ANNUAL MEETING OF THE BOARD OF REGENTS

Madison, Wisconsin

Saturday, June 16, 1923, 10:00 a. m.

President Kohler presiding.

PRESENT: Regents Birge, Butler, Casperson, Faast, Hirschman, Kohler, Kronshage, Nace, Seaman, Waters.

ABSENT: Regents Callahan, Gale, Horlick, Mahoney.

The Secretary reported that he had received the following messages from absent regents:

1. A letter from Regent Mahoney stating that he is ill in a LaCrosse hospital;
2. Word from Regent Horlick that he is in Europe on a business trip;
3. Word from Regent Callahan that he was absent on account of conflicting dates in connection with his work in the office of State Superintendent.

---

On motion of Regent Faast, seconded by Regent Butler, it was VOTED, That the reading of the minutes of the last meeting of the regents be dispensed with and that they stand approved as sent out to the regents.

By common consent the election of officers was postponed until the latter part of the morning session.

President Birge read a letter from the members of the family of Ex-Regent E. W. Miller.  
The letter was placed on file.

On motion of Regent Butler, seconded by Regent Hirschman, the following minute expressing the regents' grief at the death of the Honorable Edward W. Miller, regent of the University, 1920-23, was adopted; a copy to be sent to the family of Mr. Miller:

EDWARD W. MILLER graduated from the law school of the University with the class of 1907, and he was aided in his duty as regent by that knowledge of the University which belongs to one who has lived on the campus. He therefore brought to the Board during his short term as regent an unusual capacity for active and helpful counsel in university affairs. The regents greatly regretted the loss of his services in behalf of the University which was caused by his appointment to a federal office. This loss to the University has now been quickly followed by the event which brought his public service to a sudden and tragic end. He had entered upon it with all the high qualities of character and ability that had marked his whole career and his death cuts short the promise of a long period of distinguished service to his country.

---

President Birge spoke with reference to the services of Professor Susan A. Sterling and stated that she is retiring at the end of the current academic year.

Regent Butler presented the report of the

#### EXECUTIVE COMMITTEE

meeting held on June 15, 1923, copies of which were distributed to the regents.

On motion of Regent Butler, seconded by Regent Faast, it was VOTED, That the minutes of the Executive Committee meetings held April 24 and May 25, 1923, as sent out to the regents, and the minutes of the June 15, 1923, meeting, as presented, be ratified, approved, and confirmed.

# MODIFICATIONS IN THE COURSE IN COMMERCE

(As approved by the Letters and Science Faculty Meeting  
Monday, May 21, 1923)

A few changes in the Course in Commerce are  
proposed herewith which may be summarized as follows:

1. The dropping of Economics 3, 137, and 109 (second semester) from the list of courses required of all students;
2. In the case of lower group students the requirement of an additional year of English, Mathematics, History, Science or Foreign Language, and the limitation of the amount of specialized work required to two courses to be selected from specified groups.
3. The groups from which selections must be made at the beginning of the Junior year are specified and unless they conform to those printed in the Catalogue and Bulletin of the Course must be entered in advance on the student's record card.

The present requirements and the proposed changes are indicated below in detail:

Non-Professional Course in Home Economics  
( as recommended by the Faculty of the College of Agriculture.)

The Course as recommended for adoption is as follows:

The English requirement is increased from the 6 credits required in the other Home Economics majors to 8 credits, this increase being the addition of a 2-credit course, English 33, Introduction to English Literature.

The language requirements are the same as in the other Home Economics majors.

The science requirements in the course are as follows: All students must take Chemistry 1a, 5 credits. They are then given an option of taking two from the following list of courses:

Chemistry 1b, 5 credits,  
Agricultural Chemistry 3, 5 credits,  
Physics 65, 6 credits,  
Bacteriology 4, 5 credits,  
Physiology 1a, 4 credits.

If the student desires to take Agricultural Chemistry as one of these options, she must take Chemistry 1b as a prerequisite.

All students in this major must take at least 10 credits of elective work in the College of Letters and Science.

The following Home Economics courses are required for this major:

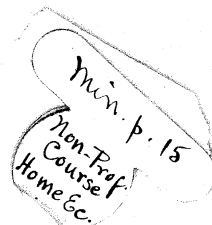

Home Economics 2, Art and Design, 3 credits,  
Home Economics 9, Introduction to Home Economics, 1 credit,  
Home Economics 3, Introduction to Food Study 3 credits,  
Home Economics 5, Introduction to Textile Study, 2 credits,  
Home Economics 7-17, House Architecture and Sanitation,  
House Architecture Laboratory, 4 credits,  
Home Economics 109, Humanics, 4 credits,  
Home Economics 110, Household Administration, 4 credits.

Total . . . . . 21 credits.

The total required work will range from 62 to 72 credits.  
This will leave 48 to 58 free electives, of which not more than 26 credits may be within the Home Economics Department.

F. B. MORRISON,  
Chairman.

## REQUIREMENTS FOR ADMISSION

High School Graduates:- Persons who are graduates of a high school or its equivalent may enter the first or second year schedule. It is advised that they take the work of the first year as a foundation for the work of the second year and extended schedule. A record of high school graduation with subjects and standings should be sent to T. L. Lewick, Director of the Short Course. A Short Course diploma may be secured by completing 32 credits of work.

Graduates of county schools of agriculture, county agricultural short courses of Wisconsin and persons from high schools who may present two or more years of agricultural instruction or others with equivalent agricultural instruction may enter the short course and receive the Short Course Diploma upon the completion of 16 credits of the extended schedule or equivalent work of the first year as the Short Course Committee may require.

Persons desiring to enter the second year and extended schedule of the Short Course should send to the Director of the Short Course their record of subjects and standings from county school, short course, high school or other courses as soon as possible after October 1, so there will be time to pass on records and plan schedule before the opening of the first term.

## PLAN OF WORK

The Short Course consists of three terms each year of five weeks each. Students may enter at the beginning of any term. The course is so planned that a definite unit of work is completed during each five-week period except in a few subjects of the second year and extended schedule. Vacation at Christmas is the same as in other courses.

All of the subjects of the first year schedule are required but the work of the second and extended schedule is entirely elective. This provides that the persons in the second year and extended schedule may select their own branches of study subject to rules of the Committee. The Short Course is so arranged that a person may attend for five, ten or fifteen weeks per year. It is planned that a Short Course Diploma be granted upon the completion of two years of work equivalent to 34 credits. Preliminary training as explained under "Requirements for Admission" may shorten this period. Parliamentary Practice and physical education are required for first two years of work. Library instruction is required in the first year schedule.

The new plan of the Short Course provides for subjects on a credit basis and for a strengthening of the Short Course instruction. The S. C. graduate may return for his third or fourth winter and select subjects of the extended schedule which he was unable to get in former years. In this way he will get much more nearly what the collegiate student gets in his full year period of instruction.

The new arrangement allows one to choose such subjects during the second year and extended schedule as will fit him for special lines of work such as herdsman, cow tester, tractor, seedsman, etc., and at the same time offer a wide selection to the student wishing a general training in practical agriculture.

The course is planned for a maximum of four subjects and parliamentary practice, physical education and library. This provides for lectures, recitations, laboratory practice and demonstrations with definite assignments for study during free periods and evenings. In the laboratories, students are given practice in such subjects as stock and grain judging, grafting, budding and pruning fruit trees, testing seeds, laying tile drains, operating farm engines, mixing rations for animals, examining of horses for soundness. Classes begin at 8 a. m. and continue until 4:30 p. m. with a noon intermission from 12 to 1:30 p. m. No classes are held on Saturday afternoon.
