President Dykstra reported that due to present conditions the demand on the student loan funds was small this year and the payments on loans better than usual, that at present there was \$48,000 in cash in the loan funds and suggested that \$30,000 might be temporarily invested. Upon motion of Regent Cleary, seconded by Regent Hodgkins, it was

VOTED, That authority be granted to invest up to \$30,000 of these funds in war bonds of the issue or issues regarded as most advantageous.

President Dykstra presented a report of Dean Greeley on the war work conducted by women on the University campus. (Copy attached.)

The President called attention to the Wisconsin Union Progress Report, dated October 14, 1942, which was distributed to the Regents. (Copy on file.)

President Dykstra called attention to the report of the Graduate School to the President (1940-42) which was distributed to the Regents. (Copy on file.)

President Dykstra presented the request of Oscar Mayer & Company for the withdrawal of the \$1000 which they presented to the Regents for the establishment of an industrial fellowship. Upon motion of Regent Sensenbrenner, seconded by Regent Kleczka, it was

VOTED, That the request be approved and the refund of \$1000 authorized.

Upon motion of Regent Kleczka, seconded by Regent Werner, it was

VOTED, That an appropriation of \$990 be made to the General Library from Regents Unassigned 1-E for operating the cloakroom of the University Library.

Upon motion of Regent Cleary, seconded by Regent Vergeront, it was

VOTED, That an appropriation of \$780 be made from Regents Unassigned 1-E for the increase in salary of Karl Paul Link, Professor of Biochemistry, beginning

November 1, 1942 (from \$5025 to \$6000 a year).

Upon motion of Regent Werner, seconded by Regent Hodgkins, it was VOTED, That an appropriation of \$639 from Regents Unassigned 1-E be made to the College of Agriculture for repairs at the Fleckenstein House for Rural Sociology.

Upon motion of Regent Sensenbrenner, seconded by Regent Vergeront, it was VOTED, That an appropriation of \$35 be made from Regents Unassigned 1-E to the Office of the Dean of Women for postage in connection with women's war work.

President Dykstra called attention to the report of Dean F. O. Holt with reference to the various war programs conducted at the University. (Copy attached.)

The Comptroller presented a number of communications and petitions with reference to the matter of turning in cannons on the University campus for scrap. Upon motion of Regent Hodgkins, seconded by Regent Vergeront, it was

VOTED, That the matter be referred to the Comptroller; that he confer with the War Department to ascertain just what their desires are and also to find out whether the University has authority to dispose of the cannons.

Regent Hodgkins, chairman of the committee appointed to revise the schedule of Board meetings for the current year, presented the following suggested schedule:

October 31, 1942	
November 21, 1942	
January 23, 1943	
February 27, 1943	
March 27, 1943	
April 24, 1943	
May 28, 1943	(Annual Meeting)

Upon motion of Regent Cleary, seconded by Regent Kleczka, it was VOTED, That the schedule be approved and the by-laws amended accordingly.

President Dykstra made verbal report on the course which is given in the University for cooks and bakers for the U. S. Navy.

Regent Cleary, Chairman of the Finance Committee, reported upon the work which his committee had done on the legislative budget and stated that in view of the fact that the State Budget Director is anxious to have the estimates for the 1943-45 biennium presented to him by November 16th, he would like to ask the Board for approval of the tentative setup so that it could be put in form for presentation to the Director of the Budget. This is to include requests for a post-war building program. Upon motion of Regent Holmes, seconded by Regent Kleczka, it was

VOTED, That the Finance Committee and the administrative officers of the University be authorized to complete the preparation of the legislative requests for 1943-45 and to present them to the State Budget Director.

The meeting adjourned at 11 A.M.

M. E. McCaffrey,

Secretary.

120. The following persons appointed apprentices for the academic year 1942-43 at \$250 each per annum:

Jerome E. Baird	Mining and metallurgy
Helen L. Baldwin	Home economics
Russell H. Brown	Chemistry
Robert A. Buckley	Chemical engineering
James L. Cockrell	Electrical Engineering
Jerome F. Fallon	Chemical engineering
Paul F. Hoffman	Electrical engineering
Joseph F. Hull	Electrical engineering
Cynthia J. Kersten	Home economics
Arne V. Larson	Mechanical engineering
Harold O. Larson	Chemistry
Roger P. Lescohier	Chemical engineering
C. Keith McLane	Chemistry
Robert L. Munson	Civil engineering
Norval E. Rather	Agricultural engineering
Jesse M. Scholl	Agronomy
Jesse C. Saemann, Jr.	Civil engineering
Veronica M. Stodola	Home economics
William A. Wilcox	Mining and metallurgy
Anne Williamson	Home economics.

121. The following persons appointed WARF assistants for the academic year 1942-43, at \$600 plus \$79 each:

Homer W. Welch, Jr.	Physics
Alvin C. Warnick	Animal husbandry
Robert E. Wagner	Agronomy
Bryce E. Tate	Chemistry
Jean E. Switzer	Agricultural bacteriology
Maryloo Spooner	Physiology
G. David Schilling	Chemical engineering
Dorothy Jane Rodwell	Zoology
Virgil I. Mann	Geology
Ernest B. McQuarrie	Biochemistry
Don H. Larsen	Pharmacology
James E. Kuntz	Plant pathology & botany
Ross M. Kitchen	Chemistry
James B. Kendrick, Jr.	Plant pathology
James A. Johnson, Jr.	Chemistry
Lennart N. Johanson	Chemical engineering
Walter J. Hushley	Physics
Peter Heussenstamm	Chemistry
Juanita L. Fox	Home economics

APPOINTMENTS:

121. (Continued)

Richard M. Elofson	Chemistry
J. Floyd Davis	Agricultural bacteriology
Tony J. Cunha	Animal husbandry
Elizabeth Cavert	Home economics
Kenneth C. Bullock	Geology
Edward J. Britten	Genetics
Lora Bond	Botany
David K. Blake, Jr.	Biochemistry
Opal G. Blagrove	Agricultural bacteriology
Edward Bevilacqua	Chemistry
Dorothy G. Beezley	Home economics
Robert W. Bauman	Biochemistry
Eleanor G. Anderson	Biochemistry.

122. The following persons appointed assistants in the Naval Training School (Radio), August 1, 1942 through June 30, 1943, at the rate of 75¢ per hour, not to exceed \$125 each per month:

THE UNIVERSITY OF WISCONSIN
Madison

Office of the Dean of Women

October 29, 1942

To the Regents of the University of Wisconsin:

President Dykstra has informed me of your interest in the war work of our women students and I have, therefore, the honor of addressing a report to you.

It was clear early this fall that last year's rather tenuous attitude toward women's part in the war had changed over summer to one of campus-wide affirmation. Women students were united in their wish to share the war responsibilities of the men but they were confused and craved the security of being told definitely what to do. An all-women's convocation materialized as the best means of answering their need. President Dykstra was the ideal spokesman.

Our University medical and nursing authorities made one course plain. We have here, they told us, many of the factors that make for an epidemic of disease: nervous strain, fatigue, and a tremendous infiltration into our community of persons from all over the country. The flu epidemic of the last war found the campus willing to help but untrained. To avoid a recurrence of this, the Office of the Dean of Women began some time ago planning with the hospital authorities for an emergency course in Home Nursing, one group of students to start instruction November 3, 1942, complete training, and be available shortly after the middle of December if need arises.

Along with the nursing recruitment, it seemed wise for this office to register all women students in order to have available various pools which could be drawn on if needed for other services. This is in line with impending national registration of all women eighteen to sixty-four.

President Dykstra approved these plans and enthusiastically consented to address two convocations on October 21; one for freshmen and sophomores, the other for juniors, seniors, and graduates.

Search for a name by which to designate our nursing groups and to give them a sense of unification with WAVES, WAACS, and WAFS resulted in WENTS (Wisconsin Emergency Nurses Training Service). President Dykstra presented this idea so effectively that it was spontaneously popular. In referring to the women's registration and the emergency nursing program as "another Wisconsin first", he suggested that if the women's war work expanded as it seemed it must, WENTS could easily be used to designate a national program - Women's Emergency National Training Service.

The girls like the idea of being WENTS. Both convocations were crowded, one overflowing into the Play Circle, and I believe it is safe to say that every woman student knows exactly what opportunities for service are now open to her here.

The President made it clear that not everyone should register for war work; that to be a student is still the main job of a student. Out of 3405 women, graduates and undergraduates, 2330 signified an interest in the various war

work categories presented. This does not imply lack of concern on the part of those who did not, but is, instead, due to the fact that more than half of our women are doing outside work to help themselves through college and are already overburdened. Also, full programs of study plus various other obligations had been undertaken before this plan was inaugurated.

Thanks to the President's impressive presentation of our responsibilities and opportunities, there has been no war hysteria; only a steady purpose to help.

The cooperation of students on which we depend so much at Wisconsin was at its usual high level. The War Council was particularly helpful.

In response, now, to your inquiry "What are Wisconsin women doing to help win the war?", I am dividing my specific answer into three parts which are appended.

Part I shows our registration blank listing instruction available now solely because of the war. I have placed after each course the number of women who indicated their interest and willingness to carry on the work in that field. All students were requested to make three choices in order of preference, which will account for the apparent discrepancy in numbers.

Part II indicates instruction which has for years been available in the University but which is now pointed up definitely for the war effort.

Part III is self-explanatory.

Our office acts as a clearing house for information concerning University woman-power. We have an advance copy of the plans for women as set up by the Women's Division of the War Manpower Commission, and are pleased to report that what has been done at Wisconsin is exactly in line with national plans.

I am glad for an opportunity to submit this report and, speaking for the women students, may I say how much we shall appreciate suggestions from you for our program.

Respectfully submitted,

Mrs. Louise Troxell Greeley
Dean of Women

PART II

WORK IN REGULAR UNIVERSITY DEPARTMENTS WHICH CONTRIBUTE TO WOMEN'S EFFECTIVENESS IN THE WAR EFFORT

This resume is representative rather than exhaustive. (It is interesting to note that in many leading educational institutions for women, certain training is now being set up in an emergency way which at Wisconsin has for years been part of the regular curriculum.)

NURSING, MEDICINE, MEDICAL TECHNOLOGY, PHARMACY:

80 nursing students are now in residence, with 75 prospects for the dormitory next June (as against 45 a year ago)

In addition, 52 freshmen are taking the first course on the hill
40-50 are taking public health or completing degrees (graduate nurses)

Total 250

HOME ECONOMICS AND AGRICULTURE:

This year 38 students will complete their majors in FOOD

Of last year's troupe in this field, 24 are now in hospital dietetics taking interne training and will be available for service during 1943.

Of other last year's graduates, 3 are home demonstration agents, 33 are teaching, 8 have federal positions, 1 is with the State Laboratory of Hygiene, the rest in commercial fields.

Agriculture:

2 girls majoring in Dairy Manufacturing

11 girls taking new course in utilization of MEATS (Animal Husbandry)

Winter dairy course opened to women, but none enrolled at present time

(Laboratory control work - starter cultures, testing milk fats, etc.)

JOURNALISM:

Percentage of women in this school has risen from 35 to 65. Current course in Army Public Relations (substitute for Civilian Publicity) is grooming them for government publicity jobs. Others are doing non-civil service publicity in the social service fields, as a result of their training.

ENGINEERING:

Non-engineering Drawing - 24 girls enrolled. Training given in blue print reading which will make them useful in engineering departments of war plants.
1 girl in new Mathematic-Mechanics course
1 girl in Civil Engineering.

PHYSICAL EDUCATION:

In addition to teaching and physical fitness programs, juniors and seniors will try to work out recreation programs for USO - may do some posture work with WAVES.

COMMERCE:

2 accounting courses, marketing, advertising, statistics, are equipping girls for filling men's places in basic economic structures, such as banks, insurance, public utilities, as well as in war plants.

SOCIAL STUDIES:

Economics: The following courses tie directly into the current scene, by giving background and techniques for dealing with problems.

War Finance

Problems of Consumption in Wartime

Government and Business

Government and Labor

Labor Problems

Personnel Administration

Sociology and Social Work:

All field work and curriculum geared to "Adaptation in Wartime"

Current course in "Community Organization" to be "Social Welfare Planning in Wartime" next semester.

New course in "Recreation and War Agencies" being planned for next semester.

Department thinks it likely that current needs may lead to students taking this work via the old apprentice method.

SCIENCE:

Chemistry: No special war courses needed. This department cannot begin to supply the demand for girls trained even in a minimum number of courses in this field - both ordnance and industrial laboratories.

Physics: Girls taking as little as 16 hours (in some instances only 6 are required) are eligible for a number of positions in government (technical aids) and in combination with mathematics for training programs both in war laboratories and civilian industry.

Geography:

Course in cartography will be offered 2nd semester - could place 2 or 3 girls with this training right now.

Army War College will also take girls trained in just one elementary course in Geography or Geology for work in their map department.

Geology:

2 graduate women students

2 undergraduate majors - one of these is helping Professor Twenhofel on a study for the War Department.

Bacteriology:

All courses apply for laboratory technicians.

PSYCHOLOGY:

Psychometric Methods (advanced statistics) - girls who had this training last year are working for the Chicago Signal Corps using this material.

Psychological Testing

Aptitude Testing - Seminar

MATHEMATICS:

Minimum courses qualify girls for jobs in government and economic institutions such as banks and utilities. Majors are offered many war opportunities such as training as junior engineers.

ART EDUCATION:

Plans to give course for credit next semester in mechanical drawing and blue print sketching and reading

LANGUAGE:

Checked both Spanish and Romance Language Departments - nothing special.

SCHOOL OF EDUCATION:

During the past three years, the Department of Education has been developing a program of community activities for students enrolled in "The Child: His Nature and Needs." Over 250 students in a semester have participated in the following community programs as part of their laboratory work:

Social Agencies:

Community Churches, Boy Scouts, Girl Scouts, Girl Reserves, Neighborhood House, Orthopedic Hospital, Recreation Department, Volunteers of America, YMCA, YWCA. Services rendered range from troop leadership to recreational therapy and city playground work; from teaching of swimming to care of children during church hours.

Secondary Schools:

Central High, East High, West High, Wisconsin High

Elementary Schools:

Franklin, Lakewood, Washington. Services here include noon recreation supervision, supervision of club activities, work with individual pupils who might have special difficulties.

In this war year, with the reduced staff facilities of welfare agencies, the above University program affords a vital contribution to the civilian aspect of war work in Madison.

PART III

There is probably no instruction in the University which does not in some fashion contribute to the war effort. It is difficult to define the limits of this instruction, but conference with department heads gives us the assurance that war needs will be met if they arise in these areas.

President C. A. Dykstra

Dear Mr. Dykstra:

You wanted some facts with reference to certain of our war programs that you might use at the time the Board of Regents meet tomorrow. I am very glad to comply with your request, and I am doing so in very brief fashion because I am sure you want to touch only the high spots.

First, I should like to comment upon the Army Institute. As of last week there were upwards of 4,400 registrants. The Institute got under way in April and there has been an increasing number of enlisted men in the Army availing itself of the opportunities of the Institute as the months have passed. In June there were 182 registrants; July, 417; August, 588; and September and October the number went over 1,000 for each month.

The Navy now plans on joining the Army in this educational venture with the result that there will be an even greater number.

You will remember that the Army anticipated 70,000 students. With the publicity now given the number may reach that figure. We have had no difficulty so far in supplying instruction, which has seemed very satisfactory to the Army Institute officials.

As of October 1, the income to the Extension Division from the Army Institute was \$5,944, expenditures \$5,784, leaving a balance of \$157. There is no charge included for the supervisory work that we are doing in our Recorder's office.

Second, with reference to the ESMTT program, which is the program sponsored by the U. S. Office of Education and which makes courses available at the college level in the fields of Engineering, Science, and Management. The purpose of the program is to speed up productions of material in war industries.

We started upon this program in May, 1942 and the present appropriation will expire as of July 1, 1943.

We have thus far, in classes that have been organized, served over 6,000 students in approximately sixty cities, and the students have represented about 1,050 businesses and industries in the state. Our estimate is that by the close of the year, June 30, we will have organized 479 classes

for the total program, enrolling 10,500 students from 1,290 businesses and industries, and the total program will involve an expenditure of federal funds of over \$400,000.

The staff, full and part time, including administrative staff, field and clerical staff, and instructors on this program numbers about 250.

In the city of Milwaukee, which is not included in the above program, we will have an enrollment for the year of an additional 2,600 students in 76 classes and involve an expenditure of federal funds of about \$38,000, and the total staff will number about 31, and the classes organized will contain representatives from about 225 industries.

Finally, the C.P.T. program which involves the training of pilots who are in the Reserve of the Army or the Navy.

We are operating these pilot training programs in seven cities in the state: Madison, Milwaukee, Eau Claire, Menomonie, Oshkosh, Racine, and Stevens Point. We had 189 trainees in the July program, we have 172 in the September program, and on the basis of the September quotas we will have, if the quotas continue, and we anticipate that there will be no reduction, 1,020 Army and Navy pilots trained under our program during the current year ending July 1, 1943. About five hundred of them will be Army pilots, the remainder Navy pilots.

On the basis of the September program the total amount of federal money involved will be about \$215,000.

We make all of the war programs self-supporting. There is, of course, the element of uncertainty which means that it is possible they could be brought to an end at any time.

Sincerely yours,

(sgd) F. O. Holt
