AMERICA'S ANSWER

ALL over the world, nations are struggling to obtain a higher standard of living for their people. They are resorting to conquests, boycotts, experimental forms of government. But America has its own answer to this problem—a solution which has proved its worth. This American workman and millions of his associates, aided by the scientists and engineers of industry, are raising the living standards of all of us. They are doing it by constantly developing new and better products, and then learning to make them inexpensive so that millions of people can afford them.

For instance in 1927, when an electric refrigerator cost about \$350, approximately 375,000 were purchased. In 1937, a better refrigerator cost only \$170. And because

the cost had been cut in half, *more than six times as many people* bought them.

In the same ten years the cost of a typical electric washer has been reduced from \$142 to \$72, a console radio from \$125 to \$53, and a 60-watt MAZDA lamp from 30 to 15 cents. And these new lower-cost articles, typical of hundreds of manufactured products, perform better and cost less to operate than their predecessors.

General Electric scientists, engineers, and workmen, by contributing to this progress—by helping to create more goods for more people at less cost—are hastening the day when all may enjoy the comforts and conveniences which only the rich could afford a few years ago.

Reunion in Berlin

Berlin, Germany,
Zimmerstrasse 68.

Dear Fellow-alumnus:

It isn't every day that an alumni reunion takes place in far away Germany.

You who are constantly at the source of things perhaps cannot appreciate the thrill that an old-timer like myself gets when, in a foreign country, he suddenly is visited by two attractive young men from his own Alma Mater.

When the track and field team that has been visiting Europe came to Berlin on August 11, Leni Riefenstahl, the movie producer who made the Olympic film, arranged a showing of this film to the American

Subscription to The Wisconsin Alumnus is \$1.00 per year. This is included in the regular memberships of The Wisconsin Alumni Association which are \$4.00, \$2.00, and \$1.00 annually. Family rate membership, \$5.00 annually. Life memberships, \$50.00 payable within the period of five years. The Association earnestly invites all former students, graduate and non-graduates to membership. Others may subscribe at the regular subscription price of \$1.00. Sustaining memberships, \$10 annually; Family rate, \$15 annually.

Entered as second class matter in the post office at Madison, Wis. Change of Address must be reported ten days before date of issue. Otherwise the Association will not be responsible for delivery.

Discontinuance—if any subscriber wishes his magazine discontinued at the expiration of his subscription, notice to that effect should be sent with the subscription, or at its expiration. Otherwise it is understood that a continuation is desired.

two boys immediately and the result might be termed "papa with his sons" if I were not afraid that the two young men might resent having so bald-headed a dad.

LOUIS P. LOCHNER, '09

"Hod" Winslow Exonerated

Chicago, Ill.

Gentlemen:

Referring to the article, "Forty Years of Hoofing" in the July issue of your publication, I feel that in fairness to "Hod" Winslow, I should confess to the book and libretto of "The Manicure Shop" and clear Winslow of this accusation.

And since we are all so avidly proud of Wisconsin triumphs, I beg to add that later "THE MANICURE SHOP" was produced professionally under a different name and broke a new high record for being the worst musical comedy flop up to that period.

I do not know whether this record still stands—but certainly "Hod" Winslow's name must be cleared.

TED STEMPFEL, '09

Who's Next?

Washington, D. C.

Dear Mr. Berge:

In response to your letter of September 8, I am sending you an additional \$6, by check to include with the \$4 I sent you some time ago during a personal depression. I am very glad to add the \$6 and appreciate the compliment of receiving your letter.

Let me heartily congratulate you on the excellence and great effectiveness of your work and your very substantial accomplishments of the past year. Most of the alumni, I feel, have the Wisconsin spirit and only need to have it jarred loose. Any service I can render, please be sure to let me know of.

RAYMOND J. HEILMAN, '12

Some Haresfoot Corrections

New York, N. Y.

Sydney Jacobson, Esq.,
c/o THE WISCONSIN ALUMNUS.

Dear Mr. Jacobson:

I have read with a great deal of interest your story, "Forty Years of Hoofing", in the Centennial Edition of July, 1938, of THE WISCONSIN ALUMNUS. I know you won't mind if, in order to get the records straight, I

correct a minor inaccuracy in your story.

You mention the 1914 production "Gypsy Suzanne" as being written as usual by "Herb" Stothart "being aided this year by a newcomer, Ivan Bickelhaupt, '14, who at present is Vice-President of American Telegraph". As a matter of fact my brother, Ivan Bickelhaupt, who was president of the Haresfoot Club in 1914, wrote the book of lyrics for "Gypsy Suzanne"; the music was written by Stothart.

I am the Bickelhaupt who is associated with the American Telephone and Telegraph Company. I was president of Haresfoot in 1911, having worked in the chorus of "The Dancing Doll", the first of the comic operas to be produced by Haresfoot, and having served as stage manager for the club in "Alpsburg" and "The Manicure Shop".

I regret that your story does not mention Joseph E. Davies, '98, U. S. Ambassador to Belgium. "Joe" Davies underwrote the financing of the Haresfoot productions during the time I was in college and without him, I don't know what we would have done.

Your story states that "Jan of the Trail", the 1915 show, was the first time women were used behind the scenes for dressmakers and wardrobe mistresses. Chester Baird of Milwaukee, "Joe" Mercer of Evanston, Illinois, and a number of the other old-timers will tell you that we carried two wardrobe mistresses with us on tour with both "Alpsburg" and "The Manicure Shop". With those two shows we also carried a professional stage carpenter and a professional stage electrician,—not because we couldn't handle the stage ourselves but because of difficulty with the stage mechanics unions while on the road.

Haresfoot has gone on for forty years and I sincerely hope it goes on for many more. I envy you who are active in the Club today the fun I know you are having out of the annual productions.

CARROLL O. BICKELHAUPT, '11

It Was for \$5

Berkeley, California.

Dear Mr. Berge:

The efforts and good work of the executive secretary are not forgotten. The various publications that come do keep the U. W. before us. As the Taylors are all "Life Membered" our dues are not in arrears, but some one may have forgotten so I enclose a small check—it will help pay postage. With best wishes

MRS. H. J. (ROSE SCHUSTER) TAYLOR, '85

Announcing

The Wisconsin Alumni Association's

SLOGAN CONTEST

Open to All Alumni

Six Valuable Prizes

The Alumni Association takes great delight in announcing its first SLOGAN CONTEST, opening November 15 and closing December 10. Six prizes will be awarded to the winners, three in each of two classifications.

- 1) Three prizes will be awarded to alumni submitting the best slogan for the Association's current rebuilding program.
- 2) Three will be awarded to the alumni submitting the best letters of not more than 100 words on "Why Every Alumnus Should Take Part in This Rebuilding Program."

First prize in each classification will be a three-year paid-up membership in the Association. Second prize in each division will be a two-year paid-up membership, and third prize will be a one-year membership.

Remember, that the current campaign is a part of the Association's rebuilding program, specifically designed to clean up the losses incurred during the lean years of the business recession. Our goal is 1,000 new members by June 1, 1939. With this increased membership the Association will be able to maintain its present standard of services and to add more which will benefit all of its members.

Here Are the Rules:

1. All entries must be postmarked on or before December 10.
2. Alumni may enter as many entries in either or both contests as they wish.
3. All slogans and letters become the property of The Wisconsin Alumni Association.
4. The magazine committee of the Association will be final judges. This committee consists of Mrs. A. M. Kessenich, Mrs. Lucy Rogers Hawkins, Irwin Maier, Frank Thayer, Arthur Towell, Wallace Meyer, Mrs. O. E. Burns, and Harry Scott.
5. Prizes will be announced in the January, 1939, issue of the Alumni Issue of the University Bulletin.
6. The membership prizes will be made out in the name of the prize winner but may be transferred to some non-member alumnus if the winner so wishes.
7. Send all entries to The Wisconsin Alumni Association, 770 Langdon St., Madison, Wis.

Write a slogan and win a prize

up and down the Hill

WE thought that we had given up writing this column, but after several of our unsuspecting readers requested that it be reinstated we decided that if you could stand it we could. We promise you absolutely nothing profound, but we do hope that whatever we have to report will prove of interest. If we step on any toes or ridicule any pet white elephants, 'seuse it, please.

A "SLIP-STICK" ALWAYS HELPS

Prof. Grant Hyde, director of the School of Journalism, almost went to Europe this year. It was this way, Prof. Hyde and his mother had set sail for the Continent with the usual fanfare and were sailing peacefully up the St. Lawrence when a storm forced their ship on the rocks. After several anxious and perturbing minutes, all passengers and hands were transferred to other ships and sent back to their starting mark. Once was enough for the worthy journalist and he decided to cancel the whole trip.

The first second generation of Wisconsinites from Hawaii entered the University this fall. They are Evelvn and Kenneth Ho, children of Kim Tong Ho of the class of 1912. Kim was one of the most popular men in school in his day. Since retiring from the vice-presidency of the Liberty Bank of Honolulu he has devoted a large part of his time to travel and study in the Orient and Australia.

It won't be Paramount Pictures fault if the country doesn't become "Wisconsin Conscious" during the next year. The Chicago offices of that news reel company has

been busy on the Campus on several recent occasions. During the summer months they photographed and released the story of the annual summer school band clinic. Last month they were on the Campus again to "shoot" the latest in co-ed fashions as portrayed by a half dozen of our more comely co-eds. And at the present writing we have just received word that they will be on deck from Wednesday afternoon on to take a complete story of the 1938 Homecoming commemorating 50 years of Wisconsin football. Watch for all three at your local theater.

Students can always be counted on to make life interesting and there is never an opportunity for a choice wise-crack that passes them by. Take the one made by the boy when he heard about the new course sponsored by the Wisconsin Men's Union, "Friendship and Marriage," for instance. When told of the advantages of the course, his only reply was, "Are there any lab classes?"

Dispossessed, as it were, when the old Union was torn down, the University Y. W. C. A. has finally found a haven in the new library school quarters, the former Phi Psi fraternity house on State street. Here two

BETWEEN CLASSES
Bascom's steps are always crowded

rooms have been set aside to be used as an office and committee room.

The committee room has been furnished in early American style by Prof. Frederick Ogg of the political science department, in memory of his wife, the late Emma Perry Ogg, and the room will be named in her memory. Mrs. Ogg was always very generous with the Y. W. C. A. and frequently opened her home to its members for teas. A suitable portrait of Mrs. Ogg will hang in the committee room.

Furnishing of the room was under the supervision of an advisory committee appointed by Miss Alma Bridgman.

It's 2 to 1 that the boys on the Campus don't get dates these days. Final registration figures show that there are 7,917 males and only 3,521 women students registered this year. Better step right up and get your Prom dates early, boys.

The student political pot is coming to a slow boil as we write this column. Already innumerable candidates have announced themselves for the class offices and board positions to be filled. Gordon Dupee, varsity debater, and Howard Weiss, Wisconsin's potential All-American fullback, have come out for the senior class presidency. Weiss is a Kappa Sig; Dupee, an independent. The latter has inserted a plank against "compulsory membership in the Alumni Association" in his platform.

He's too good, that's all. For the second successive year Prof. "Bill" Kiekhofer has had to divide his Econ 1 lecture into two sections even after the University assigned him the biggest lecture room on the Campus. It took no time at all for the registrations to overflow historic Music Hall's auditorium, so genial "Bill" announced a special lecture for the overflow in Sterling hall.

"VOTE FOR WHOOZIS"
An Electioneering parade on
Langdon Street

William Bates, Jr., a 20-year old senior, recently set a new national record for gasoline model airplanes at the Curtiss-Wright airport in Milwaukee. His ship stayed aloft for 11 minutes and 24 seconds. The previous record was 9 minutes and 3 seconds.

Blonde and comely Roma J. Allinder is the only freshman co-ed enrolled in the College of Engineering this year. Registered in the chemical engineering course, Miss Allinder has

no hesitancy about engaging in a profession generally reserved for men. She was prompted to enroll with the "plumbers" because of her liking for mathematics and chemistry.

There are twenty women students in the Law School this year and six of the eighty students admitted to the School of Medicine sign Miss before their name. There are two men enrolled in the Home Ec course to try and help balance matters.

"There's life in the old dame yet" might well be the motto being tossed about in the men's gymnasium these days. Unbelievable as it might seem, that old, decrepit, much patched building now boasts modern, chromium and leather furniture in the lobby of the athletic department offices. We don't know how it came to be there, but we'll hazard a guess that it resulted from Harry Stuhldreher losing some star tackles by making them wait on the old wooden benches that used to beautify the room.

The daughter of one of America's foremost authors has joined the University faculty this year. She is Ella V. Rolvaag, whose father was the late O. E. Rolvaag, author of "Giants in the Earth" and outstanding authority on Norse literature. Miss Rolvaag is teaching Scandinavian languages.

A Full House

11,439 students have packed the campus to capacity in a record breaking enrollment.

Good News from Baraboo

ON Saturday, August 27, you may have been in Houston or Hackensack, at the shore or in the mountains. But, in a very real sense, you were at Howard Potter's farm near Baraboo, Wisconsin, where the future development of your Alumni Association was discussed and charted.

Seated in front of the charming Swiss chalet, built by one of the famous Ringling brothers, was a group composed of all the members of the President's Council and the officers of the Alumni Association. Lawyers, bankers, professors, association directors, and business executives from New York, Chicago, Milwaukee, Minneapolis, Green Bay, and Madison — loyal alumni gathered for the day to build for the coming year and years beyond.

All day on that beautiful Wisconsin farm, away from the stress and strain of modern life, there was a discussion of constructive plans to make this seventy-seventh year the most successful year in the Association's history, to do everything possible to further the best interests of the University of Wisconsin, and to achieve the ambition of the officers of the Association who are rendering a real service to the alumni of Wisconsin.

The President's Council expressed complete confidence in the expanding services rendered by the Association under the leadership of President Howard Potter and recognized that the Association is fundamentally a service organization. The Council members were genuinely encouraged by the accelerated growth of the Association. They enthusiastically approved the work of Secretary John Berge and Editor Harry Thoma, and were emphatic in their praise of the contributions Athletic Director Harry Stuhldreher is making to the success of the Alumni Association.

It was brought out in this conference that the President's Council and the officers and directors have not been able to work out any satisfactory plan for operating without the income provided by members in the form of their membership dues. This source accounts for almost the entire income of the Association.

Here is the simple but sometimes disturbing arithmetic of the problem. In order to balance the membership and to obtain younger members, first year dues for Seniors have been set at one dollar, and the dues for the intermediate group (those who have graduated within five years) have been set at two dollars. But it costs at least four dollars per year to service each member. Since regular memberships are four dollars a year, sustaining memberships at ten dollars per year are necessary to meet the demands of the budget during this rebuilding period of obtaining the necessary number of regular members.

Cheering news was brought to the Council meeting and is here passed on to you. More than one hundred Association members voluntarily have decided that they can and should give more than ordinary support to our ambitious service program. More than one hundred have placed their names on the Honor Roll by becoming sustaining members. We need five hundred.

Seventy-one years ago the state's motto "FORWARD" was applied to the University. The Alumni Association is continuing its FORWARD progress with current publications, placement service, intellectual activities, and other services under dynamic, energetic leadership. The "ON WISCONSIN" spirit is surging ever stronger.

Fellow Alumnus, will you not join the distinguished Honor Roll of sustaining members by supplementing your membership dues with an amount which will bring the total to ten dollars for this fiscal year? In so doing you will have the satisfaction of knowing that you are fulfilling your obligation as a loyal Wisconsin alumnus by supporting an organization that is actively working for the best interests of the University and rendering an efficient service to you and to us all. May we place your name on the Honor Roll of five hundred Sustaining Members?

HARRY A. BULLIS

Radio . . . For Service or Profit?

University seeks powerful broadcasting station to improve public services

by H. B. McCarty, M. A. '30

Program Director, Station WHA

PENDING before the Federal Communications commission in Washington is an application made by the University of Wisconsin for permission to operate a new and powerful state radio station on a full-time basis. To obtain evening broadcasting privileges and the power required to reach all parts of the state free from interference from other stations, the University has requested a construction permit for a 50 kilowatt transmitter to operate on the 670 kilocycle frequency now used by WMAQ, Chicago, a station owned and operated by the National Broadcasting Company.

Wisconsin now has two broadcasting stations, and both are required to go off the air at sunset. Consequently it is not possible to broadcast when working people can listen. Granted a license to operate on night hours, the state station will reach the adult population of the state not only with educational features, but with discussions of the problems of state policy in such matters as agricultural adjustment, unemployment insurance, utility regulation, taxation, old age pensions, accident compensation, hours of labor, and public health.

Of all frequencies, the 670 kilocycle channel is most practicable for Wisconsin, and therefore, in making the present application under the present system of allocation, the state has no alternative but to seek that channel.

The question the Commission is asked to decide is whether a state that is aggressive enough and modern enough to want to supply

its people with extended public radio service has the right to do so, as against the right of a commercial radio organization to operate for private profit. The application is certain to arouse historical legal controversy which may be decided ultimately by the United States Supreme Court. It is likely also to provide an acid test of the adequacy of present methods used by the Communications Commission in determining what constitutes the public interest, convenience, and necessity in broadcasting.

WISCONSIN has been a leader in radio service since the early days of telegraphic broadcasts when the University of Wisconsin station WHA, apparently the oldest broadcasting station in operation, was known merely as transmitter 9XM. Throughout its entire development, WHA has operated on a different basis from that of the commercial broadcasting stations. Founded as it is on a philosophy of true public service rather than private gain, its goal is not profit for a few, but improvement for the many. Since its inception, WHA has never sold a penny's worth of time for advertising. It is financed through the state budget as a device for extending the benefits of Wisconsin educational, agricultural, governmental, and other service agencies directly to the people.

PROF. GORDON'S ANNUAL MUSIC FESTIVAL
About 2000 children gather on the campus to sing songs learned over the air from WHA

Unhampered by the necessity of pleasing sponsors, WHA has always been free to experiment in the public service uses of radio. Out of that experimentation have come the Wisconsin School of the Air and the Wisconsin College of the Air, offering regular courses free of charge to schools, special groups, and individuals who have been unable to continue their education. No such programs are available elsewhere on the radio dial.

LET'S DRAW
 Several thousand children are taught creative art by means of the radio

ries University and other educational agencies of the state right into the school-room and home to aid in child and adult education. To be fully successful, any program of adult education must be broadcast at night when working people are able to listen.

Operating entirely non-commercially, the new station will offer a high type of program service, such as no station dependent on the sale of time for its revenue can consistently provide. Only through public operation can sparsely settled rural areas, which are not rich potential selling markets, be assured of radio service to which they are entitled. Although programs will be designed especially for serving the interests of Wisconsin citizens, they will not be void of appeal to listeners in other states, judging from the popularity of present WHA programs as reported by listeners in neighboring states.

WITH WLBL, the Department of Agriculture and Markets station at Stevens Point, WHA has operated as a chain, in an attempt to cover the entire state with certain programs of interest and help in all sections. The development of the state broadcasting service has been seriously handicapped, however, by inadequate power and the restriction of the Federal Communications Commission limiting WHA and WLBL to day-time hours.

Because radio signals cause interference at greater distances after dark than during the day, fewer stations are permitted to occupy the channels at night. WHA, operating on 940 kilocycles, is required by federal regulation to sign off at local sundown so that stations in Fargo, North Dakota, and Louisville, Kentucky, may be free from interference. Likewise WLBL, on 900 kilocycles, with other regional stations, can broadcast only during the day.

The chief advantage to the public in the state radio system is that it car-

THE granting of this application will remedy the inequitable situation now existing in which there is in Wisconsin no dominant clear-channel station, while in the State of Illinois there are four such clear-channel sta-

RADIO SUPPLEMENTS REGULAR CLASSROOM WORK

A Class in the primary grades tuned in for one of the special "School of the Air broadcasts"

tions. No station or group of stations now assigned in Wisconsin can effectively cover the state at night.

Estimates on cost of operating the new station indicate that it will be a most economical communications device. It is expected that the cost of giving a full year of no-advertising radio service will be approximately four cents per person—or less than the present tax on a single gallon of gasoline.

To some, such a broad plan of state-owned radio facilities might seem to constitute a threat against impartial, non-political broadcasting. As an assurance against such a possibility, there has been created by the Regents of the University of Wisconsin a State Radio Council, whose nine ex-officio members are:

President of the University. Chairman
 Superintendent of Public Instruction
 Director of University Agricultural Extension
 Director of the Department of Agriculture

and Markets

Director of University Extension Service
 Secretary of Normal School Regents
 Director of State Board of Vocational and Adult Education
 Dean of the School of Education
 Technical Director of the radio stations

These men, ranking educational workers of the state, will be responsible for the formulation of the general policies governing the use of the state-owned radio facilities. They will direct their use to serve the interests of agriculture, of households, of schools, of public enterprise, and of an informed public opinion. Services such as these can be effectively rendered only by a non-commercial station.

Thus the State of Wisconsin rests its application with the Federal Communications Commission. But its case will not rest until Wisconsin has won the right to serve its people to the fullest extent with the most modern instrument—radio.

Placement Committee's Plans Progress

FURTHER indication of the seriousness of purpose of the Association's Placement Committee may be obtained from the announcement that during the month of November this committee, under the leadership of John S. Lord, '04, will bring to the Campus Mr. T. Luther Purdom, Director of the University Bureau of Appointments and Occupational Information at the University of Michigan.

Mr. Purdom will confer with members of the Association Placement Committee and members of the faculty committee engaged in the same type of work. Although the bureau at Michigan was established only recently, the work already accomplished by Mr. Purdom is of such a calibre that his advice will be eagerly sought by all those who meet with him.

It is Mr. Lord's plan that if this meeting produces the results he feels certain it will, directors of placement bureaus of other universities will be brought to the Wisconsin campus for meetings with faculty and alumni groups so that this work can be improved and enlarged as quickly as possible. The Placement Committee has already done a fine job, but Mr. Lord believes so sincerely in its possibilities that he plans to devote every effort

to building it to the point where it will be a most effective agent for students and alumni in their placement problems.

Last winter the Placement Committee brought Glenn L. Gardiner, '18, noted personnel director, to the Campus to meet with members of the senior class. Two such meetings were held. As a follow-up, the Association mailed out a copy of Mr. Gardiner's special booklet, "The College Senior Seeks a Job," to every member of the graduating class. Since then members of the committee have contacted employers in the larger cities, determining what their needs are or will be. This information has been sent to the Association offices where it has been tabulated and is available to those students and alumni who wish to use it.

Two alumni clubs have already instituted special committees to handle all placement work. The Chicago club has established an office at which there is a part time secretary whose duty it is to study the Chicago placement problems and assist young alumni in obtaining work. Milwaukee has had a committee at work on the problem for several years. Mr. Lord plans to contact other clubs in the hopes that they, too, will organize in such a way that alumni may have help in searching for employment.

Real Progress

The story of the Milwaukee Alumni Club proves it can be done

THE other day a very interesting and colorful announcement reached our desk. It was the annual pre-season bulletin of the Milwaukee Alumni club. As usual we were pleasantly surprised to read about the multitude activities which this energetic group of alumni provide for their fellow townsmen. In fact, we were so impressed with their program and the possibilities of similar ventures in other clubs that we decided to write a brief story about what happened in our neighboring city.

Milwaukee had never had a real, active alumni club until 1933 when a group of younger alumni decided that something could and should be done about getting the 5000 or so alumni in their city banded together in some cohesive unit. They started slowly, passing the word on mostly through personal contacts. Soon the interest in the plan grew and a series of weekly luncheons were announced. Later, more elaborate dinners were held for those who couldn't attend the downtown luncheons.

As the interest increased and the membership grew—annual dues were and are \$1—the club branched out into a more diversified program. Fully cognizant of the depressing problem of unemployment among the younger college graduates, the club organized a placement committee. These men contacted the many companies, big and small, in Milwaukee to determine their wants and to make contact with the proper authorities. Full time and part time jobs were uncovered in many places and in short order alumni began to lean upon the club for help in placement work.

The younger men in active management of the club soon realized that many of the important civic leaders

RUBENS F. CLAS, '14
Milwaukee Alumni President

in Milwaukee who were also alumni were too busy to take an active part in the affairs of the club. An advisory council of these men was organized. They meet with the board of directors from time to time and give the latter their advice on matters of policy and are of great assistance in the successful completion of many of the club's plans.

One thing the club realized early was that not all alumni have the same interests. With this in mind, the officers prepared a program that would appeal to young and old, "intellectual" and "playboy". A series of forums led by University faculty members and prominent Milwaukeeans was instituted with overflow crowds resulting from the first meeting to the last. Serious speakers were obtained for the quarterly dinner meetings. Dances were sponsored for the younger groups. Hares-foot was backed to the limit, with the club adding to its coffers by getting a share of the net profits over a certain amount. Football trips to Madison and out of town games were arranged.

The Milwaukee high schools were contacted by members of the club. Principals and teachers were called upon and always the University was the subject of conversation. That group in the club interested in ath-

WALLER CARSON, '18
Secretary of the Club

How Goes Membership?

“**H**OW is your membership campaign coming along?” Nearly everybody asks us that question so we're going to report to you just how things do stand at the moment. First of all let's discuss the drive for Sustaining Members.

A year ago the Association announced a new type of membership, the Sustaining Membership at \$10 a year. This type of membership offered the holder nothing more in the way of services than did the regular \$4 membership but it did give the subscriber an opportunity to take this method of showing his or her willingness to help. The Association's rebuilding program was coming along nicely, but the \$1 memberships offered to the graduating class and the \$2 memberships offered to the classes less than six years out of University did put a crimp in the total income of the Association. The cost per member stayed at slightly more than \$2 and some way had to be devised to take care of these concessions made to the younger alumni. The Sustaining Membership was the result. To date, more than 150 of these memberships have been purchased by interested and loyal alumni.

An interesting fact about these sustaining members is that in many cases the subscriber has been a life member of the Association. Having paid their regular dues for once and for all, these life members have sent in their \$10

checks with the idea that every little bit helps and that their share may be just what the Association needs to meet its goal of 1000 new members during 1938-39.

Members of the board of directors of the Association, alumni club officers and class officers have all thrown themselves into the spirit of the campaign and are vying with one another for the honor of turning in most sustaining memberships.

The general membership campaign is just getting under way. Vice-president Al Goedjen, '07, who is chairman of the membership committee, has contacted all of the class officers in an attempt to get them to take the initiative in their own groups. At the present writing, more than fifty per cent of these have indicated that they have or will start a special class campaign. Each class has been assigned its percentage of the anticipated additional 1000 members, based on the total number of alumni in each class. The quota of each group, in this way, isn't at all out of proportion with their size.

So, may we say just this in closing: The Association membership is moving upwards. The low reached in 1935 makes reaching our former high just that much more difficult. With the cooperation of our loyal club and class officers, however, we feel certain that 1938-39 will bring one of our best years.

Homecoming - 1938

FIFTY years of football were commemorated at the 1938 Wisconsin Homecoming. Appropriate display of the game as played in 1888 featured the between-halves pageantry. Pictured above are a group of the co-eds who took part in the cavalcade of football. Top right shows the lawyers entering the stadium with their new canes as the band salutes the Indiana visitors. The two shots below give some idea of the old time football game that was staged during the intermission. As in old days, fights were frequent and the band and spectators crowded onto the field.

Let's Talk About Alumnae

DRIPPING in for a brief call on Wisconsin friends one evening recently, we found ourselves in the midst of a delightful reading of Esther Forbes' literary success of last year, "PARADISE." Husband, wife, and children were deep in the atmosphere of Puritan New England and in no time at all, we too were sitting piously in meeting houses, standing beside whipping posts, feasting on "hams, smoked with beechwood, hot, yellow journey cakes, mighty rabbit pies," taking part in the terrible events of King Philip's War with its destruction of whole villages.

Esther Forbes Hoskins, '18, we all realized, is an expert on the history of early Massachusetts, and we appreciated the fact, too, that she has a genuine love for the state of Wisconsin—its people, country, and its university campus. Yes, we re-

membered Esther Forbes used to write for the old "Wisconsin Lit," and we wondered

if the undergraduates now are as interested in writing as she was then.

Miss Forbes' adventures in writing began, however, long before she dipped into journalism and advanced English in old Main Hall. As a child in Worcester, Massachusetts, she attempted to contribute her services to the home printing of a magazine, published by her four older brothers and sisters. Her first novel had Achilles for its hero, and it shows the influence of Louisa Alcott as much as of Scott or of Pope and Homer. Amazing to relate, she knew hundreds of lines of Pope's translation, and used to recite them to herself while riding her pony over the then enchanting New England country roads which now are swallowed up by cement.

As she grew older, she became ashamed, publicly, of her passion for writing, but she did a good deal on the sly. She divided her time between Massachusetts and Europe, rode horseback and continued her writing. The War began in Europe and Esther Forbes entered the University of Wisconsin, quite a jump from Worcester, but she has always felt, one of the best jumps that she could have taken. While at Wisconsin, she sold a small amount of her writings to magazines, and one story, "Break-Neck Hill," selected for the O. Henry Memorial volume of 1920, since then

has been reprinted many times in collections.

The War came nearer to America and to the Wisconsin campus, and, led more by adventure than by patriotism, she became a farmerette on the cornfields and apple orchards of Virginia, and in time won the rating of "teamster." So enjoyable was the experience that for two successive autumns after the war was over, she left her position on the editorial staff of Houghton Mifflin Company to return to the farm for a month of harvesting.

In the spring of 1926, Esther Forbes published her first novel, "O Genteel Lady," was married, and spent a summer abroad with her husband. In 1928 she published her "Mirror for Witches," and in 1929 left for a long stay in Dalmatia, Italy, and Switzerland. Early the next year in a chalet with a view of both Mont Blanc and Monte Rosa

by

Henrietta Wood Kessenich, '16

Alumnae Editor

from her room, she began "Paradise"—perhaps in a nostalgic mood for her own less

impressive New England landscape.

Time went on and she returned to the environs of Boston, and "Paradise" began to pile up. It was over a thousand pages and even the author knew it was out of hand. She stopped work for several months at a time, wrote stories and articles and her novel, "Miss Marvel." To her joy when she went back to "Paradise" she knew exactly what she wanted to do. The actual work of completing another novel had clarified her mind and given her a fresh viewpoint. In six months, she completed the final draft. "Paradise" was on the book stands—a best-seller.

And now, "The General's Lady" released for publication a few months ago is destined to receive the same acclaim given "Paradise." The usual adjective "remarkable" has been applied to this newest of the Forbes novels and this time the critics say it is something very rare. "It is a fine and humorous piece of dramatic writing." "It is the kind of book individual readers fall in love with, cherish and read and go on year after year recommending to their friends."

Esther Forbes was brought up on stories of early New England. Her name, Esther, has long been in the family. She always knew that the mother who first selected this name for her daughter died in the jail in Cam-

bridge, waiting trial for witchcraft. A bedspread embroidered by Samuel Adams' mother and grandmother, always kept in a bag in the "moth closet" and taken out only to be shown to people especially interested in such things, is now in the Worcester Art Museum. Both Miss Forbes' parents were enthusiastic historians, with a good library of source material on early New England and with the power to put what they knew into writing. Her mother is an authority on certain phases of the 17th and 18th centuries, and has published two important books. With Miss Forbes' family roots so deeply imbedded in Massachusetts, early Colonial days are as real to her as the days of last year are to most people, and it is small wonder that critics have welcomed her to the realm of historical fiction.

A final quotation on Esther Forbes we take from "The Piper" who presented Esther Forbes in a sketch. "The sense of exuberant life which gives such freshness and vitality to her novels is by no means confined to Miss Forbes' written work. I might even call her a human dynamo radiating an inexhaustible supply of contagious energy and enthusiasm. The gusto of her conversation is a sure cure for the blues and is only paralleled by her amazing absorption in the ridiculous odds and ends of incident and experience that go to make a world. One with her spontaneous interest in people knows not boredom. Yet her calmest pleasure, I like to think, comes in the Indian summer days when she walks with long, firm strides across the hills around the retired farmhouses in Princeton, Massachusetts, to which she and her husband periodically escape from the busy New York life."

Buy Xmas Seals

WOMEN in journalism may find themselves anywhere these days from the rear of a sales counter to the cabin of the Chinese

ESTHER FORBES HOSKINS, '18
Her books become best sellers

Clipper. Kathryn Shattuck, '25, for one, was never so surprised as when she found herself suddenly whisked away from her newspaper work in Pennsylvania to do publicity work for doctors, dentists and nurses out in the "interior," in Kansas City. With her heart set on buying a country paper and managing it, she had thought it would be such fun to put into actual practice the teachings of "dear old Daddy Bleyer" and to send

to Grant Hyde, reporting professor, a copy with all her own scribblings marked in red ink. Miss Shattuck still has this idea in the back of her head—that, along with the proverbial novel—but she has been too occupied with other things to join The Fourth Estate.

Following graduation, Kathryn Shattuck secured a job doing public utility publicity in Rochester, N. Y.—a job that meant publicizing a home service department. She was to organize it so that the women of the city would come in to the cooking classes, buy all the appliances, and put drudgery into the background forever. In between interior decorating the model rooms of the home service division she wrote news articles and pamphlets, arranged for meetings of club groups in the company building, organized a library for the women employees, dabbled in poetry, and sent out a monthly publication to all the housewives of the city. After a year and a half of work in this publicity for public utilities in between writing for the national magazines, she decided that her contribution to the field of better homes and better living had been made.

From Rochester she went to Pennsylvania and wrote special feature advertising for the local newspapers in the various communities. She would descend upon the leading merchants, get them to buy space in the newspapers, tell them "your business is the backbone of this community and would make an interesting story." She soon found that men liked nothing better than to tell what great successes they were and that they were in-

tensely interested in having their stories published. While touring the state doing this work she was offered a job writing a daily paper for a convention of radio and electric lamp dealers. The convention men were too bent on having a good time to give her news, and she often found herself out with a fisherman trying to pry a story out of him while he hooked a trout. Then she sat up half the night writing the copy.

Following this she went home for a well-deserved rest and to think of her country newspaper—but not for long. A telegram summoned her to Kansas City to do public relations work and publicity for the Kansas City Tuberculosis Society. She was hired for three months to put over the Christmas Seal Campaign. That was nine years ago and she is still in the same job.

The Health Conservation Association by whom she is employed is composed of all the independent health agencies in the city. From September till Christmas she is busy selling seals, and the rest of the year she is concerned with cancer control, heart, dental, and mental and social hygiene.

Her Christmas seal campaign is the big project of the year. She bombards the public through the press, radio, speaker's bureau, contests, and a "Christmas Seal Festival," a community program which she arranges and sponsors. A day's work may consist of writing a radio dramatization, securing the characters and training them in the art of radio broadcasting, writing a news release for the papers, showing a motion picture to a group, and addressing a luncheon club. Miss Shattuck firmly believes that the more people you bring into actual participation in a campaign the more seals you can sell. In her annual program which is to be held next month in the new Municipal Auditorium she has more than 500 people taking part. Physicians, nurses, Boy Scouts, Girl Scouts, Camp Fire Girls, a large boys' choir, a little theater group and dance groups all help to

make the Christmas Seal Festival a success. Last spring, because of her outstanding work in Kansas City, Miss Shattuck was called to New York City to help plan the publicity for the national Christmas Seal Campaign.

Aside from her regular work she has served as vocational guidance director for Theta Sigma Phi, national honorary journalistic fraternity for women. Occasionally she takes time off for a jaunt around the country, and this past summer, made a most interesting trip to Honduras and Guatemala.

In Kansas City she lives in an attic studio finished in knotty pine, furnished with antiques, a huge four-postered bed, shelves and shelves of books, and two typewriters. She has an interesting collection of "Currier and Ives" and almost lost a perfectly agreeable roommate because she insisted on hanging at the foot of her canopied bed two of the President Lincoln pictures—the assassination and death bed scenes.

At the present time she is writing a book of nonsense verse, and the novel waits. Some day when public health publicity has made all the public healthy we may expect to see Kay Shattuck as a country editor—who knows?

For Better Homemaking

THE last letter that we had from Gladys Branegan, '13, had a heading that belied the return address of Montana State College, Bozeman, Montana that was on the envelope. "Dollar Steamship Lines -Round the World," it said. "Red Sea-on board President Van Buren." Dr. Branegan, Dean of the Division of Household and Industrial Arts and also chairman of the Department of Home Economics at M. S. C., was on her sabbatical leave, studying various types of home-making education in "foreign countries" she meant not only England and continental Europe, but Hawaii, Japan, China, Java, the Malay States, Bur-

KATHRYN SHATTUCK, '25
Directs Xmas seals sales

ma, India, Palestine, and Turkey. Travel, you see, is one of her hobbies. In our own country, she has toured all but eight of the states and has lived in seven.

Building is another hobby and in this respect she has had rather unusual opportunities. She was president of the Alpha Gamma Delta House Assn. when the members of the Wisconsin Chapter built their beautiful home at 220 Lakelawn Place. At Montana State College she has had much to do with the planning of a Home Economics Building and of a most adequate Home Management Home, recently remodeled to provide accommodations for a separately operated Nursery School—the plan followed at Wisconsin.

Before going to Montana, she taught at the Madison High School, Platteville Normal, and the Texas State College for Women. When she first went to Montana, she served as Home Management Specialist in the Extension Service and as State Supervisor of Home Economics. She secured her M. A. degree from Columbia in 1920, her Ph. D. in 1929, and she has also studied at the Universities of Chicago and Washington.

Dr. Branegan, a life member of the Wisconsin Alumni Association, has returned to Madison many times to attend Commencement Alumni meetings, and to visit her sis-

GLADYS BRANEGAN, '13
Outstanding home maker

ter. She belongs to a number of honorary organizations — Phi Kappa Phi, Omicron Nu, Phi Upsilon Omicron and Pi Gamma Nu. She is a member of P. E. O., D. A. R., and has served as State President of the Montana Division of the American Association of University Women. She is a member of the Business and Professional Women, holds a life membership in the Montana and National Education Associations, has for many years been an active worker in the American Home Economics Association, and is

now treasurer of the national organization.

Three years ago, Dean Branegan was closely identified with the construction of unique residence halls at M. S. C.—three buildings, each consisting of two separate houses. Each of the six houses is arranged for ideal study and club life of twenty students, and three have been leased by sororities and three are operated by the college. The food is prepared in a central kitchen and transported to individual dining rooms in each house in electrically heated carts which reach the serving pantries by means of tunnels and electric elevators. Dr. Branegan was chairman of the furniture committee with the result that the quality and distinctive character of the furnishings are surpassed by few college residence halls.

New York

ONCE again the New York alumni club opened its autumn activities with a picnic at Carl Beck's, ex '10, home in Suffern. A good sized crowd attended and enjoyed the tennis, badminton, quoits and baseball games. A dinner was served at 2 o'clock, the net proceeds from this being devoted to increasing the scholarship fund.

The regular schedule of interesting meetings has been arranged by the club officers. Alumni who are not on the club's list should notify secretary R. Worth Vaughn, '28, 120 Broadway, and they will be sent notices of all future affairs.

Toledo, Ohio

THE Toledo Alumni club lost no time in getting off to an early start this year by holding its first meeting on October 9. Taking advantage of the crisp fall weather, the group met on a picnic on the Harold Anderson Farms west of the city.

The club hopes to have Harry Stuhldreher and the new dean of the Engineering School, F. Ellis Johnson, '06, as their guests at some future meeting. Wm. T. Shoemaker, '26, is president of the club this year and has as his executive committee Dr. R. P. Daniels, '96, Helen Trettien, '23, Ida Gilbert, '22, and Ethel Hart.

Robert Fulton - Inventor

(Editor's Note: We are pleased to present another in the series of "Representative Americans" sketches as prepared by the late Prof.

Carl Russell Fish in the course by that name. The manuscripts were obtained through the courtesy of Mrs. Fish and Louise Phelps Kellogg, '97, of the Historical Museum.)

ROBERT FULTON was the first great American inventor, a true example of a type which was soon to become prolific. And yet what is an inventor, and does that genus have an American species? It is undoubtedly the American idea that an inventor originates a conception, and then goes to work in a shed, while his family starves, from which he emerges with a new tool or instrument, the profits of which are snatched away by some greedy capitalist. Nearly every great invention is followed by patent suits, rival claims are put forward, and the honor of origination becomes the focus of disputes lasting for generations. The descendants of two possible inventors of one of the more useful things first produced in America maintain today their champion historians, who stock up libraries in support of their receding demigods.

INVENTION is in fact a complicated process, generally extending over several generations, and occupying many minds, each making its own contribution. Who then is the inventor? The discovery of fundamental principles belong to science. Benjamin Franklin is distinctly an exception in applying practically the results of his theoretical conclusions. The characteristic American inventor has been the mechanic rather than the scientist. Priority is of little importance. It is interesting to know that so many modern processes were known to the Chinese contemporaries of Julius Caesar; but in very few cases was there any casual connection. The Italians of the Renaissance conceived again these and many more devices; but for the most part their work and their ideas were totally unknown to

*Artist, thinker, engineer, here's
America's first great inventor*

those who reoriginated similar ideas in the eighteenth and nineteenth centuries.

Some inventions are clever tricks, the creation of untrammelled minds. Americans have been particularly apt in such contrivances, which have a fascination, because their paternity is so patent, and their influence so clear cut. More often dozens of isolated men have worked doggedly, with few moments of illumination, and the work of each has seemed futile and is forgotten, until some more complete, and perhaps less original, mind has combined their results. In the case of most American inventions, paternity has been very dubious, but their mother has been necessity. Some wide-felt need has set scores to work, and out of the seeming wastage of experiment, a working model has emerged, associated, as often by accident as by merit, with some individual.

IF IN confining the term inventor to the mechanic, we recognize the scientist, as perhaps a grandparent, some recognition must be given also to the entrepreneur. Mechanics must be fed and supplied with materials often expensive. In many instances American inventors have needed persuasive power to win support, and an understanding mind to which to address themselves. Even perfect models are practically useless until they can be manufactured and sold. The American public has become, in mechanical things, like the Athenians, eager to see and hear any new thing; but to a large extent this is a cultivated taste, and even now the advertising of a new product costs more money than its development; and this also requires a certain amount of brain power. The reaper is one of the few instances of an American product where invention and marketing were in secure hands; and these were of a family rather than of an individual.

Tom Paine remarked of the Revolution that "it energized invention and lessened the catalogue of

by the late
Carl Russell Fish

impossibilities." One of those who felt this inspiration and release, was young Robert Fulton. Robert's first outstanding characteristic was that he could do things well with his hands, unusually well. The natural thought for such a youth, at least one with ambition, was portrait painting. That portrait painting should have been a first step in the career of so many American inventors, does not indicate artistic impulse later thwarted by the pressure of grosser interests. It was a good profession. One of the universal offshoots of the desire for immortality is that of putting over images in some material more lasting than flesh and blood. Methods have changed with conditions. By the time of the Revolution there was enough wealth to indulge this desire in a manner that might indeed encourage art; but art was a secondary consideration. How many just and careful portrait painters, not only in America, would have made better mechanics had the reward induced them! It was only when the representation of the features became mechanically possible, that art and the portrait came to be considered as complimentary. At the time of the Revolution most American communities possessed their portrait painters, whom they supported fairly well and to whom they gave a social recognition denied to proficient in the other handicrafts. It is possible that Fulton studied with Charles Willson Peale, chief conservator of the lineaments of Philadelphia, Pennsylvania.

LIKE other Pennsylvania lads he was encouraged by Benjamin Franklin to push his studies abroad, and went to London where he was received and taught by that other Pennsylvanian, Benjamin West. He wrote home: "Painting requires more studying than I at first imagined." His work was characteristic. It was good, but its qualities were careful execution and strong composition. Mentally he was sentimental. Aside from portraits he preferred

bodies on the night before the execution, as Lady Jane Gray. His sentiment, however, did not get into his brush. Soon other things began to stir his brain. His work brought him into contact with noblemen who were projecting vast changes, the Duke of Bridgewater and Earl Stanhope. In London he met Robert Owen and the poet Coleridge. With a saving practicality he bridged himself from one career to another. In 1794 he went to Paris and gave that capital its first premonition of the moving picture, a Panorama, which he himself painted, catching the thought from one which had been opened in London.

THE new visions which engaged him were of improved transportation. He toyed with all its problem, including that which had not yet been solved, free trade. His first interest, however, was in canals, which were then, under the impetus given by the Duke of Bridgewater, exciting England. With considerable innocency as to what had been done in the past, he worked on plans for locks and boats. Perhaps his digging machine was a real contribution, although he did not carry it to perfection. While pressing his inventions upon the English promoters, he was constantly aware of the possibilities of his own country. He saw commerce everywhere gliding over smooth water. "In America," he wrote, "many of our Lines will be through forests."

At thirty Fulton was evidently a personage.

ANNE EMERY HALL

One of the popular women's dormitories

BASCOM HALL ENTRANCE

He had accomplished no notable deed, but his knowledge was broadening, his ideas flowing more rapidly but without blunting the careful exactitude of his detailed work. His plans commanded the attention of men of knowledge and power, his manner and personality made him acceptable to them. In Paris he was taken up by Joel Barlow, the first publicity man, then in the heyday of his hopes of transplanting French culture to the Ohio. Ever responsive to the call of the times, Fulton now turned his attention to war. He experimented with torpedoes and with submarines. His results were negative, but not without value. His submarine was so good that it may be said to have proved that such vessels were impracticable unless some power other than their own or the wind were to be used. He was patronized by Napoleon and conducted trials, not quite successful, but astonishing, on the Seine and at Brest. Any moment he might succeed, and success might destroy the naval power of Great Britain. Simultaneously Napoleon threw him over and the British Admiralty concluded that this potential terror

must be removed from the hands of the enemy. In 1804 he recrossed to England. The British were not so anxious to torpedo French ships, which were mostly in harbor, as to prevent the torpedoing of their own. They did little to facilitate Fulton's plans, and, after Trafalgar sealed up France, they dropped him. Nevertheless he received £15,000 for his services.

IN Paris he had become intimate with Robert Livingston. Both were interested in the possibilities of steam power for water transit. Livingston had invented a steam engine, and possessed a charter from New York giving him a monopoly of steam navigation in that state. In 1804 Fulton was free from entanglements and possessed an income of five hundred pounds. Livingston retired from his embassy to cultivate his estates and the tastes and interests of America. They united in giving their attention to making practical the steam-driven boat, which since Independence had occupied the attention of such men as Rumsey, Stevens, Fitch, and their backers. Success had been in sight, but had not been realized. It was a work not

requiring striking originality, but ready ingenuity, care, and a balanced capacity for visualizing the coordination of many complex parts. It was exactly adapted to the matured Fulton, and was brought to a climax in 1807, when his *Clermont* steamed steadily and swiftly up the Hudson, with an engine small enough to allow space for passengers and freight. It was not one invention, but a summary of many. If one be inclined to minimize Fulton's part in the steaming, let it be remembered that other things about the *Clermont* were new and potent. His plan of passenger accommodation foreshadowed the long saloon with berths on the side, in which Americans have since then travelled, whether by river or canal or the later railroad.

FULTON continued to build bigger and better steamboats until the War of 1812 again turned his thoughts to war. Among his many suggestions, the one carried out was a sort of floating battery propelled by steam, the plans for which seem to have been the most elaborate and perfect of his works; the first

steam vessel of war. Peace in 1815 destroyed interest in it, and a rival which the British government was constructing, was never completed. In the same year, at the age of fifty, Fulton died.

TODAY we would call him a great engineer with a maturing capacity. His mind was highly original, but he was not an historian and was not always aware that what was original with him was not new to the world of ideas. His special greatness was perhaps his vision which directed the employment of his abilities towards major needs. His work on canals was a little premature for the wealth of America, though had he lived ten years longer he might well have left his greatest reputation in connection with the Erie Canal, on which he would almost certainly have been employed. His ideas of naval warfare were slightly in advance of the scientific development of his day, though had the War of 1812 been prolonged his steam battery might have equalled the sensation of the *Monitor*. If it had not been for Rumsey, Fitch, and Stevens his work in steam navigation might also have been untimely.

For his success he should receive full credit, but his *Clermont* should not obscure the greater reputation he deserves as a man competent to handle new tasks which humanity desired.

From his boyhood onward his personality commanded increasing respect, and for many years raised him higher and higher without specific achievement.

Plans Social Science Studies

THE first meeting of the Social Science Committee of the Alumni Association under the chairmanship of L. C. Wheeler, '91, was scheduled for October 20. In addition to Mr. Wheeler, the following have been announced as committee members: R. F. Lewis, '15, superintendent of schools at Waukesha; E. C. Kraemer, prominent leader in state P. T. A. circles; Prof. R. J. Colbert, associate professor of economics and sociology in the Extension Division; and Jefferson D. Burrus, '27, Milwaukee attorney.

The committee will lay plans for the introduction and operation of the plan for group studies of social problems and their solutions in alumni clubs about the country. This plan was originated by the class of 1891 and has been sponsored by them, backed wholeheartedly by Mr. Wheeler.

TRIPP HALL OF THE MEN'S DORMITORIES

The University Theater Comes of Age

by
Lee Simonson

WHEN the history of college education in this country during the last twenty-five years is written, it will be found, I think, that the study of the modern theatre, in both its technical and literary aspects, has been one of the few important additions to the liberal arts curriculum. The innovation probably began with George Pierce Baker's pronouncement — a revolutionary credo in 1900 or thereabouts — that contemporary plays by Henry Arthur Jones, Pinero, Clyde Fitch, among others, were an important field for critical study, even though none was a literary masterpiece. Whatever their shortcomings, they represented the effort of the contemporary theatre to interpret contemporary life—without that effort no theatre could remain vital. If more important plays were to be written, performed, and appreciated, that progress could only be expediated by analyzing what living play-wrights were trying to do, what they had succeeded in doing, what they had failed to do. Fortunately the study was not entirely clinical. The importance of Ibsen was, at the time, beginning to

(Editor's Note: Lee Simonson, theater consultant for the proposed addition to the Memorial Union and author of the accompanying article, is an internationally acknowledged authority on the theatre. Harvard graduate of Baker's famous Workshop 47, actor and painter, he has become a founder and director of the Theatre Guild, designer of more than 75 major theatrical productions, member of the school auditorium and theatre committee of the National Council of School Building Problems advising the U. S. Bureau of Education, theatre editor for Encyclopedia Britannica, and author of standard reference works on theatre history and stagecraft.)

be grudgingly admitted even in academic circles, and the plays of Shaw, Synge, and Yeats, then beginning to appear at the bookshops, offered more literary intellectual stimulus than the accredited bauderies and the creaking and borrowed technique of Farquhar and Wycherly, on which supposedly important doctor's theses could be written *ad infinitum*.

That breach in the walls of academic self-sufficiency and seclusion was a salutary one. The influence that flowed through it were invigorating. For the important plays of the day were "problem" plays, constituting what has since been called "the theatre of ideas." Some students of the theatre inevitably found themselves discussing and analyzing the social, intellectual, and moral alternatives that were confronting all their contemporaries. This stimulus very naturally began to breed playwrights, and academic credit began to be given for the writing of a one act or a three act play as well as for a thesis on the Poetics of Aristotle. Once the plays were written it began to be obvious that they had to be performed: their dramatic values could not be judged on paper. The necessity for a laboratory or workshop theatre at a university became apparent. The integration of the study of the modern theatre was thereby established: the art of playwrighting in contemporary terms was analyzed, the writing of plays attempted, and their values tested, as the value of any play has to be tested, in performance.

THE theatre is probably the only field of modern art that has been vitally influenced by the American university. The number of important playwrights, directors, and designers who have created the modern American

theatre, who passed through Bakers' hands and have publicly acknowledged their indebtedness to him, is too well known to need repetition. At about the same time Mabie of Iowa was encouraging his students to interpret indigenous material and founded a school of regional playmakers, which his pupil Koch successfully expanded in his Carolina Playmakers, who in turn, not only produced several "Broadway" playwrights of distinction but helped to establish the value of first hand observation of the American scene and American character that has also become an important influence in contemporary playwrighting. Today the department of drama is an expanding one at almost every college and university of importance, and a theatre, either built or planned, has come to be almost as accepted a part of the university plan as the gymnasium or the science laboratories.

DESPITE their indisputable success, departments of the drama were, at the outset, suspect as illegitimate and dangerous parvenus. The gymnasium that might turn out a record making sprinter or a pole vaulter was the natural receptacle for a million-dollar endowment. But a university theatre that had bred several important playwrights was literally kicked upstairs or shoved into a hole in the wall into some antiquated, inadequate, or dilapidated building that no other university department could find use for. But within recent years this picture has changed. The university theatre has begun to lose its amateur status and acquire a professional one, and the need for adequate stages professionally equipped has begun to be so generally recognized that they are being built. In many instances, playgiving having become established as part of primary and secondary school education, schools and high schools have antici-

universities by building ample stages with complete scene shifting equipment and adequate switchboards. Obviously university graduates who are to direct school and high school dramatics need to be trained in theatres as well equipped if they are to direct them. The professional "Broadway" theatre has come more and more to look to the university theatre for its recruits, particularly for its technicians and more recently for some of its actors. With the breakdown of "the road," the permanent company, and the abandonment of most local stock companies, the Broadway theatre is less and less prepared to give any training whatever. The pressure of the four week rehearsal period is such that no one can take time to instruct an apprentice, even a talented one. He is too expensive to use even if he works free. He must have had a certain amount of experience elsewhere, must know "what it is all about." The college graduate who has had a few years training in the technical routine of productions on an adequately equipped stage is far more likely to get the job of assistant stage manager than the graduate of a hole-in-the-wall college theatre to whom a "light plot" and twenty light cues to an act is still news.

THE plan and equipment of the new Wisconsin Union theatre recognizes that the university theatre has come of age. It will be professionally equipped with a counterweighted scene shifting equipment, a stage large

A SCENE FROM "EXCURSION"
A milestone in Bascom theater history

enough to encourage not only University productions of every kind but to house visiting professional companies as well, no matter how "heavy" or elaborate their production, dressing room space sufficient for 20 principals and two chorus dressing rooms for 25 or more "supers" or "extras." The lighting equipment planned will be as ample as the Theatre Guild's and as a result of the recent improvements in switchboard mechanics as flexibly controlled, with less apparatus. A student who can light the stage or manage a production here should be able to handle his end of any professional production anywhere. Nevertheless all the lighting equipment as well as the switchboard control will be light in weight, extremely compact, and simple in operation, and easy for students to operate. The smaller stage of the laboratory theatre is planned for a more experimental type of production. Here the handling of elaborate settings is deliberately discouraged, the intention being that the settings here will be suggestive, formal, and reduced to a minimum. Staging will depend very largely on the plastic integration of movement, voice, and lighting. Light control here will be of the same type as in the main theatre but the control board will be in front of the house. Here the light director may experiment and improvise, or a student, handling the controls, recognize instantly the effect of changes of lighting on the actors in front of him. This small theatre, seating 200, is also convertible for lectures and moving pictures.

Back of the main stage a well equipped carpenter shop and a paint frame that can handle drops up to thirty feet high is so placed that it can serve either the main stage or the laboratory theatre or both simultaneously. Adjoining it is a well lighted costume workshop with a connecting dyeing room and wardrobe storage. The theatre in short is a complete workshop for every type of university production.

THE forestage in the large theatre is planned as an aid to the flexibility. Electrically controlled, it can be sunk to the level of the orchestra floor and temporary seats placed over it. Sunk below the level of the auditorium it can serve as the orchestra pit for musical shows; raised above the auditorium level it will be a forestage for formal or choral productions, such as the revival of a Greek tragedy, or for the directors of university orchestras or visiting soloists, bringing both out from under the proscenium and turning the theatre into a concert hall.

The auditorium will have a seating capacity of 1300 divided almost equally between orchestra and a single balcony. The rear of the orchestra will be raised like a short amphitheatre so that spectators in the rear will not feel pocketed and enjoy excellent sight lines. Sight lines have been carefully considered throughout. The last row of the balcony will not only have a full view of the front of the forestage but be able to see several feet over any actor's head at the rear of an average set

even when the front curtain is trimmed only 12 feet high. The auditorium is so planned that it can be conveniently subdivided, part of the orchestra or the balcony being cut off when smaller than capacity audiences are expected.

The connection of the theatre unit with the present activities and layout of the Wisconsin Union has been carefully considered. Backstage and workshop areas have direct access to

A SCENE FROM "HIGH TOR"
The small stage cramped the style

the lower level of the Union so that students working backstage can get a bite at either the Refectory or the Rathskeller without going through the main lobbies. The entrance from Langdon Street will lead directly either to the little theatre or to the lobby of the main theatre; it will be an automobile entrance as well, connecting directly with the main level of the present Union, so that those coming to dance or to dine there can enter without climbing wet or icy steps in stormy weather; and anyone dining at the Commons will be able to walk directly to the theatre lobby through these same corridors without having to leave the building. The theatre lobbies have been kept ample throughout so that the entrance promenade can be a pleasant social event.

CONTACT with the professional theatre is an important aspect of the general scheme. "Broadway" has come to feel the need for the audiences that it has neglected in recent years. The Theatre Congress held in New York in May, 1937, may prove historic: actors, directors, authors and stagehands disagreed violently about every aspect of the theatre but one: they were unanimous in their demand for reviving the road, and appointed permanent committees to recommend ways and means for leading professional companies on tour to play cities that they do not visit now. The surest way for committees to encourage such visits is to provide adequate theatres technically equipped to handle scenery expeditiously as well as to provide ample seating capacity. If the stage floor and stage house are ample, the show can be gotten up in time for the curtain and without excessive labor costs. On a cramped or badly equipped stage it cannot. Therefore there is every reason to hope that the Lunts, Katherine Cornell, Helen Hayes and other leading players on a

transcontinental tour will make the Madison theatre one of their regular stops, and that a series of dramatic performances will be as much of a feature of the academic year as the concert series already is. During the summer term the theatre should attract some group of the younger professional players who run the better summer playhouse along the Atlantic Coast, and a summer theatre festival, in addition to student productions, would become an annual event. An annual dance festival might easily be made part of the same summer program.

THIS new addition to the Wisconsin Union will be a community centre, where not only the student body can have the fun and the stimulus of giving plays under conditions that will make for sound technical training, but where they, the faculty and all of Madison as well can enjoy, the year round, the best that modern music, modern dance and the modern theatre can provide.

The very location of the new theater is most fortunate. Close to the center of student activities, a constant increase in the interest in theatrical work should soon result. Then, too, the beautiful vista over Lake Mendota will give patrons an opportunity to relax during intermissions, not crowded in a smoke-filled, inadequate lobby as is generally the case, but in an ample corridor with more than bare walls to stare at.

FROM "EXCURSION" BY VICTOR WOLFSON, '31
He jumped from Bascom to Broadway

Threefold Service

NOWADAYS many projects and activities have won recognition as essential to the public welfare, and as such receive public support. Most of these new social and economic programs, however, are infant enterprises when compared with public education and public assistance to agriculture. Very early in the history of our nation the American people not only decided that education and the promotion of agriculture were essential to the national welfare; but they gave effect to this conviction by enacting legislation, and establishing governmental agencies and programs, specifically designed to accomplish the desired objectives in these two fields.

The state of Wisconsin has given two state agencies responsibility for serving the state's farming industry and farm people. The State Department of Agriculture and Markets at the Capitol is in charge of the enforcement of laws affecting agriculture that have been passed by the Legislature. Their's is the job of regulation and control. They promulgate and enforce plant and animal quarantines. They inspect barns and dairy plants. They supervise the grading of farm products. They regulate the agencies buying things the farmers sell.

THE University, on the other hand, has been given the task of education and research in the field of agriculture. In certain phases of this agricultural education work it shares the task with the State Teachers' Colleges, with the State Board of Vocational Education, and with all the schools throughout the state. It is the sole agency charged by the state with the task of agricultural research.

Like all Gaul, the College of Agriculture in the University is divided in three parts. First, we have resident teaching which includes not only undergraduate instruction in agriculture and home economics, but also the Winter Short Courses, particularly the Farm Folk School you have heard much about recently.

(Editor's Note: The above is taken from a speech made by Mr. Clark at the annual schoolman's conference called by the State Superintendent of Instruction in September.)

This year we have about 750 undergraduate students in agriculture, and about 550 in home economics. There are nearly 300 graduate students majoring in agricultural or home economics subjects. Because of the success our graduates have had in finding employment, even during the depths of the depression, the enrollment in our College has been growing at a rate much faster than for the University as a whole.

Second, the Agricultural Extension Service has the task of adult, and out of school, teaching in the rural areas. The county agricultural agents, home agents and 4-H club

agents, make up the major portion of the University's staff in this program, but we also have agricul-

tural extension specialists attached to our various departments here at the University, who travel the state bringing technical information and guidance to the county agents, to the agricultural marketing associations, and to a less extent directly to individual farmers.

The third agricultural division of the University is the Agricultural Experiment Station. In some states the experiment station is located in another city than the agricultural college. Back in 1883, when our Wisconsin Station was started, our Legislature fortunately was able to rise above pork barrel politics, and refused to be swayed by the old cry that state agencies should be passed around among the various parts of the state. The Legislature gave the Agricultural Experiment Station separate identity and authority, but placed it under the supervision of the University Board of Regents.

THE Station conducts both fundamental and applied research in the natural and social sciences. It operates experimental farms for field tests at Madison, and also at Hancock, Sturgeon Bay, Marshfield, Spooner and Ashland. The University owns, and operates in cooperation with the U. S. Department of Agriculture, a branch station near La Crosse, to learn more effective methods of reducing and controlling soil erosion.

Many of those on the staff of the Agricultural Experiment Station also teach in the College of Agriculture, and some are likewise engaged in agricultural extension work. There

by
Noble Clark '15

Associate Director Agricultural Exp. Sta.

is a close coordination between the teaching activities of the College of Agriculture, the research of the Agricultural Experiment Station, and the off-campus education work of the Agricultural Extension Service.

THERE is not time to list and describe all of the services of the College of Agriculture to the people of the State of Wisconsin. Beginning with the invention of the Babcock test for measuring the fat in milk, the Experiment Station has harnessed science, and made it work for farmers. The round silo, the King system of barn ventilation, the cold curing of cheese, the development of improved strains of virtually all our Wisconsin crops, the control of devastating plant contagions by evolving disease resistant strains, the discovery of effective methods of controlling destructive insects; these and a hundred more accomplishments are evidence of the effectiveness of the Experiment Station in its program of helping to put a scientific foundation under the world's oldest, and still its most important, industry—farming.

Nor do the benefits of agricultural research flow just to farmers. American consumers today have foods available to them of higher quality than kings or millionaires could buy 50 years ago. Fresh fruit and vegetables are on our tables the year around. They no longer come only during a short local season when they are a glut on the market, and the rest of the year are either a luxury for the rich, or completely unavailable. Today the American people have a diet that is far and away better than any other similar

group of people ever had in the world's history. Research in the agricultural experiment stations has been the chief factor in making this possible.

But probably the least expected, yet most far-reaching, application of the findings of our Wisconsin Agricultural Experiment Station has been in the field of animal nutrition. It was in our laboratories that some of the pioneer feeding experiments were made that led to the discovery of vitamins.

Our Scientists, McCollum, Hart, Steenbock and others were trying to learn how to improve livestock rations, but their findings with animals have had world-wide influences in explaining human diseases caused by lack of these dietary factors which man needs only in tiny amounts, but which must be regularly present in his diet if he is to avoid sickness, or even death.

YOU have all heard of Steenbock's discovery of the method of imparting vitamin D to foods by simply irradiating them with ultra-violet light. If the public could have peeped in the laboratory door a few years back and observed Steenbock spending his time putting rats and rat food under lamps, and then meticulously weighing his long-tailed rodents, I am afraid they would have had little confidence in him or his work.

Certainly they would have thought you or I were crazy if we had told them then, that what Steenbock was doing would not only save millions of dollars for livestock and poultry farmers, but in addition would provide an inexpensive method for preventing or

ACROSS UNIVERSITY BAY FROM PICNIC POINT

curing human rickets, a disease which doctors tell us for centuries has afflicted more than half the infants and children in the north temperate regions of the earth. Many of these youngsters have mild cases that are only discernable to trained medical men, but soft bones, due to faulty assimilation of lime in the absence of adequate vitamin D, have flattened the chests and bowed the legs of millions of children born in our climate. With the inexpensive methods of prevention now available as the result of Steenbock's studies in animal nutrition, any civilized community can wipe rickets off the list of prevalent diseases just as completely as has been done with small pox and diphtheria.

ANOTHER spectacular *human* application of findings secured in our Agricultural Experiment Station, was recently announced in the national medical journals. C. A. Elvehjem, and his associates of our department of Biochemistry, for years have been studying what is known as the vitamin B complex. Instead of being a single food factor, vitamin B now is known to consist of at least 6 or 8 separate fractions, each having a special and specific effect on animal nutrition, growth, and health. One of them is the so-called anti-pellagra factor.

As you know, pellagra is widely prevalent among ill-nourished people, especially in cer-

tain parts of our Southern States. Not less than 400,000 persons are currently afflicted with the disease, and the death rate is about 70%. Elvehjem and his associates have now separated the anti-pellagra factor in its pure form, and find it to be nicotinic acid. Ten cents worth of this material, or less than a teaspoonful, will cure a case of human pellagra according to recent studies made in southern hospitals.

This fall Elvehjem and his co-workers are hot on the trail of two other new vitamins which seem to exert a great influence on the growth and health of animals. Almost certainly their findings will be useful to those advising farmers about livestock rations. Perhaps, also, their new disclosures may furnish the key that will enable human nutrition workers and the medical profession to prevent and to cure some of the ills to which human flesh is all too easy a prey.

SOME of you are probably wondering how long it takes for the new findings made in the agricultural Experiment Station to find their way to the 200,000 farms of the state; to secure the confidence of the operators of these farms; and to have the new principles adopted in terms of improved farm practices.

This task of disseminating the new information is the responsibility of the Agricultural Extension Service. They have no way of compelling adoption of the better methods of farm and livestock management, as is true in a totalitarian state, for they are limited to the democratic method of winning support of the better methods by educational means alone.

I can give you an interesting exam-

THE ENTRANCE TO AGRICULTURAL HALL

ple in this connection. About a quarter century ago, two geneticists at experiment stations in the East discovered that when strains of corn are inbred for several generations the size of the cornstalks and ears is considerably reduced, as is also the vigor of the plants. When two inbred lines are crossed, however, the resulting hybrid is larger and more vigorous than the original parental stock before the inbreeding process was begun. This is what is called hybrid vigor.

Our Wisconsin Agricultural Experiment Station workers about 15 years ago undertook to develop inbred and hybrid corn strains that would be particularly adapted to the soil and climatic conditions of this state. By 1934 they had a small amount of hybrid seed that was made available to the Agricultural Extension Service for distribution among the farmers of the state. The Extension Service has done such a splendid job of educating the farmers that this year enough hybrid seed is being raised so that next year, five years after the first hybrid seed was released, we expect not less than 50% of the corn grown in Wisconsin will be from hybrid seed.

THIS achievement is all the more remarkable when one recognizes the natural objections farmers can raise to paying a higher price for hybrid seed, (which is inevitable because of the labor and costs involved in producing the low-yielding inbred source material); as well as the disappointment the farmer feels when he learns he cannot save his own seed, but must each year purchase hybrid stock that is not more than two generations removed from the original inbred lines.

This hybrid corn program gives the answer to another question that is sometimes asked, "Why should government supply funds for research and extension work among farmers? Why shouldn't agriculture do these things for itself, as do most other industries?"

I think you know the answer. No farmer could conduct the fundamental genetic research that underlies the whole hybrid corn program. This required technically-trained men with suitable laboratory and field equipment and facilities. Likewise Wisconsin farmers could never have had the quick benefits from the new hybrids if there had been no

EXPERIMENTING ON SUDAN GRASS
Better forage crops resulted

educational work to acquaint them with the opportunities the hybrids opened up to them. The welfare of this nation is so closely tied to the economic progress of the farming portion of the population, and of the agricultural industry, that self interest on the part of the rest of the population dictates the necessity of adequate public support for agricultural research and agricultural extension work.

Abraham Lincoln, in 1862, signed the Morrill Act passed by Congress which created the Land Grant Colleges. The federal lands then given to the several states provided income to help defray the cost of establishing and maintaining colleges of agriculture and the mechanic arts.

SINCE the signing of the Morrill Act, the federal Congress has passed supplemental legislation that has given additional federal aid to teaching in the state agricultural colleges. However, much the larger portion of the more recent federal aids has been earmarked for agricultural research and agricultural extension work. It early became evident that teachers in the new agricultural colleges could not win or hold agricultural students if their instructional material were limited to the old line academic fields such as botany and zoology. The need was for scientific facts based on research close to the farming industry. The Hatch Act of 1887 provided \$15,000 annually for each state that established an agricultural experiment station. (Wisconsin had organized our Station four years earlier.)

The Smith-Lever Act of 1914 supplied the states with federal assistance in carrying to the farmers the new facts discovered in the agricultural experiment stations. This marked the beginning of the Agricultural Extension Service as we now know it. Subsequent acts increased this federal aid for agricultural extension work.

A VERY large portion of the agricultural research and extension work of the University is thus carried forward in close cooperation with, and financially assisted by, the U. S. Department of Agriculture. In fact, during the present year the federal government is giving the University more than \$1.50 for each \$1.00 supplied by the state Legislature for agricultural research and extension work.

Since 1933 the federal government has appropriated hundreds of millions annually to carry forward programs, administered in Washington, which involve direct dealings with individual farmers throughout the nation. These undertakings are in addition to the activities already receiving joint support from federal and state monies and agencies, and about which I have told you. Sometimes we are asked about the University's connection with these new federal programs. Per-

haps I should take a couple of minutes to list the more important of them, and indicate our relationship to each.

The Agricultural Adjustment Administration is a part of the United States Department of Agriculture, and has for its major objective the reduction of production of certain crops and classes of livestock, as well as the stimulation of certain so-called soil conservation practices. The goal is to increase farm incomes and buying power. All authority for this program is vested in Washington, although advisory committees of farmers have been created in each agricultural county, and there is a state committee that oversees the details of the program in the state. The University's only connection with the Agricultural Adjustment Administration program is in the field of education. Our county agents and extension specialists explain to farmers the requirements that have to be met if the Agricultural Adjustment Administration benefit payments are to be secured.

THE Soil Conservation Service is also a part of the United States Department of Agriculture. Its assignment is the reduction of soil erosion, whether from water or wind. The University cooperates with the Soil Conservation Service in research on various

phases of erosion control, and also shares with the Soil Conservation Service in the cost of an educational program which encourages farmers to follow erosion control practices. Most of the Soil Conservation Service money spent in Wisconsin, however, is in certain small erosion control demonstration areas in the western part of the state,

SOME OF THE RESULTS OF STEENBOCK'S RESEARCH
A partial showing of some of the products using Vitamin D licenses

and in this work the University has no direct authority or responsibility.

The Farm Security Administration is another subdivision of the United States Department of Agriculture. It gives direct aid to farmers who are in need of personal assistance from the public. In a way it is the farm portion of the federal government's relief program.

IN WISCONSIN the Farm Security Administration has sought technical guidance from members of the University staff, and has shown a very cooperative spirit. All authority for the program, however, is lodged in Washington, and the University has no direct responsibility.

The Rural Electrification Administration is a separate federal agency seeking to encourage the cooperative ownership of rural electric lines and power plants. The University has held educational meetings describing the role of electricity on the efficiently operated Wisconsin farm, but we have had little direct relationship with the Rural Electrification Administration.

New Badger Books

SEVERAL new books by Wisconsin authors have come off the presses during the past few months. All of them are noteworthy contributions to their respective fields.

Probably most outstanding among the non-fiction books is "Roots of American Civilization" by Curtis P. Nettels, professor of history at Wisconsin. Critics have praised Prof. Nettels' work as not only an accurate historical accounting of the growth of our civilization, but a keen diagnosis of the economic and social life of the earlier days. F. S. Crofts are the publishers. The price is \$5.50.

Interesting among the fiction books is Elizabeth Corbett's, '10, "Light of Other Days." Miss Corbett is fast becoming Wisconsin's most prolific and successful author. "The Young Mrs. Meigs", "A Nice Long Evening", and "The Langworthy Family" reached best seller proportions and "Light of Other Days" warrants the same. The publisher, D. Appleton-Century.

Of particular interest to Wisconsin alumni

is the latest of the Wisconsin Press offerings, "The Early Writing of Frederick Jackson Turner". Turner was for many years a member of the University's history department and hundreds of alumni remember the stern, relentless scholar who taught them American history as no other teacher could. The book contains a preface by Dr. Louise Phelps Kellogg, '97. Orders may be placed through the University of Wisconsin Press or the Alumni Association. The price—\$3.50.

Two textbooks have recently been published by Wisconsinites. "College Spanish", a novel presentation of beginning Spanish by H. C. Berkowitz of the University Spanish department, was issued by F. S. Crofts & Co. late last spring. The price—\$1.60. "The Relation of Moliere to Restoration Comedy" by John Wilcox, M. A. '24, associate professor of English at Wayne University, was released last month by the Columbia University press. Prof. Wilcox attempts to correlate the three schools of belief as to where the Restoration Comedy had its true birthplace. Of real interest to students of literature. The price—\$3.00.

Help Save A Life

INTO battle for the 32nd year will go thousands of volunteer fighters when the 1938 sale of Penny Christmas Seals, which will provide funds for the fight against tuberculosis next year, gets underway in all parts of Wisconsin on Thanksgiving Day.

"Tuberculosis still kills more persons between the ages of 15 and 45 than any other disease, despite the great progress that has been made against the disease," the Wisconsin Anti-Tuberculosis Association states.

Christmas Seals, each bearing the picture of a mother and her two children lighting a candle in the window, will again be sold to raise funds to save the lives of Wisconsin boys and girls and men and women. Free chest clinics, free x-ray clinics, tuberculosis studies in schools and orphanages, public health nursing demonstrations and a general educational campaign on the nature, cause, prevention and treatment of tuberculosis are among the many health services made possible by Christmas Seals.

- ex '26 Virginia Hake, Fort Atkinson, to Earl BINKERT, on August 11, at Fort Atkinson. At home in that city.
- Grad '26 Ruth E. SCHOLES, Moundville, to Leo E. Robleske, Fort Winnebago, on August 13.
- 1927 Sarah J. Williamson, Rushville, Ind., to John M. KRINGS, Cincinnati, Ohio, on September 3, at Cincinnati. Mr. Krings is advertising manager for the Gardner Industrial Publications in Cincinnati.
- 1927 Vera Houle, to Chandler BUSBY, both of Milwaukee, on August 16, in that city.
- ex '28 Loraine White, Spooner, to Alfred K. HOLTZ, Columbus, on July 30, at Spooner.
- 1928 Mary JAMIESON, Milwaukee, to Lawrence Austin, Chicago, on August 27, at Rockford. At home in Chicago.
- 1928 Helen L. Willett, Chicago, to Cecil J. FALLON, Oshkosh, on August 10, at Chicago. At home in Milwaukee.
- 1928 Alice MARSH, Orlando, Fla., to Dr. Lawrence H. KINGSBURY, Orlando, in June. Dr. Kingsbury is chief resident physician at Woodsmere, the state tuberculosis sanatorium, at Orlando.
- 1928 Kathryn A. Yost, Mt. Lebanon, Pa., to Kenneth E. MAXHAM, Reedsburg, on June 14, at Madison. At home in Haugerstown, Md., where he will teach.

- 1928 Helene Hawkins, Goodland, Kans., to Dr. Robert T. MORSE, Chicago, on June 30, at Topeka, Kans. At home at Chestnut Lodge, Rockville, Md.
- 1928 Elizabeth CURRY, Baraboo, to Frederick C. Fisher, Jr., Cedar Rapids, Ia., on June 25, at Baraboo. At home at 3425 First Ave., East, Cedar Rapids.
- 1928 Martha THOMPSON, to Leslie Hanson, both of Superior, on June 14, in that city. At home at 1101-18th St., Superior.
- 1928 Ethel F. Foley, Randolph, to Paul T. CODY, Highland, on June 27, at Randolph.
- 1928 Velma L. Melchert, Ellsworth, Kans., to Milton W. SCHACHT, Racine, on June 8, at Ellsworth.
- 1929 Pearl Jones, Evanston, to Donald A. KURZ, Appleton, on August 20, at Evanston. Mr. Kurz is assistant to the commandant of cadets at Morgan Park Military Academy.
- 1929 Rose Christopher, La Salle, Ill., to Julius MILLER, Elgin, on August 9, at Joliet. At home at Meadville, Pa., where Mr. Miller is professor of arts at Allegheny College.
- 1929 Grace Tetzlaff, Milwaukee, to Wilbur MAVES, Richland Center, in June, at Milwaukee.
- 1929 Esther M. Steele, Des Moines, Ia., to Dr. Russell C. MORRISON, Madison, on June 27, at Madison. At home at 202 N. Pinckney St., in that city.
- 1929 Grace Belke, to Eugene RAGATZ, both of Milwaukee, on June 29, at Waukesha. At home in Milwaukee.
- 1929 Ruth J. Hauck, Fort Dodge, Ia., to Frederick L. FOX, Superior, on July 16, at Nashua, Ia. At home in Wausau.
- 1929 Margaret M. Reinhardt, to Henry W. VIETMEYER, both of Milwaukee, on June 25, in that city. At home in Milwaukee.
- 1929 Helen H. Atwell, Tidioute, Pa., to Joseph A. BLATECKY, Milwaukee, on August 13, at Milwaukee.
- 1929 Maybelle Wilson, Sheboygan, to Reuben FISCHER, Cleveland, on June 25, at Cleveland. At home at 2004 S. 17th St., Sheboygan.
- 1929 Margaret J. Stamm, Wauwatosa, to John H. DAHLMAN, Milwaukee, on August 6, at Milwaukee. At home at 1428 E. Capitol Dr., in that city.
- 1929 Mary E. White, Sugar Creek, to E. Robert SHEARD, Milwaukee, on June 1. At home in Elkhorn.
- 1930 Clemence De Graw, Los Angeles, to Frederick JANDREY, Rome, Italy, in July at Rome. Mr. Jandrey is vice-consul at the American Embassy.
- 1930 Leone Stacey, Tucson, Ariz., to Dr. Emil KUHE, Salt Lake City, on August 24, at Pacific Grove, Calif. At home in Salt Lake City.
- 1930 Margaret V. Hart, Madison, to Dr. Russell H. LARSON, Wausau, on July 15, at Madison. Dr. Larson is associated with the Department of Plant Pathology at the University.
- ex '30 Lucile MANSER, to Melvin Manier, both of Appleton, on June 4. At home at 507 N. Division St., Appleton.
- 1930 Carol MASON, Milwaukee, to Neville T. Kirk, Pleasantville, N. Y., on August 14, at Mt. Kisco, N. Y. At home in Pleasantville.
- 1930 Helen M. McGURK, New York City, to Keith Brown, Toulon, Ill., on September 3, at New York City. At home in that city.
- 1930 Myra C. Hayward, Hawthorne, N. J., to Frederick W. MIEBACH, on June 24, at Passaic. At home at 439 Broadway, Paterson, N. J.
- 1930 Dorothy E. Shannon, Chicago, to David S. MORRISON, Rockford, on September 7, at Peoria. At home in Chicago.
- 1930 Ruth McShirley, Oakville, Ind., to V. G. MOSER, Muncie, on August 14 at Oakville. At home in that city.
- 1930 Emmy L. Clifford, Watertown, to Kenneth E. PORT, on July 12, in that city.
- 1930 Ruth A. Railsback, Langdon, Kans., to Gustave E. ARCHIE, Waterloo, on July 30. Mr. Archie is an engineer for the Shell Petroleum Co.
- 1930 Janet SMITH, Wauwatosa, to Carl W. ex '34 MOEBIUS, JR., Milwaukee, on July 2.
- 1930 Ruth K. Bliese, to Newton H. WILLIS, both of Waukesha, on June 25. At home at 1108 Grant St., Waukesha.
- 1930 Harriet Perry, Forestville, to Leo GEHRKE, Mayville, on August 3, at Algoma. At home at 12 S. School St., Mayville, where Mr. Gehrke is editor of the Mayville News.
- 1930 Bernice E. Bliss, Madison, to Edward A. FREDERICKSON, JR., Madison, on September 6, in this city. At home at 106 S. Hancock St.
- 1930 Ruth ALBRIGHT, Columbus, to Harlan E. Seaver, Salisbury, N. C., on July 16, at Columbus. At home in Madison.
- ex '30 Ruth H. Eberts, Benton, to Rolland G. HEBERLEIN, Fennimore, on June 16, at Benton.
- 1930 Rosella FRANSEEN, Madison, to Dr.
- 1934 Harvey J. RASZKOWSKI, on July 2, at Madison. At home in that city.
- 1930 Mary Isabel Potter, Henry, Ill., to John W. BAILEY, on August 20, at Minocqua.
- 1930 Margaret P. FINK, Racine, to Havens

- 1929 K. WILBER, Madison, on June 25, at Racine. At home at 522 N. Pinckney St., Madison.
- 1930 Lucille M. SCHWINGEL, to Dr. Carl A. FOSMARK, Wittenberg. At home in that city.
- 1930 Royetta M. SMITH, Madison, to Arthur L. Steinhaus, on June 22, at Madison. At home at 2152 Fox Ave.
- 1931 Dorothy STANGEL, Manitowoc, to Gerald McKEEVER, Stiles, on June 11, at Manitowoc. At home at Sturgeon Bay, where Mr. McKeever is an instructor at the high school.
- 1931 Marcella Bassett, Lena, to Robert BIEHL, on June 20, at Lena. Mr. Biehl is principal of the Lena High School.
- 1931 Dorothy M. Read, Polo, Ill., to Rev. Richard P. GRAEBEL, on July 31 at Polo. At home in the Presbyterian Parsonage at Polo.
- 1931 Elizabeth KAFTAN, Green Bay, to George MUENCH, Algoma, on August 20, at Manitowoc. At home at 1175 Lawe St., Green Bay.
- ex '31 Alice Scharenbrock, Willard, to Herbert KURTH, Neillsville, on June 18, at Chicago. At home in that city, where Mr. Kurth is associated with the Schumacher Motor Express of Chicago.

345.49 Miles Per Hour

WHEN Capt. George E. T. Eyston of England drove his seven-ton Thunderbolt to a new world speed record over the gleaming stretches of the Salt Flats near Salt Lake, it was Dr. H. T. Plumb, '01, who was to a large degree responsible for making this phenomenal event a success.

Dr. Plum has been district engineer for the General Electric co. at Salt Lake City for 26 years. Part of his studies have been on timing devices, particularly with the use of the electric eye. Because of the tremendous speed attained by Capt. Eyston, no mechanical timing device could ever be accurate. It was up to Dr. Plumb to perfect something that would be faultless. He did just that.

Dr. Plumb spent three days at Salt Flats, working almost without food and sleep along with others in a feverish attempt to combat speed and light reflection. On the belief that sunlight neutralized the beam of the electric eye, the officials painted a huge black line across the track at the ends of the mile course and set up a black barrier across the course to shield the photoelectric cell from the sun's reflection on the salt.

The electric current was shut off before the run and flagmen a mile down the course signaled the car's approach so that the power could be switched on about 10 seconds before the car was to enter the mile. This policy, it was pointed out, "rested" the photo cell.

In his anxiety over the performance of the apparatus, Dr. Plumb left his post in the timing tower and took up his vigil near one of the electric eyes as the car hurtled up the course. He stood within two car lengths of the track when the machine thundered past him at nearly 500 feet a second.

"It was one of the most remarkable experiences I have ever had," he said at the conclusion of the successful assault at the record. "It would be impossible to manually operate these timing traps. The car had come and gone before a man could lift his hand."

- 1931 Avis L. Gilmore, Elkhorn, to Robert J. KENNEY, on July 2, at Elkhorn. At home at 15½ E. Court St., Elkhorn.
- 1931 Sarah M. Mills, to Willard T. McLAUGHLIN, both of Helena, on June 30, at Seattle. At home at Warrenton, Ore.
- 1931 Frances LUNDGREN, to Paul H. SCHERMERHORN, both of Milwaukee on June 25, at Madison.
- 1931 Muriel PREBLE, Grinnell, Ia., to Ralph W. Childs, Waterloo, Ia., on September 5, at Davenport. At home in Rock Island, Ill.
- 1931 Alice DIERKER, to Dr. Harvey G. E. MALLOW, both of Watertown, on July 21. At home in that city at 1216½ Main Street.
- 1931 Arlyle Iserloth, Plymouth, to Donald GOODLAD, Milwaukee, on September 10, at Huntingdon. At home at 4037 N. 17th St., Milwaukee.
- 1931 Rosalie BUCKLEY, West Bend, to Dan O'Meara, Sturtevant, on June 29. At home in Sturtevant.
- 1931 Beryl CARLSON, Rhinelander, to Joseph E. Helfert, Beaver Dam, on June 25, at Rhinelander. At home in Beaver Dam.
- 1931 Julia WIGONITZ, Madison, to Philip Blacklow, Boston, Mass., on August 30, at Washington, D. C. At home in Washington.
- 1931 Dorothy THORNE, Woodstock, Ill., to William WEERS, Evanston, on June 28, at Evanston. At home in that city at 803 Simpson Ave.
- 1931 Jeanette GREGORY, Chicago, to Godfrey MILLER, on June 4, at Manitowoc. 1928 At home in Chicago. Mr. Miller is associated with the Massey and Miller law firm.
- 1931 Evelyn Churchill, to Harold F. UEHLING, Lowell, on August 20, at Fremont.
- 1931 Luzia HATZ, Bangor, to William C. 1929 GREENWALT, Milwaukee, at Milwau-

- kee, on August 25. At home in Milwaukee.
- 1931 Grace M. BRENNAN, Valders, to Dr. William P. Curran, Antigo, on June 18, at Manitowoc. At home in Antigo.
- 1931 Florence Spencer, Madison, to Robert C. BORN, Fond du Lac, on September 24, at Madison. Mr. Born is a member of the law firm of Reed, Reed, and Born at Ripon.
- ex '31 Estella M. ANDERBERG, to William J. Dyhr, both of Madison, on June 18, at Madison. At home at 125 E. Gorham St., in that city.
- 1931 Elisabeth Mutimer, Rockford, to Joseph ALUSIC, Elmhurst, on July 30, in Rockford. Mr. Alusic is a radio engineer with the NBC in Chicago.
- 1931 Lillian Horton, Wauwatosa, to Roger J. ALTPETER, Madison, on September 10, at Wauwatosa. Mr. Altpeter is on the faculty of the University.
- 1931 Gladys SHUCK, Spokane, to William H. Scanlan, San Francisco, on August 18. At home in San Francisco.
- ex '32 Renee E. Silverman, to Herbert HORWITZ, on August 21, at Chicago. At home at 5047 Waterman Blvd., St. Louis.
- 1932 June R. HEJDA, Winnetka, to Giles A. Eldred, on June 25, at Winnetka. At home in Rogers Park.
- 1932 Alice E. JONES, Madison, to Verner C. O'NEILL, Barneveld, on August 1, at Madison. At home in Barneveld, where Mr. O'Neill is principal of the high school.
- 1932 Inga Walhus, Madison, to Dr. Walter JAESCHKE, Madison, on September 3, at Rockford. At home in Madison at 739 E. Gorham Street.
- 1932 Elizabeth KYLE, Beloit, to Edgar L. Obma, Madison, on July 2, at Beloit. At home in Madison.
- 1932 Katherine V. May, Madison, to Dr. Howard J. LANEY, Prescott, on August 20, at Madison. At home at Prescott where Dr. Laney is a physician.
- 1932 Jane LOVE, to Dr. William H. Frackelton, both of Milwaukee, on June 18, at Milwaukee.
- ex '32 Florence L. MAUERMAN, Brodhead, to William H. Behrens, Walworth, on July 16, at Brodhead. At home at Walworth.
- 1932 Marcia McKENNA, to John T. HARRINGTON, both of Madison, on June 12, at Madison. At home at 1430 Mound St. Mr. Harrington is associated with Hill, Beckwith and Harrington.
- ex '32 Maryalice Riley, to Warren MEAD, both of Milwaukee, on September 8, at Milwaukee. At home in that city at 1718 N. Prospect Ave.
- ex '32 Ethene REARDON, Hurley, to Karstens Kennedy, Ironwood, Mich., on August 11, at Hurley. At home in Bismarck, N. D.
- 1932 Ethel REID, Genoa, to Glenmore Thompson, on June 21, at Genoa. At home at Menominee, Mich.
- 1932 Evelyn Blaska, Madison, to Jerome A. OWENS, Madison, on September 3, at Sun Prairie. At home in Madison at 333 W. Washington Ave.
- ex '32 Jeanette Mahnke, to Carl W. ROTH, both of Sheboygan, on June 15, at Green Bay. At home at 1932 N. 9th St., Sheboygan.
- ex '32 Lila B. SHAUB, to Rolland J. PETERSEN, both of Madison, on July 27, in

Gopher President

ACTING president for the past year, Dr. Guy Stanton Ford, '95, has been named president of the University of Minnesota by the school's board of regents. Dr. Ford assumed his acting president's duties when the late Dr. Lotus D. Coffman became ill. With the latter's death, Dr. Ford was tendered the official position.

Following his graduation from Wisconsin, Dr. Ford studied and traveled in Europe. He returned to get his Ph. D. from Columbia. His next assignment was associate professor at Yale. From here he moved to Illinois in a similar capacity. These two positions led to his appointment as department head at Minnesota, and subsequently to the deanship of the Gopher's graduate school.

Dr. Ford was accorded an honorary LL. D. by Wisconsin in 1933.

- this city. At home at 1024 Conklin Pl.
- 1932 Marian L. Rice, Portage, to J. Kenneth EVERS, Sharon, on September 9, at Dubuque. At home at 334 W. Main St., Madison.
- 1932 Alice DIETERLE, Honey Creek, to My-nard W. BESSERT, Milwaukee, in August. At home in Milwaukee at 3277 S. Delaware Ave.
- 1932 Verena Leisen, Menominee, Mich., to Harry E. WHITE, Marinette, on June 4, at Marinette. At home at 1317½ Pierce Ave., Marinette.
- 1932 Joyce Hover, to Marvin FRANCOIS, both of Belleville, on August 9, at Belleville. At home in that city.
- 1932 Fleuroung E. ENGELS, to Harlow N. Stollenwerk, both of Kenosha, on July 26, at Kenosha. At home at 826-62nd St.
- 1932 Lenore ALDINGER, New York City, to 1937 Douglas W. DUNLOP, Milwaukee, on June 17, at Thornton, Ia. Mr. Dunlop is an assistant instructor in botany at the University.
- 1932 Marian McEwan, to Robert C. ZICK-ERT, both of Fond du Lac, on August 20, in that city. At home at 100-7th St.
- 1932 Marquette Healy, Antigo, to Luverne VAUGHAN, on June 20, at Lake Mendota, Madison. At home in Mercer.
- ex '32 Amanda M. Reiner, Madison, to Jerry V. VESELSKY, JR., Berwyn, Ill., on August 9, at Madison. At home in Berwyn.
- 1932 Elsa Kronshage, to Ernst J. von BRIE-SEN, both of Milwaukee, on September 10. At home in Milwaukee at 5829 N. Bay Ridge Ave.
- 1932 Helen D. HEATLEY, Harvard, to Andrew L. Engels, Fred, Mich., in June, at Fred.
- 1932 Ruth Konrad, to Ernest HAUGEN, both of Milwaukee, on July 25, at Milwaukee. Mr. Haugen is bacteriologist for the Golden Guernsey Dairy in Milwaukee.
- 1932 Mary C. Carrier, Edgerton, to Wilbur M. HANLEY, Madison, on July 22, at Beloit. Mr. Hanley is an instructor in geography in the extension division of the University.
- 1932 Mabel E. Draves, to Clarence BROWN, both of Madison, on July 16, at Madison. At home in that city at 330 N. Carroll St.
- 1932 Catherine Lins, Mazomanie, to Roscoe G. BOOTH, on August 17, at Mazomanie. Mr. Booth is principal of the high school in that city.
- ex '32 Elizabeth Dohr, Appleton, to Frank G. BARNUM, Milwaukee, on July 16.
- 1932 Dorothea A. CAIRD, Madison, to Alva F. Southwick, Jackson, Mich., on June 11, at Madison. At home in New Castle, Pa.
- 1932 Jeanette R. ZIMMER, Wausau, to Robert P. STEBBINS, Madison, on June 4, at Wausau. At home in Berlin, where Mr. Stebbins is an attorney.
- 1932 Margaret Stetzer, to Dayton PAULS, both of Madison, on August 6, at Madison. At home at 3122 Lakeland Ave.
- 1932 Veronica (Sally) RYAN, Mt. Horeb, to 1932 M. Joseph McGINLEY, Wausau, on May 14, at San Juan Capistrano Mission, Calif. At home in Wausau.
- 1933 Janet HUEGEL, to Marshall Straus, both of Madison, on June 3, at Madison.
- 1933 Lucille Singler, to George HOFFMAN, both of Madison, on June 25, at Madison. At home at 638 S. Cuyler Ave., Oak Park.
- 1933 Edith Harrison, Ashland, to John IVERSON, Mason, on June 11, at Wheaton, Ill. At home at 26 N. Edgewood, La Grange.
- 1933 Elaine JONES, Shorewood, to Frank HENDRICKS, Woodstock, Ill., on Aug. 6, at Whitefish Bay. At home in Woodstock at 325 W. Jackson Street.
- ex '33 Jeanne LaBrish, Chicago, to Russell C. JACOBSON, on June 18, at Chicago. At home in that city.
- 1933 Margaret LOGAN, Black River Falls, to Loren Gilbert, Madison, on June 22, at Madison. At home in that city at 903 F. Gorham St.

- 1933 Carolyn E. Quisley, Rockford, to Harold G. MICHLER, Fond du Lac, on September 17, at Rockton.
- 1933 Dorothy A. Barter, to Raymond L. MITCHELL, both of Madison, on September 3, at Madison.
- 1933 Mildred M. Hemmings, Schenectady, N. Y., to Robert E. MOE, Milwaukee, on August 14, at Schenectady. Mr. Moe is television engineer with the General Electric Company.
- 1933 Margaret LUTZE, to Carl Bode, both of Milwaukee, on August 3, at Sheboygan. At home in Evanston.
- 1933 Fawn Werle, Wisconsin Rapids, to William J. O'GARA, Spooner, on August 18, at Wisconsin Rapids.
- 1933 Velma M. REICH, Black Earth, to Alfred SCHURCH, Barneveld, on June 25, '33 at Black Earth. At home in Barneveld.
- 1933 Marian W. Preston, Korea, to Kenneth E. ST. CLAIR, Appleton, on September 2, at Montreat, N. C.
- ex '33 Margaret M. PLONSKER, to Dr. Harold ex '27 L. MILLER, on August 10. At home at the Hotel Astor, Milwaukee.
- ex '33 Margaret J. Jones, to Stanley J. PERTZBORN, both of Madison, on July 2, at Madison. At home at 1419 Mound St.
- 1933 Mildred OWEN, Milwaukee, to Dr. Hugh Cunningham, on August 28, at Wild Rose. At home at 1742 N. Prospect Ave., Milwaukee.
- 1933 Muriel M. OWEN, Decatur, Ill., to Harvey W. HANNERS, Milwaukee, on 1931 August 20, at Decatur. At home at 1705 S. 84th St., Milwaukee.
- 1933 Ruth Reineking, Kiel, to Clarence W. OTTENSMAANN, Platteville, on August 6, at Kiel. At home in Platteville.
- 1933 Katherine Gallagher, Lincoln, Nebr., to William J. CONWAY, Jr., Madison, on June 9, at Omaha. At home in Wisconsin Rapids.
- 1933 Janet WEBER, to Hjalmar Bruhn, both of Madison, on August 7, at Madison.
- ex '33 Ann J. DREGNE, to Keith C. BOLTON, 1936 both of Madison, on September 3, at Madison. At home at 718 Harrison St.
- 1933 Myrtle P. Crysdale, Milwaukee, to Ralph L. BEYERSTEDT, Jr., New Holstein, on August 24, at Milwaukee. At home at 1819 Wisconsin Ave., New Holstein.
- 1933 Marjorie WELLINGTON, Ellsworth, Kans., to Robert H. Benton, Silver Springs, Md., on July 26, at Ellsworth. At home at 310 Summer St., Buffalo, N. Y.
- 1933 Gertrude UTTER, Nashotah, to Gerhard 1933 ASSENHEIMER, Cudahy, on July 7, at Nashotah. At home in Los Angeles.
- 1933 Ruth Blankenbuehler, Webster City, Ia., to Leslie W. HATFIELD, Madison, on August 6. At home in Madison.
- 1933 Margaret J. Modine, to John B. HAND, both of Racine, on September 8, at Racine. At home at 900 Main St. Mr. Hand is practicing law with the firm of Hand & Quinn.
- 1933 Regina V. BECKMANN, to Stuart C. 1934 TLEDEMAN, both of Middleton, on June 21, in that city. At home at 330 N. Carroll St., Madison.
- 1933 Nelita Schultz, Random Lake, to Dan E. SCHUCK, on July 18, at Big Cedar Lake. At home at Brillion.
- 1933 Lorraine Schwake, Two Rivers, to Wilton K. SPECHT, Mishicot, on June 11, at Two Rivers. At home at 1410 S. 19th St., Manitowoc.
- 1933 Mary Kosalos, to Andrew C. SHANE, both of Milwaukee, on July 31, in that city. At home at 836 N. 14th St., Milwaukee.
- 1933 Elsa Kathman, Cincinnati, to Walter B. SHIRK, Cincinnati, an event of early summer. Mr. Shirk is associated with the Union Gas and Electric Co.
- ex '33 Elaine Steiner, Mondovi, to Harold F. SMITH, Nelson, on August 6, at Mondovi. Mr. Smith is superintendent of the CCC Camp at Nelson.
- 1934 Helen Hill, to John W. JAMES, on August 27, in New York City. At home at 949 Palmer Ave., Bronxville, N. Y.
- 1934 Louise MARTENS, to W. Kenneth 1937 HOLL, both of Richland Center, on June 25, at Sheboygan. At home in Madison at 1555 Adams St.
- 1934 Lois A. Anderson, to Anthony J. HEIBL, both of Madison, on September 10, at Madison.
- 1934 Dorothy NAGEL, Hudson, to Clyde K. Jensch, Milwaukee, on June 18, at Hudson. At home at 1825 N. Oakland Ave., Milwaukee.
- 1934 Evelyn Bienfang, to Robert KIESSLING, both of Watertown, on June 4, at Washington, D. C.
- 1934 Julianne KLATT, Waukesha, to Winston D. BROWN, on July 16, at Waukesha.
- 1934 Katherine M. KNELL, Aurora, Ill., to Karl P. Grube, on June 11.
- ex '34 Catherine A. Keenan, Beloit, to Jerome J. HALLISEY, Appleton, on September 3, at Beloit. At home at 823 E. Pacific Ave., Appleton.
- 1934 Roma E. LALK, Wauwatosa, to Joseph Russo, Newton Highlands, Mass., on August 6, at Wauwatosa. At home at Dixon, Ill.
- 1934 Mary KESSENICH, to Mark SCHMITZ,

- ex '34 both of Madison, on October 5, at Madison. At home in this city.
- 1934 Alice LOUND, Tomahawk, to Otto Zaeske, Neillsville, on May 14, at Cresco, Ia. At home in Neillsville.
- 1934 Blanche LINDSTEDT, Cudahy, to Theodore J. HOFFMAN, Milwaukee, on September 10 at Eagle River. At home in Milwaukee at 3223 N. 46th St.
- 1934 Linnea Nyberg, Madison, to Harley LOEFFLER, New Glarus, on August 3, at Madison. At home at 304½ E. Wilson St., Madison.
- ex '34 Margaret P. KENASTON, to Dr. William H. OATWAY, Jr., both of Madison, on June 4, in that city. At home at 3725 Odana Rd., Nakoma, Madison.
- 1934 Loraine M. Friedl, Antigo, to Franklin

- E. KELLOGG, Edgerton, on August 6, at Antigo. At home in Madison.
- 1934 Helen M. LADD, Joliet, Ill., to Lawrence N. COLLINS, Youngstown, Ohio, on August 27, at Joliet. At home in Youngstown at 1745 Elm Street.
- 1934 Alethea H. HOFER, Cochrane, to Marvin L. FUGINA, Fountain City, on June 8, at Cochrane. Mr. Fugina is associated with the law firm of Fugina & Fugina of Fountain City.
- 1934 Virginia M. Butler, Detroit, to Wayne K. NEILL, Madison, on August 20, at Detroit. At home at 11 E. Gilman, Madison.
- 1934 Mae E. Jacobson, Wisconsin Rapids, to John F. NATWICK, Madison, on June 21, at Wisconsin Rapids. At home in that city at 431 Granite Street.

- ex '34 Grace Johnson, to George REISINGER, Milwaukee, on September 3, at Carnot.
- SS Faith RAWSON, Greenwood, Ill., to Dr. '34 D. H. Peterson, Chicago, on July 15, at Greenwood. At home at 373 Montrose Ave., Elmhurst, Ill.

- 1934 Jeannine J. Gandolph, to Myron A. ROSS, both of Madison, on June 29, at Mauston. At home in Madison.

- ex '34 Evelyn Peterson, Mt. Horeb, to Aldro G. SCHAACK, Highland, on August 16, at Mt. Horeb. Mr. Schaack is associated with the Northwestern Mutual Life Insurance Co. in Madison.

- SS Annabel L. STUDEBAKER, to Henry E. '34 LARZELERE, both of Beloit, on September 11, at Beloit. At home at 410 Albert St., East Lansing, Mich.

- ex '34 Bertha SCHORER, Sauk City, to Raymond SCHRANK, Brownsville, on June 1938 21, at Sauk City. At home in Akron.

- 1934 Elizabeth Schlenk, Rockford, to Richard F. DITTMAN, Rockford, on August 10, in that city.

- 1934 Margaret CONDON, Chicago, to Olen W. 1934 CHRISTOPHERSON, Chicago, on August 20, at Brodhead. Mr. Christopherson is an accountant with Haskins Sells of Chicago.

- 1930 Evelyn WACHSMUTH, Bayfield, to SJD Kenneth O'CONNELL, Eugene, Ore., on '34 June 2, at Eugene. At home in that city where Mr. O'Connell is a professor in the law department of the university.

- 1934 Gladys F. GIERKE, to Melvin A. 1938 KROHN, both of Madison, on June 25. At home at 1530 Vilas Ave., in that city.

- 1934 Wyla Studer, St. Charles, Ill., to Clarence F. WRIGHT, North Platte, Nebr., on August 7. At home in North Platte.

- 1934 Charlotte W. Lay, Kewaskum, to Lyle E. GIBSON, Montfort, on June 18. At home in Kewaskum.

Contest Winners

WISCONSIN alumni did exceptionally well by themselves in the recent contest of the James F. Lincoln Arc Welding Foundation coming off with nine of the 382 prizes awarded. The awards were announced on September 15.

The awards went to men in all branches and positions of industry and engineering—to engineers, designers, architects, production managers, draftsmen, mechanics, professors, students and others.

Wisconsin alumni who were final award winners and the titles of their essays are as follows: Herbert C. Wendt, '18, chief engineer of the Hackney Bros. Body co. of Wilson, N. C., "All Steel School Bus"; Arnold Meyer, '36, of the Heil co. of Milwaukee, "Trailerized Tank"; Earl D. Hay, '12, professor of mechanical engineering at the University of Kansas, "Arc Welded Steam Condensers of Special Design for 1000 lbs. per hr."; Herman C. Frentzel, '30, chief engineer of the Heil co. of Milwaukee, "Frame for Garbage Dump Truck"; Albert J. Gollnick, '35, structural design engineer with the Allis Chalmers co. of Milwaukee, "Welded versus Riveted Roller Gate Drums"; Paul Coddington, '15, president of the Lakeside Bridge and Steel co. of Milwaukee, "Modern Methods in the Design and Manufacture of an 80-ton Gantry Crane"; Edward W. Burgess, '07, construction engineer in Milwaukee, "Ribsteel Construction for Steel Frame Structures"; Laurence J. Berkeley, '15, president of the Berkeley Engineering co. of Cleveland, Ohio, "Arc Welding—Its Advantages and Economics in Motorization of Machine Tools"; and Eugene A. Basley, '02, welding engineer of the Link Belt co., of Chicago, "Influence of Arc Welding in the Design and Fabrication of the Sink Belt Wash Box."

- ex '34 Marion G. BUERGIN, to Elwyn C.
ex '29 PRIDE, both of Madison, on June 25, at Madison. At home at 121 S. Hamilton St.
- 1934 Mary FLYNN, Madison, to Nelson W.
1936 ROSS, Baltimore, on July 9, at Madison. At home at Baltimore.
- 1934 Olive Van SUSTEREN, Little Chute, to
1926 Dr. Maurice HARDGROVE, Milwaukee, on September 3, at Little Chute. At home in Milwaukee.
- 1934 Marjorie Dunlap, Lodi, to Stephen B. THOMAS, Pinckneyville, Ill., on June 27.
- 1934 Irene Robbins, to Leonard HAUG, Madison, on August 24, at Fall River. At home in Norman, Okla.
- 1934 Irma M. Conrad, Sun Prairie, to Robert W. ARTHUR, on July 21, at Sun Prairie. At home at 314 S. Bassett St., Madison.
- 1934 Katherine O'Neill, to Jac B. ANDERSON, Chicago, on June 11, at Dodgeville. At home in Chicago.
- 1934 Anne L. Roets, Old Bridge, N. J., to Paul R. ELLIKER, Madison, on August 27, at Arlington, Va. At home in Washington, D. C.
- 1934 Catherine E. Sorenson, to Wilbur K. DEHMER, both of Madison, on July 16, in that city. At home at 141 Division St.
- ex '34 Ruth A. Craig, to Hilmer W. GRAU, Green Bay, on July 2. At home in Green Bay at 985 Velp Avenue.
- 1934 Hazel Brusse, to James A. SCHWALBACH, Milwaukee, on July 24, 1937 at Valparaiso, Ind.
- ex '34 Doris SCHWARTZ, Los Angeles, to Jack D. Schwartz, on August 14. At home in San Francisco.
- ex '34 Eula M. SENCE, to E. C. Curtis, both of Springfield, Mo.
- ex '35 Frances N. Harmeling, Sheboygan, to Jerome F. HESSLINK, Oostburg, on August 30, at Oostburg.
- 1935 Amy HEGLAND, Hollandale, to Kenneth Nelson, on September 3, at Hollandale.
- 1935 Margaret A. Frissell, to Norbert J. HENNEN, Sheboygan Falls, on June 18, at Glendale.
- 1935 Jennie M. Austin, Madison, to Martin JOOS, Alma Center, on September 8, at Madison. At home at Toronto, Canada.
- 1935 Elizabeth Haas, Chicago, to Richard D. JONES, Madison, on July 2. At home in Chicago at 4506 N. Racine Ave.
- 1935 Janet H. Kaiser, to John W. HEISS,
1936 both of Racine, on June 18. At home in Milwaukee.
- 1935 Helen Edwards, New York, to Dr. Edward "Max" KNECHT, on June 30, at New York City.
- 1935 Verne M. KOPPLIN, Iron River, to William H. Freeman, Jr., on May 26, at Sausalito, Calif.
- 1935 Celia G. D. Schubert, Madison, to Joseph KUZELA, Elizabeth, N. J., in May, at Madison. At home in Milwaukee, at 2225 N. Summit Ave.
- 1935 Gwen KRIEL, Madison, to Roger S.
ex '30 BUCHANAN, Buffalo, N. Y., on June 11, at Buffalo.
- ex '35 Lauretta G. LEIN, Edgerton, to Carleton H. Chandler, Blanchardville, on August 6. At home in Blanchardville.
- 1935 Florence Fallis, Fort Worth, Texas, to Edward MANTHEI, West Bend, in Chicago, on June 29.
- ex '35 Lorraine LAWS, Belvidere, Ill., to Robert Mellwain, Rockford, on May 27.
- 1935 Charlotte Stuart, to Delmar LOVEJOY, on July 3, at Hollis Center, Maine. Mr. Lovejoy is assistant biologist at the University of Maine.
- ex '35 Edna E. Carter, to Thomas E. LEWIS, Jr., on July 16, at Nashua, Ia.
- 1935 Eileen LOGAN, Madison, to Laurence Hodges, Superior, Nebr., on June 12, at Chicago.
- Grad Julia Y. LEVINSON, El Dorado, Kans.,
'35 to Israel J. Davis Wichita, on June 19.
- 1935 Dorothy D. LINDHOLM, Madison, to
ex '36 Robert M. PARKINSON, on August 27, at Madison. At home at 516 Wisconsin Ave.
- 1935 Regina M. Groth, to Lawrence J. MATTEK, Chicago, on August 6, at Rhineland.
- 1935 Florence I. MARKS, Madison, to E. Glenn Griffen, Taylorville, Ill., on September 1, at Madison.
- ex '35 Marie Ripp, to Robert E. MORRISSEY, both of Madison. At home in Madison.
- 1935 Cecelia McDOWELL, to Charles W. ZELLINGER, Bloomington, on June 23.
- 1935 Margaret MEEK, to George E. BISHOP, both of Madison, on June 19, in that city. At home at 1247 E. Johnson Street.
- 1935 Mary K. Chaney, West Alexander, Pa., to Russell B. NYE, Madison, on August 6, at Dubuque. At home in Madison at 1706 Jefferson St.
- 1935 Marion L. TOFTE, to Berlyn R. OESTREICH, Manitowoc, on September 10.

- SS Irene SMITH, Cape Girardeau, Mo., to '36 Herbert S. Wright, on June 14.
- 1936 Elva DUNHAM, to William L. BUEN-

1936 ZLI, both of Madison, on October 15, at Madison. At home in this city.

1936 Dorothy DICK, Manitowoc, to Robert 1934 N. BELL, Wauwatosa, on June 18, at

Plants Without Soil

IF YOU are the kind of person who has difficulty growing plants in your home, you might do well to investigate the studies of Dr. Victor A. Tiedjens, 21. Dr. Tiedjens, together with several of his co-workers, has been experimenting successfully instead with growing plants in artificial media instead of soil.

Altho the principle of this type of culture has been known for many years, it was Dr. Tiedjens who popularized it to a large degree by perfecting a structure for this type of growing which is adaptable to home use. The structure is neat in appearance and is adaptable for porch or window boxes, for wall hanging for tables or benches, or receptacles in hotel lobbies where frequent replacement of flowers is necessary.

Scientists working on the problem of artificial media for plant culture do not maintain that this system is better than soil growing, but they point out that by using this type of media, they have better control over the plant growth. Plant nutrients can be supplied and taken away at will to fit variable weather conditions and it is possible to control the growth of plants to take advantage of weather conditions which make soil culture difficult.

Dr. Tiedjens expects to see greenhouses built and equipped for culture of plants in artificial media which will materially reduce labor and heating costs with no increase over present methods in original cost. As a research tool, artificial media has no substitute. As far as the layman is concerned, states Dr. Tiedjens, much depends upon how good a plantsman he is.

- Manitowoc. At home in Milwaukee at 3950 N. Farwell Avenue.
- 1936 Maxine Roe, Chana, Ill., to Carleton CROWELL, Oregon, on August 6. At home in Sheboygan.
- 1936 O. Theda Cotterill, to Roger A. WITT, both of Madison, on June 26, at Madison. At home in Stoughton.
- 1936 Mary E. Smith, Alexandria, La., to John F. WRIGHT, Baton Rouge, on September 6. At home in Batno Rouge.
- 1936 Marjorie WEBER, Shawano, to Jacob J. Klein, Waukesha, on June 9.
- 1936 Betty Amos, Edinburg, Ind., to Dr. Wilson WEISEL, Milwaukee, on September 3, at Edinburg. At home in Milwaukee.
- 1936 Ruth GOETZ, to Edwin PETERSEN, 1936 both of Madison, on June 25, in Madison.
- 1936 Rosemary BIEVER, Madison, to Robert ex '34 O. GRAF, Waterford, on August 7, at Nashua, Ia. At home in Waterford.
- ex '36 Evelyn WITTKOPP, Plymouth, to Lloyd 1938 L. FIFRICK, Chilton, on June 18, at Plymouth. At home in Portland, Ore.
- 1936 Janet S. WINNETT, Des Moines, to Ewald B. Nyquist, Rockford, on August 28, at Des Moines.
- 1936 Evelyn M. Parkinson, to Frederick W. LINCOLN, Wauwatosa, on June 25, at Wauwatosa.
- ex '36 Jane THODE, Burlington, Ia., to Henry Walsh, Jr., on June 18, at Burlington.
- 1930 Frances Merrill, Houston, Tex., to Melvin C. TERRY, Madison, on June 26, at Houston. At home in Houston.
- 1936 Jean G. Harrison, Wilkinsburg, Pa., to Richard J. GUENTHER, Madison, on September 3, at Wilkinsburg. At home in Manitowoc.
- 1938 Helene Zodtner, to Douglas G. HEBERLEIN, Portage, on August 20, at Portage. At home at 430 W. Wisconsin St., Portage.
- 1938 Eloise Cordreg, Cleveland, to Ray HAMANN, on August 24, at Cleveland. At home in Appleton where Mr. Hamann is coach at Kimberly High School.
- 1936 Marian E. BREWER, Cleveland, Ohio, 1936 to Richard H. STEWART, Madison, on September 3, in Cleveland. At home in that city.
- 1936 Helen Prussing, to Arnold BLUEMKE, Platteville, on June 18. At home in Belmont.
- ex '36 Helen Mason, to Charles R. BARKLEY, Racine, on July 30. At home in that city.
- 1936 Neva E. BANDELIN, Oconomowoc, to Gilbert E. Seaman, Jr., on August 20, at Oconomowoc. At home in Madison.
- 1936 Alberta Krause, Schofield, to Francis E. BACHHUBER, Jr., Wausau, on June 9, at Wausau. At home in Wausau.
- 1936 Leona Bockin, Stetsonville, to Herman A. EGGERT, Medford, on July 3, at Medford.
- 1936 Margie Kreutzer, Nashotah, to John M. DAGGETT, Jr., Eagle, on August 6. At home in Eagle.
- 1936 Genevieve Slater, Kenosha, to Louis BUSSE, Jr., Madison, on August 8. At home in Madison.
- 1936 Ruth H. Murphy, Madison, to Leslie BUSSE, Madison, on June 2, at Madison. At home in this city.
- ex '36 Zofia OLEKSIUCH, Cleveland, Ohio, to Robert McKee, Hartford, Conn., on June 22, at Hartford. At home in that city.
- 1936 Charlotte Smith, to Ervin G. SCHIESL, both of Medford, on August 1. At home in Medford.
- ex '36 Bertha E. Schwartz, to Edward H. SHOWERS, both of Madison, on June 30 at Madison. At home in this city.
- 1936 Eileen Carroll, to Clarke SMITH, both of Madison, on August 27.
- 1936 Vivian A. Underhill, Delavan, to Alden L. STONE, Jr., Madison, on August 10. At home at Rochester, N. Y.
- 1937 Letes HEEND, La Crosse, to Dr. Edwin Sinaiko, Madison, on June 19. At home in Markesan.
- 1937 Ann Klongland, to Francis J. GRAHAM, both of Madison, on June 18, at Madison. At home in this city at 1870 Rutledge.
- 1937 Esther R. Sweet, Madison, to Aleck J. KANTER, Chicago, on August 21, at Madison. At home in Chicago.
- 1937 Lucile RANSOM, Madison, to Richard E. 1927 KRUG, Milwaukee, on September 24, at Madison. At home at 770 N. Marshall Street.

- ex '37 Charlotte A. Shuman, to Charles R. LESLIE, both of Madison, on September 3, at Madison. At home in Janesville.
- 1937 Cecelia Kirkegaard, to Frederick A. MATSEN, Jr., both of Racine, on August 7. At home in Princeton, N. J.
- 1937 Dolores B. Dunbar, River Falls, to Donald R. MAY, Minneapolis, on June 11, at River Falls.
- 1937 Rachel MOMENT, Oak Park, to Louis Sinow, Dixon, on June 19. At home in Dixon.
- 1937 Gertrude Abraham, to Myron MYERS,

- on August 6. At home in Madison at 1015 University Avenue.
- 1937 Norma K. NOVOTNY, to Edwin R. SHOREY, Jr., both of Madison, on July 14, at Madison. Mr. Shorey is an engineer with the Shell Oil Co. in Tulsa.
- 1937 Marian NEWBERRY, Elmhurst, Ill., to 1932 Henry D. SHELDON, Austin, Tex., in June, at Rockford.
- 1937 Mary E. O'BRIEN, to Willard H. PUTNAM, both of Madison, on August 20, at Madison. At home at 211 Lake Lawn Place.
- 1937 Zita REUTER, Madison, to James E. 1936 UMHOEFER, Colby, on August 25, at Wausau. At home in Hillsboro.
- 1937 Alice REID, Long Beach, N. Y., to 1936 James G. GRAY, Portage, in June.
- 1937 Ann S. PLAVNICK, Madison, to Isiah 1939 S. SIGMAN, August 28, at Racine. At home in Madison.
- 1937 Phyllis B. STEVENSON, to William A. 1937 GRAMS, both of La Crosse.
- 1936 Mary MADIGAN, Beaver Dam, to Russell J. Jaycox, Whitewater, on June 4, at Beaver Dam.
- ex '37 Ruth E. PATTERSON, Milwaukee, to 1936 William R. PHILLIPS, Ruston, La., on August 18.
- 1937 Frances E. DOUDNA, Poynette, to Earl 1935 A. LEWIS, Moscow, Idaho, on July 14.
- 1937 Clarice A. Sweeney, Oregon, to John DOCKENDORFF, Madison, on July 25. At home in Madison.
- 1937 Marjorie A. Starrett, to John E. DIETRICH, Lafayette, Ind., on August 14. At home in West Lafayette.
- 1937 Margaret E. COTTINGHAM, Benton, to John D. Stanton, on June 29.
- 1937 Gertrude HOPPMAN, Chicago, to Wilbur E. LLOYD, Schnenectady, on July 18.
- ex '37 Ruth WEINKAUF, to Ben Ragus, on June 17, at Appleton.
- 1937 Erma Krueger, to Clarence WELLER, on May 28, at Colby.
- 1937 Catherine WATTS, Des Moines, to W. 1936 J. TOMPKINS, Milwaukee, on September 3. At home in Milwaukee.
- 1937 Eleanor J. CLARKE, to Allen J. LIT- ex '39 TLE, both of Madison, on September 17, at Madison.
- 1936 Dorothy WEST, to Dr. George SCHROEDER, River Forest, on July 2.
- 1937 Arlyle Feldwisch, to Malcolm VINGER, Argyle, on May 29.
- Grad '37 Helen McClure BERRY, to MA Heinz S. W. BLUHM, '29 on August 15, in New York.
- ex '37 Marjorie E. WORTH, to William I. 1931 BACKUS, both of Madison, on June 25.
- 1937 Frances GUMBLE, Albion, to Harold A.

- 1937 KELLER, Madison, on June 18.
- 1937 Dorothy TADDY, to Gordon D. THORE- 1931 SON, on June 11, at Kewaunee. At home in that city.
- 1937 Rosemary BRIGHAM, Pittsburgh, to 1935 Robert C. KASKA, on June 11, at Chicago.

Labor's "Brains"

ANOTHER one of the John R. Commons' disciples has taken his place among the important leaders in the labor field. H. P. Melnikow, '16, who learned his first lessons about labor economics from the venerable "John R.," today is the founder and director of the 17 year old Pacific Coast Labor Bureau, the "Brains" for more than 200 labor organizations on the West coast.

Convinced, after his tour of duty with the intelligence service in France, that there was a need for such an organization he set out, first in New York. The field was too sterile, however, and he moved west. There on the Pacific coast he has organized a bureau which is truly the right hand of the member unions.

The PCL does not fight labor's battles, instead it provides its members with vital statistics for ammunition. There has been scarcely a strike or labor arbitration of any degree that has not had Melnikow's hand in it somewhere. Run with a military-like precision, the Bureau has complete facts vital to all member organizations. Standards of living, wage scales, costs of production, legal aspects — everything that is pertinent to the success of the union's arbitration is available at a minute's notice. Neither A. F. of L. nor C. I. O., the bureau has but one purpose, to be of the greatest assistance to its members.

- ex '39 Mary E. ROWSE, Milwaukee, to William ex '38 F. RAE, Jr., Brielle, N. J., on September

Heads Tung Oil Work

GEORGE F. POTTER, '13, for 18 years head of the horticultural department at the University of New Hampshire, has resigned to become the principal plant physiologist in the Bureau of Plant Industry in the United States Department of Agriculture.

Potter is widely known for his research work with apples and other fruit trees. In his new position he will have general charge of the bureau's tung oil investigations with a central office at Bogalusa, Louisiana, and with regional offices located in the Gulf states.

The investigator will start the first government experimentation with the tung oil tree. Although the first tung trees were introduced into this country but 30 years ago, thousands of acres of the trees have been started in the South. Oil from the tung nut, it is said, is used in high grade varnishes and paints. When used in varnish this oil tends to make the varnish waterproof and reduces its liability to crack.

With the exception of the plantations in this country, China is the only known source of the valuable tung oil. The tung tree is known as the "national tree of China."

For a time Potter was associated with the department of horticulture of the College of Agriculture. He conducted some of the early trials with fertilizer in the cherry orchards of the Door county peninsula and with fertilizer and spraying in the apple orchards of Bayfield county.

- 6, at Milwaukee. At home in New York City.
- 1939 Beba Beth QUALY, to Carl MADDING, ex '39 both of Richland Center, on August 11, in that city.

Farm Editor Chief

WILLIAM A. Sumner, Ph. M. '31, of the agricultural journalism department of the University of Wisconsin, was elected president of the American Association of Agricultural College Editors at their recent meeting in Knoxville and Norris, Tennessee.

The agricultural college editors association includes in its membership men engaged in the information service of the United States department of agriculture and the various agricultural colleges and agricultural extension services in the states.

Mr. Sumner is a graduate of Kansas State College as well as the University of Wisconsin. After newspaper experience in Kansas he came to Wisconsin as assistant in the department of agricultural journalism. Since then, he has conducted courses in agricultural and home economics journalism and farm advertising.

- lis. At home in that city.
- ex '40 Betty Mickelson, Cambridge, to Robert LARSON, Woodruff, on June 18, at Dubuque. At home at Hancock.

- 1933 Elizabeth G. Aleshire, to Mervyn J. CONOHAN, both of St. Louis, on May 11, in that city. At home in St. Louis.
- 1933 Elizabeth Wright, Falkner, Miss., to

10 Years of Radio

IT WAS ten years ago this fall that Russ Winnie, '27, first picked up his microphone to announce that "This is station WTMJ broadcasting directly from Camp Randall." The game was South Dakota State; the score, 21-0 in favor of Wisconsin. Winnie hasn't missed a home game since then and has broadcast all of the out of town games either from telegraphic accounts or directly from the playing field. In addition to the football games, he broadcasts the Wisconsin home basketball games. His rapid-fire comments and his uncanny ability to follow the ball through the intricate maneuvers of the modern, "fast breaking" game have won him the title of the best basketball announcer in the country.

In a recent article, describing the trials and tribulations of sports announcing, he paid high tribute to his wife, Evelyn Olson Winnie, '27, who is now his chief "spotter". It is the spotter who is responsible for the smoothness of the game broadcast by the ability to "spot" the tackler, blockers, substitutes, and interesting sidelights.

- Dr. David W. OVITT, Nashville, Tenn., on June 15, at Bowling Green, Ky. At home in Milwaukee, where Dr. Ovitt is practicing medicine.
- 1933 Helen E. DAVIES, North Freedom, to Dr. Carl C. Walters, Seattle, on May 17, at Chicago.
- 1933 Shirley Posselt, to Kenneth TUHUS, both of Madison, on April 23, in that city. Mr. Tuhus is a consulting engineer with the General Engineering Co. at Portage.
- 1933 Dorothy B. SHOLTS, Oregon, to Martin Flood, Brooklyn, on May 19, at Oregon. At home near Black Earth.
- 1933 Rosamond Dermody, Pleasantville, N. Y., to Carl SELLE, Milwaukee, on April 8, at Pleasantville. Mr. Selle is director of foreign languages in the Pleasantville High School.

- 1935 Mary JACOBSON, Madison, to Robert V. Hulder, Chicago, on February 26, at Madison.
- 1935 Florence Olenhouse, to Kenneth S. DAVIS, both of Des Moines, on February 19, in that city.

Studies Relief Problems

PROF. Don D. Lescohier, Ph. D. '21, of the Economics Department went to New York at the beginning of August to accept a position as Consultant to Colonel Brehon Somervell, Administrator of the New York City Works Progress Administration.

Professor Lescohier will be with Colonel Somervell throughout the first semester. He is engaged upon a study of the whole problem of public assistance, including the relationship of relief work, direct relief and various specific forms of relief to the national social security program. Professor Lescohier has a research staff working with him in an analysis of the various aspects of the problem and a group of technical committees working in advisory capacities. These committees are composed of experts in the field of public finance, welfare administration, employment problems and statistics.

Professor Lescohier has long been a student of the problems with which the study he is now directing is concerned and has written extensively on these subjects. In 1930-1931 he directed a similar study, but on a state scale, as the Executive Director of the Wisconsin Citizens Committee on Unemployment. He is one of the authors of the study published this summer by the Industrial Relations Counselors, New York City, on the planning and administration of unemployment insurance in the United States. Professor Lescohier is expected to conclude his New York survey and to return to his teaching duties at the University by the opening of the second semester.

- 1935 Jane A. KURTENACKER, to John T.
 1935 CURTIS, both of Madison, on April 20,
 in that city. Mr. Curtis is an instructor
 in the botany department of the Uni-
 versity.
- SS Marion LUIKART, Lincoln, Nebr., to
 ex '35 Edward SCHMITZ, Jr., Manitowoc, on
 April 17. At home in Manitowoc, where
 Mr. Schmitz is associated with the East
 Wisconsin Trust Co.
- 1935 Bernice Schmidt, San Diego, Calif., to
 Second Lieut. William R. WENDT, Mil-
 waukee, on January 12, at Cavite, Phil-
 ippine Islands.
- 1935 Carlyn M. STRAUSS, New York, to Irv-
 1935 ing S. UNGAR, Chicago, on February
 14, in Atlanta, Ga. At home at 540
 Wellington Ave., Chicago.
- 1936 Eunice O. Dresser, to Mathias W. FEL-
 TON, both of Madison, on May 14, in
 that city. At home in Westmorland,
 Madison. Mr. Felton is associated with
 the plant pathology department.
- ex '36 Lorna BAUMGARTEN, Elroy, to Paul
 1937 WAHLER, La Valle, in April, at Elroy.
 At home in Racine.
- ex '36 Violet Malesovich, to Philip BACH-
 HUBER, Jr., on April 18, at Mayville.
 At home in that city, where Mr. Bach-
 huber is associated with the Mayville
 Construction Company.
- 1936 Helen J. BONHAM, Madison, to Claude
 1935 E. MUSOLF, Fond du Lac, on April 30,
 at Madison. Mr. Musolf is production
 manager with the Geddings and Lewis
 Machine Tool Co. in Fond du Lac.
- 1936 Gertrude Schaper, to Robert L. SUT-
 TER, both of Milwaukee, on September
 18, in that city. At home at 3330 W.
 Lapham St.
- 1936 Anne Randall GREEN, East Aurora, N.
 1935 Y., to George B. FIELD, on December
 20, 1937. Mr. Field is connected with
 the Federal Government at Stevens
 Point.
- 1936 Marjorie LOOMIS, to Philip G. MAR-
 ex '31 SHALL, both of Madison, on April 28,
 in that city. At home at 444 Hawthorne
 Ct. Mr. Marshall is chief of the law
 school library at the University.
- 1936 Dorothy DICK, Manitowoc, to Robert
 1934 N. BELL, Wauwatosa, on June 18.
- 1936 Eleanor HENDRICKSON, Chicago, to
 1936 Stanley HARVEY, Hazel Green, at Chi-
 cago, on February 19. At home in Chi-
 cago, where Mr. Harvey is associated
 with the Santa Fee Railroad Co.
- 1936 Phyllis VETHE, Madison, to Irwin W.
 Rohde, on March 26, at Madison. At
 home in Madison.
- 1936 Grace CARLSON, Sheboygan, to Francis
 1934 V. BEMIS, on April 30, in that city. At
 home at 330 St. Clair Ave., Sheboygan.
- 1936 Genevieve Smith, Janesville, to Jack
 O'BRIEN, Ashland, on April 30, at
 Dubuque.
- 1936 Ruth A. LAING, Berlin, to Allen J.
 ex '36 BARTLETT, Wauwatosa, on April 22,
 at Berlin. At home in Wauwatosa.
- 1936 Joyce E. EIERMAN, Milwaukee, to
 ex '37 Horace K. BURR, Manchester, Conn., on
 June 4. They will spend the first year
 of their marriage traveling in Mexico
 and Central and South America.
- 1936 Grace CARLSON, to Francis Van Kaas
 1934 BEMIS, both of Sheboygan, on April 30,
 at Sheboygan. Mr. Bemis is associated
 with the Bemis Manufacturing Co. at
 Sheboygan Falls.
- 1936 Violet Walker, Chicago, to Robert L.
 WELCH, Madison, on April 16, at Chi-
 cago. At home in Chicago where Mr.
 Welch is an engineer with the Under-
 wood Laboratories.
- 1936 Gwendolyn YAGER to Victor N. JOR-
 1936 GENSEN, both of Beloit, on March 12,
 at Madison.
- ex '36 Catherine Aberle, to Chester D. PRIEST,
 both of Sabetha, Kans., on May 8, in
 Hiawatha, Kans. At home at 421 Har-
 rison St., Sabetha.
- 1936 Lyla KISCHEL, to Roger W. HOFF-
 1936 MANN, on May 14.
- 1937 Jean VANATTA, Port Edwards, to
 ex '38 Cyril J. CORUM, Hamilton, Ohio, on
 April 23, at Madison. Mr. Corum is a
 graduate assistant in the botany depart-
 ment of the University. At home at 330
 N. Carroll St.
- 1937 Catherine FOSTER, Cornell, to Arthur
 ex '37 PEASE, St. Paul, on May 14, at Cornell.
 At home in St. Paul.
- ex '37 Elizabeth H. COCHRAN, Madison, to
 Joseph H. DeVeau, Jr., Chevy Chase,
 Md., on May 10. At home in Washing-
 ton, D. C.
- 1937 Charlotte Chase, Eau Claire, to Elmer
 ARNESON, Cadott, on May 14, at Eau
 Claire. At home in that city.
- ex '37 Catherine CASSIDY, Madison, to Dr.
 1935 Everett BURGESS, Darlington, on
 May 6, at Akron, Ohio.
- 1937 Katherine Hinn, to John N. KRAMER,
 both of Fennimore, recently. Mr. Kra-
 mer is an attorney in that city.
- ex '37 Helen I. COCHRANE, to Arthur B.
 Smith, both of Port Huron, Mich., on
 May 7, in that city. At home in Port
 Huron at 1305-7th St.
- ex '37 Charlotte G. SHAPIRO, New York, to
 1936 Maurice ZOLOTOW, Brooklyn, N. Y., on
 April 15, at Mt. Vernon, N. Y.
- 1937 June A. Sprecher, Black Hawk, to Har-
 lan L. STONE, Prairie du Sac, on March

- 19, at Nashua, Ia. At home in Deerfield, where Mr. Stone is an instructor in the high school.
- 1937 Anna M. YOUNGBECK, Chilton, to
1937 Herbert W. WILSON, Muscoda, on March 5, at Chilton. At home in Sycamore, Ind., where Mr. Wilson is an engineer for the Ideal Commutator Dresser Co.
- 1937 Mercedes J. TALIAFERRO, Madison, to Mark Kennedy, Chicago, on February 14. At home in Chicago.
- 1937 Genevra RAMSDELL, to Lloyd J. SE-
1936 VERNON, on August 16, 1937, at Lima, Peru. Mr. Severson is a mining engineer at Llallagua, Bolivia, S. A.
- ex '38 Evelyn Boie, to Harold E. BARTH, both of Madison, on May 7, in this city. At home in Madison.
- ex '38 Mary A. PAINE, to Thomas A. Claiborne, Jr., on January 12, at Aberdeen, Miss.
- ex '38 Dorothy J. BARLAMENT, to Stanley N.
ex '40 DAVIDSON, both of Madison, on May 28, at Madison. At home in this city.
- ex '38 Antoinette T. BALTES, to John J. Wilson, both of Madison, on May 28, in this city. At home at 5 S. Mills St.
- Grad Ruth S. Graves, Bluefield, Va., to
'38 Michael H. LANGFORD, Blythewood, S. C., on May 7, at Madison. At home at 406 E. Washington Ave., in this city.
- ex '38 Lucile GREAR, Riverside, Ill., to Dr. Hubert Hathaway, Madison, on April 20, at Riverside. At home at 426 Hawthorne Ct., Madison.
- ex '38 Naoma Huber, to Elroy SCHMIDT, both of West Bend, in December. At home in that city, where Mr. Schmidt is a junior officer of the West Bend Bldg. & Loan Assn.
- ex '38 Dorothy Hobbs, Bozeman, Mont., to Shirley C. PECK, Sacramento, Calif., on March 20, at Reno. At home at 809 P St., Sacramento.
- ex '38 Ruth E. Opstedal, Madison, to Henry A. KJENTVET, Jr., Elewa, on April 2, at Madison. Mr. Kjenvet is studying for his master's degree at the University.
- ex '38 Dorothy M. Atkinson, to Charles J. KENNEDY, Madison, on April 16. Mr. Kennedy is an assistant at the University.
- Grad Elsie Davis, Erie, Pa., to John C.
'38 GAREY, Madison, on April 20, at Madison. Mr. Garey is an assistant in the department of agricultural bacteriology at the University.
- ex '39 Miriam E. Greene, Minneapolis, to Robert E. NOLTE, Madison, on May 4, in Minneapolis.
- 1939 Irene Schultz, to Donald KUESTER, both of Clintonville, on March 26, in this city. Mr. Kuester is a senior engineering student at the University.
- 1939 Fern L. Reinhardt, Nelson, to C. Vaughn ANDERSON, Pepin, on March 19, at Madison. At home at 201 N. Mills St., Madison.
- ex '39 Dorothy V. ARNESON, to Edwin J.
1937 VOSS, both of Madison, on May 6, at Madison. At home at 3823 N. Lawndale Ave., Chicago, where Mr. Voss is associated with the Commonwealth Edison Co.
- ex '39 Janet De Hond, Milwaukee, to Burton F. HALES, Wauwatosa, on April 30, at Milwaukee. At home in Waterloo.
- ex '39 Fern Charlier, to James E. HARRIS, both of Madison, on April 16, at Dubuque, Ia. At home in Madison.
- ex '39 Dorothy M. SHIRLEY, Drummond, to B. Walter Nicewander, Eagle River, in May, at Madison. At home in Eagle River.
- 1940 Eleanore C. McIntyre, to James PAULUS, both of Madison, on June 18, at Fond du Lac. At home in Madison.
- 1940 Clara L. AMERMAN, Washburn, to Robert M. LEE, Chippewa Falls, on May 16, at Madison. At home at 120 N. Hancock St.
- ex '41 Barbara A. BROOKS, New York City, to
ex '41 Jamieson H. B. NEWELL, Madison, on March 26, at Dubuque, Ia.

BIRTHS

- 1923 To Mr. and Mrs. Joseph H. Stevens (Elsbeth J. HENNECKE), a daughter, Martha Jean, on February 28, at Chicago.
- 1924 To Mr. and Mrs. Ivan D. Jones (Lillian TYLER), a daughter, Lucia Lillian, on March 16, at Raleigh, N. C.
- 1924 To Mr. and Mrs. Edwin H. Hyndman (Ruth ROHRBECK), a daughter, Mary Adeline, on May 10, at State College, Pa.
- 1924 Dr. and Mrs. Gorton RITCHIE (Georgia STANCHFIELD), a son, William, on May 1, at Madison.
- 1926 To Mr. and Mrs. Charles F. McCarthy (Kathleen KONOP), a daughter, Kathleen, on January 15.
- 1926 To Mr. and Mrs. George T. BUNKER, Jr., a second daughter, Barbara Bartlett, on April 23, at La Grange.
- 1927 To Mr. and Mrs. Maurice Dunwell (Lorene SCHOENFELD), a daughter, Ann Stewart, on May 4.
- 1927 To Mr. and Mrs. Duane KIPP, a son, Joseph Duane, on March 31, at Laguna Beach, Calif.
- 1923 To Mr. and Mrs. Paul FRIEDRICH
ex '25 (Marguerite RIEDER), a daughter, Karen Marguerite, on January 19, at

- Bloomfield Hills, Mich.
- 1928 To Mr. and Mrs. Charles W. ROE, (Mar-
1928 rian NIEMANN), a daughter, Patricia
S., on October 30, 1937, at Madison.
- 1928 To Mr. and Mrs. Walter W. ENGELKE
1930 (Marion WITHEY), a son, Daniel Owen,
on May 16, at Madison.
- 1930 To Dr. and Mrs. Harold POMAIN-
1933 VILLE, (Bernice NELSON), a daughter,
on May 14, at Nekoosa.
- 1930 To Mr. and Mrs. John S. McCLEARY,
a son, John Standish, on May 23, at
Baltimore.
- 1930 To Mr. and Mrs. Everett A. JOHNSON,
1931 (Ruth HOVEY), a daughter, Carmen
Jean, on January 27, at Chicago.
- 1931 To Mr. and Mrs. Orrin Bryan EVANS
1931 (Margaret SEARLE), a son, Evan
George, on April 7, at Moscow, Idaho.
- 1931 To Mr. and Mrs. Hoyt TROWBRIDGE,
1930 (Margery HAYDEN) a daughter, on
May 17, at Madison.
- 1932 To Mr. and Mrs. Meyer S. BOGOST, a
son, Michael Barry, on April 14, at Ta-
coma, Wash., where Mr. Bogost is pub-
lic health officer for Pierce County.
- 1932 To Mr. and Mrs. Sidney HENDERSON,
ex '33 (Ruth GORDON), a son, Arnold Clay-
ton, on April 10, at Madison.
- 1932 To Mr. and Mrs. Charles G. Hallett,
(Marian ANTISDEL), a daughter,
Sharon Kay, on March 1.
- ex '32 To Mr. and Mrs. George HAYS (Jea-
ex '36 nette SHADE), a daughter, Susan, in
April.
- Grad To Mr. and Mrs. Leslie E. BLACKMAN,
'33 a daughter, Patricia Louise, on March
11, at Emporia, Kans.
- 1932 To Dr. and Mrs. Walter O. PAULSON,
a daughter, Sonja Dagny, on November
11, at Eau Claire.
- 1932 To Mr. and Mrs. Gerold POOL (Ethel
1933 ESTABROOKS), a son, James Eugene, on
May 3, at Sheboygan Falls.
- 1933 To Mr. and Mrs. C. A. Lamb, Jr., (Vir-
ginia SHADE), a daughter, Judith, in
March.
- ex '34 To Lieut. and Mrs. Clifford JOHNSON
1935 (Bernice SOMMERS), a daughter, Ka-
ren Ann, on March 26, at Rhinelander.
- 1935 To Mr. and Mrs. Robert M. LARSON
1935 (Frances ROBERTS), a daughter,
Jeanne Ruth, on December 8, at Madi-
son.
- 1937 To Mr. and Mrs. Harry SHEER, (Vir-
1937 ginia Gail KELLOGG) a daughter, Reuel
Kellogg, on March 21, at Madison.
- Fac- To Mr. and Mrs. George Fox, a son, on
ulty May 14, at Madison. Mr. Fox is end
coach of the University of Wisconsin
football team.
- ex '32 To Mr. and Mrs. Ernie LUSBY, a daugh-

- ter, Mary Lou, on January 5, at Chicago.
- 1921 To Mr. and Mrs. Percy G. SOLLIE,
a daughter, Harriet Ann, on April 4, at
Ashland.

All American?

IF THERE are better fullbacks in the country than Howard Weiss, 200 pound Wisconsin senior, those who think so will have to prove it to admirers of the Badger star. In the four games Wisconsin has played this fall at the present writing Weiss has been outstanding in every department. Powerful, even for a player of his size, he is also as fast as most halfbacks, a terrific, driving runner who can hit the line for consistent gains and also run the ends with dazzling speed. His blocking is devastating and he is one of the greatest defensive backs in Badger football history. All this adds up to a potential All-American and when it is considered that the redoubtable Howie possesses football instinct of a high order and a love for the game which makes him the first on the field and the last to leave, despite the fact that he is playing his third year of varsity football, it is hard to see how the honor team selectors can ignore him.

Playing against the almost impregnable defense of the Pittsburgh Panthers, in a game which his team lost 26-6, Weiss carried the ball on 24 of Wisconsin's 53 plays from scrimmage and averaged 3.6 yards per try. In addition, he was half the Badgers' defense and outstanding in every other department.

- 1922 To Lieut. and Mrs. S. A. McCornock (Jeane M. LAING), a daughter, Jeane Gordon, on October 25, 1937, at San Diego.
- 1923 To Mr. and Mrs. Halbert W. HOARD, a daughter, Nancy Anne, on April 14, at Milwaukee.
- 1924 To Mr. and Mrs. Harvey H. KARNOPP, a son, Bruce Harvey, on June 13.
- 1925 To Mr. and Mrs. Theodore Nilsen (Harriet WOLLAEGGER), a son, Christopher, on December 4.
- 1926 To Mr. and Mrs. D. F. Estes (Elizabeth SHEPARD), a son, David D., on October 14, 1937.
- 1927 To Mr. and Mrs. Rolland BARNUM, '27, a son, Thomas, on Sept. 28, at Madison.
- 1929 To Mr. and Mrs. Henry S. STEVENS, a daughter, on June 17, at Phoenix, Ariz.
- 1929 To Mr. and Mrs. John F. TOWLE (Margaret MOORE), a son, John Moore, on June 19, at Chicago.
- 1929 To Mr. and Mrs. John P. ASH, a daughter, Judith Gail, on September 17, at Appleton.
- 1929 To Mr. and Mrs. Wells HARRINGTON, a daughter, Elizabeth Ann, on June 20, at New York City.
- 1928 To Mr. and Mrs. Samuel T. MYERS (Margaret COOLEY), a daughter, Katherine Anne, on April 28, at Racine.
- 1930 To Mr. and Mrs. A. G. Reul (Margaret McNEIL), a son, on February 5.
- 1932 To Mr. and Mrs. Arnold RAMLOW (Melva JOHNSON), a daughter, Barbara Ann, on April 9.
- 1932 To Mr. and Mrs. Marshall NORTH, a son, on August 2, at Chicago.
- 1934 To Mr. and Mrs. Joe G. SOWERWINE, a daughter, Julie, on June 3, at Evans-ton.
- 1935 To Mr. and Mrs. Howard JOHNSON, a son, Dale Theodore, on April 12.
- 1935 To Dr. and Mrs. David G. WELTON (Sydney LYMAN), a son, on May 28, at Ann Arbor.
- 1937 To Mr. and Mrs. Lloyd J. SEVERSON (Genevra RAMSDELL), a daughter, Sylvia Rhodes, on August 22.
- 1938 To Mr. and Mrs. Harley W. Jefferson, Jr. (Betty KNIFFIN), a son, on September 7.

Shrimski Memorial

A NEW scholarship fund, amounting to \$2,000, was recently accepted by the Board of Regents as another living memorial to the late Israel Shrimski, '88, Chicago.

The new fund came to the University as a bequest in the will of the late Gussie S. Jacobson, sister of Mr. Shrimski. The bequest provides for an endowment to be known as the "Israel Shrimski Scholarship Fund." Only the income from the fund is to be paid out as scholarships, to be known as "Israel Shrimski Scholarships," to needy and deserving students.

The new fund constitutes the third to be given to the University by the family and friends of the late Mr. Shrimski as living memorials in his name. A student loan fund of \$2,000, provided for in Mr. Shrimski's own will, was accepted by the University early in 1929. In June, 1929, friends of Mr. Shrimski gave the University a scholarship fund amounting to \$12,500, "to further perpetuate the memory of Israel Shrimski, distinguished alumnus of the University of Wisconsin, whose generous and intelligent loyalty to his Alma Mater have made that memory immortal. . . ."

Commenting upon the new scholarship fund, Pres. C. A. Dykstra declared that he was very much pleased with this additional memorial to a distinguished Wisconsin alumnus, and asserted that "this is another indication of interest in the University and its students from loyal alumni and families of alumni."

Heads Library School

GEORGE C. ALLEZ, former librarian at the Stevens Point State Teachers' college, has been named director of the University library school which opened last month in its new home. Forty students, the school's capacity, are enrolled.

Mr. Allez succeeds Miss Mary Hazeltine, founder and long time head of the school. Miss Hazeltine resigned this spring and is now in the East. New quarters of the school, formerly housed in the city library, are at 811 State St., in a structure occupied previously as a fraternity house.

Mr. Allez was named director by the Board of Regents, to whose charge the school was transferred from the Wisconsin Free Library commission in a reorganization program sponsored by Gov. La Follette.

R. O. T. C. Enrollment Increases

THE University's reserve officers' training corps, the military training unit for students, has its largest enrollment since 1924, Col. Weaver, commandant, announced last month. There are 856 students in the basic and advanced corps. The basic corps instruction is open to all who wish to enroll, but the advanced corps is limited in size by war department rulings. The advanced classes, however, were enlarged this year to provide student officers for the big basic corps classes.

In 1920, when ROTC enrollment was first reported, there were 1,482 students in the course. This climbed to a peak of 1,528 in 1922, but then the course was made optional and a decline followed that hit a low of 459 in 1932. Allotments of credits for military study then caused increased interest and has caused a fairly steady climb.

Officers here were loath to say that European war troubles might be a reason for the increased enrollment this year. Past records vary so much that there is no basis for explanation of increases, they said.

S. S. W. I. Assailed

GLENN T. FIEDLER, vice-president of the Wisconsin Federation of Teachers, assailed what he termed "the taint of communism" on the University campus in a speech here at Green Bay last month.

Fiedler told the Green Bay Federated Trades council that he knew students attending the Summer School for Workers in Industry were subjected to communistic influences during their leisure moments.

"In the classroom, they've been more diplomatic, although even here there has been a decided undercurrent of communism," Fiedler asserted.

Louis Boehm, former student who now is business agent for Truck Drivers' councils, corroborated the assertion that communist influence was active at the University.

Faculty members of the Summer School for Workers denied Fiedler's contentions.

ACTIVITIES

Fraternity Pledging Slumps

DESPITE the fact that four more Wisconsin fraternities sought new members from the freshman class this fall, only 156 men of the incoming yearling class pledged themselves to the campus organizations during the regular rushing period. The formal announcement disclosed that 156 men promised their allegiance to 38 groups as compared with 179 new members acquired by 34 fraternities last year.

Four houses topped the list in numbers with 11 pledges each. They are Delta Tau Delta, Phi Gamma Delta, Phi Sigma Delta, and Pi Lambda Phi.

Seek Million Dollar Lab

A MILLION dollar agricultural research laboratory similar to the present Forest Products Laboratory in scope will be constructed here if the work of a committee of University officials and the Madison and Wisconsin Foundation bears fruit.

The last session of congress provided for the establishment of four regional agricultural research laboratories to undertake the solution of various major agricultural problems now confronting the country.

One of these areas comprises the states of North and South Dakota, Nebraska, Kansas, Minnesota, Iowa, Wisconsin, Illinois, Michigan, Indiana, and Ohio.

A University committee composed of Dean Christensen of the College of Agriculture, Dean Fred of the Graduate School, President Dykstra, and Noble Clark are working with the Madison and Wisconsin Foundation on a brief to prove Madison as the most logical site for the laboratory in this area.

Because grain and corn agricultural wastes are among the most important problems the laboratory would work on, Wisconsin may be handicapped. However, this disadvantage would be offset by the presence at the University of one of the nation's most competent staff of agricultural research members and scientists.

10% of Students Perplexed

TEN per cent of the students enrolled at the University of Wisconsin annually seek consultation with psychiatrists regarding personal and social adjustment problems, Dr. Annette C. Washburne told a district conference of religious leaders in the Episcopal church recently.

Dr. Washburne, a member of the University psychiatric staff, said not all of the 10 per cent are troubled by serious mental ailments. Unhappy home life, sex problems and waning interest in life are the more frequent complaints, she said.

Dr. Washburne scoffed at the charge that the University leads students away from religion into atheism.

New Dormitory Experiment

WITH present enrollment at an all time record of more than 11,400 students, the University of Wisconsin's new low cost cooperative housing project for men students is drawing the particular attention of State and University officials.

If the project, which was launched last spring by the Board of Regents to meet an increasingly acute student housing problem, works out satisfactorily, it is planned to provide low cost dormitories for between 1,800 and 2,000 students by September, 1939.

The first three dormitory units were completed during the summer months and are now occupied by about 250 men students. It is planned to build five more units and a large dining hall during the next year. Construction work has already begun.

The dormitories are operated on a cooperative basis. The students share in planning the type of organization and the amount of service they want. Rates depend upon the actual cost of operation, according to Don L. Halverson, director of dormitories and commons.

The three units now occupied are designated as A, B, and C until names are chosen. Boys living in A pay \$96 a year for their room and \$245 for meals.

Those in B pay \$75 a year for their room, but make their own beds and have only supervisory maid service, and \$245 for meals.

In the C unit, where the students do all their house work, the room rate is \$70 and board is optional.

All the rooms were reserved long before the fall term opened and a waiting list will quickly replace any withdrawals. The dormitories are three stories high and fireproof, with a sandstone exterior. A house fellow has been chosen by the University dormitory committee to head unit A. Students living in units B and C elect their own president.

University officials regard this experiment as the forerunner to revolutionary changes in meeting what in recent years has been a serious student housing problem because of continually increasing enrollment. Officials point out that the present plan of operation is democratic in that it permits the student to pay what he feels he can afford and according to how much work he wants to do himself.

THE UNION IS BUSY AGAIN

Students are busy at the Union again, crowding the desk where Charles Owens reigns supreme, getting a bite to eat in the Rathskeller, and meeting fellow students at teas in the Campus' living room.

Troutman With M-G-M

WILLIAM C. Troutman, director of the University theater from 1928 to 1934, has been named an assistant director by Metro-Goldwyn-Mayer studio in Hollywood and is currently at work on his first assignment, a short subject. Mr. Troutman left here in 1934 and has since directed professional and collegiate players in Cleveland, Cincinnati and New Orleans.

McDougall Edits Service

CURTIS R. McDougall, a former professor of journalism at the University, is the editor of the "News Map of the Week," a news service published in Chicago for the study of current events. The maps will be published each Monday of the school year, indicating on a four-color map measuring 36 by 48 inches the location of the major news centers of the world. Pictorial statistics in graphs, charts, and

drawings will augment the map. MacDougall is also editor of the National Almanac and Year Book, successor to the Chicago Daily News Almanac and is on the faculty of the Medill School of Journalism at Northwestern university. He received his doctor's degree in sociology while teaching at Wisconsin.

Summer Session Remains Same

LENGTHENING of the annual Summer Session from six weeks to eight weeks was postponed for at least another year by the Board of Regents at their October meeting. The board voted to defer the change due to the fact that such an increase in the duration of the session would necessitate an increase in the University budget of "between \$25,000 and \$50,000." It was believed, too, that revenue from student fees would probably be smaller because of the length of the session.

School of Commerce

THE registration in the School of Commerce for the first semester totals 432; 198 juniors and 234 seniors. There are also several graduate students some of whom are candidates for advanced degrees. There is a decided increase in the number of transfer students to the School of Commerce—174 this fall.

Mr. E. A. Gaumnitz, recently of the University of Minnesota, joined the Commerce faculty this fall as Assistant Professor of Insurance. In his Principles of Insurance course he has 148 students enrolled, which speaks well for the advisability of providing a major in the field of Insurance.

Annual Commerce Turnout **T**HE annual fall Commerce Turnout (the Commerce Smoker to the Alumni) was held in the Great Hall of the Memorial Union on October 6th. Over six hundred attended—freshmen and transfer students were particularly welcomed to the Commerce fold.

A petition to be presented to President Dykstra and the Board of Regents for a Commerce Building, prepared by Delta Sigma Pi, was presented at the meeting and enthusiastically signed by all present. The petition summarizes the needs of the School of Commerce for adequate space—every type of space—lecture rooms, recitation rooms, laboratories, offices and research rooms.

Placements Are Good **T**HE placement of June graduates, in view of general business conditions, was extremely satisfactory. The 1938 class news in this issue gives the employer and location of many of last year's graduates. Professor H. R. Trumbower is in charge of Commerce placements. The School of Commerce is anxious to cooperate with the Alumni Committee on placements in every way.

C. P. A. Conference **O**N October 28 the annual fall conference of the Wisconsin Society of Certified Public Accountants will be held in the Memorial Union under the auspices of the School of Commerce. This year a reg-

ister will be kept of returning Commerce Alumni who are now practicing accounting in Wisconsin and a report will be made in the next Commerce News Letter. A strong program has been prepared for this meeting and it is expected that two hundred certified public accountants of Wisconsin, Minnesota, Iowa and Illinois will attend.

Associations Secretaries Meet **U**NDER the joint auspices of the School of Commerce and the Department of Commerce (of the State Government) a conference with the secretaries of all trade and business groups within the State will be held in Madison on November 14. The purpose of the conference is to express the desire of the School of Commerce and the Department of Commerce to assist the business life and interests of the State in every way within their power, and to learn from the secretaries just what these two departments can do for the State Association they represent.

The Medical School

THE McArdle Memorial Laboratory for the study, diagnosis and treatment of cancer, at a cost of \$240,000 has been assured by a Federal grant under the Public Works Administration to supplement the sums made available from the McArdle Bequest. This important addition to the physical plant of the University will be located on North Char-

ONE OF THE NEW DORMITORY ROOMS
The furnishings are the same in all the rooms
regardless of the price paid

ter Street and connected with the Service Memorial Institutes and the State of Wisconsin General Hospital. This strategic position will enhance advantages that have always been felt in the interrelation of the several sciences in research work at Wisconsin. Not only will the research program in the field of cancer be greatly strengthened thereby, but a much needed easement will be effected in the departments of roentgenology and radiology of the State of Wisconsin General Hospital, whose facilities for the diagnosis and treatment of neoplastic conditions are so greatly taxed at the present time.

Sevringhaus on "Endocrine Therapy"

THERE has recently come from the press a textbook "Endocrine Therapy in General Practice" by Dr. E. L. Sevringhaus. Carefully analytical in its approach, the text divests all proposed therapeutic agents in the field of endocrinology of their disguises and offers to the general practitioner the true essence of the subject. It therefore fills a very pressing need in these days of super-salesmanship, and it should have a wide circulation.

Faculty Notes

DR. F. A. Hellebrandt of the Department of Physiology is enjoying a sabbatical leave for the academic year and will be engaged in study in several European centers.

DR. H. W. Mossman of the Department of Anatomy is likewise on sabbatical leave and will study in Europe the second semester.

DR. L. W. Paul has been appointed Associate Professor of Radiology.

DR. E. S. Gordon has been transferred from the Alumni Research Fellowship in medicine to the combined positions of Instructor in Physiological Chemistry

and Research Associate in Medicine.

DR. F. J. Pohle has returned from Thorn-dike Memorial Laboratory, Boston City Hospital, to a Wisconsin Alumni Fellowship in Haematology. He will interest himself in the haematologic diseases.

Annual Alumni Day

THE Alumni Day and Student Field Day activities on May 26 and 27 measured up completely to past standards. The guest speaker for Student Field Day was Dr. Fred Jenner Hodges, Professor of Roentgenology at the University of Michigan Medical School, who gave a notable address on "A Prescription for Graduating Physicians—A Nonofficial Remedy for Premature Mental Inertia."

Murray Heads Nurses

Miss Christina C. Murray, formerly Assistant Professor of Nursing, has been recalled to the Directorship of the School of Nursing as Professor of Nursing. Mrs. Judith Davies will early take her post as Assistant Professor of Nursing in charge of Public Health Nursing.

Find Hemophilia Aid

A treatment which will stop the bleeding of persons afflicted with hemophilia has been discovered by Dr. Frederick J. Pohle, of the University medical school, and Dr. E. H. L. Taylor, Ph. D., '28, Boston, Mass.

The substance used in the treatment is a powder obtained from the fluid or plasma of

beef blood and has been found to stop the dangerous bleeding of hemophilia patients. The powder is prepared from a protein named globulin.

Dr. Pohle said that globulin powder checked bleeding from external wounds and tooth extractions in five hemophilia sufferers during research at Harvard medical school. He said the powder will

DR. WILLIAM S. MIDDLETON
Dean of the School of Medicine

arrest bleeding only when applied to the wound externally and will not stop internal bleeding nor is it a cure for the disease. The substance is not yet available in large enough quantities for general distribution.

The discovery was made by Drs. Pohle and Taylor during work at the Harvard medical school. It was reported during May before the meeting of the American Society for Clinical Investigation. The report of the discovery is printed in the September issue of the *Journal of Clinical Investigation*.

Home Economics Dept.

WHILE the enrollment of the University as a whole increased 5.3 per cent over that of a year ago, the enrollment in home economics increased 14.9 per cent. This increase in number of students is undoubtedly due to the fact that the placement of home economics graduates has been unusually good. Out of the group of home economics students who graduated in June and at the end of the summer session of 1938, all of those who signed up with the University Placement Bureau have positions. Those who majored in dietetics and wished to take student dietitian training have received appointments in grade A hospitals. Many of those interested in commercial work have also secured positions.

The following is an excerpt from a letter sent in answer to an inquiry from a firm in New York concerning the opportunities in home economics:

"Up to the present I believe the best opportunities for the inexperienced graduate are in teaching either in the public schools or the vocational schools or in the hospital dietitian field. With teaching experience there are opportunities in the extension field as home economics specialists and county home agents and also in the Farm Security Administration. In commercial work the positions are more limited. Some of those inter-

ested in commercial work in related art have gone into interior decoration departments of large department stores. Those interested in the commercial field in clothing have accepted salesmanship positions and in some cases have worked up until they have become buyers. Some of the other graduates have gone into educational work in connection with food companies and utility companies."

Staff Promotions Miss May Cowles, '18, and Miss Marion Juaire were promoted from assistant professors to associate professor rank.

Changes in Staff At the close of the summer session Mrs. Elizabeth Johnson Neal, an assistant professor in Related Art for several years, resigned her position in order to more fully enjoy the new home which she and her husband have built in Shorewood Hills, Madison. Miss Ruth Riefling, A. B., Washington University, St. Louis, and M. A. University of Chicago, was appointed as an instructor in place of Mrs. Neal. Miss Riefling previously taught in Stephens College, Columbia, Missouri, and has also had professional experience in interior decoration.

Miss Betty Schlingen, '37, is a part time assistant in Related Art and is taking graduate work in addition to her teaching.

This year Miss Portia Glindemann, '32, M. S. Columbia University, is the home economics fellow and is devoting her full time to studying for her Doctor's degree. Replacing Miss Glindemann at the Practice Cottage is Miss Irene Haan, '32, who is on leave of absence from her position as head of the Home Economics Department at the State Teachers College in Platteville, Wisconsin.

New members of the Home Economics research staff include Miss Cleo Gray, M. S. '27, Miss Josephine Gardner, Miss Elizabeth Peterson, and Mrs. Jean Wayne.

PROF. "BILL" KIEKHOFER
His classes were so large that two sections were necessary

Home Economics Building BECAUSE of the increase in enrollment additional space in the

Home Economics Building must be provided in some way. The federal government has indicated its willingness to give 45 per cent of the money needed for erecting a new wing if the State or friends of the Department will provide 55 per cent. It is earnestly hoped that some plan may be devised so that it will be possible to get the additional space which is so sorely needed.

Changes in H-E Extension Staff Miss Betty Birong, 31, has resigned her position as clothing specialist to accept an instructorship at Stephens College, Columbia, Missouri.

Miss Jean McFarlane, '32, another of the clothing specialists, has given up her extension specialist position to become county home agent in Milwaukee County.

New staff members include Miss Clara Jonas, M. S. Cornell University, formerly home demonstration agent in Wayne County, New York, and Ellen Carlson, B. S., '30, formerly home agent in Kewaunee County, Wisconsin.

Summer Trip Miss Abby L. Marlatt, took her niece, who graduated from Kansas State College this year, on her first trip abroad during the summer. The underlying interest of the trip was seeing the development of the consumer cooperatives and the state, municipal and cooperative types of housing that are continuing to be developed in England, Denmark and Sweden, especially in Sweden which has an outstanding recognition of the needs of the low income group to be provided with suitable housing within the expenditure of a reasonable percentage of their income.

In September Miss Marlatt attended the Seventh International Management Congress in Washington, D. C., where she was chairman of the "Housing for Living" Section.

Miss Marlatt was a speaker at the recent "Madison Day" of the American Dietetic Association when that group visited here.

Women's Physical Education

PROFESSOR Blanche M. Trilling, Director of the Department of Physical Education for Women, and Associate Professor Ruth B. Glassow have returned to the Department after a semester's leave of absence. Miss Trilling spent her leave in the southern states and Miss Glassow traveled abroad.

THREE changes have been made in the staff this year. Miss Virginia Horne, Mrs. Frances Scott Bradley and Mrs. Katherine Redd Dubielzig are the new members. They replace Miss Helen Driver who has accepted a position at the University of Buffalo, Miss Louise Gray who is now at Wells College, and Mrs. Elna Mygdahl Hartenberg.

Miss Ruth Glassow and Miss Marion Broer are co-authors of a new book on tests and measurements in physical education. Miss Beatrice Hellebrandt has published a book in the field of dance composition and another on dance accompaniment.

Placements at 95% Miss Trilling is happy to announce that ninety-five per cent of the recent graduates have been placed in teaching positions. This continues the past record of the Department in which every graduate desiring a teaching position has been placed. That the work of the Department of Physical Education for Women is well-known throughout the country is evidenced by the fact that last year's graduates are teaching in fifteen states.

Enrollment ONE hundred and fifty-seven students are enrolled in the professional course in physical education. This is approximately the same number as enrolled the first semester of last year. Seventeen graduate students are registered in the Department.

Evening Recreation OCTOBER 10 marked the opening of the evening

WHAT IS THAT ANSWER?
Six-weeks exams are catching up with the dullards these days

recreation classes for faculty men and women, faculty wives, graduate students and members of the clerical staff of the University. Recreation opportunities in badminton, bowling, fencing, conditioning, swimming, ping pong, volleyball and tap dancing are provided for this group. In the past enrollment in these classes has averaged 150 a semester.

School of Journalism

FIVE new graduate assistants have been added to the School of Journalism staff of 1938-39. The new members of the staff are the following: L. Niel Plummer, chairman of the department of journalism and assistant professor, University of Kentucky; Jack W. Wild of the University of Kentucky; John Paul Jones of the University of Florida; James L. C. Ford, former member of the United Press staff and magazine writer; Burton L. Hotaling, former member of the editorial staff of the Holyoke, Mass., *Transcript-Telegram*.

Neal Talks on War News **THREE** lectures, designed to assist students in evaluating the confusing newspaper and radio reports of the European war crisis were given early this semester by Prof. Robert M. Neal.

Professor Neal's lecture topics were:

"The Broken Bottleneck", a survey of the censorship and a comparison of the situation today with that in 1914-18.

"Bullets and Bulletins", a resume of the news-gathering systems in the reporting of foreign affairs.

"Gas Masks for Propaganda", a survey of the defenses of news gathering systems against being hoodwinked by foreign propaganda machines.

Sigma Delta Chi Convenes **WITH** the University of Wisconsin chapter and the Madison alumni acting as hosts, the twenty-third national convention of Sigma Delta Chi, professional journalism fraternity, will

PROF. FRANK THAYER
Convention vice-chairman

be held November 10 to 13 inclusive at the Park hotel, Madison.

Headed by H. R. Knickerbocker, Columbia, '21, INS correspondent recently at Prague, the convention speakers will include George Pierrot, Washington, '19, former managing editor of the American Boy magazine and past national president of Sigma Delta Chi; and W. W. Loomis, publisher of the LaGrange (Ill.) Citizen.

Ralph L. Peters, roto editor of the *Detroit News*, and national president of the fraternity, is in charge of the program. According to President Peters, the basis of the program will consist of a series of round-table discussions covering all phases of the profession and led by nationally known authorities such as Knickerbocker, Pierrot, and Loomis.

The Madison arrangement committee consists of the following: Chairman, Don Anderson, Wis. ex-'25, business manager of the *Wisconsin State Journal*; vice-chairman, Frank Thayer, Wis. '16, associate professor of journalism and faculty adviser of the Wisconsin chapter of Sigma Delta Chi; Dewey D. Dunn, Wis. ex-'12, managing editor of the *Capital Times*; William A. Ender, Wis. '39, president of the Wisconsin chapter of Sigma Delta Chi; Walter A. Frantschi, Wis., '24, vice president of the Democrat Printing company, Madison; Grant M. Hyde, Wis. '12, Director of the School of Journalism; Willard R. Smith, Grinnell '21, manager of the Madison Bureau of the United Press and national treasurer of Sigma Delta Chi; William A. Sumner, Kansas State '14, professor of agricultural journalism, University of Wisconsin; and Carl A. Zielke, Wis. '34, manager of the Wisconsin Press association.

Hi Editors Conference **WITH** several hundred students participating, the 19th annual University of Wisconsin High School Editor's conference was held Saturday and Sunday, Oct. 22 and 23. Sessions were held in the Memorial Union and in the School of Journalism classrooms. The speaker at the convention banquet held Saturday night, Oct. 22, was

Frank O. Holt, Director of the University Extension Division.

The convention features consisted of the exhibit of Wisconsin student newspapers, magazines, and yearbooks; round-tables on special problems; conducted campus tours; and round-tables for faculty advisers.

College of Engineering

Mining and Metallurgy PROFESSOR E. R. Shorey is a member of the program committee of the American Mining Congress, charged with arranging the program for the annual meeting of this Congress at Los Angeles, California, October 24-29, 1938. Professor Shorey is also a member of Mining Exhibits, Incorporated, a no-capital, no-stock, non-profit organization whose function it has been to prepare the "Hall of the Mineral Empire" at the Golden Gate International Exposition to be held in 1939.

Topographic Engineering PROFESSOR Ray S. Owen attended, on September 5-8, the Second Regional Conference on Surveying and Mapping held under the auspices of Committee VIII, Civil Engineering Division of the Society for the Promotion of Engineering Education at the University of Louisville. The meeting was held at a YMCA camp on the Ohio River near Fort Knox, Kentucky. There were about ninety in attendance.

Student Inspection Trip THE senior civil engineering student inspection trip was taken October 5-8. The itinerary included Milwaukee, Fond du Lac, Wisconsin Rapids, Eau Claire, and La Crosse. The State Geologist and a representative from the Bridge Department of the State Highway Commission assisted four faculty members from the College of Engineering in conducting this trip. Faculty members were Professors Kessler, Janda, Cottingham, and Mr. Dodge.

Extension Division

AS a University function peculiarly adaptable for the enrichment of the lives of thousands in off-campus areas, Extension

teaching entered this fall upon its thirty-second year. This service involved University offerings of 425 correspondence-study courses, the full freshman and sophomore studies in Letters and Science and Engineering and many evening classes at Milwaukee, and a diversified program of day and evening classes and forums in dozens of Wisconsin cities.

A measure of the popular acceptance of this privilege is found by reference to last year's total Extension teaching service, which is represented by 26,609 registrations for 19,619 students—an enrollment equivalent to about twice the campus population.

Faculty Changes THE faculty roster was marked by changes and additions as follows:

General: English, Mrs. H. Jerome; French, William J. Boning; economics, Theodore S. Holstein; German, A. S. Hayes; history, Nels Bailkey, John W. Culver, Charles Monroe, C. H. Quenzel, Joseph Schafer, Jr., Herbert J. Wood; geography, Robert Finley; political science, Lorentz H. Adolfsen; visual instruction, Miss Gregg Montgomery.

Milwaukee Center: Chemistry, Earl Amott, S. C. Slifkin, Donald Swaheim; English, Edward Holst, David Clark Sheldon; history, Theodore W. Bauer, Ruth Reinert; mathematics, M. J. Turner; mechanical drawing, Burbank Murray, Norman Schober.

Youth Is Served OPERATING in the same number of communities as last year—16,—the freshman college-credit program was organized in Antigo, Beloit, Fond du Lac, Green Bay, Janesville, Kenosha, Manitowoc, Menasha, Merrill, Racine, Rhinelander, Sheboygan, Waupaca, Wausau, Williams Bay, Wisconsin Rapids. The full sophomore program of the University was also offered at Manitowoc and Sheboygan. The first-semester enrollment in the 16 cities reached 621, as compared with 563 last year. A total of 15 Extension classes, in credit and non-credit subjects, were being offered in October.

An exceptionally large group, numbering between 200 and 250, enrolled in the University in September by transfer from last year's Extension classes and Milwaukee Center classes. (This number compares with 134 last year). The opening of the University year was vested with extra significance for these students when, during Orientation week, they were welcomed to the campus at a spe-

cial convocation planned solely for Extension transfers, where they heard faculty and student leaders in talks on how to get the most out of their University experience. These speakers were Dean F. O. Holt, Assistant Dean John L. Bergstresser, Assistant Dean of Women Susan B. Davis, Willard W. Blaesser, of the Memorial Union, and William Bowman, a former Extension student, now enrolled in the law school.

Classes for the Masses AT MADISON and other cities the public again was invited to share in carefully planned programs of evening classes in college-credit courses, in business and engineering subjects, and in topics pertaining to many practical interests. In the latter category were Adventures in Geology, Headlines of the Week, Home Planning and Decoration, Practical Photography, Pre-School Child, and Psychology of Human Behavior.

Teachers in public and private schools were again offered the privilege of taking advanced work at their local school centers under University professors, with the opportunity of acquiring credits toward college or university degrees. Classes in Education were organized by the Department of Education at Beloit, Delavan, Green Bay (2), Janesville, Kenosha, Milwaukee (3), New Glarus, Racine,

Stoughton, Wauwatosa, and West Allis (2), and a class in Sociology, for teachers, was started at Reedsburg.

To bring to groups throughout the state the results of observation and research on outstanding governmental trends of the times, the Extension Department of Political Science formulated a new program of topics for round-table discussions and assigned instructors to conduct such forums in cities of the state. Interest in these discussions was heightened by the troubled European situation and its impact upon our own domestic problems.

New Courses NEW correspondence-study courses were introduced, others were revised, in several departments of instruction. The list includes:

Business: Business Correspondence; Business Law; Intermediate Accounting.

Economics: Cooperative Marketing and Consumers' Cooperatives; Economic History of the U. S.

German: Classical Period in German Literature; Contemporary Literature.

History: Modern European History (from 1870 to 1932); World History (two high school courses).

Mathematics: New courses in commercial mathematics and mathematics of life insurance, together with several in advanced mathematics.

AN ENGINEERING CLASS IN BRIDGE CONSTRUCTION
The R. O. T. C. enrollment is up again this year

Pharmacy: Pharmaceutical Arithmetic; Pharmaceutical Latin; Biologicals; Vitamins.

Political Science: Contemporary Dictatorships.

The course in Cooperatives was prepared not only to provide a background for those who must teach the subject in Wisconsin schools but to enable the general public to study the entire cooperative movement.

For Tomorrow's Citizens A NEW forensic year began in Wisconsin schools in the branches of platform work long supervised by the Extension Department of Debating and Public Discussion and the Wisconsin High School Forensic association. Its magnitude may be forecast partly on the basis of last year's participation, which was shared in by approximately 30,000 young people who were officially reported as engaging in competitive contests pointing toward the highest state honors. The coming year's debate question relates to a proposed British-U. S. alliance.

The debating department published a revised study aid, "The Nineteenth Century Novel," prepared by Mrs. Ruth Zevnik, in collaboration with Prof. Frank D. Crane; and a new study aid, "Educating the Consumer," compiled by Mrs. Ruth Black Fowell, '37, as the first of several publications to serve as reference guides on consumer buying.

Summer Dramatic Activities SIXTY-FIVE adults from nine states and Canada enrolled in July for the annual Dramatic and Speech Institute conducted by the Extension Bureau of Dramatic Activities. In August, the director, Miss Ethel T. Rockwell, supervised a spectacular historical pageant at Prairie du Sac, commemorating the centennial of the settlement of the Sauk Prairie region.

Prisoner Rehabilitation TO CORRELATE the recreational activities with the educational work for inmates at Waupun, the directors of recreation at the State Prison and the Central State Hospital were added to the University Extension staff upon the request of the State Board of Control. L. J. Imhoff is the recreational director at the Prison, and Henry H. Derleth holds a similar post at the Central hospital.

Milwaukee Enrollment THE Milwaukee Extension Center, serving the large metropolitan area, recorded an all-time high reg-

istration for the day school of 690 students, and the night school enrollment was forecast as about 3,200, the third highest in history. A gratifying trend was the growth in interest in the Liberal Education and Business courses held in the evening. Incident to the lower index in industrial employment, registration in the Engineering courses declined.

New Services A NEW service continued this fall at Milwaukee was the "How to Study Institute for Adults," held during the week prior to the beginning of classes, when competent lecturers discussed problems facing adults in carrying an educational program after being out of school a few years.

The Extension Division received a large registration and was accorded nationwide recognition in the industry for its recent course, "Survey of Footwear and Feet," which was offered under the joint sponsorship of the Extension Division and the Milwaukee Retail Shoe Dealers' association. Another new service is the certificate program of the National Institute of Credit, sponsored jointly by the Center and the Milwaukee Association of Credit Men, which enables students to earn the Junior or Senior Certificate of the National Institute of Credit.

Similar programs were announced in connection with other local groups, including: Certificate courses in real estate, in cooperation with the Milwaukee Real Estate Board; courses leading to the designation of Certified Life Underwriter, in cooperation with the American Life Underwriters' association; the L. O. M. A. certification, in cooperation with the Life Office Management association; and a series of courses that constitute a program of insurance training in fire and casualty, offered in cooperation with the Milwaukee Board of Fire Underwriters and the Insurance Institute of America.

Also new this fall are two courses, "Purchasing Principles and Practice," and "Purchasing Administration," both with the active cooperation of the Milwaukee Association of Purchasing Agents.

School of Education

THE extent to which the School of Education is participating in the increased University enrollment is told in following figures:

The number of students registered in the School of Education during the first semesters of the past three school years is: 1936, 754; 1937, 850; 1938, 946. These figures include students who are registered jointly in the School of Education and in other divisions of the university.

The number of graduate students registered as majoring in Education for the same three years is: 1936, 79; 1937, 78; 1938, 106. These figures do not include students majoring in Art Education and Physical Education. When these students are added, the figures become: 1936, 100; 1937, 104; 1938, 141.

In addition to these students, there are enrolled in graduate courses in Education, 26 students who are not working for degrees in Education.

Faculty Notes

A. S. BARR was honored this year by having his name listed in the latest edition of *Who's Who in America*. Barr is the third member of the Department of Education to be so honored; Dean C. J. Anderson and John Guy Fowlkes having previously earned this distinction.

JOHN GUY FOWLKES is conducting graduate courses in educational administration at Milwaukee and Delavan this year.

KAI JENSEN is holding courses in Stoughton and Janesville for teachers interested in the study of the psychology of adolescence.

CLARENCE E. RAGSDALE is conducting courses for teachers in Milwaukee, West Allis and New Glarus. The teachers at Milwaukee and West Allis are studying modern systems of psychology as they affect education, and those at New Glarus are studying the psychology of individual differences.

J. MURRAY LEE is teaching courses in Wauwatosa and Beloit which make a direct attack upon certain problems of the curriculums of those schools. He is also assisting a group of teachers in West Allis in a study of reading problems with special reference

to the needs of the West Allis Schools.

J. KENNETH LITTLE is offering courses in Educational Measurement to teachers in Kenosha, Racine, and Milwaukee.

A. H. EDGERTON has been asked to serve the Green Bay Vocational School by offering to its teaching staff a course in Guidance which will make a direct attack upon the special problems of their own school. Edgerton is offering a second course in which all Green Bay teachers may enroll.

DEAN AND MRS. C. J. ANDERSON spent a part of their summer in a tour of Norway, Sweden, Denmark and Finland.

GORDON MACKENZIE, has assumed his duties as principal of Wisconsin High. MacKenzie, who comes to the department from Leland Stanford University, spoke at the annual conference of superintendents held by the state superintendent of public instruction, John Callahan.

PROF. JOHN GUY FOWLKES
Conducts off-Campus classes

New Courses

THREE cooperative seminars are being offered to graduate students in Education this year:

Dean Anderson and MacKenzie are offering a

seminary in the Education of Teachers.

Willing and Lee are cooperating in a seminary upon curricular construction.

Jensen, Ragsdale, and Corey are offering jointly a seminary in Educational Psychology and Child Development.

Wisconsin High School

BURR W. PHILLIPS is editing the 1939 Yearbook of the National Council for the Social Studies. He is also a member of the program committee of this council for its meeting in Pittsburgh, Pennsylvania, November 25, 26. Phillips was this year promoted to the rank of associate professor in the teaching of History. He is taking a leave of absence for the academic year 1938-1939.

RUTH M. JOHNSON is acting chairman of the History Department in Wisconsin High this year, and in collaboration with Ronald B.

Edgerton is offering the educational methods course in the teaching of History. Miss Johnson studied in the summer session of Columbia University during the past summer.

MISS MARJORIE MORSE has been added to teaching staff of the History department in Wisconsin High for this year.

WILLIAM R. SUR was a member summer session staff in the department of music at the University of Illinois during the past summer. Sur was invited to become head of the music department at Illinois but declined.

RONALD B. EDGERTON has been appointed chairman of the State History Teachers Central Committee, and is also chairman of the History and Social Studies Section of the Southern Wisconsin Teachers Association for 1938-1939. Edgerton will give a paper on "An Experiment in Community Living" at the section meeting on Research in Education at the state convention of the Wisconsin Education Ass'n at Milwaukee Nov. 3, 4, 5.

CALLA A. GUYLES is state chairman of a committee of the Classical Association of

the Middle West and South which is studying "The Present Status of Latin". This committee is composed of high school teachers of Latin from scattered communities of this state.

LAURA B. JOHNSON spent part of the summer at the Rocky Mountain Workshop at Denver, Colorado. This workshop was under the auspices of the Progressive Education Association, and Miss Johnson held a fellowship. Miss Johnson will appear on the program of the foreign language section of the Central Ohio Teachers Association meeting at Columbus, Ohio, on November 4. She will speak to the topic "Correlation Through Cooperation."

College of Agriculture

A NEW course in the College of Agriculture has been established recently. The restricted number of students enrolled in it are

unusually happy about the opportunity which they have to participate in a round-table discussion and seminary on problems of economic significance as concern American agriculture.

Under the direction of K. H. Parsons, professor of agricultural economics, and Milton Bliss, instructor in agricultural journalism, the students enrolled do research work on a special problem and meet together once each

week to report their findings. Throughout the regular school year, various members of the group will appear bi-weekly on the University's radio program, "College of the Air", which is broadcast from WHA on the campus, and WLBL at Stevens Point, the state-owned stations.

This newly - designed course will enable students to do work in either agricultural economics, through research, or in agricultural journalism by helping to prepare the scripts for radio presentation. Regular academic credit is granted to eligible students who satisfactorily carry out the work to which they have been assigned.

DEAN IRA L. BALDWIN
Re-elected to national post

Teacher Demand Is Good NINETEEN of the 24 June graduates in agricultural education have already been placed, reports J. A. James of the College.

An increased interest in the teaching of agriculture in Wisconsin high schools is reported by James. Exactly 25 schools have added agricultural courses to their curricula this year. In addition to the recent graduates, a number of graduates have moved to better positions.

Enrollment Increases THE new high figure for enrollment in the regular agriculture and home economics courses which was reached in 1937 again has been broken. Preliminary registration data as released by Assistant Dean Ira L. Baldwin in the College of Agriculture indicate an increase of eleven per cent in the number of students taking agriculture

and a gain of fourteen per cent in the number of home economics students over the corresponding figures for last year.

Leadership Course Held DELEGATES from 20 states and Canada, representing six denominations, attended the 17th annual town-country Leadership Summer school at the University of Wisconsin, June 27 to July 8. Sixty-three pastors and laymen were attracted by a program of meetings, discussions, and classes covering the interests of the rural church. A. F. Wileden of the rural sociology department was in charge.

Extension Reaches 2,000,000 MORE than 100 meetings per day with an attendance of more than 2,000,000 people or 75 per cent of the total population of Wisconsin is the record of agricultural extension and home demonstration workers for 1937. The exact figures taken from the annual summary prepared by E. L. Luther, assistant state leader of agricultural representatives, are 36,790 meetings with an attendance of 2,114,279 people.

Mr. Luther's report also shows that all extension and home demonstration workers together distributed 367,891 bulletins, wrote 245,594 letters, made 38,865 visits to farm homes, wrote 14,171 news articles, held 53 achievement days for adults and 160 for 4-H club members, and conducted 245 tours.

More than 55 per cent of all families in Wisconsin benefited directly from the combined program of agricultural extension and home demonstration agents, according to Mr. Luther's report. Approximately 45 per cent of Wisconsin farmers credited the agricultural extension work with direct influence on their farming operations and 15 per cent of all homes reported benefits from the home demonstration program.

The exact figures in the report are: farms which have changes definitely

resulting from the extension program, 83,153; homes which have changes directly resulting from the home demonstration program, 32,555; entire number of families directly influenced by the extension program, 108,952.

Dairymen to Hold Schools DAIRYMEN in 41 Wisconsin counties will hold extension schools this fall and winter where they will consider latest information regarding herd building practices, reports Gordon E. Dickerson of the genetics department.

These schools, consisting of a series of three meetings held two weeks apart, will give consideration to such questions as fundamentals of dairy cattle breeding, selecting breeding stock, cooperative bull associations, as well as production records, pedigree proved sires, in-breeding and line breeding. Meeting with the breeders at these schools will be L. E. Cassida and Gordon E. Dickerson of the department of genetics; E. E. Heizer, chairman of the department of dairy husbandry, and A. C. Thomson, secretary of the Wisconsin Dairymen's association.

Sheepmen Exchange Rams TRUCKS carrying high quality pure-bred rams visited communities in 24 counties during September as part of a state program of flock improvement, according to a schedule announced by A. E. Darlow and James J. Lacey, of the animal husbandry department.

Between 25 and 35 rams of at least four breeds, consigned by Wisconsin breeders of purebred sheep, were unloaded at stops in nearly 50 different communities for sale to or exchange with local sheep breeders for flock

building purposes. At these meetings, sponsored by county agents, the College of Agriculture, and agencies of the livestock industry, demonstrations and talks were given on breed type, marketability, good fleece, and good quality. Two trucks, each covering a different territory, will be used in the tours.

Christensen to Address Forum CHRIS L. CHRISTENSEN, dean of the college, has been asked to appear before the members of the American Country Life association when they hold their national rural forum at the University of Kentucky, Lexington, November 2 to 4.

He will speak on "The American Farmer and the International Situation." The central theme of the forum is "Disadvantaged People in Rural Life."

Other well-known Wisconsin men serving as officers of the Country Life association are: E. L. Kirkpatrick and C. J. Galpin, formerly of the department of rural sociology, and Henry C. Taylor, one time head of the department of agricultural economics at the University.

Dr. Baldwin Re-elected AT THE annual meeting of the Society of American Bacteriologists, which convened this year at Los Angeles, Dr. Ira L. Baldwin, assistant dean of the College, was re-elected secretary of the association. This organization includes in its membership fully 1,200 men and women who are interested in research and teaching in the field of bacteriology.

Others who attended from the College were the Profs. E. G. Hastings, W. C. Frazier, and P. W. Wilson, and M. J. Johnson, Sylvan Lee, Orville Wyss, Robert Burris, Richard Tam, and Philip West. About 75 alumni of this school were present for the sessions.

Dr. Baldwin has been a member of the Society since 1926 and has served in his capacity as executive secretary since 1935.

The Wisconsin Union

A PWA offer of \$30,000 to assist in completing equipment and street development for the new theater and arts addition of the Memorial Union was announced last month. The offer is contingent upon the University raising a like amount. If accepted, the grant will be in addition to the \$236,000 already awarded by PWA for construction purposes.

Only partial equipment was included in the budget for the new building as set up last spring. If sufficient funds can be found and the new offer accepted, the building will be completely equipped when it opens next summer and the street area nearby improved by building an auto turn-around at the end of Park Street and cutting back curbs at the corner of Langdon and Park Streets where cars approach the hill.

The Union Council, meeting for the first time this year, approved house committee budgets totalling \$4377 as compared to expenditures of \$4098 last year. These budgets, according to chairman Edward Fleming, make possible the social program planned by the nine Union committees for the year, including free open houses, coffee hours, matinee dances, Sunday concerts, motion pictures, forums, art exhibitions, tournaments, books for the library, and other social and cultural facilities for the students.

Friendship and Marriage Course Two new courses of instruction will make their bow at the Wisconsin Union this fall.

A lecture course entitled "Friendship and Marriage" and dealing with courtship and the preparation for marriage, has attracted a maximum enrollment of 400 for the first semester and registration is already being made by a similar number for the second semester.

CARL BRICKEN
New head of the School of Music

Seven lectures on "Paths of Friendship and Marriage," "Anatomy and Physiology of Reproduction," "Dating and Mating," "Mental Hygiene Aspects of the First Years of Marriage," "Modern Parenthood," "Economic Problems in Marriage," "Youth and the Future of Family Life," will be presented at the Union by faculty members from the academic departments involved. On alternate weeks the 400 students registered will divide into small discussion groups meeting with faculty leaders on the material covered in the previous lecture.

The series is organized and presented by the Wisconsin Union with the help of a student committee and is given without credit. An advanced credit course dealing with the problems of marriage and the family more extensively and intensively is offered in the sociology department.

The second teaching venture is a three-credit course in "Group Work Practice" for students doing field work in the Union, offered by the Sociology Department and given under the supervision of Dr. Reuben L. Hill, assistant director of the Union, and the Union staff.

Public Relations Work Begins

THE Student Public Relations Committee of The Wisconsin Union is beginning its year's activity by laying plans for the Wisconsin High School Student Council Association convention to be held in Madison on November 11 and 12. The two-day program for this group of high school people participating in student government will revolve around the main theme of "Recreation—High School and Community."

The series of monthly news letters to legislators and citizens of the state is being resumed this year and the first of the 1938-39 series will have as its topic, Freshman Orientation Week. The role of the University in helping its freshmen adjust themselves to new environment will be clearly explained.

Leon Epstein, junior student from Beaver Dam, is chairman of the Student Public Relations Committee, and Karl Boedecker, L & S grad, from Milwaukee, has been appointed executive secretary.

Additional projects will be carried on during the year, including the Campus guide service, entertainment of visiting high schools, and cooperation with faculty and student organizations.

From Station WHA

"THE School in your Home" is how the Wisconsin College of the Air is known to the thousands of people all over Wisconsin who are enjoying courses of instruction at home by means of the radio.

This year's series opened on September 26 with ten courses to run for thirty weeks. There is no charge for enrolling in courses, taking the examinations, or receiving the certificates of achievement granted for successful completion of courses.

The schedule is as follows:

Monday	1:30 P. M. Agricultural Horizons 3:00 P. M. The Job Outlook
Tuesday	1:30 P. M. Good Books 3:00 P. M. Following Congress
Wednesday	1:30 P. M. Over at Our House 3:00 P. M. Mental Health and Happiness
Thursday	1:30 P. M. Music Appreciation 3:00 P. M. Contemporary Economics
Friday	1:30 P. M. American Youth Speaks 3:00 P. M. Public Discussion Clinic

All broadcasts originate on the University campus in Radio Hall. Bulletins listing all of the broadcasts have been prepared and are sent free to prospective listeners.

Political Forums THE Wisconsin Political Education Forum provided free time on the air over WHA and WLBL for all 43 qualified candidates for state-wide elective office in the primary campaign. This is the only program of its kind in America and is feasible only over a public radio system. Listeners may hear all sides of all issues, instead of only those sides whose supporters have finances to buy time on the air. The plan is being continued in the regular election campaign.

WHA Alumni On Air Two Wisconsin graduates have recently been playing opposite each other on the network broadcasts of "Backstage Wife". They are Vivian Fridell and Eloise Kummer. Both received their first radio training over the University station WHA doing reading and participating in dramatic shows.

Add New Studio A FIFTH broadcasting studio has recently been added to the Radio Hall plant. The Wisconsin campus boasts one of the finest broadcasting centers in the country. WHA and WLBL programs, heard throughout the state, are presented there throughout the day.

Intercollegiate Athletics

IT WOULD be somewhat foolish for us to attempt to recount the efforts of the football squad in these columns as all of you have read the weekly accounts of their fortunes and misfortunes in Harry Stuhldreher's Football Letters. Let us say just one word. At the present writing the team has won two and lost two games. Before the season opened, most sportswriters predicted that if Wisconsin could win three games, it would be a good season; if she won four, it would be a mystery how the boys did it. There has been some grumbling since the unfortunate defeat at La Fayette. Before you start complaining again, just remember that we do NOT have the team you'd like us to have. Also, don't forget that we'll probably lose several more than we have already lost. Enough of that and on to the other sports.

Tom Jones Wins Again PROBABLY the most consistently good track and cross country coach in the country, Tom Jones seems to be headed for another banner year with his thin-clad hill and dale men. To date the squad had won three impressive victories and seems to gather power as the season progresses. The Milwaukee Y. M. C. A. and the Wheaton college squads were taken into camp by identical scores, 15-40. (Don't forget that low score wins in cross country.)

COACH TOM JONES
His team wins again

Purdue was defeated at La Fayette by a score of 24-32.

Walter Mehl, Big Ten and National Intercollegiate two-mile champion, is a member of this year's squad, trying his hand at cross country racing for the first time. His showings have been very encouraging to date.

Basketball Prospects SINCE this is the last issue of the ALUMNUS before the basketball season gets well under way, let us make a brief and none too pleasant report on the basketball prospects for the coming year. Of last year's varsity, only two members of the team will return, Byron Bell, center, and Ernie Davis, guard. Lost by graduation are forwards George Rooney and Hod Powell, the latter an all-conference selection; Charlie Jones, center; and the two guards, Manny Frey and Lee Mitchell.

There should be some good replacements from the juniors of last year's team as well as some up and coming frosh. Bob Wiegant, at present playing and on the football squad, Schwartz, Christianson, Dupee, Anderson, and Marsh should round into pretty fair playing form by the start of the current season. All in all, however, the prospects are none too bright. Under the new Western Conference rules Wisconsin will play every Big Ten team, meeting four of them twice and four of them once.

Stadium Construction THE additional seats on the east side of Camp Randall Stadium are being pushed along as fast as possible. All hope of having them ready in time for use at the Wisconsin-Minnesota game has been abandoned, however. The seats will spread from goal post to goal post, immediately above the last row of present seats in the east stands. Approximately 7,000 additional seats will be provided by this construction.

Boxing Prospects THE University of Wisconsin, which will be host to the National Collegiate boxing tournament next March 30, 31 and April 1 will be a strong contender for team honors in the event, with six 1937 varsity veterans and a fine crop of sophomore boxers to draw on. Reduction of class weight limits by four pounds since last season will, however, compel several of Coach Jimmy Walsh's Badger veterans to move up one division.

Veterans who will be back on the squad this year include Art Walsh, 115; Jim Walsh, 125; Omar Crocker, 135; Joe Cyz, 145; Henry Strand, 155; and Truman Torgerson, 175. In addition to these veterans there are several sophomores who will give the varsity men a real fight for their posts. Of these Gene Rankin, 135; Woodie Swancutt, 145; and Nick Lee, heavyweight, are outstanding.

Fenske Back FOLLOWING a successful European invasion during the summer months, Charles (Chuck) Fenske, ace miler, is back on the campus to continue studies for a master's degree in history. Fenske made a last minute decision against joining a group of athletes touring South America during the first semester of the school year. The Badger star received his degree in history last June with a scholastic average near the "B" mark. He will continue his training for Olympic consideration.

Wrestling Promising FOUR major letter winners will form the nucleus of what appears to be a powerful wrestling team as Coach Martin rounded up his squad of veteran men after the first official practice session last month. The major winners are John Anderson, 155; Joe Quincannon, 155 and 165; Chester Piatkiewicz, 175 and high point man last year; and Ken Newbury, 135; who placed fourth in the Big Ten last season.

PROF. NATE FEINSINGER
Helps State Labor Board

Anderson should go a long way in the conference race this year, especially with two solid years of experience to back him up. Quincannon at 165 pounds is out of his weight class but he has shown that he is tough enough to win even with a disadvantage. Great seasons are expected of Piatkiewicz and Newbury.

Law School

DEAN Lloyd K. Garrison, who since June has been studying labor conditions in England both under a Guggen-

heim fellowship and as a member of the committee appointed by President Roosevelt for study of labor conditions in England and the Scandinavian countries, returned the latter part of September for a period of about four weeks. He has now gone back to England and will remain there until January. Professor Ray A. Brown is Acting Dean during his absence.

PROFESSOR Charles W. Bunn, who taught at Harvard Law School last year as an exchange professor, has returned to our fold.

WADE BOARDMAN, member of the firm of Roberts, Roe & Boardman, who has taught the course in Practice for several years, has been given a leave of absence for the first semester, but will be back with us again next year. Professor J. H. Beuscher is teaching his course in the interim.

PROFESSOR N. P. Feinsinger is still devoting part of his time to his work as counsel for the State Labor Relations Board.

PROFESSOR William Gorham Rice, Jr., was a candidate for the assembly in the September primaries. Professor Rice, whose training and experience in International Law make him one of the outstanding authorities in that field in the United States, will give a course in that subject this year. Recent world events suggest the propriety of law schools giving somewhat more attention to this problem than they have heretofore.

Requirements Raised BEGINNING this year, requirements for entrance to Law School have been raised somewhat. Whereas, formerly all students in good standing were admitted to Law School with three years of college training, the rule now is that only those with a 1.3 scholastic average or better may be admitted with only three years of pre-law training. Those with a lower scholastic average must have a degree. Despite this new restriction enrollment in Law School shows a slight increase over last year. The total enrollment this year is 420 as compared to 404 in 1937-38, and 458 in 1936-37.

Student Activities THE three graduate fellows for this year are: John D. Heywood, New Richmond; John K. Wood, Red Oak, Iowa, and Robert A. Bablitch, Stevens Point. In addition to the Public Service in-training Scholarships reported previously, one has been awarded to John C. Whitney, Green Bay.

THE Law School Association, undergraduate law organization, has elected Willard S. Stafford, Madison, as president for this year. The Association is investigating the possibility of undertaking the administration of argument cases, an activity involving the preparation and presentation of arguments on appeal which has previously been conducted under faculty supervision. Their plan would be to have students not only prepare and argue appeals, but also sit as judges.

Engineering Notes

Faculty Treks To Houghton AN EXODUS of the engineering faculty on October 7 and 8 was caused by the meeting of the North-Midwest Section of the Society for the Promotion of Engineering Education at Michigan College of Mining and Technology at Houghton, Michigan. Most of those who made the trip went by motor car and enjoyed an unusually gorgeous panorama of fall coloring, which reached a climax in and around Houghton.

Prof. G. L. Larson presided at the meeting of the mechanical engineering division, and Prof. R. A. Ragatz presented a paper at the meeting of the chemical engineering division. Mrs. L. F. Van Hagan brought home the bridge prize.

Those making the trip were: W. A. Bain, G. J. Barker, E. Bennett and wife, R. R. Benedict and wife, Mrs. C. I. Corp, J. M. Dorrans, B. G. Elliott, A. Gemant and wife, D. Gordon, C. M. Jansky, Dean F. E. Johnson, L. C. Larson, G. L. Larson and wife, F. A. Maxfield and wife, Mrs. E. Nelson, D. W. Nelson and wife, J. F. Oesterle, R. A. Ragatz, P. C. Rosenthal, C. A. Rowe, E. R. Shorey, L. F. Van Hagan and wife, M. O. Withey and wife.

Issue Plumbing Report F. M. DAWSON, dean of engineering at Iowa University and formerly professor of hydraulics and sanitary engineering at Wisconsin, and A. A. Kalinske, '33, are joint authors on a report on "Plumbing Cross Connections and Back Siphonage Research," which has been published as Technical Bulletin No. 1 of the National Association of Master Plumbers of the U. S., Inc., Washington, D. C.

Roark Publishes New Book PROF. R. J. Roark, of the mechanics department, is the author of a new book entitled "Formulas for Stress and Strain," which has just been announced by McGraw-Hill Book Company. The new book brings together in convenient form all the available formulas for stress, strain, and strength that are likely to prove useful to the designing engineer.

Prof. C. C. Thomas Dies PROF. Carl Clapp Thomas, who was head of the department of steam and gas engineering at Wisconsin for four years from 1909 to 1913, died at his home in Pasadena, Calif., on June 5.

Students Hosts To ASCE Members THE Wisconsin student chapter of the American Society of Civil Engineers was host to the Wisconsin Section of the society at a dinner meeting held in the Memorial Union on November 8. Dean F. Ellis Johnson, Dean-emeritus F. E. Turneaure, and Dr. D. W. Mead were guests of honor. Charles F. Ball, chief mechanical engineer of the Chain Belt Company of Milwaukee, described "pumpcrete", the new machine for placing concrete by the pumping method, and illustrated its operation by motion pictures. The meeting was the first attempt that has been made to bring the student civil engineers and the practicing civil engineers of the state together.

Music School

MISS Florence Bergendahl of the Music faculty and director of the Women's Chorus attended summer school at Occidental College in Los Angeles. The session there was under the direction of Dr. John Finley Williamson, who is the director of the Westminster Choir School at Princeton, New Jersey. The summer school is limited to sixty choral directors, and Miss Bergendahl returned with enthusiastic reports of their activities. The group was the first to sing in the beautiful new Thorne Hall on the Occidental Campus—and they also gave a program in the Bowl which was broadcast by N.B.C. in a nation-wide hook-up.

Attend Choir Session PROFESSOR Leon Iltis and Miss Catherine Gregg attended the Westminster Choir Summer Session held on the campus of Mt. Hermon College, Northfield, Massachusetts, following the completion of their work at the regular university summer course.

Library Addition A MAJOR change in the physical plant of Music Hall to provide library and study facilities for music students is well under way. Former students will recall an old regulation which prohibited any but seniors and graduate students from using a room well provided with books and scores but scrambling for an opportunity to sit at a single table equipped with eight chairs, in a room with bad ventilation and inadequate lighting. With the advent of a new director, Mr. Bricken graciously gave up the commodious office provided for him, and it, with a large storage room adjoining were made into one spacious room. This was re-decorated, new lighting installed, steel book cases and stacks for music provided, and chairs and tables which quintuple the seating capacity of the old library made available to the entire student body of the school of music.

The room will formally be dedicated as the Charles H. Mills Memorial Library in January, at which time a bronze plaque honoring the former director of the School of Music will be unveiled. Contributions to a memorial fund have come in from many friends and

former students, but may still be addressed to Miss Helene Stratman-Thomas, Treasurer, Music Hall.

Detroit

THE first meeting of the year of the Detroit Alumni club was held on October 15 at the Ft. Shelby Hotel in that city. The first item of business was the election of officers which resulted in the following being named: C. E. Broders, '14, president; Conrad Conradson, '83, vice-president; R. T. Johnstone, Jr., '26, secretary-treasurer. Following the election, the group spent the remainder of the afternoon listening to the Pitt-Wisconsin game.

Indianapolis

ABOUT 50 members of the Indianapolis Alumni club met at the Indiana Athletic club on Friday, October 21, the day before the Purdue game. As guests of honor, the group heard from Coach Harry Stuhldreher and Alumni Secretary A. John Berge. Both delivered short, informal talks, Stuhldreher, of course, talking about athletics and Berge telling about the work of the Association.

New officers for the coming year were elected at this same meeting. Those who will lead the club during 1938-39 are Merrill Esterline, '25, president; Robert Tristram, '13, vice-president; and Robert Blakeman, Jr., '23, secretary-treasurer.

Waukegan, Ill.

THE Wisconsin alumni of the North Shore held their first meeting of the year at a dinner at the Y. M. C. A. in Waukegan on October 12. Howard I. Potter, '16, president of the Wisconsin Alumni Association, was guest of the evening and gave an interesting talk on the University, the alumni, and Wisconsin athletics. A motion picture of the Wisconsin-Minnesota game of 1937 was shown and added much interest to an enjoyable evening.

A brief business meeting took place, resulting in the election of the following officers for the coming year: George G. Crawford, '23, president; C. L. Helgren, '30, vice-president; Florence E. Lewis, '17, secretary; and Katharine Strong, '24, treasurer.

Our Financial Report

AS "STOCKHOLDERS" in the Wisconsin Alumni Association, you are probably interested in the financial well-being of your organization. We are pleased to present at this time a summary of the annual audit prepared for the Association by Elwell, Kiekhofer and Co. of Madison. Instead of presenting the eight pages of figures in this report, we have prepared a digest of the more important divisions of the audit which should prove of interest to you.

Income . . .

THE total income of the Association for the fiscal year ending August 31 was \$18,815.77. Included in this total was \$1,606 collected for life memberships which, of course, cannot be used for operating expenses and which was turned over to the Association's Life Membership Investment Fund. This left \$17,209.77 for operating income. Of this amount, \$13,913.23 came from annual life memberships. This is an increase of \$1,427.63 over a year ago and is the highest membership income since 1932 when we took in \$16,116.98.

Advertising and interest on investments account for the largest share of the Association's remaining income and here are the figures for the last two years:

	1936-37	1937-38
Advertising -----	\$1,956.45	\$1,254.14
Interest on investments -----	1,891.57	1,620.22

Advertising slumped with the change in the size and publication frequency of the magazine and with the diminished budgets for the type of advertising generally run in magazines of our type. The drop in interest income was undoubtedly due to the disturbed economic conditions.

It is interesting to note that the upswing started last year has carried over to the present fiscal year. During the month of October our receipts were higher than for any October since 1929.

Expenses . . .

EXPENDITURES for the past year amounted to \$17,625.65 as compared to \$23,844.05 for the preceding year, a decrease of \$6,218.40. The major portion of this decrease resulted from the change in size and frequency of issue of the WISCONSIN ALUMNUS. Whereas these changes produced a decrease in advertising, the savings in printing bills certainly warrants the retention of the new size. The auditor's report shows an operating income of \$17,209.77 and operating expenses of \$17,625.65, or an excess of expenses over income of \$415.88.

Accordingly, in spite of the unsettled business and economic conditions, the Association managed to get along in fairly good shape. We did not have to borrow money nor touch our reserves. All bills were paid as they came due and at the end of the year we had money enough in the bank to take care of all bills payable:

Cash in the bank on August 31 -----	\$1,115.91
Accounts receivable -----	315.62
Accounts payable -----	925.11

Investments . . .

The auditor's report also shows an increase in the Life Membership Investment Fund: August 31, 1937 ----- \$34,000.67
August 31, 1938 ----- 35,606.67

During the year two \$1,000 bonds were sold at par and four \$1,000 Dominion of Canada bonds were purchased for that fund. Of the bonds held in the Life Membership account, \$4,000 are in default in principal and interest and \$3,000 in default in interest alone.

The Student Loan Fund on August 31 amounted to \$9,677.53. There was a cash balance of \$1,877.60 and loans outstanding of \$7,799.93. This fund shows an increase of \$110.06 over a year ago.

The audit of the Association Investment Fund shows exactly the same totals as a year ago, with a net of \$8,716.41 in this fund.

Wisconsin's Famed CHEESE MAKERS

offer this tasty
gift suggestion

Say Merry Christmas
with Wisconsin Cheese

Writes
C. A. Dykstra

"Of course I am interested in Wisconsin Cheese for Christmas. I am glad, therefore, to reply to your inquiry and to tell you that we shall do again what we did last year—send Christmas presents of Wisconsin Cheese to many friends out of the state. The thanks of our friends were so gratifying that we cannot drop this little custom out of our program by any chance."

Writes
George Haight

"I am delighted to hear of your Christmas gift plan for Wisconsin cheese. Already I am making out a list of folks to whom I will send the special gift packages this year.

"It seems to me that the vast army of Wisconsin alumni scattered throughout America will welcome this opportunity to express in this noteworthy manner the 'Spirit of Wisconsin' and to extend the fame of this state's great dairy industry by giving State Brand cheese in the special gift packages.

"It is my hope that alumni clubs everywhere will cooperate in this worthy enterprise."

Choice of

- ★ American
- ★ Cured Swiss

THE practical answer to your gift problem—these gay packages of either fine Wisconsin-made American specially selected for its piquancy of flavor, or cured nut-sweet Swiss Cheese. Both are highest quality, bearing the official trade-mark, which is your assurance of the world's finest. Shown at the left is the 2½ lb. pack of American, truly a gift of taste, a colorful promise of Wisconsin dairy goodness. The selected Swiss is cut from immense wheels and is carefully shipped in special colorful wrappings.

2½ lb. (approximately) Gift Pack. Choice of either American or Swiss Cheese. \$1 including shipping cost.

\$1

5 lb. (approximately) Gift Pack. Choice of either American or Swiss Cheese. \$1.85 including shipping cost. (Add 15c west of Rockies)

\$1.85

Lafayette

MEMBERS of the LaFayette Alumni club held two meetings on the night before the Purdue game. The first of these took place at the annual Homecoming dinner of Purdue University in the Memorial Union building on that campus. About 300 people were present at this dinner, not all of them Wisconsin alumni, of course, to hear the principal speaker of the evening, Wisconsin's President C. A. Dykstra. Purdue's own president, Dr. Elliot, was in the Philippines at the time, so the Badger "Prexy" did double duty.

The second meeting of the club took place at the home of R. B. Stewart, '25, comptroller of Purdue University, immediately following the dinner. About 30 Wisconsinites took advantage of Bob's hospitality to renew acquaintances and make vague predictions about the next day's game.

Chicago Alumnae

THE Wisconsin Alumnae Club of Chicago held its opening luncheon at Mandel Brothers on September 17. The guest speaker was Mrs. Alice Manning Dickey, a former editor of McCall's Magazine, whose subject was "The Arts of the People."

The Wisconsin Alumnae Club of Chicago holds its regular meetings the first Saturday of every month, and extends an invitation to all those wishing to join. A very interesting program has been arranged for the coming year by the program chairman, Mrs. Elizabeth Todd.

For additional information, write or call: Miss Helen Zepp, President, 521 Elmore, Park Ridge, Ill., P. R. 1388R; Miss Edith Jiencke, Rec. Secy., 665 Des Plaines Ave., Des Plaines, Ill., D. P. 146M; or Miss Anne Branson, Cor. Secy., Stevens Hotel, Chicago, Ill.

Chicago, Ill

ONCE again the Chicago Alumni club has come through with a most attractive directory of all alumni and alumnae in the Chicago area. Enclosed in an attractive red, silver and black cover, the directory includes a year book in the opening pages.

The directory is dedicated to George I.

Haight, '99, "Past President of the Alumni Association, Past President of this Club, outstanding alumnus, whose love and loyalty for his Alma Mater provide an example and inspiration for us all." Gordon Fox, '08, past president of the club, explains in his foreword that the intent of the volume is "that it will facilitate acquaintance and association and will promote co-operation in furthering the welfare of our University".

The directory feature comprises nearly 100 pages of the book. Alumni are listed alphabetically, and according to classes. Those living in the suburbs are listed alphabetically by cities. The alumnae are listed alphabetically.

Historical revenues of the club's activities, complete athletic schedules, and officers in the Chicago club, the Alumni Association and the University administration are contained in the year book section.

Schenectady, N. Y.

ON SEPTEMBER 13, the Schenectady Alumni club elected the following officers for the coming year: Frank Wood, '34, president; G. C. McNown, '35, vice-president; Herbert Dow, '36, historian, and Will Lloyd, '36, secretary-treasurer.

The club is planning to have monthly luncheon meetings during the year and three or four larger meetings. The officers have contacted Dean F. Ellis Johnson of the College of Engineering in the hopes that the new dean can address the group on one of his trips east.

Washington Big Ten

WISCONSIN Alumni in and around Washington, D. C. are not only members of their own Alumni Association, but also are active participants in a much larger social organization made up of the alumni of all of the Midwest Conference schools. The principal social event of this larger group is an annual get-together and dance on the eve of the final football games.

For the party this year, the Congressional Country Club of Washington has been rented for Friday night, November 18, and all Alumni of the University, their families and their friends in and around Washington are cordially invited to attend.

Attendance is limited to 600 and reservations may be made by telephoning in Washington to Woodley 6416.

Needed for Growing Bones and Teeth..

Vitamin "D" Belongs in Milk!

Your child needs calcium and phosphorus to insure strength and proper formation of growing bones and teeth. Milk is the richest and most economical food source of these minerals.

But in order to help the body processes make effective use of these minerals, a third factor—VITAMIN "D"—must be present. Yet, according to leading scientific authorities, Vitamin "D" is not adequately supplied in ordinary American diets. In fact, it has been estimated that improper bone development affects during infancy more than half the children in large cities and is due principally to lack of sufficient Vitamin "D."

You can make certain that your child receives enough Vitamin "D"!

Adopt the method so many doctors recommend—do what so many modern mothers are doing—serve milks that have been *enriched* with sunshine Vitamin "D"—IRRADIATED and other types of Vitamin "D" Milks prepared under the Steenbock process.

The excellent protection against faulty bone development which these Vitamin "D" Milks provide has been amply demonstrated by clinical studies on more than 3,000 infants and growing children.

For more information about this important subject, write us for our new booklet "A FOUNDATION OF STRENGTH FOR THE FUTURE!" This illustrated booklet will be sent to you at once—FREE!

WISCONSIN ALUMNI RESEARCH FOUNDATION MADISON WISCONSIN

*A corporation not for private profit, founded in 1925, to accept and administer, voluntarily assigned patents and patentable scientific discoveries developed at the University. By continuous

biological assays, the public and professional confidence in accurately standardized Vitamin D is maintained. All net avails above operating costs are dedicated to scientific research.

Real Progress

(Continued from page 11)

letics contacted the promising athletes in the high schools. Plans are now under way to present a scholarship to some outstanding graduate in each of the Milwaukee high schools each year. The Milwaukee Extension Center was not neglected in this contact work. Through the efforts of the club, Milwaukee alumni came to know the work of the center as they have never done before. The Center, in turn, helped the club prepare its mailing lists, arranged for speakers, and called to the attention of alumni, educational opportunities which few realized existed.

Throughout all of this increased activity, the noon luncheon group has met regularly. The place of meeting has changed from time to time, but the interest in these enjoyable get-togethers has always remained high.

Uppermost in the club officers' minds has always been the publicizing of the University and the interesting of more people in its welfare. To that end they have staged annual "On Wisconsin" dinners during the fall of the year. The 1938 affair will be held on December 4. Certain of the interest they have aroused among the fellow alumni, the club this year has rented the Milwaukee Auditorium as the only place large enough to hold the anticipated crowd! What the Milwaukee club can do, any club can emulate.

Copies of the interesting bulletin which describes some of these services were mailed to all alumni club presidents. Due to the fact that there have been changes in club personnel during the past few months, some of the officers may not have received their copy. If you are interested in receiving your copy write to Waller Carson, 705 Wells Bldg., Milwaukee.

Sheboygan, Wis.

MEMBERS of the Sheboygan county alumni club enjoyed a pleasant evening of good natured ribbing with Marquette alumni on September 29 when the second annual Marquette-Wisconsin Jamboree took place at the Heidelberg Club in Sheboygan. Part of the proceedings were broadcast by the local radio station WHBL.

Guest speakers on the radio program included Athletic Director "Con" Jennings, Alumni Secretary Harry Jessel, and freshman

football coach "Sunny" Sonnenberg of Marquette, and basketball coach Harold Foster, '30, and swimming and golf coach and general all-around handy-man of the athletic department Joe Steinauer from Wisconsin.

All of the speakers were loud in their praise for similar joint enterprises and expressed the wish that this annual Jamboree would continue for many years to come.

Cincinnati

ABOUT 25 members of the Cincinnati Alumni club decided to be just a little different so they held their meeting not at home, but in the Fowler hotel in LaFayette, Ind., where the group had gone to attend the Purdue game. The meeting was held just before the game on Oct. 22. Because everyone was anxious to get to the Ross-ade stadium just as soon as possible, the meeting was very informal. A. John Berge, secretary of the Alumni Association, met with the group and discussed alumni affairs for a few minutes.

Re: Xmas Shopping

HERE'S the answer to your Christmas present problem—a gift that will be especially appreciated by your friends, relatives, employes, customers, business associates, prospects.

"Say Merry Christmas with Wisconsin Cheese" is the slogan recently adopted by the Wisconsin Department of Agriculture and Markets. An attractive Christmas package containing 2½ pounds of the state's famous cheese—either Swiss or American—has been planned by the department and is offered in cooperation with the state cheesemakers' association and the new Wisconsin Agricultural Authority.

President Dykstra, George Haight, and many other prominent alumni are enthusiastic over the use of State Brand cheese as an ideal Christmas gift and it is in response to their numerous requests that the special Christmas cheese package program is going forward. People from other states are particularly pleased when they receive a Christmas present of Wisconsin's most famous product.

More than half the nation's cheese is made in Wisconsin and a gift of this fine cheese is typically "Badgeristic". Particulars of the cheese gift plan will be found on page 91 of this issue.
