Steel-Lined COFFINS For Imposing Frames

A NOTABLE IMPROVEMENT IN IMPOSING FRAME CONSTRUCTION. SAVES WEAR ON THE WOODEN COFFIN AND PROLONGS THE LIFE OF THE ARTICLE INDEFINITELY

COLD ROLLED STEEL

Detail showing construction of Steel-Lined Coffin

The Steel-Lined Coffin has come to stay. It has been in use for a year or more in some of the best equipped composing rooms, and the economical qualities of this construction have been thoroly demonstrated. Steel-Lined Coffins can be supplied separately and the Coffin on any Stone Frame can be steel-lined at the extra charge noted below.

LIST OF PRICES

Coffin, complete, Steel-Lined.....	\$1.00 per running foot
Steel Lining the Coffin of any Stone Frame listed.....	.50 per running foot
Figure both dimensions. A Coffin for a 36 x 60 frame would total sixteen feet.

THE TUBBS MANUFACTURING COMPANY

LUDINGTON, MICHIGAN

THE TUBBS MFG. CO.

LUDINGTON, MICH., U. S. A.

THE FACTORY OF QUALITY
Most modern factory of its kind in the world. Completed April 15, 1905

CATALOG NUMBER FOUR

PRINTERS MODERN WOOD FURNITURE

TUBBS GOODS ARE MADE UPON HONOR

Tubbs Guarantee

With every article of the Tubbs manufacture there is a guarantee covering material, workmanship, general construction and design. All of Tubbs goods are made the best possible to produce. We know how and will do it. Every customer must be satisfied. You will always find us ready to do more than we agree. If you want anything not shown in catalog write us — we make it.

THE VERY PINNACLE OF QUALITY

Suggestions for Ordering

Do not mutilate the catalog. Order by number and do not fail to state if you want goods shipped by freight (what route), express or mail. Otherwise we use our best judgment. In ordering cases, state size; there are four sizes: Full size, three-quarters, two-thirds and Rooker. There are also mammoth wood type cases. If your dealer can not supply you, write us direct. State the kind of finish you want on cabinets. In ordering imposing stones mention if you want stone and table, or whether table only or stone only.

F Differing from the rule of manufacturing concerns of such magnitude as The Tubbs Mfg. Co., this concern is composed almost exclusively of practical men, individuals who have been foremost in the manufacture of this line of goods for twenty and more years. No institution appreciates the value of quality more than we. Quality of production is uppermost in our mind. It is our single aim to become foremost in the manufacture of Printers' Modern Wood Furniture and Point Line Wood Type. We are producing goods of such high character as will extol their own praise. We are building up a reputation solely upon the superiority of our manufacture, and when any article leaves our factory the customer has the assurance of the highest quality of work which is possible to produce. Our new factory building at Ludington, Michigan, U. S. A., has nearly 100,000 square feet of floor space, and is one of the most complete in equipment in the world. We are constantly working to produce new ideas in Printers' Furniture that will be time-savers, thereby dividend-paying. We refer with unusual pride to Tubbs line of modern Imposing Stone Frames and Concentrated Cabinets. It is the modern equipment that adds vastly to the profit—material that will facilitate the work. Concentration is a great factor in causing profit. Tubbs Concentrated Cabinets and Imposing Stone Frames are wonderful time-savers. We base our claim to your patronage because we are experts in our line, and the order which you entrust to our care will be treated as if there was no other order on earth, as if it were our special duty to produce wood furniture so designed and executed as to be the prize piece of the world.

TUBBS CONCENTRATED CABINETS

Tubbs Concentrated Cabinet No. 220, Front View
With Steel Case Slides

List Price, Complete, \$140.00

Tubbs Concentrated Cabinet No. 220, Rear View
With Steel Case Slides

List Price, Complete, \$140.00

For Detailed Description see Page 5

TUBBS CONCENTRATED CABINETS

THERE is no extravagance displayed in buying Tubbs Concentrated Cabinets. They are no longer considered a luxury, but in fact are the most economical cabinet to buy; say nothing of the convenience in having a large number of type faces in a small space, which is a time-saver and a great saving in floor space. We are great believers in concentration. It is best to have all your type and material brought as near together as possible. With a few Tubbs Concentrated Cabinets and Imposing Stone Frames you are well supplied with furniture sufficient for a good-sized office, and will occupy but a very small space. The old way requires 35 to 50 per cent more floor space. Again, your type is kept in better shape, is free from dust. Tubbs Cabinets are dust-proof. All cabinets filled with Tubbs New Idea Cases.

Description of Tubbs Concentrated Cabinet No. 220

With Steel Case Slides

No. 220 contains 75 Tubbs New Idea Job Cases, 25 full size and 50 two-thirds; three pairs news cases, highly finished; 100 individual sort boxes, all being removable and can be carried to the case. This does away with "digging" out sorts. Galley cabinet to hold 20 double galleys; working bank or galley dump 105 inches long, making 15 square feet of storage room; three pairs Tubbs swinging brackets, the only bracket in which a case can be "shaken up." Extreme length, 103 $\frac{1}{4}$ inches; width, 29 inches; height, 44 inches; weight complete ready for shipment, 1,150 pounds. Cabinets finished in beautiful antique oak, cherry or mahogany.

List Price for Cabinet Complete as Above, \$140.00

Code Word, MACE

Description of Tubbs Concentrated Cabinet No. 221

With Wood Case Slides

No. 221 is the same cabinet as No. 220, only it is made with wood case slides instead of steel, thereby reducing the number of job cases. Otherwise it is identical. There are 58 cases in all (18 full size and 40 two-thirds), three pairs news cases and three pairs Tubbs swinging brackets, 100 individual sort boxes and a galley cabinet to hold 20 double galleys. The work bank runs full length of cabinet and gives fifteen square feet of dump space. Length, 103 $\frac{1}{4}$ inches; width, 29 inches; height, 44 inches; weight, 1,025 pounds. Cabinet finished in beautiful antique oak, cherry or mahogany, with paneled back and ends. See illustration, page 4.

TUBBS CONCENTRATED CABINETS

Tubbs Concentrated Cabinet No. 228
With Steel Case Slides

List Price, not Including Rule Cases, \$90.00

No. 228 shows the Tubbs idea of modern time-saving Printers' Furniture. A job may be completed without leaving the cabinet. This is the only cabinet made where leads, slugs and brass rule are combined in such a way as to be in front of the compositor. At the option of the purchaser the galley work bank and lead and slug rack may be built so as to work from either side of the cabinet. The galley work bank is 72 inches long and holds a galley 14 inches wide. The lead and slug rack holds equal amounts of leads and slugs from 4 to 28 ems long. The top will hold 8 Tubbs perfect rule cases, but these cases are not sent with the cabinet unless ordered separately. The cases will hold 128 pounds of brass rule; if desired 16 distinct fonts may be kept, each having an individual compartment. Between the rule cases is a convenient place for sticks, etc. This cabinet is supplied with the Tubbs New Idea Cases, and is made in three styles at the same price: To hold 25 full size and 25 two-thirds job cases and 10 sort drawers, or in lieu of the sort drawers a galley cabinet, with door, holding 20 galleys may be had. The sort drawers have 10 removable compartments, making 100 distinct receptacles. Time is saved with our sort drawers; you do not waste time "digging" out sorts; each box lifts out independently and may be carried to the case. Or 50 full size job cases without sort drawers or galley cabinet may be had. Length, 72 inches; depth, 29 inches; height, 44 inches.

List Price, not Including Rule Cases, \$90.00

Code Word, MAELSTROM

No. 229 has wood slides, 18 full size and 20 two-thirds size cases, otherwise is identical to No. 228, described above.

TUBBS PROJECTING FRONT CABINETS

With Steel Case Slides and New Idea Cases

TUBBS PROJECTING FRONT CABINETS supplied with Steel Case Slides and New Idea Cases illustrates another step in the advancement toward perfection in the line of Printers' Furniture. The Projecting Front Cabinets present several features that are an innovation in cabinet construction.

Tubbs Steel Case Slides are fastened in a grooved piece of lumber, the grain running up and down. Wood worked in this way does not shrink, and the slides are always firmly secured. In cabinets of this kind manufactured by other concerns, the wood used is worked with the grain running from front to back, and in such a way is bound to shrink more or less, thus causing the slides to become loosened, interfering with the taking out or replacing the cases in an easy manner. In order to make the slides in our cabinets doubly secure, each end of the slide is held by a separate piece of grooved wood running the full height of the cabinet. The Projecting Front is another distinctive feature. The cases set back on the Steel Slides four inches from the front; this permits the resting of another case on the same slide, enabling the compositor to take a case from any slide in the cabinet and place it at the proper height for use in composing without removing the case in that slide. The cabinets are built of selected black ash, finished in antique oak, cherry or mahogany.

We guarantee Tubbs Projecting Front Cabinets with Steel Slides not to cause the annoyance that has been the drawback in cabinets of this kind offered by other manufacturers.

TUBBS PROJECTING FRONT CABINETS

With Steel Case Slides and New Idea Cases

Tubbs Projecting Front Cabinet No. 212

With Steel Case Slides and 46 New Idea Cases

List Price, Complete, \$90.00

Tubbs Projecting Front Cabinet No. 212 is a double tier cabinet holding 46 cases, 23 in each tier. Two pairs of Tubbs swinging brackets are attached to the top accommodating two pairs of news cases, which are highly finished like the cabinet. These brackets are on the opposite side of the job cases, permitting the news compositor to work undisturbed. The swinging bracket also enables the compositor to empty his stick without leaving the cabinet. Unless otherwise ordered the cabinet is filled with California job cases, but the regular job cases may be had at the option of the purchaser. The cabinet is finished in antique oak, cherry or mahogany.

Tubbs Projecting Front Cabinet No. 207

Steel Case Slides and 50 New Idea Cases

List Price, Complete, \$85.00

Tubbs Projecting Front Cabinet No. 207, with steel slides, is a single tier cabinet for 50 cases. It is especially desirable in establishments where a large case cabinet is needed and the floor space is limited.

California job or the regular job cases may be supplied, at the option of the purchaser. Finished in antique oak, cherry or mahogany.

List Price, Complete, \$85.00

Code Word, MAGNESIA

For Detailed Description and Other Sizes, see Page 11

TUBBS PROJECTING FRONT CABINETS

With Steel Case Slides and New Idea Cases

Tubbs Projecting Front Cabinet No. 211
With Steel Slides and 23 New Idea Cases
List Price, Complete, \$45.00

Tubbs Projecting Front Cabinet No. 211 is a single tier cabinet, holding 23 cases. A pair of swinging brackets is attached to the top, accommodating a pair of news cases, finished to match the cabinet. The details and special features of this cabinet are the same as in No. 212. Finished in antique oak, cherry or mahogany.

The steel slides are made from one piece of flat steel, and built into the solid side frame; each pair will hold 500 or more pounds. We do not use angle steel. You will never experience difficulty from cases "sticking" in the Tubbs quality.

Tubbs Standard Cabinet No. 265
With Steel Case Slides and 60 New Idea Cases

List Price \$90.00

Description of Tubbs Standard Cabinet No. 265

With Steel Case Slides and New Idea Cases

No. 265 is another dividend-paying cabinet. It only occupies a space 70 inches long by 20½ inches deep, and provides for 60 full size cases, the height being only 53 inches, the top case being within the reach of the average compositor. This cabinet is also a rent reducer, and saves time for the reason that so large a number of fonts are brought together, thus saving many steps. Purchaser has choice of cases. Unless otherwise ordered California job are included. All cabinets finished in antique oak. Cherry or mahogany finish may be had without additional charge. The same style cabinet can be had with two-thirds or three-quarter size cases, and made with flat top or galley top. If galley top is wanted there should be only 50 cases, for convenience to the dump. For other sizes, dimensions and additional information, see page 20. All cases have white rock maple bottoms, expert finish and no paper covering

TUBBS STANDARD CABINETS

Tubbs Standard Cabinet No. 266
With 90 Full Size Cases and Steel Case Slides

List Price, Complete, \$135.00

Another Quality Cabinet. They are Designed by Experts and Made Right

No. 266 is in perfect keeping with the Tubbs idea of modern printers' furniture—capacity and concentration are the features which have been worked out by the designers. This cabinet can be had also with two-thirds and three-quarter size cases. Purchaser has choice of cases and finish. When no special order is given, cabinets are finished in antique oak. Cherry or mahogany can be had without extra charge. No. 266 contains 90 full size California job cases in the limited space of 8 feet 6 inches long and 20 $\frac{5}{8}$ inches deep. The height is 53 inches, and the compositor can work from the top case without removing from the cabinet. There is a saving of 66 square feet in this cabinet over the use of 20-case stands. If floor space is a problem with you, it is solved in Tubbs steel slide cabinets. They are made right.

This cabinet was designed for the printer who is working for a dividend—the fellow who wants to progress. There is a daily profit in this cabinet. Concentration. The compositor can accomplish one-third more work where material is not scattered.

TUBBS STANDARD CABINETS

Illustration shows construction of Tubbs steel case slides. Note how steel is built into the solid side frame. This construction is used in all cabinets and stands. We do not use angle steel.

Tubbs Standard Cabinet No. 262
With Steel Case Slides and 50 New Idea Cases
List Price, \$75.00

Tubbs Standard Cabinet No. 262 is a single tier cabinet. This style is especially adapted to offices where floor space is at a premium, it occupying only 5 square feet of surface. The higher cases can be removed from their slides when desired and rested upon another case drawn out at the proper height for use in setting. California job cases are always fitted in cabinets in place of the regular job cases unless otherwise ordered. It is very convenient in large cabinets to label each case. Our brass label holder is a neat arrangement for this. A line showing the style and size of type contained in each case may be printed on cards and slipped in the holder; the compositor can then see at a glance what the contents are. Cabinet has flat steel case slides, each pair holding 500 pounds.

No. 262 has 50 full size California job cases, is 84 inches high, 35 $\frac{1}{2}$ inches wide and 20 $\frac{3}{8}$ inches deep; shipping weight, 575 pounds. Finished in antique oak. Furnished in cherry or mahogany also.

List Price, \$75.00

Brass label holders 5 cents each additional.

Cabinet has quarter paneled ends.

For Prices of Various Sizes, see Page 20

TUBBS STANDARD CABINETS

The illustrations on this page show the Tubbs Standard Cabinets with steel case slides, in three different styles.

No. 260 is a 30 full size case cabinet, with flat top; it is 53 inches high, 35 $\frac{3}{4}$ inches wide and 20 $\frac{5}{8}$ inches deep. Shipping weight, 350 pounds.

No. 241 is a 25 two-thirds case cabinet, with galley top; it is 44 $\frac{1}{4}$ inches high, 25 $\frac{3}{4}$ inches wide, 20 $\frac{5}{8}$ inches deep. Shipping weight, 225 pounds.

No. 250 is a 25 three-quarter case cabinet with flat top. The illustration shows a pair of double case Style A brackets attached to the top, holding two pairs of news cases. The brackets and news cases if desired must be ordered separately. The cabinet is 44 $\frac{1}{4}$ inches high, 29 $\frac{3}{4}$ inches wide, 20 $\frac{5}{8}$ inches deep. Shipping weight, 250 pounds.

TUBBS STANDARD CABINETS

Tubbs Standard Cabinet No. 290

Wood Case Slides

List Price, Complete as Shown in Illustration, \$70.00

No. 290 is a most beautiful piece of furniture with features after the Tubbs concentrated, but with fewer cases, being supplied with wood slides. The top which holds the two pairs of news cases is built solid and can be used as a work bank as well. This is the cabinet for the printer who is not in sympathy with iron case brackets. The arrangement for holding the cases on top is built in, and is part of the cabinet proper. With this cabinet we furnish two pairs highly finished news cases, 18 full size cases, 18 two-thirds cases, 10 sort drawers with 100 individual compartments which are removable, and two large copy drawers. All cabinets finished in antique oak. If desired, we finish in cherry or mahogany at same price. Shipping weight, 620 pounds.

TUBBS STANDARD CABINETS

Tubbs Standard Cabinet No. 280
Wood Slides

List Price, with 20 Cases, Galley Top, \$33.00

No. 280. There are no cabinets made with more popularity than Tubbs Standard Cabinets with wood slides. They are made to hold all size cases and either flat or galley top. This cabinet has 20 full size Tubbs New Idea Cases, and one full size copy drawer with galley top and made from selected hardwood lumber, finished in antique oak.

No. 280, with 20 full size cases and galley top, list price \$33.00

No. 276, with 20 three-quarter cases and galley top, \$29.00

No. 272, with 20 two-thirds cases and galley top, \$24.00

Brass Label Holders attached 5 cents each

For Detailed Description, Dimensions, Other Sizes and Prices, see Page 20, under Wood Slides.

No. 272 is the cabinet that is bought more in moderate size offices than any other style. While it is made in the same beautiful design as other Tubbs Cabinets, with New Idea Cases, it sells at a lower price than any other style. This size is the correct height for adding two pairs of news cases on top with brackets. Cabinets all finished in antique oak.

No. 272, with 20 two-thirds cases, flat top, wood slides, \$21.00

No. 276, with 20 three-quarter cases, flat top, wood slides, \$26.00

List Price, with 20 Cases, Flat Top, \$21.00

Tubbs Cabinets Show Quality and Design

TUBBS STANDARD WINDOW CABINETS

No. 297 is a Standard wood case slide cabinet, specially built for use by windows. It is equipped with two pairs Tubbs swinging brackets, attached at each end of the top. The top is made 28 inches deep, and is of special construction, being made of three pieces of lumber, the center with the grain running crosswise, and the outer pieces with the grain running from front to back, this not only prevents the top from shrinking or warping, but from being broken off on account of projecting so far. Finished in antique oak, cherry or mahogany.

No. 297 has 18 full size cases, 2 pairs Tubbs swinging brackets, 2 pairs news cases. Height, 44 inches; width, 35 $\frac{3}{4}$ inches; depth, 20 $\frac{3}{8}$ inches; shipping weight, 350 pounds. List price, complete, \$36.00.

Code Word, MOIETY

No. 298 is the same style cabinet as No. 297, but is equipped with steel case slides, giving 23 full size cases in the same size cabinet. Shipping weight, 375 pounds. List price, with 2 pairs Tubbs swinging brackets and 2 pairs news cases, \$47.00.

TUBBS ELECTROTYPE CABINET

Tubbs Electrotpe Cabinet No. 301
With Wood Case Slides and Blank Cases

List Price, \$14.00

These cabinets are made with wood case slides, and are fitted with blank cases. They are made of ash, finished in antique oak, cherry or mahogany. Besides the ordinary uses of these cabinets in a printing office, they are used by advertisers for keeping halftones, electrotypes and other cuts. For printing offices, brackets for news cases may be attached to flat top cabinets, 16 or 20 case size. Galley tops can be had if desired at an additional cost. A two-thirds case is 15 $\frac{1}{8}$ x20 $\frac{1}{4}$ inches inside; three-quarters, 15 $\frac{1}{8}$ x24 $\frac{1}{4}$ inches, and full size, 15 $\frac{1}{8}$ x30 $\frac{1}{2}$ inches.

TUBBS SECTIONAL CABINETS

WITH TUBBS SECTIONAL CABINET we believe the acme of cabinet invention has been reached. There are so many attractive and desirable features about these cabinets that the printer can readily observe the desirability of adopting this system. You can add to your cabinet needs as requirements demand, without buying more case room than is necessary. When you buy a series of type you can add a section or more. Each section is uniform in construction and may be built up to the ceiling if necessary. Tier after tier may be added and the appearance will be one continuous cabinet. Only one base and one top piece is necessary for each tier. While we furnish six different style sections, they are all uniform in height. All sections are supplied with Tubbs New Idea cases and 500 pound proof steel case slides. The cases are all standard depth.

465. SECTION A. Eight full size California job cases, or other style cases if wanted. Tubbs New Idea cases and steel case slides. Each pair of steel slides guaranteed to hold 500 pounds.

466. SECTION B. Eight two-thirds size job cases and three sort drawers with ten removable boxes.

467. SECTION C. Eight full size blank cases for cuts or electrotypes. Tubbs New Idea cases and steel case slides. These cases are also desirable for legal blanks.

468. SECTION D. Eight full size Tubbs index cases with adjustable partitions, which are movable by picas both ways. Built after the style of Tubbs Indexed Electro Cabinet. See page 32.

469. SECTION E. Nine standard size sort drawers, each drawer having ten individual compartments which are removable and can be carried to the case. Ninety boxes in all.

470. SECTION F. Sixteen blank cases for cuts and electros, convenient for classifying cuts.

471. Standard top piece, hard wood, highly finished, moulded front

472. Standard top piece with 60 removable sort boxes. Wonderful capacity. No extra space used.

473. Standard base, built for strength and beauty.

When you order be sure to mention style sections wanted, also if cap and base are to be included. Order by number. For styles see above.

Brass label holders fitted on cases at 5 cents each.

TUBBS EQUALIZED UNIT TYPE CABINETS

Tubbs Equalized Unit Type Cabinet

Comprising Three Units No. 1, With Cap Piece and Base, Two Pairs New York Case Brackets Holding Two Pairs News Cases

List Price, Complete, \$63.20

Tubbs Equalized Unit Type Cabinets are made with four styles of units and two styles of cap pieces and an ordinary base piece. Unit No. 1 has 10 cases of various depths. The first case is shallow, and is intended for 6 point type; the other cases are made correspondingly deeper for 8, 10, 12 point sizes. The bottom case is of extra depth for 60 and 72 point sizes. Unit No. 2 has 8 cases, seven of regular depth; the top case is shallow, for the smaller sizes of type. Unit No. 3 contains 8 blank cases for wood type and electrotypes. Unit No. 4 has 8 indexed electrotypes. Style A cap piece is an ordinary cap piece. Style B is made with a drawer 30 inches wide, 18 inches long and 2 inches deep, inside measurement, filled with 60 removable sort boxes, $3 \times 3 \times 1\frac{1}{8}$ inches deep. The base piece is plain. Cap pieces and bases are each 3 inches high. Units are $12\frac{3}{8}$ inches high. Three units with cap and base piece form a cabinet 43 inches high, the proper height for composing. Two pairs Tubbs New York Case Brackets, holding two pairs news cases, may be attached to the top. Units may be bought as required. Always be sure and give style of unit wanted. If cap piece is wanted, state style, also specify if base is wanted. These units are made of the best black ash and finished in antique oak. When ordered, cherry or mahogany finish can be had.

TUBBS CURTAIN FRONT CASE RACKS

Tubbs Curtain Front Case Rack No. 359
List Price, \$35.00

Many printing offices have long desired a modern piece of furniture in which to utilize their ordinary cases in a cabinet manner. Tubbs Curtain Front Case Racks fill this requirement. They are in every sense of the word a modern cabinet, being equipped with steel case slides, roll front new lap cove jointed curtain, making the rack absolutely dust and knife proof. A Pasquil Yale lock is used on the curtain. The entire cabinet is of superior structural strength and may be finished in antique oak, cherry or mahogany, at the option of the purchaser. Following the Tubbs idea of concentration, many offices are discarding their ordinary case racks and stands and replacing them with cabinets. The above case rack enables them to have a modern piece of furniture and still use ordinary cases, saving considerable expense.

TUBBS STANDARD WOOD TYPE CABINETS

Tubbs Mammoth Wood Type Cabinet No. 316
With Galley Top and 20 Mammoth Adjustable Cases 23x44 Inches

List Price, \$52.00

Tubbs Wood Type Cabinets are made in two sizes (see table on page 31). Cases contain movable strips which can be adjusted to picas and arranged for any size line of wood type. These cabinets are built extra strong and finished in beautiful antique oak. No. 316 occupies less than 9 square feet of floor space and gives 140 square feet of case room. The Mammoth cases have center bar.

Nos. 314, 315, 316, 317 are the Mammoth size. Nos. 311, 312, 313 are the Special size.

TUBBS STANDARD WOOD TYPE CABINETS AND CASES

No. 426 Wood Type Case

Special Size, 23 x 32 $\frac{1}{4}$ inches. May be used in cabinets Nos. 311-312-313

Each case is supplied with six division strips cut to picas. There is no space wasted. Strips can be adjusted to any size line wood type you may have. With a regular cabinet for wood type considerable time is saved in composition and the type is kept in better shape.

No. 478 Wood Type Case

Mammoth size, 23 x 44 inches. Used in cabinets Nos. 314-315-316-317

For the average size office the Special size case, No. 426, is sufficient, while the Mammoth case, No. 478, provides for a great amount of type, and is used in offices with large selections of wood type.

TUBBS CARD INDEXED ELECTRO CABINETS

Tubbs Card Indexed Electro Cabinet No. 327

With Steel Case Slides and 60 Two-thirds Cases

List Price, Complete, \$72.00

Tubbs Card Indexed Electro Cabinets are in advance of any cabinet now on the market for the care of wood cuts, halftones and electrotypes. With the use of the card system, which is included with each cabinet, it is possible to secure any cut you may want in less than a minute. If you have a thousand cuts, you have a complete record of all cuts and their location. Each case is numbered, while divisions and sections are marked on the cases inside. An

independent cabinet containing special ruled cards for keeping the record is furnished with the cabinet. All cases are made with adjustable partitions (see illustration) to accommodate any size cut without the waste of space. Cabinets are highly finished in beautiful antique oak. Cherry or mahogany finish can be had if desired.

TUBBS CARD INDEXED ELECTRO CABINETS

Tubbs Card Indexed Electro Cabinet No. 320

Steel Case Slides

List Price, with 20 Adjustable Cases, \$25.00

No. 320 shows Tubbs Card Indexed Electro Cabinet in the smallest size it is made. No other cabinet should ever be considered for the care of original cuts, half-tones and electros. A separate cabinet filled with special indexed cards is sent with each cabinet without extra charge. All cases have metal number plates, and each case has adjustable partitions which can be arranged to care for all size cuts. With Tubbs card system you have a complete record of all your cuts, and if not in the cabinet the card shows who has it. If you have 3,000 cuts you can locate any one in a few seconds. Cabinets finished in antique oak, cherry or mahogany at same price.

TUBBS SPECIMEN CABINETS

A SYSTEMATIC filing of specimens in printing offices not only preserves the several kinds of work that is produced, but enables you to show a prospective customer the character of your work, and, being systematically classified and filed, you can easily refer to specimens of Letter Heads, Business Cards, Pamphlets, Circulars, Legal Forms, Catalogs, etc., and by doing so often suggest to your customer ideas that are exactly what he is looking for, and consequently securing his work. Our illustrations show two of the most modern cabinets that are adapted for this use. They are made of ash, handsomely finished in antique oak, cherry or mahogany, and a beautiful piece of furniture for the most elaborately decorated office. Special size cabinets can be made to order at proportionate cost.

No. 346 List Price, \$22.00

No. 346 is an 8 drawer cabinet, 4 drawers $2\frac{1}{2}$ inches deep, 4 drawers 5 inches deep, outside measurement, each drawer having movable partitions.

No. 347 is a 12 drawer cabinet with the different depth drawers with movable partitions.

Either cabinet can be had in antique oak, cherry or mahogany finish.

List Price

TUBBS IMPROVED INK CABINET

Tubbs Improved Ink Cabinet is the most convenient cabinet for the storage of ink ever manufactured. The drawers are made of different depths, and will accommodate tubes and cans from $\frac{1}{4}$ pound to 10 pound sizes. The three upper drawers are $1\frac{1}{2}$ inches deep, 20 inches wide and 14 inches long. These may be used for tubes from $\frac{1}{4}$ to 1 pound sizes. The fourth and fifth drawers are 3 inches deep and will accommodate 1 and 2 pound cans. The six and seventh drawers are $3\frac{1}{2}$ inches deep and are intended for 3 and 4 pound cans. The bottom drawer is 5 inches deep, and will hold 5 and 10 pound cans. By this arrangement the several different sizes of ink tubes and cans are kept separate, free from dust and dirt and easily accessible. There is a marble top 18x24 inches for the mixing of ink. No. 354 is made of black ash, solidly constructed, finished in antique oak, cherry or mahogany. Height 38 inches, width 25 $\frac{1}{2}$ inches, depth 19 $\frac{1}{2}$ inches. Shipping weight, 180 lbs.

TUBBS MARBLE TOP INK CABINET

Tubbs Marble Top Ink Cabinet No. 350

List Price, Complete, \$13.00

A Tubbs Ink Cabinet should be in every printing office. It provides a proper place for the storage of ink. Many dollars are lost through the lack of proper place to keep the supply. On the top of No. 350 there is a marble slab 18x24 inches for the mixing of ink. There are four compartments in the cabinet for the storage of cans or tubes. The cabinet is made of ash handsomely finished in antique oak, cherry or mahogany.

Height 38 inches, width 25 $\frac{3}{4}$ inches, depth 19 $\frac{3}{4}$ inches. Shipping weight, with stone, 170 pounds.

TUBBS SCRIPT TYPE AND BORDER CABINETS

Tubbs Script Type and Border Cabinet No. 404
20 Drawers

List Price, \$30.00

Tubbs Script Type and Border Cabinets are constructed with the cases pitched at an angle of $8\frac{1}{2}$ degrees. The type and border set on end, with the face up, between adjustable division strips. The angle prevents the contents of the case from falling down and knocking off the corners or damaging the delicate lines of the face, thereby greatly increasing the life of the type or border. Fifteen pinch springs for separating characters, and fifteen division strips are furnished with each case. Extra springs or strips may be had at 2 cents each. The side rails are grooved every 6 points, and the division strips are 18 points thick. This arrangement provides for divisions for any size divisible by 6; 8 and 9 point type or border are placed in 12 point divisions. Cases are 10 x 12 inches, and will hold 30 feet of 6 point, 24 feet of 12 point, 20 feet of 18 point, 17 feet of 24 point, 15 feet of 30 point and 13 feet of 36 point. These cabinets are beautifully constructed and may be finished in antique oak, cherry or mahogany.

TUBBS LINOTYPE MATRIX CABINETS

Tubbs Linotype Matrix Cabinet No. 387
12 Drawers
List Price, \$40.00

Tubbs Linotype Matrix Cabinets are a necessary adjunct to the linotype machine. The matrices, space bands and tools of these machines are of great value and should be carefully cared for. These cabinets provide a place for these articles in separate compartments, and when needed are easily accessible. The matrix drawers are $14\frac{1}{2}$ inches wide, and 15 inches long, and have 10 inclined sections, as shown in the illustration below. Each drawer has a capacity of 142 running inches of matrices. Six metal slugs are supplied with each drawer. These are the shape of a matrix, are $\frac{3}{4}$ of an inch wide and are used for separating characters and at the end of a section if the groove is not entirely filled. In the lower part of the cabinet is the tool drawer, $14\frac{1}{2}$ inches wide, 15 inches long, $4\frac{1}{2}$ inches deep. This cannot be opened until the curtain is raised, being fitted with a pin lock. In the front of the drawer is a section 1 inch wide partitioned for space bands (which are hung on brass rods) and provides excellent accommodations for their storage and careful keeping.

These cabinets are of superior structural strength and design, and have a new lap and cove-jointed curtain, knife and dust-proof, fitted with a pasquil Yale lock. Finished in antique oak, cherry or mahogany. Special sizes made at a proportionate cost.

TUBBS ECONOMY SORT CABINETS

Tubbs Economy Sort Cabinet No. 372

30 Regular Drawers

List Price, \$36.00

Tubbs Economy Sort Cabinets are what the name implies. Every printing office, no matter how small, should be equipped with sufficient storage capacity for sorts. Cigar boxes and other similar arrangements have no place in an office today. With Tubbs Sort Cabinets sorts of different series and sizes may be kept in separate compartments and when needed are easily accessible. Label holders may be attached to the front of each drawer, showing what the drawer contains. These drawers are $8\frac{1}{2}$ inches wide, 20 inches long and $2\frac{1}{2}$ inches deep, inside measurement, and are divided into 10 equal compartments of $3\frac{1}{4} \times 3 \times 2\frac{1}{8}$ inches, inside measurement. At a slight additional cost these drawers may be made with removable compartments, which can be easily taken out independently and carried to the case. This feature does away with the "digging out" and is a great time saver. If desired these drawers may be bought separately.

TUBBS LINOTYPE STORAGE CABINET

Tubbs Linotype Storage Cabinet No. 397. List Price, \$80.00

This cabinet is especially designed for offices using linotypes. There is dumping capacity for 9 single or double galley, with copy hooks, and 12 storage galley shelves. Each shelf is $31\frac{1}{2}$ inches long, and a regular galley cabinet for 38 galley. Two drawers 16×25 inches, and two bins $16 \times 10\frac{1}{4}$ inches, 25 inches deep, for storing empty galley. Length, 72 inches; height, 42 inches; depth, 25 inches; weight, 700 pounds.

TUBBS LINOTYPE CORRECTING BANK

Tubbs Linotype Correcting Bank No. 398. List Price, Without Truck, \$78.00. Price of Truck, \$30.00

If you have a linotype you need this piece of furniture. Note the many convenient arrangements. Galley cabinet holds 54 galley; 11 galley storage shelves, 3 storage bins, metal chute with adjustable truck; has hardwood top and convenient arrangement for take and stand slugs, dashes, etc. Top piece is removable. Length, 60 inches; depth, 25 inches. Made of hardwood, antique oak finish.

TUBBS ECONOMY GALLEY CABINETS

Flat Top Galley Cabinet No. 416
Holds 20 Galleys
List Price, \$8.00

Galley Top Galley Cabinet No. 412
Holds 66 Galleys
List Price, \$36.00

Flat Top Galley Cabinet No. 418
Holds 40 Galleys
List Price, \$15.00

There is economy in having a galley cabinet in every office, large and small alike. This is one of the pieces of furniture that assists in installing system; without system it is hard for any office to succeed. With galleys with type on them scattered over the office, on top of cases, etc., you never know where to find what you want. With a cabinet, type is kept together and cases are not covered up. When wanted, we furnish number plates for each shelf. This is a convenience. When you prove a galley number the proof and put galley in shelf corresponding with number, then you will not be obliged to "hunt."

For Detailed Description, Sizes and Prices,
see Page 41.

TUBBS ECONOMY GALLEY CABINETS

Tubbs Economy Galley Cabinet No. 415, with Galley Top

9 Tiers. Capacity, 198 Double Column Galleys

List Price, \$85.00

Tubbs Economy Galley Cabinets are made in two styles: Flat Top with plain sides and Galley Top with paneled ends. Flat Top Galley Cabinets, illustrated on page 40, are thoroughly constructed of selected hardwood and neatly finished. The shelves are grooved in the sides and are pitched at an angle. These cabinets are considerably cheaper than the Galley Top Cabinets. Galley Top Cabinets are made with paneled ends, with the shelves resting upon strips. This arrangement strengthens the cabinet. The galley top is constructed of solid pieces, $1\frac{3}{4}$ inches thick at one side, tapering down to $\frac{1}{4}$ inch thick at the other side; this gives a proper angle for holding the galley to prevent pieing. These pieces are mortised together, making an unusually serviceable top. The capacities of the Galley Top Cabinets given below include the galley top. Tubbs Economy Galley Cabinets are made of the best black ash, finished in antique oak, cherry or mahogany. Drawings and prices of special cabinets will be furnished upon application.

TUBBS JOB AND AD WORK BANK

Tubbs Job and Ad Work Bank No. 399 is a most convenient piece of modern printers' furniture. It is one more of Tubbs time-savers. Minutes are what count in any printing office. Newspapers must be on time—tomorrow will not do. If you want your job department to grow, deliver printing when promised. This bank is designed to be placed at the end of job and ad alleys, as near the type cabinets as possible. The style shown in cut provides for two compositors, each having a galley work bank and a case for leads and slugs, a drawer and use of three shelves. It is a Tubbs suggestion that a lead and rule cutter be placed at one end. The construction is of the highest character, hardwood throughout, and finished in antique oak. It is another representative of the Tubbs quality. Height, 38 inches; and 30 inches square.

TUBBS INK AND ROLLER CABINETS

Tubbs Ink and Roller Cabinet No. 352

List Price, \$9.50

For Other Styles see Page 35

Tubbs Ink and Roller Cabinets are made in three sizes and afford a proper place for the storage of ink in cans or tubes, also a shelf for brayers and slabs and a compartment with racks for eighth, quarto and half-medium rollers. The cabinets are made of ash and finished in antique oak, cherry or mahogany.

No. 351 is 37 inches high, 28 inches wide and 15 inches deep, has a shelf for ink, shelf for brayers and slabs, and brackets for six each of eighth and quarto rollers. Shipping weight, 75 pounds.

List Price, \$6.50

Code Word, NADIR

No. 352 is 37 inches high, 34 inches wide and 15 inches deep, has a shelf for ink, shelf for brayers and slabs, and brackets to hold six each of eighth, quarto and half-medium rollers. Shipping weight, 100 pounds.

List Price, \$9.50

Code Word, NASAL

No. 353 is 41 inches high, 34 inches wide and 15 inches deep, has a shelf for ink, shelf for brayers and slabs, and brackets to hold twelve each of eighth, quarto and half medium rollers. Shipping weight, 135 pounds.

List Price, \$13.00

Code Word, NARCOTIC

TUBBS PONY LETTER BOARD CABINETS

Tubbs Pony Letter Board Cabinet No. 394
With 32 Letter Boards
List Price, \$27.00

Tubbs Pony Letter Board Cabinets can be furnished in any size desired. If a larger cabinet is wanted than listed in table below, add 75 cents to list for each additional letter board. These cabinets will be found most convenient in the care of small jobs. Any office not supplied with letter boards is experiencing a daily waste of time. Stone room is too valuable to be covered with dead jobs.

No.	No. of Boards	Tiers	Size of Boards	Height Inches	Width Inches	Depth Inches	Code Word	Price
389	10	1	12 x 15 in.	31½	20	16½	Nasal	\$10.50
390	12	1	12 x 15 in.	35	20	16½	Nasty	12.00
391	16	1	12 x 15 in.	44	20	16½	Nasted	15.00
392	20	2	12 x 15 in.	31½	38½	16½	Nasting	18.00
393	24	2	12 x 15 in.	35	38½	16½	Nascent	21.00
394	32	2	12 x 15 in.	44	38½	16½	Nasful	27.00

Every printing office should be well equipped with letter boards. Keep your imposing stones clean for locking-up purposes. Type matter should be stored upon letter boards until it is wanted.

With 16 Boards

List Price, \$15.00

TUBBS HARDWOOD LETTER BOARDS

Tubbs Hardwood Letter Board No. 625
21¾ x 20½ Inches
List Price, \$1.20

Tubbs Hardwood Letter Boards are made any size desired. We list the three standard sizes only. Special sizes made at a proportionate cost. No. 625 is 21¾ x 20½ inches, and fits into stands for two-thirds size cases. No. 626 is 26¼ x 20½ inches, and fits into stands for three-quarter size cases. No. 627 is 32¼ x 20½ inches, and fits into stands for full size cases. These boards are made of thoroughly seasoned hardwood. The front of the boards are rabbitted to receive galleys. The side and back rails are higher than the board, to prevent type matter from falling off.

No.	Size of Board	Code Word	Price Each	We can make any style or size letter board cabinet wanted.

TUBBS STEEL SLIDE CASE STANDS

For Illustrations see Pages 44 and 45

TUBBS STEEL SLIDE CASE STANDS give to the printing office an up-to-date stand that will accommodate old cases. An article of this kind has long been desired. They are built of hardwood, finished in the same manner as our cabinets, much neater in appearance than the old style wooden slide stand, and provides for 25 per cent additional room for cases. The stands are usually made with open fronts, but we can furnish them with a closed, plain or paneled front, at a slight additional cost.

Tubbs Steel Slide Case Stand No. 126

This stand is made with a flat top, is 44 inches high, and will hold 40 full size ordinary lip front cases. The steel slides being so close together, it is much more convenient to have pulls on each case. The flat top requires brackets to hold the cases on top, and either our swinging, New York or Style B bracket can be used. A special feature of this stand is that the cases may be put in from either side. A galley dump may be built on the top at a small additional cost. See table below.

Tubbs Steel Slide Case Stand No. 127

A modern steel slide stand, 45 inches high, with a capacity of 32 full size ordinary lip front cases. The top is so constructed as to hold two pairs of news cases. The cases are put in from the back, permitting a news and job compositor to work at the stand on opposite sides and not interfere with each other. The cases are set back about five inches from the line of the stand, allowing sufficient knee room for the news compositor.

Tubbs Steel Slide Case Stand No. 128

This stand is constructed the same and has the same capacity as No. 127, the only difference in the two is that in this stand there are two copy drawers, 16½ x 23 x 1¼ inches deep, inside measurement, in the top rail.

List Price of Tubbs Steel Slide Case Stands

No.	Capacity	Height	Weight	Code Word	Price
126	Forty full size cases.....	44 inches	215 pounds	Natty	\$20.00
127	Thirty-two full size cases.....	45 inches	285 pounds	Natural	25.00

Two pairs Style B case brackets for No. 126.....	2.50
Case pulls, each.....	.05

The prices on steel slide stands do not include cases, brackets or case pulls. These must be ordered separately.

TUBBS CONCENTRATED STANDS

Tubbs Concentrated Stand No. 125

Double Stand for 12 Full Size and 12 Two-thirds Size Cases and Galley Rack

List Price, \$20.00

Tubbs Concentrated Stands are designed to give the printer a modern stand by embodying several features found in the upper construction of Concentrated Cabinets. These stands are made of hardwood, the construction being of great structural strength. They have a flat top, upon which is attached Tubbs swinging brackets, facing the rear of the stand. In front there is a working bank or galley dump running the entire length of the stand. The single stand has one pair of brackets and the double stand two pairs. These brackets are for news cases, and by facing the back of the stand the news compositor works undisturbed by the job man. The Tubbs swinging bracket—the bracket made for a purpose—permits the “shaking up” of the lower case without removing it from the bracket. The swinging device works with ease, throwing back the lower case, giving easy access to the galley rest, enabling the compositor to empty his stick without leaving the case. The galley dump is a useful addition, and gives considerable space for a working bank or for the storage of type matter. No. 123 is a single stand for 12 full size cases, and has one pair of brackets. No. 124 is a double stand for 24 full size cases, and has two pairs of brackets. No. 125 is a double stand holding 12 full size cases, 12 two-thirds size cases and galley cabinet for 12 galleys, and has two pairs of brackets.

Prices and Dimensions of Tubbs Concentrated Stands

No.	Description	Weight	Code Word	Price
123	Single stand, holding 12 full size cases, 1 pair brackets.....	100 pounds	Naught	\$ 7.50
124	Double stand, holding 24 full size cases, 2 pairs brackets.....	150 pounds	Naughty	13.00
125	Double stand, holding 12 full size cases, 12 two-thirds size cases, and galley cabinet for 12 galleys, 2 pairs brackets.....	150 pounds	Naughted	20.00

The above prices include brackets, but not the cases.

For prices and description of other stands, see pages 46 to 51.

TUBBS CITY CASE STANDS

Tubbs City Case Stand No. 122, Double Stand

For 30 Full Size Cases

List Price, \$8.00

Tubbs City Case Stands are rigidly constructed of hardwood, put together with bolts, and are shipped knocked down. These stands have several valuable advantages over the ordinary stands, which warrants the slight additional cost. The construction of the top of the stand brings the cap case much nearer the compositor, enabling him to set from the case with greater ease. The lower case may be pushed back, exposing a galley rest; this gives the compositor the privilege of emptying his stick without leaving the stand, and makes these stands especially adapted for straight composition work. No. 121 is a single stand for 15 full size cases. No. 122 is a double stand holding 30 full size cases. The cases may be placed in the rack or removed from either the front or back of the stand. If desired, these stands can be made with panel ends at an additional cost of \$2.00. The panels give the stand an appearance of a cabinet, also keeping out a great deal of dust and dirt from the cases.

Dimensions and Prices of Tubbs City Case Stands

No.	DESCRIPTION	Weight	Code Word	Price
121	Single Stand holding 15 full size cases	55 lbs.	Nave	\$5.75
122	Double Stand holding 30 full size cases	80 lbs.	Navel	8.00

The above prices are for stands only. For prices and description of other stands, see pages 46 to 51

TUBBS CASE STANDS AND RACKS

Tubbs Double Stand No. 115
With Galley Rest
Holds 24 Full Size Cases
Price, \$6.00

Tubbs Single Stand No. 104
Holds 12 Full Size Cases
Price, \$3.25

Tubbs Double News Stand No. 107
Holds 10 Full Size Cases
Price, \$4.25

Tubbs Double Job Stand No. 111
Holds 12 Full Size and 12 Two-thirds Size Cases
Price, \$5.50

Like all goods of the Tubbs manufacture, our case stands and racks are of the highest character. The stands are made from hardwood and put together with special designed button-head bolts. The slides are mortised into the posts, giving double strength. Note in cuts the strong posts and rails. All stands are highly sanded and completed in the natural wood. Tubbs case racks are built after same construction, the larger sizes being reinforced with iron rods. This prevents spreading. Made with panel ends and back if desired.

For Prices, Sizes and Other Styles, see Page 51

TUBBS NEW YORK CASE STANDS

Tubbs Double New York Case Stand No. 118
Holds 30 Full Size Cases and 2 Pairs on Top

List Price, Complete with Brackets, \$10.50

Tubbs Quadruple New York Case Stand No. 119
Holds 60 Full Size Cases and 4 Pairs on Top

List Price, Complete with Brackets, \$18.00

Tubbs New York Case Stands are built to save space. They are made after the design of Tubbs Steel Slide Stands. A single stand holds 15 full size cases and occupies three square feet less than an ordinary stand. A double stand holds 30 full size cases with two pairs of news cases on top, and saves six square feet of floor space. A quadruple stand holds 60 full size cases with four pairs of news cases on top, and saves 13 square feet of floor space. See illustrations for arrangement of news cases on top. The cap case is brought nearer the compositor.

TUBBS STANDING GALLEYS WITH LETTER BOARDS

Tubbs Standing Galley No. 137

With 20 Letter Boards and Galley Racks. Hardwood Top

List Price, \$72.00

Tubbs Standing Galleys are built in two styles—in cabinet form or as a rack. On the opposite page the Standing Galley Rack is illustrated; these are constructed in the same manner as ordinary stands. The space beneath the galley top is utilized for two-thirds and full size cases, or an equal number of letter boards. In the longer racks there is also a galley rack. Letter boards and cases must be ordered separately. The galley tops are made either of hardwood, or panel top lined with zinc or sheet brass. The table on the opposite page gives the different sizes and prices. The illustration on this page shows a standing galley of the cabinet style. It is made of ash, rigidly constructed, finished in antique oak, cherry or mahogany. No. 137 has 20 letter boards, 30½ x 24 inches; 26 galley shelves, 10½ x 26 inches, inside measurement. Ten letter boards, 24 x 21 inches inside measurement, may be had in place of the galley rack at the same cost. We desire to call special attention to our zinc and brass lined tops. They are of panel construction. The two outside pieces are 4 inches wide, running the entire length of the top, the grain running the long way. The center is made of pieces, with the grain running in the opposite direction, a space being left between each piece. The zinc or brass lining is then fastened to the top with screws, placed at intervals of 2¼ inches. In the zinc lined standing galleys the division strips are of wood, zinc lined. In brass lined standing galleys brass tubing is used for division strips. Galley tops of this thorough construction cannot warp, causing the screws to become loosened and the lining to bulge, as is the case in standing galleys of other manufacture.

Letter boards may be used in these Standing Galley Racks instead of cases. Letter boards or cases must be ordered separately.
For detailed description, see page 52.

TUBBS NEW IDEA CASE

ON this page we are showing two illustrations. The top one is Tubbs New Idea Case with triple veneer bottom, made from white rock maple with hardwood filler, and is free from the cheap manila paper covering. The second illustration shows the common case, which has been in use, and shows what happens to the paper when put in service. The paper covering on type cases has no purpose other than to cover unfinished material, while the objections are numerous. Every printer has had the experience. All of Tubbs cases are made from hardwood throughout, three-ply veneer bottom, the grain in each ply alternating, and made from selected white rock maple with hard maple filler. Our cases do not expand, contract, crack or warp. Instead of paper bottom, we have an expert finish, which gives a more substantial case in every way. You never experience trouble from paper cracking, becoming loose, thus making a home for type dust, which must necessarily accumulate, and as the compositor sets from the case is continually stirring it up and is inhaled. Lead poison has been traced to this in thousands of cases. Tubbs cases are easily "blowed out." They slide on the side rails, bottoms being fastened with cement-coated nails, and do not come in contact with slide.

This is Tubbs New Idea Case with White Rock Maple Triple Veneer Bottom

This Case is NOT the Tubbs Quality. See the Paper Bottom

Illustrations Showing the Lay of Cases on Pages 55 to 60. Price List on Page 59

TUBBS STEEL BOTTOM FORM RACKS

Tubbs Steel Bottom Form Rack No. 182

Holds 72 Chases

List Price, \$52.00

Forms that are ready for the press, and those that have been run, should be stored in a Tubbs steel bottom form rack until wanted. It is a mistake to take up valuable imposing stone room, or to set them on the floor where there is great danger of pieing. These racks are of superior structural strength, and are finished in antique oak, cherry or mahogany. Only a small amount of floor surface is used for the large storage capacity provided. The bottom of each compartment is lined with steel, preventing damage to the rack or chase, and making it easy to insert or remove forms. The upper tier is 13½ inches high, the middle 24 inches, and the lower 36 inches. The height and depth of the different capacity racks are the same. Extra capacity is added by additional width of rack.

TUBBS CONCENTRATED IMPOSING STONE FRAMES

TUBBS CONCENTRATED IMPOSING STONE FRAME No. 164 is for the printer who cares to advance. It is by far the most improved frame ever designed, every inch of space being used in a most advantageous manner. The stone is 48 x 80 inches, and is made this size to provide for the large assortment of reglet and furniture. This size is of special value, as it enables stone men to work freely without interfering with each other. All the material used by the stone or lock-up man is within reach. The large concentrated frames are not a luxury, but rather economy. They usually replace several ordinary pieces of furniture and save walking. Time saved is money.

Equipment

Cases.

There are 19 three-quarter size blank cases for cuts and electrotypes. Indexed electrotype cases, with division strips, may be had at an additional cost of \$7.00 list. For wood type cases, with adjustable division strips, add \$4.50 list.

Labor-Saving Reglet Rack

One of the special advantages of this frame is the splendid assortment of labor-saving reglet. This material is arranged in two racks, one on each side of the frame. On one side the rack contains 20 pieces each of nonpareil and pica of the following lengths: 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 30, 33, 36, 38, 42, 45, 48, 51, 54, 57 and 60 ems. On the other side the rack contains 20 pieces each of nonpareil and pica of the following lengths: 63, 66, 69, 72, 78, 84, 90, 96, 102, 108, 114, 120, 126, 132, 138, 144, 151, 156, 162, 168, 174, 180, 186, 192, 198, 204, 210 and 216 ems, making a total of 2,240 pieces of nonpareil and pica reglet, varying from 12 to 216 ems.

Labor-Saving Furniture Rack

There is also a large assortment of labor-saving furniture arranged in two racks, one on each side, in the same manner as the reglet. The racks contain 2,024 pieces 2, 3, 4, 5, 6, 8 and 10 lines wide. The lengths from 12 to 60 ems are on one side and from 70 to 216 ems on the other side. The assortment is as follows: 20 pieces of 2 line; 16 pieces each of 3, 4, 5 and 6 line; 12 pieces each of 8 and 10 line furniture of the following lengths: 12, 18, 24, 30, 36, 42, 48, 54, 60, 70, 80, 100, 120, 140, 160, 180, 200 and 216 ems.

Chase Racks

The chase racks run clear through the frame and will hold 12 job chases and 6 cylinder press chases.

Letter Boards

There are 11 hardwood letter boards, 24 x 27 inches inside measurement, giving a storage surface of nearly 50 square feet.

Sort Drawers

In the top of the frame there are 8 sort drawers, 4 on each side. Each drawer is 7½ inches wide, 21 inches long and 3 inches deep and has 10 removable boxes for sorts, making 80 individual receptacles.

Copy Drawers

There are two large drawers, 16½ inches wide, 21 inches long and 3½ inches deep. There is one of these drawers on each side, and are convenient for copy, proofing paper, mallet, planer, quoins, etc.

Dimensions

The stone is the best Jersey marble, 48 x 80 inches. The top of the stone is 40½ inches above the floor. The frame is made of selected hardwood and finished in antique oak, cherry or mahogany, as desired. Shipping weight, complete with stone, 2,500 pounds.

TUBBS CONCENTRATED IMPOSING STONE FRAMES

TUBBS CONCENTRATED IMPOSING STONE FRAMES

TUBBS CONCENTRATED IMPOSING STONE FRAME No. 165. In the designing of Tubbs Modern Concentrated Imposing Stone Frames we study the requirements of a printing office from a practical standpoint. The economy in using modern furniture has been demonstrated time and again and the progressive printer uses only the modern kind. Every feature of Tubbs Concentrated Imposing Stone No. 165 has its own special advantage.

Equipment

Cases

There are 18 blank cases, 20x20 inches, for electrotypes or wood type. If desired we can furnish indexed electrotype cases at a slight additional cost. The indexed cases have slotted sides with division strips that can be adjusted to picas. An index book for locating cuts is furnished with these cases.

Sort Drawers

There are 8 sort drawers in this frame. Each drawer having 10 equal compartments 3x4x3 inches. Sort drawers with removable receptacles may be supplied if desired without extra cost.

Labor-Saving Reglet Rack

One of the most convenient places for this material is underneath an imposing stone. There is a splendid assortment of labor-saving reglet, nonpareil and pica, 40 pieces of each of the following lengths: 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 30, 33, 36, 39, 42, 45, 48, 51, 54, 57 and 60 ems, making a total of 2,240 pieces.

Labor-Saving Furniture Rack

This rack contains 1,122 pieces of labor-saving furniture, assorted as follows: 18 pieces of 2 line; 15 pieces of 3, 4, 5 and 6 line; 12 pieces of 8 and 10 line; cut to 12, 18 and 24 em lengths; 24 pieces of 2 line; 20 pieces of 3, 4, 5 and 6 line; 16 pieces of 8 and 10 line; cut to 30, 36, 42, 48, 54 and 60 em lengths.

Drawers

In the top of the frame there are 4 drawers that run through the frame and can be drawn out from either side. Two of the drawers are 18x40x3½ inches in size and can be used for copy, proofing paper, yard length wood rule, reglet, furniture, etc. In the center, one above the other, are two drawers 18x40x1 inch, for metal furniture.

Letter Boards

The advantage of having ample storage surface for type matter underneath a stone is realized more every day. In No. 165 there are 11 hardwood letter boards 15x28½ inches inside; and 22 in two tiers of 11 in a tier, 15x20 inches inside. This gives a storage surface of 80 square feet.

Construction

No. 165 is constructed throughout in the highest possible character and shows design, strength and workmanship. The frame is made of black ash and is handsomely finished in antique oak, cherry or mahogany. The stone is of the best Jersey marble, 40x80 inches in size. The top of the stone is 40½ inches above the floor. Shipping weight, 1,925 pounds.

List Price, Complete, \$150.00

Code Word, OKOQJIS

TUBBS CONCENTRATED IMPOSING STONE FRAMES

Tubbs Concentrated Imposing Stone Frame No. 163

Size, 40 x 80 Inches

List Price, Complete, \$150.00

We study economy for the printer, and the modern stone frames are economy. Every inch of available space in this frame is utilized to splendid advantage. The secret of a successful printing office is concentration. Have your material arranged to save walking. No. 163 provides for all the material needed by the "lock-up" or "stone man," everything is within his reach, and he can easily do the work of two men in the old way.

Equipment

Drawers

At one end of the frame there are nine drawers running clear through the frame, which can be drawn from either side. The top drawer is $6\frac{1}{4} \times 40\frac{1}{2} \times 1\frac{1}{4}$ inches deep. This can be used for steel quoins, etc. The other eight drawers are $6\frac{1}{4} \times 49\frac{1}{2} \times 3$ inches deep, and are convenient for yard lengths of reglet and furniture of different widths, also full length wood rule. In the top of the frame, in the center, there are two large copy drawers, $18\frac{1}{4} \times 40\frac{1}{2} \times 3$ inches. These run clear through, and can be drawn from either side.

Letter Boards

There are 22 letter boards, 11 on each side, $19\frac{1}{2} \times 25$ inches, inside measurement. This gives a storage surface for tied-up matter of 75 square feet.

Chase Racks

On each side of the frame there are two chase racks, one with 10 compartments for 8×12 chases, also one with 10 compartments for 10×15 chases, making 40 compartments in all, 20 on each side.

Sort Drawers

In one end of the frame there are 8 sort drawers $11\frac{7}{8} \times 15 \times 3\frac{1}{4}$ inches deep, each drawer having 4 removable boxes $11\frac{1}{4} \times 3\frac{1}{8} \times 2\frac{3}{4}$ inches deep.

Blank Cases

In the same end as the sort drawers there are 19 blank cases, two-thirds size, for wood type, electrotypes, etc. If desired, indexed electrotype cases with slotted sides and division strips, which can be adjusted to picas, may be substituted at an additional cost of \$4.00 list.

Dimensions

The stone is the best Jersey marble, 40 x 80 inches. The top of the stone is $41\frac{1}{2}$ inches above the floor. Shipping weight, complete, 1,800 pounds.

List Price, Complete, \$150.00

TUBBS CONCENTRATED IMPOSING STONE FRAMES

Tubbs Concentrated Imposing Stone Frame No. 162

Size, 40 x 80 Inches

List Price, Complete, \$150.00

In building Concentrated Imposing Stone Frames the different arrangement of the frames usually replaces several ordinary pieces of furniture, so when the cost is considered, the prices asked for these modern frames are very reasonable. No. 162 is a thoroughly constructed frame, handsomely finished in antique oak, for a 40 x 80 stone. The space underneath is entirely utilized for sort drawers and letter boards.

Sort Drawers

There are twenty sort drawers, 10 at each end of the frame. These drawers run clear through the frame and slide upon steel rollers, six fitted into each run, this insures easy motion although heavily loaded with type. The drawers are 14 inches wide, $40\frac{3}{8}$ inches long, $2\frac{1}{2}$ inches deep, inside measurement, and have 20 equal compartments, $3\frac{3}{4} \times 6\frac{3}{4}$ inches, making a total of 400 individual receptacles for sorts.

Letter Boards

The necessity of having sufficient space for the storage of tied-up matter and standing forms is obvious to every printer. It is specially convenient to have the letter boards underneath the stone. Type matter can be easily moved from the stone to galley and then to letter board, without leaving the stone, saving the time used in walking from stone to a letter board cabinet. In this frame there are 56 letter boards, $18\frac{1}{2} \times 19\frac{1}{2}$ inches, inside measurement, giving a total of 140 square feet of storage surface. These letter boards are arranged in two tiers, 14 in each tier, on each side of the frame.

Dimensions

The stone is the very best Jersey marble, 40 x 80 inches. The top of the stone is $41\frac{1}{2}$ inches above the floor. Shipping weight, with stone, 1,900 pounds.

TUBBS CONCENTRATED IMPOSING STONE FRAMES

TUBBS CONCENTRATED IMPOSING STONE FRAME No. 160 satisfies the demand for a modern medium sized frame where every inch of space is utilized. The equipment comprises 200 yards of labor-saving furniture in widths from 2 to 10 ems and varying lengths of 12 to 60 picas; 290 yards of labor-saving reglet, pica and nonpareil, in 12 to 60 pica lengths; letter boards; sort drawers; two drawers for metal furniture; two large copy drawers and a storage cabinet with three shelves. The frame is made from selected hardwood and finished in antique oak; the stone is the best Jersey marble.

Equipment

Storage Cabinet

This cabinet is on the same side as the furniture and reglet, and is made with a door, it is 11 x 29 inches inside measurement, has three shelves for storage, giving excellent accommodations for benzine cans, mallets, planers, waste rags, wood quoins, roller bearers and general storage purposes.

Labor-Saving Furniture Rack

The labor-saving furniture in this frame is one of the special features and provides for a splendid assortment from 12 to 60 ems in length, which is cut as follows, varying 6 picas in length: 12, 18, 24, 30, 36, 42, 48, 54 and 60 picas long. The widths are 2, 3, 4, 5, 6, 8 and 10 ems. The number of pieces are as follows: 18 pieces of 2 line cut 12, 18 and 24 picas long; 24 pieces of 2 line cut 30, 36, 42, 48, 54 and 60 picas long; 15 pieces each of 3, 4, 5 and 6 line cut 12, 18 and 24 picas long; 20 pieces each of 3, 4, 5 and 6 line cut 30, 36, 42, 48, 54 and 60 picas long; 12 pieces of 8 and 10 line cut 12, 18 and 24 picas long; 16 pieces of 8 and 10 line cut 30, 36, 42, 48, 54 and 60 picas long.

Labor-Saving Reglet Rack

The labor-saving reglet supply is another important feature of this frame. The arrangement brings the reglet right where you want it. Reglet is invariably used at the stone and the "stone man" can secure the lengths wanted without leaving the stone. There is a double rack holding equal amounts of nonpareil and pica, there being 37 pieces each of 6 and 12 point cut the following desirable lengths: 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 30, 33, 36, 39, 42, 45, 48, 51, 54, 57 and 60 picas. The total of 2,072 pieces embraces 290 yards.

Drawers

In the center at the top of the frame are two drawers, $13\frac{1}{4} \times 37 \times 1$ inches, one above the other, for metal furniture; these drawers run clear through the frame and can be drawn from either side; they have a capacity for 200 pounds of improved metal furniture. On each side of the metal furniture drawers are large copy drawers $13\frac{1}{4} \times 37 \times 2\frac{3}{4}$ inches; these drawers also run clear through the frame and can be drawn from either side.

Sort Drawers

On each side of the letter boards there are 8 sort drawers, each drawer equally divided into 10 compartments $4\frac{1}{2} \times 4 \times 3$ inches, inside measurement, making 160 individual removable receptacles, which gives splendid capacity for sorts of every description. If desired specimen drawers may be substituted for the sort drawers. In this case there are 30 drawers instead of 16. The price remains the same.

Letter Boards

There are eleven letter boards $25\frac{1}{4} \times 30\frac{1}{2}$ inches, inside measurement.

Dimensions

No. 160 is 36 x 60 inches. The top of the stone is $41\frac{1}{2}$ inches above the floor. Shipping weight, 1,140 pounds.

TUBBS CONCENTRATED IMPOSING STONE FRAMES

TUBBS CONCENTRATED IMPOSING STONE FRAME No. 161 presents another illustration of the Tubbs motto, "Concentration." We study carefully the needs of the printer from practical experience, and in our line of modern imposing stone frames we aim to fill the demands of our customers. Each frame has its own individual advantages, and with our complete line a purchaser is enabled to select a frame that fills his requirements. Special frames can be made to order and drawings and prices will be furnished upon application without charge.

Tubbs Concentrated Imposing Stone Frame No. 161 has its special advantage in the extra amount of space devoted to chase racks and the 28 blank cases for wood type, electrotypes, etc. The frame is finished in antique oak, and is of superior structural strength.

Equipment

Cases

The frame contains 28 Tubbs New Idea Blank Cases, 15 x 26 inches, inside measurement, arranged in two tiers, 14 in each tier. These can be used for wood type, electrotypes, etc., or if desired, Tubbs indexed electrotypes may be substituted at a slight additional cost of \$10.00. These cases have slotted sides and division strips which can be adjusted to picas.

Drawers

In the top of the frame there are two large drawers, 36½ x 21 x 4 inches. These drawers run clear through and can be drawn from either side. They are convenient for tools, quoins, mallets, planers, proofing paper, furniture, etc.

Chase Racks

One entire side of this frame is arranged for chase racks; it is divided into three sections, each having nine separate compartments. The smaller section has nine compartments 11½ x 15 inches, for 8 x 12 and 9 x 13 chases; the section below this has an equal number of compartments 14 x 18 inches, for 10 x 15 and 12 x 18 chases; the larger section, which occupies one-half of the entire side, has nine compartments 18 x 26 inches, for 14 x 20 and 14½ x 22 chases. This provides ample room for the various size chases that are in use all the time. The bottom of the chase rack is covered with steel slides, which prevents damage being done to the rack when chases are being placed in the rack or removed.

Dimensions

The stone is the best Jersey marble, 36 x 60 inches. The top of the stone is 38 inches above the floor. Shipping weight, with stone, 1,100 pounds.

List Price, Complete, \$95.50

In offices that are well equipped with wood type and electrotypes cabinets, sort drawers, reglet and furniture racks, chase racks, etc., and a new imposing table is needed, a Tubbs imposing table with letter boards should be the one selected. The space underneath an imposing table cannot be used to better advantage. Letter boards, like leads and slugs, you can never have too many of them. It is specially convenient to have the letter boards underneath a stone. Type matter can be shifted from stone to galley, then to letter board without taking a step. These imposing tables are of superior structural strength, made of hardwood, finished in antique oak. The stone is the best Jersey marble. The tables are made with or without paneled ends, the extra cost being moderate. The letter boards are made of selected hardwood, with closed sides and back, rabbitted in front so as to permit the galley being held against the board when shifting type matter.

For Detailed Description and Prices of Different Size Tables and Stones Kept in Stock, see Page 75. Estimates and Drawings of Special Stone Frames of Any Size and With Any Arrangement Desired Furnished Upon Application.

TUBBS IMPOSING TABLES AND STONES

TUBBS STANDARD LINE OF IMPOSING TABLES AND STONES are made of selected hardwood lumber, rigidly built and finished in a thorough workmanlike manner. In selecting an Imposing Stone the requirements of your shop should be carefully considered. Our line of Frames fill every requirement, and you should have only the best. We are showing here the Standard Line of Tables kept in stock, in sizes ranging from a 24 x 36 inch stone for a two-page six column paper to a 48 x 60 inch stone for a four-page seven column paper. The tables are made in two styles. One is unvarnished and has square legs, the other is varnished and has round legs. The smaller size tables have but one drawer, which can be pulled out from either side; the larger sizes have two drawers. We use nothing but the best hard Jersey marble for our stones. In any of these tables the space beneath the stone may be utilized for chase racks, or fitted for labor-saving furniture racks or cases. All tables or frames are shipped knocked-down, so that they may be conveniently handled in stairways or taken through small doors. Estimates and drawings of special size frames will be furnished upon application. The price of tables without stone always includes the coffin. Coffins may be ordered separately and can be made any size wanted, at 75 cents net per running foot the long way.

For Tables with Letter Boards and Various Other Arrangements,
see Pages 72 and 73.

We can furnish tables larger than given in the above sizes at 75 cents per square foot. The list price of stones larger than the above stock sizes is \$1.00 per square foot. The weight of a stone is figured at 32 pounds per square foot. We can furnish any size stone wanted. Drawings and prices furnished without charge.

TUBBS MOVABLE DRYING RACKS

New York Drying Rack No. 185

20 Dryers

List Price, \$19.00

Tubbs New York Drying Rack is the popular rack. The frame is made of hardwood, put together with iron bolts and mounted on four castors. The dryers are easily placed in the frame and rest on hardwood runs. We make four sizes, a 20 or a 30 shelf rack for dryers 24 x 36 inches and a 20 or 30 shelf rack for dryers 28 x 42 inches. Extra dryers may be ordered separately.

Chicago Drying Rack No. 192

10 Dryers

List Price, \$22.00

Our Chicago Rack is of the same rigid construction as the New York rack and is mounted on castors. The special feature of this rack is that the dryers are framed all around, the side rails extending 4½ inches in the back and rest when in the frame on two pins; when the dryer is not in use it may be raised as shown in the illustration, the extended rails catching on the pins at the back of the frame. Extra dryers may be ordered separately.

TUBBS EASY RUNNING TRUCKS

For Drying Racks and General Use

Tubbs Easy Running Trucks are especially adapted for printers. They are made with a patent corner construction with its interlocking corner iron bolted to the frame, which gives great strength and rigidity to the whole truck. Patent swivel castors prevent friction, and the truck is so balanced as to *turn corners sharply and completely around in its own length.*

Printers will realize the value of this feature, and this is positively the only truck made which will admit of this. All trucks have four removable stakes 34 inches above platform. Our trucks are designed to *push* and not to pull.

No. 504 27 x 48 inches

This Truck is made with a detachable handle which can be hooked on either end, eliminating the turning of a truck when heavily loaded, also saving considerable time when handling quantities.

No. 510 24 x 36 inches

List Price, \$16.00

TUBBS LABOR-SAVING LEAD RACKS

NO printing office today is complete that is not well equipped with Tubbs Labor-saving Lead Racks. The name labor-saving implies all that is necessary for the wide-awake printer. Labor-saving material is the kind that pays dividends, and it is necessary to provide a suitable place for it. These racks are made to hold the standard lengths of leads, slugs or reglet, varying from 4 ems to 60 ems, graduated by half-ems and ems. Each compartment is stamped with the size that it will accommodate, and a line gauge is attached to each rack to aid the distributor in determining the various lengths. The racks are built of hardwood, are of solid construction and may be finished in antique oak, cherry or mahogany, at the option of the purchaser.

No. 425 is a two-tier rack with 66 compartments for leads, slugs or reglet in lengths varying from 4 to 60 ems. The lengths from 4 to 12 ems are graduated by half-ems; from 13 to 60 ems by ems. A special feature of this rack is that the material lies flat in each compartment. This prevents pi and is an advantage over racks where the material is placed on edge.

Height of rack, $17\frac{3}{4}$ inches; length, $42\frac{1}{2}$ inches, outside measurement. The compartments are 8 inches high, and will hold 750 pounds of leads or slugs. Finished in antique oak, cherry or mahogany.

No. 425 List Price, Rack only, \$6.00

List Price, Rack only, \$6.00

Code Word, RABID

Six hundred yards of labor-saving reglet fills this rack. It makes 4,554 pieces in all—46 pieces of nonpareil and 23 pieces of pica of each of the 66 different lengths.

List Price, Reglet, \$14.00

Code Word, RABIES

No. 426 List Price, Rack only, \$9.00

No. 426 is a four-tier rack of the same design, construction and finish as No. 425. In this rack there are two compartments for each length, one above the other. The lengths vary from 4 to 60 ems. From 4 to 12 ems varying by half-ems, from 13 to 60 ems by ems. In filling this rack one compartment of each size may be used for leads, the other for slugs or reglet. Height, $34\frac{1}{4}$ inches; length, $42\frac{1}{2}$ inches, outside measurement. Each compartment is 8 inches high. The rack will hold 1,500 pounds of leads or slugs.

List Price, Rack only, \$9.00

Code Word, RACE

Twelve hundred yards of labor-saving reglet fills this rack. It makes 9,108 pieces in all—92 pieces of nonpareil and 46 pieces of pica of each of the 66 different lengths.

List Price, Reglet, \$28.00

Code Word, RACEME

TUBBS BOSTON LEAD RACK

Tubbs Boston Lead Rack is made in four sections. Each section is complete in itself and can be bought separately. The four sections together form a complete rack for leads, slugs or reglet, in lengths varying from 4 to 60 ems. Each compartment is stamped with the length it will accommodate, and a line gauge is attached to each section for determining lengths when distributing. Finished in antique oak, cherry or mahogany.

Prices and Capacity

Section	Lengths in Section	Height	Length	Code Word	Price
A	4 to 6½ ems, varying by half ems; 7 to 15 ems, varying by ems	8½ in.	17½ in.	Rack	\$0.90

Tubbs
Eureka Lead
Rack
No. 428

Tubbs Eureka Lead Rack is a two tier rack; each tier has compartments for lengths from 4 to 28 ems, varying by ems. One tier may be used for leads, the other for slugs. The compartments are built on an incline. The material is placed in the rack on edge.

These compartments also incline backwards, preventing the material from falling out. Size of rack, 14½ inches wide, 28½ inches high; compartments, 5½ inches wide, and are stamped with the length accommodated.

Price, Rack only, \$2.50
Code Word, RADIATE

170 yards labor-saving reglet cut in 2,250 pieces, 60 pieces of nonpareil and 30 pieces of pica of each length, to fill No. 428.

Price, \$4.25
Code Word, RADIATOR

Tubbs Metal
Furniture
Rack
No. 430

This rack is built with compartments on both sides, each side arranged in exactly the same manner. This permits the storing of 300 pounds of metal furniture, and gives easy access to any size. It is important to keep metal furniture in good condition; after the corners and edges are damaged it cannot be used in a form that must be exact. The rack holds metal furniture 2, 3, 4, 5, 6, 8 and 10 ems wide, each size in lengths of 4, 5, 6, 8, 10, 15, 20, 25 and 50 ems. Each compartment holds 16 pieces, stacked in two tiers. The size accommodated is stamped above each compartment. The rack is finished in antique oak, cherry or mahogany. Height, 58 inches; width, 13½ inches; depth, 10 inches.

Price, Rack only, \$12.00
Code Word, RADICAL

TUBBS LABOR-SAVING WOOD FURNITURE

Tubbs Mammoth Labor-Saving Furniture Case No. 440

Contains 1,530 Pieces

List Price, \$40.00

Many printers make the serious mistake of having insufficient labor-saving wood furniture. Single cases answer for the small country office, but the average office should have the Mammoth size. In the Tubbs Mammoth Labor-Saving Furniture Case you have all lengths from 10 to 160 ems, a total of 1,530 pieces; a sufficient amount to meet the general needs without having to unlock a form to secure furniture for the job you are preparing. There is a dividend in this case, and we especially recommend this size for the medium size and larger offices. The purchase is a single item. Inconvenience and time lost with small fonts is a daily item. It is poor economy to figure first cost.

The assortment in the Mammoth case is as follows: 270 pieces each of 2, 3 and 4 line furniture; 225 pieces each of 5 and 6 line furniture; 135 pieces each of 8 and 10 line furniture, cut to the following standard lengths, 10, 15, 20, 25, 30, 40, 50, 60, 70, 80, 90, 100, 120, 140 and 160 ems. This gives 102 pieces of each length from 2 to 10 lines wide. A total of 479 yards cut into 1,530 pieces. This assortment gives more pieces of the narrow furniture, which is used oftener than the wide sizes. The case is 42 inches high, 32 inches wide and 28 inches deep at the base. It is made only with partitions. Finished in antique oak, cherry or mahogany as desired.

List Price, Complete with Furniture, \$40.00

TUBBS LABOR-SAVING WOOD FURNITURE

Style A, Single Case, No. 434
With Partitions
List Price, \$10.00

Style B, Single Case, No. 434
With Partitions
List Price, \$10.00

Tubbs Labor-Saving Furniture is given a special oil treatment which fills the pores of the wood and increases its durability. The size of each piece is stamped on the end. Labor-saving furniture cases are made in two styles, Style A without door, Style B with door. In Style A cases the furniture projects beyond the sides of the case and is more easily reached. In Style B cases it is necessary to set the furniture back in the case on account of the door. These cases are also made with and without partitions, but the value of the case is greatly increased by the partitions and we would always recommend this feature. A half case contains 280 pieces, 5 pieces each of the following widths, 2, 3, 4, 5, 6, 8 and 10 line wide by 10, 15, 20, 25, 30, 40, 50 and 60 ems long. A single case has 560 pieces, 10 pieces of each width and length, and a double case 1,120 pieces, 20 pieces of each width and length. Cases No. 435 and 437 have the same widths as a single case, but with the following lengths, 70, 80, 90, 100, 120, 140 and 160 ems. The Mammoth Case has a special assortment, as described on the opposite page.

List Prices of Labor-Saving Furniture and Cases

TUBBS POINT LINE FURNITURE

Tubbs Point Line Furniture is made with the same exactness as reglet of our manufacture. It is cut to points, perfectly dressed, and absolutely accurate. Tubbs reglet and furniture are given a special oil treatment, filling the pores and increasing its durability.

No. 680 Case Raised

No. 684
Galley Bracket
40 cents per pair

No. 682 Double Case Bracket
Style A \$1.50 per pair

No. 683 Double Case Bracket
Style B \$1.25 per pair

No. 681 New York Case Bracket
\$1.50 per pair

The above illustrations show the several kinds of case brackets used, also a galley bracket and roller bracket. Tubbs Swinging Bracket is made for a purpose. It is the only bracket made of this character whereby a case can be "shaken-up" without removing the case from the bracket. The swinging device is balanced perfectly and swings back very easily, giving free access to the galley rest. When the case is back every part of the galley is exposed, which permits easy dumping of type. This bracket is also an improvement for the reason that the compositor can correct the galley and secure type from any box in the case, even the figure boxes are easily accessible. A wooden galley for holding brass galleys accompanies each pair of brackets. A comparison of Tubbs Swinging Bracket with any other similar bracket readily sets forth the superiority of this arrangement. In the New York Case Bracket the upper case is raised above the lower and brought nearer the compositor. Tubbs Double Case Bracket, Style A, is to be attached to the end of flat top cabinets. Style B can be attached to any flat surface.

Tubbs Galley Racks

Tubbs Galley Racks are made with a strongly constructed frame to which are attached the Galley Brackets. These brackets hold single and double galleys; they are detachable from the frame, the arm of the bracket fitting into a socket.

List Price, \$5.00

TUBBS BRASS LINED GALLEYS

The construction of Tubbs Brass Lined Galleys is of such a nature that it gives a galley far more durable than the all brass galley. A brass lined galley is made with a full brass bottom, rims of wood, $\frac{7}{8}$ of an inch wide, lined with angle brass, which is secured to the bottom. This lining protects the wood rim from lye and water. The wide rim insures a safer hold when handling; there is also a brass plate at the head. Half lined galleys are made in the same substantial manner, with only the one side lined with the angle brass. Unlined galleys have brass or zinc bottoms. The Mustang and Rukenbrod mailing galleys are unlined.

No. 700 Brass Lined. List Price, \$2.00

TUBBS STEEL ROLLER BEARERS

Tubbs Steel Roller Bearers are the best roller supporters ever used for job presses. They are stamped from cold rolled steel, and only take up one-quarter of an inch of the inside space of the chase. These bearers relieve the pressure of the rollers upon a form, give an impression of even pressure, and prevent over-inking. The bearer also saves the rollers from being cut, as they are three-quarters of an inch wide on top.

Code Word, TOPBOOTS

TUBBS ELECTROTYPE BACKING

Paneled Backing

Panel Backing is made from clear selected lumber free from defects. The blocks are made in 24-inch lengths and any width desired. As a rule they are ordered with half inch variations. This backing is the thing for large plates and in book work where uniform boards are required, that are too large for ordinary backing.

Net Price

100 Square Feet, F. O. B. Ludington, Mich., \$20.00

Laminated Backing

A mounting that is guaranteed not to swell, shrink or crack, and will stand a long run without wearing in the center. It is built up of five layers of selected stock with the grain crossed alternately. The standard sizes of blocks are 12 x 24, 16 x 24, 24 x 24 and 24 x 36.

Net Price

100 Square Feet, F. O. B. Ludington, Mich., \$20.00

Tubbs V-Matched Backing

Made from birch strips three inches wide, V-matched and thoroughly glued. The fibre of the wood being broken the liability to warp is greatly lessened. It is made up in 24-inch lengths and from 10 to 14 inches wide, and $\frac{7}{8}$ inch thick.

Net Price

100 Square Feet, F. O. B. Ludington, Mich., \$7.00

Birch and Cherry Backing Lumber

The standard mounting lumber made from carefully selected timber, perfectly seasoned and dressed. Furnished in widths varying from three to ten inches and 24 inch lengths, planed to $\frac{7}{8}$ inch thick, or thinner, and put up in 100 square feet lots. Special widths and thicknesses can be furnished at an additional cost.

List Price

100 Square Feet, Birch, F. O. B. Ludington, Mich., \$ 6.00
100 Square Feet, Cherry, F.O.B. Ludington, Mich., 12.00

Suggestions About Backing

The standard thickness of backing is $\frac{7}{8}$ or $1\frac{1}{8}$ inch, and will allow final dressing. If a piece of plate is sent us with your order, we will dress the backing so as to be type high when plates are mounted. Backing lumber should be kept in the original package, covered with paper and weights on top; or stood on edge in a specially arranged rack, allowing the air to circulate around each piece. Do not lay backing on a flat surface with one side exposed or it will invariably warp.

TUBBS ENGRAVING WOOD

In the manufacture of Engraving Wood the utmost care is exercised in the selecting of maple or boxwood. Maple engraving blocks are made of Connecticut pasture-grown white rock maple, seasoned for three years by our special air-drying process.

Boxwood engraving blocks are made from specially imported Turkey and Abyssinia boxwood, which is seasoned in the same manner. Tubbs American boxwood for medium grade work is given the same careful treatment. Maple blocks are made of large pieces of wood, about five to the square foot. These blocks can be made any desired size.

Tubbs Engraving Maple No. 628 Per Square Inch, 1 Cent

In the imported boxwood blocks, there are four grades. The different grades being determined according to color, specific gravity and solidity. The cheaper grade is made from pieces near the heart of the log, and has more or less of the red streaks and imperfections. The best grade is made from the finest pieces, and is absolutely free from defects. The grain is very compact, and will hold the finest of lines. The American boxwood is clear and uniform in color, and is satisfactorily used in medium grade work. In all our engraving blocks each piece is feathered where joined, and every joint is guaranteed perfect.

TUBBS END-WOOD TINT BLOCKS

Labor-Saving Tint Blocks

Tubbs Labor-Saving Tint Blocks are made of white rock maple, finished with high polish, like engraving wood. The strips are cut to even picas and nonpareils in width. In making up a tint block, set your panel to even picas, select a strip the same width and cut to the length desired. A font consists of two pieces each, 1, 1 1/2, 2, 2 1/2, 3, 3 1/2, 4, 5, 6 and 8 ems pica wide. Each strip is 8 inches long.

List Price Per Font, \$1.00

Code Word, Tessie

Solid Face Tint Blocks

Tubbs Solid Face Tint Blocks are highly finished and print solidly. They are especially convenient for the rapid setting up of forms.

1 em wide, per ft. . . \$0.10	10 ems wide, per ft. . . \$0.48
2 ems wide, per ft. . . .12	12 ems wide, per ft. . . .50
3 ems wide, per ft. . . .15	15 ems wide, per ft. . . .66
4 ems wide, per ft. . . .20	18 ems wide, per ft. . . .75
5 ems wide, per ft. . . .22	20 ems wide, per ft. . . .80
6 ems wide, per ft. . . .24	24 ems wide, per ft. . . .85
8 ems wide, per ft. . . .26	30 ems wide, per ft. . . .90

Larger pieces squared up any size desired at 1 cent per sq. inch.

Tubbs Side Wood Poster Boards

We take considerable pride in the character of our poster boards. The hardwood boards are made of selected white rock maple. The basswood and whitewood boards are made from carefully selected stock, and perfect in every way. We have special facilities for manufacturing these boards. They are finely finished and dressed type high. Every board has the Tubbs stamp of quality, and a guarantee accompanies each piece. All the standard sizes carried in stock. We can execute orders for any size desired very promptly. These boards are sold by the square foot. Prices quoted upon application.

SPECIALTIES FOR PRINTERS

Union Hempel Quoins

These quoins have rounded ends. They do not scratch the stone. Being die struck they are perfectly accurate. They may be used with any "Hempel" quoin.

Union Hempel Quoins are made of the very highest grade material, thus insuring durability.

No. 1 (small), per dozen pairs	\$2.50
No. 2 (large), per dozen pairs	3.00
Keys, each	.50
Subject to discount	

Union Register Quoins

Afford perfect and permanent register without unlocking the form.

The Union Register Quoin may be locked in the form around each plate, just like furniture, and when it is desired to move any plate or plates, it may be done by contracting one quoin and expanding the other.

Hundreds of printers are now using them. They pay for themselves on the first job. It costs nothing to try them.

No. 1 expands from 18 to 24 points. Per doz.	\$1.50
No. 2 expands from 30 to 48 points. Per doz.	1.60
Steel wrench for operating quoins	.15
Subject to discount	

The Brower Quoin

This is undoubtedly the best quoin ever made. It has central racks and is the only quoin that possesses this most essential feature. The key goes clear through rack, giving a direct drive and never slipping out to the injury of forms. The Brower is very powerful and has continuous bearings. The best printers—the men who look to every detail—will use no other than Brower quoins.

No. 0, "Little Samson," smallest wedge quoin ever made, per dozen pairs	\$2.00
No. 1, medium size, per dozen pairs	2.50
No. 2, most useful and most satisfactory quoin on the market, per dozen pairs	3.00
Steel keys with cut teeth, imparting rolling, smooth motion, each	.50
Subject to discount	

Union Tableting Apparatus

This is a common sense tableting apparatus, quick and effective.

Prices

Complete with Box, Base Plate and Hollow Iron Brick.
Size of box, 8½ x 8½ x 18 inches.

Capacity, about 6,000 sheets at each load	\$7.50
Extra Iron Bricks, hollow, each	2.00
Extra Iron Bricks, solid, each	3.00
Extra Base Plates, each	.75

Union Hempel Locking Quoin

A simple, sure locking quoin, made on the regular "Hempel" pattern; may be operated by the standard key.

The lock, which is part of the quoin, may be dropped into mesh with the teeth at any point desired, thus effectually locking the quoin and positively preventing slipping. The Union Locking Quoin is particularly valuable to color printers where close register is imperative.

Price, per dozen pairs	\$3.00
Keys, each	.50

Non-Breakable Job Chases

Prices for Standard Job Presses

8 x 12, each	\$2.50
10 x 15, each	3.00
12 x 18, each	3.50
14½ x 22, each	4.00

Here's something entirely new. An indestructible chase for job presses at practically the price of cast iron ones. They won't break—the most they will do is bend, and the bending point commences at the breaking point of cast iron.

SPECIALTIES FOR PRINTERS

Union Form Truck

The Union Truck is made of malleable iron—it is strong, durable and light. Weighs four pounds and is stronger than cast iron ones four times as heavy.

The Union is painted red so as to be easily seen on the floor.

With Iron Tires, each . . . \$3.00
With Rubber Tires, each . . . 5.00

Union Safety Storage Can

For Benzine or Oil

This can is strongly made of galvanized iron, and is fitted with solid brass self-closing faucet. No fluid can come out until the faucet is opened by pressing button, thus preventing evaporation and insuring safety.

1 Gallon Can . . . \$2.00
3 Gallon Can . . . 2.50
5 Gallon Can . . . 3.00

Union Safe Benzine Can

Approved by insurance companies the best and safest. Made of heavy special steel japanned red. Strong, handsome, practical. Easy to fill, easy to use. Thousands in use.

Pints, each . . . 45 Cents
Quarts, each . . . 50 Cents

Union Rolling Galley Rack

A great time and money saver in publication offices. The convenience of rolling the rack loaded with galleys up to the stone and thereby having everything at hand is so apparent as to require no explanation.

These racks carry 30 galleys, are fitted with genuine Union reversible brackets, are mounted on Martin patent cushion castors, and are made of hardwood with handsome cabinet finish.

Price, \$21.00

Brass and Copper Thin Spaces

obviate the use of cardboard for letter-spacing lines or justifying particular words.

These spaces are cut by machinery and are perfectly accurate, put up in following assortments in cardboard boxes, partitioned off for each size:

No. 2, 10 oz. half point, 12, 18, 24, 36, 48 . . . \$1.00
No. 3, 10 oz. half and one point, 6, 8, 10, 12, 14, 18, 24, 30, 36, 48 . . . 1.00
No. 4, 10 oz. half and one point, 12, 18, 24, 36, 48 . . . 1.00
No. 5, 10 oz. half and one point, 6, 8, 10, 12, 14 . . . 1.00
No. 6, 10 oz. one point, 12, 18, 24, 36, 48 . . . 1.00
No. 7, 10 oz. half and one point, 54, 60, 72 . . . 1.00
No. 8, 1/4 case (wood), half and one point, 6, 8, 10, 12, 14, 18, 24, 30, 36, 48 . . . 4.00
2 oz. packages of any one size, 25 cents per package

Union All-Brass Galley

Are made just as shown in illustration. The sides are securely riveted to the bottom and project at the end, making it easy to slide matter on and off the stone. These galleys are extra heavy and extra well made. They will last a lifetime. They cost no more than others.

Prices

Single Column, 3 3/4 x 23 3/4 inches inside . . . \$2.00
Double Column, 6 1/4 x 23 3/4 inches inside . . . 2.50
Triple Column 8 1/4 x 23 3/4 inches inside . . . 3.25
News Galley, 3 3/4 x 11 3/4 inches inside . . . 1.50
Book Galley, 5 x 23 3/4 inches inside . . . 2.25

Job Galleys
