8. Blind.
9. Deaf and Dumb.
10. State Prison.
11. Industrial School for Boys.

# 'ANNUAL MESSAGE 

OF

## WILLIAM E. SMITH,

GOVERNOR OF THE STATE OF WISCONSIN,

DELIVERED TO THE LEGISLATURE

IN JOINT CONVENTION, JAN. 10, $18 \% 8$.

MADISON, WIS.:
DAVID ATWOOD, PRINTER AND STEREOTYPER.
1878.

## GOVERNOR'S MESSAGE.

## Fellow Citizens of the Senate and Assembly:

I congratulate you that, for blessings conferred and evils averted, the people of Wisconsin have reason to be profoundly grateful to that Divine Providence without whose favor neither nations, states nor individuals can prosper. If neither capital nor labor have received such ample rewards as in some preceding years, yet the representatives of both in Wisconsin have been spared the expenses, the losses and the bloodshed which in so many places characterized and accompanied the discussion and settlement of the questions at issue between them. There have been no disastrous failures among our banks, insurance companies or manufacturing establishments, which affords gratifying evidence of the honesty and prudence of our people; and as a result thereof, the private business interests of the state are upon a safe foundation.

## PUBLIC FINANCES.

The reports of the Secretary of State and State Treasurer, filled with valuable information concerning public affairs, and showing the condition of the public finances will be laid before you immediately, and I refer you to them for the details in regard to the several funds.

[^0]The amount on hand September 30, 1877, is credited to the several funds as follows:
General fund ..... $\$ 6,01440$
School fund ..... 74,195 22
School fund income. ..... 14,850 92
Normal school fund ..... 45, 05684
Normal school fund income ..... 9,452 48
Draingge fund ..... 4,828 25
University fund ..... 1,567 62
Agricultural college fund ..... 1, 97570 ..... 1, 97570
Delinquent tax fund ..... 1,977 29
Deposit fund ..... , 89160
St. Croix and Lake Superior R. R. trespass fund ..... 95, 927 08 ..... 95, 927 08
St. Croix and Lake Superior R. R. deposit fund. ..... 8, 66460 ..... 8, 66460
Sturgeon Bay and Lake Michigan canal fund ..... 3,574 33
North Wisconsin R. R. aid fund
North Wisconsin R. R. aid fund ..... 1,148 36 ..... 1,148 36
Commissioners' contingent fund ..... 17378
Allotment tund ..... 96587
Total ..... \$278,264 34
GENERAL FUND.
The receipts into the general fund during the fiscal year were. $\$ 1,199,95486$Balance from previous year10,959 94
Total ..... \$1,210, 91480
Of this sum, there was derived from:
Direct state tax ..... \$735,899 15
Railroad companies ..... 380,726 26
Fire and life insurance companies ..... 47,113 46
And from miscellaneous sources ..... 36,215 99
The total disbursements from this fund have been $\$ 1,204,90040$
Of this sum there was paid for salaries and permanent appro- priations, including interest on the public debt ..... 254,548 45
Legislative expenses. ..... 522, 03717
And for miscellaneous purposes ..... 337,735 77

## TRUST FUNDS.

The condition of the several trust funds at the close of the fiscal year, was as follows:

| School fund at inte | \$2,596,361 07; on hand, | \$74, 19522 |
| :---: | :---: | :---: |
| University fund at interest | 223, 240 32; on hand, | 1,567 62 |
| Agricultural College fund at interest. | 240,791 90; on hand, | 1.97570 |
| Normal School fund at interest. | 985,681 34; on hand, | 45,056 84 |
| Total Educational fund at interest | \$4,046, 07463 ; on hand, | \$122,795 38 |

The decrease during the year in the amount at interest is $\$ 4,855.73$, and the increase in the amount on hand is $\$ 22,612.28$; a net increase of $\$ 17,756.55$.

## STATE DEBT.

The state indebtedness remains as at the close of the preceding fiscal year, and is represented by :

| Bonds outstanding | \$14, 00000 |
| :---: | :---: |
| Currency certificates | 5700 |
| Certificates of indebtedness to trust funds | 2,238,000 00 |
|  | \$2, 252,057\% 00 |

In addition to this, the Secretary of State reports the total indebtedness of the counties, cities, towns, villages and school districts in the state as amounting to $\$ 9,658,545.04$, which added to the state debt proper makes the total public indebtedness of the people of Wisconsin, $\$ 11,910,602.04$; being somewhat less than three and one-half per cent. of the total assessed valuation.

ASSESSED VALUATION.
The value of all property in the state subject to taxation as returned by the assessors is :

This is, unquestionably, not to exceed one-half of the actual market value of the same property, notwithstanding the strict provisions of law requiring assessors to attest the correctness of their reports by oath. This serious and willful disregard of law is very properly criticised by the supreme court in the late case of Schettler against The City of Fort Howard, and the disastrous consequences likely to result therefrom very clearly indicated.

There is, too, another aspect of this matter and still more humiliating, because indicative of the fact that the public conscience seems to tolierate a want of due regard to the sanctity of an oath.

Indeed, observation leads me to the conclusion that the prevailing tendency in legislation, requiring so many returns and reports of various kinds under oath, and the manner in which "oaths are too frequently administered, have done very much to beget a contempt for their solemnity, and to degrade an act which is in theory, and should be in fact, one of the most impressive ceremonies in which man can engage. I commend this matter to your careful consideration, and suggest that it would not be improper for you to provide for the discontinuance of oaths in many cases, substituting therefor returns and reports "upon honor ;" or otherwise that you make it obligatory upon all officers administering oaths to observe that due form, without which the ceremony degenerates into a farce.

## PROPERTY EXEMPT FROM TAXATION.

In connection with the general subject of assessments, I call your attention to the values of the different kinds of property exempt from taxation, reported for the year 1876, as follows :

Deducting from this amount the value of railroad, telegraph, and insurance property, which, in the form of licenses, pays what is regarded a fair proportion of taxes, and also the several items of public property, and there remains less than $\$ 6,000,000$ exempt from taxation.

TAXES.
The total tax levied in the state for the year 1876 , was $\$ 8,097$,435.00 , amounting to $\$ 2.22$ on each one hundred dollars of assessed
valuation. The purposes for which these taxes were levied, the respective amounts and rates are as follows:

| St | \$788,942 00 | . 2162 |
| :---: | :---: | :---: |
| County tax. | 1, 436, 84900 | . 3939 |
| Town tax | 3,220,417 00 | . 8829 |
| School tax | 1,617,689 00 | . 4434 |
| Road tax | 1,033,538 00 | . 2833 |

It thus appears that the direct state tax is less than one-tenth of the total tax. The entire state tax, direct and indirect, for the year 1877, is represented by the receipts into the general fund, and amounts, as before stated, to $\$ 1,199,954.86$, and is only about one-seventh of the total tax paid by the people. From this amount have been paid all the expenses of the "state, including interest on the state debt, official salaries, cost of charitable and penal institutions, legislative and miscellaneous expenditures; which shows that those entrusted with the control of state affairs have exercised reasonable economy in the discharge of their respective duties.

## ESTIMATES FOR 1879.

The Secretary of State estimates that the receipts for the calendar year, 1879, will be, from

| Railway companies. | \$400,000 00 |
| :---: | :---: |
| Insurance comparies | 60,000 00 |
| Miscellaneous sources. | 36, 50000 |
| Taxes authorized by existing laws | 164,688 36 |
| Making in all. | \$661,188 36 |

He estirnates the expenditures for the same period at $\$ 886,983.36$.
It will devolve upon you to provide for the deficiency thus exhibited, amounting to $\$ 225,795.00$, and, in addition thereto, such sum as may be necessary to provide for the publication of the new Revised Statutes, should the labor of the revisers receive legislative sanction ; and such further sums, if any, as may be appropriated during the present session in excess of the Secretary's estimates.

Many propositions will doubtless come before you involving the expenditure of considerable sums of money. These various
propositions will receive your careful consideration. The people of the state of Wisconsin will cheerfully pay all taxes necessary for the successful prosecution of the public business, the protection of life and property, and the proper care of its unfortunate and dependent classes; but they demand from you and from me that there shall be retrenchment in all lines of public expenditures where retrenchment is practicable, and a wise economy in all public disbursements. They realize that there is a parsimony which is waste, but none the less will they scrutinize and condemn any appropriation of the public money for any but the most legitimate purposes. It will be my highest privilege to co-operate with you in all efforts to meet the reasonable anticipations of the people in this behalf.

## EDUCATION.

The reports of the State Superintendent and of the Boards of Regents of the University and Normal Schools will place before you all needful statistics relative to this important branch of state polity. You will give the recommendations they make such consideration as their importance demands. The great cost and diversity of the text books used in our common schools are believed by many to be serious evils, and fall with peculiar severity upon that class of citizens least able to bear them. Coming directly from the people, and representing as you do all sections of the state, I doubt not you will be able, by a comparison of views, to perfect measures which will remove all just grounds of complaint.

The proper education of the children and youth of our state is among the most important duties of society. The state has undertaken this duty only in part and should therefore cheerfully recognize the efficient assistance rendered in this work by the many private schools, and the excellent academies, colleges and universities which receive no direct assistance from the state.

> STATE PRISON.

The number of convicts confined in the State Prison, Septem. ber 30, 1877, was 290 . The average number in confinement during the 'year was also 290. The number in confinement the
first day of January instant exceeded 330. The reports of the Warden and Directors are full and explicit upon all points of interest connected with the management of that institution. A contract has been made for the leasing of the labor of the prisoners, from which desirable results are confidently anticipated.

For the first time in the history of that institution no appropriations are requested. I urge that the recommendations embodied in the Directors' report may receive your favorable consideration, particularly those referring to the representation of Wisconsin in the International Prison Congress, at Stockholm, in August next, and the furnishing of transportation to discharged prisoners. I alsocall your attention to the request of the Warden for relief in the matter of the loss occasioned by the failure of the Corn Exchange Bank at Waupun, and the unexpected decision of the United States Circuit Court in relation thereto. Some legislation, more accurately defining the Warden's liabilities, and his relation to the public property and funds in his possession, is imperatively demanded.

I commend to your earnest consideration the remarks of the Warden, relative to the inequality of sentences, and refer you to the reports of the State Board of Charities and Reform for the year 1875,1876 and 1877, where the same subject is further discussed. The limits to which I must confine myself in this communication forbid any review of these discussions. Many very convincing reasons are urged for the total abolition of term sentences; the most experienced prison officials are becoming the advocates of this theory ; and, I believe, its early adoption in Wisconsin would conduce to the public welfare.

## INDUSTRIAL SCHOOL FOR BOYS.

The Industrial School for Boys, at Waukesha, continues to meet all reasonable anticipations. The whole number there, during the year, was 471, and the number remaining September 30, 1877, 364. The average number for the year was 341 . The expeuditures for the year amount to $\$ 46,321.31$, including $\$ 899.34$ for permanent improvements. An appropriation of $\$ 39,000.00$ is requested for the current year.

The expenditures at the Institution for the Education of the Blind have been $\$ 19,685.89$, exclusive of the amount expended for building purposes, which was $\$ 64,353.56$. The number of pupils in attendance during the year was 91 , of whom 76 were present September 30, 1877.

At the Institute for the Deaf and Dumb, the expenditures for current expenses have been $\$ 31,426.25$, the whole number of pupils in attendance during the year 180, of whom 141 were present at the close of the fiscal year. The average attendance was 155.

The report of the trustees of the Wisconsin Hospital for the Insane, near Madison, shows that there has been expended $\$ 94,823.64$ in the maintenance of 498 patients, and that it closed the year with 382 persons under treatment. The average number under treatment was 370 .

The report of the trustees of the Northern Hospital for the Insane shows that 704 patients have been cared for at a cost of $\$ 122,559.12$, and the number under treatment at the close of the year was 537 .

The reports of these several benevolent institutions will be laid before you at an early day. The suggestions and recommendations contained in them are evidently the result of much deliberation, and I doubt not will receive the consideration their importance demands.

## CHRONIC INSANE.

It is unquestionable that the condition of the chronic insane in jails and poor-houses is, in very many instances, a reproach and disgrace to our civilization. It remains for you to determine what, if anything, shall be done for their better care and maintenance. Certainly the present hospital buildings should be utilized to their utmost capacity. All questions of local or personal pride or jealousy should be ignored and only the interests of the state as a whole and the necessities of the unfortunate people for whose benefit these buildings were constructed should determine
aud direct your action. If it shall appear that the present buildings can not be made to accommodate all who need care, I trust you will not hesitate to make suitable provision for the erection of such plain, substantial and comfortable buildings as may be required for that purpose.

## STATE BOARD OF CHARITIES AND REFORM.

The gentlemen comprising the State Board of Charities and Reform have devoted very considerable time-some of them, for a series of years-to a careful study of the various perplexing questions connected with the subjects intrusted to their supervision, and in the consideration of the matter of providing for the chronic insane, as well as all other subjects connected with the administration of the several penal and charitable institutions, you will doubtless derive very material assistance from their forthcoming instructive report.

## STATE BOARD OF HEALTH.

It cannot have escaped your notice, as citizens of Wisconsin, that the members of the State Board of Health have been active during the past year in the discharge of their appropriate duties, thereby approving themselves public benefactors. I am advised that the report of this Board, among other things, will recommend legislation looking to more complete returns of vital statistics and to the publication of a larger edition of its annual reports. Concurring in these recommendations, I solicit for them your favorable consideration.

GEOLOGICAL SURVEY.
The geological survey of the state has been prosecuted with very satisfactory results during the year. The second volume of the final reports has been published, and reflects great credit upon all engaged in its production, from the explorer in the field to the engravers and printers from whose hands the book and accompanying atlas of maps have been received.

In August last, Professor Moses Strong, assistant geologist, was
accidentally drowned in the Wisconsin river while in the prosecution of his official duties. His death was not alone a sad affliction to his family and immediate friends, but a great loss to the state. It would be in accordance with the precedents in similar cases, and a proper public recognition of his services, for the legislature to provide for the payment of his salary to his family, from the time of his death to the end of the year for which he had been appointed.

## FISH CULTURE.

The fourth annual report of the Commissioners of Fisheries abounds in interesting information relative to this branch of useful industry. With very moderate expenditures the commission is stocking our lakes and rivers with different varieties of fish, and we may reasonably anticipate ample returnsin due time. The Commissioners ask for an appropriation of $\$ 8,000$, to enable them to carry on their work to September 30, 1879.

## JUDICIAL CIRCUITS.

The report of the commissioners appointed to investigate as to the relative amount of labor required of the several circuit judges, and to ascertain what changes, if any, are desirable in the formation of the several judicial circuits, will be made directly to the legislature. It cannot be expected, therefore, that I should review or criticize the work of this commission. I assume that its members have performed their labor with conscientious thoroughness. I esteem the reports of all similar commissions as great aids to judicious legislation, and do not doubt that this report will receive proper consideration.

## REVISION OF STATUTES.

The completed labors of the learned gentlemen appointed to revise our statutes will be presented to you at an early day. The eminent ability of these gentlemen, and the zeal and thoroughness with which they have devoted themselves to the work, render it quite certain that the revision, as it comes from their hands, will be as nearly perfect as it is possible for such a work to be.

I therefore trust that all propositions to modify and change it will be carefully scrutinized and adopted only after the most mature consideration.

## STATE HISTORICAL SOCIETY.

It is with great pleasure that I comply with a request of the State Historical Society, and lay before you a summary of its opertions for the past year. The additions to its library number 1,818 volumes, and 5,090 pamphlets and documents, making the total present number of volumes, 36,957 ; of pamphlets and documents, 40,107 . Of this number 2,904 are bound newspaper files. The receipts into the general fund were $\$ 5,044.25$, and the expenditures $\$ 4,997.81$. The additions to the binding fund were $\$ 795.10$, making the total of that fund $\$ 5,595.51$, besides 640 acres of land in Texas, the gift of the late Hon. John Catlin.

## INSURANCE SUPERVISION.

The Secretary of State calls attention to the extent and variety of the duties required of that officer, and it is quite manifest that the time has arrived when the public good requires that he shall be in some manner relieved. Various methods have been suggested for effecting this result; among them a constitutional amendinent creating the office of Auditor of Public Accounts. I am constrained to doubt the expediency of thus changing the constitution. In my judgment, changes in our fundamental law should be made only in cases of extreme necessity, and a multiplication of offices should be studiously avoided as long as possible. I, therefore, recommend that the duties of Commissioner of Insurance be transferred from the Secretary of State to the Railroad Commissioner. I see no reason why the last named officer may not have ample time to attend to them without in the least neglecting the duties now devolving upon him, and that, too, without any considerable extra expense for clerk hire or office outfit.

> RAILROADS.

The report of the Railroad Commissioner is not yet published,
and I am, therefore, without information as to the details of the work of that officer for the past year. It has not come to my knowledge that any serious complaints have been made against any of the railway companies doing business in this state. It is now conclusively settled that the state has the right to regulate railroads and the managers of these great arteries of trade and commerce seem to be using their best endeavors to give the least possible occasion for the state to exercise this right.

## MILITIA.

There has been expended during the past fiscal year for military purposes, the sum of $\$ 8,267.00$, and of this amount $\$ 5,400.00$ was paid to the state militia for rent of armories, being at the rate of $\$ 300$ to each company. I consider a well regulated and properly disciplined militia as very essential for the protection of life and property. I therefore believe that the formation of military companies, and their organization into regiments and brigades should be sedulously encouraged ; that when thus organized they should be furnished with the best of modern arms, and required to meet for drill and inspection.

I sincerely hope the day may never come when the civil authorities in Wisconsin will be obliged to call for military assistance, but should that day arrive most deplorable consequences might result, if there were not a well disciplined and properly armed militia to respond to such a call. I therefore bespeak your earnest cooperation in this matter.

SUPREME COURT.
The adoption of the constitutional amendment increasing the number of Associate Justices of the Supreme Court, will impose upon you the duty of providing for their election and classification It has been suggested to me, also, that with this increase in the number of Justices, the present accommodations for this court will be quite too limited. If upon proper inquiry you find such to be the case, I trust you will not neglect to provide the necessary additional room.

The work of connecting the waters of Green Bay and Lake Michigan by a ship canal, and thereby very materially decreasing the distance between the principal ports on Green Bay and the ports on Lake Michigan, as well as creating a much needed and most available harbor of refuge, has been carried forward with energy during the past year. Already more than one-half of the entire work is completed, and the engineer in charge assures me that the remaining portion will be finished within two years.

## FEEBLE MINDED AND IMBECILE.

The last legislature directed the State Board of Charities and Reform to make certain investigations in regard to the necessity and practicability of providing for the education of the feeble minded. The result of their labors will be laid before you. The state has undertaken to provide for the blind, the deaf, the incorrigible and the insane, and no good reason appears for neglecting the feeble minded and the imbecile. Other states are meeting with very gratifying success in their endeavors to educate this class of unfortunates, and their experience should encourage us to take up this work as soon as possible. The necessity for immediate action in this direction is not so urgent in my judgment as in the case of the chronic insane, but at no distant day suitable provision should be made in their behalf.

## PRODUCTIVE INDUSTRIES.

The "facts and figures" herewith submitted may well impress upon our minds enlarged conceptions of the grave responsibilities to which we have been called by the suffrages of our fellow citizens. We have been accustomed to regard Wisconsin as only a growing state. [t is more than that - it is a great state. Its financial, educational, penal and charitable affairs involve the annual collection and disbursement of millions of dollars of money; the support and care of thousands of schools; the detection and punishment of a long list of criminals; and the furnishing of food,
shelter, clothing, instruction and medical attendance for the destitute, the unfortunate and the afflicted.

These are indeed noble themes upon which to dwell, calculated to arouse and maintain a well founded state pride, and indicative of a healthy, vigorous and self-perpetuating civilization. Contemplating them, we should not forget, however, that it is to the productive industries, to the agriculturist, the manufacturer and the miner, their allies and assistants, that we are most largely indebted for what we are, and that our principal reliance under God is upon them for continued prosperity and development as a state. Whatever tends, therefore, to the enlargement of these industries and to the protection of the persons engaged in them should re ceive your encouragement and support.

As contributing to the promotion of these ends, I recommend that suitable provision be made for the collection and publication of full and accurate statistics in relation to all the great interests of the state, especially those connected with agriculture, which is, and for many years must continue to be, the most important industry of the state, not only as furnishing employment to the greatest number of individuals, and utilizing in the aggregate the largest amount of capital, but upon its success depends very largely the success of all other industries. Whatever, therefore, the state can do in disseminating information in regard to the results of improved processes in agriculture, and to the relative profits derived from the different branches of this industry, it is not only proper but important that it should do. The State Agricultural Society was organized to assist in the accomplishment of these purposes, and has rendered most efficient service in this direction. To enable it to continue its work in the future, I recom mend that the usual appropriation be continued and made permanent.

## THE CURRENCY.

Intimately connected with state no less than with national prosperity is the matter of a sound and stable currency. It is the language of one of our most gifted and profound statesmen that "a disordered currency is one of the greatest political evils. It undermines the virtues necessary for the support of the social
system and encourages propensities destructive to its happiness. It wars against industry, frugality and economy, and it fosters the evil spirits of extravagance and speculation. Of all the contrivances for cheating the laboring classes of mankind none has been more effectual than that which deludes them with paper. money. This is the most effectual of invertions to fertilize the rich man's field by the sweat of the poor man's brow. Ordinary tyranny, oppression, excessive taxation-these bear lightly on the happiness of the mass of the community compared with fraudulent currencies and the robberies committed by depreciated paper. Our own history has recorded for our instruction enough and more than enough of the demoralizing tendency, the injustice and the intolerable oppression on the virtuous and well disposed, of a degraded paper currency, authorizd by law or any way countenanced by government."

The road to a resumption of specie payments may be rough, but there are no sloughs therein, and now that we have so nearly reached the desired goal, every backward step must he regarded a public calamity. I do not, however, share in the opinion which seems to obtain with some, that the remonetization of silver will be a backward step. Silver may very properly and very honestly be used for coinage, and if the present ratio with gold is not sufficient to insure the harmonious circulation of both metals, let the ratio be increased.

The wise statesman seeks to find new markets and additional uses for all the productions of his country, because thereby profit accrues to the citizen, and the country is benefited. The United States is the great silver-producing nation of the world. Every legitimate use to which silver can be applied enhances its value, and to that extent adds to the wealth of the nation. Its use as money is both legitimate and practicable; the only conditions being that the relative values of silver and gold be duly preserved in the coinage, and that the profits of coinage, if any, be reserved to the government.

## SAVINGS BANKS.

Economy and industry are reciprocal virtues, so that one can-2-Gov. Mess.
not thrive unless accompanied by the other. Savings banks, conveniently located. and honestly and efficiently managed, have hitherto been most powerful agents to engender habits of thrift, affording, as they do, reason ble assurance of safety for deposits, and a moderate income therefrom. Such institutions cannot. however, be made self-supporting, except in the cities and larger villages, and, therefore, a large proportion of our people are denied the benefits to be derived therefrom. The disastrous failures among savings banks in some of our sister states, during the past year, have furnished too convincing evidence that they are not always managed with that care and honesty without which they are not entitled to coufitence.

I am, therefore, inclined to look with great favor upon the proposition to organize postal savings banks, and in connection therewith to issue a series of United States bonds of such denominations and with such provision for distribution and redemption that people of limited means may, if they desire, invest their surplus earnings in government securities. It is impossible to overestimate the value of a system which shall furnish to all citizens convenient opportunity to deposit even small savings with assurance of absolute safety and some increase,-independent of the incidental advantage of distributing a further portion of our public indebtedness among our own people.

## PRESIDENTIAL ELECTIONS.

During the year just closed, republican institutions and the permanency of our government were subjected to new and unexpected trials. For the first time in our history, the question as to who was legally elected President wa left in great uncertainty. The political campaign had been one of unexampled activity and enthusiasm, and it should occasion no surprise that men formed opinions and were governed more by prejudice than reason. The experiences of other nations under somewhat similar circumstances were well calculated to inspire grave concern in the minds of all reflecting men. It was therefore not without reason that the action of Congress in organizing the Electoral Commission was hailed by the great majority of the patriotic citizens as a
beneficent deliverance from great peril. They felt that it was vastly important that some settlement should be had under the forms of law, which all good citizens could accept and recognize as conclusive. A decision was rendered, and it became the duty of every citizen to accept it and abide thereby. Any attempt, therefore, to throw discredit upon the decision made or to impugn the motives or integrity of any of the eminent gentlemen com posing that tribunal tends to weaken the public respect for law, and should be unreservedly discountenanced.

No little uneasiness is felt in regard to the possibility of a recurrence of circumstances similar to those which necessitated the appointment of the Electoral Commission, and I doubt not you will agree with me in the expression of the opinion that it is the imperative duty of Congress to provide such methods of procedure for conducting future presidential elections as will allow the will of the people to be both freely and fairly expressed at the ballot box, and, as thus expressed, ascertained with certainty and without a suspicion of fear, favor, or hope of reward.

## CONCLUSION.

I should be doing myself injustice to close this communication without an expression of my earnest conviction that the President of the United States, with the purest and highest motives, is striving to execute the high trusts committed to him in the interests of the whole people, and that in the efforts he has made for the pacification of the south, the correction of abuses in the civil service, and a return to a stable currency, he is peculiarly entitled to the generous and discriminating confidence of his fellow citizens.

Yielding to no man in devotion to the party of my choice, I nevertheless most heartily subscribe to the maxim that he serves his party best who serves his country best. Guided by the spirit of this maxim, which is only less applicable in state than in national affairs, your labor here, as legislators, cannot be otherwise than pleasant to yourselves and satisfactory to your constituents. Guided by it, my constant purpose will be to co-operate with you to advance and protect all the varied interests of Wisconsin and her people.

WILLIAM E. SMITH.
Madison, January 10, 1878.

# ANNUAL REPORT <br> OF THE <br> SECRETARY OF STATE, <br> OF THE <br> STATE OF WISCONSIN, <br> FOR THE 

FISCAL YEAR ENDING SEPTEMBER 30, 1877.

> Office of the Secretary of State, Madison, October $10,18 \% \%$

To His Excellency, Harrison Ludington, Governor of the State of Wisconsin:

Sir: In compliance with the requirements of law, I have the honor to submit the annual report of the Secretary of State for the year ending September 30, 187\%, embracing statements and tabular exhibits of the receipts and expenditures of the state during the past fiscal year, with such other information as the law authorizes or requires to have included in such report.

On September 30, 1876, the total balance in the state treasury was $\$ 315,866.61$.

The total balance on September 30, 18 ${ }^{\prime \prime} 7$, was $\$ 278,264.34$.
The condition of each fund is shown in the statements herewith submitted.

The receipts and disbursements for the fiscal year just ended, including the balances on hand from the preceding year, were as follows:

1-Sec. St.
[Doc. 1.]

|  | Tota | \$1,500,000 | \$14,000 |  |

As seen by the foregoing table, there has been no change in the state debt during the last year.

## SCHOOL FUND.

The school fund is composed of -

1. Proceeds of sales of land granted by the United States for the support of schools.
2. Moneys accruing from forfeiture or escheat, and penalties for trespass on school lands.
3. All fines collected in the several counties for breaches of penal laws.
4. All moneys paid as an exemption from military duty; and
5. Five per cent. on sale of government lands.

## SCHOOL FUND.

| RECEIPTS. |  |  |
| :---: | :---: | :---: |
| Sales of land. | \$3,807 07 |  |

| Balance September 30, 1876. | 38,580 13 | 74,195 22 |
|  | \$119,399 36 | \$119,399 36 |

The amounts of the productive school fund on the 30th days of September, $18 \% 6$ and $18 \% \%$, respectively, were as follows:

|  | 1876. | 1877. |
| :---: | :---: | :---: |
| Amount due on certificates of sales. | \$428,936 07 | \$403,323 98 |
| Amount due on loans.............. | 259,161 99 | 239, 33709 |
| Certificates of indebtedness | 1,559,700 00 | 1,559,700 00 |
| United States bonds. | 43,00000 | 43,000 00 |
| Milwaukee city bonds. | 175,00000 | -65,000 00 |
| Iowa county loan.. | r',500 00 | 5,000 00 |
| City of Madison load.. | 45,000 00 | 40,000 00 |
| City and town of Miner | 12,500 00 | 12,500 00 |
| Clark county loan.. | 25,000 00 | 20,000 00 |
| Wood county loan |  | 38,500 00 |
|  | \$2,625,798 06 | \$2,596,361 07 |

Taking into account the balances in the treasury at the close of each year, the increase is $\$ 6,178.10$.

## SCHOOL FUND INCOME.

The interest received on School Fund investments and on the principal due for sales of school lands, constitute the School Fund income. The amount of this income is annually certified by the Secretary of State to the Superintendent of Public Instrnction, and by him apportioned to the several counties of the state in the manner provided by law.

| RECEIPTS. |  |  |

## NORMAL SCHOOL FUND.

This fund consists of the proceeds of the sales of land set apart for the support of Normal Schools, by the provisions of chapter 537 of the general laws of 1865 .

The amount of productive Normal School Fund on the 30th day of September, 1876, and 18\%\%, respectively, was as follows:

|  |
| :--- | :--- | ---: | ---: |

Showing an increase of $\$ 21,764$.

## NORMAL SCHOOL FUND INCOME.

The following statement exhibits the various sources from which this income was received during the past year, and the disbursements therefrom:

The following is a statetment of the amounts at interest belonging to each of the trust funds at the close of the fiscal year.

| School Fund | \$2,596,361 07 |
| :---: | :---: |
| University Fund | 223,240 32 |
| Agricultural College Frend | 240,79190 |
| Normal School Fund | 985,681 34 |
| Total | \$4,046,074 63 |

## DRAINAGE FUND.

This fund consists of the proceeds of the sale of lands set apart as drainage lands, by virtue of chapter 537 , laws of 1865 , the amount of which is to be annaally apportioned to the several counties in which such lands lie, in prcportion to the amount of sales in each county, respectively.

|  |  | 1,97\% $9 \ddot{9} 9$ |
|  | \$26, 747746 | \$26,74746 |

## DEPOSIT ACCOUNT.

On the sale of land forfeited to the state, and the payment of the amount due the state, and all costs and penalties accrued, if any balance remain, the amount of such balance is deposited in the state treasury, to the credit of the person entitled thereto, and is denominated the Deposit Account.

## COMMISSIONERS' CONTINGENT FUND.

The legislatures of 1860 and 1861 made appropriations amounting to one thousand and fifty dollars, for the purpose of defraying the expenses referred to in the acts making the appropriations. This was the origin of the Commissioners' Contingent Fund. Since that time, certain fees collected in the land office for miscellaneous services have been placed to the credit of this fund. The original appropriations having been exhausted, the balance on hand was transferred to the general fund at the close of the fiscal year ending September 30, $18{ }^{74} 4$.

It has, however, been thought advisable to reopen the account, so as to show receipts and expenditures incident thereto.

| RECEIPTS. |  |  |

## CLERK HIRE.

Statement showing the names of the clerks employed in the office of Secretary of State, for the year ending September 30, 187\%, with the amount paid each, and the particular service rendered by each.

CLERKS IN OFFICE OF SECRETARY OF STATE.

Peter Doyle, being duly sworn, says that the foregoing list contains the names of all the clerks employed in the office of the Secretary of State during the year ending September 30, 1877, as he verily believes; and that the amount was actually paid to each clerk as stated.

PETER DOYLE,
Secretary of State.
Subscribed and sworn to before me this 10th day of October, 1877.
S. CADWALLADER,

Notary Public, Wis.

## STATE TAX.

The following statement shows the amount of state tax for the year 187\%, and also the estimates for deficiencies authorized by chapter 153, general laws of 1869:

1. State tax provided iy chapter 254, laws of $1877 \ldots \ldots \ldots \ldots$........ $\$ 263,87500$
2. Interest on certificates of indebtedness and state bonds.

157,53000
3. Interest on School Fund as per chapter 79, general laws of 1866

7,088 36
4. Annual appropriation to University of Wisconsin, as per
chapter 117, laws of 1876.......................................... 42,35962
5. Estimated deficiency for last quarter of 1877. 84,058 15
$\$ 554,91113$
The above deficiency was estimated as follows:

1. Salaries of judges and state officers for last quarter of 1877, $\$ 21,80000$
2. Appropriations to state institutions, and other appropriations remaining unpaid, exclusive of the amount provided for by the legislature, as per Senate Journal, page 437.

40,40000
3. Clerk hire, postage, gas, labor about capital, revising statutes
and incidental expenses for last quarter of 1877
33,872 55
$\$ 96,07255$

| Less balance in General Fund ..................... | \$6,014 40 |  |
| :---: | :---: | :---: |
| Estimated receipts for last quarter of 1877.......... | 6,000 00 | 12,014 40 |
|  |  | \$84,058 15 |

There has also been levied, in addition to the foregoing State tax, the following amounts for the purposes stated, in accordance with existing laws:
P incipal and interest on loan to Clark county, chapter 197, laws of 1876
$\$ 6,40000$
Principal and interest on loan to Iowa county, chapter 186, laws of 1874

28,400 00
Principal and interest on loan to city and town of Mineral Point, chapter 128, laws of 1875

7,800 00
Principal and interest on loan to town of Pine Valley, chapter 76 , laws of 1877

80171
Principal and interest on loan to Racine county, chapter 107, laws of 1876

6,494 69
Interest on loan to Wood county, chapter 144, laws of $1876 . .$.

47, 927 90
Due from counties on state tax of 1876
$821 \quad 12$

## ESTIMATES OF REVENUES AND EXPENDITURES.

For the Year Commencing January 1, 1879.
In defining the duties of the secretary of state as auditor, the law provides, among other things, that he shall annually submit with his report, a detailed estimate of expenditures to be defrayed from the treasury for the ensuing year, specifying each object of expenditure; that he shall distinguish between such as are provided for by permanent or temporary appropriations, and such as are required to be provided for by law; and that he shall also make estimates showing the sources from which such expenditures are to be defrayed.
Chapter 5 of the revised statutes provides that where the word year is used it shall be construed to mean a calendar year unless ctherwise expressed, and hence, for several years past, the estimates have been made for the calendar and not for the fiscal year.

Estimates of receipts and disbursements for the year commencing January 1, 18\%8, were submitted in the last report of this office. These were reviewed by the last legislature, and a tax based on the estimates then adopted was authorized to be levied, being of such an amount as it appeared would, with the receipts from other sources, be sufficient to defray the expenditures for the year named. These estimates, as revised, will be found on page $43 \%$ of the Senate Journal for 18\%\%.

In addition to this tax, there was levied by this office under the provisions of chapter 153, general laws of 1869 , the sum of $\$ 84,062$. 15. This tax was, on the second Monday of the present month, apportioned among the various counties, and certified to the county clerks in pursuance of the requirements of law, and will be paid into the state treasury in the months of January and February next.

The estimates given below are, therefore, for the year commencing January 1, $18 \% 9$.
Relative to these estimates, it may be remarked that while it is not easy to determine with any great degree of accuracy the amounts that may be needed for some of the purposes stated, owing to the fact that such estimates are made so long in advance of the time to which they are applicable, yet, as they are intended mainly to be only a guide for legislative action, they may answer a useful purpose in this regard.

The accuracy of the estimates will, of course, depend largely on the action of the next legislature in making appropriations; but as there will be ample opportunity for a review of such estimates by the legislature before any tax based thereon is levied, any change which circumstances may require, or which legislative action may render necessary, can easily be made.

Estimates of Expenditures, etc.- continued.

It is believed that the foregoing estimates will be sufficient for the purposes indicated, and that the amounts given will be sufficient for the general expenses of the state, should no circumstance arise rendering extraordinary appropriations necessary.
It has not been thought best to include any estimate of the amount that may be required to pay for the publication of the revision of the statutes now being made, and which will doubtless be submitted at the next session of the legislature, as there will be ample opportunity for legislative consideration of the subject at the proper time, and the condition of the matter is not now sufficiently definite to justify an estimate of the sum that may be needed for that purpose.
An item of $\$ 7,000$ is given as an estimate of the expense relative to the artificial propagation of fish. The appropriations for this purpose thus far have been $\$ 360$ in $18 \% 4$; $\$ 2,000$ in 1875 ; $\$ 10,000$ in $18 \% 6$; and $\$ 8,000$ in $187 \%$. It is thought that the amount named
above will be sufficient for the year for which these estimates are made.

Chapter 366, laws of 1876 , appropriates annually $\$ 3,000$, or such portion thereof as may be thought necessary by the state board of health, to pay the salary of the secretary of said board, and meet contingent and other expenses. The total amount is given in the estimates, it being thought that it is not more than will be necessary for the purposes stated.

Chapter 330, laws of 1875, provides that each military company or battery, complying with the conditions named in said act, shall be entitled to the sum of three hundred dollars per annum, and limits the number of said companies to twenty-four. The sum of $\$ 7,200$ is given in the estimates to cover the expenditure authorized by this act, as it is probable that the entire amount allowed will be needed.

Chapter 323, laws of 1875, provides for giving aid to high schools complying with the conditions prescribed in said act. The amount paid for this purpose for $18 \% 6$ was nearly $\$ 8,000$. As such payments are not made until on or after the 1st day of December, the amount for the present year can not be given. The sum which it is thought will be necessary in 1879 , will be found in the estimates.

Section 1, chapter 49, general laws of 18\%0, provided for the admission to the Normal schools of the state, of pupils of the Soldiers' Orphans' Home, on the conditions set forth in the act. This was amended by chapter $1 \kappa 1$, general laws of $18 \% 2$, to which acts reference is made. Chapter 72, laws of 1874 , made provision for the care of inmates of the Home in private families and private orphan asylums. The sum of $\$ 2,500$ is given in the estimates to meet the expenses arising from these acts.

Chapter 11\%, laws of $18 \% 6$, provides that there shall be levied and collected annually a tax of one-tenth of a mill on each dollar of taxable property in the state, and that the amount so collected shall form a part of the university fund income. The sum to be levied will therefore vary according to the assessment and equalization of the property of the state. The amount levied the present year was $\$ 42,359.02$. As another equalization of the value of property will be made in May next, the amount to be levied in $18 \% 8$ will doubtless be different from the foregoing, and it is hoped will be considerably in excess of it.

In 1875, the sum of eighty thousand dollars was appropriated for
the purpose of building a hall for scientific purposes, in connection with the University. The sum of twenty-five thousand dollars of this amount was levied and collected in 1875, and the balance in 18\%6. The hall was completed in June of the present year. It does not appear probable, therefore, that there will be any extraordinary appropriations necessary for University purposes during the coming year. This matter will, however, doubtless be referred to at length in the annual report of the Board of Regents.
It is not thought that appropriations to any of the existing state institutions will be needed for building purposes, and hence the estimates include only the amounts which it is believed will be necessary to defray current expenses. In making estimates for the two Insane Asylums and the Industrial School for Boys, the amounts to be received from counties under the provisions of chapter 176 , general laws of 1872 , and chapter 66 , general laws of $18 \% 0$, have been taken into account. The amounts certified the present year under these laws have been as follows: For Northern Hospital for the Insane, $\$ 47,92 \% .90$; Wisconsin State Hospital, $\$ 35,003.75$; Industrial School for Boys, $\$ 10,194.50$.

In 18\%6, the legislature provided by joint resolution No. 13, for an examination of the matter of providing a suitable institution for the better care and maintenance of the incurable insane. The commission appointed agreed on the necessity of having such an institution as early as practicable, but no definite action on the subject has yet been taken by the legislature. It is believed, however, that such action can hardly fail to result in making provision for the purpose indicated, and this will, of course, require an appropriation. No estimate is given of the amount that may be needed; as there will be ample opportunity for a consideration of the matter by the legislature before the estimates herein submitted will be needed as a basis for legislative action.

The report of the State Board of Charities and Reform, which is not required to be made until December, will doubtless contain much information relative to the various state institutions, which can not be obtained at this early date. The reports of the various local boards will also be valuable in the same way.

Estimates for other purposes have been carefully made, and in doing so, past expenditures, existing laws, and other circumstances have been duly considered. .

It is believed that the estimates of revenues are reasonably accurate, and that the amounts to be derived from the various sources indicated will not differ materially from the sums herein stated, should there be no change in the legislation now relating to such revenues.

## STATE PRINTING.

In the last report of this office, reference was made to the fact that in June, 18\%6, a contract for doing the state printing for $18 \% \%$ and 1878 was entered into with Messrs. Carpenter \& Tenney, they having been the lowest bidders for doing such printing.
The execution of this contract was commenced on the first day of January of the present year. After having done the work for a few months, the contractors made an arrangement with David Atwood, by which he was to continue the performance of said contract. This has been done up to the present time.

The contract has been a very advantageous one for the state, the rates being unusually low. It is not deemed necessary, however, to elaborate this subject here, the matter being referred to in the report of the commissioners of printing, which is given herein in appendix "N."

## ASSESSMENT OF PROPERTY FOR TAXATION.

As a compilation of the Assessment laws, with suitable forms and instructions has been published annually, and distributed among town and county officers, it is not deemed necessary to refer at length in this report to the existing laws relative to the snbject of taxation. Nor is it thought advisable to attempt a general examination of the matter of assessment, or of the principles that underlie it, the matter being one that has from time to time ${ }_{A}$ received the careful consideration of the legislature.
Little more will be done, therefore, than to refer to the official action of this office during the past year, under the laws of the state, with such incidental reference to the laws as may appear to be necessary to a correct understanding of the subject.
Chapter 235 of the general laws of $18 \% 3$, provides that the secretary of state, state treasurer, and attorney general, shall constitute a state board of assessment, and also prescribes that said
board shall meet on the third Wednesday in May, biennially. The first meeting of the board was held in May, 1874, as prescribed by statute, and the total equalized value of property in the state for $18 \% 4$ and $18 \% 5$ was determined.

The next meeting was held May 17, 1876, and the valuation for $18 \% 6$ and $187 \%$ was determined on. This will be found in the proper place in the appendix. The state tax for the present year was apportioned on this valuation, and the amount to be levied on each county was duly certified to the county clerk thereof in accordance with the provisions of chapter 94 of the general laws of $18 \% 1$.

By chapter 106, general laws of 1869 , it is provided that it shall be the duty of the assessor or assessors of each town, ward or city, respectively in this state, to ascertain and set down, at the time of making the annual assessment for each year, in separate columns prepared for that purpose, on the assessment roll, the number and value of the items of personal property named in said act, owned by each such person, which value shall be the true cash value, and shall constitute the assessed valuation of the several items of property therein described. It is also provided that each county clerk, immediately upon the receipt of such statements, shall make an abstract of the same and forward it to the office of the secretary of state on or before the second Monday in September.

Chapter ${ }^{7} 9$, laws of $18 \% 5$, provides that whenever any town, village or city clerk shall fail in any year to return to the county clerk, within the time fixed by law, the statement required by the law of 1869 , it shall be the duty of the county clerk of the county to send a messenger to such town, village or city so delinquent, to procure the statement required by said act; and that said messenger shall be entitled to a compensation of three dollars per day, and to a traveling fee of ten cents for each mile necessarily traveled in the discharge of such duty, to be paid from the county treasury, and charged to the town, city or village so delinquent. The act also provides that whenever the county clerk of any county shall fail to discharge the duty required by said chapter 106, before the second Monday in October in any year, it shall be the duty of the Secretary of State to dispatch a messenger to such county to procure the statistics so required, and said messenger shall also be entitled to a compensation of three doliars per day and ten cents per mile for actual travel in the discharge of such duty, to be paid from
the state treasury and be made a special tax against such county, such tax to be collected and returned in the same manner that other state taxes are collected and paid into the state treasury.

Under the operation of these acts returns have been received from all of the counties of the state, and a condensed statement of the information contained therein will be found in Appendix "C."

The arerage values of the principal items of property returned are as follows: Horses, $\$ 38.4^{4}$ each; mules and asses, $\$ 41.20$; neat cattle, $\$ 10.93$; sheep and lambs, $\$ 1.46$; swine, $\$ 2.56$. The average value of farming lands, as shown by these abstracts of assessment is $\$ 7.35$ per acre.

By the returns made to this office by registers of deeds, under chapter 210 , laws of 1873 , as amended, it appears that the average value of real estate sold was $\$ 14.53$ per acre. The average assessed value of the same lands, according to the same returns, was $\$ 6.7^{17}$ per acre. The average value of village and city lots sold was $\$ 55 \% .94$; and the average assessed value of the same $\$ 300.21$.

The following table exhibits the total valuation of personal property and real estate for the past six years, according to such abstracts; and also the number, total valuation and average value of the different classes of property for the years 1876 and 187\%:

| Years. | Personal property. | Real Estate. |  |
| :---: | :---: | :---: | :---: |
|  |  | City and village lots. | Lands. |

The unquestionable fact that the property of the state is in general valued too low by assessors, and also the circumstance that a considerable portion of property, not exempt by existing laws, appears to escape taxation entirely, have been frequently referred to in the reports of this office. It must be said, however, that the matter is one respecting which it is much easier to find fault, than to devise a ruasonably perfect remedy. The law, in theory, seems to be as complete as can be expected, and the difficulty lies almost wholly in its execution. The result, however, undoubtedly is that the burdens of taxation are not as equally distributed on a property basis as would be desirable. Whether a practicable remedy can be devised that will prevent this, is a question that has more than once oncupied the attention of the legislature within a few years past, and yet the difficulty does not appear to have been satisfactorily solved.

It would seem that any further legislative action that may be needed relative to the matter should be mainly of such a character as to secure a reasonably strict compliance with the provisions of existing laws on the subject. The whole matter is one well worthy of careful legislative consideration.

And in connection with this brief article on assessment, it is deemed proper to add the recommendation that the laws of the state exempting certain property from taxation be so amended as to provide for the exemption of the implements of mechanics and laboring men to a certain amount. This would seem to be only fair and reasonable in view of other exemptions made, and of the circumstance too that a large amount of personal property belonging to those much better able to pay taxes than the classes referred to, unquestionably escape taxation through the impracticability which appears to exist, of securing a full and strict compliance with the assessment laws.

The report of last year contains a statement of all property exempt from taxation in the state. This was obtained under the provisions of chapter 183, Laws of 1875 , which act is not in force the present year having expired by its own limitation. The object of the law appears to have been accomplished in securing full returns relative to such property.

## RAILROADS.

The general railroad law of the state—Chapter 119, Laws of $18 \% 2$ - provides that every railway company shall make an annual report to the stockholders, of its operations during the year ending on the 31st day of December, which report, it is provided, shall be verified by the affidavit of the secretary, treasurer and superintendent of the corporation. It is also provided that a copy of such report shall be filed in the office of the secretary of state. This act was passed prior to the passage of the law providing for the appointment of railway commissioners. It is believed that since the passage of the latter act, and its amendments, there has been no real necessity for requiring a report to be made to this office, and that it would be best to repeal the provision relating to such report, thus leaving the entire matter under the supervision of the railway commissioner.

As said commissioner prepares and publishes an annual report relative to rallway matters, it is not deemed necessary to publish herein anything not essential to a strict compliance with the law. For this purpose tabulated statements are given, which will be found in appendix "D."

The following railroad companies have been incorporated according to the provisions of the law referred to, since the date of the last report from this office:

Beef River Valley Railroad Company.
Fond du Lac, Wausau and Lake Superior Railway Company.
Forest Home Railroad Company.
A summary compiled from the reports of the present year is as follows:

Length of roads operated in Wisconsin, miles ......... .... 2,671 56
Paid up capital stock ............................................ $991,353,68896$
Total cost of road and equipments............................... . 177, 949,567 70

| Total. | \$24;075,649 84 |

## STATISTICS OF TAXES.

Each town, city and village clerk in the state, is required by chapter 150, general laws of $18 \%$, to make out and transmit annually to the county clerk of his county, a statement showing separately the taxes levied therein, and the purposes for which the same were levied. It is also, by the same chapter, made the duty of the county clerk to transmit an abstract of the same to the secretary of state on or before the first day of January next after having received such statement from city, town and village clerks. The same law also requires the secretary of state to make a condensed statement of the abstracts thus received, and include the same in his annual report.

According to the provisions of chapter 43, laws of $18 \% 4$, if any town clerk fails to make the returns referred to, it becomes the duty of the county clerk to send a messenger to procure them at the expense of the town ; and if any county clerk fails to send the abstract required to be sent by him, it becomes the duty of the secretary of state to send a messenger to procure the same at the expense of the county. Chapter 54, laws of $18 \% 6$, is substantially a reënactment of chapter 43 , laws of $18 \% 4$, with the additional provision that all costs and expenses incurred by county clerks in obtaining these returns shall be paid back into the town, city or village treasury by the delinquent clerk, or be deducted from his salary by the proper treasurer ; and that all costs and expenses incurred by the secretary of state in procuring said returns from counties, shall be paid back into the county treasury by the county clerk, or be in like manner deducted from his salary by the treasurer of the county. 3-SEC. St.
[Doc. 1.]

Under the operation of these laws, returns have been received from all the counties in the state.

The total tax levied in the state for the year 1876, was, according to these returns, $\$ 8,097,435.00$. The aggregate of local valuation, as shown by the same returns was, $\$ 364,729,328.00$. The rate of taxation was therefore 2.22 on the dollar. For detailed information see appendix "E."

The total amount of taxes levied, and the purposes for which the various town and county taxes were collected, are shown in the following tables:

AMOUNT OF TAXES LEVIED, ETC.

| PURPOSES FOR WHICH TAXES WERE LEVIED. | Amount of Tax. | Per Cent. |
| :---: | :---: | :---: |
| State tax. | \$788, 942 | . 2162 |
| County tax. | 1,435,849 | . 3939 |
| County school tax. | 297, 437 | . 0815 |
| Town taxes .... . . | 3,220,417 | . 8829 |
| School district taxes | 1,320,252 | . 3619 |
| Road district taxes. | 1,033,538 | . 2833 |
| Total | \$8, 097,435 | 2.2197 |

## STATISTICS OF INDEBTEDNESS.

Each county, town, city and village clerk in the state is required by chapter 110 , general laws of $18 \% 2$, to make a statement, whenever requested to do so by the secretary of state, showing fully and completely the financial condition of such county, town city or village; giving the bonded indebtedness thereof and the purposes for which the same was incurred, together with the accrued interest thereon remaining unpaid, and all other forms of indebtedness. Tho practice under this provision has been to require such returns annually. The information contained in these statements will be found in appendix " $F$."

The indebtedness of cities, towns, villages and school districts is shown by the following statement:

## BONDED INDEBTEDNESS.

| Railroad aid. | 6089 32 |
| :---: | :---: |
| Roads and bridges. | 108,663 97 |
| Other purposes. | 193,655 88 |
| Interest unpaid. | 176, 59901 |
| All other indebtedness | 2,854,200 14 |
| Indebtedness of school districts. | 249,905 25 |
| Total indebtendess. | \$6,720,013 58 |

## INDEBTEDNESS OF COUNTIES.

| Railroad aid. | \$2,067\%,455 78 |
| :---: | :---: |
| Roads and bridges | 11,721 80 |
| Interest unpaid. | 96, 37600 |
| Other purposes. | 634,921 37 |
| Total bonded indebtedness | \$2,810, 47495 |
| All other indebtedness. | 128,056 51 |
| Total indebtedness. | \$2,938,531 46 |

Returns have been received from all of the counties in the state, and show an aggregate indebtedness of $\$ 9,6 \% 1,459.56$. The returns last year showed an aggregate of $\$ 13,27 \%, 379.79$. The real indebtedness in $18 \% 6$, was, however, only $\$ 10,696,078.34$, the city debt of Milwaukee having been by mistake included in the return of county indebtedness, as well as in that of the city.

## AGRICULTURAL STATISTICS.

Chapter 38, laws of 1874 , provided, that it should be the duty of each assessor in the state, at the time of making the annual assessment of property, to ascertain the whole number of acres of wheat, oats, corn, barley, rye, hops and tobacco then growing in his town, and to make duplicate certificates thereof, one of which he was required to file in the office of the clerk of the town; and it was made his duty to forward the other to the county clerk of his county on or before the first day of July of the year in which such certificates were made.

By the same act, the county clerk was required to forward to the secretary of state on or before the fifteenth of July, a certificate showing the aggregate number of acres of each of said products in his county, as ascertained and compiled from the certificates of the assessors.

By chapter 224, laws of 187\%, section 1, the foregoing act was amended so as to read as follows :
"It shall be the duty of the assessors of each town in this state, at the time of making the annual assessment of property, to ascertain the whole number of acres of each kind of farm products and timber, to-wit : wheat, corn, oats, barley, rye, flax seed, the number of bushels of clover seed, cultivated grasses, potatoes, roots, apples, cultivated cranberries, hops, tobacco, and timber, then growing in his town, and make duplicate certificates thereof, one of which he shall file in the office of the town clerk of his town, and the other with the clerk of the board of supervisors of his county, on or before the first day of July of the same year."

It will be noticed that the requirements are not very plain. The views respecting the act entertained by this office will appear from the following extract taken from the instructions prepared for assessors, and published with the last compilation of the assessment laws:
"The meaning of some portions of the amendatory act is not very clear, but assessors should comply as nearly as possible with its requirements. While the phraseology used is to some extent inaccurate, it is believed that the intention was to have the number of acres given of the various products, except clover seed, where the number of bushels is required. The blank to be used by assessors has been prepared in accordance with this view. It is true, indeed, that the words ' number of bushels,' as used in the act, appear to apply to other enumerated articles as well as clover
seed, and in strictness of language these words do so apply. The impracticability, however, of determining in bushels the quantity of some of the products named, relative to which, in this view of the case, the words are used, leads to the conclusion that these words must be limited to the one item of clover seed, to which they immediately relate, and that only the number of acres of other products is to be given.

An amendment to the law, making its provisions more accurate and harmonious, will doubtless be adopted at the next session of the legislature."

Details of returns received will be found in appendix "G."
The following statement shows the aggregates of returns received under the provision of the foregoing laws since 18\%4:

| Article. | 1874. | 1875. | 1876. | 1877. |
| :---: | :---: | :---: | :---: | :---: |
| Wheat | 1, 794,919 | 1,539, 008 | 1,612,932 | 1,445,650 |
| Oats. | 700,121 | 766,343 | 909,153 | 854, 861 |
| Corn | 713,517 | 866,081 | 840,882 | 1,025,801 |
| Barley. | 98, 471 | 117, 020 | 187, 423 | 183,030 |
| Rye . | 83,628 | 92,286 | - 128,935 | 175, 314 |
| Hops | 8, 051 | 9,720 | 10.932 | 11,184 |

| Timber |  |  |  | 4, 0900,226 |
| Clover Seed (No. Bush.). |  |  |  | 76,945 |

## AGRICULTURAL SOCIETIES.

In view of the interest that attaches to these societies, and the fact that the state has frequently aided them by appropriations, it is thought proper to give, in connection with a reference to the returns made by county societies, a brief history of the legislation on the subject, and to refer to the State Agricultural Society, and to the Northern Wisconsin Agricultural and Mechanical Association, to such an extent as the space proper to be occupied in this report will permit.

The first step towards the formation of an association for the advancement of agricultural interests was taken in 1846. Very little, however, was accomplished. In 1851 the matter was again
revived, and the Wisconsin State Agricultural Society was organized.

Chapter 402, gereral laws of 1852 , appropriated to the society the sum of $\$ 500$, to be expended in the manner provided in said act.

Chapter 5, general laws 1853, declared said society a body corporate, and prescribed its rights and duties.

Chapter 70, general laws of the same year made an annual appropriation of $\$ 1,000$ to said society, to continue until such time as the legislature should otherwise direct.

Chapter 40, general laws of 1854 , increased the appropriation to $\$ 3,000$ annually.

The laws in force on the subject at the time of the adoption of the revision of 1858 , became chapter 80 of the revised statutes. This chapter was repealed by chapter 14 of the extra session of 1862, and it does not appear that from this time until $18 \% 3$, the society received any direct appropriation from the state.

Chapter ${ }^{7} 4$, laws of 1868 , made provision for the publication of the society's transactions, and the publications made since that time have been at the expense of the state. The present law on the subject is chapter 243 , laws of $18 \% 4$.

Chapters 90 of 1873,324 of $18 \% 4,159$ of 1875,86 of $18 \% 6$, and 243 of $187 \%$, appropriate each two thousand dollars to the society, and the law of $18 \% 5$ provided for furnishing stationery upon the order of the secretary.

The Northern Wisconsin Agricultural and Mechanical Association was incorporated by chapter 413, private and local laws of 18\%1, but seems to have received no direct aid from the state until 18\%5. By chapter 102 of the laws of that year an appropriation of one thousand dollars was made in its favor. Chapter 226, laws of 1876, provided for printing annually the transactions of the society, and chapter 208, laws of $187 \%$, appropriated to it one thousand dollars.

Chapter '74, general laws of 1856, provided for the organization of county societies, and the payment to each of $\$ 100$ annually on its complying with the requirements of law.
This act was repealed in 1858, and chapter 53 of that year, relating to the same subject, was enacted.

The last named act, as amended by chapter 38 , general laws of 1859 , and chapter $\&$, general laws of 1861 , is still in force, and it is
provided by these acts that all societies complying with the prescribed conditions shall be entitled to one hundred dollars each, payable out of the state treasury.

Chapter 164, general laws of $186 \%$, provides for sending to this office the names of the officers of county agricultural societies.

Chapter 309, laws of 18\%5, makes an annual appropriation of one hundred dollars to each industrial society holding an annual fair and complying with the other conditions prescribed in the act. It limits also the number of such societies.

Chapter 95, general laws of $18 \% 0$, exempts from taxation the property of agricultural associations described in said act.

The total number of county agricultural societies and industrial associations which reported to this office for 18\%5, was 53 ; for $18 \% 6,47$.

For details, reference is made to appendix "I."
The aggregate receipts and disbursements, as shown by last reports, were as follows:

## REAL ESTATE SOLD.

By the provisions of chapter 210, laws of 1873 , as amended by chapter 311 , laws of $18 \% 4$, all registers of deeds in the state are required to make out and transmit to the secretary of state, on or before the first day of September in each year, a short detailed statement, in tabular form, of all sales of real estate made and recorded in their respective counties during the preceding year, showing the
date of the conveyance, the description of the land sold, the consideration stated in the deed, and the assessed value of the property as shown by the last assessment roll.

It is also provided in the same act, that the secratary of state shall compile the information obtained from such statements for the use of the state board of assessors, and that he may, if he thinks proper to do so, include a condensed statement of the same in his annual report. Returns having been received from all the counties, such condensed statement has been prepared for this report, and is given in appendix " H ."

In the returns of real estate sold, made to this office by county clerks, the assessed valuation was often omitted or obscurely written. In other instances the considerations in deeds were not accurately stated. In still others the number of acres was not given. In all such cases, as in those of quit-claim and tax-titles, the descriptions have been wholly omitted in order to secure truthful averages of assessed valuation and consideration per acre. The table given in appendix " H." will, therefore, to this extent, fall short of showing the whole amount of land actually sold in each county during the fiscal year.

## MARRIAGES, BIRTHS AND DEATHS.

The total number of marriages, births and deaths reported to this office for the year ending December 31, 18\%6, was as follows:

| Marriages | 9,548 |
| :---: | :---: |
| Births. | 6,556 |
| Deaths | 1,180 |

Reports were received from every county in the state excepting Douglas, but many of them were manifestly incomplete. A detailed statement of them is given in appendix "K." This subject will be referred to under the heading of State Board of Health and Vital Statistics.

## ELECTIONS.

Tabular statements are given in appendix "M." showing the whole number of votes cast at the general election held on the 7th
day of November, A. D. 1876, for electors of president and vicepresident of the United States, for members of congress for the several congressional districts in the state, and for and against amending the constitution of the state in relation to savings banks.

Appendix "M." also shows the number of votes cast on the 3d day of April, A. D. 187\%, for associate justice of the supreme court of the state to succeed William P. Lyon, whose present term will expire on the first Monday in January, 1878, and for judges in the first and eighth judicial circuits of the state, to succeed John T. Wentworth in the first circuit, whose present term will expire on the first Monday in January, 18\%8, and to fill a vacancy in the eighth circuit, caused by the resignation of Judge H. L. Humphreys.

In the year 1876, a compilation of the election laws of the state with suitable forms and instructions was prepared in accordance with the provisions of chapter 243, laws of 1874 , and distributed among town and county officers. This was the first compilation made since 1868, and it was thought that no other would be needed until after the completion of the revision of the statutes, which was then being prepared.

The passage, however, by the legislature of $18 \% \%$, of chapter 264, providing for the registration of electors, repealing previous registry laws, and requiring the secretary of state to cause the, law referred to, with the general election laws of the state, to be printed in pamphlet form, with suitable forms and instructions, made it necessary to print another compilation, which was distributed among the proper local officers.

## CORPORATIONS AND RELIGIOUS SOCIETIES.

A list of corporations organized under the general laws of the state, during the year ending September 30, 18\%7, and the date of incorporation, together with a list of the religious societies organized within the same time, are given in appendix "L."

STATE BOARD OF HEALTH AND VITAL STATISTICS.
Chapter 366, laws of 1876 , entitled "An act to establish a state board of health, to provide for the appointment of a superintendent
of vital statistics, and to assign certain duties to local boards of health," provided among other things, that the governor, with the advice and consent of the senate, should appoint seven persons, to constitute a state board of health and vital statistics, and prescribed the terms of office of the members of the board. It also specifically prescribed the duties of such board so to be appointed.

In accordance with the provisions of that act, the governor, on the 26th day of May, 1876, appointed the members of the board. These were named in the last report of this office. The term of Dr. O. G. Selden having expired on the 31st day of January, of the present year, Dr. Geo. F. Witter, of Grand Rapids, was appointed as a member.

As the general proceedings of this board are required to be published annually, in a report to be made to the legislature, it is not deemed necessary to refer to its action in this report any further than may be necessary to show what has been done by this office under the provisions of the law above referred to, and which imposed some duties on the office in connection with the general subject to which the law relates.

Section 9 of the act provided that the secretary of the state board of health should be the superintendent of vital statistics, and that under the general direction of the secretary of state, it should be his duty to collect statistics and publish the report required by law relating to births, deaths and marriages.

Chapter 110, of the revised statutes, and amendatory acts, provided for making returns of such statistics to this office, but, as set forth in the various annual reports, it was in general found impracticable to secure a strict compliance with the provisions of law by some local officers and others, on whom devolved the duties of collecting and returning such statistics.

About the end of October last, the board of health issued a circular addressed to the members of the medical profession in the state, urging the importance of attention to the duties prescribed by law in the matter of making returns relative to births and deaths, and on the 1 st of November, of the same year, the following circular on the subject was issued from this office :

## State of Wisconsin, Secretary's Office, Madison, November 1, $18 \% 6$.

## To Physicians, Clergymen, Justices of the Peace and all others

 concerned:The recent passage of a law providing for a State Board of Health, and the entrance of that board upon its duties, which include a study of the vital statistics of the state, seem to make it an appropriate time at which to call your attention to the provisions of chapter 110 of the revised statutes, and amendatory acts, which provide for the collection of such statistics.

These acts require that physicians shall make a report or return to the register of deeds of their respective counties, of all births or deaths occurring in their practice, and in like manner require a report from clergymen, justices and others, of all marriages solemnized by them.

It is the purpose of the law to obtain by means of these returns such records as will be of the highest value, both for sanitary and legal purposes, and it is hoped that you will so appreciate the importance of these objects as to render faithful compliance with its provisions.

Blanks on which to make these returns have been prepared by this office and distributed to the registers of the several counties, from whom you can at any time obtain a sufficient supply, without cost. On these blanks, a sample of which is herewith sent, will be found extracts from the law, which fully explain the duties to be performed thereunder.

As the value of these reports depends to a great extent upon their completeness, you will please fill every blank where it is possible to do so, and also see that names of persons are written plainly and spelled correctly.

Very respectfully,

## PETER DOYLE, Secretary of State.

The returns since received have been more complete, and yet it would seem that additional legislation is needed to secure such a full compliance with the requirements of existing laws on the subject, that these returns may answer the purpose contemplated by the acts requiring them.

As this is, however, a subject that will doubtless receive the careful consideration of the State Board of Health, it is not thought proper or necessary to dwell on it here.

Section 6 of the act creating the Board provides that the sum of three thousand dollars, or so much thereof as may be deemed necessary by said Board, is annually appropriated to pay the salary of the secretary, meet the contingent expenses of his office and of the Board, and all costs for printing.

Under this provision the question arose as to whether the amount
named should cover the expense of printing the annual report report required to be made by said board to the legislature, in January of each year. After a careful examination of the matter, and the opinion of the attorney general having been obtained on the subject, the conclusion was arrived at that it would be proper to treat the report of the board as one coming under the provisions of the general printing law of the state.

The present members of the board are as follows:
Term Expires.
H. P. Strong, M. D., Beloit. . . . . . . . . . . . . . . . . . . . . January 31, 1878
J. T. Reeve, M. D., Appleton.............. . . . . . . . . January 31, 1879

Gen. James Bintliff, Janesville. .......... . ......... January 31, 1880
Solon Marks, M. D., Milwaukee.................... . . January 31, 1881
John Faville, M. D., Madison........................ . January 31, 1882
E. L. Griffin, M. D., Fond du Lac. .................. . January 31, 1883

Geo. F. Witter, M. D...................... . ..... January 31, 1884
For further information on this subject reference is made to the annual report of the State Board of Health.

## GEOLOGICAL SURVEY.

Chapter 292, laws of 1873 , provided for making a geological survey of the state. It was provided that such survey should be completed within four years from the commencement thereof, and an appropriation was made of thirteen thousand dolla1s per year until its completion.

It was also provided that the chief geologist should each year report to the governor the progress and result of the survey, and that when completed he should make a final report, including the result of the entire survey, accompanied by such drawings and topographical maps as might be necessary to illustrate the same, and by a single geological map showing by colors and other appropriate means, the stratification of rocks, the localities of beds of mineral deposits, and the character and extent of the different formations.

Chapter 171, laws of 1874 , made it the duty of the secretary of state to cause the manuscript of the report of the geological survey, which had then been submitted to the governor, to be bound in convenient form for reference, and provided that it should then be kept in the vaults of this office when not in use.

In 1875 there was no legislation on the subject.
Chapter 121, laws of 1876 , authorized the printing of twenty-five hundred copies of the complete report, and made the necessary provision for such printing.

The same act authorized the chief geologist in the preparation of his final report, to collate the general geology and the leading facts and principles, relating to the material resources of the state, together with practical suggestions as to the methods of detecting and utilizing the same, so as to constitute the material for a volume suited to the wants of explorers, miners, land owners, and manufacturers, and suitable for the schools of the state, and for those not familiar with the principles of geology. And it was provided that said volume should be written in clear, plain language, with explanations of technical terms, and properly illustrated with maps and diagrams, and that it should be so arranged as to constitute a key to the more perfect understanding of the whole report.

The same act directed that the reports for the years $1873,18 \% 4$ and 1875 , should be placed in the hands of the chief geologist, to be used in the preparation of his final report.

The act provided also that all the printing should be under the supervision of the chief geologist, and an appropriation not exceeding twenty-five thousand dollars, was made for the purpose of carrying into effect its provisions, of which sum it was provided that not more than twelve thousand should be drawn from the treasury in $18 \% 6$.

In accordance with the terms of said act a contract was made on the 10th day of October, $18 \% 6$, by the commissioners of printing, on behalf of the state, with Atwood \& Culver, of this city, and Seifert, Gugler \& Co., of Milwaukee, for the printing of Volume II of the final report, and the preparation of all maps and engravings necessary therefor. A reference to the general terms of this contract will be found in the last report of this office.
The work contracted for is about completed, and will be delivered within a very short time. The volume provided for in section 1 , of the act of $18 \% 6$, will then receive attention.

Chapter 36, of the laws of $18 \% \%$, amended the act of $18 \% 3$, by extending the time for completing the survey to five years, instead of four, as named in the original law. This act also increased the appropriation, by extending the time, the law of $18 \% 3$ having ap-
propriated thirteen thousand dollars a year, to continue until the completion of the survey, as already stated. It may be added that of the last thirteen thousand dollars, only four thousand had been drawn up to the end of the fiscal year.

For some general views relative to the plan of publishing the work, reference is made to the last annual report of the chief geologist.

## BANKS.

Chapter 200, private and local laws of 1867 , incorporated the Fond du Lac County Savings Institution. By chapter 42, laws of 18\%3, the name was changed to "Savings Bank of Fond du Lac."

The act of incorporation provided for making a verified report to this office on the first Monday of October in each year, setting forth the condition of the bank on the morning of that day. In view of the distrust that has to some extent existed relative to savings banks, it has been thought advisable to publish such report in full. It will be found in appendix " O." The report of the Whitewater Savings Institution, made to the governor, in pursuance of the requirements of section 10, of chapter 75, of the Revised Statute, is also published in the same appendix. In $18 \% 6$ a general act relative to the incorporation of savings banks and savings societies was passed, and submitted to the voters of the state at the next general election thereafter, when it was approved by them.

And here it may not be out of place to suggest that the matter of securing a more direct supervision of such banks, by state authority, than that which now exists, may be worthy of legislative attention.

## INSURANCE.

In the insurance report of this office for the present year, published in July, reference was made to the fact that an examination of the affairs of the Northwestern Mutual Life Insurance Company would be commenced about the 1st of August following.

The examination was commenced on that day, and was participated in by the departments of Massachusetts, New York, Illinois and Maryland, as well as by this department.

The subject of insurance and its supervision having been referred
to at some length in the insurance report, it is not deemed necessary to add anything here to what was then said. It is thought advisable, however, to publish in full the report of the examination of the company named, its condition being a matter of general importance to the people of the state. In this connection, it need only be said that the views relative to the company, set forth in the insurance report, were fully substantiated by the examination.

## The Northwestern Mutual Life Insurance Co. and its Officiat Examination.

## Milwaukee, September 1, 18\%\%.

Hon. H. L. Palmer, President.

SIR:-In the long and disastrous depression of commercial and industrial interests, with its inevitable entailment of financial embarrassment and loss, and its wide-spread depreciation of equity and cash values so seriously affecting every section of the country, it was not to be expected that the business of life insurance would escape the trying ordeal.

The very magnitude of its interests, the varied character of its trusts, and their vital relation to the peace and prosperity of millions of people, to say nothing of the many unfortunate breaches of good faith and integrity in their observance, have necessarily involved its management in more or less of public criticism and distrust. But, fortunately, the latter contingency has prompted greater vigilance and more economic methods of administration, while the standards of solvency and safety have been subjected to a censorship in all respects more thorough, exacting and circumstantial. Irrespective of existing financial emergencies, however, the sifting process of this regime are as justly and properly applicable to the strong and solvent as to the weak and worthless. And besides, most of the life insurance companies throughout the country have been already brought to its tests, and within a few months at farthest the remainder will have passed examination. Hence, the official examination of the Northwestern Mutual Life Insurance Company, initiated by the Insurance Department of Maryland, and participated in, on invitation of the managers of the company, by those of Wisconsin, Massachusetts, Illinois and New York, may be as welcome and reassuring to its members and policy holders, as it is satisfactory to those immediately engaged in eliminating the results communicated in this report.

The character and extent of the company's large volume of business, the nature and condition of its investments and other important trusts, involving direct fiscal relations with the people of more than half the states of the Union, the notable fact that its affairs have never till now been officially investigated by any insurance department or state authority, together with the unsettled condition of life insurance and the prevailing distrust in its security
as a great public resource and benefaction, were among the very potent reasons for this examination. To its managers, who have sought and desired the most searching investigation, many thanks are due for the promptness and courtesy with which they have contributed every needed facility for its successful accomplishment.

The assets admitted and the liabilities computed by us, the latter including the company's premium reserve, have been made up to July 1st of the present year, and will be found in sufficient detail in the following statement:

ASSETS.

LOANS, BONDS, REAL ESTATE, ETC.
The investments of the company in loans on mortgages on real estate amount to $\$ 11,546,404.52$, being nearly two-thirds of its to
tal assets. The examination of this item develops the most vigilant care and faithfulness in determining the validity of titles and the certainty of first liens on the property, as preliminary to the placing of loans. The margin of security appears in every instance to have been largely in excess of that required by the insurance laws of the different states, being in the aggregate nearly four times greater than the whole amount thus loaned.

But in view of the present depreciated value of real estate, and the existing distrust in the solvency of life insurance companies, the Examining Commission have caused a re-valuation of all the real estate on which the company has placed its loans. This revaluation has been made entirely independent of the company or its managers, by competent and experienced appraisers appointed by the commission in each of the seventeen states in which the loans are distributed. Under this new appraisement the value of the property except in very rare cases, is found to be double or more than double the amount of loans thereon, the gross being $\$ 34,254,-$ 405.00 , or very nearly three times the amount of such loans.

An examination of the company's books discloses the fact that, as a rule, the interest on these loans has been paid with great promptness, and that in cases of default the mortgage has gone to foreclosure. The accrued interest accounts in this and other departments have been carefully computed, and the results appear in the statement of assets.

The bonds owned by the company have been examined and verified at market rates as of July 1, 187\%. These amount in all to $\$ 810,420.00$.

The company's real estate is the building and land which it occupies in the city of Milwaukee. This has been valued by the commission upon the best information accessible at the sum of $\$ 250,000$, the same value as fixed by the company, which is nearly $\$ 75,000$ less than its original cost.

An item of 'Special Real Estate' purchased under foreclosure has been valued by the commission in the same manner, and by the same parties who appraised the real estate mortgaged to the company. The valuation of this class of property amounts to $\$ 490$,683.00.

PREMIUM NOTES, OUTSTANDING AND DEFERRED PREMIUMS, ETC.
It will be seen that the premium notes now held by the company amounting• to $\$ 3,536,965.94$, constitute about one-fifth of its entire assets. Prior to $18{ }^{\prime \prime}$, the company accepted somewhat more than one-third of its premiums in that class of securities. These notes have been personally examined and verified, and have been found in every instance to appertain to policies actually in force, and are therefore a secure and valid asset both as against the policies themselves and their computed premium reserves.

In this connection the company's loans on policies in force have been invariably found to cover only a limited portion of the reserve in each case, and are therefore equally secure.

It is also found that all premium notes with accrued interest, 4-SEc. St.
if any, thereon, are deducted from policy claims when the latter become payable, such usage being of itself an additional guaranty of the represented value of the notes, as also of the observance of good faith towards all the members of the company.

The outstanding and deferred premium accounts have been examined, item by item, and their correctness fully verified. It is proper to add that no instance appears in which the reserve on any policy is not largely in excess of the premium notes, deferred premiums and accrued interest, when the latter occur; nor is it believed that the notes are in any case in excess of what the company computes as a fair surrender value.

## PREMIUM RESERVE, SURPLUS, DIVIDENDS, ETC.

The net premium reserve, computed by the actuaries' table of mortality with interest at four per cent., on policies in force June 30th, amounts to $\$ 15,296,249$, or about six times the current yearly premium income. As this reserve and other assets of the company are invested at an annual average interest of about eight per cent., the surplus interest beyond the $\$ 612,000$ required on a four per cent. reserve, this being the standard followed by the company, will probably aggregate for the present year nearly or quite $\$ 800,000$. On a four and a half per cent. reserve, the standard of Maryland, Wisconsin, New York, Pennsylvania, Ohio, and many other states, the surplus will be measurably increased, showing a total as regards policy holders of about $\$ 1,100,000.00$ more than the exacting valuation here reported - a fact which will probably receive due consideration by policy-holders resident in those states.

After making all proper allowances for depreciation in values and excluding every assest of questionable worth, the company's present surplus, as regards policy holders, is $\$ 2,88 \%, 285.62$ over a four per cent. reserve; and on a four and a half per cent. reserve, such surplus would be increased to about $\$ 3,987,285.62$ - an amount which very conclusively exhibits its financial status and ability.

Nearly half of the snrplus is annually set apart to be distributed as return premiums or dividends to policy-holders. In consideration of the many possible contingencies liable to occur in any year, such as unusual mortality, unexpected losses, reduction of income, etc., the division of surplus seems to have been as liberal as prudence and equity would warrant - the dividends actually paid on individual policies appearing to be unusually large.

The number of policies in force at the date named was 35.959 ; covering an aggregate risk of $\$ 66,832,062$. The premium reserve on these policies has been so carefully computed under our direction by experienced actuaries, not connected with the company, that there can be no question as to its accuracy.

As a matter of information, it may be proper to state here, that in July, 1875, this company assumed the risks of the Minnesota Mutual Life Insurance Company, amounting to $\$ 1,400,000$, on some twelve hundred lives. Every policy-holder included in this arrangement assented thereto, and every policy so assumed has been valued as of age and date of issue, and its original conditions and all
rights accruing in connection therewith have been faithfully observed.

INCOMES, EXPENDITURES, ETC,

The gross income of the company for the first six months of the current year was $\$ 1,729,379$, the average annual amount for the last five years having been $\$ 3,914,568$. About five-eighths of the present income accrues from premium receipts, and the balance from interest and rents. As indicating the character of the company's investments and the large interest thereon, it may be mentioned that the interest receipts have been much more than sufficient to pay its death losses and working expenditure for several years past.

A little more than one-tenth of the annual income is absorbed in the working expenditure of the company. With the very moderate compensation paid to agents, and the absolute ownership by the company of forty-one per cent. of its business, on which commissions have been extinguished, the cost of collection is reduced to a minimum ratio. The compensation of agents, including traveling expenses, as well as commissions and salaries, amounts to about eight per cent. of the premium receipts, the commissions alone averaging but a fraction over six and a half per cent. These percentages include old and new business. But the ratio of the entire working expenditure of the company to its gross income shows a higher figure, the increase accruing largely from the wide distribution of its loans, judiciously placed, as we think, in comparatively small amounts, for greater security and more profitable investment, the expenses of travel and examination being thereby greatly enhanced.

A careful examination of the company's books and accounts, covering a period of six or seven years, has shown that only reasonable salaries are paid to its officers. and employes, and that no officer receives, directly or indirectly, any compensation whatever, contingent on the business done, or by way of commission on surplus, or in any other manner than by fixed salary established annually by the board of trustees.

## CONCLUSION.

It is due the company to state that its books and accounts. in every part of its business show a degree of accuracy not easily surpassed. In the actuarial department, the record books: and all details of account could not be more satisfactorily kept. The system of accountability and accuracy throughout finds unqualified approval.

Jesse K. Hines, Insurance Commissioner for Maryland. Peter Doyle, Sec'y of State, and e-xofficio Com. of Ins. of Wisconsin.
S. M. Rhodes, Insurance Commissioner of Massachusetts.

John F. Smyth, Superintendent of Insurance of New York. T. B. Needles, Aud'r P. A., and ex-officio Ins. Commissioner of Illinois.

It may be said here that during the present year personal examinations have been made of the affairs of all insurance companies organized by or under the laws of the state, and which transact a general business. Reference to the examination of Fire and Marine companies will be found in the insurance report.

And in connection with the subject of instrance it may not be out of place to refer to the passage of chapter 341, laws of $18 \% 6$, which will take effect on the first Monday of January next. By the provisions of this act, all fees received at this office, including those received from insurance companies, are payable into the state treasury. This does not seem to interfere with the provisions of chapter 56 , gensral laws of $18 \%$, creating the insurance department, except that, under its operation, necessary insurance expenses, within the limits prescribed by said act of 1870 , are to be paid from the state treasury in the same manner and under the same provisions of law which relate to the payment of other expenses connected with the office of secretary of state, and that no part of such expense can be paid directly from this office, as was allowable under the previous law.

Some general views relative to the insurance legislation of 18\%\%, and the action of this department in accordance therewith, will be found in the insurance report, page 27 , et seq.

## PUBLIC LANDS.

During the past two or three years many enquiries have been addressed to this office relative to the public lands granted to this state by the United States, and the use to which such lands have been applied. It is therefore thought proper to give in this report a brief history of the matter. To do more than this and give details would, it is thought, require more space than it is proper to occupy in the report of this office. Hence nothing more has been intended than to give a few essential facts, with such incidental references as may be of assistance to those who may desire to make a full examination of the subject.

The principal grants have been for educational, railway, military road and canal purposes, and these will be referred to in their order, together with the disposition made of the same by the state. Other grants for specific purposes will also be briefly noticed.

The proceeds of the sale of lands granted for educational purposes form separate funds, which are under the general supervision of the commissioners of school and university lands, such proceeds being invested by them in accordance with the laws of the state, and the income from such investments is applied for the purpose of education, as required by law. An explanation of these funds will therefore necessarily include a reference to the lands from the sales of which such funds are mainly formed, and hence the matter will be treated of in that order.

## TRUST FUNDS.

The principal trust funds of the state now under the supervision of the commissioners are: The School Fund, University Fund, Normal School Fund, Agricultural College Fund and Drainage Fund, all of these, except the last, being used to advance educational interests. These funds embrace all that arise in whole or in part from the sale of public lands in which the state has a direct and permanent interest. The St. Croix and Lake Superior Railway Trespass Fund, is briefly explained at the proper place.

## SCHOOL FUND.

This fund will be fully explained by reference to the following provisions of the constitution and laws of the state. Section two of article ten of the constitution provides as follows:
"The proceeds of all lands that have been or hereafter may be granted by the United States to this state for educational purposes (except the lands heretofore granted for the purposes of a university) and all moneys and the clear proceeds of all property that may accrue to the state by forfeiture or escheat, and all moneys which may be paid as an equivalent for exemption from military duty, and the clear proceeds of all fines collected in the several counties of any breach of the penal laws, and all moneys arising from any grant to the state where the purposes of such grant are not specified, and the five hundred thousand acres of land to which the state is entitled by the provisions of an act of congress, entitled, ' an act to appropriate the proceeds of the sale of public lands and to grant pre-emption rights, approved the fourth day of September, one thousand eight hundred and forty-one, and also the five per centum of the net proceeds of the public lands to which the state shall be-
come entitled on her admission into the union (if congress shall consent to such appropriation of the two grants last mentioned) shall be set apart as a separate fund, to be called the school fund, the interest of which, and all other revenues derived from the school lands, shall be exclusively applied to the following objects, to wit:
" 1 . To the support and maintenance of common schools in each district, and the purchase of suitable libraries and apparatus therefor;" and,
$\because 2$. The residue shall be appropriated to the support and maintenance of academies and normal schools and suitable libraries and apparatus therefor."

The lands of which the proceeds constitute this fund are the sixteenth section of each town in the state, and the five hundred thousand acre tract above referred to, and which was granted in 1841. To this there was added, by section seven of chapter 125 , laws of 1856 , seventy-five per cent. of the proceeds of the sales of the swamp and overflowcd lands, after deducting the expenses incident to the sale, and all of the purchase money of the lands selected by or under authority of this state in lieu of swamp and overflowed lands sold or otherwise disposed of by the United States since the passage of the act approved September $28,1850$.

In 185\%, twenty-five per cent. of the proceeds of the sale of swamp lands, which, under the act of 1856 , formed a part of the School Fund, was transferred to the Normal School Fund, and by chapter 67 of the general laws of 1858 , fifty per cent. of the proceeds of such sales was set apart for a drainage fund, thus leaving only twenty-five per cent. for the School Fund.

In 1865, this remaining twenty-five per cent. was transferred to the Normal School Fund, it being provided, however, that the School Fund should be credited with one-fourth of the income of the former fund until the income of the latter should reach the sum of two hundred thousand dollars. This latter provision was, however, repealed by chapter 29 of the general laws of 1870 .

The foregoing are the sources from which the School Fund has been formed. The present amount of such fund is $\$ 2,596,361.0 \%$.

In addition to this there is levied annually on the taxable property of the state, in accordance with the provisions of chapter ${ }^{7} 9$, general laws of 1866 , the sum of $\$ 7,088.66$, being seven per cent. on $\$ 101,262,33$, the amount of the five per cent. fund which was withheld by the United States government in its settlement with this state, as a set off to an equal amount for which the the territory
of Wisconsin became responsible on account of the Rock river canal lands, which will be explained hereafter.

The total number of acres of land received under the provision above referred to was about $1,460,000$, and the number of acres still unsold is $214,914.61$.

For more detailed information, reference is made to the annual reports of the commissioners of school and university lands.

## UNIVERSITY FUND.

Section 6, article 10, of the constitution of the state, is as follows:
"Provision shall be made by law for the establishment of a State University, at or near the seat of state government, and for connecting with the same, from time to time, such colleges in different parts of the state as the interests of education may require. The proceeds of all lands that have been or may hereafter be granted by the United States to the state for the support of a university, shall be and remain a perpetual fund to be called the "University Fund," the interest of which shall be appropriated to the support of the State University, and no sectarian instruction shall be allowed in such university."

By an act of congress approved June 12, 1838, there was granted to Wisconsin for the support of a university, two entire townships of land, in all seventy-two sections; and by section 7 of an act entitled "An act to enable the people of Wisconsin territory to form a constitution and state government, and for the admission of such state into the Union," approved August 6, 1846, there was granted all salt springs, not exceeding twelve in number, with six sections of land adjoining. By an act approved December 12, 1852, congress granted to the state, in lieu of the latter grant, seventy-two sections, making in the aggregate one hundred and forty-four sections, or about 92,160 acres of land.

The proceeds of the sale of this land has formed the University Fund. The amount of such fund at ihe present time is $\$ 223,240.32$. The number of acres of land still unsold is $4,36 \% .16$.

Though not strictly within the scope of this artice, it may be proper to state here that chapter 82 , general laws of 1867 , appropriated annually for ten years thereafter the sum of seven thousand three hundred and three dollars and seventy-six cents to form a part of the University Fund income; and that chapter 100, general laws of $18 \% 2$, made an annual appropriation of ten thousand dollars
for the same purpose. Both of these acts were repealed by chapter $11 \%$, laws of $18 \% 6$, which provides that there shall be annually levied a tax of one-tenth of a mill on each dollar of taxable property of the state, the tax so levied to form, when collected, a part of the University Fund income. The amount of this tax the present year is $\$ 42,359.62$.

Lands granted in aid of an agricultural college, which is now connected with the University, will be referred to under the heading " Agricultural College Fund."

## NORMAL SCHOOL FUND.

Section 1, of chapter 82, of the laws of $185 \%$, provided that it should be the duty of the commissioners of school and university lands to apportion the income of twenty-five per cent. of the gross proceeds arising from the sale of swamp and overflowed lands granted to this state by an act of congress, entitled "An act to enable the state of Arkansas and other states to reclaim the swamp and overflowed lands within their limits," approved September 28, 1850, to normal institutes and academies as hereinafter provided.

This was the origin of the Normal School Fund.
Chapter 537, general laws of 1865 , repealed all existing laws relative to the application and use of swamp and overflowed lands of the state, and the lands selected in lieu of them. It then provided that all the swamp and overflowed lands received by the state from the United States, and all moneys received from the United States in lieu of swamp and overflowed lands, and all moneys received by the state as purchase money for swamp and overflowed lands, including all amounts loaned and invested, and all sums due and to become due, on contracts for the sale of swamp lands, should be divided into equal parts, and constitute two funds, to be known as the Normal School Fund and Drainage Fund. The Normal School Fund now consists of the fund formed in accordance with the provisions of this act.

The amount of this fund at the present time is $\$ 985,681.34$. The number of acres of swamp lands still unsold, of which the proceeds are applicable to this fund, is $59 \%, 219.59$.

## AGRICULTURAL COLLEGE FUND.

By an act of congress approved July 2,1862 , entitled, " An act
donating land to the several states and territories which may provide colleges for the benefit of agriculture and mechanic arts," there was granted to the state two hundred and forty thousand acres of land.
The proceeds of the sale of these lands form the Agricultural College Fund. The use to which this fund is applied is fully set forth in chapter 114, general laws of 1866.

The present amount of the fund is $\$ 240,791.90$. The number of acres of land still unsold is 49,791.46.

## DRAJNAGE FUND.

Section 1 of chapter 67 , of the general laws of 1858 , provided that, for the purpose of carying out the intention of the of congress, entitled, "An act to grant to the state of Arkansas and other states, the swamp and overflowed lands within their limits," approved September 28, 1850, and for the purposes of enhancing to the purchasers the value of such swamp and overflowed lands as had been or might thereafter be purchased of this state, fifty per cent. of the net proceeds of the sale of the swamp and overflowed lands granted to this state by the act of congress aforesaid, should be, and the same was thereby set apart as a separate fund, to be entitled the "Drainage Fund," which fund should be devoted to the drainage and reclamation of said swamp and overflowed lands.

The law now governing this subject is chapter 537, general laws of 1865 , already referred to, and by the provisions of which the swamp lands were equally divided between the normal school fund and drainage fund. The amount belonging to this fund each year, is apportioned by the commissioners of school and university lands, among the several counties of the state, in proportion to the number of acres of swamp and overflowed lands situate in such counties respectively. The moneys so paid are then apportioned to the various towns, and expended by the proper officers in draining and reclaiming swamp and overflowed lands.
The number of acres of land applicable to this fund and still unsold, is $694,57 \% .51$.

SALE OF SCHOOL, UNIVERSITY AND OTHER LANDS.
The constitutional provisions of the state on this subject are as follows:

Article 10. Section \%. The secretary of state, treasurer, and attorney general, shall constitute a board of commissioners for the sale of the school and university lands, and for the investment of the funds arising therefrom. Any two of said commissioners shall be a quorum for the transaction of all business pertaining to the duties of their office.

Section 8. Provision shall be made by law for the sale of all school and university lands after they shall have been appraised, and when any portion of such lands shall be sold, and the purchase money shall not be paid at the time of the sale, the commissioners shall take security by mortgage upon the land sold for the sum remaining unpaid, with seven per cent. interest thereon, payable annually at the office of the treasurer. The commissioners shall be authorized to execute a good and sufficient conveyance to all purchasers of such lands, and to discharge any mortgages taken as security where the sum due thereon shall have been unpaid. The commissioners shall have power to withhold from sale any portion of such lands, when they shall deem it expedient, and shall invest all moneys arising from the sale of such lands, as well as all other university and school funds, in such manner as the legislature shall provide, and shall give such security for the faithful performance of their duties as may be required by law.

The sale of these lands was commenced in 1849, and has since been continued under the provisions of law.

It is thought proper to give here the principal laws that have been enacted relative to the sale of lands and the investment of funds arising therefrom. Some of these acts are not now in force, but they may be useful to explain the matter of past sales and investments.

These acts have been as follows:
Chapter 236, general laws of 1850 , relating to sale of school lands.
Chapter 35, general laws of 1851, relating to sale of school lands and amendatory of chapter 236 , laws of 1850 .

Chapter 43, general laws of 1853 , relating to sale of forfeited lands.

Chapter 92, general laws of 1853, providing for tax on school and university lands sold on contract.

Chapter $10 \%$, general laws of 1853 , providing for appraisal of capital lands.

Chapter 70 , general laws of 1854 , organizing state land office.
Chapter 22, general laws of 1855 , relating to sale of forfeited lands.

Chapter, 84, laws of 1855 , providing for protection of state lands. Chapter 125 , laws of 1856 , providing for sale of swamp lands.

Chapter 143, general laws of 1856 , authorizing loan to Mineral Point Seminary.

Chapter ${ }^{77}$, general laws of $185 \%$, relating to sale of swamp lands and amendatory of chapter 125 , general laws of 1856.

Chapter 187, general laws of 1859, relating to sale of state lands.
Chapter $20^{7 \%}$, general laws of 1859 , relating to loans of University Fund.

Chapter 2\%\%, general laws of 1860 , relating to trespass on state lands.

Chapter 281, general laws of 1861, providing for re-issuing patents to school and university lands.

Chapter 89, general laws of 1862, relating to investment of school funds.

Chapter 225, general laws of 1862 , relating to investment of school fund, and amendatory of chapter 89, general laws of 1862.

Chapter 100, general laws of 1863 , relating to investment of school fund, and amendatory of chapter 89, general laws of 1862.

Chapter 157 , general laws of 1863 , providing for issue of certificates of indebtedness to school fund.

Chapter 160, general laws of 1863, graduating price and regulating sale of swamp lands.

Chapter 265, general laws of 1863 , accepting grant of land for Agricultural College.

Chapter 287 , general laws of 1863 , reducing price of school and university lands, and regulating sale of same.

Chapter 156, general laws of 1864, relating to pre-emption of swamp land.

Chapter 217, general laws of 1864, providing for investment of trust funds in bonds of the state.

Chapter 233, general laws of 1864, providing against trespass on state lands, and amendatory of chapter $27 \%$, laws of 1860.

Chapter 240, general laws of 1864 , relating to sale of state lands, and amendatory of chapter $18 \%$, laws of 1859.

Chapter 261, laws of 1864 , providing for appraisal of forfeited mortgaged lands.

Chapter 4\%8, laws of 1864, accepting land grant for military road from Fort Howard to Michigan state line.

Chapter 533, general laws of 1865 , relating to sale of lands granted for military roads.

Chapter $53 \%$, general laws of 1865 , relating to the division and sale of swamp lands.

Chapter 25, general laws of 1866, relating to trust funds.
Chapter 121, general laws of 1866, relating to sale of agricultural college lands.

Chapter 22, general laws of 1867, providing for conveyance of land from Marathon county to the state.

Chapter 111, general laws of 1868, providing for investment of trust funds.
Chapter 42 , general laws of $18 \% 1$, authorizing loan of trust funds to school districts.

Chapter 133, general laws of $18 \% 2$, relating to redemption of school, university, and agricultural college lands.

Chapter 42, general laws of 1874, providing for reconveyance of lands to Marathon county.

Chapter 186, general laws of 1874, authorizing loan to Iowa county.

Chapter 128, laws of 18\%5, authorizing loan to Mineral Point.

- Chapter 107, laws of 1876, authorizing loan to Racine county.

Chapter 144, laws of 1876 , authorizing loan to Wood county.
Chapter 197, laws of $18 \% 6$, authorizing loan to Clark county.
Chapter ${ }^{7} 6$, laws of $187 \%$, authorizing loan to town of Pine Valley, Clark county.

Chapter 100, laws of 1877, authorizing loan to Baraboo.
Chapter 128, laws of 187\%, amendatory of chapter 42, laws of $18 \% 1$.

## RAILROAD GRANTS.

The report of the railway commissioners for $18 \% 4$, page $22 \%$ et seq., contains a history of the various grants of land to the state for railroad purposes, and of the disposition made of the same by the state up to June 30, 1873. Hence it is not deemed necessary to give a history of the matter here, which should necessarily be a substantial repetition of the information contained in the report referred to.

From that report it appears that the grants in aid of railway enterprises made by the general government to the state were estimated to contain $3,758,436$ acres, and that up to June 30,1873 , there had been patented or certified to railway companies $2,153,434$ acres.

Since that time there have been patented or quitclaimed lands, amounting in the aggregate to 731,048 acres, as follows:

No. of Acres.

| To North Wisconsin Railway Company, patent dated December |  |
| :---: | :---: |
| 19, 1873 | 255,994.94 |

To North Wisconsin Railway Company, patent dated January 2, 1875
76,786.64
To Wisconsin Central Railroad Company, quitclaim dated December 9, 1875
398,266.44

## MILITARY ROAD GRANTS.

## Fort Wilkins and Fort Howard Wagon Road.

By act of congress, entitled "An act granting lands to the states of Michigan and Wisconsin to aid in the construction of a military road from Fort Wilkins, in Kewenaw county, in the state of Michigan, to Fort Howard, in the state of Wisconsin, approved March 3,1863 , there was granted to the state of Wisconsin every alternate section of public land, designated by even numbers, for three sections in width on each side of said road from the state line to Fort Howard. Such grant was made subject to the conditions specified in said act.

By chapter 478, general laws of 1864 , the state accepted said grant, subject to such conditions, and commissioners were appointed to lay out and establish on the most eligible and direct route a wagon road from Fort Howard to such a point on the state line as they might select.

In pursuance of the foregoing act, the commissioners of sehool and university lands put into market in the year 1867 , the first thirty sections of the grant, for the purpose of realizing a sufficient amount to reimburse the state for expenses and damages paid in the location of the road. This having been accomplished, the balance of the land remaining unsold, was, on the 27th day of November, $18 \% 1$, conveyed to the contractors on said road. The quantity sold was $8,69 \% .64$ acres, amounting to the sum ${ }_{4}$ of $\$ 10,7 \% 1.40$.

The road was completed in the spring of 18\%0, and the quantity of lands patented to the different contractors for the construction of the road was about 285,000 acres.

## Wausau and State Line Wagon Road.

By an act of congress, entitled "An act granting lands to the state of Wisconsin to build a military road to Lake Superior," approved June 25, 1861, there was granted to the state to aid in the construction of a military wagon road from Wausau, Marathon county, following the Wisconsin river as far as Skouowany, and thence on the most feasible and direct route to a point on the state line between the states of Wisconsin and Michigan, in direction to Ontonagon, on Lake Superior, every alternate section of public land, not mineral, designated by odd numbers for three sections in width on each side of said road.

Chapter 533 of the laws of the state for 1865, provided for accepting the grant on the conditions set forth in the acts of congress. From that time until $18 \% 5$, almost nothing was done towards the building of the road. In the last named year the legislature reenacted the law of 1865 , the time provided in this act for building the road having expired; and in pursuance of the provisions of said act so revived, the government appointed commissioners to survey, locate and construct said road.

In the months of May and June of the year 18\%6, the commissioners went on and surveyed the route or line of the road, and prepared maps of the location, and transmitted them to the secretary of the interior for his approval, in accordance with the provisions of the acts of congress, with a request that upon filing said maps and approving the same, the secretary would cause the withdrawal from entry of the public lands lying on either side of the road, and described in this act of congress before referred to. The secretary declined to comply with the request and returned the maps of location, stating as his reason that no steps had been taken to definitely fix the route of said road under the act of congress until then (July 1st, 18\%6), although it was the evident intention of congress that the road should be completed within five years from the date of the approval of the act, and that no satisfactory reason being assigned for the delay of twelve years in taking the initiatory step under the act by which alone the grant attached to specific tracts of land, the delay should be treated as an abandonment of the lands. Hence nothing has been received under the grant.

## WISCONSIN RAILROAD FARM MORTGAGE LAND COM PANY.

In the report of the Railway Commissioners, to which reference has already been made, will be found a history of the grant to the above named company. The matter, however, being one of considerable interest at the present time, it is thought proper to give here a brief summary, which will explain the principal points connected with said grant, and the disposal of the same.

During the time that the La Crosse and Milwaukee, and the Milwaukee and Horicon Railroad companies were seeking to construct their roads, many farmers in the state mortgaged their farms to aid the enterprises. Subsequently the Milwaukee and St. Paul railway company became the successor of the La Crosse and Milwaukee railroad company, and the owner of the two lines referred to. It thus succeeded to all the right and title of the La Crosse and Milwaukee railroad company by the provisions of chapter 122, general laws of 1856.

With a view to assist farmers who had mortgaged their farms as stated, the legislature in 1868, by chapter 446 of the private and local laws of that year, appointed commissioners and granted to them in trust certain lands hereinafter referred to, which it was provided should be used for the benefit of said farm mortgagors, as provided in said acts.

The purposes of the acts, will, perhaps, be best understood by giving the preamble thereto. It is as follows:

Whereas, Certain owners of farms and other lands in this state mortgaged the same to aid in building the railroads now or recently known as the "La Crosse and Milwaukee Railroad," and the "Milwaukee and Horicon Railroad," by reason of which the said mortgagers have suffered great injury; and

Whereas, The "Milwaukee and St. Paul Railway Company," the successors of the above named railroad companies, and the present owners of their lines of railroad, is willing to relinquish in favor of said mortgagers its claims to certain lands donated by congress to aid in the construction of said railroads, and more especially its claims to all and singular the lands to which they are or may be entitled by reason or on account of the building or construction of a railroad from Columbus, in the state of Wisconsin, by the way of Fortage City, to Tomah, in said state of Wisconsin, by virtue of an act of congress, entitled "an act granting a portion of the public lands to the state of Wisconsin, to aid in the construction of rail-
roads," approved June 3, 1856, upon the condition that the state of Wisconsin shall relinquish its right to tax the said Milwaukee and St. Paul Railway Company, or its traffic, for or on account of its being the owner of said lands, as provided by chapter 122, laws of 1856 , or the successor to the grantee or donee of said lands so granted by congress to aid in the construction of said railroads; and,

Whereas, It is desirable that the said mortgagors should receive all the benefits which they can from such lands, and to that end the legislature of the state of Wisconsin is willing, and does hereby consent and agree that said lands may be used, devoted and applied to and for the use and benefit of the said mortgagors, and to carry out and accomplish the end and purpose aforesaid.
(Then follows the act.)
In September, 1868, the Milwaukee and St. Paul Railway Company quit-claimed to the commissioners herein referred to, for a nominal consideration, all its title and interest to the lands described in the foregoing prea mble.

In $18 \%$, a trust deed was executed to said commissioners by the governor for 28,931 acres, being a portion of a list of lands certified to the state in 1863 , on account of the grant of 1856 , which were on the route of the La Crosse and Milwaukee Railroad.

In $18^{\prime} 1$, by chapter 56 , private and local laws of that year, the commissioners were declared to be a body corporate, to be known as the Wisconsin Railroad Farm Mortgage Land Company.

In $18 \% 1$ another trust deed was executed to said company for 39,889 acres, making an aggregate of 68,820 acres received up to the present time. Of this land 50,692 acres have thus far been sold, leaving 18,128 acres still unsold.

The company still claims additional lands from the grant of June 3,1856 , to which reference has been made, under the rights which it acquired, as herein stated, and a suit to enforce this claim is now pending in the circuit court of the United States for the western district of Wisconsin.

The commissioners of the farm mortgage land company report annually to this office, and such report is transmitted to the legislature.

The principal laws relating to the duties of said commissioners are chapter 352 , private and local laws of 1869 , amendatory of chapter 446 , private and local laws of 1868 , chapter 195 , laws of $18 \% 5$, also amending the law of 1868 , and chapter 84 , laws of $187 \%$, ex-. tending the time for filing claims, under said act of 1868 , until the first day of November, $18 \% \%$.

## MILWAUKEE AND ROCK RIVER CANAL GRANT.

In the year 1836, public attention was directed to the importance of connecting the waters of Lake Michigan with those of Rock river, by means of a canal, and in 183\%, a preliminary survey was made. In 1838, the Milwaukee and Rock River Canal Company was incorporated by act of the territorial legislature.
The same year, congress passed an act to grant a quantity of land to the territory of Wisconsin for the purpose of aiding in opening a canal to connect the waters of Lake Michigan with those of Rock river. By this act, there was granted all the land that had not been disposed of in those sections or fractional sections which were numbered with odd numbers on the plats of public surveys within the width of five full sections, taken on each side of the route of said canal. This grant embraced about 139,200 acres.

At the session of the territorial legislature in 1839, a bill was passed providing for the disposal of the lands and making other provisions relative to the matter of constructing the canal.

Without going into details it will be sufficient to say here that from this time until 1848, there was considerable legislation on the subject, but that comparatively little was done in the way of constructing the canal. In the year last named an examination of the matter of the canal lands showed that of the 139,200 acres granted to the state, there had been sold 104,491 acres, and that the proceeds thereof had been paid into the territorial treasury, and expended or remained to be expended in accordance with the provisions of law relating to the subject. The remainder of the grant, about 35,000 acres, became, on the admission of the state into the union, a part of the five hundred thousand acre tract granted by congress in 1841 for educational purposes, which has been already referred to.

## GRANT IN AID OF FOX AND WISCONSIN RIVER IMPROVEMENT.

Public attention was first directed to the matter of the improvement of the Fox and Wisconsin rivers in 1829, and in October of that year a public meeting relative to the subject was held by the inhabitants of Green Bay. In 1833 another meeting was held, and $5-$ Sec. St.
[Doc. 1.]
steps were taken towards applying to congress for aid in the matter. In 1839 a survey of the route was made under the direction of the war department by Capt, Cram of the U. S. Topographical Engineers.

In 1846 an act was passed by congress, entitled "An act to grant a certain quantity of land to aid in the improvement of the Fox and Wisconsin rivers, and to connect the same by a canal in the territory of Wisconsin."

This act provided that there stould be granted to the state of Wisconsin, on its admission into the Union, for the purpose of improving the navigation of those rivers and constructing a canal to unite them, a quantity of land equal to one-half of three sections in width on each side of the said Fox river and the lakes through which it passes from its mouth to the point where the Portage canal should enter the same, and on each side of said canal from one stream to another, the alternate sections to be reserved to the United States.

It was provided that said lands should be selected under the direction of the governor of the state, and that when the river should be improved and the canal finished they should forever remain a public highway for the use of the government of the United States, free from any toll or charge for the transportation of mails or property of the United States, or persons in their service.

This grant embraced about 318,720 acres, and was accepted by the state in June, 1848. The same year an act was passed providing for the disposal of the lands and the application of the proceeds thereof to the construction of a canal connecting the rivers.

Under this act a board of public works was appointed to take general charge of the matter, in accordance with the provisions of the act. The report of this board made in 1850 , showed that up to that time there had been sold of the lands selected under the act of Congress of $1846,45,891$ acres, for the sum of $\$ 5^{4}, 692$, and that out of this sum there remained in the treasury, after the payment of all authorized expenditures, $\$ 14,304$.
Up to this time there had been solected and confirmed to the state, on account of this grant, 131, 660 acres, a portion of which was unsaleable, on account of being marshy or otherwise inferior in quality. Of the remainder of the grant made by the terms of the act of 1846, it appeared that a considerable portion had been sold
by the United States before the grant to the state took effect. In lieu of these, the governor made a selection of about 60,000 acres from the even or reserved sections, but such selections were not approved.

From this time until 1853, efforts were made by the state to secure the construction of the canal, but for various reasons the work was not as successfully prosecuted as it had been hoped would be done.

In the last named year the legislature passed an act entitled "An act to incorporate an association for the completion of the improvement of the Fox and Wisconsin Rivers," and transferred to the corporation all the right and title of the state to the lands granted in aid of the canal, as well as all the improvements then made. The conditions of the grant will be found by referring to chapter 98 , general laws of 1853 .

The lands remaining unsold in 1853, and which were granted to the company by the terms of its charter, amounted to about 168,000 acres, which were valued at about $\$ 808,000$.

In 1854 an act of Congress was passed, authorizing the governor to se!ect the balance of the grant of 1846 to which the state was entitled, and provided how the quantity of land should be ascertained. In 1855 a resolution was adopted by Congress, declaratory of the meaning of the act of 1854 .

After the passage of this resolution, the commissioner of the general land office issued a certificate to the governor of the state authorizing the selection of 415,134 acres in the manner prescribed in said certi ficate.

In 1856, the state granted to the company these lands on the conditions set forth in the act making such grant which is chapter 112 , general laws of 1856 .

One of these conditions was that within ninety days after the passage of the act, the company should convey by a deed of trust to the trustees to be appointed by the governor with the assent of the directors of the company, all the unsold lands granted to the state in aid of the enterprise, together with all the improvement works and all the property of the company, for the purposes set forth in said deed, which was mainly to secure the prosecution and completion of the work. The company then continued the work of improvement.

By chapter 180 of the general laws of 1860 , the time allowed to the company by the act of 1856 in which the improvement was to be completed, was extended to the first day of April, 1863.

In 1865, another act was passed (chapter 535, of that year), extending the time to the 1st of May, 1866.

In February of the last named year, the trustees herein referred to, in execution of the powers contained in the trust deed, and pursuant to a judgment rendered by the circuit court of Fond du Lac county, sold at public sale at the city of Appleton all the works of the improvement, and all the lands granted by congress which were then unsold. In pursuance of existing laws, the purchasers at such sale became incorporated as the Green Bay and Mississippi Canal Company.
The state had, from time to time, represented to congress the importance of assuming control of this improvement as a national work, and in 1866, underinstructions from the proper United States authorities, surveys of the Fox and Wisconsin rivers were commenced.

In 18\%0, congress directed the secretary of war to adopt such a plan for the improvement of the Fox and Wisconsin rivers as should be approved by the chief of engineers, and a board of arbitrators was appointed to effect a settlement with the Green Bay and Mississippi Canal Company for the transfer of all its rights, after taking into account the amount realized from the sale of lands granted to the state for the purpose of aiding the improvement.

This resulted in the transfer by the company to the United States, of all its property on the payment of the amount found due said company being $\$ 145,000$.
In conclusion it may be said that the grants of land to aid this improvement, made by the general government from time to time, amounted in the aggregate to 683,969 acres, which were disposed of in the manner herein stated.

The direct appropriations by congress for the purpose of the improvement have been as follows:

By an act of July 11, 1870, \$100,000; act of March 3, 1873, $\$ 300,000$; act of June $23,1874, \$ 300,000$; act of March 3, 1875, $\$ 500,000$.

## STURGEON BAY AND LAKE MICHIGAN SHIP CANAL GRANT.

In the report of this office for $18 \% 6$, a history of this grant was given, and the report of a committee appointed to investigate the affairs of the company engaged in the prosecution of the work for which the grant was made was published. Hence it is not deemed necessary to refer to the matter in detail here. During the past year a small portion of the lands of the company was disposed of under the provisions of chapter 224 , laws of 1876 .

## PROTECTION OF STATE LANDS.

Chapter 46, general laws of 1869 , provided, among other things, for the appointment of one or more agents by the governor for the protection of the timber growing on any of the lands granted by congress to aid in the construction of railroads, by act approved June 3,1856 , and which were granted by the state to the St. Croix and Lake Superior Railroad Company, for the purpose of aiding in building a railroad from the River or Lake St. Croix to the west end of Lake Superior and Bayfield.

This act was amended by chapter \% \% , general laws of 18\%1, and chapter 335 , laws of $18 \% 6$, but the provision relative to the appointment of agents remains unchanged, and such agents are appointed by the governor in accordance with the provisions of said act.

Chapter 21, general laws of $18 \% 1$, authorized the commissioners of school and university lands to appoint clerks, not exceeding five in number, for the purpose of protecting the school, university, swamp and overflowed, or any other lands in which the state might have an interest, legal or equitable, and appropriated the sum of $\$ 6,000$ annually for the payment of such clerks.

Chapter 314, laws of $18 \% 6$, repealed the foregoing act, and provided for the appointment of such clerks by the governor, the other provisions of the act being substantially the same as those contained in the law of $18 \% 1$. Chapter 37\%, general laws of 1865 , contains some general provisions on the subject of protecting public lands.

Chapter 104, private and local laws of $18 \% 2$, provides that the president of the Sturgeon Bay and Lake Michigan Ship Canal and

Harbor Company shall have authority to act as agent for the protection of lands granted in aid of said canal, on his complying with the requirements set forth in said act.

These are the existing provisions of law relative to the protection of state lands.

## AUDITING AND OTHER DUTIES.

Section 2 of article 6, of the constitution of the state, provides that the secretary of state shall be ex-officio auditor; and section ${ }^{7}$, of article 10 , provides that he shall be one of the commissioners of school and university lands.

At the time of the adoption of the constitution, the business of the state was comparatively small, and it was doubtless wise to devolve on one offlcer the performance of several duties rather than to multiply offices, thus leaving very little to be done by the incumbent of each. It may be fairly presumed, too, that the framers of the constitution did not anticipate the rapid development of the state that has since taken place, and hence that they could not at that time, by any ordinary foresight, adequately provide for the full supervision of its constantly increasing financial and other business interests.

Only ten years had elapsed, however, after the adoption of the constitution, when it seems to have become apparent that the duties devolving on this office had increased to such an extent as to render it desirable to attempt devising a plan that might result in lessening to some extent the duties as auditor. At least this may be fairly presumed to have been one of the objects in view in enacting chapter 158 , general laws of 1858 , providing for the appointment of a comptroller and prescribing his duties.

In 1860, the supreme court, in the case of The State ex. rel. of Crawford vs. Hastings, treasurer, decided the act of 1858 unconstitutional, and also held, in substance, that the duties of secretary of state as auditor were in the nature of a personal trust, and could not be delegated by him.

Subsequently the attention of the legislature was, on one or two occasions, called to the matter through the reports of this office, and the adoption of a constitutional amendment providing for the election of auditor was recommended. In the report for the year 1865,

Hon. Lucius Fairchild referred to this subject, stating that at no distant day the best interests of the state would require the creation of a department having charge only of the financial interests of the state.
In $18 \%$, the leg islature passed an act - chapter 5.6 of that year providing that the secretary of state should also be ex-officio commissioner of insurance.

The additional duties imposed by this act are continually increasing, and necessarily occupy considerable time, and demand, to a great extent, careful personal attention.

It is believed that from the foregoing statements, without going into details on the subject, it will be apparent that the time is certainly not far distant when the best interests of the state will demand a division of the duties now devolving on this office. Indeed, should such a course be adopted in this regard as would require a constitutional amendment, it would seem that steps should soon be taken in that direction. And here it may not be considered out of place to make an observation or two of such a character as the experience of the past few years has suggested, relative to the method of accomplishing the result referred to, in such a way that the interest of the state may be best subserved. At first sight it would perhaps appear desirable to establish a separate insurance department; or it might appear advisable to unite the duties of railway and insurance supervision, as either of these courses could be adopted without a constitutional amendment, and should there appear to be no better way, one of these may be worthy of consideration. There would seem to be reasons, however, for having the important duties of insurance supervision performed by an officer elected by the people, and immediately responsible to them, rather than by a person appointed for that purpose, and hence not so directly responsible, and therefore that some elective state officer should be ex-officio commissioner of insurance; and it may be added that the same principle is believed to be true of railway and other important interests that may be considered of such a nature as to demand state supervision at all.

It may be said, too, as already remarked in substance, that even previous to the passage of the act of $18 \%$, relative to insurance subervision, many were of the opinion that it would be desirable to have a separate auditing department, and that there appeared to
exist a growing necessity for it. The same seems to be the case still.

The duties of auditing are among the most important, and the financial interests of the state are increasing so rapidly, that it is safe to presume that in the near future an officer having charge of such interests should have few, if any, other duties requiring his attention. The annual disbursements from the general fund are now considerably in excess of a million of dollars annually, the payments ranging from very small to comparatively large amounts." Many accounts require considerable examination to determine their accuracy, and all should of course receive careful consideration before any payment is made.

A general supervision of the revenues of the state also requires not a little time and attention. In addition to this, there are necessarily many duties to be performed relative to the various trust funds. And it may not be improper to suggest here, that, in view of the constantly increasing expenditure by the state in ard of the different educational, benevolent, and correctional institutions, it may soon be a matter worthy of consideration, whether it may not be advisable to have all details relative to the payment of appropriations for these purposes made subject to the careful examination and audit of some central auditing office, and whether all such payments should not be made directly from the state treasury.

Without at all reflecting on the present management in this regard, it may be said that there would seem to be some advantages to the state from the adoption of the course here suggested, which it is believed will be apparent from even a casual examination of the subject. It would doubtless be desirable, for the sake of convenience, to have suitable provisions for the payment, by the proper local officer, of small bills, but it might be arranged that bills exceeding a certain amount, to be determined by the legislature, should, before being paid, be examined and audited in the manner stated. This would seem to be the more necessary in view of the policy adopted by the state as set forth in the law of 1876 , providing for the investment of state funds, thus rendering it desirable to retain as much money as possible for such purpose until actually needed, instead of paying the same in large amounts to local officers.

And in this connection it may be proper to briefly refer to the
management of school and university and other public lands under existing laws and the provisions of the constitution, and to suggest that if there existed the office of auditor, the person filling such office might, perhaps, properly be required to act as ex officio commissioner of said lands, thus placing such matters under the control of one officer. This would seem to be appropriate in view of the fact that the management of these lands necessarily involve transactions of a financial character.

The principal portion of the lands that were granted to the state and that have been under the control of the commissioners of school and university lands, has been sold, and the business of the land office arising from such sales will necessarily greatly diminish hereafter.
It is believed that with this condition of the matter, the business could be more economically and efficiently conducted under the direct management of one officer than can be done under the present arrangement with a divided responsibility, and in view, too, of the fact that owing to a pressure of other duties no commissioners can possibly devote any great degree of personal attention to the details of such business.

Should the arrangements suggested be at any time carried into practice, the result would be, that the secretary of state would perform the duties proper of that office, including the supervision of printing and publication, election and assessment matters, the keeping of all required records, and the collection of statistics provided for by law, and also act as commissioner of insurance, while the auditor would have general charge of the financial affairs of the state, and also act as commissioner of public lands. It may be added here, that there is a growing want for much more complete statistical information relative to the various interests of the state than is now provided for, and that the time is not far distant when such information will be very desirable, if not essentially necessary to intelligent legislation respecting those interests. It is thought that this arrangement would not necessarily result in any increase of expense, as a greater degree of economy would doubtless be secured in some of the matters to which reference has been made, than appears practicable under the present system.

This is not suggested as the best method that may be devised for accomplishing the purpose herein referred to, but only as one way
that may be worth considering. It is not deemed necessary, however, to elaborate the subject, but it has been thought proper to thus briefly refer to it as one that may be soon worthy of the attention of the legislature. And, in conclusion, it may be said that it has not been intended in writing this article to take the position that there is any immediate or pressing necessity existing relative to the matter referred to, or requiring a division of the duties of the office, but the general interests and business of the state will doubtless make this necessary at no distant day. And, as has been remarked, should such a course be thought advisable, as would require a constitutional amendment, which would necessarily involve a delay of some years, it would seem that the subjert is one which should receive early attention.

It may not be improper to add, that while the policy of creating offices not essentially necessary, can hardly be condemned in too severe terms, yet it is believed that wise economy and true policy will sanction a course that would so distribute duties as to enable the officer having charge of a department to give personal attention to all matters of particular importance, and also exercise a dirent personal supervision over all details of office work.

It may be added, too, that in almost every other state of the Union, certainly in all the principal ones, there exists the office of auditor. In some cases, other duties, especially those of insurance supervision, are coupled with the duties of such office, but in general it is an entirely separate department.

This matter was briefly referred to in the insurance report of the present year, page 8 , to which, for history of the method of insurance supervision in the several states, the reader is referred.

## UNSETTLED CLAIMS.

In the report of this office for 1874, and again in 18\%5, reference was made to the fact that bills for printing done in Europe for the commissiner of immigration, in the year 18\%3, had been received and filed. It was also stated that there was not a sufficient sum left of the appropriation for 1873 , properly applicable to that purpose, to pay such bills in full, the unpaid balance being $\$ 1,188.8 \%$. This balance seems to be still unpaid, there having been no legislative action on the subject. For a full explanation of the matter,
reference is made to the report of $18 \% 4$, page 43 . It is recommended that an appropriation be made for the payment of the balance above stated, it appearing to be equitably due, notwithstanding that all the requirements of law may not have been fully complied with in ordering such printing.
In June, 18\%5, a bill for five thousand dollars, made out in the name of Stevens \& Sloan, was presented by B. J. Stevens, of this city, the bill being for "retainer, preparing brief, attendance on supreme court at the winter term of 1873-4, and going to Washington to argue case, in the case of Schulenberg and others, plaintiffs in error, against Hammon, defendant in error, and Schow, plaintiff in error, against same defendant in error."
These cases were to enforce payment for trespass committed on the lands of the St. Croix and Lake Superior Railroad grant, which was granted to the state in 1856, to aid in the construction of railroads, and the protection of which was provided for by chapter 46 , general laws of 1869 , and amendatory acts. The title of the state to the lands appears to have been also involved, and it should, perhaps, be added that the decision was favorable to the state.
The bill for services did not seem to come directly within the provision of the act of 1869 , above cited, or others amendatory thereof, which provide for the payment of expenses incurred relative to the protection of said lands; neither was it certified to or approved by the governor, the claimant taking the position that under the law, the duty of determing the amount proper to be paid for such services, and auditing a bill therefor, devolved on this office.

After a careful examination of the matter, and legal advice having been obtained, the conclusion was arrived at that this could not properly be done, and that payment could not be made.

Subsequently, and after the passage of chapter 335, laws of $18 \% 6$, the subject was again examined at the request of the applicant, and the same conclusion was again arrived at. In examining the matter, it did not become necessary to attempt determining whether or not the amount charged was a reasonable one, it appearing as already stated, that there existed no legal right on the part of this office to determine the sum prcper to be paid in that or similar cases.
It is but proper to add, that to the bill as presented, there were
attached statements of several prominent members of the legal profession, setting forth that, in their opinion, the charge made was a reasonable one. The papers relative to the subject will be found on file in this office.
During the past year, a claim was made by the Mineral Point Railway Company for the refunding of $\$ 3,431.74$, which, it was claimed, had been paid by mistake of said company as a license fee for $18 \% 6$, in excess of the amount required by law. It was stated that the sum of $\$ 4.413 .48$, being four per cent. on the gross earnings of $18 \% 5$, had been paid, while under the provisions of chapter 97 , laws of $18 \%$, the amount payable was only $\$ 981.74$. From an examination of the case, the claim appeared to be correct, and the facts appeared to have been as alleged by the company. It was thought, however, that the amount claimed could not properly be refunded without an appropriation being made by the legislature for that purpose, or, at least, a resolution being adopted authorizing. payment to be made. The license fee of the company for the present year, amounting to $\$ 1,048.25$, is still unpaid, which deducted from $\$ 3,431.74$, leaves a balance of $\$ 2,383.49$, to which it is believed the company is justly entitled.
The foregoing include all the claims made up to the present time, which appear to require legislative action.

## STATE FINANCES.

In the last report of this office, reference was made to the constitutional and legal provisions which relate to the providing of revenues to defray the expenses of the state, and the fact that appropriations made by the legislature in excess of the estimates for expenditures sometimes renders it necessary to temporarily use some of the trust funds, was also referred to.

Hence it need only be said here, that similar causes will doubtless make it necessary to use some of such funds for the payment of general expenses during the last quarter of the present year, the balance in the general fund on the 30th of September having been only $\$ 6,014.40$, and it not being probable that more than a few thousand dollars will be received into the treasury during the quarter.

And it may be proper to say here that appropriations in excess
of the estimates has not been the only cause of the small balance in the general fund at the close of the fiscal year. Owing to the great depression of business that has existed for some time past, the receipts from railway and insurance companies, and from some minor sources, have been less than the estimates of such receipts.

By referring to the Senate Journal of $18 \% 6$, page 630, it will be seen that the receipts from railway companies for the present year were estimated at $\$ 400,000$, while the actual receipts have been only $\$ 380,726.26$, including the sum of $\$ 2,904.06$ due from the preceding year. The receipts from taxes to be paid by insurance companies were estimated at $\$ 65,000$, while the actual receipts up to the close of the fiscal year have been only $47,113.46$, and the amount to be received during the coming quarter will be very inconsiderable.

It will thus be seen that the aggregate receipts from the sources named, after deducting the amount of railway license fee due from the preceding year, as above stated, has been $\$ 40,064.34$ less than the estimated receipts from such sources made by the legislature of $18 \% 6$, and which at the time seemed quite reasonable. The receipts from miscellaneous sources have also been somewhat less than the estimates made at the same time. Besides this, chapter 245, laws of $187 \%$, provided for apportioning to the several counties in which the lands owned by the West Wisconsin Railway Company were located, on the condition set forth in said acts, so much of the li. cense fees received from said company as should amount to a sum not exceeding two and a half cents per acre for the lands of said company, which were exempt from taxation on such counties. The amount paid under this act was $\$ 12,826.16$.

In connection with the matter of the reduced receipts from insurance companies, it may be proper to say that this has been in part owing to the reduction in business transacted by fire and marine companies, and in part to the fact that the number of life companies licensed the present year has been considerably less than usual. Besides this, competition for business among fire companies has been so great that rates have been largely reduced, thus rendering the gross receipts on which taxes are paid, much less than would otherwise have been the case. It may be added that when the estimates were made, there was in force a requirement of law that each fire and marine company should, on entering the state,
pay five hundred dollars as a license fee for the first year, which provision was repealed in $18 \% 6$. It is believed that the passage of chapter 182 , laws of 1877 , a reference to which will be found on page 27 of the insurance report of the present year, will result in providing at least a small additional revenue from this source.
It is hoped, and may be fairly presumed, that hereafter there will not be such a falling off from estimates carefully made, as the past year has been to a great extent, one of unusual business depression. It would seem as if the receipts from railway companies the coming year may even be considerably in excess of the estimates, on account of the large crop the present season, and the consequent increase of business.
And in connection with the subject of revenues it may be proper to add that under the operation of chapter 3 3 1 , laws of $18 \% 6$, establishing the salaries of state offlcers, there will be some receipts into the treasury from fees hitherto applicable under existing laws to payment of such officers. There will also doubtless be some revenues from the investment of funds provided for by chapter 340, of laws of the same year hereafter referred to.

A reference to the Senate Journal of the present year, page 437, will show that appropriations amounting to $\$ 60,500$ were made by the last legislature in excess of the estimates on which the tax of 1876 was based; and it was provided that said amount should be levied with the tax of $187 \%$. This will, however, not be collected or paid into the treasury until January or February next. The same is true of a balance amounting to $\$ 30,000$ of an appropriation made to the Institute for the Blind by chapter 342, laws of 187\%, but not collectable, under the provisions of said act, with the tax of that year, nor payable until the present year. Some smaller appropriations in excess of the estimates were also made, the amounts of which will be found under the appropriate headings in this report.

In accordance with the provisions of chapter 153, general laws of 1869 , such a sum was added the present year to the tax authorized by the legislature as appeared to be sufficient with said tax so provided for, to meet all proper demands on the treasury, within the limitations of said act. The amount so added, and the estimates on which it was based, will be found in the proper place in the report.
Should there be no extraordinary appropriations by the legisla-
ture at the next session, it is believed that the tax levied, with the amounts receivable from other sources of revenue, will be sufficient to meet all necessary expenditures, payable from the general fund, during the coming year.

The matter of the temporary use of some of the trust funds for the payment of general expenses, was referred to in the report of last year, to which for a statement of the causes that, under some circumstances, make it necessary to occasionally use of such funds, reference is made.
It need only be said here that should this use at any time result in a loss of interest to any such trust fund, and thus reduce the income, it would seem to be only equitable that the legislature should make such an appropriation from the general fund as would be equal to such loss. It will not, of course, be understood that the foregoing remarks are at all intended to sanction the use of such funds for general purposes under ordinary circumstances. Such circumstances, however, may arise in the future, as they have arisen in the past, which will render it necessary to to adopt such a course, to prevent the impairment of the credit of the state. It is hoped, however, that this will not be the case, and the attention of the legislature is respectfully invited to a consideration of the matter of authorizing each year the levy of such an amount of tax as will be sufficient to meet all ordinary contingencies and thus prevent the existence of this necessity.

During the fiscal year that has just closed, the sum of $\$ 39,692.00$ of the trust funds was loaned to school districts, under the provisions of chapter 42 , general laws of 1871 , and amendatory acts. The amounts annually due on these loans are collected under the provisions of the acts named and those of chapter 60, laws of $18 \% 3$.

In addition to this amount, there has been loaned to the town of Pine Valley, under the provisions of chapter " $\%$, laws of $187 \%$, the sum of $\$ 3,000$, to the county of Racine, under the provisionsof chapter $10 \%$, laws of $1876, \$ 7,500$, and to the county of Wood, under the provisions of chapter 144 , laws of $18 \% 6, \$ 68,500$. It is probable that the additional sum of $\$ 31,500$ will be loaned to Wood county within a short time. The details of disbursements on account of these loans will be found in the appropriate accounts herein.

Chapter 340, laws of 1876 , provides for the investment, in bonds of the United States or of this state, of public moneys in the treasury,
whenever in the opinion of the lawfully constituted authorities, it may be deemed advantageous to the state to so invest such moneys. This act is to take effect on the first Monday of January, $18 \% 8$.

It will be seen from another portion of this report that the total amount of state bonds now outstanding is only $\$ 14,000$. These are, it is believed, held by a few individuals, and none of them are offered in the market. This being the case, and as there is no reasonable probability that there will be any early issue of bonds by the state, it will be seen that practically the investments are limited to United States bonds. This subject, however, having received careful legislative consideration in 18\%6, it is not deemed necessary to dwell on it here.

In conclusion, it may be said that there seems to be no very specific duty to be performed at the present time under the provision of law requiring the secretary of state, as auditor, to suggest plans for the improvement and management of the public revenues. The matter has been referred to in previous reports, and references to the subject to such an extent as to be considered a compliance with the provision stated, will be found in the foregoing and other articles printed herein, some of which necessarily relate, at least incidentally, to the finances of the state.

## MISCELLANEOUS.

Chapter 138, laws of $187 \%$, provides that all notaries public appointed after the passage and publication of the act, shall hold their offices for the term of four years, instead of two, which had been the term under previous laws. In accordance with the act, all commissions issued to notaries, atter the tenth day of March last, will continue in force for said term of four years, unless sooner revoked or otherwise detarmined in the manner provided by law.

The propriety and expediency of publishing in the annual report of this office, a list of all notarial appointments have been duly considered, but it has not appeared advisable to do so. As such appointments are being issued, at least every week, a list of notaries published in the report of any given year, would not of course contain the names of those appointed after the publication of such report, and previous to the publication of the next; and hence would necessarily be incomplete so far as giving the names of all persons
duly authorized to act at the time the report might be referred to for such information. Besides this, the act referred to provides that the secretary of state shall deliver to each notary appointed a certificate of such appointment, which certificate shall be filed in the office of the clerk of the circuit court of the county where such notary resides. Thus there is always a record in each county of all persons authorized to act as notaries in such county, and information as to who are duly qualified to so act can therefore be obtained at any time from clerks of the circuit court, as well as from this office.

In addition to this, it may be stated that such publication would occupy more space in this report than would appear to be proper to use for such information. If the names were published, it would be necessary to give in addition thereto the date of appointment, date of qualification and post office address. Otherwise the publication would be of very little, if any, value whatever.

The foregoing explanation has been thought proper in view of the fact that since the passage of the act referred to, the matter of publishing such appointments has been occasionally suggested.

And here it may not be out of place to state that, in accordance with the views of the legislature on the subject of the publication of annual reports, as manifested by the passage of chapter 32, laws of 1874 , it has been deemed not only proper, but a duty, in the preparation of the reports of this office, to give all statistical information in as condensed a form as has appeared to be compatible with a clear presentation of such information; and for the same reason, nothing has been published, except that which has been required by direct provision of law, or which has appeared to be of general interest and utility. The adoption of a different course would make it an easy matter to prepare much larger reports, but it is believed that they would not contain additional information such as would be of any real value to the public.

Section 4, chapter 48, general laws of $18 \% 1$, amendatory of section 4 , chapter 24 , general laws of $18 \% 0$, authorizes and requires the state treasurer, immediately on the receipt of the annual state tax or license fee from any rairoad company, for the purchase of the stock of which any debt may have been created by a town, city or village, as provided in said acts, to place to the credit of such town, city or village, the whole amount of said license fee so received,
and in such proportion as shall be in an equal ratio to the indebtedness incurred by each.
It is provided by section 8 of said act of $18 \% 1$, that when any bonds of any such town city or village shall be duly registered in the office of the secretary of state, as provided in said act, the said secretary of state shall annually ascertain the amount of principal and interest for the current year, due and accrued, and to accrue on such bonds, and that from the amount so ascertained he shall deduct the amount in the state treasury, placed to the credit of such town, city or village; and that he shall then, in accordance with the provisions of said act, certify to the proper officers the amount due on such bonds, for interest or principal, and unprovided for. Such amount is then to be levied and collected with the state tax.

Under the provisions of the acts named, there have been registered in this office twenty-five bonds of two hundred and fifty dollars each, issued by the town of Staunton; twenty-five bonds of like amount issued by the town of Star Prairie, and twenty-five bonds for five hundred dollars each issued by the town of Richmond, all in the county of St. Croix. All of these bonds were issued in aid of the North Wisconsin Railway Compauy, are dated January 1, 18\%2, payable January 1, 1892, and bear interest at seven per cent.

Until the present year, it was necessary to levy a tax for a portion of the interest due, but this year the license fee paid by the company, has been not only sufficient for this purpose, but leaves a small balance to the credit of such towns, applicable under the terms of said acts to the payment of the principal of said bonds. For a full explanation of this matter reference is made to the laws above cited.

Chapter 119, general laws of 1868, provides for the payment of the postage of state officers. It is recommended that this act be so amended as to include necessary telegraphing. The business of the office occasionally requires the sending of telegraphic dispatches, and there does not appear to be any direct provision of law relating to the payment of expenses incurred therefor. While the amount necessary for such purposes, in the course of a year, is very incousiderable, still there should be a direct sanction of law for its payment.
The present year, all returns required by law have been received
from the counties, except the county of Dodge, in time to have the information which they contain included in this report. The records of the county named were accidentally burned in the month of September last, and hence it became impossible for the officers of that county to send some returns. This fact should be remembered in comparing the aggregates of statistics found in this report with those of preceding years.

Joint resolution No 2, approved February 6, 18\%\%, provided for the exchange of copies of the last Legislative Manual for similar publications of other states. In accordance with this resolution, copies of the Manual referred to were forwarded to the proper officers of the various states and territories. Some copies of similar publications were received in exchange, and have been placed in the state library. From the officers of other states replies have been received, stating that no provision of law existed for the publication of similar books, and hence that none could be sent in exchange.

In conclusion, it is thought proper to say that it is a pleasure to acknowledge the general fidelity and efficiency of those who have assisted in the discharge of the duties of this office during the past four years; also, to acknoweledge the uniform courtesy and kindness of those who have been in charge of other departments necessarily associated to some extent with this, in the performance of many official duties. And it may not be improper to here express the hope that the officer who may be selected by the suffrages of the people of the state to take charge of the affairs of this office in January next, may find the duties and associations of the place as agreeable and pleasant as they have been to the writer.

Respectfully submitted,

> PETER DOYLE, Secretary of State.

## APPENDIX "N."

## ANNUAL REPORT

OF THE

## COMIIISSIONERS 0F PUBLIC PRINTING

Of the State of Wisconsin, for the Fiscal Year ending September 30, $187 \%$.

> Office of Commissioners of Public Printing, Madison, October $10,18 \% \%$.

To His Excellency, Harrison Ludington, Governor of the State of Wisconsin:

SIR:-In accordance with the requirements of chapter 32 , of the general laws of $18 \% 4$, the Commissioners of Public Printing have the honor to submit their annual report.

## PRINTING DURING THE PAST YEAR.

As the expense of the printing of the state during the past fiscal year is given in detail in the report of the Secretary of State, it is not deemed necessary to repeat the same herein, and hence summaries only are given.

The amounts paid for publishing and advertising are as follows:
Publishing general laws in newspapers. ..... \$14,976 00
Publishing local laws in newspapers. ..... 81840
Advertising sales of lands ..... 1,639 10
Publishing notices and proclamations. ..... 93135
Total ..... \$28,364 85

The following table shows the amount paid for printing, ruling and binding, together with cost of paper:

| For what purpose. | Cost of print ing, ruling, and binding | Cost of paper. | Total cost. |
| :---: | :---: | :---: | :---: |
| Legislative Manual | \$1,216 95 | \$170 50 | \$1,387 45 |

On the first day of January last, the contract of E. B. Bolens, as state printer, expired, and that of Carpenter \& Tenney, for doing the state printing for two years ensuing, took effect. The work was done by this firm until April, when it was transferred to David Atwood. No assignment of the contract was made, however, and the sureties of Carpenter \& Tenney are still held for the fulfillment of the contract entered into by the latter.

## GEOLOGICAL REPORT.

In accordance with the provisions of chapter 121, laws of $18 \% 6$, the commissioners of public printing advertised for sealed proposals for printing the complete geological report, which were opened on the 15th day of September, 18\%6, and the contract awarded jointly to Atwood \& Culver, of Madison, and Seifert, Gugler \& Co., of Milwaukee, their bid being the lowest and best one, and as follows:

Composition, plain, figure, and rule and figure, 38 cents per thousand ems.

Press work, 38 cents per token of 250 impressions.
Folding, per hundred sections of 16 pages each, 4 cents.
Binding, cloth, beveled edges, gilt title on back and state seal in gilt on side, 30 cents per volume.

Wood cuts, 42 cents per square inch, and the same to become the property of the state.

Engraving, full page diagrams, $4 \frac{1}{2} \times{ }^{17} \frac{1}{2}$ inches, at 25 cents per square inch, the same to become the property of the state.

For printing the first 2,500 impressions of said diagrams, including paper, $\$ 8$; for additional presswork on same, including paper, $\$ 3.25$ per thousand impressions.

Furnishing plates, $4 \frac{1}{2} \times 7 \frac{1}{2}$ inches, in black and two tints, first 2,500 copies of each, $\$ 45.05$; additional copies $\$ 10.25$ per thousand.

Furnishing 2,500 copies oí each of fourteen maps, $23 \times 27, \$ 388$ per map, including paper and stitching into atlas, with paper cover.

The work has been pushed foward as rapidly as possible, under the supervision of the state geologist, and is, at the present time, nearly ready for delivery.

## PURCHASE OF PAPER.

But one general purchase of paper has been made during the past fiscal year, the bids for which were opened on the 25th of May, and the contract for both classes of paper awarded to Bradner, Smith \& Co., of Chicago, under which the following paper was furnished:

## FIRST CLASS.

$11251 / 2$ reams 50 fb book, $25 \times 38$.
$44 \frac{1}{2} \frac{4}{5}$ reams 60 th book, $25 \times 38$.
$45 \frac{13}{2}$ reams 82 th book, $37 \times 42$.
$40 \frac{14}{2}$ reams 40 Ht S. S. \& C. book, $21 \times 32$.

## SECOND CLASS.

40 reams Weston's 40 tb record medium.
$25 \frac{16}{2}$ reams 70 开 granite, $20 \times 25$.
$16 \frac{1}{2} \frac{5}{0}$ reams 40 th granite, $20 \times 25$.
25 reams 36 th double flatcap.
30 reams 28 Ht folio.
5000 sheets Cranes' No. 21 bond, $17 \times 22$.
Previous to this the purchase of one hundred and fifty reams of 50 Hb book, eleven reams of 40 Hb granite cover paper, and five reams of 40 fb ledger medium, had been made necessary by an unusual amount of printing authorized by the last legislature. It was obtained from the state printer at the same rates paid by the state under the last previous contract, as follows: Book paper, 14-Séc. St.
[Doc. 1.]
$10_{\frac{2}{104}}^{24}$ cents per pound; granite, 15 cents per pound; medium, 25 cents per pound. A special purchase of paper was also made in February last for printing the geological report, comprising 140 reams of 90 ft S. S. \& C. book, $28 \times 42$, at 15 cents per pound.

At the close of the last fiscal year a supply of paper had been contracted for, but not received or included among the purchases of that year. It is therefore included among the purchases of this year, and is as follows:

## FIRST CLASS.

1,200 reams book paper, $25 \times 28,50 \mathrm{fb} \ldots \ldots \ldots \ldots$. at $1024-100$ cents per ft. 40 reams print paper, $25 \times 38,40 \mathrm{Hb}$.
at $81 / 2$ cents per th.

## SECOND CLASS.

3,000 sheets Crane's No. 21 bond, 17x22... ......... ........ at $\$ 2200$ per M.
2,000 sheets Crane's No. 21 bond, 16x24..................... at 2100 per M-
10 reams granite medium, $20 \times 25,40 \mathrm{Hb} \ldots \ldots \ldots \ldots \ldots \ldots$.................. 15 cents per Hb

The following is a general exhibit of the paper received and used during the year:

# EIGHTH ANNUAL REPORT 

OF THE
SECRETARY OF STATE
AS

## COMMISSIONER OF INSURANCE.

## PART I.

## FIRE AND MARINE INSURANCE.

Office of Secretary of State,<br>Department of Insurance, Madison, June 1, $187 \%$.

> To His Excellency, Harrison Ludington, Governor of the State of Wisconsin:

Sir-In compliance with the requirements of law, I have the honor to submit the Eighth Annual Report of this Department.

In the report for $18 \% 4$, reference was made to the fact that the legislature of that year enacted a law authorizing the secretary of state to include his report as commissioner of insurance with the general report of the office required to be made in October, or to have it printed separately. The reasons for the adoption of the latter course were also stated.

The same reasons have continued to exist, and hence a similar
course has been adopted with reference to the reports that have been published since that time.

The practice of omitting from the annual reports the detailed statements filed by insurance companies has also been continued, and it is believed to be one which should, in general, be adhered to. The reasons for such omission were set forth in the report for 1874, and therefore it is not deemed necessary to again state them. It may be proper, however, to add a few words to what was then said.

At the session of the legislature in the winter of 1874 , special attention was given to the matter of devising means to secure a reduction of the public printing of the state. The various acts on that subject were carefully examined, and a general printing law was enacted (ch. 243, Laws of 1874). Provision was made for the purchase of paper by the state, and the secretry of state, state treasurer and attorney general were constituted printing commissioners, to exercise a general supervision over the matter of state printing. The legislature of that year clearly indicated a purpose to have the reports of all departments reduced to the smallest size consistent with a proper presentation to the public of all the essential facts and circumstances connected with the administration of the department making the report.

Independently of this circumstance it has been believed that tabulated statements contained in a small compass, and thus presenting essential facts in a condensed form, are ordinarily more desirable than extensive details covering a much larger space, but containing little, if any, additional information.

Were the opposite opinion entertained, and were it believed to be in accordance with law, it would be an easy matter to print the detailed statements referred to, or the principal portions of them, indeed much easier than to tabulate the information which they contain. The statements of companies transacting business in the state the present year would increase the size of the report so as to make it a volume of about six hundred pages, and to print such a volume is believed to be totally unnecessary, especially as the statements are on file in this office, and are always accessible to those who may desire to see them.

It may be added that the practice of this department in the matter referred to accords with that which is being adopted by other

- states. The fire insurance report of Iowa, for instance, in 18681869 , contained 480 pages, while the report of the business of all , companies, fire and life, for $1875,18 \% 6$ and $18 \%$, contained an average of less than 100 pages each. The California report for $18 \%$, was less than half the size of that for $18 \% 4$. In the last named state, by act of March $11,18 \% 6$, the insurance report is limited to one hundred pages. The Maryland report for 1875 contained only about eighty pages. The reduction in all of these cases arose from the omission of the statements filed by companies. In other states again, the insurance report is given as a part of the report of the office having charge of insurance supervision. The reason why this course has not been adopted in this state has already been set forth.

In addition to the foregoing, it may be proper to state that each company is required to have its annual statement published in the official state paper, and in one paper of general circulation published in the city of Milwaukee. This publication is made immediately after a company has been licensed, and hence information is given to the public of the condition of such company early in the year.

Besides this, the practice of this department has been to prepare early in March a summary showing the condition of all fire and marine companies that have been licensed, and to circulate copies of the same extensively for public information.

The foregoing brief explanation is thought to be proper in view of the fact that the practice referred to is different from that which is adopted in many of the states in the publication of insurance reports.

The present year, for reasons which will be set forth in part II, portions of the statements filed by life companies are given, there being but few of such companies transacting business in the state.

## STATE SUPERVISION OF INSURANCE COMPANIES.

The supervision of the business of insurance by means of separate insurance departments, which now exist in most of the states, is of recent crigin. A separate department, charged exclusively with such supervision, was established in Massachusetts in 1855; in New York in 1859; in Connecticut in 1865; and at a later date in all or nearly all of the other states in which separate insurance departments exist.

In most of the states there are officers appointed on whom devolve no other duties than those of insurance supervision; while in others, some elective state officer is ex officio commissioner or superintendent of insurance. In California, Connecticut, Indiana, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New York, Ohio, Pennsylvania, Rhode Island and Tennessee, there are separate insurance officers. In Alabama, Arkansas, Colorado, Iowa, Illinois, Mississippi, Nebraska, Virginia and West Virginia, the auditor of state acts as insurance commissioner. In Delaware, Louisiana, New Jersey, North Carolina, Oregon and Wisconsin, the duties of supervision devolve on the secretary of state. In Florida the state treasurer, comptroller and attorney general form a board of insurance commissioners. In Georgia, South Carolina and Texas, the comptroller general acts as insurance officer. In Vermont the secretary of state and treasurer perform such duties.

The general provisions of law relative to supervision are substantially the same in all of the states, and the reports made to the various departments are alike in their general features.

The insurance department of this state was established in 187 , by chapter 56 of the laws of that year, and the secretary of state was, by the same act, made ex officio commissioner of insurance.

Since that time there bave been several amendatory acts, but none changing or materially modifying the general system of supervision.

The fact that the secretary of state is required by the corstitution and laws to act as a commissioner of school and university lands, and auditor, in addition to performing the usual duties of secretary of state, and that he is also charged with insurance supervision, renders it impossible to give as much personal attention to any one of the duties thus devolving on him as may be done in those states in which there is a greater division of such duties.

This subject will, however, be referred to in the general report of this office for the present year, and hence it is not deemed necessary to dwell on it here.

It need only be added that during the past year all means allowed by law have been used to secure the public against the transaction of business by companies of questionable standing, or not justly entitled to confidence and deserving of patronage.

A close scrutiny in this regard has been the more necessary in view of the repeal by the legislature of $18 \% 6$, of the provisions of law requiring each company seeking admission into the state to pay the sum of five hundred dollars as a license for the first year, and soon after such repeal the rule was adopted that no company would be admitted without first having an examination of its affairs made either by the insurance officer of the state where such company was located, or by this department. This is still believed to be a reasonable requirement and one that should not be departed from.

The matter of insuranse having been considered as a very important one to the people of the state, as much personal attention as possible has been continually given to the matter of insurance supervision.

## COMPANIES TRANSACTING BUSINESS IN THE STATE IN $18 \% 6$.

During the year 18\%6, one hundred and forty-four Fire and Marine companies, including those of this state, were licensed by this department. Of this number, the following twel ve were admitted after the publication of the last report and before the close of the calendar year:

The following companies which did not transact business in the state in $18 \%$, have been admitted the present year:

| Name of Company. | Location. | Bate of Admission. | Capital. |
| :---: | :---: | :---: | :---: |
| Amity | New York, N. Y.......... | April 17, 1877 | \$200,000 |
| Commerce Fire | New Sork, N. Y | April 17, 1877 | 200,000 |
| Farragut Fire............................ | New York, N. Y | Mar. 10, 187\% | 200,000 |
| New York City ..................... .. | New York, N. Y.. ....... | April 12, 1877 | 200,000 |
| Resolute Fire. | New York, N. Y......... | April 17, 1877 | 200,000 |
| Trade | Camden, N J............. | Feb. 26, 1877 | 200,000 |
| La Caisse Generale . . . . . . . . . . . . . . . | Paris, France....... .... | April 25, 1877* | 321,936 |

## COMPANIES WITHDRAWN.

The following companies that transacted business in the state in 18\%6, have not complied with the requirements of law, and have not been licensed for the current year:

> Brewer's Fire Ins. Co., of America, Milwaukee. $\dagger$
> Alliance, Boston, Mass.
> Armenia, Pittsburg, Pa.
> Columbia Fire, New York, N. Y.
> Farmers' \& Drovers', Louisville, Ky.
> Franklin, Wheeling, W. Va.
> Germania Fire, Elizabeth City, N. J.
> Globe, C'icago, Ill.
> Home Ins. \& Banking Co., Galveston, Texas.
> People's, Memphis, Tenn.
> Planters', Memphis, Tenn.
> Southern Underwriters, Raleigh, N. C.
> Tradesmen's Fire, New York, N. Y.

COMPANIES NOW TRANSACTING BUSINESS IN THE STATE.

During the present year, up to date of this report, one hundred and thirty-nine companies have been licensed. Of these, nine are Wisconsin companies, one hundred and ten those of other states of

[^5]the Union, and fourteen those of foreign countres. They may be classified as follows:
Wisconsin foint stock comparies ..... 3
Wisconsin mutual companies ..... 5
Companies of other states ..... 113
Joint stock comapanies of other countries ..... 15
Marine compan.es. ..... 3

## HICENSES REVOKED。

> Continental of New York, N. Y.*
> Globe, Chicago, Ill.

The paid capital, net assets, and re-insurance reserve, and also the risks written, premiums received, and losses paid, of the different classes of companies enumerated, are given in the following tables:

| Companies. | Paid capital. | Net assets. | $\begin{gathered} \text { He-insurance } \\ \text { reverve. } \end{gathered}$ |

| Wisconsin mutual companies | 22, 180, 55\% | 310, 743 | 170, 165 |
| Companies of other states | 4, 334, 791,277 | 41, 803, 354 | 22, 645, 031 |
| Companies of foreign countries | 1,176, 704, 893 | 10, 649, 691 | 5, 164,258 |
| Marine companies......... | 201,563,605 | 1, 793, 410 | 1,310,304 |
| Total .................................. | \$5, 785, 794, 120 | \$55, 013, 714 | \$29, 537, 444 |

For a more detailed account of the standing and business operations of the different classes of companies enumerated, reference is made to the tables given herein.

[^6]
## INCREASE OF CAPJTAL.

The increase of capital of joint stock companies during the past year, is given in the following table:

| Companies. | Paid capital in 1875. | Paid capital in 1876. | Increase. |
| :---: | :---: | :---: | :---: |
| Connecticut Fire........................................ | \$500,000 | \$1,000, 000 | \$500, 000 |
| Detroit Fire and Marine . . . . . . . . . . . . . . . . . . . . . . . . . | 150,000 | 250,000 | 100,000 |
| Orient, Conn. | 400, 000 | 500,000 | 100,000 |
| Phœnix, Conn | 600,000 | 1,000,000 | 400,000 |
| St. Joseph Fire and Marine | 200, 000 | 220,000 | 20,000 |
| Springfield Fire and Marine | 600,000 | 750,000 | 150,000 |
| Union, Pa.. | 138,670 | 200,000 | 61,330 |
| Washington Fire and Marine............ ............ | 300,000 | 400, 000 | 100,0:0 |
| Westchester Fire | 250, 000 | 300,000 | 50,000 |
| Total ............................................... | \$3, 138, 670 | \$4, 620,000 | \$1, 481, 330 |

## DECREASE OF CAPITAL.

The decrease of capital in joint stock companies during the past year, is given in the following table:

| Companies. | $\begin{aligned} & \text { Paid capital } \\ & \text { in } 18 \div 5 . \end{aligned}$ | Paid capital in 1876 | Decrease. |
| :---: | :---: | :---: | :---: |
| Mississippi Valley ........... | \$250, 000 | \$200,000 | \$50,000 |
| Paterson Fire | 204, 200 | 202,700 | 1,500 |
| Total. | \$454,200 | \$402, 700 | \$. 1,500 |

## BUSINESS IN WISCONSIN IN $18 \% 6$.

The year of 1876 was comparatively free from fires so far as this state is concerned, and though insurance business partook of the general depression that existed in nearly all departments of business, yet the year was on the whole rather favorable for the companies; and the amount of losses incurred was less than for many preceding years.

The companies that transacted business in the state in 18\%6, and that have reported to this department, represented a paid capital of about seventy millions of dollars. The total amount of risks writ-
ten on property issued in the state during that year was $\$ 123,614,-$ 294 ; premiums received thereon, $\$ 1,798,428$; losses paid, $\$ 634,674$; losses incurred, $\$ 613,620$. The risks written in 1875 amounted to $\$ 147,440,316$; premiums received, $\$ 211,031$; losses paid, $\$ 1,87^{77}, 111$. In $18{ }^{7} 4$, the risks written were $\$ 154,795,630$; premiums received, $\$ 2,2 \% 1,059$; losses paid, $\$ 1,010,023$. It therefore appears that the ratio of losses to premiums received in 1876 , was 34 per cent.; in 1875,89 per cent.; and in 1874,65 per cent. The proportions of this business transacted by the different classes of companies named during the years stated, are shown in the following table:

| Companies. | $\begin{aligned} & \text { Risks } \\ & \text { Written. } \end{aligned}$ | Premiums <br> Received. | Lnsses Paid. |
| :---: | :---: | :---: | :---: |
| 1876. |  |  |  |
| Wisconsin joint-stock companies...................... | \$3,200,204 | \$165, 234 | \$49, 796 |

| Total | \$154, 795, 630 | \$2,271, 059 | \$1,010, 023 |

## SUMMARY OF BUSINESS OF WISCONSIN COMPANIES.

The aggregate business of Wisconsin companies for the year 1876, was as follows: Net risks in force December 31, 1875, $\$ 96,472,884$;
risks written during the year, $\$ 69,734,345$; re-insurance reserve, $\$ 674,595$; net assets, $\$ 2,391,625$ : premiums received, $\$ 767,229$; expenses, $\$ 285,361$; losses paid, $\$ 417,857$; losses incurred, $\$ 339,544$ The ratio of losses paid to premium received was 54.46 per cent. The cash income of the joint-stock companies exceeded the expenditures by $\$ 46,736$. The expenditures of one of the mutual compamies exceeded the income, the excess being $\$ 41,556$. The income of the other mutual companies exceeded the expenditures, the total excess being $\$ 98,626$.

The following table shows net assets and re-insurance reserve of Wisconsin companies, since the organization of the insurance department:

| Number of Companies. | Year. | Net Assets. | Re-insurance Keerve. |
| :---: | :---: | :---: | :---: |
| Eight .... | 1876 | \$2,391,625 | \$674,595 |
| Nine | 1875 | 2,855,481 | 744, 378 |
| Ten | 1874 | 3,251,215 | 906, 974 |
| Ten .. | 1873 | 2,795,551 | 881, 860 |
| Ten . . . . . . . | $18 \% 2$ | 2,644,103 | 780,942 |
| Eleven . | 1871 | 2,472,392 | 618,641 |
| Ten | 1870 | 2,911,012 | 569,899 |
| Total . |  | \$19, 321,379 | \$5,177,029 |

For other items of interest relative to the standing and business operations of Wisconsin companies, reference is made to the tables.

## ASSETS AND INVESTMENTS.

The total assets of Wisconsin joint-stock companies, as shown by the last statements, is $\$ 1,13 \widetilde{0}, 654$, a decrease from the previous year of $\$ 447,151$. The total amount of assets of the mutual companies is $\$ 1,307,131$, a decrease from that shown by the statements of 1875 of $\$ 40,96 \%$. These assets are described in detail in the statements referred to, which are published in full in this report.

The following is a summary of the different classes of assets for the last four years:

|  | 18\%6. | 18750 | 18才如. | 1873. |
| :---: | :---: | :---: | :---: | :---: |
| stock companies. |  | - |  |  |

| Miscellareous. | 5,007 | 4,714 | 6,922 | 7,071 |
| Total | \$1,307, <95 | \$1, 391, 273 | \$1,665, 51 \% | \$1,802, 806 |
| Donbtfulassets. . | 864 | 2,575 | 8,791 | 104 |
| Total | \$1, 307, 031 | \$1, 388, 698 | \$1, 656, 726 | \$1,802,702 |

In the insurance report for $18 \% 5$, reference was made to various acts under which Wisconsin companies were organized. In examining the condition of these companies, and the business which they transact, it is necessary to keep these acts in view, as the general insurance law of the state, chapter 56, general laws of 1870 , provides that all companies organized previous to the passage of that law, are subject to its provisions, except that the capitals of
such companies may continue of the amounts and character named in their charters, and that the investment of capital and assets, may remain the same as prescribed therein, and that in general all such companies shall be entitled to all the privileges and powers granted by their charters.

The Brewers' Fire Insurance Company of Milwaukee re-insured its risks in November last in the Home Insurance Company of New York and hence has discontinued business.

The Hekla Insurance Company transacts business in Illinois and in this state.
The North Western National transacts business in this state and also in Connecticut, Colorado, California, Indiana, Illinois, Iowa, Kentucky, Kansas, Maryland, Minnesota, Missouri, Michigan, Maine, Massachusetts, New York. This is the only Wisconsin company that transacts a marine business. During the year 1876, marine risks were written by it amounting to $\$ 5,473.980$, premiums received $\$ 53,554$. Net amount paid for losses during the year $\$ 81.268$. Net amount of risks in force at the ond of the year, $\$ 153,000$. The business in Wisconsin was : risks written $\$ 837,105$; premiums received, $\$ 6,863$; losses paid on risks written, $\$ 11,12 \%$.

The Milwaukee Mechanics' Mutual transacts business the present year in Iowa, Illinois, Indiana, Missouri, Ohio, Minnesota, Pennsylvania, Colarado, and Wisconsin.
The remaining companies do no business outside of Wisconsin.
At the last session of the legislature the following law was enacted relative to the Madison Mutual Insurance company:

## CHAPTER 147.

An Act relating to the Madison Mutual Insurance Company, and amenda tory of chapter 329, private and local laws of 1863.

The people of the state of Wisconsin, represented in senate and assembly, do enac ${ }^{t}$ as follows:
Section 1. Chapter three hundred and twenty-nine of the private and $10^{-}$ cal laws of 1863 , entitled "An act to amend chapter two hundred and thirteen of the private and local laws of 1859 , entitled 'An act to amend chapter three hundred and ninety-four of the laws of 1851, entitled 'An act to incorporate the Madison Mutual Insurance Company,'" is hereby amended as follows: Section 1. The third section of chapter 394 of the laws of 1851, entitled "An act to incorporate the Madison Mutual Insurance Company," is hereby amended so as to read as follows: Section 3. Every person who
shall at any time become interested in said company by insuring therein, and the administrators or assigns of said persons continuing to be insured therein agreeable to the provisions of this act where a premium note has been given on account of the per centage paid for premiums on such insurance subject to assessment, shall be deemed and taken to be members of said company for and during the term of their respective policies, and no longer, and shall at all times be concluded and bound by the provisions of this act, also any person who shall deposit as a part of the guaranty fund as hereinafter provided, with said company, any sum of money or in lieu thereof bonds or other collateral of the full value of the money subscription to be approved by the executive committee, and in sums not less than one hundred dollars, shall be deemed and taken to be members of said company and entitled to all the privileges thereof. The said company is hereby authorized and empowered on such terms under this act as its board of directors $m \cdot y$ see fit, to receive subscription and deposit of a guaranty fund of one hundred thousand dollars or more as a further security to its policy holders, and to issue certificates in such form as the directors may prescribe to the depositors thereof, entitling them to the privileges of membership and depositors. The money, bonds or other securities so deposited shall be held by the company in trust for the persors making such deposit, and such persons shall be entitled to and shall receive the interest or earnings of such money, bonds or other securities, and such earnings of the company if any shall be from time to time divisible as profits under any law of this state in return for such guaranty fund deposited, the same being deposited with the company and held by it as a guaranty fund for any and all liabilities against the company, and deemed a part of the assets thereof, but shall only be applied in payment of such liability after all other assets of the company, except the premium notes taken previous to the passage of this act, shall have been exhausted. The said deposits and the certificates tnereof shall be assignable or transferable in such manner as shall be provided by the by-laws and the moneys or proceeds of such deposits collected from time to time may be reinvested in any manner that it is permitted to invest the funds of the company, and as the directors shall order, or the company may purchase the same from its surplus, and it shall be lawful for said company to reinsure its risks in any solvent company authorized to transact business in this state, to the satisfaction of the insured or the approval of the secretary of state. Whenever the amount of one hundred thousand dollars shall have been deposited, the secretary of the company shall call a meeting of the members thereof at the ottice of said company, by publishing a notice in one or more of the daily papers of Madison, ten days prior to the time of such meeting, for the purpose of electing, and they shall have power to elect a board of directors, of such members, not less than five nor more than nine, as a majority of the members, including the above mentioned depositors, present, shall by resolution determine. The directors first elected shall be classified into three classes by lot, so that the term of one class shall expire on the third Wednesday of January, 1878, the second one year, and the third two years thereafter, but all shall hold until their succes-
sors are elected; and there shall be an annual election on the third Wednes. day of January in each year, to elect directors to fill vancancies and terms then expiring. The business and property of the company shall be managed by the board of directors so elected. The company shall have power in their discretion to make any and all insurance which it is or may hereafter be authorized to make to any person or persons with whom it may agree to that effect, for a specific rate of premium to be paid in cash in the same manner and to the same extent that insurance companies, other than mutual insurance com. panies are accustomed to do, and may lawfully do under any law of this state, and iv all such cases the insured shall not become a member of the company, or be in anywise entitled to any share of the profits, premium nor earnings nor in anywise liable for the losses, debts or liabilities of said company, and all premiums received for such insurance shall be passed to the general credit of the company, and all lossess growing out of said special policies, shall be paid in like manner as losses under ordinary policies of the company. The annual meeting for the electing of directors shall be held on the third Weduesday of January in each year, at the office of the company, in the city of Madison, Wisconsin, at such hour of the day as the board of directors for the time being shall designate, of which election public notice shall be given in one or more of the newspapers published in the city of Madison at least thirty days preceding such election, and such election shall be holden under the inspection of the board of directors, and such election shall be made by ballot and by a plurality of the votes of the members present, or their proxies, allowing one vote for every one hundred dollars, each member shall have insured in said company : and each dollar subscribed shall represent one hun. dred dollars insured, and equal the premium note given for that amount of insurance, and entitle such subscriber to one vote, and any member may yote in person; or by proxy at his pleasure. At any election of directors of said company, including the first election herein authorized, after the subscription of such guarantee fund, and his membership shall be ascertained by the records and entries in the office of said company, or by certificates above stated, and no oath shall be administered to any member oftering to vote in person, or required to be attached to his appointment, when offering to vote by proxy.

Section 2. All acts or parts of acts conflicting with the provisions of this act, are hereby repealed.

Section 3. This act shall take effect from and after its passage.
Approved March 6, 1877.
It may be remarked with reference to such acts as the foregoing, that they are not in conflict with the constitutional amendment adopted in $18 \% 1$, prohibiting the granting of corporate powers by special acts, except to cities.

In Attorney General v. Railroad Companies, 35 Wis., 425 , it swas decided that the amendment of $18: \% 1$ related only to asts of incor-
poration granted after its adoption, and does not impair the power of alteration or repeal reserved to the legislature by the state constitution, in respect to charters granted prior to the adoption of that amendment.

On the 18th of May a letter was addressed to the Secretary of the Madison Mutual Insurance Company, requesting information as to what had been done under the act abore given. The inquiry was promptly answered, and a copy of resolutions adopted by the directors on the 4th of April, was furnished. The following is a copy of the principal one of said resolutions:

Resolved, That the directors of the Madison Mutual Insurance Company, for and on behalf of the company, hereby accept the amendment to the charter, enacted by the recent act of the legislature, entitled, an act relating to the Madison Mutual Insurance Company, and amendatory of chapter 328, private and local laws of 1863 , approved March 6th, 1877, and that the said company will ; eceive subscriptions to a guaranty fund of two hundred and fifty thousand dollars, and such additional sum thereto as the board of directors may hereafter prescribe, in accordance with said act. Subscribers should deposit with the secretary such bonds and mortgages, or bonds of the United States or other securities, as the committee hereinafter named shall approve, as shall be equal to their par value to the amount subscribed by each subscriber respectively, or in lieu thereof money to such amount, or such part thereof as such securities shall, at their par value, come short of, which deposits shall be held by said company according to the terms and provisions of the aforesaid act, and of these resolutions, and as may hereafter be prescribed by the law of the company, not inconsistent with said act. The subscribers to such fund shall be at liberty to exchange the securities deposited by them respectively, for others, to the approval of the executive committee, but they shall at all times keep their subscriptions good to the full amount thereof. The interest which may accrue upon all such securities and money so deposited, shall be kept separate and apart from the other funds of the company, unless required to pay liabilities, according to and in the cases provided in said act, and be paid to the depositors thereof, respectively, as collected, so that each shall receive the interest produced by the securities deposited by him respectively, and not share in the interest produced by the depositors of other securities; and the securities deposited by each shall be kept in a separate envelope, by the secretary, and the company shall be answerable for the safe keeping thereof. Dividends from the earnings of said company, aside from such securities, shall be made, as the directors may, from time to time direct, in pursuance of any law of this state; and in case of losses which must be paid from such guarantee fund the same shall be ratably apportioned according to the amounts subscribed by the several depositors. But the said subscribers shall not be liable for any
debts or any contracts of said company beyond the amount of their subscriptions respectively.

The remaining resolutions provided for the appointment of a committee for the purpose of carrying the foregoing into effect, and provided also that as soon as the sum of one hundred thousand dollars should be subscribed and securities therefor deposited, the secretary should call a meeting of themembers of said company, as provided in said act.

The secretary of the company also furnished a statement showing the assets and liabilities of said company on the first day of May last, which statement is published at the proper place in this report, and referred to under the heading of examinations. No act was passed at the last session amendatory of the charter of any of the other insurance companies of the state, and hence there is nothing to be said on the subject here.

## HAIL INSURA NCE COMPANIES.

On June 30, 1876, the Union Mutual Hail Insurance Company, of Princeton, was incorporated, under the provisions of chapter 196, laws of 1876 , and has since that time transacted business in this state.

The Mutual Hail Insurance Company, of Milwaukee, though not subject to the general provisions of the insurance law, has annually filed a statement in this department, showing its condition. The statements of these companies are printed in full in this report.

There seems to be, at present, no law regarding the transaction of busines in the state by Hail insurance companies of other states. It is therefore recommended that a law be enacted relative to such companies, and providing the terms and conditions upon which they may transact business in this state. As the law now stands, there being no prohibition, it seems that Hail companies of other states may transact business here without a violation of law. This is manifestly unfair to home companies, they being required to pay taxes and make regular reports to this department. Until the present year no case arose rendering such legislation necessary.

TOWN INSURANCE COMPANIES.
By chapter 343, laws of $18 \% 6$, all laws existing at that time relative to town insurance companies, were codified and consolidated.

This was amended by chapter 263, laws of 187\%. There was also enacted chapter 82 , entitled "An act relating to town insurance companies."

These acts are as follows:

## CHAPTER 263.

An Act to amend chapter 2,8 and 10 of chapter 344 of the general laws of 1876, entitled, "An act to codify and consolidate all laws in relation to town insurance companies."

## The people of the state of Wisconsin, represented in senate and assembly, do enact

 as follows:Section 2. Section 2, chapter 344, laws of 1876 , is hereby amended by adding after the word "president," "one secretary and one treasurer." Such treasurer shall, before entering upon the duties of his office, execute and file with the secretary of such company a bond, conditioned for the faithful dis. charge of the duties of his office, with two or more good and sufficient sureties, payable to such company, in the penal sum of not less than five thousand dollars, and in such further sum as such directors may order, such bond and sureties to be approved by the president and a majority of the directors of such company.
Section 2 . Section 8 of said chapter is hereby amended by adding at the end of said section : provided, $\%$ however, that if any loss shall occur during the first eight months in any one year, the directors may, after the amount of such loss has been ascertained, by a vote of a majority of the directors, at any meeting called for the purpose of making an assessment, hire an amount of money, at a rate of interest not exceeding eight per cent, sufficient to pay such loss, and in such case they shall include the interest with such amount in their assessment, and may delay the secretary from issuing the aforesaid notices until such time as they may deem best, but not later than the first day of October following such loss.
Section 3. Section ten of said chapter is hereby amended by adding after the word "majority" the words, " of two-thirds of all the shares or stock composing such company, present at such meeting, and all acts to which this section is amendatory, shall be construed so as not to disorganize any town insurauce company organized under the laws of 1874, and all acts and proceedings of such town insurance companies are hereby legalized and declared valid to all intents and purposes."
Section 4. This act shall take effect and be in furce from and after its passage and publication.
Approved March 8, 1877.

## CHAPTER 82.

An Act relating to town insurance companies.
The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
Section 1. Any town insurance company now or hereafter to be organized under the laws of this state, in any town or number of adjoining towns contiguous to any incorporated city, may, if the board of directors of such com. pany so choose, keep its general office and hold any or all of its business ness meetings in such city.

Section 2. All acts and proceedings of such insurance companies heretofore had or done at meetings held in such city, or in or through its business (ffice in such city are hereby legalized and declared valid for all purposes.

Section 3. This act shall take effect and be in force from and after its passage and publication.
Approved March 1, 1877.
As was stated in previous reports, town insurance companies are not required to report to this department, and hence nothing more can be done than to give the acts which provide for their organization, and by which they are governed in the transaction of business. It is believed that the law should be so amended as to require reports to be made to this office, and that such companies should be made subject to its supervision.

## UNAUTHORIZED INSURANCE.

Notwithstanding that the laws of this state are quite liberal in relation to allowing the transaction of business by companies of other states, it occasionaliy happens that some company seeks to transact business in the state without being authorized to do so. It has been a matter of surprise, too, that some persons desiring insurance have occasionally patronized such companies thus attempting to violate the law. It would seem that the latter circumstance would of itself be sufficient to throw discredit on any company to such an extent as to prevent it from securing any business. Specious arguments are however used, and small reductions from ordinary rates are given, and thus occasionally a few policies are written.

Persons insuring with such companies should not be disappointed if, in case of loss, they fail to find the representations fulfilled which are made when insurance is effected. And companies not comply-
ing with the state laws, being under no obligation to not remove suits into the federal courts, may annoy and embarrass policy holders to a great extent, even if such companies remain solvent. It is not often that such insurance is sought to be effected through agencies in the state, but names of persons having property to be insured are obtained, and then such persons are written to from offices outside of the state.

It appearing, however, that in a few cases during the past winter, agents solicited insurance for companies not authorized to transact business in Wisconsin, the following notice was published in the official paper, and other newspapers in different parts of the state, and it was also printed on the last page of the summary, showing the condition of insurance companies, which was distributed in March:

## insurance notice.

> State of Wisconsin, Secretary's Office, Department of Insurance, Madison, March $15,1877$.

It having been represented to this department that some persons not authorized to act as insurance agents have recently solicifed insurance in this state on behalf of companies that have not complied with the laws thereof, and that have not been licensed to transact business therein, it is thought proper to invite the attention of all concerned to the provisions of law relating to the protection of the public against unauthorized insurance agents.

By section 22, chapter 56, general laws of 1870, it is provided that the term "agent," as used in that section, "shall include an acknowledged ngent, surveyor, broker, or any otber person who shall receive any application or make any contract for insurance, or collect or receive any premiums, or deliver any policy, or in any manner assist or aid in the transaction of the business of any insurance company not incorporated by the laws of this state."

The following sections of chapter 13 of the general laws of 1871 also relate to the same subject:
"Section 1. Whoever solicits insurance on behalf of any fire, marine, in. land, life, or accident insurance company, or transmits for any pers in other than himself an application for insurance, or a policy of insurance, to or from said company, or advertises that he will receive or transmit the same, shall be held to be an agent of such company to all intents and purposes, unle:s it can be shown that he receives no commission or other compensation or consideration for such service.
"Section 4. Every agent soliciting insurance shall exhibit his certificate of anthority, when requested to by any person, and a refusal or failure so to
do shall be presumptive evidence that such agent is doing business contrary to law.
"Section 5. Whoever violates the provisions of this chapter shall be pun. ished by a fine not exceeding five hundred dollars, nor less than fifty dollars for each offense, which shall be sued for and recovered in the name of the state by the district attorney of the county in which the company or the agent or agents so violating shall be located or doing business, and one-half of said penalty when recovered shall be paid into the treasury of said county, and the other half to the informer of such violation. In case of the nonpayment of such penalty, the party su offending shall be liable to imprisonment for a period not exceeding six months, in the discretion of any court having cognizance thereof; such penalties may also be sued for and recovered in the name of the state by the attorney general, and when sued for and collected by him, shall be paid into the state treasury."

It is hoped that agents of companies authorized to transact business in the state will coöperate, so far as practicable, with this department, in securing a full compliance with the insurance laws. PETER DOYLE, Secretary of State, and ex-officio Commissioner of Insurance.

It will be seen that the above provisions of law are ample to secure the public against the transaction of business by unauthorized insurance agents, and that any person may give information relative to the violation. Every practicable measure within the limits allowed by law will be adopted by this department with a view to prevent such unauthorized insurance.

## LEGISLATION.

The legislature of 1877 enacted four laws relating to the subject of insurance, besides those relating to town insurance companies, to which reference has already been made. These acts are as follows:

CHAPTER 16.
An Acr to amend section 1, chapter 64, of the general laws of 1872, entitled "An act to provide for the enforcement of laws in certain cases."

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
Section 1. Section 1, of chapter 64, of the general laws of 1872 , is hereby amended so as to read as follows: Section 1. If any insurance company or association shall make application to change the venue or remove any suit or action heretofore commenced or which shall be hereafter commmenced in any court of the state of Wisconsin, to the United States circuit or district
court, or to the federal court, contrary to the provision of any law of the state of Wisconsin, or contrary to any agreement it has made and filed, or tuay make and file as provided and required by section twenty-two, chapter fiftysix, of the general laws of Wisconsin for the year 1870, or any other provisions of law now in force in said state, or may hereafter be enacted therein, it shall be the imperitive duty of the secretary of state, or other proper state officer, to revoke and recall any authority or license or certificate to such company to do and transact any business in the state of Wisconsin, and no renewal or new license or certificate shall be granted to such company for three years after application, and such company shall thereafter be prohibited from transacting any business in the state of Wisconsin, until again duly licensed; provided, that the provisions of the foregoing section shall not apply to any company having made such application and obtained an order for removal prior to January 1, 1877, and that in case the license of any company has been revoked for such cause, the secretary of state may re-license such company, and continne to do so on its compliance hereafter with the provisions of chapter 56 , of the general laws of 1870 , and acts amendatory thereof.

Section 2. This act shall take effect and be in force from and after its passage and publication.

Approved March 13, 1877.

## CHAPTER 182.

An Act to amend section 1, of chapter 299, of the laws of 1873, entitled "An act to amend chapter 56, general laws of 1870 , entitled 'An act to provide for the incorporation and government of fire and inland navigation insur. ance companies '"

## The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

Section. 1. Amend section one (1), of chapter two hundred and ninety-nine (299), of the general laws of 1873 , so that the section, when amended, shall read as follows: Section 1. Section thirty-three (33), chapter fifty-six, general laws of 1870 , is hereby amended by striking out the word "incorporated," where it occurs in the thirty-fourth (34th) line, as printed, so as to read as follows: "Section 33. It shall be the duty of every company transacting the business of insurance, under this act, to include in its annual statement a statement showing the amount received in cash premiums for insuring property situated in this state, during the year for which such statement is made, also amount received in premium notes, in cash notes, and the amount received from other sources; and showing also the amount paid in this state for salaries, commissions to agents, and for losses during the same period. And each such company, before receiving a license to transact business for the current year, shall pay to the state treasurer a sum equal to two per centum of the gross cash receipts of said company in this state, including all notes taken for premiums during the year for which such statement is made; provided,
all companies chartered or organized under the laws of this state may be allowed to deduct from such gross receipts their office expenditures and offlcers' salaries; provided, that this act shall not be construed to prohibit cities and villages having an organized fire department from collecting the two (2), per cent. now allowed by law on the receipts of each insurance company within their respective limits, to be applied to the support of the fire department of suck cities and villages."
Section 2. This act shall take effect and be in force from and after its passage and publication.
A pproved March 7, 1877.

## CHAPTER 233.

An Act relating to the capital of fire and inland navigation insurance companies [of] other states and of foreign governments, desiring to transact business in this state.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
Section 1. No fire or inland navigation insurance company organized or incorporated under the laws of any other state of the United States or of any foreign government, shall hereaiter be admitted to transact business in this state, unless possessed of a paid up capital of two hundred thousand dollars; provided, however, that the provisions of this act shall not apply to any company that was duly licensed to transact business in the state during the year 1876, and that has or shall have complied with the requirements of law relative to obtaining a license for the present year; and provided, that mutual companies of other states may be admitted to transact business in this state, in case the states where such mutual companies are located admit the mutual companies of this state, by complying in all respects with the conditions and obligations imposed by the laws of such states on the mutual companies of this state.

Section 2. This act shall take effect and be in force from and after its passage and publication.

Approved March 8, 1877.

## CHAPTER 281.

An Act relating to fire insurance companies doing business in the state of Wisconsin.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
Section 1. All fire insurauce companies doing business in the state of Wisconsin, who may take any promissory note or obligation in writing from any person, for which the consideration, in whole or in part, shal lbe the issuing of a policy of insurance, shall at the time of the taking thereof, insert therein
in the body of such promissory note or obligation in prominent and legible writing or print, the words: "Given in payment for a policy of insurance. If transferred either before or after maturity, this obligation shall be subject to all defenses, as if owned by the payee herein named." Provided, that this section shall not apply to ordinary notes taken by insurance agents for premiums and policies, issued on a cash basis, and which may be received by such agents in payment of premiums.

Section 2. Such promissory notes or obligations shall be non-negotiable, and shall be subject to all defenses the maker or makers thereof may have against the original promisee, in whosoever hands the said note or obligation may be. Provided, also, that all notes mentioned in section one, of this act, hereafter executed, shall, if the company to whom the same were given become insolvent or bankrupt, be wholly void in whosoever hands the same may be, so far as the premiums for which the same was given accrued after such insolvency or bankruptcy.

Section 3. Any fire insurance company violating the provisions of section one of this act, by neglecting and refusing to insert in notes and obligations taken by them for insurance, the words required by section one of this act, shall forfeit their license to do business in this state.
Section 4. Should any fire insurance company doing business in this state after having issued a policy of insurance, and taken in payment therefor any note or obligation, and before the expiration of said policy the said insurance company shculd become insolvent, fail, or become bankrupt, the note or obligation given in payment for such policy shail become utterly void so far as the premium for which the same was given accrued after such insolvency or bankruptcy, and of no effect in whosoever hands the same may be.

Section 5. All acts or parts of acts conflicting with the provisions of this act, are hereby repealed.
Section 6. This act shall take effect and be in force from and after its passage and publication.
Approved March 8, 1877.
Of the foregoing acts, chapter 16 will be referred to when speaking of the removal of suits from state to federal courts, on subsequent pages.

Chapter 182 was enacted for the purpose of correcting a defect in section 33 , chapter 56 , general laws of 1870 , as amended by subsequent acts. Under the law, as it stood previous to the passage of the act of last winter, insurance companies were required to report in their annual statements, the amounts received in the state during the year for which the statements were made, and were required to pay a tax of two per cent. thereon. It sometimes happened that property in the state, especially some of that owned by railway corporations, was insured in New York city, but in compa-
nies doing business in Wisconsin. The premiums not being received in this state, they were not included in the annual reports, and were not, under the law as it existed, subject to taxation. This was manifestly unfair, and hence the passage of the act referred to. Under its provisions each company is required to report the amount received for insuring any property situated in the state, no matter where the premiums are received, and to pay the tax of two per cent. on such amount. This is certainly fair and equitable, and cannot justly be objected to by insurance companies.

Chapter 233 provides, among cther things set forth in the act, that no fire or inland navigation insurance company shall be admitted to transact business in the state unless it has a paid up capital of at least two hundred thousand dollars. This is believed to be quite reasonable, and a provision that tends to the security of policy holders. Previous to the passage of this act only a capital of one hundred thousand dollars was required. While a company with such a capital may do a very secure business in the state where located, or even to a limited extent beyond it, yet it seems that, in general, companies extending their business to several states should have a larger capital.

Our neighboring states of Iowa, Michigan and Minnesota have, for some time past, required companies transacting business within their territories to have a paid up capital of two hundred thousand dollars, and it is believed that there is no good reason why Wisconsin should not require the same amount on the part of companies applying to transact business.

This is the more necessary, in view of the repeal, by the legislature of $18 \% 6$, of the provision requiring a payment of five hundred dollars by companies applying for admission, as a license for the first year. After the repeal of that provision it not unfrequently happened that applications were made by companies possessing small capitals, as well as by a few others, desiring evidently to experiment in the state respecting the obtaining of business, and if unsuccessful to withdraw therefrom. This rendered necessary a strict examination respecting the condition of such companies, and the rule already referred to was adopted, that no company would be admitted without an examination of its affairs being made either by this department or the insurance officer of the state where the company was located, the latter being allowed by the law of the
state to answer in lieu of a personal examination. The provisions of this act are not made applicable to any company that transacted business in 1876 , and that continued to comply with all legal requirements.

Chapter 281 providing, among other things, that premium notes shall be void in case the company holding them becomes insolvent, and prescribing the form for such notes, is believed to be an act which will tend greatly to the protection of policy holders who insure with companies taking such notes on account of premiums, and insurance companies interested should give special attention to the requirements of this law.

Under the heading " Legislation," it may be proper to refer to chapter $24 \%$, laws of 1874 , which provides that in all cases where any individual or insurance company authorized by law to take risks and issue policies of insurance against fire, shall insure real property, and the property so insured shall be wholly destroyed without criminal fault on the part of the insured, the amount written in the policy shall be taken and deemed the true value of the property at the time of such loss. Soon after its passage this law gave rise to considerable criticism and discussion, but it has, in practice, been almost if not totally inoperative. A case has recently arisen under the act, which is now before the supreme court, and the constitutionality of the law, which has been questioned by many, will doubtless be determined. The evident purpose of the law was to prevent the insuring of property beyond its actual value, and it may have had a restraining influence in this direction.

Some general views relative to this law were stated in the report for 1874 , and it having been once considered by the legislature since that time, and no modification having been made, it is not thought necessary to discuss its merits here. It may be added that independently of this act, the general provisions of our law relative to insurance are such as to afford all the protection practicable to policy holders, while seeking to avoid injustice to insurance companies.

One difficulty that sometimes exists in adjusting losses, arises from the circumstance that agents occasionally make representations not in full accord with the conditions contained in the policies which the companies deliver.

It is well to remember in such cases that it is the settled law of
this state that insurance agents who are authorized to take ris'ss and issue policies, may waive by parol any condition in the policies issued, and that the companies which they represent will be bound by their action in this respect.

## SPECIAL RESERVE FUND.

The legislature of 1875 enacted a law'entitled " an act to provide against extraordinary conflagrations and for the creation of safety funds by fire insurance companies," which is similar in its general features to what is known as the "Surplus Law," of New York. The merits of the New York law have been extensively discussed in eastern insurance journals and reports, and three of the companies of that state have complied with its provisions, viz. : the Continental, the Williamsburg City and Standard.

No Wisconsin company has yet adopted the course allowed by the law of this state in relation to providing the funds therein described. It is believed, however, that at least one or two of such companies will do so at no distant day. The law is given in full in the insurance report for 1875 , and it is not deemed necessary to go into any discussion of it here. An amendment is needed to correct some verbal inaccuracies which occurred in engrossing or enrolling, and this having been done it is believed that the law should be allowed to remain on the statute book, for the adoption of its provisions by any of our state companies will doubtless add to the standing of such companies, and tend to the general security of the insured.

## REMOVAL OF SUITS FROM STATE TO FEDERAL COURTS.

In the report of this department for 1876, a brief history was given of litigation in both federal and state courts, relative to the constitutionality of that portion of chapter 56, general laws of 1870, which provides that any insurance company organized or incorporated under the laws of any other state of the United States, or of any foreign government, shall, before receiving a license to transact business in Wisconsin, appoint an attorney, on whom process of law may be served, and file an agreement that such company will not remove suits for trial into the federal courts. The constitutionality of chapter 64, general laws of $18 \% 2$, which provides for the revocation of the license of any company so transferring a suit, was also involved.

Now that the question has been definitely settled by the final adjudication of the highest judicial tribunal in the United States, it is thought proper to continue to the present time the history of that litigation, inasmuch as the decision is one of much interest to the people of the siate, as well as to insurance companies.

In the report for last year, the fact was set forth that on the 28th day of September, 18\%5, the circuit court of the United States for the western district of Wisconsin, rendered a decision holding the state law of $18 \% 0$, to which reference has been made, unconstitutional, in a case in which the Hartford Insurance Company had applied for an injunction to restrain the revocation of its license for having made application to remove a suit from a state to a federal court. It was also stated that soon after the rendering of that decision, the Continental Insurance Company of New York, obtained an injunction prohibiting the revocation of its license for the same cause.

Reference was also made to the fact that the question of the constitutionality of the law had been argued before the supreme court of the state, and an application made for a writ of mandamus ordering the revocation of the license of the Continental Insurance Company.

On the 15th of August, 18\%6, the decision of the supreme court was rendered, sustaining the state law, and a writ of mandamus was issued.

The opinion in the case was written by Chief Justice Ryan, and is very elaborate. As it is printed in full in the supreme court reports, Vol. 40 , page 175 , and is thus accessible to the public, it is not deemed necessary to give it herein.

The writ of mandamus having been served, and it appearing that the injunction issued by the federal court did not apply to the license in force at the time of serving the writ of mandamus, said license was revoked, and copies of the order of revocation, duly authenticated, were mailed to the officers and agents of said company. Soon after the revocation of its license, the Continental Insurance Company took the necessary steps to take the case in which the mandamus was issued to the supreme court of the United States, by writ of error.

It appearing that a final decision in the case would not be reached for a long time, and it being thought advisable that the question
involved be definitely settled as soon as practicable, an appeal was. takon by this department from the decision of the United StatesCircuit Court granting an injunction.

In this case, Messrs. Butler, Stillman and Hubbard of New York, and Sloan, Stevens \& Morris, of this city, acted as solictors for the company, while this department was represented by the Attorney General and Hon. Geo. B. Smith.

While these proceedings were pending, the legislature passed an act, chapter 16, laws of $18 \% \%$, which is given on a preceding page, providing that the provisions of chapter 64, general laws of 1872 , should not apply to any insurance company that made application for the removal of suits from state to federal courts, and ob-tained an order for such removal prior to January 1, 187\%, and providing further, that in case the license of any company had been revoked for such a cause, it should be lawful for the secretary of state to re-license such company, and continue to do so on its complying with the insurance laws of the state.

In accordance with the provisions of this act, a license was issued: to the Continental Insurance Company, on the fifteenth day of February last, since which time it has continued to transact business in the state, having been excluded therefrom for the period of six months.

On the 19th of March, a decision was rendered by the Supreme Court of the United States, in the case referred to, and on account of the importance of the question involved, it is thought proper to publish in full the opinion of the court, as well as the dissenting. opinion written by Justice Bradley, and concurred in by Justices. Swayne and Miller:

## SUPREME COURT OF THE UNITED STATES.

$$
\text { No. 910. - Остоber Term, } 1876 .
$$

Peter Doxle, Secretary of State of the State of Wisconsin, Appellant, vs. The Continental Life Insurance Company of the City of New York.

STATEMENT OF CASE.
The bill of complaint alleges that the complainant, The Continental Insurance Company of the city of New York, is a corporation organized and existing under the laws of the state of Connecticut, and a citizen of that state.

That prior to the passage of the act of the legislature of the state of Wis-
consin entitled "An act to provide for the incorporation and government of fire and inland navigation insurance companies," approved March 4th 1870, the complainant had established agencies, opened offices, and made considerable expenditures of money in advertising the business of insurance against loss by fire in the state of Wisconsin. That soon after the passage of said act, complainant complied with the provisions of Sec. 22 thereof, and procured from the state treasurer and secretary of state the certificate and license to do business in said state as therein provided, and did subsequently fully comply with said act; but that upon filing appointment of an agent upon whom process of law could be served, complainant was compelled to add an agreement, on its part, not to remove into the federal courts suits brought against it in the state courts, which agreement to that effect was made. That after the decision in this court in Home Ins. Co. vs. Paige, 20 Wall., 445, the complainant removed a suit brought on one of its policies against it in the state court, into the federal court. That because of such removal, a demand was made upon the defeodant, Peter Doyle, as secretary of state, that he revoke the certificate or license authorizing the complainant to do business in said state of Wisconsin.

That complainant had a large number of agencies in the state, engaged in the conduct of its business, and a revocation of its license would work great and irreparable injury to the complainant in its business in said state, and the complainant feared that said defendant would revoke said license, unless restrained by injunction. A temporary injunction was issued restraining the defendant frora revoking the license of the complainant because of the removal of said suit from the state to the federal court.

The defendant demurred to the bill. The demurrer was overruled and a decree entered making the injunction perpetual. From this decree the defendant appeals.

Sec. 22, Chap. 56, laws of Wis., 1870, provides as follows:
"That any fire insurance company, association or partnership, incorporated by or organized under the laws of any other state of the United States, desiring to transact any such business as aforesaid by any agent or agents, in this state, shall first appoint an attorney in this state, on whom process of law can be served, containing an agreement that such company will not remove the suit tor trial in the United States circuit or federal courts, and file in the office of the sucretary of state a written instrument, duly signed and sealed, certifying such appointment, which shall continue until another attorney be substituted."

Sections 1 and 3, ch. 64, Laws of Wisconsin, provide as follows:
"Section 1. If any insurance company or association shall make application to change the venue or remove any suit or action heretofore commenced, or which shall be hereafter commenced, in any court of the state of Wiscon$\sin$, to the United States circuit or district court, or to the feeeral court, con trary to the provisions of any law of the state of Wisconsin, or contrary to any agreement it has made and filed, or may make and file, as provided and
required by section number twenty-two (22) of chapter fifty-six (56) of the general laws of Wisconsin for the year A. D. 1870, or any provision of law now in force in said state, or may hereafter be exacted therein, it shall be the imperative duty of the secretary of state, or other proper state officer, to revoke and recall any authority or license to such company to do and transact any business in the state of Wisconsin, and no renewal or new license or certificate shall be granted to such company for three jears after such revocation, and such company sball therefore (thereafter) be prohibited from transacting any business in the state of $W$ isconsin until again duly licensed.
"Section 3. If any insurance company or association shall make application to remove any case from the state court into the United States circuit or district court or federal court, contrary to the provisions of chapter filty-six (56) of the General Laws of Wisconsin for the year A. D. 1870, or any other state law, or contrary to any agreement which such company may have filed in pursuance of said chapter fifty-six (56) of the General Laws of Wisconsin for the year 1870 , or any other law of the state of Wisconsin, it shall be liable, in addition, to a penalty of not less than one hundred dollars or more than five hundred dollars for each application so made, or for each offense so committed for making such application, the same to be recovered by suit in the name of the state of Wisconsin; and it shall be the imperative duty of the attorney general of the state of Wisconsin to see and attend that all of the provisions of said chapter fifty-six (56) of the general laws of 1870 , and the provisions of this act, are duly enforced."
Geo. B. Smith,
A. Scotyl' Sloan,
For Appellant.
Wm. Allen Butler,
B. J. Stevens,
I. C. Sloan,
For Appellee.

Mr. Justice Hunt delivered the opinion of the court.
The case of The Home Insurance Company vs. Morse, reported in 20 Wallace Rep., 445, is the basis of the bill of complaint in the present suit. We have carefully reviewed our decision in that case and are satisfied with it. In that case an agreement not to remove any suit brought against it in the state courts of $W$ isconsin into the federal courts had been made by the com ${ }^{-}$ pany in compliance with the Wisconsin statute of 1870 . The company nev ${ }^{-}$ ertheless did take all the step's required by the United States statute of 1789 to remove its suit with Morse from the state court into the federal courtsDisregarding that action the supreme court of Wisconsin allowed the action in the state court to proceed to judgment against the company as if no transfer had been made. When the judgment thus obtained was brought into this court, we held it to be illegally obtained and reversed it. It was held, first, upon the generyl principles of law, that although an individual may unlawfully omit to exercise his right to transfer a particular case from the state courts to the federal courts, and may do this as often as he thinks fit in each recurring case, he cannot bind himself in advance by an agreement which may be specifically enforced thus to forfeit his rights. This was upon the
principle that every man is entitled to resort to all the courts of the country to invoke the protection which all the laws and all the courts may afford him, and that he cannot barter away his life, his freedom, or his constitutional rights.

As to the effect of the statutory requirement of the agreement, the opinion, - at page 458 of the caae as reported, is in these words:
"On this branch of the case the conclusion is this:
" 1 st. The constitution of the United States secures to citizens of another state than that in which suit is brought, an absolute rignt to remove their cases into the federal court upon compliance with the terms of the act of 1789.
" 2 d . The statute of Wisconsin is an obstruction to this right, is repugnant to the constitution of the United States and the laws in pursuance thereof, and is illegal and void.
"3. The agreement of the insurance company derives no support from an unconstitutional statute, and is roid, as it would be had no such statute been passed."
The opinion of a court must always be read in connection with the facts upon which it is based. Thus, the second conclusion above recited, that the statute of Wisconsin is repugnant to the constitution of the United Siates, and is illegal and void, must be understood as spoken of the provision of the statute under review, to wit, that portion thereof requiring a stipulation not to transfer causes to the courts of the United States. The decision was upon that portion of the statute only, and other portions thereof, when they are presented, must be judged of upon their merits.

We have not decided that the state of Wisconsin had not the power to impose terms and conditions as preliminary to the right of an insurance company to appoint agents, keep offices, and issue policies in that state. On the contrary, the case of Paul vs. Virginia (8 Wall., 168), where it is held that such conditions may be imposed, was cited with approval in Home Insurance Co. vs. Morse. That case arose upon a statute of Virginia, providing that no foreign insurance company should transact business within that state until it had taken out a license and had made a deposit with the state treasurer of bonds varying in amount from thirty thousand to fifty thousand dollars, according to the amount of its capital. This court sustained the power of the legislature to impose such conditions, and sustained the judgment of the state court convicting Paul upon an indictment for violating the state law in issuing policies without having first complied with the conditions required

Ducat vs. Chicago, 10 Wall., 410 , decided that the statute of the state of Illinois, requiring a license to be taken out by foreign insurance companies, for which six dollars each should be paid, and the filing of an appointment of an attorney with power to accept service of process, was a legal condition; and a requirement that when such company was located in the city of Chicago, it should also pay to the treasurer of that city $\$ 2$ upon the $\$ 100$ upon the amount of all premiums received, was held to be legal.

In the La Fayette Ins. Co. vs. French, 18 How., 494, the court say "a corporation created by Indiana can transact business in Ohio only with the consent, express or implied, of the latter state. (13 Peters R., 519.) This consent may be accompanied by such conditions as Ohio may think fit to impose; and these conditions must be deemed valid and effectual by other states and by this court, provided they are not repugnant to the constitution or laws of the United States or inconsistent with those rules of public law which secure the jurisdiction and authority of each state from encroachment by all others, or that principle of natural justice which forbids condemnation without opportunity for defense."
Neither did the case of The Home Insurance Company (supra) undertake to decide what are the powers of the state of Wisconsin, in revoking a license previously granted to an insurance company, for what causes or rpon what grounds its action in that respect may be based. No such question arose upon the facts or was argued by counsel or referred to in the opinion of the court.

The case now before us does present that point, and with distinctness.
The complainant alleges that a license had been granted to the Continental Insurance Company upon its executing an agreement that it would not re. move any suit against it from the tribunal of the state to the federal courts; that in the case of Drake it did, on the 10th day of March, 1875, transfer his suit from the Winnebago circuit of the state to the circuit court of the United States; that Drake thereupon demanded that the defendant, who is secretary of state of Wisconsin, should revoke and annul its license, in accordance with the provisions of the act of 1872 ; that it insisted that he has power to do so summarily, without notice or trial; that the complainant is fearful that he wil! do so, and that it will be done simply aod only for the reason that the complainant transferred to the federal court the case of Drake, as above set forth.

The cases of Bank of Augusta vs. Earle, Ducat vs. Chicago, Paul vs. Virginia. and La Fayette Ins. Co. vs. French, establish the principle that a state may impose upon a foreign corporation as a condition of coming into or doing business within its territory, any terms, conditions and restrictions it may think proper that are not repugnant to the constitution or laws of the United States. The point is elaborated at great length by Chief Justice Taney in the case first named, and by Mr. Justice Field in the case last uamed.

The corrclative power to revoke or recall a permission is necessary consequence of the main power. A mere license by a state is always revocable. (Rector vs. Philadelphia, 24 How., 300; People vs. Roper, 55 N. Y., 629; People vs. Commissioners, $47 \mathrm{~N} . \mathrm{Y} ., 50$.) The power to revoke can only be restrained, if at all, by an explicit contract upon good consideration to that ef. fect. (Humphrey vs. Pegues, 16 Wall., -; Tomlinson vs. Jessup, 15 id., 454.)

A license to a foreign corporation to enter a state does not involve a permanent right to remain. Full power and control over its territories, its citizens and its business (subject to the laws and constitution of the United states) belong to the state.

If the state has the power to do an act its intention or the reason by which it is influenced in doing it carnot be inquired intn. Thus the pleading before us alleges that the permission of the Continental Insurance Company to transact its business in Wisconsin is about to be revoked for the reason that it removed the case of Drake from the state to the federal courts.

If the act of an individual is within the terms of the law, whatever may be the reason which governs him, or whatever may be the result, it cannot be impeached. The acts of a state are subject to still less inquiry, either as to the act itself or as to the reason for it. The state of Wisconsin (except so far as its connection with the constitution and laws of the United States alters its position) is a sovereign state, possessing all the powers of the most absolute government in the world.

The argument that the revocation in question is made for an unconstitutional reason cannot be sustained. The suggestion confounds an act with an emotion or a mental proceeding, which is not the subject of inquiry in determining the validity of a statute. An unconstitutional reason or intention is an impractical suggestion which cannot be applied to the affairs of life. If the act done by the state is legal, is not in violation of the constitution or laws of the United States, it is quite out of the power of any court to inquire what was the intention of those who enacted the law.

In all the cases where the litigation of a state has been declared void such legislation bas been based upon an act or a fact which was itself illegal. Thus, in Crandall vs. Nevada, a tax was imposed and collected upon passen gers in railroad and stage companies. ( 6 W ull., 35.)

In Almy vs. State of California a stamp duty was imposed by the legislature upon bills of lading for gold or silver transported from that state to any port or place out of the state. ( 24 How., 169.)
In Brown vs. The State of Maryland a license, at an expense of $\$ 50$, was required before an importer of goods could sell the same by the bale, package or barrel. ( 12 Wheat., 419.)
In Henderson vs. Mayor of New York the statute required the master to give a bond of $\$ 300$ for each passenger, conditioned that he should not become a public charge within four years, or to pay the sum of $\$ 150$. $\quad 92 \mathrm{U}$. S. R., 265.)

In the Passengers' case the requirement was of a like character. ( 7 How ., 572.$)$

In all these cases it was the act or fact complained of that was the subject of judicial inquiry, and upon the act was the judgment pronounced.
The statute of Wisconsin declares that if a foreign insurance company shall remove any case from its state court into the federal courts, contrary to the provisions of the act of 1870 , it shall be the duty of the secretary of state immediately to cancel its license to do business within the state. If the state has the power to cancel the license, it has the power to judge of the cases in which the cancellation shall be made. It has the power to determine for what causes, and in what manner, the revocation shall be made.

It is said that we thus indirectly sanction what we condemn when presented directly, to wit, that we enable the state of $W$ isconsin to enforce an agreement to abstain from the federal courts. This is an "inexact statement." The effect of our decision in this respect is that the state may compel the foreign company to abstain from the federal courts or to cease to do business in the state. It gives the company the option. This is justifiable, because the complainant has no constitutional right to do business in that state: that state has authority at any time to declare that it shall not trancact business there. This is the whole point of the case, and without reference to the injustice, the prejudice, or the wrong that is alleged to exist, must determine the question. No right of the complainant under the laws or constitution of the United States, by its exclusion from the state, is infringed, and this is what the state now accomplishes. There is nothing, therefore, that will justify the interference of this court. The decree of the court below awarding a perpetual injunction is reversed, $\varepsilon$ nd the cause is remanded that a decree be entered dismissing the bill for want of equity.

Mr. Justice Bradley dissenting.
I feel obliged to dissent from the judgment of the court in this case.
The following is a brief statement of the reasons for my opinion:
Though a state may have the power, (if it sees fit to subject its citizens to the inconvenience), of prohibiting all foreign corporations from transacting business within its jurisdiction, it has no power to impose unconstitutional conditions upon their doing so. Total prohibition may produce suffering, and may manifest a spirit of unfriendliness towards sister states; but prohibition except upon conditions derogatory to the jurisdiction and sovereignty of the United States, is mischievous and productive of hostility and disloyalty to the general government. If a state is unwise enough to legislate the one; it has no constitutional power to legislate the other. The citizens of the United States, whether as individuals or associations, corporate or incorporate, have a constitutional right, in proper cases, to resort to the courts of the United States. Any agreement, stipulation, or state law precluding them from this right is absolutely void, - just as void as would be an agreement: not to resort to the state courts for redress of wrongs, or defense of unjust actions; or, as would be a city ordinance prohibiting an appeal to the statecourts from municipal prosecutions.

The questions arising upon these Wisconsin laws have already been considered by this court in the case of The Home Insurance Company vs. Morse, and we held and adjudged that the agreement which the company was compelled to make, not to remove a suit into the federal courts, was absolutely void. In principle, this case does not differ a particle from that. The statelegislature of 1872 under which, and in obedience to which, the license of the appellees is threatened to be revoked, is just as unconstitutional and just. as void as the agreement was in the former case.
The argument used, that the greater always includes the less, and, therefore, if the state may exclude the appellees without any cause, it may exclude.
them for a bad cause, is not sound. It is just as unsound as it would be for me to say that, because I may without cause, refuse to receive a man as my tenant; therefore, I may make it a condition of his tenani:y, that he shall take the life of my enemy, or rob my neighbor of his property.

The conditions of society and the modes of doing business in the country are such, that a large part of its transactions is conducted through the agency of corporations. This is especially true with regard to the business of banking, insurance, and transportation. Individuals cannot safely engage in enterprises of this sort, requiring large capital. They can only be successfully carried out by corporations in which individuals may safely join their small contributions without endangering their entire fortunes. To shut these institutions out of neighboring states would not only cripple their energies, but would deprive the people of those states of the benefits of their enterprise. The business of insurance, particularly, can only be carried on with entire safety by scattering the risks over large areas of territory, so as to secure the benefits of the most extended average. The needs of the country require that corporations - at least those of a commercial or financial character - should be able to transact business in different states. If these states can, at will, deprive them of the right to resort to the courts of the United States, then, in large portions of the country the government and laws of the United States may be nullified and rendered inoperative with regard to a large class of transactions constitutionally belonging to their jurisdiction.

The whole thing, however free from intentional disloyalty, is derogatory to that mutual comity and respect which ought to prevail between the state and geveral governments, and ought to meet the condemnation of the courts whenever brought within their proper cognizance.
In my judgment the decree for injunction ought to be affirmed; and in this opinion I am authorized to say that Justices Swayne and Miller concur.

It will thus be seen that the provisions of our state law requiring insurance companies to file agreements that they will not remove suits from state to federal courts is declared to be unconstitutinal, and that agreements filed thereunder are void. It is also decided, however, that the state may exclude a company for any cause or for no cause, and that the matter of exclusion is not one for judicial inquiry in the federal courts. This decision settles definitely a question that has been a source of considerable annoyance not only in this, but in some other states, where similar laws exist.

Whether in view of the foregoing decision, the law referred to needs modification, is a subject that may be worthy of legislative attention.

## REINSURANCE RESERVE.

Section 20, chapter 56, general laws of $18 \% 0$, provides that in making the annual statements required by said section, each company shall charge as a liability, a sufficient amount to reinsure all outstanding risks. It does not provide any method for determining such amount, nor fix any basis of computation, leaving it primarily to the determination of the company, to be given under oath in its annual statement, subject however to the general power of supervision and correction conferred on this department.

Soon after the passage of the law, such reserve was fixed at forty per cent. of all premiums on unexpired fire risks, and the entire amount of premiums received on marine risks.

Subsequently the National Insurance Convention, composed of commissioners of the various states, recommended the adoption of a higher standard, which was accordingly adopted in this state, and which is fully set forth in the blanks prepared for insurance statements, the form of which can be seen by referring to the statements of insurance companies published herein.

It is to be remarked, with reference to this, that the laws of some of the states fix a different and lower standard, and hence that the liability charged as a reserve in such cases is less than that required by this state under the rule referred to. This results, of course, in a larger surplus being shown when the smaller liability is charged, but it is apparent that this does not affect the standing of a company, the matter being one of form rather than of substance in such cases, provided that a sufficient amount is charged as a reserve. It is believed that the rule of this state is a proper one, and that should there be any legislation on the subject, it should be only to give it the direct sanction of law, or rather to incorporate it into a legal requirement.

In general, the reserve given by the companies under the oaths of their officers has been accepted by this department, and it is believed that in all cases it is of a sufficient amount to substantially comply with the requirements of law.

## EXAMINATIONS.

Section 23 , chapter 56 , general laws of $18 \%$, provides that it shall be the duty of the secretary of state, whenever he shall deem it ex-
pedient to do so, or whenever any responsible party shall file written charges against any insurance company, alleging that any return or statement filed by such company is false, or that the affairs of such company are in an unsound condition, to examine into the affairs of any insurance company incorporated in this state, or doing business by its agents therein. Section 30 of the same chapter provides that such an examination shall not be required of companies organized outside of this state, in states where, under the laws thereof, they are similarly supervised by the proper officer as in such laws provided, and such officer shall furnish, when required to do so by the secretary of state, a certificate and statement exhibiting the solvency of any such company.

Under these provisions, a demand has been made for a certified statement by the officer of any state where an insurance company has been located, showing its condition, in every case in which a reasonable doubt has existed relative thereto, and as already stated, this has been done in every instance where application has been made by a company located in another state for a license to transact business in Wisconsin, and which had not transacted business therein the preceding year. In no case has a company been licensed where a certificate of examination and a statement of the condition of the company was not furnished when demanded. Such statements are on file in this office.

During the past year, personal examinations were made of the affairs of the following companies, and it was found that the statements filed in this office correctly represented their general condition at the time such statements were made:

> Germantown Farmers' Mutual.
> Herman Farmers' Mutual.
> Concordia Mutual.
> Madison Mutual.
> North Western National.
> Milwaukee Mechanics' Mutual.
> Hekla.

The Madison Mutual furnished a statement of its assets and liabilities on the first day of May last, which statement was made the basis of examination, and is published herein in connection with

4 -Ins
[Doc. 2]
the annual statement of said company. The Hekla insurance company furnished a similar statement, showing its assets and liabilities on the 31 st of March, which is also published in this report, and was made the basis of examination in that case. The examination of the Milwaukee Mechanics' Mutual was made by Hon. Ferd. Kuehn, state treasurer, he being one of the directors of said company, and his examination was accepted and considered entirely satisfactory by this department.

The foregoing companies embrace all of the fire insurance companies incorporated by or under the laws of this state; and it is necessary to remember that such companies have reserved to them by section 18 , chapter 56 , general laws of $18 \%$, all the privileges and powers granted by their charters, and hence that examinations in such cases can go only to the extent of ascertaining whether they are in such a condition as to comply with the charter requirements. No departure from such requirements was found to exist in any case to such an extent as to at all impair the standing of any of the companies. In one or two cases, where it was deemed necessary, directions were given as to the course to be adopted in order to be even technically within the law, and it is believed that such directions have since been followed.

Respectfully submitted,

> PETER DOYLE, Secretary of State, and Ex-Officio Commissioner of Insurance

# EIGHTH ANNUAL REPORT 

of the

SECRETARY OF STATE

As

## COMMISSIONER 0F INSURANCE.

PART II.

## LIFE AND ACCIDENT INSURANCE.

> State of Wisconsin, Office of Secretary of State, Department of Insurance, Madison, June $1,187 \%$.

To His Excellency, Harrison Ludington, Governor of the State of Wisconsin:

Sir-In accordance with the requirements of law, I have the honor to submit the Eighth Annual Report of this department, relative to the life and accident insurance companies that have transacted business in the state during the past year.

The deep interest manifested in the business of life insurance, and the distrust that has to some extent existed as to the condition
of life companies, have made it appear adrisable to publish, the present year, a statement of the assets and liabilities of each of such companies transacting business in the state, especially as the number of life companies is so small that the publication of such statements does not very materially increase the size of the report.

In accordance with the practice which has existed since the organization of the department, the business of companies issuing accident policies is given in connection with that of the life companies. This will, of course, render it necessary, in making comparisons, to keep in view the difference between the two classes of companies. It may be added that the only company licensed in the state at the present time, which issues exclusively accident policies, is The Railway Passengers' Assurance, of Hartford.

## COMPANIES TRANSACTING BUSINESS IN THE STATE IN $18 \% 6$.

During the year $18 \% 6$, twenty-nine life and accident insurance companies filed annual statements and complied with the remaining provisions of law, so as to entitle them to transact business, and were thereupon duly licensed by this department. The only company admitted since the date of the last report is the United States, of New York. This company transacted business in the state in 1874 and $18 \% 5$, but did not apply for a license in 18\%6. It is, however, licensed for the present year.

## COMPANIES WITHDRAWN.

The following companies that transacted business in the state in 18\%5, not having complied with the provisions of law, have not been licensed for the current year:

Life Association of America, St. Louis.
Chicago Life, Chicago.
Protection Life, Chicago.
Berkshire, Pittsfield, Mass.
Hartford Accident, Hartford.
The Continental Life Insurance Company, of New York, became insolvent in October last, and its affairs are being closed up in the New York courts.

## COMPANIES NOW TRANSACTING BUSINESS IN THE STATE.

Twenty-four companies have been licensed for the present year up to the date of this report. The following table shows the amount of paid capital of each, and the date of commencing business:

These companies had, on the thirty-first day of December, 18\%6, according to the statements filed in this office, admitted assets to the amount of $\$ 373,290,579$. Their liabilities, exclusive of capital, was $\$ 315,034,616$; capital stock, $\$ 4,050,000$; net surplus of twentythree companies, $\$ 54,366,098$; deficiency of one other, $\$ 160,135$;
total income, $\$ 88,115,661$; total expenditures, $\$ 69,288,220$. Of the income, $\$ 62,810,66$ ) was cash premiums; $\$ 22,395,057$, interests, dividends, rents an 1 from other sources, and the balance premium notes. The total amount of cash expenditures was $\$ 63,3 \% 1,132$, of which there was paid for death losses, $\$ 22,735,013$; dividends to policy holders, $\$ 13,312,090$; lapsed, surrendered and purchased policies, $\$ 15,597,954$; dividends to stockholders, $\$ 350,308$; commissions, $\$ 4,244,871$; taxes, salaries to officers and employes and medical examiners' fees, $\$ 2,903,649$; other payments, $\$ 4,225,247$; total note disbursements, $\$ 5,919,089$. The excess of income over expenditures was $\$ 18,827,441$. The total number of policies issued by the companies during the year was 82,379 ; amount insured thereby, $\$ 217,9+8,619$; number of policies in force at the end of the year, 623,250 ; amount insured, $\$ 1,559,778,695$. The number of policies that terminated during the year was 92,008 ; amount insured thereby, $\$ 242,295,768$. The policies of the Railway Passengers' Assurance Company are not included in the foregoing. For further information relative to the business of these companies, reference is made to the tables given herein.

The following table shows the total admitted assets, total liabilities exclusive of capital, surplus as regards policy holders, capital stock, net surplus, cash and note income, cash and note disbursements and premium reserve of life and accident companies transacting business in the state for the past three years:

Table showing total admitted assets, etc.

|  | 1874. | 1875. | 1876. |
| :---: | :---: | :---: | :---: |

| National, state and local taxes................. | 1,126,609 |  |  |
| All other cash payments. ...................... | 4,419, 735 | 4,331,790 | 4,225, 247 |
| Note disbursements | 7,915,516 | 7, 204, 423 | 5,919,089 |
| Total | \$73, 555,632 | \$72,073, 285 | \$69.288, 220 |

## BUSINESS IN WISCONSIN in 1876 .

The total number of life policies issued in the state during the year 1876, was 3,906 ; amount insured, $\$ 9,017,686$. The total number of accident policies was 1,623 ; amount insured, $\$ 5,087,150$. The number of life policies in force at the close of the year was 23,489 ; amount insured, $\$ 39,332,798$; number of accident policies in force at same time, 1,412 ; amount insured thereby, $\$ 4,425,821$. The total amount of premiums received was $\$ 1,211,728$; losses paid $\$ 408,939$.

In $18 \% 5$, the number of life policies issued was $3,1 \% 9$; amount insured thereby, $\$ 4,530,752$; total number of accident policies, 1,339 ;
amount insured, $\$ 3,984,000$; number of life policies in force at the close of the year, 23,343 ; amount insured, $\$ 35,479,291$; number of accident policies in force at the same time, 1,245 ; amount insured, $\$ 3,705,120$; total amount of premiums received, $\$ 1,310,766$; losses paid, $\$ 528,653$. The foregoing exhibit does not include the policies issued by the Railway Passengérs' Assurance Company, the character of the business done by this company being such as to render it impracticable to give exact information in this respect.
The following table shows the premiums received and losses paid by companies transacting the business of life and accident insurance in the state from 187\% to the present time:

| Year. | Premiums received. | $\begin{aligned} & \text { Losses } \\ & \text { puid. } \end{aligned}$ | Per centage. |
| :---: | :---: | :---: | :---: |
| 1871 | \$1,834, 838 | \$315, 337 | 17.18 |
| 1872 | 1,659, 252 | 349,557 | 20.94 |
| 1873 | 1,535,662 | 430, 322 | 28.02 |
| 1874 | 1,437, 153 | 482, 269 | 33.55 |
| 1875 | 1,340,766 | 528,653 | 39.42 |
| 1876 | 1,211,728 | 408,939 | 33.91 |

From the foregoing table it appears that the amount of premiums received in the state since $18 \% 2$ has been less each year than the preceding, while the amount of losses paid has increased, with the exception of the past year. The number of companies transacting business each of the years named was as follows: In 18\%1, thirty-nine; $18 \% 2$, thirty-seven; 1873, thirty-seven; 1874 , thirtytwo; 18\%5, thirty-two; in 1876, twenty-nine; and the present year, only twenty-four companies have been licensed.

## EXAMINATIONS.

Section 13, chapter 59, general laws of $18 \% 0$, provides that it shall be the duty of the secretary of state to make, or cause to be made, an examination of the condition and affairs of any life or accident insurance company doing business in this state, whenever he shall deem it expedient to do so, and also whenever he shall have good reason to suspect the correctness of any annual statement, or that the affairs of any company making such statements, are in an unsound condition.

In accordance with the requirements of said section, correspondence was commenced in December last, with some of the life companies then transacting business in the state, with a view to having examinations made of the affairs of such companies, before issuing licenses for the present year. In one or two instances satisfactory evidence was received from the insurance departments of the states where such companies were located, as to the condition of the companies, and personal examinations were therefore considered unnecessary. Two of such companies did not apply for licenses, and hence no examinations were made.

The Protection Life Insurance Company, of Chicago, one of the companies of which an examination was thought to be necessary, applied for a license, but after considerable correspondence, and the writer having visited Chicago for the purpose of making the necessary arrangement for such examinaiion, the company decided that the Wisconsin business for the present year would not justify the expense of an examination and the payment of the annual license fee required by law; and hence said company has not been licensed. It is not necessary to give a full history of the matter here. All correspondence in the case is on file in this office, and can be consulted at any time by those who may desire further information on the subject.

## NORTHWESTERN MUTUAL LIFE INSURANCE COMPANY.

This company continues to rank among the most substantial and best managed companies of the United States. It must be pleasing to every citizen of Wisconsin to know that during the past year, when a widespread distrust existed relative to the business of life insurance in general, the standing and management of the Northwestern Mutual Life Insurance Company was not questioned by any citizen of this state, nor did any doubt as to its condition exist in any other state in which it was transacting business, so far as the writer is aware. This feeliug of confidence arose trom continued honesty and ability in the management of its affairs since the organization of the company in 1859. Its obligations have been performed with promptness, and a spirit of fairness, that can scarcely be too highly commended at this time, when the evidence of mismanagement of some life companies is so apparent. The

Northwestern Mutual transacts business the present year in the following states:

Colorado.
Connecticut.
Georgia.
Illinois.
Indiana.
Iowa.
Kansas.
Kentucky.
Maine.
Maryland.
Massachusetts.
Michigan.

Minnesota.
Missouri.
Nebraska.
New Hampshire.
New Jersey.
New York.
Ohio.
Oregon.
Pennsylvania.
Rhode Island.
Vermont.
Wisconsin.

No doubt as to the conditions of this company having been entertained by this department, it has not been thought necessary to make an examination of its affairs.

Since this report was commenced, however, the commissioner of Maryland gave notice that under a recent law of that state, it is his duty to annually examine all life companies transacting business therein, and hence that it is necessary to make an examination of the affairs of the Northwestern Mutual.

In view of this fact, this department and that of Illinois will take part in the examination, which will commence about the first of August; and it is not improbable that other departments will be represented, it being the desire of the company that the examination shall be thorough, and such as to batisfactory to all of the states in which the company transacts business.

From the last statement filed in this office, it appears that the total admitted assets of the company, at the close of the year 18\%6, amounted to $\$ 17,995,862$; in 1875 , the amount was $\$ 17,051,551$; and in $18 \% 4, \$ 15,465,34 \%$. The premium reserve on the thirty-first day of December last was $\$ 15,101,447$, according to the Actuaries' Table of Mortality, with interest at four per cent., and $\$ 14,047,440$, according to the American Experience Table, with interest at four and one-half per cent., the latter being the standard of reserve required by the laws of this state. The total income in 1876 was $\$ 3,925,372$, of which $\$ 3,274,738$ was in cash, and the balance in pre-
mium notes. The total expenditures amounted to $\$ 2,955,233$, of which $\$ 2,010,063$ was cash. The number of policies in force at the close of the year $18 \% 5$ was 36,428 , by which there was insured the sum of $\$ 6 \%, 124,215$; number of policies written during the year 1876, including old policies revived and increased, 5,347 ; amount insured thereby, $\$ 12,375,829$; number in force at the close of the year $18 \% 6$, 36,456 ; insured thereby $\$ 6 \%, 493,191$. The total number of policies issued in the state during the year was 666 , by which there was insured the sum of $\$ 1,185,808$. The total number of policies in force in Wisconsin at the close of the year was 9,341 ; amount insured thereby, $\$ 13,004,461$. The ratio of expenses to total income was was 13.83 per cent.

## NON-FORFEITURE JAAWS.

The propriety and expediency of attempting by legislation to se cure to policy-holders in . life companies an equitable value of the reserve which such companies are required to maintain, is a subject that has of late occupied considerable attention, and that has given rise to extended discussion tu the columns of insurance journals, as. well as in some of the leading daily papers of the country.

There seems to be no doubt that most of the life insurance companies have voluntarily done as much in this regard as sound principles and a proper regard for the strength and stability of the companies, and the best interests of all their policy-holders, would warrant. It is believed to be equally true that cases sometimes arise involving much hardship to policy-holders, because of companies not doing so. Still it is to be remarked that it seems to be hardly within the province of general legislation to provide for exceptional cases.

The contract of life insurance is voluntary on both sides, and if legislation secures to both parties a fulfillment of obligations voluntarily incurred, this would seem to be all that can be reasonably expected.

To do more than this would be to attempt establishing in legislation a principle, the necessary tendency of which must be to lessen the idea of individual responsibility, and create a spirit of dependence on the state which wonld appear to be at variance with correct views of the true objects and purposes of government.

The policy holder has a right to expect that the state will secure to him a full compliance in every respect by the company with the terms of the insurance contract. If this is done, and the company is also held responsible for all the representations made by its agent at the time insurance is effected, which is now the settled law of this state, that would seem to be giving to the policy holders all the protection that it is within the province of legislation to afford. To compel a company to pay a surrender value not provided for in its contract at the option of every policy holder who might desire to discontinue insurance, or to compel continuing the policy in force after the time when it would lapse in accordance with the conditions of the policy itself, would seem to be adopting a rule unknown to any other department of business; and such a course could hardly fail to be ultimately injurious in its consequences both to the policy holders and insurance companies.

It is true that if such a law were in force, every contract made subsequent to its passage would be subject to its provisions, and hence that it would be substantially a part of each contract. It is apparent, however, that this would not meet the objection herein suggested, so far as the principle involved is concerned.

In addition to this, it may be said that it seems very doubtful, to say the least, whether it is practicable to devise any law on the subject that would be fair and equitable to all classes of policy holders, and which would not be at variance with the necessary principles on which the business of life insurance rests, and by which it is conducted. It seems unnecessary, however, to elaborate this view here, as the subject has been extensively discussed during the past year.

It is true indeed, that companies in fixing rates of premiums have to take into account the reserve necessary to be kept; and it would seem too that policy holders should be entitled to an equitable value thereof independently of any specific contract. This seems to be in accordance with the view taken of life insurance contracts by the supreme court of the United States in the case of the New York Life Insurance Company vs. Parmelia A. Dudley, decided in October last, the decision covering several cases which involved the same principle. But if the company performs all that it agrees to do in every respect, it is, to say the least, very doubtful whether legislation should seek to accomplish more. Companie
failing to comply with those equitable obligations to the insured which may arise from the nature of the business transacted, but not provided for by agreement between the parties, will fail to meet that public approval without which no business of a public or quasipublic character can permanently succeed. It not unfrequently happens that policies lapse because of inattention on the part of policy holders to the times at which the premiums are payable. This might be remedied by a law requiring all companies transacting business in the state to give not less than twenty nor more than thirty days notice of the time when any premium would become due.

The following, which is substantially the law enacted last winter in New York would, it is believed, if enacted in this state, be sufficient to meet all reasonable requirements in this regard.

> "The People of the State of Wisconsin, represented in Senate and Assembly,do enact as follows:
"Sec. 1. No life insurance company doing business in the state of Wiscon sin, shall have power to declare forfeited or lapsed any policy hereafter issued or renewed by reason of non-payment of any annual premium or interest, or any portion thereof, except as hereinafter provided. Whenever any premium or interest due upon any snch policy shall remain unpaid when due, a written or printed notice stating the amount of such premium or interest due on such policy, the place where said premium or interest should be paid, and the person to whom the same is payable, shall be duly addressed and mailed to the person whose life is assured, or the assigneee of the policy, if notice of the assignment has been given to the company, at his or her last known post office address, postage paid by the company, or by an agent of such company or person appointed by it to collect such premium. Such notice shall further state that unless the said premium or interest then due shall be paid to the company or to a duly appointed agent or other person authorized to collect such premium within thirty days after the mailing of such notice, the said policy and all payments thereon will become forfeited and void. In case the payment demanded by such notice shall be made within the thirty days limited therefor, the same shall be taken to be in full compliance with the requirements of the policy in respect to the payment of said premium or interest, any thing therein contained to the contrary notwithstanding; but no such policy shall in any case be forfeited or declared forfeited or lapsed until the expiration of thirty days after the malling of such notice. Provided, however, that a notice stating when the premium will fall due, and that if not paid the policy and all payments thereon will become forfeited and void, served in the manner hereinbefore provided, at least
twenty and not more than thirty days prior to the day when the premium is payable, shall have the same effect as the service of the notice hereinbefore provided for.
"SEC. 2. The affidavit of any one authorized by section one to mail such notice, that the same was duly addressed to the person whose life is assured by the policy, or to the assignee of the policy, if notice of the assignment has been given to the company, in pursuance of said section, shall be presumptive evidence of such notice having been given."

It is thought proper to add that if the provision of law requiring fire and marine insurance companies to agree that they will not remove suits from state to federal courts for trial, is to be kept in force, there would seem to be no reason why there should not be a similar one relating to life companies. This would secure to policy holders the advantage of having all controversies with insurance companies settled in the state courts and having all questions arising under state law adjudicated by them.

It is now settled that the state may require this as a condition precedent to granting a license, and may revoke the license of any company violating such a condition. This is referred to at length in the beginning of the report relative to fire and marıne companies for the present year.

## failures of life companies.

The past year has been, to some extent, an exceptional one in the history of life insurance in this country. Companies transacting an extensive business and making, under the oaths of their officers, statements purporting to correctly represent their condition, and showing that they were in good standing, suddenly became insolvent, thus proving that not only all considerations of common honesty were disregarded, but that statements made in pursuance of law, and verified by affidavit in accordance with its requirements, were false and fraudulent.

The failures of such companies have greatly disturbed public confidence relative to life insurance, and a feeling of distrust has arisen which materially injures the business of those companies that are substantial and that have been honestly managed.

The general depression that has existed in all departments of business for some time past doubtless contributed largely to produce such failures. But this was not the only cause. There was
in many cases a reckless extravagance that has hardly characterized any other business.

There is much truth in the following extract from the "Nation:"
"The infancy of life insurance in this country has been marked by a comparative freedom from those gigantic swindles of which we have so many instances in the history of life insurance in England. A great number of our companies have indeed been compelled to suspend; but, as' a general rule, their failure has resulted more from extravagant and unwise management than from intentional fraud, and their assets have proved sufficient to effect the reinsurance of their policy holders in other companies. But the cases of downright fraud and perjury which have recently come to light may well lead us to enquire whether, after all, our life insurance management is entitled to much credit on the score of honesty, while the great number of failures cannot but direct public attention to their causes.
"That the management of life insurance companies has been marked by an extravazance, not to say recklessuess, of pecuniary expenditure which would not have been tolerated in any other purely financial corporation, will probably not be questioned by any one well informed on the subject. It may have been no worse than, perhaps not so bad as, our railway management; but if so, there is less excuse for it. To build and to run a railway are very complicated operations, into which a great variety of bargains asd contracts enter, and which involve the legal rights of great aumbers of persons besides those immediately interested. It is in this great complexity of the mutual rights, and the difflculties of understanding and defining them, that we are to seek for the origin of our railway troubles. But however large may be the business of a life insurance company, the elements of which it is made up are of the simplest character. It consists in receiving from its policyholders certain definite contributions at specified times, in safely investing them until wanted, and iu returning the proceeds to the proper parties, according to certain well understood principles. The only legitimate contracts of any importance into which it can enter are to receive and pay certain sums of money at certain times, so that its operations are almost independent of those changes in the supply and demand of services and commodities which so powerfully affect railway interests."

When a life insuranse company pays some of its officers forty or fifty thousand dollars a year, and then seeks to commend itself to public favor on the ground that it is a sort of benevolent institution, it has little reason to complain if it meets with the public condemnation whish it deserves. Its benevolence in such cases is rather too limited.

It is not intended by this to make any attack on life insurance in general, or to deny that there may be commendable and benevolent
features about it if properly conducted. Neither will it be denied that honest and competent officers should receive respectable salaries; but on the other hand, when gross mismanagment exists, it cannot be too severely censured or condemned.

The class of persons who insure with life companies is composed largely of those who are in moderate circumstances, and often includes many who can hardly afford to pay the required premiums, but who do so with the hope that, by this means, they will secure something for their families at a time when it may be badly needed. For a company to recive money under such circumstances, and then, by reckless extravagance or other mismanagement, become insolvent, seems almost as criminal as direct robbery.
Various theories may be ingeniously advanced to account for the failures of life companies, and mathematics may be strained to their utmost by experts; but the simple fact remains and is plain to the comprehension of the most ordinary observer, that most of the failures are caused by positive dishonesty and reckless mismanagment. Unless under extraordinary circumstances there is no necessity for such companies to fail from any other canse.

It is not deemed necessary to give any detailed reference to the management or rather mismanagement of the companies that failed during the past year.

The subject has been so extensively discussed in the newspapers and by journals devoted exclusively to insurance matters, that to do so here would only unnecessarily enlarge the report.

The failures of life companies in $18 \% 6$ led to a more thorough and general examination of the affairs of such companies sinces that time, and a sysiem of investigation has been contiued by the proper authorities in the various states, which can hardly fail to result in being bencficial both to honestly managed insurance companies and the insuring public. The action taken by this department has been referred to under the heading of examinations.

The following extract from a prominent journal, referring to doubts that have arisen relative to life companies, is thought proper to be published in this connection, as presenting a view which is substantially correct:
"The temporary distrust may be a present annoyance, but it is sure in the end to be an excellent thing for the companies which are really worthy of public confidence. Out of it has already sprung a demand for such legisla-
tion as will compel companies, so far as legislation can, to put the public in possession of the exact facts concerning their financial condition. Even without such legislation, there will be - in fact there already is - an emulation among the companies to establish, more clearly than ever before, their claims to public confidence; and with such legislation it will be more difficult than it has been for weak or insolvent companies to secure business. The period of distrust will be succeeded by a period of watchfulness from which the best of the insurance companies are sure to reap the benefit to which they are entitled."

Of the life companies that failed during the year 18\%6, the only one licensed in this state was the Continental of New York, which was at the same time transacting business in all the principal states, and was generally considered reliable. The affairs of this company are being closed in accordance with the requirements of the laws of New York. Everything practicable will be done by this department to advance the interests of policy holders in this state.

Respectfully submitted,

PETER DOYLE,<br>Secretary of State, and Ex-Officio Commissioner of Insurance

## RECAPITULATION.

| Balance in fund October 1, 1876. | \$10,959 94 |
| :---: | :---: |
| Receipts. | 1,199,954 86 |
| Total. | \$1,210,914 80 |
| Disbursements. | 1,204,900 40 |
| Balance in fund September 30, 1877 | \$6,014 40 |

The amounts remaining due to the several charitable, penal and other institutions of this state, on account of the appropriations made to them in 1877, are as follows:

The following statement shows the amount due the state on September $30,18 \%$, on account of state tax:
Bayfield county....................................................... $\$ 14742$
Burnett county. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . $5^{57} 46$
Polk county. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 61624
Total ................................................................... $\$ 82112$
The collection of the state taxes shows a very gratifying result, the amount remaining due and unpaid being only $\$ 821.12$, out of an aggregate of $\$ 736,129.38$, levied for the year $18 \% 6$, most of which will be paid before the close of the calendar year from the delinquent taxes to be collected for said counties on the school lands.

The several railroad companies have promptly met their obligations to the state, and paid in full the license tax due for $181 \%$, on the gross earnungs for the year 18\%6. The only company in arrear with its dues is the Mineral Point railroad company, with $\$ 1,048.25$. It should be remarked, however, that said company, for every year previous, has always promptly paid, and now claims to be entitled to a drawback on the license tax paid for the year $18 \% 6$, which was paid by said company prior to the passage of the act regulating the license to be paid by railroad companies.
The Sheboygan and Fond dn Lac railroad company was in arrear with $\$ 2,904.06$ for the year $18 \% 6$, but has since paid all its dues. The Green Bay and Minnesota railroad cempany is still indebted for the 2 d installment, due August 20, 18\%5, being $\$ 6,705.24$, and the facts, at the time, were reported to the attorney general for further action, as required by law. The subsequent installments have all been paid by said company.

The general fund at the close of the fiscal year exhibits a balance to its credit of $\$ 6,014.40$; the additional revenue yet to be derived may be estimated at $\$ 6,000$. This credit will necessarily be largely overdrawn before the close of the calendar year, and the liabilities so to be incurred, on careful computation, may be estimated at $\$ 156,300$. A large amount of this deficiency is attributable to the greatly diminished income from the railroad and insurance companies, and some smaller sources of revenue, resulting in a reduction of about $\$ 45,000$ below the estimate of 1876 ; the appropriations to the charitable and penal institutions were $\$ 60,300$, in excess of the amount provided for by the levy of taxes for 1876, but provision for their payment was made by the legislature in the tax levy for 187\%, who appropriated for said purpose $\$ 60,500$, which sum, however, is not collectable until February or March of the following year. In pursuance of the provisions of chapter 245 of the laws of 187\%, entitled, "an act to distribute more equally the burdens of taxation in certain counties," a sum of $2 \frac{1}{2}$ cents per acre on the lands of the West Wisconsin R'y Co. exempt from taxation, was to be refunded and paid over to the counties entitled to receive the same, amounting to $\$ 12,82616-100$, of which sum $\$ 11,96850-100$ has already been paid over. Adding to the above several special appropriations for attorney fees in railroad cases, the appointment of additional revisors of the statutes, for fish commissioners, investigations, legislative manuals, and other needed appropriations, which could not have been provided for in the tax levy of $18 \% 6$, and it will fully account for and corroborate the correctness of the estimated shortage of $\$ 156,300$, above stated. From this sum is to be deducted, however, the credit on hand and revenues to be expected, being $\$ 12$,014.40 , and the amount already appropriated by the legislature, $\$ 60$,500 , leaving a balance of $\$ 83,785.60$, which it will become necessary to assess in addition to the tax provided by law to be levied for $18 \% \%$. Under existing laws, a deficiency of smaller or larger dimensions will be of annual occurrence, unless a sufficient amount for contingent expenses shall be allowed annually in advance to meet appropriations which cannot bo specially provided for in the estimates of taxes. To meet the necessities of the case, there is now no alternative left other than to draw from the trust funds if the credit of the state shall not be impaired, and care should therefore be taken that trust funds may always remain on hand sufficient to meet such emergency.

## STATE INDEBTEDNESS.

The debt of the state amounts to and is classified as follows:

| To School Fund | \$1,559,700 00 |  |
| :---: | :---: | :---: |
| To Normal School Fund | 515, 70000 |  |
| To University Fund. | 111,000 00 |  |
| To Agricultural College Total | 51,600 00 | \$2, 2388,000000 |
| Bonds maturing in 1880. | \$12,000 00 |  |
| Bonds maturing in 1886. | 1,000 00 |  |
| Bonds maturing in 1888. | 1,000 00 |  |
| Currency certificates. |  | $\begin{array}{r} 14,00000 \\ 5700 \end{array}$ |
| Total indebtedness |  | \$2,252, 05700 |

## INVESTMENTS.

| Wood county........................ ................ | 30,000 00 |  |
|  |  | \$52,350 00 |

In conformity with chapter 144 , laws of $18 \% 6$, authorizing the commissioners of the school and university lands to loan a portion of the trust funds of the state to the county of Wood, not exceeding $\$ 100,000$, said county has made application for said loan on the conditions ramed in said act, which provide that no money shall be paid over until as many as $\$ 50,000$ of the bonds issued by said county in aid of the Wisconsin Valley railroad and the Green Bay and Lake Pepin railroad, shall be offered tor cancellation, and such bonds to be received upon paying to the holders 50 cents upon the dollar of the principal of the bond and not before. In compliance with such conditions, the county of Wood has surrendered for cancellation $\$ 137,000$ of it bonds issued in aid of said railroads, together with all coupons unpaid attached to such bonds, and has received as a loan thereior the sum of $\$ 68,500$, viz.: $\$ 38,5(0)$ from the school fund, and $\$ 30,000$ from the normal school fund, which amount was paid over to the holders of the bonds who surrendered the same on the terms aforesaid. Of the amount of bonds so received, $\$ 50,000$ were issued in aid of the Wisconsin Valley Railroad, and $\$ 87,000$ in aid of the Green Bay and Lake Pepin Railroad.

As required by law the bonds were cancelled by the commissioners in the presence of the chairman of the board of supervisors of Wood county and of the clerk of said county, and a certificate of such cancellation, setting forth the amount and date, and the number of the bonds so cancelled, and the number and amount of coupons attached to such bonds, signed in duplicate and filed and recorded respectively in the office of the secretary of state, and the office of the clerk of said county.
The chairman of the board of supervisors and the clerk of the county of Wood in behalf of said county, have issued certificates of indebtedness for the amount authorized to be loaned, being $\$ 100$,000 , in 200 certificates of $\$ 500$ each, of which number the sum of $\$ 68,500$, in 137 certificates has been surrendered to the secrerary of state for the loan actually paid over, and the remaining $\$ 31$,500 , being certificates No. 138 to 200 inclusive, are held by the state treasurer as custodian, but are of no validity or effect unless the bonds of said county with the unpaid coupons attached, are surrendered for eancellation at one-half of their face value.

Statement of Securities, etc.- continued.

There is further on hand one note of C. Robinson, for $\$ 429$, given in 1873 , for a forfeited mortgage on school lands, and maturing June 1, 18'78, upon which the interest has been regularly paid each year. Another note for $\$ 1,000$, given by Simeon Small, was surrendered to the clerk of the United States court, at Milwaukee, in June, $18 \% 4$, to prove the claim of the state, and on which two dividends have been paid, one of $\$ 35^{7} .31$, in 1874 , and $\$ 96.47$, in 1875, no further dividend has since been declared.

JOHNSON ENDOWMENT FUND TO THE STATE UNIVERSITY.
Mr. John A. Johnson, in a letter directed to the president of the State University, Dr. John Bascom, February 12, 1876, made a donation of five thousand dollars to the University of Wisconsin, onehalf to be paid on the 1 st of January, 18\%\%, and one-half January $1,18 \% 8$. In payment of the first installment, Mr. Johnson, on the 6th of January, 187\%, surrendered a promissory note, made by Victor P. Lawson and John Anderson, of Chicago, for $\$ 2,500$, dated December 1, $18 \% 6$, to the order of John A. Johnson, and by him indorsed to the treasurer of the university, payable July 1, 1880, with interest at 10 per cent. per annum. This donation, as he remarked in his letter, was made for the purpose more to encourage attendance at our common schools, than to impress the importance of a liberal education, and for that reason makes it a condition that applicants for aid must have attended the common schools at least one year. The first interest to be collected on this endowment fund will fall due on the first of December next.

## WEST WISCONSIN RAILROAD LICENSE FUND.

In accordance with the provisions of chapter 245 of the laws of 1877, entitled "an act to distribute more equally the burdens of taxation in certain counties in the state," the West Wisconsin Railroad Company has prepared a duly certified statement or list of the lands owned by said railroad company in each of the several counties wherein said lands are located, and which are exempt from taxation, on the 1st day of August, 18\%\%. Such statement was duly transmitted to this office and filed, as required by law, and in accordance therewith the proper amounts apportioned to the several counties, such apportionment being at the rate of $2 \frac{1}{2}$ cents per acre upon the lands of said company so exempt from taxation.

The following is a statement of the number of acres reported for each county, and the amount apportioned to such county:

| St. Croix county on. . . . . | 17.305 .82 | cres, at $21 / 2$ cents per acre. | \$432 65 |
| :---: | :---: | :---: | :---: |
| unn. . . . . . . .do | 110,036.24 | . . . . do. . . . . . .do | 2,750 91 |
| Pepin...... ${ }^{\text {do }}$ | 15,133.13 | do. | 37833 |
| Buffalo..... . do | 18,717.83 | do | 46795 |
| Eau Claire . . do | 80,824.16 | do...... . .do | 2,020 60 |
| Chippewa....do | 44,293.21 | do...... . .do | 1,107 33 |
| La Crosse. . . do | 3,360.51 | . .do. . . . . . .do | 8401 |
| Monroe..... d | 30,502.11 | .do. . . . . . .do | 76255 |
| Juneau. . . . . do | 1,586.91 | .do. . . . . . .do | 3967 |
| Wood........ | 280.40 | .do.... . do | 701 |
| Jackson..... do | 139,830.71 | . do .. . . . .do | 3,495 77 |
| Clark. . . . . . do. | 51,175.32 | . do...... . . do | 1,279 38 |
| Total | 513,046.35 | .do..... . . . do | \$12,826 16 |

Of the above amount, $\$ 11,968.50$ has been paid over to the several counties. The county of St. Croix declined to accept its apportionment of $\$ 432.65$, as the lands were assessed by the county; and the counties of Pepin, Juneau and Wood (\$425.01), have not yet drawn their apportionments.

## ST. CROIX AND LAKE SUPERIOR RAILROAD COMPANY TRESPASS FUND.

During the present fiscal year no new notes have been received in sotte:nent for trespasses. The old notes collected, amounting to $\$ 10,648.33$ as above stated are as follows, viz.:

| H. L. Bixby, balance | \$1,018 15 net proceeds........ | \$1,028 64 |
| :---: | :---: | :---: |
| E. Greely Hersey, on ac't. | 1,000 00 ..do................ | 99750 |
| W. Clark Hersey . . . . . . . . . . . | 88425 and interest. | 95610 |
| Thompson \& Anderson, balance. | 1,047 96 ..do. | 1,076 29 |
| Walker, Judd \& Veazie........ | 6,427 31 ..do................. | 6,589 80 |
| Total |  | \$10,648 33 |

Ail other notes not yet paid, all of which have now matured, have been surrendered to the attorney general to enforce their collection, the same amounting to $\$ 9,989.34$. The note of Torinus, Staples \& Co., given in $18 \% 3$ ( $\$ 8,799.66$ ), is still in litigation, and the case pending before the supreme court of the state of Minnesota.

The collection of these notes, which were all received during the last four years, being very complicated, I beg to submit herewith for future reference, statements of all notes received and the disposition made of the same; the amounts paid represent the net proceeds of collection, including interest where due, and exchange for collection deducted.

## Banks and banking.

In obedience to the requirements of law, I submit the following report exhibiting the condition and transactions of this branch of my department for this fiscal year :

There is also due the Exchange Bank of Darling \& Co., a surplus of $\$ 2,1 \% 2.00$, which I deem it my duty to retain until the indebtedness of said bank to the state, on account of state bonds sold to the same, amounting to $\$ 3,655.00$, is discharged.

[^9]The stocks of the following banks have been exchanged for United States treasury notes, and with them I will redeem their outstanding circulation at par on presentation:

| Names of Banks. | Outstanding Circulation. |  |
| :---: | :---: | :---: |
| Hudson City Bank | $\$ 51700$ | Not advertised |
| La Crosse County Bank | 9300 | .....do . |
| Merchants' Bank, Milwaukee | 15000 | do |
| Milwaukee County Bank | 23500 | do |
| Wisconsin Pinery Bank, Stevens Total. | 36900 | $\ddot{\$ 1,364000}$ |
| Banks wound up and circulation redeemed in gold on presentation, by this office: |  |  |
| Union Bank Milwaukee (not advertised) outstandstanding circulation. |  | \$87 00 |
| Germania Bank, Milwaukee...................... |  |  |
|  |  | \$110 00 |
| The amounts due the several banks for surplus and for circulation outstanding, viz: |  |  |
| Surplus due banks until after,' decision of legal proceedings pending. | \$2, 88900 |  |
| Surplus due Exchange Bank of Darling \& Co ... | 2,172 00 |  |
| Treasury notes tor redemption of outstanding circulation of banks not advertised. | 1,364 00 |  |
| Treasury notes for outstanding circulation of Ba tavian Bank, La Crosse. | 22300 |  |
| Deposit certificate for outstanding circulation of Wisconsin, Marine and Fire Insurance Company Bank, Milwaukee | 1,149 00 |  |
| Total amount due in currency ............... |  | \$7, ${ }^{7} 97700$ |
| Amount due in coin for outstanding circulation of the Union Bahk. Milwaukee. | \& $\$ 8700$ |  |
| Amount due in coin for outstanding circulation of Germania Bank, Milwaukee | - 2300 |  |
| Grand total |  | \$7, 907 00 |

The appendix will show:
"A." Securities, circulation and capital of banks.
"B." Names of stockholders and the amount of stock held by each.
" C." Names of personal bondsmen.
"D." List of banks, their location and officers.
"E." Bank note impressions on hand.
"F." Bank note plates on hand.
"G." Condiiion of each bank at the time of lastreport, July, 2, 1877.
All of which is respectfully submitted,

## APPENDIX.

" A."Statement of the securities held in trust for each of the follow-ing Banking Associations, and the amount of circulatingnotes issued and outstanding on the same, on the first day ofOctober, 18\%\%:

| Cash items | 269, 47738 |
| Public securities | 1,403 00 |
| Bills of solvent banks. | 612,728 17 |

Office of State Treasurer, Madison, July 14, A. D. $18 \% \%$.

I hereby certify that the foregoing statement is an abstract of the semi-annual reports made to this office by the several banks that made reports (as far as it was practicable to arrange the items under general heads), in pursuance of the provisions of the 41st section of the act entitled "An act to authorize the business of banking." Approved April 19, 1852.

FERD. KUEHN,
State Treasurer.

## ANNUAL REPORT

OF THE
COMMISSIONERS

# OF <br> <br> SCHOOL AND UNIVERSITY LANDS 

 <br> <br> SCHOOL AND UNIVERSITY LANDS}

OF THE
STATE OF WISCONSIN,
FOR THE
FISCAL YEAR ENDING SEPTEMBER 30, $187 \%$.

Office of Commissioners of
School and University Lands, Madison, October 1, $187 \%$.

To His Excellency, Harrison Ludington, Governor of the State of Wisconsin:

Sir:-As required by law, we have the honor to report herewith to you our official proceedings for the year ending September 30, $187 \%$.

The reports of the Secretary of State and State Treasurer exhibit detailed statements of the receipts and disbursements on account of the several funds affected by our action, and to them we respectfully refer.
$1-S . \&$ U. L.
[Doc. 4]

## LANDS SOLD.

The whole number of acres sold during the fiscal year was 42 ,064.81, against $58,442.12$ sold during the fiscal year $18 \% 6$, and are classified as follows:

Acres.
School lands................................................................. . . $12,340.15$
University lands....................................................... $\quad 960.00$
Agricultural college lands...... ..................... ............. $3,767.01$
Marathon county lands.... ........................................... 605.18
Normal school lands........ .......................................... $9,762.15$
Drainage lands ......................................................... 14, 630.32
Total...... ...................................................... 42,064.81 $_{\text {4, }}^{\text {4, }}$

For a detailed statement of these sales, we respectfully refer to the accompanying tables, marked exhibits "A," "B," "C," "D," "E," and "F."
These tables show the number of acres of each class of land sold, the amount sold for, the amount of principal paid, and the amount due on which the state is receiving seven per cent. interest.

The number of acres sold, as compared with the previous year classified, is as follows:

|  | 1876. | 1877. |
| :---: | :---: | :---: |
|  | Acres. | Acres. |
| School lands. | 15, 392.07 | 12,340.15 |
| University lands... | 491.60 | ${ }^{960.00}$ |
| Agricultural college lands. | 6,218.04 | 3, 767.01 |
| Marathon county lands... | 1,000.00 | ${ }^{605.18}$ |
| Normal school lands.. | 15,335.71 | 9, ${ }^{1762.15}$ |
| Drainage lands.................................. | 20,004.70 | 14, 630.32 |
| Total | 58,442.12 | 42, 064.81 |

## FORFEITURES.

The following table shows the number of acres of land held on certificate, and lands mortgaged to the state to secure loans, and
the amount due on the same, which was forfeited during the year for non-payment of annual interest due thereon:

|  | Acres. | Amt. due. |
| :---: | :---: | :---: |
| School lands. | 11,238.34 | \$12,100 45 |
| University lands. | 920.00 | 1,494 00 |
| Agricultural College lands. | 1,923.26 | $1,77+00$ |
| Normal School lands. | 847.07 | 1,612 00 |
| Drainage lands..... | 86.87 | 1,9700 |
| School Fund loans..... |  | 2,223 00 |
| Normal School Fund loans |  | 90000 |
| Total. | 15, 015.54 | \$20, 20045 |

## INCOME.

The amount of interest moneys received from the several productivé funds, comprising certificates of sales, loans, certificates of indebtedness, and bonds, under our supervision during the year, is as follows:

| School Fund Income. | Amount. \$181,656 77 |
| :---: | :---: |
| University Fund Income.. | 15,336 74 |
| Agricultural College Fund Income. | 19,237 96 |
| Normal School Fund Income. | 67,254 17 |
| Total Inco | \$283,485 |

Income from Drainage Fund
$\$ 82353$

## LANDS HELD BY THE STATE.

The whole number of acres held by the state at the close of the fiscal year, was $1,568,655.02$.

The table marked Exhibit "G." shows the number of acres belonging to each fund, and the counties in which they are situated.

The number of acres owned by the state, classified, are as follows:
Acres.
School lands ..... 214,914.61
University lands ..... 4,367.16
Normal School lands. ..... 597,219.59
Drainage lands ..... 694,577.51
Agricultural College lands. ..... 49,791.46
Marathon county lands ..... 7,784.69
Total ..... 1,568,655.02

The changes in the number of acres, as compared with the same at the close of the fiscal year of $18 \% 6$, are accounted for as follows:

## PRICE AND TERMS OF SALE OF STATE LANDS.

Lands held by the state are subject to sale at private entry on the following terms: The School, University and Agricultural College lands are sold on ten years' time, twenty-five per cent. of the purchase money being required in cash, and the balance due drawing seven per cent. interest, payable annually in advance. The Normal School, Drainage (swamp), and Marathon county lands are sold for cash. The price ranges as follows:

| School lands, f | \$100 to $\$ 125$ per acre. |
| :---: | :---: |
| University lands from | 200 to 300 per acre. |
| Agricultural College lands | 125 per acre. |
| Normal School lands (swam | 50 to 125 per acre. |
| Drainage lands (swamp), fro | 50 to 125 per acre. |
| Marathon county lands. | 75 per acre. |

## APPORTIONMENT OF DRAINAGE MONEY.

#### Abstract

The table marked Exhibit " H ." shows the amount of drainage money apportioned to the several counties, July 1, 187\%, for drainage purposes, in pursuance of chapter $53 \%$ laws of 1865 . The amount received during the year was $\$ 16,644.86$, and is composed of the following items: From sales of land ..... \$14,538 72 Payment on certificates of sale. ..... 1, 26606 Interest on certificates of sale ..... 82864 Penalty on taxes ..... 1144 Total ..... \$16, 64486

## INVESTMENT OF TRUST FUNDS.

Investments of the trust funds have been made during the year by loans to school districts, in pursuance of chapter 42 , laws of $18 \% 1$, for the purpose of erecting school buildings, to the amount of $\$ 39,692$; by a loan of $\$ 68,500$ to the county of Wood, under the provisions of chapter 144, laws of $18 \% 6$; to the county of Racine, $\$ 7,500$, being the balance of a loan authorized by chapter 107 , laws of 1876 ; and $\$ 3,000$ to the town of Pine Valley, Clark county, by virtue of chapter 76 , laws of $18{ }^{17 \%}$; in the aggregate, $\$ 118,692$, from the following funds:

## LOANS TO SCHOOL DISTRICTS.

| School fund | \$6,600 |  |
| :---: | :---: | :---: |
| University fund. | 12,578 |  |

| Total. | .... .... | \$240,79190 |

Showing an increase in this fund during the year of $\$ 2,312.50$.
The following table shows a comparitive statement of the amounts of the several productive trust funds, September 30, 1876, and September 30, 18\%\%:

|  | 1876. | 1877. |
| :---: | :---: | :---: |
| School Fund. | \$2,625,798 06 | \$2,596,361 07 |
| University Fund | 222, 73556 | 223,240 32 |
| Normal School Fund | 963, 91734 | 985,681 34 |
| Agricultural College Fund | 238, 47940 | 240,791 90 |
| Total | \$4,050,930 36 | \$4, 046,074 63 |

Showing a total decrease in the several productive trust funds, during the year, of $\$ 4,855.73$.

## UNPRODUCTIVE FUNDS.

The unproductive trust funds consist of unsold lands held in trust by the state for said funds, and are estimated as follows:

| School Fund | \$253,898 00 |
| :---: | :---: |
| University Fund | 8,920 00 |
| Normal School Fund | 697, 83300 |
| Agricultural College Fund. | 61,695 00 |
| Drainage Fund . . . . . . . . | 792, 23300 |
| Total | \$1,814,579 00 |

The amount of the trust funds on hand and in the treasury, September $30,18 \% \%$, and nonproductive, are as follows:
School Fund ..... $\$ 74,19522$
University Fund. ..... 1,567 62
Normal School Fund. ..... 45,056 84
Agricultural College Fund ..... 1,975 70
Total ..... \$122,795 38

Since the date of our last report there has been received from the general government patents for $11,846.99$ acres of Swamp Lands in the Eau Claire and Bayfield Land Districts. These lands have been duly advertised, and will be offered at public sale on the 12th day of December, $18 \% \%$.

> PETER DOYLE, FERDINAND KUEHN, A. SCOTT SLOAN, Commissioners of School and University Lands.

## UNIVERSITY 0F WISCONSIN.

## ANNUAL REPORT OF THE BOARD OF REGENTS TO THE GOVERNOR.

## To the Governor of Wisconsin:

In transmitting to you the annual report of the Board of Regents of the University of Wisconsin for the year ending September 30, 18\%\%, permit me to congratulate you upon the additional evidences therein presented of continuously rapid and wholesome progress in this department of public education.

During the past year Science Hall has been completed, furnished and occupied; the magnetic observatory has been completed, equipped and placed in operation; an efficient system of water works and drainage has been constructed; gas and bath roors have been added to the healthful and necessary conveniences of Ladies' Hall, and other important improvements and repairs effected, many of them hitherto reluctantly delayed because of deficiencies in the financial resources at the command of the board. Important additions, by purchase or contribution, have also been made during the year, to the collections in natural history, to the gallery of arts, to the law and general libraries, and to the scientific apparatus of the University.

The final report of the building committee, including a statement of disbursements in the construction of science hall, the magnetic observatory, and other improvements and appurtenances, and the annual reports of the secretary and treasurer, accompany this report. The Board of Regents does not hesitate to invite the most rigid scrutiny as to the extent and character of the expenditures, especially as to that portion of them which relates to the
special improvements above enumerated. The duties of the building committee involved continuous responsibility and laborious personal service for a period of nearly two years, without pecuniary compensation, and those duties have been discharged with a general efficiency and persistent integrity of purpose which cannot fail to command public approbation. It is the ananimous conviction of the Board of Regents that larger and more practical results could not have been secured at the same cost. Actual and intelligent inspection of these improvements will emphatically confirm the conclusions of the board.

In transmitting to you the annual report of the Board of Regents one year ago, I had the honor to inform you of a gratifying testimonial of public confidence in the University, in the donation of a considerable sum of money then proposed by Hon. John A. Johnson, of Dane county, in trust for the benefit of worthy students seeking the advantages of liberal education. The conditions of this donation have been confirmed during the past year by an actual payment into the treasury according to the terms stipulated, and the beneficent purposes of the donor will be hereafter realized.

It is now my gratifying duty to announce in behalf of the board, that the liberal donation of the preceding year has been supplemented during the past year, on the part of another distinguished citizen of Dane county, by a further act of private munificence, of still greater consequence to the permanent usefulness and reputation of the institution committed to our charge. I refer to the proposal of ex-Governor Cadwallader C. Washburn to erect upon the grounds of the University during the coming year, for the benfit of the University, an Astronomical Observatory, equipped with superior facilities for investigations in astronomical science, such observatory to be constructed and furnished wholly at the personal cost of the donor. The act is one which reflects special honor upon its author and upon our state, and goes farther to establish our claim to honorable rank as a progressive and enlightened people than any degree of material prosperity.

It is logically assumed by the board, that the acts of private beneficence cited are evidences of public confidence in the existing administration of University affairs. But this is not all. The board also assumes that these acts are based, at least impliedly, upon confidence in the permanent good faith of the state to all its
existing legal and equitable obligations with respect to the University and its income. Those obligations, therefore, possess the nature and equitable force of a contract, not merely with reference to the authorities of the University, but also in respect to those public-spirited citizens who have so nobly contributed from their private property to its permanent endowment.'

We cannot too frequently recur, in this connection, to the fact that by its own fundamental law, the state originally was as definitely and positively committed to the establishment of the University as to any other means or grade of public education. By the voluntary acceptance, moreover, of repeated acts of the national legislature, and by many times repeated acts of its own in conformity therewith, and in acknowledgment of the sanctity of its trust, the state is now as definitely and positively pledged to a faithful and equitable execution of its guardianship over the rightful property and the lawfully determined income of the University, as to any permanent policy of legislatlon relating more directly to the material welfare of the people. And when "a wise liberality" on the part of the state is exhorted or commended, it means that liberality implied by good faith to constitutional obligations, and by an honest guardianship of property committed to its hands-and no more.

We believe it to be true, however, that no money can be expended in any department of public service with greater certainty of immediate and valuable results. The University is now offering to the young men and women of the state opportunities for attaining a knowledge of the natural sciences and practical arts, rarely surpassed. The state can largely and safely rely upon those who improve these opportunities for the development of.its natural wealth; for the utilization of its material resources; for the boon of public order, and for the other innumerable blessings of an enlightened and progressive civilization. To-day the graduates of our own University are mining, building, teaching, investigating-in manifold ways and by manifold devices-developing, multiplying and utilizing natural forces and capacities of progress otherwise inert. And these compensations for enlightened legislation, as we have seen, are already supplemented and multiplied by notable acts of private bounty, of large actual and prospective value in any proper estimate of the educational resources now at our command.

In this place, permit me to protest against the false impression, sometimes unfortunately entertained, that University education conflicts with more special methods of liberal culture, and that the progress of the one depends in some way upon the obstruction of the other. No such conflict of interest actually exists. In purpose and theory, the University is pre-eminently catholic and nonsectarian. Under the obligations of law and the rules of the board, its courses of instruction can have no reference, by precept or example, to special forms of religious worship or belief. It does not seek to add to or detract from the patronage or influence of educational institutions of adverse character in the respects named. Its doors are open only to such as prefer its method and standard of public education; and this under such circumstances as to warrant the assumption that all, or nearly all, who avail themselves of its privileges and its honors would otherwise be practically denied the advantages conferred. In the nature of things, it is the only system of education which the state can establish or directly promote. Clearly, to depreciate this means of enlightenment and progress is not to build up other departments of education, but to limit and diminish those which exist.

The original plan of the University, in those things which most relate to practical conveniences and exterior form, now rapially approaches completicn. The construction of the astronomical observatory during the ensuing year, and the subsequent erection of an assembly hall, with suitable accommodations for the rapidly growing library, will complete the list of University buildings so often presented, and so earnestly urged upon legislative consideration. With foundations thus substantial, permanent and secure, no apprehension need be indulged in as to the future of the institution. It offers to us at the present time, the gratifying prospect of continuously healthy and normal growth in every facility for the fulfillment of its grand office, as the central source of higher educational influences within the state. Apparatus for scientific. investigation, machinery for instruction in practical mechanics, books, furniture and works of art, are yet in greater or less degree deficient. But all these are believed to be attainable hereafter, as necessity or convenience may require, by gratuitous contribution or by purchase from the annual University income.

As to the internal administration of University affairs, there ex-
ists no present occasion for doubt. It is characterized in all departments by enlightened energy and vigor. This fact is sufficiently attested by the rapid increase in attendance upon the higher courses, by the elevated standard of instruction, and by the high rank which the University has now attained in public opinion at home and among institutions of its class abroad.

Some apprehension is felt that the indefinite legal and administrative relations of the Board of Regents and the Faculty may possibly prove a hindrance to the largest progress of the University in the future. Special ability and fidelity on the part of those intrusted with large responsibility in the government of the University, tend to increase rather than diminish the causes of this apprehension. By the act of reorganization, it is provided that "the government of the University" shall vest in the Board of Regents. By the same act, "the immediate government of the several colleges " is intrusted to their several faculties, but reserving to the Board of Regents the power to regulate courses of instruction, to prescribe the authorities to be used in the several courses, to confer degrees and to grant diplomas. It was the marifest purpose of the state to vest in the regents primary authority as to expenditures, appointments, courses of instruction and degrees; but there is nothing in the act defining the precise extent to which this authority can be rightfully exercised, without infringing upon the prerogatives of the instructional force in "the immediate government of the several colleges." The dividing line of duty and authority is thus left sufficiently uncertain to permit differences of opinion in the practical administration of affairs. Expediency, therefore, seems to dictate the enactment of amendments to the law, in respect to the several departments of University government, so clear and precise as to forbid the possibility of discordant opinion. Fortunately, under existing circumstances, the removal of all obscurity in the law is of far greater consequence to the prosperity of the University than the relative measure of power conferred.

The plan of the University is wisely such as to permit indefinite expansion within its proper educational sphere. Its courses of instruction may consistently refer to all branches of practical and professional knowledge. But it was intended to be something more than a resort for lectures and recitations. It is also the ap-
propriate repository of all that pertains to the pursuit and dissemination of knowledge under the general patronage of the state. Its libraries, its gallery of art, its illustrative apparatus, and its collections in geology, botany and natnral history, serve as essentially to define its character and to promote its power for public good as its courses of instruction; and obviously within its walls should be centralized all the material agencies the state aspires to possess of value to the ambitious student or advanced scholar. The substantial independence of university departments under the law renders this practicable, with advantage to every interest concerned.

The question of perpetuating the present system of coeducation in the University has been revived by the report of the board of visitors, present at the last annual examination. This report, together with the comments of the President of the University upon the same subject, in his annual report to the Board of Regents, is herewith submitted:
The argument of the board of visitors relates more directly to the degree of education which female students are physically enabled to acquire within a given time, than to the expediency of coeducation in the abstract. We are_furthermore assured, in a semi-official way, that the board of visitors do not wish to be understood as recommending a denial of any of the existing privileges of the University to any class of students, but as suggesting, simply, such modification in the courses of instruction as will render them available to female students who may prefer less exacting mental labor, and a minor degree of culture.
It is not claimed that the problem of coeducation has been finally determined, in its relation to capacity for mental culture, and still less in its relation to the personal association of the sexes in our universities. Nor is this problem in either respect one which can or ought to be determined upon special data, or upon limited observation and experience, here or elsewhere. The whole civilized world is concerned in the experiment, and by the final judgment of all the parties to the controversy we shall be forced to abide.

However that may be, no doubt ought to obtain as to the duty University to maintain that higher standard of instruction by which alone it can claim an honest title to its proper rank and name. And if, unfortuuately, there are students, or classes of students, un-
fitted by nature or preparatory training for that extent of progress and intellectual development necessary to entitle them to the honors and rewards of univeristy education, obviously their place is elsewhere.

This view is further enforced by the fact that, by the law and theory of its organization, the University occupies a specific position in the general plan of public education, with duties limited to a special plane of educational service. Between its work and that of the common school, the high school, the private school, the academy or the boarding school, there is justly no conflict or confusion of energy, and can be none while neither seeks to usurp the proper functions of the other.

So far as coeducation refers specifically to the personal and social relations of the sexes, however, ordinary prudence suggests a considerable degree of conservatism. While we cannot consistently lower the standard of university education, there certainly exists no obstruction to the enforcement of such rules of discipline in respect to students in attendance upon the University, as best conform to the average views of parents and guardians, and a wholesome public opinion.

The Board of Regents acknowledges the receipt, from the com. missioners of the centennial exposition, of a bronze medal awarded to the University, in consideration of "its bound volumes of catalogues, regents' reports, examination papers by students, albums of work in drawing, plans of grounds and buildings, a history prepared for the exhibition, important representations from its mineralogical collection, and for the extent and variety of its exhibits, which, together, furnish evidence of the recent activity and growth of the institution:"

Accompanying this report will be found a diagram, showing the interior plan of the magnetic observatory.

In conclusion, permit me to state that the chief considerations which have hitherto induced many of the young men and women of Wisconsin to go without the state in pursuit of a liberal education, have disappeared. In all the departments of literature, science and law, every essential facility for the acquisition of knowledge and mental discipline are now attainable within the state, at a relatively moderate cost. This progress has rendered possible more appropriate relations between the University and the high schools,
and is likely to enforce a more just appreciation of their obligations to the state by teachers in preparatory grades. With the unity of organization and concord of effort thus promised, and probable in the near future, the state has no reason to apprehend any humiliating inferiority in its standard of education, or want of allegiance to the University on the part of its intelligent citizens.

Respectfully submitted,
GEO. H. PAUI, President of the Board of Regents. Milwaukee, October 1, $18 \%$ \%

## FINANCIAL CONDITION.

## ANNUAL REPORT OF THE SECRETARY OF THE BOARD OF REGENTS.

Madison, October 1, $18 \%$
Hon. Geo. H. Paul, President of the Board of Regents of the University of Wisconsin:
Sir: - I have the honor to report herewith the financial condition of the State University, exhibiting the amount of productive funds on hand, and the receipts and disbursements of the income of the several funds, for the year ending September 30, 187\%.

## UNIVERSITY FUND.

This fund consists of the proceeds of the sales of land granted by congress for the support of a university.

| RECEIPTS. |  |  |
| :---: | :---: | :---: |
| Sales of lands.. | \$287 74 |  |
| Dues on certficates. | 5,670 00 | ........... |

## UNSOLD LANDS.

The university lands remaining unsold at the close of the fiscal year amount to $4,36 \% .16$ acres, and the agricultural college lands unsold amount to 49,791.46 acres.

The university lands are sold from $\$ 2.00$ to $\$ 3.00$ per acre, and the agricultural college lands at $\$ 1.25$ per acre on ten years' time, twenty-five per cent. of the purchase money being required in cash, and the balance due drawing seven per cent. interest, payable annually in advance.

The lands are located as follows:

## UNIVERSITY LANDS.

Counties. No. of acres.
Burnett ..... 27.25
Chippewa ..... 671.95
Clark ..... 280.45

Shawano ..... 3,831.02
Total ..... 49,87146
LEWIS MEDAL FUND.

This fund consists of a donation of $\$ 200$, made to the University by ex-Gov. James T. Lewis, in the year 1866, for the purpose of distributing medals to such meritorious students as should become
entitled thereto, in accordance with the standard of merit to be prescribed by the regents and faculty. As the fund was hardly sufficient to accomplish the object of the donor, it remained at interest, by direction of the regents, until June 1\%, 1873, when, by resolution of the board, the treasurer was instructed to invest the principal and interest, amounting to $\$ 300$, in such interest-bearing securities as should seem to him most desirable. In accordance with his instructions, the treasurer purchased United States bonds, bearing six per cent. gold interest, due in January and July, which he now holds as a special fund, the income therefrom to be used for prizes.

At the annual meeting in June, 1874 (with the consent of ex-Gov. Lewis), the regents resolved "to give a prize of $\$ 20$ each year, at such time and under such regu'ations as the faculty shall determine, to the under-graduate student who shall produce the best written essay; that the name of the prize shall be the 'Lewis Prize,' and that the name of the successful competitor of each year shall be published in the next issued catalogue of the University."

## JOHNSON ENDOWMENT FUND.

This fund was created by the liberality of Hon. John A. Johnson, of Madison, Wisconsin.

In a communication addressed to the president of the University, dated February 12, $18 \% 6$, Mr. Johnson donated the sum of five thousand dollars (one-half to be paid to the treasurer of the University January 1, 1877, and one-half January 1, 1878), as a perpetual fund, "the annual income from which shall be devoted to aiding needy students at the University of Wisconsin, who have previously to entering the University attended the common school in the United States at least one year in the aggregate before fifteen years of age, and have attended the University at least one term; or, if they have not attended the common school as aforesaid, they must have attended the University at least one year."
"Until the year 1900, such students only as either read or speak (or both) any of the Scandinavian languages (Norse, Swedish, Danish or Icelandic), reasonably well, shall receive aid from this fund."
"No student shall receive more than fifty dollars in one year, nor shall more than two hundred dollars in the aggregate be given to any one student."
"The president or acting president of the University, together with two of the professors that the president may designate, shall constitute a committee to distribute the aid to the students under the provisions of this bequest."
"All applications for aid must be made to said committee, who are hereby authorized to make such rules in relation thereto as they deem proper."
" No distinction in sex shall be made by the committee in giving aid."
"It should be impressed upon the students who may apply for such aid, the duty of paying back to the fund, as soon as they may be fairly and reasonably able to do so, the full amount they may have received from it. The money thus paid back to be added to and treated as a part of the original fund."

In accordance with the terms of this donation, Mr. Johnson did, on the 28th day of December, $18 \% 6$, turn over to the University, securities amounting to $\$ 2,500$, drawing ten per cent interest, payable annually, which are now on deposit with the state treasurer.

## THE RECEIPTS AND DISBURSEMENTS

For the fiscal year ending September 30.187\%, were as follows :

| Sept. 30 | U. S. 5-20 bonds on hand. |  | \$200 00 |

The cash balance on hand of $\$ 104$ proceeds from the redemption of U. S. 5-20 bond, No. 25479 - \$100.

All of which is respectfully submitted,

> FERD. KUEHN, Treas. of the Regents of the University of Wis.

Madison, October 1, $187 \%$.

## SCIENCE HALL AND MAGNETIC OBSERVATORY.

## REPORT OF SPECIAL BUILDING COMMITTEE IN CHARGE OF THEIR CONSTRUCTION, WITH OTHER IMPROVEMENTS.

- 

To the Honorable Board of Regents of the University of Wisconsin:

Your special building committee to whom has been committed from time to time the charge of constructing Science Hall, with its heating apparatus, the Magnetic Observatory, the general system of water-supply and sewerage, the steam power for machinery and other general improvements, beg leave to finally report.

It has been a duty no less than a necessity to economize and closely look after every detail in the various kinds of work done; to sacrifice ornament for utility; to substantially provide the most ample accommodation, and the greatest number of conveniences with the least possible cost. We have endeavored to do this in every degree consistent with character and durability.

Economy does not always consist in cheapness. Some expenditures may appear to you extravagant, or at least unnecessary; much work has been done which you cannot now judge of in respect to cost or quality, hidden as it is from view, under ground, under water, and otherwise. This we have carefully cared for to ensure its permanency.

The building entrusted to your committee is completed. Contractors have faithfully complied with their several agreements, have been all settled with and paid in full. There are, however, two claims for damages - not claimed as legal, but as equitable one by D. Stephens, the other by Goodman \& Moores, both arising from the accidental falling of walls during a violent storm last September. In view of the circumstances we have been extremely
liberal with Mr. Stephens in settling his bill for extra work, and so far as consistent with duty have considered his misfortune. There is no question in regard to facts, and it has been left for the Board to determine whether they will contribute to his loss.

Goodman \& Moores present a bill for $\$ 75.00$ damages, caused them, which should be paid either by contractor Stephens or the Regents.

SCIENCE HALL.
Two years ago this building was contracted for, and placed under our direction, with authority given to exercise large discretion.

Designed for special uses, it has been an unusual care to perfect it, and to keep within the limits of the sum appropriated for its erection.

We present it completed at a cost of less than $\$ 80,000$, including the incidentals of advertising, of plans and superintendence and extra work, but not including the additional steam-heating, water and machinery work. Vouchers are receipted and on file for the several items to wit:
David Stephens' contract ........................................... $\$ 69,97500$
David Stephens' bill of extras................................................ 4,914 78
Advertising proposals and blanks .................................. 14670
H. C. Kech, plans and superintendence............................... 3, 79005

Surveying site and photo. elevation ...................................... 800
T. Regan, extra piping laboratories.................................................... 12995

Vroman \& Frank, extra locks.......................................... $27 \quad 70$
T. A. Nelson, painting and calcimining art gallery .................. $94 \quad 35$

Total cost of the building, exclusive of steam and water...... $\$ 79,38653$

## STEAM HEATING APPARATUS,

including low pressure boiler. This, while its cost of putting in is greater than many other systems of heating, we feel confident will prove most economical in its use, perfect in its capacity, and conducive to both comfort and health. The bills are as follows:

| Goodman \& Moores' contrac | \$10,930 00 |
| :---: | :---: |
| Goodman \& Moores' bill of extras | 18728 |
| H. C. Koch, plans and superintendence. | 55586 |
|  | \$11, 67314 |
| J. W. Eviston, boiler contract . . . . . . . . . . . . . . . . . . . . . . . . . . . | 5,183 00 |
| J. W. Eviston, bill of extras and cost of testing and running on trial. | $41^{17} 00$ |
| H. C. Koch, plans and superintendence. . . . . . . . . . . . . . . . . . . . | 27326 |
| Total cost. | \$17,546 40 |

## MAGNETIC OBSERVATORY.

This peculiar building - underground entirely, is finished, except clearing away the surplus earth, it has been in use some months and cost for excavation, masonry and work contracted:
To Jas. Livsey ..... \$1;142 57
D. R. Jones plans and superintendence ..... 4000
Total cost \$1,182 57
WATER WORKS AND DRAINAGE.

The contract on file with Crane Bros. Manufacturing Company to furnish a supply of water from the lake to the dome of " University Hall," (an elevation of 160 feet), to thence distribute it to Ladies' Hall, Science Hall and over the grounds in abundance, will give all the details of material used and work done, which includes not only the necessary steam pnmps and boiler of twenty-five horse power, but a fine steam engine for propelling machinery in Science Hall, all now in working order.

| This company's contract was ................................... | \$8,262 00 |
| :---: | :---: |
| Their bill for extras.. | 53423 |
| D. R. Jones superintending | 16000 |
| Total................................................. | \$8,956 23 |
| A nine-inch sewer pipe laid from Ladies Hall to a point 150 feet |  |
| Hall, and laid from 6 feet to 19 feet deep, was laid by Gill \& |  |
| Purcell for'. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . |  |
| Making the total cost of all | 10,684 53 |
| A small barn at tenant house cost | \$177 85 |
| There has been paid, as incidental to the other improveme |  |
| for excavaioon of gutters, trenching, gradiug, etc., not contracted for, butdone by D Stephens, Gill \& Purcell, and others, |  |
| work not of building proper | \$1,996 44 |
| Of which the city contributed for earth on street | 10000 |
| Making | \$1,896 44 |

COAL VAULT.
The need of providing storage for a partial supply of coal at or near Science Hall was so evident that your committee have caused a vault to be built in the rear of boiler room and underneath the carriage way. It is finished, and cost, as per contract with T. Davenport, $\$ 883$.

3 - Reg. Unir.
[Doc. 5]

A contract has been made with T. Regan to ohange the present dry closets at Ladies' Hall to water closets; to put a bathing-room in order, and to generally distribute water from the main head throughout the building, including the sewerage and soft water cistern connections for the sum of $\$ 643.90$. The work to be done immediately after commencement, when the building will be comparatively vacant.

## SUMMARY OF EXPENDITURES.

| Science Hall buildin | \$79,386 53 |
| :---: | :---: |
| Steam heating apparatus | 11, 67314 |
| Low pressure boiler.... | 5, 873 26 |
| Magnetic observatory | 1,182 57 |
| Water works . . . . . . . | 8,956 23 |
| Drains and sewers. | 1,728 30 |
| Barn for tenant house. | 17785 |
| Grading, etc. | 1,896 44 |
| Coal vault, \$883; Ladies' Hall, \$642.90 | 1,525 90 |
| Total | 112,400 22 |

The above comprises the principal work of permanent improvements to the University property during the past two years, and with the exception of finishing up the grounds, the duties assigned your building committee are ended.

The work entire is respectfully submitted for your inspection and approval, with the request that the committee be now discharged.

N. B. VAN SLYKE, MATTHEW KEENAN, THOS. B. CHYNOWETH, Building Committee.

Madison, June 19, $18 \% \%$.

## UNIVERSITY COLLEGES.

## REPORT OF THE PRESIDENT OF THE UNIVERSITY TO THE BOARD OF REGENTS.

## To the Regents of the University of Wisconsin:

The period covered by this report is the fiscal year closing September $30,187 \%$. The instruction of the year has proceeded in each of its branches without interruption, and has, we believe, been successful in its leading aims. Some secondary changes have been made in the courses, designed to make each a little more distinctive, and especially to give the scientific students an opportunity for extended practical work. In connection with these changes, we hope also to be able to give students in each course more freedom of selection and substitution from other courses. While we value highly well-defined and harmonized courses of study, it is also our desire to give large liberty to individual predilections. Science Hall now affords abundant opportunities for all forms of practical work, and a corresponding freedom of choice is called for to enable us to avail ourselves fully of them.

The number of students during the past year was reduced by higher conditions of admission and their more strict application. This we anticipated. The present year opens with an increase of seventy-two, and we believe also with better conditions of scholarship than have ever before been attained by us. The spirit of the students, as shown by their attention to their work and by their general behaviour, has been every way commendable. This fact has made the past year a very pleasant one to the Faculty.

The proportion of young women to young men in the classes of the university year now opening is a little less than one-fourth. They easily maintain their rank in scholarship with the young men, and constitute an entirely satisfactory portion of our students.

In the entrances of the present fall, an unusual number of high schools are represented, and we have most pleasant evidences of increasingly good work in these intermediate and most valuable portions of our school system. We trust that many of them will soon appear on our accredited list. Very sure we are, that good preparatury work for the University will greatly aid the high shools in their larger and more direct service to the communities in which they are situated. We would appeal to facts on this question. It will be found, we believe, that the most vigorous high schools, as a rule, are those which feel the influence of higher institutions.

The Magnetic Observatory has been finished during the past year, and very complete observations are now taken in it. It is, in its appliances, a scientific curiosity. Science Hall is also in full occupation, and we are daily more and more gratified by its resources, and the possibilities of growth which it offers. Our present apparatus enables us to commence our work to advantage, while there are constant suggestions of new wants and enlarged instruction. The present material for our Mineralogical, Geological and Zoölogical Museums is sufficient to furnish the basis of a fine collection; yet there is room left for the work of many years.

Ex-Gov. C. C. Washburn has expressed his purpose to erect and thoroughly furnish an Astronomical Observatory during the coming year. This very liberal gift, for which Mīr. Washburn has our most hearty thanks, will meet another urgent want; will help to give the University a higher standing among kindred institutions, and, in due time, we trust, an interest in the scientific world. We hope that this liberality, so commendable in itself, will prove contagious, and that many of our citizens will, in a like way, identify themselves with the progress of higher education in the state.

One great want, which we will once more mention without repeating its reasons, is an Assembly Hall and Library. These can be united to advantage in one building, and when secured in good form, will advance the University on its literary side as much as Science Hall has already advanced it scientifically. The body of our students can not be reached in discussions and lectures on the broad range of subjects open to us, till we have a room that can contain them all; nor can they otherwise, in their own exercises, exert over each other the influence they ought. In consultation and study, an open, well furnisbed library is a first condition of
earnest inquiry and a quickened literary taste. We are impatient for these most needful things, and would gladly accept the economy in other directions which is necessary for their early attainment.

Our thanks are due to the Board of Visitors that they did not allow their critical function to suffer by disuse. Nor, perhaps, are criticisms to be regarded as less valuable, because they are not altogether palatable. It is not to be expected that we should clearly see or freely acknowledge all our faults. We are in this condition in reference to a portion of the criticisms of the Board. The students had been during the past year unusually attentive to military drill, and cheerful in it. This spirit we have striven personally to encourage, and were hoping that their efforts, in an exercise ordinarily so irksome, would win recognition. In this we were destined to disappointment. Doubtless our drill is not like that of professionals, but it should be remembered that we contend with great difficulties in this enforced military training.

One thing we profoundly regretted in the report of the Board of Visitors, and that was the opinion expressed by them as to the health of the young women. There were some passing appearances, arising from the excessive studiousness of a few not naturally strong, that gave the criticism a color of truth, and were, doubtless, the grounds of the conviction in the minds of the committee. These reasons, however, were very partial and by no means sufficient for the broad conclusions drawn from them; conclusions arising from exceedingly limited observation, and which did not command the assent of all the committee. We regret these opinions because they tend to open a controversy just closed, and to compel us to travel a second time over ground already painfully trodden, and this with the prospect of no other or better issue than that already reached. To be pushed back into the water, when we have just reached shore, is trying.

The Faculty, most of whom were in the outset opposed to co-education, and who have had years of observation both as to its relation to education and to the health of young women, pronounce earnestly and unanimously in favor of the maintenance of our present method.

Contrary to the opinion of the visitors, the young women do their work with less rather than with greater labor than the young men, and certainly do not fall below them in any respect as scholars. We also believe this labor to be done by them with perfect safety
to health, nay, with advantage to health if ordinary prudence is exercised. The young women, whose health was primarily the ground of criticism, have improved in strength, rather than deteriorated, since they have been with us, though they have burdened themselves with extra work which we do not counsel.

We confess to some surprise that so many of the medical profession bring forward for the first time in connection with co-education, a function familiar from the dawn of human life, as if it had the force of a fresh discovery in putting down this form of progress, when, in fact, it has no more to do with co-education than with separate education, can as well be provided for in the one form of instruction as in the other, and bears with ten-fold furce against the labors of women as operatives, clerks, teachers, housekeepers, in which callings continuous hard work has been allowed to pass utterly unchallenged.
Though my convistion has been, previous to this report, that the health of the young women as a whole was better than that of the young men, and that there were striking instances of graduation among the young women with robust strength, I am striving to test this opinion by facts, so far with the following results. All excuses for ill health are given by me. The exact number of students in our collegiate and dependent courses is $35 \%$. Of this number, 93 are young women, a trifle more than one-quarter. During the past eight weeks, the most trying weeks in the year for students, there have been 155 days of absence from ill health on the part of young men, and 18 on the part of young women. The young women should have lost, according to their numbers, 54 days, or three times as many as they have actually lost. The students were not a ware that any such registration was being made. It may be felt that the young men are less conscientious in pleading ill health than the young women, and this is doubtless true; but I sharply question a young man, and rarely ask any questions of a young woman. I explain the facts in this way. The young men are not accustomed to confinement, and though sun-browned and apparently robust, they do not endure the violent transition as well as women. Study is more congenial to the habits of young women, and the visiting committee are certainly mistaken in supposing that they have to work harder in accomplishing their tasks. The reverse is true. In addition to the above bill of ill health against the
young men, a corresponding large number of them has been compelled, from the same cause, to leave the University altogether.

A second showing of the registration, which I had not contemplated, but one very interesting, is this; the absences of the young women are almost exclusively in the lower classes. Of the eighteen, two are in the Sub-Freshmen, fourteen in the Freshmen, one in the Sophomore, one in the Junior and none in the Senior. The absences of the young men are evenly distributed, on the other hand, through the entire course. The young women do not then seem to deterioate with us in health, but quite the opposite. I do not belong to the number of those who set lightly by health. - I would not sacrufice any measure of it for scholarship; but it has long seemed to me plain, that a young woman who withdraws herself from society and gives herself judiciously to a college course, is far better circumstanced in reference to health than the great majority of her sex.

I repeat my thanks to the visiting committee for their labors, and have no doubt that even the mistakes which such Boards may inadvertently make, will ultimately be productive of more knowledge and more safety.

## ANNUAL EXAMINATIONS.

## REPORT OF THE BOARD OF VISITORS TO THE BOARD OF REGENTS.

To the Hon. the board of Regents of the University of Wisconsin:
The undersigned, members of the board of visitors to attend the annual examination of the University classes, respectfully submit the following report:

The University has fortunately outlived, to a great extent, the prejudices and hostility with which it had to contend during the early part of its history. For some years past, it has been rapidly gaining the confidence of the people of the state, as is shown by the more generous policy pursued with reference to it by their representatives, and by the increasing number of students who are availing themselves of the opportunities it offers for enlarged through courses of study. From such observations as we have been able to make during the recent examinations, we do not hesitate to affirm that this con0dence is well merited. The high reputation of its facility, as a crops of accomplished and zealous teachers, who keep in full rapport with the latest developements of learning and science, and the largely extended educational facilities, which, by the wise liberality of the state government, have of late given it, in the form of natural science collections, apparatus, and increased room for laboratories, work shops and cabinets, make it an institution in which the state may feel a just pride, and which presents great advantages for students who desire to pursue a thorough course of training and study. The more and better ị becomes known, the more highly, we feel assured, will it be appreciated. Such at least is the impression we carry away after having attended the examinations and the commencement exercises.

In regard to the examinations, we think it proper, at the outset, to express our sense of the manifest fairness with which they were conducted. There was evidently no pre-arrangement by which the student was enabled to prepare in advance for certain questions, or for examination upon some special chapter or division of a textbook. He was expected to have a general knowledge of the subject under consideration, and to answer, not by an exercise of verbal memory, reproducing the language of the text-book, but as one who had mastered it, and was, consequently, able to develope clearly, in his own language, the points upon which he was questioned. There were, of course, some instances of failure by students to meet the requirements of such an examination, in part obviously arising from temporary embarrassment, and, in other cases, the consequence, doubtless, of having imperfectly assimilated the instruction they had received.

It was our aim to ebserve whether the students had been trained to think or to repeat; whether they had been storing up principles or rules; whether they had been mastering systems or particulars, and it gives us pleasure to report the very high character of training indicated by what we saw of the examinations in the several classes. Nothing was done, it would appear, with a view to effect and show, but the purpose kept in view secmed to be to give, as far as was possible within the necessarily narrow limits of the examinations, a fair indication of the acquirements of the students. The character of the training to which the students had been subjected appeared to be in conformity with the most modern and approved methods. Upon one or two points we may venture a word of criticism. In some cases the pedagogic maxim that " the maximum of talk on the part of the pupil, and the minimum of talk on the part of the teacher, is the perfection of a recitation," was violated. The active, trained mind of the teacher seemed intolerant of the slower action of the mind of the pupil, and to prevent the gaps in the recitation from becoming too great and too frequent the teacher hastened, as we thought, prematurely, to his aid. In a few instances, also, leading questions were put, or a hesitating pupil was jostled and pushed hither and thither, by a rapid succession of questions, until he suddenly found himself on the right ground, though apparently not having a very clear conception of the route which led to it. Such instances, however, were the ex-
ception and not the rule, and due rather to a not unnatural impatience than to design.
In this place, we would suggest whether it would not be practicable to adopt some system of vocal training in the University, by which students would gradually acquire the habit of a clear and distinct utterance, while attaining a certain quality of culture in the tones of the voice. We do not venture this suggestion on account of any noticeable deficiency, in these respects, on the part of the students of the University as compared with the students of other similar institutions, but because it must be admitted that, as a people, whether owing to some climatic or physical cause, or to transmitted habit, we are inclined to nasal drawling, clipping syllables, and flattening our vowels. These are peculiarities not deserving to be cherished as national characteristics, and which may be modified and gradually eradicated, if those who have the education of the people in their charge can be brought to feel that such a result is of sufficient importance to justify the labor which would be necessary in order to attain it.

The limits of this report, as well as the circumstance that it was impossible for the members of the board of visitors to attend the examinations of all the classes, or all the examinations of any one class, will preclude us from attempting a notice in detail of the several classes. We think it proper, however, to state that nowhere in the University were the results of earnest and critical study more apparent thar in the classical department. Clearness of perception and accuracy of expression were noticeable in the examinations of the classes in Latin and Greek. In both, we observed a cheerful earnestness on the part of the students, betokening a thorough interest in the work, and showing that the study of these noble languages has lost none of its old power to quicken the intellect, and epkindle an appreciation of whatever is best in human culture.

The examinations, in the scientific department, gave evidence of careful training, and the method of conducting the examinations merits approval. This was particularly noticeable in the classes in physics, zoölogy, chemistry, applied mechanics, and mathematics. We are aware that the exact character of the studies taught in this department leave but little room for the student to exercise freedom in answering the questions, and his proficiency or igno-
rance of the subject, must be quickly apparent. Nevertheless the examinations indicated that the student was thrown wholly on his own resources, and thus gave a good opportunity of determining the proficiency of each.

We have only words of praise to bestow on those who have labored for the erection of Science Hall. It is a building in every way well adapted to the purposes for which it is intended. Substantial and excellent throughout, we cannot but congratulate the Board of Regents upon having secured the construction of an edifice of such size, and so solidly and thoroughly well built, as it seems to be, at so small an expenditure of money. It must be borne in mind, however, that the building alone cannot accomplish the ends which its erection was designed to promote. In order to attain the results sought for, the professors in each department must have proper apparatus to work with, and this apparatus is so essential to the attainment of the best results that it ought not to be obtained from time to time; it should be procured at once. Some of the apparatus now on hand in the department of physics cannot be made available until additional apparatus is secured. This assertion applies especially in reference to a spectroscope, an instrument of undoubted utility, and each day becoming more useful in the arts and sciences. It cannot, however, be made available for class illustration without the use of a heliostat. Again, in the study of the composition of crystals, a highly important branch, the polariscope is absolutely essential. As there is now but one such. instrument in the University, it is, of course, impossible for each student to familiarize himself with the subject under these circumstances. Now a cheap form of polariscope is manufactured for class use, and it would seem advisable that a number of these instruments should be obtained. It is a well understood fact that instruction "imparted through the eye" is a most important method. In nearly all the departments of science a good lantern is essential. The lantern on hand has many good features, its principal defect being the small size of the condensing lens. It is doubtful whether lenses of the proper sizes can be found already manufactured, and, in any event, a superior lens can be obtained only by having it made to order.

The electric apparatus is sadly deficient in many essentials. For example, the electric light cannot be used without a regulator, and
the battery power cannot be properly utilized for want of it. The battery in use is by no means what it should be. An institution designed to afford instruction in all the important facts concerning electricity should have one of M. Gramme's magnetic electric machines, which can always be relied upon, and replaces the troublesome, and always dirty, Grove's battery.

There should also be procured a standard galvanometer, a quadrant electrometer, and such other instruments as are absolutely requisite to equip a good physical laboratory - such a one as students can work in, and practically familiarize themselves with the essential details in heat, light, electricity and chemistry, which they cannot fully do with the apparatus now on hand.

With the addition above suggested, the department of Physics, in Science Hall, will be as well equipped as that of any other institution in the country, and we must be satisfied with nothing else.

The departments of Chemistry and Zoölogy require more apparatus and material to equip them thoroughly, and now that the new building is ready to receive them, it would seem to be an appropriate time to supply the deficiencies and make it what it should be.

We were much interested in inspecting the magnetic observatoy constructed by the University, but supplied with instruments and superintended by the United States Coast Survey Bureau. As it is the only observatory of the kind in the United States, it cannot but add to the attractions of the Uuiversity as a scientific centre.

It is now several years since the experiment of the coeducation of the sexes was begun in the University. In respect to the proficiency shown by the young women in the several classes during the recent examinations, as compared with the young men, our impressions coincide with former boards of visitors. They sustained the test at least as creditably as the young men, and, if there was a difference, we are inclined to think it was in favor of the young women. In the main, they excelled in the precision and promptitude with which they responded to questions. We were, however, deeply impressed with the appearance of ill-health which most of them presented. It would not seem probable that, by mere coincidence, so many young women should be congregated together offering this peculiarity. There are a few notable exceptions, but, as a whole, this appearance is unmistakable, and has given rise to considerable comment among the members of the board. There
can be nothing about the hygienic condition of the University, in any of it parts, which would give rise to ill-health. Every part ex. amined presented an appearance of cleanliness; the food in the Ladies Hall was wholesome and well prepared; the service rooms clean; the dormitories well lighted and aired, and of sufficient capacity. We are, therefore, compelled to look elsewhere for the cause.

Every physiologist is well aware, that at stated times, nature makes a great demand upon the energies of early womanhood, and that at these times great caution must be exercised lest injury be done - an injury which, it is well known, may prove permanent. In order to keep place in the University classes, where the sexes are educated together, no account is taken of the fact that the woman labors under a double disadvantage, as compared with the man. 1st, in the circumstance that nature compels compliance with its well established laws, and, as above stated, makes demands upon her energies: and, 2d, that to keep her class standing, the girl must devote more energy, and, consequently, work harder, to accomplish her task, making drafts upon her system, which, by the very nature of the case, is already taxed to meet the physiological demands made upon it. It is also well known that overwork, in whatever way induced, at the times indicated, will produce deterioration of the system, which generally manifests iself by bloodlessness, followed by a train of evils which it is not necessary here to enumerate. It is this very condition of bloodlessness which is so noticeable in the women of the University at this time; the sallow features, the pearly whiteness of the eye, the lack of color, the want of physical development in the majority, and an absolute expression of anæmia in very many of the women students, all indicate that demands are made upon then which they cannot meet.

Education is greatly to be desired, but it is better that the future matrons of the state should be without a University training than that it should be procured at the fearful expense of ruined health; better that the future mothers of the state should be robust, hearty, healthy women, than that, by over study, they entail upon their descendants the germs of disease. And there is no more certain law than that of heredity. The over-wrought nervous system undermines the general health stealthily, buat certainly, and its evil consequences are prolonged in many cases through life.

We are aware that the law organizing the University provides that it shall be open for the education of men and women. It is not therefore necessary that both classes of students be subjected to the same systematic course of training, mental drill being attained in a variety of ways, each leading to adequate results; and the thought impressed itself upon some of the members of the Board that the curriculum could be so ordered that both sexes might obtain University drill-adjusted in such a manner that each sex should be enabled to secure that form of education best fitted for his or her respective sphere - and that the system of compelling men and women to fare alike might be so modified as to preclude the possibility of causing disease. We are forced to the conviction that there is at present, a marked disparity between the health of the men and women of the University, and that, as a class, the women present undoubted evidences of physical deterioration. If the Board of Regents, however, consider it expedient to alter the curriculum in any way, we would earnestly recommend that particular attention be paid to the physical well being of the female students.
In the Department of Military Science, the visitors observed with regret that there seemed to be a want of interest in the exercises on the part of the students who participated in them. To whatever cause this is due, an attempt should be made to correct the defect. Omitting all consideration of the benefits which might accrue, in the contingency of war, from a more general and hearty participation in the drill exercises, the immediate results of such a course upon the students, as an excellent system of gymnastics, giving vigor to the body, firmness and manliness of bearing and grace of movement are of very high importance. An earnest effort ought, in our judgment, to be made to arouse a warmer interest in this department than appears to exist at present.
The examination of the Law Class embraced a wide range of topics, and was of a very satisfactory character. It gave evidence that the young men composing it have been under the care of competent sustructors, and that, in addition to the oral teaching they have received in the form of lectures, they have profited by a diligent study of the text-books.

In general, the impressions received respecting the discipline which prewails in the University "were favorable. The orderly
movements of the students, in the several buildings and on the grounds, and their conduct while entering or leaving the class rooms, left little scope for criticism. In the classes, during recitations, there were some instances of a lack of attention, and of a strict observance of the proprieties of the occasion, such as one student communicating with another or abruptly changing his place, which suggested that there was still room for improvement in the matter of deportment. As a rule, however, the conduct of the students was considerate and courteous, indicating a high regard as well as respect for their instructors.

The Experimental Farm, under the supervision of the agricultural department, presents a variety of soils, surfaces and exposures, which admirably adapt it to the purpose to which it is devoted. Many important experiments are conducted upon it, the results of which, if properly utilized, must be of great value. Thus far, however, they have attracted less attention than they merit. This is probably due to the fact that their publication has been mainly confined to an insertion among the documents accompanying the annual report of the Board of Regents of the University, a place where they are not likely to attract the attention of any considerable number of those who are most directly concerned in agriculture. It the results of such experiments could be communicated, in a popular form, from time to time, as they are concluded, to agricultural journals having a large circulation in the state, or to leading newspapers, they would be more effectively brought to the notice of the class of persons most directly interested in them, to the advantage both of the farmers and of the University.

A serious inconvenience is felt at present, from the lack of a hall or chamber, sufficiently large to accommodate the whole body of students when assembled. It is often necessary to address all the students together, and, in institutions where the opportunity exists, such meetings are of frequent occurrence for purposes of instruction, advice, etc. It would, therefore, seem to be eminently proper that this deficiency should be supplied as speedily as possible. The rooms now used for the library are altogether too small, and the books cannot be properly arranged. The books are increasing, from year to year, and the demand for more room will shortly make it necessary to provide a place for them elsewhere than in the narrow quarters now afforded in the main building.

We would accordingly suggest that steps be taken to secure the construction at an early day, of a suitable building for the library, and arrange the plan so that a general assembly chamber may form a feature of it.

We would further suggest whether it would not be well to designate the members of the board of visitors as is now done in the case of the visitors of the Normal Schools, at the beginning of the Academic year, and authorize them to visit the University and attend the recitations of classes, whenever it might suit their individual convenience, in addition to attending the examinations at the close of the year. Doubtless, competent persons, interested in the educational progress of the state, and whose business or inclinations bring them from time to time to the capital, might be found, who would perform such duties without additional expense to the University. Were such a course adop!ed, it would enable boards of visitors to obtain a much greater familiarity with the methods and condition of the University, its efficiency and its needs, than is practicable under the existing system, and to submit recommendations and criticisms with greater confidence than they are able to feel at present.

In concluding our report, we desire to express our warm appreciation of the many courtesies and attentions which we have received from the board of regents, and from the president and faculty of the University, while engaged in the discharge of our duties.

> MOSES LANE, GEORGE W. EASTMAN, W. H. BORDEN, HORACE RUBLEE, HENRY JANE, D. G. HOOKER, WALTER KEMPSTER, O. R. SMITH,

Madison, June 20, 18\%7.

## EXPERLMENTAL FARM.

## REPORT OF THE PROFESSOR OF AGRICULTURE AND CHEMISTRY TO THE BOARD OF REGENTS.

To the Hon. George H. Paul,
Pres't of the Board of Regents of the University of Wisconsin:
SIR: I submit herewith a report of experiments conducted upon the University Experimental Farm, for the year ending September 30, together with a copy of meteorological observations taken under my charge at the University, for the year ending Oct. 31, $18 \% \%$.

Madison, November 1, $18 \%$.

W. W. DANIELLS.

## WINTER WHEAT.

The following varieties were sown September 21, one-half measured bushels of seed per acre being used. Soil, a clay loam upon which wheat had been raised the previous year. Twelve loads of well-rotted stable manure were put upon each acre before plowing.

Fultz - Weight of seed per bushel, 60 Hts ; harvested July 11, 187\%. Weight of straw and grain per acre, $6,616 \mathrm{mbs}$. Weight of grain, $2,846 \mathrm{tb} 5 \mathrm{Weight}$ per measured bushel, $63 \frac{3}{4} \mathrm{Hbs}$. Yield per acre, 47.4 bushels. Percentage of grain to weight of straw and grain, 43.

This variety was first sown in 1872 , when it yielded 33 bushels per acre, in 1873 , the yield was 20 bushels per acre, in 1874, 35 4-Reg. Univ.
[Doc. 5.]
bushels, in $18 \% 5,1 \% .5$ bushels, in 1876 , it winter-killed. The mean yield for the six years we have raised it, is 25.4 bushels.

Prussian-Weight of seed per bushel, $56 \frac{1}{2}$ fbs. Harvested July $1^{17}$ th. Weight of straw and grain per acre, 5,798 \#bs. Weight of grain, $2,001 \mathrm{Hbs}$. Weight per measured bushel, $59 \frac{1}{2} \mathrm{Hbs}$. Yield per acre, 33.3 bushels. Percentage of grain to weight of straw and grain, 33. This variety was slightly injured by the winter.

Diehl - Was entirely killed by the winter.
Clawson - Weight of seed per measured bushel, $56 \frac{1}{2} \mathrm{Hbs}$. Harvested July 14th. Weight of straw and grain per acre, $5,850 \mathrm{Hbs}$. Weight of grain, $2,567 \mathrm{mbs}$. Yield per acre, 42.6 bushels. Percentage of grain to weight of straw and grain, 43.8.

## WHITE WINTER RYE.

Sown September 28, 18\%6. Weight of seed per bushel, 56 Hbs . Harvested July 12th. Weight of straw and grain per acre, $6,097 \mathrm{fbs}$. Weight of grain, $2,280 \mathrm{fbs}$. Yield per acre, 40.7 bushels. Weight of grain per measured bushel, $58 \frac{1}{2}$ tos. Percentage of grain to weight of straw and grain, 3\%.3.

This appears to be a superior variety of rye. It has a large, plump, white kernel. and yields well.

## SPRING WHEAT.

The following varieties were sown with $1 \frac{1}{2}$ measured bushels of seed per acre. Soil a light clay loam. Cereals had for several years previous been raised upon the field. Twelve loads of well rotted stable manure were' spread upon each acre before plowing. The land was fall plowed, and cultivated in the spring before sowing. The seed was sown broadcast by hand.

Red Mammoth Spring - Sown April 1\%th. Weight of seed per measured bushel, 52 tbs . Harvested July 28th and 31st. Weight of straw and grain per acre, $5,796 \mathrm{mbs}$. Weight of grain, $1,684 \mathrm{Hbs}$. Yield per acre, 28 bushels. Weight of one bushel, 59 lbs . Percentage of grain to weight of straw and grain, 29.

White Michigan - Sown April 1\%th. Weight of seed per meas-
ured bushel, $56 \frac{1}{2} \mathrm{fbs}$. Harvested July 26th. Weight of straw and grain per acre, $5,776 \mathrm{Hbs}$. Weight of grain, $1,720 \mathrm{Hbs}$. Weight of one measured bushel, 58 mbs . Yield per acre, 28.6 bushels. Percentage of grain to weight of straw and grain, 29.8.

Oran - Sown April 17th. Weight of seed per measured bushel $56 \frac{1}{2} \mathrm{Hbs}$. Harvested July 26th. Weight of straw and grain per acre $5,236 \mathrm{tbs}$. Weight of grain $1,262 \mathrm{fbs}$. Weight of one measured bushel $56 \frac{1}{2} \mathrm{mbs}$. Yield per acre 21 bushels. Percentage of grain to weight of straw and grain 24.

Odessa - Sown April 21st. Weight of seed per measured bushel 54 Hhs. Harvested July 31st. Weight of straw and grain per acre $6,116 \mathrm{fbs}$. Weight of grain $1,912 \mathrm{Hs}$. Yield per acre 31.8 bushels. Weight of one measured bushel $61 \frac{1}{4}$ tbs. Percentage of grain to weight of straw and grain 31.

German Fife - Sown April 21st. Weight of seed per measured bushel 54 fbs . Harvested August 2d. Weight of straw and grain per acre $4,696 \mathrm{tbs}$. Weight of grain $1,250 \mathrm{Hs}$. Weight of one measured bushel $54 \frac{1}{2} \mathrm{tbs}$. Yield per acre 20.8 bushels. Percent age of grain to weight of straw and grain 26.6.

April - Sown April 21st. Weight of seed per measured bushel, 55 ths. Harvested August 1st. Weight of straw and grain per acre, $5,724 \mathrm{~ms}$. Weight of grain, $1,448 \mathrm{mbs}$. Weight of one measured bushel, 53 fbs . Yield per acre, 24 bushels. Percentage of grain to weight of straw and grain, 25.3.

Arnautka - Sown April 21st. Weight of seed per measured bushel, $5 \% \mathrm{Hbs}$. Harvested August 1st. Weight of straw and grain per acre, $5,776 \mathrm{Hbs}$. Weight of grain, $1,812 \mathrm{Hts}$. Weight of one measured bushel, $58 \frac{1}{2} \mathrm{tbs}$. Yield per acre, 30.2 bushels. Percentage of grain to weight of straw and grain, 31.4.

Bismark-Sown April 21st. Weight of seed per measured bushel, 55 fbs . Harvested August 2d and 6th. Weight of straw and grain per acre, $5,636 \mathrm{Hbs}$. Weight of grain, $1,548 \mathrm{Hts}$. Weight of one measured bushel, 56 fbs . Yield per acre, 25.8 bushels. Percentage of grain to weight of straw and grain, 27.4.

Oseca - Sown April 21st. Weight of seed per measured bushel 59 lbs. Harvested August 27th. Weight of straw and grain per acre $4,976 \mathrm{lbs}$. Weight of grain $1,592 \mathrm{lbs}$. Weight of one meas-
ured bushel $57 \frac{1}{2} \mathrm{lbs}$. Yield per acre 26.5 bushels. Percentage of grain to weight of straw and grain 32.

Touzelle - A new variety from France obtained of the commis sioner of agriculture. Eight quarts of seed weighing $15 \frac{1}{2}$ lbs., were sown April 21st, upon one-fourth acre of ground. Harvested August 27th. Weight of straw and grain per acre $4,096 \mathrm{lbs}$. Weight of grain $1,0 \% 2 \mathrm{lbs}$. Weight of one measured bushel 59 lbs . Yield per acre $1 \% .9$ bushels. Percentage of grain to weight of straw and grain 26.1.

All these varieties of wheat were injured by the chinch-bug to some extent. The last two varieties being very late were most seriously injured.

## BARLEY.

The following varieties of barley were sown April 21st, with two measured bushels of seed per acre. The soil is light clay loam, which for several years has been in cultivation to cereals. The land was fall plowed, and dressed with twelve loads of well rotted stable manure per acre. All varieties were more or less injured by chinchbugs.
Manshury - Weight of seed per measured bushel, 50 lbs . Har. vested July 20th. Weight of straw and grain per acre, $5,980 \mathrm{lbs}$. Weight of grain, $3,120 \mathrm{lbs}$. Weight of one measured bushel, $48 \frac{3}{4}$ lbs. Yield per acre, 65 bushels. Percentage of grain to weight of straw and grain, 52.2.

Chevalier - Weight of seed per measured bushel, 44 lbs . Harvested July $2 \%$ th. Weight of straw and grain per acre, $5,540 \mathrm{lbs}$. Weight of grain, $2,126 \mathrm{lbs}$. Yield per acre, 44.3 bushels. Weight of one measured bushel, 47 lbs . Percentage of grain to wetght of straw and grain, 38.4.

Common Scotch - Weight of seed per measured bushel, 49 fbs. Harvested July 21st. Weight of straw and grain per acre, $5,760 \mathrm{Hbs}$. Weight of grain, $2,488 \mathrm{fbs}$. Weight of one measured bushel, $46 \frac{1}{2} \mathrm{fbs}$. Yield per acre, 51.7 bushels. Percentage of grain to weight of straw and grain, 43.2.

Saxonian - Weight of seed per measured bushel, $49 \frac{1}{2} \mathrm{fbs}$. Har.
vested July 23d. Weight of straw and grain per acre, $5,900 \mathrm{fbs}$. Weight of grain, $2,522 \mathrm{Hbs}$. Weight of one measured bushel, $47 \frac{1}{2} \mathrm{fts}$. Yield per acre, 52.5 bushels. Percentage of grain to weight of straw and grain, $42 . \%$.

Probstier - Weight of seed per measured bushel, 44 fbs . Harvested July 24th. Weight of straw and grain per acre, $6,380 \mathrm{Hbs}$. Weight of grain, $2,684 \mathrm{Hbs}$. Weight of one measured bushel, 49 Hbs . Yield per acre, $5 \% .6$ bushels. Percentage of grain to weight of straw and grain, 43.3.

## OATS.

The following varieties were sown May 5th, upon land that was fall-plowed, and thoroughly cultivated beiore sowing. The soil was clay loam, and was dressed with 12 loads of well rotted stable manure per acre. They were all badly lodged by severe wind and rain storms, which caused them to shell badly while being harvested. $2 \frac{1}{2}$ measured bushels of seed were sown to the acre.

White Schonen - Weight of seed per measured bushel, 29 fbs . Harevsted August 4th. Weight of straw and grain per acre, $6,885 \mathrm{fbs}$. Weight of grain, $3,024 \mathrm{fbs}$. Weight of one measured bushel, $38 \frac{1}{4} \mathrm{fbs}$. Yield per acre, 89.5 bushels. Percentage of grain to weight of straw and grain, 42.8.

White Waterloo - Weight of seed per measured bushel, 24 fts . Harvested August 3d. Weight of straw and grain per acre, $1,355 \%$ Hbs. Weight of grain, $2,753 \mathrm{Hbs}$. Weight of one measured bushel, $38 \frac{3}{4} \mathrm{fbs}$. Yield per acre, 86 bushels. Percentage of grain to weight of straw and grain, 37.4.

Canada - Weight of seed per measured bushel '25 lbs. Harvested August 4th. Weight of straw and grain per acre $8,728 \mathrm{lbs}$. Weight of grain 2,866 l lbs. Weight of one measured bushel $37 \frac{1}{2}$ lbs. Yield per acre 89.2 bushels.
.Somerset - Weight of seed per measured bushel 32 lbs. Harvested August 5th. Weight of straw and grain per $\mathcal{E}^{\text {re }} 7.216 \mathrm{lbs}$. Weight of grain $2,700 \mathrm{lbs}$. Weight of one measured bushel $37 \frac{1}{2}$ lbs. Yield per acre 84.3 bushels. Percentage of grain to weight of straw and grain 3\%.4.

Houghton - Weight of seed per measured bushel 25 lbs. Harvested August 17th. Weight of straw and grain per acre $7,176 \mathrm{lbs}$. Weight of grain $1,906 \mathrm{lbs}$. Weight of one measured bushel $31 \frac{1}{2}$ lbs. Yield per acre 59.5 bushels. Percentage of grain to weight of straw and grain 26.5.

Early Fellow - Weight of seed per measured bushel 30 lbs. Harvested August 20th. Weight of straw and grain per acre 7,140 lbs. Weight of grain 2,280 lbs. Yield per acre 71.2 bushels. Weight of one measured bushel 35 lbs . Percentage of grain to weight of straw and grain 32. A large tree near the centre of the plat upon which these oats grew diminished the yield somewhat.

Black Norway - Weight of seed per bushel 25 lbs . Harvested August 6 th and 13th. Weight of straw and grain per acre $7,456 \mathrm{lbs}$. Weight of grain 2,7\%2 lbs. Weight of one measured bushel 32 lbs . Yield per acre 86.6 bushels. Percentage of grain to weight of straw and grain 3\%.2.

## CORN.

The following varieties were planted May 14th, upon clay loam that was dress d with twelve loads of well-rotted stable manure per acre. The first three varieties were planted in hills $4 \times 4$ feet; the White Australian, being a much smaller variety, was planted $3 \frac{1}{2} \times 4$ feet. In other respects, the cultivation was the same. The seed of White Australian and Cherokee varieties was poor, requiring twice replanting.

Yellow Dent - Ripe September 14th. Yield in pounds of ears per acre, $\overline{0}, 434$, in bushels of ears of 75 Ibs . each, 72.4 . This variety stood next to wheat, and was quite severely injured by the chinch-bug, after the whest was harvested.

Cherokee - Ripe September 16th. Pounds of ears per acre, 5,116 . Yield, in bushels of 75 tbs. each, 68.2 .

Lysaghts-A large yellow variety obtained of William Lysaght, Esq., of Belleville. Ripe September 8th. Pounds of ears per acre, 5,044 . Yield in bushels of 75 fts . each, 67.2 .

White Australian - Ripe September 10th. Pounds of ears per acre, 6,041 . Yield in bushels of 75 lbs . each, 80.5.

## IMPROVEMENT OF SOILS BY MECHANICAL MEANS.

This experiment was begun in $18 \% 1$, to be continued five years, upon four adjacent plats of an acre each, which have been cultivated as follows :

Plat 1, to be plowed to the depth of five inches only.
Plat 2, to be plowed twelve inches deep.
Plat 3, to be plowed twenty inches deep by trench-plowing.
Plat 4, to be plowed twenty inches deep by subsoiling.
Plats 1 and 2 have been cultivated in the prescribed manner from the beginning.
Plat 3, in 1871, was plowed twelve inches deep only; in 1872 and 'r3, seventeen inches; in 1874 and 1875, eighteen inches, which is as deep as it was found practicable to plaw.

Plat 4 was subsoiled sixteen inches deep in $18 \% 1$; seventeen inches in $18 \%$ and ' 73 , and eighteen inches in $18 \% 4$ and $18 \% 5$.
The cultivation of these plats has been the same in all other respects than those mentioned.
The soil is clay with heavy clay subsoil; the land is level and rather low. In the fall of 1873 , an underground drain was laid through each of the plats to carry away water that formerly flowed over them all, after heavy rains.
During the first four years these plats were in cultivation to corn exclusi ely. In 1875 a portion was in cultivation to corn, and a portion to oats.

The ive years through which the experiment was to be continued expired in 1875. During the past two seasons these plats have been in cultivation to corn, all of them having been plowed alike, about eight inches deep, except that plat 1 was plowed no deeper than before, in order that no unstirred soil should be brought to the surface. The following table gives the yield per acre for the respective years, the corn being in bushels of ears, weighing 75 lbs . each.

| Depth of Cultivation. | 1871. | 1872. | 1873. | 1874. | 1875. |  | 1876. | 1877. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  | Corn. | Oats. |  |  |
| Plowed 5 inches | 55.4 | 43.5 | 53.4 | 53 | 67.7 | 60.2 | 45.7 | 75.9 |
| Plowed 12 inches | 50.6 | 50.3 | 52.8 | 58.1 | 67 | 65.5 | 46.8 | 75.5 |
| Trench-plowed 18 inch | 44.9 | 54.7 | 51.3 | 65.3 | 60.5 | 65.1 | 43.6 | 67.8 67.5 |
| Subsoiled 18 inches... | 41.2 | 56.8 | 51.1 | 65.8 | 57.2 | 64 | 44.1 | 67.5 |

In $18 \% 5$ the last two plats were severely injured by chinch-bugs.
The average yield for the entire seven years, in bushels of ears of corn, weighing 75 lbs. each, is:

> For 5 -inch plowing, 56.3 .
> For 12 -inch plowing, 57.3 .
> For 18 -inch trench plowing, 56.8 .
> For 18 -inch subsoiling, 54.2.

## POTATOES.

The following varieties were planted May 5th, in rows $3 \frac{1}{2}$ feet. apart, hills 18 inches apart in the row. The time of ripening and yield per acre is given in the subjoined table:

| Variety. | Time of ripening. | Bushels per acre. |
| :---: | :---: | :---: |
| Alpha |  | 242 |
| Early Rose.... | July 30 | 279.6 |
| Early Favorite........ | July 30 | 213.6 |
| Snow-Flake.......... | ${ }_{\text {Aug. }}{ }^{\text {Aug. }}$ | 208.9 |
| Brownell's Beauty. | Aug. ${ }^{\text {ang. }} 9$ | 282.5 139.5 |
| Compton's Surprise | Aug. ${ }^{\text {A }} 0$ | 157.7 |
| Eureka........ | Aug. 12 | 222.1 |
| Nonsuch. | Aug. 3 | 246.3 |

The following are varieties that have never before been in cultivation in this vicinity. One pound of seed of each variety was cut. into singie eyes, and received the cultivation usually given to field potatoes:

Ruby, ripe August 2d, yield $108 \frac{3}{4}$ 7ts.
Improved Peachblow, not ripe Oct. 6th, yield $88 \frac{1}{2}$ tbs.
Superior, ripe Oct. 1st, yield $75 \frac{3}{4} \mathrm{tbs}$.
Centennial, ripe Sept. 12th, yield 44 fbs.
I would express my obligation to Mr. E. G. Hayden, farm superintendent, for his care and attention in carrying .out the details of these experiments.

## METEOROLOGY.

The meteorological observations formerly taken under the directions of the Smithsonian Institution, are now taken under the direction of the chief officer of the United States signal service.

The morning observation is taken at 6:45 local time, to correspond with 7:35, Washington time, at which hour an observation is taken at all stations through the country. The hours of afternoon and evening observations are still 2 and 9 , local time, respectively.

The temperature is given in degress and tenths, F .
The amount of cloudiness is expressed by a number indicating the tenths of the sky overcast. The following abbreviations are used:

St. - Stratus.
Cu.-Cumulus.
Cir. - Cirrus.
Nim. - Nimbus.
Cu.-St. - Cumulo-Stratus.
Cir.-St. - Cirro-Stratus.
Cir.-Cu. - Cirro-Cumulus.
The direction of the wind is taken for eight points of the compass, the figures accompanying represent the force on a scale from 1 , a very light breeze, to 10 , a most violent hurricane. In the summary of observations, the percentage of wind from each direction is given for each month, and for the entire year.

The beight of the barometer is indicated by inches and decimals and corrected for the expansion above $32^{\circ}$.
"Relative humidity" is the percentage of complete saturation existing at the time when the observatipn is made.

Latitude $43^{\circ} .4^{\prime}$, 33.1."
Longitude $12^{\circ} .20^{\prime}$, $58.5 . .^{\prime \prime}$
Height above the sea, 1088 feet.
Maximum observed temperature for the year, $88^{\circ}$.
Minimum observed temperature for the year - $22^{\circ}$.
Range observed temperature during the year, $108^{\circ}$.
Mean temperature for the year, $45.4^{\circ}$.

NOVEMBER, $18 \% 6$.

## NOVEMBER, $18 \% 6$.

NOVEMBER, $18 \% 6$.

## TRUSTEES' REPORT.

Madison, September 30, $187 \%$.

## To His Excellency, Harrison Ludington, Governor of the State of Wisconsin:

The Trustees of the Wisconsin State Hospital for the Insane, take pleasure in presenting to you, the eighteenth annual report of that institution; and that pleasure is immeasurably heightened by the fact that the past year has been one of uninterrupted prosperity in the affiairs of the Hospital. The management has been satisfactory to the Board, and successful in imparting benefits to the sorely afflicted persons that come under its ministrations. None of our state institutions appeal more strongly to our state authorities for encouragement and support, than do the hospitals for the insane; and nothing can be more gratifying to the people than to learn that these unfortunate persons are so well cared for as to render their lives as comfortable and as endurable as their mental condition will permit. That portion of this class of persons coming under the care of the hospital under our charge, have certainly had no cause of complaint during the past year; and the statistics will show, that permanent relief has been afforded to many of the inmates of that institution. A distinguished writer has said that "A sound mind in a sound body is a short but full description of a happy state in this world; he that has these two has little to wish for, and he that wants either of them will be but little better for anything else." It is to restore one or both of these conditions so essential to " a happy state," that insane hospitals are established; and to be able to state, that seven hundred and sixteen persons have been discharged from this hospital since it was opened in 1860 , recovered, expresses in stronger terms, its great usefulness, than it can be done in other
words. That the people may more fully understand the amount of good accomplished by this hospital, we subjoin a few figures:

The hospital was opened for the reception of patients in July, 1860. The total number of admissions to its benefits since that time, has been twelve hundred and eighty-seven males, and twelve hundred and five females - making a total of twenty-four hundred and ninety-three. Of this number there have been discharged recovered, three hundred and sixty-eight males, and three hurdred and forty-eight females, making a total of seven hundred and sixteen; and discharged improved, two hundred and ninety-three males and two hundred and thirty-six females, making a total of five hundred and twenty-nine. The number discharged unimproved, has been, two hundred and seventy males and two hundred and seven-ty-six females, making a total of five hundred and forty-six. The number that have died has been one hundred and seventy-one males and one hundred and forty-five females, making a total of three hundred and sixteen. An analysis of these figures shows the gratifying fact, that more than one-half of all the patients that have come under treatment in the hospital, have been discharged improved and nearly one-thurd of the whole number have been discharged, fully recovered, while but a little over one-fifth of the number have been discharged unimproved. This latter number, though their mental condition was not improved, received much better care than would have been possible outside of the hospital, which goes to make up the total of its benefits.

The figures relating to the operations of the year ending September 30, 1877, may prove of interest. On the first of October, 18\%6, there were in the Hospital one hundred and eighty-nine males and one hundred and sixty-five females, making a total of three hundred and fifty-four. There have been admitted during the year sixty-one males and eighty-three females, making a total of one hundred and forty-four, and showing the whole number that have been treated to have been four hundred and ninety-eight. The number remaining in the hospital at the end of the fiscal year was three hundred and eighty-two. The daily average number under treatment during the past year has been a fraction over three hundred and seventy.
Accompanying the superintendent's report will be found several statistical tables, showing the number of admissions; years of age
at time of admission, nativity of patients, residence when admitted; civil condition when admitted; duration of insanity when admitted; age when attacked, and number recovered of each age; number died; age at death; cause of insanity of those admitted, etc. These tables will be examined with special interest by many of the people of the state.

The reports of the superintendent, the several officers and committees, herewith published, will give full details of the operations and progress at the hospital during the past year, and reference is made to them with special satisfaction. They present a gratifying condition of affairs, and prove that the management has been such as to commend those in charge to the good will of the people of the state.

A statement of the financial wants of the hospital for the ensuing year, is presented, as follows:
To meet current expenses from January 1 to March 1, 1878..... $\$ 16,46667$
To meet current expenses from March 1, 1878, to March 1, 1879. $\quad 88,92000$
For new gas works.. ......................................... - 8, 00000
For modification of water closets, bath and clothes rooms...... 2,00000
For material for furniture . . .................................... 1,00000
For completion of new roofing of wings...................... 1,50000
For extension of water pipes................................... 2,00000
For hose and fire apparatus.......... ....... ................. 2, 00000
For addition to barn and stable............................... 1,00000
For purchase of cows ......................................... 1,20000
For medical library and apparatus............................. 500.00
For new floors.................................................. 1, 20000
Total ................................ ...................... \$125,786 67
Deduct amount that will be received from counties.......... 35, 00373
Amount to be appropriated..................................... \$90,78294
The board would recommend an appropriation of $\$ 80,000$ for the purpose of constructing additional wings to the Hospital building.

A few words in regard to the necessity for these appropriations may not be out of place, though it will be apparent to most persons.

The appropriation of the last legislature only provided means for the support of this hospital until the first of January, 1878, while the policy adopted in case of all the other state institutions, was to provide for their support till the first of March, 1878. This is un-
doubtedly the true policy, as it furnishes means of support till the next annual appropriation is made; and the first item of $\$ 16,466.64$ is for the expenses of the hospital during the months of January and February next, to make the time correspond with the other institutions.

The current expense item of $\$ 88,920$ is for the year from March 1,1878 , to March 1, 1879, and is based upon an average population during the year, of 380 , at $\$ 4.50$ per week each. This is ten more than the estimated number for last year, but there seems no doubt but there will be at least that increase in the number of patients the next year. The rate is fifty cents per week each, less than was appropriated by the last legislature.

The item for gas works will commend itself to all who have carefully considered the matter, and to such as have not, we refer to the remarks of the Superintendent on this subject, to be found in his report. It is desirable to construct new gas works, both for economy and safety, as clearly appears from past experience; and either point should afford a sufficient reason for the appropriation.

The item of $\$ 2,000$ for the modification of water closets, etc., will secure improvements of great value, not only to the comfort but to the health of the inmates of the hospital. A portion of this work was done last year, and it has proved so satisfactory, that the board feel like urging an appropriation to go through with all the wards without delay. The change entirely relieves the wards from an unpleasant odor that cannot be avoided at times, as they are now constructed - and renders the use of the apartments vastly more convenient and private - considerations that should not be overlooked.

With the facilities the shop affords, much furniture of a character adapted for use in the hospital, and not found in markets, can be manufactured to great advantage. During the last year a large amount of this work has been done, and superior articles have thus been supplied to the institution. The bedsteads for use are all made in the shop, and we are sure that those produced are better, stronger and cheaper than any now in use in this country. They are unlike any others, and for good looks, strength and durability, superior to any that have heretofore been used in the hospital. The appropriation of $\$ 1,000$ for materials for furniture is certainly one of great propriety if not of urgent necessity.

The main building and a part of the wings have been newly shingled, and the remainder is in need of the same service. The leakage is considerable, and the consequent injury to the building is becoming serious. To complete the work thoroughly will require the $\$ 1,500$ asked for, and it is hoped it will be appropriated.
In the construction of the work for furnishing a supply of water from the lake, the pipe extends out into the lake but five hundred feet. The water on this shore is quite shallow, and deepens very gradually, so that the depth reached in this five hundred feet is only five feet. Experience has shown that in high winds, frequent upon the lake, the flow of water is muddy, a large deposit of which is made in the tanks. To extend the pipe into the lake two thousand feet more, would reach a depth of nine feet of water, and this difficulty would no doubt be obviated. To accomplish this work would cost $\$ 2,000$, and it seems desirable that it be done.
Protection from fire is a matter that cannot be overlooked with any show of propriety. Now that the supply of water is abundant, the apparatus necessary to make adequate protection should not be delayed a single year nor a day, longer than is necessary to complete the works. Plans have been devised to perfect this desirable object, that must prove available in any contingency, and the importance of having these plans executed must be obvious to all thinking men. The appropriation of $\$ 2,000$ for this purpose cannot be too strongly urged.

The items for $\$ 1,000$ for barn, etc., and the $\$ 1,200$ for the purchase of cows, will be considered together. The extension of stableroom is an absolute necessity, if the number of cows is increased, as all space is now used. The experience of the past year has convinced the board that it will be good policy to keep upon the farm a sufficient number of cows to supply the hospital with all the milk and butter needed for use in the institution. It has heretofore required about twenty-five cows to supply milk. During the last summer that number has been doubled, and the milk has been used more abundantly than before; and in addition, five thousand pounds of choice butter have been made. About thirty more cows - making eighty in all - it is estimated, will abundantly supply the household with both milk and butter, thus affording a very superior article, and saving from $\$ 3,000$ to $\$ 5,000$ in the annual money expenditures. There is ample pasturage and meadow land to support this
number of cows without inconvenience. There is no doubt but the increase of the dairy suggested would prove a profitable one, and produce a prompt and large return for the investment.

The $\$ 500$ askèd for, to replenish the medical library, needs no argument. It is obviously necessary. An appropriation of this amount was promised last year, but was, by some accident, omitted in the bill. We trust it will not be forgotten by the next legislature.

Many of the floors have become badly worn, and should be made new. To make as thorough work as would be desirable, will cost the $\$ 1,200$ asked for. The floors that it is proposed to renew are pine, and they have become rough and uncomfortable. It is proposed to substitute hard wood floors for them. As the building becomes older, as a matter of course, the repairs from year to year increase.

We have thus noted the various items of appropriation desired, in the ordinary running of the Hospital. The necessity for more extended accommodation for the insane of the state, induces us to renew the suggestion that has been made before, of enlarging the present capacity of our hospital buildings, by the addition of wings to each end. Our jails and poor-houses are filled with insane persons, and they cannot receive that attention that should be given them by the state. By the additions proposed, room for a large number of patients could be provided at much less expense than by the erection of a new building, and in many respects it would be better. It would afford a larger number of wards, and the patients could be more thoroughly classified, which would be of vast advantage to them. The same number of officers that are now required, could do the work after the enlargement. No new out-buildings would be required. No new water supply would be needed. But little additional expense for heating apparatus would be necessary. The cost of maintaining patients per capita, would be materially reduced. These considerations, and many others that might be adduced, would go to show that if additional room for the insane is to be provided, the enlargement of the present building is by far the most economical and judicious method of doing it; and it is presumed, in view of the large number of insane persons in the state not provided for, that the next legislature will not fail to provide more room for their accommodation. Entertaining these views, we
urge upon the legislature the propriety of enlarging the State Hospital by the addition of wings, and of making appropriation for it without delay. For fuller reasons in favor of this course, we refer to the Superintendent's report. The amount of money required for this enlargement is estimated at $\$ 80,000$.

In our last report, reference was made to the fact that a system for supplying an abundance of water for the various uses of the hospital had been adopted, and that work had been commenced to put the plan in execution. It was an immense undertaking, but it has been completed, and that its success is fulfilling the most sanguine expectations of its projectors, is a source of gratification to the members of the board and to the officers of the institution. There has been no failure in the least particular, and the supply of water is abundant and unfailing. No one thing about the hospital has given the members of the board so much apprehension and thought as has this question of water. The supply has always been limited, and had there been a fire, the result must have been calamitous, for want of the needed supply of water. This want is now supplied; and not only is the supply of water ample, but it is much softer, hence better for laundry purposes, as well as for use in the boilers. When it is considered that fifteen hundred barrels of water is required for each day's use, the importance of this improvement will be duly appreciated. While it was a work of vast magnitude, we are happy to state that it has been well performed, and the expense has not exceeded the appropriation for that purpose.

Additional water tanks have been supplied, of sufficient capacity to hold the water for a day's use; and the pumping faclities are such that the tanks can be filled in a short time. This affords a great saving of time, as well as a saving of fuel in keeping up steam for pumping purposes during the whole day, as has been the case in the past.

Special attention is called to the report of the visiting committee, the chairman of which is Dr. L. J. Barrows of Janesville. He takes a deep interest in the hospital, is thorough in his monthly examinations, has had personal experience in a like institution, and makes up his report from actual knowledge that entitles it to high consideration.

The members of the board are frequently asked as to the condition of the $\$ 10,000$, that has been in dispute between ex-state treas-
urer Bætz, and the late treasurer of this board. The legislature of 1875, placed this matter in the hands of the attorney general for adjustment, and that officer assumed charge of the same. Suit was commenced against Mr. Bætz, and at the term of the Dane circuit court last spring, the jury acquitted that gentleman from liability; but, it is understood, the case has been appealed to the supreme court.
The appropriation made to the hospital last winter, has been ample to run the institution, and the board congratulates itself upon being able to state that it presents no deficiency to be supplied by the next legislature.
The propriety of making the appropriations payable quarterly, instead of monthly, is suggested. The receiving of the money in small instalments renders necessary the making of purchases of supplies more at retail than is advisable or profitable. This would be obviated if the money were received in quarterly instalments.

The improvements about the buildings and grounds have been quite extensive during the past year; as much so as the means at command would permit. One important improvement in the building has been the construction of a new iron stairway at the extreme ends of the wings, extending from the basement to the upper story. This stairway is of much convenience at all times; and, in case of fire, would afford a line of egress from the building that might be the means of saving many lives.

The statistics furaished and published herewith, pertaining to the operations upon the farm during the past year, give gratifying evidence of good management in this important department. It is really proving a source of profit, as well as affording a healthful recreation for such patients as choose to work upon the farm. The crops have been unusually good the last season, and the products of the farm are becoming matters of considerable account. The wisdom of purchasing the land about the Hospital is abundantly proven with each year's crop.

The stock upon the place is improved with each year, till the herd of cattle now upon it will rank high with any herd of graded cattle in the state.

Dr. J. A. Mack and Peter Gardner resigned the positions of second assistant physician and steward, on the first of December, 1876; and these places have been satisfactorily filled since that time by

Dr. J. N. De Hart, and by Archibald Tredway. No other changes have taken place in the officers of the hospital, during the last year. It gives us much pleasure to state that all officers of the institution have discharged their duties with marked ability, and fidelity to the welfare of those under their care, and to the interests of the state.

In thus briefly referring to the matters of interest relating to the institution committed to their charge, it is a source of sincere gratification to the members of the board, that they can make a report so generally favorable, and one that gives so strong assurance that the insane within the district attached to this State Hospital, to the number that can be accommodated, are well and properly cared for by those in charge. The state authorities have ever been liberal in making provision for its nnfortunate citizens, and we shall look with confidence for a continuance of that liberality, which has given Wisconsin a proud position in the sisterhood of states.

All of which is respectfully submitted.
DAVID ATWOOD, President.
Levi Alden, Secretary.

## SUPERINTENDENT'S REPORT.

## To the Board of Trustees of the Wisconsin State Hospital for the Insane.

Gentlemen: In compliance with the law governing the hospital, I submit to you the following report of its operations for the fiscal year eniding September 30, 18\%\%.

The population of the hospital at the beginning of the year was three hundred and fifty-four; at its close, three hundred and eightytwo. The average number under treatment being a fraction over three hundred and seventy, while the entire number under treatment during the year was four hundred and ninety eight. There have been one hundred and forty-four admissions and one hundred and sixteen discharges. Of those discharged, twenty-eight died, twenty-one were improved, twenty-one unimproved, and forty-five recovered. As is usually the case, several patients were brought here in a dying condition, surviving their journey only a few days.

The general health of the hospital has been good. Twice during the year malarial epidemics have prevailed to some extent, affecting attendants almost exclusively in one case. Neither was followed by death.

During the year we have manufactured forty-eight dining tables, thereby supplying each of the ward dining rooms with three or four tables for patients; thus allowing a better classification than was possible before, when only one or two tables were used. We have also manufactured forty bedsteads, which are neat and handsome in appearance and essentially indestructible.

The work of modification of water closets and clothes rooms is under way, and will be completed for the six wards contemplated in the appropriation, by the first of December. Three of the new closets are now in use and we are highly pleased with the advantages secured by the improvement. They are convenient, odorless, and out of sight from the general ward. There are still six more
suites of closets and bath rooms equally objectionable as those just changed. They open on the hall in full sight of anyone who may be passing through the ward; they are too small, and are inconvenient and offensively public. Owing to different arrangement and construction, it will cost $\$ 2,000$ to effect the desired change. This should by all means be done.

The roofing provided for by last year's appropriation has been finished, leaving about the same amount to be done in order to complete a good, sound roof over the entire hospital building. This will require fifteen hundred dollars.

The material for water tanks is all on hand and one tank is finished. The others we will build as time permits - all being done by our own workmen. When this work is finished we shall have storage room for 1,500 barrels of water, or one day's supply; which can all be raised at one run of the pumps, thereby avoiding the necessity of keeping up steam all day for that purpose, as heretofore.

The new engine is being constructed by E. P. Allis \& Co., of Milwaukee, is of the Corliss pattern, and is $12 \times 36$ inches. It will be in place about the first of November.

Our system of water supply, which had been begun a few weeks before your last annual meeting, is finished, and has been in successful operation for several months. We now have an eight-inch pipe laid from a point five hundred feet out into the lake, up to the pumps, which are located at the engine house, a total distance of 2,1\%2 feet; and from here, a six-inch supply pipe to the hospital. The greatest depth of trench required for laying the main pipe was about forty feet. This work was begun late in the season, and as the work progressed, presented may difficulties, the greatest of which was rocks and quicksand. However, it has been completed, and within the appropriation for the purpose. All our anticipations in regard to the benefits that would accrue from it, have been more than realized. Our estimates as to the quantity of water it would supply are shown to be mathematically correct, viz., six hundred barrels per hour. No more scale forms in the boilers or pipes, and we have soft water for bathing and laurdry purposes, and plenty of it. There is, however, one point in the work which is incomplete. This we knew would be the case when the plan was first adopted, but preferred to wait till the general plan had proved a
success, before asking means for this. I refer to the extension of the pipe into the lake. This entension is now five hundred feet, and the depth reached is, at low water, five feet.

The result is, that during the high winds that stir up the bottom of the lake to this depth, we get muddy water and a deposit of mud in the tanks. Two thousand feet of pipe will reach water nine feet deep at present lake level, which will, I think, obviate the difficulty. This will cost $\$ 2,000$.
A system of protection from fire is now in process of construction, and will, when finished, give a circle of hose attachments all round the hospital, and a sufficient number for all the out-buildings. There will also be stand pipes passing through the hospital at three points from basement to cupola, with hose attachments on each floor. From the top of these stand pipes, will run perforated pipes, along all the ridges of the roof of the hospital, so that the roof can be flooded at a moment's notice. This necessity for protecting the roof from flying sparks in case the outbuildings should burn, becomes imperative on account of a shingle roof being placed on the hospital. We now have enough to attach on one floor all through the hospital, and for outside purposes, except the barn. There should be hose on all the floors of the hospital, and also enough to protect the barn. This will require $\$ 1,200$.

It is my design to organize a fire company from our employees, and practice regular drill at stated intervals.
I estimate the wants of the hospital for the coming year, for current expense, on a basis of population of three hundred and eighty, at four dollars and fifty cents per week, per capita, at eighty-eight thousand, nine hundred and twenty dollars. There will be received from counties, thirty-five thousand and three dollars, and seventythree cents; leaving to be appropriated for current expenses, fiftythree thousand, nine hundred and sixteen dollars and twenty-seven cents.

## RECAPITULATION.

For current expense ..... $\$ 88,420$
Gas works ..... 8,003
Modification of closets, bath and clothes rooms ..... 2,000
Material for furniture ..... 1,000
To complete new roof on hospital ..... 1,500
Extension of water pipe ..... 2,000
Hose and fire apparatus. ..... 2,000
Barn and stable ..... 1,000
Milch cows ..... 1,200
Medical library and apparatus ..... 500
New floors ..... 1,200

For a number of years the hospital has been lighted with gasoline. Three years ago a gasoline machine of improved pattern was purchased, which has, I think, worked as well as any machine made for that purpose. But with the best possible machines, there are yet serious objections to the use of gasoline for light. The first and most important is, that it is always more dangerous to handle than gunpowder. The vapor when mixed with air is hightly explosive. As evidence in the case, I would mention that the house containing our machine has once been blown down, at another time the front blown out, and lastly the door and window blown out and the whole interior set on fire. On this last occasion, the machine, through some slight disorder, had ceased working, and two of our employees entered the room where it was to regulate it. One of them stood opposite the door and the other had gone round on the opposite side of the machine; an explosion occurred, when the one near the door was blown clear out of it. The other one groped his way out through a sheet of flame, escaping badly burned. Had he lacked presence of mind, or accidentally stumbled, he would have been burned to death. Any accidental leaks about the machine constantly renders such accidents liable to occur. Again, gasoline does not make a fixed gas, but is liable to condense in the pipes and chandaliers, and when the key is turned escape as liquid gasoline. We have had carpets set on fire in this way, and a number of times the person opening the key has been covered with gasoline. Fortunately no one has yet been seriously burned in this way, but it is owing to pure good luck and not to the safety of the arrangement. Gasoline is more dangerous to handle than gunpowder, because it readily forms a heavy vapor, which invisibly flows along the suiface of floor or ground, thus establishing a connection between the source and a fire that may be at several yards distance, and an explosion or conflagration results.

Auother objection to gasoline for light is its cost. The only reason it is ever chaper than coal, is, that automatic machines are made that require little or no extra help; whereas, coal gas works require
considerable labor constantly. With the amount of help we have always on hand, no extra help would be required for coal gas works, and that method of lighting would be far cheaper. Therefore I recommend the erection of coal gas works which will cost eight thousand dollars.

Another pressing want is more barn and stable room for the accommodation of a larger dairy. The wisdom of keeping a larger dairy than heretofore has, I think, been sufficiently demonstrated during the past summer. Heretofore it has required twenty-five cows to furnish milk for the household. During April and May last we doubled the number of milch cows, and, beside furnishing the house more abundantly with milk than ever before, we have, up to the 30th of September, made five thousand pounds of very choice butter. Our farm will, I think, support cows enough to make all our butter, which has in past years cost from $\$ 3,200$ to $\$ 4,600$ per year. We have not at present sufficient barn and stable room to provide for this amount of stock. One thousand dollars will build barn and stable room enough to cover all our wants in this direction, and $\$ 1,200$ will be required to purchase the requisite number of cows. Pigs enough are raised to utilize all the refuse of the dairy.
Last year an item of $\$ 500$ for medical library and instruments was agreed upon, both by your board and the State Board of Charities, but did not appear in the bill, and was not passed upon by the legislative committees. I again ask for that amount for the same purpose.

The appropriation for material for furniture will all be exhausted this winter. The amount received was only half what was asked for. We need another thousand dollars to continue the manufacture of furniture.

Many of the floors of the hospital are badly worn, epecially the ward dining rooms and halls. Until last year no new floors have been laid. Sixteen years wear and no repairs has made the defect too great to allow us to make the needed repairs from the current expense fund. Twelve hụndred dollars will be required for the immediate and pressing wants in this direction.

Some of the expenses of a hospital may properly be called fixed expenses, because they do not change materially with any variation of the population within ordinary limits, say, between 300 and 600 .

Some of these I will enumerate. Take, for instance, the salaries of officers, wages of engineer and fireman, cook, launderer, head farmer, gardener, baker, night watches, etc.; also repair of machinery and all minor improvements, the care of grounds, repair of out buildings, etc:, each comparatively small in itself, but making altogether an important aggregate.

In changing the capacity of the hospital from 350 to 550 , the following items of expense would not be increased, except the first, which would, with the addition of one more medical assistant, be increased $\$ 800$. None of the other items would be increased at all:
Salaries of officers ..... \$5,600
Wages of engineer, firemen and blacksmith ..... 2,040
Wages of carpenters ..... 1,522
Wages of head cook ..... 720
Wages of head launderer. ..... 540
Cost of conducting farm and garden ..... 5,812
Wages of baker. ..... 480
Wages of night watches ..... 600
Wages of supervisors ..... 600
Wages of domestics. ..... 840
Maintenance of persons mentioned above, 25 at $\$ 3$ per week ..... 3,900
Light, heat and repairs of center bulding ..... 3,000
Repairs of outbuildings, grounds, etc. ..... 500
Papers, magazines and books ..... 500
Expenses of trustees and visiting committee. ..... 397
Expenses of officers of hospital ou business. ..... 500
Amusements. ..... 500
Chaplain ..... 312
Medical and surgical instruments and apparatus. ..... 300
Total expense. ..... \$28,663
Less. ..... 800
Actual expense ..... \$27, 863

This does not represent all, but most of the main items, for every one knows that the same principle enters into nearly all the departments of expense to some degree. But taking these figures, which have been taken from our last report (save where the expense for the year was less than usual) and which are not large estimates, and divide, first by 350 , and then by 550 , and the difference per capita, per year, is shown, which, dividing by 52 and the same rate per week is shown, omitting fractions, thus:
The cost per year of these items, for 350 patients, per capita, is.... $\quad \$ 7884$
The cost per year of these items, for 550 patients, per capita, is ..... 5028
Difference in favor of 550 , per capita, per year ..... $\$ 2828$
Difference in favor of 550 , per capita, per week ..... 54

Could this showing be carried into all the details of expense, the difference could be easily shown to be still greater.

If, therefore, our present building were enlarged to its originally intended capacity, it would materially decrease the cost per capita of maintaining patients. It would also give us room for better classification, and add materially to the efficiency of our treatment. The number of insane in the state not cared for in either hospital is enough to warrant the enlargement of the State Hospital, even if another building is erected at the same time.

Another point in favor of the enlargement of the State Hospital is, that no other outbuildings will be required than those we now have. Wings can be added to the present building that will give accommodation for two hundred patients at an expense of eighty thousand dollars, or four hundred dollars per capita, which is less per capita than any separate suitable building can be erected for, where extra outbuildings are required. An objection has been raised to the effect that increasing the nnmber of chronic cases, in a hospital where recent cases must be treated, will necessitate too expensive a manner of caring for the chronic cases, who might be fed on plainer and cheaper food, and cared for more cheaply by themselves. To this objection I would urge, that we could devote these new wards exclusively to chronic cases, and care for them according to the most rigid rules of economy that the case might require.

The hospital is at present extremely crowded, and one life has been lost as a direct result of this. We have only a limited nur. ber of rooms adapted to the care of violent patients, which are in the extreme wing of the building. When we are not crowded, the custom is to keep all patients who are subject to paroxysms of violence, in a room alone, occupying always the same room, even during their quiet periods. But, during the summer, we have been so crowded as to be cbliged to resort to associating them with others while quiet, and so use their rooms for those who need safer care. This, of course, involves the risk of a paroxysm of violence coming
on during the night, of which we may have no warning. Such was the case on the night of the 18th of May last, when two demented cases (who had slept in the same room for two weeks previous without trouble) quarreled, and one killed the other with a wooden pail used as a night vessel. Being a county charge, the county judge was at once notified of the occurrence. I take this incident as a text to insist upon some relief from our crowded condition by providing increased accommodations for the insane.

During the summer, we had excursions on the steamer Mendota once or twice a week for such patients as had means to pay the expense. These excursion parties consisted usually of from fifty to sixty patients, and have afforded great delight and benefit to such as could participate. Patients were in no case allowed to go without the express sanction of their friends, and it is due the friends to say that means were liberally and promptly provided. I think our experience during the past summer has proved this means of recreation to be comparatively safe and highly beneficial. The regular out-of-door exercise of all our patients has been pushed to the full extent during the past year, generally not more than a dozen patients being left in the house during pleasant summer days, and even during winter those who were in good physical condition have been taken out for regular and extended walks. We have only used the airing court for a small number of the most unseemly behaved ones.

The farm and garden have done exceedingly well, as will be seen from the appended report.

Unusual demands have been made, during the past year, upon many of our employees, and they are, generally, deserving of much praise for faithful and efficient services.

Dr. J. N. DeHart and Archibald Tredway have filled the places of Dr. Mack and Mr. Gardner, who resigned 'December 1, 1866. Each of these gentlemen have shown themselves well qualified for their responsible positions.

## ACKNOWLEDGMENTS.

We are indebted to the publishers, of the following papers for their gratuitous contribution, and can assure them of the pleasure they have given to our patients, many of them taking a keen in-
terest in the news of the neighborhood, as well as the general news and reading matter contained. We hope to see their papers continually on our tables.

I desire to express to you, gentlemen of the board of trustees, my grateful appreciation of the kind consideration that has uniformly marked your action in the general management of the hospital, and for the prompt and careful attention given to all matters that have required your action or advice. The consciousness that you have fully appreciated the oft-times trying and perplexing duties that have devolved upon me, has done much to lighten the burdens of the year's labors, and permit me to say, that whatever of success may have attended the administration of the hospital during the past year, is largely owing to your active and effective supervision of its affairs, and the generous support you have given me.

## D. F. BOUGHTON, Superintendent.

[^13]
## REP0RT OF THE EXECUTIVE COMMITTEE.

## To the Board of Trustees of the Wisconsin State Hospital for the Insane:

Another year of prosperity with the hospital has passed. The general health in the institution has been excellent, and the management, in all respects, has been satisfactory.

Your committee has given such attention to the affairs of the hosp:tal as was needed; and would make brief mention of the progress made in the various departments.

The plan for procuring a supply of water from the lake, that had been adopted at the date of our last report, has been completed, and it fully meets the expectations of the board, when it was adopted. The supply is abundant, and can never fail. The work has been well done, and the expense has been kept within the amount appropriated for that purpose.

Various improvements have been made about the premises during the past year: An iron stairway, from the lower story to the upper one, has been constructed at the extreme ends of the wings; the new roofing authorized, has been completed, except painting; a large amount of needed painting has been done; valuable improvements in several of the water closets have been perfected; considerable new furniture for the various rooms, such as tables, bedsteads, and seats, all of excellent quality, has been manufactured in the shop; a new engine has been ordered, and will soon be in place; apparatus for protection against fire has been procured to a limited extent; the laundry has been materially improved; the operations on the farm have been pursued with skill and energy; the dairy has been increased and is found profitable; the grounds have been improved in many ways; and, generally, the suggestions of the board, from time to time, have been executed in a manner highly beneficial to the hospital.

From the best observations the committee has been able to make-and its members have been as watchful as circumstances would permit - the several officers of the hospital have discharged their respective duties with marked fidelity to the interests of the institution, and for the benefit of its inmates.

Several improvements are needed during the coming year, that will be indicated in the report of the superintendent; and it is hoped the legislature will make provision for carrying them out.

Nothing has occurred during the past year to render the duties of the committee, in any manner, unpleasant. The board has reason to congratulate the people of the state upen the excellent condition of the affairs in and about the hospital committed to its charge.

Respectfully submitted, DAVID ATWOOD, ANDREW PROUDFIT, Executive Comittee.

## REP0RT 0F BUILDING COMMITTEE.

## To the Trustees of the Wisconsin State Hospital for the Insane:

Since your annual meeting in $18 \% 6$, the iron stairs, provided for by appropriation that year, have been completed in a satisfactory manner; the cost of same being $\$ 2,011.67$. This exceeds the sum unexpended, $\$ 711.6 \%$. The portion of the new roof provided for by the last legislature is completed (except painting), at a cost of $\$ 1,349.5 \%$. The balance of the appropriation will be sufficient to pay for the painting. There was provision made for painting the outside of the Hospital building in 18\%6, and the work has been finished in a workmanlike manner. An appropriation of $\$ 1,000$ was made at the last session of the legislature, for improving the closets, which were in a bad condition. This work is progressing, and at this time $\$ 51 \% .68$ has been expended. The superintendent suggested a new plan which we have adopted, and which has proved to be a great improvement. We use flagging of Joliet stone about 4 inches thick, in four pieces which form the floor to one closet and the ceiling to the one above it. These pieces of stone are set in the walls, and supported by hollnw iron columns in the center, which support the corners of the four pieces of flagging where they meet. This is arranged in a safe manner. The drainage pipe passes down through the iron columns. The stone are closely fitted and the joints made perfectly tight, so that leakage is impossible. The closets can be kept clean and pure, also free from offensive odors, with but little labor. We would recommend that all the closets in the building be improved in the same way. For this purpose an appropriation of about $\$ 2,000$ will be necessary.

Respectfully submitted,
ANDREW PROUDFIT, JOHN A. JOHNSON, Building Committee.

## REPORT OF COMMITTEE 0N FARM AND FARMING.

## To the Board of Trustees of the Wisconsin State Hospitalfor the Insane:

The undersigned, members of the committee on farm and garden, herewith present a detailed statement of the products of the farm and garden, with their estimated value of each article, for the year 1877, being governed in their estimates of values by the established wholesale prices in the different markets of this state:

Report of Committee on $\dot{F}$ arm and Farming - continued.

The above showing presents a net gain in the value of all products for the year $187 \%$ over that of $18 \% 6$, of $\$ 1,308.59$, and on many articles, values are fixed at much lower rates.

There has been a corresponding increase in the value of the products of the farm for each year since 1874. The aggregate value for each year is as follows: For 1874, $\$ 5,742.10 ; 1875, \$ 8,981.95$; 1876, $\$ 9,852.28 ; 1877, \$ 10,766.19$. This favorable showing is fairly attributable to the changing of the management of the farm, from that of grain-producing to that of garden and dairy. The latter requires far less acreage for plow land, at the same time furnishing abundant means for enriching the soil for the better growth of grass, hay and vegetables, and producing more directly such articles of subsistence as are necessarily used in the hospital. It also affords a better opportunity for the employment of a greater number of the inmates of the hospital in easy and profitable labor.

This change was indispensable, the soil had been greatly imporerished by long continued cropping with grain, and after all expenses for harvesting and marketing the grain had been paid, there was little left to meet expenses of the hospital. The change has necessarily been gradual, yet it has progressed; the advantages have been made so apparent that the committee no longer hesitate in recommending that the dairy be enlarged and improved to the full capacity of the farm. The committee take pleasure in stating that, under the present management, the farm is made to contribute all that could be reasonably expected in defraying the expenses of
[Doc. 6]
the hospital. Its fences and buildings are kept in excellent repair, and the stock on the farm can hardly be excelled.
H. N. DAVIS,
R. E. DAVIS,

Committee.

## REPORT OF VISITING COMMITTEE.

## To the Board of Trustees of the Wisconsin Hospital for the Insane:

Gentlemen - Since my last report to you, at your April meeting, I have, each month, made personal inspection of the condition of the patients, and the every day working condition of the institution. These visits have been made unannounced and at irregular times of the month, and some one of your number has in turn accompanied me upon each occasion. A note of each month's visit has been duly entered upon the proper book, and the record exhibits the satisfaction of your committee with the continued efficiency and faithfulness of the management of the institution and confirms in the fullest manner its claims to public confidence. To render these monthly visits still more efficient, I would suggest that the visiting committee be provided with a list of names of the patients upon each ward. A personal inspection can then be made, if desired, and the condition of each patient considered.

In conformity with your policy, that the general public should be thoroughly informed of the advantages this institution offers to that large and increasing class requiring its special care, I have, from time to time, invited, to visit the hospital with as, citizens holding influential positions and well known to the public. The result has been, that in almost every instance, these parties, through the press, have called public attention to the management of the institution; the care and treatment of patients; the modern sanitary improvements adopted, etc., and a marked impression is being rapidly made upon the unfortunate prejudice existing against insane asylums. An article published in a newspaper last week, is so well calculated to impress favorably the public mind, that I take the liberty of quoting from it.
"Early in the morning we entered the female wards and found the attendants and domestics busy at their work. The patients had just breakfasted. Some were finishing their toilets, others were walking about, a few were under restraint. The restraints used were of a very simple kind, consisting mainly of a muff confining the hands, or a strap holding the patients in the chairs they occupied. The attendants were women of neat and careful habits, cheerful in their appearance, and apparently fully aware of the responsibility resting upon them. So accustomed have they become to the freaks of the insane, that even the most violent rarely do any injury to themselves or others. Every day, in suitable weather, nearly all go out of doors and spend hours in the sunlight and air. Many of the friends have sent the means and made special request that the patients in whom they are interested be allowed to make excursions on the lake in the steamer that plies between Madison and Mendota. Some thirty or more went out the day we were there, accompanied by a full force of attendants. Hygienic treatment is the main reliance of the physicians. Good care, good food, plenty of fresh air, agreeable exercise, pleasant surroundings, anything to divert the attention or keep the mind occupied in a healthy manner. These are the means used in curing this unfortunate class. Those that are curable yield to such treatment, and those that are not are very much benefited thereby.
"We passed through every room in the building and made careful examination of all the appliances for the comfort and health of the patients; the cheerful drawing room, containing books, papers, musical instruments and social games; the hall devoted to concerts, theatres and lectures, the chapel for religious worship, the private rooms of the patients, dining rooms, closets, and the rooms where patients are confined in cases of paroxysmal mania, and we found everything kept with scrupulous neatness and care.
"We saw patients in all degrees of insanity. There were some whose minds were scarcely clouded, engaged in reading, singing, playing on instruments, working at embroidery, helping in domestic work, such as making butter, baking, cleaning, etc.; others were silent and gloomy, filled with strange notions, and others were noisy and dangerous, their minds completely shattered, dead to the world and their friends, absolutely incurable. For these incurable ones the state makes no provision further than what is convenient. There
ought to be a special building provided for these, and it could be done at a slight expense. It might be connected with the other buildings, and furnished with water, heat and light from the same source. There is now no place where the unfortunate victims of disease and hereditary transmission can be confined except at the county poor houses or jails, and it is more than evident that these are unfit places for such cases."

I thank the members of the board for many favors received, and the officers for courteous aid rendered the visiting committee in the performance of their monthly duties.

Respectfully,

LYMAN J. BARROWS,<br>Chairman Vis. Com.

Madison, Wis., October 16, $187 \%$.

## AUDITING COMMITTEES REP0 RT.

Madison, October, $187 \%$.
To the Trustees of the Wisconsin State Hospital for the Insan e.
Gentlemen: - The auditing committee would respectfully report that they have compared the books of the secretary and treasurer, also have made a general examination of all the several accounts kept by the institution, and find everything correct and in business order.

Respectfully,

H. N. DAVIS, ANDREW PROUDFIT,<br>Auditing Committee.

## TRUSTEES' REPORT.

> Office of Trustees, Northern Hospital for the Insane, October $17,187 \%$.
To His Excellency, Harrison Ludington, Governor of the State of Wisconsin:

SIR:-The trustees of the Northern Hospital for the Insane herewith present their fifth annual report.

The year just ended has been marked with increased usefulness of this institution.
The number of patients admitted since the organiztion of the hospital. . 945
The number discharged ..... 408
The number discharged recovered. ..... 108
The number admitted this year. ..... 201
The number discharged recovered this year. ..... 40

Fortunately no epidemic has affected the health of the patients, nor has any accident occurred, notiwithstanding much of the time the hospital has been crowded.

In the accompanying report of Dr. Walter Kempster, the superintendent, will be found the statistics of the hospital since its organization. His report cannot fail to interest all who desire a proper treatment of the insane. It also embraces the subject of their legal responsibility, which may be studied with profit by the learned professions.

The pressure for the admission of patients is largely beyond our power to accommodate them, we therefore renew our former recommendation for additional room. Herewith is submitted a plan for
four additional wings to this hospital, which, when completed, will accommodate 414 patients, at an estimated cost of $\$ 190,000$. With an appropriation of that sum, all the insane in the state may be provided with a comfortable home. The boilers, engine and water supply for this institution are now sufficient to supply the wants of the proposed addition. With a small outlay on the gas-holder, the present works will afford the necessary light. The organization of this institution is now complete, and will only require one more assistant physician to attend to the medical wants of such increased number of patients. The farm is large and productive, and the hospital is convenient of access from all parts of the state. For these reasons we believe the incurable insane can be provided with a comfortable home at this place with less expense than at any other point.

We therefore ask for an appropriation of $\$ 190,000$ for this purpose.

The land in front of the hospital buildings, for which an appropriation was made last year, has been purchased, and the state has a deed therefor. All the purchases and improvements for which special appropriations were made have been completed, except a small portion on which the time for completing such work was necessarily fixed subsequent ta the present date.
The appropriation for subsistence is found to be ample for current expenses to the first of March next, and, as usual, we have no deficiency to report. The accompanying reports of the officers and committees of the board will show the financial condition of the hospital, together with a detailed statement of disbursements.

The reports of the Steward and Matron show that the work in their respective departments has been well done.

The wards of the hospital have been inspected each month by one of the trustees in company with a competent physician not connected with the hospital, and their respective reports are herewith transmitted.

The following is an estimate for current expenses and appropriations asked for the year commencing March 1, 18\%8:

[^14]There will be required for the support of 550 patients, from Sep- tember 30,1877 , till March 1,1878 , 214 weeks, at $\$ 4.50$ per week $\$ 53,38900$
There will be required to pay for work and material under con-tract, and for additional work and material ordered and to car-ry out the purposes for which special appropriations weremade, and to pay other indebtedness27, 02400
Balance on hand March 1, 1878 ..... 24605
Total ..... $\$ 80,65905$
There will be required for the support of 550 patients for one year, commencing March 1, 1878, and ending March 1, 1879, at $\$ 4.50$ per week ..... $\$ 129,05400$
Balance on hand March 1, 1878 ..... $\$ 24605$
Due from counties. ..... 48,927 90
Will be received from steward ..... 3,000 00
Balance to be appropriated for current expenses. ..... 76, 88005
Total ..... $\$ 129,05400$
For pipes to conduct water for fire purposes under north wing.. ..... $\$ 60000$
For enlarging gas holder ..... 1,500 00
For farm ..... 1,500 00
For radiators under center building ..... 1,500 00
Total appropriations required for above purposes ..... $\$ 81,98000$
We are not unmindful of the high rank which this hospital holds among other similar institutions. Its success in a large degree is justly attributable to the able and efficient services of the superintendent. We cordially indorse all he has said in commendation of his assistants, Drs. W. H. Hancker, John W. Goe and J. R. Thompson.

## Respectfully submitted,

D. W. MAXON,
W. P. ROUNDS,
PETER RUPP,
N. A. GRAY,
THOS. D. GRIMMER.

## SUPERINTENDENT'S REP0RT.

## To the Board of Trustees of the Northern Hospital for the In-

 sane:Gentlemen: In accordance with the law organizing this hospital, I have the honor to present the fifth annual reort.

The movement of the population has been as follows:

|  | M. | F. | T. |
| :---: | :---: | :---: | :---: |
| Remaining under treatment September 30, 1876. | 246 | 257 | 503 |
| Admitted during the year. | 101 | 100 | §01 |
| Whole number under treatment. | 347 | 357 | 704 |
| Discharged. | 82 | 85 | 167 |
| Discharged recovered. | 17 | 23 | 40 |
| Discharged improved.. | 15 | 21 | 36 |
| Discharged unimproved | 29 | 20 | 49 |
| Died. | 21 | 21 | 42 |
| Total.. | 82 | 85 | 167 |
| Remaining under treatment September 30, 1877. | 265 | 272 | 537 |

It affords me pleasure to report that, notwithstanding the unstable characteristics of many in our household, there has been no accident of any kind during the year, and that the general health of the entire population has been excellent.

Although our capacity has been largely increased, we have, during a part of the year, been crowded; at one time there were 560 patients in the hospital, and at that time the demand for more room was as urgent as when we had accommodation for only half that number.

Several of the more populous counties have been compelled to remove chronic cases to make room for others who were more demonstrative than those in the hospital, but the cases brought were not always recent or more hopeful than those who were discharged to make room for them, the exchange being made for the reason that the boisteroas behavior of the ones brought rendered it almost impossible for the county authorities to care for that particular person.

The number of exchanges thus made during the year has been 69 , of whom 43 were discharged unimproved, that is, so far as their mental state was concerned, and 26 were discharged improved. In all, there had been improvement of the general health and personal comfort.

We have been importuned repeatedly to take back some of the cases sent away, owing sometimes, to a fresh outburst of violent behavior, or more frequently because the friends did not want a relative shut up in jail.

Some epileptics discharged have been returned because they could not be taken care of properly, and one was returned because "every time he had a fit he fell on the stone floor of the jail and gashed himself;" the patient's scalp presented abundant evidence of the truth of the assertion.

Of the 201 persons admitted during the year, only 27 were cases of acute mania, all the others had forms of insanity from which they are not likely to recover speedily, if at all. 138 of the number admitted had been insane according to the testimony of the persons bringing them, for periods of time ranging from 6 months to 32 years; and 46 had been insane for from 2 to 30 years, or even longer.

A very large proportion of the chronic cases were brought from county receptacles; some were picked up wandering about the country, and two were brought here from the state prison, their terms of imprisonment having expired, and the authorities of Dodge county sending them here as patients from the "state at large," that is "that the residence of these two persons could not be ascertained;" the person bringing them however, informed us that one was sent to state prison from Green county, and the other from Winnebago county, and subsequent inquiry concerning the one sent from Winnebago county proves that our informant was correct.

By referring to the tables in the appendix to this report, it will be seen, that by far the largest number of those who were discharged recovered had been insane but a short time previous to admission, which again admonishes us of the importance of early treatment - not only so far as the future welfare of the patient is concerned, which is of the first importance, but also that the cost to the state is but a fraction compared with what it costs to support the chronic insane person for a life time.

Table number XVI shows that of those who died, six only had been insane less than one year. Of this number, one died within 36 hours after arriving at the hospital from inanition and great exhaustion. One died within 5 days from the same cause, but to which may be superadded consumption. One died 15 days after admission, exhausted by consumption. One died 22 days after admission from effusion into the brain. There was one death from inflammation of the bowels; one sudden death from cerebral hemorrhage; one sudden death from embolism of the coronary arteries; one from angina pectoris; one from paralysis of heart, due to disease of the medulla oblongata; one sudden death from fatty degeneration of the heart; and one from atheroma of the coronary. arteries.

There were 16 deaths from consumption, 7 from general paresis, and 3 from epilepsy. The appropriate table shows the length of time the insanity had existed previous to death, and the time that the patient had been in hospital, with form of disease at the time of admission.

There were 49 persons admitted who were over fifty years of age; 25 over sixty; 17 over seventy; 4 between seventy-five and eighty.

The tables showing hereditary predisposition to insanity, or other diseases, is worthy of careful perusal; and they also show how frequently diseases may cross from one form to another. Some of these I will state briefly, as the tables do not convey the information except numerically.

One of our patients was admitted with a history of violence, the paroxysms coming on sudddenly and with great fury, he would seize a weapon of any kind and demolish furniture or anything within reach. Upon examination, it appeared that his mother was epileptic, two brothers had been insane, two other brothers and two sisters and a sister's child had epilepsy, and the family in all
its branches was consumptive; these facts warranted the belief that the sudden attacks of violence were induced by what is called larvated epilepsy, and that eventually our patient would have epileptic seizures, and this proved to be the case. In another case, the maternal grandfather and maternal aunt died of consumption; our patient has epilepsy. Another, the father and two brothers died of consumption, and one brother of cancer; our patient is a demented choreic. Another, the maternal aunt was insane, and another maternal aunt died of dropsy; the patient is epileptic.

In another, a number of uncles and aunts died of consumption; the patient has epilepsy.

In another, the maternal aunt died of consumption, and other members of the family are consumptive; the patient has epilepsy.

These facts concerning the liability of epilepsy and consumption to alternate in the several branches of one family are not new; but the fact is not as generally understood as it should be.

In another form of disease, namely, general paresis, we have one or two instances of a hereditary taint. In one case three maternal uncles died of some form of brain trouble, just what, is not known, but they were insane, and the maternal ancestors had long manifested insanity at an early age. Our patient had general paresis developed somewhat earlier in life than is usual.

In another case the father had been a very intemperate man, and died in a debauch; the patient has general paresis.

Another case, indicating how family deterioration descends, presents a sad history; a paternal uncle committed suicide; a paternal cousin died insane, the patient's father died insane, a brother died insane, one brother was feeble minded and died of heart disease, and another brother died of consumption; our patient was an intemperate man for many years, and eventually became insane,

A young man was admitted who had committed some minor depredations against his neighbors ; they, being much incensed, proposed to send him to jail, but pending his trial he ran away, and when next heard from he was doing strange things in a neighboring state; his conduct was so singular that it attracted considerable attention, and he was finally brought to the hospital. On examination, it was found that six paternal great aunts and oue paternal uncle had been insane, also his paternal grandmother, and a paternal cousin; the young man had dementia.

Another singular record is the following: Patient's parents were cousins, and the father always eccentric, the mother was an epileptic and died in a fit; a cousin died of cancer; our patient has been insane for several years, and is a confirmed lunatic.

The most overwhelming evidence can be procured to show the fatal consequences of marriages of consanguinity, where either of the contracting parties are predisposed to forms of brain disease, but notwithstanding all that has been said, people are married regardless of consequences, and without so much as a thought bestowed upon one of the most vital questions that can be brought before the mind; and not only is this true in marriages of consanguinity, but it is equally true of those persons who are in no way allied by blood, but who possess a tendency, or rather inherit a form of brain disease. The importance of this subject is so great that it ought not to be dismissed in a few words, and we cannot forbear the thought that this subject should be brought continually to the attention of parents, teachers, and everyone who is interested in the future welfare and prosperity of the race; they should be constantly reminded that two persons uniting in marriage, and each possessing a taint of any form of disease, that disease will be intensified in the offsprıng, and family deterioration will be the more rapidly produced. The risk should never be taken, it is too great; the consequences of it are too terrible.
The appropriate table shows that 38 of those admitted during the year were known to inherit insanity, and that these 38 had 55 relatives known to be insane.

Another table shows that 44 persons were known to inherit other forms of disease independent of insanity, but of a character to insure bodily deterioration, a disease that might be again transmitted; indeed, of those admitted during the year we find that 76 inherited disease in some form, either insanity, consumption, or cancer, and sometimes two or three of these diseases, or some other form of bodily deterioration; nearly 38 per cent. of those from whom we were able to obtain any facts relative to family antecedents, and when we take into consideration the number admitted about whom we are unable to learn even the simplest facts, it is fair to assume that this large percentage is in reality only the minimum of all who inherit some form of disease.

In previous reports, $I$ have called attention to the interchangea-
bility of disease, and our present statistics confirm former observations; that is, we find that the consumptive families become epileptics, the epileptics consumptive, and so on through the long list of diseases.

Table XVII shows the number of those admitted during the year who have committed, attempted or threatened violence, a total of fifty. Of this number, 15 inherited predisposition to insanity, and 16 inherited diseases independent of insanity. These are all included in the general table of hereditary transmission, but are sifted out for the purpose of calling attention to this all-important branch of sociological enquiry.

From table XVI it will also be seen that nine actually attempted suicide.

Seven attempted homicide.
Five threatened homicide in no uncertain manner.
Three attempted suicide and threatened homicide.
Two committed arson, and
Two attempted suicide and homicide.
Fifty out of a total of 201 admissions is a large percentage of cases presenting violent characteristics, and these cases are just those who evidently intended to accomplish what they attempted or threatened, and do not include all who made meaningless attempts or threats.

Of the form of disease in those admitted, there were 53 of chronic mania, 52 of dementia, 30 of melancholia, $2 \%$ of acute mania, 13 of sub-acute mania, 11 of paroxysmal mania, 7 of epileptic mania, 6 of general paresis, 1 of periodic mania, and 1 recently admitted, about whose insanity I am in doubt. The seven admitted with epileptic mania do not include all the epileptics; there were in all 23 epileptics admitted, all insane, some of them appearing under different forms of mental disease, according to the symptoms manifested, some being maniacal, others demented, etc.

There are now in the hospital 52 epileptics, also insane. Of these, in all human probability not one will recover. We continue the use of Nitrite of Amyl, and find.that it certainly relieves a large percentage of epileptic cases. We use it liberally, and have not yet seen the first untoward result, even from its daily use, in certain cases, for more than two years.

Of the persons remaining in the hospital, $18 \%$ have improved
mentally and physically, 214 have improved physically, and 136 are unimproved, excepting so far as their surroundings render them more comfortable.

The usual tables are appended to this report.

## IMPROVEMENTS.

Of the improvements made from time to time, I have kept you advised in my quarterly reports, but a brief review may not be inappropriate. The first decided improvement was the change made in the water-closets of the north wing; the entire system has been arranged to correspond with that in the south wing, which has been found to be so satisfactory. Since the change has been made, the wards which were formerly most difficult to keep pure have been entirely free from odor, and the system has been found to be as satisfactory as it is on the south side.

In the heating apparatus, important changes have been made. First, the old boilers have been replaced by one similar in size and appearance to those already in place; but experience demonstrated that we could increase the heating surface considerably without injuring the draft or consuming any more fuel, so that we hope during the winter to be able to report a measure of economy by this change, especially as it involves no additional outlay.

Another great improvement has been the change made in the steam main under the north wing; it will be remembered that we partially arranged this last year, and the slight increase in the diameter of the pipe used then, gave us much more satisfactory results than we had hitherto been able to obtain with the small pipe. Now we have the full sized mains under the entire wing, beginning with an eight inch main, carrying this more than half way, and then reducing to a six inch pipe, which is carried the rest of the distance under the wing, and into which all the feed pipes to the stacks of radiators are tapped. The old steam coils have all been removed from under wings $\mathrm{C}, \mathrm{D}$ and E , and radiators corresponding to those placed under wings $A$ and $B$ have replaced them. We have also put up two large stacks of radiators under the north end of wing F, which has hitherto always given us considerable trouble to keep warm, and two large stacks have also been put up under the ladies' sitting room on ward I; also under the extreme front of the center
building. Radiators are also being placed under the other part of wing $F$, and when this is completed the system of heating under the north wing will correspond with that under the south wing, leaving only the center building to be changed in the future. The hot water generators under the north wing have always been insufficient to supply the water required for all purposes, and the old ones have been replaced by new generators of sufficient capacity to supply all that will be required. The changes here enumerated involved a large amount of work, but it has all been accomplished by our own men, and we have not been obliged to employ additional labor. To give a solid foundation for the new heating apparatus, we have laid a brick floor the entire length of the basement and under the center building, which overcomes the objectionable feature of dust arising from the breaking up of the cement floor originally laid by the contractors.

To accommodate the new boiler, it became necessary to enlarge our boiler house. This has been done by removing the east wall sixteen feet further east, giving us ample room for coal and other necessary appliances.

To accommodate the new engine ordered we have constructed an addition to the old engine room, giving us sufficient room in that department, and the new engine is now in place. The engine fully performs the requirements named in the contract, that is, it develops more than 50 horse power with a pressure of steam not exceeding three pounds per square inch.

Outside, many changes and improvements have been made. A new cow barn, 30 by 72 feet, has been put up in a substantial manner. This became a necessity because of the additional number of cows required to furnish milk for our increased number of patients. The vegetable cellar, which has hitherto proved inadequate to hold our crops, has been doubled in size. It is now 100 feet long and 30 feet wide, having a cellar, store-room and attic, but it will be none too large even now. Two large forcing beds, for starting early vegetables and keeping the household supplied with flowering plants, have been built in the garden, out of the stone picked up on the place; they are substantial and will prove a great convenience and comfort to the hospital. All this work has been done by our regular force, with the exception of employing one mason for a time to assist in some of the brick laying, and a man to put on the iron
roof of the boiler and engine rooms. We have also constructed a small building in rear of the hospital, in which to properly care for the dead until such time as relatives arrive or we are authorized to inter them in our lot. This is a much needed improvement.

In the front of the hospital a number of changes have been made. First, an avenue has been cut through directly in front of the center building to the railroad, and the authorities of the Chicago \& Northwestern railroad kindly consented to remove their depot from its old location to one directly in front of the hospital, making it much more convenient for the public who have business at the hospital. Along this avenue we have laid sidewalks, graded and gravelled the road, set out a number of elm trees on each side and put up a row of gaslights, so that hereafter persons arriving at night, as they must do during winter, will not be subjected to the annoyance of plunging off the roadway into ditches, etc., which they have done heretofore.
The small piece of ground formerly belonging to the county of Winnebago, and which was so unsightly, has been purchased, in accordance with the act passed during the last session of the legislature, and it has been cleared up. We have graded the highway along the front of the farm, and partly gravelled it. Altogether, these improvements have added to the appearance of the hospital. In the immediate rear, we have made some changes. In connection with the construction of the new barn, a room was prepared in one of the old barns for men to occupy during the winter, as well as the summer. Water pipes were laid to the barn for convenience of watering stock, and steam and gas pipes were laid in the same trench, so that these conveniences are now in operation.

Grading, draining, clearing land and removing stumps have occupied the farm hands when not otherwise employed. The piece of woodland south of the barns, which I suggested should be cleared up, in the last report, has been cleared; but this does not give us a sufficient number of acres of clear land to cultivate, and more of the timber should be cut off, or additional clear land procured, if it is not considered advisable to cut off the timber.

One of the greatest improvements made in the rear has been the completion of the side track by the Chicago and Northwestern Railroad Co., thus enabling them to take the cars directly into the coal house before they are unloaded.

The appropriate table in the steward's account of crops raised will show that what ground we have has not been idle. The crops have been bountiful, with the single exception of potatoes, which were smaller than usual, owing to the severe drought which prevailed just at the time they were beginning to " set."

There is yet much to be done around the hospital buildings and upon the grounds, in order to perfect them; that which has already been done does not make much display, because it has been in the main preparatory. All that we have attempted in the way of improvement has been started from the bottom. We have endeavored to prepare thoroughly for that which remains to be done in the way of beautifying, so that when we finish any part, we shall feel that it has been substantially and properly perfected. I would suggest that a small appropriation be asked to enable us to continue the work begun on the farm and grounds. We shall also require an additional appropriation for stock, as our increasing numbers require more milk. We need ten more cows.

## GAS.

The manufacture of gas from coal continues to be satisfactory. The entire cost for the past year has been $\$ 986.70$; total number of feet consumed, $1,070,1^{17} 0$; for the ensuing year I am in hopes to still further reduce the cost by burning the tar under the retorts, which at once saves fuel and gets rid of what would otherwise become a nuisance. It would be advisable to increase the capacity of our present gas holder; during the long winter nights the gas burned in the house is double the capacity of the holder; as a measure of safety it should be made large enough to hold a supply for two nights, then should anything occur to interrupt the manufacture of gas for a few hours, we should not be in danger of sudden darkness, or what is worse, the use of lamps and candles in the wards.

## EXTENSION.

I desire to call attention once more to the number of insane now in various receptacles throughout the state; in doing so, I can only reiterate the statements $I$ have made concerning them in preceding reports. The same conditions exist to-day that called forth the remarks on former occasions of this kind.

The people need more room immediately, for the care of the chronic insane now in jails, etc., and I am of the opinion that this room can be more quickly and economically supplied in the manner formely suggested, $i . e$. , by increasing the capacity of existing institutions than in any other way, and I see no reason for changing any part of the plans for such enlargement that have been hitherto presented to this board. Permit me therefore once more to call your attention to this important matter, and allow me to suggest the propriety of again calling the attention of the governor to the imperative necessity that exists now for more room.

In accordance with your wish, I herewith present a plan with detailed estimates of the cost of construction of additional wings to this hospital.

## CHANGES IN STAFF.

Some changes have oscured in our staff since the last annual report.

In October last, Dr. James H. McBride resigned, to engage in the pactice of his profession elsewhere. In the resignation of Dr. McBride the institution lost the services of a valuable officer, who fully identified himself with the interests of the institution. To fill the vacancy thus created, Dr. William H. Hancker was promoted to be first assistant physician, and Dr. John W. Goe to the position of second assistant physician. On the 1st of January, 18\%\%, John R. Thomson, M. D. was appointed to fill the vacancy created by the promotion of the other officers.

The staff, as thus constituted, have performed their duties well, and are worthy of your continued confidence and support. I desire to acknowledge my appreciation of their services in this public manner. The other officers of the institution rersain unchanged. Mr. Joseph Butler continues as steward, and Mrs. Butler as matron. Most of the employees, who were here at the close of the last fiscal year, are still present, and for the faithful performance of their duties they deserve and I have no doubt will receive your commendation. Their duties are often arduous and trying in the extreme, and faithfulness under these circumstances deserves approbation as a measure of encouragement.

## LABORATORY.

Work in the laboratory has been carried on as opportunity of-
fered during the year, and I am gratified that progress is being made in this important branch of scientific investigation. The results already attained here amply repay all the time and trouble, and it is not too much to say that we may expect from continuing such investigations real advances in our knowledge of the causation of insanity, beyond what has already been accomplished, concerning the pathology of this disease. I trust that this important matter may receive your continued support.

## ACKNOWLEDGMENTS.

We have been the recipients of favors from the editors and proprietors of the following papers, and we heartily thank them in the name of our household, for their kind remembrances:

> Green Bay Advocate.
> Oshkosh Times.
> Brandon Times.
> Appleton Crescent.
> Appleton Post.
> Marinette and Peshtigo Eagle.
> State Gazette (Green Bay).
> Ripon Commonwealth.
> Fond du Lac Commonwealth.
> Ripon Free Press.
> Der Banner und Volksfreund (German).
> Germania.
> Fond du Lac Saturday Reporter.
> Der Herold (German).
> Wisconsin Telegraph (German).
> Kenosha Telegraph.
> Der Nord Western (German).
> New London Times.
> Palmyra Enterprise.
> Stevens Point Journal.

We are under obligations to the Hon. T. O. Howe, U.S.S.; Hon. W. P. Lynde, M. C. and Hon. S. D. Burchard, M. C., for very valuable congressional documents for the medical library.

Services have been held in our chapel by Rev. Mr. Lomas of $2-$ Nor. Hos.
[Doc. 7]

Milton, by Messrs. Needham and Stebbins, and by the Rev. Mr. Coles of Fond du Lac.
From a friend in Waukesha, we have received $\$ 23$, to purchase books for the library. Our thanks are due in an especial manner to that devoted friend of the insane, J. S. Peirson, Esq., of New York, for procuring for us a large number of books for our library, and for the contribution of a number of pictures for the wards; and through whose instrumentality we were made the recipients of a number of Bibles printed in several languages for the use of the patients.

We have also received contributions of illustrated papers and magazines from Miss Sadie C. Goe, several volumes of Harper's Weekly, bound, from K. M. Hutchinson, Esq.; illustrated papers from C. W. Felker, Esq., also from C. P. Paine, Esq., a number of valuable books for our library were presented by Rev. R. M. S. Pease; apples from Mr. Mason, of Ripon, and Mr. Fink of Milwaukee.

To one and all we return thanks for these kindnesses.

## COMPILATION OF LAWS RELATING TO THE INSANE.

We have frequent inquiries for information concerning statutory provisions relative to the insane. I have therefore procured a compilation of all laws now in force in the state of Wisconsin, which is hereby respectfully presented as a part of this report; for the compilation, I am greatly indebted to C. P. Larkin, Esq., of Milwaukee, who kindly volunteered to look up the authorities; as it is a work of importance, I. would respectfully suggest that when in type it would be well to order printed several hundred extra copies of this compilation for the purpose of distribution to members of the legal profession and other interested parties; it will always be convenient, and in this shape. will prove of value to all who are in any way concerned in the laws relating to insanity.
The suggestions relative to defects in the present laws are worthy of your attention.
While upon this subject, I would call your attention to chapter 1\%6, section 2, General Laws 18\%2, relative to the admission of persons from the state at large; the law referred to authorizes their admission, but there is no authority to discharge them as in the case of other patients. I would suggest whether it would not be
advisable to ask for the passage of a law authorizing the return of these patients to the counties whence they were sent to the hospital, when, after due trial, they are found to be chronic cases, and be there maintained at the expense of the state; otherwise, some counties in our district will have their full quota of patients in the hospital and as many more from the state at large, thus working an injustice upon all by overcrowding.

## LEGAL RELATIONS OF THE INSANE.

During the past year several somewhat important suits have occurred in different parts of the state to which I have been subpoenaed for the purpose of testifying upon the mental condition of the persons interested, and my attention has been drawn to one or two points upon which the lawyer and the physician meet on common ground ; and it occurred to me that it would not be inappropriate to discuss briefly some of the points concerning insanity, which appear to be vexed questions with our brethren of the legal profession.

In surveying the field, we shall find that the adage about the diagreement of doctors will hold good with reference to the opinions of the gentlemen who represent the exact science - law, when they are brought in contact with the, to them, mysterious condition called insanity; we shall find that in their dilemma, they have golled upon the doctors to assist them, but until public opinion compelled them to give up preconceived judgments, they have been slow to receive the advice they have asked, and have deferred acting upon the advice until compelled absolutely to yield by force of circumstances.

Lately there has been a considerable advance in opinions entertained by the legal profession, especially in America ; but no longer ago than 1863, the opinion was advanced on the floor of the British Parliament, that " much harm had been done by the theories of men who had endeavored to show that insanity depended upon a disease." This opinion was expressed by a member of the legal profession.

In England but little attention was paid to the subject of insanity in any of its relations, until George III became insane, when it occurred to some that a disorder which could attack a king, and he an Eng!ish king, and a beloved king, could be no vulgar ailment,
and straightway judges, lawyers, physicians and commoners, paid heed to a subject which, except in rare instances, had been ignored.

One difficulty that presented itself at that time, and which to some extent is operative now, has been to differentiate between a condition of mind in which a person is irresponsible for his acts, and that mental state in which persons are to be held accountable. Bench and bar have differed upon this point from the first, and even now logical opinions forcibly presented and abundantly substantiated, tending to show just what the difference is, are completely ignored, but no rule is given by which any one can be guided, and the ground taken at one time as a rule of law is set aside at another time. The professions of law and medicine have never harmonized in views upon this important matter, for the reason that the members of the legal profession are very slow to admit anything which does not bear upon its face the impress of legislative enactment, preferring to abide by the "unwritten law," no matter how antiquated, rather than yield one jot to the advancement of scientific investigation; indeed nearly every advance made in the direction of medical science has been received by our legal brethren with reluctance and distrust. This, perhaps, is not surprising when we reflect for a moment that nearly all the operations of the legal profession turn upon the application of certain established rules laid down for the guidance of that profession, or, upon the validity or constitutionality of the particular act governing the case; the mind accustomed only to apply certain fixed rules to particular cases, cannot be expected to apply itself easily to those questions which do not possess the fixed form given by legislative enactment. As we are sometimes asked whether the definitions of insanity given by early commentators are not now considered as good as any, a belief entertained by some of the legal profession, let us consider them a moment. Lord Coke classifies insane or irresponsible people as follows:

1st. "Idiots, who, from nativity by perpetual infirmity, are non compos mentis.
2d. "He that by sickness, grief or other accident, wholly loses his memory and understanding.

3d. "A lunatic that hath sometimes his understanding, and sometimes not, and therefore he is called non compos mentis so long as he hath not understanding.

4th. "Lastly, he that for a time depriveth himself, by his own vicious act, of his memory and understanding, as he that is drunken."

Littleton and Coke advanced the opinion "that a man should not be heard to stultify himself by setting up as a defense that he was non compos mentis, when the deed was alleged to have been done for which he is under examination."

Lord Hale says: "But it should be observed that every person at the age of discretion is presumed sane, unless the contrary is proved; and if a lunatic hath lucid intervals, the law presumes the offense of such person to have been committed in a lucid interval, unless it appears to have been committed in the time of his distemper." Also, "An idiot is a fool or madman from his nativity, and one who never has lucid intervals; and such a one is described as a person that cannot number twenty, tell the days of the week, does not know his own father or mother, or his own age."

To Lord Hale's credit, however, be it said that he also held that the "consent of the will" was what rendered a man's action culpable or otherwise, and that no man could commit a crime, although he had understanding, if he had no will. Again, Lord Hale says, speaking of "partial insanity," that " this is the condition of very many, especially melancholy persons, who for the most part do cover their defect in excessive fears and griefs, and yet who are not wholly destitute of the use of reason; and that this partial insani$t y$ seems not to excuse them in the committing of any capital offense." He concludes quite a lengthy definition, by saying, as a test of capacity: "The best measure I can think of is this: Such a person as laboring under melancholy distempers, hath yet ordinarily as good understanding as ordinarily a child of fourteen years hath, is such a person as may be guilty of treason or felony."

Blackstone held with Littleton and Coke, that a man shall not be heard to stultify himself by pleading insanity, and stated that this doctrine had been handed down as common law, but in the same commentaries we find that it was held that if a man became mad after he had pleaded, he should not be tried, for how can he make a defense? And again, if, after judgment be pronounced, he becomes of non sane memory, execution shall bo stayed, for, peradventure, had the prisoner been of sound memory, he might have alleged something in stay of judgment or execution. Even Coke said that "it would be a miserable spectacle to see a mad man exe-
cuted," and characterized such an event as against law, and of extreme inhumanity and cruelty, and can be of no example to others.

In 1723 , Mr. Justice Tracy held, at the trial of Arnold for shooting at Lord Onslow:
"It is not every kind of frantic humor, or something unafcountable in man's actions, that points him out to be such a madman as is exempted from punishment; it must be a man that is totally deprived of his understanding and memory, and doth not know what he is doing, no more than an infant - than a brute or a wild beast. Such a one is never the object of punishment."

This test of insanity has been characterized by a very able English writer (Maudsley), and not inappropriately, "the wild beast form of the knowlege test."

Under this theory of insanity, many lunatics were hanged during the eighteenth century.

We have seen already that the doctors of law do not always agree.

In 1767 , Lord Mansfield stated the law thus:
"It hath been said to be a maxim that no man can plead his being a lunatic to avoid a deed executed, or excuse an act done at that time, because it is said if he was a lunatic he could not remember any action he did during the period of his insanity."
Under Edward III, a scruple began to arise whether a man should be permitted to blemish himself by pleading his own insanity; and afterward it was doubted whether a plaintiff who had executed a release since the commencement of his suit, and who was taken to be sane at its commencement and at the time of pleading, should be permitted to plead an intermediate deprivation of reason existing at the execution of the release, and the question was asked how he (the lunatic) came to remember the release, if out of his senses when he gave it?

Under Henry VI, this method of reasoning was seriously adopted by the judges, and from such "loose authorities, the maxim that a man should not stultify himself hath been handed down as settled law." 2 Bl. Com., 291, 292.

In the trial of Oxford for shooting at the Queen, Lord Denman told the jury that "persons prima facie must be taken to be of sound mind till the contrary is shown. But a person may commit a criminal act and not be responsible. On the part of the defense it
is contended that the prisoner was non compos mentis, that is, unable to distinguish right from wrong, or in other words, that from the effect of a diseased mind (mark the words), he did not know at the time that the act he did was wrong. The question is said to be whether the prisoner was laboring under that species of insanity which satisfied you that he was quite unaware of the nature, character and consequences of the act he was committing, or, in other words, whether he was under the influence of a diseased mind, and was really unconscious at the time he was committing the act that it was a crime."

Hadfield's trial for shooting at the king in Drury Lane Theatre in 1800 , brought up the most thorough and enlightened discussion of insanity as connected with crime that had taken place up to that time, and the result was that Lord Hale's doctrine of insanity received a fatal blow. "In accordance with these doctrines (Hale's), the attorney general told the jury that to protect a person from criminal responsibility, there must be a total deprivation of memory and understanding."

To this Mr. Erskine replied: "That if those expressions were meant to be taken in the literal sense of the words, which he did not deny, then no such madness ever existed in the world. This condition of mind is observed only in idiocy and fatuity, and its unhappy subjects are never made accountable to the law. In proper madness, on the contrary, so far was there from being a total deprivation of memory and understanding, that in all the cases that have filled Westminster Hall with the most complicated considerations, the lunatics and other insane persons who have been the subjects of them have not only had memory in every sense of the expression, they have not only had the most perfect knowledge and recollection of all the relations they stood in towards others, but have, in general, been remarkable for subtlety and acuteness. Defects in their reasoning have seldom been traceable, the disease consisting in the delusive sources of thought. All their deductions within the scope of their malady being formed on the immovable assumption of matters as realities, either without any foundation whatever, or so distorted and disfigured by fancy as to be nearly the same thing as their creation. Instead, therefore, of making that kind of insanity which would exempt from punishment to consist in the absence of any of the intellectual faculties, I would lay
down delusion as its true character, of which the criminal act in question must be its immediate, unqualified offspring."

Upon this ground the jury brought in a verdict of not guilty.
In 1812 occurred the celebrated trial of Bellingham for the murder of Mr. Percival, whom he shot while under the delusions of insanity. The most undoubted proof of the man's insanity was offered, but Lord Mansfield refused to postpone the case, and in seven days from the commission of the act, Bellingham was executed. On that trial, Lord Mansfield held the somewhat paradoxical opinion that " upon the authority of the first sages of the country, and upon the authority of the established law in all times, which has never been questioned, that although a man may be incapable of conducting his own affairs, he may still be answerable for his criminal acts, if he be possessed of a mind capable of distinguishing right from wrong."
Here we find the "wild beast" theory modified somewhat, and the rule in this case was given, that if a man was capable of distinguishing right from wrong, then he was answerable to law for all his criminal acts, but was not to be held responsible for civil acts, and might be incapable also of managing his own affairs, of course then requiring a guardian.

These cases will serve to indicate what opinions were entertained by the most learned jurists of that time, concerning insanity. The discrepancies in opinion arose, perhaps, from the fact that each gentleman set up his own standard by which to guage lis idea of what a lunatic ought to be; and disregarding the sworn opinions of some of the most learned medical experts of the time, the judges even going so far in some cases as to instruct the jury to pay no attention whatever to the testimony of the doctors, as for instance, Denman, Campbell and Anderson; and Lord Chancellor Truro said "his experience taught him that there were very few cases of insanity in which any good came from the examination of medical witnesses."

We shall see, however, that other judges have thought differently.

Matters went on in the same way until the shooting of Mr. Drummond by David McNaughten, which took place in March, 1843, when, during the trial, the insanity of the prisoner became so evident that Lord Chief Justice Tindal stopped the trial and directed an acquittal on the ground of insanity.

This humane act of the chief justice created a great outcry thoughout the land, and the house of lords was importuned to introduce a bill for the purpose of securing the punishment of such offenders as the chief justice had directed to be acquitted.

They did not introduce a bill, but the subject was discussed in the house, and the discussion finally ended by propounding to the fifteen judges certain questions to which they required answers concerning the law respecting crimes committed by persons afflictsd with insane delusions.

The questions and answers are as follows:
1st. "What is the law respecting alleged crimes committed by persons afflicted with insane delusions in respect of one or more particular subjects or persons; as, for instance, where at the time of the commission of the alleged crime the accused knew he was acting contrary to law, but did the act complained of with a view, under the influence of insane delusion, of redressing or avenging some supposed injury, or of producing some supposed public benefit?"

2d. "What are the proper questions to be submitted to the jury when a person alleged to be afflicted with insane delusion, respecting one or more particular subjects or persons, is charged with the commission of a crime (murder for example), and insanity is set up as a defense?"

3d. "In what terms ought the question to be left to the jury as to the prisoner's state of mind when the act was committed?"

4th. "If a person, under an insane delusion as to existing facts, commits an offense in consequence thereof, is he thereby excused?"

5th. "Can a medical man conversant with the disease of insanity, who never saw the prisoner previously to the trial, but who was present during the whole trial, and the examination of all the witnesses, be asked his opinion as to the state of the prisoner's mind at the time of the commission of the alleged crime, or whether the prisoner was conscious at the time of doing the act that he was acting contrary to law, or whether he was laboring under any, and what delusion at the time?"

The answer to the first question was that "assuming the inquiry to be confined to those persons who labor under such partial delusions only, and are not in other respects insane, they are of the opinion that notwithstanding the party accused did the act com-
plained of, with a view, under the influence of insane delusions, of redressing or avenging some supposed grievance or injury, or of producing some public benefit, he is nevertheless punishable, according to the nature of the crime committed, if he knew at the time of committing such crime, that he was acting contrary to law, by which expression they understood their lordships to mean the law of the land."

Mr. Justice Maule, however, stated "that to render a person irresponsible for crime, on account of unsoundness of mind, the unsoundness should, according to law, as it has long been understood and held, be such as to render him incapable of knowing right from wrong."

Lord Chief Justice Tindal delivered the opinion of all the judges, excepting Mr. Justice Maule, on the following questions. In answer to the second and third questions, he said:
"As these two questions appear to be more conveniently discussed togther, we have to submit our opinion to be, that the jury ought to be told in all cases that every man is presumed to be sane and to possess a sufficient degree of reason to be responsible for his crimes, until the contrary be proved to their satisfaction, and that to establish a defense on the ground of insanity, it must be clearly proved that at the time of committing the act, the party accused was laboring under such a defect of reason from disease of the mind, as not to know the nature and quality of the act he was doing, or if he did know it, that he did not know he was doing what was wrong. The mode of putting the latter part of the question to the jury on these occasions has generally been, whether the accused at the time of doing the act, knew the difference between right and wrong; which mode, though rarely if ever leading to any mistake with the jury, is not as we conceive, so accurate when put generally and in the abstract as when put with reference to the parties' knowledge of right and wrong, in respect to the very act with which he is charged. If the questions were to be put as to the knowledge, solely and exclusively with reference to the law of the land, it might tend to confound the jury by inducing them to bebelieve that an actual knowledge of the law of the land was essential in order to lead to a conviction; whereas the law is administered upon the principle that every one must be taken conclusively to know it, without proof that he does know it. If the accused was
conscious that ihe act was one which he ought not to do, and if that act was at the time contrary to the law of the land, he is punishable; and the usual course, therefore, has been to leave the question to the jury whether the party accused had a sufficient degree of reason to know that he was doing an act that was wrong; and this course we think is correct, accompanied with such observations and explanations as the circumstances of each case may require."

To the fourth question, the reply is:
"On the assumption that he labors under partial delusion only, and is not, in nther respects, insane, he must be considered in the same situation, as to responsibility, as if the facts, with respect to which the delusion exists, were real. Hor example: if, under the influence of delusion, he supposes another man to be in the act of attempting to take away his life, and he kills that man, as he supposes, in self defense, he would be exempt from punishment. If his delusion was that the deceased had inflicted a serious injury to his character and fortune, and he killed him in revenge for such supposed injury, he would be laable to punishment."

To the fifth question, they answered as follows:
"We think the medical man, under the circumstances supposed, cannot, in strictness, be asked his opinion in the terms above stated, because each of these questions involves the determination of the truth of the facts deposed to, which it is for the jury to decide, and the questions are not mere questions upon a matter of science, in which case, such evidence is admissible; but where the facts are admitted, or not disputed, and the question becomes, substantially, one of science only, it may be convenient to allow the question to be put in that general form, though the sume cannot he insisted on as a matter of right."

From the time that these answers were prepared by the judges, the law in England has, with but few exceptions, been administered in accordance therewith, and they have had a controlling influence, until quite recently, over the administration of law in respect to insane persons alleged to have committed criminal acts in this country, and this has been done, notwithstanding men of the highest scientific attainments, both of the legal and medical professions, have protested and continue to protest against the utter worthlessness of what is called the knowledge test.

Judges upon the English bench have repeatedly charged the jury
in accordance with the answers quoted above, and immediately have addressed the "Home Secretary," to whom such matters are referred, asking that sentence, where the prisoner is found "guilty," be not carried into effect, because of the prisoner's undoubted insanity.

To be sure, there are those who may agree with a certain judge now on the English bench, who, as Maudsley tells us, "is not sure whether it was not more necessary to hang an insane person than a sane one;" and this opinion was doubtless expressed in no inhuman spirit, but merely under the supposition that the hanging of an insane person would deter other lunatics from killing.

This opinion gives us a possible clue to the operations of the mind of that judge, for had he known what those who live daily among the insane are cognizant of, and which has been testified to scores of times, he would not have made the remark.

Lunatics are no more deterred from killing, when that is in the line of their delusion, because of a fear of death, than they are deterred from self mutilation because of the consequent pain which they know they will suffer, and which they occasionally do commit for the very purpose of causing themselves pain.

The motives which actuate the masses of mankind, as fear of pain, fear of public opinion, fear of death, etc., do not enter into the mind of a lunatic as such, when he is actuated by delusion to commit an offense. They are often taken into consideration and dwelt upon, and for a time the insane person may be restrained by exercising his powers of self control, but the time comes when he can no longer exercise that controlling power, as the brain disease increases in intensity and the power of self control becomes less; or, in other words, as the delusion becomes more intense, and orerpowers the operations of the mind, the act is carried out with no fear whatever of the consequences. This is the daily experience of all those who have to do with the care of insane persons.

Hadfield illustrated this point most forcibly. He stated after his arrest for shooting at the king, that he knew he was doing an illegal act when he fired the shot, and he said that he knew that his life was forfeited, and that he had shot at the king for the very purpose of having his own life taken, in order that he might fulfill some great purpose of his own in thus securing his own death.
Mittermaier somewhere relates that he inquired of a man who
had killed his father, if he did not know that the crime he had committed was punishable with death; I know it very well, said the man, but God sent me into the world to punish great sinners, of whom my father is one. I have killed him according to divine command. Cases are far too numerous to cite here, where it has been proven that most atrocious acts have been committed by lunatics not only upon the person of others but upon their own persons, and that both before and after the act has been committed, the person knew perfectly well that the act was wrong, both morally and legally.

Insane people not infrequently commit crime for the very purpose of being put to death according to law and for the accomplishment of some object which they have in view. One of the stumbling blocks over which jurists have continually tripped, has been a name created by themselves long ago, and still adhered to almost every where by bench and bar. I refer to the terms "partial insanity" and "partial delusion." I say terms; because no such conditions can exist. A few courts have seen the fallacy and discontinued the use of the terms, as we shall see. It is in doubt as to just when these phrases arose, but it is usual to ascribe the paternity of them to Lord Hale, who laid it down as a proposition that "insanity may be general or it may be partial. There is," says he, "a partial insanity of mind, and there is a total insanity." And Sir John Nicholl speaks of partial insanity "as only that which is occasionally called forth, and not that which only exists occasionally." Hence, we may infer that insanity may exist all the time, but if it is not called forth, that is, I suppose, if the person is not constantly raving, then he is only partially insane, no matter how deeply rooted the disease may be. Judged by this standard, there would be very few cases of complete or general insanity.

It is not improbable that the idea of partial insanity may have taken root at a time when very little was known about the physiology of the mind, when a plausible speculation was seized upon as a probable fact, and when all mental phenomena were surrounded by an atmosphere of mystery, at a time when the mind was thought to be made up of a number of faculties, each being distinct, and each of which might operate in its own sphere independently of all the other faculties. It would not require a great stretch of the imagination to suppose that if each faculty of the mind could oper-
ate in its own sphere, and independently of all other faculties, that one of the faculties might become diseased or deranged without in any way encroaching upon the functions of any other mental faculty, and that all the rest might continue to act in a normal manner and independently of the diseased faculty.

The subject of partial insanity was very ably handled by Lord Brougham. He says (case of Sarah Gibson, Jurist, March, 1834): "Again the disease affecting them (the faculties of the mind) may have been more or less general, it may have affected more or it may have affected fewer of the mental faculties, for we must keep always in view that which the inaccuracy of ordinary language inslines us to forget, that the mind is one and indivisible; that when we speak of its different powers or faculties, as memory, imagination, consciousness, we speak metaphorically, likening the mind to the budy, as if it had members or compartments, whereas in all accuracy of speech, we mean to speak of the mind acting variously, that is, remembering, fancying, reflecting - the same mind in all these operations being the agent. We, therefore, cannot in any correctness of language speak of general or partial insanity, but we may most accurately speak of the mind exerting itself in consciousness, without cloud or imperfection, but being morbid when it fancies, and so its owner may have a diseased imagination; or the imagination may not be diseased and yet the memory may be impaired and the owner be said to have lost his memory. In these cases we do not mean that the mind has one faculty, as consciousness, sound, while another, as memory or imagination is diseased; but that the mind is sound when reflecting upon its own operations and diseased when exercising the combination termed imagining, or casting the retrospect called recollection."

Again Lord Brougham has laid down the doctrine that "in civil cases, partial insanity should have the same legal consequences as the general form of the disease." The idea of partial unsoundness, in the common acceptation, is incompatible he thinks, with the unity and individuality of the mind.
"If the mind were an aggregate of several faculties, one or more of them might certainly become unsound, while the rest remained unaffected, and it would be very proper to consider the acts of the individual in reference to this point. But if the mind is indivisible, we are unable to limit exactly the operation of any unsound-
ness by which it is affected. Delusion as long as it exists, whether much or little, under control, is a manifestation of insanity ; and hence no confidence can be placed in the acts or any act of a diseased mind, however apparently rational that act may appear to be or may in reality be, because we have no security that the lurking delusion, the real unsoundness, does not mingle itself with or occasion the act. Hence if a person believing himself to be the emperor of Germany should make his will, and we were quite convinced that, had any one spoken of the German diet, or abused the German Emperor, the testator's delusion would have at once broken forth, then we must pronounce the will void, be it rational and efficacious in every respect as any disposition of property could be.
"Liberty of will and of action is absolutely essential to criminal to criminal responsibility. Culpability supposes not only a clear perception of the consequences of criminal acts, but the liberty, unembarrassed by disease, of the active powers which nature has given us, of pursuing that course which is the result of the free choice of the intellectual faculties. It is one of these wise provisions in the arrangement of things, that the power of perceiving the good and the evil is never unassociated with that of obtaining the one and avoiding the other. When, therefore, disease has brought upon an individual the very opposite condition, enlightened jurisprudence will hold out to him its protection, instead of crushing him as a sacrifice to violated justice."
Notwithstanding the well expressed opinion of this learned man, an opinion expressed, too, prior to the time when the questions were propounded by the lords to the judges, the judges utterly ignored the existence of such an opinion, and turned back the tide of progress, not to say humanity, and, in their celebrated answers, not only promulgated the doctrine of partial insanity, but also the monstrosity of "partial delusion." See answer to the fourth question.

If we examine for a moment some of the definitions which judges and lawyers have given to delusion, we shall, I think, be perplexed if we attempt to reconcile their definitions with their partial delusions.

Sir John Nicholl defined a delusion to be "a belief of facts which no rational reason would have believed."

Here, however, we are left in doubt as to what a "rational rea-
son " is, and the question at once occurs, whether a man who declares that he can see through a solid wall, or tell what is transpiring hundreds of miles away, while he is in a state of mesmerism, is possessed of "rational reason." Yet there are a great many people, not insane, who profess to believe just such things. Again, this definition of a delusion, says that it is the belief of facts, etc. Now belief is based either upon direct recollection, or it depends upon testimony, and if any one has a direct recollection of facts, and those facts have aided him in making up his mind, as it is called, and he gives expression to the opinions based upon these facts, we cannot call the statement a delusion, or the individual deluded who expresses them.

Another writer, Shelford, defines a delusion to be "a belief of facts which no rational person would have believed," and this he says " is the true test of insanity." I am unable to see that this definition is an improvement on Nicholl's.
Brougham's definition was not much better; he says a delusion is "the belief of things as realities which exist only in the imagination of the patient." Here, again, we are confronted by the fact that many sane people imagine things to exist which do not exist in fact, and they pertinaciously adhere to their belief. Witness the belief in spiritualism and such absurdities. In all these legal definitions of delusion we have put forth as factors in the case, belief, which, as above stated, is based upon direct recollection of facts, or on testimony. Just here another element enters at once for consideration, that is, how much credence may be attached to the testimony, the nature of it, and the character of the party giving the testimony, together with the knowledge or intelligence or trustworthiness of the person who testifies, a process of reasoning not likely to be carried out by an insane person laboring under delusions.
The above are the legal definitions of delusion. Physicians have contended for some time that a delusion is the existence in the mind of a person, of extravagant ideas which do not exist in reality but only in the diseased imagination of the party; it is a false belief, indulged in contrary to the usual modes of thought or expression of an individual, and which he does not perceive, nor out of which he cannot be reasoned.

Under either of the above definitions, it is difficult to determine
where a partial delusion can be admitted. If an insane person asserts himself under the influence of any delusive thought, the assertion is full and complete. We never hear insane people uttering a partial false belief. We never hear insane people say, I partly believe that I am a king; I am almost persuaded that I am the emperor of the world; I pretty nearly believe that I am God. They make the direct assertion, and are oftentimes prepared to support their assertions by arguments more forcible than elegant.
Delusions arise from false perceptions, from an inability to properly interpret the sensations created, it may be, by the imagination of a diseased brain, or they may arise from an inability to properly adjust the sensations created by false perceptions concerning the surroundings of the individual. In other words, delusions may arise from within the mind when the brain is the subject of disease, or they may be but distorted images presented to the mind by reason of false perceptions concerning external objects; and in consequence of the disease, the individual is unable, by an effort of reason, to properly adjust the distorted images presented.

Delusions often arise from a perverted state of the feelings, and they are frequently intensified because of the false perceptions which arise from the disiased imagination or by imparting a false color to real occurrences. The more they are dwelt upon the deeper becomes the conviction, and they are dwelt upon because they are the offspring of the disease, and its external manifestation, just as pain is the manifestation of a pathological or diseased condition of some internal part, hence the inability to resist the delusion or to banish it from the mind.

But it may be asked, if this is so, why delusions are not always present and manifest in every case of insanity.

The answer is, that insanity must not be regarded as a state of disease differing from other forms; pain is not always present in disease, fever is not always present; the peculiar manifestations characterizing any form of acute or chronic disease are not always present; delusions may not be apparent because the rapidity with which ideas present themselves may prevent the arrangement of converting ideas into words and sentences before other ideas take their place and incoherence be the result. The cases of insanity, however, are few in number where, at some time or other, the person is not influenced by delusion; but they may not express the 3-Nor. Hos.
[Doc. 7]
delusion, keeping it concealed for a purpose; indeed it is not infrequent for insane people, after recovery, to tell us that they had delusions, and one of the delusions was, that they were not to tell the subject of their insane thoughts to any one. Hence, to make delusion the true test of insanity is unwarranted. I think if we come to look closely at the subject of partial delusions, we shall have to define them as ideas which exist only in the imaginations of legal gentlemen, and that they are the result of preconceived ideas of the sanctity of their "unwritten law." The belief in the existence of partial insanity has perhaps a firmer hold upon the minds of most legal and many medical gentlemen. This idea was promulgated at the same time that partial delusions were brought: into being, and before the time that special attention was given tothe underlying causes of insanity.

In all ages the popular insane man has been one pictured with wild glaring eyes, hair erect, saliva issuing from the mouth, a ranting, tearing, bellowing creature, only kept in place by the aid of chains, which he clanks and strains upon in his wild vagaries, utterly bereft of feeling, utterly oblivious to all the nobler emotions, who does not know who he is, where he is, nor even that he exists; this may be supposed to be a case of complete insanity; the other cases of complete insanity as above stated are either idiotic or fatuous.

Of the first of these cases we can only say that at the present. time they are never seen, and even if the disease approximates any such state as that described it lasts but a few days. In visiting. the wards of a well conducted hospital, people who come for the gratification of idle curiosity are often sadly disappointed, because they have not seen the "crazy ones," and, like the celebrated Mr. Burke, ask, at the end of the visit, whether there were any insane people there?, It is related of that great statesman and orator, that. after being conducted through a lunatic asylum, he turned to his. attendant and remarked, that he had not seen one person whom he considered insane; whereupon, his conductor called a gentleman, in whom Mr. Burke had been much interested because of his ingenious arguments on certain political qnestions, and touched the subject of the patient's delusions, when the patient immediately asserted, that after each meal, porcupine quills grew out from his body, and at once became so incoherent and oppressive that Mr. Burke requested that he might at once be removed.

The popular ideas concerning insanity, and many of the legal theories concerning this disease, are the outgrowth of speculations advanced years ago when metaphysical disquisitions took the place of the practical researches of to-day, and the present illogical statements and definitions given to the disease are the direct outcome of the former speculations concerning it, and from which it is exceedingly difficult for the legal profession to break away, owing to their veneration for antiquated opinions, and the dislike they have for new principles of law.

There is another reason also for the reluctance manifested by the legal profession to change their opinions. Trials, as they are ordinarily conducted, so far as the medical testimony is concerned, are not calculated to impress any person with the belief that medical men are agreed upon the question of insanity.

Counsel for the prosecution prepares certain questions which are to be propounded to the medical witnesses called by him, and it is natural to suppose that those questions are framed in such a manner as to touch lightly upon the points in the prisoner's case, which, if called forth, may be supposed to damage the prosecuting attorney's cause. On the other hand, counsel for the defense frames another set of questions for another series of medical witnesses, and it is equally natural to suppose that these questions are so framed that they shall call forth every minute circumstance connected with the prisoner's past life or present condition, which shall in any way tend to throw a doubt upon the prisoner's sanity, even going so far at times, as I can assert from practical experience, as to overstep the boundaries of exactitude, so far as any facts bearing upon the case are concerned, leaving the opposing counsel to overthrow as much of the testimony as possible by cross-examination, and if unable to overthrow the testimony, the doubt of course is given to the prisoner, as it should be. It is easy to see that two medical gentlemen, who may have spent years of hard study upon this somewhat intricate subject, and who may entertain views precisely identical on all the important points of this disease, yet when brought face to face with each other, upon the witness stand, are compelled, from the very nature of the questions propounded by counsel, to appear as though they were opposed to each other, and so far as that case is concerned, they go on record as though they held dissimilar views; thus great injustice is done both to the legal and
medical professions. Another unfarorable circumstance affecting progress, depends upon the habit of calling as experts physicians who may never have seen a half dozen cases of insanity, and who have never bestowed any study upon the subject. It is not to be expected that these gentlemen are versed in all the technicalities of an intricate subject, and yet they are called upon and compelled to respond as best they may to the questions asked, and the testimony they have given not infrequently carries with it as much weight as that given by the most experienced experts.

Notwithstanding these hindrances, much progress has of late been made, and it is very evident that in some places the old law which has been handed down since the days of Littleton and Coke is giving way to more advanced ideas on the subject of insanity; and this is specially marked in this country. But before entering into the consideration of partial insanity, let us look for a moment at some of the definitions of insanity:

Conolly defines insanity to be, "The impairment of any one or more of the faculties of the mind, accompanied with, or inducing a defect, in the comparing faculty."

Cullen says, "Insanity in a person awake is a false judgment arising from perceptions of the imagination or from false recollections, commonly producing disproportionate emotions."

Locke says insanity is "A disposition to associate ideas incorrectly, and to mistake them for truth; hence madmen err as men do who argue right from wrong principles."

Spurzheim says it is "An aberration of any sensation or intellectual power from the healthy state, without the mind being able to distinguish that diseased state; or in the aberration of any feeling from the state of health, without being able to distinguish it, and without the action of the feelings."

Crichton considers the judgment to be distinct from and independent of the organization, and is of opinion that this faculty remains unaffected, observing that "in regard to lunatics and men of sane mind, the faculty of judgment is the same in both, but they have different perceptions, and therefore their judgment must be different."

Maudsley says, "Insanity consists essentially of a morbid derangement, generally chronic, of the supreme cerebral centres the grey matter of the cerebral convolutions or the intellectorium
commune - giving rise to perverted feeling, defective or erroneous ideation, and discordant conduct, conjointly or separately, and more or less incapacitating the individual for his due social relations."

Bucknill says, "A condition of the mind in which a false action of conception or judgment, a defective power of the will, or an uncontrollable violence of the emotions and instincts, have separately or conjointly been produced by disease." And further :
"The broad view of the production of insanity appears to be this: 'The brain, like every other organ of the body, for the perfect performance of its functions, requires the perfect condition of its organization, and its freedom from all pathological states whatever; consequently, the existence of any pathological state in the organ of the mind changes its healthy functions, and produces a greater or less amount of disease of mind - that is of insanity.'"

From these definitions it will be observed that nearly all agree on one point. Indeed it may be said that every writer of prominence for the past quarter of a century has regarded insanity as in some way dependent upon disease, and all agree upon a disordered condition of one or more of the intellectual faculties as a factor in the case.

All agree that there is an abnormal action of the intellectual faculties. Now when we consider for a moment what the faculties of the mind are, as defined by some writers, we find them divided into: sensation; that change in the state of the mind which is produced by an impression upon an organ of sense; of perception; that faculty which enables us to take cognizance of external things; of consciousness; by which we are made sensible that we think or will; the immediate knowledge which the mind, as a whole, has of its sensations and thoughts; of attention; the faculty by which we voluntarily direct the organs of sense to the examınation of objects, the continuous effort of the mind in the acquisition of knowledge; of memory; which enables mankind to recall an idea in the absence of the object which originally produced the mental impression; also to recall former knowledge, and to acquire new knowledge; of imagination; that power of reproducing or recalling images, and of combining them without regard to their reality or truthfulness; a faculty which is almost illimitable, but which depends largely upon memory for its perfect action; of judgment; which, after comparison has done its work, enables us to form conclusions; of the
will; which determines us to do something after all the other faculties have performed their part, and which is by some regarded as the result of the operation of the other faculties.

The unity of all these intellectual operations constitutes the mind, and it is the generally recaived opinion that all these faculties must operate normally, in order to produce a normal mind, each being an essential factor, and without which it would not be possible to have a healthy mind. All the other faculties of the mind are largely dependent upon sensation, for without sensation we could not take cognizance of what was going on about or within us.

It is very well known that this faculty of sensation depends largely upon the perfectness of the blood supply to all parts of the brain, where the sense impressions center; with impaired blood supply, there will be impaired sensation. This is made familiar to us all by the common sensation of the foot going to sleep, which depends upon an interruption of the blood supply to the limb, hence the peculiar sensations and difficulty of moving the affected member, until circulation is in a measure restored to that part. We must not expect perfect sense impressions when there is imperfect blood supply.

One of the most frequent changes found, on examination of the brains of persons who have died insane, is alteration and disturbance of the blood supply to the brain, and this condition is noticed even in the very earliest stages of insanity.

It is conceded that sensation depends very largely upon perfect blood supply to the brain, which, as above stated, is almost always interfered with when insanity has existed for any length of time. Again, if perception should be interfered with, and the person failed to obtain clear ideas of external impressions, through false perception, it would not be possible for him to go through the subsequent steps of the process of reason, which are called into action by perception satisfactorily. With false perceptions, there would of necessity be a faulty comparison and faulty judgment.

It is apparent that if memory is at fault, or if the attention is impaired; if the power of association of ideas is interfered with; if judgment is affected by disease; if imagination, which depends so largely on memory, is beclouded; if any one of these delicate mental faculties is in any way diseased, there must be a disordered action of the mind. It is impossible, also, that either of these
faculties can be impaired in its operation without affecting the others.

But assuming for a moment that disease may attack one or more of the faculties, and not affect any other, which one of the group can we dispossess of its functions and still have a normal mind? Can we take sensation, consciousness, perception, memory or judgment? Leave either one of them out, and it does not seem to me that we have a clear disposing mind left.

The mental faculties are merely a mode of activity in which the mind is engaged at one time. The mind cannot be split up into several parts, each operating in its own sphere, and independently of all the other faculties. We may concentrate our thought upon some one intellectual operation, but in so doing we call into play certain other forces which, for the sake of convenience, are called faculties. The mode of activity may be determined in one direction, as in observing external objects, or it may be in recalling former sense impressions, when memory is brought prominently into action; but other so-called faculties are made operative by the same effort; otherwise we could not follow out a train of reason for a moment. It is impossible to call into play one faculty of the mind individually and independently of all the other faculties; hence, we cannot have one faculty disordered and not interfere with some other faculty.

Now, if all the faculties are necessary to constitute a sound mind, and disease of one or more renders the mind disordered or unsound, if we cannot have one of the faculties impaired without impairing the rest, then how are we to have a partial insanity, which judges and lawyers define to be a state in which a person is insane on one subject and sane on all others; that is, the faculties of the mind are sound upon all subjects but one, and the faculties are unsound or insane upon that particular subject.

The soundness of the intellectual faculties one and all depends upon the healthiness of the organ through which the operation of the faculties manifest themselves; that is, the brain. And we have yet to learn that one special part of the brain presides exclusively over one special faculty of the mind. Disease of any part of the brain, however limited in extent, may interfere very largely with the activity of several, or even all of the mental faculties.

We are not to suppose for a moment that mind can be diseased;
it is the brain through which the mind manifests itself that is diseased, and it is this disease of the brain which distorts the manifestations of the mind, which gives rise to the expression of disordered intellectual faculties, of delusion.
It is no evidence that because an insane person only gives expression to one delusion, therefore, it is the only delusion that he has, for it is a matter of common observation in hospitals for insane, that a man may express only one delusion for a long time, and then suddenly discover a host of delusive ideas which he has all along entertained but did not think proper to express.

The partial insanity of the law has been by some writers, both legal and medical, called monomania, a term which has done much harm, because upon it has been built the so called partial insanity.

We have seen that if one of the faculties of the mind is impaired, the whole mind must be unsound. Which one of the intellectual faculties possesses a double function, a sort of jack-in-the-box movement, sound, sane on all subjects that can come before it but one, and when that subject presents itself, presto, its soundness is gone, it is now unsound, insane?

It really seems to be as absurd to talk about partial insanity, as it would be to talk about partial fever, partial inflammation, partial rheumatism or a partial sore throat.
We have either one condition or the other, either health or disease, but partial disease is a term unknown in correct nomenclature; insanity is a disease, literally unhealth, it appears to me to be futile to talk about partial ill-health.
There is a period in the history of every case when it is often difficult to state where disease begins; the gradations between the states of health and disease sometimes pass into each other as insensibly to all external appearances as day shades into night. Who can mark the boundary where day ends and night begins? Nature is not often abrupt in her movements. Men may carry the germs of disease weeks or years, increasing daily, verging into serious alterations of the structure of tissues, and at last some slight circumstance, trifling perhaps by itself, serves to set in motion a train of influences which at once develop the full disease.

The line of demarcation between sanity and insanity is no exception to this rule; the circumstances giving rise to disease of the brain may be and often are as insidious as the development of dis-
ease in any other organ, but the disease having developed, it can no more be partial than consumption can be partial. It is rather difficult to conceive that a lung may be healthy and diseased at the same time; a portion of the lung tissue may be diseased, but it affects the whole.

It is a common circumstance in many cases of insanity to find that the peculiar manifestations of the disease are not continually present, but this is no evidence that the disease does not exist. It is not common for a consumptive to bleed freely from the lungs or to cough constantly, but the disease is there nevertheless.

In the case of consumptives, there are many external circumstances, such as irritating particles in the air, dampness and a large variety of causes which induce the cough, etc., and so it is in cases of insanity; there are certain external things, or perhaps they may be internal, arising from emotions, etc., which call forth the peculiiar expressions which aid us in determining the disease, but to say that because an insane person did not rave constantly or did not express his delusions constantly, that he was only partially insane, would be as illogical as it would be to say that because a consumptive did not cough or bleed all the time, therefore, he only had partial consumption.

Because the disease affects the power to think, and dominates the will of the individual, and often leads him to commit acts contrary to his ordinary ways, we are not to think that it must be regarded as a special form of disorder unlike any other, and not amenable to the same laws. The thinking organ, the brain, when diseased, can no more be cured by argument, than disease affecting the heart or lungs can be cured by argument; the mere fact of the disease being located in the brain, instead of in some other organ, is of no moment so far as the disease is concerned. It is just as much disease in one place as in the other, only in one place it may affect the action of the heart or lungs, impairing their capacity to properly perform their functions, and in the other case it is located in the brain, and impairs its capacity to properly perform its functions, which, among other things, is the proper guidance of the faculties, the control of the channels through which thoughts are expressed.
It would be just as logical to hold a man morally responsible for the perfect action of his heart or lungs when they were diseased, as to hold him morally responsible for the perfect action of his brain
when that is diseased, and yet this is what the courts have been doing ever since the days of Hale; and it would seem that the only reason that they have for doing so is, because Lord Hale said so, and other eminent legal gentlemen have followed in his wake.
It was Lord Hale who said, "that there are such creatures as witches, I make no doubt at all; for, first, the scriptures had affirmed so much; secondly, the wisdom of all nations had provided laws against such persons, which is an argument of their confidence of such a crime." The reasons were considered good and sufficient, and "the jury found a verdict of guilty; whereat the judge was satisfied, and upon his sentence they were executed." Case of King $v$. Cullender and Duny. It is the same kind of reasoning that perpetuates the doctrine of partial insanity.

The test of knowledge of right and wrong has been referred to as one of the methods used to determine the responsibility of an alleged insane person. It was formerly held, and indeed is held today in some places, that if an insane person was able to distinguish right from wrong, and then committed a wrong, that he should suffer punishment.

It is a matter of daily observation among those who are intimately associated with the insane of all classes, that they do have correct ideas on this subject, and discriminate closely in relation to it. They know and feel and frequently speak of the morbid idea which is impelling them to do a wrong act, and which they realize fully; the annals of jurisprudence record many cases in detail, describing the mental agony suffered by persons who wrestled against the force of delusions which finally overcame them.
A case now occurs to my mind of a young mother, occupying a social position second to none, who became what the courts would call "partially insane," a true case of "monomania." The delusion, and the only one that was apparent at the time, was, that she must kill her infant in order to save it from future damnation, and by so doing she would also save her own soul; she struggled against the impulse, she called attention to the desire, and to the fact that it was growing upon her. She afterwards told me that she had fought against it, and prayed to be delivered from it, and the anguish of the woman as she related the sad story was proof sufficient of the truthfulness of her statement. At last the delusion overcame her, and she did drown the child, holding it in her arms under the water until it died, and
yet she told me that at the very time, and amid all her conflicting emotions, that she knew she was disobeying the law when she thrust her child under the water. This was a typical case of "partial insanity," and one where the person knew and distinguished between right and wrong. Indeed, tried by this test alone, there are but very few insane persons in any hospital, except those who are fatuous, who would not be amenable to the law for any overt act they might commit.

Again, it is held by courts that those persons who are the subjects of "partial insanity" are responsible before the law according to the quality of the act performed, which means, that for the commission of some offenses, they would be held responsible, for others, irresponsible, the difference being, that for civil acts, they might be irresponsible, but for a criminal act, they would be held responsible. This would seem to be a great inconsistency, for if insanity is a disorder or disease of the brain affecting the intellectulal faculties, and "partial insanity" is "a disease of one or more of the intellectual faculties," according to the courts, they must possess ability to guage the standard of disease with great exactitude, to decide upon the amount of disease necessary in the one case to invalidate a will, or in another to hold an insane manslayer a "monomaniac," a "partially insane" person guilty and responsible for his acts.

It is saying to the insane man in the one case: "you are insane; the disease is a visitation of Providence, and you can not help it; you have some property; we will take care of that for you, because some of your intellectual faculties are disordered, and you can not take proper care of your belongings; you can not make a contract or transfer a deed, but you must be careful how you go about; you must walk with propriety; if, in the disturbance of your moral and intellectual perceptions you take a step for which a sane man would be punished, insanity will be no bar to your punishment; the law expects you to move as discreetly and circumspectly as if the undimmed light of reason were shining upon your path; you must keep before you a clear idea of what is right and what is wrong, and although you cannot judge oi the matter, so far as your property is concerned, we shall hold you to strict accountability for any want of judgment when your act interferes with the property or rights of others."

This is assuming a very great responsibility; it is virtually determining how much disease it is necessary for a man to have in order to render him irresponsible for his acts, a position which it would seem that no one save Omnipotence can assume with propriety.

Recently there has sprung up in our own country broader views relative to the question of insanity, and some of our judges have rendered opinions more in accordance with the dictates of right, to say nothing of humanity.

Since 1800, alienists have taught, in constantly increasing numbers, that a capacity to distinguish right from wrong is an inadequate test, and that, not infrequently, while the reason is apparently able to make this distinction, the will may be so enfeebled, and the morals so perverted by disease as to deprive the sufferer of that "vicious will" necessary to constitute a crime.

The first Anglo-American judges to adopt these lessons of medical science were Shaw, of Massachusetts, in 1843, and Edwards, of New York, in 1845. They ruled that insanity was proved if the homicde "had no power of control; if his moral or intellectual powers were so deficient that he had not sufficient will;" and, "if he did the act from an irresistible and uncontrollable impulse."

Edwards took occasion to observe that the "law, in its slow and cautious progress, still lags far behind the advance of true knewledge," and the history of the progress of legal medicine proves the truth of this observation as to every medico-legal topic.

In the case of the State $v$. Weir, in 1864, Chief Justice Bell charged the jury thus: "The evidence must satisfy the jury that the party at the time of committing the act in question was insane, and that the disease is of such severity, that the person is incapable of distinguishing between right and wrong, in that particular case or of controlling the sudden impulse of his own disordered mind; or as the same rule has been laid down by an eminent judge, a person, mn order to be punishable by law, must have sufficient memory, intelligence, reason and will, to enable him to distinguish between right and wrong in regard to the particular act about to be done, to know and understand that it will be wrong, and that he will deserve punishment by committing it; to which $I$ add sufficient mental power to control the sudden impulses of his own disordered mind . . . . I have been accustomed to regard as the distinguish
ing test of insanity the inability to control the actions of a man's mind. The power of the control of the thoughts being lost, the power of the will over the conduct may be equally lost, and the party under the influence of disease acts not as a rational being, but under the blind influence of evil thoughts, which he can neither regulate nor control. It was perhaps not without reason that in ancient times the insane were spoken of as possessed with a devil, so foreign are the impulses of that evil spirit to all the natural promptings of the sane heart and mind."

Again, in the case of The State of Indiana v. Stevens, the instructions to the jury, "that if they believed the defendant knew the difference between right and wrong in respect to the act in question, if he was conscious that such act was one which he ought not to do, he was responsible, was held erroneous." It would appear then, that the American courts, which, having inherited the common law of England, at first followed docilely in the wake of the English courts, are now exhibiting a disposition to emancipate themselves from an authority which they perceive to be founded on defective and erroneous views of insanity, and a desire to bring the law more into accordance with the results of scientific observation.

Many different forms have been given by different courts, each having the main points in view, but failing to state them fairly. The most compreherisive view of the whole subject extant, embodying as it does the principles for which alienists have contended for many years, is the opinion delivered by Doe, $\delta$. , from which opinion I have made thes > extracts. (Wharton \& Stille's Jurisprudence.)

In $18 \%$, in the supreme court of New Hampshire, a case was decided: The defendant Pike was tried before Powley, C. J., and Doe, J., for murder in perpetrating a robbery. One of the defenses appears to have been "dipsomania," and on the trial the court instructed the jury, "that whether there is such a mental disease as dipsomania, and whether defendant had that disease, and whether the killing of Brown was the product of such disease, were questions of fact for the jury."

In the supreme court this was affirmed, Smith, J., saying: "This was correct. If there are any diseases, whose existence is so much a matter of history and general knowleege that the court may assume it in charging a jury, dipsomania certainly does not fall within that class. The court do not profess to have the qualifications of
medical experts. Whether there is such a disease as dipsomania is a question of science and fact, not of law."

In the above cited case, Doe, J., further says: "Whether the old or the new medical theories are correct, is a question of fact for the jury; it is not the business of the court to know whether any of them is correct. It is often difficult to ascertain whether an individual had a mental disease, and whether an act was a product of that disease, but the difficulties arise from the nature of the facts to be investigated, and not from the law; they are practical difficulties to be solved by the jury, and not legal difficulties for the court." "To say that the expert testifies to the tests of mental disease as a fact, and a judge the test of criminal responsibility as a rule of law, is only to state the dilemma in another form. For, if the alleged act of a defendant was the act of his mental disease, it was not in law his act, and he is no more responsible for it than he would be if it had been the act of his involuntary intoxication, or of another person using the defendant's hand against his utmost resistance; if the defendant's knowledge is the test of responsibility in one of these cases, it is the test in all of them. If he does not know the act to be wrong, he is equally irresponsible, whether his will be overcome, and his hand used by the irresistible power of his own mental disease, or by the irresistible power of another per son. When disease is the propelling, unconcrollable power, the man is as innocent as the weapon - the mental and moral elements are as guiltless as the material. If his mental, moral and bodily strength is subjugated and pressed to an involuntary service, it is immaterial whether it is done by his disease or by another man or a brute, or any physical force of art or nature set in operation without any fault on his part. If a man, knowing the difference between right and wrong, but deprived, by either of these agencies, of the power to choose between them, is punished, he is punished for his inability to make a choice, he is punished for incapacity; and that is the very thing for which the law says he shall not be punished. He might as well be punished for an incapacity to distinguish right from wrong, as for an incapacity to overcome a mental disease which forces upon him its choice of the wrong. Whether it is a possible condition in nature for a man knowing the wrongfulness of an act to be rendered by mental disease incapable of choosing not to do it and of not doing it, and whether a defendant
in a particular case has been thus incapacitated, are obviously questions of fact. But whether they are questions of fact or of law, when an expert testifies, that there may be such a condition, and that upon personal examination he thinks the person is or was in such a condition - that his disease has overcome, or suspended, or temporarily or permanently obliterated, his capacity of choosing between a known right and a known wrong - and the judge says that knowledge is the test of capacity, the judge flatly contradicts the expert. Either the expert testifies to law, or the judge testifies to fact. From this dilemma the aathorities afford no escape."
"The whole difficulty is, that courts have undertaken to declare that to be law which is a matter of fact. The principles of the law were maintained at the trial of the present case, when experts having testified as usual that neither knowledge nor delusion is the test, the court instructed the jury that all tests of mental disease are purely matters of fact, and that, if homicide was the offspring or product of mental disease in the defendant, he was not guilty by reason of insanity.
"A striking and conspicuous want of success has attended the efforts made to adjust the legal relations of mental disease. It was for a long time supposed that men, however insane, if they knew an act to be wrong, could refrain from doing it. But whether that suspicion is correct or not, is a pure question of fact; in other words, a medical supposition; in other words, a medical theory. Whether it originated in the medical or any other profession, or in the general notions of mankind, is immaterial. It is as medical in its nature as the opposite theory. The knowledge test in all its forms, and the delusion test, are medical theories introduced in immature stages of science, in the dim light of early times, and subsequently, upon more extensive observations and more critical examination, repudiated by the medical profession. But legal tribunals have claimed these tests as immutable principles of law, and have fancied they were abundantly vindicated by a sweeping denunciation of medical theories, unconscious that this aggressive defense was an irresistible assault on their own position. In this manner, opinions purely medical and pathological in their character, relating entirely to questions of fact, and full of errors, as medical experts now testify, passed into books of law, and acquired the force of
judicial decisions. Defective medical theories usurped the position of common law principles. The law does not change with every advance of science; nor does it maintain a fantastic consistency by adhering to medical mistakes which science has corrected. The legal principle, however much it may formerly have been obscured by pathological darkness and confusion, is that a product of mental disease is not a contract, a will or a crime.
"It is often difficult to ascertain whether an individual has a mental disease, and whether the act was the product of that disease; but these difficulties arise from the nature of the facts to be investigated, and not from the law; they are practical difficulties to be solved by the jury, and not legal difficulties for the court."

The American decisions are certainly in advance of any judgment concerning insanity which has been given in England; they put in proper light the relations of medical observation and law in questions of mental disease, and it cannot be doubted that future progress will be along the path which they have marked out. The question which will probably be submitted to the jury will be substantially, Was the act the offspring or product of mental disease? He says further:
"It is a matter of history that insanity has been, for the most part, a growth of the modern state of society. Like many other diseases, it is caused in a great degree by the habits and incidents of civilized life. In the earlier and ruder ages it was comparatively rare. Its present extent has been chiefly attained within a few hundred years. Until recently, there were no asylums for the insane, and no experts devoting their lives exclusively to the practical study and treatment of the disease. The necessary opportunities for obtaining understanding of it did not exist, until they were furnished by the positions of superintendents of asylums and their assistants; consequentially, until recently, there was very little knowledge of the subject. It is the common practice for experts under the oath of a witness, to inform the jury, in substance, that knowledge is not the test, and for the judge, not under the oath of a witness, to inform the jury that knowledge is the test. And the situation is still more impressive when the judge is forced by an impulse of humanity, as he often is, to substantially advise the jury to acquit the accused on the testimony of the experts, in violation of the test asserted by himself. The predicament is one that can-
not be prolonged after it is realized. If the tests of insanity are matters of law, the practice of allowing experts to testify what they are should be discontinued; if they are matters of fact, the judge should no longer testify without being sworn as a witness, and showing himself qualified to testify as an expert."

From the same opinion, we shall see also in what light the superintendents of asylums and other experts have taken in regard to the tests formulated by the courts, both in England and America, and how steadily and persistently they have for many years testified to the same matters, and in language almost identical; but until their opinions were sifted by Mr. Justice Doe, they have been all but universally disregarded, or looked upon as visionary ideas, not worthy the attention of the court or jury.

In the case of State v. Pike, Judge Doe says: "The legal profession, in profound ignorance of mental diserase, have assailed the superintendents of asylums, who knew all that was: known on the subject, ar $d$ to whom the world owes an incalculable debt, as visionary theorists or sentimental philosophers, attempting to overturn settled principles of law; whereas, in fact, the legal profession were invading the province of medicine, and attempting to install old exploded medical theories, in the place of facts established in the progress of scientific knowledge. The invading party will escape from a false position when it withdraws into its own territory, and the administration of justice will avoid discredit when the controversy is thus brought to an end."

To substantiate his assertion, Judge Doe then cites the opinion of medical men, testified to in some celebrated cases, as follows: "In Queen v. Oxford, tried in 1840, Dr. Chowne testified that he considered doing an act, without a motive, a proof, to some extent, of an unsound mind; that one kind of insanity has been well described by the term 'lesion of the will;' that it is sometimes called moral insanity; that patients are often impelled to commit suicide without any motive; that this state of mind is not incompatible with an acuteness of mind, and an ability to attend to the ordinary affairs of life. Lord Denman instructed the jury that if some controlling disease was, in truth, the acting power within the defendant, which he could not resist, he was not responsible, but that the kncwledge of right and wrong was the test.
"In Queen v. McNaughton, tried in 1843, Dr. Monroe testified 4 - Nor. Hos.
[Doc. ${ }^{7}$ ]
that an insane person may commit murder, and yet be aware of the consequences; that lunatics often manifest a high degree of clearness and ingenuity, and exhibit, occasionally, great cunning in escaping from the consequences of such acts; that he considered a person laboring under a morbid delusion to be of unsound mind; that insanity may exist without any morbid delusion; that a person may be of unsound mind and yet be able to manage the usual affairs of life; that insanity may exist with a moral preception of right and wrong, and that this is very common. Eight experts gave their opinion, going to show that the defendant had committed the act in quest:on, under the influence of a morbid delusion, which deprived him of the power of self control. Their testimony, in substance, was, that the defendant was insane, and that knowledge of right and wrong was not the test. The medical testimony was so strong that the court stopped the trial and substantially directed the jury to acquit the defendant, but Chief Justice Tindal instructed the jury that knowledge of right and wrong was the test. It does not appear how the defendant could be acquitted by that test.
"In Queens v. Pate, tried in 1850, Dr. Connolly testified: 'I have conversed with the prisoner since this transaction, and in my opinion he is a person of unsound mind. I am not aware that he suffers from any particular delusion. He is well aware that he has done wrong and regrets it.' Dr. Monro testified:' 'I have had five interviews with Mr. Pate since this transaction, and, from my own observation, I believe him to be of unsound mind. I agree with Dr. Connolly, that he is not laboring under any specific delusion. I think he may have known very well what he was doing, and have known that it was very wrong; but it frequently happens with persons of diseased mind that they will perversely do what they know to be wrong.' Mr. Baron Alderson instructed the jury, however, that the knowledge of right and wrong was the test."
In Queen v. Townley, tried in 1863, Dr. Winslow testified: " I think that at this present moment he is a man of deranged intellect. He was deranged on the 18th of November, and I thought still more so last night, when I saw him the second time." The witness was asked, "If the present state of mental derangement existed on the 21st of August, would it be likely to lead to the commission of the act then committed?" His answer was, "Most undoubtedly.

Assuming him to have been on the 21st of August as he was on the 18th of November and yesterday, I do not believe that he was in a condition of mind to estimate like a sane man, the nature of his act and his legal liability."

The witness further testified: "He does not appear to have a sane opinion on a moral point; I have no doubt he knows that these opinions of his are contrary to those generally entertained, and that, if acted upon, they would subject him to punishment; I should think that he would know that killing a person was contrary to law, and wrong in that sense; I should think that from his saying he should be hanged, he knew he had done wrong."

Dr. Gisborne testified that the prisoner's language implied that he knew that what he had done was punishable, but that he (the witness) believed he would repeat the offense to-morrow."

Mr. Baron Martin instructed the jury again, that knowledge of right and wrong was the test. "In these cases, the testimony of experts negatived the idea that knowledge of right and wrong is the test, and the admission of this evidence, coupled with the rule given by the court to the jury, that knowledge of right and wrong is the test, brought the law into conflict with itself. Either the experts testified on a question of law, or the court testified on a question of fact. The conflict was only rendered a little more palpabls in People v. Huntington, tried in New York in 1856. Experts testified as they have long testified in England, that a man without delusion may be irresponsible by reason of insanity, for an act which he knows to be a crime, the consequences of which he understands. One expert testified that he defined insanity as a disease of the brain, by which the freedom of the will is impaired, and that almost all insane people know right from wrong. The knowledge test of insanity, as laid down by the English judges in their opinions given to the House of Lords in what is called McNaughten's Case, 1 C. \& K., 131, was read by counsel to the experts; the experts were directly asked their opinion of that test, and they testified that they did not agree with the English judges on that subject.
"The same knowledge test laid down by the supreme court of New York (Freeman v. People, 4 Denio, 28) was read to one of the experts, and the same kind of testimony was repeated. But the court instructed the jury that the knowledge of right and wrong was the test."

So long as the present methods of securing the opinions of medical experts are employed, just so long there must be an apparent conflict of opinions among the medical gentlemen called to give opinions, but the conflict is only apparent ; the real fault lies in the method. I am of the opinion that the true policy of all tribunals having jurisdiction in such cases would be to call experts, and by experts I mean those only who by long experience in the particular branch they study, who have acquired practical knowledge of the subject, who "should be the sworn advisers of the court and jury, and not witnesses summoned in the particular behalf of any party."

Maine, in 1847 , wisely enacted that " when any person is indicted for a criminal offense, or is committed to jail on a charge thereof, * * * any judge of the court before which he is to be tried, when a plea of insanity is made in court, or he is notified that it will be made, may * * * order such person into the care of the superintendent of the insane hospital, to be detained and observed by him till the further order of the court, that the truth or falsity of the plea may be ascertained."

New York, in $18 ; 4$, enacted laws which provide for "an investigation of the sanity or insanity of the accused, as a separate and independent proceeding from the trial of the indictment," and after such preliminary investigation, "leave the question of the guilt or innocence of the accused to be tried by itself." Thus have Maine and New York lessened the frequent difficulty of choosing between "inhumanity to disease and indulgence to crime."

I have dwelt at some length upon this subject, because of its really great importance, and because of the interest I feel in making the fact of the causation of insanity thoroughly familiar, not only to members of my own profession, but also to our legal brethren with whom we are often brought in contact.

The old ideas respecting the mind have been exploded. We now know that insanity is a disease, a sickness, and is amenable to treatment as such, in precisely the same way as other forms of disease are treated, and that the only difference that exists to make it appear distinct from other forms of disease is, that it sometimes disturbs the power of self control, and that thought is interfered with, because of the affection of the brain. To hold a man responsible for that which he has no control over, is a mistake, a course worthy of the dark ages only; and if man is to be held responsible
for one disease, he should be for all, no matter where located, nor what the effect of the disease may be.

Respectfully submitted,
WALTER KEMPSTER, M. D.
Northern Hospital for the Insane, Winnebago, Wis., Oct. 17, 18\%\%.

Note. A compilation of the laws of this state upon the subject of in sanity following this report has been omitted in printing by the commissioners of printing, in accordance with chapter 32 , laws of 1874.

## REPORT 0F AUDITING C0MMITTEE.

Hospital Building, October 17, $18 \% \%$.

To the Board of Trustees of the Northern Hospital for the Insane:
Gentlemen: Your committee, having examined the reports, books and vouchers, of secretary, treasurer and steward, would respectfully report that they find them correct.
P. RUPP,
M. P. ROUNDS

## REPORT OF EXECUTIVE COMMITTEE.

Hospital Building, October 17, $18 \% \%$.
To the Board of Trustees of the Northern Hospital for the Insane:
Gentlemen: Your committee would respectfully report that they have examined the accounts of the hospital, and find them correct.

The farm, road, and house improvements have been satisfactorily and economically made; all of which speaks for the faithfulness of the resident officers. The necessity for the several further improvements recommended by the superintendent, in his report, has been made apparent to us in our visits during the last meeting.

Respectfully submitted,

> N. A. GRAY, P. RUPP.

## REP0RT 0F BUILDING COMMITTEE.

To the Board of Trustees of the Northern Hospital for the Insane:
Gentlemen: The building committee present the following report:

A boiler similar to the two previously in use at the hospital has been purchased and placed in position.

Cast iron radiators have been placed under the north wing, and when this is completed the improved heating apparatus will be finished under both wings.

The boilers for heating water in the north wing have never furnished a sufficient supply of hot water, and we replaced them with two that will.

Brick floors have been laid in all the corridors of the basement of the north wing, and the water closets have been changed to correspond with those in the south wing.

A low pressure engine has been purchased, and is now being set up, and will be ready for use November 1. Responsible parties have guarantied that this engine shall have fifty horse power capacity, with five pounds of steam.

The boiler house has been enlarged by extending it east sixteen feet.

The engine house has been enlarged by extending it north twentytwo feet. This was found necessary in order to furnish sufficient room for the new engine.

The great benefit derived from the green house, previously in use, and its insufficient capacity, seemed to warrant a small expenditure in that direction, and we have built another of equal size.

There being no proper place to care for the dead, previous to burial, or to preserve them until called for by friends, we are building a morgue, convenient to the hospital, for that purpose.

The great increase in the amount of products of the garden has compelled us to enlarge the vegetable cellar to twice its former size.

A cow shed, thirty by seventy-two feet, has been added to the barn.

In accordance with the resolution of the board, we have sold two of the old boilers, and received for them four hundred and forty dollars, which has been paid over to the treasurer.

Respectfully submitted,
THOS. D. GRIMMER.
D. W. MAXON.

## REPORT OF VISITING COMMITTEES.

Northern Hospital for the Insane, Winnebago, October 25, 1876.

At the request of D. W. Maxon, one of the trustees of the asylum, I made a pretty thorough examination of the above hospital, also the grounds upen which it is located. This being my first visit to the institution, and having heard much pro and con. in regard to its location, I not only examined the building inside and out, but made a careful survey of all its surroundings; the farm, the garden and the out buildings. I must confess that I was highly pleased with the location, and corgratulate the individuals who selected this spot as a suitable place for the erection of this hospital. The hospital is located on the most elevated part of the grounds, twentyone feet above Lake Winnebago, thus insuring ample fall for good drainage, which insures a dry soil, an invaluable consideration in the location of all public and state buildings, and more especially an institution of this character. In view of the fact, there being hundreds of insane persons in the state still unprovided for (and the number is rapidly increasing), it is evident that the time has arrived when the state will be obliged to make still larger additions to. one or both of the hospitals now in operation, or erect another.
In consideration of the charming and healthy location of this hospital, it would in my opinion, be wisdom on the part of our legislature to take steps as soon as practicable to increase the capacity of this hospital, so that it will accommodate at least nine hundred patients. In my opinion, there ought to be provision made for the permanent insane, which could be accomplished by the erection of an additional wing. This ceriainly would be better and more economical than the erection of another hospital. I was highly gratified with the management of the farm and garden, especially 6 - Nor. Hor.
[Doc. 7]
the latter, which is under a high state of cultivation, yielding large quantities of vegetables, roots and other produce, which go far in lessening the expenses of the institution.

In the management of the hospital, as far as I could learn from one visit, I have only words of praise. At the time of my visit, Dr. Kempster was absent, and Dr. McBride had just resigned; but I was kind ${ }^{\prime} y$ waited upon and shown through the building by Drs. Hancker and Goe. Everything seemed to be in order; the floors, ceilings, beds and bedding, all were scrupulously clean. I was highly gratified with the cooking department, which gave unmistakable evidence that the patients were supplied with abundance of food, and that of excellent quality.

The patients were all well cared for and receiving good treatment. The greatest defect I noticed in the hospital was the absence of a library, which surely ought to be remedied without delay, for it is cruel to deprive these poor creatures of the advantage and pleasure which many of them would undoubtedly derive from a well selected library.

Concurred in,
GEO. W. HUNT, M. D. D. W. MAXON.

## Northern Hospital for the Insane, Winnebago, November 28, $18 \% 6$.

I have this day carefully examined the different wards and departments of the Northern Hospital for the Insane, and have witnessed the various workings of the same, which I consider to be superior to anything I have ever seen in this branch of charity, having visited some hospitals for the insane in Germany. It is not alone the advanced mode of modern architecture and mechanical construction of this elegant institution which has favorably attracted my attention, but also the most perfect management and scientific method of medical treatment of the insane patients. I also feel pleased to say that the female and male attendants of the hospital appear to fulfill their duties in a careful and kind manner in regard to the treatment of the inmates, and to keeping the various apartments clean and neat in every respect. The superintendent of the institution seems to fill his position in a praiseworthy manner, mak-
ing it his exclusive effort and aim to benefit the poor afflicted individuals which are placed under his care.

The microscopical investigations as to the pathological condition of the brains of the insane are of great importance to medical science, and show his great ability and efficiency in the matter to which he has devoted his life; and I would respectfully suggest that the legislature be requested to aid his efforts in making the laboratory both a benefit to his patient and a pride to the state of Wisconsin. The only suggestion I have to make is, that more amusements be furnished in the departments devoted to the convalescent patients; such, for instance as a piano, a bowling alley, another billiard table, etc.; for I was impressed with the fact that both the male and female patients in the convalescent wards did not have amusement enough to occupy their whole time, and were too much occupied in brooding over their own unfortunate thoughts, with the exceptions of those evenings each week when they enjoy amusing entertainments in the hall of the hospital. At the close of my report, I have to render thanks for the kind and friendly manner in which both the superintendent and his assisstants acceded to my requests while visiting the hospital. I also feel obliged to Mr. D. W. Maxon for cordially inviting me to examine this magnificent institution.

> [Signed] ALEX. J. SCHWEICHLER, M. D.

I subscribe to the foregoing, and concur in the suggestions.
D. W. MAXON.

> Northern Hospital for the Insane, Winnebago, December $22,18 \% 6$.

It has been my privilege this day, through invitation of one of the board of trustees, Hon. D. W. Maxon, to make a general inspection of the above hospital, which I have found a model of neatness and order and shows a complete medical and hygienic supervision in all its appointments.
This institution is not only an asylum for the insane, but is a field for scientific research, to obtain a more definite knowledge of the terrible infirmity of these unfortunate inmates, and to enlighten the profession as to the best methods of treatment.

The people of this state owe a debt of gratitude to the wisdom of the superintendent, and liberal policy of the trustees in furnishing means for prosecuting this inestimable work.
L. J. ROSS WOLCOTT, M. D.

## Northern Hospital for the Insane, Winnebago, January 23, $18 \% 7$.

To the Board of Trustees of Northern Hospital for Insane:
By invitation of Hon. Thomas D. Grimmer, I have this day visited the above institution for the purpose of inspecting the management thereof in its detail. Of the general condition of the building and all its appurtenances, it can only be said that the state has shown a wise generosity in thus providing for this class of unfortunates. Many who have heretofore, from force of circumstances, been obliged to inhabit jails and poor-houses, are here provided with a comfortable home.

Of the direct management of the hospital, under the wise supervision of Dr. Kempster and his able assistants, there is, so far as my observation extends, nothing to say except that it is in every way admirable; everything is studied that will conduce to the comfort and relief of the patients. Kind words and gentle treatment are the rule, and in most cases seem to be all powerful. I was particularly pleased with the cleanliness of the wards, and the entire absence of those revolting scenes that have formed the bugbear of so many minds in connection with insane hospitals in general. I congratulate the board on its wise selection, and have only to add that I hope the state may continue to receive the services of the present management.

I am satisfied that a visit from those who are interested in the care of our unfortunate insane will convince the most skeptical that here, at least, many things are done for them which cannot be done under private management.
H. B. DALE, M. D.

THOS. D. GRIMMER, Visiting Committee.

## Northern Hospital for the Insane, Winnebago, February 23, $187 \%$.

Accepting the invitation of Hon. T. D. Grimmer, we have this day visited this hospital and carefully looked through all its apartments. Of the quiet, cheerful and homelike atmosphere which in general pervades the whole building, we speak in warm commendation. While by reason of their infirmities many of the inmates cannot appreciate this, yet its continued cheerful influences upon their disordered minds must be salutary. The scrupulous cleanliness everywhere noticed, the substantial and nutritious food with which the patients are regularly supplied and the general sanitary condition of the hospital, were matters of special observation and note.

Our time and attention were given largely to a careful and thorough examination of the four essential sanitary arrangements of the building, viz.: water supply, heating, ventilation and sewerage. These we find most admirable in design, practical and effective in adaptation, and ample to meet all the wants of the hospital. We were instructed and greatly interested in witnessing the perfection of the sewerage arrangements which have been adopted. When the slight changes now contemplated in the north wing shall have been accomplished, we believe nothing will be left undone to render the system complete. This essential and troublesome factor in the sanitary combinations of the hospital reflects great credit upon the thoughtful mind that originated and so wisely adapted all variations to their specific ends.

Having observed in the sanitary arrangements of the building only that which seems to us to be the best, we have no suggestions of improvement or change to make.

E. L. GRIFFIN, M. D., Pres. State Board of Health. J. T. REEVE, M. D., Sec. State Board of Health.

Northern Hospital for Insane, Winnebago, March 26, $187 \%$.

At the request of and in company with the Hon. T. D. Grimmer, I have to-day carefully inspected the Northern Hospital for the Insane.

With the regard to the hygienic condition and management of this institution, they are thoroughly satisfactory to me. To itemize is not necessary.

I wish only to suggest the hope that very soon the state will so increase its capacity that it may kindly care for the large number of unfortunate insane that now have but the shelter of the poor houses and jails.

G. M. STEELE, M. D.

> Northern Hospital for the Insane, Winnebago, May $30,18 \% \%$

Pursuant to inritation of Dr. N. A. Gray, I have this day made careful inspection of this hospital. The condition of the various wards seems as near perfect as the circumstances will permit. The management is all that could be desired. The dormitories are now over crowded, and it is earnestly to be hoped that the requisite appropriations will be made to build the necessary additions, that the insane of our state may not longer be turned out of these havens of rest to deceased minds, and sent to our jails and poorhouses.

The writer has no suggestions to make, but wishes to express his thanks for the courtesy he received from the physician in charge, and his assistants.

A. H. DORRIS, M. D.

> Northern Hospital for the Insane, Winnebago, July $30,18 \% \%$.

Through the courtesy of Hon. W. P. Rounds, and in company with him and Dr. Kempster, I have to-day made as thorough an examination of the hospital as time would permit, and find it in as perfect condition, in regard to cleanliness and ventilation, as it is
possible to make an institution of this character, and the care of the patients is all that could be desired.

G. W. DODGE, M. D.<br>W. P. ROUNDS,<br>Visiting Member.

## Northern Hospital for the Insane. Winnebago, Aug. 30, $18 \% \%$.

Having this day officially visited the Northern Hospital for the Insane, by appointment of, and in company with, Hon. W. P. Rounds, trustee, I take pleasure in confirming previous testimony as to its judicious management, and its excellent sanitary appointments and conditions.

The cleanly and comfortable appearance of the inmates gives ample proof of the kind treatment and care bestowed upon them.

I have no suggestions to make, save that I find here many cases evidently incurable, and the increasing number of this class in the state, already far in excess of the capacity of our hospitals, which must be reserved for the treatment of those for whom there is hope, forces the question of the care of these incurables sharply upon the attention. Confined now, as many of them are, in jails and poorhouses, and other most unsuitable quarters, where it is impossible that they receive that humane and judicious management which their unfortunate condition demands, it is greatly to be desired that such provision be made by the state as will give to these hopelessly insane a home, and the supervising care of one skilled in dealing with, and, so far as possible, contributing to the comfort of a class which appeals so strongly to our sympathy, as well as to our
humanity.

J. T. REEVE, M. D.
W. P. ROUNDS, Visiting Member.

## Northern Hospittal for the Insane, Winnebago, September 28, $187 \%$.

## To the Board of Trustees of the Northern Hospital for the Insane:

Gentlemen: By invitation of Hon. W. P. Rounds, and accompanied by him and by Hon. T. D. Grimmer, we have to-day visited the Northern Hospital for the Insane, examining its several wards and its systems of ventilation, sewerage and heat and water supply, and observing the condition, appearance and daily life of its inmates; and our report of the same can have little to say but in way of commendation.

An air of perfect neatness and comfort pervaded the entire institution. At their meals, we found the patients supplied with an abundance of wholesome, palatable and nutritious food. Sleeping. apartments, and everything pertaining to the wards, were comfortably appointed and amply ventilated. A proper system of discharge and ventilation, especially in the south wing, obviated the usual unwholesome emanations from waterclosets. The method of heat supply at low pressure seemed adequate to the thorough and equable warming of the building at all seasons. Facilities for amusements were supplied in fair degree.

In short, little seemed lacking in sanitary and moral conditions to effect all for the patients possible, to those most important means.

The gratification and pride of the medical profession of the state are appealed to, very strongly, by the minute and thorough investigation still in progress in the laboratory of the hospital, of the hitherto undetermined pathology of certain nervous diseases. The faithful use of the means very generously provided by the state for the exploration of a new domain in nervous pathology has already been fruitful of great results to medical science, results appreciated and valued both at home and abroad. The state is honored by the world wide recognition of these important contributions to nervous medicine, scarcely less than by its more obvious beneficence to its own suffering citizens, and we can but hope that future legislatures will emulate the enlightened liberality of those of the past few years, in furnishing the means for the continued prosecution of these researches. J. R. BARNETT, M. D., Neenah, Wis. C. F. BARNETT, M. D., Bunker Hill, Ill.

## TRUSTEES' REPORT.

## To his Excellency, the Governor:

The board of trustees of the Wisconsin Institution for the Education of the Blind, take great pleasure in being able to report its continued prosperity. The number of pupils is steadily increasing, and the number now in attendance exceeds that of any period of its history. The official report of the superintendent to the board of trustees is herewith transmitted. As it contains a full statement of the condition of the institution, any further discussion of the topics it covers is deemed unnecessary. The reports of the treasurer and secretary also accompany this report, to which your attention is invited as showing the financial condition of the institution. Since the date of our last report the main building of the institution has been completed, and was ready for occupancy at the beginning of the present school year. In the completion of this building, the board of trustees take great satisfaction in saying that the work has been well done, and that in point of substantiality it is believed to be the best public building in the state. No effort has been spared, in so far as the money placed at our disposal would allow, to make the building fire-proof. The policy adopted by the state, not to insure its public buildings against loss by fire, made it, in our judgment, obligatory upon us to adopt this course. The satisfactory results attained are largely due to the ability, skill and faithfulness of the architect, Mr. D. R. Jones, of Madison, to whom the board of trustees are under obligations, not only for his skill and fidelity in his professional capacity, but for his uniform urbanity, as a gentleman, in all his intercourse with them. The south veranda of the west wing is not yet built; but the board of trustees has entered into contract with the Madison Manufacturing Company to furnish material and do the work for the sum of one thou-
sand five hundred and ninety-five dollars, and to have the work completed by the 20th of November of this year.
In our report of last year, we asked for a special appropriation to enable us to build a fence around the grounds; to paint the wood work of the shop; to build a shed for the protection of the live stock; to furnish, in part, the main building, and to build a fire-proof bleach-house. All the work has been done except building the bleach house, which is now in process of construction. The board of trustees have endeavored to protect the building from damage by lightning, by using solid copper rods, half-inch square, placed upon it after the direction of Hon. C. H. Haskins, member of the state board of charities and reform, and it is believed the building has all the protection which a careful study of electricity, and the laws by which it is governed, can give. The grounds about the premises require re-grading, in order to conform them to the grade made necessary by the erection of the new building. For this purpose a special appropriation of five hundred dollars will be needed.

The following is a statement of the receipts and disbursements. from the fund for current expenses during the year:

## ESTIMATES.

The estimates for the current expenses of the institution for the ensuing year are as follows:

It is a pleasure again to be able to report the continued kindness of the railroads of the state to the inmates of this institution. Through all the years of seeming conflict between these corporations and the state, the managers of the railways have never failed to send free passes to our pupils, thus enabling them to spend the annual vacation with their friends, and return again to the institution at the beginning of the next school year. When it is remembered that many of these pupils are utterly destitute of means to enable them to visit their friends, this charitable actof the railroads will be appreciated by the friends of the blind everywhere.

> Respectfully,
J. B. WHITING, Secretary.
Janesville, Nov. 1, $187 \%$.

## TREASURER'S REP0RT.

To the Board of Trustees of the Wisconsin Institution for the Education of the Blind:
I hand you herewith a statement of my receipts and disbursements as treasurer, from the date of my last report to April 2, $18 \% \%$. Respectfully yours, J. B. DOE,

Respectfully,
J. B. WHITING,

Secretary.
Janesville, November 1, $187 \%$.

* Omitte d from printed report, in accordance with chapter 32, laws of 1874.

## SUPERINTENDENT'S REPORT.

To the Trustees of the Wisconsin Institution for the Education of the Blind:

Gentlemen: The history of the year just closed is very much like that of the preceding years. Faithful work of teachers, combined with industry and ambition of pupils, has resulted in a good degree of advancement in each department of the institution.

Ninety-one persons, forty-one males and fifty females, have received instruction. Of this number twenty have been admitted since the date of the last report, and ten have closed their connection with the school. Our pupils returned to school after the summer vacation with a commendable degree of promptness, only one of those expected to return, being still absent at this date. Three are detained at home by ill-health. One still considered a member of the school is not expected to be present this term. A few new pupils are expected soon. The number now present is seventysix.

The following table shows the number of pupils in attendance during each year of the existence of the institution.

| Number of Pupils. | From- | To- |
| :---: | :---: | :---: |
| Eight. | Oct. 1, 1850 | Jan. 11, 1851 |
| Nine . | Jan. 11, 1851 | Dec. 18, 1851 |
| Nine | Dec. 18, 1851 | Dec. 30, 1852 |
| Thirteen | Dec. 30, 1852 | Dec. 31,1853 |
| Sixteen | Dec. 31, 1853 | Dec. 31, 1854 |
| Fourteen | Dec. 31, 1854 | Dec. 31, 1855 |
| Nineteen | Dec. 31, 1855 | Dec. 31, 1856 |
| Twenty | Dec. 31, 1856 | Oct. 1, 1857 |
| Twenty-five | Oct. 1, 1857 | Oct. 1, 1858 |
| Twenty-seven | Oct. 1, 1858 | Oct. 6, 1859 |
| Thirty-four. | Oct. 6, 1859 | Oct. 1, 1860 |
| Forty-two | Oct. 1, 1860 | Oct. 1, 1861 |

| Fifty-four | Oct. 1, 1862 | Oct. 1, 1863 |
| Fifty-nine | Oct. 1. 1863 | Oct. 1, 1864 |
| Fifty-eight. | Oct. 1, 1864 | Oct. 1, 1865 |
| Fifty-four | Oct. 1, 1865 | $\begin{array}{ll}\text { Oct. } & 1,1866 \\ \text { Oct. } & 1,1867\end{array}$ |
| Fifty-four | $\begin{array}{ll}\text { Oct. } & 1,1866 \\ \text { Oct. } & 1,1867\end{array}$ | $\begin{array}{ll}\text { Oct. } & 1,1867 \\ \text { Oct. } & 8,1868\end{array}$ |
| Sixty..... Sixty | $\begin{array}{ll}\text { Oct. } & 1,1867 \\ \text { Oct. } & 8,1868\end{array}$ | $\begin{array}{lr}\text { Oct. } & 8,1868 \\ \text { Oct. } & 12,1869\end{array}$ |
| Sixty-nine | Oct. <br> Oct. <br> 12, 186898 | Oct. Oct. $12,18,1870$ |
| Sixty-eight | Oct. 12, 1870 | Oct. 1, 1871 |
| Seventy-six | Oct. 1, 1871 | Oct. 1, 1872 |
| Seventy-seven | Oct. 1, 1872 | Oct. 1, 1873 |
| Seventy-five | Oct. 1, 1873 | Oct. 1, 1874 |
| Eighty-two. | Oct. 1, 1874 | Oct. 1, 1875 |
| Eighty-six | Oct. 1, 1875 | Oct. 1, 1876 |
| Ninety-one | Oct. 1, 1876 | Oct. 1, 1877 |

There have been no material changes in the general plan of instruction. The course pursued here is substantially the same as that of other American institutions for the blind. Classes were taught last term in history, algebra, rhetoric, grammar, arithmet ic geography, reading and spelling. This term there are five classes in spelling, five in reading, four in geography, seven in arithmetic, and one each in grammar, algebra, physiology, and English literature. During one hour of each day; the youngest pupils are taught according to a modification of the kindergarten system. Their improvement, especially in the use of their hands, is manifest, and we hope, with more experience, still better results may be obtained.

The usual attention has been given to music. This term we have an intermediate, as well as a primary and $\varepsilon \mathrm{n}$ advanced choir. We have also two classes in harmony, that meet alternate days. Les-
sons have been given on the piano, cabinet organ and violin, and also in vocal culture. A new and profitable feature in the musical education has been a series of illustrated lectures on various themes pertaining to the general subject of music, given by Mr. Van Cleve.

In the industrial department, the manufacture of corn brooms has been continued. The value of this work consists not only in the knowledge of how to make brooms, but also in the skill acquired in the use of tools, and the habit of industry. Cane-seating has been taught to both boys and girls. Weaving of rag-carpets has been found to afford a comfortable support to blind persons in some sections of the state, even in the present "hard times." A loom has this fall been purchased, in order that this branch of industry may be taught to those of our pupils whose circumstances render it probable that this may be a profitable occupation for them.

Our girls learn to sew, knit, crochet, and do various other kinds of work which may render them helpful members of a family circle. It is our design to introduce every new industry which seems likely to afford our scholars profitable employment, or such manual dexterity as will enable them to do well whatever their hands find to do. With this in view, we expect soon to introduce the knitting machine. We know it is practicable for blind girls to learn to use this skillfully, for it has been done with eminent success in the New York City Institution for the Blind.

There has been more sickness among our pupils than in some previous years. A child who was severely sick last term, as the result of whooping cough, suffered for a long time from a complication of difficulties following an attack of pneumonia. Her life was spared, though she is still very frail. During the winter a number of cases of diphtheria occurred. Fortunately we escaped the mortality which prevailed among the children of the city. When we remember that many of our pupils have constitutions naturally feeble, that others have been enfeebled by the disease that destroyed their sight, that most of them are disinclined to take a sufficient amount of exercise, and that some are over-ambitious and inclined to confine themselves too closely to study, we have reason to be grateful that no more sickness prevails. That it does not, is the result of constant watchfulness and prompt attention to slight ailments, combined with careful sanitary regulations.
The great event of the year has been the completion and occupa-
tion of the main building, which replaces the one destroyed by fire in 1874. The institution has now accommodations sufficient for all who may naturally be expected to attend the school, for a number of years to come.
The charter law of the institution defines its object to be "to continue and maintain the school for the education of the blind, established at Janesville, and to qualify, as far as may be, that unfortunate class of persons for the enjoyment of the blessings of a free government, obtaining the means of subsistence, and the discharge of those duties, social and political, devolving upon American citizens."

This is no small or ignoble task. The work involves many perplexing questions, and calls for energy and perseverance in order to surmount the difficulties in the way of success. If our pupils shall become intelligent, industrious, self-reliant and useful members of society, we shall have reason to rejoice; and the state will have received proper recompense for the effort expended to qualify them for citizenship. That any of them should fail to realize our hopes for them is discouraging, but such results are not peculiar to Wisconsin, or this institution. Perfect successin every case is too much to be expected. The degree of success to be looked for must be dependent in individual cases, not alone upon the amount of pains taken, but also upon native ability and natural traits which may either assist or retard improvement.

It is impossible that a work requiring so great a variety of processes, done for so dependent a class of persons, should not involve a large expenditure of labor and money, even when the utmost economy is exercised. But we should endeavor not to lose sight of the radical distinction between a true economy and a parsimony which will defeat the object for which we labor.

More teachers are required than for the same number of pupils in an ordinary school. We aim to give our scholars a substantial English education, believing this a fundamental requisite for accomplishing the purpose for which the institution was established.

The great variety in age, attainments and ability gives us, with our comparatively small number of scholars, about all the grades found in our common schools, from the lowest primary to the upper high schcol classes. Instruction in nearly all these classes must be given orally; hence, the time devoted to each class must be suffi-
cient, not only for recitation, but also for learning a new lesson. This must be the case until text books can be furnished cheaply enough to warrant the expense of supplying each pupil with a book, as is the case in schools for seeing children. Until this can be done, learning the lesson from the lips of a skilled teacher must be preferred to any other method. The necessity for guiding each hand over maps and other apparatus renders it impossible to teach large classes, except in a few branches.

Dr. Samuel G. Howe, of Massachusetts, better known to the public than any other educator of the blind, in the report written but a short time before his death, after more than forty years of experience in this work, says: "In order to do justice to all, our classes are necessarily small, and the number of teachers large. This, of course, increases the cost of instruction; but cheapness is no more applicable in equipping an educational establishment, than in offcering and fitting up an army. Indeed, of all kinds of poor economy, that which will admit the packing of a large number of pupils, of different ages and mental capacity, into one large division, for the sake of saving the salary of an additional teacher, is the poorest."

It would be impossible for us to make a suitable classification with our present number of teachers, but for the assistance rendered by several of our older pupils. This term, five classes are taught in this way.

In addition to their work in the schoolroom, our teachers must render considerable assistance to the pupils in reading, writing, etc., out of school hours.

Much time and effort are required in general culture and training. Mr. Little has made reference to this in the 23d report of this institution, as follows: "This may be a proper place to refer to the great amount of incidental labor that comes upon the officers of the house in endeavoring by personal influence and repeated instruction to form, in the pupils, good personal habits and manners, and to give them an acquaintance with the proprieties of life. On account of their inability to perceive how cultured persons behave under various circumstances, things which with others are largely matters of unconscious imitation are, to the blind, matters of laborious acquisition; and while some of them are solicitous to conform to the customs of good society, and ready to comply with suggestions upon any point of decorum, others are negligent of appear-
ance, careless of manners, and seem to think it strange that one way of doing a thing should be considered more correct or becoming than another. That there are among our pupils any uncouth motions of head, face, hands or body, is an occasion of great and constant regret; that there are no more is due partly to highly creditable exertions made by many of them to improve, and partly to incessant care and kindness on the part of teachers and others who have them in charge from day to day."

Our musical department is a source of expense which the state is not called upon to meet in any other public educational institutution, and its object is frequently mistaken. Music is taught to the blind, not chiefly because it provides a pleasant accomplishment. Perhaps it is right to remember the pleasure music affords to those who are excluded by their infirmity from many of the usual avenues of enjoyment, and especially its value to them in increasing their social opportunities, and hence the probability of their success in life. But what we should never forget is, that music, as a profession, affords to those with good minds, having some natural musical ability, and much patience and industry, the best possible prospect of success in " obtaining the means of subsistence." That employment in which sight plays a secondary part, in which the intelligent mind, cultivated taste and quick ear are of the greatest importance, and even touch need not be the chief guide, is the one of all others in which the blind may hope to compete successfully with the seeing. As it is impossible otherwise to know which of our scholars may develop into successful musicians, we give all a chance to learn to sing, and all who make reasonable progress in literary studies, a trial upon some musical instrument. Some are dropped after a short experiment, if their case seems utterly hopeless. Some are continued longer than would otherwise be done, because several, by patient perseverance, have made good players and successful teachers only after many discouragements, and long practice and instruction. Here, again, it is poor economy to have anything but thorough work done, or to keep so small a supply of instruments as to limit the amount of practice by anything but the profit of the pupils.

Maps, books, and most apparatus used in schools for the blind must be manufactured expressly for the purpose, and partly because of the small demand for such articles, they are expensive. 2-Bund.
[Doc. 8]

Books in raised letters are bulky, costly, and, in the nature of the case, less durable than ordinary books. They cannot be used without constant handling, and when the letters are pressed down by use they are illegible and thus worthless. Nearly every variety of educational work has received national aid, except the education of the blind.

At the meeting of the American Association of Instructors of the Blind, held in Philadelphia, in August, 18\%6, and at which twentysix institutions were represented, the following resolutions were adopted:
"I. Resolved, That we, 'The American Association of Instructors of the Blind,' consisting of the superintendents, trustees and teachers of the state institutions in the United States, in convention assembled, do earnestly entreat congress to take such measures as shall secure for the blind improved means of education, by an endowment that shall permanently provide embossed books and apparatus for their instruction. And we urge this for the following considerations:
"1st. Embossed books and tangible apparatus, are of the highest importance in the education of the blind; but as there is too limited a demand to make their production remunerative to private enterprise, appeals have necessarily been made to the charitable for their manufacture, with but fitful returns obtained by much labor and expense. There is needed a regular income, no part of which to be expended in building, that shall permit of continuous work in this manufacture. And we believe that if text-books can be supplied similar to those used in ordinary schools, blind children may often be educated with the seeing at their homes.
" 2 . In other systems of education - notably the deaf and dumbmaterial aid has been given by congress, and we are convinced that in no other way can congress more efficiently aid the blind of the entire country, than by assisting in the production of such books and apparatus.
" 3d. That inasmuch as the 'American Printing House for the Blind,' located at Louisville, Ky., is an institution chartered by that state, and has received for reveral years annual appropriations from the states of Kentucky, New Jersey and Delaware, for the benefit of the blind in those states, which have been expended in the production of several thousand volumes in raised letters, unsurpassed
in mechanical execution; and as said institution is fully prepared with all the type and machinery needed for supplying the blind, and is under the gratuitous management of a board of trustees every way worthy of their trust, there can be no doubt that the endowment of this institutution by congress would secure the most beneficial results to all the blind of the country.
"II. Resolved, That a committee of five, consisting of the superintendents of the Kentucky Institution, of the New York City Institution, of the Pennsylvania Institution, of the Maryland Institution and of the Georgia Institution, be appointed to embody the above suggestions in a bill, to be presented to congress for its addoption, and to perfect and carry out the details necessary to secure its passage."

The committee appointed prepared a bill which has been presented to congress. It is to be hoped that it will meet with favor from those interested in education, and desirous of helping those whose need of help is greater than that of the mass of the community.

The railroads of the state have again conferred favors upon the institution and its pupils by gratuitously carrying them to and from their homes for the summer vacation.

The following newspapers have been sent to the institution during the whole, or a part of the year.

Thaniss are hereby rendered for the favor, and a continuance of the same is requested.

Burlington Standard.
Green Bay Advocate.
Wisconsin Chief, Fort Atkinson.
Monroe Sentinel.
Kenosha Union.
Kenosha Telegraph.
Wood County Reporter.
Kilbourn City Guard.
Brandon Times.
Palmyra Enterprise.
Journal of Commerce, Chicago.
Goodson Gazette, Staunton, Va.
The Tablet, Romney, W. Va.
Mutes Companion, Faribault, Minn.

Encouraged by past success, and grateful for the care of Divine Providence, let us look forward with hope, and take hold of the work entrusted to us to perform with new energy and zeal.

Respectfully,
Mrs. THOMAS H. LITTLE, Superintendent.

## CATALOGUE OF PUPILS.

Names. Residence, county.

Names. Residence, county.

## ADMISSION 0F POPILS.

Any person wishing to make application for the admission of a pupil into the institution, must address the superintendent, giving definite and truthful answers to the following questions, viz.:

1st. What are the names and postoffice address of the parents or guardians of the person for whom application is made? ${ }^{\cdot}$

2d. Are such parents or guardians legal residents of the state of Wisconsin?

3d. What is the name and age of the person for whom application is made?

4th. At what age did he or she become blind, and from what cause?

5th. Is he or she of sound mind and susceptible of intellectual culture?

6th. Is he or she free from bodily deformity and all infectious diseases?

7th. What are his or her personal habits and moral character?
Upon receipt of such application by the superintendent, the applicant will be notified as to whether or not the person in question will be admitted; and no one must be sent to the institution until such notification shall have been received.

No person of imbecile or unsound mind, or of confirmed immoral character, will be knowingly received into the institution; and in case any person shall, after a fair trial, prove incompetent for useful instruction, or disobedient to the wholesome regulations of the institution, such pupil will be thereupon discharged.

All are expected to come provided with an adequate supply of good, comfortable clothing, which must be replenished from time to time, as it becomes necessary.

The stock of clothing should embrace suitable articles for both
summer and winter, and a sufficient number of each kind to admit of the necessary changes for washing and repairing:

All clothing must be sent in good condition, not only upon the first entrance of the pupil, but also at each subsequent return from home, after the vacation.

Each article should also be distinctly marked with the owner's name or initials, in order to prevent confusion or loss.

There is no charge for tuition, or for board; but a small sum should be deposited with the superintendent for occasional expenses.

It is important that new pupils should enter upon their term of instruction at the commencement of a session; and it is expected of all others that they will be present at the opening of the school and remain until it closes, on the last day of the session, unless prevented from doing so by sickness or other emergency. It is also expected that timely arrangements will be made for the departure of every pupil from the institution within a few days after the close of each session.

All letters to the pupils should be addressed to the care of the institution, in order to insure their prompt reception.

From ten to fourteen is the most favorable age for entering the institution, provided the pupils have judicious care and training at home, prior to that age. But as this is not always the case, and as there are many who lose their sight after that age; or having lost it earlier, do not find an opportunity of going to school at the proper time, the regulations of the institution allow the admission of all proper subjects who are not under eight or above twentyone years of age.

It must be borne in mind, however, by the friends of blind children, that though they have the privilege of sending them to the institution at a later period than the one mentioned as the best, yet it is of the highest importance that they should be sent within said period; for, as they grow older, their neglected powers lose their susceptibility for cultivation, rendering the training more and more difficult, until they become wholly incapacitated for receiving such an education as will fit them for a life of usefulness, independence and happiness. It is not uncommon to witness results of this kind, arising out of the morbid tenderness with which a blind child is frequently regarded by his friends, rendering them unwil-
ling to trust him, at the proper age, to the care of strangers, lest some harm should befall him. Indeed, every year's experience serves to indicate more clearly the lamentable prevalence of this unjust neglect; as there are constantly applying for admission into the several institutions of the country, those whose melancholy lot is to lead a life of hopeless ignorance and dependence, but who might, with proper training in early youth, have become happy and useful members of society, maintaining themselves comfortably and respectably.

The term of instruction is not limited to any definite number of years, but is determined in each individual case by the aequirements of the pupil, and consequent fitness for graduating. The length of each one's term will of course depend upon his aptness to learn, and the extent of the course to be pursued.

The session of the institution commences on the second Wednesday of September in each year, and closes on the next to the last Wednesday of June following; leaving a vacation of more than two months, during which time the pupils have an opportunity of visiting their homes and replenishing their clothing.

Parents of blind children are cordially invited to visit the institution, that they may decide from their own observation whether it is best to send them here.

All persons are requested to send the names and addresses of blind children of their acquaintaince to the superintendent.

## TRUSTEES' REPORT.

To His Excellency, Harrison Ludington,<br>Governor of the State of Wisconsin.

Sir: - The Board of Trustees of the Wisconsin Institute for the education of the deaf and dumb, respectfully submit the following report for the twenty-sixth year of the institution, ending September 30, 187\%:

Early in the year, this board were called to mourn the sudden and painful death of their esteemed colleague, Hon. Willard Isham. They heartily concur in the tribute to his memory embodied in the accompanying report of the principal of the institute.

By the steady co-operation and efficiency of the principal, teachers and officers, the work of the institute has been successfully prosecuted through the year. The number of pupils in attendance has been larger than ever before. They have been favored generally with good health, and under kind, parental discipline and faithful instruction, they have been happy in their present associations, and have made good progress in mental development and in the acquisition of knowledge which will fit them for a useful life. The facts respecting the internal administration of the school in all its departments are presented in detail, in the several reports herewith submitted.

Mr. C. L. Williams tendered his resignation as teacher, to take effect on the first of March, and at the close of the school year, Miss Bishop resigned her office as Matron. These resignations were accepted by the board, and the places thus vacated have been satisfactorily filled. Some changes have also taken place in the charge of the shops and in the engineer's department. The corps of teachers and officers as now constituted is well organized, and it is believed will work harmoniously and effectively for the intellectual
and practical education of those for whose benefit the institution is sustained.

The treasurer's report shows the amount of funds expended during the last year to have been $\$ 31,426.25$, distributed as follows:

## EXPENDITURES.

Means of instruction and amusement ..... \$432 58
Clothing and expenses of indigent pupils ..... 54157
Drugs and medicines ..... 7340
Farm and barn ..... 71719
Fuel-coal and wood ..... 2,350 04
House furnishing. ..... 1, 42651
Laundry ..... 23291
Lights ..... 53306
Live stock. ..... 9200
Manufacturing - shoe shop. ..... $\$ 71707$ ..... 6568
78287
Managers and trustees' expenses ..... 50235
Miscellaneous purposes ..... 66714
Repairs - ordinary ..... 99809
Subsistence. ..... 8,114 25
Salaries and wages ..... 13,962 29
Total ..... \$31, 42625

By rigid economy the expenditures have been kept within the limits of the appropriations made by the legislature. The amount specifically named for the purchase of apparatus for the laundry has proved sufficient for the purpose, and has been judiciously expended. There have been introduced, one Standard Washer, one Weston Wringer, and one Baldwin Mangle, together with a small engine of eight horse power, and the necessary gearing to run them. These articles embrace the latest improvements in such apparatus, and with the drying room properly fitted up, make the laundry complete in all its appointments. The building, with its outfit will, it is believed, compare favorably with any like establishment in the state, for economy in erection and furnishing, the excellence of all its fixtures, and the ease and efficiency with which the washing for so large a household can now be done. It is a great relief to have that unpleasant work entirely withdrawn from the main edifice. The space thus vacated will be available for other advantageous purposes.

The repairs for the past year have been more extensive than ordinary, and were to a considerable extent of the nature of perma-
nent improvements. The partition wall between the dining room and the former kitchen was removed, and the superstructure supported by an iron girder resting on substantial iron pillars. The dining room was thus made sixty feet square, with improved provision for light and ventilation. The boilers of the heating apparatus were thoroughly cleaned, reflued and reset; a steam drum was added and larger main pipes put in. These changes are confidently expected to favor both economy of fuel, and increased comfort. Water closets and bath rooms in the east wing will soon be completed. The expenditures for these purposes have been kept within the amounts appropriated for repairs.

After careful scrutiny of the necessities of the institution, in consultation with the State Board of Charities, the following estimate of probable expenses for the year to come, has been agreed on.

## LIST OF APPROPRIATIONS ASKED FOR.

Means of instruction and amusement ..... $\$ 50000$
Clothing and expenses of indigent pupils ..... 60000
Drugs and medicines ..... 7500
Farm and barn ..... 50000
Fuel ..... 2, 10000
House furnishing. ..... 1,000 00
Laundry ..... 20000
Lights. ..... 50000
Live stock ..... 20000
Manufacturing ..... 80000
Managers and trustees. ..... 40000
Miscellaneous ..... 72500
Repairs, ordinary ..... 1, 00000
Subsistence. ..... 8, 00000
Salaries and wages ..... 13,00000
Library ..... 10000
Printing stock ..... 30000
Total ..... $\$ 30,00000$

This board apprehends some difficulty in keeping the running expenses of the institution within these limits, but they are disposed to make the attempt, and to do their best to carry through the work for the year on this basis. They desire, therefore, through your excellency, respectfully to ask of the legislature an appropriation of $\$ 30,000$ for the current expenses of the coming year. No special appropriations additional are called for at this time.

In their administration of this trust, the members of this board come, year by year, to a higher appreciation of the importance of
this branch of public instruction provided by the state, and to a deepening conviction that no pains should be spared to secure for all of the unfortunate deaf scattered over the state, the full benefit of the opportunities here presented.

In behalf of the board, respectfully submitted,
A. L. CHAPIN,

President.

## PRINCIPAL'S REPORT.

## To the Honorable Board of Trustees, Wisconsin Institute for the Deaf and Dumb :

Gentlemen : In presenting the regular annual report of the progress and present condition of the institute, it is necessary for the sake of completing the history, as well as for giving information to those without, to state some things already known to you. I am gratified that these statements are so favorable; that I am able to represent this branch of state education in a prosperous and healthy condition. It has been a year of almost unembarrassed work, marked by general good health and order, and with reasonable success.

Humble and grateful acknowledgment is due the Providence which has kept so large a family exempt, to so great an extent, from serious iilness during a year marked by the unasual prevalence of smal! pox and scarlet fever in many parts of the state. Great care has been taken to avoid danger without, and to preserve wholesome conditions within and thus, with the favor of God, we have passed the year without a death among the pupils. But not without the death of one known throughout the community as a man of Christian benevolence, and especially interested and actively engaged in this particular field - Willard Isham, a prominent, honored and faithful member of your board. A citizen of this village for many years, he knew the history of the institute from its foundation. A man of large and generous heart, he was interested in everything which tended to ameliorate the condition of the unfortunate, and, being interested, was ever ready to aid by counsel, and by sacrifice if necessary, never hesitating to use time and energy at the call of the institute. He was first appointed trustee in 185\%, continuing till 1869 ; and a second time in $18 \% 5$, continuing till his decease, November 25, 1876. During a portion of this time he was a member of the executive committee, and as such. originated and aided in carrying out_many plans which have
added greatly to the usefulness and comfort of the institute. Socially, he was a man who made friends in all ranks. As a business man, he was thoroughly trustworthy, and in all relations was governed by sound Christian principle. In his death, not only the institute, but the entire community has lost a valuable man, and the state a worthy citizen.

The conduct of the teachers and officers in the discharge of their duties has been, with a single exception, such as to excite the highest commendation. So far we experience no difficulty arising from the employment of a greater proportion of ladies as teachers. It is, however, an experiment which will require a more extended trial to enable us to pronounce judgment intelligently. I am able to speak in unqualified terms of the fidelity and efficiency of the corps as it now stands.

## ATTENDANCE.

During the year, one hundred and eighty pupils were registered; the average attendance was one hundred and fifty-five; a number considerably in advance of any previous year. These were arranged in nine classes, or grades, each under the care of a teacher; while a tenth teacher gave instruction wholly by articulation to seven pupils, and in the practice of articulation for a portion of each day, to twenty others, all semi-mutes, with whom it was deemed possible to keep and improve the ability to speak.

The progress of the pupils has been, in the main, satisfactory. The average natural ability is as good as among the same number of children possessing all their senses, and their application, and industry are certainly equal, but the difficulties to be overcome are greater.

We may. safely suppose the deaf infant equal in all points of natural endowment to the hearing one. It is when the child begins to learn that the disadvantages arising from the closing of the main avenue to the mind - the ear - are discovered. Could means be devised for completely overcoming these, the deaf youth, experiencing no unusual hindrance in the processes of education, would continue the equal of his hearing brother. Yet, while in our work we lay hold of everything in natural provisions, and in artificial contrivances which will aid us, so far nothing has been found to meet the great want arising from deafness. We do not find, that where one sense is lost, Nature supplies a full compensation by
giving greater acuteness and power to remaining senses. Experience shows that skillful and continuous effort on the part of both teacher and pupil will induce the deficient one to substitute to a certain extent the action of another for that of the lost sense; and to put upon an existing sense more of the functions which are common to two or more senses; but the eye can never in any proper sense be said to hear, nor the ear to see.

The special work of each sense can be performed alone by that sense; and hence where one sense is lost, no skill in adaptation of means, no amount of faithfulness in application, can entirely remove the hindrance. We must recognize the inferiority of our pupils with respect to all that would be received by them through the sense of hearing.

I desire therefore, that in noticing them, and in estimating their advancement in education, you will keep in mind this great disadvantage under which they labor, and give them and their teachers. due credit for any excellence attained.

The following table shows the counties of the state from which the pupils came.

| County. | Pupils. | County. | Pupils. | County. | Pupils. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Adams ... .. |  | Iowa....... |  | Portage ... | .... 4 |
| Brown | 8 | Jackson | ... 1 | Racine . | . 5 |
| Buffalo | 1 | Jefferson | 10 | Richland | 2 |
| Calumet | 2 | Juneau | 1 | Rock | 4 |
| Chippewa | 2 | Kenosha | 5 | St. Croix | 1 |
| Clark | 2 | La Fayette. | . 3 | Sauk | 3 |
| Columbia. | 10 | Manitowoc | . 6 | Shawano |  |
| Dane. | 9 | Marathon | . 3 | Sheboygan | 4 |
| Dodge | 6 | Marquette | 2 | Trempealeau | 1 |
| Door . . | 3 | Milwaukee . | 18 | Vernon. . | 3 |
| Dunn. |  | Monroe. | 3 | Walworth | 8 |
| Eau Claire | 2 | Oconto | 1 | Washington | 2 |
| Fond du Lac | 5 | Outagamie | 1 | Waukesha. | 7 |
| Grant. | 5 | Ozaukee | 1 | Waupaca. | 4 |
| Green |  | Pepin. . |  | Waushara | 5 |
| Green Lake. | 2 | Pierce | 3 | Winnebago | 6 |

From this it appears that there are ten counties containing a population of fifty thousand, from which there were during the year no pupils. It cannot be reasonably supposed that there are no children of suitable age and condition for admission within these counties; nor that there are but two or three in many other large and populous counties.

According to the general statistical tables, the whole number of deaf within the state would be about six hundred, the ratio being
about one in every two thousand of population. Probably one-half of these are within the limits of school age - ten to twenty years. Allowing to each the full term prescribed by law, we ought to have at least two hundred and fifty pupils in the institute. But as some do not ask, others would not be benefited by, and still others, having received some education before becoming deaf, do not need so long a term, we judge that of the whole number in the state, there ought to be in school to-day two hundred pupils.

I call attention to this condition, not for the purpose of entering upon a discussion as to the reasons for it; but with the hope of awakening interest, and of securing the coöperation of all who can aid in bringing those who are entitled to them to a ready acceptance of the generous and ample provision made for them here. Certainly they are entitled to all the state gives - they need it; and the state's appropriations ought not to be, to so great an extent, wasted, and her benevolent intentions, in so many cases, frustrated. A proper appreciation of the value of education to the child, and fuller information concerning the nature of this institution, and the facilities here provided by the state, will remedy this evil. It is desirable, therefore, that our reports be widely distributed, and that parents and others interested in children who are deaf should freely visit the institute for actual observation of its organization and methods of instruction. Our thanks are due to those who have thus interested themselves, and assisted in bringing in pupils; and we request all who know of any entitled to admission, to notify us, indicating how they may be addressed or visited.

## INDUSTRIAL DEPARTMENT.

The following programme, giving the time of the various occupations of the day, will show the amount devoted to labor. It applies to every pupil and is strictly carried out. Its effect in preserving order, and inducing habits of regularity and industry is marked.

| A. M. | P. M. |
| :--- | :--- |
| 5: 45 - Rise. | 12 to - Dinner and recreation. |
| 6:30 - Breakfast. | 1 to 3 - School. |
| 7 to $8: 30$ - Work. | $3: 15$ to $5: 30$ - Work. |
| 9 to 12 - School. | $5: 30$ to 7 -Supper and recreation |

7 to 9 , р. м. - Study.
Young pupils retire at 8; older, at 9 o'clock.
On Saturday, 7:15, A. m., to $10: 30$, work; remainder of day, holiday
On Sunday, 9, A. m., lecture ; 2:30 to 4, class instruction; 7, P. m., lecture or reading.
Breakfast, 6:30; dinner, 12; supper, 6.
While it is not expected that the labor of the pupils shall be
source of income to the institute, it is very desirable that it should pay the expense of oversight and material necessary; and such is generally the fact. If, however, the industrial department should not prove self sustaining, the fact that any considerable number of pupils leave the institute prepared to make a living is sufficient to justify the outlay.

During the year there were employed in the cabinet shop twelve boys; in the shoe shop, fifteen; in the basket shop, twelve, and the remainder about the building and grounds, in work which would otherwise have cost the wages of hired men.

All the girls have received daily instruction in plain and ornamental needle work, and performed the chamber and dining room work for themselves and the boys. They have also assisted, as far as practicable, in the laundry. This work, from its character and variety, cannot be accurately estimated in dollars and cents, and yet it has caused a material saving in expense of hired help, and taught them important lessons in domestic work. During the past year, the amount of house work done by the pupils has been very consideraoly increased.

The annexed list of articles made in the sewing room during the year will give a partial statement of the girls' work.
Pairs of cloth mittens ........... 45 Pillow cases ....................... . . 126
Shop aprons - boys .............. 49 Towels ................................ 148

Bed spreads....................... 30 Handkerchiets...................... 12
Table cloths .................... 47 Slate wipers ........................ 350

Sheets . . . . . . . . . . . . . . . . . . . . . . . . . 102
Also a large number and variety of fancy articles in crochet, embroidery and worsted work.

Type setting is an occupation in which the deaf have at least equal ability with the hearing; some have thought superior. It is taught in half the institutes in the United States, and can be well introduced here. A comparatively small outlay will be sufficient to meet the want, and I therefore earnestly recommend its introduction.

EXPENSES.
The books and vouchers laid before you show that the current
expenses for the year have been kept within the sum appropriated by the last legislature - $\$ 31,500$.
The expense per pupil, including not only subsistence, but tuition in school, and labor, books and tools, medical attendance, service of all kinds, repairs of buildings, etc., has been $\$ 202.75$ - for subsistence alone, $\$ 43.86$ - about $\$ 1$ per week, counting the entire household.

## LIBRARY.

The experiences of the year have strengthened the impression held of the necessity of additions to our library, for the benefit of both officers and pupils. The village contains no library accessible, and the few books on hand constitute all within reach. The every day work of the teacher requires the aid of standard works of literature, and of reference, which few, if any, are able to purchase; while for our pupils, needing not only the information contained in books, but the incentive to reading, a well selected addition to what we have will be of inestimable advantage. I earnestly request that such an amount as you may deem advisable be set aside for the purchase of books.

## CLOSING EXERCISES.

The closing exercises, held June 12th, were of usual interest. The examinations of the classes were, in the main, satisfactory, and the pablic exhibition of creditable character. Diplomas were awarded to the following named pupils who had completed their term in the institute:

Lida Bailey.
Hugh Cork.
Henrich Grosenick.
Louis Hecker.
Harry Reed.
Sidney R. Barker.
Charles Barnhart.

Ernst J. Boeckman.
Philip J. Conery.
Charles Henry.
George E. Joeckel.
Mary A. McKee.
Dennis O'Connell.
Ella Overton.

Also, certificates of proficiency and good character to Patrick Callahan and Jennie O. Smith.

## STATISTICS.

I insert here tabular statement of the institutions for the education of the deaf and dumb within the United States and Canada, as containing valuable information which will not reach our citizens in any other way.

American Institutions for the Instruction of the Deaf and Dumb for the yeur $18 \% 6$.

American Institutions for the Instruction of the Deaf and Dumb, 1876 - continued.

1 Under this head are included the semi-denf and all the deaf who have acquired some knowledge of the language through the ear.
${ }^{2}$ Including the principal.
3 Not including the semi-mute tea hers
4 Number in 34 institntions, containing 4,144 pupils.

> Deaf Mute Index, Colorado Institute.
> The Educator, New York Institute.
> Deaf Mute Journal, Mexico, N. Y.
> Mirror, Michigan Institute.
> Goodson Gazette, Virginia Institute.
> Companion, Minnesota Institute.

Valuable specimens of Colorado minerals for the cabinet were received from Christopher Minert, Esq., of Albany, Greene connty, Wis. Contributions of minerals, petrifactions, fossils, relics, etc., are solicited, and when presented will be carefully kept.

We also acknowledge the favor of reduced fare to pupils coming to and going from school, on the Northwestern, Western Union and Milwaukee \& St. Paul railroads.

With a lively appreciation of the delicacy and importance of the trust imposed upon me, and with assurances of devotion and faithfulness thereto, I have the honor, gentlemen, to submit the foregoing.

## Respectfully,

W. H. De MOTTE,<br>Principal.

Delavan, Wis., October 1, $187 \%$.

## PHYSICIAN'S REP0RT.

To the Board of Trustees of the Wisconsin Institute for the Education of the Deaf and Dumb:

Gentlemen: During the year ending September 30, 18\%17, there has been more sickness among the pupils than the year previous, but mostly of a mild order, and yielding readily to mild remedial measures and good care. There have been three cases of pneumonia, and several cases of acute bronchitis, one of accident, two of fracture of fore-arm, and two dislocations, with other slight accidents, comprise the list. A perfect recovery in all cases is largely attributable to more than ordinary care, hygienic and dietetic rules and regulations.

All of which is respectfully submitted.
J. B. HEMINWAY, M. D.

## TRASURER'S REPORT.

> To the Board of Trustees of the Wisconsin Institute for the Education of the Deaf and Dumb:

## ADMISSION OF PUPILS.

The Wisconsin Institute for the Education of the Deaf and Dumb is located at Delavan, Walworth County, on the Western Union Railroad.

It is a school for the education of the children and youth of the State who, on account of deafness, cannot be instructed in the common school.

The proper age of admission is twelve years; application should not be made for any child under ten. The regular course of instruction occupies five years. It is understood that parents and guardians will allow their children to remain during that period unless their stay is shortened by removal or Providential circumstances. The only time in the year for admission is the beginning of the term, on the first Wednesday of September. The term closes in June. There is no winter vacation.

No person of imbecile or unsound mind will knowingly be admitted; and such, if received, will be discharged on discovery that he cannot be instructed by means of the methods here employed

All applicants must be free from immoralities of conduct, and from offensive or contagious diseases.

There is no charge for children of the state for board or tuition, but their friends are expected to pay traveling and incidental expenses, and to supply clothing-a sufficient supply of which should be furnished at the beginning of the school year, or be sent by express as needed. Ordinary mending is done at the institute, but the making of garments is no part of its work. Every garment should be distinctly marked with the owner's name. A sum of money, not less than five dollars, should be deposited with the principal at the beginning of the school year, for incidental expenses.

All letters respecting applicants should be addressed to the principal, to whom money should be sent by draft or post-office order.

All letters and express packages for pupils should be marked "Institute for the Deaf and Dumb." Express matter should be prepaid.

Any person knowing of deaf-mute children or youth, not in school, may confer a great blessing on them by sendirg their names and the addres of their parents, to the principal of the Institute for the Deaf and Dumb, Delavan, Wisconsin.

## FORM OF APPLICATION.

1. Full name of deaf-mute.
2. Date of birth.
3. Place of birth.
4. Names of parents.

Father.
Mother.
5. Residence of parents.

Town.
County.
Post-office.
Nearsst railroad station.
6. Occupation of father or mother.
7. Nationality of parents.
8. Was the child born deaf?

Or, what was the cause of deafness?
At what age?
9. Is deafness total, or partial?
10. What is the general health?
11. Is there any imbecility or idiocy?
12. Has it had the Small pox?

Mumps?
Measles?
Whooping cough?
13. Are any of the family connections deaf?
14. Were the parents related before marriage?
15. Names of all the children in the order of age.

Signature of parent or other person making application.
Post-office address.
This form, when filled and signed, should be sent to

> W. H. De MOTTE,
> Principal Institutefor Deaf and Dumb, Delavan, Walworth County, Wisconsin,

## BY-LAWS.

## TRUSTEES.

The regular meeting of the board of trustees shall be held at the Institute, as follows:

1. The annual meeting on the first Wedeesday of May, at which time they shall elect by ballot, a president, an executive committee of two, and a treasurer, from their own number, also a secretary and Steward, who may or may not be of their own number.
2. A meeting at the close of the school term in June, for the appointment of officers and the fixing of salaries; for determining the repairs and improvements during vacation, and for the consideration of such other matters as demand attention for the ensuing year.
3. A meeting on the third Wednesday of October, at which they shall examine the accounts for the fiscal year ended, make estimates for the legislative appropriations, and prepare to report to the governor of the state the condition and wants of the Institute.

The president or two members of the board may call special meetings. A majority of the trustees shall constitute a quorum, and have power, in case of a vacancy, to elect any officer of the Institute.

## THE EXECUTIVE COMMITTEE.

The executive committee shall have the general oversight of the Institute, in accordance with the regulations of the board, during the intervals of its meeting, convene monthly for the auditing of accounts, examination of the premises, and conierence with the Principal concerning the welfare of the Institute.

THE TREASURER.
The Treasurer shall give bonds yearly, to be approved by the Board of Trustees, for the faithful discharge of his duties, in such
sum as they may determine. He shall draw from the state treasurer, on warrant signed by the president and secretary of the board, all moneys appropriated for the Institute. From funds in his keeping, he shall pay orders issued by the secretary and countersigned by one member of the execvtive committee, keeping a record thereof. At the board meeting in October, and at other times when required, he shall present a full statement of his accounts with the Institute.

## THE SECRETARY.

The secretary shall make a full and accurate record of the proceedings of the board, notify its members of regular and of special meetings, sign orders on the state treasurer, making a minute of the same on the records of the board, and present to the governor the annual report of the trustees. He shall also act as secretary of the executive committee, recording their actions for examination by the board, and keeping a list of all bills audited by the committce.

## THE PRINCIPAL.

The principal shall reside in the Institute, and be the chief exective in all its departments, carrying out the regulations of the board of trustees.

Subject to the approval of the board, he may make such rules as he may deem best for the general good; assign to the teachers pupils for instruction or supervision, and define the duties of each pertaining to the school room, study or or chapel; he shall prescribe the course and method of instruction, the text-books and apparatus to be employed in teaching, and the kind and degree of discipline to be enforsed. He shall direct the matron in domestic or supervisory duties. Ho shall seek the improvement-physical, mental and moral - of the pnpils, inculcating religious truth and right principles, yet avoiding the expression of denominational preference.

He shall employ such persons, not specified as officers of the Institute, as are necessary for its efficient, yet economical management in each department, fix their wages and dismiss them for good cause.

He shall keep full records of the administration of the Institute, ts members, teachers, and pupils, in a form to exhibit its condi-
tion and to indicate the steps of its developing history and its accomplished results.

He shall oversee and direct the steward in making the necessary ordinary purchases, and see that a definite account of the same be presented monthly to the executive committee, referring all extraordinary items to the trustees for their approval before purchasing.

He shall be prepared to state to the board, at any meeting, the condition of the Institute, and at the meeting in Octobcr, present a written report.
Between the meetings of the board he shall advise with the executive committee.

## THE STEWARD.

The steward, shall, under the direction of the principal and executive committee, purchase provisions and other necessary articles for the Institute, and see that the same are properly taken care of and economically used.
He shall keep plain, clear and exact accounts of all receipts and expenditures, and present the same with the vouchers therefor, to the executive committee at their monthly meetings for examination.

He shall see that the buildings are properly warmed, that the grounds and buildings are kept in order, and that the live stock is properly taken care of.

He shall pay special attention to the manner in which the watchman performs his duties, and report all irregularities to the principal.

He shall, under the direction of the principal, consider the male pupils as under his special care, when they are not under the charge of the teachers.

He shall be governed, in the discharge of the duties of his office, by the rules and regulations made by the principal and board of trustees.

## TEACHERS.

The teachers shall be appointed by the board of trustees, on consultation with the principal. They shall instruct the pupils under the direction of the principal, and perform such other duties connected with the other departments of instruction and supervision as he may from time to time require.

They shall attend the daily devotions, and take such part in the
religious instruction of the pupils as may be assigned them by the principal.

## MATRON.

The matron shall be appointed by the board, on consultation with the principal, and shall have charge of the female pupils out of school hours, and a general direction of the domestic affairs of the institute, under direction of the principal.

## PHYSICIAN.

The physician shall be elected annually by the board. He shall visit the institute when notified; shall prescribe for the sick; shall look carefully to the sanitary condition of the institute and its surroundings; and faithfully perform all the duties in the line of his profession. He shall report the condition of his department at each regular meeting of the trustees, and at such other times as he may deem necessary, or the board may require.

MASTER MECHANICS.
The master mechanics shall be appointed by the board, on consultation with the principal, and shall have charge of the shops, and the supervision and instruction of the pupils assigned to them, in their respective trades, and perform such labor in the line of their occupation as may be required of them, and report to the principal the condition of their shops, when he shall require.

## PUPILS.

Pupils shall be received and dismissed only by the principal, with the sanction of the executive committee.

Every pupil who has not been vaccinated, before being received into the institute, shall be vaccinated without delay.

Pupils honorably dismissed from the institute shall receive a certificate signed by the president and secretary.
Pupils shall not ba allowed to retain any pocket money, but on admission shall deliver the same to the principal, who shall cause it to be credited on his books, and returned in such sums as he may deem advisable, the object for which it is furnished being specified.

## MANUFACTURES.

| The goods on hand ready for market at th are valued at | \$28,066 56 |
| :---: | :---: |
| The sales for the year amount to. | 73,589 67 |
| Total. | \$101, 65623 |
| Deduct amount on hand September 30, 1876 | 24,479 94 |
| Value of goods manufactured during year | \$77, 17629 |

The following table presents a summary and comparative statement of the reports and inventories of prison property, assets and liabilities for September 30, 18;6, and September 30, 1877:

| Assets. | $\begin{gathered} \text { Sept. } 30, \\ 1876 . \end{gathered}$ | $\begin{gathered} \text { Sept. } 30, \\ 1877 . \end{gathered}$ |
| :---: | :---: | :---: |
| Cash on hand.. | \$402 13 | \$46 23 |
| Bills receivable and accounts | 19,799 98 | 22,750 54 |
| Due from United States | 65563 | 1,209 88 |
| Due from state institutions | 8,533 97 | 12342 |
| Due from Corn Exchange Bank | 9,631 07 | 9,631 07 |
| Goods ready for market. | 24,479 94 | 28,026 56 |
| Material for manufacturing and use | 34,458 83 | 34, 04006 |
| Machinery and tools..... ... | 25,026 15 | 28,206 48 |
| Furniture and miscellaneous goods in | 12,542 74 | 13, 31512 |
| Gross assets, exclusive of real estate | \$135, 53044 | \$137, 28936 |
| Liabilities | 22,365 84 | 6,412 75 |
| Net assets, exclusive of real estate | \$113,164 60 | \$130,876 61 |

Increase in net assets during the fiscal year, $\$ 17,712.01$, mainly represented by decreased liabilities.

The account of the prison with the state for the fiscal year ending September 30, may be stated as follows:

| DEBITS. | $\begin{array}{r} \$ 39,07853 \\ \quad 8340 \end{array}$ |  |
| :---: | :---: | :---: |
| $R$ eceived from state treasurer, exclusive of appro priation to pay indebtedness due from other state institutions <br> Received from accounts prior to April 1, 1874..... |  |  |
|  |  |  |
| CREDITS. |  |  |
| Increase in net assets ac above. |  | \$17,712 01 |
| Balance, which is the net cost or loss to the state on prison account for the fiscal year, |  | 21,449 92 |
| Total | \$39,161 93 | \$39,161 93 |

The net cost on current expense account last year was $\$ 9,12 \% .38$. The increase for this year is attributable to several causes, among which may be especially. noted:
The increased cost of flour and meat; the locking up of a large number of men, from the time of the fire until the shops were put in running order, a period of about sixty days, and the employment of the others at very serious disadvantage.

The following table presents a comparative statement of the sereral items mentioned for the fiscal years ending September 30:

|  | 1876. | 1877. |
| :---: | :---: | :---: |
| Total cost to feed, clothe, warm, instruct and superintend the prisoners, exclusive of expense connected with manufacturing $\qquad$ | \$34,205 77 | \$39,841 68 |
| Average cost per year per man ..................... | 13104 | -137 05 |
| Average cost per week | 252 | $2631 / 2$ |
| Total number of days of confinement............ | 95, 426 | 105, 8\%3 |
| Total number of days spent in productive labor... | 55,585 | 60,649 |
| Amount of earnings per day of productive labor necessary to render the prison self supporting.. Actual net earnings per day........................ | $\$ 060$ 45 | $\begin{gathered} \$ 0632 / 3 \\ 41 \end{gathered}$ |

Additions to and changes in

## PRISON BUILDINGS.

There have been no additions made to the prison buildings during the past year, and no considerable changes made except to rebuild the engíne house which was destroyed by fire January 31, $18 \% \%$, and to make such repairs as use and natural wear and decay have rendered necessary. For the details of the expenditures for these purporses, reference is respectfully made to the warden's report.

## GENERAL CONCERNS.

For two years last past, the warden has reported as a portion of the prison assets a claim against the Corn Exchange Bank of Waupun, amounting to $\$ 9,631.07$, and he, as well as the directors, has entertained the opinion that this was, in fact, a debt due to the state from that bank, and therefore, that in the bankruptcy proceedings pending against it, this claim would be entitled to preference and paid in full. Such, also, was the opinion of the attorney general and other distinguished counsel who were consulted in reference thereto. A decision to that effect was given by Judge Dyer, of the United States district court, but on appeal by the assignee to the United States circuit court, Judge Drummond reversed the judgment. No appeal being allowed from the circuit to the supreme court of the United States in such matters, there is no alternative but to accept and abide by the judgment as rendered by Judge Drummond, which places this claim on a par with all other claims against the bank, and renders the amount likely to be received entirely uncertain, but presumably very small.' We know that in fact a very large reduction must be made in this item, but because the amount is uncertain, we suffer it to remain nominally as heretofore. There is no doubt in the minds of the directors as to the technical liability of the warden to the state for whatever deficiency may arise in this matter; but whether he should, in fact, be called upon to respond to this technical liability is a question, as it would seem rery proper to be submitted to the legislature for consideration and determination.

In this connection, too, it is proper to call the attention of the
legislature to the opinion filed by Judge Drummond in deciding this matter, a copy of which is appended to the warden's report. If his arguments and conclusions are to be adopted, further legislation in regard to the prison is indispensable. If it is true, as he seems to hold, that the warden is personally liable on the contrats that he may make for the state in his official capacity, and that judgment may be taken against him thereon, and his private property levied upon and sold to pay such judgments, we must expect to be able to secure only bankrupts, or "ne'er-do-wells" to fill that important office in the future.

The directors have approved tho contract made by the warden with M. D. Wells \& Co., for the leasing of the labor of the convicts for the term of five years from January 1, 1878, at the rate of forty cents per day. While the price to be paid seems small, it is all, and probably more than the state has ever realized from the labor heretofore, and compares very favorably with the average prices obtained elsewhere. A copy of the contract accompanies the warden's report. We anticipate very satisfactory results from this change in the system of employing the convicts.

We think our net income will be somewhat increased; but as of vastly more importance to the prison and to the convicts, and therefore to the state, we expect a very decided gain in the way of discipline and culture. The officers of the prison relieved from the cares and labor incident to the manufacturing interests, can devote themselves to the prisoners, their education, management and discipline; their reformation. The prisoners, themselves, working under the supervision of men pecuniarily interested in the results of their labor, will be likely to be taught all the improved processes, and withal will have excellent opportunities to acquire habits of regular industry - the best safeguard against relapsing into crime.

During the past fiscal year the directors have reappointed Hon. Horatio N. Smith, of Sheboygan county, to be warden, and Jacob Fuss, of Brown county, to be clerk of the Prison, for three years from Jannary 1, 1877, and they have respectively given new bonds and continued in the satisfactory discharge of their onerous duties. But few changes have been made by the warden among the subordinate officers, and employees of the prison. Something has been gained we think in the way of perfecting details of management, but our prison, although comparing favorably with other similar in-
stitutions, is not yet our ideal of a penal institution, and, indeed, never can be. The more we observe and study penal institutions and their inmates, the more we realize that penology is a science not to be mastered in a day, or a year, or a lifetime. Here as nowhere else are we remindad that

Labor with what zeal we will, Something still remains undone.

We think we are pursuing the right course in retaining the services as far as possible of those officers, who upon trial are found to have capacity and adaptedness for the places they fill. Each year's experience makes them better qualified for the work, and we therefore confidently anticipate continued improvement in the management and administration of our prison and its affairs.

Under the provisions of the law of $18 \% 6$, we have allowed compensation to various prisoners as follows:

To I. S. Clear and Geo. Wilson, each $\$ 25.00$, for extra labor and good conduct.

To Merchant Childers, Julius Falk and Charles Schultz, each one month's dimunition of term fur same.

To Henry Buettner, $\$ 15.00$ for same.

## RECOMMENDATIONS.

## SENTENCES.

We agree with the warden's views in regard to the necessity for a modification of the laws of the state concerning the terms of sentences. So far as the immediate effects upon the discipline of the convicts are concerned, we cons:der it immaterial whether this modification is effected by the abolition of term sentences as advocated by the State Board of Charities and Reform, or by limiting the discretion now reposed in the various courts and judges, as recommended by the warden. A discussion of the effects likely to be produced upon the criminal classes, and through them upon society at large, by the adoption of either of these methods, would protract this report to unwarrantable length, and we therefore remit it to those more immediately charged with such duties.

## APPROPRIATIONS.

We also agree with the warden in the opinion that no appropriations will be required by this institution for the current year. In view of this fact, we earnestly recommend the passage of a law authorizing the governor to appoint a representation from this state to attend the Inter-national Prison Congress which is to meet at Stockholm next summer, and the appropriation of a reasonable sum, say one thousand dollars, for defraying his expenses. These congresses are resulting in great good, and Wisconsin should be represented in them, that she may both contribute to and share in their benefits.

## PRISON LIBRARY.

Referring to the tabular report herein, concerning the prison library, and calling attention to the difficulties heretofore experienced in obtaining appropriations for it, we recommend a modification in the law whereby the gate fees for admission of visitors may be constituted a special library fund, to be expended under the direction of the warden, in replenishing the library, and for other educational purposes.

## PROPERTY.

We further recommend a modification of existing laws, so that beyond question or doubt, all prison property and funds and debts due to the prison shall be state property, that the warden shall not be personally liable upon the contracts that he may make for the state, nor shall execution issue against him or his property or the property of the state in his possession. It would seem eminently proper, too, that all contracts should be made and all the business of the prison should be carried on, not in the name of the warden, but in the name of the state.

## PARDONS.

We recommend that power be conferred upon the governor to pardon ex gratia, say not to exceed three convicts annually, without compliance on the part of said convicts with the laws now in forse in regard to pardons.

## GOOD TIME LAW.

We recommend further that the " good time law," so called, be
so modified that short term convicts shall be entitled to less credits and long term convicts to more credits for good conduct than now provided for.

DISCHARGED CONVICTS.
The present law permits the warden to furnish each convict discharged with a suit of "citizen's" clothing and five dollars in money. In most cases this sum is utterly inadequate to furnish the discharged prisoner transportation to his home - to say nothing of support for the few days while seeking employment. This bare statement is to us a most eloquent and pathetic appeal for a modification of this law whereby authority may be conferred upon the warden at his discretion and as necessity may require to furnish, in addition to the clothing and money now provided for, transportation to any place within this state.

Respectfully,
NELSON DEWEY, WM. E. SMITH, GEO. W. BURCHARD,

Directors.

## WARDEN'S REP0RT.

Office of the Wisconsin State Prison, Waupun, October 1, $187 \%$.

To Nelson Dewey, William E. Smith, G. W. Burchard, Directors of the Wisconsin State Prison.

My fourth annual report is herewith respectfully submitted.
The present number of convicts is:
Males..................... .................................... ......... 280
Females................................................................... 10
Total......................................................................... . 290

The number on the first day of October, 18\%6, was:
Males........................................................... 253 ...
Females................ ........................................ 13 ....
Total....................................................... - 266
Increase................................................................. 24
The average number during the past year, was.......................... 290
A detailed statement of the prison population will be found in statistical report No.1. The usual good health of the convicts has continued during the past year; only four deaths have occurred, the particulars of which will be tound in the report of the prison physician, Dr. Butterfield.

No escapes, or serious attempts to escape, have been made.
With the exception of the fire in the engine room, on the night of February 1st, the particulars of which were reported to you on
the 10th day of February, the daily routine of prison matters has continued much the same as in former years.

The receipts and disbursements have been as follows, the detailed account of which will be found in table No. 2.*

## SUMMARY OF RECEIPTS AND DISBURSEMENTS

| Total amount of sales. | \$73,589 67 |

Statistical table No. 8 shows the different crimes for which prisoners have been sentenced from October 1, 1876, to September 30, $187 \%$, specifying the circuit and county in which they were sentenced, also the highest and the lowest, and the average sentence for each crime. It will be found quite an interesting study in making the comparison as to the difference in the sentences from the several courts for the same crime. This subject is entitled to much greater consideration than is generally given to it. The unequal terms for which convicts are sentenced for the same crime is one of the most prolific causes of discontent among the convicts in the prison. When a man is compelled to serve two years, while the man he works with serves only six months for the same offense, he feels that he is unjustly punished for 18 months. So with the man who is sentenced for twelve years for horse stealing, while another (both being first offenses) is sentenced for two years. The twelve year man feels that he is unjustly deprived of his liberty for ten years. No system of reasoning can satisfy him or myself of the justice of the laws so administered.

I am of the opinion that too wide a range is allowed the courts in their sentences for crime, and that the minimum should be increased and the maximum decreased in almost all cases, and in no case should a person be sent to the state prison for less than one year. If the offense does not merit one year, it would be better to give the party thirty days solitary confinement in jail, the diet to consist of bread and water - but with very little bread. In this way the odium of state prison would be avoided, county expenses lessened, and, in my judgment, the punishment would be more effectual in preventing a repetition of the crime. It is often the
case, too, that sentences, with the assent of the district attorney are given, entirely inadequate to the crime. Men are often arrested, when the proof is so positive that they know it would be useless to stand a trial, therefore they will go before the county court, plead guilty, and, in most cases, receive the lowest sentence allowed by law. I trust the board appointed to revise the statutes will report some remedy for these evils.

In my reports of $1874,18 \% 5$ and 1876 , I have called attention to chapter ${ }^{15} 5$ of the general laws of 1858 , which provides for the removal of the insane convicts from the state prison. Also to their deplorable condition while confined in their cells; also to the disastrous effects their presence has on the prison discipline; but as no attention is paid to the matter, I consider it useless to make any further reference or to express any opinion on the subject. I will only state the law and practice in relation to insane convicts in the state of Illnois, quoting from a letter received from R. W. McClaughry, the present efficient warden of the state prison, at Joliet:
"I enclose you a copy of the section of our statutes relating to insane convicts. Our practice is to send them to the insane hospital whenever the prison physician decides that they are insane, and they are admitted on his certificate."

The following is the section referred to:
" 42 . Insane convict. Sec. 42. If any case of insanity shall occur in said penitentiary, such iusane person shall at once be removed to the insane hospital at Jacksonville, or other similar hospital under the control of the state, at the expense of the state, and should said patient recover before his or her time of imprisonment shall expire, he or she shall be returned to said penitentiary, and it is hereby made the duty of the superintendent of the said hospital for the insane to receive into said hospital, and treat all such insane convicts as in other cases of insanity" (2d L., 1867, P. 36, sec. 46).

The net proceeds from our ten acre farm and hog pen have been $\$ 1,366 . \% 3$, as seen by the following statement:

The contract with M. D. Wells \& Co., of Chicago, leasing the prison labor, provides, as you are aware, for the transfer of all the able bodied convicts to them on the 1st day of January, 1878, and by agreement they are to have 100 men on the 1st day of November, for instruction; also, that they may come in during the month of October to fit up their shops and set up their machinery. In the
mean time every effort will be made to work up the material on hand as closely as possible, into goods for market. Therefore, the labor, care and anxiety of the officers will be increased instead of diminished, until the final transfer is made on the 1st day of January next. We shall at that time have a large amount of manufactured goods on hand. This will be in part the earnings of former years, from the proceeds of which, together with collections on accounts, it is believed the expenses of the prison can be maintained the coming year without appropriation. When our manufacturing ceases, we shall have more time to devote to selling goods, and I anticipate no trouble in disposing of the goods on hand during the coming summer. When this is accomplished the warden will have more time to devote to the proper management of the prison.

The following is a copy of the contract above referred to:
This agreement, made and concluded this 20th day of September, A. D. $187 \%$, by and between Horatio N. Smith, as warden of the Wisconsin state prison, for the state of Wisconsin, party of the first part, and M. D. Wells \& Co., of Chicago, in the state of Illinois, parties of the second part.

Witnesseth, that the said party of the first part, for the said state, and for himself as such warden, and his successors in office, in consideration of the rents, covenants and agreements hereinafter set forth, mentioned, reserved and contained, to be paid, kept and performed by and on behalf of the parties of the second part, their successors, heirs, executors, administrators and assigns, does hereby covenant, promise and agree, for the said state, and for himself as such warden, and his successors in office, as follows:
First. To furnish to the said parties of the second part, for the term of five years, beginning on the first day of January, A. D. 18\%8, and terminating on the thirty-first day of December, A. D. 1882, the labor and service of all the able-bodied convicts, which may or shall be confined in said Wisconsin state prison during said term, or any part thereof (excepting and reserving therefrom such and somany of said convicts as may, in the judgment of said warden, his successor or successors in office, or the officer acting as such, from time to time be required for carrying on the ordinary business of the said prison), not exceeding in all, at any one time, three hundred convicts, to be employed only in the manufacture of boots and shoes, and other work incidental thereto. For the purposes of this
agreement, the words "able-bodied convicts" shall be held and construed to include all convicts, except those who, by reason of physical disability or other infirmity, are incapacitated to perform an ordinary day's labor.

Second. To furnish so much of the shop room now built within the walls of the said prison as may be required for the successful employment of said convicts, and in addition thereto such room for storage as may be required and can be conveniently spared by the party of the first for that purpose, also such power as may be necessary for carrying on said manufacturing and such shafting, pulleys and machines now on hand as can be legitimately used in said business; to warm all work shops, to move all cars as may be necessary, and load and unload the same, and in addition furnish not to exceed one runner or choreman for every fifty convicts employed.

Third. To maintain the discipline of the said convicts in as good condition as it now exists, and to furnish a sufficient number of guards and keepers to maintain industry, good order and discipline among the convicts.

And the said parties of the second part, for themselves, their successors, their survivors or survivor and their and each of their heirs, executors and administrators, in consideration thereof, do hereby covenant, promise and agree to and with the said party of the first part and his successors in office as follows:

First. To pay in full on or before the tenth (10th) day of each and every month during the existence of this agreement at the rate of forty cents per day per convict for each and every day's labor performed by them during the month next preceding, nine and three-fourths hours of labor to be accounted as a full day, and the number of hours to be spent in labor to be regulated exclusively by the warden for the time being, or in his absence, by the deputywarden.

Second. To furnish, at their own expense, all foremen and intructors, material and machinery, exsept as herein otherwise provided, in such number and quantity and in such time as may be required to keep said convicts fully and constantly employed.

And it is hereby mutually agreed and understood by and between the parties hereto as follows:

First. That no deduction shall be made (by the said party of the first part) for the time lost by the said convicts by reason of the
failure or neglect of the parties of the second part to keep and perform any of the stipulations herein contained by them to be kept or performed, or while changing clothing, bathing, shaving or receiving visits from friends in accordance with the rules and regulations of said prison now in force, or which may hereafter be adopted.

Second. That nothing in this agreement shall be considered or construed as granting any right or authority to the said parties of the second part, to govern or discipline the said convicts or any of them, but the said convicts shall labor under this agreement subject to all the rules and regulations of said prison, which may be in force from time to time for their government, discipline and care, and there is hereby reserved to the directors of the said prison, and to the warden and each and every of his subordinate officers and employees, full power and authority to prevent the demanding or imposition of unusual or severe labor, or labor whereby the health or safety of the convicts may be impaired or jeopardized, and the said warden may from time to time prescribe all needful rules for the government of the said parties of the second part, their overseers and agents, in their relations to the convicts, and may require the summary dismissal of any individual employed by the said parties of the second part, whenever in his judgment the presence or conduct of such individual is prejudicial to the discipline of the prison or the welfare of the convicts.

Third. In case the number of able-bodied convicts in said prison, as herein defined, shall exceed three hundred, the parties of the second part may at their election have and receive the labor of such excess, at the same rate of pay, and upon the same terms and conditions as hereinbefore provided, for the three hundred or less under this contract; but in case they shall elect not to have and receive their labor, and in case any convict shall not be able-bodied according to the definition of those words as given herein, and the labor of such cannot be profitably used by the parties of the first part, in carrying on the ordinary business of said prison, then and in either case the said party of the first part may employ or lease the same as the best interests of said prison may require.

Fourth. Neither the said party of the first part, nor the state of Wisconsin shall in anywise be held responsible or liable for any loss or damage by fire or other casualty to the business of the said parties of the second part, or to their property used or stored upon
the grounds, or in the buildings of the said prison; but in case the buildings occupied by the said parties of the second part shall be destroyed, either in whole or in part by fire or otherwise, without fault or neglect of the parties of the second part, their agents or employees, then the party of the first part shall rebuild the same, or furnish others of like capacity at the earliest practicable day; provided, however, that during the time of rebuilding or repairing any such shop, the parties of the second part shall be required to pay for the labor of such convicts only as they can keep profitably employed.
Fifth. The parties of the second part hereby agree to keep all shops, buildings and machinery, occupied or used by them, under and by virtue•of this agreement, in as good order, repair, and condition as the same are now in, ordinary wear and tear, and damage by accidental fire, or other casualties, not happening through the fault or neglect of the parties of the second part, their agents and employees, only excepted.
Sixth. That if the parties of the second part shall fail to pay any installment of the contract price for the period of thirty days after it becomes due, the said party of the first part may, at any time thereafter, and before the same is paid, declaro this agreement forfeited, and thereupon the same shall become from that time forth inoperative; but the parties of the second part shall not thereby be released from liability to pay what may be due according to the terms thereof, nor shall the bond or bonds given by them be in any way affected.

Seventh. That the said parties of the second part shall have no power or authority to assign, farm out or underlet their interest in this contract, in whole or in part, without the consent of the party of the first part, in writing, approved by the directors of said prison.

Eighth. This agreement is made and entered into under, by virtue of and pursuant to the provisions of chapter 288 of the laws of Wisconsin for the year 1876, and the same are hereby made a part hereof.
Ninth. It is mutually agreed by the parties hereto that either party may terminate this contract at any time by giving to the other party notice in writing six months previous to the time when such termination shall take effect.

Tenth. It is also mutually agreed, that whenever for any reason or reasons other than those in this agreement mentioned, any of the said convicts are absent from work or idle in the factory, then in such cases the said party of the second part shall be required to pay for only that number of quarter day's labor to which the service actually rendered during any one day by said absent or idle convict or convicts nearest approaches.

In witness whereof the said parties of the first and second part have hereunto set their hands the day and year first above written.

Signed in presence of (Signed) Jacob Fuss. (Signed) A. G. Newell.

In consideration of the execution of the within and foregoing contract and agreement by Horatio N. Smith, warden of the Wisconsin State Prison, of the first part, and M. D. Wells \& Co., of the second part, we, the undersigned, as sureties for the said M. D. Wells \& Co., do jointly and severally hereby guaranty and covenant, and agree to and with the said state and warden, that the said M. D. Wells \& Co. shall and will, at maturity, pay all rents and sums of money agreed to be paid by them by the terms of the said contract, and that they will and shall in due season do, perform, fulfill and observe all conditions, covenants, agreements, and limitations, as set forth and agreed by them to be done, performed, fulfilled and observed by the terms of said contract and agreement.

In witness whereof, we have hereto set our hands and seals this 20th day of September, A. D. $18 \% \%$.

| (Signed) | HENRY J. MacFARLAND. | [Seal] |

We, the undersigned directors of the state priscn of the state of Wisconsin at Waupun, in the said state, do hereby advise, consent to and approve of the within and foregoing contract by and between Horatio N. Smith, warden of said prison of the first part, and M. D. Wells \& Co. of the second part.

Done by us this 20th day of September, $18 \% \%$.

The amount due the state from the Corn Exchange Bank remains the same as at the date of my last report, with the exception that two court decisions have been made in relation to it. The first by Judge Dyer, of the United States district court, that the money deposited in said bank was the property of the state, and therefore entitled to priority under the bankrupt law. The second by Judge Drummond, of the United States circuit court, which reversed the decision of Judge Dyer, and decided said deposit was not money of the state, but an individual claim of the warden, and not entitled to priority. The decision of Judge Drummond appears to me to involve the necessity of some legislation to more clearly define and protect both the rights of the state and the warden. I quote from the decision as follows:

## In the Circuit Court of the United States, for the Eastern Dis. trict of Wisconsin:

## In the Matter of the Corn Exchange Bank, Bankrupt.

Appeal from the decision of District Court, allowing claim in favor of the State of Wisconsin, and declaring it entit)ed to priority.

Opinion of the Honorable Thomas Doummond, Circuit Judge.
The Corn Exchange Bank became bankrupt, and a controversy arose out of a certain amount of money that had been deposited with it by the warden of the penitentiary at Waupun, where the bank was situated. The warden received from the treasurer of the state, upon the order of the directors of the penitentiary, $\$ 10,000$, and deposited it in his name as warden. It was, therefore, to the credit of H. N. Smith, warden. He had an individual account at the bank at the same time, which was kept entirely distinct from his account as warden. It seems they had no safe place of deposit for the money used in defraying the expenses of the penitentiary, and which might be received as the proceeds of the articles manufactured by the prisoners and sold, and, therefore, with the consent of the directors, the warden kept this account with the bank.

Almost immediately after this sum was received from the state it was deposited, the cashier of the bank absconded, the bank failed, was put into bankruptcy. The state now comes in and claims, that this money, deposited under these circumstances, was the money of the state, and that the state, under the bankrupt law, has a priority,
and that it should be first paid in preference to some other creditors, according to the mode of distribution pointed out in the bankrupt law.
"The question is, whether the money was the money of the state so as to entitle it to a preference over certain other creditors of the bankrupt.
"The district court found that it was. The question before this court is whether that decision of the district court was correct.
"That depends very much as well upon general principles as upon the particular legislation concerning the warden of the penitentiary, and the duties he was called upon to perform. He was appointed by the directors; he was the superintendent of the penitentiary, and the treasurer. He could sue and be sued on the contracts connected with the management of the penitentiary and the supply of materials and provisions. Judgment could be rendered against him, and execution levied upon his property. He received the proceeds of the labor of the convicts, and all money appropriated by the state for necessary disbursements. It should be added, he gave a bond, as required under the law, in the sum of $\$ 20,000$, for the faithful performance of his duty, and for the proper accounting for all moneys that should come into his hands. Now, when he received the money, which, in one sense, might be said to belong to the state, that is, when he received it for the particular purposes of his office, either as the proceeds of the labor of the convicts or as money directly appropriated by the state, was he the mere agent of the state, performing the duty of an agent without any property in the money? If he were, and had nothing to do but the performance of a duty as agent, then, if he lost the money exercising proper care, or if it were taken from him by force or otherwise, he would not be accountable. An agent, it is well known, who is simply acting for his principal in keeping money, is not accountable to him for it in case of loss, provided he uses reasonable care and diligence in keeping the same."

Up to this point Judge Drummond's reasoning is the same as Judge Dyer's, but immediately following, he decides that the warden was not acting in the capacity of an agent, and in effect, that all moneys received from appropriation or sale of state property is the warden's; also that the warden is personally liable for all contracts made by him for supplies for the prison, all of which seems to be
very inconsistent, and is, as I believe, entirely contrary to the intention of the prison law of this state. A Massachusetts case is cited by Judge Drummond, where it was decided, that the deposit of the warden in a bank that failed could not be offset against the indebtedness of the state to this bank, but in this case there was no evidence that the funds deposited by the warden ever belonged to the state. Another case is cited, where a paymaster of the United States deposited funds with certain parties, and fraudulently consented to said funds being appropriated for their own purposes. The court held that the United States was entitled to priority under the bankrupt law. From this it would appear that if the warden had fraudulently agreed that the cashier of the Corn Exchange Bank might run away with the funds of the state, that the state would be entitled to priority under the bankrupt law, and his bond relieved from all liability on that account. But if the warden was honest, and performed his legitimate duties, and deposited the funds in good faith, for the purpose of checking out the amount in payment of prison indebtedness, and the cashier steals the money, the state has no claim on the assets of the bank. Is not this offering a reward for dishonesty and a penalty for honesty? The decision of Judge Drummond concludes by saying, in substance, that if he thought the state was not secured by the bond of the warden, that he should be inclined to favor the application for priority.

Some legislation will be necessary, under this decision, to define and protect the rights of the warden and the state.

A copy of the decision from which the above extract is made, will be found in full in paper marked No. 10.

In my last annual report, I estimated that $\$ 3,000$ would be required for general repairs, which included new floors in shops, new windows in cell'room, sewers from the kitchen to main sewer, repairing machinery, etc. On the 10th day of February last, I submitted an estimate of $\$ 5,000$ to repair the loss in consequence of the fire. The legislature included these two in one appropriation of $\$ 8,000$ for general repairs.

## The expenditures have been as follows:

In consequence of the fire, including two new boilers ..... \$5,964 47
For general repairs ..... 2,47686In addition to the above, as the means of protection against fire,500 feet of $21 / 2$ inch 4 -ply rubber hose, and 140 feet of 3 -inch ironpipe, with the necessary attachments, have been procured at acost of.40014
Whole expenditure for these purposes ..... $\$ 8,84147$
An itemized account of the above will be found in statementNo. 10.I estimate the current expenses for the ensuing year on the basisof an average number of 300 convicts as follows:
For means of instruction in prison school ..... $\$ 3000$
Addition to the librray ..... 20000
Newspapers ..... 6000
Printing ..... 3000
Stationery ..... 300
Drugs and medicines ..... 30000
Forage ..... 37500
Fuel ..... 4,250 00
Lights. ..... 60000
Laundry ..... 4000
House and cell room furnishing ..... 65000
Traveling expenses. ..... 35000
Telegraph ..... 3500
Express ..... 7500
Tobacco ..... 37500
Salaries and wages ..... 17,000 00
Clothing ..... 2,000 00
Shoeshop ..... 80000
Subsistence ..... 19,500 00
Convicts discharged ..... 80000
Freight ..... 25000
Postage ..... 30000
Directors' expenses ..... 1,000 00
General repairs. ..... 1,000 00
Total ..... $\$ 50,05000$
To meet the above we have a balance due on state appropriation, ..... $\$ 6,00000$ Estimated earnings of labor leased to M. D. Wells \& Co. from January 1, 1878 to October 1, 1878 ..... 18,000 00

I estimate, that with the above amounts, the collections on outstanding indebtedness and from sales of goods and material during the year, will be sufficient to pay all deficiences, and the existing indebtedness of $\$ 6,412.75$. The excess of outstanding indebtedness over liabilities and the manufactured goods on hand, represent
in part the earnings of the past three years. With reasonable success in making sales and collections, no appropriation will be required for the year ending October 1, 18\%8, and it is probable that none will be required for the year ending October 1, $18^{\prime} 79$.

The sanitary condition of the prison will be seen from the report of Dr. Butterfield, and the moral and religious condition from the reports of Rev. E. Tasker, the Protestant, and Father Joseph Smith, the Roman Catholic, chaplains, all of whom have faithfully performed the duties of their positions.

## IN THE CIRCUIT COURT OF THE UNITED STATES, FOR THE EASTERN DIŞTRICT OF WISCONSIN.

In the Matter of the Corn Exchange Bank - Bankrupt.
Appeal from decision of District Court allowing claim in favor of the state of Wisconsin, and declaring it entitled to priority.

Opinion of Honorable Thomas Drummond, Circuit Judge.
The Corn Exchange Bank became bankrupt, and a controversy arose out of a certain amount of money that had been deposited with it by the warden of the penitentiary at Waupun, where the bank was situated. The warden received from the treasurer of the state, upon the order of the directors of the penitentiary $\$ 10,000$, and deposited it in his name as warden. It was, therefore, to the credit of H. N. Smith, Wardęn. He had an individual account at the bank at the same time, which was kept entirely distinct from his account as warden. It seems they had no safe place of deposit for the money used in defraying the expenses of the penitentiary, and which might be received as the proceeds of the articles manufactured by the prisoners and sold, and, therefore, with the consent of the directors, the warden kept this account with the bank.

Almost immediately after this sum received from the state was deposited, the cashier of the bank absconded, the bank failed, was put into bankruptcy. The state now comes in and claims that this money, deposited under these circumstances, was the money of the state, and that the state, under the bankrupt law, had a priority, and that it should be first paid in preference to some other creditors, according to the mode of distribution pointed out in the bankrupt law.

The question is, whether the money was the roney of the state, so as to entitle it to a preference over certain other creditors of the bankrupt.

The district court found that it was; the question before this
court is, whether that decision of the district court was correct. That depends very much, as well upon general principles as upon the particular legislation concerning the warden of the penitentiary, and the duties he was called upon to perform. He was appointed by the directors; he was the superintendent of the penitentiary and the treasurer. He could sue and be sued on contracts connected with the management of the penitentiary and the supply of materials and provisions. Judgment could be rendered against him, and execution levied upon his property. He received the proceeds of the labor of the convicts, and all money appropriated by the state for necessary disbursements. It should be added, he gave a bond, as required under the law, in the sum of $\$ 20,000$, for the faithful performance of his duty, and for the proper accounting for all moneys that should come into his hands.

Now when he received the money - which in one sense might be said belonged to the state, that is, when he received it for the particular purposes of his office, either as the proceeds of the labor of the convicts, or as money appropriated by the state, was he the mere agent of the state, performing the duty of an agent without any property in the money? If he were, and had nothing to do but the performance of a duty as agent, then, if he lost the money exercising proper care, or if it were taken from him by force or otherwise, he would not be accountable. An agent, it is well known, who is simply acting for his principal in keeping money, is not accountable to him for it in case of loss, provided he uses reasonable care and diligence in keeping the same. Now if, when the warden received at Madison, the money, or drafts convertible into money, he had lost it in transit from Madison to Waupun, would it have been the loss of the state, if he had exercised reasonable care? I think as a public officer, having given bonds to the state, the state would have a right to say to him that he was not the mere agent for the keeping of this money as the money of the state, but that he had certain duties to perform in relation to it; that he had the disbursement of the money; that he could make contracts that contemplated the expenditure of the money; that he had certain personal duties and responsibilities in connection with this matter; that the state had trusted him with the money, but it was his money for the purposes for which it was placed in his hands.

It is said that the money was deposited in the bank with the con-
sent and acquiescence, and in one sense it might be under the instruction of the directors of the penitentiary, still that did not discharge the warden from the duty he owed the state. The law does not clothe the directors, as I understand, with the power to say to him, where he siall keep his money, or what he should do with it. It may be contracts were to be made with the consent of the directors, but he, as the treasurer of the penitentiary was himself empowered and required by the statutes to do certain things in relation to the expenditure of the money. He is intrusted with the safe keeping of the money, and there would seem to be no doubt, if there shall turn out to be a deficiency here, after proper distribution, that the warden himself will be personally accountable for it to the state on his bond, and that he cannot rely upon the instructions of the directors in order to relieve himself from that responsibility.

At the time this case was decided by the district court, its attention was not called to a case in Massachusetts, reported in the 11th of Metcalf, 129, and which is in all essential particulars precisely like this case. In fact, the material provisions of the law upon which the supreme court of Massachusetts decided that case have been recited in the statute of Wisconsin, and therefore that case is applicable to this case, and that case, curiously enough, was one arising out of the insolvency of a bank. The Phœnix Bank had loaned money to the state. It became insolvent, and its affairs were wound up under the laws of Massachusetts. For this claim against the state, the question arose whether the state had the right to set off certain deposit accounts, which had been made in the bank by agents of the state, one of whom was a person who had the management of a bridge across the Charles river, and who was called upon to make disbursements for the repairs of the bridge, and with whom was placed the tolls of the bridge; and also the bank had on deposit, at the time it suspended, certain moneys deposited by the warden of the penitentiary. True, it does not appear precisely from what source these moneys came into the hands of the warden. C. Lincoln, Jr., warden of the state prison, had deposited the sum of $\$ 11,930$, which sum, on the books of the bank, stood credited to Charles Lincoln, Jr., warden of Massachusetts state prison, at Charlestown.

Now, it will be observed that the court was required to deter-
mine whether the setoff should be allowed in each of these cases, one, that of the agent of the Charles river bridge, and the other, that of the warden of the penitentiary, and therefore it became the duty of the court to determine whether these cases were alike or different, as the attention of the court was called to the particular circumstances connected with each deposit.

In the one case, that of the agent of the Charles River Bridge, the court decided that although the state might not have had a legal right to bring a suit, still that it had such an equitable interest in the fund deposited in the name of the agent of the Charles river bridge, that it could claim a setoff for that money against the claim of the bank for the money which had been loaned to the state. In the case of the warden of the penitentiary, the court decided that the state had no such equitable interest in that fund that it could set it off against the claim of the bank. The opinion of the supreme court of Massachusetts was given by Chief Justice Shaw, as high authority as there is in this country, and is very short. He says:
"Can the deposit made by the warden of the state prison be set off? His authority and duty are regulated by the Revised Statutes, 144, sections 16 and 19. This demand stands upon a very different ground from that of the bridge agent, a difference depending upon the very different provisions of law under which these agents are constituted. By the revised statutes, the state prison and its officers are constituted a separate and distinct establishment, having powers and functions, and being charged with duties and responsibilities of a peculiar nature.
"It is provided that the warden shall have the charge and custody of all the real and personal estate, stock, tools and property pertaining to the prison."

There is precisely the same power conferred by the statute of Wisconsin; in fact it is obviously taken from the statute of Massachusetts.
"That he shall receive and pay out all moneys granted by the legislature for the support thereof, and shall keep and render regular accounts."

So it is by the law of Wisconsin.* That the warden and his suc-

[^23]cessor may sue and be sued thereon to final judgment and execution. "That I o such suit shall abate by reason of the office of warden becoming vacant, but that every successor of the warden pending such suit, may take upon himself the prosecution and defense thereof, and that upon motion of the adverse party, and notice, he shall be required to do so."

Precisely like the law of Wisconsin.
After having cited these provisions of the laws of Massachusetts, the court says:
"The court are of the opinion, that in no sense can the money thus received and held by the warden of the state prison in his official capacity be regarded as the money of the zommonwealth, or money in which the commonwealth has any equitable interest. The warden is liable to judgment and execution. Both the obligations of the warden and the property to meet them devolve upon his successor. The statute contemplates that the commonwealth may have occasion to appropriate money, from time to time, should the revenues of the prison be insufficient for its support. But to the extent of those revenues they are placed entirely under the warden, he being subject only to apply them to the purposes of the institution, and to render an account of the manner of their disbursement. And we think it was the intention of the legislature to put the warden in such a situation of responsibility for all contracts made on account of the prison, that persons dealing with him, and making contracts, should not be barred of their legal remedies by being obliged to treat such contracts as made by the commonwealth, who are not liable in their, sovereign capacity to be sued."

So that, unless, as it seems to me, this court should overrule the decision of the supreme court of Massachusetts on a statute, many parts of which have been incorporated in the law of Wisconsin, it must rule this case. And the question which has occurred to the court is, whether that decision is sound under the law? Of course, if the court were satisfied that it were not a correct decision, it is not binding as authority upon this court, but, after the best reflection I have been able to give the subject, I am inclined to think it is a sound rule there laid down. I have already stated that, in my opinion, the warden cannot relieve himself from responsibility in relation to the funds which, in one sense, it may be, belonged to the
state, by showing that he exercised due care over them; that he has been guilty of no fault or negligence. I think, as a matter of public policy, he is bound to account absolutely to the state for the funds that have been placed in his hands. And it seems to me, this consideration acquires additional strength from the fact that the law makes him personally responsible on his contract, and makes him liable to judgment and execution.
If he had made a contract for the supply of provisions for the penitentiary, and the state had paid over to him the money necessary to meet tbat contract, and he had deposited it in a bank to his credit, as warden of the penitentiary, and he had been sued upon that contract, judgment obtained, and execution issued against him, and in the hands of the sheriff, liable to be levied upon his property, could the state come to him to say, "This is not your money, you have no right to use it for the payment of this debt?" Would not, on the contrary, the warden have the right to say, "This money has been entrusted to me for this among other purposes, and you cannot recall it. Responsible as I am under this contract, it is my legal right to hold it, and to meet my liability, to relieve my own property from seizure under this execution." I can have no doubt that he would have the right so to do.

A case has been cited which was decided by the supreme court of the United States, Bayne County against the United States, at the present term of the sapreme court. Of course, if that case, fairly considered, ruled this, this court would have to follow it; but I think it does not.

That was a case where a paymaster of the army had received $\$ 200,000$ of the public money for disbursement in the usual way, it is to be presumed, by him as paymaster. He had deposited the m oney in a bank in Washington. He thereupon entered in a fraudulent conspiracy with Bayne \& Co. by which he allowed Bayne \& Co., as the result of this conspiracy, to take control of this money for their own purposes, they knowing that it was money he had as paymaster, and which of course belonged to the United States.

The company became bankrupt, and the question was, whether, under the circumstances, the government had a right to priority over a portion of this money which this company had received, as against the other creditors; and it was decided by the supreme court that the government had this right of priority. But why did 5 -St. Pris.
[Doc. 10]
the supreme court so decide? It was because it was received by Bayne \& Co. in pursuance of a fraudulent conspiracy, they knowing it was the money of the government, and held by the paymaster as the money of the government.

The court says: "The law imposes on the firm an obligation, and implies a promise on its part to refund the money, and a suit could be brought for the recovery of the money."

Noy, if the paymaster, as to the money in his hands, occupied the same relations as to it to the government of the United States that the warden of the penitentiary did to this state, or if the Corn Exchange Bank of Waupun had the same relations to the state that this insolvent firm of Bayne \& Co. had to the United States, then this decision would apply. But it is obvious from what has already been said, that the distinction between the two cases, between the obligations of the insolvent firm and those of the Corn Exchange Bank of Waupun, the one to the United States, the other to the state, and the duties of the paymaster in relation to the money, and those of the warden in relation to the money he had, are entirely distinct, and so different as really to prevent that case from being a binding authority upon this court, under the facts in the case before us.

So that I shall have to reverse the decision of the district court, and hold that the state is not entitled to a preference over the other creditors for the money which is claimed. The sum is nearly $\$ 10,000$. It seems there is a slight discrepancy in the evidence as to what the sum was. I beliere there is a statement that there was a check charged to the individval accourt of Mr. Smith which should have been charged to the other account. I do not know whether there is any controversy about that; if there is, that can probably be arranged between the counsel.

I have no doubt, I may say in conclusion, of the liability of the warden on his bond to the state for this amount.

If I thought the state had not this remedy, possibly I should feel inclined to look with a little more favor upon the application which has been made for a priority, but presuming that the state has ample remedy against the warden and his sureties, and believing that the decision of the supreme court of Massachusetts is a case precisely in point, and under a law, which so far as it affects the decision of that court, is the same as the law of Wisconsin, I must hold that the state is not entitled to priority over the other creditors.

## PHYSICIAN'S REPORT.

The following is the medical department report of the State Prison, for the year ending October 31, 18\%\%:

Although the number of prisoners has considerably increased during the past year, their general health has been remarkably good, considering that many are brought here in a filthy and loathsome condition, caused by all manner of excesses calculated to impair their systems, and instead of being able to earn something to help defray their expenses, they are a burden to the prison while in confinement, and a tax to the charities of the people after their discharge.

There have been four deaths since our last report:
Joseph Hildreth, aged 35 , committed suicide by severing the femoral artery with a case knife, which he sharpened on the walls of his cell. It was his second commitment. His health was quite feeble, and he had occasionally shown slight symptoms of insanity.

Herman Frank died March 28th, of consumption. He had been in poor health since his admission.

John Widdèrman, aged 81, died suddenly, January 5th, of disease of the heart.
J. Stevens died May otth, of paralysis.

I think there has been less sickness that has confined men in the hospital than in any previous year. We have had quite a number of accidents by machinery, but none to incapacitate from labor any considerable length of time.

Situated as the prison is, on a high and rolling prairie, in a healthy locality, free from any miasmatic surroundings, with pure air and excellent water, and the recently improved drainage and ventilation, I see no reason why the prisoners should not remain comparitively healthy, unless visited by some prevailing epidemic.

I have from year to year called attention to the condition of the
insane, and urged some special provision for their relief; as yet they remain about the same, with very little, if any improvement; may we not hope ere long some means may be adopted that will be both worthy and humane.

I can but express thanks to the warden and officers connected with the institution for services rendered in the discharge of professional duties.

H. L. BUTTERFILD,<br>Prison Physician.

## CHAPLAIN'S REPORT.

In presenting my annual report, I desire to express gratitude for divine favor and goodness.

In this work, each year seems to bring with it an increasing weight of responsibility. Or it may be that my acquaintance with the peculiarities and necessities of those under my charge give me increased anxiety. For certain it is that I never occupied a position which gave me so much concern by day, or so interrupted my rest by night.

During the past year, I have been variously exercised, and had it not been for the knowledge that some seeds had fallen into good ground, and some little good accomplished, I should have become discouraged. But these assurances of good have sustained and encouraged me, and, all things considered, there is much for which to be thankful.

Perhaps there is no better field for Christian labor, where there are better opportunities for doing good. And while the word incorrigible might, with propriety, be stamped upon the brow of some within these walls, I am encouraged by the fact that the great majority receive the truth. It exerts a salutary influence upon them, and some will be restored to society wiser and better men. I am satisfied that some such have been discharged during the year. While being punished, they have become reformed, and I doubt not but they will become honored and useful members of society.

The advantages of

## THE PRISON SCHOOL

seem to be fully realized by most of those who attend, and they manifest an intense desire to learn. 'Tis true, that in some instances, there is a ficklemess and lack of determination to improve their opportunities, which is discouraging. But when the surroundings and early habits of these men are considered, it is not much wonder they should lack both the disposition and ability for mental improvement.

Yet, while some are indifferent in this respect, others are really in ernest and do succeed. During the year some have gone out who came to the prison unable to read or write, yet have shown themselves to be apt scholars, and have acquired such a knowledge of the common branches of education as will enable them to transact their own busiress, and, hence, have gone out with manly feelings, and a determination, henceforth, to lead lives of honesty and usefulness.

BOOKS NEEDED.
When I accepted the chaplaincy of this prison, I found a small library for the use of the convicts, but it was greatly in need of replenishing, no provision of law having been made for that purpose. In my first report I called attention to this fact, also, in each report since. During the last session of the legislature, a bill was introduced, making an appropriation for this purpose, but for some unaccountable reason it did not pass. The necessity for books, and the great good which must accrue from their reading, prompts me again to call attention to this subject, in the hope that success will this year crown the effort.

## YOUNG CONVICTS.

In my last report I expressed regret that so many youths should be sent to this prison. I did so on account of the contaminating influences, resulting from associating with older and more hardened criminals. "Crime is contagious," and the promiscuous mingling of young and old together, tends to increase rather than prevent crime. Many boys have been sent here during the past, and still they come.
I am aware society must be protected from the depredations of young criminals. While this is true, we should also have an eye to their reformation. Mingling with "professionals" will not effect this. "A man may be reformed by sending him to an institution of this kind, but a boy, never." If a jail sentence is not practicable, some arrangement should be made whereby they could not only be restrained, but reformed, instead of being schooled in crime by contact with the more vicious and hardened.

The importance of this subject constrains me to again call atten-
tion to it. In a former report I endeavored to present the matter in such a light as should awaken an interest, and lead to active measures in behalf of this unfortunate class of persons.

The warden, in his report for 1874 , called attention to this subject, and some extracts were given from a convict's manuscript; which are worthy the careful attention and regard of all. And such is its importance, that I again call special attention to it.

I have before said that it would be a matter of economy for the state to make some special provision for this class of persons. None but those who have given attention to the subject, can realize its importance, as a protection to society, and an incentive to reform.

The time when a convict is discharged from prison is the real crisis in his history, which shall determine whether he shall become a man, or a demon; a blessing, or a curse.

The poor fellows who have been so unfortunate as to serve a term in prison have a hard time of it, at the best, on their release, even when they have homes and friends to help them.

But none save those who experience it can know the peculiar trials and afflictions those have to suffer who have neither home, nor friends, nor money. The time of many expires in midwinter, for which no special provision is made by the state, to protect from inclement weather, by extra clothing suited to the season. A season, also, when it is difficult to procure work, and sometimes on account of sickness being unable to perform it, even if it could be procured.

Under the circumstances, the marvel really is, that so few comparatively commit crime, in order to procure the necessaries of life. Were it not that a relation of incidents would swell this report to an undue length, I should be glad to present some facts which have come under my own observation, showing the importance and necessity that something should be done, and that speedily, to aid discharged convicts. I sincerely hope that ere many months shall pass, some plan may be matured and some society organized, having in view this humane and worthy object.

## ACKNOWLEDGEMENTS.

In conclusion, I desire again to express my thanks to all the officers, whose uniform courtesy has won my respect and esteem, and especially to the warden, Hon. H. N. Smith, for his sympathy and
support in all efforts to promote the comfort, the intellectual and moral welfare of these brethren in bonds.

> Respectfully submitted,

E. TASKER, Chaplain.

Waupun, Wis., September 30, $18 \% \%$.

## ROMAN CATHOLIC CHAPLAIN'S REPORT.

It has been the established policy of our excellent warden, Hon. H. N. Smith, and his efficient deputy, to afford me every facility in the discharge of my ministerial duties as Catholic chaplain. The fundamental principle of our universally admired constitution, liberty of conscience for all, has been fully realized in this institution. Confessions are heard, and high mass has been celebrated regularly on the last Suinday of every month, from half past seven to halt past ten in the forenoon. All the prisoners are present, and attend, with very praisworthy decorum, to the moral instructions. Many are monthly communicants, and all have full liberty to consult their chaplain. From observation and consultation with the prisoners, I find that the prison discipline has been administered strictly, yet with great kindness and commiseration, which I think tends very much to the good order prevailing through every department of the prison. We have " the right man in the right place." There is a good selection of books for the prisoners. Catholics have books of purity and useful instruction for their special benefit. This arrangement, I trust, will have a good moral effect on the future of these poor people. It is liberal and honorable in the state, and profitable to religion. I am sure the prisoners are very grateful to those who have endeavored to lighten the heavy but just yoke of their captivity. God grant that when restored to liberty they may prove, by their future conduct, to have become better Christians and law abiding citizens. To the warden, deputy and subordinate officers, I am under many obligations, and for which I am thankful.

JOSEPH SMITH,<br>Catholic Chaplain.

## WISCONSIN INDUSTRIAL SCH00L F0R B OYS

Is situated about three-fourths of a mile west of the railroad-depot, in the village of Waukesha, the county seat of Waukesha county, Wisconsin. It was organized as a House of Refuge, and opened in 1860. The name was afterwards changed to State Reform School, and again to Wisconsin Industrial School for Boys, its present title. The buildings are located on the southern bank of Fox River, in view of the trains as they pass to and from Milwaukee and Madison, presenting an attractive front to the traveling public, and furnishing the best evidence of the parental care of the State authorities for the juvenile delinquents within our borders. The buildings includ a main central building three stories high, used for the residence of the superintendent's family, chapel, school-rooms, office, dining and lodging rooms for officers, teachers, and employees, furnace room, cellar, and kitchen. On the east of the main central building, are three family buildings, three stories high, each with dining hall, play-room, bath-room, dressing-room, hospital room, officers' room, dormitory, and store-room. On the west of the main central building are three family buildings like those on the east in all respects. The family buildings were intended to accommodate 30 to 36 boys each. The main central and family buildings here spoken of are built of stone, with slate roofs, and are intended to be substantially fire-proof. They are provided with hard and soft water force-pumps, hose and extinguishers. In addition to these buildings, and in the rear of them, are two stoneshop buildings three stories high, with slate roofs, which embrace laundry, steam drying room, tank-room, store, cellar, correction house, shoe-shops, tailor-shop, carpenter-shop, paint-shop, broomshop, and store-rooms. Of wooden buildings there is a convenient barn, with sheds for cattle and cellar for roots. A first-class piggery, with stone basement and storage above for corn, etc., a poul-
try-house, ice-house, slaughter-house, and tool-house. There is also a wooden building with stone basement, formerly used for shops, now used for bakery, boys' kitchen, and bath-room in the basement, and for a family of boys in the two upper stories. There is another wooden building formerly used for girls, since removed, stone basement added, and intended to accommodate 30 to 36 boys. This building is two stories high above basement. We have erected during the year $18 \% \%$ a correction house, intended for a family of 40 of the most refractory boys. It is three stories high, $44 \times 80$ feet, built of stone with slate roof. It contains all that the other family buildings are provided with, and in addition a school-room, work-shop, with lodging-room for such help as are unprovided for elsewhere, band-room, etc., etc. There is on the farm a comfortable house and barn for the use of the farmer and his family, and a stone carriage and horse barn $40 \times 7 \%$ feet, two stories high, built in the most substantial manner, of the best material, furnishing convenient storage for the vehicles used on the farm, and comfortable quarters for the stock with ample room for their necessary food. The farm consists of about 233 acres of land, the most of it under good cultivation.

## MANAGERS' REPORT.

To his Excellency Harrison Ludington,Governor of the State of Wisconsin:
The board of managers of the Wisconsin Industrial School forBoys have the honor to present herewith the eighteenth annual re-port of the performance of their duty in the management of the in-stitution under their charge for the year ending September 30,18\%\%:
The number in school at the beginning of the year was..... ..... 318
The number received during the year was ..... 134
The number returns from out on ticket was ..... 13
The number recommitted was ..... 6
Whole number in school during the year was ..... 471
Whole number in school since July, 1860, was ..... 1,425
Returned home on ticket of leave was ..... 78 ..... 78
Sent out to place was ..... 13
Returned to magistrates - illegally committed - was ..... 4
Out on furlough was ..... 3
Lost by death was. ..... 5
Lost by escape was ..... 3
Granted full discharge ..... 1
On record September 30, 1877 ..... 364 ..... 364
Total as above ..... 471

The expenditures for the year according to the bills examined, audited and allowed amount to the sum of $\$ 46,321.31$, which may be classified as follows:
1 Amusements ..... $\$ 13139$
2 Means of instruction ..... 70736
3 Clothing and tailorshops ..... 4,141 07
4 Drugs and medicine and medical service ..... 53325
5 Farm and barn expenses ..... 2,923 09
6 Fuel. ..... 3, 04833
7 Lights. ..... 56749
8 House furnishing ..... 1,473 17
9 Laundry and cleanliness. ..... 40801
10 Freight ..... 54523
11 Broom shop ..... 1042
12 Carpenter shop ..... 5863
13 Stone shop ..... 25337
14 Knitting shop ..... 2,184 64
15 Ordinary repairs. ..... 67289
16 Permanent improvements. ..... 89934
17 Miscellaneous ..... 58850
18 Subsistence ..... 10, 81088
19 Salaries ..... 14, 16709
20 Wages. ..... 1,262 55
21 Telegraph ..... 8630
22 Postage ..... 22731
23 Express ..... 6950
24 Managers' expenses ..... 55150

We have a greater number of inmates than we ever had before. The increase during the past year has been greater than in any other year of our history. This has rendered the employment of additional help necessary, and increased the cost of subsistence• Notwithstanding the addition to our number of between forty and fifty above the preceding year, the current expenses of the institution have been reduced about $\$ 1,800$. This will be regarded as substantial evidence of economical management. We believe the school was never in better condition than at present. It has met and promises to continue to meet the expectation of its intelligent and judicious friends. It is now about twenty years since the law establishing this institutson was enacted. Those who were sent here in the outset, and still survive, have long since entercd into active life with such preparation as they were able to secure here, and together with those who have left the school later, numbering in all more than a thousand, are living testimonials of the generosity and wisdom of the state. A large proportion have done well, and are repaying to the state in the capacity of industrious and orderly citizens, the cost of their education and reformation here. Every county has its jail where criminals are imprisoned before trial and after conviction for crime.

The state has its priscn where crime is punished. The object in jail and prison is to render the punishment so severe as to deter the criminal from a repetition of his crime and consequent return to the place of punishment. The objects sought to be attained here are somewhat different. We design to suppress vice and to prevent the commission of crime. Prevention is better than punishment. This is not a penal institution in any just sense. It is as
its name indicates, and the legislature and managers intended it to be, an industrial school. Many of our boys are the children of ignorant and vicious parents who regard the law, its makers and administrators with feelings of hostility, and they cultivate similar feelings in their offspring. It is the work of this school to correct this miseducation of the neglected and destitute boys sent here for reformation. In order to accomplish this successfully, the school must not be, and must not be regarded, as a prison; and while it may not be policy to render it so much more attractive than the homes our boys have left as to encourage parents to induce their sons to commit crimes in order to gain admission here, yet it is necessary as well as humane to indulge a decent regard for the comfort of the boys brought under our control.

The subject of the proper treatment of these boys is surrounded with difficulty. They are not confirmed or hardened criminals who should be made to suffer the hardships, discomforts or humiliations of prison life, and afterwards turned loose again upon socisty with their old prejudices against law and order hardened into convictions. But they should rather find the Industrial School a place of cheerful industry, where they can acquire such an education as will qualify them for the transaction of ordinary business, and such habits and principles as will fit them for useful members of society. Parents who have been criminals themselves can not easily understand the difference between the jail or prison where they have suffered the penalties of violated law, and an industrial school where their sons are to be saved, if possible, from a like experience. This difficulty in discriminating is not confined to the class alluded to, but is felt by a large proportion of the general public. It is to enlighten those who pay the taxes and who have a right to know that we call attention to these matters so familiar to those who have given them careful thought and patient study, and so misunderstood by those who are indifferent or unfriendly. It is charged by some of the parents of our boys that they are overworked and underfed, while others who have a very limited knowledge of the school, derived from a casual visit or hearsay, express the fear that we pet and pamper the boys, and do not secure the income from their labor which we should. We endeavor to pursue such a course as to avoid both extremes, and invite intelligent and careful inspection of processes and results as the most satisfactory answer to these sometimes unfriendly criticisms.

The people of the state generally appear to have acquired some knowledge of the working of the school, and it is by such means and in like proportion that the institution is advancing in the grod opinion of the public. But it is remarkable that public officers who have been engaged for years in sending boys here should manifest so moderate a comprehension of the aims and operations of the school. It is also noticeable that the publishers of leading newspapers who claim to be, and are, educators of the people, are so illy informed as to all that relates to this school. The law enacts that every boy shall be committed during his minority, and that the managers shall have the power to keep or discharge at their discretion at any time. Now, the history of the school shows, notwithstanding the long term of commitment, that one in a hundred remains until the expiration of his minority, and a large proportion do nct remain one-fourth of the time for which they are committed. Will those who venture into print to instruct the public note these facts?

We do not invite parents or guardians to send their boys here We do not believe that our school is better than a well regulated home for any boy who can be controlled and saved from the perpetration of crime at home. But for boys who cannot be so controlled and saved, we believe the school is better than home, and our belief is shared by many parents whose boys have gone out from here to brighten and cheer the homes they have before darkened by their waywardness. The instrumentalities provided by the state here, nor such as are needed, are not provided elsewhere. The results reached here are such as cannot be reached in the private family or the ordinary public school, and time only serves to increase our attachment to and confidence in the industrial school. We have some boys here who could be better provided for in some other place, if that place could be found. The state has no home for the friendless. We are sometimes imposed upon by parents or guardians, supervisors or magistrates. We try to avoid this as much as possible. We have not room for the boys who are properly here, and do not propose to keep such as ought not to be here.

The operations on the farm have been unusually remunerative and satisfactory, as will be seen by reference to the tables accompanying the superintendent's report. The crops were abundant and secured in good condition. The labor of the boys on the farm,
in aid of the buildings erected during the year, in the knitting shop, in the boot and shoe factory, indeed, in all branches of industry where they had been called to work, entitles them to especial commendation. The experience of the year just closed has proved conclusively the wisdom of the introduction of the manufacture or boots and shoes. Not only has it furnished employment for a large number of boys, but a profit of four thousand dollars has been added to our capital, making it now nineteen thousand dollars, and we trust that at the end of three years from this date a portion of the profits may be used toward the payment of current expenses. The factory has realized all it promised. We regard its success as fully assured. The health of the boys has been generally good. We have been visited with scarlet fever and a malignant form of measles, but with all our buildings crowded as they have been, and many of our boys down with these contagious and dangerous diseases, we have only lost five cases in a population of about five hundred. While we cannot fail to regret the loss of these boys, we think all who are acquainted with our circumstances and the kind of patients subjected to treatment, will agree with us that only the best of medical attendance and the most careful nursing could have resulted in so small a death rate.

Tke duties of all connected with the school have, in our judgment, been faithfully performed. The progress made in the educational department can be estimated somewhat from the teachers' report, and entitles all engaged there to favorable mention. The buildings for which appropriation was made by the last legislature are nearly completed, and will be occupied before this report is in the hands of the legislature. The amount appropriated will be sufficient to finish and furnish all that was contemplated, and in style, material and workmanship equal, if not superior to the buildings heretofore erected here and always regarded as creditable to the state. The estimates for the ensuing year have been made with a careful regard to necessary wants of the institution and are based upon the experience of the past years. The amount deemed necessary, and the purposes for which the same is required, will be found in the following statement:

## ESTIMATES FOR 1878.

1 Amusements and means of instruction ..... $\$ 90000$
2 Clothing, tailor shop and shoes ..... 4,600 00
3 Drugs, medicines and medical services ..... 60000
4 Farm and barn expenses ..... 3,30000
5 Fuel ..... 3,400 00
6 Lights ..... 60000
7 House furnishing ..... 1,600 00
8 Laundry and cleanliness ..... 50000
9 Stone yard and stone ..... 1,25000
10 Ordinary repairs ..... 80000
11 Permanent improvements ..... 1,000 00
12 Miscellaneous expenses ..... 62950
13 Subsistence ..... 12,000 00
14 Salaries ..... 14, 75000
15 Wages ..... 1,40000
16 Telegraph, $\$ 90$, and express, $\$ 75$ ..... 16500
17 Postage ..... 25000
18 Printing ..... 5000
19 Freight ..... 60000
20 Manager's expenses ..... 55000
21 Library ..... 25000
Total $\$ 49,19450$
Deduct due from counties ..... 10,194 50
Leaving amount to be appropriated ..... $\$ 39,00000$

We republish the laws relating to the school, for the information of the public generally, and the committing magistrates particularly. All of which is respectfully submitted. Waúkesha, November, $18 \% \%$.

WM. BLAIR, EDWARD O'NEILL, JOHN MATHER, ANDREW E. ELMORE, CHARIES R. GIBBS, Managers.

The funds of the boot and shoe factory are all invested in stock, boots and shoes on hand, machinery, etc., as per manager's report.

ANDREW E. ELMORE, Treasurer.
Waukesha, November 8, $18 \% \%$.

## SUPERINTENDENT'S REPORT.

Office of the Sup't of the Wisconsin, Industrial School for Boys, Waukesha, October 30, 18\%\%.

## To the Board of Managers,

Gentlemen: In accordance with your requirements I respectfully submit to you the superintendent's eighteenth annual report of the internal affairs of this institution, and ask your careful examination of the statistical tables hereinafter set forth and numbered from one to sixteen inclusive.

It will be seen by referring to table No. 1, that we commenced the year with 318 boys and closed with 364 ; showing an increase of 46, an increase much larger than can well be accommodated in either one of our family buildings, and the whole number at this date is quite as large as can weil be accommodated when the spacious building now in the process of erection shall be completed. Should the ratio of increase for the present year only equal that of the past, we shall find ourselves with an additional full seized family of boys to be lodged in our already crowded dormitories, which cannot be done without great detriment to health and comfort.
Early in the past spring with a small squad of boys we commenced the improvement of our front park by grading up the low and swampy grounds lying along the southerly shore of Fox river; a part of which grounds have already been seeded, and the balance made ready for seeding in the coming spring. A graveled drive upon a foundation made of stone, taken from the bed of this stream, 'has been nearly completed along its bank, from near Bethesda spring to our grove, and a row of trees planted upon each side thereof, and numerous cross drives, connecting this new avenue with the
drives running through the grounds, heretofore improved, have been laid out and nearly completed.

The hot beds, and nearly all the currant bushes and nursery trees have been removed from the front grounds, and shade and ornamental trees have been planted upon about five acres of the flat lands contiguous to the river, the bed of which has been made much wider, and the banks bolder and more abrupt, so that the waters of this stream may be confined to its channel, and the hitherto marshy places may become the most desirable part of our pleasure grounds.

About one thousand currant bushes have been planted upon our back-grounds, and the hot beds removed thereto.

A graveled wagon road, across the flat in the rear of our buildings, and leading on a straight line to and through the sand and gravel bank to the table lands of the southern parts of the farm, is being constructed as rapidly as other work will permit. New fences have been built and old ones repaired wherever required. The boys' play ground has been enlarged and the fence around the same repaired and whitened. A meat room and a refrigeratory have been constructed in connection with the ice-house, so that we are enabled to slaughter and preserve our meats during the warm season of the year.

New timbers and new floors have been put into the bath and play rooms of the family building number one, and many of the other family buildings have been more or less repaired and repainted. The well in the front grounds has been repaired and a new pump put in it. The cisterns, sewers and tile drains have also been repaired and put in working order.
A shed (long needed), 20 by 90 feet, has been constructed and the lower part used for sheltering wagons and heavy agricultural machinery, and for storing and husking corn in bad weather, and the upper part for storing husks (for bedding) and such other things as need protection from sun and storm.

Our facilities for making soaps have been improved by repairs to the building used for that work, and the purchase of a large and heavy kettle expressly constructed for that purpose, and setting the same in a substant'al brick arch, and the' purchasing of such other fixtures as will enable us to manufacture nearly all the soaps required for the purposes of cleanliness.

The boot and shoe factory has been considerably enlarged, and
rendered much more convenient. The shop formerly used for broom making has been converted into a tailor shop, and the old tailor shop has been remodeled, and is now used for manufacturing cotton and woolen socks, and heavy yarn mittens.

The bakery and cook room has also been enlarged, and many internal conveniences added thereto.

The products of the boot and shoe factory, and of the sork and mitten factory, find a ready market, and the amount of work turned out by these branches of industry has more than doubled over that of the previous year. The latter factory is manned by the very smallest boys of the school, and table number 11 will show you what they have done during the year.

Table number 12 shows the amount of live stock on the farm, all of which is in good condition. Tables number 13 and 14 show that the farm and garden have yielded bountiful crops, notwithstanding the very unfavorable weather for cultivating corn and root crops during the early part of the season. Fifty acres of adjoining land was rented last spring, which yielded us a handsome return in hay, oats and potatoes. An amount of land equal to this should be purchased at once for permanent use. An examination of the other tables will impart such further information as is deemed necessary to be given in this report.

No change in our rules, and but few changes in the corps of assistants have been made since my connection with the school, but a very satisfactory improvement in the deportment of the pupils is shown by our records. A grade book in which is recorded the irregularities of each boy is kept and posted at the close of each half month, and each boy rises or falls in his grade in accordance with this record. The grades range from first to fifth inclusive; the fifth being the lowest and the first the highest, unless a boy shall continue in it for two successive months; then he is promoted to the grade of honor, where he remains unless his own acts reduce him to some one of the inferior grades, where he may, by good conduct promote himself again to the highest rank. When I assumed the duties of superintendent, on the 15th of January last, this book shows, that of the 340 boys then here, 97 were in the grade of honor, and 22 were in the fifth or lowest grade; and the same record shows, that on the date bereof, 199 of the same boys have reached the grade of honor, while only 4 remain in the lowest
grade. And of the $10 \%$ committed since the 15th of January to this date, 19 have reached the grade of honor, 60 the first grade, 15 the second, 9 the third, and only 4 remain in the fourth grade, where all new comers are entered, and none have tallen below the starting point; and only one boy has escaped since my present connection with the school. These figures point with emphasis to the fact that my colaborers as well as the inmates have generally been assiduous in their efforts to improve the moral standing of our little community.

The older portion of the boys are usually required to work five hours, and to go to school four hours each day, and are allowed two intermissions of one-half hour each; and the smaller boys are required to attend school the same length of time, but are only required to work four hours, which gives them two intermissions of one hour each. These daily intermissions, together with the last half of each Saturday afternoon, give the boys quite as much time for play as can be made beneficial to them.
We have had much sickness during the year, and have lost five boys by death: one of whom died of consumption, and another of dropsy, within a few days after I took charge of the school; two died of scarlet fever during the summer, and one died in September of brain disease.

The report of the physician, on file in this office, will further enlighten you upon this subject, and table No. 10 will show the number of deaths occurring during each year of the last decade.

The report of the librarian herewith submitted will show the need of more reading matter; and the report of the principal teacher will show the management and workings of the various departments of our school.

I desire to return my cordial thanks to the clergymen of Waukesha and elsewhere, who have gratuitously discoursed to us each Sunday afternoon of the year, and to all others who have, in any manner, contributed to the good and welfare of the institution.

> S. J. M. PUTNAM, Superinterident.

Geography, manual ..... 10
History ..... 21
Grammar, language lessons ..... 41
Writing ..... 41
Spelling, oral and written, whole number ..... 41

As most of the inmates we receive enter the primary department, we have been obliged to promote classes before they had reached the required standard of scholarship.

We are glad to report that in reading, spelling and writing, our pupils have made considerable advancement.

Feeling thankful to the superintendent and board of managers for their influence and support, and to those teachers and officers united with me in promoting the school work, I respectfully submit the above report.

GEORGE W. HOWARD, Principal.

## LIBRARIAN'S REPORT.

## To the Board of Managers and Superintendent:

The report of 1876 shows 1,274 volumes in the circulating library, and there have been no additions during the year. A great number of the books are worthless; the favorite books being in constant use are soon worn out. The "Christian Weekly" is the only periodical subscribed for. The "Kenosha Telegraph," "Evangelical Messenger" and "Brandon Times," are gratuitous contributions.

The reading room, which contains 216 volumes, is a favorite resort of the boys, often being crowded. The boys have become so conversant with the books that a new supply is necessary to keep alive their interest. A large amount of reading matter is sent in to the boys by their parents and friends. Some of this is rejected as unfit for circulation. The friends and patrons of the school are earnestly requested to send in such books and papers as shall be beneficial to the pupils.

IDA M. PUTNAM,
September 30, $18 \% \%$.
Librarian.

## Laws relating T0 THE SCH0OL

AN ACT to provide for the government and management of the State Reform School.

Section 1. The State Reform School at Waukesha shall be the place of confinement and instruction of all male children between the age of eight and sixteen years, who shall be legally committed to the State Reform School as vagrants, or on the conviction of any criminal offense, or for incorrigible or vicious conduct, by any court having competent authority to make said commitment.

Section 2. The managers of the State Reform School are hereby clothed with the sole authority to discharge any child or children from said reform school, who have heretofore been or may hereafter be legally committed thereto; and such power shall rest solely with said board of managers, and they shall have power to return any child to the court, justice, or other authorities ordering or directing said child to be committed, when in the judgment of said managers they may deem said child an improper snbject for their care and management, or who shall be found incorrigible, or whose continuance in the school may be deemed prejudicial to the management and discipline thereof, or who, in their judgment, ought to be removed from the school from any cause; and in such case said court, police-justice, or other authority shall have power, and are hereby required, to proceed as they might have done, had they not ordered the cons mitment to such school.

Section 3. The superintendent of the State Reform School shall charge to each of the several counties in this state, in a book provided by him for that purpose, the sum of one dollar ( $\$ 1$ ) per week for the care and maintenance of each person remaining in said State Reform School, who was committed thereto as a vagrant, or by reason of incorrigible or vicious conduct, or who may thereafter be
[Doc. 11]
received into said State Reform School; committed for vagrancy or incorrigible or vicious conduct, from each of said counties respectively; provided, that the cost of the original commitment of all persons to said State Reform School shall be chargeable to the county from which the person committed to said school is sent; and provided, further, that it shall be the duty of the superintendent of said State Reform School to procure the arrest and return of any person escaping therefrom; and it shall also be the duty of any justice of the peace, marshal, or constable, upon information of such escape, to arrest and return any such fugitive as above mentioned.

Section 4. The superintendent of the State Reform School shall keep an accurate account of the amount due from each county for the support of persons therefrom, and shall annually, on or before the tenth day of October in each year, report to the Secretary of State the amount which may then be due from each county for the year ending on the first day of October preceding, which report shall state the name of each person for whom such account is rendered, the number of weeks which such person has been in said school during said year, and the amount charged for each of said persons respectively; and such report shall be verified by the oath of said superintendent as to its correctness. The secretary of state shall add the amount due from any county in this state for the support of such persons to the state tax apportioned to said county, and such amount shall be collected and paid into the state treasury for the use of the State Reform School.

Section 5. The board of managers shall consist of five members, who shall be appointed by the governor and hold their offices for three years ; said board shall be divided into three classes, and so divided that the term of one class shall expire each year, on the first Tuesday of March, and shall receive for their compensation two dollars and fifty cents (\$2.50) per day for every day actually employed, and ten (10) cents per mile for every mile actually traveled, and shall verify their account by their oath of affirmation.

Section 6. Such managers shall have the power to make rules, regulations, ordinances and by-laws for the government, dicipline and management of the State Reform School, and the inmates thereof, as to them may seem just and proper ; provided, that such rules and by-laws shall be in accordance with the constitution of
the United States ; and they shall have power to place the children committed to their care, during the minority of said children, at such employment, and cause them to be instructed in such branches of useful knowledge as shall be suited to their years and capacities; and they shall have power in their discretion to bind out said children, with their consent or the consent of their parents or guardians, if they have any, as apprentices or servants during their minority, to such persons, and at such places, to learn such proper trades and employments, as to their judgments will be most for their reformation, and amendment, and the future benefit of such children ; provided, that the religious opinions of the inmates shall not be interfered with.

Section \%. The said managers shall appoint a superintendent of said State Reform School, and such officers as they may deem necessary for the interest of the institution, with a view to the accomplishment of the object of its establishment and economy of its management ; and the said managers shall make a detailed report to the governor, of the performance of their duty, on or before the 10th day of October in each year, which report shall contain a statement of the number of persons in the school at the commencement of the year, together with all such facts and statements as they may deem necessary to commnnicate; which report shall be laid before the legislature by the governor.

Section 8. The courts and several magistrates in any county in this state may, in their discretion, sentence to the State Reform School any such male who may be convicted before them as a vagrant, or of any petit larceny or misdemeanor; and the several courts may, in their discretion, send to said State Reform School any such male who may be convicted before them of any offense which, under existing laws, would be punishable by imprisonment in the state prison; provided, in all cases, the term of commitment shall not be less than to the age of 21 years.

Section 9. The managers of the State Reform School shall have power, in their discretion, to restore any person duly committed to said school, to the care of his parents or guardians, before the expiration of their minority, if in their judgment it would be most for the future benefit and advantage of such persons.

Section 10. The courts end several magistrates in any county in the state shall also have the power to commit to the State Re-
form School, any male child under the ages specified in section one of this act, upon complaints and due proof made to said court or magistrate by the parent or guardian of such child, that by reason of incorrigible or vicious conduct, such child is beyoud the control and power of such parent or guardian, and that a due regard for the morals and future welfare of such child manifestly requires that he should be committed to the guardianship of the managers of the State Reform School.

Section 11. The managers of the State Reform School are hereby authorized and directed to procure suitable places for the females under their charge, and in their discretion to dispose of them, as, in their judgment, will be for their interests and the interest of the state.
Section 12. All acts or parts of acts inconsistent with the provisions of this act are hereby repealed, and this act shall take effect and be in force from and after its passage.

Approved March 15, $18^{\prime} \%$.

AN ACT to amend section one and section eight, and repeal sectiont en of chapter sixty-six, of the general laws of 1870 , entitled, "An act to provide for the government and management of the Industrial School for Boys."

Section 1. Section one of said chapter sixty-six, shall be amended so as to read as follows : "The Wisconsin Industrial School for Boys, at Waukesha, shall be the place of confinement and instruction of all male children between the ages of ten and sixteen years who shall be legally committed to the said Wiscousin Industrial School for Boys as vagrants, or on the conviction of any criminal offense, or for incorrigible or vicious conduct, by any court having competent authority to make said commitment."

Section 2. Section eight of said chapter sixty-six shall be amended so as to read as follows; "The courts and several magistrates in any county in this state, may, in their discretion, sentence to the Wisconsin Industrial School for Boys, any such male child who may be convicted before them as a vagrant, or of any petit larceny or misdemeanor, and the several courts may, in their dis-
cretion, send to the said Wisconsin Industrial School for Boys azy such male child who may be convicted before them of any offense which, under the existing laws, would be punishable by imprisonment in the state prison, and the said several courts may, in their discretion, commit to the said Wisconsin Industrial School for Boys, any male child within the ages specified in section one of this act, upon complaints and due proof made to said court or magistrate by the parents or guardian of such child, that, by reason. of incorrigible or vicious conduct, such child is beyond the control and power of such parents or guardian, and that a due regard for the morals and welfare of such child manifestly required that he should be committed to the guardianship of the managers of the Wisconsin Industrial School for Boys; provided, in all cases, the terms of commitment shall not be less than to the age of twentyone years.

Section 3. Section ten of said chapter sixty-six is hereby repealed, and this act shall take effect and be in force from and after its passage and publication.

Approved March 11, 1873.

AN ACT to amend chapter 105, of the general laws of 1873 , relating to the government and management of the State Industrial School for Boys.

Section 1. Section 2 of said chapter 105 shall be amended so as to read, when amended, as follows:
"Section 2. Section 8 of said chapter 66 shall be amended so as to read as follows: 'The court and several magistrates in any county in the state may, at their discretion, sentence to the Wisconsin Industrial School for Boys any such male child who may be convicted of any petit larceny or misdemeanor, and the several courts may, in their discretion, send to the said Wisconsin Industrial School for Boys, any such male child who shall be convicted befere them of any offense which, under the existing laws, would be punishable by imprisonment in the state prison; and the county judge and judges of municipal courts in any county in this state may, in their discretion, commit to the said Wisconsin Industrial

Sohool for Boys any male child, having a legal residence in said county, and being between the ages of ten and sixteen years, which upon complaini and due proof is found to be a vagrant, or so incorrigible and vicious that a due regard for the morals and welfare of such child manifestly requires that he shall be committed to the guardianship of the managers of said school: provided, in all cases the term of commitment shall not be less than to the age of twentyone years."

Section 2. This act shall take effect from and after its passage and publication.
