The Wisconsin ALUMNUS

There's plenty here you can't see

YOUR TRAIN RIDE of the future may be a more delightful experience because of something you can't see in this picture.

The thing you can't see is the customary gap between the ends of the rails. You can't see it because it isn't there. For the rails, instead of being bolted together, are welded together into lengths of solid metal sometimes a mile long.

This is done by pressure-welding...by forcing the rails together at their ends in the heat of oxy-acetylene flames until they become a single, continuous piece, uniform in appearance, structure, and strength.

Pressure-welded track is being used increasingly by railroads because it cuts maintenance costs and provides a smoother, quieter ride for passengers.

Pressure-welding also is used by many other industries. Some use pressure welding for the construction

of overland pipe lines... some for the fabrication of machinery parts... some for making oil-well tools... and some are using pressure-welding to make airplane and automobile parts.

Pressure-welding is a research development of The Linde Air Products Company and The Oxweld Railroad Service Company, Units of UCC.

If you are a bit technically minded or just want to know more about this subject, write for booklet P-4 on Oxy-Acetylene Pressure-Welding.

9 Billion Dollars worth of *Peace of Mind*

for 3,150,000 Equitable Policyholders
and Their Families

IF ALL MEMBERS of the Equitable family of policyholders were to call a single place home, "Equitable Town" would be about the same size as Boston, St. Louis, Pittsburgh and San Francisco combined!

It might look more like a fabulous Hollywood movie lot than an ordinary city, with Texas ranchers living next door to Connecticut school teachers, Iowa corn growers and Cape Cod fishermen. Doctors from Chicago and mechanics from Detroit would be neighbors to Georgia cotton growers and Oregon foresters.

The families of "Equitable Town" have joined in a great co-operative enterprise of family security. There are now 3,150,000 members of this great family. In the past year they increased the life insurance they own to \$9,172,440,000. Their membership in The Equitable means peace of mind and the assurance of funds to carry out cherished plans.

Last year these families received checks for an aggregate of \$238,064,000—an average of \$27,716 every hour throughout the year. These benefit dollars helped keep families together, assured children of college education, paid off mortgages, provided retirement income and served many other human needs.

Assets guaranteeing this flow of benefits reached a new high of \$3,849,438,000, an increase of \$341,455,000 for the year. Beyond their primary purpose of assuring the payment of policy benefits, these funds are furnishing capital for business and industry in every state of the union. They are helping to finance millions of productive jobs. They are aiding farmers and home owners.

Truly, life insurance funds mean more factories, more work, more homes, and richer living for all America.

Up and Down the Hill ★ ★ ★

old E. Foster predicts on another page of this issue. Maybe Bud can even repeat the miracle of 13 years ago, when the Badgers jumped from ninth to second place on two seasons.

The state of Wisconsin was not left out of the national basketball news this year, however, despite the Varsity's poor showing. Thanks to a little up-state town, Badger basketball made headlines around the country. Reedsville, a class C high school with an enrollment of 87, including only 44 boys, did the impossible by winning handily the state cage championship. Before record Field House crowds, the country boys knocked off city-slicker outfits from Wisconsin Rapids, Racine, and Eau Claire.

That high school tournament, incidentally, is just another example of how the University unassumingly is serving the whole state. Not only is the Field House turned over without charge to the high school athletic association, but the Wisconsin coaching staff voluntarily runs the show.

If the success of Wisconsin's 1946 crew is in inverse proportion to the size of its coxswain, Coach Allen Walz' rowers should win the national regatta at Annapolis without even sweating. He's Norman Zaichick, a four-foot two-inch Madison sophomore who weighs only 75 pounds and has to sit on a pile of pillows so he can see where the shell is going.

A spot-lighted table filled with fish molds and jello molds, with kidney bean salad, pea and celery salad, and hard-boiled eggs with caviar and gorgonzola cheese, cherry tarts, and cream puffs, and with all kinds of extras—all this and two decorated hams, potatoes au gratin, and baked beans—greeted the eyes of hungry guests at the Wisconsin Union's Smorgasbord in Tripp Commons last month. It was the annual "Union Family" banquet, the first since before the war. A feature of the evening was the presentation of an honorary life membership to Dr. H. C. Bradley, x'10, of the department of physiological chemistry, who was chairman of the faculty committee which planned the Union and who has served as faculty representative on the Union Council for 18 years.

An unusually large number of past student presidents of the Union were present at the dinner. They included Walter Panceo, x'44, Miss Anne Boegholt, '45, Douglas Osterheld, '40, Lowell Frautschi, '27, Jerry Wulk, '46, and Bob Lampman, '42. Osterheld is back on the Union staff as assistant director after three years in the air corps. Lampman, now a grad student in economics, is chairman of the new "Wisconsin Forum of the Air," a panel discussion of world problems broadcast over WHA every Monday afternoon at 4:30.

Cram sessions are a Wisconsin institution. Generations of students have drunk untold gallons of coffee and coke as they studied far into the night just before exams. Now along comes a University psychologist who says it's all wrong.

"Cramming is inefficient," declares Prof. W. J. Brogden. "Less is learned for the time spent than if study had been well distributed."

It was just five years ago this month that the University of Wisconsin won itself a national basketball championship. That headline, along with other nostalgic items, is recorded in "Madison Memories," a new column appearing for the first time in this issue of the *Wisconsin Alumnus*. The column will be a regular *Alumnus* feature from now on.

In 1941 the Badgers were defeated only once in conference competition. This season they were victorious only once, yet Wisconsin still drew the second-largest gate in the Big Ten, a fine demonstration of Badger loyalty. One of the big Wisconsin attractions was Bob Cook, midget forward, who finished fourth in the Conference individual scoring race and was recently named "most valuable player" by his teammates. He'll be back next fall, along with some stars of former years due to be released from service, making the Wisconsin cage picture for 1947 a good deal brighter, as Coach Har-

International News photo

MONDAY, MARCH 18, in Washington, D. C., was a great day for Wisconsin. The picture shows **Julius A. "Cap" Krug**, being sworn in as Secretary of the Inter by **Wiley Rutledge**, '14, Associate Justice of the U. S. Supreme Court. Mr. Krug, a Madison boy, worked his way through the University, and in recent years has been chief power engineer for the TVA and chairman of the WPB. He succeeds Harold Ickes. His daughter Marilyn is a U. S. freshman. Justice Rutledge was a former dean of the law school at the University of Iowa.

Wisconsin Gets Set for 15,000 Students

Regents Organize "Freshman Branch" At Badger Village

FACED with an anticipated enrollment of 15,000 students next fall, the University of Wisconsin is taking action now to enlarge its academic plant and staff.

The all-time record registration will be handled in regular campus dormitories, rooming houses, and classrooms; at a Truax Field annex; and at a Badger Ordnance Works branch of the University near Sauk City. Night classes will be in full swing next September.

More than 250 new instructors have recently been appointed, and 601 professors are now on the U. W. faculty. Although this means that the University now has the largest teaching staff in its almost century-old history, still more faculty members will be needed to handle the 15,000 enrollment expected in September. Pres. E. B. Fred is now devoting much time to the problem of hiring competent instructors and finding accommodations for them in Madison.

Other projects, calling for the enlargement of the Memorial Union, for a new Center for Continuation Study, for a veterans' hospital, and for other campus buildings are now getting under way.

* * *

THE BOARD OF REGENTS at its March meeting approved inauguration of a program of instruction next fall at the University's BOW branch and selected Prof. Carl Bogholt of the department of philosophy to head the branch campus as associate dean pro tem of the College of Letters and Science.

Instruction at BOW will be conducted chiefly at the freshman level, the Regents decided, because of the "excessive cost of diversified teaching." Students will get two free trips to Madison a week on University buses.

* * *

THE POSSIBILITIES of remodeling the Memorial Union, especially the expansion of its cafeteria facilities, are being studied under the supervision of the state architect's office, Porter Butts, Union director, has announced.

As authorized by the Board of Regents, the study will focus on the feasibility of enlarging the cafeteria seating capacity to approximately double its present size and adding a second service counter to cut down the long waiting lines. Also to be studied is the structural possibility of adding meeting and private dining room space, additional offices for student organizations, and rehearsal rooms and storage

Many Will Be Quartered at Truax

State Journal photo by Harrington

FOR MANY EX-GI'S, doffing their uniforms did not mean escaping from Army barracks. More than 200 single student veterans, like the two trading pinups above, are double-decked at the University of Wisconsin's Truax Field housing project on Madison's East Side. Some 70 married couples are also housed at Truax. This is the first time in history that the University has provided dormitory housing for married couples during the regular school year. Plans are under consideration for the expansion of Truax facilities so that 1,000 to 1,200 more students can be quartered at the former air field next fall.

facilities in the unfinished basement area of the theater.

* * *

HOPES THAT THE cornerstone of the new Center for Continuation Study will be laid during commencement weekend in June, 1947, were expressed at a recent meeting of the University of Wisconsin Foundation, which is accepting gifts and bequests to finance the building. The Center will be located along Lake Mendota between the Memorial Union and Lake Street, on ground now occupied by the YMCA, the Armory, and several fraternity and rooming houses.

GEN. OMAR BRADLEY has announced that the Veterans' Administration will build a \$4,250,000 veterans' tuberculosis hospital in Madison so as to be close to the outstanding medical facilities offered by the University of Wisconsin. Site of the new hospital is expected to be a wooded hill immediately west of the U. S. Forest Products Laboratory.

AN \$85,000 JEWISH student center is being planned by the B'nai B'rith Hillel Foundation at the University. Dr. Theodore Gordon, resident rabbi, (Continued on page 27)

The University and the Bomb

THE FOUR-MILLION VOLT ATOM SMASHER of the University of Wisconsin has come back from war. It is shown here being moved into the basement of Sterling Hall, where it will be housed until a special \$20,000 underground laboratory recently ordered by the Board of Regents is built nearby. Designed in 1934 by Prof. R. B. Herb, the atom-smasher was taken from the campus under the deepest secrecy in April, 1943, and moved to Los Alamos, New Mexico. Now within a month the machine, which is capable of accelerating atom particles to nearly four million volts energy—a speed of 70 million miles an hour—will again be in use, probing into the peacetime possibilities of atomic energy.

* * *

AN A-BOMB BLAST OVER MADISON would wipe out most of the University, declares Hugh Richards, atomic scientist helping to reinstall Wisconsin's atombuster in its Sterling Hall laboratory.

Say that an atomic rocket detonated over the Square. There would be a sudden burst of light, a thunderous wave of sound, and Madison would be a city of dead and dying, Mr. Richards warns. He witnessed the original A-bomb test in New Mexico.

"Buildings would be leveled out as far as the Yahara river on the East side and, on the West side, to an arc that would take in a considerable part of the University," the scientist predicts. "The neutron and gamma rays of the bomb would reach out in killing intensity to the University district, too."

* * *

THE ATOMIC ERA which mankind has now entered may mark the beginning of a warless prosperity or the end of present civilization, according to Prof. Farrington Daniels, now on leave from the University of Wisconsin, who spoke in the Union Theater recently. Prof. Daniels is head of the Metallurgical Laboratory at the University of Chicago, one of the key research units in the development of the atomic bomb.

"Fortune smiled on us in the prosecution of the war," Prof. Daniels said, "but it has presented the nation with unprecedented responsibility."

The peacetime uses of atomic energy are staggering in their proportions, he predicted, because man is now able to tap the same source of energy that characterizes the intense heat of the sun and the stars. But he warned that as a military weapon the A-bomb as yet has absolutely no defense, and that the nations of Europe could have atomic bombs in three years or even less.

Declared the atomic expert:

"There is only one solution for the future. We've got to eliminate war—and we've got to do it now."

"We have only three short years to put the world house in order. There must not be another war—we must eliminate the causes of war. As far as I can see, Public Enemy No. 1 is the man who says there have always been wars and there always will be."

"This is an ideal time—the only time—to outlaw war. There is only one thing stronger than atomic power—the heart of man."

* * *

SOME 50 University of Wisconsin faculty members and graduate students, most of whom had some connection with work on the atomic bomb, have recently formed the Wisconsin Association of Scientists and already gone on record as opposing military control of research into atomic energy and favoring a free exchange of scientific knowledge. Prof. Robert Specht, assistant professor of mathematics, is president of the new group.

AFTER making a long series of breathtaking contributions to America's war effort, University of Wisconsin scientists now are figuratively exchanging uniforms for civies and are reconverting the laboratories of the campus to peacetime research.

* * *

DURING THE WAR the University aided penicillin production by isolating a high-producing variety of the mold for quantity-manufacturing purposes. Now the University is seeking a substance even more potent than penicillin.

Prof. Elizabeth McCoy, '25, whose quiet modesty belies her position as one of the world's foremost bacteriologists, is hard at work in a basement laboratory in Agricultural Hall, analyzing thousands of antibiotics in the hope of isolating one which will cure diseases immune to penicillin.

An antibiotic is a waste product gormed through the life processes of one organism which will kill or inhibit the growth of another organism. *Penicillium notatum*, for instance, throws off the complex chemical, penicillin, which is almost sure death for many disease germs. But it has no effect on others, including typhoid, dysentery, undulant fever, and tuberculosis.

To find new life-saving antibiotics is the peacetime task of the University bacteriologists who a few months ago were studying the possibilities of germ warfare.

* * *

A "BULLET FINDER" developed at the University of Wisconsin during the war is expected to have continuing value in peacetime.

The device is the work of Dr. W. E. Gilson, '38, a specialist in electrophysiology and medical electronics. It is one of the most practical yet developed, for it is not only portable but can detect a metal fragment within a wound without the use of a time-consuming x-ray machine.

Besides being tested at the battlefront, Dr. Gilson's metal locator has been used by surgeons at the Wisconsin General Hospital.

* * *

RESEARCH IN EXPLOSIVES at the University of Wisconsin during the war has resulted in a simple, new method of producing nitric oxide, the base for explosives and for the nitrate fertilizers which the nation's farmland needs.

While the scientists who developed the process, known as the Wisconsin method for nitrogen fixation, are reluctant to discuss savings that can be affected by it, they agree that it might cut costs of manufacturing nitrate fertilizers by about 50 per cent.

Agricultural leaders say that farmers are now using only about 10 per cent as much nitrate fertilizer as their

DANIELS

Wisconsin

soils require because the cost is beyond what they can economically pay. Any cut in cost would make possible a corresponding increase in use.

The process was perfected by F. G. Cottrell, Nathan Gilbert, '42, and William G. Henrickson, research associates at the University, working under Prof. Farrington Daniels of the chemistry department. The patent applications are held by the Wisconsin Alumni Research Foundation. They are expected to be made available to industry shortly.

* * *

POSTWAR SYNTHETICS are not being neglected by University scientists.

Research into the nature of chemical catalysts, now being conducted at Wisconsin, will be of immeasurable utility in the manufacture of textiles, plastics, rubber, and other products.

The same program of study which in the past four years gave the American war effort such significant assistance is now being continued on the campus in the development of the fundamental principles applicable to catalysis—a chemical process involved almost without exception in the production of the new synthetics.

The research is under the direction of Profs. K. M. Watson, '23, and O. A. Hougen, '18, of the chemical engineering department.

* * *

BECAUSE A UNIVERSITY of Wisconsin scientist sought the reason for cows bleeding to death, the medical profession now has a drug which may prevent or cure certain types of strokes, heart attacks, apoplexy, and many other diseases caused by the clotting of blood.

The drug is *dicumarol*, which was developed after Wisconsin farmers several years ago asked Prof. Karl Paul Link, '22, University biochemist, what was causing their cows to bleed to death.

In his investigation, Prof. Link learned the dead cows had fed on spoiled clover. He also learned that the cows' blood would not clot. Further exploration revealed that one constituent of clover—coumarin, found in all green plants—underwent a chemical change when clover spoiled, and became dicoumarin. Prof. Link suggested that dicoumarin acted on the blood in such a way as to prevent clotting—and that's why the cows bled to death.

Medical researchers at the University went to work on the problem. They isolated dicoumarin and then produced it under the name "dicumarol." Now the drug is being used to combat diseases caused by blood-clots.

Dr. Link is also responsible for a new brand of aspirin which has just appeared on the market.

Following the production of dicumarol, he established an inverse relationship between it and aspirin, and proved

that aspirin could cause hemorrhages if misused. Dr. Link determined that the addition of 1 part of Vitamin K to 1000 parts of aspirin made the medicine safe.

The new brand of aspirin, first to be marketed under a WARF patent, contains enough Vitamin K to counteract the anti-coagulating action of ordinary aspirin upon the blood.

* * *

THERE IS ONLY ONE device in the world which can measure the rapidly changing temperatures in the cylinder of a Diesel engine while it is in operation, and that device is in the Mechanical Engineering Building at the University of Wisconsin.

The apparatus brought answers sought by science in perfecting war-time airplane engines and will bring smoother and more efficient operation in the cars of tomorrow.

Temperatures within a Diesel cylinder jump from 70 degrees Fahrenheit to 4,000 degrees within 1/5,000th of a second. Yet the device, known as an electro-optical-pyrometer, gives an instantaneous reading.

The two scientists who invented the pyrometer are O. A. Uyehara, '42, working under the direction of Dr. K. M. Watson of the department of chemical engineering, and P. S. Myers, under the direction of Prof. L. A. Wilson of the department of mechanical engineering, in a project financed jointly by the Wisconsin Alumni Research Foundation and the University.

* * *

A NEW AND VASTLY more efficient machine for commercial refrigeration has been invented by Prof. John R. Roebuck of the University physics department, but the scientist is still looking in vain for a producer willing to tackle the complexities involved in the construction.

The hitch comes in the tremendously high speeds at which the rotor of the refrigerating unit must operate to achieve usable temperature drops. Prof. Roebuck explains, but he thinks that atomic research may help, because equally high speeds were used in some processes of producing the A-bomb.

Prof. Roebuck has computed that the refrigerating motor, on which he is obtaining a patent, can produce temperature drops as great as 270 degrees Fahrenheit. To do this, the outside of the rotor cylinder must travel at a surface speed of about 1,300 feet a second.

* * *

VITAMIN B₆, or *pyridoxine*, plays a highly important role in nutrition, recent studies by Elizabeth Miller and Carl Baumann, '29, of the University of Wisconsin indicate.

In the past it has been assumed that pyridoxine deficiency is not likely to occur on diets made up of natural food-stuffs, but the new information suggests this vitamin may have previously unsuspected practical importance.

He Fights Cancer

DR. CONRAD ELVEHJEM, professor of biochemistry at the University of Wisconsin and a world-famous authority on nutrition, has been named to a panel on that subject under the chemistry division of the American Cancer Society, New York. He is one of 91 of the nation's foremost authorities in the field of cancer study who have been commissioned to seek out a cure for the dread disease.

Famed for his research in vitamins and the discovery of nicotinic acid, Dr. Elvehjem will investigate the effect of nutrition on cancer. He will coordinate his work with that being conducted continuously at the Cancer Research Institute in Mc Ardle Memorial Hall on the University campus.

FIVE UNIVERSITY DEPARTMENTS cooperated recently in developing a powerful new insecticide,

Sabadilla used to be a relatively little known drug which found mild popularity in salve form as a treatment for skin rashes. Today the substance has been revealed as one of the most toxic of bug killers, and 400 tons of it will be used this year to kill the peach bugs of California, the soldier bugs of Texas, the chinch bugs of Illinois, and the leaf hoppers of Wisconsin.

Prof. Norman C. Fassett of the University botany department, aided in the work of nomenclature on the project. Dr. Karl Paul Link, '22, biochemist, isolated the toxic substances of the sabadilla seed. Prof. Carl H. Krieger, '33, research associate in the control laboratory of the Wisconsin Alumni Research Foundation, tested the material on rats. Dr. Elsie Cole, '44, of the zoology department did work on the effect of sabadilla on the endocrine glands of rats and raised bugs to be used in sabadilla tests. And Prof. T. C. Allen, '32, of the department of economic entomology began the whole investigation.

(Continued on page 30)

The 7th Annual Rural Art Exhibition

CREATIVE expression in art in the rural communities of the state is being encouraged by the Wisconsin College of Agriculture, working through a rural art group in the department of rural sociology. Highlight of the program is an annual exhibition of paintings and handicraft by amateur rural artists.

The seventh such exhibit was held from March 9 to April 2 in the galleries of the Wisconsin Historical Library and the Memorial Union. More than 250 entries were shown. No prizes were awarded, because the show is not competitive.

Curry Participates

"Since 1939 this unique and interesting exhibition has been a regular University feature, attracting the great many who want to see examples of the skills and tastes of our amateur Wisconsin artists," says John Steuart Curry, University artist-in-residence, who takes an active part in the work of stimulating native Wisconsin art.

Cultivating Home

The exhibition is annually divided into two sections: a senior section for adults and a junior division for youths. From 450,000 rural young people, 186 boys and girls were chosen to exhibit in this year's show.

Distinctive pictures are purchased from each exhibit to form a permanent collection of rural art maintained by the College of Agriculture. The collection now numbers over 60 pieces and represents the best cultural patterns of rural Wisconsin.

Schwalbach Broadcasts

In addition to the annual rural art show, the University conducts a statewide program of personal instruction and guidance in rural art. James A. Schwalbach, Extension specialist, conducts a weekly radio art program over

station WHA and spends much of his time visiting rural folk interested in creative expression.

Guiding the rural art program is the rural art committee of the University. Its members are Prof. John R. Barton, department of rural sociology; Mrs. Agnes Leindorff, assistant professor of home economics; Mrs. Anne Tressler, director of the Wisconsin Union student workshop; Byron C. Jorns, instructor in agricultural journalism; and representatives of student organizations.

Says Dr. Barton:

"We are encouraging and promoting a strong Wisconsin rural culture, knowing it will emerge as a powerful regional unifying force."

THIS QUIET PASTORAL SCENE of Winnebago County farmland was one of four pictures submitted in the first Wisconsin Rural Art Exhibition in 1940. It was painted by Miss Iris Furman of Oshkosh. This year more than 250 entries were on display at the annual exhibit, a part of the University of Wisconsin's program of stimulating native rural Wisconsin art.

A New Wisconsin Idea Theater Project Grown Culture

A DECADE ago "the Wisconsin idea," which envisions a campus as broad as the state, was concerned largely with bigger alfalfa yields and better dairy cows. Now the Wisconsin-wide extension program of the University is maturing into the development of the cultural arts as well, particularly dramatics.

The new project, centering on the Madison campus and spreading from the Illinois line to Lake Superior, has been named *The Wisconsin Idea Theater*; its purpose, to enlist the participation of every citizen in the state seeking outlets for satisfying self-expression, individually or in groups, through drama. Sponsored jointly by the Colleges of Letters and Science and of Agriculture and the Extension Division, it may become truly a "people's theater," interpreting Wisconsin's past and present as a part of the unfolding American scene.

University Provides Leadership

Directing the program is Robert E. Gard, who came to the University in 1945 as assistant professor of speech. He is a playwright himself. The administrative direction of the project is under Leslie E. Brown, acting director of the department of debating and public discussion of the Extension Division. LeRoy Hinze, rural drama specialist of the College of Agriculture, and Mrs. Rome Krulevitch, WHA script writer, will act as consultants.

Says Prof. Brown:

"Drama affords a far richer opportunity for personal and group expression and participation than almost any of the creative arts. People are constantly having to make adjustments to the changing social and economic scene. Through its expression and interpretation of the region, the drama as it is now to be developed in Wisconsin stands to become an important medium for adjusting them to changing conditions in the modern world."

He sees the new theater project as providing a continuous flow of the theater arts in such fields as research, playwrighting, radio scripts, community, religious, and children's drama, the theater of industry, and similar vehicles for carrying good drama out to the state.

Talent Sought

The Wisconsin drama program is keyed to discovering and developing talents of playwrights, collectors of materials of folklore and tradition as suitable drama themes, radio script writers, and producers of drama.

Prof. Gard invites participation particularly from persons who would like to try writing a Wisconsin play, those who could supply a good Wisconsin yarn or even a whole body of useful material, and those interested in producing a good Wisconsin play or plays.

"If you are interested in playwrighting," he says, "write a draft and send it to me for criticism and suggestion. We're especially interested in one-act plays taking about 20 to 25 minutes."

Five Projects Planned

The Wisconsin Idea Theater is developing along five channels, all calculated to stimulate a state-wide cultural arts movement.

1. RADIO THEATER. Beginning March 14, station WHA has been broadcasting a series of weekly Wisconsin-created programs, featuring radio plays written by school teachers, students, women's club members and other amateur writers throughout the state.

2. THEATER ARTS CENTER. It is hoped that provision will eventually be made for a small theater on the University campus as a pattern for local theater auditoriums. Its functions would include a drama workshop and a spot where regional and final trials can be held in drama and for-ensic competition.

FIRST OF THE Wisconsin Idea Theater programs to get under way is a series of weekly radio plays, written by amateur Wisconsin authors and broadcast over WHA by University student players every Thursday afternoon at 4:30.

PROF. ROBERT E. GARD is the director of the new Wisconsin Idea Theater described in the accompanying article. A graduate of the Universities of Kansas and Cornell, he came to Wisconsin this fall from the University of Alberta, Canada, where he was in charge of a Rockefeller Foundation folklore and local history project. Prof. Gard, a playwright himself, will seek to develop the cultural resources of the people of the state through drama and related arts.

3. TRAVELING THEATER. A traveling theater will be organized to carry good drama to the people in the state. It will begin in 1948, Wisconsin's centennial year, cultivating a keener local appreciation of state history.

4. SCHOOL DRAMA. The Wisconsin Idea Theater will aid the University in training dramatics teachers and in encouraging schools to make wider use of the drama.

5. COMMUNITY DRAMA SPECIALISTS. Both the College of Agriculture and the Extension Division are already providing service to local groups in their drama activities. The new project will aid in extending and coordinating these services, through visits to communities, institutes, workshops, lectures, and University courses.

When these Wisconsin Idea Theater plans are realized, a body of Wisconsin-created dramatic literature will have been generated from which good plays can circulate around the state, royalty-free.

First of the five Theater projects to get under way is the radio work. Wisconsin playwrights and amateur writers are really having their day as they send their original work to Prof. Gard.

Radio plays submitted are now being broadcast over State Station WHA at 4:30 each Thursday afternoon.

With Funny Faces and Tentacles That Tantalize.

Octy's at It Again!

WHEN the Milwaukee Journal ran a naive story the other day saying that "kissing is out" at the University of Wisconsin, it was just like waving a red flag in front of a bull, as far as the *Octopus* was concerned.

The campus humor magazine promptly reprinted the story—along with a full-page photo of a coed and her boy-friend in a not exactly decorous pose on a Langdon Street porch (see facing page).

All of which is to say that "*Octy's*" at it again. The Wisconsin *Esquire*, which had its beginning shortly after World War I, is being edited once more after three years of suspended publication during World War II.

Credit for reviving "*Octy*" goes to a petite senior co-ed, Jane Weisselberg, of Kew Gardens, Long Island, N. Y., the second woman in history to edit the magazine. She and Jobe W. Soffa, Fond du Lac, business manager, started from scratch in the fall of 1945 and now have a staff of over 100 volunteer contributors, all imbued with the time-honored "*Octy*" tradition that "nothing's sacred."

The *Octopus* has a well-deserved reputation as one of the best home-talent college humor magazines in the country. With funny cartoons and clever jibes, the colorful sheet has tickled the funnybone of generations of Wisconsin students. Its special editions have been particularly popular.

One issue, in the style of the *Police Gazette* even to the pink paper, under the editorship of the late Irving Tressler, '30, is still fondly remembered. So are a "La Vie Wisconsinienne" number and the annual take-offs on the *Daily Cardinal*.

Certain individuals perennially have been the butt of *Octopus* jokes. Although he was for many years faculty chairman of the magazine's board of control, former Dean of Men Scott Goodnight came in for his share of ribbing, even to a special "Goodnight" cover showing the dean in the form of a trained seal.

"*Octy*" has had no qualms about making faces at the other end of State Street, either. In 1939 the collective wrath of Wisconsin Republicans fell on the magazine's neck after publication of "Poor Julius' Almanack," a collection of choice statements made by then Gov. Julius P. Heil.

Done up in antique type and flourishing borders, the famous "Almanack" page was full of such statesmanlike paragraphs as:

"Even when you call me governor at high noon, January 2, I will be the same plain, humble, poverty-stricken peasant boy you knew yesterday."

"I am very friendly to the University. I want to see Wisconsin have the best University in America. Something is smoldering somewhere and I want to clean it up. I want to get rid of this cancerous growth or kill the patient."

With cartoons as well as with words "*Octy*" has poked fun at Madison and the University campus. One of the sheet's classic drawings, labeled "Fire at Ann Emery Hall," showed every hook-and-ladder truck in the city parked around the girls' dormitory and every single Madison fireman climbing over the building, peering in windows, and charging down hallways, while scantily-clad co-eds filed out into the street. Meanwhile the only evidence of fire was a thin trickle of smoke coming out of the chimney!

In its quarter-century of publication, the *Octopus* has not only established itself as an outstanding campus humor magazine but has served as a practical training ground for talented students. Many an "*Octy*" graduate is prominent in writing, radio, theater, art, teaching, government, and industry today.

Margaret Truman, daughter of the president of the United States, is now studying history under "*Octy's*" founder, Prof. Lowell Ragatz, '20, head of the history department at George Washington University. Prof. Ragatz and Artist Fred Sperry, '21, started the *Octopus* in 1919. Its title is credited to Ragatz's younger brother, Roy, '27, then in high school and now editor of the *Journal* of the Wisconsin Medical Society.

Elmer Giessel, '26, budget director of the state of Wisconsin, is a former *Octopus* accountant. Alexander Gottlieb, '28, became a motion picture producer in Hollywood. Franklin Clarke, '29, business manager of the magazine, returned to the campus during the war as a colonel commanding the ROTC unit here. Hubert Townsend, '23, heads the art department of a prominent New York advertising agency. Charles J. Lewin, '23, is editor of one of Massachusetts' best known newspapers, the *New Bedford Standard-Times*.

Oscar W. Riegel, '24, heads the journalism department of Washington and Lee University at Lexington, Va. Carl Buss, '30, is a radio dramatist in Hollywood. The names of Marshall Glasier, 'x27, Paul Clemens, '22, and James Watrous, '31, are well known in Wisconsin art circles. Bob Shaplen, '37, was a war correspondent for *Newsweek* in the southwest Pacific, and Leonard Silk, '40, wrote the same keen satire for *Yank* as he did for "*Octy*."

Don Abert, '28, business manager of the *Milwaukee Journal*, rose from

artist to editor of "*Octy*" during his days at the University. Another *Journal* man, Don C. Trenary, '28, preceded Abert in the editor's chair. Laurence C. Eklund, '27, and Robert Fleming, '34, both *Journal* men, contributed to "*Octy*."

Many who were on the *Octopus* staff in their college days have remained in Madison. Among them are Arthur Towell, '24, advertising agency director, and "Hank" Lathers, '26, commercial artist for it; William L. Doudna, '26, and Aldric Revell, '34, Madison newspaper men; Willard J. Rendall, '22, merchant; and William Harley, '35, of WHA, state radio station.

Editors of the *Octopus* over the years include:

Robert Herz, '20; Fred Sperry, '21; Rodney Welsh, '22; Hubert Townsend, '23; Richard Bellack, '24; Gordon Lewis, '25; John Powell, '26; Don Trenary, '28; Don Abert, '28; John Allcott, '28; John Ash, '29; Irving Tressler, '30; Gordon Swarthout, '31; Holley J. Smith, '31; Fred Pederson, '33; William Hawley, '31; Maurice Blum, '35; William Harley, '35; Charles Fleming, '37; Tom Hyland, '38; Myron Lee Gordon, '39; Leonard Silk, '40; Roger Wurtz, '41; Edward Mayland, '42; Robert Hanson, '43; and Irene Trepel, '43.

Recently named to carry on the "*Octy*" traditions of full-busted co-eds, sloppy college Joes, weasel-eyed house mothers, and forgetful professors in 1946-47 are Alan Anderson, editor, and George Balthazor, business manager. Their cosmopolitan staff, in true "*Octy*" style, will number everybody from Badger Beauties to Akio Konoshima, varsity boxer.

Library Is Looking For Lost Magazines

The University of Wisconsin Library is soliciting the aid of *Alumnus* readers in completing its magazine files.

Anyone having copies of the following periodicals is asked to communicate with Gilbert H. Doane, library director:

Sphinx, from 1906 to 1911.

Wisconsin Literary Magazine (later the *Wisconsin Magazine*), 1905, 1906, 1910, 1911, 1912, and 1914.

The Wisconsin Idea

"Whatever may be the limitations which trammel inquiry elsewhere, we believe that the great State University of Wisconsin should ever encourage that continual and fearless sifting and winnowing by which alone the truth can be found."—From a report of the Board of Regents in 1894.

WALTER FRAUTSCHL, '24, has succeeded C. V. Hibbard, '00, as president of the Wisconsin Alumni Club of Madison. Mr. Hibbard resigned on February 21. Continuing officers of the Madison group are Arthur Trebilcock, '17, vice-president; Mrs. Ray Dvorak, '34, secretary; and L. W. Bridgman, '06, treasurer.

To Provide Scholarships West Bend Badgers Set Up Foundation

At a recent meeting of the West Bend Alumni Club, a committee previously appointed to study a proposed scholarship fund reported that it had organized a corporation under the name of "West Bend Foundation of Wisconsin Alumni."

A non-profit organization set up for educational, scientific, and charitable purposes, it will encourage students to attend the University by providing scholarships, gifts, and loans from funds donated by alumni and friends of Wisconsin.

La Crosse Alumni Reorganize Club

Reorganization of the University of Wisconsin Alumni Association for the La Crosse area was announced last month by a newly elected board of directors.

Activities of the group, interrupted by the war, will be resumed under the new directors, who named as officers L. M. Englehard, '27, president; Franklin Pamperin, x'24, vice-president; and Allan Schilling, '26, secretary-treasurer. Other members are Mrs. William Newburg, Mrs. Hubert Fuller, '27, and E. P. Hartl, '40.

With the Clubs

Ten New Association Directors Will be Selected Next Month

TEN directors of the Wisconsin Alumni Association will be elected by mail ballot this spring to fill three-year terms expiring June 30, 1949. The new members of the Association's board of directors will be chosen from a slate of 15 candidates named by a nominating committee.

Ballots are being mailed out now to all members of the Alumni Association. The elected directors will be announced on May 25.

Here are the 15 candidates from whom 10 new Association directors will be selected. Save this list for reference when your ballot arrives.

HARRY W. ADAMS, '00, Beloit.
National past president, Beloit Alumni Club; Director, Mutual Benefit Ins. Co.; president, Flakall Corp.; president, Beloit YMCA; former mayor of Beloit.

WALTER ALEXANDER, '97, Milwaukee.
President, Union Refrigerator Transit Co.; former president Milwaukee School Board; former member, U. W. Athletic Council; major, World War I.

HOMER BENTON, '08, Appleton.
Attorney; former president, Outagamie County Bar Ass'n.; captain, inf., World War I.

LAURIE CARLSON, '42, Superior.
High school teacher; member of state legislature for six years; president, Superior Alumni Club.

Nimmer Is New President of Alumni Club in Akron

New officers of the Akron, Ohio, Wisconsin Club are Fred W. Nimmer, '25, president; Mrs. Harold L. Mull, '29, vice-president; and Jay R. Hess, secretary-treasurer. Dr. E. L. Sevringhaus, former professor of medicine at Wisconsin, spoke to the Akron group at its Founders' Day banquet on March 6.

New Baltimore Officers

Incoming officers of the Wisconsin Alumni Club of Baltimore are T. A. Holgate, '40, president; John R. Shea, '09, vice president; Carl Hessler, '41, treasurer; Rev. A. Haworth, '34, secretary; and Rev. A. J. Stiemke, '20, and Mrs. R. E. Lenhard, '21, members of the board of directors.

Mrs. W. H. CONLIN, '17, Madison.
Special agent, Northwestern Mutual Life Insurance Co.; former pres., Madison Council of PTA; former member, Dane County Red Cross Board.

WILLIAM J. HAGENAH, '03, Glen-coe, Ill.
Public utility expert; chairman of board, Schering Corp.; executive director, U. W. Foundation; maintains annual law school scholarship.

Mrs. LUCY ROGERS HAWKINS, '18, Evanston, Ill.
Associate editor, *Oil and Soap*; lecturer, Northwestern U. school of journalism; former editor, *The Mat-rix*, of Theta Sigma Phi; former assistant editor, *U. W. Press Bulletin*; member, AAUW.

J. W. JACKSON, '00, Madison.
Renominated executive director, Madison & Wis. Foundation; "W" winner; lt. col., World War I; Phi Delta Theta; Rotary International.

A. F. KLETZIEN, '17, Neerah.
Director of commercial research, Marathon Corp.; former director, Wisconsin Taxpayers Alliance; "W" winner; lt., World War I; life member, Wisconsin Union.

LLOYD LARSON, '27, Milwaukee.
Sports editor, *Milwaukee Sentinel*; six times a "W" winner; long active in U. W. sports circles.

WALTER MALZAHN, '19, West Bend.
Secretary-treasurer, West Bend Aluminum Co.; director, Wisconsin Taxpayers Alliance; president, board of vocational and adult education of West Bend.

Mrs. STANTON MEAD, '24, Wisconsin Rapids.
Chairman, South Wood County American Red Cross Camp; Kappa Alpha Theta.

Mrs. V. W. MELOCHE, '18, Madison.
Former manager, student employment office; U. W. YWCA board; Community Union; Kappa Kappa Gamma.

IRVING RICE, '23, St. Paul, Minn.
Investment banker; former president, St. Paul Alumni Club; former regional governor, Wisconsin Alumni Association.

HERBERT J. SCHWAHN, '29, Milwaukee.
Special agent, Northwestern Mutual Life Insurance Company; member, board of directors of Wisconsin Alumni Club of Milwaukee; former

(Continued on page 30)

Little Issues Statement Clarifying Registration Situation

REGISTRAR Kenneth Little, in an effort to clarify the present emergency admission policy of the University of Wisconsin, has issued the following statement to the *Wisconsin Alumnus*:

General Policy

The University of Wisconsin is planning for an enrollment of 15,000 students in the semester which will open in September, 1946. Because this will be by far the highest registration in history and because of Madison's continued critical housing shortage, certain emergency restrictions have had to be placed on University attendance by new non-resident students.

New Non-Resident Students

New out-of-state undergraduate students, with a few exceptions for unusually able applicants, will not be given permits to register until July 1.

So far a policy has not been adopted which gives preference to the sons and

daughters of alumni who live outside of Wisconsin; but students, particularly veterans, whose parents have a connection with the state of Wisconsin, will be preferred among the non-resident students who may be permitted to enroll after July 1.

The suspension in the admission of new out-of-state undergraduate students will hold until July 1, at which time decision will be made as to the number of out-of-state students who will be permitted to come. It is hoped that 400 to 500 can be admitted, but present indications are that the number will be much smaller.

In selecting any new out-of-state students for next fall, the following factors will be considered:

1. Scholastic qualification.
2. Status as a veteran and length of time education has been interrupted by war.
3. Prior connection of the student or his parents with the state of Wisconsin.
4. Freshman standing preferred.

Former Students

All former students at the University of Wisconsin, regardless of residence, including those assigned here for army or navy programs in which they earned full University credit, will be permitted to reenter, providing they left the University in good standing.

Graduate School

No emergency restrictions apply to entry into the graduate school, but the graduate school has raised its scholastic requirement for admission to a 1.75 grade-point average.

Scholarships

Students who hold scholarships awarded primarily on the basis of scholastic achievement will be permitted to enter.

Non-resident scholarships will be continued. It has been the consistent policy, however, that the great majority of these scholarships go to students who are already in the University. If any are granted to new non-resident students, they will be permitted to enter.

Wisconsin Students

There is no change in the admission requirements for Wisconsin students. Graduates of Wisconsin high schools who meet the normal entrance requirements of the University will receive permits to register. It is urgent, however, that, in view of the total situation, students of doubtful college aptitude do not use college facilities greatly needed by war veterans.

All Wisconsin high school seniors who expect to enter the University this fall are asked to write the Registrar,

IN THE ACCOMPANYING article, Kenneth Little, registrar, lists the salient points of the new admission policy now governing enrollments at the University of Wisconsin.

trar, University of Wisconsin, Madison 6, Wis., as follows:

"I plan to enter the University of Wisconsin in September, 1946."

This notice should be sent before May 1. It is not binding.

Housing Policy

The University does not guarantee rooming accommodations. The issuance of a permit to register does not insure a room. Each student must arrange for his own living quarters.

All University-owned dormitories are reserved for Wisconsin students. Wisconsin veterans have priority in all University dormitories for men. Wisconsin women who are also veterans have preference in dormitories for women.

The University reserves the right to assign students to living quarters at Truax Field or Badger Ordnance Village as a condition of admission.

Summer Session

Permits will be granted to new non-resident students for the summer semester, but these carry no commitment for permission to register in the fall semester of 1946-47, nor will students who attend the summer session gain preference for fall admission.

Grading Policy

Rumors to the effect that the University has adopted a grading policy which will make it more difficult for students to remain in the University are wholly untrue. The faculty has asked the deans of the colleges to be less lenient toward students who are doing unsatisfactory work, but they have not raised the level of attainment which is necessary to remain in the University.

The statements of admission policy listed above are subject to change due to altering circumstances, Registrar Little emphasized. The University will make every effort to keep the public advised of any modifications, he said.

Professors in the News

The honorary degree of doctor of science was conferred by the University of Pennsylvania recently upon **Dr. WILLIAM S. MIDDLETON**, dean of the medical school of the University of Wisconsin.

Maj. B. RODNEY BERTRAMSON, now on terminal leave from the army, has joined the staff of the University soils department as an assistant professor. Before serving as a military government officer in Germany he taught at Colorado State College. Bertramson received his bachelor and master degrees at the University of Nebraska in 1938 and his PhD at Oregon State in 1941.

Dr. JOHN CHARLES WALKER, professor of plant pathology at the University, has been elected to the National Academy of Sciences. He is the 10th Wisconsin faculty member to be so honored.

Dr. HERMAN SALINGER, instructor in German at the University who is also known as a poet and translator, has accepted an appointment as assistant professor at the University of Kansas City, Kansas City, Mo.

Dr. HELMUT REHDER, member of the University of Wisconsin's German department since 1937, has accepted an appointment to become head of the University of Illinois' German department, effective September 1.

COACH ALLEN WALZ, back from three years in the Navy, is working with 60 boys this spring to develop the first Wisconsin crew since 1941. Here's the Badger rowers' schedule:

May 4—Lake Mendota; Marietta (Ohio) College, and alumni crew.

May 11—Annapolis, Md.; Cornell, Columbia, Harvard, Navy, M.I.T., Princeton, Pennsylvania, and Rutgers in the national intercollegiate regatta.

May 25—Philadelphia, Pa.; Pennsylvania and M.I.T.

June 1—Ithaca, N. Y.; Cornell, Princeton, and Pennsylvania.

Basketball Guard Wins '46 Shafer Scholarship

Robert Smith, guard on the University of Wisconsin basketball team and an outstanding student, has been awarded the Shafer Scholarship for 1946, a "living memorial" established by the parents of Allen J. Shafer, Jr., in memory of their son who was fatally injured in a football game at Camp Randall in 1944. Smith is a Madison freshman.

Swimmers, Wrestlers Fail To Place in Big Ten Meets

Wisconsin's team failed to place in the 1946 Big Ten swimming meet at Minnesota last month, and the Badger wrestlers failed to get a man past the semi-finals in Conference competition at Illinois.

On the Campus

Dedicated to Revealing Hidden Lights The University of Wisconsin Press

REVEALING lights that ordinarily would be hidden beneath the bushel is the mission of the University of Wisconsin Press.

The Press, set up on the campus in 1937, publishes works in the fields of science, history, and literature that otherwise might never become books. This policy has made the U. W. Press outstanding among the nation's 40-odd university presses in the production of scholarly volumes.

More than 50 titles have been published at Madison since the Press was organized. It functions under the dean of the graduate school and a special faculty committee appointed by the president. They select titles from manuscripts submitted by Wisconsin professors and alumni, and even outsiders.

Managing editor is Miss Livia Appel, who came to Wisconsin from the

University of Minnesota. She strictly limits the publication policy of the Press to the promotion of the "scholarly and educational" functions for which the University is tax-supported.

Among the U. W. Press books to be published this spring are two works of scholarship that will have a general appeal. One, George Mowry's *Theodore Roosevelt and the Progressive Movement*, is a gripping recital of the relationship of one of America's great personalities to the most significant political movement of our time. Dr. Mowry, now of Mills College, Calif., received his PhD from Wisconsin. The other is a collection of *French Lyrics in English Verse* by the late William Frederic Geise, scholar and gifted poet.

Also on the list for spring or summer publication is a study in criminogenesis by Prof. John L. Gillin of the U. W. sociology department, *The Wisconsin Prisoner*; the first definitive biography in English of a great modern literary figure, *Galdos, Spanish Man of*

(Continued on page 21)

He Breaks Record

LLOYD LA BEACH, Badger freshman sensation, broadjumped 24 feet, 2 3/8 inches in Chicago last month to set a new Big Ten record as Wisconsin placed third in the Western Conference indoor track meet. The promising young Jamaican athlete, whose performances have been giving Coach Tom Jones visions of national championships, previously had broken the Armory broadjump record.

She Cures Chickens

State Journal photo

DORIS MAE GNAUCK, Milwaukee, only girl majoring in poultry husbandry at the University of Wisconsin, is a self-educated expert at doctoring fowl. Little black suitcase in hand, she goes about the state diagnosing and curing all sorts of poultry ailments. Miss Gnauck received nationwide publicity lately through an article in "Colliers" Magazine.

Wisconsin Boxers Go Undefeated

By WARREN JOLLYMORE, '46
NCAA 135-Pound Champion, 1942

THE 1946 University of Wisconsin boxing team, which started the year as an unknown quantity, wound up the season with the first perfect record established by Badger fighters in three years. Upsetting the undefeated University of Virginia Cavaliers in the season's debut, the ambitious Badgers improved steadily as the season progressed, ending up on the top rung of the intercollegiate ladder.

Coached by DeWitt Portal, former San Jose (Cal.) State College mentor, the Cards defeated Virginia 4-½-3-½, Penn State twice, 6-2 and 8-0, Michigan State 6-2, Miami 7-½-½, Ottumwa (Ia.) Naval Air Base 5-3, and Louisiana State University 5-3 in that order to lay claim to the mythical national championship. The last five matches were fought at home before a total of over 50,000 fans in the University Field House. Former Coach John Walsh returned to the campus unexpectedly in January and aided the fortunes of the Badgers by acting as advisory coach.

Stars Galore

Although it is difficult to pick out the stars of the Badger lineup, Jackie Gibson, Don Dickenson, Stan Kozuszek, and Akio Konoshima were outstanding throughout the season.

Gibson, classy little 120 pounder who was released from the army air corps in time to join the team in the season's second match, wound up his college competition by winning five out of his six matches. A sterling performer for Wisconsin in '42 and '43, Jackie entered the ring with a useless left hand in the last bout of the season and lost by a TKO to LSU's Doug Ellwood to write an unfitting finis to his great college career. Gibson will be remembered to Badger fans, however, as the kid who started out as team mascot in 1939 and ended up as one of the finest 120 pounders ever to carry the Cardinal into a college ring.

"Peshtigo Mauler"

Kozuszek and Konoshima, both juniors, will be back another year to do battle for Wisconsin. Kozuszek alternated as a heavy and a lightweight. Always a crowd pleaser, the "Peshtigo Mauler" won five and drew two in his seven bouts. When Stan fought at 175 pounds, Art Hughlett of Waukesha capably carried on in the heavyweight division.

Konoshima, heavy-handed 127 pounder boxing his second year as a Badger won four and lost 2, numbering among his victims George Cross, Virginia star, and Miami's Jimmy Demos, two of the nation's leading featherweights. Sidelined for the last bout of the season because of injuries,

HERE IS THE WISCONSIN boxing team that brought the sport back to pre-war form at the University by chalking up a string of seven stunning victories and no defeats in 1946 competition. **Back row:** John Lendensky, Floyd Kowal, George Holmes, Ken Holmes, Darrow Burmeister, Art Hughlett, Stan Kozuszek, John Higgins, and Don Dickinson. **Second row:** John Walsh, advisory coach, Al Knapp, Bill Zung, Dave Reiels, Tom Cullen, Norman Anderson, Allan Shellenberger, and Coach DeWitt Portal. **Front row:** Leland Schultz, Akio Konoshima, Lyle Warzeka, Len Robock, Jim Swenson, Les Paul, Bob Humphrey, and Jackie Gibson.

Konoshima was replaced by Leland Schultz, gamester from Plum City, Wis., who lost by a TKO in a rousing battle against LSU's Charles Sharkey.

Dickenson Hits Hard

In Dickenson, 155 pounder, Coach Portal uncovered one of the finest prospects to arrive on the Wisconsin campus in many a year. Boxing his first year in intercollegiate ranks, the hard punching Tomah freshman won five bouts for the Badgers, stopping three of his foes and completely outclassing the other two. When Dickenson was unable to compete in the first and last bouts of the season due to injuries, he was replaced by Madison's Dave Reiels, who performed in an equally impressive manner. Reiels looked like a champion in TKOing LSU's N. J. LeBlanc in the season's finale, serving notice that he will be very much a part of Wisconsin boxing during the next two years. A sophomore, Reiels is the most improved boxer on the Badger squad.

The only other Badger to wind up his college career along with Gibson was Len Robock, of Berlin, Wis. Due to an injured right hand, Len represented the Cards only twice during the season, scoring decisive victories both times.

Other lightweights who fought well for the Badgers this year include Les Paul and Lyle Warzeka, Madison freshmen, and Jim Swenson, a sophomore southpaw from Cameron, Wis.

Humphrey Is Clever

At 145 pounds, the heaviest burden was carried by Bob Humphrey, St. Joseph, Mo. freshman, who contributed

five wins as against one loss during the season. Humphrey, a neat boxer and a potent puncher, was out of the second Penn State contest because of a cut eye, but he was ably replaced by Floyd Kowal, Janesville, who won a decision over Lion Captain Bill Smith.

The 165 pound class was full of capable clouters in the persons of John Lendensky, promising puncher from Natrona, Pa., and Norm Anderson and Tom Cullen, both Madison boys. All three won bouts for the 1946 team and will be back to win more next season.

The victorious close of the '46 season marks the seventh time in 14 years that a Wisconsin boxing team has remained unbeaten and untied through a season of college competition. There have been greater Wisconsin teams, but never has a Badger squad started a season with so little and ended it with so much as the Cards of '46.

Black Earth Boy Wins \$100 Oratorical Award

John G. Barsness, University student from Black Earth, has been awarded a \$100 victory bond as the winner of the 19th annual Frankenburg Oratorical Contest. His oration was entitled "Our Last Chance."

The annual prize is offered by the Wisconsin Alumni Association. John Berge, executive secretary of the Association, presided at the contest, which was judged by J. Jeffrey Auer, Prof. Henry L. Ewbank, and Prof. Andrew T. Weaver.

THE 1946 Summer Session of the University of Wisconsin will again include a full semester of work and an eight-week session for both undergraduates and graduates.

Registration for the summer semester will be held May 30 to June 1 and classes will start June 3. This full session closes Sept. 14, with examinations from Sept. 11 to 14. Students in the eight-week session will register on June 21 and 22 and begin classes on

Twin Summer Session

June 24. The eight-week session closes Aug. 16.

The summer session will offer classes for beginning and advanced students in all fields of education. In the eight-week session the hundreds of courses offered include many new and timely subjects.

In addition to the long and short summer sessions, 18 special institutes, workshops, laboratory schools, and clinics will meet on the Wisconsin campus this summer.

They are:

The University of Wisconsin School for Workers, June 9—Aug. 17; Institute for County Welfare Directors, June 17—21; Education Press Institute, June 23—29; Workshop in Home Economics and Education, June 24—Aug. 16; Writer's Institute, June 24—Aug. 16; Institute on Professional and Public Relations, July 2—3; The Seventeenth Annual Music Clinic, July 7—20; Institute for Vocational Rehabilitation, July 8—12.

Town-Country Leadership Summer School, July 8—19; Visual Education Institute, July 15—19; Institute for Superintendents and Principals, July 22—26; Public Service Radio Institute, July 29—Aug. 9; The School of Banking Institute, July 28—Aug. 10; Institute on Child Development, July 29—Aug. 2; Institute for Social Case Workers, July 29—Aug. 2.

Short Course in Underwriting and a Short Course in Fire and Casualty Insurance, Aug. 11—17; The Eight-Week Radio Institute, June 24—Aug. 16; Workshop in Elementary Education, June 24—Aug. 16; State Curriculum Workshop, June 24—Aug. 16; Elementary Laboratory School, June 24—Aug. 16; The Psycho-Educational Clinic, June 24—Aug. 16; and The Reading Clinic, June 24—Aug. 16.

New out-of-state students may attend the University of Wisconsin this summer, but permits granted them carry no commitment for permission to register in the fall semester of 1946-47.

World War II veterans who do not possess all of the requirements for admission and who are not candidates for a degree may be admitted to the University upon giving satisfactory evidence that they are prepared to take advantageously the subjects open to them.

The University Division of Residence Halls will offer accommodations for women in Barnard and Elizabeth Waters Halls for the eight-week session. For men, several Kronshage houses will be open. Married couples without children will be housed at Truax Field, families at the Camp Randall Trailer Park.

Says Dean John Guy Fowlkes about his 1946 double summer session:

"The year 1946 offers the first opportunity for study under the international peace since 1941. Consequently, it is essential that we direct our efforts towards becoming better able to live as well as to do. Our military accomplishments have been superb. Our achievements towards the internal problems of social developments are equally challenging and even more essential. The 1946 Summer Session offers rich opportunities for development."

AS A SUMMER-SCHOOL CAMPUS the University of Wisconsin is in a class by itself. This year more than ever before students will be attracted by a setting for college work unequalled anywhere else in the country. Hub of June day activities in Madison is the Memorial Union Terrace (above), where one can sit and sip a coke in the shade of stately elms, watch the clean, white canvas of sailboats scudding over Lake Mendota, or listen to the shouts of bathers frolic on the "Y" pier.

"... promoting by organized effort the best interests of the University ..."

Come Back to Madison in May

Remember Madison in May? The sun-flecked Union Terrace . . . the long, green sweep of Bascom Hill . . . hot, lazy afternoons on a pier-end . . . the lacy finger of Picnic Point stretching out into glistening, blue Mendota . . . a star-lit night sky above the Observatory. Remember? Why not come back to Madison this first peacetime May in five years and recapture the pleasure of old acquaintances and the beauty that is Wisconsin in the Spring.

This year as every year the University administration and the Wisconsin Alumni Association are jointly sponsoring a Commencement-Reunion Weekend on May 24, 25, and 26. Although the Madison housing situation is bad, thousands of Badgers are expected to be able to return to the campus by making their reservations early at downtown hotels, by staying with friends and relatives, by stopping at nearby towns, or by driving in for a day.

Nine University classes are reuniting in Madison this year: 1896, 1901, 1906, 1911, 1921, 1926, 1931, 1936, and 1941. The oldest reuniting group, the '96ers, will be inducted into the Half-Century Club, that exclusive Wisconsin organization open only to University alumni who have been graduates for 50 years or more. The newest reuniting class, the '41ers, will sponsor a reunion dance. Other classes will meet at special luncheons and get-togethers.

Commencement-Reunion Weekend activities get under way on **FRIDAY, the 24th**, when Pres. William D. Hoard, Jr., will present the Golden Jubilee Certificates of the Alumni Association to every class of '96er attending the Half-Century Club luncheon in the Memorial Union. Then that evening Pres. and Mrs. E. B. Fred of the University will entertain graduating seniors and reuniting alumni at their annual lawn reception.

SATURDAY, the 25th, is a combined Commencement-Alumni Day. The University's 93rd graduation exercises are set for 8 o'clock that morning in the Field House. For the first time since 1941 they will have a peacetime rather than a military air. Gov. Walter S. Goodland and President Fred will speak to some 800 seniors and award honorary degrees to three distinguished Americans.

The annual administrative meetings of the Wisconsin Alumni Association will take place during the day Saturday with sessions of the Wisconsin Alumni Club Assembly, the Wisconsin Alumni Association, and the Association's Board of Directors scheduled. Ten newly elected directors are to be presented.

Saturday evening is filled with reunion activities bound to attract the largest crowd of alumni in many years back to the University: the annual alumni dinner on the Union Terrace at 6:30, a special alumni program in the Union Theater at 8, and a gala Reunion Dance in Great Hall at 9.

The final day of the Weekend, **SUNDAY, the 26th**, is being set aside as Memorial Sunday. Special services dedicated to the more than 500 Wisconsin alumni killed in action in World War II will be held at 10 a. m. State and University dignitaries, faculty, classmates, friends, and parents will attend the solemn rites to pay tribute to the Fighting Badgers who fell in line of duty.

An invitation to come back to Madison in May will be mailed out soon to all Wisconsin alumni over the signatures of President Fred of the University and President Hoard of the Alumni Association. They will welcome every Badger back to Wisconsin to see for himself the forward march of his University, to honor Wisconsin's soldier dead, to revel in the loveliness of springtime Madison, and to experience the joy of meeting old friends once again.

Former Alumni Director Awarded Legion of Merit

Army Signal Corps photo

COL. FRANKLIN L. ORTH, '28, is shown being congratulated by Maj. Gen. Edward H. Brooks, commanding general of the Fourth Service Command, Atlanta, Ga., as the former director of the Wisconsin Alumni Association is awarded the Legion of Merit. Col. Orth, whose home is in Milwaukee, served at Camp Grant, Ill. in the military personnel division of the Army Service Forces, and as a battalion commander with the famous Merrill's Marauders in Burma. He holds University degrees in both economics and law and coached crew and football on the campus for two years following his graduation.

★ In Memoriam ★

Maj. Hervey C. SCUDDER, '29, West Trenton, N. J., son of Mrs. Hervey C. Scudder, Sr., Broadhurst Farms, Sullivan Way, Trenton, N. J., was killed August 26, 1945, in a troop carrier plane crash in Manila. Prior to going to the Pacific, Maj. Scudder, who was one of the outstanding pilots and aircraft observers in the Trenton area, was commanding officer of Biggs Field, Texas. He flew as a commercial pilot until 1935 when he joined the 119th Observation Squadron, a National Guard unit. He is survived by his wife and two sons.

2nd Lt. Lyle J. LANGENBERG, '43, son of Mr. and Mrs. H. W. Langenberg, 403 N. Sidney Street, Kimberly, who was reported missing in action after his plane took part in a mission over Nagoya, Japan, on February 15, 1945, has been declared dead by the War Department. Lt. Langenberg was a crew member aboard a B-29.

Pvt. Victor L. KELMAN, '43, son of Mrs. Benjamin Kelman, 42 St. Paul Street, Brookline, Mass., who has been listed as missing in action since Feb. 1, 1944, has been killed in action at Cisterna, Italy.

Medical Units Stand Reveille in Madison

State Journal photo by Harrington

THREE FIGHTING BADGERS who found much to talk about at the homecoming of the 44th General Hospital Unit and the 135th Medical Regiment on the University of Wisconsin campus last month were (left to right) Col. Marc J. Musser, '32, Col. Frank L. Weston, '21, and Col. William J. Bleckwenn, '17. The 135th, first under the command of Col. Bleckwenn and later under Col. Musser, both of the University faculty, was a front-line unit operating with the American Sixth Army in the Pacific and took part in most of the heavy invasions from Buna through the Philippines. To the two men came the Legion of Merit, awarded personally by Maj. Gen. Norman T. Kirk, surgeon general of the army, in the Memorial Union. Col. Weston commanded the 44th, which also saw action in the Pacific and also was staffed largely with Wisconsin Medical School personnel.

ward S. VAKOS, Henry T. WILSON, John A. ZWICKY, Ray C. MARCK.

1st Lt. R. Wayne HUGOBOOM is in Munich . . . Lieut. Arthur J. WALSH, USMC, is on his way back to Jansenville . . . Lieut. (jg) Eldon J. WOLF is stationed with the U. S. Naval Air Station, Norfolk, Va.

Atomic Bomber

MAJ. WOODROW SWANCUTT, '40, Wisconsin Rapids, former U.W. boxing champion, is competing in a new tournament these days—a tournament to decide which bomb crew will have the honor of dropping the atomic bomb over the navy's guinea pig fleet in the Pacific this summer. Eight B-29 crews, one of them commanded by Swancutt, are now competing for the assignment at Albuquerque, N. M.

ANOTHER WISCONSIN man, Ens. Donald T. Anderson, x'45, Madison, will take part in the atomic bomb test in the Marshalls as a member of the crew of the USS Rockingham. So will Lt. O. Alfred Granum, '43, on the USS Nevada. Lt. Philip M. Webster, x'45, a meteorologist with the 20th Army Air Force at Guam, is also working on a phase of the test, as is Lt. David E. James, x'46, on the aircraft carrier Shangri-La.

University Press

(Continued from page 14)

Letters, by the late Prof. H. Chonon Berkowitz of the U. W.; a thoroughly revised edition of a medical title by a Wisconsin professor that has had a gratifying sale throughout the world, Dr. Noel A. Gillespie's *Endotracheal Anaesthesia*; and an exhaustive investigation in the field of classical mythology on the origins and development of a Greek myth, *Hermes the Thief: The Story of a Myth*, by Norman O. Brown, former Wisconsin student.

Veterans Favor Wisconsin

The University of Wisconsin has been named as one of the colleges favored by returned veterans who are resuming their educations.

The Veterans Administration in Washington says that 41 per cent of all student veterans are enrolled in 38 big schools, Wisconsin being one of them.

"She's a Woman"

Holstein Breeders Elect a Secretary

A trim, snappy-eyed brunette was reelected last month as secretary of the largest state cattle breeder's association in the United States and the only woman secretary in the country for such an association.

She's Mrs. Jack Reynolds, '40, West Bend, of the Holstein-Friesian Association of Wisconsin. Mrs. Reynolds will be remembered on the campus as Florence Schroeder.

Three years ago, when Jack Reynolds, '40, went into the navy, the Holstein men looked over the field for a successor to him as their secretary.

"Why not Mrs. Reynolds?" suggested one.

"She's a woman. Who ever heard of a woman secretary for a cattle association. Got'ta have a man that can get out in the barns and stir things up," said another director.

But Mrs. Reynolds was elected anyway. How successful she's been is indicated by the fact that what used to be a four-page association news letter is now a 36-page magazine. Last month when the Holstein association met at Richland Center, Mrs. Reynolds' reelection went through without a murmur.

With the "United States News"

Five Wisconsinites Are Washington Journalists

The editorial offices of the *United States News*, Washington weekly news magazine, are filled with University of Wisconsin graduates.

Owen L. Scott, '20, has been executive editor of the *News* for a number of years. Carson Lyman, '22, is assistant news editor and William Pinkerton, '31, is one of the national editors.

Executive editor of the *World Report*, a new magazine about to be published by the *News*, is Lloyd Lehrbas, '19, who during the war was personal aide to Gen. Douglas MacArthur.

Bertram Zilmer, '20, is one of the editors of the Bureau of National Affairs, an affiliated organization which puts out news services for business men.

Ex-Coed Listed Among Nazis in United States

Dr. Therese Kaltenbacher, a student at the University of Wisconsin summer session in 1938, was one of nine persons with state of Wisconsin connections included on a German list of 643 Nazi party members operating in the United States as late as 1942. The list was revealed last month by a Senate military affairs sub-committee.

While at the University, Dr. Kaltenbacher took two courses in educational methods, according to the registrar's records. She gave Konstanz, Germany, as her home address.

He Studied at Wisconsin in 1871

State Journal photo

ONE OF WISCONSIN'S OLDEST living alumni is Frank Coolidge, 91, retired farmer and railroad man of Middleton. Mr. Coolidge attended the University's Letters and Science Preparatory Department in 1871-73.

"My courses included biology, algebra, arithmetic, and English," he recalls, "all taught by one teacher, Professor Leahy, in Bascom Hall. This building and two dormitories were the only buildings on the campus. I boarded downtown and drove home to Pheasant Branch weekends with horse and buggy."

Trailing the Badgers

1881 W

Judge Albert J. MARSH, Eau Claire, died March 13. He had practiced law for 54 years and had resided in Eau Claire for 64 years.

1896 W

George J. CARROLL, Milwaukee attorney for more than 50 years, died March 11. He had resigned last July from the law firm of Carroll and Thekan. Mr. Carroll had spent some time in Florida, returning to Milwaukee last month.

1897 W

Dr. Fay T. CLARK, Waupun physician, civic leader and businessman, died February 23. He was head of the Clark-Swartz

Hospital and president of the Waupun Canning Co. and the Waupun Building and Loan company. Dr. Clark had been mayor of Waupun from 1925 to 1929 and president of the board of education for more than 25 years.

1903 W

Henry GRAASS, Green Bay, was killed in an automobile accident near Madison on March 8. He had served as circuit judge since 1914 and previously had been Door county district attorney and city attorney.

1904 W

Mrs. Arthur BEATTY (Carlotta McCUTCHEON), Madison, died March 3 in a Madison hospital. She had lived in Mad-

ison since 1899 and was a member of Phi Beta Kappa. Mrs. Beatty is survived by a son, Hamilton, '28.

1906 W

Lewis R. ZERBEL, Madison, foreman of the University's Hill Farm, died February 27. Mr. Zerbel was one of the University's oldest employees, having served at the farm since 1905. . . . Madge W. LORANGER, Rochester, N. Y., died February 10. Miss Lorange was director of the social service department at the Rochester General Hospital. At one time she had been in the social service department of the Marquette University Dispensary, Milwaukee.

1908 W

State Senator Melvin R. LAIRD, Marshfield, died March 19 at a hospital in Rochester, Minn. Serving his second term in the senate, Mr. Laird, represented the 24th senatorial district. He was an executive of the Connor Lumber and Land company at Marshfield. Senator Laird had also served as Presbyterian minister at Prairie du Sac, Lincoln, Ill., and Omaha, Nebr. During the first World War he served as chaplain of the 335th regiment in France.

1910 W

Mrs. Arthur L. DOLE (Esther MOHR), Chestertown, Md., died January 10. Mrs. Dole was professor of history at Washington College, Chestertown, from 1926 through 1945. She was active in the American Historical Society, the Maryland Historical Society and the Daughters of the American Revolution. In 1941 she published *Maryland During the Revolution*. . . . Edgar C. WILSON, Wausau, died January 20 of a heart attack. Mr. Wilson had been in the lumber business in Green Bay and had been manager of the Green Bay office of the Sonotone Corp. of New York. . . . Mrs. John F. CADY, (Ruth BUMP), formerly of Chetek and Cameron, Wisconsin, died March 2 in South Gate, Calif., where she had lived for the past 23 years. . . . Anabel McLEOD, Chippewa Falls, died at her home on March 11 after a brief illness. She taught music for many years. Miss McLeod is survived by a sister, Florence, '10.

1916 W

Freeman D. LOHR, East Orange, N. J., died January 16 in Memorial Hospital, New York. After leaving college he became associated with the Koppers Seaboard By-Product Coke Co. and worked in various departments before becoming works manager, which position he held at the time of his death. During World War II Mr. Lohr served on the army's industrial advisory committee for industrial plant defense work. He is survived by Mary Utman LOHR, '19, and four children.

1919 W

Henry J. DUWE, instructor in accounting at the University Extension, has been appointed business manager.

1921 W

Mrs. S. H. BARRETT (Grace BEMIS), Antigo, is state home management supervisor for Wisconsin for the Farm Security Administration. Her office is on the sixth floor of the Milwaukee County Courthouse.

1923 W

James Everett MACKIE, Menlo Park, Calif., was killed in an automobile accident February 21 in San Francisco. His wife, Gene PLUMB, '20, was injured in the accident. A daughter, Traves, is a student at the University. Mr. Mackie was connected with the National Lumber Manufacturer's Ass'n. . . . Dr. Harry E. CARSWELL has announced his resignation at the medical school of the University of Louisville and will become superintendent of the Richland Hospital about June. . . . Percy F. LEWIS, Milwaukee, is the newly elected illustrious potentate of Tripoli Temple. Mr. Lewis was placed on the inactive list of the Naval Reserve on February 1, 1945, after 26 months of service. . . . Robert L. RUNDORFF, Minneapolis, assistant gas engineer of the Northern States Power Co., died suddenly in St. Paul on December 3. He is survived by his wife, the former Dorothy SUTOR, '24.

1924 W

Howard R. LATHROPE, agricultural agent of Wood County for 16 years, has tendered his resignation effective in mid-April. He will accept a position as associate professor in agronomy at Purdue University, Lafayette, Ind.

1926 W

Elfrieda KRUSCHKE, Waldo, married Harvey Baer, Silver Creek, on March 2. They will live near Random Lake, Wisconsin. Mrs. Baer was a sewing teacher at Washington High School, Two Rivers.

1927 W

Lloyd LARSON, Milwaukee, has been named sports editor of the Milwaukee Sentinel. While at Wisconsin he won six letters in football and baseball and captained the baseball team. The past three years he has been in the advertising business. . . . Durell J. BENEDICT, who has been associated with the Stanley Hanks Co., Madison, for more than 18 years, bought the Hanks Co. and will operate under the name of D. J. Benedict company at 130 State Street, Madison.

1929 W

Severin SWENSEN, mathematics teacher at Boys' Technical High School, Milwaukee, for 17 years, died March 17. He had been in ill health since November. Mr. Swensen served in World War I and in World War II was a lieutenant colonel in the engineers.

1930 W

John C. WEBER has moved from Morgantown, W. Va., to 304 Virginia Terrace, Madison. He is on the electrical engineering staff of the University.

1931 W

Clyde A. MEGGETT, Eau Claire, married Gwen C. Connors, Rice Lake, on January 25. Mr. Meggett is a partner in the Balcom-Meggett Printing Shop. . . . S. Richard HEATH, district attorney of Fond du Lac County, has announced his candidacy for the office of judge of the municipal court of Fond du Lac County. . . . Col. Franklin T. MATTHIAS, formerly of Curtiss, Wis., is now on terminal leave from the army engineering corps. He will leave later this month for Sao Paulo, Brazil, where he has accepted the position of project manager with the Sao Paulo Tramway, Light and Power Co. . . . Theodore E. WHITING, Washington, D. C., was awarded the Emblem for Exceptional Service at a ceremony in the Pentagon, Washington. The award was for outstanding service in the War Department. Mr. Whiting is assistant to the director of the international division and serves as statistical analyst and consultant.

1932 W

Dr. Marc J. MUSSER, Jr., Madison, was married February 22 to Gladys Norsetter. Since his return from military service Dr. Musser is again at his post of assistant professor of neuropsychiatry at Wisconsin General hospital.

1933 W

Anton A. KALINSKE, formerly of the University of Iowa, has been appointed associate professor of hydraulics at the University of Minnesota. . . . John V. EVANS, Kenosha and Kathleen Rogers, Elgin, Ill., were married Feb. 23. Mr. Evans, since his military discharge, is associated with the law firm of Cavanagh, Stephenson, and Mittelstaed, Kenosha. . . . Prof. William R. BASCOM of the Northwestern University department of anthropology, who spent three years in West Africa with the office of strategic services and the foreign economic administration, has returned to Northwestern University.

1934 W

Helen BOUCHER, Madison, married Lt. Albert G. Incani, New York City, on February 27. Mrs. Incani was on the staff of the Wisconsin General Hospital before entering the army nurse corps. As a first lieutenant she served 21 months, 18 of which were spent in Burma. . . . Leonard HAUG, associate band instructor at the University of Oklahoma, has been named

director of the band and orchestra. . . . Virginia L. DOERN, formerly of Milwaukee, has arrived in the Southwest Pacific area to serve the armed forces as an American Red Cross staff assistant. Miss Doern had been a technical illustrator for Lockheed Aircraft, Los Angeles, before joining the Red Cross. . . . Mrs. William H. OATWAY, Jr. (Margaret Pyre) Tucson, Ariz., formerly of Madison, died March 3 in Tucson.

1935 W

Lester F. ZIMMERMAN, Milwaukee, who taught English at the University Extension Division before serving as a lieutenant in the army, has rejoined the Extension staff. . . . Mr. and Mrs. Marshall F. Chapman, Scarsdale, N. Y., announce the birth of a son on March 2. Mrs. Chapman was the former Lucy PORTER, '35.

(Continued on page 24)

Badger Bookshelf

OUR ROVING BIBLE. By Dr. Lawrence E. Nelson, graduate student in English at the 1921 Summer Session. Abingdon-Cokesbury Press, Nashville.

"This book begged to be written," says Dr. Nelson, director of the division of languages and literature, University of Redlands, Calif. "It presents evidence, objective and abundant, that for centuries the Bible has shaped English and American thinking in more ways and to a greater extent than has hitherto been generally realized."

Unlike many books about the Bible, this one is written in a spritely style. While Dr. Nelson takes his subject seriously, he and the reader are never bored by it. The first edition of 5,000 was sold before publication.

WHEN YOU MARRY. By Reuben Hill, PhM '36, and Evelyn M. Duvall. Association Press, New York, \$3.

Those Wisconsin students who remember Dr. Hill's stimulating "Marriage and the Family" course will want to read this latest book by the now associate professor of sociology at Iowa State. Writing in informal, lively style that is often humorous and always wisely human, he and Mrs. Duvall have coordinated a vast amount of interesting information and instruction in biology, psychology, sociology, and economics with sound advice on religion and psychiatry. Each one's experience as a parent as well as teacher has entered into the content of the book. The result is as varied as a library and as readable as a novel.

WHEN FOREMAN AND STEWARD BARGAIN. By Glenn Gardiner, BA 18, MA '20. McGraw-Hill, New York.

Mr. Gardiner, author of more than 30 texts on industrial organization and management, here makes an important contribution to the field of peaceful labor relations.

"This book is written primarily for foremen who sincerely desire to develop and maintain successful relations with union stewards," he writes. "It is not written for foremen who merely want to win arguments with stewards. I am more interested in 'what's right' than in 'who's right.'"

1936 W

Jean WEIRICK, Janesville, was married February 24 to Donald R. Gunter, Ft. Worth, Texas, at the post chapel at Ft. Leavenworth. Mrs. Gunter was an army social hostess at Ft. Leavenworth. . . . Maynard W. MEYER, Wauwatosa, now on terminal leave from the Navy, has been named director of planning for the Metropolitan Milwaukee War Memorial Organization. The committee offices will be at 828 N. Broadway, Milwaukee.

1937 W

Lloyd M. COOKE, Argo, Ill., married Dorothy Lathe, Montreal, Canada, on Nov. 3, 1944. He is employed as section leader, Corn Products Refining Company, Chemical Division, Argo. . . . Frances HIPPE, Edgerton, was married January 19 to Harry R. McQuinn at Royal Oak, Michigan. Mrs. McQuinn was released from military service in March, 1943 and now lives at 258 Roth Blvd., Clawson, Michigan. . . . Dr. L. K. EVERSON, physician and surgeon, will move his offices to 221 Wisconsin Ave., Madison. Dr. Everson has had his office in the Tenney Building for about a year. Before that he served for two years as an examining physician with the navy. . . . Paul S. HAWKINS was discharged from military service on November 15. He sailed from San Francisco on January 20 for Shanghai, China, where he will be associated with the National City Bank of New York. His wife, Helen, '39, and daughter, hope to go there soon. . . . Dr. John R. TALBOT, formerly of Oshkosh, has recently opened an office in Wauwatosa. He will also be associated with the Hansberry Hospital in Hillsboro. Dr. Talbot has recently been released from military service, having enlisted in October, 1940. . . . Severa KRUG and Joseph L. PEET, '34, both of Beloit, were married on March 5. Mrs. Peet was formerly employed in the U. S. Employment Office, Beloit. Mr. Peet, since his military discharge, is associated in the real estate and insurance business with his father.

1938 W

Sidney (Cohen) SPENCER, Milwaukee, died February 22 in a hospital in Milwaukee after an illness of several months. He had been a radio script writer in New York and in Hollywood. Mr. Spencer took part in the Haresfoot productions of 1937 and 1938.

1939 W

Harold A. METZEN will take over the duties as athletic director and coach at Wisconsin High School, March 4. He replaces Clyde KNAPP, '44, who has been granted a leave of absence to join the Inter-American Education Foundation Group which will make a tour of Chile starting March 12.

1940 W

Dr. and Mrs. Edward R. LEVITZ, formerly of New Haven, Conn., now assistant surgeon, USS *Brunswick*, announce the birth of a son, Alan Arthur on January 17. . . . Capt. Daniel T. SULLIVAN, Ojibwa, and Jeromia Tygielski, Chicago, were married February 23 in Chicago. They will make their home at 407 State Street, Madison. Capt. Sullivan is on terminal leave and will resume his position on the *Wisconsin State Journal* staff soon. . . . Max S. LINDEMANN, Madison, a navy veteran and personnel examiner for the state bureau of personnel, was named city personnel officer by the civil service personnel board. Mr. Lindemann had been employed with the state bureau of personnel since 1929 as statistical clerk and junior statistician before becoming a personnel examiner. . . . Aleda STOLEN, Madison, married Dr. William E. Jones, Kelso, Wash., on February 25. They will make their home in Madison, where Dr. Jones is resident physician at the Wisconsin General Hospital. Mrs. Jones is on terminal leave, having served as a nurse with the 44th General Hospital Unit. . . . William C. GATERMAN, Manitowoc, and Florence Stanul, Two Rivers, were married March 1. Mr. Gaterman, associated with the Gaterman Manufacturing company was recently released from the armed forces after duty in the European theater of operations.

Madison Memories

From the Files of the WISCONSIN ALUMNUS

ONE YEAR AGO, April, 1945: The Board of Regents voted to set up a "little Annapolis" on the campus, making the University one of the 23 schools in the country with a four-year naval ROTC course.

FIVE YEARS AGO, April, 1941: The University of Wisconsin basketball team, winner of the Big Ten title, became the championship club of the country by defeating Washington State in the NCAA finals at Kansas City.

TEN YEARS AGO, April, 1936: The Wisconsin Alumni Association celebrated its Diamond Jubilee with a coast-to-coast "Wisconsin night" radio broadcast featuring Pres. Glenn Frank speaking from the campus and Fredric March, '20, speaking from Hollywood.

TWENTY YEARS AGO, April, 1926: The U. W. glee club has just returned from Washington, D. C., where the group entertained President and Mrs. Coolidge with a 45-minute concert in the East room of the White House.

THIRTY YEARS AGO, April, 1916: Excavation work has begun for the new stadium at Camp Randall.

FORTY YEARS AGO, April, 1906: Dr. George Clarke Sellery and Prof. Carl Russell Fish were the official representatives of the University at a special convention of history teachers in Chicago.

1941 W

Esther WELLER, Oshkosh, and Wilbur M. BENSON, '45, formerly of Grand Forks, N. Dak., were married February 22; at home at 11 N. Spooner St., Madison, while Mr. Benson completes his education at the University. Mrs. Benson is assistant secretary of the advanced standing committee at the University. . . . Elton M. A Timely Book

JAPAN: A Physical, Cultural and Regional Geography

By GLENN T. TREWARTHA

THIS recent book by a recognized authority on the geography of the Far East presents a wealth of information indispensable to an understanding of the country's resources and outlook for the future.

Early chapters on geographic features and natural resources are followed by illuminating discussions of Japan's population, her cities, agriculture, industry, trade, and communications. Included also are detailed descriptions of the country's major geographic subdivisions.

"Much the best information yet published for a study of Japan in the modern world." — D. H. Buchanan, Department of State.

"Will long be the standard source for many purposes." — Far Eastern Survey.

"Makes fascinating reading." — Shanghai Evening Post and Mercury.

"Indispensable to all who wish seriously to study that ill-fated country." — Geographic Review.

Profusely illustrated. \$5.00

Wisconsin Gets Set for 15,000 Students

(Continued from page 5)

says work on the foundation of the building will begin this year.

The center will include a chapel seating 100, an auditorium with a seating capacity of about 500, library, music, game and recreation rooms, offices, and classrooms for studies in Yiddish and Hebrew culture.

Site of the center is the famed Kiekhofler wall on Langdon Street, where many generations of students have inscribed Homecoming slogans.

* * *

THE STATE BOARD OF HEALTH will ask the 1947 Legislature to appropriate a half million dollars to construct and equip a new state laboratory of hygiene building on the University campus, Dr. Carl N. Neupert, state health officer, has revealed.

* * *

OTHER BUILDING PROJECT actions were taken by the Board of Regents at its March meeting. They include:

1. Location of the new \$2,000,000 Engineering Building west of Randall Avenue, between Dayton and Johnson Street, on the site of the present Camp Randall Trailer Park.

2. Purchase of the King property near the Stock Pavilion for \$16,000 as a site for the new Dairy Building.

3. Further study of land along Elm Drive for a physical education area.

4. Acquisition of more land near Camp Randall for intercollegiate athletics.

5. Location of the \$600,000 State Diagnostic Center of the State Department of Public Welfare on the west side of Orchard Street, opposite the University Heating Plant.

6. Transfer of \$1,000 to the department of naval science and tactics to furnish the Blackhawk Garage, which

is to be used by the NROTC until an armory is built.

7. Location of two new four-story men's dormitories and an additional L-shaped dormitory south of Kronshage Hall.

A Basketball Post-Mortem

THE basketball call at the University of Wisconsin last fall was answered by 150 men. We of the coaching staff were pretty well satisfied, because that was more men than had responded in the previous three years put together. We had dreams of the manpower shortage being over, and felt the large squad would give us a strong foundation.

Later, we found it didn't stop the roof from falling on us.

The 1945-46 squad included three boys who had won letters in 1944-45 and two boys who had been squad men before going into service. The balance were 17-year-old freshmen and some returned GIs who had played a little camp basketball. We soon found that we had a lot of willing workers that were comers and showed promise, but that there was a lack of power in several positions.

We developed a fine scorer in Bob Cook and a capable forward in Ex Menzel, but our guards didn't have enough punch and our centers were weak in defense and ability to score. The squad as a whole was full of that old "try," but because of their greenness the boys made too many mistakes to win ball games.

In looking back on the season it seems that the worst thing about it was our record. Never have we worked with boys that gave so much trying to win. The squad was the kind that got better with each game and learned many things that will help it in another year. My biggest sorrow is that the boys weren't rewarded this year.

Bob Cook ended up in fourth place in the league scoring. The team was ninth, but we feel a lot better than that about them. Our crowds were second in the conference, demonstrating the fans' great interest in these fighting Badgers. Captain Gene Mathews and Kurt Grimm are the only men we lose by graduation, so the remaining squadmen, along with stars of former years returning from service, give promise of far greater results in another year.

COACH FOSTER

Harold E. "Bud" Foster

Build the University by Means of Insurance

The University of Wisconsin Foundation is soliciting gifts and bequests from loyal alumni and friends. If you are unable to write the size check which your interest in Wisconsin urges you to write, a life insurance policy made payable to the Foundation can be your solution.

We heartily endorse this plan and will be pleased to discuss it with you.

To Help the University

Foundation Adopts Insurance Project

The officers and directors of the University of Wisconsin Foundation are convinced that there are a great number of alumni as well as many friends of the institution who will wish to assist the University through the Foundation by assignment of either paid-up life insurance policies or policies on which they are now paying premiums; or by purchase of an additional life insurance policy either on themselves or on the life of someone in whom they have an insurable interest.

As a means of initiating its plan to raise money by use of life insurance, the Foundation has published a small booklet, captioned: "HOW YOU CAN HELP TO BUILD AND PERPETUATE THE UNIVERSITY OF WISCONSIN BY MEANS OF INSURANCE," which is divided into four parts:

- (a) Purpose of the University of Wisconsin Foundation.
- (b) Primary Plans and Projects of the Foundation.
- (c) How Insurance Can Help You to Make Your gift.
- (d) Why a Gift Through Insurance is Simple and Practical.

The plan suggests a simple method by which a sizeable gift can be made by any alumnus or friend of the University through year-to-year payments out of his or her current income. It opens the way for the average man or woman to leave a substantial amount of money for a specific endowment fund or for the support of some other worthy University of Wisconsin project.

Interested parties are urged to either contact their local life insurance agent or write to the University of Wisconsin Foundation, 905 University Avenue, Madison 5, Wisconsin. Copies of the insurance booklet will be mailed on request.

Wisconsin Students Are Going to Jail

University of Wisconsin students are going to prison.

They're not going as inmates, however, but as visiting members of the classes in prison administration, parole, and probation conducted at the University by Carl E. Johnson, new sociology professor and former deputy warden at the state prison at Waupun.

Nine Classes to Reunite

The classes of 1896, 1901, 1906, 1911, 1921, 1926, 1931, 1936, and 1941 will hold reunions on the campus next month as a part of the annual Commencement-Alumni Weekend. The May *Wisconsin Alumnus* will carry full details of all reunion activities.

Directory Issue

JULY, 1946

★ For the first time since before the war, the Wisconsin Alumni Association will publish a complete Directory of all its members as a special part of the July, 1946, issue of the *Wisconsin Alumnus*.

★ Every loyal Wisconsin alumnus who's a member of the Association will be listed according to his city or town of current residence, and his class year will be indicated.

★ If you aren't a member of the Alumni Association now, mail the blank below and your name will be entered on the records in time to be included in the Alumni Directory.

★ If you are a member of the Association, why not pass this notice along to a non-member alumnus who'd like to be listed as a full-time Badger in the July *Wisconsin Alumnus*.

Name ----- Class -----

Address -----

City ----- Zone ----- State -----

Membership open to anyone who has attended the
University one semester or more

You're sure
when
Vitamin D
products
bear this seal!

WHEN you buy food and pharmaceutical products with Vitamin D content look for the Wisconsin Alumni Research Foundation Seal or mention of the Foundation. Every product bearing the Foundation seal or name is periodically checked in the Foundation laboratories to assure dependable, uniform potency. These checkups make certain the products meet the label claims of the Vitamin D content. For twenty years the Foundation has carried on this program of testing. That is why the Foundation Seal has the confidence of the medical profession and the public. Look to it for your added guarantee of dependability.

10 New Directors Will Be Elected

(Continued from page 12)

president, Wisconsin Alumni Club of Milwaukee; member, Cardinal Club of Milwaukee; past president, Milwaukee Junior Chamber of Commerce.

Each member of the Alumni Association will vote for 10 directors from the list of 15 candidates. Directors whose terms of office expire this spring are:

Harry W. Adams, '00, Beloit; Walter Alexander, '97, Milwaukee; Alfred L. Buser, '12, St. Paul, Minn.; Robert M. Connelly, '16, Appleton; Dr. James P. Dean, '11, Madison; Judge F. Ryan Duffy, '10, Milwaukee; Mrs. Lucy Rogers Hawkins, '18, Evanston, Ill.; J. W. Jackson, '00, Madison; Mrs. Hugo Kuechenmeister, '13, Thiensville; and Mrs. V. W. Meloche, '18, Madison.

Continuing directors include:

William D. Hoard, '21, Ft. Atkinson; Guy Sundt, '22, Madison; Mrs. L. D. Barney, '27, Montclair, N. J.; Mrs. Bernard Brazeau, '29, Wisconsin Rapids; H. E. Broadfoot, '17, New York; A. C. Davey, '21, La Grange, Ill.; Harold L. Geisse, '05, Wausau; Dr. H. M. Stang, '16, Eau Claire; Arthur Timm, '25, Milwaukee; Mrs. H. R. Vergeront, '06, Viroqua.

Joseph A. Cutler, '09, Milwaukee; Frank O. Holt, '07, Madison; Mrs. Marshall B. Wood, '28, Rockford, Ill.; Willard G. Aschenbrener, '21, Racine; George Ekern, '28, Chicago; Richard Ela, '28, Madison; Gordon Fox, '08, Chicago; Dr. Gunnar Gundersen, '17, La Crosse; Mrs. R. E. Krug, '37, Milwaukee; and John H. Sarles, '23, Minneapolis, Minn.

Past presidents of the Association; presidents of the Alumni Club of Chicago, Madison, and Milwaukee; and presidents of the U. W. classes of 1944, 1945, and 1946 are also members of the board of directors.

The 15 candidates for the 10 board positions open this year were selected by a nominating committee in accordance with section 2, article 4, of the constitution of the Wisconsin Alumni Association.

Members of the nominating committee were:

Ben Reynolds, '09, Madison, chairman; Ann Boegholt, Madison, '45, Walter Frautschi, '24, Madison; Ray Myers, '35, Milwaukee; and L. Frederick Hoebel, '38, Chicago.

Science Reconverts

(Continued from page 7)

PROF. ARTHUR D. HASLER of the University zoology department, who spent part of the war in Germany as a member of a government panel studying the effects of psychological warfare, is now back at peacetime pursuits, particularly an analysis of the habits of perch in Lake Mendota during the winter months which should prove a boon to ice-fishermen.

The biologist has determined that "the perch become concentrated in the deeper waters of the lake and they migrate very little to the upper strata," and that the fish school according to size groups—meaning that the size of the first fish caught will most likely indicate the size of all the fish in a particular area.
