schuyler were their names. I was asked to recommend them a servant, and to get them one in twenty-four hours. How I toiled and slaved! My good wife, too, asked all the people of her acquaintance, and we hunted everywhere to find an honest Tartar servant; not but that there are plenty of honest Tartars," he added, "quite as many as Christians, but Mr. Schuyler required a man who could speak Russian, and who, to a certain extent,

was accustomed to European ways. Well, we searched everywhere, and at the last moment a fellow offered himself for the situation. I could hear of nothing against his character, and the fact was, I had no time to make inquiries. But the next thing I heard was that the servant had turned out to be a scoundrel, and that Mr. MacGahan, who wrote a very interesting book about his journey, had adverted to me in it, and said that I had recommended the man. Now, if I get you a servant, perhaps you will write a book and say the same as Mr. MacGahan has done—that is, if you are not pleased with your servant; but I tell you candidly that I can not in any way be responsible for his character, although I will do my best to find you an honest fellow.”

No one could have been kinder than Mr. Bektchourin. He assured me that he would make every inquiry with reference to the object I had in view; while I relieved his mind by promising to speak to Mr. MacGahan, so that when another edition of “Campaigning on the Oxus” came out, Mr. Bektchourin’s explanation of the circumstances might be appended in a note. Probably, on account of the military element in the hotel, the newspapers were represented by the *Imalid*, and, on turning over the leaves of an old number of this journal, I came across a paragraph which showed the friendly interest the Russian officer who wrote it evidently took in India.

It was to the effect that at a late exhibition of maps in Paris, the more recent British maps of the Attrek and Afghanistan were not to be found, but that an interesting map of the Punjab, with all the various march-routes, and which the compiler had particularly not intended to be published, was to be seen on the expedition.

The following day I called upon General Bazoulek, the governor *pro tem*, now that Kryjinovsky was away. He was a good-looking man of about five-and-forty, and a little pompous in his demeanor, for in Kryjinovsky’s absence he was all-powerful at Orenburg, and he duly endeavored to impress upon me the importance of his position. He could give me no information whatever as to how to go to Khiva, his remark being the same stereotyped one repeated ever so many times before:

“You must go to Kasala, and there you will be able to obtain every information.” On inquiry if there was a post to Khiva, his answer was, “I believe so, but I do not know by what route it goes.” In fact, the ignorance displayed by all the officials with whom I came in contact might have surprised any one aware of the great importance attached to the study of geography by the Russian military authorities. I could not explain it to myself otherwise than by assuming that the real solution of the problem consisted in the politeness of the officers, who preferred being thought ignorant to rude.

## CHAPTER XI.

The Ural Cossacks.—Dissenters.—Two Thousand Five Hundred Men Banished.—Exiles Flogged.—A Battue.—Reports about General Kauffmann.—The Tzar's Officers in Turkistan.

THE principal topic of conversation at Orenburg was a recent emeute amidst the Ural Cossacks. It appeared that the inhabitants of the town of Uralsk, as also many of the people in that neighborhood, had become excessively discontented with the military law of universal conscription. Previously to the promulgation of the new edict, the better-to-do classes had not sent their sons to serve, and the ranks were filled with recruits from the poorer orders. But now all was changed: money would no longer purchase a substitute, and grievous discontent possessed the minds of the Ural Cossacks. Most of them were Raskolniki dissenters from the Greek Church, and belonged to the old faith (Staroi vara). When they were ordered to send their sons to serve, they rebelled, and openly called the emperor Antichrist. This was too much for the pious-minded authorities at St. Petersburg, and 2500 of the malcontents had been banished from Uralsk to Central Asia, while it was said at Orenburg that 2000 more would speedily follow.

The delinquents had been marched from Orenburg to Kasala, and from that place it was intended to transport them to Khivan territory. A detachment of 500 had been already sent to Nookoos, a small fort recently constructed by the Russians on the right bank of the Amu Darya. It appeared that the commander at Kasala had experienced much difficulty with the men when he ordered them to march under escort to Nookoos: they absolutely refused to stir. At last he ordered them to be attached to camels by cords, and then commanded the Orenburg Cossacks to flog the prisoners with their whips. This

had been done with great barbarity, and I was assured that three of the victims had died under the lash. The commandant of Kasala had written to St. Petersburg to know what was to be done with the remainder of the exiles.

G—— now informed me of a battue which had taken place by orders of Kryjinovsky a few weeks previous to my arrival, with the object of destroying some wolves, which had been doing a vast amount of damage in the neighborhood. Several miles of country had been inclosed by beaters, who gradually reduced the circle. However, the wolves proved too much for the sportsmen, as the latter were not able to bag a single animal.

I must say I had become rather skeptical as to the existence of these carnivorous beasts—that is to say, in any large quantities: I had now traveled over five hundred versts of country, and had not seen or heard a single one. That there were wolves I did not deny, but was inclined to believe that both their numbers and depredations were much exaggerated.

Kauffmann, the Governor-general of Turkistan, was said to have sent for two more regiments from European Russia, and they were to be dispatched to Turkistan immediately, he himself being now on his road to St. Petersburg; and people in Orenburg said that he was not in very good favor at court, for having pushed the Russian arms farther in Central Asia than had been either the wish or intention of the emperor. It was declared that the Tzar himself was very much opposed to this system of annexation in the East, and had only been induced to permit it on the representations of his generals that they were surrounded by lawless tribes, who carried off and imprisoned Russian subjects.

It is easy to make a good case if the counsel for the plaintiff is the only one heard. The Kokandians and Khivans have not had the opportunity of putting forward their side of the question, so, as is naturally to be supposed, the Russian generals have invariably carried the day. Indeed, we can not wonder at the Tzar's officers in Turkistan being so eager to continue in their line of conquest. Taken for the most part from poor but well-born families, having no inheritance but the sword, no prospect

save promotion, they thirst for war as the only means at hand for rapidly rising in the service. A life in Central Asia in time of peace is looked upon with contempt; and with every thing to be gained by war and nothing by peace, we ought not to be surprised should every little pretext be sought for to provoke reprisals on the part of the native population. Europe then hears of the cruelties committed by the brutal fanatics in Central Asia, of Russian magnanimity, and of Mohammedan intolerance.

Exeter Hall is quieted by the idea of a crusade against the Mussulmans; the lust for conquest is cloaked in a garb called Christianity; the sword and the Bible go forth together. Thousands of the natives are mown down by that evangelical weapon, the breech-loader; and one day we read in our morning newspapers that a territory larger than France and England together has been added to the Tzar's dominions.

But it does not signify, observe some of our legislators; the sooner Russia and India touch each other, the better. How much better for India to have a Russian neighbor on her frontier instead of the barbarous Afghans! Russia herself is apparently well aware of the advantage of having civilized neighbors on her western frontier; as it is, on that frontier she is obliged to keep concentrated two-thirds of her available forces. People in this country who advocate the two empires touching are not, perhaps, aware that our Indian army would then have to be increased to three times its present strength, and in spite of that precaution there would be less security for ourselves.

It now wanted only two days to Christmas. I had already been four days in Orenburg, and, as far as I could see, was as far off as ever from obtaining a servant. Getting into my sleigh, I hurried off to the house of my friend Bektchourin. I found him, as usual, clad in his dressing-gown; but this time he was not alone, for several Easterns were sharing his hospitality and imbibing large glasses of strong green tea, which, I was told, is the kind most appreciated in Central Asia.

It was fortunate that I had called at that hour, for it gave me the opportunity of making the acquaintance of the Khan of Kokan, formerly a sovereign, but now an exile far from his

own country, and detained in European Russia by the order of the Tzar. He was a swarthy, strong-built fellow. His captivity did not seem to have pressed much on his soul. He had readily adopted European customs, and had actually gone so far as to give a ball. This I was informed had been a great success, many of the fair damsels in Orenburg having attended it; while a wicked report ran to the effect that a great competition was going on among certain of the ladies with the view of converting the handsome khan to the Greek faith, and so on to matrimony according to the Russian rites; but, taking into consideration a Mohammedan's innate horror of idols or image-worship, and that the khan is already blessed with four wives, this would seem rather a hopeless task. However, every thing might be gained in the event of success, and a union with the convert would, it was said, not be displeasing to some of the less favored fair ones of Orenburg. Fabulous reports of his wealth were spread about the town, and great delight was evinced in every quarter on its being announced that he had elected to live in Orenburg, and was about to purchase a house in the neighborhood, having been prompted to take this step by his friendship with Mr. Bektchourin, and General Kryjinovsky, the governor of the province. According to my Tartar acquaintance, the khan's wealth had been much exaggerated, and he was not by any means the Cræsus he had been represented. On leaving Kokan, he had taken with him a large quantity of treasure in gold and silver specie, but had been robbed on the road; while at the time of which I write he had only 120,000 rubles—about £15,000 of our money—not much in the eyes of an English match-maker, but a glittering bait to the husband-seeking dames of Orenburg.

Bektchourin now said that he had discovered a Bokharan who would accompany me as a servant; and that the man could speak Russian, Tartar, and Persian, and would be very useful as an interpreter.

However, later on B—— came to the hotel, and with a long face informed me that he did not think the fellow would suit; that Mrs. Bektchourin had been making inquiries, and had discovered that the Bokharan's papa and mamma smoked opium,

while it was currently rumored that their son partook of his parents' taste. An opium-smoker as a servant would have been an intolerable nuisance. In consequence of this, Mr. Bektchourin had brought with him a young Russian, who had been a clerk in a counting-office, and could speak Tartar. He was ready to accompany me. However, I discovered that his idea was to travel as an equal, and that he had no intention to act as a servant; in fact, he had so great an idea of his own importance that I felt that the Bokharan, opium and all, would have been more eligible as an attendant.

What was to be done? I began to think that I might as well search for the philosopher's stone as for a servant in Orenburg. But B—— was by no means disheartened. "I will find one," he said, "never fear;" and a few hours later another candidate for the post turned up in the shape of a man who had already been to Tashkent with Mr. David Ker. He informed me that Mr. Bektchourin had sent him to the inn, and that Mrs. Bektchourin had lent him five rubles to take his passport out of pawn, a Jew having previously advanced some money on this document. As the Tartar appeared a likely sort of fellow, I agreed to accept his services, twenty-five rubles a month being the wages, and all found.

"Perhaps, one of noble birth," said the man, "you would not object to give me two months' wages on account? I have an aged mother, and should like to leave a little money to support her during my absence." Filial affection is undeniably a good trait in a man's character. I was delighted; I had secured a prodigy. I blessed Bektchourin, who had sent me such a paragon of virtue, and I gave the servant the money, he promising to return to the hotel early the following morning. The difficulties of the journey seemed half over already, and I went to bed convinced that at last I was in a fair way to make a start.

Hope told a flattering tale: I awoke the next morning at about five o'clock, and commenced my preparations. However, no man arrived, and a few hours later I rang the bell for the head waiter of the inn.

"Did you see the servant I engaged yesterday?"

"Yes, one of noble birth, I saw him."

"Why has he not come here this morning? He was to have been here at six."

"Perhaps, one of noble birth, you gave him some money?"

"Yes," was my reply, "for his bedridden mother."

An irrepressible grin caused the lantern jaws of the head waiter to open from ear to ear; a cavernous mouth was disclosed; a few yellow teeth bristling at irregular intervals in the huge recess appeared to take their share in his amusement, for, unrolling a long tongue, he caressed the stumpy fangs and licked his lips with an air of the greatest possible enjoyment.

"His bedridden mother! Hee! hee! hee! Oh, the son of an animal!" and the tears poured down the fellow's face as he became convulsed with laughter. "You will not see him again," he continued, "until he has spent the money: he has gone to *kootit*" (drink and make merry, the acme of a Russian's happiness). "Oh, the cunning pigeon!" and the head waiter left the room, evidently much delighted at the way I had been taken in by his countryman. At first I could hardly bring myself to believe in the waiter's version of the matter—the delinquent had such an honest-looking countenance, and my vanity was somewhat insulted at the idea of my having been so duped. No; it was more likely that he would turn up later. Comforting my mind as well as I could with this reflection, I went out to purchase some provisions for my journey with my friend G——, who, like myself, thought that the fellow would probably come to the hotel in the afternoon.

## CHAPTER XII.

A Supply of Provisions.—A Grocer's Shop.—An Elastic Piece of Goods.—Schuyler and MacGahan.—A Russian Bank.—Gold and Paper.—Coutts's Circular Notes.—Cox's Letter of Credit.—What is the Paper Value of a Half-imperial?—Russia on the Verge of Bankruptcy.—A Dinner Party.—German Military Railway Carriages.—The Russian Railway Gauge.—Christmas-day.—The Chief of the Police.—An Intelligent Thief-catcher.—A Podorojnaya.—Arrival of the Prisoner.—“Women, Women!—there were two with him.”

G——, though he was an American citizen, a man of the world in its fullest sense, and had traveled from the States to Orenburg, was not an efficient adviser with reference to the supply of provisions required by a traveler. Indeed, if I had taken my friend's advice I should have bought the contents of nearly every shop in Orenburg. The grocers looked delighted as G—— put aside tin after tin of preserved meats. At last I was obliged to remonstrate, “So! many thanks, but how can I carry them?”

“Carry them!” continued my imperturbable friend; “a sleigh is the most elastic piece of goods I know; it will stretch to any amount. Schuyler and MacGahan took a great deal more. I am only just beginning; we will go to another store presently. These sweet lozenges—they are excellent; try some;” and to the grocer, “Put four pounds of this chocolate aside, and some pickles too—delicious; a few bottles—very good. Now then, about candles and spirits for cooking, and a cooking apparatus, and a lamp. You had better have some carpenter's tools, in case the sleigh breaks, and lots of stout cord and nails. A carpet would be also a good thing to take to sit down upon; and some wine and spirits to present to the Russian officers. They like wine, and although you don't drink yourself, they do: just a dozen or so,” he added, with a supplicating glance. “Well, as you like—but it would be bet-

ter. Then you must have presents for the natives—a few looking-glasses and ornaments. You will find them very useful.”

It was really necessary to make a stand of some sort against my good-intentioned companion, who, not accustomed to travel himself, evidently thought that the entire contents of an upholsterer's or grocer's shop were indispensable requisites for a journey on the steppes.

“I tell you what it is,” I observed, “I shall not take a quarter of the things which you have put aside for me, and certainly not purchase any more. It was as much as I could do to stow myself away in my sleigh when traveling without a servant from Samara here; and the vehicle would never hold half these things, which are for the most part quite unnecessary.”

“Not at all,” said my acquaintance, giving vent to his feelings by squirting some tobacco-juice on the floor. “Not at all. Schuyler and MacGahan had two sleighs. Capital; the thing is settled.” Then, to the shop-man: “A few pounds of cocoa. I shall soon have finished,” he added.

It was useless arguing with him, and the only thing to be done was to allow the shop-man to put aside the different articles, and to say that I would call another day, select what I wanted, and then pay the bill.

I now proceeded to the bank, as the amount of Russian gold, in half-imperials, which I brought from St. Petersburg was more than would be required for my journey. The money was very heavy and cumbersome as carried in my waist-belt, and so I determined to convert a certain proportion of the precious metal into bank-notes. There is a curious circumstance in connection with the paper currency in Russia which is not generally known by foreigners. On the face of every note is printed the following announcement: “The bank will pay the owner, on demand, the amount of rubles stamped on the paper in either gold or silver.” A most just and excellent arrangement if it were only carried out; but, on the contrary, it is extremely difficult to obtain gold in Russia, and during my stay at St. Petersburg I had to wait nearly an hour at Venekin's bank while the clerk was sent out to buy half-imperials.

Finally, I had to pay six rubles eighteen copecks for each coin, the value stamped on it being five rubles, fifteen copecks. On my going to the Government Bank at Orenburg and inquiring if I could change some half-imperials into paper, the cashier declined to give more than five rubles seventy-five copecks for each piece. I would not accept those terms, and went to the Commercial Bank, the cashier here offering six rubles. On my producing some English sovereigns he greatly admired them, and said that they were very beautiful, but refused to give me any rubles in exchange, unless I would first pay the cost of a telegram to the head of the firm in St. Petersburg, so as to inquire what price he would give. I then discovered that no one else in Orenburg would change the sovereigns on any terms whatever, and so had to accept these conditions.

The following day I was informed that the Commercial Bank would change my English gold, though at a much lower rate than that which I had received at St. Petersburg. After the difficulties experienced with the sovereigns, it can easily be imagined that the cashier did not look with much respect upon Coutts's circular notes, or upon a letter of credit from Cox & Co., the well-known bankers and army agents in Craig's Court. The bills might just as well have been waste paper in so far as the official was concerned; and when I told him that the paper of these two English bankers was looked upon in London as being as good as gold, the clerk shook his head, and evidently did not believe me.

In spite of the amount of silver which is supposed to be found in Russia, there is a great deficiency of this metal in the banks. The cashiers object to pay any one more than five rubles, or fourteen shillings, in silver pieces, and confine their business almost exclusively to paper notes. When a Russian is about to leave Orenburg for a long drive by post, and a supply of silver is absolutely necessary, he has to send different people as commissioners to the bank: each man will then receive five rubles' worth of silver, and in this manner the traveler can eventually get sufficient small change for his journey. Indeed, without a certain supply of silver coin it is almost impossible to travel in Russia, the station inspectors hardly ever

having any change. The amount of paper in circulation throughout the Tzar's dominions is somewhat startling to a foreigner; and if the financial prosperity of a nation can be gauged by the amount of gold it possesses, Russia must be on the verge of bankruptcy.

In the evening I dined with a party of Russian officers, among others the chief of the telegraphs at Orenburg. The conversation turned on the chance of any immediate rupture with Germany; and one of the guests assured me that it would be impossible for a German army to make use of its own railway-carriages on the Russian lines, as the gauge has been made purposely of a different width to that employed in Germany and Austria. However, another of the party here remarked that, according to a recent account, the Prussians had got over this difficulty, an engineer officer having invented a system for building carriages and engines by which the wheels can be made to fit any kind of line, and that if this statement were true a German advance would not necessarily be impeded on account of the difference of gauge. The telegraph official was very inquisitive, and asked a great many questions about my journey, finally stating to G——, "You may depend upon it, we shall never see him again. He has been sent out by his Government, and when he has done what they want, he will return, but not by this road."

It was Christmas-day. I had been exactly twenty-five days on my journey—enough time to go from London to New York and back—and was still no farther on my road than Orenburg. All of a sudden Mr. Bektchourin was announced, his first question being, "Have you seen the servant?" "Yes," was my reply, "not only seen him, but engaged him, and given in advance fifty rubles, on account of his bedridden mother. He was to have been here yesterday morning at six, but he has not turned up."

"Oh, the dove!" said Mr. Bektchourin; "oh, the cunning little scoundrel! You do not know how he has deceived my wife. He came to her in my absence, and said that he had seen me, and then persuaded her to lend him five rubles to take his passport out of pawn. She gave him the money, and

he has bolted with it. Oh, the cunning one!"—and Mr. Bektchourin shook his fist with rage—"but we will catch him. His little back shall smart. My dear sir, I will go to the police;" and the good man hurried off as fast as he could in that direction.

Later on I called on the same authorities, and was fortunate enough to find Colonel Dreir, the Chief of the Force at Orenburg. He informed me that Mr. Bektchourin had been already there, and that the case was in the hands of Sergeant Solovef, the most intelligent of the thief-catchers in the district. As he uttered these words, the colonel touched a bell, and desired the servant to summon the sergeant.

A moment afterward the latter stood before us. He was a stout-built fellow, with a firm, resolute mouth, and a hawk-like nose and eye. He saluted in the military fashion, and remained at attention, standing stiff and erect before his chief.

"You have heard of this English gentleman who has been robbed by a Tartar servant?"

"I have heard."

"The rogue must be caught."

"I will catch him."

"The money must be got back."

"The money shall be got back—if he has not spent it," muttered the sergeant.

"Immediately."

"Immediately."

"Go at once," said the colonel.

"I obey," was the answer; and the sergeant, swinging round on his heel, saluted, and left the room.

The difficulties of obtaining a servant at Orenburg seemed to be so great that I made up my mind not to delay a day longer on that account, but to go alone on my travels—at all events, so far as Kasala. Once there, I could try again, and see whether in that part of the world an honest Tartar was such a *rara avis* as in Orenburg. In the mean time, Colonel Dreir gave me an order for a *podorojnaya* as far as Fort Number One (Kasala), and told me to go to the Kaznacheistvo, or Treasury, where the necessary document could be obtained.

On receiving the pass, I found that it was worded as follows :

BY THE ORDER OF  
HIS MAJESTY THE EMPEROR ALEXANDER,  
THE SON OF NICHOLAS,  
AUTOCRAT OF THE WHOLE OF RUSSIA,  
etc., etc.

From the town of Orsk to the town of Kasala, to the Captain of the English service, Frederick, the son of Gustavus Burnaby, to give three horses, with a driver, for the legal fare, without delay. Given in the town of Orenburg, 15th Dec., 1875.

I had barely returned to my hotel, when Bektchourin was again announced ; and while we were drinking some tea, the clashing of a sword-scabard on the staircase, and a considerable noise and clamor going on outside, warned us that something unusual was occurring. The head waiter now entered the room. His face wore a look of intense importance, coupled with admiration for something he had seen. He was evidently bursting to impart to me a startling piece of news ; and if he had been an English groom, I should have thought that my best horse had broken his leg.

“Well, what is it?” I inquired. “Is the house on fire, or your wife dead?” “No, one of noble birth, they have caught him.” “What! the thief?” cried Bektchourin. “Yes; the sergeant has him outside. The rogue is weeping; the servants are all looking on—the lodgers too: they all know that he is caught. It is grand; praise be to God! May the sergeant bring him in?” “By all means,” I said. A moment later the door opened, and the delinquent was precipitated into the room.

The sergeant followed. His mien was imposing. He took two short steps, then a long one, advanced to the side of the prisoner, placed his left hand on the culprit’s shoulder, and saluted majestically with the right. It was a comical gathering—the servants in the room, their hair bristling with awe; the lodgers outside, eager to know what was the matter; the head waiter wiping his perspiring forehead with a table-napkin—

which he had brought me as a substitute for a towel—his huge mouth extended from ear to ear, and alternately opening and shutting with astonishment; the prisoner pleading for mercy; the sergeant erect and consequential; while Bektchourin, who was more excited than I could have believed it possible for an Oriental to become, was shaking his fist in the culprit's face. "So they have caught you, brother! Ah! my little pigeon, you have come back! So you wanted to throw discredit on our race! Oh, you dear one! But now, stick, stick, stick! you shall have it! Ah, my love, you may cry!" as the prisoner groaned at the allusion to the whipping in store for him. "But the money, sergeant, the money—what has he done with it? and where did you catch him?"

The policeman was not gifted with the same command of language as his interrogator; and to gain time to collect his thoughts, he once more saluted, then jerked out, "He spent twenty-five rubles in drink—there are twenty-five here. Women, women—there were two with him!" and, having disburdened himself of this statement, the sergeant produced the money he had taken from the culprit, and laid it on the table. "For the sake of Heaven, pardon me!" cried the prisoner, going down on his knees, and trying to kiss Bektchourin's feet; "but I drank, she drank, we all drank. I will return the money."

"Very well," said Bektchourin. "First of all, the money, and then we will take into consideration the whipping; so remove him, sergeant, and see if he is able to make good the deficiency."

## CHAPTER XIII.

A Sheep-skin Suit.—Servant Hunting.—A Tartar Dwarf.—Nazar.—Packing the Sleigh.—Kirghiz Camels.—Ural Mountains.—Krasnogorsk.—Bouran.—Off the Track.—Harness broken.—Driver loses his Way.—Nazar Famished.—Keeping Awake under Difficulties.—The Rescue.—Nazar's Culinary Composition.—Benighted Travelers.—The Courier.—An Officer and his Wife.—The Doctor.—Bleeding.—Curiosity.—Tropical Heat or Extreme Cold, which is the Worst to Bear?

THE excitement created in the household by the prisoner's arrival having calmed down, I set out with my friend G—— to see if I could purchase a sheep-skin suit, such as is worn by the Russian peasantry. In the mean time, Bektchourin very good-naturedly went off in search of a servant. "I must get you one," he said. "You shall not go alone. It shall not be said that there is not one honest Tartar servant in Orenburg." G—— drove me to a street mainly inhabited by dealers in sheep-skin. On entering one of the shops, we were nearly compelled to beat a retreat, owing to the smell. A few years ago the Thames, on a hot summer's afternoon and at low water, had a bouquet peculiarly its own, and one which startled the olfactory nerves; but the odor in this little Russian shop was infinitely more disgusting. The sheep-skins were in every stage of preparation. The heat thrown out by a large drying-stove was very great, and only the absolute necessity of ordering some warm clothes forced me to remain for an instant in the establishment. The things I had brought from St. Petersburg were of no use for the journey on horseback. The shuba or pelisse, which reached to my feet, would not have been suitable attire when I was in the saddle, and sheep-skin garments, in spite of their disagreeable smell, are much the warmest clothes that can be worn. I was measured for a riding-coat, the wool to be worn inside, for some trousers of the same material, and for a pair of high stockings, or rather buckets, also

made of sheep-skin. These last would be drawn on over four pairs of fishing stockings, and in their turn be encased in some high cloth boots—experience had already taught me that any leather about the feet is a mistake—and when my new clothes were put on over those which had been made for me in London, I thought myself proof against any amount of frost.

In the evening Bektchourin returned to the hotel, accompanied by a Tartar, the most diminutive of his race, and certainly not five feet high. I was informed that he was of noble birth, his father having been an officer in the Russian army; but the family was poor, and Nazar—this was his name—liked traveling and adventure. The man expressed himself as ready to do any thing and go anywhere. He said that he never drank. I found out that he could speak Russian very well, and also the Kirghiz dialect. Bektchourin said that he could answer for the fellow's honesty; and as he wanted fifty rubles on account, to leave with his wife, I agreed to advance this amount, though with a slight feeling of hesitation, after the way I had been taken in by the man with the aged mother. The money was paid. Bektchourin, embracing me, said good-bye, and it was agreed that the servant should come to the inn the following morning, when we would start on our travels.

Long before day-break I was up making preparations, and by the time the Tartar arrived I had packed up most of the provisions. And then came the tug of war, for there were the servant, sleigh, horses, and luggage; but how on earth to put the luggage into the vehicle, and afterward to find room for my legs—this was a problem which it appeared impossible to solve.

Nazar first arranged the parcels in one manner and then in another, but all to no purpose. At last, the inventive genius of the head waiter came to the rescue, when, by firmly tying some of the provision-boxes to the edges of the sleigh, there was sufficient space left for me to sit down. Fortunately my servant was a dwarf, his personal luggage being adapted to his stature. Balancing himself on the top of the gun-case and saddle-bags, he looked round for orders. "Off!" I cried; and away we galloped down the principal street of Orenburg, es-

corted by the good wishes and farewells of the inmates of the hotel.

A biting east wind, but a bright clear atmosphere, and in a few moments I was driving along the river Oural. Every now and then we encountered a caravan of camels drawing sleighs laden with cotton from Tashkent. Any one only accustomed to the camels of the Libyan sands would hardly recognize any affinity between the undersized and shaggy animals with lion-like manes which are met with in the steppes, and the huge sleek "ships of the desert" to be found in the African Sahara. Nature has supplied the Kirghiz camels with every requisite for resisting a bitterly cold clime, and the hardy beasts could be seen striding through the snow where it was four feet deep, and where horses would have been of no avail. Here a Cossack galloped by us, brandishing his long spear as he quickly vanished in the distance; and then we met some Kirghiz wanderers, their ruddy faces—red as lobsters—offering a striking contrast to the sallow-visaged Russians I had left behind.

I must say I congratulated myself on the purchase of the sheep-skin clothes. In the keen air which surrounded us it was impossible to perceive the slightest smell, and for the first time during my sleigh journey I was feeling tolerably warm. We arrived at the station-house in capital time. In less than ten minutes fresh post-horses were harnessed, and I was again *en route*. Nothing could have been more uninteresting than the country through which we were traveling; naught but a bleak white plain, save for the low ridge of Ural mountains which, lying far away on our left, slightly broke the monotony of the scene.

Three stations had been left behind us; I had determined to put another stage—Krasnogorsk—between myself and Orenburg. Nazar was a little famished: he had started without any breakfast, and a delighted expression passed over his countenance when I announced to him my intention of halting a short time at Krasnogorsk.

"Excellent milk there," he remarked, at the same time smacking his lips; "eggs, too. Please God, we will stop."

I was myself beginning to experience a sensation of empti-

ness in my inner man; the glass of tea and rusk I had swallowed before leaving Orenburg were not very staying condiments, and I desired the driver to hurry on as fast as possible. However, the old proverb, "The more haste the less speed," proved, alas! to be a true one.

The afternoon was drawing to a close, and the golden orb could be seen dimly descending in the far-off west, when I became aware, by the numerous exclamations of my Tartar driver, principally consisting, as I afterward ascertained, of strong expressions, that he was not at all contented with his horses. At starting, I had remarked upon their appearance. They were as thin as laths, or, as Jorrocks would have said, "as her-ring-gutted as greyhounds," the ribs of the animal in the shafts looking as if they might at any moment pierce the skin. The driver had harnessed his beasts in what the Russians call goose fashion, that is to say, one in the shafts and the other two as leaders. His short whip, with lash some twelve feet long, and which previously he had allowed to trail behind the sleigh, was now continually in the air, while the thong, thick as my wrist at the handle end, resounded from the flanks of the overtaxed animals—sounds like pistol-shots breaking the deep stillness of the snowy waste.

In answer to the question as to what was the matter, the one word "Bouran" was his answer; and by the way the gradually rising gale was beginning to drift the snow across our path, it became evident that we were about to encounter a heavy storm.

Presently the atmosphere became denser with flaky particles, the cold becoming more and more intense. The last rays of the setting sun had disappeared from view, and, in spite of all my wraps, I began to feel the first insidious onslaught of the elements.

Darker and darker grew the shades around, till at last I could barely distinguish the driver's back; and my little Tartar servant, perched like a monkey at his side, informed me, in a melancholy tone, that we had lost our way. It was the case. We were off the track, while our wearied animals, up to their flanks and breast-deep in the snow, were vainly endeavoring to plow

a passage forward. A final effort, caused by the pitiless lash of our driver's whip, and the goaded steeds burst through the barrier. Up and down went the sleigh, bounding wildly over the treacherous furrow, till at last one of the horses stumbled and fell, breaking his rope harness, and bringing us to a dead halt.

Our team had collapsed, that was evident, and the driver seemed to have equally succumbed, for he left off swearing, and his whip, which up to that moment had never ceased cracking, lay stretched out behind the vehicle. He got off the seat, and, having with difficulty succeeded in raising the fallen animal, jumped on his back and made a wide cast round, in the hope of discovering the track.

"I am starving," said my little Tartar, in a melancholy tone: "I had no breakfast—my belt is very loose;" and, suiting the action to the words, he commenced tightening the strap round his waist, in order the better to resist the wolf inside. I had some bread and chocolate in my pocket, and, dividing it with him, we stopped for a while the pangs of hunger.

In about an hour's time the driver returned, and in a mournful tone informed me that he had lost his way, that we must sleep out, and that in all probability we should be frozen. Not a pleasant piece of intelligence, with the thermometer below zero, and a hurricane searing the face as if it were with a red-hot iron if we exposed the smallest piece of skin to its onslaught; while the flakes, drifting higher and higher around the sleigh, threatened, if the storm continued much longer, to bury us alive.

There was no wood in the neighborhood—nothing with which we could make a fire—and the sleeping-sack, which I at once thought of, proved useless, owing to the small size of the aperture. We had no shovel to make a snow house, and there was naught to do save to sit it out the life-long night.

My hands and feet first began to smart, and the nails to ache as if they were being scorched over a fire—a nasty burning, gnawing sensation which eat into the joints and then died away in a dull feeling of indescribable numbness which seized all the limbs. The pain was considerable, although it did not

amount to that agony experienced from severe frost-bites, and which I had to undergo later on in the journey. A heavy weight seemed to bear me down, and I dozed off for a second, till aroused once more to the reality of existence by the groaning of my little servant. He was murmuring something to himself in a low tone, but not one word of complaint ever escaped his lips.

I desired him to get inside, and, giving the Tartar coachman all the furs that could be spared, we pulled ourselves together, as it is commonly termed, strung our nerves for the occasion, and determined not to go to sleep.

There was now no more pain, and my thoughts began to wander to far-off places, while well-known faces came and looked at me, then flitted away in the waste, and were replaced by well-spread banquet-halls, laden with viands which vanished as in my dream I strove to partake. It was over, and I was lost to consciousness, when I was suddenly aroused by a sharp tap on my elbow, and a violent shaking from the hands of my follower. "Do not close your eyes, sir," he said, "or you will never open them again."

It was a hard task making the effort, but it was done, and presently I had, in my turn, to keep him from succumbing to the cold. All this time the driver was uttering some grunting exclamations from beneath the snow, which my slight knowledge of the Tartar language did not allow me to comprehend; loud, hoarse sounds and ejaculations blurring forth at intervals and breaking the stillness of the night, for the wind had fallen, and a dead silence reigned around.

"What is he doing?" I inquired of my servant; "is he praying?"

"No, sir," was the reply; "he is only lamenting his fate, and swearing at the horses for having brought us into this plight."

So the night wore on, and those only who have laid on a sick-bed, and heard the endless tick of the clock as the hands go round the dial, can tell how glad we were when the first faint streak of color in the far-off east warned us that the day was breaking. We then pulled out the driver from beneath

his cold, white canopy, and found him, though very stiff, otherwise not much the worse for his night's lodging. He shook the snow from off his furs, and then, stretching himself two or three times to see if his joints were all right, proceeded to mount one of the horses, and said that he would ride off to the next station for help. This he did, making his way as best he could to the road, now distant from us nearly a mile, at times disappearing from our gaze as horse and rider struggled through the piled-up snowy ridges.

An hour sped by, and yet another, but there was no longer any danger in seeking sleep, and at midday I was aroused by a friendly pressure from the hand of a farmer, who had been summoned to our assistance by the driver.

"Well, brother," said the jolly, round-faced old countryman, "cheer up: we have arrived in time, praise be to God!" "Now, then, children," to some of his laborers who had come with him, and who were provided with spades and shovels, "dig out the sleigh." This was soon done, a well-earned remuneration bestowed on the kind-hearted peasants, when with three fresh horses we soon regained the road, and, an hour later, the station.

It had been a slow journey, for we had taken twenty-one hours to go eighteen miles; however, we were fortunate in not having lost something else besides time; and a little while after our arrival, having partaken of a strange culinary composition of Nazar's, made of rice, eggs, and chocolate, boiled in milk over a spirit-lamp—this strange mixture proving, in our ravenous state, the most savory of dishes—I felt myself once more in working order, and ready to start.

My bad luck still continued: the Fates were again unfavorable; for, on arriving at the next station, I found congregated there four passengers, all prevented from traveling by a snow-storm. Among them was the carrier with the mail from Orenburg to Tashkent, a short, thick-set, sturdy-looking fellow, with a revolver at his waist, and a determined, dare-devil expression on his countenance; not the sort of fellow that any Kirghiz or Tartar marauders would be likely to get the better of in an encounter.

He told me that the storm was very great, and it was useless attempting to go forward for the present, as if he were to do so he certainly would be benighted on the road, and very likely be frozen. The wind, according to him, was the main difficulty; for, cutting against the horses' faces, it caused them so much pain that the poor beasts could not face it, and this, he said, was the reason that travelers found themselves so constantly driving off the track.

Then came an officer and his young wife, who were returning to St. Petersburg from Tashkent, the lady looking little capable of resisting the rough life she would have to lead before reaching the railway at Sizeran. They had a comfortable, close sleigh, arranged with every requisite for keeping the travelers protected from the elements, but, in spite of this, the lady, who unfortunately looked in a delicate state of health, had suffered a great deal in the journey.

Notwithstanding all the precautions which had been taken, she found it impossible to keep her feet warm, the circulation in her extremities being sometimes quite checked by the cold wind which penetrated to the bones through carriage, wraps, and all.

Another benighted traveler was a doctor on his way to visit a patient, who lived in a village about fifty miles farther on the road. The sick man's residence was situated miles from a physician, and he had to send all the way to Orenburg for medical assistance. It appeared that he was suffering from a violent quinsy, or sore throat, an illness which is exceedingly rapid in its effects. The dispatch for the doctor had been sent off eight days previous, and probably when the son of Esculapius arrived he would find that the invalid had either recovered entirely or had been buried in the family vault. The medical gentleman had come away without any caustic, and eagerly inquired if any of us had a medicine-chest or could supply the deficiency.

My own traveling companions, the Cockle's pills and some bottles of cholera medicine, did not seem to be applicable in the case mentioned, though, if the sick man had been an Arab, I should have administered the former freely, and probably with success, as faith is worth any amount of physic, and effects most marvelous cures.

Bleeding is still very much in vogue amidst the Russian practitioners, and one of the party suggested that a little blood-letting might be advisable, and lower the patient's inflammation.

The doctor shook his head, and immediately commenced a long professional dissertation, which he interlarded with various Latin words, in order to duly impress us with his classical education, but he did not seem entirely to dislike the idea of the lancet, which I have but little doubt he eventually tried upon the unfortunate patient.

There was not much reticence among the party, each traveler being plied with different questions, and having to submit to a cross-examination as to who he was, from whence he came, where he was going to, and what was his business. In fact, the inquiries were of so exhaustive a character, the more particularly those made by the surgeon, that I had serious thoughts of telling him my age, income, and what I had for dinner the previous evening, in the hope of fully satisfying his curiosity.

The evening wore on, and one by one our party lay down to sleep, or to find what rest they could obtain, on the wooden planks of the floor, the lady being accommodated upon the sofa. In spite of the hardness of the boards, we were all speedily plunged in the arms of Morpheus, the cold winds and exposure during the previous night having taken more out of me than any other clime which I had hitherto experienced.

The burning rays of a tropical sun on an African Sahara dry up the sap of the human frame, while a long camel journey fatigues the rider, but nothing like the pitiless cold and physical suffering which inevitably accompany a winter tour through Russia.

At long intervals travelers arrived from Orenburg, and then the repose of our party would be broken for a moment by the new-comers, who strode in to take a share of the planks. There was no light in the room, and the fresh arrivals, in their endeavors to find a clear space on the floor, freely trod upon the body of the carrier. Some strong language issued from the lips of the man with the letter-bags, for which he was rebuked by the son of Esculapius, who, even at that hour of the night, could not refrain from inflicting upon us a Latin quotation.

## CHAPTER XIV.

A Start with the <sup>at</sup> Carrier.—Tea-money.—A Breakdown.—The Book for Complaints.—Improvement in Scenery.—Trade in Shawls.—An Eastern Tale.—Podgornaya.—A Precipice.—Oura.—The Inn at Orsk.—A Basin and a Table Napkin.—A Servant with a Joyful Countenance.—No Horses at the Stable.—A Man who has Horses for Hire.—You have a Grandmother.—A Blue-eyed Siren.

I DETERMINED to take advantage of the presence of the man with the mails, and said that I would continue the journey with him, hoping by this means the quicker to reach my destination. The carrier had no objection, and, after a considerable delay in obtaining horses for our sleighs, we started. There was an advantage in accompanying him, for he was well provided with shovels and spades to dig out his vehicle in the event of the horses straying from the path and stumbling into a snow-drift. The main difficulty I should have would be to keep up with him, this being owing to the superiority of the teams which are supplied for the post. However, I hoped to do this by the means of tea-money, an open sesamé to the affections of Russian sleigh-drivers, and which I had hitherto found their most vulnerable point. Let it be known that you tip handsomely, and your Jehu will drive you along regardless of his master's interest, while the regulation ten versts an hour can often be converted into half as much again.

Alas! all my calculations were upset; once more I was doomed to disappointment. I began to think that there was some influence behind the scenes, purposely doing its best to retard me on my journey. The tinkle of the bell on the carrier's sleigh resounded in my ears for the first half-hour or so, when I fell asleep.

On awaking a few moments later, I found that the sounds were lost in the distance; my horses were traveling at a foot-pace, while the driver, who had descended from his seat, was

flogging the poor beasts unmercifully, vainly endeavoring to get them into a trot.

"How far are we from the station behind us?" I inquired.

"Five versts," was the answer.

I looked at my watch. We had been one hour and a half coming about three miles, and, in spite of the sleighman's whip and imprecations, it seemed impossible that his weak team could drag us to the next stage.

It was no use going on, so I desired him to return immediately, and, on arriving at the station, sent for the inspector, and also for the book in which travelers inscribe any complaint they may wish to make.

I wrote in it that the carrier and myself had been detained forty-five minutes, counting from the time when our horses had been first ordered, and that finally the animals supplied me were so bad that they could not go out of a walk. I concluded my remarks by expressing a hope that the inspector would be punished for keeping such useless animals in his establishment.

Having written down my grievance, I read it out to the interested party, to the great satisfaction of some other travelers who, like myself, had suffered from his carelessness. The man now became seriously alarmed, and said that he had never been complained of before; that he would be ruined; and that if I would only pardon him on this occasion, he would never err against another traveler.

"Please, little father, pardon," he cried, "and I will send you on with three beautiful horses, full of fire and bursting with corn."

"Will you promise to make up for the lost time, and to catch the post at the next station? If so, I will pardon you; but if not, you shall suffer for your carelessness."

The man caught at the chance, and I wrote down at the bottom of the page that I would forgive him if he fulfilled these conditions, which, much to my surprise, he succeeded in doing.

The country now improved very much in appearance. The low chain of mountains on my left was sometimes broken abruptly for a mile or so, when a single giant would rear itself up into space before us as if by its altitude to block the inter-

vening gap. Various-colored grasses could be seen through the fleecy snow, golden-tinted and bright chestnut being the hues which predominated amidst the rising vegetation, while olive-colored brambles and thorns, sprinkled with sombre fir and pine forests, strongly contrasted with the pale carpet glistening beneath a midday sun. Stalactites in every form and shape hung pendent from the branches, the tenuous icicles reflecting through their transparent surface all the prismatic colors of a rainbow. Here spider-like webs of icy film spanned the frequent bushes, or, broken by a pitiless beam from the orb overhead, hung in silky tresses, and floated in the rising breeze. There gnarled stumps and quaintly shaped blocks of timber, half-hid from the gaze by their wintry raiment, might have been antediluvian giants of a former world, suddenly awakened to existence, and shaking off their snowy coverlet; while the bright and varied dresses of the peasantry afforded a pleasing change to the eye, after the similarity of color and costume I had remarked in European Russia.

A considerable trade is carried on in the district between Orenburg and Orsk in shawls and neck-wrappers. These are made of gossamer-like webs of goats'-hair woven into the articles above mentioned. They are marvelously light, a very large shawl, which can be put into an ordinary sized official envelope, not weighing more than a few ounces. What most surprises the traveler is the excessive warmth of these Oriental wraps, as well as the softness of their texture, many of them being so delicately made that they can be passed through a finger-ring. Any one who has seen the extraordinary lightness and softness of this material can understand what the author of an Eastern tale had in his mind's eye when he invented the story of the fairy tent which could shelter an army, and was yet so light as to be hardly perceptible to the touch.

Among other kinds of shawls offered for sale at the various station-houses on the road, and where the good woman and her daughters entreat the traveler to purchase in so plausible and winning a manner that it is difficult to say nay, are wraps made of hares'-down. This is woven by the wives of the farmers and peasants in the neighborhood into very warm shawls, and

which are softer, if possible, than those made of goats' hair, although they are not nearly so light.

The price of these articles of female attire is not by any means exorbitant. A good shawl can be obtained for from thirty to forty rubles; and I feel convinced that if some of our London trades-people were to send their traveling-agents to those parts, a very profitable return would be made on the capital invested; for the shawls in question would demand a ready sale in this country.

Just before reaching Podgornaya, a halting-place on the highway, the road became very precipitous. It was a dark night, though fortunately unaccompanied by wind; but a thick mist—which had upraised itself from the mass of vegetation which abounded throughout the district—made it extremely difficult for our driver to see the path before him. The road was bad, and in some places dangerous—now descending a steep decline, then taking a sudden bend, when a hair-breadth to right or left would have caused a general smash. At last we came to a spot where the slope was fearfully abrupt. At its steepest part our road branched off at right angles from the line in which we had been previously driving, and which terminated in a precipice. It was not quite the sort of spot that any one would have cared to drive over on a dark night; and as for myself, I was unaware of the dangers of the route. They only became apparent when I was returning along the same track by daylight, and homeward-bound from Khiva.

The two drivers had a long discussion before they would attempt the descent. When they at last commenced operations, it was with the greatest care, and one sleigh at a time, the two drivers stepping slowly backward, and leading the sliding steeds of my vehicle, after which they returned for the sleigh with the post. A slip would have been fatal; but luckily the Fates were on our side, and let us pass in safety.

The weather became much warmer on approaching Orsk, and I began to flatter myself that the real cold of the journey was over, little anticipating what was still in store.

After crossing a few frozen streams, we entered the town,

my driver crying out "Oura!"\* at every moment to his horses, which, like himself, did not appear to be sorry that they had come to the end of the stage. The town is a clean-looking one, and the houses are well built, while an air of comfort reigned around delightful to behold, after the rough work we had been going through for the last few days. The driver pulled up at a little inn known by the name of the Tzarskoe Selo. It was filled with farmers and peasants, many of them much the worse for liquor; and at a bar just within the portico a man was engaged in pouring out vodki, which was eagerly demanded by the customers.

The amount of this spirit, which is quite as strong as whisky, that a Russian moujik can drink would be an interesting theme for Sir Wilfrid Lawson to dilate upon in one of his periodical dissertations on the advantages of temperance. If the teetotalers of England, like some of their missionary brethren, should ever think of making converts abroad, they would have a magnificent field for their labors in Russia. Often when driving through the streets I have been struck by the sight of some figure or other lying prostrate in the snow. "What is it?" I would ask; "is he dead?" "No; only drunk," would be the reply, followed by a laugh, as if it were a good joke to see a man who had made a beast of himself. It may be that in proportion to the population there are not more drunkards in the Tzar's dominions than in England, or rather Scotland; but, at all events, to get drunk lowers a man in the opinion of the public in our country, whereas it is a feather in his cap in Russia.

Fortunately, there was a vacant room in the inn, and here I was at once supplied with the smallest of basins and a table napkin. In the mean time I dispatched Nazar to the post to desire the inspector to send me three horses immediately. There was no time to lose, and I wanted to hurry forward that afternoon.

Presently my man returned with a joyous countenance,

---

\* A Tartar word, from which, perhaps, our word "hurra" comes. It signifies "beat."

which betokened something disagreeable. In fact, in all countries where I have hitherto traveled, human nature, as typified in domestics, is much the same; they invariably look pleased when they have a piece of bad news to impart to their masters.

“What is it?” I asked. “Sleigh broken?”

“No, sir. No horses to be had; that is all. General Kauffmann went through early this morning and took them all. The inspector says you must wait till to-morrow, and that then he will have a team ready for you. It is nice and warm,” continued Nazar, looking at the stove. “We will sleep here, little father; eat till we fill our clothes, and continue our journey to-morrow.”

“Nazar,” I replied, giving my countenance the sternest expression it could assume, “I command; you obey. We leave in an hour’s time. Go and hire some horses as far as the next stage. If you find it impossible to obtain any at the station, try and get some from a private dealer; but horses I must have.”

In a few minutes my servant returned with a still more joyful countenance than before. The inspector would not send any horses, and no one could be found in the town who was inclined to let out his animals on hire.

There was nothing to be done but to search myself. Nazar had evidently made up his mind to sleep at Orsk. However, I had made up mine to continue the journey.

Leaving the inn, I hailed a passing sleigh, the driver appearing to me to have a more intelligent expression than his fellows. Getting into the vehicle, I inquired if he knew of any one who had horses for hire.

“Yes,” was the answer. One of his relatives had some; but the house to which I was driven was shut up, and no one was at home. I began to despair, and think that I should have as much difficulty in obtaining horses at Orsk as I had in procuring a servant at Orenburg.

I now determined to try what gold, or rather silver, would do, and said to the driver, “If you will take me to any one who has horses for hire, I will give you a ruble for yourself.”

"A whole ruble!" cried the man, with a broad grin of delight; and, jumping off his seat, he ran to a little knot of Tartars, one of whom was bargaining with the others for a basket of frozen fish, and began to ply them with questions. In a minute he returned. "Let us go," he said; and with a "Burr" (the sound which is used by Russians to urge on their horses) and a loud crack with his lash, we drove rapidly in another direction.

I had arrived at the outskirts of the town, and we stopped before a dirty-looking wooden cottage.

A tall man dressed in a long coat reaching to his heels, bright yellow trousers, which were stuffed into a pair of red leather boots, while an enormous black sheep-skin cap covered his head, came out and asked my business. I said that I wanted three horses to go to the next stage, and asked him what he would drive me there for, the regular postal tariff being about two rubles.

"One of noble birth," replied the fellow, "the roads are bad, but my horses will gallop the whole way. They are excellent horses; all the people in the town look at them, and envy me. They say how fat they are! look, how round! The governor has not got any horses like mine in his stable. I spoil them; I cherish them; and they gallop like the wind. The people look, wonder, and admire. Come and see the dear little animals."

"I have no doubt about it. They are excellent horses," I replied; "but what will you take me for?"

"Let us say four rubles, your excellency, and give me one on account. One little whole silver ruble; for the sake of God let me put it in my pocket, and we will bless you."

"All right," was my answer. "Send the horses to the Tzarskoe Selo Inn immediately."

Presently the fellow rushed into my room, and, bowing to the ground, took off his cap with a grandiose air, then, drawing out the money I had given him from some hidden recess in the neighborhood of his skin, he thrust the ruble into my hand, and exclaimed, "Little father, my uncle owns one of the horses; he is very angry. He says that he was not consulted in the

matter, and that he loves the animal like a brother. My uncle will not let his horse leave the stable for less than five rubles. What is to be done? I told him that I had agreed to take you, and even showed him the money; but he is hard-hearted and stern."

"Very well," I said; "bring round the horses."

In a few minutes the fellow returned, and exclaimed, "One of noble birth, I am ashamed!"

"Quite right," I said; "you have every reason to be so. But go on; is your uncle's horse dead?"

"No, one of noble birth, not so bad as that; but my brother is vexed. He has a share in one of the animals; he will not let me drive him to the next station for less than six rubles," and the man, putting on an expression in which cunning, avarice, and pretended sorrow were blended, rubbed his forehead, and added, "What shall we do?"

I said, "You have a grandmother?"

"Yes," he replied, much surprised. "How did you know that? I have; a very old grandmother."

"Well," I continued, "go and tell her that," fearing lest she should be annoyed if any accident were to happen during our journey; for you know misfortunes occur sometimes; God sends them," I added, piously.—"Yes, he does," interrupted the man; "we are simple people, your excellency."—"And, not wishing to hurt the old lady's feelings, should the fore leg of your uncle's horse or the hind leg of your brother's suffer on the road, I have changed my mind, and shall not go with you to-day, but take post-horses to-morrow."

The man now became alarmed, thinking that he was about to lose his fare. He rubbed his forehead violently, and then exclaimed, "I will take your excellency for five rubles."

"But your brother?"

"Never mind; he is an animal; let us go."

"No," I answered. "I shall wait—the post-horses are beautiful horses. I am told that they gallop like the wind; all the people in the town look at them, and the inspector loves them."

"Let us say four rubles, your excellency."

“But your uncle might beat you. I should not like you to be hurt.”

“No,” was the answer, “we will go;” and the knotty point being thus settled, we drove off, much to the dissatisfaction of my little servant, Nazar; a blue-eyed siren in Orsk having, as the Orientals say, made roast meat of his heart, in spite of his being a married man.

## CHAPTER XV.

Nomad Tribes.—A Picture of Desolation.—Nazar is worn out.—The Inspector.—Price of Land, Cattle, and Provisions.—The Cattle-pest.—Vaccinating the Animals.—The Kirghiz do not believe in Doctors.—Small-pox.—Strict Orders to Prevent Englishmen traveling in Russian Asia.—The Cost of Post-horses.—Robbing Peter to pay Paul.—Postal Track let out to Contractors.—Fort Karabootaok.—Filthy Stations.—Horses wanted.—Whipping the Order of the Day.—The Emperor Nicholas.—A Snow-storm.—Asleep in the Sleigh.—Frost-bites.—Physical Pain.—Mental Agony.—Cossack Soldiers.—Brothers in Misfortune.

THE aspect of the country now underwent an entire change. We had left all traces of civilization behind us, and were regularly upon the steppes. Not the steppes as they are described to us in the summer months, when hundreds of nomad tribes, like their forefathers of old, migrate from place to place, with their families, flocks, and herds, and relieve the dreary aspect of this vast flat expanse with their picturesque kibitkas, or tents, while hundreds of horses, grazing on the rich grass, are a source of considerable wealth to the Kirghiz proprietors.

A large dining-table covered with naught but its white cloth is not a cheery sight. To describe the country for the next one hundred miles from Orsk, I need only extend the table-cover. For here, there, and everywhere was a dazzling, glaring sheet of white, as seen under the influence of a midday sun; then gradually softening down as the god of light sunk into the west, it faded into a vast, melancholy-looking, colorless ocean. This was shrouded in some places from the view by filmy clouds of mist and vapor, which rose in the evening air and shaded the wilderness around—a picture of desolation which wearied, by its utter loneliness, and at the same time appalled by its immensity; a circle of which the centre was everywhere, and the circumference nowhere. Such were the steppes as I drove through them at night-fall or in the early morn; and where,

fatigued by want of sleep, my eye searched eagerly, but in vain, for a station.

On arriving at the halting-place, which was about twenty-seven versts from Orsk, Nazar came to me, and said, "I am very sleepy; I have not slept for three nights, and shall fall off if we continue the journey."

When I began to think of it, the poor fellow had a good deal of reason on his side. I could occasionally obtain a few moments' broken slumber, which was out of the question for him. I felt rather ashamed that in my selfishness I had overdriven a willing horse, and the fellow had shown first-class pluck when we had to pass the night out on the roadside; so, saying that he ought to have told me before that he wanted rest, I sent him to lie down, when, stretching his limbs alongside the stove, in an instant he was fast asleep.

The inspector was a good-tempered, fat old fellow, with red cheeks and an asthmatic cough. He had been a veterinary surgeon in a Cossack regiment, and consequently his services were much in request with the people at Orsk. He informed me that land could be bought on these flats for a ruble and a half a desyatin (2700 acres); that a cow cost £3 2s. 6*d.*; a fat sheep, two years old, 12s. 6*d.*; and mutton or beef, a penny per pound. A capital horse could be purchased for three sovereigns, a camel for £7 10s., while flour cost 1s. 4*d.* the pood of 40 lbs. These were the prices at Orsk, but at times he said that provisions could be bought at a much lower rate, particularly if purchased from the Tartars themselves. The latter had suffered a great deal of late years from the cattle-pest, and vaccinating the animals had been tried as an experiment, but, according to my informant, with but slight success.

The Kirghiz themselves have but little faith in doctors or vets. It is with great difficulty that the nomads can be persuaded to have their children vaccinated; the result is, that when small-pox breaks out among them it creates fearful havoc in the population. Putting this epidemic out of the question, the roving Tartars are a peculiarly healthy race. The absence of medical men does not seem to have affected their longevity, the disease they most suffer from being ophthalmia, which is

brought on by the glare of the snow in winter, and by the dust and heat in the summer months.

After leaving Orsk, the *podorojnaya*, or passport, system came in force, and my pass and self underwent the most rigid scrutiny; the officials at the stations being very much alarmed lest any one should escape their vigilance, and drive by the stations without having his papers examined.

I could not help asking the inspector, at a place where the examination was carried on in a very searching manner, if some horrible crime had not been committed in the neighborhood, as it appeared to me that he was on the lookout for a criminal.

"No," said the man, "that is not the reason; but we do not want any foreigners, particularly Englishmen, in these parts. Our orders in this respect are very strict."

The cost of traveling was now reduced from four copecks per horse to two and a half; however, we found that a traveler did not gain much by this reduction, as the amount paid for the *podorojnaya* very nearly made up for the difference. I now learned that the postal track was let out to some contractors, who receive a subsidy for carrying the post, and at the same time have to keep a certain number of horses for the convenience of passengers. The stations were filthily dirty, and the sofas in a disgusting state. Indeed, there were no arrangements made for washing, or for ablutions of any kind; and it seems that the Russians are of opinion that soap and water are not required when traveling, and that the less washing done on these occasions, the better.

On arriving at Karabootaok, a small fort the Russians have built, 317 miles from Orsk, I found that the term fort was a misnomer. The place is not fortified in any sense so as to resist a disciplined force, although a few resolute men could doubtless hold it for a long time against any number of Kirghiz or Tartar horsemen.

I was obliged to halt for a time at this station. There was a snow-storm going on, while the wind howled and whistled about the house, driving before it in its course such clouds of flaky particles that no horse could face its onslaught. Later on, and when the wind had a little abated, I asked the inspect-

or to give an order for three horses to be harnessed to my sleigh. But there were no animals in the stable, and we had to wait several hours before some could be procured. As a rule, however, there was but little delay, and the inspectors carried out their instructions to the letter.

Formerly, and even in European Russia, passengers were sometimes detained for days waiting for horses at the stations, the inspectors not troubling their heads about any traveler, unless he happened to be an officer. There is a story to the effect that a Frenchman, who had been kept waiting a long time for post-horses, and who could not induce the inspector to give him any, was much astonished by the behavior of a Russian captain. The latter, on asking for a fresh team, was told that there were no animals in the stable. However, he at once procured a whip and chastised the official, the result of the whipping being the instant discovery of some horses. The Frenchman seized the idea, and taking his cane followed the example set him, which he found a most marvelous specific in the course of his travels through Russia.

Only a few years ago whipping was the order of the day; and, according to some accounts, the late Emperor Nicholas himself occasionally administered chastisement to his officers. But whipping in these days is out of the question, and so I had to remain kicking my heels about in the waiting-room, although in this instance I had a suspicion that the inspector had some horses in the stable.

After waiting for several hours I was informed that some horses had been procured. The snow-storm had somewhat lulled, but the wind was almost as high as ever, and the cold more intense than any thing hitherto experienced. On leaving the station I had forgotten to put on my thick gloves, and took my seat in the sleigh, with each hand folded in the sleeve of its fellow, the fur pelisse in this way forming a sort of muff, and protecting my hands from the cold. The road was less jolty than usual, and the sleigh glided along, comparatively speaking, smoothly. The change of motion before long produced an effect; leaning back in the vehicle, I fell fast asleep.

In the course of my slumber my hands slipped from the

warm fur covering in which they were inserted, resting themselves on the side of the sleigh, unprotected by any thick gloves, and exposed to the full power of the biting east wind. This, if impossible to withstand when stationary or on foot, was now doubly dangerous, owing to the movement of the sleigh, which, going in an opposite direction, added considerably to the force with which the wind blew.

In a few minutes I awoke; a feeling of intense pain had seized my extremities. It seemed as if they had been plunged into some corrosive acid which was gradually eating the flesh from the bones.

I looked at my finger-nails; they were blue; the fingers and back part of my hands were of the same color, while my wrists and the lower part of the arm were of a waxen hue. There was no doubt about it, I was frost-bitten, and that in no slight degree; so, calling to my servant, I made him rub the skin with some snow in hopes of restoring the vitality. This he did for several minutes, but all this time the same pain previously described was gradually ascending up my arms, while the lower portions of the limbs were lost to all sensation, dead to pain—dead to every sense of feeling—hanging quite listlessly by my side, Nazar in vain using all his energies so as to restore circulation.

“It is no good,” he said, looking sorrowfully at me; “we must get on as fast as possible to the station. “How far off is it?” he inquired of the driver. “Seven miles,” was the answer.

“Go as fast as you can!” I cried.

The pain, which by that time had ascended to the glands under my arms, had become more acute than any thing I had hitherto experienced. Apparently, extreme cold acts in two ways on the nervous system: sometimes, and more mercifully, by bringing on a slumber from which the victim never awakes; and at others, by consuming him, as it were, over a slow fire, and limb by limb. All this time the perspiration was pouring down my forehead, my body itself being as if on fire, the pain gradually ascending the parts attacked.

There are moments in a man's life when death itself would

be a relief. It was about the day that an unfortunate criminal\* would have to undergo the last dread sentence of the law ; and I remember distinctly the thought occurring to my mind, as to whether the physical pain I was then undergoing was less than the mental agony of the poor wretch on the drop.

Would the distance that separated us from the station ever be traversed ? each mile seeming to me a league, and each league a day's journey. At last we arrived. Hurrying to the waiting-room, I met three Cossacks, to whom I showed my hands. The soldiers led me into an outer room, and having taken off my coat and bared my arms, they plunged them up to the shoulder in a tub of ice and water. However, there was now no sensation whatever, and the limbs, which were of a blue color, floated painlessly in the water.

The elder of the Cossacks shook his head and said, "Brother, it is a bad job ; you will lose your hands."

"They will drop off," remarked another, "if we can not get back the circulation."

"Have you any spirit with you?" added a third.

Nazar, on hearing this, ran out and brought in a tin bottle containing naphtha for cooking purposes, upon which the Cossacks, taking my arms out of the icy water, proceeded to rub them with the strong spirit.

Rub, rub, rub ; the skin peeled under their horny hands, and the spirit irritated the membrane below. At last a faint sensation like tickling pervaded the elbow-joints, and I slightly flinched.

"Does it hurt?" asked the elder of the Cossacks.

"A little."

"Capital, brothers !" he continued ; "rub as hard as you can !" and after going on with the friction until the flesh was almost flayed, they suddenly plunged my arms again into the ice and water. I had not felt any thing before, but this time the pain was very acute.

"Good !" said the Cossacks. "The more it hurts, the better chance you have of saving your hands." And after a short time they let me take them out of the tub.

---

\* Wainwright.

“You are fortunate, little father,” said the elder of the Cossacks. “If it had not been for the spirit, your hands would have dropped off, if you had not lost your arms as well.”

Rough, kind-hearted fellows were these poor soldiers; and when I forced on the elder of them a present for himself and comrades, the old soldier simply added, “Are we not all brothers when in misfortune? Would you not have helped me if I had been in a like predicament?”

I shook his hand heartily, and went to the waiting-room to rest on the sofa, as the physical shock just undergone had for the moment thoroughly prostrated me. My arms also were sore and inflamed, the spirit having in some places penetrated the raw flesh; and it was several weeks before I thoroughly recovered from the effects of my carelessness.

## CHAPTER XVI.

Kashgar.—English Officers drilling the Inhabitants.—Yakoob Bek's Envoys.—Perfidious Albion.—Tashkent.—Commerce with Bokhara.—A Railway to Tashkent.—Irghiz.—A Wolf.—Terekli.—The Boundary-line.—How Far does Russia extend?—Uncivil Inspector.—Bottles broken by the Frost.—Passengers' Necks.—Tartar Sleigh-drivers.—A Ruined Contractor.—A Team of Camels.—Head over Heels in the Snow.—The Kirghiz Horses.—A Hundred Miles' Ride.—Two Hundred Miles in Twenty-four Hours (on two Horses).—Two Extraordinary Marches.

A FEW stations farther on I met an officer, who asked very eagerly if I were going to Kashgar—he had found out, by inquiry from the inspector, who I was—and he afterward assured me that there were thirty English officers in the above-mentioned khanate engaged in drilling the inhabitants. He said that my compatriots had already organized a force of ten thousand men to resist the Russian advance, and declared that this information had come from Yakoob Bek's envoys, who had been sent from Kashgar to Tashkent, and who had stated it to the Russians.

I assured my informant that there was no truth whatever in the story, but with no effect; and he seemed thoroughly impressed with the idea that I was another agent of perfidious Albion, sent either to stir up the Kokandians or aid the Kashgarians against the designs of their Northern foe. I could not help remarking that if such were my designs it would have been far easier for me to have gone from India to Kashgar than to have come through Russia, and, as it were, through the heart of the enemy's country; but even this argument had no effect. Tashkent, according to him, was a sort of Paradise; the climate was excellent, and the inhabitants actually boasted a theatre. He said that the city contained five thousand Europeans and about seventy-five thousand natives, besides the garrison. The commerce with Bokhara was rapidly increasing,

and Tashkent becoming a great emporium for all merchandise to and from Central Asia.

According to my informant, the great desire of General Kauffmann, the Governor-general of the province of Turkistan, was to establish a railway from European Russia to Tashkent. The road from Orenburg *via* Orsk, Kasala, and the town of Turkistan had been surveyed, and was impracticable, owing to the nature of the soil. The line which would eventually unite the capital with the East would most likely pass through Western Siberia, and, according to all accounts, before very long some decisive steps would be taken with the object of carrying this idea into execution.

As we were nearing Irghiz, another fortress on the Orenburg-Tashkent road, which is on a larger scale than the stronghold at Karabootaok, although equally unserviceable, should it ever be attacked by a force belonging to a civilized power, Nazar suddenly exclaimed, "Wolf!" and, seizing my gun-case, commenced unstrapping it. But the animal showed no disposition to allow me to come to close quarters, and he slunk away as soon as he saw us, at a good jog-trot, not giving a chance for a shot.

After another long and uninteresting drive through the same sort of desert, snow-covered country which I have previously attempted to describe, we came to Terekli, a station which divides the territory under General Kauffmann's authority from the vast province which acknowledges the government of Kryjinovsky, the Governor-general at Orenburg. I was now  $761\frac{1}{2}$  versts, or about 500 miles, from Orenburg, and about to enter the province of Turkistan, which extends from this point to a line not yet decided upon by the Russian geographers.

A colonel was in the waiting-room, and he had desired the inspector not to allow any travelers to enter this apartment, for the official refused to allow me to go there, and took me into a little den inhabited by himself.

Here the *podorojnaya* again underwent a most rigid examination. The inspector was very uncivil, saying if I wanted to rest I might stop in his room, but by no means enter the one set aside for travelers; and he then remarked that it was a

gross piece of presumption on my part to think of associating with so exalted an individual as a Russian colonel.

The station-houses were much more comfortably arranged than those which I had seen in General Kryjinovsky's district. They were no longer constructed of wood—which, by-the-way, was so infested with insects as to be a perpetual source of torment to the traveler—but of cement. The stoves, too, were better arranged, and the waiting-rooms furnished with divans covered with Oriental rugs, where we could rest, spared from the war hitherto waged on us by the insect tribe.

Nazar now came to me with a melancholy face. "The bottles are broken," he said. On looking I found that the contents of some bottles of strong pickles had become frozen into a solid mass of ice, and that in consequence the glass had been fractured. On a closer inspection, I found that the other bottles were in a similar state, and all of them had to be thrown away. The havoc made by the frost was the more remarkable as the articles in question had been carefully packed in cotton-wool and in wooden cases, which, in their turn, had been thickly covered with hay.

The disregard shown for the passengers' necks by the Tartar sleigh-drivers in General Kauffmann's district was, if possible, even greater than in Kryjinovsky's province. Whenever the road allowed, the driver made his horses gallop the whole way, never once letting them trot. There was a notice put up in the waiting-rooms at each station to the effect that if a traveler should urge his driver to go more than the regulation pace, ten versts an hour, and in consequence any damage occur to the horses, the traveler was to be fined forty rubles. I could not help thinking that in Russian Asia the authorities cared less for the travelers' lives than for horses, there being no punishment whatever for the drivers should they upset their fares; while, to put it more tersely, I could not harm a horse for less than forty rubles, while my driver might break my neck for nothing.

At another station, Nazar, who had jumped off the sleigh to order a fresh team, ran back to inform me that there were no horses in the stables. It appeared, on inquiry, that the man

who had contracted to supply the track with horses had been ruined. The animals, which under the most favorable circumstances never received much care during the winter, had been half starved, some had died, and others been seized by the creditors in liquidation of their accounts. The consequence was that instead of being supplied with three fresh horses, their place was taken by three gigantic camels. I should have thought that one of these enormous quadrupeds would have sufficed to draw my tiny vehicle; but, no! the order on the *podorojnaya* was to supply the bearer with three horses, and the number must be adhered to—such was the explanation given me by Nazar.

It was a strange sight to see these gigantic beasts harnessed by some ropes to the little vehicle. I have tried many ways of locomotion in my life—from fire-balloons to bicycles, from canoes and bullocks to cows, camels, and donkeys; while in the East the time-honored sedan of our grandfathers has occasionally borne me and my fortunes—but never had I traveled in so comical a fashion.

A Tartar rode the centre camel. His head-gear would have called attention, if nothing else had, for he wore a large black hat which reminded me of an inverted coal-scuttle, while a horn-like protuberance sticking out from its summit gave a diabolical appearance to his lobster-colored visage. The hat, which was made of sheep-skin, had the white wool inside, which formed a striking contrast to the flaming countenance of the excited Tartar. He had replaced the usual knout used for driving by a whip armed with a thin cord lash, and he urged on his ungainly team more by the shrill sounds of his voice than by any attempt at flagellation, the Tartar seldom being able to get more than four miles an hour from the lazy brutes.

All of a sudden the camel in the centre quickly stopped, and its rider was precipitated head over heels on the snow. Luckily, it was soft falling, there were no bones broken, and in a minute or so he was again in the saddle, having changed the system of harnessing, and placed one of the camels as leader, while the other two were driven as wheelers. We got

on very fairly for a little while, when the foremost of our train, having received a rather sharper application of the lash than he deemed expedient, remonstrated with his rider by lying down. Coaxing and persuasion were now used; he was promised the warmest of stalls, the most delicious of water, if he would only get up. But this the beast absolutely declined to do, until the cold from the snow striking against his body induced him to rise from the ground.

We now went even slower than before. Our driver was afraid to use his lash for fear of another ebullition of temper on the part of the delinquent, and confined himself to cracking his whip in the air. The sounds of this proceeding presently reaching the ears of the leader, perhaps made him think that his companions were undergoing chastisement. Anyhow, it appeared to afford him some satisfaction, for quickening his stride he compelled his brethren behind to accelerate their pace, and after a long, wearisome drive we eventually arrived at our destination.

The country now began to change its snowy aspect, and party-colored grasses of various hues dotted the steppes around. The Kirghiz had taken advantage of the more benignant weather, and hundreds of horses were here and there to be seen picking up what they could find. In fact, it is extraordinary how any of these animals manage to exist through the winter months, as the nomads hardly ever feed them with corn, trusting to the slight vegetation which exists beneath the snow. Occasionally the poor beasts perish by thousands, and a Tartar who is a rich man one week may find himself a beggar the next. This comes from the frequent snow-storms, when the thermometer sometimes descends to from forty to fifty degrees below zero, Fahrenheit; but more often from some slight thaw taking place for perhaps a few hours. This is sufficient to ruin whole districts, for the ground becomes covered with an impenetrable coating of ice, and the horses simply die of starvation, not being able to kick away the frozen substance as they do the snow from the grass beneath their hoofs. No horses which I have ever seen are so hardy as these little animals, which are indigenous to the Kirghiz steppes; perhaps for the same rea-

son that the Spartans of old excelled all other nations in physical strength, but with this difference, that nature doles out to the weakly colts the same fate which the Spartan parents apportioned to their sickly offspring.

The Kirghiz never clothe their horses, even in the coldest winter. They do not even take the trouble to water them, the snow eaten by the animals supplying this want. Toward the end of the winter months the ribs of the poor beasts almost come through their sides; but once the snow disappears, and the rich vegetation which replaces it in the early spring comes up, the animals gain flesh and strength, and are capable of performing marches which many people in this country would deem impossible, a hundred-mile ride not being at all an uncommon occurrence in Tartary. Kirghiz horses are not generally well shaped, and can not gallop very fast, but they can traverse enormous distances without water, forage, or halting. When the natives wish to perform any very long journey they generally employ two horses: on one they carry a little water in a skin, and some corn, while they ride the other, changing from time to time, to ease the animals.

It is said that a Kirghiz chief once galloped with a Cossack escort (on two horses) 200 miles in twenty-four hours, the path extending for a considerable distance over a mountainous and rocky district. The animals, however, soon recovered from the effects of the journey, although they were a little lame for the first few days.

An extraordinary march was made by Count Borkh to the Sam, in May, 1870. The object of his expedition was to explore the routes across the Ust Urt, and if possible to capture some Kirghiz aúls (villages), which were the head-quarters of some marauding bands from the town of Kungrad. The Russian officer determined to cross the northern Tchink, and by a forced march to surprise the tribes which nomadized on the Sam. Up to that time only small Cossack detachments had ever succeeded in penetrating to this locality. To explain the difficulties to be overcome, it must be observed that the Ust Urt plateau is bounded on all sides by a scarped cliff, known by the name of the Tchink. It is very steep, attaining in some

places an elevation of from 400 to 600 feet, and the tracks down its rugged sides are blocked up by enormous rocks and loose stones. Count Borkh resolved to march as lightly equipped as possible, and without baggage, as he wished to avoid meeting any parties of the nomad tribes on his road. His men carried three days' rations on their saddles, while the artillery took only as many rounds as the limber-box would contain. The expedition was made up of 150 Orenburg Cossacks, 60 mounted riflemen, and a gun, which was taken more by way of experiment than for any other reason, the authorities being anxious to know if artillery could be transported in that direction.

The troops at the outset met with serious obstacles in the passes over the northern Tchink, horses and men coming down every minute. The gun had to be dragged up the first pass by fifty dismounted Cossacks supplied with ropes. But, notwithstanding the difficulties experienced, the troops marched sixty miles, and did not halt till they had descended the following day to Kurgan Tchagai. Now commenced a long, sterile, sandy steppe. There was no forage under-foot, and no water save at considerable intervals, the wells being 180 feet deep. However, the little force again marched for sixty miles without a halt, when its leader was obliged to abandon the enterprise and retrace his steps, owing to the absolute dearth of provisions, the Kirghiz having received timely warning of his approach, and made off a few hours before the arrival of the party. The troops reached their quarters (Jebyske) on the sixth day, after a march of 266 miles over a desolate and arid country. The heat had been excessive, the thermometer sometimes reaching 117 degrees Fahrenheit during the day, while the nights were cold and frosty. The insufficiency of supplies had been so felt that the men, on the fourth day of the expedition, were obliged to kill and eat a Cossack horse. There were no sick in the party, and only twelve horses, which had been ridden by the riflemen, were found to have suffered from sore backs; this being occasioned by the men not having properly adjusted their saddles before mounting. Similar rapidity characterized a raid made by Count Borkh in the summer of 1869 upon the aúl of

the Kirghiz Amantai, a chief who nomadized at that time on the Teress-Akhana, a tributary of the Khobda.

Count Borkh, who was then constructing the Ak-Tiube Fort, formed a flying column of seventy Orenburg Cossacks, and, accomplishing nearly 133 miles in two days, by secluded paths and valleys reached Murtuk. Intelligence was here received that Amantai was nomadizing with his kinsmen, the Chiklins; and as the ties of clanship are held in great esteem among the Kirghiz, the whole success of the detachment depended upon its falling upon the Chiklins unawares.

The object of the detachment was favored by the inclemency of the night, which was such as is seldom experienced in the steppes. Taking advantage of the darkness, Count Borkh ordered the Cossacks to tie up their sabres, cover their stirrups, and put nose-bags over their horses' mouths, to prevent them from neighing.

In utter darkness, and amidst the howling of the storm, the Cossacks passed among the sleeping aúls, with the assistance of a trusty guide, and the constant flashes of the lightning.

At day-break the detachment was far on its road, and perceiving on the banks of a rivulet the traces of some Kirghiz, who had just quitted the spot, it trotted forward, and soon described in a large ravine some aúls, among which was that of Amantai.

It was necessary to gallop the distance to the aúls as quickly as possible, so as not to give the Kirghiz time to recover. Forbidding the Cossacks to fire, Count Borkh dashed at the aúls, and demanded from the astonished Kirghiz the surrender of Amantai, who was at once given up.

Apprehending an attack on their return journey, the Cossacks formed a sort of movable square, and throwing out a chain of skirmishers around the herd which they had captured (about 900 head), prepared, in the event of attack, to dismount and fire over the saddle. The Kirghiz followed at a respectful distance, but, observing the precautions which had been taken, commenced gradually to drop off. The detachment reached Ak-Tiube in six days without *contretemps*, after a march of 333 miles, and with the loss of only two lame horses.

From the incidents which I have cited, it will be at once seen that the Kirghiz horses yield to none in strength and endurance, and that a nation which is able to dispose of from 300,000 to 400,000 Cossacks, mounted upon steeds such as I have described, is a very formidable embodiment of military power.

## CHAPTER XVII.

Breakdown of the Sleigh.—Fresh Vehicles.—The “Scavenger’s Daughter.”—The Sea of Aral.—A Salt Breeze.—Less Snow.—Christmas-day in Russia.—Amorous Females in Search of a Husband.—Supper for Two.—Kasala, or Fort Number One.—The Garrison.—The Aral Fleet.—The Inn of Morozoff.—Comparisons in Dirt.—In Search of a Lodging.—Go with God, Brother.—The Jews’ Quarter.—A Commandant.

THE jolting imparted by the motion of the camels to the sleigh had been too much for the wooden frame-work, and an inspector who gave me this information declared that it would be impossible for us to continue the journey save in another carriage.

Nazar, however, was of opinion that this statement on the part of the official was an interested one, and only made to induce me to hire one of his own vehicles. But as the chances appeared tolerably evenly balanced in favor of my sleigh reaching Kasala, or of my being left on the road—not a pleasant thing to look forward to, in the month of January, in the steppes—I determined to be on the safe side and leave it behind, though with feelings of regret, as if I were parting with an old friend; for it had carried myself and fortunes for more than a thousand miles.

The sleigh in which we now found ourselves was still more like a coffin than the one I had abandoned. In addition to being narrow, it was short; and after once wedging myself in, there was no possibility of stretching my legs till I arrived at the next station.

There is in the Tower a singular instrument of torture, invented by some diabolical genius of the Middle Ages, and called the “Scavenger’s Daughter.” The victim who was wedded, as it was termed, to this fiendish contrivance could not make the slightest movement, his limbs and body being compressed into the smallest space. Of such a nature was the sleigh in

which I was now traveling; and if Dante had ever been placed in a similar predicament, he would undoubtedly have added yet another way of punishing the ungodly to the long list of torments in his "Inferno."

Our driver pulled up at a station called Soppak. We were rapidly nearing Kasala. When we continued our journey, we passed by small salt-lakes, which were covered with thick ice; while far away in the distance, and about forty versts from us, lay the Sea of Aral, which, according to the inspector, was also frozen for several versts from its shores, thus rendering navigation impossible. A salt breeze was blowing straight in our faces. It parched and dried up the skin, and, in spite of the cold weather, produced a state of feverishness; while the tea which we drank was not at all calculated to quench our thirst, as the only water which could be procured had a brackish taste and strong saline flavor. In fact, the whole country in this district is impregnated with salt for miles around, and undoubtedly at some not very remote date has been covered by the sea.

The snow became less and less, till at last the horses could scarcely drag the vehicle over the thinly covered ground; and when we stopped at a halting-place about five stations from Kasala, it was necessary to abandon the sleigh and hire a carriage. Slowly we rolled along the road, a rough and fatiguing one for the half-starved horses, which were so weak from want of food that they could hardly put one leg before another; when another heavy snow-storm warned us that winter was still raging on in front.

The evening was well advanced. The last station but one had been reached; so I resolved to sleep there, and enter the town the following morning, not knowing where I should be able to find accommodation should we arrive at Kasala in the still hours of the night. There was no inspector in the station, for it was Christmas-day—not according to our English reckoning, for that had been passed at Orenburg, but the Russian anniversary of the same event, which is celebrated according to the Old Style, and takes place twelve days after our own. The official, finding it dull all alone, had given himself a holiday,

and gone off to Fort Number One, there to eat, drink, and be merry.

I must say I was sorry not to have been able to arrive in time for the anniversary of this time-honored festival, which is kept by the Russians with not one whit less pomp or feasting than in our own country. With them, as with us, it is customary for all the members of a family to assemble beneath one roof. Rich and poor relations unite together, the festive board is spread, and unusual hospitality prevails; while, later on, a Christmas-tree, laden with fruit and presents, rejoices the souls of the more juvenile population. Pleasure, however, has its dark side, and vodka, like punch, can not be drunk with impunity; while the appearance of the Russians the morning after the feast plainly tells its tale.

Russian girls frequently amuse themselves at this time of year by attempting to discover what sort of a husband will eventually lead them to the altar. A favorite manner of doing this is by so-called divination. The amorous female who is tired of a celibate life sits, in the mystic hours of the night, between two large mirrors. On each side she places a candle, and then eagerly watches until she can see twelve reflected lights, when, if the Fates are propitious, she ought also to discern the husband she desires portrayed in the glass before her. Another method of divination is to have supper laid for two, when, if the young lady is in luck, the apparition of the future husband will come and sit down beside her; but, in order to secure success, the girl must not divulge to any one her intention of thus attempting to dive into futurity.

There is a story told in Russia to the effect that the daughter of a rich farmer was in love with a young lieutenant, and he, suspecting that she would probably have supper laid for two, climbed the wall of the garden, and, sitting down by her side, partook of the prepared banquet; the girl being under the impression that it was his apparition, and not the real Simon Pure. On leaving the room, the officer forgot his sword, which he had unbuckled before he sat down to supper; and the girl, finding the weapon after his departure, hid it in the cupboard as a memento of the visit. Later on she married an-

other suitor, and he, fancying that there was some rival who supplanted him in his wife's affection, and one day discovering the sword, was confirmed in his suspicions, and killed her in a fit of passion.

Sometimes the inquisitive husband-seeker will take a candle, and, melting the wax, pour it on the snow, after which she strives to discern in the hardened substance the likeness of him she seeks; while a very favorite amusement at this season of the year, and when several girls are congregated under the same roof, is to divine by the aid of a cock. Each girl, taking some corn, makes a small heap on the floor, and there conceals a ring. The chanticleer is then introduced, and is let loose beside the corn. Presently he begins to peck at the heaps of grain. At last one of the rings is exposed to view, when its ownèr, according to the popular belief, will outstrip her companions in the race for matrimony.

We left our quarters at day-break. I had been informed that there was an inn at the fort, and determined to drive there at once, and not to go to the regular postal station at Kasala, so as to avoid losing any time. As we neared our destination, the country on both sides of the road was covered with sheets of ice. The frozen water was an overflow from the Syr Darya, or Jaxartes, which in the autumn had risen far above its banks and inundated the country in the neighborhood. The air was bright and pure, and my spirits rose with the idea that probably my sleigh-traveling was over, and that now I was about to commence another phase in my journey—the march to Khiva. From the information which I had been able to gather on the road, it appeared that there was snow on the ground all the way from Kasala to the newly annexed khanate. If so, it was all the better for my journey, as we should have no difficulty about water.

We now drove into the little town of Kasala, otherwise known as Kasalinsk, or Fort Number One. The inhabitants are composed of nomad Kirghiz, who pitch their *kibitkas*, or tents, in the outskirts of the town, and there pass the winter, migrating once more in the early spring; of Russian and Tartar merchants, who live in one-storied brick or cement-built

houses; while Jews, Greeks, Khivans, Tashkentians, Bokharans, and representatives of almost every country in Asia, are to be met with in the streets. Kasala is a place possessing considerable commercial importance in Central Asia, owing to its geographical position, all goods coming to Russia from Bokhara, Khiva, Tashkent, and Kokan having to pass it on the way. The entire population is about 5000; while at the time of my visit it was garrisoned by a local infantry force of 350 men, under a commandant, and a cavalry regiment of about 400 strong. In addition to this force, there were the sailors of the Aral fleet (four small steamers, drawing but little water, and able to ascend the Amu Darya to within a few miles of Petro-Alexandrovska, a Russian fort, built in Khivan territory, which has been recently annexed to the Russian Empire, in spite of Count Schouvaloff's assurance\* to her Majesty's late Government). The crews of these vessels augmented the garrison by about 750 men. There were a few nine and four pounders, and a small detachment of artillery permanently stationed within the walls, while there were also fourteen small guns, capable, however, of throwing a ten-pound shell. These had been taken out of the steamers, and were available should they be required.

The fort itself is in the shape of a half star. It is an earthwork, defended on the south by a bastioned front which extends to the banks of the Syr Darya, here about half a verst wide. The fort is surrounded by a dry ditch and a parapet about eight feet high and twelve thick, the ditch being about thirty feet broad and twelve deep. Within the structure there are barracks sufficiently large to contain 2000 troops, and also warehouses filled with stores. These buildings are constructed of bricks and dried clay. The plan of the fortification is badly designed, and the place might be very easily taken; however, it answers the purpose for which it was intended—namely, to check the Kirghiz, and hurl them back again into the wilderness in the event of their attempting to resist a Russian advance.

---

\* See Appendix B.

The hostelry to which we were bound was called the Inn of Morozoff, Morozoff being a speculative Russian who had built a small one-storied house and roughly finished it, trusting to make his profits out of the officers of the garrison and the Russian merchants who were continually passing through Kasala.

On inquiring if I could have a room, the waiter, a man of Jewish type, informed me that the town was full, and that there would be no room vacant for several days. However, he gave us the name of an individual who kept a sort of lodging-house.

“It is very dirty,” observed the waiter, “but I dare say you don’t mind that,” and he looked contemptuously at my sheepskin attire.

The man who addressed us was himself begrimed with dirt, and Morozoff’s inn, in point of cleanliness, would have been surpassed by even a pig-sty in many of our Leicestershire farms. However, there are comparisons in dirt, and the proprietor of the lodging-house where I now betook myself was even more unwashed than the waiter above mentioned.

“Rooms?” said he; “no: we are here five and six in a room, and our passages are full too.”

“Do you know of any other lodging-house?” I inquired.

“Lodging-house? no. Go with God, brother;” and with these words he slammed the door in my face, leaving Nazar and myself looking pensively at each other outside.

“He is the son of an animal!” exclaimed my faithful follower; “but it is cold here. One of noble birth, what shall we do?”

An idea struck me. “Drive to the Jews’ quarters,” I said to the sleighman, thinking that perhaps among the tribes of Israel I might find quarters for the night.

Abraham, Isaac, and Jacob were now visited, but in vain, and the Mohammedan inhabitants were equally impervious to an offer. The fact was, that a feast peculiar to the followers of the Prophet happened to fall on the same date as the Russian Christmas. People had come from every part of Asia to meet their friends and relatives. Unusual rejoicing was going on;

the Russian making his heart gay with vodki, while the follower of Islam, after stuffing himself with pillofts of rice and mutton, was seeking in the fumes of opium relief from the cares of this world, and a foretaste of the one to come, a Mohammeden's Paradise consisting of an unlimited seraglio which costs nothing to keep, and where the female inhabitants require no guardians, do not quarrel or pull his beard, and are always young.

As it was impossible to find any lodgings in Kasala, I resolved to drive to the fort and see if the commandant could do any thing for us. This officer received me very courteously, and at once sent his servant to search everywhere in the town for rooms. In the mean time he offered me an apartment in his own house. A large brass basin was brought in, and I now enjoyed the luxury of soap and water, which was well appreciated after a continuous journey for twelve days.

Foreigners can not understand an Englishman's love of water, and look upon us as dirty for requiring so much washing. Russians consider a vapor-bath once a week an *embarras de richesse* in so far as cleanliness is concerned, while the mere idea of any one having a cold bath every morning is beyond their comprehension, and another proof of the eccentricity appertaining to an insular character.

The room in which I found myself was furnished in the simplest manner, a bedstead and a few wooden chairs being all the furniture; however, it was clean, and free from insect life. Presently the servant sent out by the commandant in search of lodgings returned. He had been everywhere in Kasala, and there was not a room, or even the share of a room, to be had. I now learned that privacy is not considered at all essential in the steppes, where three or four officers will often share the same apartment.

## CHAPTER XVIII.

Hospitality.—An English Engineer Officer at Kasala.—A Russian Scientific Expedition.—Surveying the Oxus.—The Rapidity of the Stream.—A Future Fleet.—Transport and Fishing Barges.—Lady Smokers.—Disturbances in Kokan.—The *Invalide* Newspaper.—Abuse of Yakoob Bek.—Dinner.—Any Thing you ask for.—Cabbage-soup and Cold Mutton.—Colonel Goloff.—His Residence.—An Assembly.—The Beauty and Fashion of Kasala.—Steamers.—Wood instead of Coal.—Great Expense to Government.—When we Fight you Fellows in India.—Zakuski.—Russian Linguists.—System of Teaching Languages.—Public Schools in England.—Latin and Greek, or French and German.—A Foundation, or a Two-storied House.

THE commandant pressed me to remain beneath his roof, at least until such time as I could find sleeping-quarters. Shortly afterward he introduced me to his wife and family. I must say I was much struck by the kindness and hospitality of this gentleman. He had never seen me before, had no security beyond my word as to who I was, and yet he instantly placed his house at my disposal. The courteousness and hospitality of this kind old commandant will always remain in my memory as one of the pleasantest episodes in my journey to Khiva. His wife now informed me that an English engineer officer had resided beneath their roof the previous summer, and had subsequently accompanied a Russian scientific expedition as far as Petro-Alexandrovsk, the object of his journey being to survey the Oxus. The members of the expedition had, at the time my compatriot was with it, navigated the stream to the fort, but since his departure some Russian officers had ascended the river seventy versts beyond that part; indeed, the commandant informed me that when a steamer then being built was finished, which would draw but little water and steam twenty versts per hour, it would be able to ascend the stream for a much greater distance, and perhaps to the source of the river. The chief ob-

stacle hitherto experienced had been the rapidity of the current, and as the engines on the vessels in commission were of little horse-power, it had been difficult to make headway against the stream.

Permission had been given to a merchant to build a fleet of fishing vessels for the Sea of Aral, which is said to abound with the finny tribe. This would doubtless be a great convenience, as in case of necessity these barges could be used to transport troops up the Oxus.

The distance from the Sea of Aral to European Russia is considerable. The supply of fish supplied by the Black and Caspian seas is very plentiful. It is to be feared that the enterprising individual who is about to construct this fleet of fishing barges will find his speculation any thing but a lucrative one, although from a military point of view it will be extremely useful.

My hostess poured out some tea, and, handing me a cigarette, lighted one for herself. This is not at all an exceptional proceeding in Russia, where the women smoke as much as the men. In the best society at St. Petersburg, it is not at all an uncommon spectacle to see the married women and aged chaperons indulging in cigarettes. Fortunately, the girls have not as yet taken to the habit.

The disturbances in Kokan, by all accounts, had been much exaggerated, and the Russian troops had not at any time been in danger. An officer who had passed through Kasala, on his road from Tashkent to St. Petersburg, had said that his comrades and self were very surprised to find that they were such great heroes. This was all owing to the *Invalide* newspaper, for the Russian military journal had bespattered the officers under Kauffmann with adulation; but that it was well this organ had done so, as there would now be plenty of medals and decorations. If the paper would only continue its abuse of Yakoob Bek, it would very likely bring about a campaign in the summer against Kashgar, and that this was the wish of General Kauffmann, the Governor-general of Turkistan.

I now proceeded to Morozoff's hostelry to see what could be obtained for dinner, as I felt excessively hungry, the keen air of

the steppes having produced a most healthy appetite. On asking the same domestic who had greeted me in the morning what there was to eat,

“Any thing you ask for,” was the immediate reply.

This, when submitted to investigation, proved to be slightly incorrect, for some cabbage-soup and cold mutton were the sole contents of the larder.

“We have magnificent wine,” observed the servant, producing a bottle of port as black as ink, and which appeared to be a concoction of Russian spirits, thickened with soot. “Delicious! taste it; our wine is famous all over the country.”

The room in which I found myself was of an oblong shape, and without any furniture save a table and bench. A few sheep-skins in a corner showed that the apartment was already taken; and in reply to my inquiry I was informed that three merchants had slept there, but that, they not being at home, the waiter had taken possession of their room.

According to him, it was a delightful Christmas. More vodki had been drunk the previous evening than had ever been known in the annals of Fort Number One. Universal drunkenness still prevailed, and the inhabitants in consequence were thoroughly enjoying themselves.

I ordered a sleigh, but had some difficulty in obtaining one, as there were only five of these vehicles in Kasala. I then drove to the house of Colonel Goloff, the district governor. He was not at home, but engaged in paying visits to the families of the principal officials in the garrison, as it is the custom in Russia to call on your friends during the Christmas week and offer them the congratulations of the season. His servant, however, told me that the governor would soon return, so I resolved to await his arrival.

The house was a substantial and well-built edifice, but only one story high, like almost every other building in Kasala. The two sentinels outside the building, and whom I could distinguish through the thick double-glass windows, every now and then took a short run backward and forward in front of their sentry-boxes, so as to keep up the circulation in their feet, the cold being very great.

A small entrance-hall afforded every convenience to the visitor for hanging up his fur pelisse and depositing his galoches, while four large and lofty rooms opening one into the other formed the dwelling apartments of the family. There were fine parquet floors in each of the rooms alluded to, while some full-length mirrors, with a few chairs and tables, constituted the entire furniture. Large stoves set in the walls were arranged so as to impart a genial warmth throughout the building; while three or four back rooms, used as offices and kitchen, looked out upon a small garden and stable, which were behind the colonel's residence.

Presently the rattle of a sleigh which stopped before the portico announced to me that the governor had returned, and a minute later he entered the room.

He was a tall but somewhat corpulent man, evidently on the wrong side of fifty, and clad in a dark-blue uniform. I introduced myself to him, and apologized for the liberty I had taken in calling.

He said that he had heard from the authorities at St. Petersburg that I was on my way, at the same time observing that he could not allow me to remain under the commandant's roof. "His house is small," remarked the governor; "besides that, he has a wife and children; here I am all alone, my family has gone to Russia. You must come and stay with me."

"Nay, you must," he added, somewhat sharply, as I hesitated to intrude myself on his hospitality; so, thanking him for the invitation, I drove back to the commandant's quarters. It was with difficulty that I could persuade him to let me depart, and then it was only by saying that the governor had expressed his wish, or rather orders, on this subject in such a peremptory manner that it was impossible for me to refuse.

Of all the hospitable people whose acquaintance it has been my good fortune to make during my many travels, there is no one who can compare to this kind-hearted commandant. To have his house invaded by an Englishman, and instantly to offer him a lodging, although he had no idea who the stranger might be, except that he was very dirty and clad in sheepskins, would have been a high trial to the most philanthropic

of individuals; but it was done by this good-natured officer. There are two ways of showing a kindness, and this act of hospitality had been performed with great tact, the commandant striving to persuade me that a favor would have been conferred on him by my remaining beneath his roof.

On returning to the governor's, I found the reception-room filled with officers who had come to offer him the usual Christmas congratulations. He then told me that there would be an assembly at his house later on in the evening, when I should have the opportunity of seeing all the beauty and fashion of Kasala.

The apartments were thrown open and fairly lighted. Shortly afterward the ladies began to arrive, all of them being in high dress, and little coteries were speedily formed. Some settled down to play whist, regardless of the buzz of conversation around them; others promenaded about the rooms with the lady of their choice — men and women all with cigarettes in their mouths, and filling the apartments with clouds of smoke. There was no stiffness anywhere, and every thing was done to make a stranger feel thoroughly at home. General Kauffmann had passed through Kasala a few days previous, and had left a very pleasant impression upon the fairer part of the community, with whom the aged general was decidedly a favorite, and many remarks were made as to why he had gone to St. Petersburg.

One of the officers spoke Portuguese, having been some time at Madeira, and he was delighted to have an opportunity of airing his knowledge of that language. He had been attached to a Russian squadron which had sailed to America a few years ago, and he was now doing duty on board a vessel belonging to the Aral fleet. He informed me that his ship drew but little water, not more than from three to four feet, and that she could steam from Petro-Alexandrovsk to Tashkent; the great difficulty, however, was the scarcity of fuel, for they had to burn wood instead of coal. It was very difficult to carry a sufficient supply of this article, which was very bulky, for a long journey, while the expense to the Government was enormous.

The officers in the garrison were unanimous in envying the luck of their more fortunate comrades in Kokan, who had been engaged during the recent disturbances, and they bitterly complained of the slowness of promotion and the dreary existence at Kasala.

“Any thing for a change,” remarked one of them, a dashing little fellow with several medals; “we are bored to death here.”

“Yes,” added another, “when we fight you fellows in India, then we shall have some promotion. As to fighting with the Kokandians, we might as well shoot pheasants; none of our seniors get killed.”

“I don’t think England will interfere with us about Kashgar,” remarked an officer, apparently much older than his comrades.

“Who knows, and who cares?” said another. “If we do fight, we will shoot at each other in the morning, and liquor up together when there is a truce. Come along and have a drink;” and with these words he led me into an adjoining room, where some servants had just brought in what the Russians call *zakuski*—caviare, salt-fish, little bits of bread-and-cheese, slices of highly flavored sausage, and spirits of every kind.

I was surprised to find that so few of the party could speak French; in fact, there was hardly a lady present who could converse in this language; indeed, they did not blush when acknowledging their ignorance. It was quite a pleasure to meet with some people who were not ashamed of their own language. There is a general opinion in England that Russians are good linguists, because their own tongue is so difficult that all others become easy to them afterward. This is an entire fallacy. The true reason why some Russians speak two or three foreign languages well, and with a perfect pronunciation, is the attention that is paid to the subject, the more particularly in Moscow and the capital. There the child has an English or French nurse as soon as he is able to speak, and he learns the foreign languages at the expense of his own, for the pronunciation first acquired is the one to which we generally ad-

here. By the time he is ten or eleven years old, he often speaks French, German, and English, while these languages are grammatically studied as he gets older.

Now, in England we fall into the opposite extreme: we usually neglect the modern languages, and even omit the study of our natural tongue. We occupy the whole of our boy's scholastic and college career with the study of Latin and Greek, imagining that we are laying a good foundation for the lad to learn modern languages later on in life, and when he leaves college. But this is then a hopeless task: after twenty, it is very exceptional to find any one who can tutor himself to a new pronunciation. Men, when leaving school or college, have generally but little time for further education, and the result is that we are, as a nation, the worst linguists in the world. As it is, our public schools are kept up for the advantage of the masters, who, having been trained themselves in a special branch of study, would be ruined if any other system of education were insisted upon by the parents. The result is that the boy's education suffers. If, at our public schools, Latin and Greek were made to change places in relative importance with French and German, many lads, on entering life, would find that they had built a two-storied house, instead of having merely laid the foundation of an edifice which they will never have time to complete.

The evening wore on. Thicker and thicker grew the clouds of tobacco-smoke which escaped from the lips of the smokers. Some servants now brought in two magnificent sturgeons, which were placed on the supper-table. The host walked up to his different guests and invited them to partake. Tobacco did not affect the appetites of the party, and a bite and then a whiff would often be indulged in by some of the guests. Wines of all kinds were placed on the table, and the clinking of Champagne-glasses, as the guests pledged their host, mingled frequently with the conversation.

"So you are going to Kashgar?" said a young officer, who had been so kind as to point out to me the different celebrities of the evening.

"No."

"Why do you not go there?" he continued. "You would meet a quantity of English officers who are teaching Yakoob Bek's men to fight."

"Do not talk politics," said another, his senior. "Of course we shall have to fight England some day; but the English, although they fought against us in the Crimea, were much better fellows than the French."

Trays were now brought in with dishes containing small beefsteaks and fried potatoes, which were replaced at intervals of about half an hour by fresh courses; but it was getting very late, and with difficulty I could keep my eyes open. It was ten days since I had taken off my clothes to sleep, and a sleigh journey over the steppes takes a little out of any man's constitution.

Fortunately my host observed my inability to keep awake, and volunteered to show me my sleeping apartment.

"You have brought your bed-linen?" he remarked. "But of course you have. You are too old a soldier not to have done so;" and with these words he shut a door which separated me from the rest of the company.

I had fortunately, in anticipation of some such event, brought an air mattress from England. It did not weigh above two or three pounds, was easily inflated, and very portable. This, being blown up and placed on the floor, made a capital couch; while, as I had no sheets or blankets with me, I did what the Russians do under similar circumstances, and lay down with my pelisse as a blanket. The door of the apartment was thin. The partition-wall which separated my room from those occupied by the guests offered little impediment to the sound; but ringing laughter and jingling of glasses do not keep a man from sleeping if he is once really exhausted, and I speedily became lost to consciousness.

## CHAPTER XIX.

Ablutions under Difficulties.—The Turkomans.—An Escort of Cossacks.—The Khan and his Executioner.—In Search of Horses.—Provisions for the March.—Snow instead of Water.—Exceptional Winter.—Frozen to Death.—The Unclean Animal.—Kirghiz Amazons.—Ural Cossacks.—Dissenters and the Tzar.—The Town of Kasala and Fever.—Kibitkas.—Mr. MacGahan and the Fair Sex.—A Wife for One Hundred Sheep.—The Matrimonial Lottery.—A Russian Officer.—Liquor is the only Thing worth living for.—Shadows of War.

THE following morning, at ten, Nazar, coming into my room, informed me that Colonel Goloff was dressing, and that breakfast would soon be ready.

On asking for a basin, I was informed that it was not the custom to wash in the sleeping apartment, but that a regular room was set aside for this purpose. I was then taken into a sort of scullery, with a sink and large copper utensil. In the last-mentioned article was a supply of water. This, on pulling a string attached to a plug in the vessel, streamed out from an aperture in the side.

It was a primitive sort of arrangement, as I could only wash one hand at a time, and very cold, as there was no stove, while the icicles hung about the window-frames. Under these circumstances the morning ablutions became a tedious process, and rather a pain than a pleasure.

The colonel now entered my room, and invited me to breakfast. The repast was of a frugal nature; it merely consisted of tea and dry bread, more substantial food being considered quite out of place at such an hour of the day, the habit the Russians have of eating supper in the early hours of the morning not being conducive to appetite.

My host then informed me that he had himself been five times to Petro-Alexandrovsk.

The Turkomans, he said, gave a great deal of trouble, as they

crossed the Oxus when the river was frozen, and made frequent raids upon the Kirghiz, carrying off their sheep and cattle. Indeed, on this account he thought that it would be better for me to have an escort of Cossacks; "for then," he added, "it can accompany you to our fort, and Colonel Ivanoff, the chief of the Amu Darya district, will send you on to Khiva, which is about sixty miles from Petro-Alexandrovsk, with a fresh escort."

On asking what would happen to me if I were to visit the khan's capital alone and unprotected—

"That would never do!" he said. "Why, the khan would very likely order his executioner to gouge out your eyes, or would keep you in a hole in the ground for five or six days before he admitted you to an audience. The Khivans are very dangerous people."

I thanked him very heartily for the information, which, I dare say, was given in a friendly spirit. It was refreshing to find that the good Governor of Kasala valued my life so highly, and I shall always feel deeply indebted to him for his kindness.

He now promised to get me a guide; and, ringing a bell, desired the servant to send for a Kirghiz officer. The latter would be able to communicate with his countrymen, and tell them that I wanted to buy some horses, for the journey would have to be accomplished on horseback, and it was impossible to hire any animals in Kasala.

Camels would also be required, and a kibitka, or circular tent. As for provisions, the colonel recommended me to take some stchi—cabbage-soup, with meat cut up in it. This, he declared, was very portable, as it would become frozen and keep for any amount of time, while it might easily be carried in iron stable-buckets. The principal difficulty for a traveler, in his opinion, was the forage: a sufficient supply of it must be taken for a fourteen days' journey, twelve pounds of barley per diem being the ordinary allowance for a horse. This would add enormously to the weight of baggage, as for three horses we should require thirty-six pounds of barley a day, or 504 pounds for the march. According to the colonel, I need not burden the caravan by taking a supply of water, as in all probability there would be snow on the ground the whole way. However, I

had better purchase some sacks, so that in the event of it appearing likely that any part of the route before us were thinly covered, we could put some in our sacks, and thus carry it on the camels.

The cold would be my greatest enemy, as the winter we were then experiencing was the most severe he had ever known at Kasala, and several people had been recently frozen to death. When we had finished our breakfast, the governor left me till dinner, which he said would be on the table about 2 P.M., and departed to go through his routine of duties, when I determined to walk through the town and look at the Kirghiz population.

I took Nazar with me to act as interpreter, in the event of my wishing to converse with any of the inhabitants who could not speak Russian. The little man was full of admiration at the splendor and luxury in the governor's residence, and described to me in glowing terms the magnificent banquet he had partaken of the previous evening; his only fear being lest in some disguised form or other he had eaten of the unclean animal, for this is a sore point with the Tartars, as, indeed, with all other Mohammedan nations. The bazaar, he said, would not be open, on account of its being a feast-day; and he had been to the Treasury to change some money, and found that this establishment was also closed. Presently some Kirghiz men and women rode by, the latter sitting astride their horses, and managing their palfreys with the most consummate ease and grace.

We now met some Bokharans and Khivans, the marked Jewish type and swarthy faces of the former contrasting strongly with the Khivans, who were several shades lighter in complexion. Every one, man or woman, was enveloped in some kind of fur or other, and not a particle of their skin was left uncovered, save just above the eyes.

A few Cossacks from the Ural, who were exiled from their far-off home, walked in little knots before their dwelling-houses, some discussing the chance of a pardon and a return to their families at Uralsk, others the hardship of a journey to Khivan territory, whither it was rumored they were shortly to be sent. Many of these men appeared to be considerably past their

prime, and the journey to Kasala must have been a very trying one for them. Their one idea was that the emperor himself had not wished their offense to be punished in so stern a manner; and that the order for their banishment had been obtained through some source, which, unfavorable to the dissenters, had exaggerated the facts of the case to the Tzar.

The town of Kasala was kept in a very dirty state, and did not reflect credit on those authorities whose duty it was to see after such matters. Filth and ordure were strewed about the thoroughfare; and if it had not been for the extreme frost, which kept every thing congealed, the effect upon the atmosphere would have been any thing but pleasant. Indeed, it is a wonder that more sickness does not ensue, the more particularly in the early spring. In houses where there is a certain pretension to wealth and comfort the refuse is never removed, and the retiring-rooms are left in a state which must be seen to be believed; indeed, any attempt at description would inevitably disgust the reader. The result is that when the cold takes its departure and a thaw sets in, the houses become a hot-bed of fever, while the death-rate among the population is often doubled.

On the outskirts of the town some Kirghiz had pitched their kibitkas. These tents are the homes of the nomad tribes, and are carried by them on camels from place to place. One of these abodes was adorned inside with thick carpets of various hues, and bright-colored cushions, on which the inmates reposed. A small fire in the centre of the apartment gave out a thick white smoke, which wreathed itself round in serpent-like coils, till, gradually reaching the roof, it escaped through an aperture left for that purpose. Very pungent and trying to the eyes was this dense atmosphere—a wood, or rather sort of bramble, called saksaoon, which is found in large quantities on the steppes, being used for fuel. The women in the tent appeared to have no fear of strangers, and did not cover up their faces, as is the custom among other Mohammedan races; they were evidently delighted at our visit, and, putting down fresh rugs on the ground, invited me to sit by their side. As a rule, there could not be much said of the beauty of their appearance; in-

deed, making every allowance for Mr. MacGahan's advocacy of the fair sex in Tartary, I can not help thinking that the energetic correspondent is either extremely susceptible or else very easily pleased, as a moon-faced, red-cheeked girl, the acme of perfection from a Kirghiz point of view, does not quite answer to my ideas of a beauty. Most of the women have good eyes and teeth, but the breadth of the face and the size of the mouth take off from these advantages; while the girls are not at all graceful, although on horseback they appear to perfection.

An elderly man, clad in a long brown dressing-gown, thickly wadded to keep out the cold, was the proprietor of the kikitka. Pouring some water into a huge caldron, which was suspended from a tripod over the fire, he proceeded to make the tea, while a young girl handed round some raisins and dried currants. The inmates were surprised when I told them that I was not a Russian, but had come from a land far away toward the setting sun.

"Anglitchanin" (Englishman), said Nazar; and the party gravely repeated the word Anglitchanin. One of the men now inquired if I had brought my wife with me, and he was astonished on hearing that I was unprovided with a helpmate, the whole party being of the opinion that such an appendage was as necessary to a man's happiness as his horse or camel.

The Kirghiz have one great advantage over the other Mohammedan races—they have the opportunity of seeing the girls whom they wish to marry, and of conversing with them before the bargain is concluded with their parents, one hundred sheep being the average price given for a young woman. Among those Tartars who have fixed residences, and who do not migrate from place to place, this state of things is not allowed. Here the man who wishes to buy a wife has to run a considerable risk, for he seldom has an opportunity of judging of her looks, temper, or disposition. The girl always keeps her face covered when in public, and is concealed from the men as much as possible. The man's mother, or some other female relative, occasionally acts as his agent, and arranges so that her client may be hidden behind some cupboard in their house. They then invite the girl to visit them, when the latter, thinking

herself alone, is induced to uncover her face. The suitor now makes a mental calculation as to how much she is worth. The bidding then commences, the young lady's parents asking at first much more than they will eventually take.

"She has sheep's eyes, and is lovely," says her mother.

"Yes," replies the female relative, the wife-seeker's advocate, "she has sheep's eyes, but is not moon-faced, and has no hips whatever! Let us say two hundred rubles."

And so the bidding goes on, until eventually, the bargain being concluded, the ceremony, such as it is, takes place, very few preliminaries being considered necessary.

"Do you like Kasala?" I inquired of the best-looking of the girls.

"No," replied an aged female, not giving the maid I addressed time to speak; "we all prefer the steppes." And with these words she glanced contemptuously at her daughter, who, as Nazar afterward informed me, liked the slight civilization that Kasala was able to afford better than the beauties of nature and the trackless wastes in Tartary.

On leaving the kibitka, I proceeded to Morozoff's hostelry to call upon a young Russian officer, to whom I had been introduced the previous evening. I found my acquaintance at home. He inhabited a small room in company with another officer, who had been waiting for six weeks to join his regiment at Petro-Alexandrovsk, and who, to all appearance, did not much fancy the journey, as he was still at Kasala when I returned there six weeks later.

The room was fitted up very simply. The furniture consisted of two small bedsteads; some colored French prints and photographs were suspended from the walls, while a few books and two strong wooden chairs completed the arrangements.

The officers were glad to see a visitor, and have an opportunity of talking about St. Petersburg. One of them at once produced some bottles of vodki, and was much surprised to find that I was not addicted to strong drinks. "You do not mean to say that the officers in your army do not get drunk?" he said. "Why, liquor is the only thing worth living for!"

and he tossed off a tumbler of the pure spirit. The main difficulty, however, was to disabuse my friends' minds of the idea that I had been sent out by the English Government, and that the authorities at home paid for my expenses.

"And so you might have spent all your leave of absence in St. Petersburg, and yet only remained there ten days! How very strange!" said the elder of the two, evidently wondering how I could have stopped for so brief a time at this Elysium in the eyes of a Russian officer.

This gentleman had been in the Guards, but, like many of his comrades, had outstripped his allowance and run into debt. In consequence of this he had been removed to an appointment at Kasala, which happened at that time to be vacant; and my young friend now found himself acting as a sort of police magistrate—rather a change from his former life at St. Petersburg. Existence in the fort, according to him, was fearfully dull—hardly any female society, and but little to do. Now, at Khiva there was always the prospect of a war with the Turkomans, or some little excitement in the shape of a rebellion to suppress, and then men might have a chance of seeing service.

In fact, you can not be with Russian officers in Central Asia for half an hour without remarking how they long for a war. It is very natural; and the wonder to my mind is why Russia has not extended herself still farther in Central Asia. Indeed, if it had not been for the emperor, who is, by all accounts, opposed to this rapid extension of his dominions, the Russians would already be on our Indian frontier. Nothing would be so popular with the officers in Central Asia—or, indeed, for the matter of that, in European Russia also—as a war with England about India; and as the only public opinion which can be said to exist in the Tzar's empire is represented by the military class, which in a few years will absorb all the male population of the nation, we ought to be thoroughly prepared for any emergency. Indeed, should Russia be permitted to annex Kashgar, Balkh, and Merve, an invasion of India would be by no means so difficult or impossible as some people would have us believe. Russia, if her reserves were called out, would be able to dispose of 1,300,000 men. In the event of a campaign,

the 847,847 men in her active establishment could be reckoned upon as available for offensive purposes.\*

The province of Turkistan is the one which most closely adjoins our Indian empire. Here, according to Russian data, there are 33,893 men. I use the term Russian data, because we have no means of knowing whether these figures are accurate, and, at the present moment, the greater part of the forces in the Western Siberian, Orenburg, and Kazan districts might be concentrated in the neighborhood of Tashkent and Samarcand, and no one in this country would be the wiser. We

---

\* The Russian Empire is divided into fourteen military districts, most of these districts including several governments, which are specified below. The following table shows the number of soldiers in each district:

DISTRICTS.	MEN.
1. <i>St. Petersburg</i> —This includes the governments of St. Petersburg, Novgorod, Pskof, Olonetz, Archangel, Esthonia.....	84,353
2. <i>Finland</i> .....	14,787
3. <i>Vilna</i> —Including Vilna, Kovno, Grodno, Vitebsk, Minsk, Mohilev, Livonia, and Courland.....	93,370
4. <i>Warsaw</i> —Including Warsaw, Kalisz, Kiëlce, Lomsha, Lublin, Petrikau, Plock, Siedlec, Suwalki..	113,686
5. <i>Kiev</i> —Includes Kiev, Podolia, Volhynia.....	58,816
6. <i>Odessa</i> —Includes Kherson, Ekaterinoslav, Tavrida, and Bessarabia.....	63,391
7. <i>Kharkof</i> —Includes Kursk, Oriel, Tchernigov, Poltava, Kharkof, and Voronetz.....	65,457
8. <i>Moscow</i> —Includes Moscow, Trer, Jaroslav, Vologda, Kostroma, Vladimir, Nijni-Novgorod, Smolensk, Kaluga, Riazan, and Tambov....	85,024
9. <i>Kazan</i> —Includes Kazan, Perm, Viatka, Simbirsk, and Samara.....	34,300
10. <i>Caucasus</i> —Includes the provinces of Kuban, Terek, Daghestan, Zakhatali; the governments of Tiflis, Erivan, Baku, Stavropol, and Koutais.....	151,161
11. <i>Orenburg</i> —Orenburg and Ufa.....	14,680
12. <i>Western Siberia</i> .....	16,256
13. <i>Eastern Siberia</i> .....	18,673
14. <i>Turkistan</i> —Comprising the government of that name..	33,893
Total number of men.....	847,847

have no consular agents in any of the towns through which these troops would have to march on their road to Turkistan. No Englishmen are allowed to travel in Central Asia, and, owing to the Russian newspapers being completely in the hands of the authorities, the information which is published may be purposely intended to mislead. If the Governor-general in Turkistan were forming large *étapes*, or *dépôts*, of provisions and arms in Samarcand, Khiva, and Krasnovodsk, we should be equally ignorant until, awaking up one morning, we might discover that, instead of our having to fight an enemy 2000 miles distant from his base of operations, a base had been formed within 350 miles of our Indian frontier, which was as well supplied with all the requisites for war as St. Petersburg or Moscow.

In the Caucasus there is a standing army of 151,161 men within easy water communication of Ashourade. Along the valley of the Attrek to Herat there are no natural obstacles to impede an advancing force; indeed, if the Afghans, tempted by the idea of looting the rich cities in the plains of India, were to join an invader, he might give us a little trouble.

## CHAPTER XX.

A Priest.—Only one Wife allowed.—Russian Bread.—The Telegraph in Turkistan.—General Milutin might change his Mind.—Horse-dealing.—Five Pounds for a Horse, Saddle and Bridle, etc.—A Guide.—The Expedition to Khiva.—The Russian Troops on the March.—Forty Degrees below Zero, Fahrenheit.

ON returning to the governor's, I found that gentleman awaiting me for dinner; and in the course of conversation he said that the Kirghiz officer had sent round to inform his compatriots that I wished to purchase some horses, and that several animals would be brought for my inspection on the following morning.

The priest now came in: he was a man about thirty, of an unwashed appearance, and with long uncombed locks reaching half-way down his back. On the colonel's invitation, he sat down by my side. He was a married man, and I now learned that Russian priests are allowed to marry; but if their wives die, the reverend gentlemen can not marry again. This is not a bad rule for the women, as the husbands look after all their ailments with the greatest care. Our conversation was chiefly about horses, when I discovered that the visitor had one for sale, and that this was the object of his visit. The Kirghiz, he informed me, do not have their horses shod, except when about to travel over very rocky ground. In winter and in summer the active little animals traverse the deserts, the hoof itself affording ample protection, and a lame or unsound steed is with them a rarity, while a hundred miles in a day has frequently been accomplished by some of the Kirghiz horsemen.

I had arrived at Kasala at a bad time for a man who, like myself, wished to push forward immediately. The following morning, on inquiring if any horses had been brought for my inspection, I was informed that the festival was not over. The

Kirghiz were still engaged in stuffing themselves with rice and mutton, and in drinking sour mare's milk (koomyes), and could not be induced to leave their houses, even on the chance of selling a horse to a Christian. I thought that Nazar's services might be put into requisition, so I desired him to go into the town and proclaim to his co-religionists that I was prepared to give a good price, provided that they could bring me some animals which would suit. Under other circumstances, I should continue my journey along the sleigh road to Fort Perovsky, and, buying horses at that spot, ride from there to Petro-Alexandrovsk; my idea being that if the Tartars at Kasala heard that I was going to leave the fort and purchase horses elsewhere, they would take a little more interest in the matter.

I also desired him to make arrangements about the preparation of some stchi, or cabbage-soup, for the journey, and also to order forty pounds of bread, of which half was to be made as light as possible. The Russian bakers possess the secret of making bread which is not much heavier than rusks would be if made of the same size as the loaves in question. This is a great advantage in the desert, for at times, when no fire-wood can be obtained, the ordinary bread becomes so hard frozen that it has to be chopped with an axe; while a knife is utterly useless against the granite-like substance into which the flour is converted. Indeed, on one occasion I broke my best knife when attempting to cut a loaf of frozen bread.

My real intentions were not in favor of continuing the journey to Perovsky, if this could possibly be avoided, for by doing so we should be nearer the capital of Turkistan. St. Petersburg is now in direct electric communication with Tashkent, while I believe that the wire has been recently extended so far as Kokan, the distance being about 670 miles from Kasala to Tashkent. There was also a wire from St. Petersburg to Orsk, which is about 500 miles from Kasala; but any communication coming from St. Petersburg would be more likely to pass through the head-quarters of General Kauffmann than by another route. I was not very desirous to approach Tashkent nearer than was absolutely necessary; as, although I had obtained permission to travel in Russia from General Milutin, the

Minister of War, it was not impossible that he might change his mind; such, in fact, having been the opinion of my friends at St. Petersburg, who had advised me to lose no time on the road.

Nazar's message to his countrymen proved of the greatest use. My departure for Perovsky would have affected them in their most susceptible point—the pocket; and, in spite of its being feast-time, they proceeded to look up all the animals which could be obtained in Kasala.

Now, the Kirghiz are not like the Arabs in one respect, though similar to them in many others. The descendant of Ishmael will seldom sell his horses, no matter how much money you may offer for these animals; while the Tartars will sell every thing they have for money. The result was, they began to think that it might be a good occasion to palm off some of their lame animals and utterly worthless screws upon the innocent Christian; or, if I would not fall into the trap set for me by the faithful, to take advantage of my inexperience with reference to the average price of horses in that part of the world, and sell me a good animal, but at three times its market value. However, the steppe coper is not unique in this respect, and he would not get much the best of a London dealer.

Forthwith there appeared a procession before the governor's house. This was composed of excited natives, looking, many of them, like animated bundles of rags, so thickly were they enveloped in shreds and tatters. Each of these animated bundles was astride on some sort of quadruped—camels, horses, donkeys, all were brought on the scene, forming a comical picture, which will never be effaced from my memory. The horses were, for the most part, of the worst description; that is to say, so far as appearance was concerned. Their ribs in many instances almost protruded through the skin, the proprietors of the quadrupeds having apparently been engaged in solving the knotty point as to how near they could reduce them to a straw-a-day diet without their animals succumbing to the experiment.

Don Quixote's steed, the far-famed Rosinante, was by all accounts not the best-fed of animals, and the poor brutes which can be seen each summer expiring beneath the horns of the

*Horse Dealing*

bulls in the Plaza de Toros of Seville do not carry much flesh, but many of them would have been equine Daniel Lamberts if compared with the horses now brought for my inspection.

If ever there was a Banting system especially devised for four-footed animals, that system had been carried out to its fullest extent, and some of the poor beasts were so weak that they could hardly move one leg before the other. Except for their excessive leanness, they looked more like huge Newfoundland dogs than as connected with the equine race, and had been turned out in the depth of winter with no other covering save the thick coats which nature has given them.

The late Mr. Tattersall himself could not have eulogized any animals brought to the hammer more than did these red-faced, high-cheek-boned, ferret-eyed Tartars their respective quadrupeds; while each man commented on his neighbor's property in terms of scorn and derision. At last, after rejecting a number of jades which looked more fit to carry my boots than their wearer, I selected a little black horse. He was about fourteen hands in height, and I eventually became his owner, saddle and bridle into the bargain, for the sum of five pounds, this being considered a very high price at Kasala. The saddlery was of the most gaudy description, the saddle being made of highly painted wood, richly decorated with gilding and enamel; while a small knob about six inches long, sticking up at the pommel, looked especially contrived for the impalement of the rider.

The following day the Kirghiz official, who had been desired to procure a guide, called upon me with a candidate for that office.

The latter was a tall, muscular-looking man, with a cunning and avaricious expression about the corners of his mouth whenever he indulged in a smile. His head attire consisted of a tall black sheep-skin hat, of the sugar-loaf pattern: the thick wool around the lower part of it was so arranged as to protect his eyes against the glare of the snow. His neck was encircled by a dirty goat's-hair shawl, which had been once white, but was now almost of the same hue as his coarse black beard and mustache. A bright-yellow dressing-gown, thickly wadded to protect the wearer from cold, was girt around his waist by a

green sash. Yellow leather trousers were drawn over his lathy legs, while an enormous pair of boots, the toes of which were turned up and culminated in formidable-looking points—fearful weapons to deliver a kick with—protected his extremities. For arms he carried a short cimeter, which was buckled around his waist by a narrow leather strap. However, the sword was not of much use, as it had been little cared for and was very rusty, while the steel of which the cimeter was manufactured was of an utterly worthless character.

He announced himself as ready to guide me to Petro-Alexandrovsk, the Russian fort; and his companion, the Kirghiz official, said that the man had acted as guide to the troops which marched upon Khiva during the expedition against that country, and that he could be thoroughly depended upon.

An agreement was soon made by which he was to provide me with some camels. He would also bring his own horse, while, if I could not find at Kasala an animal worth buying for Nazar, the little man should be mounted upon a camel. The price the guide first demanded for his services was very exorbitant, being three times more than the ordinary tariff; however, after a little bargaining, he became more moderate in his demands. When every thing had been arranged, he proceeded in search of some camels, and I determined to start in thirty-six hours.

In the mean time Nazar had tied my recently acquired purchase to a cart which stood in the governor's orchard, and had gone in search of a shoeing smith. I did not know what sort of ground would have to be traversed, once we were on the other side of Khiva; and if it were of a rocky nature, horse-shoes would be indispensable. Nose-bags and horse-rugs had also to be purchased—two rugs to be put under the saddle, while the third was to be strapped above it, and thus to interpose between the seat of the rider and the wooden frame-work of the saddle; this being the system adopted in the steppes, and with great success, as the horses hardly ever have sore backs.

The following day I called upon the commandant to say good-bye, and thank him for all his kindness. He informed me, in the course of our conversation, that the Russian troops

which marched against Khiva carried nothing but their arms and ammunition, their great-coats and knapsacks having been transported on camels. Occasionally, he said, the men would accomplish fifty versts (thirty-three miles) in a day. At times the heat was very great, and the troops were then only served out with tea and biscuits, as meat was supposed to have an injurious effect upon their marching powers. The Kirghiz, he said, lived entirely upon milk during the hot weather, and only killed their sheep in the winter months, or when obliged by sheer necessity. The nomad tribes could not exist without their flocks, which form their chief source of wealth, cattle being very scarce among them. The Kirghiz, however, possessed plenty of horses, and a man's riches would not be estimated by the number of rubles he had, as in Russia, but by the quantity of horses and sheep in his possession.

"I am afraid you will have a terribly cold journey," said the old officer, as he shook hands with me and said farewell. "The thermometer was down to 32 degrees below zero, Reaumur, yesterday (40 degrees Fahrenheit), and indoors it was bad enough. We piled as much wood in the stove as it would hold, and sat in our furs all day long, but in spite of this the cold made itself felt."

The winter we were then experiencing was an exceptional one even for that part of the world; and when I returned to the governor's house I found the Kirghiz, who were engaged in putting up a kibitka in the garden for me to look at, grumbling as much as the Russians at the cruelty of the elements.

9 degrees Fahr. = 4 deg. Reaumur

## CHAPTER XXI.

Water Route from Kasala to Petro-Alexandrovsk.—The Irkibai Route.—The Winter-march Route.—General Perovsky.—His Expedition.—Loss of Nine Thousand Camels.—New-year's-day.—Two out of Ten Cossacks Frozen to Death.—Major Wood and the Survey of the Oxus.—Struggling into the Saddle.—Your Horse is Tough.—Ophthalmia.—Cotton Bales.—The Mohammedans and the Deity.—Fatalism.—The Will of Allah.

THE water route to Petro-Alexandrovsk was closed to me by the frost, but it affords easy communication in summer with the Khivan khanate. Indeed, should the Russian Government ever permit Englishmen to travel in their Asiatic dominions, Khiva will probably become known to Mr. Cook, and on the list of his personally conducted tours. However, besides the water route by the Jaxartes, Sea of Aral, and Oxus, there are several land routes, used respectively in summer and winter.

One way of reaching Petro-Alexandrovsk is the track taken by the column which marched from Kasala on Khiva during the war. This route, striking slightly to the south-east, brings the traveler to the Irkibai ford, and then, diverging to the south-west, continues to Kiptchak. From there the traveler can proceed along the banks of the Amu Darya River to within a short distance of the fort. This is a very circuitous route, the great advantage it possesses being a sufficient supply of wells on the road to make it a practicable one during the summer months, the climate of the Kirghiz steppes being just as remarkable by its intense heat during June, July, and August, as by its extreme cold throughout the winter. Wyld's map of Khiva and the surrounding territories shows this line of march, which occupies about twenty-five days, very correctly.

Then there is another road, which is known as the winter-march road. This is by far the shortest way from Kasala to Petro-Alexandrovsk, the Russian fort in Khivan territory. This

road leads almost due south past Uteh Utkul to Kenderli, 177 miles from Fort Number One; then, diverging slightly to the east for about sixty miles, it turns south to Karabatoor, 303 miles distant from the starting-point. Finally, after passing Tady Kazgan, Kooktche, and Kilde Moonar, it leads straight to Petro-Alexandrovsk, which is 360 miles from Kasala.

This road, however, is impracticable in summer, as there are scarcely any wells along it, and those which exist generally contain water so salt and brackish as to be fit for camels alone, while human beings and horses can drink it only when reduced to extreme necessity. Along this route there are wells at Balaktay, forty miles from Kasala; at Berd Kazgan, forty-two miles farther on, there is more water; the traveler then must journey for ninety-five miles to Kenderli, where there are some very brackish wells; and from thence it is 123 miles to Karabatoor, where first you find water fit for human consumption. After this there is a plentiful supply of water till you reach Petro-Alexandrovsk.

I enter thus minutely into details about this route, as it is not marked down in any English map that I have seen, and in the one in my possession it is not shown accurately, Karabatoor being represented as close to the Oxus, whereas in reality it is fifty-three miles from that river. I am not aware that the above-mentioned road has been traveled by any Englishman save myself; indeed, it is seldom used except by the Tartars or Cossacks on their way to and from Khiva, and when the snow, which covers the ground for ten weeks in the year, supplying the place of water, renders the journey possible.

It is a very arduous march, however, and one which requires a great many preparations beforehand, as every thing has to be taken by the traveler in the shape of provisions for himself, barley for his horses, and occasionally fuel to burn in those places where saksaoor, the fire-wood of the steppes, is not to be found. He must also not forget bags to carry snow, should it appear likely that for any long distance there will be a deficiency of this substitute for water. The result was, I found that for myself, whose only personal luggage consisted of a change of clothes, a few instruments, and my gun, and for my Tartar

servant, I could not do with less than three camels and two horses.

It will be easy, from these few details, to imagine the preparations which General Perovsky had to make in the year 1839, when he attempted to take Khiva in the winter, and why he failed. Intense frost, heavy snow-storms, and want of provisions compelled him to retire when only half-way from Orenburg, having lost two-thirds of his men, nine thousand camels, and an immense quantity of horses, from illness, cold, and hunger—the expense of the expedition amounting to six and a half millions of rubles. The sum for those days appears a large one, but it is not so if we consider that the invading column consisted of three and a half battalions of infantry, two regiments of Ural, and four sotnias, or 750 Orenburg Cossacks, besides twenty-two guns and a rocket-battery—in all, of four thousand five hundred men, accompanied by a large intendance, and, in addition to horse transport, ten thousand camels, with two thousand Kirghiz drivers.

It may be thought that the Khivan enemy assisted in the destruction of the Russian expedition. But this was not the case: the greater part of Perovsky's forces never saw the foe, and there were only slight engagements with advanced parties, in each of which the khan's troops were put to flight.

The cold on New-year's-day, 1876, Russian style, or the 12th of January according to our calendar, was the greatest I ever remember to have experienced. The sentries posted outside the governor's and commandant's houses were obliged to wear the thickest of galoches stuffed with hay, and to keep running backward and forward the whole time they were on duty, to keep their feet from freezing. The instant any man left the house his mustache was frozen into a solid block of ice; and if his nose were exposed to the wind for a minute or so, it turned first blue and then white; while, as to touching any thing in the shape of metal with the bare hand, you might as well have taken hold of red-hot iron.

Every thing was ready for a start. Three camels and a Turkoman driver were at the door laden with the kubitka, forage, etc. The governor had given his last instructions to the

Kirghiz guide, and duly impressed upon his mind that he was to be sure to take me straight to the fort. I had declined the offer of an escort. Indeed, it would have been hard upon the poor Cossacks, giving them a long, useless journey over the steppes, merely on account of the Turkomans: and it was as well I did so; as, out of a party of ten soldiers at that time marching from Petro-Alexandrovsck, I was subsequently informed that two had been frozen to death and several others frost-bitten, the uniform of a Cossack not being nearly so proof against the onslaught of the elements as the thick furs, sheepskins, etc., which can be worn by a private individual.

My guide rode his own horse—one, if possible, a little thinner than mine—while the little Tartar servant, who was seated on a huge corn-sack, balanced on the other side by a bundle of fire-wood, and perched upon the tallest of the camels, smiled lugubriously as he bid farewell to his numerous acquaintances, and, turning to me, said,

“Please God we shall not be frozen!”

To which I devoutly replied,

“Inshallah.”

In spite of some drawbacks to the road selected—such as our being obliged to use melted snow instead of water, and to carry more fire-wood than would be required along the other track—for me it possessed several advantages.

First of all, I could get to Petro-Alexandrovsck in half the time employed if I took the Irkibai route; and, secondly, I should see a new track, or at least one which was not marked on Mr. Wyld's map of Khiva; while, however much I might wish to visit Khiva in the summer, and sail across the Sea of Aral, circumstances over which I had no control would prevent my carrying this into execution.

For provisions I had supplied myself with stchi, or cabbage-soup, with large pieces of meat cut up in it. This, poured into two large iron stable-buckets, had become hard frozen, and was thus easily carried slung on the back of a camel. Twenty pounds' weight of cooked meat were also taken, and a hatchet to chop up our frozen food, or to cut down brush-wood for a fire; while a cooking-lamp, with a supply of spirit to be used

under the mess tins, in the event of our fuel running short, made up the baggage.

Although I had hired the camels as far as Petro-Alexandrovsk, I had not the slightest intention of going there if it could be avoided. I had the permission of General Milutin, the Russian Minister of War, to travel in Russian Asia, and considered myself at liberty to change my direction at pleasure without consulting any officers subordinate to him in the Russian service.

However, the rumors which had reached my ears about Major Wood's journey made me rather doubtful as to whether General Milutin might not change his mind, and I had a very strong presentiment that I should never see Khiva if, like my compatriot, I once were to find myself in Fort Petro-Alexandrovsk. Indeed, as I subsequently learned from Major Wood's lips, he had never been permitted to go within sixty versts of the Khan's capital; and when he expressed a wish to Colonel Ivanoff, the commandant of the garrison, to be allowed to see Khiva, that officer informed him that there was a strict order from General Kauffmann on this subject, and no such permission could be granted.

Since Major Wood's departure, the river Oxus has been surveyed for a considerable distance beyond the fort; and it is to be hoped that when a more extended survey takes place the military authorities at St. Petersburg will ask Major Wood to participate in it. It is as important to Englishmen as to Russians to know how far the mighty stream is navigable. Another reason also induced me to ride to Khiva without going to Petro-Alexandrovsk; for in the event of the Russian commandant permitting me to enter the capital, which was highly improbable, I felt convinced that it would be with an escort, and then I should be taken about to see every thing *couleur de rose*, or as the Russians would like me to see it, and not be permitted to take my time and wander, free and unrestrained, about the city. I was also curious to know whether the Khivan sovereign was as great a barbarian as the Russians made him out to be.

It was only after a great deal of struggling that I managed

to get into the saddle; for although my horse was only fourteen hands high, my sheep-skin clothes and other thick garments were very heavy, and could not have weighed less than fifty pounds. The stirrup-irons also, though huge of their kind, were barely large enough, as Nazar had covered them with felt, so as to prevent my feet freezing to the steel.

The little animal groaned as I gained my seat. The guide here made a remark to Nazar, and a wolfish expression passed over his countenance, which wore a hungry sort of look, and he glared at my horse in such a peculiar manner that it attracted my attention.

“What does he say, Nazar?” I inquired.

“He says that your horse has very little fat, but that he is tough,” was the reply.

“I hope so,” I observed; “the poor beast has to carry me a long way, and he is very much overweighted.”

“No, sir, you do not understand me,” continued my domestic. “He means that when your horse breaks down and we have to kill him, he will be very tough food.”

“What! you do not intend to say that the fellow wants to eat my horse?” I remarked, indignantly.

“Oh yes; the brute will never get to Petro-Alexandrovsk; and then we will all have such a feast!” And my little Tartar’s eyes glistened as much as the guide’s had done, as he gloated over the anticipated banquet, horse-flesh being considered a great delicacy by the inhabitants of those regions.

We soon crossed the Syr Darya River, the Jaxartes of ancient history, which bathes the southern side of Fort Number One. A high-road had been made over its frozen surface, which glistened beneath the rays of a midday sun like a vast sheet of burnished steel. The steamers belonging to the Aral fleet lay imbedded in the ice, the black funnels and smoky appearance of the vessels contrasting strongly with the bright colors worn by the peasantry who strolled along the banks.

A few exiled Cossacks from Uralsk were grouped together busily engaged conversing with a Tartar, who had just arrived from Orenburg. They were trying to learn some tidings of the old folks at home; while two wild-looking Kirghiz were

haggling with a knot of Khivans, the latter wishing to buy a sheep which the natives had for sale.

A little way from the town we came upon hundreds of cotton-bales lying scattered along the path. No one was left in charge of them, and the huge bundles seemed at the disposal of any would-be thief. It appeared that they had been brought from Bokhara. The camel-drivers had gone on to Kasala to feast with their friends in that town, but would return when the festival was over, and then continue the journey to Orenburg. In the mean time their master's property was left in the steppe, this affording a striking proof of the happy-go-lucky disposition of the Tartar camel-drivers.

"Will not some of the cotton be stolen?" I inquired of Nazar.

"If God pleases," was the pious answer.

The Mohammedans invariably throw upon the Deity the responsibility for any mischance that may occur through their own negligence, the doctrine of *fatalism* thus covering a multitude of sins.

I subsequently discovered that the only way to impart a little circumspection to my careless camel-driver when, after smashing my boxes, he excused himself on the ground that the Almighty had been the cause of his disaster, was to administer to the delinquent a slight chastisement. This having been inflicted, I exclaimed, "Brother, it was the will of God; you must not complain. It was your destiny to break my property, and mine to beat you. We neither of us could help it, praise be to Allah."

This method of dealing with my party had a capital effect upon them, and much more care was afterward taken in loading and unloading the camels.

Kasala now lay far in our wake, and naught could be seen save an endless white expanse. A gale came on. The wind howled and whistled, billowing before it broad waves of snow. Our eyes began to run, and the eyeballs to ache; the constant glare and cutting breeze half blinded us as we rode. The horses waded heavily through the piled-up ridges. The poor beasts suffered like ourselves: their eyes were incrustated with

frozen tears; and it was as much as we could do to urge them forward.

I had taken the precaution to bring some tinted spectacles from England in order to protect my eyes from this evil, which gives rise to many cases of ophthalmia amidst the nomad tribes, the dust and sun in the summer months being nearly as trying as the cutting winds and dazzling snow throughout the winter. However, my shades proved to be useless. The side-springs were made of steel, and directly they touched my cheeks I felt as if they had been seared with a red-hot poker. There was nothing to be done but to pull my cap well over my eyes, and look as best I could through the dark fur. This somewhat shaded the glaring mirror at our feet, and relieved the aching pupils.

## CHAPTER XXII.

Camels.—Their Rate of March.—How to divide the Marches.—The Kibitka.—Better be Cold than Blind.—A Tartar Cook.—The Turkoman's Appetite.—A Khivan Caravan.—Main Road goes to Khiva.—The Branch Road to the Fort.—Drinking Tea with the Khivans.—Sheltering the Camels.

AFTER marching for about five hours, the guide asked me to halt the caravan. The sun was fast disappearing in the west, as we had started late; and as it is always as well to make a short journey on the first day, in order to see how the saddles fit, and if the luggage has been well adjusted on the camels, I consented, but with the express stipulation that we must strike our camp and start again at twelve that night.

Camels will only feed in the day-time, and the best plan is to march them as much as possible during the night. They walk very slowly, and as a rule can not go more than two miles and a third an hour. This is the average rate of a caravan; however, they walk a little faster at night than during the day, so it is always as well to halt at sunset and start at midnight, unloading the camels for about two hours in the day to feed. By this means the traveler ought to get sixteen hours per day steady work from his caravan, and march at least thirty-seven miles.

All this time the Turkoman driver and guide were engaged in putting up the kibitka. This was intended to screen us from the bitterly cold wind which, coming straight from the east, whistled across the desert, unchecked by mountain or forest.

The kibitkas are very simple in their construction. I will endeavor briefly to describe them. Imagine a bundle of sticks, each five feet three inches in length and an inch in diameter; these are connected with each other by means of some cross-sticks, through the ends of which holes are bored and leather thongs passed. This allows plenty of room for all the sticks

to open out freely; they then form a complete circle about twelve feet in diameter and five feet three in height. They do not require any forcing into the ground, for the circular shape keeps them steady. When this is done, a thick piece of *cash-mar*, or cloth made of sheep's wool, is suspended from their tops, and reaches to the ground. This forms a shield through which the wind can not pass. Another bundle of sticks is then produced. They are all fastened at one end to a small wooden cross about six inches long by four broad. A man, standing in the centre of the circle, raises up this bundle in the air, the cross upward, and hitches their other ends, by means of little leather loops, one by one on the different upright sticks which form the circular walls. The result is, they all pull against each other, and are consequently self-supporting. Another piece of cloth is passed round the outside of this scaffolding, leaving a piece uncovered at the top to allow the smoke to escape. One stick is removed from the uprights which form the walls. This substitutes a door, and the kibitka is completed.

A fire is now lighted in the middle of the tent, some snow put in a kettle, which is suspended from a tripod of three sticks above the flames, and, under the influence of a few glasses of scalding tea, the wayfarer makes himself as comfortable as circumstances will admit.

However, the smoke from the damp wood filled the tent. It was of so pungent a character that we found it impossible to keep on the roof. Our eyes, which had suffered from the wind and glare, now smarted from the smoke, and it was impossible to keep them open.

"The wood is damp," said the guide; "better be cold than be blind;" and, unhooking the upper frame-work of the kibitka, he left only the walls standing.

It was a glorious evening; the stars as seen from the snow-covered desert were brighter and more dazzling than any I had hitherto witnessed. From time to time some glittering meteor would shoot across the heavens. A momentary track of vivid flame traced out its course through space. Showers of orbs of falling fire flashed for one moment, and then disappeared

from our view. Myriads of constellations and worlds above sparkled like gems in a priceless diadem. It was a magnificent pyrotechnic display, Nature being the sole actor in the spectacle. It was well worth a journey even to Central Asia.

In the mean time the guide, who took upon himself the office of *chef de cuisine*, was occupied with an iron pot, his special property. He was busily engaged throwing into this receptacle slices of meat, which with difficulty he had hacked from a piece of frozen mutton. A few handfuls of rice were next added, and some hunches of mutton fat. This he extracted from a hiding-place in his clothes, and the culinary compound was speedily crackling over the red-hot embers of our fire.

It was not a very appetizing spectacle, nor a dish that Baron Brisse would have been likely to add to any of his *menus*; but after a ride across the steppes in midwinter the traveler soon loses every other feeling in the absorbing one of hunger, and at that time I think I could have eaten my great-grandfather if he had been properly roasted for the occasion.

Nazar's face assumed a most voracious aspect. Seizing a large wooden ladle, he buried it in the cooking mass; then, first of all filling his own mouth, with a look of supreme satisfaction he handed me the ladle.

The guide, baring his arm to the elbow, plunged his hand into the pot, and, throwing about a quarter of a pound of its contents within his capacious jaws, bolted it at one swallow. His eyes nearly started out of his head with the effort. He smiled condescendingly; pointed to the viands, the result of his culinary skill; and, rubbing his stomach slowly, gave me to understand that the meat was done to a turn.

The Turkoman sat in a corner of the kibitka. He was taking some little square biscuits or cakes, made of flour, salt, and fat, from a small bag which had been attached to the saddle of his donkey. His countenance wore a melancholy expression, for the biscuits were frozen as hard as brickbats. From time to time he would lay one of the cakes upon the embers, and when it was thawed through, hand it to one of my party. "Yackshe" (good), he said to me, looking at the smoking mut-

ton with a beseeching look, as much as to say, "Let me, too, partake;" when, notwithstanding the disapproving looks of Nazar and the guide, who wished to eat it all themselves, I desired him to squat down by their side.

It was a quaint sight, the two wild figures before me, with their bare arms thrust alternately into the pot, every now and then swearing and looking fiercely at the Turkoman, who, to make up for lost time, eat much more rapidly than they did. I myself was supplied with a large saucerful of rice and meat, which, in spite of the rough manner in which it had been prepared, proved a very savory compound.

While thus engaged, three Khivans rode up to us. One was a merchant who had been to Orenburg. He had there disposed of his cotton-bales, and was now returning to Khiva with a supply of Russian goods in the shape of knives, saucers, cups, and bright-colored chintzes, such as find a ready sale in the khan's territory.

He was a strong-built, sturdy fellow, and about five feet ten in height. A tall, cone-shaped, black Astrakhan hat covered his head; while his body was clad in an orange-colored dressing-gown, thickly quilted, and girt tightly around his loins with a long red sash. A heavy sheep-skin mantle enveloped him from head to foot, and, with his coal-black beard and piercing dark eyes, he would have been worth a large sum to an artist as a model.

For weapons, the Khivan had armed himself with a long single-barreled gun. This was ornamented with damasken work, and had a large, bell-shaped muzzle. The barrel was very thin, and I could not help thinking that the fire-arm, should it be discharged, would be much more dangerous to its owner than to his foe. A short, richly mounted sabre completed his offensive arsenal.

He was accompanied by two countrymen, his servants. They kept a careful eye on their master's goods, and were similarly armed. The party would have made the fortune of any London stage-manager who might have required some brigands for a piece, could they have been placed on the boards as I saw them then attired.

The merchant had twelve camels and four camel-drivers with him, besides five led horses. He himself rode a very nice-looking gray, which I afterward tried to purchase, but no offer would tempt the owner to part with his animal.

He could speak a little Russian, having learned that language when trading at Orenburg. On my offering him a glass of tea, he squatted down by the fire and proposed that we should continue the journey together, when our united caravans would run less risk if attacked by any band of marauding Kirghiz. He also informed me that the track on which we had that day been traveling led straight to Khiva, but that a little farther on the road, at a place known by the Kirghiz as Tan Sooloo, there was a branch road which would take us to Petro-Alexandrovsk.

My guide, however, did not appear much struck with the new arrival, and here observed that we were not going to Khiva but to the Russian fort, and that his orders were to take me to Petro-Alexandrovsk, while Nazar whispered in my ear that the Khivan and his followers would be dangerous companions, the more particularly as their party was, numerically speaking, far stronger than our own.

It was evident that neither my servant nor the guide much liked the proposed addition to our caravan, the real reason being that they thought the Khivan's appetite might perhaps surpass the Turkoman's; and, should I extend my hospitality to the former as well as to the camel-driver, there would be little left for themselves to eat.

My mind was soon made up about the matter. I had learned one piece of important information. This was with reference to the road to Khiva, and I determined, if the merchant could only be persuaded to march as rapidly as ourselves, to join his party.

On mentioning this to Nazar, he shook his head, and remarked that we should be at least twenty days reaching Khiva, even supposing that our guide would accompany us there, as the heavily laden camels of the trader would never be able to keep up with our own. The thought then occurred to me that the amount of barley I had brought for the horses would only last fourteen days, and, hearing from the Khivan's lips that he

did not expect to reach his destination for at least three weeks, I gave up the idea.

After staying at our fireside for about half an hour, the merchant left, and in a short time sent a message by one of his servants asking me if I would honor him by drinking tea with himself and followers.

I found the party encamped in a small ravine, about a hundred yards from my own kikitka, and seated round a fire. They had sheltered themselves in the same way as ourselves, and in addition had raised up an embankment of snow in the direction of the wind, so as to be better protected from its gusts. The camel-drivers had unloaded their animals, and were engaged in shoveling away the snow, so as to leave a dry spot upon which the huge beasts could lie down. Should this not be done, and the camels rest on the snow, the heat of their bodies converts it into water, and the animals get cold in the stomach, an illness which generally proves fatal to them. The luggage and saddles were placed around the cleared spot so as to protect the camels from the wind, and I found that my Turkoman had joined the party, and that his three beasts were also within the inclosure.

The merchant, producing a pillow and piece of carpet, made me sit in the place of honor, nearest the fire. Presently he handed me a tin slop-basin, full of what he called tea, but which was the nastiest beverage it has ever been my bad luck to taste. It was not tea, in our sense of the word, but a mixture which had a peculiar flavor of grease, salt, and tea-leaves. Swallowing my nausea as best I could, in order to avoid offending my host, I drank off the nasty draught, and exclaimed, in the best Tartar I could master for the occasion, "Excellent!"

My host was much pleased at my appreciation of the beverage, and said, "Now I see that you are not a Russian" (Nazar having previously informed him that I was an Englishman). "Strange to say, Russians do not like my tea. Good tea comes from Hindoostan. You will drink some more?"

Fortunately Nazar now came to my rescue. He called attention to the stars, said that it was late, and that we were going to start early; so, shaking hands with my host, I escaped from his well-meant but decidedly disagreeable hospitality.

## CHAPTER XXIII.

A Lazy Guide.—A Cold Pig.—Insubordination.—How to awake Arabs.—Hot Embers better than Cold Water.—Power of Camels to carry Burdens much Exaggerated.—Quickest Road to a Tartar's Affections.—Sores from Frost-bites.

I FOUND the guide lying at full length on an old piece of carpet, which he had placed by the fire. He showed no readiness to resign his place on my arrival. The little Tartar, however, soon removed him, for, taking up the cooking-pot, which was by that time filled with ice and water, he poured a portion of the contents on the head of the delinquent. The latter started up, uttered some fearful language at this summary proceeding, which he did not seem to relish, then rolling the folds of his sheep-skin tighter round his body, he threw himself down a few yards farther off from the fire.

"We shall have trouble with him," said my faithful follower; "he says that we are not to start till to-morrow morning. I told him that you would strike the camp at midnight, and he remarked that in that case we should go alone, and that he would return to Kasala."

It was not pleasant at the outset of the expedition to find this insubordination in one of my party, and I felt that the only thing for me to do was to bring matters to a climax before the refractory spirit communicated itself to the camel-driver.

"We shall march at twelve," I observed; "call me if I am not awake;" and, buckling my sheep-skin tightly around me, I soon fell fast asleep.

It is a curious fact that almost every one of us, if we really wish to awake at a certain hour, invariably do so, and the more frequently a little before the time. The result was that at half-past eleven I started up, thinking that I had overslept my-

self; but, as half an hour at least was required to saddle and load the camels, I determined to awake the guide.

Walking up to his side, I shook him well; he slowly opened his eyes, but, seeing me, emitted a grunt of displeasure and turned over again. It is always difficult arousing this class of people, particularly when they have once made up their minds to sleep till morning.

In the desert of Africa I used to have the greatest trouble with them, one old sheik, who acted as head man to my party, being the most sleepy of mortals. However, I invented a method of arousing him, which proved invariably efficacious. His attire was scanty, and slightly indecent according to our ideas. It merely consisted of a large sheet; this he was wont to wind many times round his body, and sleep, thus protected from the winds, which are very cutting at night-time in the Sahara. No amount of kicking would then awake the old fellow, and I found that the best plan was to gradually roll him over and over until the piece of calico was unwound, and the aged gentleman began to feel the cold breeze against his nude body.

This invariably produced the desired effect; and, arising from the sand, he, in his turn, would visit the other camel-drivers, and perform on them the same operation. However, my Kirghiz guide and Turkoman camel-driver wore no such light apparel. Their sheep-skin garments were tightly buckled round their waists, and of course prevented any such action on my part.

By way of a commencement, I took down the walls of the kubitka, allowing the wind to exercise its full sway upon the bodies of the sleepers, and then trampled upon the embers of our fire. Nazar, who by this time had awaked, now came up, and solved the difficulty by putting some hot ashes on the guide's sheep-skin. The fellow had been awake the whole of the time, and it was only his obstinacy which prevented him from getting up. In fact, no amount of blows would have stimulated the man half so much as the fear that his clothes should suffer.

He sprung to his feet, and, casting sundry imprecations upon Nazar's head, proceeded to arouse the Turkoman.

It was a strange, wild scene, the vast snow-covered steppe lighted up as brightly as if it were midday by a thousand constellations, which reflected themselves in the cold white sheet below. Not a cloud dimmed the majesty of the heavens; the wind had lulled, and no sounds broke the stillness of the night; the Khivan and his followers were buried in the arms of Morpheus; the merchant's head resting on his richly ornamented saddle, while a sword was placed by him ready for instant action; the camel-drivers lay within the inclosure formed by their camels; my Turkoman had huddled himself up for warmth against the body of our largest quadruped; while his donkey, attracted by the warmth of the fire, had hobbled to the embers, and was sleeping side by side with the trader.

The Turkoman resented strongly the unceremonious manner in which he had been awakened; and he took hold of the haft of his knife, prepared to avenge this kind of treatment. However, the guide putting his hand upon the hilt of the rusty old weapon which was strapped to his side, the camel-driver succumbed, and helped to pack the tent.

There was now no more resistance. My men were thoroughly aroused, and a few minutes later our camels could be heard venting their indignation at being laden by deep, low growls, bursting out at intervals, as each beast thought that his own load was heavier than that of his fellows.

There is a good deal of nonsense talked and written about the patience and long-suffering of these so-called ships of the desert. I should much like any individual who thus sings the virtues of these huge animals to ride a thousand miles on a camel, as the writer of these lines has done, and find his patient quadruped either running away, or else suddenly lying down without any forewarning motion. This latter camel eccentricity is most disagreeable, as the rider has his backbone nearly dislocated, or otherwise feels as if his body were split up by the unexpected concussion. The power of camels to carry burdens is also much exaggerated; and although a strong beast will carry eight hundred pounds day after day for a short journey, he very soon breaks down if you should increase the march. I had reduced the weight carried by my own animals

to four hundred pounds per camel, and even with this light load had great difficulty in making them march sixteen hours a day.

Nazar by this time had blown up the embers of the fire into a flame, and was ready with some large beakers of boiling tea. This beverage becomes an absolute necessity when riding across the steppes in midwinter, and is far superior in heat-giving properties to any wines or spirits. In fact, a traveler would succumb to the cold on the latter when the former will save his life. The hot liquid soon put the Turkoman and guide in good humor; and the fond way in which they looked at my little servant when he handed them each a handful of sugar showed me that this difficulty was settled. The quickest road to a dog's affection is through his stomach, and a Tartar's sympathies lie very much in the same direction. My men had now learned that they must obey; and the guide, this having once been thoroughly impressed upon his stolid mind, became thoroughly amenable to discipline.

A considerable amount of time, however, had been lost, and it was 3 A.M. before we were in the saddle. The Turkoman knew the road, and started with Nazar and the caravan, while the guide and myself trotted forward at the slow, ambling pace peculiar to the animals of the steppes, and which some of them can keep up for twenty-four hours on an emergency. It is not quite so fast as a huntsman's average pace when returning with his hounds to the kennels, but a much more jolting one, as the Kirghiz horses are generally very rough. Indeed, I soon found this out to my cost, for the sores on my arms and elbows were only half healed over, the limbs not having recovered from the effects of the frost-bites inflicted during my sleigh journey. Not being able to change my clothes was an additional source of annoyance, for if I could only have bathed my arms there would have been less suffering; but undressing in those climes would only have added fuel to the flame, and created fresh frost-bites.

After about two hours' riding, the guide suddenly stopped. He now proposed that we should wait until the caravan arrived; and, hobbling our animals with a piece of cord made of horse-

hair, and which the Kirghiz use especially for this purpose, we threw ourselves down upon the snow, and tried to sleep.

No fire could be made, as there were no brambles in the neighborhood, and the cold, which was becoming very intense, penetrated through my sheep-skin clothes.

It was impossible to go to sleep, the frost not being of that violent nature which utterly prostrates a man, although it was quite sufficient to make me feel very uncomfortable. However, the guide seemed to be impervious to the weather, while some loud snoring informed me that he was lost to consciousness.

There is a sort of dog-in-the-manger feeling which seizes many of us when we see another enjoying that of which we can not ourselves partake, and the weakness of human nature is such that I felt very much inclined to awake the slumberer, and make him teach me a little of the Kirghiz language, instead of letting the fellow rest in peace. However, I resisted the temptation, and, lighting a cigarette, walked up and down, straining my eyes in the direction of our gradually approaching caravan. I was looking forward to the moment when we could once more trot onward, the rough motion of the horse, frost-bites and all, not being so hard to bear as this wearisome onslaught of the elements, which utterly prevented slumber.

## CHAPTER XXIV.

The Guide's Retaliation.—Horses' Nostrils stuffed up with Icicles.—Endurance of the Horses.—The Brother-in-law's Horses.—Kalenderhana.—A Sudden Thought.—Stchi.—The Women expose their Faces.—The Kirghiz Poetry.—Sheep.—A Sign of Manhood in the Bridegroom.—Jealous Females.—Feasting.—A Peculiar Pocket.—Games.—Horse-races.—The Girls and their Admirers.—The Prettiest Girl in the Tribe.—A Simple Marriage Ceremony.—But supposing she would not have you?

THE sun now arose bright and glorious. All the colors of the rainbow lighted up the sky. The wind had calmed, and the cold became less searching. Presently my little caravan loomed in sight. Nazar was fast asleep, and stretched out at full length on the top of a gigantic camel, the little Tartar's legs dangling on each side of the saddle, while, for better security, he had strapped himself to a corn-sack.

The guide now retaliated upon the sleeper for the ducking the latter had inflicted upon him the previous evening: he seized the camel's nose, and made that peculiar lispng sound which all Tartars use to these animals to make them lie down. The big brute went down at once on his knees with a sudden jerk, greatly alarming my little servant, who awoke, thinking that his strap had broken, and that he had been precipitated to the ground.

In a few minutes we had put up the walls of the kibitka, a fire was blazing, and one of the buckets containing frozen cabbage-soup was gradually becoming thawed over the flames. It was just 9 A.M., and the caravan had marched six hours, we having, according to the guide, done seventeen miles. What had surprised me most during our morning's march was the extreme endurance of our horses. The guide frequently had to dismount and to clean out their nostrils, which were entirely stuffed up with icicles; but the little animals had plowed

their way steadily through the snow, which was in some places quite two feet deep. The one I rode, which in England would not have been considered able to carry my boots, was as fresh as possible after his march of seventeen miles, and, in spite of the weight on his back—quite twenty stone—had never shown the least sign of fatigue.

“He is a wonderful horse,” I said to the guide.

“Horse!” observed the latter, very contemptuously; “call him a horse! You should see my brother-in-law’s horses at Kalenderhana, for they are beautiful animals, round and fat.”

“Where is Kalenderhana?” I inquired.

“On this side of the Oxus,” was the reply, “and on the main track.”

“Not on the road to Petro-Alexandrovsrk?” I observed.

“No, on the road to Khiva.”

A thought then suddenly occurred to me. Why not try and persuade the fellow to take me to Kalenderhana under the pretext of buying some horses from his brother-in-law? It was true that I should still be a good many miles from Khiva; but if the guide could only be induced to continue the journey as far as his brother-in-law’s village, I might then find some other excuse to proceed onward, and enter the khan’s capital without having put my foot into the Russian fort.

“How far is Kalenderhana from Petro-Alexandrovsrk?” I inquired.

“About forty miles.”

“It is a pity your brother-in-law’s kibitka is so far from Petro, for perhaps you are right about this animal. He is hardly up to my weight, or fit for so long a journey; however, as we are going to the fort, I shall buy some horses in that neighborhood. I am told that the horses there are very beautiful, that they are round and fat, and they can gallop like wind.”

I had said enough, and it seemed to me that the best course to pursue would be to let the conversation drop as if I had no particular interest in the matter, and had made up my mind as to what I was about to do. Nazar I had gained over to my views, having promised him a hundred-ruble note the day we

reached either Bokhara or Merve, *via* Khiva, and the little Tartar was well aware that if we once entered Petro-Alexandrovska he had but little chance of earning his promised reward.

The guide could not have been persuaded to go to Khiva by a mere offer of money. If this had been suggested to him he would have become suspicious, and have made a mental calculation as to whether it would not have been better worth his while to obey the Governor at Kasala and receive a reward from him, for having, in spite of my offer, brought me straight to the fort, and carried out his instructions to the letter. However, there is one element in a Kirghiz's mental composition that outweighs every ordinary pecuniary consideration, and that is his intense love for horse-dealing; and no Yorkshire farmer is keener in this particular branch of commerce than these half-savage wanderers in the steppes of Tartary.

The Turkoman, who was superintending the *cuisine*, now announced that the soup was ready, and we were soon at work swallowing large spoonfuls of this favorite Russian dish, *stchi*. It was not an appetizing mixture to look at; masses of thick grease floated on the top of the finely grated cabbage, while a few sticks mixed with some pieces of meat which had been cut up in the soup showed that one of the fagots had fallen into the caldron.

The camel-driver again distinguished himself as a trencherman, on this occasion eating the whole of a four-pound loaf. Occasionally he would bury his head in the soup vessel and suck up the half-tepid liquor, much to the indignation of Nazar and the guide, the former remarking that this way of eating was not fair, at the same time offering the Turkoman a spoon. This the latter gratefully declined, and made my followers still more angry by saying that the soup tasted better if eaten in his manner.

The time sped by rapidly, when, on looking upward, I found that the sun would soon be at his highest altitude, and that we had already been nearly three hours stationary. The horses had finished feeding; so, saddling the animals, we proceeded on our journey with the Khivan caravan, which had by this time caught us up.

The merchant now announced his intention of continuing the march in our company, at all events for that day, in spite of the extra weight carried by his camels. He was very inquisitive about England and her manufactures, the more particularly as one of his relatives had visited Hindoostan, and he himself had been several times to Bokhara and Balkh.

“When the railway is opened from Sizeran to Orenburg, I shall go to St. Petersburg,” he observed. “They tell me that it is like an enchantment, that it is like a fairy city.”

“The women expose their faces,” I remarked.

“Yes; that I have observed during my visits to Orenburg, and was at first surprised to see that their husbands did not mind it any more than do these barbarous Kirghiz.” As he said these words he looked contemptuously at the guide, who was riding a little in advance of the party, engaged in singing a song descriptive of his love for mutton.

The Kirghiz poetry is filled with odes in the honor of sheep, the natives placing this animal on the highest pinnacle of their estimation—after their wives, and, indeed, sometimes before them. Sheep make up the entire riches of these nomad tribes. A Kirghiz lives upon their milk during the summer and autumn. At that time of the year he would consider it a great piece of extravagance to eat any meat, and this is only done should any animal become ill and die, in which case there is a feast in the kubitka. However, if a guest arrives, nothing is too good for him, and hospitality is shown by slaying one of the flock.

It is then a red-letter day, and it is remembered long afterward by the owner of the animal.

In winter, when there is nothing else upon which the Kirghiz can subsist, they are obliged occasionally to kill some of their sheep, varying this diet by eating either a horse or a little camel's flesh—that is to say, should any of these last-named quadrupeds meet with an accident or die a natural death in the neighborhood. A native's clothes are made entirely of sheep's wool manufactured into coarse homespun. When he wishes to buy a horse or a camel, he gives so many sheep in exchange; and when he wants a wife, he pays for her in the same com-

modity, a good fat sheep being worth in those parts about four rubles, or eleven shillings of our money.

The Kirghiz have a custom of betrothing their sons to girls often several years before the latter have arrived at puberty. This is done by the parents of the interested parties, the father of the lad giving so many of the flock to the girl's parents. When the lady is old enough the bridegroom fetches her home to his habitation. Her father, if he be generous, returns to the young couple the same number of animals that he has previously received, with a few in addition as interest. But this is only among the more wealthy families; the heads of poorer establishments do not feel inclined to give back any of their sheep, and prefer being thought stingy to having nothing to subsist upon in the winter.

Sometimes the matrimonial arrangement is made by the would-be husband, who, going straight to the girl's parents, strikes a bargain with them for their daughter. When all things are arranged he returns alone to his own kikitka, which is, perhaps, two or three hundred versts from the young lady's home. After waiting here a few days, he goes back for his bride.

It is considered a sign of manhood should the bridegroom, regardless of robbers and marauding parties, bring no companions when journeying toward the kikitka of his betrothed. The young lady herself sits inside the tent, and sings a ditty which has reference to her lover's bravery, to her own good looks, and to his good fortune, to sheep, and to the festivities about to ensue.

The women of the tribe squat on the ground and form a circle round the tent. If the bridegroom attempts to enter the bride's kikitka, the jealous females rush forward and beat him with sticks, the most unfavored and elderly of the unmarried women taking great delight in this performance. However, love generally prevails; the young man's back smarts, but he forces a passage into the kikitka. His beloved one now throws herself into his arms, and he there seeks a solace for all his troubles. The young lady then presents him with some feathers, red silk, and cloves, this being the accustomed offering

made by a Kirghiz maiden to her bridegroom to testify to him her purity and affection. The happy couple are now left alone, the women outside singing some native ditty, in which the joys of marriage are rather forcibly described.

Feasting then begins; friends and relations come from all parts of the steppe, having brought horses and sheep as a contribution to the festival; indeed, without this it would be impossible for the host to give the entertainment, for he would be literally eaten out of house and home.

Sometimes a hundred sheep and forty or fifty horses are slain, the iron caldron being kept all day long at boiling-point. The Kirghiz stuff themselves to repletion, and afterward carry away in their trousers, which they tie up at the knee, the meat they are unable to swallow at the time. It is a peculiar pocket, the roast mutton in this manner coming closely in contact with the Kirghiz legs; but such little matters do not affect these half-wild wanderers. When the feast is over the games begin, and the animals which have not been eaten are set apart as prizes, the young men wrestling with each other. No tripping is allowed, no dexterity comes into play, and the contest is decided by sheer strength.

After this there are horse-races, the length of the course being from twenty to thirty miles, this distance being accomplished at the rate of from eighteen to twenty miles an hour, the successful rider sometimes receiving eight or nine horses as a prize.

Then the girls mount the swiftest horses which they can borrow from their friends or relations, and one of the Amazons, challenging the men to race against her, gallops across the steppe. She is pursued by a horseman, who strives to place his hand round her waist, the girl all this time showering blows with her whip on the head of her admirer, and doing her best to keep him at bay. If he does not succeed in his attempt, the girl will often turn round upon him, and so belabor the unfortunate wight with her whip that he frequently falls off his horse, and is then an object of scorn and derision to all the assembled guests; but if, on the contrary, he succeeds in placing his hand on the girl's breast, she surrenders at

once, they ride away together amidst the cheers and encouraging shouts of the company, and it is not considered strict etiquette to follow, no chaperons in Tartary being considered necessary.

The Turkomans sometimes decide the knotty point of who is to marry the prettiest girl in their tribe in the same primitive manner. On these occasions the whole tribe turns out, and the young lady, being allowed her choice of horses, gallops away from her suitors. They follow her, and she avoids those whom she dislikes, and seeks to throw herself in the way of the object of her affections. The moment that she is caught she becomes the wife of her captor. Further ceremonies are dispensed with, and he then takes her to his tent.

"What do you pay in your country for a wife?" asked the guide, when I had finished questioning him on these subjects.

"We pay nothing. We ask the girl, and if she says yes, and her parents do not refuse, we marry her."

"But if the girl does not like you—if she hits you on the head with her whip, or gallops away when you ride up to her side—what do you do in that case?"

"Why, we do not marry her."

"But if you want to marry her very much; if you love her more than your best horse and all your sheep and camels put together?"

"We can not marry her without her consent."

"And are the girls moon-faced?"

"Some of them."

The guide appeared to be lost in a fit of meditation very unusual amidst the Arabs of the steppes. Presently, removing his sheep-skin hat, and rubbing his closely shaven head, he said, "Will you take me with you to your country? It would be so nice; I should get a moon-faced wife, and all for nothing. Why, she would not cost so much as a sheep."

"But supposing she would not have you?"

"Not have me!" and the guide here looked at me in astonishment, which he emphasized in a manner peculiar to his countrymen, by using his fingers instead of a pocket-handker-

chief. "Not have me! Well, I should give her a white wrapper, or a ring for her ears or her nose."

"And if she still refused you?"

"Why, I would give her a gold ornament for her head; and what girl is there who could resist such a present?"

## CHAPTER XXV.

Disobedience of Orders.—A Lesson.—A Song about a Sheep.—The Importance of a Traveler gauged in Russia by his Furs, in Asia by his Retinue.—Worn out.—The Pretty Ice-bearer.—Moon-faced Girls.—Seville.—Gitanas.—Buying a Sheep.—“Fat!”—A Beautiful Butcher.—Disillusion.—A Kirghiz Pipe.—Kirghiz Tobacco.—Heart Disease.—Desultory Warfare.—Progress of Russia.—The Sword and the Gibbet.—Christianity and the Bible.—A Filthy Habit.—Snow for Horses instead of Water.—In the Misty Gloom of Awakening Day.—Stretching a Point.—We will go to Kalenderhana.—Ootch Ootkool.—Tan Sooloo.—Tooz.—A Small Salt Lake.

THE afternoon was now drawing to a close, and by this time the guide and myself had ridden on considerably ahead of the Khivan and his party; the merchant, who spoke a little Russian, having sometimes acted as interpreter between myself and my follower. I had previously desired Nazar to continue marching with the Turkoman and our three camels until they came up to us.

From time to time the guide would leave the track, and, galloping his horse on to any little rising ground in the neighborhood, search for a convenient spot upon which to encamp. At last he selected a small ravine, sheltered from the wind by two low hills. There was a great deal of brush-wood in the neighborhood, and I then learned that this spot, even in the winter-time, was a resort of the wandering tribes, as a certain amount of grass could always be found beneath the snow; in fact, sufficient to keep life in their animals till the early spring. But now, for as far as we could see, there was no living soul besides ourselves in sight.

The cold had become more piercing than ever. The felt which covered the stirrup-irons had worn off in places, and I had continually to remove my feet from the stirrup-irons in order to prevent their adhering to the steel. We looked every-

where, but in vain, for the caravan; so, dismounting and hobbling our horses, we began cutting down what brush-wood we could find for a fire, a small axe purchased at Kasala, and which was hung from my saddle, now proving very useful. Fortunately, the wood was not at all damp; the guide had found some grass as dry as tinder; and in about five minutes we had made a fire.

An hour passed away, and then another, but no signs of the caravan.

My follower now began to be alarmed, and proposed that we should retrace our steps.

After about half an hour's ride we came upon the Khivan's encampment. It appeared that he had stopped at this place, and as our Turkoman had declared that he did not know the way, Nazar had taken upon himself to halt and to unload the camels.

My feet by this time were suffering a good deal from the cold; but it would never have done to have given in to my lazy followers, or these delays might be repeated. I instantly ordered them to saddle and load the camels. A few grumbles could be heard, but the men obeyed, and I then returned with them to the spot my guide had originally chosen.

The lesson produced its effect, and the trouble given in reloading the caravan proved most efficacious, as on no subsequent occasion did the Turkoman attempt to halt until such time as he had come up with the guide and myself.

I was now fifty versts from Kasala; and as the camels had marched for sixteen hours with but a short halt the previous evening, I determined to remain till dawn, and then start. This time I had little difficulty in awaking my party; they were becoming disciplined, and the moment I shook the guide he arose and began to load the camels.

I had promised to buy a sheep, if we met any Kirghiz on the road who would sell us one. This had greatly raised the spirits of my followers, the guide having improvised a song about the liberality of the Englishman about to give them a whole sheep, of which he was to have the liver and the most delicate morsels as his own portion.

Quantities of shrubs on both sides of the path, and extending right and left as far as the eye could reach, varied the monotony of the scene; bright-colored grass and low brush-wood in great abundance were interspersed with thick masses of stunted bramble-trees. It was evident that we were approaching a locality frequented by beings like ourselves, for human footsteps could be plainly traced in the track leading to some black dots yet only dimly seen in the gradually breaking morn. Larger and larger they became, until at last a thick cloud of dark-blue smoke issuing from the roofs of these dark objects showed us that we were approaching the dwelling-place of some Kirghiz.

On descending a steep ravine, we came upon what appeared to have been a sheep-pen, for the foot-prints of these animals could be here seen in great abundance, and an inclosure of piled-up logs showed where the sheep had but recently been confined. The guide now got off his horse, and looked at me complacently. "Bah, bah!" he said, and, opening his mouth from ear to ear, showed a row of white teeth which would have been the envy of many a London dame.

However, he did not wish to go forward at once to the kikitkas. We should not present the same majestic appearance alone and unaccompanied, as we should make a little later, and at the head of our caravan. In Russia the importance of a traveler is gauged by the value of his furs, but in Asia by the number of his retinue. The guide was aware of this, and in spite of his longing for mutton, he was enabled to restrain himself until such time as we could appear with proper dignity.

I myself was not sorry of the opportunity afforded me to obtain a little sleep. Continued traveling had thoroughly tired me out, and, flinging myself down by the side of a huge bonfire of brambles, I became instantly lost to consciousness. When I awoke, the sun was descending toward the west, and Nazar, coming up, told me that the caravan had been waiting there two hours, but, seeing that I was so fast asleep, he had not wished to awake me.

Another half-hour, and we rode up to the principal kikitka.

It evidently belonged to a wealthy Kirghiz. The dwelling was three times the size of an ordinary kibitka, and the walls were ornamented with straw plaiting of different colors, while an abundance of hay in an inclosure adjoining the dwelling showed that the proprietor was a prudent man, and had laid in a supply of fodder for his horses.

A girl who was carrying a large sheet of ice to the tent came up to the guide, who asked her if there were any sheep for sale. This inquiry instantly produced a sensation in the kibitka, and the whole family came out to have a look at the Croesus who actually wanted to buy a whole sheep.

The head of the kibitka was a man considerably above the middle age. He must in his earlier days have been a splendid type of mankind, for even now his muscular neck, square shoulders, and enormous girth of chest, showed that he would be a dangerous opponent in a hand-to-hand struggle. He was followed by a woman suckling a child, and in rear of her, and taking a shy, inquisitive glance at the new arrival from behind the door of the kibitka, was the girl the guide had accosted on arrival. She was an exception to the generality of Kirghiz women, who rarely exhibit any marked signs of beauty, and their high cheek-bones, bullet heads, and low foreheads are not often appreciated by the foreigner.

A moon-faced girl in a London ball-room would be added to the list of wall-flowers, though in a Tartar's estimation that class of beauty is the highest to which the fair sex can aspire. The ice-bearer, however, would have held her own, if pitted for good looks, against any European belle; and her complexion, two or three shades darker than that of her companions, made my thoughts wander several thousand miles in another direction, and I bethought me of far-off Seville, for the girl might have been a gitana, from Triana by the side of the Guadalquivir.

She was evidently from a southern clime, her small mouth and well-shaped nose—a relief from the pug probosces which, for the most part, distinguish the Tartars—denoting a Persian origin, very likely the daughter of a captive who, in years gone by, had been carried off in a raid from the country on the

other side of the Attrek, and found favor in the eyes of her master.

The old man volunteered to lead us to the sheep-fold, so, dismounting from our horses, we accompanied him in that direction. The pretty girl, who had recovered from her shyness, hurried forward to catch one of the flock for our inspection. She ran like a hare over the rough stumps and brush-wood which studded the snow-covered ground, a large number of black-faced sheep scampering before her. At last she came up with one which, fatter than its companions, could not keep up with the flock. Suddenly stooping, she seized her victim by one foot, and with a rapid movement turned him over on his back. A clear, ringing laugh resounded from her lips. She turned round to us and pointed triumphantly at the sheep; then, drawing her hand across her neck, she went through, in pantomime, the operation of cutting his throat.

My guide was now in his element; he rushed forward, and, bending down, punched the unfortunate animal in the ribs; then looking up at me, he made use of the one word, "Fat!"

A bargain was soon struck, the price being four rubles; and we returned to the kibitka to pay a visit to the proprietor, the girl going on in front with her arm round the neck of my recently acquired purchase, the slight shadow of sentiment created in my mind at the first sight of her beautiful face becoming rapidly effaced as I saw how eager she was to play the part of a butcher.

On entering the tent I found that the ground was covered with thick carpets, a layer of hay having been put down between them and the ground. The carpets were of many colors, and on inquiry I learned that they had been purchased from a merchant who had passed that way on his road to Kasala. A cushion was brought for me, and I was given the post of honor by the fire, which consisted of a few red embers piled up in a shallow basin of dried clay; the proprietor squatting down opposite me, while the rest of his family, seated on their hams, their knees and chins touching, gazed curiously upon the newly arrived stranger.

The children were so wrapped up in skins and furs that each

child looked three times his natural size. They were amusing themselves by teasing the unfortunate sheep, which was tied up to the door of the kubitka. A single-barreled gun—the barrel tied to the stock by a leathern thong—and two old swords were hung up in the corners of the tent; a few iron cooking-pans, a bright-colored earthenware tea-pot, and some wooden spoons, stood on a gaudily painted wooden box, which contained the valuables of the proprietor.

A large brass pipe was near the fire. It resembled a Turkish so-called hubble-bubble, as the smoke had first of all to pass through some water which was contained in a receptacle below the bowl, while, instead of there being a long india-rubber tube through which to inhale the fumes, this was substituted by a wooden stem about two feet long, to the end of which was a horn mouth-piece. The tobacco smoked was very different from any I have seen in other countries, and was so strong that two or three whiffs were sufficient to prostrate for the moment any man not accustomed to its use.

The host, taking up his pipe, slowly inhaled the fumes, until after about half a minute he fell back upon his carpet, apparently stupefied by the effects of the tobacco. Indeed, I subsequently heard that all natives who much indulge in this kind of smoking are subject to heart disease, and a number of sickly Khivans were pointed out to me as victims to this habit.

We were informed that the snow on the desert in front of us was very deep in several places, and that we should have a great deal of difficulty in riding through some of the drifts. To the guide's inquiry whether there had been any bands of Turkomans in those parts, the answer was "No;" that the country was, comparatively speaking, quiet; but that as the Oxus was frozen, no one could tell whether some Turkoman party or other might not have crossed the river during the last few days.

There was a sort of desultory warfare,\* which is carried on at intervals between the Russians and some of the Turkoman tribes, the former shooting down the Bedouins of the steppes

---

\* See Appendix A.

without any mercy whenever they catch them. Where might is right, a great deal can be done by this terrorizing system. However, it is as well to call things by their proper names; and it would be more correct to say that the progress of Russia in the East is based upon the sword and the gibbet, rather than upon Christianity and the Bible.

The guide now became impatient, and proposed that we should return to our tent, which had been pitched at about ten minutes' walk from the aúl. He was a little alarmed lest I should invite his compatriots to the feast, in which case, as it is always the custom to help the guests first—and their appetites he gauged by his own—he thought that there would be little or nothing left for himself and Nazar. In the mean time the young lady—the *ci-devant* object of my admiration—had cut the sheep's throat, and a little while later the carcass was brought to our encampment, the fair butcher receiving the skin and head as a recompense for her trouble.

My followers were in their element. Huge lumps of half-cooked meat and fat rapidly disappeared down their throats, the feasting going on steadily during several hours. At last nature could do no more; all the belts had been let out to the last hole; and Nazar, putting his head close to mine, eructed loudly in my face, the Turkoman and the guide performing the same operation, but fortunately at a little distance. This was done in honor of the entertainer, and in order to show their appreciation of the repast. Indeed, to such an extent is this filthy habit fashionable in Central Asia, that a Kirghiz who has eaten nothing in his friend's house will do his best to eruct outside, so that all the by-standers may say, "See how he has been entertained! How he must have feasted! His host has honored him. He must be a distinguished man!"

We continued our march at day-break, and rode toward a spot known by the Kirghiz as Berd Kazgan, where there was said to be a well of brackish water. Our horses and camels had not drunk since leaving Kasala. They had only eaten snow; and although the Kirghiz never give their herds of horses any water during the winter months, but leave them to shift for themselves, the animals suffer very much in conse-

quence, and when they are doing hard work the owner has to give them water at least every fourth day.

Our course now lay nearly due south. Occasionally we came to places where the wind acting upon the snow had blown it into all sorts of curious forms and shapes. Sometimes, in the misty gloom of awakening day, we seemed to be riding through endless cemeteries, the frozen patches resembling slabs or marble grave-stones, this apparently unbounded burial-ground extending across the desert as far as the eye could reach.

As I was riding across the plain my horse stumbled slightly, when the guide remarked, "How thin the poor beast is! If you could only see my brother-in-law's horses!"

"Well," I replied, "it is rather out of the way to ride to Kalenderhana; but, to oblige you, I would not object to stretch a point, and go there instead of to Petro-Alexandrovsk."

"What would the commandant say?" observed the guide. "He might punish me; perhaps I should be beaten."

"That is your business, not mine," I remarked; "but the horses are beautiful at the fort. We will go there."

"No," said the guide, "we will go to Kalenderhana, and then from my aúl to the fort. It will be a little way round: however, that does not signify. We will not say a word to the commandant, and you shall buy such a horse! You will look with scorn at every other horse you may see, and people will say, 'What a fortunate man!'"

We had now thoroughly outstripped the Khivan, being at least twelve hours ahead of his caravan. I was not sorry for this, as otherwise the sudden change in my route might have surprised him. We had left Ootch Ootkool, a spot marked on Wyld's map of Khiva, considerably to our rear, while the country was a succession of hill and dale, but much more undulating toward my bridle-hand than in the direction of the setting sun.

Our course, as we neared a spot known by the Kirghiz as Tan Sooloo, was due south. From this place to Tooz, our next halting-place, the distance was sixty versts. On either side of

the track there were deep hollows and ravines innumerable, while saksaoon and brush-wood became each moment more scarce. Apparently all this country had been at some remote period buried beneath the sea. Frequently we came across shells and other marine crustacea scattered in profusion along our path, while at Tooz we passed a small salt lake which lay about a hundred yards to the east of the track, and was frozen as hard as adamant.

Tooz signifies "salt" in the Tartar language, and the sand all about the lake is saturated with salt. Indeed, the traveler does not require any stronger testimony to this fact than the peculiar taste of his tea, for, however carefully the snow is chosen, it is sure to become mixed with a little sand; and the more you drink, the thirstier you become. According to the guide, there were two much larger sheets of salt-water to the west, dividing the ground between ourselves and the Sea of Aral.

## CHAPTER XXVI.

The Turkoman on his Donkey.—Jana Darya.—A once Fertile Country.—A Barren Waste.—The Grandfather of the Khan.—English Horses and Kirghiz Horses.—Russian Cavalry.—A Sea of Molten Gold.—Silver Isles.—Kamstakak.—A Fresh-water Pond.—A Return to Vegetation.—Soigak.—Pheasants.—The Camel-driver is taken Ill.—The Moullahs.—Conjuring the Evil One.—A Dog of an Unbeliever.—The Guide's Fight with the Khivan.—A Revolver is sometimes a Peace-maker.—Khivan Method of preserving Grass throughout the Winter.—Deep Chasms.—Tombs.—The Vision of the Kirghiz.—The Kazan-Tor Mountains.—Auriferous Nature of the Soil.

It was a quaint spectacle to watch my little caravan as we rode away from our different encampments. First came the guide, clad in a long dressing-gown of crimson cloth, which he had exchanged for the more homely garment in which he commenced the journey. His robe, which was lined with sheep-skin, was tightly girt round his loins with a broad blue sash; a tall, conical-shaped black hat surmounted his bronzed countenance. His sword dangled at his side, and he used the weapon sheathed as a whip to urge on his steed, now a little done up by this constant marching through the snow.

Then appeared a still more ludicrous figure—the Turkoman camel-driver. He rode a donkey he had purchased just before leaving Kasala. The long legs of the rider nearly touched the ground, while his figure was wrapped up in a tattered robe that looked as if it might have formed part of an old Turkish carpet. His head was adorned with a white sheep-skin hat of the coal-scuttle pattern. His feet, which had first been carefully wrapped up in many thicknesses of cloth, were inserted in a pair of enormous high boots. Around his arm was hitched the end of a rope; this was attached to a huge camel, which strode behind the donkey.

On the top of the camel lay my Tartar servant, generally

fast asleep, with arms and legs outstretched, while a cord was bound round his waist, and attached to some corn-bags to keep him from rolling over. The other two camels stalked along in the rear, the whole cavalcade throwing weird and grotesque shadows on the pale carpet of snow, which exaggerated a thousand times in its reflections the motley appearance of my party.

We were approaching Jana Darya, the dried-up bed of a river which is lost in the sand. All the desert in this neighborhood was once thickly inhabited. Canals cut on all sides irrigated the now parched-up soil; and this not so long ago, for there are men alive who say that they have heard tell of the former richness of this district.

The grandfather of the present Khan of Khiva is said to have been the cause of this once fertile plain having been changed into an absolute waste; for, fearing that the Russians would make use of the Jana Darya and its communication with the Syr Darya as a means to advance upon Khiva, he had a dam built near the junction of the rivers. The Syr Darya then no longer supplied the Jana's channel; gradually the water dried up, and the inhabitants of this former rich district emigrated by thousands to the other side of the Oxus.

Later on, and after the Russians had built Fort Perovsky, the dam was destroyed, and the Jana Darya once more fertilized the district. However, the Jaxartes became then so shallow that the steamers in the Sea of Aral could with difficulty ascend to Tashkent; so the old channel was once more blocked, and thousands of acres of once fertile territory are now a barren waste.

From Jana Darya we rode sixty versts, or forty miles, without a halt. I must say that it much surprised me to see how well the Kirghiz horses stood the long journeys. We had now gone three hundred miles, and my little animal, in spite of his skeleton-like appearance, carried me quite as well as the day he left Kasala; this, probably, being owing to the change in his food from grass to barley. We are apt to think very highly of English horses, and deservedly, so far as pace is concerned; but if it came to a question of endurance, I much doubt wheth-

er our large and well-fed horses could compete with the little half-starved Kirghiz animals. This is a subject which must be borne in mind in the event of future complications in the East; and should the military law of universal conscription be ever applied to the nomad Kirghiz, Russia, besides having a greater force of cavalry than any other nation, will be supplied with the hardiest horses in the world.

Now the snow became scarcer along the track, and could only be found in thin patches, the sand being almost everywhere visible, and looking, beneath the influence of a glaring sun, like a sea of molten gold studded with silver isles. Presently the latter, in their turn, could no longer be seen: the snow had entirely disappeared from our gaze, and an unbounded ocean of sand lay behind us, before us, and all around.

It must not be thought that the cold had equally taken flight; and the two days' march when the ground was exposed to view were the most trying of the journey. The mercury had descended to  $30^{\circ}$  below zero, and the wind was more biting than ever—in fact, we could not take off our gloves for an instant without the hands and fingers being instantly benumbed, and powerless to do their work. My followers had a great advantage in this respect, as their Eastern attire required no buttoning; while, if ever I unbuttoned my coat, my fingers lost their feeling, and the little Tartar's services had to be called into requisition to button it for me again.

Just before reaching a spot known to the Kirghiz as Kamstakat, we rode through a raised plain surrounded by sand-hills. It formed a vast natural amphitheatre of a circular shape, with a diameter of quite five miles. In the centre of this plateau we came upon a fresh-water pond, the result of the rain, which falls very heavily during the rainy season in the months of February, March, and April. A good supply of ice was chopped out with the axe, and some large pieces of the frozen water strapped to the saddle of one of the camels, for us to melt, if required, during our onward journey.

The country now again showed signs of a return to vegetation. It was covered with thick brush-wood, the shrubs being much larger; and the general appearance of the landscape be-

tokened that we were approaching a more fertile soil. For the first time since I left Kasala, traces of game were to be found. Here and there a hare would dart across our path, while herds of the saigak, as difficult to approach as the chamois, could be seen bounding away from us at the first sound of our approach. Pheasants were said to be plentiful in the neighborhood, and occasionally we could see the birds running before us in the distance, seeking to hide themselves in the thick foliage.

Up to this time every thing had gone smoothly with my party, and no one had shown any symptoms of illness; but this happy state of things was not destined to continue, for the camel-driver now began to show decided signs of being done up. He had caught a fever some years before at Bokhara, and was subject to periodical attacks of this malady. He groaned a great deal, could not look at food, and on trying to mount his donkey fell backward in the attempt. There was nothing for it but to strap him on to a camel and continue on our way, the poor fellow writhing with pain at every movement of the animal. I offered him some quinine, but he had a horror of medicine, and said that he should not be well till he saw his moullah, or priest, when the latter could conjure the evil one out of him.

The Turkomans and other nomad races in the steppes often attribute a disease or illness to the devil, and think, like some nations of old, that they can not be cured unless a holy man will exorcise the demon, and, with him, their malady. All that night the camel-driver groaned incessantly, and he showed such signs of prostration that I much feared we should never get him alive to the guide's aúl.

About thirty miles from the fresh-water pond in the wilderness we came to a place known as Karakol. Here we saw, to the west of our route, what appeared to be a large lake. However, the guide said that it was an overflow from the Amu Darya. Close by the water there were a few Kirghiz kubitkas, the ground being cultivated in this neighborhood, while corn and various grasses for cattle abounded throughout the district.

We now encountered a small party of Khivans. My guide

gave them the customary salutation, "Salam aaleikom;" however, they made no response. Their leader had observed by my dress that I was a foreigner. He looked fixedly at us, and recognized the guide as the one who had aided the Russians during their advance against the khan's country. The Khivan stopped his horse, and called out to him, "There you are again, with dogs of unbelievers! I have little doubt but that you are an unbeliever yourself."

This was too much for the equanimity of my guide, who piqued himself upon his rigid observance of all Mohammedan rites. Did he not wash his feet with snow the prescribed number of times a day, in spite of the danger of having them frost-bitten, and had he not once suffered in consequence? Did he not rub his hands with snow before eating? and had he ever been known to put his left hand in the dish? No; I might be called a dog of an unbeliever, and that was very likely the case. Had he not seen me eat some sausages of that kind which, when at Kasala, he had been informed were made of the flesh of the unclean animal? and was not one pot of the preserved meat which I had purchased at Orenburg, and of which he always refused to partake, also a composition of the same foul beast?

The insult was too great to be borne, and he made a tremendous effort to draw his cimeter. This was a hopeless task; so, rushing forward with his whip in the air, he assailed his enemy by smiting vigorous blows on a new Astrakhan cap which adorned the head of the Khivan. The latter retaliated by striking the guide on his crimson dressing-gown with a short camel stick. The damage done to their clothes was great, and the Khivan, suddenly seizing the skirt of my guide's garment, tore it up the back, the sound of the tear making my follower more furious than ever, for he was very proud of the robe in question, and was looking forward to displaying it to his brother-in-law at Kalenderhana.

The combatants became breathless with their exertions. The Khivan's companions surrounded the guide, and began to play with their knife-handles in a menacing manner. They were six men to two, as the guide and myself had outstripped our

caravan by several versts. I now drew my pistol from its holster, and this action on my part immediately produced the desired effect. A revolver is a formidable weapon, and the band of Khivans had sufficient discrimination to recognize its use. Their party fell back a little, and one of them, putting his knife down on the ground, said something to me, which I understood meant, "It is not your business to interfere; let them settle it between themselves." To this I could not make any objection; when the opponents, seeing that they were to be the only combatants, left off wrestling together.

My guide, who was very much out of breath, now blew his nose with his fingers as a sign of contempt for his adversary, and squatted on his haunches on the ground. His foe, not to be outdone, performed the same feat with his nasal organ, and sat down opposite him. They then began a verbal battle in which the reputations of their respective female relatives were much aspersed. This continued for about five minutes, when, becoming tired with waiting, I walked up to them and said, "Aman" (peace); then, taking hold of their wrists, I forcibly made them shake hands. "Salam aaleikom" (peace be with you), at last said the guide. "Aaleikom asalam" (with you be peace), was the answer, and the combatants separated.

We now encountered a party of men and women who were engaged in unearthing a quantity of grass from a deep cutting in the ground. This grass had been mowed in the previous autumn, and was thus preserved until such time as the owner required it; the extreme cold, or perhaps the dryness of the air, keeping the grass as fresh as the day it was cut. Our road became less clearly defined, frequently making the most circuitous turns, and winding round in a northerly direction to turn once more due south. We passed by deep holes and chasms in the path, and which would have made it dangerous traveling after night-fall if it had not been for the brightness of the moon and stars, which lighted up the surrounding country and turned the night almost into day, the chasms being caused by the heavy rain-falls which occur during the wet season.

The camel-driver at last showed symptoms of recovery; the fever had left him, but he was wretchedly weak, and could not

sit on his donkey, Nazar riding that animal, having given up his own huge steed to the Turkoman. Presently we came across some Kirghiz tombs, which were constructed of clay dried in the sun. Some of them rose from thirty to forty feet above the ground. These marked the resting-places of the richer Kirghiz, who, like Abraham and the forefathers of old, wandered from place to place with their flocks and herds, seldom, however, omitting to select a plot of ground and build a tomb to contain their ashes.

So, like the vanity of the human race, we too build tombs in order that some distinguished personages may be remembered, while posterity soon forgets the very name of the departed. How many Egyptians are there that know who built the Pyramids, and for whom they were constructed? How many Englishmen can tell us in whose honor some of the statues in the parks and squares of London were erected? The poorer Kirghiz, like the poor in other countries, have no such honors paid to their remains—no pillar or stone marks the spot where their bodies are turned to dust. “Where the tree falls, there let it lie.” This old saying well applies to them: a hole is dug, a few shovelfuls of sand are thrown over their remains, and, save perhaps by their horses and camels, the children of the desert are soon forgotten.

The guide and I had by this time ridden a long way in front of our caravan, and we determined to await its arrival. We were on the borders of Khivan territory, and it was difficult to say how the inhabitants would receive us.

We lay down by the side of the road, and in a few minutes were fast asleep. Indeed, after several days of almost incessant traveling, I found myself continually dozing off on horseback, and then clutching convulsively at the pommel of my saddle, as the animal swerved and threw me off my balance. When we awoke, the guide was anxious to know whether the camels had passed us during the night. Looking down on the ground, he carefully inspected the various tracks—one of our camels having a peculiar mark upon a hind foot, which enabled my man to distinguish her tread from that of a million quadrupeds.

The vision of the Kirghiz is very extraordinary, and very often my guide would discern objects with the naked eye which I could barely distinguish with my glasses. His knowledge of locality was also very remarkable, for sometimes when no track could be seen he would get off his horse and search for flowers or grass, and, if he could find any, would be able to judge by their appearance as to the district in which we were.

The Book of Nature was as familiar to this semi-savage Kirghiz as the Koran to his moullah; and, presently pointing to a chain of mountains, which, rearing themselves up before us, extended east and west of our path, he observed that Kalendarhana was just behind them, and, making a sound suggestive of a kiss, informed me that he should not be sorry to see his wife.

The scenery became more striking as we approached this mountain barrier. Picturesque crags and large masses of sparkling quartz dazzled the eye with their glinting. Broken patches of frozen snow at intervals carpeted the sandy soil, and formed a mirror which flashed beneath the midday sun. Many streaks down the rugged sides of the heights around us showed where the rain, pouring down on their crests in the early spring, diverged in foaming torrents. Here, dashing with irresistible force through the narrow pass, they would furrow a road before them; there, emerging from the gradually widening defile, they would rush in a hundred different channels to swell the volume of the mighty Oxus.

This mountainous ridge was called by the guide Kazan-Tor, and the pass which gives access to the fertile plains we were gradually approaching would prove a formidable obstacle to an invading column if the defenders were worth their salt. However, this chain of hills does not extend very far in an easterly direction. It comes to an abrupt termination about twenty-five miles from the track upon which I was traveling, and the flank can be easily turned. The defile is about a quarter of a mile broad and about seven miles long, the ground having a strongly marked auriferous nature; while, from the appearance of some of the rocks, I should say that a search for

copper would not prove unremunerative to an engineer or his employers.

We emerged upon a vast plain, which was intersected by a quantity of water-courses, or canals. These, springing from the Amu Darya, are employed by the inhabitants of the adjacent villages for irrigating their fields during the summer.

## CHAPTER XXVII.

PRESENTLY we came upon some kikitkas, which were evidently constructed as a permanency. Wide ditches were dug around them, and high wattled palisades, which in every instance encircled the dwellings, showed us that the inmates feared attack. Indeed, from this spot until we crossed the Oxus, each village was fortified in some such a manner. Formerly the Kirghiz and Turkomans lived in a continual state of war, the Kirghiz making marauding expeditions into their neighbors' territory, and carrying off horses and cattle; while their foe, in his turn, frequently crossed the Oxus in armed bands of from fifty to sixty horsemen, plundered the Kirghiz kikitkas, and carried away the spoil. At the present moment, from Russian sources we only hear of the marauding disposition of

the Turkomans, and of the peaceful disposition of the Kirghiz; the Turkoman raids being purposely exaggerated, in the same way as previously the Khivans were maligned, in order to give an excuse for an advance upon Merve. The fact is, that if the Kirghiz carry off a Turkoman's cattle no one hears of it; but if, on the contrary, the latter crosses the Oxus by way of retaliation, this is made the subject for a tirade of abuse. Indeed, if we were to believe some Russian statements, the Khivans have always been the aggressors; and it is not generally known that the first attack on this Central Asian khanate was made by the subjects of the Tzar.

This occurred at the end of the sixteenth century. A band of Cossacks happened to capture some Persian merchants, and through them learned of the existence of the rich territory of Khiva. Their cupidity was excited, and they resolved to make a raid in that direction. The Cossacks rode across the Kirghiz steppe in light-marching order, without having any baggage with them save that which could be carried on their saddles, when, after crossing the Oxus, they attacked the Khivan town Urgentch. The khan and his forces were absent. Little resistance was made, and the town was destroyed, the Cossacks carrying off a thousand women, besides many carts laden with a rich booty. This extra baggage proved too much for them. They were overtaken and surrounded by the Khivans. The Russians had no water, but they fought for several days, quenching their thirst with the blood of the slain. Human nature, however, has its limits, and finally, when nearly all the Cossacks had been killed, the remainder surrendered, and were brought back prisoners to the khan.

The Cossacks did not recover very rapidly from this serious blow; but after a time they once more marched upon Khiva in a band of five hundred strong, under the command of Atoman Nechae. The raid was made successfully; but when returning with their spoil, the Cossacks were overtaken by their pursuers and slain to a man.

A third campaign ended still more unfavorably. The Cossacks lost their way, and, instead of reaching Khiva, found themselves by the shores of the Sea of Aral. The winter came

on; frosts commenced, storms raged, and provisions were exhausted. At first the Cossacks killed some of their number, and lived upon the dead bodies; but at length they went to the Khivans, and voluntarily gave themselves up into slavery.

For the fourth time the Russians made war upon Khiva in the reign of Peter the Great. This monarch was fully aware of the advantages to be gained by thoroughly subjecting this country. The report that there was auriferous sand in the river Amu, and that the Khivans purposely concealed this circumstance for fear of bringing the Russians to their country, also attracted the Tzar's attention, and he determined to open out mercantile relations with India *via* Khiva.

Prince Bekovitch Tcherkassky was given the command of the expedition. Careful preparations had to be made previous to an advance. Points were selected by the shores of the Caspian, and forts built at Cape Trjuk-Karagan, and at the entrance to the Alexander and Balkan bays (forts St. George, Alexander, and Krasnovodsk\*), so as to maintain communications with Astrakhan. After securing his base in this manner on the eastern shore of the Caspian, Prince Bekovitch advanced across the Ust Urt into Khivan territory.

His detachment consisted of two companies of mounted infantry, one dragoon regiment, 2500 Cossacks, with some Tartars and Kalmucks, in all 13,300 men, and six guns. Three months' provisions were carried on camels and in carts drawn by horses. Bekovitch, after a two months' march, halted on the banks of the Oxus. He had then traversed 900 miles of sandy steppe, in the hottest season of the year, and when the only water that could be obtained had to be procured from wells dug at each halting-place. The Russian prince was now attacked by the Khivans. He had drawn up his forces so as to protect his rear by the river, while his flanks were defended by a barricade formed of baggage-wagons. After a fight which lasted three days, the Khivans were repulsed. A truce

---

\* Krasnovodsk, by the latest accounts, is to be the commencement of a line of postal stations between the Caspian and the Khivan town, Kuni Ugenj. The new road will greatly facilitate the transport of troops and supplies to Khiva.

was now declared, when the prince, thinking himself secure, was so idiotic as to divide his troops. The latter were at once attacked, and cut to pieces by their enemy.

Perovsky's expedition in 1839, which proved such a disastrous failure, I have already mentioned; and not much more was heard of Khiva until the year 1859, when a large Russian force, avowedly for the purpose of reconnoitring, was dispatched to the east coast of the Caspian.

The Turkomans, who did not like this amicable survey of their country, attacked the expedition near Balkan Bay, and seized the Russian camel train and baggage. The commander was thus prevented making a map of the Balkan hills. However, he recommended the construction of a fort near Krasnovodsk Bay, under the pretext of opening out friendly relations with the Turkomans. He then sailed to Ashourade and to Hassan Kuli Bay,\* where he bombarded a Turkoman settlement, and took Chikishlar.

The Russians commenced building a new fort at Krasnovodsk Bay in the autumn of 1869. A station was formed in 1870 at Tash Arvat-Kala, 103 miles from Krasnovodsk, while two military intermediate posts were also established, one on the shore of Michael Bay, at a place called Mikhailovsk, and another on the Aktam, at Mulla Kari. A connecting link of communication was thus formed with the head-quarters at Krasnovodsk.

Chikishlar † was occupied in the month of November, 1871,

---

\* A correspondent of the *Golos*, writing in 1871 from Baku, after a visit to all the military positions on the east coast of the Caspian, observes that Hassan Kuli, Gomush Tepe, and the localities thereabouts, are now Turkomania *de jure*, and not *de facto*, as I was assured, in spite of my knowledge of political geography, that Persia begins now at the Attrek, and not at the Kara-Su. The Yamud Turkomans, the owners of the country between the Attrek and the Kara-Su, are also not aware of this; but, in the loftier considerations of international rights, they are a people with whom it is not requisite to be on any ceremony.

† Venukof, in his military review, writing about Chikishlar, remarks, "That although the line of the east coast of the Caspian can be always easily defended, and therefore does not require one strong local central power, yet that, for the purpose of saving time in the execution of given

and a fort erected there by Colonel Markosoff. Ashourade was Persian territory. However, this did not prevent its occupation by the Tzar's forces, and the latter date Persia's recognition of their right to this station from the day when the late Shah came on board a Russian vessel, he having been told that in the Bay of Astrabad the water was not so rough as off other parts of the coast.

The Russians were now established at four points in Turkoman territory: in the island of Ashourade; in the Mangyshlak Peninsula; by the Attrek; and in Krasnovodsk Bay.

Every thing was ready, and nothing wanted save some pretext for an advance upon Khiva. A *casus belli* soon presented itself; but in order to explain how matters were finally brought to a head, it will be necessary to return for a moment to the year 1869.

Among the nomad Kirghiz is a tribe known as the Adayefs, and when Fort Novo-Alexandrovska was erected on the Mangyshlak Isthmus, the Russian Government felt that it was strong enough to tax this people. The latter were in the habit of paying taxes to Khiva; but this did not avail them with the Tzar's officials, and a forced contribution of one ruble and fifty copecks was levied from each kubitka, or tent. This was in 1850; but in 1869 a fresh system was introduced, and the taxes extorted from the Adayefs were raised 150 per cent.

This gave rise to great dissatisfaction, and in March, 1870, hostilities commenced between the Adayefs and the Russians, when the Khan of Khiva backed up the people, whom he looked upon as his subjects. He had been alarmed at the occupation of Krasnovodsk, and now finding that General Kauffmann was bent on war, dispatched to him the following letter from Khiva:

“From the beginning of the world up to the present time there has never been an instance of one sovereign, in order to re-assure another, and for the well-being of the subjects of a

---

orders, and for the purpose of uniformity of administrative and other action, in the eyes of the Turkomans it would be advisable to vest the control of affairs on the east coast of the Caspian in one chief officer, whose centre of administration should be at Chikishlar.”

foreign power, having erected a fort on the frontier, and having advanced his troops. Our sovereign desires that the White Tzar, following the example of his forefathers, should not permit himself to be led away by the greatness of the empire with which God has intrusted him, and should not seek to gain possession of the lands of other powers, which is opposed to the custom of great sovereigns.

“If, on the contrary, trusting to the strength of his army, he desires to make war with us, let him remember that before the Creator of heaven and earth, before the great Judge of all earthly judges, all are equal—the strong and weak alike. To whom He will, to him He gives the victory. No one can succeed against the will and predestination of the All-Highest.”

In the mean time the Adayefs, who, at the outset of their quarrel with the Russians, had destroyed a convoy and attacked Fort Alexandrovsk, had been completely overcome by a detachment of troops dispatched from the Caucasus, and some Cossacks, who had been taken prisoners by the Kirghiz and brought to Khiva, were detained there by the khan.

In the beginning of 1872 the latter sent two embassies, one to the Viceroy of the Caucasus, and the other to the Emperor. In his letter to the viceroy the khan wrote as follows:

“Harmony has existed between the two governments. How, then, has it happened that during the last year your troops have landed at Cheleken, on the shores of the Bay of Khaurism, under the pretext of commercial objects, and that recently a small detachment of these troops was advancing toward the Sary Kamysh, which has of old belonged to us, but retired before reaching that point? Besides this, Russian troops have advanced from Tashkent and Ak Musjid (Perovskiy) as far as the well of Min Bulak, which is situated within our hereditary dominions.

“We are ignorant whether the grand duke (the viceroy) knows of these proceedings or not. Meanwhile, on our side no such action has been taken as could violate friendly relations with you. Some Kirghiz had seized four or five of your people, but we took charge of them, and kept them in safety near ourselves. If you wish to maintain friendly relations

with us, then conclude such conditions as will leave each of us satisfied with our former frontiers, and we will restore to you all your captives; but if these captives are made to serve simply as a pretext for a war, of which the real object is the extension of your territories, the will of the powerful and holy One must determine what shall happen—a will which can be avoided by none.”

The embassy was not allowed to go to St. Petersburg, and the envoys were informed that no communications would be held with them until the prisoners had been released. The khan now dispatched a mission to India; but the authorities there, probably putting credence in the statement so often made by Russian officials that there was no wish to annex any of the khan's territory, declined giving him assistance, and advised that sovereign to restore the Russian prisoners, and to make peace with the Russian Government.

The Russian chancellor a short time afterward heard of this refusal to aid Khiva, and he remarked that this was in perfect harmony with the understanding which existed between the Imperial Government and that of Her Majesty, and that it had given him great pleasure. It must undoubtedly have been highly pleasing to him, for now he knew that England had no intention to assist the khan, and that the latter must in consequence unfailingly succumb to the forces under Kauffmann's orders.

The authorities in Great Britain were quite tranquilized as to any intention on the part of the Government of St. Petersburg to annex Khiva. All their doubts on this subject had been put at rest by a statement made to Lord Granville by Count Schouvaloff on the 8th of January, 1873, when the words used by the latter were to this effect:

With regard to the expedition to Khiva, it was true that it was decided upon for next spring. To give an idea of its character, it was sufficient to say that it would consist of *four and a half battalions*. Its object was to punish acts of brigandage, to recover fifty Russian prisoners, and to teach the khan that such conduct on his part could not be continued with the impunity in which the moderation of Russia had led him to be-

lieve. Not only was it *far from the intention* of the Emperor to take possession of *Khiva*, but POSITIVE ORDERS had been prepared to prevent it, and directions given that the conditions imposed should be such as could not *in any way lead to a prolonged occupancy* of *Khiva*.

Count Schouvaloff repeated the surprise which the Emperor, entertaining such sentiments, felt at the uneasiness which, it was said, existed in England on the subject; and he gave Lord Granville most decided assurance that he might give POSITIVE ASSURANCES to Parliament on this matter.

The total force employed by General Kauffmann in his *Khivan* expedition consisted of 53 companies of infantry, 25 sotnias\* of Cossacks, 54 guns, 6 mortars, 2 mitrailleuses, 5 rocket divisions, 19,200 camels, with a complement of about 14,000 men. Russian battalions appear to be of a very expansive character if fifty-three companies of infantry can be comprised in four and a half battalions. The strength laid down for a battalion is four companies of the line and one company of rifles. The war establishment of a battalion comprises 900 rank and file, of whom sixty men are in reserve. Indeed, it would appear that the Russian commander-in-chief had borrowed a leaf out of the book of the sick patient, who, when desired by his doctor to limit himself to three glasses of wine a day, had some glasses constructed which would contain a bottle, and thus kept within the exact letter of his promise to the medical gentleman.

The troops were divided into different columns, which in their turn were divided into detachments—the Tashkent column, consisting of two detachments; of the Ojizzah, which marched from Tashkent, and the Kasalinsk from Fort Number One; and, finally, the Orenburg, Krasnovodsk, and Kenderli columns, which were to march respectively from Embinsk along the western shores of the Sea of Aral, from Krasnovodsk, Chikishlar, and from the Bay of Kenderli to the Aibougir lake, traversing the dreary wastes of the Ust Urt.†

---

\* A sotnia of Cossacks is about 150 horsemen.

† Ways of communication by sea to the east coast of the Caspian:

It seems strange that the water communication from Kasala by the Syr Darya, Sea of Aral, and Oxus was not made use of during the invasion. Some vessels belonging to the Aral fleet had sailed up the Oxus as far as Kungrad, and there was nothing to prevent the Russians attacking Khiva by water. This, indeed, was strongly urged upon Kauffmann. But the general is reported to have said that it must be a land expedition, as otherwise the sailors would share the rewards, and that he wished all the decorations and honors to fall to the lot of the army. Kauffmann was of opinion that there ought to be only two detachments of troops sent against the khanate — one formed of troops from the army of the Caucasus, which should march from Krasnovodsk to Khiva,\* and the other to march from Tashkent and under his personal command.

Kauffmann's wishes in this respect were disregarded. Kryjinovsky, the Governor-general of Orenburg, urged upon the Government the dangers of such a plan, and he observed that, in the event of no troops being dispatched from Orenburg, the Khivans and Turkomans might advance on the Kirghiz steppes,

---

From Astrakhan to Fort Alexandrovsk it is a twenty-four hours' journey; however, the bar at the mouth of the Volga has a depth of only one and a half feet, so that vessels have to wait for a south wind to bring up a sufficient quantity of water into the estuaries to enable them to pass out. From Astrakhan to Balkan Bay, forty-eight to sixty hours. From Astrakhan to Ashourade, seventy-two to eighty-four hours. During strong westerly breezes these passages are longer, and entrance into the harbors or creeks is effected under difficulties. From Petrovsk and Baku to Fort Alexandrovsk and to Krasnovodsk, with a fair wind, the passage lasts only twenty-four hours. The distance in both cases is not over 127 miles. From Ashourade, in Astrabad Bay, to Gomush Tepe, one hour and a half; to Hassan Kuli, three hours and a half; to Cheleken Island, sixteen hours; to Balkan Bay (185 nautical miles), twenty hours. Two private steam-navigation companies are bound, under contract with the Russian Government, one of them to keep 150 steamers on the Caspian, and a corresponding number of barges; and both companies to transport stores and troops, etc., at certain rates from Astrakhan, Petrovsk, and Baku, to the east coast of the Caspian. There are other vessels belonging to these companies and to merchants of Baku, besides about 500 Turkoman boats, which are suitable for navigation along the shallow eastern coast.

\* For routes to Khiva, see Appendix A.

intercept communications on the postal road from Orsk to Tashkent, and possibly alarm the Ural and Orenburg districts.

The troops from Orenburg had no difficulty in marching along the west coast of the Sea of Aral to Kungrad, where they were joined by the Kenderli detachment. Not being able to hear any thing of General Kauffmann's column, they advanced upon Khiva, and captured the gate of that city. Intelligence was now received from Kauffmann that he had also arrived before Khiva, and that the city was about to surrender. However, the fire continuing, General Verevkin, who commanded the Orenburg column, took the city and citadel. This had scarcely been completed when the news was brought that Kauffmann had accepted the capitulation offered him by the chief inhabitants of the city, and that he was entering Khiva from another gate. The khan had fled. However, after two days he returned, and was reinstated in his post, but was subjected to a council, or divan, formed for the most part of Russian officers.

The expedition from Krasnovodsk, under Colonel Markosoff, proved a complete failure, owing to the want of water; and, after burying his cannon in the sand, the colonel ordered his troops to retire. The columns from the Caspian and Tashkent were practically of no use. The expedition from Orenburg, which had been dispatched solely at the instigation of General Kryjinovsky, and with the reluctant consent of General Kauffmann, had beaten the enemy and taken Khiva.

A war indemnity of 2,200,000 rubles was imposed upon the Khivan sovereign. The news of his subjection spread like wild-fire all over Central Asia, and Russian influence became paramount in the khanates.

The so-called insolence of the khan had been punished. His capital had been taken, he himself was in the hands of his foe. No sovereign's humiliation could have been more complete, and Kauffmann had compelled him to drain the bitter cup to its dregs.

The object of the expedition was obtained, and now all there remained to do was to fulfill the promise of the Emperor, given to the English Government by Count Schouvaloff, Russian ambassador in London. However, this was not done; there had

been a misunderstanding, it was said, and the construction of a Russian fort was at once commenced on Khivan territory.

Shortly before this, Prince Gortschakoff, writing to Kauffmann about the conditions of a treaty with Kokan, made use of the following language, which M. Terentyef is so kind as to publish to the world in his work on England and Russia in the East :

“You express your conviction, produced by experience, that in an intercourse with Asiatics the grand secret of success consists in unchanging veracity and firmness, combined with a decided attitude of peace. I, too, am the more firmly convinced of the correctness of this view, since it has invariably served as my guide in my political action and intercourse both in the East and West.”

It is a pity that M. Terentyef's work is not translated into the Tartar language, as it would be refreshing to the Khan of Khiva to read of such a noble expression of feeling on the part of one of his foes. Fortunately the work has been translated into English, and it will doubtless gratify the minds of those members in the House of Commons who were under the impression that no part of Khivan territory was to be annexed to Russia.

A proportion of the war indemnity of 2,200,000 rubles was imposed upon a tribe of Turkomans who had fought against the expedition from Orenburg. They were nominally Khivan subjects, and for a month after the conquest of Khiva they had been on friendly terms with the conquering officers; indeed, some Russian officers who had been sent out for the purpose of surveying, had remained for days and nights together in the Turkoman encampment.

There was no reason to believe that the Turkomans would break the truce. However, it would not do for the Tashkent column to return home without a little bloodshed. The glory of the war had been confined to the columns from the Caucasus and Orenburg, and the officers from Tashkent had done nothing to merit promotion.

General Kauffmann now sent for the elders of the tribe, and declared that a part of the indemnity must be paid by them

within a fortnight, and the remainder later on. At the same time the general detained some of the elders as hostages until such time as the first installment of the indemnity had been paid in to the Russian treasury. But the Russian commander-in-chief was in a hurry, and instead of waiting the appointed time, he sent out a large detachment under General Golovatcheff to ascertain what chance there was of the payment being made.

This general, in order to discover the intentions of the Turkomans, at once attacked the villages and encampments, burned their houses, destroyed some wagons laden with household stores, and devastated the whole district. If the Turkomans had been treated differently, they might have given a civil answer to the Russian general. But they are poor barbarous creatures, utterly unacquainted with that European civilization which characterizes Russian troops, and they were so foolish as to be exceedingly angry. Indeed, later on, these wretched and ignorant Turkomans became utterly lost to all feelings of honor, and actually dared to attack General Golovatcheff's camp at Illyali; but they had no chance against the breech-loaders of their foes, and were repulsed with great slaughter.

The Turkomans now abandoned the district. They were disinclined to listen to any terms of peace which might subsequently be offered them. However, they sent Golovatcheff the following message:

“We know how to respect peace, and shall keep it if you will have peace with us; but if you will not have it, we shall fight, and we can fight well.”

According to General Kryjinovsky, the Governor-general of Orenburg, the attack on the Turkomans was entirely uncalled for, and likely to lead to serious results.\* “It will now be necessary,” he said, “for us to send expeditions against the Turkomans for many years to come. Their country will be a second Caucasus, and in the end we shall be obliged to take them, which will undoubtedly lead to complications with England.”

---

\* For the attack upon the Turkomans, see translation from the *Vestnik Evropy* of November, 1873, Appendix C.

This remark of General Kryjinovsky has every chance of being realized. Colonel Ivanoff, the commandant at Petro-Alexandrovsk, already has had occasion to attack some bands of nomad Turkomans. On one occasion he made prisoners of two of these Arabs of the steppes.\* They had pillaged, it was said, some Russian Kirghiz. In consequence of this, the captive Turkomans were tried by court-martial and sentenced to death. The sentence was shortly afterward put into execution.

The Turkomans, on their side, have captured a Russian soldier. They refuse to surrender him until such time as they receive a sum of money for the widows of their two fellow-countrymen. The man has not been tried by court-martial by the Turkomans, probably on account of their ignorance of military law. When they become more civilized, they will doubtless follow the example set them by their Christian foe.

On the 24th of August, 1873, a treaty of peace, which had been first of all approved by the Emperor, was made with Khiva. The khanate was reduced to a state of complete vassalage. The delta and right bank of the Oxus were ceded to Russia. The Oxus was closed to all save Russian and Khivan vessels; Russian merchants were allowed perfect freedom of commerce in the khanate, with liberty to purchase and hold property; a Russian fortress was to be built four miles south of Shurahan, and in a garden belonging to an uncle of the khan; while all the territory situated between the former Bokharo-Khivan frontier, the right bank of the Amu Darya, from Gugertli to Meshekly, and the line passing from Meshekly to the point of junction of the former Bokharo-Khivan frontier with the frontier of the Russian Empire, was taken from Khiva and annexed to the dominions of the Emir of Bokhara.†

A life-long feud between Khiva and Bokhara will inevitably follow this redistribution of soil. If, after the Franco-Prussian war, the Germans, instead of taking Alsace and Lorraine for themselves, had forced Belgium to accept these provinces, the French could not have been expected to have looked with

---

\* See movements of Russian troops on the Oxus, Appendix C.

† See treaty between Russia and Bokhara, Appendix B.

friendly eyes upon the new proprietors, and a spark would have been struck, certain at some future period to burst out into flame. This will happen between Bokhara and Khiva. It will not be difficult to get some one to stir the fire, and the consequence will be the absolute incorporation of Bokhara and Khiva with the Russian Empire.

## CHAPTER XXVIII.

The Guide's Kibitka.—His Wife.—His Brother-in-law.—Why not go to Khiva?—Domestic Pressure.—Eating a Horse.—Letter to the Khan.—The Moullah.—Kapitan or Polkovnik.—A Letter in Russian.—Tchin.—Horse-dealing.—A Horse with one Eye.—Canals from the Oxus.—Jougouroo.—The Gray Horse.—A Purchase.

SOME men and women running out of one of the kibitkas, and warmly greeting the guide, announced to me that we had reached his home at Kalenderhana. In a short time I found myself seated on a rug, an object of curiosity to many of the inhabitants, who had never before seen a man dressed in European costume. Every part of my attire was in turn inspected and commented upon, the women coming forward and feeling the texture of my coat and trousers, the large buttons being a source of great admiration.

The hostess was clad in a flowing white dressing-gown, with a turban of the same color, folded many times around her small head. For a Kirghiz, she was decidedly good-looking, and well worth the hundred sheep her lord and master had paid for her. She was delighted at his arrival, and two ruddy-faced little children were seated upon their father's knee, and playing with his beard and mustache. The brother-in-law, a short, hump-backed fellow, who had been informed that I wished to purchase a horse, was most assiduous in his attentions. He seized a pillow which an aged relative, his grandfather, had secured for his own accommodation, and dragged it from beneath his elderly relative; then, pushing it behind my back, he patted me on the shoulder, and said that he had heard I wanted a horse. Well, he had the most beautiful of the equine race; it had performed extraordinary feats, and was the wonder of all the village. We would look at it, and then I should see. Yes, what I should see! and, pouring me out some tea, he absolutely put four lumps of sugar in my glass, to the astonishment of the other

inmates, who were aghast at such reckless extravagance. I replied, in a careless manner, that his horse was doubtlessly a beautiful one, but that at Petro there were lovely animals. If we went to the fort, I should very likely buy one there; but if we were not to go to Petro, but to Khiva, that then I would purchase his animal, and pay for it in the khan's capital. This having been duly interpreted by Nazar, an animated conversation took place among the members of the family, the guide being somewhat reluctant, and his brother-in-law and other relatives eager to contest all his arguments. He had already brought me off the route to Petro; he would very likely get punished for that. Why not go to Khiva? And Nazar suggested that then we would not visit the fort at all, but would continue our journey to Bokhara.

I now inquired if we could procure some camels to take us as far as that city. This was a fortunate remark, as it appeared that another of the guide's relatives had camels for hire; and, eager that I should employ his animals, he exhausted all his eloquence upon my follower to persuade him to go to Bokhara. The domestic pressure put upon the guide was too much for him. Turning to Nazar, he agreed to go on with us to Bokhara, where he said that we could hire fresh camels and return to Kasala, *via* Samarcand and Tashkent, thus avoiding altogether Fort Petro-Alexandrovsk.

My faithful follower now whispered in my ear, "We are to have a great feast to-night. The guide's brother-in-law has a horse which is not very well. The animal is to be killed directly, and we are to eat him." Later on, an enormous caldron was suspended from a tripod across the fire, a heap of fagots was piled upon the embers, and a dense smoke filled the tent. Large pieces of the unfortunate quadruped were now thrown into the pot by the guide's wife, who officiated as cook, the host and the rest of the party superintending the operations with the greatest interest.

"Will there be any thing else to eat?" I inquired.

"No," was the answer of my surprised Tartar. "What more would you have? We might eat two sheep at a time; but a horse—no. There will, perhaps, be enough left for break-

fast, praise be to God for his bounty ;” and the little man, opening his mouth from ear to ear, licked his lips in anticipation of the banquet.

A piece of raw cotton floating in some greasy substance, which was contained in a large iron ladle, threw a lurid light over the red faces of the hungry Kirghiz, eager to commence the banquet.

The dark smoke from the rude lamp was curling itself in spiral columns amidst the dense gray clouds which ascended from the burning pile. From time to time some relative of the family, lifting up the thick cloth that served as a door, entered the dwelling. The sudden draft would then upheave the thick atmosphere, and, forcing it through the aperture, reveal the boundless canopy of the heavens, the sky studded with a million gems, while the queen of night, like a globe of metallic silver, cast her pale shadow through the half-raised rug or curtain.

My hostess was rocking a recently born child with one hand, and stirring some rice, which was boiling in an adjacent kettle, with the other. My guide and Tartar servant were washing their hands and feet in the snow at the threshold. The brother-in-law was for the hundredth time informing me that his horse was a horse, and that all the rest of the equine race were mules in comparison, when the woman announced that the meat was done to a turn, and that all things were ready for the feast.

A portion of the steed and some rice were given to me in a slop-basin. The rest of the party, calling upon Allah to bless the entertainment, squatted round the caldron, and thrust their hands into its seething contents, which speedily vanished down their throats. A conjurer, or fire-king, at a village fair, might have swallowed swords or flames, pokers or daggers, but he would have had no chance whatever if pitted to eat horse against my guide's brother-in-law. I thought, when for the second time the caldron had been emptied, that this would have sufficed. But no, for each man strove to outdo his neighbor; belts and broad sashes were loosed from around the loins; and Nazar, who had made up his mind that he ought to

eat for his master as well as himself, was actually swelling before my eyes, and becoming wheezy in his utterances.

Overeating would seem to paralyze a man's speech almost as much as excess in alcohol; and the hoarse, breathed-out tones of the Kirghiz men jarred on the ear in comparison with the clear voices of the females, who, not daring to eat at the same time as their lords and masters, stood round and helped them to the most savory pieces.

At times the guide, by way of honoring me in the person of Nazar, would take a greasy piece of meat from the iron kettle, and, holding the luscious morsel up at arms-length, so that all might perceive his intention, would slowly insert it in Nazar's mouth; the latter gulping down the half-raw flesh without any attempt at mastication, in order to show how highly he appreciated the compliment.

I hoped that this would wind up the entertainment, but the feasters were far from having any such intention; and the same process of gorging going on steadily throughout the night and early morning, announced to me that my follower would very likely be wrong in his conjecture, and that ere breakfast-time all the horse would have disappeared.

Long, narrow, wooden carts, each with high wheels, were all the morning bringing grass into the village for the horses of the inhabitants. A few trees planted here and there, the first that we had seen since leaving Kasala, afforded a pleasing change to the vision, tired of gazing over snow and low brushwood, while a large supply of hay in an inclosure hard by the kibitka showed that my guide had armed himself against the danger of a sudden thaw.

He now informed me that I could not go to the town of Khiva without first having the khan's permission, and said that a letter must be written to that sovereign and sent before us, asking his leave for my followers and self to enter the city. This piece of information rather startled me. I had been under the impression that all I had to do was to ride to the town, encamp outside the walls, and ride in each day so as to inspect every thing worth seeing. However, according to the guide, not even this could be done without the khan's permission.

I was puzzled, not knowing in what language to address him. My servant could not write in Tartar, and I was afraid that if I dispatched a letter written in Arabic, some unintentional omission of the due amount of courteous expressions which one is bound to use when writing to a sovereign might offend this Khivan potentate.

Nazar at last proposed that I should inquire for some mollah who could write a letter in the Tartar language. On asking the guide, he at once sent for a learned man who, he said, could write beautiful things, so soft and sweet that they were like the sounds of sheep bleating in the distance.

Presently the scribe arrived. He was a tall, angular-looking man, one shoulder being much higher than the other, while his dressing-gown bore signs of its having been originally made for a much shorter individual than himself. His long arms protruded through the sleeves, showing several inches of shirtless skin. He entered the kibitka with an air of great importance, while the party rose at his approach, much awed at the arrival of a person who had as much there, as the guide observed, pointing to his own head, as was in the united occiputs of all the people in the village.

The mollah carried an inkstand made of bullock's horn: the ink was of the thickest possible description, while a wooden stopper at each end of the horn formed the top and bottom of the inkstand. He unfolded a sheet of paper, and, squatting down by my side, he pulled out one of the plugs from the horn bottle, at the same time producing a long style made of cane, which served him in lieu of a pen.

A dead silence reigned around; all the inmates of the kibitka were appalled by the preparations of the mollah. Writing a letter was no every-day occurrence in that village; and the man who was able to make a piece of paper speak—the common definition of writing amidst savage nations—was looked upon as a prodigy of learning.

The guide, however, did not appear so awed as the rest of his relatives. Had he not been to Kasala and seen the clerks write? "Why, some of the Russian soldiers could do as much!" and saying this in a muttered tone to Nazar, he undid

a small parcel, and taking out some coarse snuff, put a quantity on the back of his hand, which he snuffed up his nostrils with an air of the greatest delectation.

“What shall I say?” inquired the moullah. “What is your tchin [rank]?”

“No particular rank,” I observed. “You can leave that out.”

“No,” said the moullah; “we must have some tchin. Are you a polkovnik [a colonel]?”

“No, only a kapitan [captain].”

The moullah here picked his ear with his pen, and, turning to Nazar, said something.

“What is it?” I inquired.

“Why, kapitan will not do. They look down upon kapitans at Khiva. The word is like the Tartar word “kabtan,” and gives no idea of rank to a Khivan. Better say polkovnik.”

In the mean time the moullah had written a most flowery epistle. Nazar said it was beautiful, and all the rest of the party greatly admired the composition. However, the word polkovnik was still inserted, and the moullah was so pleased with the letter that he would not erase the expression. Giving the fellow some silver, I determined to write to the khan myself, and in the Russian language, as I had learned from the guide that there were two or three Tartars in the city who acted as interpreters. I wrote as follows:

“An English gentleman who is traveling through Central Asia requests the permission of His Majesty the Khan to visit his celebrated capital.”

“That will not do,” said Nazar, dolefully; “there is no tchin. Why do not you call yourself polkovnik? We shall not be received with due importance.” And the little man sat down on the carpet with an indignant air, as if to say, “See how you have humbled me!”

A young fellow was found to go forward with the missive, and it was arranged that he should start at once with the letter, while the caravan and myself would follow on later in the day.

In the mean time the horse had been sent for. Presently

he arrived, escorted by the whole village, every body being eager to sing his praises save those who had animals of their own for sale. One old man sought to attract my attention by shaking his head violently and frowning at the horse when he thought that his owner was not looking; but the aged gentleman assumed the most pleasant of smiles should any one save myself catch his eye.

“He has a beast of his own for sale,” said Nazar. “Look there;” and he pointed to a brute which was lame all round, and which looked only fit for the knacker’s yard. Neither of the animals would suit, the one belonging to the guide’s brother-in-law being blind in one eye. This the unblushing Kirghiz said was of no consequence at all, for in his opinion one eye was just as good as two; however, he remarked that if we would continue our journey to another kibitka, about five versts’ distance, he could then show me some horses with two eyes.

“Yes, with two eyes!” said all the rest of the party, gravely wagging their heads, as if such a complement of vision in one horse were a most remarkable fact in natural history. Our road now lay south-west, and in the direction of the town of Oogentch, which is distant about twenty-three versts from Kalendarhana. The country appeared to be highly cultivated, canals innumerable cutting the fields at right angles to each other, and arranged so as to supply the district with water from the Oxus. Corn is grown in great abundance in this neighborhood, and also jougouroo, a species of grain which the Kirghiz and Khivans give their horses instead of barley.

Presently we came to another aúl, which was also the property of the guide’s brother-in-law. I had begun to hate that man even more than Weller senior could have hated his mother-in-law. I did not want to buy any of the fellow’s horses; I felt convinced that if he were to sell me one, it would be a screw, or have some defect which I should only discover after the purchase was completed. But there was no help for it. It was one of those disagreeable things which had to be done, that is to say, if I wished to see Khiva; and the guide had already shown a little impatience at my not having bought the one-eyed brute shown me at the last kibitka.

This time a gray horse was brought out for inspection. The lad who rode him, cracking his whip, rode straight at a ditch about ten feet wide, and got his animal over all right. The animal had two eyes, which was also a consideration, so I said that I would buy him, and pay for my purchase in Khiva. But no; this proposal did not meet the brother-in-law's approval. He knit his brows, and remarked to Nazar that I might be honest or I might be a rogue, "God only knew." If I took the horse, why, perhaps the money would not be sent back, and he would lose the animal. People had stolen horses before, and would steal them again.

I here became a little indignant, and informed him that horse-stealing was not such a common occurrence in my country as in his, and that if I wished to steal a horse I should not steal a useless brute like the one I was about to purchase; that the guide knew who I was, and that if I might have the animal the money should be paid in Khiva. This the brother-in-law would not hear of for a moment, apparently fearing that if the money once came into the possession of the guide there was little chance of the latter returning it to him. Finally matters were compromised, I agreeing to pay half the amount down and send the other half back with the messenger who had been dispatched with my letter to the khan. A saddle and bridle were also bought, and Nazar, descending from his huge camel, mounted the new purchase.

## CHAPTER XXIX.

The Oozek.—A Fragile Bridge.—The Oxus.—Khivan Taxation.—Russian Imports.—The Traders.—A Slug.—A Caravan.—Costumes.—Saddles.—Khivan Horses.—Salam Aaleikom.—Quarters for the Night.—Hospitality.—A Khivan House.—Melons.—Hindoostan and England.—Railways.—An Iron Horse.—Five Hundred Versts in Twenty-four Hours.

Now we crossed a little stream about twenty yards wide, known by the name of the Oozek. It was said to be a tributary of the Oxus. A rough bridge made of cross-poles, sticks, and dried clay afforded a means of crossing the water; for the banks were too steep to admit of a descent to the frozen surface. Finally, after riding along a narrow path planted on both sides with high reeds, we arrived upon the banks of the Amu Darya, and I gazed on that world-renowned stream, which in my boyish days it had been my dream to visit.

The mighty Oxus—the Oxus of Alexander—lay at my feet, its banks bound together by a bridge of transparent ice, which, here at least half a mile broad, is the boundary-line separating the subjects of the khan from those who pay tribute to the Tzar.

Each Khivan has to pay an annual tax of eleven rubles for his house to the khan, while the inhabitants on the right bank of the river pay four rubles per kubitka to the Russian authorities. The Khivans, however, who live in town pay no taxes, and the sovereign obtains the greater part of his revenues from crown-lands, and from a duty of two and a half per cent. on the value of all goods which are imported or exported from his dominions. But this source of income is now curtailed, as the khan has become a vassal of the Emperor, and Russian goods pay no duty whatever.\*

Before crossing the Oxus we dismounted for a short time at

---

\* See treaty with Khiva, Appendix B.

a kibitka hard by the river. It was in former years a station-house where custom duties were levied on all goods brought from Russia. A few Khivans were warming their hands over a wood fire; they had come from Oogentch, and were going to trade in Shurahan, a town near Petro-Alexandrovsk, and which formerly belonged to the khan, but has now been seized by the Russians. The merchants were fine-looking fellows, with a very different type of countenance from the Tartars and Kirghiz, the dark complexion and large eyes with slightly Jewish nose of the Khivans being the very opposite to the broad, barge-shaped faces, ruddy cheeks, and little eyes of the Tartars.

One of the traders recognized my fresh horse, and laughed as he pointed him out to his companions.

"What is it?" I inquired of Nazar.

"They only say that he is a slug, and stumbles," observed the latter. "He nearly fell with me as we were coming here. Please God I do not break my neck before we reach Khiva."

We met quantities of arbas—two-wheeled native carts—each of them drawn by one horse, as we rode across the river. A caravan, with camels belonging to the merchant in the station, was also traversing the frozen stream, which, as hard as a turn-pike road, would have safely borne a battery of eighteen-pounders. The Khivans whom we met were, for the most part, dressed in long, red dressing-gowns, which reached down to their heels. These garments were made of a mixture of silk and cotton stuff, while they were thickly wadded with a species of quilting, to defend the wearers from the cold. Tall, black lamb-skin hats, taller even than a Foot-guardsman's bear-skin, covered their heads, and each man carried, strapped to his saddle, a long single-barreled gun, with a short, highly ornamented stock. The saddles, which were made of wood, were highly ornamented with gold, enamel, and turquoise stones, while the bridles and steel appurtenances were clean and well appointed, in this respect affording a striking contrast to the slovenly equipment of the Tartars. The horses, too, were of a different breed, being much larger animals than those which I had seen on the steppes—the Khivan horses averaging about fifteen

hands, while a good many which I met could not have been less than sixteen.

Every man whom we encountered in our path never failed to salute us with the regular Arab salutation, "Salam aaleikom," each of us in turn responding "Aaleikom salam;" and the varied tones of the wayfarers, as two large caravans passed each other, broke upon the ear almost like a response in the Litany, and carried my thoughts like a flash of lightning to very different scenes in my island home.

The shades of night were falling fast, and the guide, riding up, informed me that it would be better not to continue our march to Oogentch, but to halt at one of the many houses which were now to be met with at every turn. On my assenting to his proposal, he began to look about and to carefully inspect each abode which we passed.

"What is he doing?" I inquired of Nazar.

"He is trying to find a house where the owner is well off, and can give us plenty to eat," was the answer. "It is no good stopping for the night at any beggar's house, and getting starved in consequence."

The guide's search was finally rewarded, and he pulled up by the side of a large, substantial-looking, square building, built of dried clay. High wooden gates, studded with iron clampings, gave access to the dwelling. The guide rapped with his whip-handle against the door. An old man, bent nearly double with age, tottered out and asked our business.

"We want your hospitality for the night," was the answer. When, as if this were the most natural thing in the world, the old fellow called out to his servants. Several of them ran forward, and, taking hold of my horse, aided me to dismount.

It now turned out that what I had at first taken for a house was merely a square court-yard, consisting of four high walls, while the edifice itself, built of the same material as the inclosure, was erected inside the gates. A similar entrance, on a smaller scale, led to some stables, which, in their turn, gave access to that part of the building which was inhabited by the family. Another door, however, on the opposite side of the dwelling, led to the harem and more private apartments. My

host gave an order that our horses and camels were to be well fed; and seeing that Nazar was in the act of taking some barley from the sacks on our camels, made a sign for him to desist.

“Have I not corn?” he remarked. “Are not you my guests?” and calling his servants, he desired them to look after our animals as if they were his own.

I now found myself in a lofty room, which was reserved for great occasions, and for strangers like myself. One end of the apartment was covered with thick carpets; this was the place of honor for the visitors. In the centre of the room, and where there were no rugs, was a small square hearth; this was filled with some charcoal embers, which were surrounded by a coping of about three inches in height, forming a species of fender. On the coping stood a copper vessel of the same shape as many of the so-called Pompeian ewers. The vessel was richly chased, and constructed with a long swan-like neck, so that the attendant might the more conveniently pour water over the hands of his master’s guests before they commenced their repast. On the other side of the hearth there was a square hole about three feet deep. Two steps led down to it, the cavity being adorned with variegated tiles; this was the place for ablutions, and thus arranged so as to keep the water from wetting the other parts of the apartment.

Two narrow slits, each about two feet long by six inches wide, supplied the place of windows, and some open wooden trellis-work served as shutters, there being no glass, which is unknown in these parts. A few pegs in the wall on which we could hang our clothes supplied the place of a wardrobe, while the floor on the opposite side of the room to that reserved for myself was covered with coarse cloth, and arranged for my retinue.

Presently the host appeared. He bore in his hand a large earthenware dish full of rice and mutton, while his servants brought baskets filled with bread and hard-boiled eggs. Some milk was now produced in an earthenware pitcher, and an enormous melon, which weighed quite twenty-five pounds, was carried in on a tray. All the dishes were placed at my feet, I be-

ing seated on the carpets, my head supported by a richly colored silk cushion, which had been specially brought by my entertainer. When all the viands had been thus set round me, the host, bowing to the ground, asked permission to retire; then, walking backward a few steps, he sat down beside Nazar and the guide, who were gazing greedily upon the dishes—a striking change to the rough fare which we had lived upon for the previous thirteen days.

I made a sign for the owner of the house to approach and sit down by my side. With an air of great humility he complied with my request, the host on such occasions thinking it his duty to play the part of a servant to his guest.

I was much surprised at the size and flavor of the fruit, which was as fresh as on the day when it had been first picked. The climate is so dry that all the Khivans have to do to preserve their melons is to hang them up in a temperature about two degrees above freezing-point; for, should the frost ever attack them, they lose all their flavor, and are useless for the table. The melons here have a fame which is celebrated all over the East. In former years they were sent as far as Peking for the Emperor of China's table. Some of them attain forty pounds in weight, while the taste is so delicious that any one only accustomed to this fruit in Europe would scarcely recognize its relationship with the delicate and highly perfumed melons of Khiva.

The host, when he got over his first diffidence, asked many questions about the countries through which I had passed. He had the idea that to go to England his direction would be eastward from Khiva. Geographical knowledge in the khan's dominions is very limited, and Hindoostan and England are continually blended together under the same head.

"So you have been thirteen days coming here from Kasala!" he exclaimed. "Praise be to God, who has allowed you to pass the desert in safety. Have you camels in your country?"

"No," I replied, "but we have trains with iron wheels; they run upon long strips of iron, which are laid upon the ground for the wheels to roll over."

"Do the horses drag them very fast?" he asked.

“We do not use live horses, but we make a horse of iron and fill him with water, and put fire under the water. The water boils, and turns into steam. The steam is very powerful; it rushes out of the horse’s stomach, and turns large wheels which we give him instead of legs. The wheels revolve over the iron lines which we have previously laid down, and the horse, which we call an engine, moves very quickly, dragging the arbas behind him: they are made of wood and iron, and have four wheels, not two, like your arbas in Khiva. The pace is so great that if your khan had an iron horse and a railway he could go to Kasala in one day.”

“It is a miracle!” said the Khivan, as Nazar translated to him my little speech, my servant himself, who had never seen a railway, being a little incredulous as to the possibility of going five hundred versts in twenty-four hours. The guide, who sat on the opposite side of the fire, and was engaged in washing his feet over the cavity in the floor, now remarked that his brother-in-law had the best horses in the steppes, but that they could not do the distance in less than ten days; then how could a horse that was made of iron, and with wheels instead of legs, do it in one? If it could, we were conjurers, like the man he had once seen swallow a sword at Kasala. “But who knew?” He had heard something about it at the Fort, and he looked down contemptuously at the host’s servants, who had assembled to gaze upon the new arrivals, and who were not traveled men like himself—a man who had been to Kasala and back being considered a great traveler by the Khivans.

Nazar, who did not want to be outdone in this way by the guide, now said,

“They have got wires which speak in Russia. This I have seen myself; they are fastened to the top of high poles, and the wires extend over miles of country. Any man in Sizeran who may wish to say something to a friend in Orenburg goes to one end of the wire; they turn a handle, and it makes a noise at the other end in Orenburg; the moullah there understands what the wire says, and you can talk almost as fast as if you were actually speaking to your friend.”

“I have heard something about this,” said our host. “There

was a merchant who passed through here two years ago, and he told me about it. He said that there was one of these speaking-wires all the way from St. Petersburg to Tashkent, and that the White Tzar could speak with his soldiers at Tashkent. He also said that they were going to make a speaking-wire to Petro-Alexandrovsk, and that then we could know every thing that was happening at Kasala, and the price of cotton at Orenburg, without having to send a letter."

The evening was far advanced, and the host, seeing that I was very drowsy, retired, when Nazar, the guide, and camel-driver, drawing the piece of cloth close to the embers, stretched themselves out at full length, and soon fell asleep.

On the morrow I was puzzled to know how to reward my host for his hospitality; however, on inquiring, I was informed that the custom in those parts was for the guest to make a present to his host, and that the best thing would be for me to give as many rubles as I thought just. This is the system universally adopted throughout Central Asia in the places where there are no caravansaries, or regular hostelries, for the travelers. The Khivans are thus enabled to carry out the injunctions of their prophet to the letter, and to lavish hospitality on their guest, being sure that on his departure they will be well remunerated for their trouble, and for the expenses which they may have incurred.

## CHAPTER XXX.

Oogentch.—The Town.—The Bazaar.—A Barber's Shop.—“These Infidels have Strange Customs.”—“Please God you do not get your Throat cut!”—Breakfast with a Khivan Merchant.—India a Mine of Wealth in the Eyes of the Russians in Tashkent.—There are Many Roads to India.—A Fort at Merve.—Shabbatat Canal.—The Bridge.—The Cemetery.—The Tombs.—Fearful Scenes.—“Who began the War?”—The Kazabat Canal.—Shamahooloor.—A Sportsman.—“You have not got a Wife?”—A Breech-loader.—“The Khan has now no Soldiers.”

WE were about four versts from Oogentch, the first town the traveler arrives at in Khivan territory, if going from Kalendarhana to the capital. There was a singular dearth of rising ground throughout the route; and if it had not been for the hundreds of dikes which traversed the country on every side, I should have imagined myself back upon the steppes. The snow, too, which had almost disappeared as we passed through the defile in the Kazan-Tor of mountains, now lay thick and flaky on the ground; while the cold, in spite of the latitude to which we had attained, was as intense as ever.

Large gardens inclosed by high walls were dotted about the landscape, and square-built houses similar to the one in which I had passed the night became more frequent as we gradually neared the town. Indeed, if the Khivans had only been supplied with arms and a good leader, it would have been difficult for the Russians to have entered Oogentch, as every walled garden could have been turned into a citadel, and a few resolute men with breech-loaders might have caused great destruction in the invaders' ranks.

The merchants in Oogentch seemed to do a considerable trade with the people of the surrounding districts, for the road was every now and then blocked up by hundreds of carts, all bringing corn and various kinds of grass to the market, while numerous camels laden with goods from other parts of the

khanate had been formed into one vast caravan, which extended for more than a mile, and was slowly filing into the town. The latter was defended by a ditch and high wall made of dried clay, now much out of repair, and masses of its *débris* had in many places choked up the surrounding trench.

The people gazed curiously at me as we rode through the narrow streets, my sheep-skin attire not being a customary one in those parts; and some of the inhabitants, stopping the guide, inquired if I were a Russian.

“No,” was the answer—“an Englishman.”

The announcement of my nationality produced an evident revulsion of feeling in the Khivans, who did not appear to bear much good-will toward their conquerors.

The bazaar through which we rode was held in a narrow street: this was partly covered over with rafters and straw, probably in order to protect the passers-by from the rays of the sun during the summer months. Grapes, dried fruits, and melons were for sale in many of the stalls: these last were niches or recesses in the walls, and no windows or shutters of any kind separated these primitive shops from the thoroughfare. In the centre of each recess sat the proprietor, surrounded by his wares, and generally engaged in warming his hands over a charcoal pan, which, mounted on a tripod stand, stood before him. Farther on, men were to be seen hammering into different shapes sheets of copper brought from Russia, and manufacturing water-bottles and pipes. All sorts of bright-colored calico stuffs were offered for sale, and found ready purchasers, while thick skeins of silk of various hues, and spun in the country, were readily exchanged for Russian paper money, which passes in Oogentch as well as the native currency. Women continually flitted past us in the street, taking sly glances at the strangers through the corner of their veils; the fair sex in Khiva not having their faces uncovered, as is the custom among the Kirghiz, but obeying strictly the rules laid down for their guidance by the Prophet.

As I expected to arrive at the capital either that afternoon or the following day, and wished to make my entrance into the city clean-shaved, and not with a beard of thirteen days' growth,

I asked Nazar to make inquiries whether a barber could be found in the neighborhood. The news that the Englishman wanted to be shaved was soon spread through the town, and a boy volunteered to show me the way to the barber's shop. We were followed there by a crowd of certainly from three to four hundred people. It was the more remarkable to them, as the report had been spread that the stranger would have his chin shaved and not his head, the Khivans keeping their heads as devoid of hair as a block of marble.

"Have your head shaved, sir," said Nazar; "it will look so nice—just like mine;" and, lifting off a green skull-cap, he showed me his bullet-like poll.

If I had been quite certain that my hair would have grown again, in all probability I should have followed my man's example; but not wishing to return to London with my head *à la* Nazar, I declined the proposal.

On arriving at the shop, we dismounted, and sat down in the recess by the barber's side. The crowd had now greatly increased, and was each moment becoming more dense, the whole town having by this time become aware that an Englishman was within the walls, and that he was about to be shaved. Moullahs, camel-drivers, and merchants jostled the one with the other to obtain a good view. Their bronzed faces glanced and peered through the fur of their Astrakhan hats; and the idea occurred to me that, if the barber were fanatically disposed, he might think that it would be doing a good deed in the eyes of Allah and of his own countrymen if he were forthwith to cut the throat of the unbeliever.

There was not a single Russian in Oogentch, and no authorities save the moullahs, or priests, who, in all probability, would be more fanatically disposed than even the rest of the population.

The remark made by the district governor at Kasala now flashed across my mind—"If you go to Khiva without an escort, the khan will very likely have your eyes taken out, or order you into a dungeon."

However, nothing was to be gained by crying over spilled milk—the die was cast; I was in Khivan territory, and, what

was far more to the point, in the hands of the barber, who was busily engaged in rubbing a thin strip of steel on a whetstone, the former article supplying the place of a razor, a handle being considered an unnecessary luxury. The street in front of the shop was now completely blocked up by the crowd. The people behind, who were not able to see as well as they could wish, called out to their friends who hid the performance from their view, and made them sit down, so that all might be able to enjoy the spectacle. If their curiosity was excited, mine was equally aroused. It was a strange scene, the crowd of eager faces, all staring intently into the recess: even some women, in spite of the prohibitory law, had stopped for a moment, and were looking at the performance with unmixed astonishment. If I had been in the hands of an executioner and about to have my throat cut, this would not have been half so interesting to them; for was I not having my chin shaved? "What will he do next?" asked one of the most curious of his neighbors. "Perhaps have his mustache shaved," was the reply; "but who knows? These infidels have strange customs;" and the excitement grew to boiling pitch.

My little Tartar began to be rather alarmed; he had not anticipated such a gathering, and he murmured in my ear, "Please God you do not get your throat cut! They might cut mine too. Allah preserve us, and bring us out of this scrape! Have your head shaved, it will please them."

At that moment the barber had put the dirty thumb of his left hand into my mouth, and was brandishing the razor in the air; no soap being used, as water was considered quite sufficient. Even under the most favorable circumstances, with a well-lathered chin and the sharpest of razors, being shaved, if one's beard luxuriates in a two weeks' growth, is not a pleasant process, but at Oogentch it was a highly painful operation. The razor at each movement of the barber's wrist tore out those hairs in my beard which it was too blunt to cut. The people were delighted. They were not prepared for this feature in the entertainment, and they roared with laughter as I slightly winced. Later on, the crowd became still more hilarious, and its enjoyment of the proceedings was greatly in-

creased, for the awkward barber, who was confused at the presence of so large a number of spectators, became a little nervous, trembled, and gashed my cheek.

The operation was at last over, and I was preparing to leave the shop, when a merchant came forward, and addressing me in Russian, asked me to breakfast with him. On my entering the recess where his wares were exposed for sale, he removed a curtain which hung in an obscure corner, and, stooping, led the way through a low covered way into a good-sized room. This was the apartment used by his family. His wife was seated there, engaged in performing some culinary operations over a charcoal fire. Her face was uncovered, as she did not expect any visitors, and with a rapid movement of her thick white shawl she entirely concealed her features. She was not by any means a beauty, and her personal attractions not such as to overcome a traveler; however, thinking it best to keep us out of temptation, she left the room and entered the harem, which was divided by a curtain from the apartment in which we found ourselves.

A dish composed of small pieces of roast pheasant, served up with a slightly acid sauce and surrounded by a huge pile of rice, was now brought in, followed by fried fish much resembling gudgeon; and while I was eating, the host plied me with questions about the countries through which I had traveled. He was ignorant that any water communication existed between Great Britain and India, and thought that the ordinary route from England to that empire lay through China. He was aware, however, that England was not the same country as India, thus showing more geographical knowledge than was possessed by his compatriot at our sleeping quarters of the previous evening.

My host had been for some time at Tashkent, where he had learned Russian. He had also been to Bokhara, and had spoken with several merchants who had gone with caravans to Cabul and Lahore. He was the more curious at meeting me, as he said that he had never seen an Englishman, and was very anxious to know whether there was any chance of a war between Great Britain and Russia. This, he observed, was look-

ed upon in Tashkent as certain soon to happen, the Russian inhabitants of that city talking about India as of a mine of wealth, from which they would be able to replenish their empty purses.

“How will they march to India?” I inquired. “There are high mountains which block the way; and, besides this, if they were to come, how do you know that we should let them get back again?”

“There are many roads,” he answered. “Merchants go from Bokhara to Cabul in sixteen days in the summer months; then there is the road through Merve and Herat, which is now stopped by the Turkomans, but which the Russians are going to open, and at the same time to build a fort at Merve. You have fine soldiers in India,” he continued; “but we are told that the natives of India do not like you, and will look upon the Russians as deliverers.”

“How do you like the Russians?” I inquired.

“Pretty well; they buy my goods when I am at Tashkent, and leave alone small people like myself. If I were rich, it would be another matter; but then I could bribe—money will go a long way with the colonels, and even the generals do not always keep their palms shut.”

“Were you in Khiva when the country was taken?” I asked.

“No; I was then at Tashkent, and we thought that the Russians would never get here. It was fearful,” he added, “so much bloodshed; so many friends killed; such cruelties: war is a dreadful thing.”

“Perhaps we shall meet some time or other in India,” I remarked, “and then I will return your hospitality.”

“That is to say if the Russians let you,” replied the man; “but when they are in Hindoostan there will not be much left for yourselves, or the natives either, for the matter of that; the officers here know how to squeeze money out of a stone.”

Nazar now came in. He informed us that the horses were ready, and that the guide was waiting for me to continue the journey; so, pressing a few rubles on my entertainer, I mounted and rode off toward the capital. On emerging once more

into the country, I found that the road was separated on each side from the adjacent lands by low walls of dried clay, each about four feet in height; and the neighboring fields were divided from each other by ditches, which marked the boundaries of the respective properties. About nine versts from Oogentch we crossed a canal known by the name of the Shabbatat. This was surmounted by a bridge constructed, in the clumsiest manner, of upright beams driven into the mud below, and cross planks with earth thrown on them to form the road. There was no wall or parapet on either side to prevent the passenger from falling into the stream, which was at least twelve feet below, and with a frightened horse or drunken coachman it was not the sort of place that a nervous man would like to cross on a dark night.

The road was now no longer inclosed, and we rode through a sandy track of seemingly uncultivated ground till we arrived at a cemetery. Here the tombs were made of dried clay, and formed in strange and fantastic shapes to suit the caprice or taste of the dead one's relatives. Banners or large white flags, mounted on poles ten or twelve feet high, floated in the breeze over several of the sepulchres, and marked the burial-place of some fallen hero or other, famous for his valor and prowess; while mounds of earth, unadorned save by the rising vegetation, were the last resting-places of his humbler followers. A small dwelling hard by this dead men's home was tenanted by an aged moullah, whose office it was to look after the cemetery, and offer up prayers for the departed. A lad now approached us, and offering me some dried fruits and tea, invited us to dismount and share their hospitality.

Later on, I walked round the tombs, accompanied by the old moullah, who told of the fearful scenes enacted during the enemy's advance on his country; and on being informed that I was not a Russian, he heaped deep curses on the invaders. "They say that we began the war," muttered the old man, "and it was they who imprisoned our merchants at Kasala in order to provoke the khan: but our day is gone by, and the infidels remain our masters."

After riding about seven versts farther, we crossed another

canal called the Kazabat, and as night was coming on, and there were no signs of the messenger I had sent forward to Khiva, we halted at a village called Shamahooloor. Here it was not even necessary for the guide to ask for hospitality. A fine-looking man, with a cheery, frank expression on his nut-brown face, came out of a substantially built house, and asked us to honor his roof by resting beneath it till the morrow. He was apparently better off than the owner of the dwelling where we had stopped the previous evening; and the room set apart for guests, though furnished in the same style as our quarters of the night before, was much larger, and the carpets, etc., of better quality.

Our host was a sportsman, and kept several hawks, these birds being much used in the chase by the Khivans. They are flown at hares or saigaks, a species of antelope; when the hawk, hovering above its prey's head, strikes him between the eyes, and the animal, becoming bewildered, does not know which way to turn, and falls an easy victim to the hounds.

"Do you not hunt in this way in your country?" asked the host.

"No; we hunt foxes, but only with hounds, and follow ourselves on horseback."

"Are your horses like our own?" he inquired.

"No; they are stouter-built, as a rule, have better shoulders, and are stronger animals; but though they can gallop faster than your horses for a short distance, I do not think they can last so long."

"Which do you like best, your horse or your wife?" inquired the man.

"That depends upon the woman," I replied; and the guide, here joining in the conversation, said in England they do not buy or sell their wives, and that I was not a married man.

"What! you have not got a wife?"

"No; how could I travel if I had one?"

"Why, you might leave her behind and lock her up, as our merchants do with their wives when they go on a journey."

"In my country the women are never locked up."

"What a marvel!" said the man; "and how can you trust

them? Is it not dangerous to expose them to so much temptation? They are poor weak creatures, and easily led. But if one of them is unfaithful to her husband, what does he do?"

"He goes to our moullah, whom we call a judge, and obtains a divorce, and marries some one else."

"What! you mean to say he does not cut the woman's throat?"

"No; he would very likely be hanged himself if he did."

"What a country!" said the host; "we manage things better in Khiva."

The guide was much astonished on hearing the price of horses in England. "And what do the poor people do?" he inquired.

"Why, walk."

"Walk?"

"Yes, walk"—this appearing to the man such an extraordinary statement that he could hardly credit it.

Later on, I took out my breech-loader from its case, as the weapon had become very rusty during the march, and began to clean it. The host scrutinized the gun very carefully, and was delighted at the rapidity with which it could be loaded.

"Ah!" he said, with a sigh, "if we had only been armed with some of your guns, the Russians would never have got here; the khan's arms were useless in comparison." With these words my host showed me his own gun, which had a barrel at least five feet long, and a rest to stick in the ground to steady the aim. "It is a nice weapon too," he added, "though not like yours, for mine takes five minutes to load, and quite a minute to fire; indeed, before I can shoot once, the Russians with their rifles can kill twenty men. Our khan has now no soldiers; the Russians will not let him have any."

## CHAPTER XXXI.

The Messenger.—Two Khivan Noblemen.—Minarets.—Orchards.—Mulberry-trees. — Khiva. — The Fortifications. — The Market-place. — The Gallows.—How Murderers are put to Death.—The Muscovite Imagination. — Capital Punishment rarely inflicted. — The Population. — The Schools. — Cupolas. — The Khivan's House. — A Bath in Khiva. — The Bathing Establishment. — The Belt which contained my Gold. — The Moullah. — Captain Abbot. — “The Winter killed the Dogs by Thousands.”—The Khan's Treasurer.—“They do not love you English People.”—“Four Years ago we were quite as far off Russia as you are at the Present Time.”—Distinguished Foreigners. — Ink Frozen. — “The Russians have not such Things.”

THE next morning we encountered on the road the messenger whom I had dispatched with my letter to the khan. He was accompanied by two Khivan noblemen. One of them courteously saluted us; he then said that His Majesty had received my letter, and had sent him forward to escort me into the city, and to say that I was welcome to his capital.

We were now fast nearing Khiva, which could be just discerned in the distance, but was hidden, to a certain extent, from our view by a narrow belt of tall, graceful trees; however, some richly-painted minarets and high domes of colored tiles could be seen towering above the leafy groves. Orchards, surrounded by walls eight and ten feet high, continually met the gaze, and avenues of mulberry-trees studded the landscape in all directions.

The two Khivans rode first; I followed, having put on my black fur pelisse instead of the sheep-skin garment, so as to present a more respectable appearance on entering the city. Nazar, who was mounted on the horse that stumbled, brought up the rear. He had desired the camel-driver to follow in the distance with the messenger and the caravan; my servant being of opinion that the number of our animals was not sufficient to deeply impress the Khivans with my importance,

and that on this occasion it was better to ride in without any caravan than with the small one I possessed. We now entered the city, which is of an oblong form, and surrounded by two walls: the outer one is about fifty feet high: its basement is constructed of baked bricks, the upper part being built of dried clay. This forms the first line of defense, and completely encircles the town, which is about a quarter of a mile within the wall. Four high wooden gates, clamped with iron, barred the approach from the north, south, east, and west, while the walls themselves were in many places out of repair.

The town itself is surrounded by a second wall, not quite so high as the one just described, and with a dry ditch, which is now half filled with ruined *débris*. The slope which leads from the wall to the trench had been used as a cemetery, and hundreds of sepulchres and tombs were scattered along some undulating ground just without the city. The space between the first and second walls is used as a market-place, where cattle, horses, sheep, and camels are sold, and where a number of carts were standing, filled with corn and grass.

Here an ominous-looking cross-beam had been erected, towering high above the heads of the people with its bare, gaunt poles.

This was the gallows on which all people convicted of theft are executed; murderers being put to death in a different manner, having their throats cut from ear to ear in the same way that sheep are killed.

This punishment is carried out by the side of a large hole in the ground, not far from the principal street in the centre of the town. But I must here remark that the many cruelties stated to have been perpetrated by the present khan previous to the capture of his city did not take place. Indeed, they only existed in the fertile Muscovite imagination, which was eager to find an excuse for the appropriation of a neighbor's property. On the contrary, capital punishment was only inflicted when the laws had been infringed; and there is no instance of the khan having arbitrarily put any one to death.

The two walls above mentioned appear to have made up the defenses of the city, which was also armed with sixteen guns.

These, however, proved practically useless against the Russians, as the garrison only fired solid shot, not being provided with shell. The khan seemed to have made no use whatever of the many inclosed gardens in the vicinity of the city during the Russian advance, as, if he had, and firmly contested each yard of soil, I much doubt whether the Tzar's troops could have ever entered the city.

It is difficult to estimate the population of an Oriental city by simply riding round its walls; so many houses are uninhabited, and others again are densely packed with inhabitants. However, I should say, as a mere guess, that there are about 25,000 human beings within the walls of Khiva. The streets are broad and clean, while the houses belonging to the richer inhabitants are built of highly polished bricks and colored tiles, which lend a cheerful aspect to the otherwise somewhat sombre color of the surroundings. There are nine schools: the largest, which contains 130 pupils, was built by the father of the present khan. These buildings are all constructed with high, colored domes, and are ornamented with frescoes and arabesque work, the bright aspect of the cupolas first attracting the stranger's attention on his nearing the city.

Presently we rode through a bazaar similar to the one at Oogentch, thin rafters and straw uniting the tops of the houses in the street, and forming a sort of roof to protect the stall-keepers and their customers from the rays of a summer sun. We were followed by crowds of people; and as some of the more inquisitive approached too closely, the Khivans who accompanied me, raising their whips in the air, freely belabored the shoulders of the multitude, thus securing a little space. After riding through a great number of streets, and taking the most circuitous course—probably in order to duly impress me with an idea of the importance of the town—we arrived before my companion's house. Several servants ran forward and took hold of the horses. The Khivan dismounted, and, bowing obsequiously, led the way through a high door-way constructed of solid timber. We next entered a square open court, with carved stone pillars supporting a balcony which looked down upon a marble fountain, or basin, the general appearance of

the court being that of a patio in some nobleman's house in Cordova or Seville. A door of a similar construction to the one already described, though somewhat lower, gave access to a long, narrow room, a raised dais at each end being covered with handsome rugs. There were no windows, glass being a luxury which has only recently found its way to the capital; but the apartment received its light from an aperture at the side, which was slightly concealed by some trellis-work, and from a space left uncovered in the ceiling, which was adorned with arabesque figures. The two doors which led from the court were each of them handsomely carved, and in the middle of the room was a hearth filled with charcoal embers. My host, beckoning to me to take the post of honor by the fire, retired a few paces and folded his arms across his chest; then, assuming a deprecatory air, he asked my permission to sit down.

Grapes, melons, and other fruit, fresh as on the day when first picked, were brought in on a large tray and laid at my feet, while the host himself, bringing in a Russian tea-pot and cup, poured out some of the boiling liquid and placed it by my side; I all this time being seated on a rug, with my legs crossed under me, in any thing but a comfortable position.

He then inquired if I had any commands for him, as the khan had given an order that every thing I might require was instantly to be supplied. On my expressing a wish to have a bath, a servant was at once dispatched to give the necessary orders to the keeper of the establishment. In an hour's time Nazar informed me that the bath was ready, and that we should have to ride there, as it was in a house in the centre of the town. The host now led the way, Nazar bringing up the rear, carrying some soap in one hand, and a hair-brush in the other, the latter a source of great astonishment to the Khivans, who, having no hair of their own, could not understand the use of such an article.

The bathing establishment consisted of three large rooms with vaulted roofs. Several divans made of dried clay were arranged around the walls of the first apartment, and covered with rugs and cushions. On one of these sat the keeper of the bath. He at once arose, and, beckoning to me to sit down be-

side him, produced a pipe. There is an old saying that when you are in Rome you must do as Rome does. I took two or three whiffs, and was nearly choked in consequence. Some sherbet was now poured out, and an attendant helped me to undress, when feeling the belt which contained all my gold, he asked what it was. It is no use showing Asiatics that you suspect them of possible dishonesty, and the result of my experience has been to prove that you can do more by apparently confiding in them than by any other method. I merely remarked, "Money;" and, asking him to take care of it while I went into the hot room, I gave him the belt. The man bowed down, and, pointing to his head, conveyed to my mind that his life would answer for the money. He then led the way into a second apartment. Here there was a charcoal furnace, and on the fire a quantity of large stones which were at a white-heat. He threw three or four pailfuls of cold water on the stones: the liquid was in an instant converted into steam, and volumes of dense vapor filled the apartment. Hotter and hotter it grew, the atmosphere being so thick that the attendant was invisible. After steaming for about half an hour, he came to my side, and led me to a large reservoir filled with water and floating ice; when, seizing a bucket, he soused me from head to foot. The process was over, there being no shampooing or bone-kneading, as in similar establishments in Turkey, and I was conducted back to the dressing-room.

Here many of the principal inhabitants had assembled, in order to have a look at the stranger who, although a Christian, still liked washing. One of them, an old moullah, could speak a little Arabic, having twice performed the pilgrimage to Mecca. He remembered Captain Abbott's visit to Khiva, forty years ago, and was under the impression that I, like that officer, had come to the Khivan capital from India and Herat.

"He was such a nice gentleman!" observed the moullah, alluding to Abbott. "He was a medicine-man too, and cured several sick people. We heard afterward that he had been killed by the Russians. Was that the case?" And on being informed that Captain Abbott had returned in safety to England, the old man gave praise to God.

“Your compatriot was with us about the time that the Russians were attempting to reach Khiva,” continued the moullah; “and people here then thought that an army from Hindoostan was coming to help us; but we did not require any assistance: the winter killed the dogs by thousands. Praise be to God!” And this expression, which is the same in Tartar as in Arabic, was devoutly repeated by the rest of the company.

“How did the Russians succeed in taking Khiva?” I inquired.

“They came in the summer. Allah did not fight for us.”

“It has been said,” I remarked, “that your people had poisoned some of the wells in the desert. Was this the case?”

The old man turned red with indignation.

“Poison the wells which God has given us!” he said; “no, never; for that would be a sin in his eyes.”

Nazar by this time had returned with the horses; so, shaking hands with the principal people, who arose at my departure, I rode away, followed by the blessings of the old priest. The latter, from the fact of my speaking Arabic, looking upon me as not quite a Mohammedan, but as certainly a very distinguished moullah in my own country.

Later on in the afternoon I received a visit from no less a person than the khan’s treasurer. He was a tall, fat man, of about forty years of age, and with a forbidding expression on his countenance. He was extremely anxious to learn my business, and to know if I had been sent to Khiva by my Government, and was much surprised that the Russians had not stopped me on the route.

“You have not been to Fort Petro-Alexandrovska?” he observed.

“No,” I replied.

“Ah! that accounts for it,” he continued, with a sarcastic laugh. “They do not much love you English people, though, by all accounts, you are now on speaking terms, and not at war.”

“Do you think this state of things will last long?” I inquired.

The man grinned, and, stretching out his arm, pointed eastward.

“They are pushing onward,” he added. “You will have an opportunity of shaking hands with your friends before long. Four years ago we were quite as far from Russia as you are at the present time; and you have not many white men in India.”

“Quite sufficient to give Russia a good beating,” I remarked; when, asking at what time it would be convenient for me to pay my respects to the khan, the following afternoon was fixed for an audience, and the treasurer left me.

A succession of visitors came pouring in during the evening, the arrival of an Englishman in Khiva being looked upon as an extraordinary occurrence. I have often pitied distinguished foreigners who, when visiting London, are taken, among other sights, to the Zoological Gardens on a Sunday—the *habitués* of the Gardens staring at the unfortunate stranger as if he were a choice specimen of the gorilla or chimpanzee which has been imported from some recently discovered region. The lions and monkeys are deserted for the new arrival, and his every gesture is scanned as if he were not made of flesh, blood, and bone, like an ordinary mortal, and had nothing in common with the rest of humanity. This was my own position. My manner of eating with a knife and fork much astonished some of the visitors, and one of them, coming up, tried to imitate the proceeding, the consequence being that he ran the fork into his cheek, to the great amusement of the rest of the party.

Nazar and the guide did not at all object to this intrusion on my privacy.

“It is their custom,” said my little Tartar, at the same time expectorating on the floor; “they are poor barbarous people, and do not know any better. They want to honor you,” he added, “and this is their way of doing it. If you were a Russian, there would not be half so much curiosity displayed.”

The evening wore on, and, taking an inkstand out of my writing-case, I tried to write a letter. However, this proved a difficult task, as the ink, which was frozen into a solid lump, had smashed the bottle. The cold still remained as great as ever; though now it was impossible for me to register it, owing to my thermometer having been broken during the journey. The small charcoal hearth in my room gave out but lit-

tle warmth, and the draught through the apertures in the roof and walls was so great that it was impossible to undress. There was nothing for it but to wrap myself in my fur pelisse, and, thus attired, lie down on my air mattress; the latter a source of the greatest astonishment to the Khivans, who were delighted when I explained how it could be used on an emergency as a raft. "We could cross the Amu on it," observed one of them. "And it is light and soft," added another, lifting it up between his finger and thumb. "The Russians have not such things," chimed in a third, who had once been inside Fort Petro-Alexandrovsk.

## CHAPTER XXXII.

Breakfast in Khiva.—Decorations or Orders.—How to obtain them in Russia.—The Procession through the Streets.—The Band.—The Khan's Palace.—His Guards.—Effeminate Boys dressed a Little like Women.—The Treasury.—Khivan Tribute to the Tzar.—The Executioner.—Nazar's Trepidation.—The Reception Hall.—The Audience.—The Khan.—His Description.—Tea.—The Interpreters.—England, "How Far is it from Russia?"—Englishmen and Germans.—Wyld's Map.—"Where is India?"—A Compass.—An Infernal Machine.—Afghanistan.—China.—War with Russia.—"The Russians laughed at you."—"What shall you do about Kashgar?"—"Are there Jews in your Country?"—"The Russians love Money very much."—"Hum!"

IN the morning my host again appeared, accompanied by several servants bearing sweetmeats and fruits, the invariable preludes to a breakfast at Khiva, while a frozen block of milk was also sent me, and some butter which was as hard as a billiard-ball. Nazar was all this time engaged in brushing a black shooting-jacket, the only garment I possessed except my regular riding attire. However, I had brought one white shirt, thinking that I might possibly have an interview with some Central Asian magnate or other, and, greatly to my surprise, the article in question was not much the worse for the journey.

While these preparations were going on, the host kept plying Nazar with questions as to my *tchin* (rank), and as to whether I had any orders or not, the Russian officers who had visited Khiva having been covered with decorations, a successful review or parade at St. Petersburg often enabling an officer to obtain an order which, with us, would only be given for services in the field. Indeed, I remember once seeing a Russian official with his breast so covered with decorations, that, struck with astonishment, I asked in what sanguinary actions he had distinguished himself. The man whom I addressed smiled. "He has never been under fire," was the reply, "but he is useful to the

State, as, through his agents, he knows every thing that goes on in Russia."

"You have no orders?" inquired Nazar.

"No."

"Well, I have told them that you have a great many, but that you have not brought them with you for fear of their being stolen. If I could only tie a few pieces of ribbon on your coat it would look so well—the people, too, would think so much more of me;" and my little Tartar servant swelled out his chest, as much as to say, "I am a person of considerable importance, though you do not seem to see it."

I was a good deal annoyed with Nazar for having thus imposed upon my host, and instantly desired him to state that in my country officers only received decorations for real services, consequently there were not so many worn as in the Russian army; while as to my rank, I was a captain, and traveling at my own expense and for my own pleasure, and not in any way as an agent of the British Government.

In the afternoon two officials arrived from the khan's palace, with an escort of six men on horseback and four on foot. The elder of the two dignitaries said that His Majesty was waiting to receive me, and my horse being brought round, I mounted, and accompanied him toward the palace. The six men on horseback led the way, then I came between the two officials, and Nazar brought up the rear with some attendants on foot, who freely lashed the crowd with their whips whenever any of the spectators approached our horses too closely.

The news that the khan was about to receive me had spread rapidly through the town, and the streets were lined with curious individuals all eager to see the Englishman. Perhaps in no part of the world is India more talked of than in the Central Asian khanates; and the stories of our wealth and power, which have reached Khiva through Afghan and Bokharan sources, have grown like a snow-ball in its onward course, until the riches described in the garden discovered by Aladdin would pale if compared with the fabled treasures of Hindoostan.

After riding through several narrow streets, where, in some

instances, the house-tops were thronged with people desirous of looking at our procession, we emerged on a small, flat piece of ground which was not built over, and which formed a sort of open square. Here a deep hole was pointed out to me as the spot where criminals who have been found guilty of murder had their throats cut from ear to ear.

The khan's palace is a large building, ornamented with pillars and domes, which, covered with bright-colored tiles, flash in the sun, and attract the attention of the stranger approaching Khiva. A guard of thirty or forty men armed with cimeters stood at the palace gates. We next passed into a small courtyard. The khan's guards were all attired in long flowing silk robes of various patterns, bright-colored sashes being girt around their waists, and tall fur hats surmounting their bronzed countenances. The court-yard was surrounded by a low pile of buildings, which are the offices of the palace, and was filled with attendants and menials of the court, while good-looking boys of an effeminate appearance, with long hair streaming down their shoulders, and dressed a little like the women, lounged about, and seemed to have nothing in particular to do.

A door at the farther end of the court gave access to a low passage, and, after passing through some dirty corridors, where I had occasionally to stoop in order to avoid knocking my head against the ceiling, we came to a large, square-shaped room. Here the treasurer was seated, with three moullahs, who were squatted by his side, while several attendants crouched in humble attitudes at the opposite end of the apartment. The treasurer and his companions were busily engaged in counting some rolls of ruble-notes and a heap of silver coin, which had been received from the khan's subjects, and were now to be sent to Petro-Alexandrovska as part of the tribute to the Tzar.

The great man now made a sign to some of his attendants, when a large wooden box, bearing signs of having been manufactured in Russia, was pushed a little from the wall and offered to me as a seat. Nazar was accommodated among the dependents at the other end of the room. After the usual salaams had been made, the functionary continued his task, leaving me in ignorance as to what was to be the next part of

the programme; Nazar squatting himself as far as possible from one of the attendants, who was armed with a cimeter, and whom he suspected of being the executioner.

After I had been kept waiting for about a quarter of an hour, a messenger entered the room and informed the treasurer that the khan was disengaged, and ready to receive me. We now entered a long corridor, which led to an inner court-yard. Here we found the reception-hall, a large tent, or kubitka, of a dome-like shape. The treasurer, lifting up a fold of thick cloth, motioned to me to enter, and on doing so I found myself face to face with the celebrated khan, who was reclining against some pillows or cushions, and seated on a handsome Persian rug, warming his feet by a circular hearth filled with burning charcoal. He raised his hand to his forehead as I stood before him, a salute which I returned by touching my cap. He then made a sign for me to sit down by his side.

Before I relate our conversation, it may not be uninteresting if I describe the sovereign. He is taller than the average of his subjects, being quite five feet ten in height, and is strongly built: his face is of a broad, massive type, he has a low, square forehead, large dark eyes, a short straight nose with dilated nostrils, and a coal-black beard and mustache; while an enormous mouth, with irregular but white teeth, and a chin somewhat concealed by his beard, and not at all in character with the otherwise determined appearance of his face, must complete the picture.

He did not look more than eight-and-twenty, and has a pleasant, genial smile, and a merry twinkle in his eye, very unusual among Orientals; in fact, to me an expression in Spanish would better describe his face than any English one I can think of. It is very *simpática*, and I must say I was greatly surprised, after all that has been written in Russian newspapers about the cruelties and other iniquities perpetrated by this Khivan potentate, to find the original such a cheery sort of fellow.

His countenance was of a very different type from his treasurer's. The hang-dog expression of the latter made me bilious to look at him, and it was said that he carried to great lengths

those peculiar vices and depraved habits to which Orientals are so often addicted. The khan was dressed in a similar sort of costume to that generally worn by his subjects, but it was made of much richer materials, and a jeweled sword was lying by his seat. His head was covered by a tall black Astrakhan hat, of a sugar-loaf shape; and on my seeing that all the officials who were in the room at the same time as myself kept on their fur hats, I did the same.

The sovereign, turning to an attendant, gave an order in a low tone, when tea was instantly brought, and handed to me in a small porcelain tea-cup. A conversation with the khan was now commenced, and carried on through Nazar and a Kirghiz interpreter who spoke Russian, and occasionally by means of a moullah, who was acquainted with Arabic, and had spent some time in Egypt. The khan, when he wished to say any thing which was not intended for the ears of the other attendants, murmured his questions to this official, who would then translate them to me.

The first question asked was how far England is from Russia, and whether Englishmen and Germans are of the same nation? thus showing rather a deficiency in geographical knowledge. Fortunately I had Wyld's map of the countries lying between England and India in my pocket, and producing it, I unfolded the map before him.

He at once asked where India was.

I pointed to it.

"No," he said, "India is there," pointing to the south-east.

He was seated facing the south, and could not understand that it was necessary to read the map to the reverse hand.

As I was not quite certain where the north was, I desired Nazar to give me my compass, which he wore round his neck. When he handed it to me I observed the countenances of the khan's followers assume an expression of alarm, and they looked as if they thought that it was an infernal machine and might go off. However, the sovereign himself instantly recognized the use of the instrument, and said that he had two which had been given him some time previous by a traveler.

I now adjusted the map to the north, and showed him all

the different places he mentioned, at the same time pointing with my finger to the direction in which he would have to ride if he should wish to visit them.

He was under the impression that Afghanistan belonged to England, and was greatly struck with the size of India, and the small space that Great Britain takes up on the map. "China, where the tea comes from, belongs to you also?" he inquired, evidently thinking that England has the same relations with the Celestial Empire as Russia with Kokan.

The khan then putting his hand on Hindoostan on the map, observed that India was large, but not so large as Russia, which required nearly two hands to cover it.

I here remarked that extent of territory does not make up the strength of a nation, and that India contained nearly three times as many inhabitants as were in the whole of the Russian Empire; while Her Majesty ruled over such a large extent of territory which was not shown in the map, that the sun never sets throughout her dominions.

He then asked if it were true that the son of our queen had lately married the daughter of the Tzar, as the Russians had told him so, and said that it was a proof of the friendship which existed between England and Russia, and of the interests they had in common, which would eventually lead to the two empires touching in the East.

He was also very anxious to know whether Englishmen loved the Russians as much as the Russians said they did; "for if I am to believe what I hear from other sources," he continued, "the more particularly through the Bokharans, there is not much love lost between the two countries, and the people in India are not at all eager to have their *dear friends* as such near neighbors."

He then said, "You had a war with Russia some years ago, and were the allies of the Sultan. This made a great stir in Central Asia, and we were very glad to hear the news, as we thought you would defend us in the same manner if we were attacked. There was another khan, however, who helped you at that time, and from all accounts you took some Russian territory. Now," continued the speaker, "I want to know if it is

true that the khan who was your friend at that time has been since defeated by another power, and that the Russians then laughed at you, and said that you were weak and could not fight without your friend, after which they retook all the country they had previously lost.”

To this I replied that there had been no territory taken, and that as to our fearing Russia, or any other power, this was a statement as ridiculous as false; that England had beaten Russia before, and could easily do so again; but that we were a peaceable nation, and never wished to interfere with our neighbors so long as they did not interfere with us.

“That is all very well,” said the khan; and after being silent for a few seconds, he suddenly observed, “Why did not England help me when I sent a mission to Lord Northbrooke?”

To this I replied that, being only a traveler, and not in the secrets of the Government, I could not possibly know all that passed in the political world.

“Well,” observed the sovereign, “the Russians will now advance to Kashgar, then to Bokhara and Balkh, and so on to Merve and Herat: you will have to fight some day, whether your government likes it or not. I am informed that India is very rich,” he added, “and that Russia has got plenty of soldiers, but little with which to pay them. I am paying for some of them now,” he continued, looking with a sad smile at his treasurer.

The khan next said, “We Mohammedans used to think that England was our friend because she helped the Sultan; but you have let the Russians take Tashkent, conquer me, and make her way into Kokan. What shall you do about Kashgar?” he suddenly inquired; “shall you defend Kashgar or not?”

Here I remarked that I was very sorry the Russians had been allowed to get to Khiva, as this might easily have been prevented, but that I could not give him an answer, as I was utterly ignorant of the policy of the Government.

“You do not have a khan,” he asked, “at the head of affairs?”

“No,” I replied, “a queen; and Her Majesty is advised as

to her policy by her ministers, who for the time being are supposed to represent the opinion of the country."

"And does that opinion change?" he inquired.

"Very frequently," I resumed; "and since your country was conquered we have had a fresh government, whose policy is diametrically opposite to that held by the previous one; and in a few years' time we shall have another change, for in our country, as the people advance in knowledge and wealth, they require fresh laws and privileges. The result of this is, they choose a different set of people to represent them: the sovereign, however, remains always immutable, and she can make no mistake, all the responsibility of government resting with the ministry, who, in their turn, are selected from the majority of the representatives."

"Can your queen have a subject's head cut off?" asked the khan.

"No, not without a trial before our judges—they answer to your moullahs; and then if the prisoner has committed murder, he is nearly sure to be sentenced to death, and hanged."

"Then she never has their throats cut?"

"No."

"Hindoostan is a very wonderful country," continued the khan. "The envoy I sent there a few years ago has told me of your railroads and telegraphs; but the Russians have railroads too."

"Yes," I replied; "we lent them money, and our engineers have helped to make them."

"Do the Russians pay you for this?" he inquired.

"Yes; so far they have behaved very honorably."

"Are there not Jews in your country, like some of the Jews at Bokhara?"

"One of the richest men in England is a Jew."

"The Russians do not take away the money from the Jews?"

"No."

The khan here said a few words to his treasurer, and then remarked, "Why do they take money from me, then? The Russians love money very much." As he said this he shook

his head sorrowfully at the treasurer, and the latter, assuming a most mournful expression, ejaculated, "Hum!" purring out this monosyllable in a doleful strain; the word "hum" having been constantly used during our conversation both by the sovereign and his nobles.

The khan now by a low bow made me aware that the interview was over.

"I have given orders for you to be shown every thing you may wish to see in my city," he observed; when, saying good-bye, and thanking him for his kindness, I returned to my quarters. The people bowed down before the cortége as we rode back through the streets, for the news had spread that my reception had been a very gracious one.

## CHAPTER XXXIII.

The Present Khan.—The Law of Succession.—The Turkomans and their Tribute.—The Royal Gardens.—A Summer Palace.—How the Sovereign administers Justice.—God's Vengeance.—The Prison.—The Prisoners.—The Stocks.—The Schools.—The Moullahs.—Reading, Writing, and the Koran.—How School-masters are remunerated for their Trouble.—Preparations for a Start to Bokhara.—*L'homme propose, mais Dieu dispose*.—A Letter.—It must have cost a Large Sum of Money sending that Telegram.—General Milutin.—Count Schouvaloff's Brother.—The Bazaar.—A Strict Order.—A Nose-ring.—The Unclean Animal.—A Present from the Khan.—His Invitation to Englishmen.—His Hospitality.

THE present khan is the eleventh in succession of the same family. He commenced his reign ten years ago, at the death of the previous sovereign, the khanate descending from father to son, and not to the eldest male relative, as is the case amidst some other Mohammedan nations. The monarch receives the crown-lands and gardens intact. With the rest of the nation, the property at a father's death is divided equally among his sons, thus doing away with the possibility of any one possessing a large extent of the soil.

The actual khan, after paying his annual tribute to the Tzar, has 100,000 rubles, or about £14,000, a year left for himself. He has no army to maintain, and some of the Turkoman tribes are recommencing to pay him taxes. This they do for fear lest otherwise it might be made a pretext for a Russian advance into their country.

The following day I rode out to visit the sovereign's gardens, which are about three versts from the town. He has five: each of them is from four to five acres in extent: they are surrounded by high walls, built of dried clay, with solid buttresses at the corners. Two large wooden gates at the entrance of the inclosure were opened by the gardener, a little swarthy man, clad in a dressing-gown of many colors, and with a long iron hoe on his shoulder. I was accompanied by the son

of my host and Nazar, when, the former saying that I had the khan's permission, the gardener stepped aside and allowed us to enter.

The garden was remarkably well kept, and the horticultural arrangements much better than I expected to find so far from Europe. Here were to be seen long avenues of fruit-trees, carefully cut and trimmed; there men were engaged in preparing the soil, which would be thickly studded with melons in the ensuing spring. Apple, pear, and cherry trees abounded, while in the centre of the ground high scaffoldings, covered with trellis-work, showed where, in summer, the vines are trained. Under their grateful shade, cool walks are formed to protect the khan and his ladies from the burning sun.

He has a small summer palace in this garden, to which he resorts, and where he holds his court in June and July. Trenches for the purpose of irrigation are cut in all directions about the grounds, while frequent mulberry-trees, terminating in thick clusters of the same, are interspersed throughout the garden.

The scene must be a striking one when the khan, surrounded by his court and officers of state, administers justice; for this takes place in the open, on a raised stone dais, which is ascended by a low flight of steps. There the delinquents are brought; and if they do not at once confess their guilt to their lord and master, he orders them to be taken to the moullah, a learned man, whose business it is to investigate all such matters. The latter produces a copy of the Koran, and desires the suspected individual to swear his innocence; if this is done, and there are no eye-witnesses to prove the man's guilt, he is allowed to go free. Should he perjure himself, the Khivans believe that the vengeance of Allah will speedily overtake him, and that the retribution will then be much greater than any punishment which man's justice could inflict.

"But," I inquired, "are there never some wretches among you who will risk the wrath of Allah, and, perjuring themselves, be released to commit other crimes?"

"No," was the answer. "The fear of God's vengeance is happily too great to admit of such wickedness."

"But supposing that there are witnesses who can prove that

the person committed the crime, and he still denies it. What do you do then?"

"Why, we beat him with rods, put salt in his mouth, and expose him to the burning rays of the sun, until at last he confesses, and then is punished for his breach of the law."

After riding through the gardens which lie on the southern side of the city, and are on the road to Merve, we returned to Khiva, and visited the prison—a low building on the left of the court, which forms the entrance to the khan's palace. Here I found two prisoners, their feet fastened in wooden stocks, while heavy iron chains encircled their necks and bodies. They were accused of having assaulted a woman, and two females were witnesses of the act; but as the prisoners would not confess, they were to be kept in confinement till they acknowledged their guilt.

On leaving the jail, I rode to the principal school, and found it a series of little low rooms or open niches, which inclosed a court-yard. A large fountain or basin for water had been constructed in the centre of the open space, the corners of the court being surmounted by some high domes and minarets of colored tiles similar to those in the khan's palace. A moullah superintends each school, and under his supervision there is a staff of other teachers. The subjects taught are reading, writing, and the Koran, pages of which are committed to memory by the pupils. The teacher squats beside the hearth in the middle of the room, while the boys sit around him, and learn from his lips verses of their Scripture. The parents pay for their children's tuition in corn, a certain number of measures being given to the instructor in return for his labors. A crowd followed us about, and some of the people were much surprised, seeing that I wrote from left to right, instead of from right to left, as I jotted down my notes in a pocket-book.

A succession of visitors awaited us on returning to our quarters, several moullahs who had been to Egypt and Mecca calling to pay their respects to the Englishman, who, like themselves, spoke Arabic.

In the mean time Nazar was making preparations for a start to Bokhara. Bread had been ordered, or rather a peculiar sort

of little round cake, which substitutes the so-called staff of life at Khiva. The guide had promised to accompany us, and the camel-driver was thoroughly prepared to accompany me to the end of the world so long as I gave him plenty to eat. I determined to remain one day longer, and then leave for Bokhara. This would be a twelve days' march from Khiva. From Bokhara I could go on to Merve and Meshed, where we should be in Persian territory.

I should much have liked to have remained some days longer at Khiva, but time was important. It was the 27th of January, and I was obliged to be back with my regiment on the 14th of April. However, *L'homme propose, mais Dieu dispose*; and the truth of this celebrated old French saying was prominently brought before me the next morning, for, on returning from an early ride through the market, where a great sale of camels and horses was taking place, I found two strangers in my apartment. One of them, producing a letter, handed it to me, saying that he had been sent to Khiva by order of the commandant at Petro-Alexandrovska.

On opening the inclosure, I found a letter written in Russian on one side of the paper, and in French on the other.

Its contents were to the following effect: that the colonel had received a telegram, *via* Tashkent, and that I must go to the fort to receive the communication.

I was greatly surprised to find that any one took so much interest in me as to dispatch a telegram so many thousand miles, and put himself to the expense of having the message forwarded from Tashkent, where the telegraph ends, to Khiva, a distance of nine hundred miles, by couriers with relays of horses. It must have cost a large sum of money sending that telegram, and I began to be a little alarmed, thinking that perhaps I should be asked to pay for it.

Again, what could have occurred of such great importance as to induce any one to telegraph? Could it be that General Milutin, the Russian Minister of War, had just remembered that I had called four times at his house, and that he had not been able to give me an interview, but that he was now prepared to grant one?

There was another solution which might also have been correct, and the thought suddenly occurred to me that perhaps Count Schouvaloff's brother, to whom the thoughtful ambassador in London had so kindly given me a letter of recommendation, had by this time arrived at St. Petersburg, and wished to show me some hospitality.

Anyhow, there was the letter, and I must go to Petro-Alexandrovsk to receive the telegram. It was not a pleasant thought after having gone so far, to have possibly to return to European Russia over the snow-covered steppes. It is a hard journey even for the Tartars, this fourteen days' march, with the cold at  $20^{\circ}$  and  $30^{\circ}$  degrees below zero, and no shelter to be met with on the road. The Tartar and Khivan merchants occasionally, it is true, make the journey in midwinter, but invariably wait till the spring for their return to Orenburg.

I had accomplished the really hard part of my journey, and every degree marched in the direction of Merve would have led me to a warmer clime. However, there was nothing to be done save to go to Petro-Alexandrovsk, and then, if the dispatch were of such a nature as to oblige me to return, to retrace my steps.

The messenger who had brought the letter was eager for my immediate return to the fort; but this, I said, was out of the question till the next day, as I wished to make some purchases in the town, and must also pay a farewell visit to the khan previous to my departure.

A little later I rode to the bazaar, accompanied by Nazar and the guide, the latter not being at all pleased at our having to go to Petro-Alexandrovsk. He was very uneasy in his own mind about the consequences which might occur to him for having brought me to Khiva.

One of the men sent with the commandant's letter was now continually in our wake, and I subsequently learned that a strict order had been sent to the khan to have our party followed and taken to the fort, in the event of my having left the city.

On arriving at the bazaar we were instantly surrounded by merchants, all eager to dispose of their wares. On selecting the most respectable-looking man I could see, he led me into a

large room at the back of his shop. Here, after he had offered us some dried fruit and tea, as indispensable to a Khivan tradesman when bargaining with a customer as coffee to a shop-keeper in Cairo, he proceeded to a large wooden box which stood in a corner of the apartment, and unlocked it with an enormous key which hung from his girdle, the key, as it turned in the lock, giving out a peculiar hissing sound, owing to some hidden mechanism in the interior.

“Do you want something for a young or for an old woman?” asked the merchant—Nazar having previously informed him that I wished to buy some female ornaments.

“If you want it for a young wife, look how beautiful this is—she would look lovely with it;” and he handed me a large gold ring, curiously set with small pearls and turquoises.

“This would be too large for her finger,” I remarked.

“Yes,” replied the man; “but not for her nose. This is for her nose.”

“Lovely!” said the guide. “My brother-in-law’s wife has one its very counterpart; buy it.”

“Sir,” said Nazar, “no girl could resist you if you offered her such a present.”

The whole party were much surprised when I informed them that in England we only put rings in the noses of the unclean animal.

The jewelry for sale was of a tawdry description; however, eventually I discovered a curiously worked gold ornament, with long pendants of coral and other stones. After a great deal of haggling Nazar succeeded in obtaining it for me at one-third of the price originally asked; the Khivan jewelers having very elastic consciences, in spite of the Prophet’s injunction that no true believer is to deceive the stranger within his gates.

On returning to my quarters, I found the treasurer awaiting my arrival. He had heard the news of my enforced departure, and came to know at what time it would be convenient for me to pay my respects and say farewell to the khan. Shortly afterward I rode with him to the palace, when he first led the way to the treasury, and there presenting me with a dressing-gown, said that his majesty had been pleased to beg my acceptance of

this garment. It was a long robe, made of black cloth, reaching to the knees, and lined inside with silk and bright-colored chintzes. Indeed, as I was afterward informed, this is the highest honor that can be paid a stranger; and a halat, or dressing-gown, from the khan is looked upon at Khiva much as the Order of the Garter would be in England.

The sovereign expressed his annoyance that I had to leave his capital so suddenly. He then remarked,

“You will come back again, I trust; and pray tell all Englishmen whom you may meet that I have heard from the envoy I sent to India of the greatness of their nation, and only hope that before long I shall see some of them in my capital.”

He was very kind in his manner, and shook hands warmly when I took my leave; the impression being left on my mind that the Khan of Khiva is the least bigoted of all the Moham-medans whose acquaintance I have made in the course of my travels, and that the stories of his cruelties to Russian prisoners, previous to the capture of his city, are pure inventions which have been disseminated by the Russian press in order to try and justify the annexation of his territory.

Before leaving my quarters I endeavored to persuade my host to accept a present in lieu of the handsome treatment my party and myself had received at his hands. However, this was a fruitless task; the Khivan at once declined, saying that I was the khan's guest, and that his majesty would be very angry if he were to learn that I had tried to requite his hospitality by giving a present to his servant. Indeed, when I made it a personal matter my attempt was equally fruitless, and I left the city slightly pained at not being able to leave behind some token or other to show how much I appreciated his kindness during my stay at Khiva.

## CHAPTER XXXIV.

Departure from Khiva.—The Khan's Brother.—His Rumored Intention of visiting St. Petersburg.—Villages.—Goryin.—The Governor of Anca.—Lord Northbrooke.—Herat.—Lahore.—Lucknow.—Calcutta.—Our Soldiers in India.—The Cossacks.—Indian Teas.—An Effeminate-looking Boy.—Partiality of some Russian Officers to these Appendages of Eastern Courts.—The Amu Darya.—Lager.—Three Squadrons picketed out in the Open.—The Telegram from H.R.H. the Duke of Cambridge.—Colonel Ivanoff.—Misunderstanding between Major Wood and Colonel Ivanoff.—Atmosphere of Central Asia, and the Colonel's Memory.—Letter to General Kolpakovsky.—Dinner at Ivanoff's.—Russia and England.—Merve.—If taken, a Strong Fort would be built there.—Roads to Merve.—The Khivans are Quiet People.—Court-martial upon the Turkomans.—Turkistan a Source of Loss to the Exchequer.—Troops at Petro-Alexandrovsk.—Ivanoff would shortly receive his Promotion.—The *Russki Mir* (*Russian World*).—Article on the Large Number of German Officers in the Russian Army.—Marked Antipathy to the Germans.—The New Military System in a Transitory State.—Contempt expressed for Austria.—The Ladies at Petro-Alexandrovsk.

WE left the city by its eastern gate, and presently passed by a building constructed with some regard to taste, and surrounded by a number of large gardens, all separated from each other by low walls. The house belonged to the sovereign's brother, who, it was said, had the intention of visiting St. Petersburg, so as personally to ask the Tzar to withdraw his troops from the khan's dominions.

It was a glorious, bright morning, and one calculated to raise the spirits of myself and party, now very much depressed at hearing that possibly we should have to return to Fort Number One. Little Nazar in particular lamented the idea of a return to the snow-covered steppes, where there was nothing to eat, and said that he had been obliged to take in his leather belt three holes, and that he was only just beginning to fill it out again.

The guide, too, dreaded the rod that might be in pickle for

him at Petro-Alexandrovsk; and I myself was suffering from a bilious attack, brought on either by eating melons, or by the letter of the Russian commandant—bad news affecting one's digestive organs, in my opinion, quite as much as any thing put into the stomach.

The road was now quite uninclosed, and a large tract of fertile country extended on all sides as far as the eye could reach. Presently we passed a small village about twelve versts from Khiva; and twenty-four versts farther on, another village called Goryin, finally halting for the night at Anca. We had marched sixty versts, or forty miles, in six hours, our horses having gone all the time at a slow, steady trot, the camels not reaching our halting-place till eight hours afterward.

Anca is a large town, and has a bazaar and market, which are famous throughout the district. We stopped at the house of the governor, a Khivan, who had been sent by the khan on a mission to Lord Northbrooke four years ago, just before the Russians invaded Khiva, and at the time when the khan thought that an alliance with England would prove beneficial to his country.

The moment our host discovered that I was an Englishman, he squatted at my feet, and asked a hundred questions about India and the natives. He had heard of the Prince of Wales's visit to those regions; and in order to explain to me his own route, and what towns he had passed through on his road to Calcutta, he cut an apple in pieces. Taking one seed, he placed it on the ground, with the remark, "Khiva;" then for Herat he put down a second seed; while for Lahore and Lucknow he cut an apple into two pieces; and for Calcutta he put a large apple on the floor, endeavoring in this way to indicate to me his idea of the relative size and importance of the places which he had visited.

The soldiers in India, in his opinion, were magnificent men, with splendid uniforms; as to the Russian soldiers, they were nothing in comparison; and he spat on the ground by way of showing his contempt for the Cossacks.

"But they have a great many more soldiers than you," he remarked, "and could afford to lose as many men as you have in India, and begin again with double the original force."

“But the Russians like us,” I said. “Their emperor is a man of peace; and many people in my country say that it will be a good thing for India when she has a civilized neighbor on our frontier, instead of the Afghans.”

The Khivan's face swelled with suppressed mirth, which he thought that it would be indecorous to give vent to; but checking his laughter as best he could, he merely said,

“If they like you so much, why do they prevent your goods coming here? Indian teas are either forbidden altogether, or have a prohibitory duty placed upon them; and I have often heard it said that if an Englishman were to go from India to Russia, he would be killed by the Russians, and that they would say we had done it, in order to stir up an ill-feeling against us.”

Presently he left me, and sent his boy, an effeminate-looking lad, who appeared much surprised when I told him in rather gruff tones to return to his master. I was afterward informed by several Russian officers of their partiality to these appendages of Eastern courts. Oriental habits have proved too much for the Tartar blood, which is so largely diffused throughout the Russian race; and where the victors should have set an example to the conquered, the latter have in many instances brought the victors down to their own level. Major Wood, in his book, “The Sea of Aral,” devotes a note expressed in Latin to this subject, and I cordially agree with him in his remarks.

We started early the next morning. We rode across the Amu Darya at a spot about thirteen miles from Anca, and where the stream was nearly two versts wide; the ice being in some places more than a foot thick. Presently we stopped by a Cossack cavalry station, called Lager. Here, in spite of the inclemency of the season, three squadrons were picketed out in the open, the horses having coats like bears, and looking exceedingly well, notwithstanding their exposure to the extreme cold.

We were now approaching Petro-Alexandrovska, and a few dark spots on the distant horizon were pointed out to us as the recently erected fort. The emissary who had brought me the commandant's letter spurred his horse forward, leaving his companion with my party and self. “He has only gone on to say

that you are coming," was the reply to my inquiry, and a few minutes later we rode into Petro-Alexandrovsk. It has been built on the site of a house and garden which formerly belonged to the uncle of the Khan of Khiva, the materials of his house having been used in constructing the wall which has been erected round the fort.

The commandant's house stood in a small open space in the centre of the inclosure, and a flag-staff at one end of the dwelling, and two sentries walking up and down in front of the doors, would have made me aware that this was the house of the chief of the Amu Darya district, even if my guide, who was each moment more alarmed at the possible consequences to himself for his having taken us to Khiva, had not already informed us that here lived the celebrated Colonel Ivanoff.

The commandant was out hunting, so a servant informed me. At that moment a young officer coming up accosted me by my name, and said, "We expected you before this. Come with me. There is a room prepared;" and he led the way to a small building inhabited by some of the officers in the garrison. Here I found several of them congregated in a small room, and was introduced in due form by my newly made acquaintance. I then heard that the telegram which had arrived for me was from H.R.H. the Duke of Cambridge, and that he required my immediate return to European Russia. I subsequently learned from a Russian officer that, although the message was from London, the people most interested in its having been dispatched were at St. Petersburg—Generals Milutin and Kauffmann not at all approving of any Englishman traveling in Central Asia. The document had been waiting for me several days at the fort, and, in the event of my having gone first to Petro-Alexandrovsk, I should never have seen Khiva.

A little later an officer brought a message from Colonel Ivanoff, to say that he had returned from shooting, and was waiting to see me. He is a tall man, considerably over six feet in height, but very thin, and of a German type, his whiskers having a decided Teutonic appearance. I was received by him at first a little stiffly, but his demeanor soon changed, and he began to laugh about my journey.

"Too bad," he said, "letting you get so far, and not allowing you to carry out your undertaking."

"It was lucky," I remarked, "that I did not come here first."

"Yes," said Ivanoff; "when I received the dispatch, and found that you did not arrive, I sent back a special Tartar courier to Fort Number One, to say that you had probably gone on to Bokhara, and thus given us the slip; but we should have caught you there," he continued.

"It is the fortune of war," I said. "Anyhow, I have seen Khiva."

The colonel here winced a little.

"Khiva; that is nothing," he said. "Why, Major Wood, one of your compatriots, an officer in the Engineers, was here last summer: he could have gone to Khiva any day if he liked; indeed, I was a little surprised that he never asked me to let him go there."\*

"Well," I remarked, "as I have to return to European Russia, there can be no objection to my going to St. Petersburg, *via* Tashkent and Western Siberia, or by Krasnovodsk and the Caspian."

"My orders are very strict about this," said the colonel. "You must go back the shortest way through Kasala. But you can write, if you like, to General Kolpakovsky, the officer commanding our troops in Turkistan, and I will send on the letter with the same courier who leaves this afternoon to announce your capture; and then, if you return to Kasala in the course of three or four days' time, you will there receive the general's answer."

---

\* Apparently there was a slight misunderstanding between Major Wood and Colonel Ivanoff on this point, or possibly the atmosphere of Central Asia has somewhat affected the colonel's memory. After my return to London from Khiva, I dined one evening with Major Wood, and asked him why he had not gone to Khiva. His reply was, "I wanted to go there very much: I frequently asked Ivanoff to let me, saying that it was a great nuisance to have come so far, and not be allowed to enter the town; however, Ivanoff replied that he was very sorry, but he could not allow me to do so, as he had received a strict order from General Kauffmann on that subject."

I dined at Ivanoff's that evening, and had the pleasure of making the acquaintance of the officers on his personal staff. They were all of them intelligent men, and, to my surprise, very abstemious, which is indeed a rare quality amidst the officers in European Russia.

We talked for a long time about England and Russia, the general tone of conversation being that England and Russia ought to be on the most friendly terms, but that our interests were so diametrically opposite that it would be impossible, sooner or later, to avoid a collision.

With reference to Merve, the colonel remarked that he could take it at any time, provided his Government would allow him to do so, while he said that the fortress he would then build there would be a great deal stronger than the one at Petro-Alexandrovsk.

"In fact," he added, "there we hardly require a fort. You see it only consists of a low earthen parapet. The Khivans are quiet people; they do not give us any trouble, and they pay their tribute very regularly. The Turkomans, however, are quite another race; they were perpetually quarreling with our Kirghiz. However, a few months since I caught an armed band, which had crossed the Oxus; I ordered two of my captives to be tried by court-martial, and afterward had them hanged. Since then the Turkomans have been very quiet. However, they have got one of my soldiers a prisoner at Merve."

"Have they not tried him by court-martial and hanged him?" I inquired.

"No; but they want me to pay a ransom for him. The fellow has told them that he is an officer. In consequence of this they ask an exorbitant sum; anyhow, I shall not grant it."

"We should have no difficulty whatever in taking Merve,"\*

---

\* The distance from Khiva to Merve is about 430 miles, and the time occupied by a caravan in performing this journey is seventeen days. According to all accounts, troops, if supplied with a camel train, can easily accomplish this march. The only part of the road trying to man and beast is the 170 miles' desert which lies between the Moorghaub and the Oxus, but even here wells are to be found; and the longest interval traversed without water is fifty-six miles. A force dispatched from Khiva to Merve

observed another officer. "People talk of the difficulty of getting there; why, our Cossacks could be at Merve in a week if the Government would only allow us."

"It is too bad," continued a third; "our comrades at Tashkent and Kokan are getting all the rewards and decorations, and here we are doing nothing. When I came to Petro-Alexandrovsk I thought that it would lead to something."

The colonel, it appeared, had risen very rapidly in the service; he was only thirty-two, and now commanded 3000 men, while 1000 of the Cossacks from Uralsk were shortly expected. They would make up the strength of the troops in the Amu Darya division of the Turkistan district to about 4000 strong. The head-quarters were at Petro-Alexandrovsk, while detachments had been stationed at Lager and Nookoos, a small fort about eighty miles from Petro-Alexandrovsk, and on the right bank of the Oxus.

It was said that Ivanoff would shortly receive his promotion, and be made a general, which probably would take place when Kauffmann returned from St. Petersburg.

---

would not have to undergo half the hardship experienced in the route from Kasala to Khiva. Indeed, the Khivans, under Mohammed Rabiss Khan, were able to take Merve; thus showing that even a badly organized Asiatic force can perform the journey. Besides the two caravan roads that lead from Khiva to the capital of the Turkomans, there is a direct caravan track from Bokhara to Merve, by Chardjui, the distance being about 230 miles. This is by far the easiest route. Two days is the longest time that troops would be on the road without finding wells, while caravans go from Bokhara to Merve in thirteen days. A Bokharan army, under Shah Murad, captured this stronghold of the Turkomans in 1850, and destroyed the dam or bend of the river Moorghaub in order to impoverish the country. Where Bokharan troops can go Russian soldiers would have no difficulty in following, and the same force which has captured Samarcand would find little difficulty in overcoming any resistance the badly armed but brave Turkoman hordes might be able to oppose. There is a third route to Merve, which would perhaps be the easiest of all in the event of an advance in that direction. This would be along the line of the Turkoman forts, under the slopes of the Attrek outside Khorassan. This road leads through a fertile and well-watered country, and where some Turkoman tribes have been already gained over to the Russian interests. A Russian line of military operations along the Kurren Dagh would flank Persia in the north, and turn her from the east at Meshed.

A newspaper was brought in later on in the evening. It was the *Russian World*, and it contained an article about the large number of German officers in high position in the Russian army, a number out of all proportion with the population of the Baltic Provinces, as compared with the rest of the empire.

It was easy to see, from the remarks which were freely passed, that not much love was lost between the officers in the garrison and the Germans, Ivanoff himself, in spite of his Teuton appearance, being very anti-Prussian, in which feeling he was joined by almost every officer in the garrison. Indeed, during my journey through Russia, I was struck by the marked hostility shown by all classes to the Austrians and Germans, the conduct of the former power during the Crimean war having left a very bitter feeling behind it, which is strengthened by the supposed antagonistic views of the two governments with reference to Constantinople.

The Russian officers were unanimous in saying that the new military system in Russia was as yet in a state of transition, and that they were not yet prepared for war with so great a power as Germany; the general remark being that if they could only have peace for five more years, that then Russia would be able to show her teeth.

As to Austria, she was spoken of in terms of great contempt, and alluded to as if she only held her place in Europe by reason of the sufferance of the Emperors Alexander and William; the Austrian army being looked down upon by the Russian officers.

However, I can not help thinking that the latter will find out their mistake when the day arrives for them to attempt an invasion of Francis Joseph's dominions. Austria has profited by her defeat at Sadowa. Her officers and men are now as intelligent and capable as those of any army in Europe; while, though her exchequer is at a low ebb, it is really in not so bad a state as that of her neighbor, whose reckless borrowing to pay the interest of former loans is very likely to ultimately produce a national bankruptcy.\*

---

\* The newly acquired territory in Turkistan, owing to bad administra-

There were about thirty ladies in Petro-Alexandrovsk: these were the wives and daughters of the officers in the garrison;

tion, has only added to the Russian debt. I here give some figures with reference to the income and expenditure in that province. As these figures are taken from a Russian source, it may be presumed that they do not overstate the balance against the national exchequer.

## BUDGET OF THE TURKISTAN GOVERNMENT.

Year.	Income in Rubles.	Administrative Expenditure in Rubles.	Balance in Rubles.
1868 ...	1,643,237 .....	620,750 .....	1,022,487
1869 ...	2,205,909 .....	1,229,064 .....	976,845
1870 ...	2,007,837 .....	1,177,125 .....	830,712
1871 ...	2,021,138 .....	1,378,768 .....	642,370
1872 ...	2,019,296 .....	1,695,732 .....	323,564
			<u>3,795,978</u>

MILITARY EXPENDITURE IN THE TURKISTAN GOVERNMENT FOR FIVE YEARS,  
FROM 1868 TO 1872.

	Amount shown in Rubles.
For 1868 .....	4,392,940
“ 1869 .....	4,592,460
“ 1870 .....	6,114,883
“ 1871 .....	6,820,945
“ 1872 .....	7,576,186
	<u>29,497,414</u>
Deduct Balance .....	3,795,978
	<u>25,701,436</u>
Or, at 7 rubles to the pound sterling, a deficit of about .....	£3,671,633

We will now examine more in detail the budget for 1874.

Income in Rubles .....	2,971,889
Add (1) Receipts from Postal Department .....	108,240
“ (2) “ “ Telegraph Department .....	42,000
Balance of previous years, according to estimate of Con- tract Department .....	1,200
Income from all sources .....	<u>3,123,329</u>

Thus—Grand total of expenditure amounts to..... 2,514,157

Deduct 2,514,157 rubles from 3,123,329 rubles.

Balance ..... 609,172

But now we must deduct ordinary military expenditure, which, if gauged by former years, amounts to about 5,000,000 rubles a year.

Deduct 609,172 rubles from 5,000,000 rubles.

Balance ..... 4,390,828

Or about £627,261 excess of expenditure over income.

## CHAPTER XXXV.

The Meet.—Bokharan and Kirghiz Sportsmen.—The Country.—The Chase.—The Falcons.—A Club-house.—A Ball.—The Way of Dancing Quadrilles.—Valses.—A Mazurka.—Theatricals.—Osbaldestone's Feat.—The Davenport Brothers' Trick.—The Khan's Treasurer.—An Envoy from the Emir of Bokhara.—“Who is the Khan in the Moon?”—A Russo-German Scientific Expedition.—A Prussian Officer.—Nazar and Ivanoff's Servants.—Captain Yanusheff.—Shurahan.

THE following morning, after a hurried breakfast, an officer came and informed us that every thing was ready for a start. I now mounted a little bay horse, which, though hardly fourteen hands, danced about beneath me as if he had been carrying a feather-weight jockey for the Cambridgeshire.

There were horses and men of all kinds and shapes—long-legged men on short-legged horses, and short-legged men on giant Turkoman steeds; all the officers being in uniform, while some Bokharan and Kirghiz sportsmen, attired in crimson dressing-gowns, rode in the rear of our cavalcade.

Seven or eight greyhounds were led in couples behind the master of the hunt, a stout colonel, who was said to understand the ways and haunts of timid puss better than any other officer in the garrison; and a stoutly built Khivan who rode a fine-looking chestnut bore upon his elbow a graceful falcon, which, now hooded, was destined later on to play its part in the day's sport.

The Kirghiz made the welkin ring with their yells. Immense excitement prevailed, while all the dogs in the garrison, attracted by the noise and commotion, were collected round the *cortége*.

The hunting-ground was about eight miles distant, and away we rode at a rattling pace; the gallop to cover being considered as part of the day's entertainment.

The country lay open and flat before. There was not an

obstacle to check our course save now and then a dike, some eight feet wide, which the horses took in fair style; the Kirghiz and Bokharans looking back to see how the animal I bestrode would jump with his heavy rider. Never a stumble, however, and the hardy little beast could have carried Daniel Lambert himself, if that worthy but obese gentleman had been resuscitated for the occasion. Now a Bokharan would race by me with a wild cry, and lash a flagging mongrel, which, mingling with our pack, and soon outstripped by his fleeter brethren, had crossed the riders' path.

All of a sudden the master pulled up his panting steed, and, dismounting, told us that we had reached the cover.

A narrow tract of bush and bramble-covered ground was extended right and left of our party, while over the low brushwood was seen a broad crystal streak, like a Venetian mirror set in a frame of frosted silver. The Oxus lay before us, and the flakes of snow which covered the banks and surrounding country marked its breadth from shore to shore.

We now formed one long line, each horseman being twenty yards apart from his fellow, and in this order rode through the reeds and brambles.

Presently a wild shout from a red-gowned Kirghiz announced that a hare had broken cover, and Russians, Cossacks, Kirghiz, and self galloped in pursuit of the startled quarry. Straight at the river went the frightened animal, and after it, in hot pursuit, our heterogeneous pack. Down the bank our horses slid rather than scrambled, and across the river we raced, each man vying with his neighbor. Half a mile from the farther shore lay another dense copse, and it seemed as if the greyhounds would be distanced in the chase.

But the rider who bore the falcon now launched his bird into the air. Another second and the hawk was perched on its victim's back, while the well-trained greyhounds, surrounding their prey, stood open-mouthed, with lolling tongues, not daring to approach the quarry.

The master now galloped up and, dismounting, took possession of the hare, when in a few minutes more we were again in full cry. Five hares eventually rewarded our exertions, and

then, after a headlong burst homeward, I found myself again within the precincts of the fort.

In the evening I went to the assembly-rooms. Here each week a dance is held, but on other days the building is used as a club by the officers of the garrison. A long but narrow room, the wooden floor of which had been brought from European Russia, was arranged for the ball: an adjacent apartment was furnished with a well-spread supper-table, while a quantity of small tables, laden with bottles of the sweetest of Champagne and Bordeaux, were already occupied by some officers.

A brass band belonging to one of the regiments of the garrison was playing an inspiring quadrille; the Russians not dancing it as in England, but each man, first securing chairs for himself and partner, remains seated beside his lady until the moment arrives for them to take their turn in the figure. The last part of the dance, too, is different to any thing ever seen in this country, and London society would find itself singularly puzzled if invited to participate in a Russian quadrille.

Now the musicians struck up a valse, and round went the giddy couples; but the moments of bliss experienced by the cavalier are brief, for he is not allowed to dance the valse through with his partner: after taking one turn she leaves him, and in another instant is whirling round, encircled by the arms of a second cavalier, who in his turn gives way to a third.

Later on a mazaruka was danced, not as we see it in this country, but with stately figures, accompanied by the jingling of spurs, each cavalier stamping lightly with his armed heel, and joining in the cadence of the music; the varied uniforms of the Cossacks and other officers lighting up the room, and making it difficult for me to realize that we were in Central Asia, and in the lately conquered Khivan territory.

I had dispatched a letter to General Kryjinovsky, the Governor-general of Turkistan during Kauffmann's absence from his command; and Colonel Ivanoff now informed me that two officers, with a Cossack escort, were about to march to Kasala. He also said that it would be as well if I were to accompany the party, and receive at Fort Number One the answer to my

request to be permitted to return to St. Petersburg by Tashkent and Western Siberia, instead of by Orenburg.

Some theatricals had been arranged for that evening, with soldiers as actors. After dinner I went with Ivanoff and his staff to witness the performance. The majority of the spectators consisted of Cossacks and Kirghiz. The latter were not able to understand the language of the actors, but eagerly followed their gestures, and were highly delighted with the frequent pistol-shots and clashing of sabres which accompanied each act, the principal character in the piece being a robber chief. The performance ended by his capture and execution, the actor personifying the robber being brought on the stage. This man, who was an acrobat, inserted his feet into the noose of a rope, and was suspended by his heels, the executioner firing off a pistol in the air as a sign of the prisoner's dissolution. A plate was on a table by the door, and each officer on leaving put in a few rubles to reward the performers for their trouble.

I had a conversation with the colonel the next evening about the respective merits of the Kirghiz and English horses; and I left the good-natured officer in considerable doubt as to my veracity, neither his staff nor himself being able to believe that any English horse had ever jumped thirty-six feet in breadth; while Osbaldestone's feat of riding 200 miles in eight hours and a half was in their eyes nothing in comparison to the leap above mentioned.

People in Central Asia can not be supposed to be so *au fait* with what goes on in the world as we denizens of the West, and I eventually succeeded in obtaining a certain amount of credence, by saying that no one in the room could tie me with a rope in such a manner that I could not free myself. An artillery officer now stepped forward, and wished my assertion to be put to the proof. This was done, and the result disconcerted the audience, as the time I took in escaping from my bonds was not half so long as the officer had taken in tying me.

The following morning the khan's treasurer arrived, bringing with him several thousand rubles as an installment of the war indemnity. He breakfasted with Ivanoff, and managed to eat

his food with a knife and fork, though the management of the latter article appeared to give him a good deal of trouble.

In spite of his Mussulman creed, the treasurer had a taste for Champagne, which his sovereign also appreciates. A few dozens of this wine are frequently sent to Khiva from the fort, the scruples of the khan having been allayed by the information that Champagne was not known to the prophet, and that consequently he could not have laid down any law prohibiting its use.

Shortly before the arrival of the treasurer, an envoy from the Emir of Bokhara had been at Petro-Alexandrovsk. There had been a misunderstanding about some nomad Kirghiz, who, it was said, used to cross the frontier and enter Bokharan territory when the Russian officials were about to collect the taxes. Some correspondence on this subject had ensued between the Emir and General Kauffmann. The former, by all accounts, was not a very enlightened ruler, and it was said of him that on one occasion he sent to a Russian officer, who had been seen looking at the moon through a telescope, and inquired what it was he could see there. "Mountains and extinct volcanoes," was the answer. "Dear me," said the Emir, "how very curious! Pray who is the khan in the moon? I should like to make his acquaintance."

While talking about Bokhara, an officer remarked that a Russian and German scientific expedition was about to visit that city, and subsequently survey the country between Samarcand and Peshawur; a railway to Central Asia being absolutely necessary for the purpose of quickly concentrating troops, should it be required. "To our next meeting," suddenly observed a young officer, pledging me in a glass of Champagne. "Where will it be?" "Who knows?" said another; "I suppose, sooner or later, we shall meet on the battle-field." In fact, almost every officer I met in Central Asia was of opinion that ere long a collision would take place between themselves and our troops in India, the general remark being, "It is a great pity; but our interests clash, and though capital friends as individuals, the question as to who is to be master in the East must soon be decided by the sword."

In spite of General Kauffmann's dislike to foreigners traveling in Turkistan, a Prussian officer had been permitted to enter a Russian regiment, and was serving at Petro-Alexandrovsch. He had been all through the Franco-German war, where he had distinguished himself. Subsequently, however, to this, he persuaded one of the Tzar's German relatives to ask the emperor to give him a commission in a regiment in Turkistan. In the course of conversation, I found that he had been educated at the same establishment as myself in Germany, and consequently knew several of my friends. The Russian officers spoke very highly of his military capacity, though many of them remarked that it was a great mistake allowing him to serve with them, as he would know too much, should war break out between Germany and themselves, when, of course, he would return to the fatherland. It must at first have been somewhat disagreeable for this young German officer, being thus thrown in constant contact with a body of officers who, to a man, detested his nationality.

I was now busy with Nazar making preparations for our return march to Orenburg, and laying in a supply of provisions for the journey. I had purchased two dozen pheasants, these birds being found in great profusion in Khiva, where they can be bought for fivepence each.

My little Tartar had a doleful expression on his countenance, and on inquiry I found that he was living with Ivanoff's soldier-servants, and that they sold their own rations and lived principally upon fish, which could be purchased for a mere song at Petro. Nazar had found that this diet did not agree with him. He was too stingy to spend some extra money I had allowed him as board-wages, and preferred to mess at the expense of the servants, the latter protecting themselves by sometimes not letting him know the dinner-hour, and only calling him when nothing was left of their repast save bones.

"Look here!" said my servant, "I'm a skeleton."

"Why do you not buy something with your board-wages?" I inquired.

"Buy!" he replied, much surprised at my question. "I'm not such a fool as to buy so long as I can get any thing to eat

without paying for it; but they are greedy, those dogs of servants, sons of animals that they are!" and the little man walked away, not at all pleased with the hospitality of his *confrères* in the kitchen.

I was now introduced to the two officers who were to accompany me to Fort Number One. One of these, Captain Yanusheff, was an artillery officer, who had distinguished himself in the Khivan expedition, and he now commanded the entire artillery force in the Amu Darya district. He was going to Kasala to buy some remount horses from the Kirghiz. His companion was a Cossack saül, or captain; he was returning to Tashkent to join his squadron. These two officers would take with them an escort of ten Cossacks, and the start was arranged for the following morning. The weather had become much warmer; indeed, when that afternoon we rode over to Shurahan, a Khivan town which has been annexed to Russia, our road lay no longer over snow, but over sand, while according to all accounts the ice on the Oxus would soon begin to melt. My companions, who did not fancy a ride to Kasala, determined to take advantage of this change in the weather, and travel in a tarantass drawn by horses, until they arrived at a place where snow had fallen; the horses could then be sent back, and camels harnessed in their stead.

## CHAPTER XXXVI.

The Tarantass.—The Last Adieux.—A Night in the Cold.—The Cossacks: their Arms, Weight, etc.—How they Bivouac.—The Emir of Bokhara.—The Sentry.—His Punishment.—Whipping the Camel-driver.—The Kirghiz Postman.—A Kirghiz Chapel.—A Race back to Kasala.—Three Hundred and Fifty-nine Miles in Nine Days and Two Hours.—A Duel.—Mutiny of the Uralsk Cossacks.—The Tzarevitch.—The Cross of St. George.—A Re-enforcement of 10,000 Men from Orenburg.

OUR start the following morning was a curious sight to witness. First came the tarantass, an extraordinary vehicle, peculiar to Russia. It resembled a hansom-cab without the wheels, and the carriage then fastened in a brewer's dray. There were no springs of any kind to prevent jolting, while some small but very solid wooden wheels supported the body of the cart. Harness, made of cables, was attached to six Kirghiz horses, whose united efforts could barely move the vehicle more than five miles an hour. Several officers of the garrison accompanied their comrades for a mile or so, and then wished them "godspeed" on their journey, which, in spite of the change in the weather, was looked upon as any thing but a light undertaking. Soon after leaving the fort we came to a large village. Here we found several ladies; among others, the wife of the artillery officer, who had come to say farewell to her husband. Champagne and bottles of vodki were lying on the ground, and a bonfire had been lighted, by which the ladies sat warming their feet.

The last adieux had been said. Yanusheff had torn himself away from his fond surroundings, and we were once more *en route*. In a few hours or so we came again upon the snow. It covered the ground so thickly that the horses in the tarantass had to be taken out, and a couple of camels harnessed in their place.

In the mean time I had ridden on with my guide and Nazar.

Presently we halted by the ruins of an old castle, which had been built by one of the khan's ancestors to defend his country against a Russian invasion.

After waiting some time for the tarantass, which did not arrive, we continued the journey, hoping to encounter our baggage camels, which had been sent forward the previous day with the Cossacks. After marching for another hour, we stopped at a well about forty miles from Petro-Alexandrovsk. It was bitterly cold; there was a great deal of wind, nothing to eat, and, what was worse, the brambles and brush-wood were too damp to make a fire. "What had become of our baggage camels?" was the question each man put to his neighbor; "had we passed them in the dark, or were they still in front of us?"

It was useless going on or going back, and the only thing to do was to sit it out, and persuade ourselves that we were neither cold nor hungry. Imagination is a wonderful thing, but it has its limits, and the more I tried to persuade myself that I had just dined, the more I thought of the flesh-pots of Egypt and all their accompaniments, while visions of turtle-soup and Champagne came floating up before me, and stimulating afresh the keen rage of a ravenous appetite. The guide cursed his fate, and, to cheer up his spirits, commenced singing a ditty about the beauties of a sheep and the delights of roast mutton. However, the night sped by, and, lying down on the snow, we got what sleep we could, till at day-break we were joined by the officers in the tarantass.

My fellow-travelers, who had slept in the carriage, and were provided with thick furs, had passed the night a little less uncomfortably than ourselves, although they too cursed the cold in no very measured terms.

Soon afterward we came up with the Cossacks and baggage camels, the escort having bivouacked a few versts beyond the well.\*

---

\* Captain Petto, of the Russian service, in his work, "Steppe Campaigns," gives us the following information about a Cossack bivouac: "In the presence of the enemy a detachment ordinarily bivouacs behind a wagon barricade; but if the transport be small, and the place selected for the bivouac offers one of its sides to a river, ravine, or other obstacle which

The artillery captain ordered his driver to stop, and, getting out of the vehicle, proposed that we should have breakfast.

Presently he produced from the boot in the tarantass a square tin box, with a large cork inserted in one of its sides. The

---

is secure from an unexpected attack, the wagon barricade may, in order to gain internal space, be arranged in the shape of a lunette, with its open side toward the natural obstacle. On the other hand, if the train be large, it is preferable to form a square, the carts being in several rows, and sufficient room being given for the reception of the horses, not losing sight of the possibility of bringing a fire to bear upon the enemy from behind the carts. The length of each face of the square should be in proportion to the number of men defending it. The angular spaces are filled with bales, or occupied with guns. The troops are ordinarily distributed parallel to the faces of the wagon barricade, and at such distances apart that between them and the inner row of carts in rear there may be sufficient space, in the event of attack, for bringing up artillery and reserves. The men's kits are heaped up in rear of their own particular section, and behind them are piled their rifles. The Cossack horse-lines are in rear of the line of the bivouac, and behind them, in the centre of the barricade, are the staff, the artillery park, the engineer and hospital trains, the sutlers, and, lastly, if there is room, the drivers with their horses and camels in a separate square. By day, it is necessary to take advantage of any opportunity of sending out the animals to pasture; but they should be again brought into camp at twilight, and, if possible, placed within the barricade—the camels near one of the faces most removed from attack, and the horses in the horse-lines, and hobbled. For the defense of a camp, both by day and night, it is necessary to throw out a chain of dismounted posts. These posts furnished from the Cossacks are called mayaks (signaling stations). Each mayak consists of three men: one of them always remains mounted, while the other two rest: they go separately to water, to get grass, etc. At night the camp should be surrounded with a chain of sentries, and the detachment should be on the *qui vive*, as the robbers often make a dash at the camp, and, taking advantage of the commotion which ensues, endeavor to carry off the camels and horses, or to seize any thing they can. In former times the detached Cossack posts, pickets, and small forts along the Siberian line protected themselves by throwing out sentries on commanding eminences, and at night by patrols; but, owing to the small number of men and the frequent alarms, the outpost service was so fatiguing that the Cossacks had recourse to the use of dogs. These dogs were exceedingly watchful, and at the smallest noise barked and roused the Cossacks. This custom was probably brought from the Caucasus—in fact, from the shores of the Black Sea, where the employment of dogs was in general use, and where these animals were regularly rationed and trained.

vessel contained about four gallons of the strongest vodki. He then took a beaker, which held about half a pint, and called out, “Children, come here!”

The Cossacks, who were looking on at the operation with great interest, ran up, and my companion, filling the measure, gave each man in turn a dram: this the soldiers tossed off at one gulp, and then returned to their horses. I tasted some of the vodki, which was more like liquid fire than any thing else to which it can be likened, and spirits of wine or naphtha would have been a cooling draught in comparison. However, the artillery captain had no intention of testing the strength of the Cossack’s fire-water. His servant, bringing up some bottles of Madeira, and vodki of another quality, poured us out a less potent stimulant, which, in the keen air we were then breathing, was not unpalatable, though in England two or three glasses of the mixture would have put most men under the table.

The Cossacks were fine, well-built fellows, averaging about eleven stone in weight, their marching weight\* being over

---

\* Captain Petto’s observations about the size and requirements of a steppe train may not be uninteresting to military readers. This officer remarks: “The amount of train in a steppe campaign depends on the quantity of provisions and other requisites which have to be carried by the expeditionary force. The following are the chief articles to be carried: Food, forage, horse equipment, officers’ and soldiers’ baggage, medicines and hospital stores, felt tents, and camp equipage. The proportion of this equipage for a company of 170 men is as follows: Six cast-iron boilers with lids, two white-metal dram-cups, seven water-vessels, seven pounds of pepper, four pounds and a half of laurel-leaves, 100 pounds of leaf-tobacco, nine bottles essence of vinegar, 100 pounds of onions, ten pounds of garlic, ten pounds of horse-radish, ten pounds of soap, 200 pounds of salt, three wooden troughs, five scythes, 120 mats, 300 fathoms rope, three hatchets, three spades, three picks, seven shovels, two white-metal mugs, one eight-gallon cask, three wooden shovels, one net, one iron pail, and 170 wooden tea-cups. The weight of this is from 1200 to 1600 pounds. Sometimes we have had to carry with us such things as wood field-forges, bridging material, portable wells, guns on pack animals, and finally a number of spare horses or camels, in case of forming sick convoys, flying detachments, or for carrying convalescents, etc. From this list of necessaries it is plain that the train of a steppe detachment must be very numerous. In European warfare one cart ordinarily suffices for forty or fifty men; in steppe campaigns it is otherwise: every two or three men must have an

eighteen stone, this including twenty pounds of barley for their horses (barley being preferred to oats in these parts), and six

---

animal, and sometimes more. If we suppose, for example, a Cossack sotnia (150 men) taking the field with a month's supplies, then, according to calculation, it will require about eighty camels, without counting officers' baggage, carts for the transport of military stores, the sick, etc. This is the reason that military detachments marching in the steppe are nothing else but an escort to their own numerous trains. Napoleon's campaign in Egypt, where the transport organized by him was on so reduced a scale that every thing could be placed within a small infantry square, can not serve us as a precedent, because the French were able to transport their food and other stores by the Nile. The same must be remarked respecting the later expeditions in Algeria, where the French had seldom to proceed more than two or three marches from their store dépôts; but even in this case, according to the observations of Marshal Bugeaud, there were often more than 1000 different sorts of animals with a column consisting of 5000 men under arms. In the steppes the smallest train, as we know, was that at the time of the Khivan campaign of Prince Bekovitch Tcherkassky, when there was a camel to every two men; the greatest was in the winter of 1839, in General Perovsky's expedition, when every man had two camels, and every two men approximately had a three-horse cart. The English train in the East Indies and in Afghanistan was still more numerous. Suffice it to say that, according to the returns, the train of each battalion of infantry is fixed in time of peace at 1200 mules and 600 mule-drivers. In the field these numbers are still further increased. The reason why such vast crowds of servants and immense trains follow in the wake of a detachment, where every elephant, every horse, every camel, and every bullock has his attendant, is partly due to the climate, so baneful for Europeans, and still more to the Oriental habits which effeminate the troops. Even the common soldiers had their servants, and thus, in the words of an Englishman, the military camp was turned into a motley show. Similar license led to pernicious consequences for the English during their second expedition to Afghanistan in the winter of 1841, when the detachment of 4000 men under General Elphinstone was forced to retreat; the train following in rear numbered 12000 men. This unarmed, dissolute, and most demoralized mob quickly fell into complete disorder, enabling the Afghans to surround the English detachment and destroy it, so that of the 16,000 or 17,000 men only one Englishman, thanks to the rapidity of his horse, succeeded in reaching the fortress of Jelalabad. Consequently, in the Abyssinian campaign, in 1867, the English deemed it necessary to limit the baggage of each officer to eighty pounds, and that of each soldier to twenty pounds, including bedding. The result was to reduce the ordinary number of mules per battalion from 1200 to 187, and 100 drivers. But with all this, the train of the expeditionary force numbered 20,000 various

pounds of biscuits, a sufficient ration for a man for four days. For arms they carried short breech-loading rifles and swords, while they were shortly to be supplied with the Berdan carbine, which is spoken of very highly by the Russian officers.

The Cossacks do not receive much pay—about four shillings

---

animals. For carrying the baggage in steppe campaigns we use pack animals, two-horse or one-horse carts, and, lastly, bullock transport. The baggage is so arranged that each pair-horse or pair-bullock cart has not more than 1400 pounds, each one-horse 700 pounds, each camel-load 680 pounds. The quantity of carts or camels, and consequently the size of the train, is calculated for each unit. Assuming the company of infantry at 200 men, inclusive of servants, non-combatants, and officers, it requires for one month 12,480 pounds of biscuit (net weight), 2080 pounds of groats (net), in lieu of five-sixths of the monthly allowance of spirit, sixty pounds of tea, and 180 pounds of sugar, and five gallons and a half of spirits, weighing eighty pounds; oats for the draught horses, 600 pounds; fifteen kibitkas, being ten per company, two for sick, three for officers, each weighing 260 pounds, equal to 3900 pounds; felts for bedding (ten pounds to twelve pounds), camp equipage and antiscorbutic stores, 1200 pounds to 2000 pounds; men's kits, at sixty pounds, 12,000 pounds; ammunition, 2000 pounds; in all, about sixteen tons. If this amount of baggage be placed in one-horse carts, 1000 pounds in each, thirty-six carts will be required. Of this number, for food alone (six tons and a half) fifteen carts; and as the detachments are never sent for less than two months, fifty carts will be required. To this number we must add three or four additional carts for the apothecaries' medicines and sick on the march; in all, say fifty-six carts. For this load there ought to be sixty-five camels (each at 560 pounds), allowing one spare camel for every seven or ten camels. The sotnias of Cossacks have no special carts for their baggage, but carry it with the forage: the number of carts which they require is much greater than for a company. For a Cossack sotnia, consisting of 145 men and three officers, 148 riding and fourteen pack horses, much more transport is required than for a company. The food for the men, and barley or oats (eight quarts and a half daily) for the horses, amount in two months to 120,000 pounds, without the sacks. The other baggage is not great—ten or eleven kibitkas; seven for the Cossacks, three for officers, and one for sick, equal to 2600 pounds, and two or three carts for the apothecary, medicine, and sick. On this computation, the number of carts necessary for a sotnia for two months, including sacks and coverings, will amount to 130 or 135. Of camels for the same period, leaving five carts, there would be required about 200 (each carrying 640 pounds), to which must be added about thirty spare. If hay has to be carried, a considerable addition must be made to the transport."

every third of a year, or a shilling a month, being all a man has for pocket-money. However, they are well fed and clothed. The daily ration is two and a half pounds of flour and one pound of meat; one hundred soldiers receiving one pound of tea and three pounds of sugar per diem, while each man is credited with half a copeck a day for vegetables. His horse, uniform, arms, etc., are his own property, or the property of the district which has equipped him and sent him forth to fight for the White Tzar. He receives about two pounds fifteen shillings a year from the State, and is obliged to keep his kit in repair with this sum, which the military authorities say is sufficient for the purpose, although the soldiers are of a different opinion.

These data were given me by the artillery captain, who, leaving his companion asleep in the tarantass, occasionally stretched his legs by walking a few versts over the snow. He had seen a good deal of service in Turkistan, and expected very shortly to obtain his promotion. Among other things, he told me that when Russia was at war with Bokhara, a Cossack officer was taken prisoner. The Emir sent for him, and asked if he could make powder. He said, "Yes, but not for them." On their asking why, he declared that it was manufactured with brandy and pigs' fat, and that this made the powder so strong. "The Emir," continued my companion, "regards the Sultan with feelings of the greatest veneration, and has the honorary title of Grand Officer to the Porte. He used to look upon England as the first nation in the world; but he is beginning to fear us now, and he believes more in our troops, who are close at hand, than in those of the Sultan at Stamboul."

It was getting late, and Yanusheff gave strict orders to the sentry who was posted over the horses to awake him an hour after midnight. The man, however, neglected his duty, and was punished by having to walk the whole of the next day and lead his horse, the culprit being much laughed at by the other Cossacks, who look down upon all foot-soldiers with supreme contempt.

It was a picturesque sight, the march from this encampment. First, the Cossacks, the barrels of their carbines gleaming in

the moonlight, the vashlik of a conical shape, surmounting each man's low cap, and giving a ghastly appearance to the riders, the distorted shadows reflected on the snow beneath, and appearing like a detachment of gigantic phantoms pursuing our little force. Then the tarantass, drawn by two huge camels, which slowly plowed their way through the heavy track, the driver nodding on his box but half awake, the two officers in the arms of Morpheus inside, and the heavy wood-work creaking at each stride of the enormous quadrupeds. In the wake of this vehicle strode the baggage camels, the officers' servants fast asleep on the backs of their animals, one man lying with his face to the tail, and snoring hard in spite of the continued movement; another fellow lay stretched across his saddle, apparently a good deal the worse for drink: he shouted out at intervals the strains of a Bacchanalian ditty. Nazar, who was always hungry, could be seen walking in the rear. He had kept back a bone from the evening meal, and was gnawing it like a dog, his strong jaws snapping as they closed on the fibrous mutton.

I generally remained by our bivouac fire an hour or so after the rest of the party had marched, and, seated by the side of the glowing embers, watched the caravan as it vanished slowly in the distance.

My guide was utterly crest-fallen; he had been severely reprimanded at the fort for taking me to Khiva, and was now kept in such order by the Cossacks that his usual air of importance had entirely disappeared.

Yanusheff had already given his camel-driver an idea of discipline. The man had been very dilatory in saddling the camels. My companion, observing this, called a Cossack, and ordered him to beat the refractory individual. Seeing, however, that the whipping was not sufficiently severe, the captain took the knout from him, and with his own hand administered the chastisement, at the same time telling the soldier that if this occurred again he should order him to be beaten by his own comrades for not carrying out orders properly.

We now arrived at a spot on the road where the snow was so deep that the camels were unable to draw the vehicle: in

this dilemma the Cossacks proved useful; for, attaching some lassoes to the tarantass, and spurring their horses, they succeeded in dragging it slowly forward. At this place we met a Kirghiz who was taking the post to Petro-Alexandrovsk. He rode one horse and led another, carrying his letters, food, and forage on the spare animal. The man, however, would change his horses every two or three hours, and expected to arrive at Petro-Alexandrovsk in about ten days from the time he had left Perovsky—the next fort the Russians hold on the Orenburg and Tashkent line, after passing Kasala.

On the following day we rode by an old Kirghiz chapel, built in memory of some celebrated warrior. It was used in summer-time for praying, and in winter as a sheep-pen, the Kirghiz being indifferent about such matters. Finally we arrived at a landmark known as being seventeen miles from Kasala.

Yanusheff and I now determined to let the camels follow us, and to gallop on ourselves ahead of the caravan. The Cossack officer resolved to do the same. My companions selected the best horses they could find from amidst the escort, at the same time ordering the dismounted Cossacks to ride the camels. The snow still slightly covered the ground, but not enough to stop our animals, which, probably knowing that they were close to home, raced against each other the whole way, when we galloped across the Syr Darya and pulled up at Morozoff's hostelry at twelve o'clock midday, February 12th.

We had ridden 536 versts, or 357 miles, in exactly nine days and two hours, thus averaging about thirty-nine miles a day! At the same time, it must be remembered that, with an interval of in all not more than nine days' rest, my horse had previously carried me 500 miles. In London, judging by his size, he would have been put down as a Polo pony. In spite of the twenty stone he carried, he had never been either sick or lame during the journey, and had galloped the last seventeen miles through the snow to Kasala in one hour and twenty-five minutes.

A room was unoccupied at the inn. It was not a very luxurious apartment, the furniture consisting of a rickety table, a

few chairs, and a wooden sofa or divan; however, it was like Mohammed's seventh heaven, after the steppes.

A young officer who was residing at the inn now entered the room, and told me all that occurred since my departure. There had been a duel, in which several officers had participated, and he had been under arrest in consequence.

An *émeute* had taken place among the Uralsk Cossacks. It appeared that the two thousand exiles had become very discontented at the way in which they had been treated, and from grumbling had proceeded to threats: some of them had been overheard, and it was said that a few of the malcontents had expressed a wish to cut the throats of all the officers in the fort. As the Uralsk Cossacks outnumbered the garrison, and the officers slept in private lodgings, and not in barracks, it was perfectly possible that the exiles might be able to carry their threat into execution. For several nights each officer had a guard stationed round his quarters. The district governor had reported the affair to the governor-general at Tashkent. The latter officer had dispatched one of his subordinate generals, with full powers of life and death, to investigate the matter, and reports said that several of the malcontents were to be shot.

Among the many rumors which were rife at Kasala, was one to the effect that the Tzarevitch would probably visit Tashkent in the course of the summer, when he would perhaps join in an expedition to be dispatched against Kashgar. It was remarked that a campaign against Yakoob Bek would afford the prince a capital opportunity for winning his Cross of St. George, a military order which must be won on the field of battle, and which the Tzar wears.

In confirmation of the rumors of a summer campaign, it was stated that a division of 10,000 men from the Orenburg district was now on the march to Tashkent. This was a source of annoyance to some of the officers in Turkistan, who did not like the idea of the field for gaining crosses and promotion being too much enlarged. In their opinion, the forces then in Central Asia were ample for any that might be dispatched against Yakoob Bek.

## CHAPTER XXXVII.

The District Governor.—A Cossack Colonel's Funeral.—The Island in the Sea of Aral.—How to join the Amu Darya and Syr Darya Rivers.—My Quarters in Morozoff's Inn.—Letter from General Kolpakovsky.—Changing Money.—English Sovereigns.—Sale of Horses.—A Jew and a Greek.—Sympathy between the Russians and the Greeks.—A Rich Young Kirghiz Widow.—Love-making through a Third Party.—A Boy-husband.—Cossacks marching from Orenburg.—Nazar's Father-in-law.—The Commander of the Battery.—Dispatches sent from Tashkent to St. Petersburg in Twelve Days.—A Fat Goose.

I now called upon the district governor, and found him at home, surrounded by a bevy of officers in full uniform. He told me that a Cossack colonel had recently died of consumption, and that the funeral ceremony was then going on inside the church. The men of the regiment were all mounted, and drawn up facing the holy edifice. The cold was very great, and the troops had every facility afforded them for sowing the seeds of their colonel's malady. Indeed, the frost was so severe that the district governor and his friends had found it inconvenient to remain inside the church, and had returned to drink tea at home, until such time as the service was concluded.

Among the guests was a naval officer who had frequently cruised in the Sea of Aral: he said that there was an island in it which was forty miles round, and that no fresh water could be discovered, although antelopes and foxes abounded. Some sheep had been turned out on the island a year previous, but since that time no one had seen them; while, according to my informant, there were hardly any rocks in the Sea of Aral, and navigation was not at all dangerous.

The possibility of gaining the Amu Darya and Syr Darya by means of the Jana Darya was next discussed; but most of the officers seemed to think that in this case there would be too little water left in the Syr Darya for the steamers to pass from Orenburg to Tashkent.

When I had the opportunity of speaking privately to the governor, I inquired if he had received any communication with reference to the letter which I had dispatched from Petro-Alexandrovsk to the commander-in-chief at Tashkent, in which letter I had asked to be allowed to return to European Russia *via* Western Siberia. However, the Fates were unpropitious; no reply had been sent, and I had to return to the inn without any knowledge as to what would be my next movements.

My quarters at Morozoff's were not quite what a Sybarite would have selected, unless, like myself, he had been confined to Hobson's choice. The pipes of the stove were out of order, and when heated there was an escape of charcoal-gas into the room I inhabited, a frightful headache being the consequence. If, on the contrary, I desired the servant not to light the stove, furs had to be worn day and night to keep out the cold.

The waiter was the most phlegmatic of his species. When I complained of the gas, he never moved a muscle of his countenance, but simply observed, "One of noble birth, at Morozoff's it is always so;" and if I upbraided him on account of the cold, he returned a similar answer.

Yanusheff now came to say good-bye. He had not been able to find any good artillery horses at Kasala. He intended to start the following morning for a large village in the neighborhood of Perovsky, and visit the sultan of the district, a Kirghiz chief, who owned 1500 horses.

Yanusheff was going to dine out on that evening; and as he had a large sum of money which he had brought to purchase the necessary animals, and did not care to carry it about with him, he asked me to take care of his rubles until he returned from dinner. I could not help remarking that he was placing a singular amount of confidence in a stranger, particularly as there were several Russian officers at the inn; but I agreed to take charge of the money, as he said he preferred leaving it in my care. The following morning I saw my fellow-traveler for a moment, and returned him the packet. He was in his sleigh, *en route* for Perovsky, and we cordially shook hands. I parted from him with regret: he was an agreeable companion, besides being a well-read and highly intelligent man.

A little later in the day I received a letter from General Kolpakovsky. It was to this effect: that as I had received orders to return immediately to European Russia, he could not sanction my proposed journey *via* Tashkent and Western Siberia, for this would not be the shortest route; and that the permission which I had received from General Milutin to travel in Russian Asia had been canceled. Presuming that the reasons given would convince me of the necessity of my immediate return to European Russia by the postal road to Orenburg, he asked me to believe in his complete respect, and had the honor of being, etc., etc. The letter was very conclusive, and there was nothing to be done save to pack up my traps, order horses, and start for Orenburg.

The district governor now called; he had also received a letter insisting on my immediate departure from Kasala. Although it was a holiday, and all the official departments were closed, he said that he would at once send to get me a *podrojnaya* (a road pass).

I wanted to change some gold before I started on my journey. A Bokharan offered to take a few of the Russian half-imperial pieces, but on looking at them he refused to give the same value for all the coins, as some of them were three and four years old, and this, in his opinion, deteriorated their value. I eventually disposed of my half-imperials, and also of a few English sovereigns, to the district governor. These were looked upon as a curiosity by the Russian officers in Central Asia, and whenever it became known that I possessed some, every body was eager to change them for me.

The sleigh was packed; the horses were prancing at the door; I had paid my bill, and sold my horses, etc. My little black had not been a dear purchase. I bought him for forty rubles (about five pounds), and had sold him for three pounds ten shillings. He had carried me over 900 miles, and I had no reason to complain of my bargain.

Getting into the coffin-like sleigh, I said farewell to my friends. A wild huzza from the Tartar driver to stimulate his horses, accompanied by a stinging reminder from his whip, and we were off.

Later on I met a Jew and a Greek, who were going to Tashkent. The latter, when I inquired how he had obtained permission to travel in Central Asia, told me that on arriving in Russia he had a Greek passport, but after a little while he managed to procure a Russian one, and was then permitted to cross the Ural. The Jew was a Russian subject, so of course no difficulties had been thrown in his way.

There is a great deal of sympathy between the Russians and Greeks, probably owing to the hatred these powers bear the Porte, and to their similarity in religion. The character of the inhabitants of both these countries is also strongly marked with Oriental peculiarities, the Russian being of a highly suspicious nature. The Greek is equally suspicious, but he has more brains, and is sure to get the best of the Muscovite in a bargain.

On arriving at another station, the inspector informed me that a rich young Kirghiz widow was in the waiting-room. He wished to know whether I had any objection to her presence, as some Russian travelers disliked the natives sharing the same apartment with them. To this I replied by sending the lady a formal invitation through Nazar, who was desired to say that an English traveler had heard of her presence in the station, and hoped that she would drink tea with him.

Nazar departed with a broad grin on his countenance, this attention on my part to the young widow of the steppes striking him as rather remarkable. "One of noble blood," he remarked, as he quitted the room, "you can not marry her; she is of a different religion." Presently he returned, leading in a decidedly good-looking and prepossessing girl, apparently about eighteen years of age. She was clad in a long gray dressing-gown, her tiny feet being incased in Chinese slippers; and her head covered with many yards of white silk, worn in the form of a turban.

On my offering her a chair, she sat down, and by the means of Nazar we speedily commenced a conversation.

There are a good many ways of telling a woman she is pretty, but it is always difficult to do so through a third party; and the compliments which I paid her in Russian I have no

doubt lost considerably in being translated into Tartar, though Nazar assured me that the expressions he selected were the most poetical with which he was acquainted.

As, however, his ideas of poetry were, like my late guide's, limited to songs about the beauty of a sheep and the delights of roast mutton, I fear that when he was desired to tell her that she was the most beautiful of her sex, Nazar translated it as follows:

“He says ‘that thou art lovelier than a sheep with a fat tail’” (this appendage being a great delicacy among the Tartars); “that thy face is the roundest in the flock; and that thy breath is sweeter to him than many pieces of mutton roasted over bright embers.”

On Nazar informing her that I was not married, she was a little astonished, and then observed that she was not married, but would be so in two years' time.

It appeared that, according to the laws of her tribe, she must become the wife of her late husband's brother. The latter was only twelve years of age, and she would have to wait till the boy was fourteen before the marriage could take place. The lady did not much like the idea of so young a husband, and was curious to know how widows managed in my country, being very much surprised when I told her that they chose for themselves.

A few hours sped away very agreeably as I was chatting with the fair widow, when her future husband, a chubby-faced lad, entered the room, and announced that the camels were ready, and that it was time for them to start for their aúl.

On receiving this information, she gave the boy a sharp stroke across the shoulder, but left the room; and the future husband will doubtless get many a whipping from her previous to their marriage, which he will probably pay back with interest at some later period.

On nearing Orsk, I learned from an inspector that 800 Cosacks had already left Orenburg, and were on their way to Tashkent, and he added that he had received orders to have some kibitkas pitched for them close to the station-house. Many more battalions would shortly follow, and they would have

been at Orsk before if it had not been for the weather, which this winter had been more severe than he ever remembered to have experienced, several Tartar drivers having been frozen to death.

Nazar now informed me that his wife lived at a small village a few miles from Orenburg, with her father; and, as my little Tartar was very eager to see his lady, I promised to halt there for the night. We drove up to his house about 12 P.M. The inmates, who were not aware of Nazar's return, had all gone to sleep. My follower tried the door; it was bolted; then he hammered against the portals.

After about five minutes thus spent waiting in the cold, his father-in-law came out, and, hearing that I had arrived, asked me to sleep there for the night. In the mean time, Nazar's wife, who was a good deal taller than himself, had got up, and was welcoming her husband. On looking around me, I found that only one room was well warmed, and that the others had no stoves. The bedroom was occupied by Nazar's father-in-law, his wife, their daughter, and two other children. Nazar would sleep with them. I felt that my presence might be slightly *de trop*, although Tartars, as a rule, are not particular about privacy. The apartment was in a filthy state; and thousands of cockroaches were crawling about on some wooden platforms, which served as beds for the family.

The room did not offer any attractions, so I determined to leave my servant and drive on to the next station. This was filled with travelers. The commander of a battery, and a surgeon of artillery, with their families, occupied all the available space; so the inspector took me to his own quarters, where his wife was sleeping, the woman looking up with a smile as I entered, not being at all disconcerted by the presence of a stranger.

In the morning I made the acquaintance of the commander of the battery and his wife; they were traveling in a large sleigh, and were many versts in front of the troops. The commander had occasionally carried dispatches from Tashkent to St. Petersburg, and on one occasion he performed the journey in twelve days. He remarked that he could post from Tash-

kent to Samarcand in one day and a quarter, and could be in Bokhara in five days after leaving Tashkent.

Nazar now arrived with his father-in-law, the latter bringing a fat goose, which he laid down at my feet. Nazar informed me that this was his way of showing respect, remarking that it was a fat bird, and that he would eat it if I did not. The father-in-law could speak a little Russian, and inquired about Nazar's moral behavior during his journey, patting the little Tartar on the back when I said that his conduct had been most exemplary, and that to the best of my belief he had not brought back a Khivan lady.

Not far from this station we met two companies of infantry on the march to Tashkent. They were all in sleighs, some drawn by camels, others by horses, five and six men being in each vehicle. The troops were being hurried on as rapidly as possible. The men seemed to be young and healthy, and were singing in chorus to pass away the tedious hours. Later on, when passing through a village, we encountered more soldiers, several of them much the worse for drink.

The officers with the troops had brought all sorts of reports from Orenburg, the last rumor being that Kryjinovsky was to be the governor-general at Tashkent, Kauffmann to be minister of war, and Milutin to be commander-in-chief in the Caucasus.

## CHAPTER XXXVIII.

An Inquisitive Inspector.—“Will England cede us Kashgar?”—The Fortress Afghan.—“Are the English Christians?”—“Have you Images?”—“And yet you call yourselves Christians.”—The Bath in Uralsk.—No one washed on a Friday.—The Chief of the Police.—A Murderer.—His Punishment.—The Ural Cossacks.—Sizeran.—Good-bye to Nazar.

I HAD made up my mind not to stop at Orenburg, but continue my journey straight to Uralsk, a large town on the Ural River, the capital of the district from which the Cossacks in Kasala had been so recently banished. Uralsk was off the main road to Sizeran, but by taking this route I should have the opportunity of seeing a new line of country.

The following day I encountered an inspector who was more suspicious than any I had previously encountered.

He looked at my pass—“So you have come from Khiva?”

“Yes.”

“You are English?”

“Yes.”

Here the man looked at me very fixedly, and continued, “Will England cede [*oostoopit*] us Kashgar?”

This question rather amused me, and I replied, pointing to a horse that was being led by the station, “Will you cede that horse to me?”

“He is not my property,” said the man, looking a little astonished at the question.

“Well, Kashgar is not an English possession, and how can we cede to Russia what does not belong to ourselves?”

“Then England will not fight with us about Kashgar?” inquired the inspector.

“I really don’t know, but I wish she would,” I replied, becoming a little annoyed by this evident attempt at cross-examination. “Anyhow,” I continued, “if you put your noses into Afghanistan, you will very likely get them pulled for you.”

"Afghan!" said the man; "oh, very good!" and, taking a piece of paper, he wrote down: "If Russia should take the Fortress Afghan [*Krapost Afghan*] there will then be war between England and Russia. I have noted your words down," he said.

"So I see," was my remark; "but Afghan is not a fortress."

"That does not signify," said the inspector; "it is something, and you have said that if we take it there will very likely be war."

A friend of his now entered the room, and asked a good many questions about England.

"Are the English Christians?" he inquired.

"Yes."

"Have you images [*obrazye*] like those?" pointing to some tawdry pictures of saints which hung on the wall.

"No; we do not believe in images."

"And yet you call yourselves Christians!" said the man, the Protestant religion instantly falling one hundred per cent. in his estimation.

"Do you believe in Christ?"

"Yes."

"And in the saints?"

"No; not as being able to perform miracles in our own days, whatever they might have done before."

"Horrible!" said the man; "you are as bad as the Mohamedans."

The distance from Orenburg to Uralsk is about 280 versts. On arriving at the last-mentioned town, I drove to the inn. It was tolerably clean, although bed-linen was a luxury unknown to the proprietor.

My first inquiry was for a bath, and not being able to obtain this article on the premises, I drove off to the bathing establishment. Here I was told that no washing could be done on that day, for it was a Friday, and not a washing-day. No one in Uralsk ever washed on a Friday, and if I wanted a bath I must come there the next afternoon. The offer of four times the usual price had no effect on the proprietor, and in return to my entreaties the man merely exclaimed, "Little father, go away:

to-morrow the bath will be beautiful and hot. Go away, for the sake of God, and do not be angry."

On returning to the hotel, I found that the Chief of the Police in the town had already been to see me, and had left word that he would call again. Shortly afterward he was announced, when in the course of conversation he told me that he had heard of my being likely to visit Uralsk, having received the information from Orenburg.

The next morning Nazar came into my room with a beaming countenance. "We shall have such a spectacle to-day, and all for nothing!" he said; "a man is to be beaten to death. Let us go to the market-place; a scaffold has been erected there." On inquiry, I learned that a Kirghiz had murdered a Cossack officer about twelve months previous, and that the assassin had been found guilty, and was to be punished. On arriving in the square, we found the ground partly occupied by a scaffold, on which stood a large, solid, black cross. A few ropes and cords were lying on the platform; the scaffold was surrounded by lines of infantry, who kept the people off, and from time to time dropped the butt-end of their rifles on the toes of the by-standers, if they attempted to approach too closely.

Presently a low hum, which gradually swelled to a deep bass roar, announced that the *cortége* with the prisoner was in sight. The culprit could be plainly seen mounted on a block of wood, placed in a dirty old cart, which was drawn by a mule; a guard of soldiers followed the criminal, while an escort went in front and opened out a road through the crowd of by-standers. On arriving at the platform, the prisoner was made to ascend it. He turned deadly pale when he saw the cross, but, quickly recovering himself, his countenance resumed its original expression, and, carelessly looking at the people, he nodded to some of his acquaintances.

The officer in command of the soldiers now gave an order, and two of the men, seizing the prisoner, tied him up to the cross. A magistrate, who was standing on the scaffold, took a document from his pocket and commenced reading the proceedings of the trial and the sentence, which was to the effect that the culprit would be sent to Siberia.

The man did not move a muscle of his face as the sentence was read out, but Nazar was considerably disappointed. "And so we are to have no performance," said the blood-thirsty little Tartar; "it is too bad of the authorities cheating us in this way."

Capital punishment has been abolished throughout European Russia, save for treason; however, it must not be thought that on this account the culprits are more leniently dealt with. Forced labor in the mines of Siberia rapidly puts an end to the criminal's existence, and it is said that the strongest man will succumb after two or three years' confinement.

The inhabitants of Uralsk, who had most of them some near relation or dear friend in exile in Central Asia, were so depressed that they hardly ventured to look us in the face as we met them in the streets. Some of the Ural Cossacks were said to be still in hiding, and waiting for an opportunity to escape from the country; but their fate could not be doubtful for a moment. When the cold season was over they would be caught, and dispatched in gangs to their relations in Kasala.

Such are the delights of living in a country where despotism rules paramount. Such is the civilization which certain people in England are eager to see forced upon the inhabitants of Central Asia.

There was nothing of note to be seen at Uralsk, so I left for Sizeran. This was reached after a thirty-six hours' continuous journey. It was the middle of March; my sleigh journey was now over. Shaking hands with the faithful little Tartar, who had accompanied me to the last, I said good-bye to him, and, so far as my travels are concerned, must say farewell to the reader.

## APPENDIX A.

---

### THE RUSSIAN ADVANCE EASTWARD.

THE same rule which applies to natural phenomena is equally applicable to nations: the smaller body has a tendency to gravitate toward the greater, and the tribe, khanate, or kingdom, to the more powerful empire which it adjoins.

Russia, in the days of her weakness, was overrun and dominated to a great extent by her warlike neighbors, the Tartars. She is repaying them in their own coin.

Forty years ago she had taken from Persia 70,000 and from Tartary 270,000 square miles of territory; since that time she has conquered the Bokharans—Khiva and Kokan; while her frontier is rapidly striding forward toward the Hindoo Koosh.

During the early part of this century she had stretched out a long line of outposts—let us call it her left arm—in the direction of Western Siberia, and had gradually penetrated farther and farther until she spread herself nearly over its entire extent. Military settlements, forts, and chains of detached posts extended from the rivers Ural and Irtysh to the valley of the river Ili; while her right arm, but half extended, reached from Orenburg to Orsk, and then by the north of the Sea of Aral to Fort Perovsky, which is about two hundred miles from the mouth of the Syr Darya, the Jaxartes of ancient history.

This extension of the right arm had been attended with numerous difficulties. The line of strongholds stretching from Fort Orsk to Zvarinogolovsk had cut off from the Kirghiz of the Little Horde their best grazing ground. It had been given to some Cossacks. An endless feud ensued between the new and the old occupants. It is impossible, if you are bent upon

conquest and despoliation, to prevent those nations which feel themselves aggrieved from resorting to hostilities.

As Russia stretched her right arm past the north of the Sea of Aral, the Kokandians and Khivans became alarmed. Would they not too some day have to succumb?

The Bokharans, Khivans, and Kokandians felt, thirty years ago, as Russophobists in India feel in the present day. Which was the best course for the Kokandians and Bokharans to pursue—to check the invader's progress at the outset, or allow him to establish his dépôts and push forward to their frontier?

They elected the former. Constant raids were made on the Kirghiz—now Russian subjects—and the Russians captured the enemy's stronghold, Ak Mechet. The name of the victorious general was given to this fort, henceforward known as Perovsky. Forts Numbers One, Two, and Three were then built at Kasala and on the sites of two Kokan forts. Thus was founded the Syr Darya line, the extremity of the half-bent right arm which Russia was gradually extending toward Tashkent.

In spite of the chain of forts which stretched along the Western Siberian and the Syr Darya lines, the country between them was only half subdued. It was felt that the newly acquired territory could not be deemed thoroughly secure until the two lines joined. The right hand must grasp its fellow of the left ere the wished-for result could be obtained.

In 1854 a committee of officers was ordered to assemble and deliberate on this proposed step. It was then stated that the junction could not be effected without having a collision with Kokan and Bokhara, which would eventually lead to the subjection of these khanates. This idea was not displeasing to the authorities at St. Petersburg, and it was determined to join the Syr Darya and Western Siberian lines.

The Crimean war now came on, and occupied all Russia's attention. But as soon as peace was proclaimed, preparations were at once commenced for carrying the original proposal into execution.

The Ili was crossed, the Kokan forts Pishpek and Tokmak were destroyed by General Zimmermann, and forts Vernoe and

Kastek constructed at the base of the Tian Shan range. This was between 1854 and 1860. Armed reconnoissances were next made of the district lying between the Chú River and the Aulieta fort. The fingers of the left hand had not been idle; they were gradually circling round in the direction of the Syr Darya. The right arm, which in 1859 had reached forward to Djulek, where a fort had been constructed, was pushed onward to Yany-Kurgan. The Syr Darya valley and Karataù mountains had been carefully surveyed.

Every thing was prepared for uniting the two lines, and it was determined that simultaneous movements should be made by Major-general Tchernayeff with the Siberian army, and by Verëvkin with the Orenburg troops. The former was to occupy Aulieta, the latter to march from Djulek along the Karataù ridge, and to take possession of Suzak and Chulak Kurgan.

General Verëvkin thought that it would be more satisfactory if the frontier line embraced the town of Turkistan, thus pushing forward the boundary 130 miles beyond Djulek; but General Tchernayeff—thinking that as it was a mere question of advancing the frontier eastward, the more territory secured for Russia the better—suggested that the line should include Chemkent, a Kokan fort 100 miles beyond Turkistan, or 230 from Djulek. This proposal was duly carried into execution.

There had been but little bloodshed on the Russian side. The large towns of Turkistan and Chemkent had been taken at the expense of about fifty killed and wounded. The loss experienced by the Kokandians, according to the official accounts, was immense.

This was satisfactory to the Russian military authorities, but indecision still reigned at St. Petersburg as to how far the limits of the empire should be extended. On the 30th of July the following general order was published:

“His Imperial Majesty has been pleased to command that all the forts erected on the newly occupied extent of country from the river Chú to the Syr Darya as far as the Kokan Fort,\* Yany-Kurgan inclusive, be considered as temporarily forming a new Kokan line of frontier, to the

---

\* Between Djulek and Turkistan.

command of which his Majesty has been pleased to appoint Major-general Tchernayeff, who is to have chief command of all the troops along it; those of Western Siberia as well as those of the Orenburg region."

General Tchernayeff took possession of Chemkent on the 22d of September. The news of his success soon reached St. Petersburg, and on the 21st of November the same year (1864) the world was favored with Prince Gortschakoff's dispatch. The chancellor states in the first article of this celebrated document:

"It has been judged indispensable that our two lines of frontier, one reaching from China to Lake Issyk Kul, the other from the Sea of Aral along the Syr Darya, should be united by fortified points, so that all our ports may be in a position to mutually support each other."

The chancellor continues in the third article:

"We have adopted the line between Lake Issyk Kul and the Syr Darya, besides fortifying Chemkent, which has been recently taken by us. We find ourselves in the presence of a more solid, compact, less unsettled, and better organized social state, fixing for us with geographical precision the limit up to which we are bound to advance, and at which we must halt, because, on the one hand, any farther extension of our rule, meeting, as it would, no longer with unstable communities such as the nomad tribes, but with more regularly constituted tribes, would entail considerable exertions, and would draw us on from annexation to annexation with complications which can not be foreseen. It is unnecessary for me to call attention to the evident interest that Russia has in not extending her territory. Of late years people have been pleased to assign to Russia the mission of civilizing the countries which are her neighbors in the Continent of Asia. The advancement of civilization has no agent more efficient than commercial relations. These last, to become developed, require order and stability, but in Asia this necessitates complete change of customs. Asiatics must be made to understand that it is more to their interest to favor and insure the trade of caravans than to pillage them. These elementary notions can only penetrate the public conscience when there is a social organism and a government which directs and represents it. We accomplish the first part of this task in advancing our frontier to the limit where these indispensable conditions are to be found. We accomplish the second by endeavoring henceforth to prove to the neighboring states by a firm system, so far as the suppression of their ill-dealings is concerned, but at the same time by moderation and justice in the employment of force, and by respecting their independence, that Russia is not their enemy, that she nourishes toward them no ideas of conquest, and that pacific and commercial relations will be more profitable than disorder, pillage, reprisals, and permanent warfare. In consecrating itself to this task, the Impe-

rial Cabinet is inspired by Russian interests. It believes that, at the same time it serves the interests of civilization and humanity, it has the right to count on an equitable and loyal appreciation of the steps which it pursues, and of the principles by which it is guided."

After the promulgation of this dispatch, it seemed clear that the Imperial Government at St. Petersburg had set its face against any farther annexation in the East; that Chemkent was the limit of its boundary-line, and that the authorities at St. Petersburg were really desirous to live at peace with the inhabitants of Central Asia; that the Cossack swords were to be turned into reaping-hooks, and that every thing was to be done to promote commerce and the interests of civilization. The millennium had apparently commenced in Russia. The Cossacks and Kokandians were to stroke beards and lie down peacefully side by side. This would have been a most refreshing spectacle, and the peace-at-any-price party in England went into raptures at the idea. However, it was not so pleasing to the governor-generals who represented the emperor in the Orenburg and Western Siberian districts. The dispatch was diametrically opposite to the system which, according to Mr. Venukoff, has always been adopted by Russia in her dealings with Eastern nations. We can not be surprised that the generals looked upon Prince Gortschakoff's literary composition as so much waste paper, in so far as they were concerned, and intended merely to blind the eyes of Europe to the ulterior intentions of their Government.

Colonel Venukoff, in his military review, observes: "In Central Asia, that is to say, there where it is easy to apply the principle *divide et impera*, by making use of the rival antagonisms of the Bashkirs, Kirghiz, and Calmucks, the Orenburg and Siberian governors have taken for their guidance the rule to weaken each one of these troublesome nations by the means of the others." Thus it would seem that the promotion of discord amidst their neighbors was much more likely to be the policy pursued by the conquerors of Turkistan than the promotion of peace, commerce, and civilization.

At all events, General Tchernayeff, who directed the military operations in Turkistan, did not think that he was bound to

maintain peaceful relations with the inhabitants of Tashkent, a large town containing 78,165 inhabitants, and seventy miles from Chemkent; for, considering it necessary to obtain a more intimate\* knowledge of the state of affairs in Tashkent before the winter set in, the general advanced upon that city. In this reconnoissance, on the assumption that the numerous but unwarlike population would not be able, suddenly attacked, to defend the entire length of their walls (about sixteen miles), Tchernayeff stormed the most accessible part of the town. Contrary, however, to expectation, the attempt failed.

It is a strange way of living at peace with your neighbor—first making a military reconnoissance of his city, then playfully throwing a few shells within the walls, and finally storming the most accessible part of the town. Indeed, if we take General Tchernayeff's own report, we find that the reasons assigned by him for his attack upon Tashkent are singularly vague. He writes, in a dispatch to the minister of war, which is dated the 19th October, 1864, "At last, as I have already had the honor of acquainting your Excellency, information was received, which has subsequently been confirmed, that Tashkent had entered into relations with the Ameer of Bokhara."

Now, Bokhara was at peace with Russia, and the authorities at St. Petersburg wished to live at peace with their neighbors; so the reason which is given by General Tchernayeff for his attack upon Tashkent is not very satisfactory. Some European statesmen thought that this little ebullition of feeling on the part of General Tchernayeff would have been followed by the authorities at St. Petersburg gently remonstrating with the energetic warrior. However, the Russian minister of war was at that time so soothed by the peaceful notes in Prince Gortschakoff's declaration, that he could not find it in his heart even to forward a reprimand. The Government contented itself by refusing to give its sanction to the general's project of conquering Tashkent, but took care to furnish him without loss of time with strong re-enforcements, on the plea that it would then be easier to defend the district already occupied.

---

\* See General Romanovsky's "Notes on Central Asia."

In an order of the day from the minister of war, dated 12th of February, 1865, we read: "The advanced line established last year in the Trans-Chú region is to be connected with the line of the Syr Darya, and one province to be formed, under the title of the province of Turkistan, of the whole of the territory bordering the Central Asiatic possessions from the Sea of Aral to Lake Issyk Kul. The administration of the new province is to be intrusted to a special military governor, who shall at the same time command the forces stationed within the province."

General Tchernayeff was punished for his attack upon Tashkent, made only five months previously, by being appointed governor of the region and commander of the forces, while fresh troops were sent to him from Orenburg and Western Siberia.

Tchernayeff, three months after he had been appointed Governor of Turkistan, reported to the minister of war at St. Petersburg that the Ameer of Bokhara was marching his troops in the direction of Ura Tube, a town about sixty miles south of Tashkent. The general concluded his dispatch by saying that this movement could only be interpreted as a desire on the part of the Ameer of Bokhara to take advantage of the difficulties of the khanate, and mix himself up in its affairs.

The magnanimous Tchernayeff was alarmed lest another might take possession of some territory which did not belong to Russia. There was no direct evidence as to this intention on the part of the Ameer. The general, however, thought that, in spite of the disapproval expressed by the Imperial Government about his attempt to annex Tashkent, the authorities would be glad if this were an accomplished fact. He advanced with his troops to Fort Niazbek, which commands the water supply of the city, and summoned the governor to surrender. This fortress is situated sixteen miles north-east of Tashkent, and is on the left bank of the river Chirikik. It was one of the most formidable strongholds in the khanate, and yet it capitulated after a few hours' fire from the Russian batteries. The Tzar's troops suffered no loss in killed, and only seven Russians were slightly wounded. From this we can

see that no great difficulties in the shape of opposition from the Kokandians could be anticipated. Prince Gortschakoff's dispatch and the Kokan forces were equally impotent to restrain the invader.

Russia had indeed advanced her right arm during that last twelve months. From Djulek, where it had been intended to draw the boundary-line, to Niazbek is more than three hundred miles. Fort Vernoe was more to the east than even Niazbek. The right arm must again reach forward.

After taking Niazbek, Tchernayeff determined to take possession of Tashkent. This town was stormed on the 14th of July, 1865. The Russians had 1951 men and twelve guns exposed to a force of 30,000 defenders. In spite of this discrepancy in numbers, there were only twenty-eight Russian soldiers killed and eighty wounded. No officer was among the slain. Thus one of the most populous and important cities in Central Asia was added to the dominions of the White Tzar.

The Ameer of Bokhara was extremely well disposed toward Russia. The Bokharan merchants, in days gone by, had received special privileges and an exemption from custom duties in their tradings with the emperor's subjects; but shortly after the capture of Tashkent, Tchernayeff found that he had serious cause to complain of the Ameer's conduct. This sovereign, simultaneously with the seizure of Tashkent by the Russians, had actually dared to enter Hodjent, a town about six days' march from the city.

Hodjent is a most important military post. It is situated on the Syr Darya, at a point where the stream turns sharply to the south. Here the roads to Kokan, Tashkent, Bokhara, and last, but not by any means least, Balkh, cross each other. The possession of Hodjent by the Russians would thus enable them to sever Kokan from Bokhara, and afford a most advantageous position for an attack upon either of these countries.

If Tchernayeff had intended to respect the dispatch which the Russian chancellor had sent to the different courts in Europe, the general would not have troubled himself about Hodjent; but the temptation was too great, and Tchernayeff fell.

Hodjent did not belong to Russia, but this was no reason why it should belong to Bokhara—thus the general argued to himself. Any little scruples he might have had as to whether the conscientious chancellor at St. Petersburg would be grieved at his proceedings were speedily quelled, and he issued an order to arrest all the Bokharans who could be found within his province, and to seize their property. The order was extended to Orenburg. General Kryjinovsky was requested to co-operate in carrying Tchernayeff's edict into effect. So the merchandise of every Bokharan found in that town was also sequestered.

This was in July, 1865, only six months after the promulgation of Prince Gortschakoff's famous dispatch, in which he said that Russia wished to live at peace with her neighbors, and promote commerce and civilization in Central Asia.

In my account of the way a rupture was first brought about between Russia and Bokhara I adhere strictly to General Romanovsky's statements in his "Notes on the Central Asiatic Question." As this officer accompanied General Kryjinovsky in a journey which the latter made at this time to Turkistan, in order to study the position of affairs in that province, he ought to be well acquainted with the facts of the case. Terentyeff, in his work on "England and Russia in Central Asia," says that Tchernayeff arrested the Bokharan merchants because the Bokharans had demanded the evacuation of Tashkent and Chemkent, pending the receipt of the final decision of the White Tzar; and that in the event of a refusal they had threatened a holy war, or, in other words, a general rising of all Mohammedans.

It is very possible that some faint rumors as to the contents of the celebrated Gortschakoff document had reached Bokhara. The Ameer might have been under the impression that the Russian general had exceeded his instructions. But even if the demand were made as Terentyeff states, it was a strong measure for Tchernayeff to adopt, and one more characteristic of Eastern than of Western civilization. Perhaps, indeed, I am wrong in using the term Eastern, as the laws of hospitality are rigidly observed by Mohammedans in Asia, and the Rus-

sian in this respect is sometimes behind his first cousin, the Tartar. It does not, however, signify whose version of the circumstances is correct. The Bokharans were arrested; General Tchernayeff's main object was attained: he had wished to have a *casus belli* against Bokhara. His wish was realized, for the Ameer at once retaliated by arresting all the Russian merchants who happened to be within his city.

In spite of the aggressive measures commenced by the Russians against Bokhara, the Ameer did not attempt any hostilities. Tchernayeff, too, had not many troops at his disposal, so he satisfied himself for the moment by occupying the Trans-Chirchik region, a fertile district close to Tashkent.

In the mean time the Bokharan sovereign dispatched a mission to the emperor at St. Petersburg, in order to remonstrate about the imprisonment of the Bokharan merchants and the seizure of their goods. The Ameer could not understand this system of promoting the interests of commerce and civilization. However, he would not long remain in ignorance, for he was about to undergo a course of education in the doctrines of civilization as understood in Russia.

Kryjinovsky met the mission at Fort Number One. He would not allow the Bokharan envoys to go to the capital, the reason assigned being that he was himself empowered to negotiate with them. We need not be astonished at General Kryjinovsky's refusing to allow the Bokharan envoys to go to St. Petersburg. Their mission was to complain of his conduct, and if their story had reached the Tzar's ears the Governor of Orenburg might have lost his appointment. Shortly afterward the two generals, Kryjinovsky and Tchernayeff, met. They were not in accord about what was to be done with Tashkent; Tchernayeff wishing to annex that city to the empire, while Kryjinovsky was for reducing it to a state of vassalage, and not for occupying the newly conquered district with Russian troops.

It is interesting to mark this difference of opinion between the two generals, as toward the end of the year 1865 Kryjinovsky was recalled for a time to St. Petersburg. It will be curious to see how this visit to the capital subsequently influ-

enced him in his treatment of the question. The Bokharan envoys were still detained by the Russian authorities; and at the end of October, 1865, General Tchernayeff sent a Russian mission to Bokhara, ostensibly with the object of establishing friendly relations and of re-opening that trade which had been brought to so abrupt a conclusion by his own act of arresting the Bokharan merchants.

There were several military as well as civil officers attached to this mission. It bore such a military as well as political aspect, that the Ameer, who was highly dissatisfied that his own envoys to the Tzar had been arrested, actually had the audacity to detain the Russian gentlemen. He was undoubtedly wrong in committing so illegal an act, and one so contrary to the law of nations. The Ameer was not wise in his generation. He did not discern that the old saying, "What is sauce for the goose is sauce for the gander," did not apply in his case. The Russians had detained his mission, it is true, but, then, the Tzar was more powerful than the Ameer, although the latter potentate had this still to learn. Might gives right in the treatment of one country by another. The Ameer was rash in applying the Mosaic law, "An eye for an eye, a tooth for a tooth," to the Christianizing and civilizing power on his frontier.

Tchernayeff now crossed the Syr Darya, at Chinaz, with fourteen companies of infantry, nine hundred Cossacks, sixteen guns, and twelve hundred camels. His object was to march across the hungry steppe to Djirrak, so as to force the Ameer to release the envoys. However, the latter sovereign declined to do so unless his Bokharan subjects were permitted to return. A battle was the consequence, and the Russians had so much the worst of the encounter that their expedition had to retreat to the Syr Darya.

That Tchernayeff had the worst of this encounter is tolerably clear, from his report to the commander-in-chief, at Orenburg, dated March 19th, 1866, in which he urgently asked for re-enforcements. However, the authorities at St. Petersburg were not pleased at the check their arms had received. An order was issued to recall the beaten general, and General Romanovsky was appointed to replace him in the command.

Soon afterward the Russians had a force of three thousand fighting men in Tashkent. In an engagement that took place at Irdja the Bokharans were utterly routed. General Romanovsky followed up the advantages he had gained by a fresh victory in the same neighborhood. The Ameer's army was annihilated, and the sovereign had to take refuge in Samarcand.

The Russian general did not think that he had sufficient forces to capture the city of Samarcand, so he determined to take possession of Hodjent. This town was stormed after a siege which lasted eight days. The commander-in-chief then resolved to retain all the territory he had occupied on the left bank of the Syr Darya, and on the Kokan side he expressed his wish to take possession of the large town of Namangan. This, in Romanovsky's opinion, would have been most convenient, as the boundary-line could then have been drawn along the river Naryn, which lies south of Lake Issyk Kul.

General Romanovsky was not permitted to carry out his project of occupying Namangan, and of pushing the frontier to the south of Lake Issyk Kul. It was felt at St. Petersburg that this step would have been premature, and that the English nation might have been aroused from its state of lethargy, the object of the Russian Government being always rather to take advantage of events than to force them.

The general was on the best of terms with Hudoyar Khan, the Prince of Kokan, who had promised to faithfully obey the commands of the Russian authorities, and, in Romanovsky's words, the khan had most conscientiously fulfilled his promises. However, General Kryjinovsky, after his arrival at St. Petersburg, sent a dispatch to Tashkent, in which he stated that he considered it necessary to occupy the entire khanate of Kokan, and extend the Imperial dominions to the Celestial mountains and the Bolors. He recommended General Romanovsky to assume a high tone toward Kokan, and to treat Hudoyar Khan as a man who by his position should be a vassal of Russia. Should he take umbrage and operate against us, wrote the Governor-general of Orenburg, so much the better; it will give us a pretext to close with him. With reference to the Ameer of Bokhara, every thing must be demanded

of, nothing conceded to, him; and Kryjinovsky still refused to allow the release of the Bokharan merchants who were detained at Orenburg. Doubtless he did this in their own interests, and in order to accustom them to the new order of things, as stated in Prince Gortschakoff's declaration of 1864. The Russian merchants had long since been sent back from Bokhara, but this did not affect Kryjinovsky's treatment of his prisoners. They required civilizing *à la Russe*, and he determined to civilize them.

It was well known that this governor-general had been honored a short time previous by being admitted to an audience with some high authorities in the capital. A few people in London now expressed their belief that the celebrated dispatch was all humbug, and said that the chancellor wished to annex more territory. These men, however, were contradicted by the wisecracks of the English community, who contented themselves by pointing out the distinctness of the chancellor's statements, and saying that they ought not to be impugned by even the shadow of a suspicion.

Kryjinovsky returned to Tashkent: it was stated that he was desirous to bring matters to a head. He shortly manifested his ideas on this subject by forwarding an official report to St. Petersburg recommending the immediate commencement of hostilities against the inhabitants of Kokan. The Governor-general of Orenburg grounded his report on an attack which had been made on the Russians by a party of robbers, and on the khan having concentrated his forces in his own territories.

In Romanovsky's opinion the khan had not the means to stop the inroads of predatory parties, and this general thought that the concentration of native troops was merely the very natural consequence of the concentration of the Russian troops in Hodjent, which began immediately after the arrival of the Governor-general of Orenburg in the province of Turkistan.

A new element was now introduced on the scene. Some of the inhabitants of the conquered districts requested permission to become vassals of Russia. Sixty-two natives of Tashkent were persuaded to sign a document asking for their town to be annexed to Russia. Some few inhabitants of the Trans-

Chirchik district and of Hodjent did the same; so that all the country occupied up to May, 1866, became incorporated with the Russian Empire.

Shortly after this event the Ameer of Bokhara sent an emissary to Kryjinovsky to conclude a treaty of peace. However, as the Governor-general of Orenburg demanded 100,000 tillas as a war indemnity, the emissary would not accede to the terms, his Mohammedan mind being too obtuse to see the justice of the demand. The case was a clear one. The governors of Orenburg and Tashkent had first of all arrested some Bokharan merchants, and sequestrated their goods. The Ameer of Bokhara had been so wicked as to resent this proceeding. It was as if a strong savage had set fire to a weak savage's wigwam, and the strong man had afterward asked for an indemnity because he had slightly burned his fingers while creating the conflagration. The facts had been made out, the weak savage could pay, but would not pay, so he must be made to pay; and Kryjinovsky determined to attack Bokhara.

His subordinate, Romanovsky, was ordered to prepare for an immediate campaign in the Ameer's territory. The frontier was crossed, and the forts of Oura Tube and Djirrak were taken by storm, when, singularly enough, the day after the capture of Djirrak, Kryjinovsky received a telegram from St. Petersburg, in which the Government stated its disinclination to extend the limits of the empire, and at the same time called his attention to the order of 1866, which was to the effect, that, should the inhabitants of Tashkent and of the other conquered districts renew their request to become Russian subjects, so as to obtain protection against the Ameer of Bokhara, it was to be granted them. But this had already been done; and as sixty-two out of the 78,165 inhabitants of Tashkent had expressed a desire to belong to Russia, the remaining 78,103 individuals had become, *nolens volens*, subjects of the Tzar.

Kryjinovsky left for Orenburg on the 10th of November, 1866. The troops were put into winter-quarters, and a strong garrison was left in Djirrak, the recently conquered town, which was some distance from the left bank of the Syr Darya, and on the high-road to Samarcand. In the spring of the fol-

lowing year, 1867, a Bokharan fort, called Zani Kurgan, not far from Djirrak, was taken by the Russians, and shortly afterward an imperial decree was issued, separating the Turkistan province from the Orenburg government, the residence appointed for the governor-general being in Tashkent. The newly formed province was in its turn divided into the Syr Darya and Semirechensky districts; the two together containing a population of about 1,500,000 inhabitants.

A fresh governor, General Kauffmann, replaced Romanovsky on the 17th of November, 1867. The new officer commenced his reign by destroying the Bokharan town of Ukhum, and in April, 1868, he marched through the valley of the Zerafshan to Samarcand. This far-famed town at once surrendered to the Russian arms. Katye Kurgan, forty miles from Samarcand, and on the high-road to Bokhara, was next taken, and on the 2d of July, the Ameer, with all his army, was utterly defeated on the Zerabulak heights. The Bokharan sovereign now felt that he was impotent to resist the invader's progress. Muscovite civilization was too much for him, and the defeated monarch was obliged to sign a treaty of peace. By this he bound himself to pay an indemnity, and to acknowledge the right of Russia to all the territory won by her since 1865.

Territorial aggrandizement had always been contrary to the expressed wish of the authorities at St. Petersburg, and they must have been deeply grieved to find themselves compelled to annex so much Bokharan territory. However, Kauffmann was not recalled, like his predecessors, Tchernayeff and Romanovsky, had been: a scape-goat was not required this time. England was too much occupied in money-making to cast a thought upon the affairs of Central Asia; and although a few members in the House of Commons and the *Morning Post* might grumble a little, the British Government did not trouble itself much about the matter.

By the possession of Samarcand, the Russians held Bokhara completely at their disposition; they had full control over the waters of the Zerafshan, and, in consequence, over the crops of Bokhara. The knowledge of this fact now stirred up a little the British Cabinet; but the Russian chancellor, eager to throw

oil on the troubled waters, promised to restore Samarcand to the Ameer. Our ministers placed credence in the statement. Their minds were tranquilized about the matter, and they once more lay down to slumber. The Cabinet had excited itself a little more than was its wont, for some Afghans—that warlike race, which were looked upon as our surest safeguard in the event of a quarrel with Russia—had actually fought under the Tzar's standard, and with the Christians, against the Bokharans.

The facts were as follows: The ruler at Balkh had sent 286 Afghan soldiers under Sekunder Khan, the grandson of Mohammed Khan, to aid the Ameer of Bokhara. The Ameer had not been able to pay these auxiliaries with regularity, and Sekunder quietly left his ally and attached himself to the forces under Kauffmann. Afghans combined with Russians, and in arms against the followers of the prophet! Soldiers of fortune will fight for the power which pays best or is able to offer the greatest bribe; and it had just dawned upon the few people in Great Britain who take an interest in the affairs of Central Asia, that the chance of looting the rich cities of the plains in India might prove an irresistible attraction to the inhabitants of Afghanistan if it were proposed to them, of course in the interests of civilization, by any Russian agents. Sekunder Khan, who is the nephew of Shere Ali, became a lieutenant-colonel in the Tzar's army. He soon mastered Russian and French: however, he found that there was no chance of his rising higher in the Russian service—his nationality told against him; and being furthermore aggrieved at the treatment received by one of his followers, Rahmed Khan, an ensign in the Russian army, from the adjutant of his regiment, Sekunder called out the last-mentioned officer. The challenge was not accepted, and the infuriated Afghan, who announced his determination to horsewhip his adversary on the first opportunity, was put under arrest. He resigned his commission and came to England, where, according to Mr. Terentyeff, he has been well received, and assigned an allowance of £4000 a year instead of £600, his pay in Russia.

The Ameer of Bokhara was under the impression that Samarcand would be restored to him. It is said that he signed a

treaty granting special privileges to Russian traders, pledging himself to pay a war indemnity of £75,000, on the understanding that Samarcand would be evacuated. This the Russians did not do: however, they restored the Ameer's authority, which had been shaken by an insurrection headed by one of his sons, for, marching upon Karshi, they drove from it the rebel and his supporters. They then advanced against two chiefs in Shahr i Subz, and, conquering them, restored the district to the Ameer.

The last expedition the Russians have made in that part of the world was to the sources of the Zerafshan, in the mountainous country to the south-east of Bokhara. There they reduced to their own rule the bekships of Urgut, Faraf, Macha, Kshtut, and Maghian. What was of no use to Kauffmann, he gave back to the original owners; what was worth retaining, the general kept for Russia.

In the north-eastern division of Turkistan the Tzar's officers had not been idle. Some troops had been dispatched from Vernoe to the Naryn, the main branch of the Syr Darya. Here they constructed a bridge, erected a fort, and made a road, thus opening a carriage-way in the direction of Kashgar.

Kokan was now entirely cut off from the adjacent khanates, and lay at the mercy of the invader.

Shortly before this the Russian relations with China had become complicated; a revolution had occurred in that empire, and all Eastern Turkistan emancipated itself from the Chinese yoke. Bands of Russian Kirghiz marched into Chinese territory, and freely pillaged the inhabitants. This led to the destruction of the Russian consulates and factories in Kulja and Chuguchak. Yakoob Bek, the ruler in Kashgar, formed of Kashgaria an independent state; and as he found that the Taranchees and Dungans were not at all submissive, he occupied some of the Dungan towns, among others Karashan and Turfa.

In order to defend the Russian Kirghiz from the Taranchees, which was a capital excuse for an advance, the Governor-general of Turkistan, at the end of August, 1870, ordered the slope from the Muzart Pass to be occupied. This is the only

pass in the Tian Shan range which unites the province of Ili with Altishahr.

The Russians, having possession of the Muzart Pass, were enabled to prevent Yakooob Bek from annexing Kulja. They did this in the most effective manner by taking possession of it themselves.

The St. Petersburg official journals declared that Kulja was only to be temporarily occupied, and that it would be given up as soon as the Chinese authority could be re-established by reinforcements of troops from China. Negotiations about the restoration of the province of Ili (Kulja) were said to have been carried on between Jung, a Chinese commissioner, and a Russian general. However, all was to no purpose; there was no intention to give any thing back; and in spite of the statements issuing from official sources, Kulja, like Samarcand, became permanently annexed to the Tzar's dominions.

A little later a revolution in Kokan, brought about by Russian agents, afforded the long wished-for opportunity. Some of the inhabitants expressed a desire to become subjects of the emperor, and General Kauffmann was so kind as to accede to their wishes. By the entire possession of this khanate the Russian right arm had reached far eastward, but Kulja, the extremity of her left arm, was still a long way in advance.

In Lieutenant-colonel Leistin's map of Turkistan, 1875, the boundary-line between Kokan and Kashgar is not dotted in. Does this mean that a fresh movement forward with the right arm is imminent? It will have to reach well out to shake hands with its fellow at Kulja.

A natural boundary of mountains separates Kokan from Kashgar, but General Kauffmann is not likely to be deterred in his advance. Eastward, south-eastward! is the cry, and Kashgar will inevitably succumb, unless England intervene in her behalf.

## APPENDIX B.

---

### REPORT OF MR. SCHUYLER.

MR. SCHUYLER, Secretary of the United States Legation at St. Petersburg, on his return from the Russian province of Turkistan, made a long report to his Government. From this report I extract the following remarks :

“The faults of the Russian administration seem to be, however, in some measure due to the personal character and conduct of the governor-general. General Kauffmann is, unfortunately, a very weak as well as a very vain man, and has always been surrounded, wherever he was, by persons who use these qualities to serve their own purpose. He came to Central Asia with no knowledge of the country, and, by holding himself in a very lofty position, has acquired very little knowledge of it during his stay. He has considered it necessary to keep up an appearance of state, and to have little communication with the natives, having been in the Asiatic part of Tashkent only once or twice during the seven years of his administration. He never rides through the street without a body-guard of 100 Cossacks, and maintains himself at a distance from the Russians also.

“At his balls it is forbidden to a gentleman to be seated, a more strict etiquette than prevails at the balls of the emperor at St. Petersburg. The Central Asiatics are accustomed to a very simple, and, in some respects, democratic kind of life, and, instead of standing in awe of the governor-general, they turn his actions, to some extent, to ridicule. At the same time, these restrictions in their intercourse with him prevent their reaching him with complaints or suggestions, and therefore, so far as he knows the natives, he knows only such as by their wealth and cunning are able to get round him. In this respect he is the exact opposite of General Tchernayeff, who, by his simplicity, bravery, and almost intuitive knowledge of the country and people, made himself very popular, and is very greatly regretted by the natives, who long for his return. It is natural, of course, that General Kauffmann should have his favorites among the Russian officers, and should be disposed to uphold them in spite of all charges of maladministration. Although the most glaring acts of maladministration have been committed

by the district prefects, or commanders, the general tone set by the governor-general is such as to naturally lead to this result, and to render it almost hopeless to expect any thing better. The prefects being removed, to a certain extent, from the observation and control of the centre of observation, and falling soon into the ways and methods of former Central Asiatic governments, abuse their powers, and consider themselves almost irresponsible. A striking example of this was in the management of the Karaminski district, one of the most fertile and thickly settled in the whole province, and surrounding, but not including, the city of Tashkent. The prefect of this district in one year levied 90,000 rubles of illegal taxes, all of which he spent, beside other Government money, and yet he resided within five miles of the house of the governor-general, and was known to be living in a style, with frequent dinners, suppers, and gambling parties, entirely impossible on his salary of 2400 rubles a year. Among other things, savings funds had been instituted for the benefit of the population, but by a subsequent regulation, approved by the governor-general, it had been allowed to spend them on the administrative needs of the district. This money, some 22,000 rubles, entirely disappeared, and no accounts of its expenditure could be found, except that it was said that it had been used in fitting up the house of the prefect. Money was taken from the natives at all times and under all pretenses, and a grossly illegal order was issued, forbidding all persons to cross the river Syr Darya at any other place than the places specified in the order, threatening persons who did so with being sent to Siberia. The points specified were places belonging to friends of the prefect.

“When at last matters became too scandalous, the governor-general felt obliged to take some notice, and removed the prefect from the district; but, instead of punishing him, he appointed him to another locality, stating that he considered him ‘a most useful officer.’

“The prefect of the district of Peroffski was investigated, and removed for extortion and bribery. He was then appointed to Auli-ata, and has lately been again investigated, and removed for demanding an illegal contribution from the natives, on the occasion of the demand for camels for the Khivan expedition. Other persons have in like way been removed from one post for maladministration, and immediately given another.

“On the other hand, many persons who endeavored to enlighten the public as to the state of affairs were immediately punished, and the commandant of the district of ——— was removed, and sent out of the province, for having written a letter to St. Petersburg for publication, though not at the time actually published, stating the truth about the disaffection and riots at Khodjend, alleging that they were caused by the excessive taxation, which was not what the Russians had at first promised, and not by the vaccination measures, as had been given out. Similar instances are numerous. When the papers showing the guilt of one *employé* were presented to the governor-general, he tore them up without reading them, say-

ing, 'I know this person so well, and I believe him to be such an honest man, that I can not think such things to be possible.'

"In some cases, acts not only wrong in themselves, but bringing with them very important consequences, have been committed, not from a desire of personal gain, but from a wish to appear zealous in the performance of duties, or from motives of intrigue. A case which happened last year is especially noticeable.

"An officer named Emmonds, in possession of a considerable amount of Government funds, gave information that he had been robbed by the Kirghiz. The chief Kirghiz living in the neighborhood of the alleged occurrence were arrested, and, after a long examination, several of them confessed their guilt, though the money could not be found. While the trial was going on, Emmonds committed suicide, leaving a letter in which he stated that he was not the honest man that had been supposed, as he had himself spent the money, and made that excuse to clear himself. The Kirghiz were then, of course, released, but the question arose, why had they confessed? And on an investigation, it was found that the judicial officer, Baron Grevenitz of Kerney, had extorted confession from them by means of torture, a practice wholly at variance with Russian law, and certainly most disastrous for Russian influence among the Kirghiz.

"There was another case in the same neighborhood, at Kopol, where a district prefect had been robbed, beaten, and severely wounded. As he was most deservedly unpopular for the extortions he practiced on the natives, this was not to be wondered at. Over sixty Kirghiz were accused of participating in this act, the chief of them being the Sultan Veizak, holding the rank of major in the Russian service, the most aristocratic and respected among the Kirghiz chiefs, and a well-known and life-long friend to Russia. The chief evidence against him was, that some of the property stolen from the prefect was found in his tent. One investigation succeeded another, until a Cossack finally confessed that he had placed these articles in the tent of Veizak at the instigation of the judge himself. It is said that this was done because the judge wished to please one high official by convicting of robbery and sedition another of whom he was jealous. Among the papers of the investigating commission is a letter from the prefect to the judge with regard to the means of obtaining this evidence. For various reasons it has never been possible to completely finish the investigation, but it was thought necessary to remove the judge, and to bestow upon him a similar post in the city of Khodjend, where he is now the chief administrator of justice. The effect of such a proceeding is, of course, to make the natives thoroughly displeased with the working of the Russian courts.

"Another case of the ill-advised action of the authorities, regardless of the effect produced upon the natives, occurred last summer.

"When the Khivan expedition began, it was found necessary to obtain 14,000 camels, exactly 14 per cent. of the whole number of camels in the

provinces, and it was agreed that in case these camels died a sum of fifty rubles would be paid for each. They had to be furnished in proper proportions by the different districts. In consequence of the hardships of the expedition, nearly all the camels perished, and it became, therefore, necessary to pay a sum of 700,000 rubles. One of the prefects, thinking that he had found a good opportunity to show his zeal for the administration and the good feeling of the district, told the population over whom he ruled that the Government would never pay for these camels, and that it would be much better for them to make them a present to the administration, and, by the use of proper persuasion, succeeded in accomplishing this. The example was followed in most of the other districts, and the result is, that the inhabitants feel that they have been absolutely robbed by the Government of these camels; and, to speak of nothing else, if it were necessary again to furnish camels for some expedition, the discontent would be very great.

\* \* \* \* \*

“No efforts have been made to spread Christianity, though a church exists at Tashkent for the use of the Russians; and General Kauffmann has speedily put down all missionary projects.

\* \* \* \* \*

“As far as education is concerned, the Russians have done almost nothing. In Samarcand, owing to the vigorous efforts of the commander of the city, himself a Mussulman, a small school has been opened for the instruction of Mussulman children in Russian; but neither in Tashkent nor in any other town of the province does such a school exist, nor, indeed, a school of any kind. It has been proposed once or twice to introduce the teaching of Russian and of modern knowledge into some of the Mussulman medresses, or high schools, and, upon the whole, this project was viewed with favor by the authorities; but, owing to their lack of intuitive, the matter has been neglected.”

---

### *Russian Immorality in Central Asia.*

Major Wood, in his work, “Shores of Lake Aral,” remarks, in page 241, as follows:

“Notwithstanding the constant drill and rifle practice, the Russian officers on the Amu would find life dreary were it not for the occasional brush with the Turkoman tribes, which promises to become a periodical institution. Besides a little tiger-slaying or pheasant and snipe shooting, means of recreation are totally wanting; and such an isolated position, be-

sides aiding, perhaps, to a caducity of European *morale*,\* is in itself an incentive to that military restlessness and yearning for decorations which is taken as a sign of the aggressive policy of Russia in Central Asia."

---

*Treaty of Peace between Russia and Khiva, prepared by General Aid-de-camp Kauffmann, commanding the forces acting against Khiva, and accepted by the Khan of Khiva, Seid-Muhamed-Rahim-Bahadur-Khan.*

1. Seid-Muhamed-Rahim-Bahadur-Khan acknowledges himself to be the humble servant of the Emperor of all the Russias. He renounces the right of maintaining any direct and friendly relations with neighboring Rulers and Khans, and of concluding with them commercial or other treaties of any kind soever, and shall not, without the knowledge and permission of the superior Russian authorities in Central Asia, undertake any military operations against such neighboring countries.

2. The boundary between the Russian and Khivan territories shall be the Amu Darya, from Kukertli down the river as far as the point at which the most westerly branch of the Amu Darya leaves the main stream, and from that point the frontier shall pass along such branch as far as its mouth in the Aral Sea. Farther, the frontier shall extend along the sea-coast to Cape Urgu, and from thence along the base of the chink (escarpment) of the Ust-Urt, following the so-called ancient bed of the Amu Darya.

3. THE WHOLE OF THE RIGHT BANK OF THE AMU DARYA AND THE LANDS ADJOINING THEREUNTO, WHICH HAVE HITHERTO BEEN CONSIDERED AS BELONGING TO KHIVA, SHALL PASS OVER FROM THE KHAN INTO THE POSSESSION OF RUSSIA, TOGETHER WITH THE PEOPLE DWELLING AND CAMPING THEREON. Those parcels of land which are at present the property of the Khan, and of which the usufruct has been given by him to Khivan Officers of State, become likewise the property of the Russian Government, free of all claims on the part of the previous owners. The Khan may indemnify them by grants of land on the left bank.

---

\* "Infandum! adolescentes Bokharæ, urbe stuprorum, lupanari; palam ac jure venundari apud Vamberium narrantur. Utrum censorum Scythici istæc permittent nescio, fœdissima percontari non soleo, confiteor; attamen credo hæc probræ etiamnum florere, nam greges adolescentium ex intima Asiæ Mediæ sub tutelâ et cum assensu censorum, agrum Scythicum stupri causâ perlustrare solent. A.D. MDCCCLXXIV. grex impuberum in castris Nukii et Cimbæ (in regione Oxii) lubricas saltationes Scythicas centurionibus gratissimas exhibebant. Prudenti satis."

4. In the event of a portion of such right bank being transferred to the possession of the Ameer of Bokhara, by the will of His Majesty the Emperor, the Khan of Khiva shall recognize the latter as the lawful possessor of such portion of his former dominions, and engages to renounce all intention of re-establishing his authority therein.

5. Russian steamers and other Russian vessels, whether belonging to the Government or to private individuals, shall have the free and exclusive right of navigating the Amu Darya River. Khivan and Bokharian vessels may enjoy the same right not otherwise than by special permission from the superior Russian authority in Central Asia.

6. Russians shall have the right to construct wharves (landing-places) on the left bank wheresoever the same shall be found necessary and convenient. The Government of the Khan shall be responsible for the safety and security of such wharves. The approval of the localities selected for wharves shall rest with the superior Russian authorities in Central Asia.

7. Independently of such wharves, Russians shall have the right to establish factories on the left bank of the Amu Darya, for the purpose of storing and safe-keeping their merchandise. For the purposes of such factories the Government of the Khan shall allot, in the localities which shall have been indicated by the superior Russian authorities in Central Asia, a sufficient quantity of unoccupied land for wharves and for the construction of store-houses, of buildings for the accommodation of servants of the factories, and of persons transacting business with the factories, and of merchants' offices, as well as for the establishment of domestic farms. Such factories, together with all persons residing thereat, and with all goods placed therein, shall be under the immediate protection of the Government of the Khan, which shall be responsible for the safety and security of the same.

8. All the towns and villages, without exception, within the Khanate of Khiva shall henceforward be open to Russian trade. Russian merchants and Russian caravans may freely travel throughout the entire Khanate, and shall enjoy the special protection of the local authorities. The Government of the Khan shall be responsible for the safety of caravans and stores.

9. Russian merchants trading in the Khanate shall be free from the payment of customs duties (*ziaket*), and of all kinds of dues on trade, in the same manner as the merchants of Khiva have long enjoyed immunity from *ziaket* on the route through Kazalinsk, at Orenburg, and at the stations (landing-places) on the Caspian Sea.

10. Russian merchants shall have the right of carrying their goods through the Khivan territory to all neighboring countries free of customs duties (free transit trade).

11. Russian merchants shall, if they desire it, have the right to establish agents (caravan bashis) in Khiva and other towns within the Khanate, for

the purpose of maintaining communication with the authorities, and superintending the regularity of their trade.

12. Russian subjects shall have the right to hold immovable property in Khiva. A land-tax shall be leviable on the same by agreement with the superior Russian authority in Central Asia.

13. Commercial engagements between Russians and Khivans shall be fulfilled inviolably on both sides.

14. The Government of the Khan engages to examine (inquire into) without delay the complaints and claims of Russian subjects against Khivans, and in case such complaints and claims shall have proved to be well founded, to give immediate satisfaction in respect of the same. In the examination of disputes (claims) between Russian subjects and Khivans, preference shall be given to Russians in respect to the payment of debts by Khivans.

15. Complaints and claims of Khivans against Russian subjects shall be referred to the nearest Russian authorities for examination and satisfaction, even in the event of such complaints and claims being raised by Russian subjects within the confines of the Khanate.

16. The Government of the Khan shall in no case give refuge to emigrants (runaways) from Russia having no permit from Russian authorities, without regard to the nationality of such individuals. Should any Russian subjects, being criminals, seek concealment within the boundaries of Khiva in order to avoid judicial pursuit, the Government of the Khan engages to capture such persons, and to surrender them to the nearest Russian authorities.

17. The proclamation made by Seid-Muhamed-Rahim-Bahadur-Khan on the 12th (24th) of July last, respecting the liberation of all slaves in the Khanate, and the abolition in perpetuity of slavery and of trade in men, shall remain in full force, and the Government of the Khan engages to employ all the means in its power in order to watch over the strict and conscientious prosecution of this matter.

18. A fine is inflicted on the Khanate of Khiva to the extent of 2,200,000 rubles, in order to cover the expenses incurred by the Russian Exchequer in the prosecution of the late war, which was provoked by the Government of the Khan and by the Khivan people. Since, owing to the insufficiency of money in the country, and particularly in the hands of the Government, the Khivan Government is unable to pay the above sum within a short time, the Khivan Government shall, in consideration of such difficulty, have the right of paying the said fine by installments, with the addition of interest thereon at the rate of 5 per cent. per annum, on condition that during the first two years 100,000 rubles shall be annually paid into the Russian Exchequer, 125,000 rubles per annum during the two ensuing years, and, after that, 175,000 rubles per annum during the succeeding two years; and in the year 1881, that is to say, after the expiration of eight years, the sum of 200,000 rubles shall be paid; and lastly,

a sum of not less than 200,000 rubles per annum shall be paid until the final settlement of the claim. The installments may be paid both in Russian bank-notes and in the current coin of Khiva, at the pleasure of the Government of the Khan.

The first installment shall be paid on the 1st (13th) of December, 1873. On account of this installment, the Khan shall have the right to levy a tax for the current year from the population on the right bank, according to the assessment hitherto in force. This collection shall be terminated by the 1st (13th) of December by agreement between the Khan's collectors and the local Russian authorities.

Subsequent installments shall be paid in by the 1st (13th) of November of each year until the entire fine, with interest thereon, shall have been paid off.

After the expiration of nineteen years, that is to say, by the 1st (13th) of November, 1892, after the payment of 200,000 rubles for the year 1892, the sum of 70,054 rubles will still be due by the Government of the Khan; and by the 1st (13th) of November, 1893, the last installment of 73,557 rubles shall be paid. Should the Government of the Khan desire to shorten the term of payment, and thus to reduce the amount of accruing interest, it shall have the right to pay larger annual installments.

These conditions have been fixed and accepted for exact execution and constant guidance on the one part by General Aid-de-camp Kauffmann, Governor-general of Turkistan, and on the other part by Seid-Muhamed-Rahim-Bahadur-Kahn, Ruler of Khiva, in the garden of Hendemian (the camp of the Russian troops at the city of Khiva), on the 12th (24th) day of August, 1873 (on the first day of the month of Radjab, in the year 1290).

The original treaty was signed and sealed by General Aid-de-camp Kauffmann, Governor-general of Turkistan, and by Seid-Muhamed-Rahim-Bahadur-Khan.

---

*The Promise not to annex Khivan Territory.*

“EARL GRANVILLE TO LORD A. LOFTUS.

“Foreign Office, Jan. 8th, 1873.

“MY LORD,—Having received information from your Excellency and from Count Brunnow that Count Schouvalow, a statesman enjoying the full confidence of the Emperor of Russia, had left St. Petersburg for London at the desire of His Imperial Majesty, I had the pleasure of receiving his Excellency on the 8th instant.

“He confirmed the fact that it was by the emperor's desire that he sought a personal interview with me. It had caused great surprise to His Imperial Majesty to learn from various sources that a certain amount

of excitement and susceptibility had been caused in the public mind of this country on account of questions connected with Central Asia.

“The emperor knew of no questions in Central Asia which could affect the good understanding between the two countries. It was true that no agreement has been come to as to some of the details of the arrangement concluded by Lord Clarendon and Prince Gortchakow on the basis of Mr. Forsyth's recommendations as to the boundaries of Afghanistan; but the question ought not to be a cause to ruffle the good relations between the two countries. His Imperial Majesty had agreed to almost every thing that we had asked. There remained only the point regarding the provinces of Badakshan and Wakhan. There might be arguments used respectively by the departments of each Government, but the emperor was of opinion that such a question should not be a cause of difference between the two countries, and His Imperial Majesty was determined that it should not be so. He was the more inclined to carry out this determination in consequence of His Majesty's belief in the conciliatory policy of Her Majesty's Government.

“Count Schouvalow added, on his own part, that he had every reason to believe, if it were desired by Her Majesty's Government, the agreement might be arrived at at a very early period.

“With regard to the expedition to Khiva, it was true that it was decided upon for next spring. TO GIVE AN IDEA OF ITS CHARACTER IT WAS SUFFICIENT TO SAY THAT IT WOULD CONSIST OF FOUR AND A HALF BATTALIONS. Its object was to punish acts of brigandage, to recover fifty Russian prisoners, and to teach the Khan that such conduct on his part could not be continued with the impunity in which the moderation of Russia had led him to believe. NOT ONLY WAS IT FAR FROM THE INTENTION OF THE EMPEROR TO TAKE POSSESSION OF KHIVA, BUT POSITIVE ORDERS HAD BEEN PREPARED TO PREVENT IT, and directions given that the conditions imposed should be such as could not in any way lead to a PROLONGED OCCUPANCY OF KHIVA.

“Count Schouvalow repeated the surprise which the EMPEROR, entertaining such sentiments, felt at the uneasiness which it was said existed in England on the subject, and HE gave me most DECIDED ASSURANCE that I might give POSITIVE ASSURANCES to Parliament on this matter.

“With regard to the uneasiness which might exist in England on the subject of Central Asia, I could not deny the fact to Count Schouvalow: the people of this country were decidedly in favor of peace, but a great jealousy existed as to any thing which really affected OUR HONOR and INTEREST; that they were particularly alive to any thing affecting India; that the progress of Russia in Asia had been considerable, and sometimes as it would appear, like England in India and France in Algeria, more so than was desired by the Central Governments; that the

Clarendon and Gortchakow arrangement, apparently agreeable to both Governments, had met with great delay as to its final settlement; that it was with the object of coming to a settlement satisfactory to both countries, and in a friendly and conciliatory spirit, that I had addressed to your Excellency the dispatch of the 17th October.

“The only point of difference which now remained, as Count Schouvalow had pointed out, concerned Badakshan and Wakhan. In our opinion, historical facts proved that these countries were under the domination of the sovereign of Cabul, and we have acknowledged as much in public documents; that, with regard to the expedition to Khiva, Count Schouvalow was aware that Lord Northbroke had given the strongest advice to the Khan to comply with the reasonable demands of the Emperor; and if the expedition were undertaken and carried out with the OBJECT and WITHIN THE LIMITS described by Count Schouvalow, it would meet with no remonstrance from Her Majesty’s Government, but it would undoubtedly excite public attention, and make the settlement of the boundary of Afghanistan more important for the object which both Governments had in view, viz., peace in Central Asia, and good relations between the two countries.

“As to coming to a decision at an early date, it appeared to me desirable, inasmuch as it would bear a different aspect if arrived at in the spirit with which both Governments were actuated, and not complicated by possible discussions raised in the British Parliament.

“I concluded by telling Count Schouvalow that I knew the confidence which was placed in him by the Emperor, and that I felt sure that my colleagues would agree with me in appreciating his visit to England, as a gratifying proof of the eminently conciliatory and friendly spirit with which the Emperor desired to settle without delay the question at issue.

“I am, etc.,

(Signed)

“GRANVILLE.”

*Treaty concluded between General Aid-de-camp Kauffmann, Governor-general of Turkistan, and Seid Muzafer, Ameer of Bokhara.*

ART. 1. The line of frontier between the dominions of His Imperial Majesty the Emperor of all the Russias and those of His Eminence the Ameer of Bokhara remains unaltered.

All the Khivan territory on the right bank of the Amu Darya being now annexed to the Russian dominions, the former frontier separating the possessions of the Ameer of Bokhara from the Khanate of Khiva, and stretching on the west from the locality called Khalata toward Gugertli,

*togai* on the right bank of the Amu is abolished. The territory situated between the former Bokharo-Khivan frontier, the right bank of the Amu Darya, from Gugertli to Meshekly, *togai* inclusive, and the line passing from Meshekly to the point of junction of the former Bokharo-Khivan frontier with the frontier of the Russian Empire, are annexed to the dominions of the Ameer of Bokhara.

ART. 2. The right bank of the Amu Darya being detached from the Khanate of Khiva, all the caravan routes leading from Bokhara to the north into the Russian dominions traverse henceforth exclusively lands belonging to Bokhara and Russia. The Governments of Russia and Bokhara, each within its own limits, shall both watch over the security of the march of caravans and of the transit trade.

ART. 3. Russian steamers and other Russian Government vessels, as well as vessels belonging to private individuals, shall have the right of free navigation on that portion of the Amu Darya which belongs to the Ameer of Bokhara.

ART. 4. Russians shall have the right to establish wharves (landing-places) and store-houses for merchandise in such places on the Bokharian banks of the Amu Darya as may be judged necessary and convenient for that purpose. The Government of Bokhara shall undertake to watch over the safety and security of the said wharves and store-houses. The ratification of the selection of localities for the establishment of wharves shall rest with the superior Russian authorities in Central Asia.

ART. 5. All the towns and villages of the Khanate of Bokhara shall be open to Russian trade. Russian traders and Russian caravans shall freely pass through all parts of the Khanate, and shall enjoy the special protection of the local authorities. The Bokharian Government shall be responsible for the security of Russian caravans within the confines of the Khanate of Bokhara.

ART. 6. All merchandise belonging to Russian traders, whether transported from the Russian possessions into Bokhara or from Bokhara to Russia, shall, without exception, be liable to a tax of two and a half per cent. *ad valorem*, in the same way as a duty of one-fortieth is charged on merchandise in the Turkistan province. Besides this *ziaket*, no other supplementary tax shall be imposed.

ART. 7. Russian traders shall have the right to transport their merchandise through Bokhara to all neighboring countries free of duty.

ART. 8. Russian traders shall be allowed to establish caravansaries for the storage of their merchandise in all Bokharian towns in which they may consider it necessary to do so. Bokharian traders shall enjoy the same privilege in the towns of the Turkistan Province.

ART. 9. Russian traders shall have the right to have commercial agents in all the towns of Bokhara, whose business it shall be to watch over the regular course of trade and over the legal imposition of customs dues, and who shall also be authorized to enter into communication with the local

authorities. Bokharian traders shall enjoy the same privilege in the towns of the Turkistan Province.

ART. 10. Engagements of trade between Russians and Bokharians shall be held sacred and inviolable on both sides. The Bokharian Government shall promise to keep watch over the honest fulfillment of all trading engagements, as also over the conscientious conduct of trading affairs generally.

ART. 11. Russian subjects shall, equally with the subjects of Bokhara, have the right to occupy themselves in the Bokharian dominions with the various trades and crafts which are allowed under the *Shahrigate*, in exactly the same way as Bokharian subjects are permitted in the Russian dominions to follow those occupations which are sanctioned by the laws of Russia.

ART. 12. Russian subjects shall have the right to possess immovable property in the Khanate, *i. e.*, to acquire by purchase gardens and cultivable lands. Such property shall be liable to a land-tax on an equality with the properties of Bokharian subjects. The same right shall be enjoyed by Bokharian subjects within the limits of the Russian Empire.

ART. 13. Russian subjects shall enter the Bokharian dominions with permits, issued by the Russian authorities, for crossing the frontier; they shall have the right of free passage throughout the entire Khanate, and they shall enjoy the special protection of the Bokharian authorities.

ART. 14. The Government of Bokhara shall in no case admit into its country any emigrants from Russia, whatever may be their nationality, who are not provided with permits from Russian authorities. If a criminal, being a Russian subject, seeks refuge within the confines of Bokhara from the pursuit of the law, the same shall be arrested and delivered over to the nearest Russian authorities.

ART. 15. In order to hold direct and uninterrupted relations with the superior Russian authorities in Central Asia, the Ameer of Bokhara shall select from among those around him a person of confidence whom he shall establish at Tashkent as his Envoy Plenipotentiary. Such envoy shall reside at Tashkent in a house belonging to the Ameer, and at the expense of the latter.

ART. 16. The Russian Government may, in like manner, have a permanent representative in Bokhara, who shall be near the person of His Eminence the Ameer. The Russian Plenipotentiary in Bokhara, as in the case of the Ameer's Plenipotentiary in Tashkent, shall reside in a house belonging to the Russian Government, and at the expense of the latter.

ART. 17. In deference to the Emperor of all the Russias, and for the greater glory of His Imperial Majesty, His Eminence the Ameer Seid Muzaffer has resolved that henceforth and forever the shameful trade in men, which is so contrary to the laws of humanity, shall be abolished within the limits of Bokhara. In conformity with this resolution, Seid Muzaffer shall immediately send to all his beks the strictest orders to that

effect. Besides the order abolishing the slave-trade, commands shall be sent to all the frontier towns of Bokhara to which slaves are brought for sale from neighboring countries, to the effect that in case slaves should be brought to such places, notwithstanding the orders of the Ameer, the same should be taken from their owners and immediately liberated.

ART. 18. His Eminence Seid Muzafer, being sincerely desirous of developing and strengthening the friendly and neighborly relations which have subsisted for five years to the benefit of Bokhara, shall be guided by the seventeen Articles composing the Treaty of Friendship between Russia and Bokhara. This Treaty shall be written in duplicate, each copy being written in the two languages, one in the Russian and the other in the Turkish language.

In token of the confirmation of Treaty, and of its acceptance as a guide to himself and to his successors, the Ameer Seid Muzafer has attached his seal. In Shaar, the 28th day of September (O.S.), 1873, in the month of Shagban, 19th day, 1290.

---

*An Afghan Prince on the Importance of Merve.*

THE Sirdar Iskander Ahmed Khan, Baruzkei of Afghanistan, remarks as follows :

“Lord Granville’s policy in fortifying Afghanistan on one side only, and leaving exposed the others to the inroads of enemies, excites my utmost surprise. It is like unto a man building a house with three walls, and leaving the gable-end to adventurers.

“Such is just now the case with Afghanistan. Lord Granville insured, as he thought, the safety of Afghanistan in ascertaining its boundary on the Oxus, and leaving exposed that toward the north-west, thus opening a passage to Russia by way of Merve, to which she (Russia) is already approaching, as the recent movements of General Lomakin at once indicate.

“I really think the English Government has no time to lose by looking indifferently at the question. It may be already predicated that Russia will certainly take Merve. When that is accomplished, it is equally certain England will lose her prestige, not only in Afghanistan, but likewise in Persia, and then she (England) must have recourse to an expedient after the fashion of a Chinese wall on the Indus to maintain her supremacy in India. Thus, the national expenditure on behalf of Afghanistan for these twenty years past will be merged and finally lost, and that not through the treachery of the Afghans, or their unfaithfulness toward England, but through the misguided policy of England herself in allowing the most powerful invader to take possession of the threshold of the house, and then telling the inmates to take care of themselves.

“Merve, at this time, is only a refuge for marauders; but let Russia possess it, and it will then become a place of notoriety, and one of the richest in the world, both for its fertility and well-known capacity for the maintenance of a corps of soldiers at little cost: example, five or six melons only will constitute a camel-load. Hence the animals which rove at large become fat and sleek, without care of the owner, and vegetation everywhere is equally luxuriant. In short, if Merve pass into the hands of Russia it will regain its former splendor. But the question will not rest here, that Russia will take Merve merely, and hold it quietly, but she will take the Morgab River also, and march up to it, and thus possess all the country. For example, when she leaves Merve, the first country worthy of note with which she will come in contact on the same river is Ulatan, with its ruined fort, and which was the country of the Salore Turkomans for some years after their defeat by the Persians, and who, through the invasion of the Teku Turkomans, were compelled to desert, and for these fifteen years they have come under the jurisdiction of Herat in the fort of Marooghagh, and cultivate its whole territory. The next country Russia will seize is Panjdeh, on the same river, where are Sarok Turkomans dwelling, which place is nearly equal in fertility to Merve. That country was frequently dependent upon Herat; for example, the Shah Kamran, the last sovereign of Sadozai, had always a commission there, and my father, at the request of the Sarok Turkomans, sent twice a commissioner among them to collect the taxes.

“One stage farther on, and Russia will come to the fort of Marooghagh, and from thence within one stage to the fort of Morgab, which is situated on the high-road betwixt Herat and Maimana, and, farther on still, to Afghan Turkistan. When Russia shall have reached here, she will divide or cut off Herat from Afghan Turkistan, and thus extend her power from one side to Maimana, and the other side to Herat Badgheese as far as the Coshk, which is separated from Herat Bason by the high mountains of Baba. The countries I have named are nearly equally fertile, and also favorable to any number of armies marching through.

“Russia having established herself in these countries, she will lose no time in exercising her powerful influence upon the whole of Afghanistan, by sending a mission under the name of commercial or scientific purposes—a pretext which is not uncommon to European diplomacy, and which invariably achieves the desired policy. In that case Afghanistan will not be able to refuse the Russian mission, as she has done up to the present time, the enemy being at the threshold.

“I can not think that Russia will approach Merve without the secret consent of Persia, who must not consent to Russia’s aggression thither unless some specious proposition be made, which can not be less than allowing her to take Herat by means of her aid.

“Persia must have two points of interest, viz.: First, the legitimacy of Merve, which belongs to her of ancient right; and, secondly, the cost of

two armies which perished there. Therefore Persia must oppose any power approaching Merve, or, if she be unable to do so herself, she must call for the help of England. Should she do neither (as she has done to the present, in not mastering her own territory and leaving it to the mercy of intruders), then the whole question has approached a solution.

“In my opinion, England has not long to reflect upon the matter indifferently; she must, as soon as possible, propose to Persia the conquest of Merve, and thus prevent Russia from taking it. Should Russia, notwithstanding, make aggression upon Merve, it will be clear that she has Persia in view (not a country left at the mercy of any aggressive power), by conquering which no power could legitimately accuse her. In the event of Persia’s refusal to conquer Merve at once, it remains that England take care of that country, either diplomatically, by ascertaining the boundary beyond Merve, or by taking possession of the country by means of the Afghan forces, and thus reckoning Persia the closest ally to Russia.

“ISKANDER AHMED KHAN.

“8th January, 1875.”

## APPENDIX C.

---

### *Russian Operations against the Yomud Turkomans in July, 1873. (Taken from the Vestnik Evropy.)*

GENERAL KAUFFMANN resolved to exact a fine from the Turkomans, and gave orders to commence the collection of the money from the Bairam-Shali branch of the Yomud tribe, the most numerous and turbulent branch of these Turkomans. The amount of the fine was fixed at 300,000 rubles, and notification of the same was made to the elders of the Yomuds, who attended on the general in the beginning of June, in obedience to his summons. The elders promised that the fine should be paid, and five of their number were allowed to return to their people with notice to that effect, while twelve others were detained as hostages.

At the same time, viz., on the 7th (19th) of July, and without waiting to see the result, a force under Major-general Golovatcheff, composed of eight companies, eight *sotnias*, ten guns (including two mitrailleuses), and a rocket battery, was advanced from Khiva to Hazarat, where the settlements of the Bairam-Shali Yomuds commence. Encountering only small parties of Turkomans, who followed its movements, this detachment at once commenced operations on the 9th (21st) of July by seizing a caravan, and firing some shells into the running Turkomans. It is therefore evident that from the very beginning it was not expected that the payment would be made, notwithstanding that five of the elders were suffered to return to their tribe to collect the money.

The military operations commenced on the fourth day after the appearance of the elders, in compliance with General Kauffmann's order. The commander of the detachment sent out against the Turkomans did, indeed, learn that the Yomuds had not alone not begun to collect the money, but that they had struck their tents with the intention of decamping and of offering us armed resistance. What credit attached to this intelligence it is impossible to say; at any rate, only three days had elapsed from the time of the first announcement to the elders of the imposition of the contribution. Nevertheless, although the initiative of the campaign against the Yomud Turkomans was not provoked by any acts on their part, but was solely taken by the local military authorities, no particular significance need be attached to that circumstance. It is a universally

acknowledged fact, confirmed by foreign writers, that the Turkomans are marauders. Whether they anticipated us and attacked us first, or we them, is a matter of little consequence. The material point is that, *having concluded a treaty with Khiva*,\* Russia could not allow an element of the population to remain free from her influence, which would most certainly interfere with the fulfillment of the terms of the treaty, a circumstance which might possibly necessitate a renewal of Russian military operations in the Khanate of Khiva.

On the 13th (25th) of July, General Golovatcheff encamped his force at the Chandyr village, and was at once surrounded by large masses of Turkomans. The enemy here made their first display of energy, attacking the force on different sides, until the infantry fire, the artillery, and rockets finally forced them to turn and fly, the troops following in pursuit for a distance of three and a half versts. During this action, Lieutenant Kamenetski with a few Cossacks, forming an outpost, pursued a party of Turkomans, and fell into an ambush, where they were all killed. The enemy suffered a great loss. The affair of the 15th (27th) of July was, however, still more grave. The Turkomans, as it was stated in the official report, "fought with a furious determination; pushing their caps over their eyes, they rushed upon our bayonets with sabres and halberts." There was in this action even a "critical moment," according to the official report, not, of course, in the sense of a possibility of our losing the day; that we could not have lost, for in the report there is nothing to show that the enemy's fire occasioned any harm to our soldiers. The Turkomans fought principally with cold steel, and it was for that reason that they rushed upon our front ranks. The "critical moment" occurred when one of the Cossack *sotnias* which was sent forward, being obliged to draw back before superior forces, losing its officer, Lieutenant-colonel Esipof; "the Turkomans broke through the front of our troops, following upon the heels of the Cossacks. Both mounted and on foot, they rushed to this attack, armed exclusively with sabres and halberts. Those among them who had no horses came galloping to our front, mounted behind the horsemen, and jumping down, joined in the attack on our ranks. Bare-footed, and clothed only in shirts and loose trousers, with their sleeves tucked up, and screening their eyes with their left arms, they broke with shrieks and shouts through an opening between the 2d Rifle Battalion and the 8th Orenburg *sotnia*, falling on the suite of Major-general Golovatcheff, and on his escort. Golovatcheff was himself wounded, receiving a sabre-cut on his right wrist."

The chief of the staff of the detachment also received a sabre-cut. His Highness Prince Eugene Maximilianovitch (of Lauchtenburg) himself shot, with a revolver, a Turkoman who attacked him. These unmounted Tur-

---

\* The treaty was signed on the 12th (24th) of August, 1873, having been ratified by the Emperor.

komans had evidently devoted themselves to death, because they could not have hoped to escape with the horsemen who brought them up to the Russian front. The enemy was beaten back at all points, and in retreating were overtaken by shells.

Our detachment then advanced through the town of Ilyaly along the road to Kyzyl-Takyr, without at first meeting with any opposition; but, encountering the enemy again farther on, it had to push its way for eight versts through masses of Turkomans. On reaching the Ana-Murat canal, it was discovered that the detachment had been proceeding in a wrong direction, owing to its having lost its guides. It should not have marched to Kyzyl-Takyr, but to the lower extremity of the Ana-Murat-Bai canal, where the enemy was concentrated. Having, therefore, passed the night by the Ana-Murat-Bai, the detachment advanced on the next day to the lower part of that canal.

Our losses on the 15th (27th) of July consisted of—killed, one staff-officer and three privates, and wounded, one general, four officers, and thirty-two privates. According to native accounts the enemy lost only 800 men. The Turkomans engaged in the action are said to have numbered 4000 foot and 6000 horse.

On reaching the Niaz-Sheikh Canal, General Golovatcheff received intelligence concerning the whereabouts of the Turkomans, which compelled him to resume his former direction. On the 17th (29th) of July the detachment had another engagement, which was remarkable only for the fact that our soldiers captured a large transport escorted by the Turkomans, on which occasion the detachment captured upward of 5000 head of cattle, 119 camels, and about 3000 arbas (three-wheeled carts) laden with various articles of property. The Turkomans fled in great haste, leaving behind them not alone their property, but also their wives and children; and the official report in reference to this, making no allusion to any loss on our side, speaks only of slaughtered Turkomans.

On the following day, the 18th (30th) of July, General Golovatcheff, returning to his previous halting-place by the Niaz-Sheikh Canal, where his (Turkistan) detachment was joined by the Orenburg detachment, and by the main body of the Russian troops under General Kauffmann, who, receiving no intelligence from General Golovatcheff's detachment, owing to the interception of the communications by the enemy, had himself advanced from Khiva on the 15th (27th) with ten companies, eight guns, and one *sotnia*, leaving in Khiva only six companies with two guns. The Orenburg detachment had left still earlier, and in the wake of the Turkistan detachment, reaching Kyzyl-Takyr on the 15th (27th) of July, and proceeding from that place to Ilyaly, where General Golovatcheff arrived later. General Kauffmann marched first to Hazarat, and then to Zmukshir; that is, he took the same direction as that followed by General Golovatcheff, but proceeded along the other side of the canal.

On the 19th (31st) of July all the detachments were assembled at Ilyaly.

The rout of the Turkomans, when our troops came suddenly upon them, was complete. A considerable number of them were killed and wounded; 9000 head of cattle were captured, and the dwellings, crops, and various stores of the Turkomans along General Golovatcheff's line of march from Hazarat to Zmukshir were devoted to the flames; altogether about 3000 laden arbas were destroyed and burned by our troops. Materially weakened, and morally beaten, the Yomuds were dispersed on all sides.

After the 20th July (O. S.) deputations of Yomud Turkomans came to General Kauffmann, appealing for mercy. The commander of the forces, nevertheless, proposed to exact some portion of the fine from the Yomuds, which should be in proportion to the means which, on inquiry, they should still be known to possess. From the other tribes General Kauffmann demanded a payment of 310,000 rubles within a twelve days' term, allowing them to make up half of that sum in camels.

\* \* \* \* \*

The three Asiatic Khanates of Kokan, Bokhara, and Khiva, preserving only an appearance of independence, and having lost some portions of their territories, have fallen under the actual influence of Russia. Kokan is isolated from the two other Khanates. Khiva is now separated from Bokhara, and Bokhara and Khiva are now entirely open to Russian troops, who, at the same time, command the irrigation sources of those Khanates, and by that means alone hold the populations of those countries entirely at their mercy.

\* \* \* \* \*

Although by the treaty with Khiva our frontier on the western side is defined by the old bed of the Oxus, yet it exists, of course, only as far as those extreme points where the Khivan territories merge westward into the steppes. The points already occupied by Russian troops on the south-eastern coast of the Caspian lie considerably to the south of the Uzboi (the so-called ancient bed of the Oxus), so that here the line of frontier must necessarily be formed by the *Attrek*. It has already been officially declared to be our boundary by the Russian authorities, and has been practically recognized as such by Persia, our immediate neighbor in that quarter.

---

*Movements of Russian Troops on the Oxus in January, 1874.*  
(From Russian Official Accounts.)

Later on, it was given out that the Turkomans intended to ravage the country appropriated to Russia in the Delta of the Oxus, so soon as the ice became strong enough to allow them to pass over it to the Russian side.

Accordingly, on the 4th of January, Major Dreschern marched from Petro-Alexandrovska with four companies of infantry and fifty Cossacks,

taking with him two field-guns and two howitzers. Three days later, Colonel Ivanoff followed with a *sotnia* of Cossacks and a rocket company, leaving instructions for two companies of infantry, with a troop of field artillery and fifty Cossacks, to be in readiness as a reserve force in the event of its being required.

The troops thus left in garrison were three companies of infantry in full complement, and a troop of Cossacks, with the garrison artillery, and a troop of mountain artillery, or a total of something more than 1000 men.

The troops forming the expeditionary force were supplied with fur coats, felt blankets, and felt boots.

Arrangements were made for the erection of tents by the local inhabitants at the various places where the troops were appointed to bivouac.

The average temperature was 5° below freezing-point (Reaumur); during the night it fell to 11° and 12°. It was daily expected that the river would be blocked with the ice.

The official reports state that the rumors concerning the hostile intentions of the Turkomans having increased, Colonel Ivanoff ordered the reserve force to quit the fort, which it accordingly did on the 15th of January, under the command of Lieutenant-colonel Aderkas, provided with every winter requirement, with provisions for nineteen days, and accompanied by a transport of seventy camels, laden with sacks of biscuits, buckwheat, and conserved meats.

The first intimation of the crossing of a body of Turkomans to the right bank of the Oxus was received on the 15th of January, *i. e.*, on the same day on which the reserve issued from Petro-Alexandrovsk. It was then said that the Turkomans had made their appearance at Khodjà-Kul (lake) at Kipchak, and at the same time it was rumored among the Kirghiz that they intended to break past the Russian column to the encampments of the nomads of the Daù-Kara, a lake situated about seventy miles to the north-east of Nukus.

Subsequently to this it was learned that a body of about 300 Turkomans had attacked the fortified post of Mohmut-Kul, but that, failing in their attempt to seize it, they had proceeded to Kipchak, destroying all the tents and stores of clover prepared for the Russian troops.

At Nukus, Colonel Ivanoff found no signs of the Turkomans, but his spies brought him the intelligence that some 6000 Turkomans, mounted and on foot, were assembled in the vicinity of the Laudan, and all along the course of that canal up to Kipchak. It was further stated that these Turkomans were under the leadership of Kazy-Murad (one of the deputation of elders unwarrantably kept as a hostage during the Khivan expedition [see page 519], but who succeeded in making his escape), and of a Kirghiz named Dosan. The spies reported that none of the other elders of the tribes joined in the movement, although they suffered their people to take part in it.

On the 17th of January it was ascertained that about 1000 Turkomans

had crossed the Oxus near Kipchak, and had taken the direct road to the Daù-Kara.

Colonel Ivanoff being at this time left with only fifty mounted Cossacks (having previously detached one *sotnia*, with a rocket company, to escort back to Petrovsk the officer who had brought the re-enforcements to the Oxus), mounted 100 riflemen upon cart-horses, and sent them, under Lieutenant-colonel Dreschern, in the direction of the Daù-Kara, to the encounter of the returning escort. This improvised cavalry, without saddles or bridles, performed a journey of thirty miles, and, meeting the escort, rode back again.

On the 20th of January Colonel Ivanoff, leaving the greater portion of his baggage at Nukus, marched from that place to Nazar-Khan (upstream one march distance from Nukus), at which place Lieutenant-colonel Aderkas, coming down from Petro-Alexandrovska with the reserve forces, was ordered to await him, being instructed in the mean while to send patrols up the river, in order to ascertain the strength of the enemy and to prevent him from crossing. At this time the river was only partially frozen over, and it was found that the Turkomans were passing over at Kipchak, where the ice was strongest.

On the 21st and 22d of January the outposts of the united forces of Colonel Ivanoff and Lieutenant-colonel Dreschern, which were encamped at Nazar-Khan, were harassed by small parties of Turkomans, but these were fired upon and kept at a distance. On the 23d the force advanced up the river, provided with felts, furs, and ten days' rations, leaving the *impedimenta* at Nazar-Khan, under the charge of the Kirghiz elders. On the same day the force encamped at Kipchak, where the ice was traversable from three points, taking up a position immediately in front of the central crossing.

The left bank of the river was densely lined with Turkomans, who, while the Russian detachment was advancing toward Kipchak, likewise pushed on in the same direction. The Russians had barely formed their camp when the Turkomans opened fire upon them, but without any effect, to which the Russians did not respond. In the mean while the Cossack patrols kept the Turkomans from crossing above and below the Russian camp.

Having determined to pass over to the left bank, Colonel Ivanoff sent a cavalry force to reconnoitre all the three crossings; and while in this manner leaving the Turkomans in ignorance regarding the one he would select for passing his troops over, he dispatched Lieutenant-colonel Aderkas with two *sotnias* of Cossacks and a company of rifles, to drive back a strong body of Turkomans which had mustered at the lower crossing, about three miles lower down the river, and to examine the condition of the ice in that direction. This operation was speedily performed, with very little firing, and the ice was reported to be of a good thickness.

On the night of the 23d of January the Turkomans kept up a sharp fire

upon the Russian camp, and made some bold attacks upon the chain of pickets and on a patrol, but were repulsed with heavy losses.

The Turkomans were chiefly massed on the left bank, opposite the Russian camp, believing that the Russians intended to cross the river at that point. In order, therefore, to keep them in their delusion, the Russian commanding officer sent Lieutenant-colonel Dreschern with two companies of infantry and a troop of mountain artillery to occupy the right bank of the lower crossing, Lieutenant-colonel Aderkas being at the same time ordered to proceed with three *sotnias*, one company of rifles, and a troop of field artillery, to make a demonstration in the direction of the higher crossing leading to Kipchak, while Colonel Ivanoff, with the main body and the train, remained temporarily in camp.

The detachment under Lieutenant-colonel Aderkas was soon engaged in a sharp fusillade with the Turkomans, of whom 1500, scattering themselves over the ice, and, screening themselves behind carts and boats brought down by the drifting ice, kept up a continuous fire, accompanied by a practice with their falconets from the left bank. The field artillery being brought into play, the Turkomans were driven back from off the ice. Ordering Lieutenant-colonel Aderkas to remain where he was for about an hour, Colonel Ivanoff hastily broke up his camp, and moved quickly with all the rest of his force, and with the train, to the lower crossing, where Lieutenant-colonel Dreschern had located a company of infantry on the ice midway between the two banks.

On being informed that the ice was sufficiently strong for the passage of the troops, Colonel Ivanoff organized a special column for the occupation of a position on the left bank. Taking with them a troop of mountain artillery, the men ran across the river (850 fathoms wide), and, firing a volley at the Turkomans massed on the bank, established themselves in a strong position. Preparations were next made for the passage of the remainder of the force, which was effected with complete success. The guns were drawn over by the men, the wheels being bound round with felt, and the ends of the carriages placed on wooden slides, in order to lessen the friction. Lieutenant-colonel Aderkas had joined the main force before the passage was effected. Abandoning his position at the higher crossing, he was followed by great numbers of Turkomans. On joining Ivanoff's detachment, however, two *sotnias* were told off to go up the right bank, in order to protect the transports. Seeing that the Russian troops had already established a footing on the left bank, and that the rest of the force could not be prevented from crossing, the Turkomans offered no further resistance, and gradually dispersed.

From the position on the left bank Colonel Ivanoff sent a letter to the Khan of Khiva, acquainting him with the fact of his having traversed the river, and requesting him to pacify the Uzbegs, and not to interfere in the affairs of the Russians with the Turkomans. He also requested the Khan to attach an agent to the Russian detachment so long as it remained on

the left bank of the Oxus. On the 25th of January the Russian detachment marched to Kazy-Murad, an encampment of Turkomans. Leaving Kipchak on its left, the Cossack cavalry sent in advance demolished all before them so effectually, that when the main force came up there was not a living creature to be seen, fire and sword having already laid waste the country.

Wishing to avoid the permanent dwellings of the people of Kipchak and of Mangyt, Colonel Ivanoff proceeded toward the Kuba-tau hills, but found, to his astonishment, that the country was flooded. This was a surprise even to the local guides, who knew that the canals were always dry in the winter, and were not aware of the fact that the Turkomans had destroyed the dam of the Arna canal.

As the water was rising rapidly over the low marshy lands, Colonel Ivanoff recalled the Cossacks, who were continuing their work of destruction in all directions, and fell back upon the desolated Kazy-Murad encampment, where the Russian force halted on the night of the 25th of January.

On the morning of the 26th the Russian detachment marched through Mangyt, the commanding officer assuring the inhabitants that they had nothing to fear, and crossing in that town the only existing bridge over the Arna canal, proceeded four miles beyond Mangyt, coming upon the winter encampments of the Kulchar Turkomans, which were at once demolished; the Cossacks performing the work of destruction at distances, while the infantry did it as effectually along the line of march.

At Mangyt, Colonel Ivanoff had received a notification from the Khan of Khiva to the effect that the Yomud Turkomans of Hazarat had given in their allegiance. To this Colonel Ivanoff replied that, although he did not fully believe in the sincerity of the Yomuds, he would not pass through their lands, but would proceed by way of the encampments of the Chaudurs, and so back again to the right bank of the river. Taking warning by the fate of the Kulchars, the Chaudur elders presented themselves on the 26th of January in the Russian camp at Lake Chagat, on the north-west side of the Kuba-tau hills, with a moiety of the contribution demanded of them, on the condition that they should not be molested. They entreated Colonel Ivanoff not to proceed through their lands, but to this he would not accede, assuring them, however, that he would do the people no injury if they complied with his demands. On the 27th the Russian detachment bivouacked at the Ikdyr wells, where another moiety of the contribution was paid by the Chaudurs. On the 28th the detachment reached Porsu (about thirty-three miles north-west of Kipchak), and halted at Lake Lar. Here the elders of the Imraly, Kara-Dashly, and Kara-Ilyaly Turkomans presented themselves with tenders of submission, and with some of the contributions exacted from them.

On the 29th of January, Colonel Ivanoff, with a portion of his detachment, visited the site of Old Porsu, where Prince Cherkaski and his suite

were murdered in 1717. The place is now a scene of utter ruin, having been abandoned by the inhabitants thirty years ago on account of a deficiency of water. Here a triple volley was fired in honor of Bekovitch and his followers, and after a night's halt Colonel Ivanoff rejoined the rest of his force. On the 30th of January he camped again at Lake Chagat.

On the 31st the force entered Kipchak, where it was obliged to wait for the opening of the river, the ice having been weakened by warm weather. On the 4th of February the river was clear of ice, and on the 5th the Russian detachment crossed over in boats to the right bank.

During the stay of the Russian force in Kipchak, Colonel Ivanoff sent three *sotnias* of Cossacks down the river to the Laudan canal, to survey the left bank in that direction, a work which had not been done during the expedition to Khiva in the summer. These *sotnias* performed the journey (fifty-three miles there and back) in a single day.

## STEPPE ROUTES.

1. To Khiva from Novo-Alexandrovsk (a former fort) in Kaidak Bay (410 miles), across the Ust-Urt, to Aibugir Bay on the Aral. Turpaef, an Armenian, rode this way to Khiva in seven days, in 1834. A caravan would be three weeks traveling.
2. The Mangyshlak caravan route through Baki-Kuduk, by Tabyn-Pu and Aibugir, 569 miles; a month's caravan journey. Water scarce, and fodder only along the first few stages.
3. To Kune-Urgendj from Kinderlinsk Bay, 420 miles. Little water. Here, however, proceeding more to the south, the Mangyshlak road may be struck, reducing the distance to 316 miles.
4. From Krasnovodsk, the Sary Kamysh road, according to Muravief, 546 miles; but according to Markorof about 486 miles. Markorof route in all respects the best; falls in with Muravief's at Beshdeshik, and proceeds by that.
5. From Hassan Kuli (the Degeli route) by Gesli Ata, and then following Markorof's route, twice crossing the old bed of the Oxus, 360 miles.
6. The Ortokui route, between the two last mentioned, leaving the first at the fourth stage, and so reducing the distance by  $53\frac{1}{2}$  miles.
7. From Gomush-Tepe, across the embouchure of the Attrek, and then partly following the Degeli route, and partly over a separate route, by the Shargel Lake—Vambery's route.
8. The Teke route, also between the above two (four and five) to Chin-Mahomed and Ortokui,  $533\frac{1}{2}$  miles.

9. From Balkan Bay, along the old bed of the Oxus to Kune-Urgendj. According to Dandevil's inquiries in 1859, it would appear that the distance to Kune-Urgendj, from the eastern extremity of Balkan Bay, is 385 miles, which can be accomplished in eight days. Fresh water at each night halt.
10. From Krasnovodsk to Kizyl Arvat, through Mulla Kari, 253 miles. This route was traversed in 1870 by a detachment. No fodder, sands, and little fuel. This route crosses the bed of the Oxus at Aidin well, and then passes along the northern side of the Kurrendagh mountains. Beyond Kizyl Arvat it proceeds eastward along the base of the Keppet-dagh mountains, through the country of the Teke Turkomans. Karys fort, 83 miles beyond Kizyl Arvat;  $73\frac{1}{2}$  miles farther is Ashabad, and about 200 miles farther still lies Sarak, from which, says Colonel Venukoff, Herat is only 133 miles. The distance from Krasnovodsk to Herat by this route he estimates at 633 miles.
11. From Astrabad to Herat the road passes through Boodjnur (200 miles) —Meshed (362 miles), equal to twenty-six stages, through a populous country. Entire distance to Herat,  $580\frac{2}{3}$  miles.

Colonel Venukoff remarks with reference to this route :

Properly speaking, this great trade route lies beyond the limits of Turkomania, and within those of Persia ; but it is in a strategical sense the most important of all, even with respect to the Turkoman country alone, which it flanks on the south.

---

#### COLONEL VENUKOFF'S LIST OF ROUTES FROM RUSSIA TO CHINA.

##### I. *From the Eastern Boundaries of Manjuria to Gueerin.*

(a.) *From the Gulf Possette through Houn-Tchun and Ningootoo.*

	Versts.*	
The Bay of the Expedition.	0	At the mouth of the river Tchurha, viz., 10 versts by the sea from the Novgorod Post.
1. The town Houn-Tchun. . . . .	30	By the valley of the river Tchurha, across the frontier (20 versts), and then into another valley.
2. The river Mitchen. . . . .	25	By the left bank of the river Toomen-Ouli.

---

\* Three versts are about equal to two miles.

	Versts.	
3. The river Kachari.....	35	By the left bank of the river Toomen-Ouli. Some Chinese huts in the valley.
4. " " .....	25	Through the valley Kachari. Chinese huts.
5. " Fourcha .....	25	" " "
6. Hata.....	30	Through a hilly country.
7. The river Malchouri.....	30	Over well-wooded hills.
8. " Hourcha .....	40	Hills along the river Malchouri.
9. The town Ningootoo.....	20	Here you cross the river Hourcha.
	<hr style="width: 10%; margin: 0 auto;"/> 260	versts.
10. Village, Koulou-lamouhoo .	20	Hilly country on the left bank of the river Hourcha.
11. " Scharan .....	21	Hilly country on the left bank of the river Hourcha. A postal station (first from Ningootoo).
12. " Birha .....	31	Hilly country to the north of the lake Birtine; cross the river Aicha.
13. " Talan .....	31	Hilly country, covered with pine woods to the north of the river Fouldsehai.
14. " Omoho-soro.....	41	Over the hills.
15. The village Ikessou.....	21	" "
16. " Touyitoune....	41	Over the ridge of Fosschan.
17. " Lafa.....	31	Through the mountains.
18. " Eguemoo.....	40	" "
19. " Nishicha.....	38	Hilly country along the river Echanebiri.
20. The town Gueerin.....	8	Through the valley of Soungari, which is crossed near the town.
	<hr style="width: 10%; margin: 0 auto;"/> 302	versts.
Total.....	562	versts. 20 stages.

The general aspect of the route is hilly and woody. It is thinly peopled, and difficult traveling for carriages. There are frequent and heavy rains. Many small rivers overflow. Snow in winter.

(b.) *From the Mouth of Soungari to Gueerin.*

	Versts.	
Michael-Semionovsk Station.		About fifteen versts below the junction of the rivers Amur and Soungari.
The town San-Sin (Ilan-Hala)	310	By the river Soungari in boats.

	Versts.	
1. Miao-Tzoune . . . . .	10	Cross the river Hourchoo.
2. Ordo-Moussoune . . . . .	35	The details of this route are not well known: Chinese road-books do not give them. From the maps it is seen that there must be crossings over the rivers Ma-jan, Tchabar, Ficktoo (Ajechai?), Altchoucka, and Lalin. The river Altchoucka is some ten versts from the Sakouri station. The general aspect of the country: slightly hilly, covered with wood on its eastern part, and more open and cultivated on the western. The population of the western part is small. After the testimony of Mr. Brunier and Mr. Williamson, the vegetation is good everywhere. Great deal of marshy land.
3. Tchungourkoo . . . . .	36	
4. Fourchoune . . . . .	36	
5. Fossichaine . . . . .	38	
6. Salé-Fotekoo . . . . .	20	
7. Ficktoo . . . . .	52	
8. Sakouri . . . . .	41	
9. Lalin-Dogone . . . . .	15	
10. Mangou-Karoune . . . . .	15	
11. Tenguel-Tchekoo . . . . .	15	
12-15. The town Guerin . . . . .	114	See route No. II. Stages 33-36.
In all, from San-Sin . . . . .	427	
From Michael-Semionovsk . . . . .	737	By water by the Soungari, 1050 versts.

(c.) *Other Routes in Eastern Manjuria.*

Besides these carriage roads, which are bad, there are others in the Eastern Manjuria, which, to use a Siberian expression, are known under the name of *tajejni*, viz., forest. They are as follows:

(1.) *From the valley Souifoun to Ningootoo.*—By this route it takes fifteen days to go from Bladivostak to Ningootoo, probably some 300 versts. In Russian territory this route leads along the left bank of the river Souifoun; and in Manjuria, by the sources of the Mouren, and along the river Kouitoulin.

(2.) *From the bank of the Ousuri River, by the river Mouren to Ningootoo.*—A caravan road. If necessary, light vehicles can be used. On the road you meet with woods and hills; hardly any population. Twenty days' march (more than 400 versts).

(3.) *From the banks of the Ousuri, along Dumane, Kirkin, and Voken to the San-Sin.*—This is a bad path for pack animals; it winds through woody mountains. Over 360 versts.

(4.) *From the banks of the Ousuri, by Nour and Voken.*—A similar path, about 400 versts.

According to Mr. Williamson, there is no road between the towns San-Sin and Ningootoo, but the communication is kept up in summer by boats, and in winter on the ice along the river Hourcha. The explorations made by Barbash in 1872 are not yet published.\*

## II. *From Blagovestchensk through Tzitzikar to Guerin.*

	Versts.	
Principal town Blagovestchensk	0	On the left bank of the Amour. Here the river Zeja adds its waters.
1. The town Aygoun.....	31	After having crossed Amour, the road leads along its right bank through a series of villages.
2. Ganza (Homnia).....	15	A plain. On leaving the river Ganza you find the night stage at the village.
3. Eldjana .....	20	Hilly; fairly populated country.
4. Sandjana.....	17	At first you pass through a valley, afterward through a hilly country.
5. An idol temple, Tougousa.	20	By the valley of the river Koumour, after which you ascend some rising ground.
6. Sindjak.....	21	A descent from the wooded heights. Continue the march along the river.
7. Merchai.....	21	A valley, undulating ground, again a valley.
8. Sidigou.....	15	A valley, a hill. The country is flat near the village.
9. Simadou.....	24	Over small hills; an open, undulating country.
10. The town Merguen.....	29	Hilly country, fairly populated and cultivated.
	—	
	213	versts.
11. Eelaka.....	36	Hilly country.
12. Kamnika.....	21	The valley of the river Lolocho.
13. Boldo.....	31	Slightly hilly country. Cross the river Nemer. On the other side of the river Nonni to the west there is a small town, Boutcha.

---

\* These routes were published by Colonel Venukoff in 1873.—*Translator.*

	Versts.	
14. Locha .....	31	The valley of the river Nonni.
15. Nimnen .....	41	" " "
16. Tchachar .....	38	" " "
17. The town Tzitzikar.....	31	" " "
		The country is peopled and cultivated. The river Nonni is navigable between Merguen and Tzitzikar.
	<hr style="width: 10%; margin: 0 auto;"/> 229	versts.
18. Tamdecha .....	28	The valley of the river Nonni.
19. Ontochon.....	38	" " "
		A village some distance from the river.
20. Duhanay .....	38	The valley of the river Nonni.
21. Talcha.....	38	" " "
22. Kouré (Goulou) .....	34	" " "
23. Oulan-Nor.....	28	" " "
		There are Mongols in the neighborhood.
24. Mosin.....	22	" " "
25. Tchoukaou .....	15	" " "
		Near the village is the junction of the Nonni and the Soungari.
26. The town Bedounai .....	25	Crossing over the Soungari.
27. Shery.....	30	} Settlements in the valley Soungari.
28. Hotzi .....	30	
29. Soun-tcha-boo.....	17	
30. Talay-tchjao .....	26	
31. Mangou.....	26	
32. Tenguel-Tchekoo .....	26	
33. Faien.....	26	The road passes by some hillocks.
34. Shouran.....	26	The valley of the Soungari.
35. Town Boutcha .....	27	Cross the river Shouran; the valley of Soungari.
36. The town Gueerin .....	35	The valley of Soungari; cross the river close to the town. It contains nearly 60,000 inhabitants.
	<hr style="width: 10%; margin: 0 auto;"/> 535	versts.
In all, from Blagovestchensk...	977	versts. 36 stages.

Taking into consideration the distance from Gueerin to Moukden and Peking, we find that from Blagovestchensk to Moukden is 1381 versts, and to Peking, 2130 versts.

The road between Blagovestchensk and Gueerin is a good one for carriages—at least for China. There are postal stations. The inhabitants are rich in corn. Parallel with this road there is a water-way; it extends for more than 750 versts. It is practicable for steam navigation. The whole of this road was mapped out in the year 1870, by the topographer, Mr. Nachvalni, whose route much resembles the one given above. It was published in 1871 by the West Russian Geographical Society.

### III. *From Gueerin to Peking.*

	Versts.	
The principal town Gueerin...	0	On the left bank of the Soungari, in a valley bounded on the west by steep mountain slopes.
1. Seoudai .....	36	Up the mountain. Hilly country.
2. Eelmin .....	36	Hilly.
3. Saijan .....	28	Cross the river Eelmin. Hilly.
4. Eebadan .....	31	Cross the river Saijan. Hilly.
5. Altin-émel.....	30	Cross the rivers Eebadan and Itoun. To the north of the road lies the town Kouan-tchen-tzsée, with 35,000 inhabitants. It is important for its trade.
6. Hairsou.....	33	Hilly. The valley of Hairsou.
7. Aigné-Hauton.....	40	Cross the river Hairsou; afterward the valley. There are hillocks.
8. Maingou-hay.....	28	The valley of the river Aigué.
9. Town Khay-Youan-Sian..	28	Cross the frontier through the gate Ou-youan-boo.
10. Kaoli (near the town Té-lin)	43	Hilly.
11. Eelou.....	35	Cross the rivers Fan-hay and Eelou.
12. The principal town Moukden	36	A plain. The town is situated on the right; northern bank of the river Hounouhou.
	404	versts.
13. Zou-bian .....	32	A plain.
14. Zuy-lou-hay.....	21	Cross over the large river Laohay on rafts.
15. Bo-tzee-boo .....	36	A plain.
16. Earl-dao-tzeen.....	25	A plain.
17. Siao-hay-sian.....	25	Slightly hilly.
18. Town Kouan-neen-tehjeou.	37	A plain; slightly hilly.
19. Sin-tian .....	40	Very hilly; then a plain.
20. Dou-loou-bo-tian.....	13	Cross a river. Hilly.

	Versts.	
21. Town Zseen-tchjeou-foo...	26	Cross the river Daleen-hay.
22. Soun-shan .....	25	Cross the river Siao-leen-hay. Mountains.
23. Da-chan-tian .....	20	Hilly.
24. Town Neen-Youan-tchjeou	25	Hilly. Lan-Shan and Gan-tsao-leen ridge.
25. Shah-hay-só.....	20	Hilly. Not far from the sea. There is a bridge over the river Neen-Youan-hay.
26. Tchjun-hia-shó .....	20	Hilly.
27. Tsian-vey.....	36	Hilly. Cross two small mountain streams.
28. Town Neen-hay-Sian.....	27	Cross two small rivers, and passing through the gate of the great wall Shan-hay-gouan.

---

423 versts.

29. Town Foo-Neen-Sian .....	55	Hilly, and often steep mountains.
30. Loo-loo-Sian .....	25	Mountains. Cross the river Yan-hay.
31. Town Youn-neen-tchjeou..	18	Mountains. A tolerably large town. It is situated in the valley of Lan-hay (Shandoo-hola).
32. Soo-hay .....	27	Cross the Lan-hay, near the town. Mountains.
33. Fin-youan-Sian .....	35	Hilly.
34. You-Sian .....	40	Cross the river Shah-loo-hay. A plain.
35. Town Tsee-tchjeou.....	34	Cross the river Inn-mo-hay. A plain.
36. San-hay-Sian .....	36	Cross the river San-hay. A plain.
37. Town Toun-tchjeou.....	36	Cross the river Bay-hay (Pay-hó). This town is the corn port of Peking. The great stone wall in ruins.
38. Peking.....	20	There are two roads; the northern, paved with flagstones, is badly kept, and is a bad one for carriages. At Palee-tchao there is a canal; the southern road is not paved. There are many branch roads. The first brings you to a Manjurian town, the second to a Chinese town.

---

326 versts.

In all from Gueerin..... 1153 versts. 38 stages.

This is a post-road; but the stages are not always found as indicated in the post-books. The ascents and descents of the Lao-doun mountains are very steep, and are often washed away by heavy rains. Crossing over the mountain streams is also difficult. On this road, the distances from Pekin are as follows:

From Zourouhaytoo, 2227 versts; from Blagovestchensk, 2130 versts; from the mouth of the Soungari, 1890 versts; from the Gulf of Possette, 1715 versts. See for the details in the routes Nos. I., II., VII.

#### IV. *The Shortest Route from Blagovestchensk to Pekin.*

	Versts.	
1-17. The principal town Tzit-zikar . . . . .	443	See the route in Manjuria, No. II.
18. Village Barchirhay . . . . .	19	Cross the river Nonni on rafts and boats.
19. Village Gamiatay . . . . .	24	The valley of the Nonni; well populated.
20. Village Hatayhay . . . . .	24	A plain. Cross the branches of the river Yal twice on rafts and boats.
21. Small town Tchaul-hauto . . . . .	46	Slightly hilly. Cross the Tchaul in boats.
22. Kara-chersoutay . . . . .	40	A steppe; good pasture.
23. Datcheman-houdouk . . . . .	35	A steppe.
24. Hatchjattoo . . . . .	30	A steppe.
25. Mahay . . . . .	25	A steppe. Cross the river Toro twice. Two fords.
26. Nomouchin . . . . .	47	A steppe. Pastures not so good.
27. Hashattoo . . . . .	20	A steppe.
28. Village Boroairgueen . . . . .	30	A steppe. Cross the river Holo.
29. Tehjangoutoo . . . . .	22	A steppe.
30. Kaysou-Boulak . . . . .	33	A steppe. Small lake at the stage.
31. Dalay-häck . . . . .	22	A steppe.
32. Sheenegol . . . . .	30	A steppe.
33. Sain-hack . . . . .	36	A steppe and hills.
34. Kaysou-hodour . . . . .	24	A steppe.
35. Kookootchol . . . . .	26	Cross over Hara-Mouren; a plain.
36. Tehjourgatay . . . . .	33	The valley of the river Locha; cross the same.
37. Shara-Nor . . . . .	31	Hills; a stage.
38. Honhotoo . . . . .	30	A valley.
39. Kouren-bouha . . . . .	20	The valley of the river Honhotoo.
40. Halmay-Oulan . . . . .	22	Hilly country.
41. Hareen-Ousoo . . . . .	30	Hillocks on the right bank of the Locha.

	Versts.	
42. Hohotouy.....	30	The valley of the river Locha.
43. Town Tchagan-So-Borchan	28	“ “ “
44. Hara-hoto .....	35	“ “ “
45. Sorabo.....	38	Over the mountains.
46. Sousaybo.....	15	The valley of the river Bao-hay.
47. Village Dan-ban.....	20	“ “ “
48. Small town Kuan-tchen...	16	“ “ “
49. The gate See-fin-Kheou ...	31	Mountains.
50-56. Pekin.....	211	See the route in Mongolia, No. VII.

In all..... 1576 versts. 56 stages, of which 28 (equal to 784 versts) are in Mongolia.

This road serves as the post communication in Eastern Mongolia, which is at present principally inhabited by a settled population; and as a route for couriers between Tzitzikar and Pekin. For the greater part of its extent it is a caravan road. It passes through a steppe which is rich in pastures. Near the village Boroairgueen it forks south-west, passing Heshouy, Boro-hoto, Tchjao-hoto, and the sources of Shara-Mouren to Dolon-Nor. From this place Boroairgueen is more than 450 versts.

In former times the road from Tzitzikar to See-fin-Kheou was used by the Russian caravans and embassies to Pekin. It is very convenient for small detachments of troops, especially for cavalry.

### V. *The Shortest Route from Bedounai to Pekin and Moukden.*

	Versts.	
The town Bedounai.....	0	From Tzitzikar, 276 versts; from the mouth of the Soungari by the river, 700 versts.
1. Hilly-Mangua.....	42	A steppe.
2. Beckheeri-Bayshan.....	30	“
3. Tchagastoo-Bayshan.....	20	“
4. Bataranhoui.....	35	“
5. Arou-Baucso (mount).....	35	“
6. Narhan-shanga.....	40	“
7. Village Borotoo.....	27	Mountains.
8. Hosho-Mangua.....	35	Steppe, with mountains.
9. Shara-Mangua.....	50	Cross over Lecho-hay. Hilly.
10. Tapir-dala.....	20	Steppe.
11. Eeké-Bayshan.....	45	Hilly steppe.
12. Bayshan.....	25	Along the river Neerkouy.
13. Kookoo-guerai.....	28	“ “ “
14. Hara-Bayshan.....	19	“ “ “
15. Tchagan-Hall.....	25	“ “ “
16. Baynoock.....	20	Mountains.

	Versts.	
17. Newtchugal-hoto.....	20	Mountains.
18. Village Kalka.....	27	“
19. Harelin-Hall.....	24	“
20. Abita-Dabagan.....	26	“
21. Kamchou-Soborchan.....	15	“
22. Koojin-Boé.....	35	Mountains. Cross to the sources of Heen-Lo-hay.
23. Olo-hoshou.....	23	On the same river.
24. Sousay-Bo.....	26	Mountains.
25. Dan-Ban.....	20	The valley of the river Bao-hay.
27. Kouan-Tchen.....	16	“ “ “
28. The gate See-fin-Kheou...	31	Mountains.
29-35. Pekin.....	211	See the route No. VIII.
In all.....	970	versts. 35 stages; of these 28 are in Mongolia.

From the town Bedounai through the valleys of the Soungari and Eetoun-Berri there is a road to the Altin-Emel station, which is situated on the main post-road from Gueerin to Moukden. This road, through a populous country, was passed by the missionary Williamson. It is 250 versts in length. And as the distance from the Altin-Emel station to Moukden (the route No. III.) is 243 versts, the total amount of versts between Bedounai and Moukden will be 493 versts, which is 170 versts shorter than that through Gueerin.

#### VI. *The By-road from Tzitzikar to Houlan-tchen.*

	Versts.	
The town Tzitzikar.....	0	
1-7. Moseen station.....	226	See the route in Manjuria, No. II.
8. Borhee-hatay.....	45	} Through a plain, then a slightly hilly country on the left bank of Soungari; a well-populated dis- trict.
9. Chabchily.....	40	
10. Odoultay.....	30	
11. Boulaktay.....	20	
12. Tchjoho-hoshotay.....	30	
13. Town Houlan-tchen.....	40	Cross the river Houlan.
In all.....	431	versts. 13 stages. This is a post- road.

#### *From Zourouhaytoo to Merguen. Routes from Argouni into the Basin of the River Nonni.*

	Versts.	
Old Zourouhaytoo station..	0	On the left bank of the Argoun, nine versts higher up than where it meets its tributary, the Gan.

	Versts.	
1. Netouga.....	40	After having crossed the river Argoun the road goes parallel to the river Gan, through a hilly country, and by the remains of a wall.
2. A meadow by the river Gan	32	Through the valley of the river Gan, and the hillocks which border it on its southern parts. In some parts the road is difficult to pass, on account of a great quantity of burrows made by marmots.
3. The river Aesken.....	38	Partly in valleys burrowed by marmots, and partly over woody and grassy hillocks.
4. The river Tchonga.....	33	Through the valley of the rivers of Aesken and Tchonga, among the mountains.
5. The river Kouldour.....	36	Over the Hingan; flat, marshy, covered with beech-trees.
6. The source of Nonni.....	26	A steep ascent from the marshy valley of Dzergeloun to the Hingan ridge. It is covered with woods. A steep descent to Nonni.
7. The river Nonni.....	21	Through a woody and grassy valley, sloping to the east.
8. " " .....	39	The same valley, mostly prairies. Four fords over the river.
9. " " .....	40	Over the mountains near the river, then again through the valley which is covered with woods. Here the river begins to be navigable for rafts.
10. The road forks to Merguen and Tzitzikar.....	38	The valley on the left bank of Nonni.
11. The river Houy-Lee.....	37	Over wooded mountains into the valley of Houy-Lee.
12. The river Houy-Lee, above its junction with the river Gan.....	41	Through the valley Houy-Lee, and over surrounding hillocks. The fords are dangerous at flood-time.

	Versts.	
13. The Toungouse village. . . . .	17	By some hillocks, along the river Gan. The first place where you meet inhabitants.
14. Leedzou, a Chinese village. . . . .	24	Cross the river Gan in boats at the village.
15. The town Merguen. . . . .	15	A valley. Cross the river Nonni in boats, at the town. Here the river is seventy sagen* wide, and from two to three versts at flood-time overflowed.

In all. . . . . 477 versts. 15 stages.

The road is difficult. The country is woody and marshy in the mountains. Carriages can be used with difficulty: a good road for caravans; pastures are plentiful. In summer the road is swarmed with insects; and in winter the overflow of the rivers is against the traveler. The distance from Zourouhaytoo to Blagovestchensk through Merguen is 661 versts.

#### VII. *From Zourouhaytoo to Tzitzikar.*

	Versts.	
The old Zourouhaytoo station. . . . .	0	On the left bank of the Argoun.
1. The spring Shigeldchee. . . . .	20	Cross the Argoun, then through the steppe. Plenty of water at the stage.
2. The spring Shindunay. . . . .	20	Three times over mountains.
3. The spring Yargoutay. . . . .	12	A high ridge of mountains.
4. The river Mirguell. . . . .	25	In dry weather, scarcely any water; in wet weather, impassable.
5. The town Kouloun-Boyr (Haylar). . . . .	29	Now woods; a steppe, and over sloping heights. Four versts from the town you cross the river Haylar.
	<u>106</u> versts.	
6. Hak. . . . .	20	A plain.
7. Djarmanay. . . . .	20	} The road is very hilly; the ground is first wooded, then grass, and marsh. At the stations horses are to be had.
8. Hara-Hoshou. . . . .	31	
9. Aeki-Earl. . . . .	20	
10. Mendoukey. . . . .	20	
11. Harhey. . . . .	20	

\* A sagen is seven feet.—*Translator.*

	Versts.	
12. Irektai.....	25	} Over a wooded ridge of the Hingan.
13. Boohatoo.....	20	
14. Eelan-Obo.....	20	} Descend the Hingan, and afterward through a well-watered and well- wooded country, near the river Yalou. Many valleys and hills. No large settlements or cultivat- ed grounds.
15. Barea.....	20	
16. Shavar.....	26	
17. Aja.....	26	
18. Saraktee.....	26	
19. Hara-Hatoy.....	31	
20. Koukour.....	26	
21. Hanjee.....	20	} A populous and cultivated valley; hills.
22. Sheetai.....	31	
23. The town Tzitzikar.....	31	Cross the river Nonni; navigable.

433 versts.

In all, from Zourouhaytoo... 539 versts. 23 stages.

This is the Chinese post-road to Haylar, at one time passed by Langé, but probably much changed since then (1736) in details, so that it is difficult to compare it with the Chinese table of present stages, as shown here.

### VIII. *From the Banks of the Argoun to Pekin.*

	Versts.	
Abagaytouy.....	0	120 versts from the old Zourouhay- too station.
1. The river Haylar.....	20	After having crossed the river Ar- goun, along the hillocks Sheevee- Guntsey.
2. The lake Dalai-Nor.....	25	Cross the river Haylar, through a hilly steppe; good pasture.
3. The river Oursoun.....	30	By the valley of this river, its right bank is higher than the left. Both banks are marshy.
4. The river Oursoun.....	30	" " "
5. Oulan-Boulak.....	30	Cross over on the left bank of Our- soun, in order to avoid another crossing at the mouth of the river Kalka, by Lake Bouir-Nor.
6. The river Oursoun.....	15	} Along the river Oursoun.
7. Bouir-Ee-Oulan-Aergee ...	25	
8. The lake Bouir-Nor.....	29	On the flat bank of the lake.
9. The lake Tchaptou-Nor... ..	40	A plain. Bad water at the stage.
10. The lake Hoytø-Tossihonor	33	A plain.
11. Ibtartay-Nor.....	23	A plain—dry at first, marshy after- ward.

	Versts.	
12. Angueertoo-Nor.....	38	Through grass-covered hills, then a marshy plain.
13. Boroldgeetoo-Nor.....	33	Sandy, sometimes a hilly steppe.
14. Habeergan.....	26	A sterile plain, and mountains.
15. Hara-Oussou.....	37	" " "
16. Horhon-Hall.....	40	Cross the rivers Hara -Oussou and Intchagan. A plain.
17. Patchay-Koubour.....	31	A plain, partly marshy, and sandy hills. Cross the rivulets Horhon-Hall and Ten-Birra.
18. Honker.....	46	By a high steppe; past the bitter waters of the lakes Keremto, Koudoun, and others; and afterward by the valley of the river Balougoura.
19. Kouldou.....	30	By the valley of Balougoura, and neighboring hills. Sands to the west of the river.
21. Koutourihou-Boulak.....	31	By the slopes of the Hingan; good pasture.
22. Hara-Hoto (village).....	38	A hilly steppe, afterward by the valley of Hara-Mouren.
23. Kourkai (village).....	31	The valley of Hara-Mouren; plenty of grass.
24. At the foot of mountains..	39	Cross over Sira-Mouren; afterward sands and mountain.
25. Hotosseen-Houdouk.....	15	Through a well-populated valley. Good wells at the stage.
26. The river Perkai.....	24	Hilly; no timber; a grass-covered steppe.
27. " Seercha.....	33	On the road some deep ravines are met with.
28. The spring Boulangar....	32	Cross the river Seebai.
29. The town Kouan-Chen....	25	The road is in a hilly but cultivated and well-populated country.
30. The gate See-fin-Kheou...	31	The road winds up among the mountains. The Great Wall—end of Mongolia.
	880	verst.
31. San-Doun-In.....	31	Cross Lan-Hai over a bad bridge; mountains.
32. Tzun-Houa-tchjeou.....	26	Descend the mountains; afterward is a well-populated valley.

	Versts.	
33. Shee-Main . . . . .	31	} By a valley among the mountains.
34. Zsee-Tchjeou . . . . .	31	
35. Sang-Hay . . . . .	36	Slightly undulating vale.
36. Toun-Tchjeou . . . . .	36	A populated and cultivated plain.
37. Pekin . . . . .	20	There are several roads: for foot-passengers it is better to follow the one leading to the eastern gate, and which is paved; for carriages, more to the south, through a thinly populated valley—the one which leads to the south-eastern gate.
	<hr style="width: 10%; margin: 0 auto;"/> 211 versts.	
In all . . . . .	1091 versts.	37 stages.

Of all the roads from the Russian frontier, through Mongolia to China, this is the shortest, the best provided with pastures, and the best adapted for locomotion. Besides, this road is the most important from a strategic point of view, because at first it leads into the most populated parts of Mongolia, and then into a country near the Yellow Sea, where all kinds of stores can be shipped. For carriages, in its southern, mountainous half, it is as convenient as every other Chinese road.

### IX. *From the Nertchinsk Boundary, past Lake Dal-Nor, to Pekin.*

From the frontier, near the Koubeldjin Light-house, to Pekin there are 36 stages—1159 versts. It is a caravan road, but it is practicable for carts, the more especially for two-wheeled carts.

	Versts.	
The spring Halsoutchee-Boulak	0	Some 35 versts from Tchindant, and Kluchevsky.
1. Olon-Nor . . . . .	36	A hilly steppe; many lakes. Direction southward.
2. Obodon-Nor . . . . .	28	“ “ “
3. Houtoo-Baydoo . . . . .	47	A hilly steppe. Direction south-west.
4. Tcheerokee . . . . .	40	Slightly hilly steppe; here and there lakes; good pastures.
5. The river Keroulane . . . . .	45	Steppe mostly level; good pastures. A stage on the northern bank of the Keroulane.
	<hr style="width: 10%; margin: 0 auto;"/> 196 versts.	

	Versts.	
6. Kondou . . . . .	25	A ford over Keroulane, and then a hilly steppe.
7. Airdencee-Tologoy . . . . .	32	A hilly steppe; good pasture.
8. Hubto . . . . .	53	Very unlevel steppe; good grass.
9. Holostay-Boulak . . . . .	17	" " "
10. Tchortchee-Kebour . . . . .	40	A plain; partly sand, partly hilly.
11. Tchono . . . . .	26	A plain; pasture becomes worse.
12. Ouguestchin . . . . .	22	First a plain, afterward by some hills.
13. Houloussoutay . . . . .	15	Partly by the valley of Ouguestchin; partly by the hills. Central Mongolia commences. Pastures are poor.
14. Stourhoutoo-Boulak . . . . .	44	Steppe; in some places hilly.
15. Tezee-Boulak . . . . .	35	Sterile steppe.
16. Ounegate . . . . .	40	Sterile steppe, then small hills and the valley of Tchikir-Ousou.
17. Sharaee-Bouritoo . . . . .	32	Unbroken, slightly sandy steppe; turning to the S.S.E.
18. Argai-Tchikir . . . . .	36	A plain.
19. Habtchellee-Boulon . . . . .	35	"
20. The sources of Tchikir . . . . .	34	Along the river, which is crossed several times. The road turns again to the south.
21. Oboulon . . . . .	31	Over the hills, past many springs.
22. Tagan-Nor . . . . .	27	A flat plain. The ruins of a temple are seen to the west of Tagan-Nor; and still farther to the west is the lake Dal-Nor.
—		
526 versts.		
23. In the steppe . . . . .	31	Partly over hills, partly sands. At the stage it is necessary to dig wells. The water does not lay deep.
24. Small lake Horay-Kourai . . . . .	19	} Hilly and sandy steppe. A difficult road.
25. The lake Oustou-Kourai . . . . .	38	
26. Small river Tourguen-Iskiar . . . . .	36	A slightly hilly plain.
27. Small river Kourkir . . . . .	31	A height to the west from the mountain Pé-tcha or Hamar-Dabagana.
28. The village San-Dain . . . . .	31	Through the valley Kourkir.
29. " You-djao-In . . . . .	31	" " "
30. " Tzé-Tzian-In . . . . .	26	Through the valley Shandou-hola.

		Versts.	
31.	The village Nan-Ya . . . . .	35	Some fords over the Shandou-hola (Lian-ho); rather difficult in rainy weather.
32.	Hou-Bay-Kheou . . . . .	38	The road winds up among the mountains. At Hou-Bay-Kheou is the Great Wall, consequently, the end of Mongolia, which, for the last four stages, is mostly populated by Chinese. You begin to see trees after the 26th stage.
		—	
		316	versts.
33.	{ Lao-Houa-tchen 15 } { Sha-Hia . . . . . 15 }	} . . . 30	{ Through a deep valley of the river Hakir, and over the surrounding hillocks.
34.	{ Shin-Houan . . . 15 } { Mi-Youn-Sian . . 15 }	} . . . 30	{ The same valley.
35.	Niaou-Lian-Sian . . . . .	31	Cross the river Pey-Ho; the commencement of a plain.
36.	Pekin . . . . .	41	Thickly populated plain.
		—	
		131	versts
In all . . . . .		1159	versts. 36 stages.

In the year 1689 a large caravan, accompanying the Chinese Mission to Nertchinsk, passed this road twice. See Gerbillon, "Second Voyage in Tartary," and Du Halde, vol. iv., page 163, etc.

### *X. From Tchindant through Dolon-Nor to Peking.*

This road, which really begins, not at Tchindant, but from the Houlous-soutay military station, was passed in carts by the merchants Boutin in the year 1870. On their return from Kalgan, through Dolon-Nor, they followed the same road.

		Versts.	
1.	Military station Houlous-soutay . . . . .	40	From Tchindant southward through the steppe.
2.	Oussoun-Kilee . . . . .	48	Between the lakes Dsun and Baroun-Torey, and then to the river Ouldsa.
3.	Holotey-Nor . . . . .	32	Over some hillocks near Ouldsa.
4.	The river Ouldsa . . . . .	7	By the Mongolian Bousséeff military station.
5.	Horbouney-Boulak . . . . .	48	A firm road; hillocks.
6.	Soumin-Boulak . . . . .	30½	A firm road; hillocks. The ruins of a temple at the stage.

	Versts.	
7. Koundouloun-Boulak (Bayan-Doun).....	52	A stony road; cross over the Bayan-Doun Mountains.
8. The lake Shara-Bourdou ..	49	Good, hard road.
9. Kairoulun, the reservoir of Tzé-Baess .....	14	Descent into the valley. At the station there are shops, a monastery, etc.
	<hr style="width: 10%; margin: 0 auto;"/> 320½	versts.
10. Tzagan-Tologoy.....	25	Hillocks.
11. Hashlar-Torogo.....	19	Large hillocks in a deep valley.
12. Tzagan-When-Houdouk...	25	Hillocks.
13. Boro-Torom.....	23	“
14. Tossoun-Houdouk.....	22	“
15. Batouhan (Dzoun-Boulak).	27½	A spring at the Batouhan range of mountains.
16. Amoney-Oussou-Hoshun...	37	Through the valley of Shara-Sharatey. Poor pasture.
17. Hodjou-Boulak .....	27½	Hillocks.
18. Atzanou-Oulan-Hoshun ...	23	Good road. The stage at the river Shonoin-Hall.
19. Noukoutey-Hall.....	22	Cross the mountains.
20. Baen-Haylassan.....	18	By some hillocks to a dry river-bed; wells surrounded by elm-trees.
21. Zashây-Houdouk.....	28	Stony road, then a vast plain.
22. Ara-Houbou.....	20	Over the mountains into a deep valley.
23. The river Dzoulga.....	16	Hillocks; the river flows from west to east.
24. Baen-Dalay.....	28½	Over hillocks into a valley.
25. Sayhan-Oussou .....	24	Over hillocks, past nomad camps.
26. Ouyout-Hall.....	34	Over mountains.
27. Taboun-Houdouk .....	26	Over the Babeenai-Shéelai mount.
28. Ara-Hall.....	25	Hillocks, and a vast plain.
29. Bandida-Datzan.....	38	Two fords on the river Shileein-Hall.
30. Takal-gatai .....	10	A ford on the same river. A road over a mountain.
31. Balguechay-Houdouk.....	30	Hillocks, past rocks and volcanoes.
32. Amalon (Chinese hut)....	30	Cross over the Kouitoun-Shileein crest.
33. Sirouhan-Hall.....	12	A river on the north boundary of the great sands.

	Versts.	
34. Eehai-Tala.....	32	Sand hills.
35. Tzagan-Nor.....	14	“
36. Shourganta-Nor.....	21	“ then a hard road.
37. Tariatey-Houdouk.....	21	Partly sands.
38. Kirimtoo-Nor.....	21	A vast, deep valley.
39. Saeetoo-Nor.....	10	A deep valley. Lakes.
40. Shandou-Hall.....	32	Near the ruins of the town Tchjao-Nayman-Soumai.
41. Dolon-Nor.....	20	Cross the river Shandou-Hall (8 sagen 1½ arskin*), then hillocks.
	765½	versts.
42. Houminz.....	35	Mountains.
43. Ounzhoumil.....	32	Cross over Lian-hay, and mountains.
44. Niansa-Houmil.....	28	Birch-woods in some places of the road. Mountains high.
45. Hodgee-Houn (small town).	27	Through the valley of Shelanhee. The road to Geyhai.
46. Dawa-Houmil.....	20	Ascent and descent.
47. Shara-Hoto (mount).....	30	By the valley of the river Founin-Tzan.
48. Boro-Nor (small town)....	24	
49. Seen-Dja.....	20	
50. Shopian-Lan.....	22	
51. Houbay-Kheou.....	35	The Great Wall.
	273	versts.
52-57. Pekin.....	132	Through a populated country.
In all.....	1491	versts.

From Dolon-Nor to Kalgan there is a road suitable for carts. It is some 240 versts long.

### XI. *From the Sources of the Onon to Peking.*

	Versts.	
The Asheenguee quarantine	0	
1. The Chinese quarantine on the river Onon.....	32	Through the valley of Onon.
2. The river Baecen-Hall.....	29	Mountains.
3. The brook Sadaguen-Hall.	27	The Doutoulur range and valley.
4. The river Hourhou.....	26	Through the valley of the river Dgergalantoui and mountains.

\* An arskin is 0.778 of a yard.—*Translator.*

	Versts.	
5. The Tarkiltchee .....	36	Mountains.
6. Keroulun .....	40	Hilly steppe.
7. The lake Darchan-Tzaydamoo .....	45	Valley and hills.
	<u>215</u>	versts.*
8. Kontoul-Boulak .....	35	Mountains. Steppe; pasture-ground.

10. Tchagan-Boulak .....	46	
11. Sheebartay .....	51	Hilly steppe, firm ground, and good pastures.
12. Onouin-Tcholoc .....	32	A plain with small hills. To the east Onouin-Tcholoc mountains.
13. Ongon-Ailesou .....	30	Steppe; in some parts stone, in some grass.
14. Kara-Manhounce-Habirgan .....	35	A plain; in some parts grass.
15. Houlousoutay-Tchagan-Nor .....	25	A plain.
16. Soudetoo .....	36	Partly deep sands. Good water at the stage.
17. Kodo-Koutchin .....	36	Sandy hills. Three wells.
18. Scenzai-Shery .....	25	A level steppe. Good water and grass found at the stage.
19. Tarhir .....	21	Level steppe; sand.
20. Keterhou (Hederhon) .....	15	Hilly.
21. Horho .....	15	Hilly, sterile steppe.
22. Habeergan .....	26	Slightly hilly, the ground firm.
23. Seera-Souritoo .....	19	Steppe very flat, with small quantities of deep sand.
24. Houloustay .....	28	Deep sands upon an unlevel country.
25. Kour-Tchagan-Nor .....	17	Deep sands upon an unlevel country. The stage by a lake.
26. Kouen-Nor .....	25	Along the river with high banks, over very broken country.
27. Koultouk .....	23	Unbroken steppe; afterward sandy hills.

\* The following road from Kiachta runs to Darchan-Tzaydamoo:

	Versts.	
Kiachta .....	0	
1-12. Ourga .....	279½	See the Route No. XII.
13-17. Mokotoo .....	175½	“ “
18. Baen-Airgnetoo .....	22	On the river Keroulun.
19. Tono-Ola .....	32	“ “
20. The river Keroulun .....	35	Through a valley.
21. The lake Darchan-Tzaydamoo .....	32	

To Kiachta..... 576 versts.

	Versts.	
28. Houjimouk (small lake)...	21	A plain; in parts hard ground, in parts deep sands.
29. The lake Angueertoo-Nor..	19	Sand-hills. Good water at the stage.
30. Holbo.....	15	Sands; many hillocks.
31. Kouysou-Boulak.....	20	Sands; many hillocks (the forty-fifth stage from Kiachta).*
32. Kon-Nor.....	41	Very hilly country.
33. Boro-Hauton (town).....	10	Steppe; marshy during rains. The town is on the river Shandougol.
34. Nogay-Hosho.....	27	Level steppe; village on same river.
35. Tchelon-Balgasou.....	31	Hilly country, rich in grass.
36. The gate Doo-Shee-Kheou.	15	Hilly country.
	<u>786</u>	versts.
37. Youn-Tchjeou-Sian.....	20	Mountains, afterward by the valley of the river Pey-Ho.
38. Tche-Tchen-Sian.....	25	The same valley, which in one place is inclosed by mountains.
39. Tia-Ou-Boo.....	20	" " "
40. Koheen.....	18	Wide valley.
41. Toumoo.....	28	} The country is mountainous, but well peopled, and cultivated.
42. Houay-Lay-Sian.....	18	
43. You-Lin.....	15	
44. Nan-Khequ.....	31	
45. Sha-Hay.....	21	A well-cultivated plain, with a numerous population.
46. Pekin.....	24	
	<u>220</u>	versts.

In all, from Asheenguee quar. 1221 versts. 46 stages.

In all, from Kiachta.....1582 versts. 60 stages.

This road is important in this respect, that on it military detachments can be moved conjointly from Selenga and Onon, which are divided in Zabaykal by the Yablonoff range. For the movement of troops, this road is the most convenient of all those which lead to the west. The Emperor Khan-See led his large armies by it. The best season for marches are the months of April, May, August, and September.

\* From here the road to Dolon-Nor passes the following stages:

	Versts.	
46. The village Airel.....	30	
47. Nortoo-Boulak.....	35	Mountains and valley.
48. Dolon-Nor.....	30	A flat steppe.
From Asheenguee quarantine.....	993	versts. 34 stages.
From Kiachta.....	1219	versts. 48 stages.

XII. *From Kiachta over Ourgoo and Kalgan to Pekin. A Caravan Road.*

	Versts.	
Kiachta .....	0	
1. The lake Hilan-Nor.....	9	A plain.
2. Ibitzich .....	24	A plain. Mostly woody.
3. The river Iro.....	22½	Cross the river Iro; a rocky defile.
4. Kouitoun.....	28	Ascent from the valley of the Iro to the mountains.
5. Ourmouchtoui.....	27	Descent.
6. Baeen-Hall .....	22	"
7. Hara-Hall.....	34	Mostly in mountains.
8. Horimtoo.....	20	Slopes.
9. Hountzal.....	30	On slopes and on crests.
10. Bourgalтай.....	19	Cross over the mountain Tchana-gou; slopes.
11. Arshanti .....	22	Slopes.
12. The town Ourga.....	23	Ascend to the Gountoui crest, and descend into the valley of the river Tola.
	279½	versts.

14. Oulan-Houdouk.....	35	Plain, partly marshy, partly sands, very little grass.
15. Sentchjee.....	30	Good well at the stage.
16. Oudai.....	30	Difficult road.
17-32. From Oudai to Tzsamin-Oussou		the same stages as Nos. 28-41 of the route No. XII.; but from 38, Soutchjee, the following road can be taken:
Ougoundouin-Hoshotoo.....	30	From here the pastures improve.
Hadain-Oussou.....	30	
Oulan-Hoshou.....	12	
Tzsamin-Oussou.....	29	
33-37. To Kalgan.....	123	The route No. XII.

In all, from Ourga to Kalan, 950 versts. 37 stages, that is to say, 6 more than in the route No. XII.  
The road is somewhat shorter, but more difficult.

(b.) *Argalinsk Road.*

	Versts.	
0-9. Ourga-Shara-Sheerotoo..	269	According to the route No. XII.
10. Olon-Bayseen.....	23	A range of stony mountains.
11. Soutchjeen-Oussou.....	32	Steppe, covered with many-colored stones of a flinty nature.
12. Houlougour.....	18	
13. Abourgaeen-Soumai.....	33	A handsome idol-temple. Many camels in the neighborhood.

	Versts.	
14. Dourban-Daretoo.....	20	Sandy ground. There are pasture-lands for the camels in the neighborhood.
15. Airguee.....	32	Through the Oudai defile, and into the valley.
16. Oubourr-Oudai.....	35	Bad grass, and salt-water.
17. Hashoun.....	26	

These two last-named stages lay some distance away from the stages of the same name, shown in the route No. XII.

18. Haratoucen-Soutchjee.....	20	Good well.
19. Tzsoun-Soutchjee.....	30	
20. Batchay.....	25	By stony slopes.
21. Olon-Houndouk.....	40	
22. Saeen-Oussou.....	23	Bad water; a salt lake.
23. Houtchjeertoo.....	23	Sand, grass, <i>soulee</i> , injurious for horses.
24. Koul-Houdak.....	20	Difficult road. Sands.
25. Shara-Boudourguna.....	22	
26. Dourma.....	25	Over sandy mountain. A very difficult stage.
27. Tzakildak.....	20	Mountains and sand.
28. Alai-Soutoo.....	22	Mountains and sand. Grass better; water good. Sheep graze in the neighborhood.
29. Hara-Tologoy.....	30	
30. Kouitoun.....	35	
31. Tzsamin-Oussou.....	20	Good pasture-grounds.
32-36. Kalgan.....	123	According to the route No. XII.

In all, from Ourga.. 987 versts. 36 stages.

Although these three roads, viz., Argalinsk, Houndjoui, and Darhan, leading direct from Ourga to Kalgan, are frequented by numerous caravans, they are not suitable for troops, on account of the deficiency of pasture-grounds and scarcity of water. Our Cossacks carry a light mail to Pekin by one of these roads.

#### XIV. *The Postal Road from Kiachta to Pekin.*

	Versts.	
1-12. Kiachta to Ourga.....	279	See route No. XII.
13. Sono-Sholantoo.....	19	Through the valley of the river Tola, which is crossed at about 11 versts from the town.

	Versts.	
14. Boukouk . . . . .	27	Out of the valley and into a hilly steppe. Good grass.
15. Dologon . . . . .	20	A hilly steppe.
16. Tchjargalantoo . . . . .	28	" "
17. Ondourdaba . . . . .	28	" "
18. Tala-Balik . . . . .	33	A hilly steppe. Grass less thick.
19. Naroun . . . . .	30	A hilly steppe.
20. Modon . . . . .	33	" "
21. Tayroom . . . . .	33	Steppe. Grass grows very thin.
22. Boro-Daga . . . . .	23	" " "
23. Baeen-Bilkich . . . . .	28	Poor vegetation at the stage.
24. Baeen-Hosheegou . . . . .	24	A small lake at the stage; grass very scarce.
25. Salgoi . . . . .	28	Nearly a sterile steppe.
26. Soutchjee . . . . .	31	" "
27. Saeer-Oussou . . . . .	30	Undulating and hilly steppe. At the stage a house and an idol-temple. At this point the road from Oulasoutay joins on the west.

## 415 versts.

28. Koutoul . . . . .	30	Hilly steppe.
29. Baro-Obo . . . . .	36	"
30. Dsobor . . . . .	25	"
31. Salatoo . . . . .	22	"
32. Horban-Naysha . . . . .	28	Hilly steppe. Poor vegetation.
33. Naroun . . . . .	42	Hilly steppe.
34. Hontchai . . . . .	28	"
35. Hashai . . . . .	36	"
36. Tougourik . . . . .	28	Clean sand.
37. Tolee-Boulak . . . . .	25	Hilly steppe. An idol-temple at the station.
38. Soudgee . . . . .	20	Hilly steppe. Some trees at the stage.
39. Biloun . . . . .	25	Steppe; a little grass.
40. Kormachar . . . . .	33	" "
41. Tzessi-Hongor . . . . .	20	" "
42. Oulan-Houdouk . . . . .	29	Slightly hilly steppe.
43. Shara-Mouren . . . . .	27	Sandy steppe; dried-up rivulet.
44. Tzagan-Houdouk . . . . .	25	Sandy steppe.
45. Olon-Houdouk . . . . .	24	"
46. Boltay . . . . .	22	"
47. Shara-Hada . . . . .	18	"

	Versts.	
48. Bombotoo.....	22	Sandy steppe.
49. Oulaha.....	24	“
50. Tchjin-tay.....	36	Hills.
51. Tchetchertay.....	36	
52. Minhall.....	26	Grassy steppe.
53. Tchjagoustay.....	18	“
54. Kouï-Soutay.....	22	“
55. Oro-Houdouk.....	24	Grassy steppe. The stage at the lake near Angulee-Nor.
56. Halutay.....	24	Grassy steppe. The stage at the brook Halutay, which flows into the Angulee-Nor.
57. Bourgasoutay.....	28	Rich pasture-grounds. The stage is near a brook, at the foot of hills.
58. Tchagan-Tologay.....	25	Mountainous country; the road leads over a plain.
59. Kalgan.....	30	Descent from the highlands through a ravine to the east of Nordiansk.
	858	versts.
60-67. Pekin.....	217	See the route No. XII.
In all.....	1760	versts. 67 stages.

This road is for pack animals, but carts can be used. Horses and camels are found at the stages. The pasture-grounds are very poor from stages 20-55. In some places there is nothing but sand; in addition to this, it is 276 versts longer than that of No. XII., so it is only used by the Chinese mail. The real route differs a little in names, as well as in distances, from that published in the "Military Statistic Magazine," but is in accordance with the "Chinese Road-book."

### XV. *From Youstida through Dzindzilik to Irkoutsk.*

The greatest part of this road runs through Chinese military stations, which may be considered as frontier stations to the governments of Tomsk, Eniseysk, and Irkoutsk, although they lie far to the south of the frontier, and on the other side of the Tannou-Ola ridge. The eastern part of the route, from Dzindzilik to Kossogol, was traversed in 1872 by the Minoussin merchant Veselkoff with a herd of cattle.

Youstid was formerly a Chinese military station. It is at the sources of the river Tchoui, in Russian territory.

	Versts.	
1. The lake Dayshour.....	30	Over the frontier ridge Sayluguem.

	Versts.			
2. Military station Oulasou-touaman.....	}	Some 500 versts.		
3. Ouroun-Nor.....				
4. Bodogonee-Holay.....				
5. Borgitchaytee.....				
6. Handagaytee.....				
7. Tzitzirgan.....				
8. The river Holay.....				
9. Military station Airgatee..				
10. Alack-Obo.....				
11. Village Samgatay.....				
13. Military station Dzindzilik.				
14. A brook, flowing into Dzindzilik.....			20	By the river Dzindzilik, past an idol-temple. Plenty of food and water. The inhabitants are Ourian-hee.
15. Hargana.....			20	Over the ridge of Hargana; very little water. The road leads along the frontier of Mongolia and Ourian-hee.
16. The river Touskoul.....			25(?)	Cross two ridges, to the north of the frontier.
17. The river Sheerik.....	16	Cross twice more, and over the river Soudute.		
18. A brook near the river Sheerik.....	25	Two ridges; good road; plenty of grass and water.		
19. The river Koss (flows to the west).....	15	High, woody; bad road.		
20. The river Koss.....	25	Up the river; good grass.		
21. The river Tariss.....	23	Cross over a large, naked ridge. The river flows to the N.E.		
22. The mount Takeel.....	20	At first to the N.E. by Tariss, then to the S.E. by a plain.		
23. The river Souuk.....	24	By the river Souuk. Good grass; many stones on the mountains.		
24. Military station Agar.....	7	A pass over the mountains, and then on the river Agar.		
25. The river Mourue.....	35(?)	A large river, flows to the S.W.		
26. " ".....	15	Steppe, with good grass. Trees in the hollows.		
27. Steppe.....	30	Many Mongolian nomad camps; good pastures.		

	Versts.	
28. Pass the night in steppe ..	20	No timber; hilly country.
29. " " " "	25	No timber; hilly country. Good grass.
30. The river Aigai, 6 versts from Kossogol.....	30	
From Dzindzilik...	345	versts, traversed by the merchant Veselkoff.

For five days along the eastern bank of Kossogol to the idol-temple Ourianhow, on the north bank of the lake (120 versts), and from there to Irkoutsk-trough:

36. Tounkoo.....	132	Caravan road.
39. Koultouk.....	75	} On wheels.
41. Irkoutsk.....	67	
	281	versts.
In all.....	1156	versts.

#### XVI. *From Yousteed to Ouliasoutay.*

This is the so-called road of Beeysk merchants, passed by them in the year 1870. The length of the road is 555 versts; the stages were as follows:

	Versts.		Versts.
1. Hatoo-Boulak.....	30	9. Zerin-Nor.....	42
2. Kara-Mangay.....	28	10. Shabir-Hall.....	18
3. Ateheet-Nor.....	40	11. On the river Kounhoui ...	38
4. Oussoun-Hall.....	15	12. " ".....	34
5. The river Sheeberee.....	32	13. " ".....	38
6. Hotuel-Boulak.....	28	14. " ".....	38
7. Chinese farm.....	38	15. Ouzoun-Djoul.....	40
8. Sheeneouss.....	38	16. Ouliasoutay.....	48

#### XVII. *From the Station Souok through Kobdo to Ouliasoutay and Kalgan.*

The Chinese military station Souok is 514 versts from Oust-Kamenogorsk. There are 284 versts of carriage road.

	Versts.	
1. The Boro-Bourgasou station	25	Highlands.
2. The Belou station.....	35	Ascent of the mountain, and then through a hilly country.
3. The Elldegai station.....	35	At first in mountains, descent into the valley of the river Kobdo.

Versts.

4. The Koto station.....	20	Cross the river Kobdo, and through the valley of the river Koto.
5. Ouhasherote .....	20	In a mountainous country, over Ee-gees-Daba.
6. Honguerloo.....	20	Past the lake Alten-Tchetchey, and over some hills.
7. Hongo.....	25	In mountains, and in the valley of Hongomeruck.
8. Shara-Balik.....	35	In mountains, across the rivers Aid-geegalia, Tarhin, and Tchagan-Bourgassou.
9. The town Kobdo.....	35	Mountains first, then steppe. The town Kobdo lies on the river Bou-jantoo; a fortress is on the north, and the market is on the south.

250 versts.

10. Kara-Oussou.....	32	Over mountains, and steppe to the south end of Lake Ikai-Aral-Nor.
11. Sahee-Boulak.....	56	} A stony steppe.
12. Djeergalantee.....	34	
13. Karganin.....	17	
14. Dourga-Nor.....	33	At the south-east end of the lake Dourga.
15. Baga-Nor.....	30	
16. Argalantee.....	39	On the river Dzahan.
17. Bochoo.....	26	} In the steppe along the river Djabgan; a ford can not be always found.
18. Dzour.....	20	
19. Baga-Dzeess.....	24	
20. Ihee-Dzeess.....	21	
21. Houdouk-Oulack.....	20	} By the right bank of the river Djabgan, cross the river Yaroo-Hall, and other tributaries of the Djabgan.
22. Borho.....	28	
23. Aldeer.....	21	
24. The town Ouliassoutay....	18	The town has a fortress and a market, is situated in a valley between the mountains.

419 versts.

25. Shouran.....	29	Steppe; good grass.
26. Dagan-Dehlai.....	24	By the river Bouentoo-Hall.
27. Boueentoo-Hall.....	21	“ “ “
28. Ara-Djirgalantoo.....	15	} Steppe.
29. Oubour-Djirgalantoo.....	19	

	Versts.	
30. Oulan-Boumba .....	19	By the river Hobol.
31. Hobol .....	25	“ “
32. Dzack-Hall .....	22	By the river Dzack-Hall. Level steppe, bad pasturage.
33. Baydarik-Hall.....	18	By the river Baydarik. Level steppe, bad pastures.
34. Outaecn-Hall .....	30	Over a ridge. Sands.
35. Ologay.....	13	“ “
36. Hara-Tologoy.....	26	} Wells in sandy steppes.
37. Toui.....	18	
38. Shargaldshout .....	23	
39. Hobol-Hortee .....	22	
40. Horida.....	28	Sands and rocks. Mountains to the north.
41. Haraneedoun .....	18	Sands.
42. Hadatoo .....	20	Sands. The frontier between Ourga and Ouliassoutay.
43. Ounegatoo .....	23	Sands.
44. Ongueinn-Hall .....	25	Sands. Stage at the river.
45. Dzerän.....	33	Sands.
46. Toumourik.....	25	Sands. Stage near a lake.
47. Tzaptcheer .....	19	By the same lake. The road from Ourga to Thibet.
48. Haracem-Djeerim.....	29	Hilly, sandy steppe.
49. Dziralantoo.....	19	By a defile.
50. Loss.....	30	Stony hills; steppe.
51. Shoboutay.....	23	Steppe; not much grass.
52. Baroun-Soutchjee.....	17	Steppe.
53. Saecer-Oussou.....	40	Steppe. Here on the north the post-road from Ourga.
	673	versts.
In all.....	1342	“
To Kalgan.....	2200	“ See the route No. XIV.
To Pekin.....	2417	“

This is the longest of all the steppe roads between the frontiers of Russia and Pekin. It is poor in water and grass; and although it is a postal road, it is exclusively for pack animals.

XVIII. *Roads across Djungaria.*

(a.) *From Zaysiansk to Kobdo.*

The Zaysiansk post is 511 versts from Semipalatinsk by the mail road.

	Versts.	
1. Terektee.....	18	} Over the north slopes of Mouss-Taga and Saour. Plenty of water and grass at the first three stages.
2. Saree-Boulak.....	20	
3. Oulastee.....	25	
4. Another Oulastee.....	25	
5. Toumandee.....	40	
6. Kok-Boukai.....	35	
7. Moukourtoui.....	25	
8. The lake Oulungour.....	30	
9. Bouloun-Tochouy.....	25	
	243	versts.
10. Tangergai on Ouroungoo..	45	
11. The river Ouroungoo.....	70	
12. The river Tchinguéel.....	75	Mountains. Inhabited by Ourian-hays.
13. The river Tchagan.....	60	Mountains. Inhabited by Targouout-Kalmouks.
14. The river Bouloung.....	50	Mountains covered with wood. Kalmouks-Koshots.
15. The Tchajgan picket.....	60	Mountains. The road joins the Ouroumzosk-Kobdo road.
16. The Nareen.....	40	} The road leads by Ouroungou, then through mountains; having crossed over them, it descends to Kobdo.
17. The Dabseentoo.....	60	
18. The Bathock.....	45	
19. The Soudjin.....	30	
20. The town Kobdo.....	25	
	550	versts.
In all.....	793	versts. A road for pack animals.

(b.) *From Tchougoutchak and the Zaysiansk Post to Koutioun.*

The first of these roads was a Chinese postal road. When surveyed in the year 1871, it was found practicable for carriages. The second difficult for carriages, but only in the first three stations.

Tchougoutchak..... 4 versts from Baktoff. The Zaysiansk post.

	Versts.		Versts.
1. Setair-Modo.....	45	1. Ken-Say.....	31
2. Shara-Houloussou.....	60	2. Tchagan-Obo.....	34
3. The picket Tolee.....	20	3. Dann-Sou.....	30

	Versts.		Versts.
4. The picket Yamatee.....	18	4. The mouth of the Desbik..	27
5. The picket Kouldenen....	20	5. Kara village and Sarec-Ai-	
6. The picket Outoo .....	15	meela .....	26
7. The picket Bouktchour...	18	6. Ak-Sou .....	22
8. Village Olon-Boulak.....	20	7. Kouroom-Sou.....	13
9. Village Shar-Oussou.....	30	8. Shara-Houloussou.....	22
10. Station Kour.....	36	9-17. Kouitoun.....	209
11. Kouitoun .....	32		<hr/> 414
	<hr/> 314		

The road passes through Kouitoun, from Ouroumtzee to Kuldja.

### XIX. *From Kuldja to Hamee by the North Tian-shan Line.*

Old Kuldja, that is to say, Tarantcha.

	Versts.	
1. Bayanday.....	11	A plain.
2. Souidoun.....	32	“
3. Tchin-Tcha-Hoday .....	17	“
4. Ee-Tay.....	21	
5. Lian-ta.....	15	To the south of the pass through the Iren-Habirgan mountain.
6. Ba-Mo .....	25	A pass; descent to the lake Sayra- moo.
7. Houstay.....	28	A plain.
8. Takoumtoo .....	30	A plain. Sand in some places.
9. Village Dahianza.....	14	
10. Military station Tzsin-Ho..	47	
11. Koum-Tam .....	39	
12. Military station Totohoy..	15	
13. Military station Kourtoo- Kounga.....	10	} A plain. Sand in some places.
14. Military station Domboda .	19	
15. Military station Boulhatzsee	25	
16. The ruins of Kour-Kara- Oussou.....	22	
	<hr/> 370	
17. Military station Kouitoun..	22	A plain. A road passes through Kouitoun, from Tchougoutchak (314 versts).
18. Military station Antzsee- Haya.....	20	Steppe. Good grass.
19. Military station Horgoss..	25	Level steppe.

	Versts.	
20. Military station Oulan-Ous-sou.....	22	Level steppe.
21. Village Manass, or Kanguee	40	Level steppe. Cross the river Manass.
22. Military station Yan-Balgasoun.....	21	Steppe.
23. Military station Toumourik	26	"
24. Village Houtoukbay.....	38	"
25. Military station Loklon...	33	Steppe. Good grass.
26. Village Houn-Neen.....	40	Slightly hilly. Villages.
27. The town Ouroumzee.....	22	Slightly hilly; well watered. The town Ouroumzee was the principal town of the north Tian-shan line.

---

309 versts.

From here to Hamee there are two roads: the one through Tourfun is the shortest, the other through Barkoul is more convenient. We take the last.

	Versts.	
28. Military station Hay-Hoou.	26	A plain; well watered.
29. Village Fou-Khan.....	24	Slightly hilly.
30. Military station Dee-Tzuan.	20	By the foot of the mountains.
31. Military station Tzeen-Sou	27	By the foot of the mountains.
32. Military station San-Tay..	33	By the foot of the mountains. The country is well watered by some streams from Bogdo-Olee.
33. Village Tzseemsa.....	34	By the foot of the mountains; steppe.
34. The town Hou-Tchen.....	29	By the foot of the mountains. A citadel on the north side of the town.
35. Small town Keetay.....	39	A well-watered and populated country.
36. Military station Mouroui..	25	Steppe; by the foot of the mountains.
37. Military station Ak-Tash..	22	Steppe.
38. Military station Oulan-Ous-sou.....	22	"
39. Military station Sabee....	30	"
40. Village Hashoun.....	29	"
41. Military station Ourtoo....	35	Steppe.
42. Tchjooba-Tzuan.....	29	By the side of a river.

From here to Barkoul there are two roads. You can go either direct through Hou-Houay (60 versts), or by the mail road, viz.:

	Versts.	
43. Military station Sae-Outzsee	30	On the slopes of the Tian-shan.
From here there is a road through the military station, Lae-Ba-Tzuan, to Hamee and Peetchan.		
44. The town Barkoul.....	35	On the slopes of the Tian-shan.
	<u>499</u>	versts.
45. Military station Koysou...	36	By the foot of the mountains.
46. Military station Soun-Shou-Tan.....	41	By the foot of the mountains.
47. Military station Nan-Shan-Kheou.....	36	Over the mountains.
48. Military station Hay-Tch-joo-Fan.....	27	Descent along the river.
49. Mount Hamee or Komoul.	30	A plain.
	<u>170</u>	versts.
In all.....	1378	versts. At the time of the Chinese dominion this road was a postal road.

From Hamee, through the steppe to the town of An-See, on the river Boulougeer, it is 470 versts. The road is a bad one; it runs through a sandy steppe. At An-See the road turns to the gate Tzsia-Youi-Houan, and then goes over the mountain Sou-Djeou, and continues to Pekin. Pekin is 3541 versts from Hamee, and 4889 from Kuldja.

## XX. *From Kashgar to Hamee, and Farther to Pekin.*

	Versts.	
The town Kashgar.....	0	
1. Village Shaptoul.....	40	Populated and cultivated plain.
2. Village Yangabad.....	30	} Along the Keeseel-Darya; in a steppe, very sandy.
3. Baston-Togozaek.....	80	
4. Keeseel-Darya.....	30	
5. Maral-Bashee.....	20	By the river Tarim.
6. Village Bartchouk.....	20	By the river Tarim. Here we meet the road from Yarkand, which is 325 versts distant.
7. Kook-Tchoul.....	20	} Steppe, along the Tarim.
8. Citadel Tchay-Sheerin....	20	
9. Airendae.....	20	
10. Otouss - Kamae (Ourtoul-Kemane).....	20	} Steppe, in some parts hilly.
11. Bish-Koudouk.....	20	
12. Village Yangarick.....	20

## THE MOST IMPORTANT ROUTES IN TURKISTAN.

In China we have enumerated only the frontier routes which pass through the Chinese dominions;\* we now publish some inner routes, which go through our own territories, and continue into Independent Turkistan. This we do because there are no route-maps and road-books for Turkistan.

I. *The Road from Semipalatinsk to Vernye.*

This is the best road from Siberia to Central Asia. It runs parallel with the Djungarian frontier. It has also a double importance in a strategical point of view, because it is connected with all the rest of the roads which lead from the provinces of Semipalatinsk, and Semiretchensk, into the interior of Djungaria.

	Versts.	
Semipalatinsk.....	695	From Omsk.
1. The picket Oulougoos.....	25	} Steppe. Hard ground.
2. Arkaleek.....	22	
3. Astchee-Koul.....	27	
4. Djartash.....	21½	
5. Keeseel-Moul.....	26	
6. Arkat.....	26¼	Near the Arkat Mountains.
7. Aldjan-Adeeroff.....	24	
8. Ousoun-Boulak.....	24½	
9. Inrekey.....	26¼	
10. Alteen-Kalat.....	22¼	Hilly.
11. Sergiopol.....	26½	On the right bank of the Ayagoos. A fortification and a military station.
<hr style="width: 10%; margin: 0 auto;"/>		
	271¼	versts.
12. Ayagoos.....	31½	Hilly.
13. Taldee-Koudouk.....	29	Across the Ayagoos, by a plain.
14. Keeseel Key.....	23¾	} Steppe.
15. Malo-Ayagoos.....	26	
16. Djouss-Agatch.....	26½	
17. Arganatinsk.....	31	Sandy hills.
18. Astchee-Boulak.....	29½	Slightly hilly; no water.
19. Lapseensk.....	34	Steppe; sandy ground.
20. Baskansk.....	28½	Steppe; clay ground.

\* It must be remembered that these march routes were published in St. Petersburg in 1873. Since that time Russia has annexed the whole of Kokan.—*Translator.*

	Versts.	
21. Aksouisk.....	28½	A plain; small quantity of grass.
22. Abakoumoff.....	25½	A plain; good grass.
23. Village Arasansk.....	21	Mineral waters.
24. Kopal.....	29	Hilly; afterward a level country.
	<hr/>	
	363½	versts.
25. Ak-Itchkin.....	27	A mountain plain, with ravines.
26. Saree-Boulak.....	26	Over the mountains into the valley of Karatal.
27. Kara-Boulak.....	30	A plain; cross over the Karatal.
28. Djangeess-Agatch.....	22	A plain; hilly.
29. Tzaritzeen.....	20½	Steep descent to Koks; a cross over.
30. Kougalinsk.....	25¼	Over mountains.
31. Alteen-Eemell.....	22¼	A valley. Very many ravines.
32. Kouyankous.....	27½	“ “ “
33. Karatchekin.....	27¾	Hilly.
34. Tchingeeldinsk.....	33½	A plain. Few ravines.
35. Fortification of Illiysk....	23¾	Deep sands. Cross the river Ili on a raft.
36. Koutentaysk.....	23½	A sandy plain.
37. Karasouisk.....	22½	“ “
38. The town Värniy.....	24½	Steppe. A small quantity of grass.
	<hr/>	
	356	versts.
In all, from Semipalatinsk, 991½ versts. 38 stages.		

## II. *Steppe Roads in the Siberian Steppe.*

(a.) *From Karkaraloff to Aulieta*, through the harbor of Berteesh or Balhash, then along the west bank of this lake, thence to the river Chu below the ruins of Saree-Kurgan, and from there, through a sandy steppe, to the mountain road from Vernye to Aulieta. The road is bad. There is very little water or grass. It is about 800 versts in length.

(b.) *From Karkaraloff to Tchoulak-Kurgan*, through Kara-Mendee, Kaylubay-Boulat, Tess-Boulat, the ford Kasangan, in the river Chu, and through a sandy steppe to the west of the lake Karakol; in all, about 1000 versts. This road is good. To the north of the boundary Kaylubay-Boulat, but farther on to the Tess-Boulat, water is found only in three wells, and that is of a bad quality. From Tess to the river Chu, 70 versts, there is no water at all. On the other side of the river Chu the water is salt in the wells and in Lake Karakol.

(c.) *From Aktau*, through the boundary Djartash to *Djulek-Kurgan*, it is the same kind of road as that marked *b*. From Djulek-Kurgan through Karatau Mountains there is a road to Chemkent. It is about 750 versts in length, reckoning from Aktau.

(d.) *From Akmoloff to Turkistan*, through Kaebatee, on the river Saree-Su, there is a caravan road, which from Kaebatee leads through the sands of Djeetee-Konour and the Golodnaya steppe (the steppe of hunger), on the right bank of the river Tchou. This river is crossed at the ford Toy-Tubai, and the road goes on to Surak through a sandy steppe, which abounds in saksaoöl. After Surak it leads across the Karatau Mountains, by the sources of the stream Kashkar-Ata. The north and south parts of this road are pretty good, but the march through the sands of Djeetee-Konour and the Golodnaya steppe is a trying one. The distance from Akmoloff to Turkistan is about 900 versts.

(e.) *From Akmoloff to Turkistan*, through Kaebatee, along the river Saree-Su, to the ford Karaoutkoul, in the river Chu, then rounding the mountain Karatau to the springs Daouh-Hodja, hence to the Tumen-Areek, and so to Turkistan, in all about 1000 versts. In the valley Saree-Su there are some fine pastures; the water in the river, although a little salt, can be used. Between Ayna-Koul and the ford Karaoutkoul it is necessary to dig wells, on account of the badness of water in the Bahtee-Kouream. At the springs Daouh-Hodja there is scarcely any pasture; but it is to be found in the neighboring mountains. For fring, djikda, saksaoöl,\* etc., are met with on the greater part of the road.

The road from Oulou-Taou, Taou, Atbassar, Koktchetarr, and Petropavlovsk joins the last-mentioned road at Kon-Dombak, on the river Saree-Su. The distance from Petropavlovsk to Turkistan is 1500 versts.

### III. *The Caravan Road from Troitzk to Tashkent.*

	Days.	
1. The town Troitzk. . . . .	0	
2. Station Mihaylovskaya. . . . .	1	One day's journey.

23. Meen-Boulak.....	1	
24. Yancee-Kurgan.....	1	
25. Turkistan.....	3½	} Along the mail road, or along-side it.
26. Chemkent.....	5	
27. Tashkent.....	3	
	25 days.	
In all.....	38 days.	About 1640 versts.

#### IV. *From the Town of Irghiz to Kasalinsk.*

A mail road.\* It is within the district of the Governor-general of Turkistan. Good stations are to be found. The town Irghiz is 393 versts from Orsk by the mail road.

	Versts.		
1. Djalangatch.....	20		
2. Katye-Koul.....	18		
3. Djalownee.....	36	} Sands for Karakoum.	
4. Terekli.....	30		
5. Djouluss.....	17		
6. Kara-Koudouk.....	18		
7. Doungluck-Sor.....	30		
8. Koul-Koudouk.....	26		
9. Altee-Koudouk.....	21		
10. Ak-Djoupass.....	18		
11. Sapak.....	28		
12. Kameeshlee-Bash.....	28		
13. Bok-Baoulee.....	34		
14. The town Kasalinsk.....	32		
	346 versts,		and from Orsk, 739.

\* This road I traveled along myself. Some of the stations have been changed. In another part will be found this route as it now exists.—*Translator.*

V. *From Kuldja to Kasalinsk.*

This road from Vernye is a mail road. It runs through the Russian colonies, which may be looked upon as the basis of our operations in Turkistan, both within the boundaries of Djungaria, Tian-shan, Touran, and Khiva. It branches off at different points; the south branches lead into inner Turkistan. The above-named roads, from the Kirghiz steppes and European Russia, join it from the north.

The town of Kuldja (old or of Taratchinsk).

	Versts.	
1. Yangueeshar.....	15	Cross the river Ili.
2. Hanahay.....	37	} Villages near mountains.
3. Kaldjatt.....	23	
4. Ketmen.....	30	
5. Dardamba.....	19	
6. Tchountchjee.....	25	
7. The ford Telek.....	23	By the river Tchareen
8. Kara-Toum.....	13	
9. Saree-Tchagan.....	30	
10. Saree-Boulak.....	30	
11. Togoos-Toraou.....	20	On the river Tchilik.
12. Lavar.....	19	
13. Oulkoun-Enko.....	21	
14. Village Mihailovsk.....	22	
15. Military station Sophina ..	20	} Carriage-road.
16. Military station Nadejdina.	22	
17. The town Vernye.....	23	
393 versts.		A good carriage-road.
18. Village Lubovniy.....	28½	
19. Ousoun-Agatch.....	27	
20. Kastek.....	27	
21. Targansk.....	33	
22. Otarsk.....	30½	
23. Kourdaysk.....	32½	
24. Sagatinsk.....	30	
25. Konstantinovsk.....	23	
26. Pishpek.....	22¾	Cross the river Chu.

21. Karaboulak . . . . .	30	
22. Tokmak . . . . .	34	
23. Isseegatee . . . . .	28	
24. Pishpek . . . . .	23	

650 versts. The mail road begins at the twelfth stage.

VII. *From Aulieta to Kokan.*

A difficult bridle-road over the mountains.

	Versts.		Versts.
1. Outch-Kurgan.....	25	7. Iskee-Abad.....	13
2. Mountain-pass Kara-Boura	40	8. Namangan.....	20
3. The river Tcheerik.....	35	9. Turia-Kurgan.....	12
4. Kouree-Tchaneesh.....	30	10. Sang.....	33
5. The mountain-pass Tchan-		11. Soultan-Bayad.....	21
eesh.....	25	12. Kokan.....	20
6. Ak-Tash.....	25		
		In all.....	299

From the village Iskee-Abad to Kokan caravans march through the Fergan valley. At Sang they cross the Syr Darya. After this they must go across twenty versts of sand.

VIII. *From Chemkent to Samarcand.*

Chemkent is on the road from Turkistan to Aulieta (see route No. V.).

	Versts.	
1. Ak-Tash.....	14 $\frac{3}{4}$	
2. Begler-Bek.....	15	
3. Sharaeehan.....	21 $\frac{1}{4}$	
4. Djerree.....	14	
5. An-Djar.....	16 $\frac{1}{4}$	
6. Kouplan-Bek.....	15	
7. Tashkent.....	18 $\frac{1}{2}$	
	114 $\frac{3}{4}$ versts.	
8. Niasbash.....	19 $\frac{3}{4}$	
9. Tashkent station.....	22	
10. Tcheenaz.....	22	
11. Malek.....	17	Cross the Syr Darya.
12. Moursa-Rabat.....	33 $\frac{3}{4}$	} A sterile steppe.
13. Agatchleek.....	29 $\frac{3}{4}$	
14. Outch-Tubai.....	20	
15. Djeesak.....	14	
	179 $\frac{1}{4}$ versts.	
16. Yanee-Kurgan.....	23 $\frac{1}{4}$	Defile.
17. Sarayleek.....	15 $\frac{3}{4}$	
18. A stone bridge.....	15 $\frac{3}{4}$	
19. Djimbay.....	19 $\frac{3}{4}$	
20. Samarcand.....	19 $\frac{3}{4}$	
	94 $\frac{1}{4}$	
In all.....	388 $\frac{1}{2}$ versts.	The mail-road.

IX. *From Tashkent to Namangan.*

	Versts.		Versts.
1. Keliaoutchee.....	52	6. Oroum-Saram.....	24
2. Teliaou.....	30	7. Shagan.....	24
3. Kam-Rabat.....	25	8. Tchouss.....	32
4. Shaydan.....	22	9. Turé-Kurgan.....	20
5. Ak-Djar.....	32	10. Namangan.....	12

In all, 273 versts of good caravan road. Suitable for carriages.

X. *From Tashkent to Kokan.*

	Versts.		Versts.
1. Kouiluke.....	12	6. Tchilmahram.....	32
2. Toy-Tubai.....	22	7. Bayboutée.....	32
3. Kelsaoutchee.....	18	8. Kokan.....	8
4. Teliaou.....	30		—
5. Moulla-Meer.....	56	In all.....	210

Cross the Teheertchik on rafts, at Kouiluke, and the Syr Darya at Tchilmahram.

XI. *From Tashkent to Hodjent.*

A mail-road, through a populous country.

	Versts.		Versts.
1. Karassou.....	34½	5. Moursa-Rabat.....	30
2. Pskent.....	18½	6. Hodjent.....	24
3. Ouralskaya.....	26½		—
4. Djamboulak.....	36½	In all.....	170

XII. *From Osh to Djirrak.*

A capital caravan road through Fergana. It is a good one for carriages.

	Versts.		Versts.
Osh.....	—	9. Hodjent.....	32
1. Assakai.....	60		112
2. Kokan.....	22		
3. Margueelan.....	23	10. Naou.....	25
4. Reeshtan.....	27	11. Oura-Tubai.....	40
5. Kokhan.....	36	12. Savat.....	32
	168	13. Zaameen.....	25
6. Bish-Areek.....	32	14. Djeesak.....	55
7. Kaneebadam.....	24		177
8. Karaktcheekoum.....	24	In all.....	457

From Hodjent to Djirrak the road is good for carriages.

XIII. *From Samarcand to Bokhara.*

Through the valley on the left bank of the Zer-afshan.

	Versts.		Versts.
Samarcand . . . . .	—	6. Mialik . . . . .	18
1. Daoul . . . . .	22	7. Boustan . . . . .	28
2. Tchimbay . . . . .	21½	8. Kouyouk-Mazar . . . . .	25
3. Katee-Kurgan . . . . .	22½	9. Bokhara . . . . .	29
4. Kala-Ee-Davouss . . . . .	30		—
5. Kerminai . . . . .	35	In all . . . . .	225

XIV. *From Samarcand to Karshi.*

A caravan road through a hilly country ; no streams, but plenty of wells. Abundance of water.

	Versts.		Versts.
1. In the valley of Miankal . .	30	5. Koungour-Taou . . . . .	15
2. Djamm . . . . .	40	6. Karshi . . . . .	17

XX. *From Kokan to Kashgar.*

Osh is 168 versts from Kokan, as in the route No. XII. From Osh three different routes are given by the natives; but, on looking at the list, they appear to resolve themselves into one, except at one place:

	Versts.		Versts.		Versts.
Madee.....	1½	Langer.....	3	Madee.....	2
Kablan-Kol.....	3½	Kablan-Kol.....	4	Kablan-Kol.....	4

				Kashgar.....	5
In all.....	63	In all.....	64½	In all.....	70½

There are no settlements on the roads, and caravans rest under the open sky, where convenient, and near the brooks or wells. The mountainous character of the country past Sofoo-Karaoul forces the traveler sometimes to make détours.

XXI. *From Kokan to Koulab.*

The details of this road were obtained by questioning the natives.\* Mountainous, a road for pack animals.

\* It must be remembered that these marches were first published in 1873. The Russians know more about Kokan now.—*Translator.*

1. Kokan.....	}	In Kokan territory.
2. Saree-Kurgan.....		
3. Rishtan.....		
4. Feysabad.....		
5. Yarmasar.....		
6. Aval.....		
7. Outch-Kurgan.....

19. Ak-Sou.....	}	Koulab.
20. Hvalin.....		
21. Hanabad.....		
22. Koulab.....		

XXII. *From Dyzzak to Khiva.*

	Versts.	
1. Klee.....	12	} A carriage-road. Mountains on the left.
2. Village Nouska.....	33	
3. Village Outch-Ma.....	35	Good road. Four small rivers.
4. Village Farish.....	16	Stony road.
5. Village Selibash.....	18	Very stony.
6. Village Temir-Kabouk....	24	Not suitable for carriages.
7. The well Balta-Saldeer....	26	Very little grass; plenty of fire-wood.
8. The well Bish-Bayguee ...	32	Heavy sands; plenty of water and fire-wood.
9. Bay-Man-Taptee.....	26	A plain; some sand; plenty of good water; pasture for three versts.
10. The well Mastchee.....	19½	An even road, a little sandy; water pretty good; food and fire-wood can be obtained.
11. The well Ayak.....	15	Hilly, hard road. Fresh water; plenty of food and fuel.

	Versts.	
12. The well Aristan-Bell-Koudouk.....	25	Sterile, hilly, and sandy country; good water.
13. The well Manat-Djamm...	23	Over the ridge Arslan.
14. The well Kinderlee.....	14½	
15. The well Karak-Ata.....	8	Much water.
16. The well Tchohrk-Koudouk	30½	
17. Soultan-Bibee.....	40	
18. Outch-Koudouk.....	17½	
19. Djanguelda.....	26	
20. Hala-Ata.....	15½	
21. The well Adam-Krilgan...	28	The sands An-Koum.
22. Outch-Tchoutchak.....	48	By the Amu-Darya.
23. Ishkai-Yar.....	20	} Along the Amu-Darya.
24. Maneklee.....	20	
25. Shourahan.....	76	
26. The town Hankee.....	30	
27. The town Khiva.....	50	
In all.....	708	versts.

The troops can do this distance in seventy days. This is the road over which the Turkistan detachment marched in the year 1873.

### XXIII. *From Perovsky to Irkibai.*

A bad, sandy road, without pastures, along Jana-Darya. It is nearly 350 versts in length.

1. Areek-Kok-Ousiak.	8. Tass-Noura.
2. Boukai.	9. Saree-Tcheganak.
3. Moulkai.	10. Kok-Tchougoul.
4. Irgoul.	11. Akeer.
5. Kok-Tchougoul.	12. Kara-Outkoul.
6. Tchayouk.	13. Irkibay.
7. Koum-Tchougoul.	

### XXIV. *From Kasalinsk to Bokhara.*

	Versts.		Versts.
1. The lake Alimbay.....	15	7. Dtchaman-Tchaganok....	14
2. The well Outabass.....	18	8. The well Kjara-Moui.....	23
3. The well Irbay.....	30	9. The well Oulshir-Kasgan..	46
4. Djanbaga.....	18	10. Irkibay.....	26
5. Saree-Boulak.....	18	11. Mountain Zangar-Tubai...	10
6. The well Manass.....	25	12. Keeseel-Kak.....	45

- |                            |                        |
|----------------------------|------------------------|
| 13. At the foot of Boukan. | 19. Djousalee-Say.     |
| 14. Yous-Koudouk.          | 20. Keeseel-Kak.       |
| 15. Kokpantash.            | 21. Nasar-Bay.         |
| 16. Tanjareek.             | 22. Kassatal.          |
| 17. Tumenbay.              | 23. Bazaar Saree-Boul. |
| 18. Kinderlee.             | 24. The town Bokhara.  |

This road was traversed by Ignatieff in the year 1858. There is not much fodder or fuel. It is about 700 versts in length.

THE END.

# VALUABLE AND INTERESTING WORKS
