The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

MINUTES OF THE REGULAR MEETING

of the

BOARD OF REGENTS OF THE UNIVERSITY OF WISCONSIN SYSTEM

Milwaukee, Wisconsin

Held in Room E245, Wisconsin Room West, UW-Milwaukee Union
Friday, May 11, 1984
9:00 a.m.

- Vice President Knowles Presiding -

UW-Milw - May 1984 Regent meetings held at UW-Milw.

PRESENT: Regents Clusen, Conroy, Finlayson, Fish, Gerrard, Grover,
Hanson, Heckrodt, Knowles, Lawton, Nikolay, O'Harrow, Schilling,
Veneman, Weinstein and Zirbel

ABSENT: None

Upon motion by Regent Lawton, seconded by Regent Fish, the minutes of the regular meeting of the Board of Regents of the University of Wisconsin System, held on April 6, 1984, were approved as mailed to the members of the Board.

REPORT OF THE PRESIDENT OF THE BOARD

Welcome to Regent Laurence A. Weinstein

Regent Knowles welcomed Laurence A. Weinstein, of Madison, to his first meeting as a member of the Board of Regents.

Weinstein, Laurence - Introduction of Regent Weinstein,
appointed to Bd. as of 5-1-84, P.1.

REPORT OF THE PRESIDENT OF THE SYSTEM

Report of Non-Personnel Actions and Informational Items

It was moved by Regent Finlayson, seconded by Regent Veneman, and unanimously carried that the following resolution be adopted:

Resolution 3039: That the report of non-personnel actions by administrative officers to the Board of Regents and informational items reported for the record (copy on file with the papers of this meeting) be received for the record; and that actions included in the report be approved, ratified and confirmed.

UW-Milw-Programs - Presentation on -

Presentation: UW-Milwaukee School of Architecture and Urban Planning

DP 2-5

Introducing Chancellor Horton, President O'Neil expressed appreciation for the opportunity to visit UW-Milwaukee and for all that the Chancellor and his colleagues had done to provide so hospitable an environment for the Regent meetings.

It was noted by Chancellor Horton that the UW-Milwaukee School of Architecture and Urban Planning was the only architectural school in Wisconsin that offered degrees through the Ph.D. Its faculty had won awards for outstanding research, and it was recognized as being among the top ten architecture schools in the nation by the Architecture and Research Centers Consortium. Of the 108 schools of architecture in the United States, UW-Milwaukee was one of 14 that offered the Ph.D. degree. Stating that the quality of graduate programs and research activity helped to attract outstanding faculty and students, he said the School of Architecture and Urban Planning was a major strength for UW-Milwaukee and was ideally suited to fulfilling its metropolitan mission.

He then introduced Dr. Carl Patton, professor of urban planning and Dean of the School of Architecture and Urban Planning, who had come to UW-Milwaukee last fall from the Department of Urban and Regional Planning at the University of Illinois at Champaign/Urbana, where he was chairperson of his department. He had also served as director of the Illinois Bureau of Urban and Regional Planning Research, as principal planner for an architectural firm, and as a planner with the Baltimore Urban Renewal and Housing Agency. Dr. Patton held a degree in community planning from the University of Cincinnati, a master's degree in planning from the University of Illinois at Urbana, and a Ph.D. in public policy from the University of California at Berkeley.

Dean Patton pointed out that the excellent reputation achieved by the School of Architecture and Urban Planning was particularly remarkable because the school was only 15 years old. There were nearly 800 students enrolled in five degree programs, 75 percent of whom were from Wisconsin. It was the quality of the programs, he felt, that made it possible to attract 25 percent of the school's students from out of state, a ratio which was five times the campus average.

Showing a slide presentation about the school, which had been designated as a center of excellence at UW-Milwaukee, the Dean stated that in addition to offering five degrees, faculty conducted research on a wide range of topics and provided extensive community service. Being located in Milwaukee, they were able to respond to pressing urban problems and to participate actively in the urban mission of the university. He described the Bachelor of Science in Architectural Studies as a preprofessional degree that prepared students for entry into master's degree programs in architecture and planning, employment at the apprentice level in architecture, or employment in related fields. The architectural studies program focused on developing basic design, drawing and other technical skills, including model-building to develop student ability to think in three dimensions. The program also provided course work in materials testing and structural analysis.

The second degree was the Master of Architecture--an accredited, professional program that focused on design, construction and professional practice. Students worked on such real-world problems as designs for the Milwaukee lake front, for a children's hospital, for a mill in Cedarburg, and for a bus terminal in Green Bay. An annual Chicago studio, held in conjunction with Chicago-based architectural firms, brought students into contact with large-scale design and development.

The third degree was the Master of Urban Planning--a recognized professional degree that had an urban policy focus and dealt with linkages between the built and natural environments. Current teaching and research were being conducted in several areas, including historic preservation, neighborhood redevelopment, energy conservation through land-use planning, transportation policy, and water quality.

The fourth program was the joint degree in architecture and urban planning, which focused on integration of architecture, planning and large-scale real estate development. Student work included research, planning and design for a farmer's market for the west side of Milwaukee, and large-scale home improvement projects for Milwaukee's Park East Corridor.

The fifth program was the Ph.D. in Architecture, a small, highly selective program to educate tomorrow's teachers and researchers. The major focus of the program, which had already reached its design maximum of twelve students in residence, was the area of environment and behavior--the study of how people perceived and used the environment and how architecture could respond to individual or group needs.

Because a well-rounded education in architecture and planning required knowledge of how the professions were practiced in other cultures, the school offered study-abroad programs in London and Barcelona. The following spring, a semester in Paris would be added for students to concentrate on European architecture and planning history, as well as modern international design and practice. Also offered was a semester in Mexico where students in residence applied to the housing needs of the poor such innovative technology as fired-in-place adobe construction that could be hand-built by families and that was virtually indestructible. The school had also developed its international reputation through the work and publications of two distinguished professors, Amos Rapoport and David Stea.

Funded research was conducted through the school's Center for Architecture and Urban Planning Research, which attended to a wide variety of research issues in planning, architecture and design, ranging from the study, design and construction of children's playgrounds to daylight and heat-gain studies for the Grand Avenue Mall in Milwaukee.

Stating that with current resources the school could respond to less than ten percent of the community service requests it received, the Dean said that consequently the attempt was made to select projects that combined teaching, research and community service, such as the Grand Avenue project, which extended to the entire Milwaukee sky-walk system. It was also expected that the school would be involved in work on Milwaukee's old Federal Building.

Further community service was provided through the small towns project, an example of which was a study of downtown redevelopment for Medford, Wisconsin. Students also prepared designs for the Charles Allis Art Museum, located on Milwaukee's lower east side, and faculty as well as students participated in numerous campus service projects, such as reconstruction of the UW-Milwaukee Plaza. In addition, the school attempted to inform the general public about its programs and the architecture/planning professions through such means as an architect in the city exhibit which had been on display locally.

Noting that competitions were another way to measure quality, Dean Patton reported that more than 25 awards had been won by faculty and students in the past year, including the first five of seven prizes at the Chicago American Institute of Architects' competition for students from the five midwest schools of architecture. Faculty had won more progressive architectural awards than any other school in the nation, regardless of size or age, and although the oldest alumni had been in practice less than ten years, they had already become principals in major architecture/planning firms and had won many awards.

Support services for the School of Architecture and Urban Planning included a reference center, a computer center linked to the campus main-frame computer and to the school's micro-computers, a counseling office to serve student advising and course-scheduling needs, a shop to instruct students in multi-building and historic preservation methods, and a graphics center to provide photo reproduction and graphic services in the school and to teach students the art of graphic presentation and photography.

With reference to new activities, the Dean outlined plans to expand current teaching in the areas of interior architecture, industrial architecture, urban landscape design and urban real estate development/design in order to meet increasing demand in these fields. Noting that computer-aided design was another important area of the future, he pointed out that the school's computer equipment was obsolete and that computer-aided design courses were crowded. Waiting lists double-to-three-times the course enrollment forced restriction of enrollment to seniors and graduate students. In addition, he continued, the school was currently located in a building that did not have sufficient space, so that up to four faculty members were required to share one office. The school had no gallery, no archives, very limited display space, and an inadequate handicapped entrance. He asked support for campus plans to renovate the building and construct a new wing, as well as for acquisition of state-of-the-art computer equipment.

Regent Lawton inquired as to how long the school's excellence could be maintained in its present physical facilities.

In reply, Dean Patton estimated that if plans for the renovation and addition proceeded at the earliest possible time, construction could be completed by 1988. With hope for relief later in the decade, he felt the school could maintain its quality in the interim.

Thanking the Dean and his colleagues for their presentation, President O'Neil observed that one of Chancellor Horton's many accomplishments had been to bring impressive new people into the university as deans and in other roles, just as he had contributed significantly to the city and the state, most recently by co-chairing a committee which led to creation of the Forward with Wisconsin campaign.

Wice Presidents - Retirement of Vice Pres. Lorenz, 5-1-84, p.5
X-ref - Lorenz

Status of System Vice Presidents

The President then noted two transitions of special importance. On May 1, Ronald Bornstein had assumed office as Vice President for University Relations, and Vice President Reuben Lorenz had retired, although he planned to continue on a part-time basis in order to complete preparation of the 1984-85 budget.

UW Stevens Point - UW-SP Student Government wins 1984 President's Award for Student Government, p.5

President's Award for Student Government

It was announced by President O'Neil that the 1984 President's Award for Student Government was won by the UW-Stevens Point Student Government Association. Because competition this year was unusually keen, there were several other outstanding student government programs which could not be recognized by this award.

Commencements - Report on degrees to be conferred at Spring Commencement - 1984, p.5, X-ref Degrees Conferred, pp5-6

Noting that the month of May was the time of commencements across the UW System, President O'Neil announced that a total of 11,221 baccalaureate and 2,150 graduate degrees would be conferred. Advanced degrees included 226 doctorates at UW-Madison and 51 at UW-Milwaukee, along with 242 degrees in law and 143 in medicine. In addition, the UW Centers would confer approximately 600 degrees, including degrees to a couple at the West Bend Center who worked their way through school as security officers. Both were to graduate with honors and planned to pursue baccalaureate degrees at UW-Milwaukee.

At UW-Green Bay, graduates would include State Representative Sharon Metz, who was to receive her baccalaureate degree Summa Cum Laude. UW-Platteville had honored 1950-graduate Patrick Boyle, Chancellor of UW-Extension, as one of its distinguished alumni, and at UW-Superior, Mr. Charles Moorhouse was at the age of 70 to receive his baccalaureate degree in visual arts and then to begin a new career as an illustrator of children's books. Commencement at UW-La Crosse would include celebration of the institution's 75th anniversary.

Noting that behind the numbers of graduates were hundreds of deeply personal experiences and a great deal of family commitment, the President observed that there also was the not easily measured dimension of faculty commitment which alone made every degree program possible.

Compensation

Statement regarding Faculty Commitment; Need for Understanding and Unity
- statement by Pres. O'Neil, Regent Hutton & Regent Knowles about need for unity & appreciation for faculty commitment in face of salary difficulties - pp 6-8

President O'Neil then made the following statement:

"Anyone who has been teaching this year, as I have, anywhere in the UW System knows this has been a trying and discouraging time for faculty morale. Their commitment to their students admirably transcends personal anger or professional disappointment. The quality of education might well have suffered from this year's lack of tangible recognition for faculty commitment--but with few exceptions I sense that faculty have continued to give the full measure of their energies and their knowledge to the benefit of their students. Such commitment is a priceless human resource which the citizens of this state simply cannot afford to take for granted.

"We tend at times to become callous about the loss of particular faculty colleagues. I might, therefore, relate a conversation overheard several days ago in an elevator in a UW-Madison classroom building--and it was not Van Hise Hall. Two students were comparing notes about their programs for next year. It was obvious there would be some serious gaps in the curriculum. One student turned to the other and said, 'With Professor _____ leaving, I guess there really isn't any program anymore in _____.' (I withhold the name of the professor and the discipline for obvious reasons, though I know enough about both to warrant the accuracy of what those students were saying at a time they did not realize anyone else was listening.) If we are concerned about losing faculty at Madison and at every System institution, it is chiefly because we hope not to deprive our students of unique learning opportunities which those faculty offer. The professor in question may indeed be replaced--though it is obviously too late this year to find a permanent successor in time to plug the gaps in those students' curriculum. And the fear is substantial that under current conditions the successor may not match the caliber of the predecessor.

"Fortunately a great many of our faculty colleagues have resisted such temptations and have decided that Wisconsin is a good place to teach and pursue research despite this year's discouragement. My greater fear is what may happen next year unless there are relatively soon some encouraging signals to those who have resisted alternatives and declined offers at typically far higher salaries to remain in Wisconsin this year.

"Our University System represents a unique resource in another but closely related way. The whole is considerably more than the sum of the parts--whether it be measured in terms of Systemwide programs like the Sea Grant or Latin American Studies, or in terms of our superb interlibrary loan system, or in terms of Compendia like the ones recently published on overseas study and international programs, university service to business and industry, or opportunities for school teachers and children at all our institutions this coming summer. Events of recent weeks have tested that premise of unity and have caused some colleagues to question whether there is indeed a sufficiently common interest across the University System. I continue to believe as I did on coming here four and a half years ago that those who decided in the early 1970s to merge the two state systems were wise and foresighted. What they created nearly a decade and half ago is a single system of higher education--a whole whose strength and potential do indeed transcend the sum of its components. A single Board of Regents plays a role in this state which is matched in few others.

"Despite these cohesive forces, there are also bound to be divisive pressures. We are currently experiencing one of the most disturbing kinds of fragmentation. A denial of faculty salary increases provides the kind of catalyst that may divide otherwise cohesive communities. My predecessor, Ed Young, from whom I have learned many lessons, used to describe in his salty down-East way a problem with which he too was familiar: 'When the water runs low, things get nasty in the life boat.' Well, the water this year has been lower than usual, and quite understandably the passengers in that life boat have been less tolerant of one another than they were when the water level was higher.

"In fact, the analogy to a life boat is not inappropriate. Universities are at best fragile institutions. Even in the happiest of times they are not always harmonious. Academic freedom and faculty governance recognize the independence of each professor and his or her right to speak publicly--even intemperately--on issues of concern. Such statements and their relationship to the institution can easily be misunderstood by legislators and others in state government. Even our friends sometimes mistake healthy but harsh criticism for disloyalty. It is not always easy even for those of us who know the academy well to draw that distinction. Yet in times like these we must keep that difference clearly in mind, else the frail craft may stray off course or founder in heavy seas.

"What I would offer this morning is a renewed plea for understanding, for unity, and for suspended judgment at both ends of State Street and out across the state. We face some extremely difficult issues and need objectivity as we try to solve them. A willingness to suspend judgment, to keep talking with one another, and to seek workable, mutually acceptable solutions will alone carry us through this tense time. Or, in terms of the earlier metaphor, such unity may help us through these choppy seas--and will in time replenish the water supply in the life boat."

Regent Lawton emphasized the importance of communicating at every opportunity appreciation for the devotion of faculty to their institutions and their students, "particularly the teaching faculty who have taken a beating with very, very few compliments." It was crucial, he felt, for the Regents to convey that message to the faculty, in addition to the Board's commitment to improve compensation.

Regent Knowles stated that the Governor seemed completely sincere in his resolve to change the present situation and that the time had come to assure him that he had support for his effort. "We have gone on record in support of the Faculty Study Committee report. I think it is time that we, as individual Regents, contact the Governor to reassure him that we are on his side in this endeavor to do something about our plight and about faculty increases for the next year and about the catch-up fund."

✓ United Council - last report by outgoing Pres., Susan Znidorka; Introduction of incoming Pres., Scott Dacey, p. 8.

Report of United Council of UW Student Governments

Introducing Ms. Susan Znidorka, who was attending her last Regent meeting as President of United Council, President O'Neil commended her for the leadership she had provided during a difficult period for the organization.

✓ UW-centers - United Council Comments on amendments to Constitution, p. 8

Ms. Znidorka first commented on amendments to the Constitution of the UW Centers. (See pages 14-15 for discussion and action on this matter.) Expressing the view that more should be done to foster communication between students and faculty, she said that in the Centers this might best occur at the departmental level.

✓ Credits to Transfers - Student Credits - see transfers - student also

With respect to undergraduate transfer of credit policy, she was pleased with the degree of sensitivity toward students which the document reflected and with the general philosophy of making it as easy as possible for students to transfer. (See pages 16-17.)

✓ Fees, Segregated - support of United Council for 1984-85 fee increases in Auxiliary & Segregated Fee Budget, p. 8 - X - reg. United Council with Auxiliary Enterprises

On a third issue, she stated support for proposed System segregated fee and user charge increases, which were kept lower than the rate of inflation. (See pages 22-23.) Reporting that United Council was studying systemwide policies on segregated university fees, she said students intended to pursue greater involvement in such matters.

✓ United Council - report on membership referendum, p. 8.

Ms. Znidorka then advised the Board that in recent referenda at UW-La Crosse, UW-Green Bay and UW-Superior, students overwhelmingly voted in favor of continuing their membership in United Council. A referendum was to be held on May 16 at UW-River Falls. Turning to recent activities, she reported that plans were being made for inclusion of the UW Centers in United Council and that Council members had participated in the first annual Minority Student Leadership Conference at UW-Stout. At its last meeting, the Council had approved amendments to its corporate bylaws and standing rules of order. Changes were made in affirmative action guidelines and in the responsibilities of the president and executive director. Each of the committees--Academic Affairs, Minority Affairs, Legislative Affairs, Women's Affairs, Director's Committee and President's Committee--was to set priorities on issues of concern to students at the June meeting, with all of them focusing to some extent on voter registration and candidate forums. Copies of the year-end report were to be forwarded upon completion to the Regents.

Expressing appreciation to the Board for the opportunity to make monthly presentations and to President O'Neil for his support and encouragement, Ms. Znidorka introduced Mr. Scott Dacey, who was to take office as President of United Council on June 1. Mr. Dacey had served as Vice President of the UW-Milwaukee Student Association.

REPORT OF THE EDUCATION COMMITTEE

Chairman Schilling presented the Committee's report, noting that the first agenda item was a UW-Milwaukee presentation to which all Regents had been invited.

Presentation on Facilitating Access of Handicapped Students at UW-Milwaukee, p. 9.

In his introduction, Chancellor Horton noted that UW-Milwaukee enrolled the largest percentage of disabled students in the System and that UW-Milwaukee's goal in services for disabled students was to create an encouraging environment in which all students would be able to develop to their fullest potential. Reviewing development of special services since the early 1970s, he indicated that most physical barriers on campus had been removed and that campus coordinators were now devoting attention to removing attitudinal barriers.

The Chancellor then introduced Jeantz Martin, Coordinator of Disabled Student Services, and Marty Armato, Coordinator of Hearing Impaired Services, for presentation of a short slide-tape program profiling campus services for disabled students.

In answer to Regent questions, Ms. Martin noted that 582 self-identified disabled students were registered this semester at UW-Milwaukee. She described the campus advisory committee, which included disabled students, and recognized students Jim Hanover and Tim Walker who were in attendance at the Committee meeting. In conclusion, she indicated that most disabled students were enrolled full-time and had retention rates similar to campuswide averages.

Chairman Schilling expressed appreciation to Regent Finlayson, Vice Chairman of the Education Committee, for her good work in presiding at the April Committee meeting, which he was unable to attend because of another commitment.

Acceptance of Proffer by the Trustees of the Vilas Trust Estate: Scholarships, Fellowships and Professorships

Reviewing the background and procedures for accepting this annual gift, Vice President Lyall called attention at the Committee meeting to that portion of the will providing scholarship money earmarked for "students of Negro blood," which was an extraordinary preferment at the time the will was drafted.

Resolution 3040 was adopted unanimously, upon motion by Regent Schilling, seconded by Regent Conroy.

Vilas Trust Estate - Acceptance of 1984-85 proffer - R-3040
+ R-3041, pp 9-13

Resolution 3040: That the Board of Regents of the University of Wisconsin System gratefully accepts the proffer by the Trustees of the William F. Vilas Trust Estate (copy dated April 24, 1984, on file), of the sum of \$672,762 for the year 1984-85 for the maintenance of the scholarships, fellowships, and professorships (with their respective auxiliary allowances) to be expended in the following order:

1. Continuation of 10 Vilas Undergraduate Scholarships at \$400.00 each		\$ 4,000.00
2. Continuation of 10 Vilas Graduate Fellowships:		
a. 5 at \$600.00 each	\$ 3,000.00	
b. 5 traveling fellowships at \$1,500.00 each	<u>\$ 7,500.00</u>	\$10,500.00
3. Continuation of 16 Vilas Research Professorships plus auxiliary allowances for the academic year as follows:		
Leonard Berkowitz - Vilas Research Professor in Psychology, College of Letters and Science, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
R. Byron Bird - Vilas Research Professor of Chemical Engineering, College of Engineering, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
George E. P. Box - Vilas Research Professor of Mathematics and Statistics, College of Letters and Science, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
Arthur S. Goldberger - Vilas Research Professor of Economics, College of Letters and Science, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
Reinhold Grimm, Vilas Research Professor of Comparative Literature and German, College of Letters and Science, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00

Joel F. Handler - Vilas Research Professor in Law, Law School, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
Ihab Hassan - Vilas Research Professor in English and Comparative Literature, College of Letters and Science, UW-Milwaukee		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
Jost Hermand - Vilas Research Professor in German, College of Letters and Science, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
H. Jerome Keisler, Vilas Research Professor of Mathematics, College of Letters and Science, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
Robert J. Lampman - Vilas Research Professor of Economics, College of Letters and Science, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
Henry A. Lardy - Vilas Research Professor of Biological Sciences, College of Agricultural and Life Sciences and Graduate School, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
Willard F. Mueller - Vilas Research Professor of Agricultural Economics, College of Agricultural and Life Sciences, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00
Walter Rudin - Vilas Research Professor of Mathematics, College of Letters and Science, UW-Madison		
Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00

Barry Trost - Vilas Research Professor of Chemistry,
College of Letters and Science, UW-Madison

Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00

Jan Vansina - Vilas Research Professor of
History, College of Letters and Science,
UW-Madison

Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00

Professor to be Named

Salary	\$10,000.00	
Auxiliary Allowance	<u>\$15,000.00</u>	\$25,000.00

4. a. Continuation of 50
additional scholarships
at \$400.00 each

\$20,000.00

b. Continuation of 50
additional fellowships
at \$600.00 each

\$30,000.00

\$ 50,000.00

5. Continuation of eighty (80)
additional scholarships at
\$400.00 each under the
provisions of Paragraph E,
Article Fourth of the Deed of Gift
and Conveyance by the Trustees
of the Estate of William F. Vilas

\$ 32,000.00

As to the one hundred thirty (130) additional Vilas Scholarships and the fifty (50) additional Vilas Fellowships provided for in four (4) and five (5) above, the Regents are to bear in mind the provisions of the Will requiring that the additional fellowships shall be (a) awarded to graduates of the University of Wisconsin, and (b) the further provisions of the Will that "for at least one-fifth of these scholarships and fellowships the Regents shall prefer in appointment among worthy and qualified candidates those of Negro blood, if such present themselves. Otherwise than as aforesaid, they shall be governed by the Regents in like manner as those first above provided for."

6. Retirement benefits for the
following retired Vilas Professors:

David Fellman	\$ 2,500.00
J. Willard Hurst	\$ 2,500.00
Antonio Sanchez-Barbudo	\$ 2,500.00
William Sewell	\$ 2,500.00
John Willard	<u>\$ 2,500.00</u>

\$12,500.00

7. Ten (10) New Vilas Associates in Arts and Humanities - to be named		\$100,000.00
8. One-time special funding for:		
Professor George E. P. Box	\$ 8,200.00	
Professor Henry Lardy	17,562.00	
Professor Barry Trost	<u>38,000.00</u>	
		<u>\$ 63,762.00</u>
TOTAL		\$672,762.00

Acceptance of Proffer by the Trustees of the Vilas Trust Estate: Art
of Music

Dr. Lyall advised the Committee that the Vilas bequest had always provided separately for funds to support the art of music, and that this year an opera workshop and a Bach festival were to be funded. President O'Neil explained that recommendations for projects were solicited from the chancellors of UW-Madison and UW-Milwaukee and that continuing programs, as well as new ones, were given consideration.

Adoption of the following resolution was moved by Regent Schilling, seconded by Regent Zirbel and unanimously voted:

Resolution 3041: That, the Board of Regents of the University of Wisconsin System gratefully accepts the gift by the Trustees of the William F. Vilas Trust Estate (copy dated April 24, 1984, on file), of \$23,300.00 for the academic year 1984-85, for the encouragement of merit and talent, or to promote appreciation of and taste for, the art of music, in connection with university instruction therein, to be used for the following purposes:

1. <u>UW-Madison:</u> The Evolution of an Opera--A ten day workshop		\$13,100.00
2. <u>UW-Milwaukee:</u> Bach Festival-- 300th Anniversary of the Birth of Johann Sebastian Bach		<u>\$10,200.00</u>
TOTAL		\$23,300.00

On behalf of the Regents, Chairman Schilling expressed appreciation for the Vilas Trust's annual gifts, which were exceedingly helpful in assisting many programs.

Approval of Amendments to the Constitution of the University of Wisconsin Centers

The Committee was informed by Vice President Lyall that the proposed amendments were required principally by the change in title from UW Center System to UW Centers and from chancellor to executive dean. In addition, the number of senators had been changed to reflect the relative size of individual centers. Finally, a correction was made in the text on page 7, beginning with line 21, which now read: "The executive dean shall appoint one of the center deans to be a member, who shall participate in Senate discussions and may be elected as a voting member of appropriate committees." The Committee was assured by Executive Dean Ratner that the error was typographical and that the correction did not result in a substantive change.

It was moved by Regent Schilling and seconded by Regent Weinstein that the following resolution be adopted:

Resolution 3042: That, upon the recommendation of the President of the University of Wisconsin System and the Executive Dean of the University of Wisconsin Centers, the amendments of the University of Wisconsin Centers Constitution be approved.

In discussion at the Board meeting, Regent Hanson recalled that problems had arisen when the chancellor did not give specific reasons in his letter to the person being denied tenure. Noting that the amendments required specific reasons at other levels in the process, she asked if there had been consideration of whether the executive dean should also be required to give specific reasons.

In reply, Professor Dion Kempthorne, who chaired the Centers Steering Committee, said he felt the matter of providing reasons was adequately addressed in the constitution, although the degree of specificity could be challenged in individual cases. It was his understanding that reasons would need to be provided along the line, as required by the individual situation. He thought the constitution was probably as explicit on that point as a working document could be.

Regent Fish inquired about whether there was faculty opposition to any of the proposed changes.

Responding in the negative, Dr. Kempthorne added that the process of revision had been an exacting and thorough one. Starting in the fall of 1982, the document was studied by an ad hoc committee which made recommendations, after which the proposed changes were approved by the Faculty Senate and by each campus.

With reference to Regent Hanson's question, Regent Schilling asked if the word "specific" had been added in the proposed amendments.

Indicating that the word had been added to one section of the document, Regent Hanson emphasized the importance of also addressing the issue in the letter from the executive dean, which was the final step in the process. She thought that letter should be required to state specific reasons for denial of tenure.

Appeals - comment on need to follow proper procedures, p. 15.

President O'Neil observed that the general issue was one he had worked on extensively as general counsel of the American Association of University Professors. In developing a statement on procedures for nonrenewal of tenure-track appointments, the AAUP felt that a statement of reasons should be provided only if the faculty member wished it, since there were times when a person denied reappointment would prefer not to have the reasons formally stated in writing and included in the permanent personnel record. If the faculty member, after informal notice of the reasons wanted them put in writing, the President said reasons then should be set forth and should be specific.

With respect to personnel appeals in general, Regent Schilling noted that Board members had commented on the need for careful adherence to proper procedures. If attorneys had reviewed the letters in question, he thought there would have been fewer problems.

Put to vote, Resolution 3042 was unanimously adopted.

Approval of the WHA-TV Application to the Federal Communications Commission for Four Channels in the Instructional Television Fixed Service (ITFS)

Continuing the report of the Education Committee, Regent Schilling explained that the Federal Communications Commission was making available channels in the high frequency band for targeted-audience broadcasting and that WHA-TV's application would be for four bands. (The Educational Communications Board had also applied for six bands in a different part of the spectrum.) The Board of Regents as the licensee needed to approve WHA's application.

In response to Regent questions, Vice President Bornstein said no fiscal note had been attached to this request because there were no current plans for construction. Rather, the intention at this time was simply to reserve future opportunities for outreach. The Public Broadcasting System was asking for four additional channels on behalf of WHA, which the Regents in the future might wish to license. It was understood that construction would not begin unless external funding sources could be found.

Upon motion by Regent Schilling, seconded by Regent Zirbel, the following resolution was unanimously adopted:

Resolution 3043: That the Board of Regents of the University of Wisconsin System, upon the recommendation of the President of the University of Wisconsin System and the Chancellor of the University of Wisconsin-Extension, approve the application of WHA-TV to the Federal Communications Commission for four channels in the Instructional Television Fixed Service; and that the Vice President and Trust Officer be authorized to certify the application as an officer of the Board of Regents.

Academic Planning Statement - Approval of revisions to
ACPS-4, Academic Year Definitions & Assorted
Board of Regents Meeting 5/11/84 derivatives, R-3044, & re:
overload payments, R 3044, p. 15 - reg. salaries
& EXH. A.

Approval of Revision of Section 6, Academic Planning Statement No. 4
(ACPS-4)

Summarizing the proposed changes before the Committee, Vice President Lyall observed that revision of the policy guiding overload payments reflected the relationship between UW-Extension and the institutions. While in principle a faculty member on full-time contract was expected to provide all services within that contract, it was not in all cases feasible to do so. The intent of the policy was to minimize the number of those cases and at the same time to provide guidelines for use when overload payments were warranted. The policy also stated the statutory limit of \$5,000 on overload payments to full-time faculty and specified that summer support should not exceed two-ninths of the academic year salary. Responsibility for monitoring the policy was shifted in the revision from the chancellor of UW-Extension to the institutional chancellors. The Committee was advised by Chancellor Boyle that he, the System Advisory Committee on Outreach, and the other chancellors endorsed the proposed changes.

It was moved by Regent Schilling, seconded by Regent Finlayson and unanimously carried that Resolution 3044 be adopted.

Resolution 3044: That, upon the recommendation of the President of the University of Wisconsin System, the proposed revisions to Section 6 "unanticipated assignments for faculty members from university sources during the period of appointment" of Academic Planning Statement No. 4 (ACPS-4) (UWS Policy on Academic Year Definitions and Assorted Derivatives) be approved. (EXHIBIT A)

Revision of UW System Undergraduate Transfer of Credit Policy

Regent Schilling summarized Committee review of proposed changes to the policy, first adopted by the Board in 1973. It was pointed out by Vice President Lyall that the policy's philosophy was to make transfer of credit as easy as possible within the System and from institutions outside the System, consistent with maintaining standards of quality. She pointed out the basic admission requirements for transfer students, limitations on oversubscribed majors, appeals provisions, the limitation of 72 credits for transfer students from two-year institutions, and provisions for VTAE transfer students.

Members of the Committee urged that institutions notify students as early as possible about transfer of credit policy. Observing that credit transfer was the number-one concern of students at the UW Centers, Executive Dean Ratner commented that the four-year institutions generally communicated their expectations well but that problems occurred when students changed majors or educational goals and then discovered that they must take extra courses as a result. He described a brochure on transfer of credit, which would be widely distributed to Center students starting in the summer. It was noted by Vice President Lyall that all System institutions had credit by examination policies.

Adoption of the following resolution was moved by Regent Schilling, seconded by Regent Conroy and carried unanimously:

Transfers-Student - Approval of revisions to
Undergraduate Transfer Policy, R-3045, pp 16-17,
Board of Regents Meeting 5/11/84 * Exh. B.

Resolution 3045: That, upon the recommendation of the President of the University of Wisconsin System, the proposed revisions to the current Undergraduate Transfer Policy dated April, 1976 be approved. (EXHIBIT B)

Teacher Education

→ Catalogue of 1984 Summer Educational Offerings ^{and} p. 17.

Vice President Lyall distributed to the Committee a catalogue, prepared by Academic Planner Ellen Notar in cooperation with the institutions, listing summer course offerings throughout the System for teachers. Materials organized by subject and institution included information on dates, fees, course level and telephone numbers. It was to be distributed to all school district superintendents and other interested individuals.

→ Progress Report on the Task Force on Teacher Education, p. 17.

It was noted that this Task Force was established to explore the role of teacher education programs in System institutions, how to carry out that role and how to improve interactions between the schools and the university. Three focal areas had been identified by the Task Force: pre-service teacher preparation and admission standards; ways to facilitate continuing education for teachers; and additional partnerships and linkages between the university and elementary/secondary school systems. The Task Force was in the midst of holding hearings around the state, and at Regent Zirbel's request, a list of those who appeared at the hearings would be provided to the Regents. The final report of the Task Force was to be presented in November 1984. President O'Neil commented that Wisconsin's efforts were unique in that they were undertaken voluntarily, while similar studies in other states had been externally mandated.

Meeting between Chief Academic Officers of the UW System and the Minnesota Public University Systems

Vice President Lyall described the May 1 meeting as a follow-up to the proposal made last January by Governors Earl and Perpich for increased cooperation between the states. The systems in attendance agreed to the following: (1) Chief academic officers of the border institutions would meet annually to discuss transfer students, programs, and other subjects of mutual interest; (2) short term faculty and scholar exchanges would be arranged between Wisconsin and Minnesota; (3) exchanges of visual and performing artists would be arranged; and (4) planning would begin on a joint humanities conference for the next academic year.

✓ Minnesota, University of - meetings of chief academic officers of Wis. & Minn. systems on ways of increased cooperation, p. 17.

✓ Affirmative Action → Presentation by UW-Milwaukee Board of Visitors Committee on Minority Student Attraction and Retention, pp. 17-18 - X-ref. UW-Milw Visitors

Regent Schilling summarized the presentation made by Mrs. Jacqueline Shropshire on behalf of the Committee, which was formed three years previously to examine the wide range of affirmative action and minority programs on campus. The Committee heard from students and staff, met with

Regent Finlayson, and held forums in the neighborhoods of black, Hispanic and Native American residents of Milwaukee, in order to learn first-hand of the barriers which impeded minority student enrollments in the university. What the Committee had concluded was that minority student support programs needed increased funding and staff to be more effective, that demonstration and experimental programs should have permanent status, and that an undergraduate advanced opportunity program to parallel the graduate AOP was needed. The Committee asked the Board of Regents to consider these findings, and it was agreed that copies the report would be sent to all members of the Board. Regent Finlayson complimented the Committee on its efforts to assist UW-Milwaukee and the community as a whole.

*Academic Programs - report on meeting with grad school deans on Regent expectations re new programs, p. 18.
Meeting with UW System Graduate School Deans*

Regent Schilling described to the Education Committee a recent meeting he and Vice President Lyall had with System graduate school deans, who were concerned that the Board might be sending a message that all new degree programs were unwelcome. "I wanted to stress my personal view that the Board expects new programs to be brought forward. We would be alarmed if new programs were not being brought forward as part of a healthy curriculum. On the other hand, all must recognize that not all new programs can be approved." Since the deans felt Regent expectations in that regard were not clearly enough enunciated, he had recommended that the Board better articulate its concerns regarding new programs, and that the institutions more fully state their objectives in proposing them to the Board. Regent Conroy inquired about a systemwide approach to priority setting, and Dr. Lyall advised that more information on this subject would be brought to the Board in the fall.

Named Professorships: UW-Madison

In closed session, the Committee approved Resolutions 3046 to 3055.

In response to a question from Regent Conroy, Chancellor Shain noted that, while there were no women among those being recommended for named professorships at this meeting, there were women who held named professorships at UW-Madison.

Resolutions 3046-3051 were moved by Regent Schilling, seconded by Regent Conroy and adopted unanimously.

Resolution 3046: That, upon the recommendation of the President of the University of Wisconsin System and the Chancellor of the University of Wisconsin-Madison, the status of William A. Brock be changed from Professor, Department of Economics, College of Letters and Science, to Frank P. Ramsey Professor, Department of Economics, College of Letters and Science, University of Wisconsin-Madison, effective July 1, 1984.

REPORT OF THE BUSINESS AND FINANCE COMMITTEE

Chairman Veneman presented the Committee's report.

Approval of Gifts, Grants and U.S. Government Contracts

The Committee reviewed the monthly list of gifts, grants and U.S. government contracts which included 30 research grants for UW-Madison from the National Institutes of Health for \$3.4 million and 37 grants from National Science Foundation for \$4.4 million, with grants from these two federal agencies going to 34 different departments. While the month's activity was \$8 million less than the same month a year previously, the year-to-date total of \$242 million was \$33 million higher than last year, the current month's lower amount being due to different timing in federal student aid grants. This year's student aid had been running about \$8 million ahead of last year, but now the two years' totals were about equal, as had been anticipated.

Resolution 3056 was adopted unanimously, upon motion by Regent Veneman, seconded by Regent Lawton.

Resolution 3056: That, upon recommendation of the President of the University of Wisconsin System, the gifts, grants and contracts presented at this meeting (copy on file with the papers of this meeting) be accepted, approved, ratified and confirmed; and that, where signature authority has not been previously delegated, appropriate officers be authorized to sign agreements.

-

Approval of 1984-85 Annual Budget: UW Hospital and Clinics

Regent Veneman reported on Committee consideration of the 1984-85 annual budget for the UW-Hospital and Clinics which was presented by Superintendent Gordon Derzon. Regent Lawton, Chairman of the Council of Trustees of the UW Hospital and Clinics, joined the Committee for this portion of the meeting. Also present were Vice Chancellor David Kindig and Peter Christman, Director of Hospital Fiscal Affairs.

Achievements in 1983-84 and goals for 1984-85 were briefly reviewed, and the Committee was advised that current-year patient activity had increased significantly since the budget materials had been prepared. Instead of having an operating loss for this year, the hospital was now projecting a positive net income, but the 1984-85 budget estimates were not being changed at this time. In the materials submitted to the Regents, it had been stated that even though there could be an operating deficit in 1984-85, there would not be a rate increase proposed at the beginning of the year. With the increase in carry-over cash balances resulting from improved 1983-84 activity, it now appeared unlikely that any rate increase would be requested from the Rate Review Board in 1984-85.

Adoption of the following resolution was moved by Regent Veneman, seconded by Regent Hanson and unanimously voted:

Resolution 3057: That, upon recommendation of the UW-Madison Chancellor and the President of the System, the University of Wisconsin Hospital and Clinics Operating Budget for the fiscal year July 1, 1984, to June 30, 1985, at an estimated amount of \$106,313,000 be approved, that the University Administration be authorized to make the necessary final accounting adjustments; and submit for review to the Joint Committee on Finance.

Hospital Budget
✓ Approval of 1984-85
budget, R. 3057,
PP. 21-22

Approval of 1984-85 Annual Budget: Auxiliaries and Segregated Fees

Presenting the 1984-85 auxiliaries and segregated fees annual budget to the Committee, Vice President Lorenz indicated that the auxiliaries were in strong financial condition and that even with the proposed increases averaging only 3.38% (less than salary increases and anticipated inflation), the auxiliaries would be able to maintain facilities in very good condition. He then introduced Robert Clancey, Director of Auxiliary Operations Analysis, who gave a summary of the budget book. It was noted that funding of the reserves and the investment return they brought had helped provide the financial stability and minimal rate increases which had become evident over the last few years.

Regent Veneman moved and Regent Weinstein seconded the following resolution:

~~Scope~~
✓ Auxiliary Enterprises - Approval of 1984-85 budget
for auxiliaries & segregated fees, R. 3058, PP. 22-23
A-reg. Fees, Segregated

Resolution 3058: That, upon recommendation of the respective Chancellors and the President of the System, the University of Wisconsin System's operating budget for the fiscal year July 1, 1984, through June 30, 1985, for Auxiliary Enterprises and Segregated Fee Operations, including user charges and other items reflected in Book B, 1984-85 Annual Budget Documentation, May 1984, as presented to the Board and on file with the records of this meeting be approved; and that System Administration, together with the institutions, be authorized to revise and approve budgets in accordance with actual enrollment experience for the first semester 1984-85, or other significant economic factors which necessitate a budget change, subject to approval by the Board, of any room and board or segregated fee rate change. Any new programs to be funded by the segregated fee or user charge are subject to review and prior approval by System Administration.

In discussion at the Board meeting Regent Clusen, said there had been a question concerning the effect of these rates on the total percentage of student cost.

Mr. Clancey replied that while tuition had not yet been determined, approximately 65 percent of student cost was for room and board, and about 5.8 percent was for segregated fees.

Put to the vote, Resolution 3058 was unanimously adopted.

✓ Hospital - Authorization to enter consortium for solid waste disposal plant, R-3059, pp. 23-24.

Authority to Enter into Consortium for Construction and Operation of Solid Waste Disposal Plant: UW Hospital and Clinics

Summarizing Committee consideration of the request, Chairman Veneman explained that the University Hospital was currently joined with a group of other hospitals in operating a central laundry service and that it was now being proposed that the four Madison hospitals (excluding the Veterans Hospital) join in forming a corporation that would provide a central waste disposal plant. The plant would be connected with the central laundry which would purchase the steam produced by the disposal plant. The project, costing \$2 million or less, would be funded by an up-front capital contribution of 10 to 20 percent of that amount, with the balance being financed. Operating costs, including debt service, were to be covered by a per-pound charge. Final cost estimates were being determined, and it was anticipated that a break-even operation would be achieved in a couple of years.

It was moved by Regent Veneman and seconded by Regent Clusen that the following resolution be adopted:

Resolution 3059: That, upon recommendation of the Chancellor of the UW-Madison and President of the System, the administration be authorized to execute the necessary documents and do all things necessary to effect the participation in a consortium of Madison hospitals for purposes of building and operating a solid waste disposal plant in connection with the Madison United Hospital Laundry.

In discussion at the Board meeting, Regent Nikolay inquired about the source of the up-front contribution.

Dr. Kindig replied that the cost would be prorated on the basis of expected utilization by the four hospitals. The UW Hospital's share amounted to approximately \$70,000, which would be a cash payment from the capital budget.

Put to the vote, Resolution 3059 was adopted unanimously.

Bequests-UW-Madison - Bequest of Ruth I. Thomas to UW-Madison accepted, R.3060, p. 24. X-ref Thomas

Bequest of Ruth I. Thomas

The Committee then considered the bequest of Ruth I. Thomas of the Village of Shorewood, Milwaukee County, Wisconsin, whose last will and testament provided for the UW-Madison to share equally in five charitable shares of the residuary estate, which was estimated to be approximately \$9,000. Ruth I. Thomas received a Ph.B. (Bachelor of Philosophy) in October 1931 from the University of Wisconsin, Madison; her major studies were in the College of Education.

Resolution 3060 was unanimously adopted, upon motion by Regent Veneman, seconded by Regent Hanson.

Resolution 3060: That the bequest of the late Ruth I. Thomas, Village of Shorewood, Milwaukee County, Wisconsin be accepted by the Board of Regents of the University of Wisconsin System in accordance with the terms and conditions of the will; and that the Trust Officer or Assistant Trust Officer be authorized to sign receipts and do all things necessary to effect the transfer for the benefit of the University of Wisconsin-Madison.

Budget, Operations

Update on Annual/Biennial Budget Development - 1984-85 - 1985-87, pp 24-25
TOP priority for 1985-87 to be compensation, pp 24-25 X-ref Compensation

Reporting on annual and biennial budget development, Regent Veneman said the Committee was advised by Vice President Lorenz that a recommendation on academic fees would be submitted for action by the Board in June and that the average increase would be approximately 8 percent.

Informational reports on salary adjustments and changes of status would also be provided at the June meeting, with review of the complete annual budget scheduled for July.

Turning to biennial budget development, he indicated that the Governor had issued to all state agencies budget preparation guidelines which included: an expenditure guideline calling for an average 2.5 percent budget increase beyond pay-plan adjustments, debt service, utilities, and inflation offset adjustments; limitations on adding positions for services; and careful review of base budgets to identify low priorities and other opportunities for reallocation to improve services. System Administration had initiated discussions with chancellors on various steps in biennial budget development, given the state guidelines and joint study of instructional funding methodologies.

The UW System's top priority for 1985-87 would be to obtain competitive faculty and academic staff compensation adjustments. System Administration was planning to develop a biennial budget policy paper on other priorities and fee policy to be presented at the July meeting, this review being an interim step in the process of preparing a biennial budget for approval by the Board in October. Another interim step would be a special review in June of initiatives to improve aids and services for minority/disadvantaged students.

In Committee discussion, Regent Knowles made the observation that the projected 8 percent fee increase was necessary to fund the already approved biennial budget authorization.

✓ Audits

↓
Status Report on the Legislative Audit Bureau Audits of Student Activities/Services and System Administration, P. 25 ✓ x-ref.
Legislative Audit Bureau

Vice President Lorenz reported that the Audit Bureau had completed site work on the student services audit and was now working on a similar review at VTAE. A draft report combining the UW and VTAE reviews was expected to be available in July. Staff had provided the Audit Bureau with volumes of information regarding System Administration operations, and a draft report on the audit was expected sometime in the next month or two.

Report of the Vice President

In his report to the Committee, Vice President Lorenz stated that current projections were consistent with those of past months and that the year-end balance was estimated to be about \$1.2 million.

- - -

REPORT OF THE PHYSICAL PLANNING AND DEVELOPMENT COMMITTEE

Chairman O'Harrow reported for the Committee.

Approval of Major Project Concept and Budget Reports

The Committee considered six major project concept and budget reports, the first being the UW-Madison Music Hall remodeling project, at a cost of \$1 million in gift funds from the Rennebohm Foundation. The building, constructed in 1878 as an assembly and recital hall, was on the National Register of Historic Places as part of the university's Bascom Hill Historic District. No exterior alterations or additions were proposed, and while the interior work would be extensive, the intent was to remodel in such a way as to preserve the character and style of the building. Elements of the remodeling included replacement of main floor seating and realignment to allow improved viewing; creation of a new lobby at the rear of the hall; installation of a ticket office and a control booth; removal of partitions and unnecessary obstructions at the rear and in wing spaces to allow more

efficient use of the stage area and to provide scenery storage space; improvements in the ventilating system and addition of air conditioning; addition of a new stage surface, floor covering, opaque window shades and a removable orchestra pit cover; and auditorium/stage lighting improvements. As part of the project, alternate bids would be requested for a chiller vault and theatrical lighting fixtures.

The second UW-Madison project was the Biotron cooling system replacement project, at a cost of \$582,000 from general fund supported borrowing-energy conservation allocation. The primary purpose of this project was to conserve energy, which would be accomplished by replacing two 450-horsepower chillers with two 250-horsepower chillers (operating at a higher evaporator temperature) and two 25-horsepower, 10-ton low temperature brine chillers. The project also included addition of a 750 KVA transformer with switchgear and wiring, plus modifications in the existing parallel high voltage feeder system. Simple payback, based on construction costs of \$499,000 and first-year savings of \$135,404, was four years, and the total cost of \$582,000 had a discounted payback of 4.7 years.

The next request was for projects at UW-Oshkosh and UW-Stevens Point involving primary electrical distribution system repairs at costs of \$853,000 and \$772,600, respectively, from GPR-supported borrowing-minimum maintenance health and safety allocation. The work was recommended because of the age and condition of the distribution systems and because of power outages which had occurred.

The second project for UW-Stevens Point was for improvements at the Treehaven Field Study Station in Lincoln County at a total cost of \$980,000, funded by \$520,000 of program revenues and \$460,000 from GPR bonding. The project included construction of a 6,900 GSF classroom building, two 48-person residence halls (one of which would be winterized), movable equipment for the three facilities, utilities, paving of drives and the parking lot, and site development. The 6.9 acres on which the structures would be sited were in the process of being deeded to the Board.

The final concept and budget report was for the UW-Platteville Ottensman Hall addition project, at a cost of \$2,250,000 (from \$2,100,000 of GPR-supported borrowing and \$150,000 of renewable energy resources and demonstration funds). An alternate was also included which would provide 3,170 GSF of basement area for future laboratory space at an estimated \$87,000. The requested Phase I addition and Phase II remodeling were to provide sufficient "state-of-the-art" laboratory facilities, together with faculty offices and related service space required to meet the growing needs of the College of Engineering, as identified in a comprehensive space management study conducted in 1981.

Phase I provided for construction of an addition on the south side of Ottensman Hall to create three new laboratories with support space, a new service entrance and receiving room, twelve faculty/staff offices, space for relocation and expansion of the shop facility, basement-level space for storage of equipment and supplies, and improved interior circulation. Additionally, special energy conservation measures and energy recovery devices would be incorporated for cost-saving effectiveness and for demonstration purposes to complement the instructional program. The design of the addition would result in an increase in the assignable area of the existing building by reducing the number of major circulation corridors on both the ground and first floors in the Phase II remodeling to be requested in the 1985-87 biennium.

Upon motion by Regent O'Harrow, seconded by Regents Clusen and Heckrodt, Resolution 3061 was adopted unanimously.

Resolution 3061: That, upon the recommendation of the UW-Madison, Oshkosh, Platteville and Stevens Point Chancellors and the President of the University of Wisconsin System, the concept and budget reports for the following projects be approved and authority granted to plan, bid and construct, at the costs and from the funding sources indicated:

Approval of Land Transactions: UW-La Crosse and UW-Madison

Regent O'Harrow reported on Committee consideration of two land transactions, one for UW-La Crosse and one for UW-Madison. At UW-La Crosse the request was to approve purchase of a .22-acre parcel of land at 1510 Vine Street at a cost of \$75,780 plus \$1,000 for appraisal and closing costs and an estimated \$8,000 for relocation costs. Located within the campus boundary and identified for acquisition in the 1978 Campus Development Plan, this parcel was appraised at \$72,000 and \$79,560 in March 1984, for an average of \$75,780--the price at which an option to purchase had been secured.

The UW-Madison request was for authority to exchange an unused, university-owned parcel at 1013 Spring Street for a value of \$15,000 plus a credit of \$4,000 on improvements on 215 North Orchard, which the grantor would remove from the site, for a net cash cost of \$100,000 for the parcel. In April, the Board had authorized acquisition of this parcel at the average of the appraisals, which was \$119,000. The present renters indicated they would continue to lease the units, which should also reduce relocation costs.

It was moved by Regent O'Harrow, seconded by Regent Heckrodt and carried unanimously that the following resolution be adopted:

Resolution 3062: That, upon the recommendation of the UW-LaCrosse and UW-Madison Chancellors and the President of the University of Wisconsin System, authority be granted to complete the following land transactions:

UW-LaCrosse - Bldg's hands

Purchase of a .22 acre parcel of developed land, located at 1510 Vine Street, at an estimated cost of \$75,780, plus \$1,000 for appraisal and closing costs and an estimated \$8,000 for relocation expenses.

UW-Madison - Bldg's hands - General

Exchange of a surplus parcel of UW-Madison land at a value of \$15,000 and located at 1013 Spring Street in the City of Madison (Lot 4, Block 2, Central Homes Addition) for an improved lot located at 215 North Orchard Street with further authority granted to the present owner to remove the improvements (for which the grantor will give a credit of \$4,000) for a net cost of \$100,000 for the property.

Authorization for Initiation of Property Condemnation Proceedings,
UW-La Crosse

The next agenda item requested authority to initiate condemnation proceedings if necessary to acquire a parcel of land at 1520 Vine Street, which would be used to complete development and parking in the southwest sector of the campus. The owner offered to sell the parcel to the university in 1983 but, when an offer was made for \$41,250, the owner stated his preference for tearing down the existing building and constructing a duplex because of his present financing and the ability to write off his remaining building value as a loss. Since the state presently owned the parcel to the west and the property to the east was in an estate and had been offered to the state, new construction in this location would prevent proper development of the entire area. Negotiations were to continue, but inability to initiate condemnation on short notice might allow the owner to obtain a building permit and start demolition, making him eligible for the expense of plans rendered unusable and construction costs incurred.

Regent O'Harrow moved and Regent Nikolay seconded Resolution 3063, which was unanimously adopted.

✓ Approval to acquire parcel at 1510 Vine St R-3062, pp. 27-28.

✓ Approval of exchange of parcel at 1013 Spring St for one at 215 N. Orchard St. R-3062-pp 27-28

X-reg/ Spring St, 1013

X-✓ N. Orchard St, 215

Resolution 3063: Whereas, the following described land is required for the University of Wisconsin-LaCrosse to complete development and parking in the southwest sector of the campus:

UW-LaCrosse-Bldg St
lands
Auth. to condemn
land at 1520 Vine St.
R-3063, pp. 28-29.

Lot 3, Block 15, Metzger & Funk's Addition to City of LaCrosse.

Whereas, the Board of Regents of the University of Wisconsin System has authority to condemn lands it deems necessary for an institution pursuant to Section 36.11 (9), Wis. Stats., and this acquisition has been approved by the State Building Commission as required by Section 20.924 (1)(b), Wis. Stats.

Now, therefore, be it resolved by the Board of Regents of the University of Wisconsin System, in regular meeting assembled, that the previously described lands are needed to complete development and parking in this southwest sector of the UW-LaCrosse campus and that such lands be acquired by gift or purchase at an agreed price if possible;

Be It Further Resolved That, if the above lands or any parcel thereof cannot be purchased at an agreed price, the Attorney General of Wisconsin be, and he is hereby requested, authorized and instructed to commence and prosecute proceedings in accordance with provisions of Chapter 32, Wisconsin Statutes, and to take any other appropriate action which may, by him, be deemed necessary to acquire said lands or any parcel thereof free and clear of all encumbrances.

Approval of Major Project Budget Increases, UW-Madison

Regent O'Harrow summarized Committee review of a proposed increase in the budget for the UW-Madison Plant Sciences remodeling and addition project of \$247,000 from GPR-residual bonding authority, for a revised total project cost of \$7,785,500. One year after occupancy there were several critical elements of the Plant Sciences building program which were still not functional, a situation which had seriously affected the productivity of building occupants. Numerous efforts had been made to make the project viable within the authorized budget, including reductions in program space, fixed equipment and movable equipment. The situation was made more difficult by a number of problems encountered after construction, and the Committee agreed with campus representatives that action was needed to make the facility fully operational.

The following resolution was unanimously adopted, upon motion by Regent O'Harrow, seconded by Regent Nikolay.

Resolution 3064: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authorization be granted to increase the budget of the 1979-81 Plant Sciences Remodeling and Addition project by \$247,000 for a total revised project cost of \$7,785,500, from General Fund Supported Borrowing (\$6,850,500), Residual Bonding Authority (\$247,000) and Gifts and Grants (\$688,000).

R. 3064, pp 29-30

Amendment to Carson Park Lease, UW-Eau Claire

The Committee reviewed a request for authority to extend until May 13, 1991, the lease between the City of Eau Claire and UW-Eau Claire for use of Carson Park. First approved in 1969, the lease was extended for an additional two years in 1977, to May 13, 1986. There was now a need for press-box improvements in the Carson Park stadium, which was used by UW-Eau Claire for all home football games. Under terms of this extension, the university would pay an additional \$17,000 in student segregated fees toward construction of a new press box. The project had been unanimously endorsed by the UW-Eau Claire Student Senate Finance Commission.

Regent O'Harrow moved and Regent Nikolay seconded Resolution 3065 which was adopted unanimously:

Resolution 3065: That, upon the recommendation of the UW-Eau Claire Chancellor and the President of the University of Wisconsin System, the Secretary or Assistant Secretary of the Board be authorized to sign an addendum to the lease agreement with the City of Eau Claire which provides that the expiration date of the existing seventeen-year lease between the City of Eau Claire and the University of Wisconsin-Eau Claire for the use of Carson Park be extended for an additional five years (to May 13, 1991), at an additional cost of \$17,000 from Student Segregated Fees.

Approval of Intercollegiate Athletic Facility Projects, UW-Madison

It was reported by Regent O'Harrow that the Committee approved a funding policy for facility maintenance, health/safety projects and construction of new facilities for UW-Madison's Division of Intercollegiate Athletics, as well as approving four projects to be funded in accordance with the new policy. The field house, the Camp Randall Stadium complex, the crew house, the outdoor track, and Guy Lowman baseball field comprised the Division of Intercollegiate Athletics' facilities. Approximately \$6 million of maintenance, health and safety projects had been identified as requiring attention over the current and next several biennia, the most critical of which involved the east stands of the Stadium (constructed and enclosed between 1916 and 1930) and the communication center located above the west stands. Available program revenue sources were not sufficient to cover the increased maintenance, health and safety costs (attributable to the advanced

age of the facilities), while at the same time providing for increased program costs and also maintaining a comprehensive sports program for both men and women administered in a manner consistent with the nondiscriminatory policies prescribed by Title IX.

The proposed formula was developed by staff of UW-Madison, System Administration and the Division of State Facilities Management, who agreed that the policy should include a combination of GPR and program revenue funds to support the cost of maintenance, health and safety projects. The formula distribution determined to be most appropriate was 70 percent GPR and 30 percent program revenues, which was comparable to the GPR/student fee funding support distribution for general operations and also approximated the relative numbers of student participants in intercollegiate non-income and income sports. It was indicated that a consistent method in financing major maintenance and safety projects would be very helpful in long-range budget planning for the Division of Intercollegiate Athletics and would ensure adequate protection of the state's investment in these facilities.

The following four projects were recommended for funding in accordance with the proposed policy. The first project request was to replace the existing audio system loudspeakers and electronics in the field house with a central cluster system for use at athletic events and a flexible system for universitywide special events. The total cost of \$177,300 would be funded by \$124,000 in general fund-supported borrowing-minimum maintenance/health and safety allocation, and \$53,300 in program revenues.

The second project was a \$50,000 Camp Randall Stadium waterproofing/exterior deck resurfacing/structural evaluation study and test section project (\$35,000 from GPR-capital improvement fund earnings and \$15,000 from program revenues). The purpose was to identify structural concrete problems in the stadium and to make recommendations (with cost estimates) for correcting them, as well as to formulate a method for making existing exterior surfaces water tight. The project budget provided for a test section of alternative sealing processes.

The third project concerned reglazing of the communication center windows in the stadium at a cost of \$130,000, with \$39,000 funded from program revenues and \$91,000 from GPR-capital improvement fund earnings-minimum maintenance/health and safety allocation. When constructed in 1967, the facility included tempered glass windows which were state-of-the-art at that time. Improvements since then in design and installation of tempered glass necessitated their replacement during the summer of 1984 to assure the safety of stadium occupants.

The fourth project was replacement of the deteriorated, 17-year-old upper main level roof on the communication center, along with a small amount of masonry repair work. If the physical plant staff could not repair the low level roof, it would also need to be removed and replaced. The maximum cost of the project would be \$100,000, funded with \$70,000 of GPR-capital improvement fund earnings-minimum maintenance/health and safety allocation and \$30,000 of program revenues.

Committee members supported the proposed financing policy as a reasonable approach to funding required maintenance, health and safety projects in the Division of Intercollegiate Athletics facilities.

It was moved by Regent O'Harrow, seconded by Regent Heckrodt and unanimously carried that Resolution 3066 be adopted.

Resolution 3066: That upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, the following policy be approved for funding facility maintenance, health and safety projects and construction of new facilities for the Division of Intercollegiate Athletics on the UW-Madison campus:

Regent Policies - Approval of
Policy for funding
Intercollegiate Athletic
Facilities at UW-Madison
R-3066, pp. 30-32

- (3) Camp Randall Stadium Communication Center Reglazing project, \$130,000 (~~\$91,000 1983-85 GPR Cap. Imp. Fund Earnings Min. Maint./Health and Safety Alloc. and \$39,000 Non-GPR Program Revenues~~)
- (4) Camp Randall Stadium Communication Center Roof Replacement project, \$100,000 (~~\$70,000 GPR Cap. Imp. Fund Earnings Min. Maint./Health and Safety Allocation and \$30,000 Non-GPR Program Revenues~~).
R. 3066, pp. 30-32.

Approval of Minor Projects, UW System

Three minor projects were presented to the Committee, one each at UW-Madison, UW-Platteville and UW-Superior. At UW-Madison, the request was for \$75,800 in non-GPR program revenues to replace deteriorated, 22-year-old roofs on five Eagle Heights apartment buildings. The UW-Platteville request was for \$39,000 of GPR-minor project funds/state building trust funds to relocate approximately 310 feet of the campus road adjacent to the central heating plant and Ottensman Hall in order to improve circulation by eliminating two of the three existing 90-degree angle curves in a 500-foot

stretch. At UW-Superior, the project involved replacement of dasher boards in the fourteen-year-old Wessman Arena, at a cost of \$83,200 from non-GPR program revenues. The boards did not stay in alignment, which caused a serious safety hazard.

Adoption of the following resolution was moved by Regent O'Harrow and seconded by Regent Nikolay:

Resolution 3067: That, upon the recommendation of the UW-Madison, Platteville and Superior Chancellors and the President of the University of Wisconsin System, the following minor projects be approved and authority granted to plan, bid and construct, at the cost and from the funding sources indicated:

UW-Madison

UW-Superior - Bids & hands

Approval of ✓ Wessman Arena Dasher Board Replacement project,
\$83,200, ~~Non-GPR Program Revenues~~ R-3067, pp 32-384.

In discussion at the Board meeting, it was pointed out by Regent Fish that there had been several late additions to the agenda, including the Eagle Heights project, for which roof inspections had been done in April and October 1983. Asking for an explanation in each case of the justification for late submission, he observed that projects should be brought forward in a timely fashion to permit inclusion in the advance materials.

It was indicated by Vice President Winter that the Eagle Heights request had not been submitted by UW-Madison prior to the time agenda materials were distributed.

President O'Neil agreed that the advance mailing ought to represent the complete agenda for the Regent meetings, although there occasionally were unusual situations which warranted special consideration. Noting that some university boards would not permit addition of any post-agenda mailing items, no matter how great the urgency, he suggested that in the future any late submissions include a precise explanation of the reason the item was late and the consequences of not being able to consider it at the meeting for which it was submitted. It was necessary, he emphasized, to make certain that permission be sought to add items to the agenda only in the most extenuating circumstances.

Regent Fish noted that it was his intention to vote for the resolution before the Board. What he did not support was a procedure which would continue to permit late addition of such items to the agenda.

In explanation of the timing of the Eagle Heights request, UW-Madison Vice Chancellor Len Van Ess said that, although campus staff completed inspections at the times indicated, a roof repair project could not go forward until a final report was received from the Division of State Facilities Management. The report in this case was received only two days previously.

Mr. Winter added that staff considered the roofs to be in such poor condition that repairs should be made immediately. In response to a question by Regent Fish, he said the Division of State Facilities Management classified the roof problem as a priority one repair.

Regent Fish commented that it was difficult to understand why there should have been so long a delay in completing the report on a priority one problem.

Chairman O'Harrow asked if Regent Fish would accept the suggestion made by President O'Neil with respect to justification for late submissions.

Regent Fish said he would concur on the condition that it not be presented to the institutions in the positive sense that they could make a late request if they would add a paragraph indicating why it was late. Instead, it should be emphasized that only under rare circumstances would a late item be considered, and then only with an adequate statement of justification.

Put to the vote, Resolution 3067 was unanimously adopted.

Telecommunications Systems - status report on planning for acquisition of telephone systems p 34
Report of the Vice President

In a status report on telecommunications, Vice President Winter spoke about planning for acquisition of telephone systems in the UW System. In 1983-84, there had been a Department of Administration directive that all state government users stay on existing centrex exchanges through June 30, 1984, to provide time to assess the impact of new rates being developed by the Wisconsin Telephone Company.

DOA staff had recently advised that requests for acquisition of new telephone systems might now be submitted for review, and System staff intended to consult with the Higher Education Subcommittee of the State Building Commission to assure that any procedures agreed upon with DOA staff were also acceptable to the subcommittee.

UW-Stevens Point had submitted to DOA and System Administration a request for proposal to acquire a new telephone system. Prior to proceeding with the bidding process, the Regent's Physical Planning and Development Committee would be asked to review a System recommendation relating to that proposal.

Telephones - see also telecommunications systems

Gift-In-Kind of a Fast Food Laboratory, UW-Stout

Regent O'Harrow reported on Committee review of a request from UW-Stout for Regent indication of willingness to accept a gift-in-kind from the Burger King Corporation of the construction and equipping of a fast-food restaurant facility, valued at \$125,000, in the Home Economics Building at UW-Stout. The

university and the Burger King Corporation had worked cooperatively to develop a "Seminar in Hotel and Restaurant Management: The Fast Food Industry," and executives of the Florida corporate offices, as well as the regional office in Minnesota, had served as guest lecturers on campus. In a highly competitive and fast-changing industry, the expertise which these professionals brought to the UW-Stout program in Hotel and Restaurant Management was considered invaluable. The goal was to have the fast food laboratory completed and ready for operation by September 1, 1984, with all plans to be approved by the System Division of Architecture, Engineering, Physical Plant and Energy Management prior to the start of any construction.

It was moved by Regent O'Harrow and seconded by Regent Nikolay that the following resolution be adopted:

NW-Stout-Bldgs & Hands

*Approval of gift in kind
✓ of fast food lab from
Burger King Corp. R. 3068
pp. 34-35
✓ x-ref Burger King Corp*

Resolution 3068: That, upon the recommendation of the UW-Stout Chancellor and the President of the University of Wisconsin System, the Board of Regents indicate their willingness to accept a "gift-in-kind" of the construction of a fast food laboratory in the Home Economics Building on the UW-Stout campus from the Burger King Corporation, with the offer including remodeling and the donation and installation of appropriate equipment.

In discussion at the Board meeting, President O'Neil commented that the proposal seemed an exceptional kind of opportunity and one that was especially appropriate for UW-Stout.

Regent Lawton asked if there would be guidelines as to the use of this project as an advertising tool for the corporation.

In reply, Chancellor Swanson said the gift probably would be recognized by a plaque in the laboratory stating the name of the donor, as was the case with other gifts-in-kind. While that might have some advertising value, he assured the Board that the laboratory would not include large promotional signs.

Noting the Physical Planning and Development Committee raised similar questions, Chairman O'Harrow asked if Regent Lawton would wish the proposal to be held over for further review.

Responding in the negative, Regent Lawton expressed confidence that the chancellor would handle the matter appropriately.

The question was put on Resolution 3068 and it was adopted unanimously.

Approval of Major Project Concept and Budget Report, UW-Milwaukee

A final item before the Committee was the concept and budget report for the UW-Milwaukee Golda Meir Library addition project. The design, which complemented existing buildings details, satisfied all programmatic/aesthetic requirements and was considered cost-effective, as well as space efficient. Addition of a lower level and three floors above grade to the northwest, a lower level to the southeast, and a partial fourth floor level would provide needed stack and study space, special collection facilities and media distribution/technical service areas.

It was requested by Chancellor Horton that the Committee grant additional authority to plan, bid and construct two alternate bids, provided they could be funded within the enumerated budget of \$11,327,600. Acceptance of the two alternates would result in the addition, remodeling and energy modifications, all being completed as originally authorized by the Regents, but below the \$12,888,000 budget level the Board approved.

At the time the State Building Commission acted to delete the remodeling portion of the project (with the understanding that it would be resubmitted in the 1985-87 capital budget request), there was an interest in capping the state's bonded indebtedness to a certain level. Further, the close interrelationship between the addition and remodeling was not clear at that time. To complete the addition and then do the remodeling would result in a second disruption to library operations over that which would occur if both elements proceeded under a single project. The State Building Commission originally approved the separation of the projects with the understanding that a tower would be added to the existing library. The present concept was to add primarily horizontal space, which made it more appropriate to have the addition and remodeling constructed as a single project.

It was noted that some recent project bids had been substantially under budget, including two on the UW-Milwaukee campus: the Pearse/Garland remodeling project which was more than \$600,000 (or 10%) under budget and the plaza replacement project which was \$400,000 (or 33%) under budget.

The energy modification portion of the concept and budget report provided for the following major items: retrofit of six multizone air handling systems to variable air volume (with a discounted payback of 9.9 years for a cost of \$500,250); conversion of the central HVAC system to variable air volume (with discounted payback of 5.4 years for a cost of \$402,500); thirteen electrical modifications, with paybacks ranging from .8 to 8.32 years, the primary items being \$139,985 and \$462,168 lighting fixture modifications; and retrofit of existing glazing.

Regent O'Harrow moved adoption by the Board of Resolution 3069. The motion seconded by Regent Nikolay and unanimously carried.

Resolution 3069: That, upon the recommendation of the UW-Milwaukee Chancellor and the President of the University of Wisconsin System, the concept and budget reports for the Golda Meir Library Addition project and the Golda Meir Library Energy Modifications project be approved, at costs of \$11,327,600 and \$2,038,082 respectively (from GPR-General Fund Supported Borrowing), with further authority granted to seek alternate bids in the Library Addition portion for Media Center Development (estimated to cost \$711,000) and Miscellaneous Minor Remodeling (estimated to cost \$379,000), with authority granted to prepare final plans and specifications, bid and construct the projects.

ACADEMIC PLANNING STATEMENT NO. 4 (ACPS-4)

6. Unanticipated assignments for faculty members** from University sources during the period of appointment

a. General policy.

The salary received by full time faculty members is considered to be full compensation for university activity during their appointment period. Thus, such faculty members may not receive compensation for an overload activity from any funds administered within the University System, regardless of source, except through procedures and within standards provided in this policy.

Recurring needs for a faculty member to assume special institutional responsibilities should be handled through some method other than overload payments. The following alternatives are suggested:

- (1) An adjustment in the faculty member's existing responsibilities to release time for a new assignment.
- (2) Reevaluate the individual's existing and added duties to determine whether a temporary revision of base salary is appropriate.
- (3) Compensate, if possible, for the added load by converting an academic year appointment to an annual appointment.

Exceptions are subject to specific advance approval of the Chancellor(s) or designee whose Unit(s) is (are) involved and must be of an unusual, short term, or nonrecurring nature. When exceptions are granted, two methods for dealing with an ad hoc or temporary need for special institutional services are suggested:

- (1) Overload payment made directly to the faculty member;
- (2) Purchase of load wherein there is a transfer of money into the faculty member's department or employing unit as a purchase of institutional time from that unit. This may permit the release of the unit's resources to support other scholarly activities of the individual or unit.

** Applies also to those academic staff members assigned instructional responsibilities

Compensation for such exceptions cannot exceed the statutory limitations as defined in the Wisconsin Statutes (Section 19.45(9)(m)).* This limitation (i.e., \$5000/year) is to be applied to all full-time employees (academic or annual).

Calculation of overload payments shall be made in conformance to methodology developed in FPPP #29 (Financial Policy Procedures Papers #29).

b. Mini-sessions during the academic year

Teaching provided during mini-sessions scheduled within the academic year, even though the activity may occur during an academic recess (as, for example, during the Christmas and New Year's recess), should be incorporated in the regular academic teaching load of the faculty members providing the instruction.

c. Summer session and post-commencement (-term) mini-sessions

Budgets for mini-sessions conducted outside of the period of the nine-month academic year shall be included in this part of the annualized budget allocated to summer session activities of the institution. Compensation received from the University in the summer period should not in aggregate exceed two-ninths of the academic year salary of the person appointed unless an explicit exception is granted by the Chancellor (or designee).

d. Interinstitutional instructional consulting, or technical service on an overload basis

One of the assumptions of merger is that the University of Wisconsin System should be able to arrange for the sharing of expertise among the various Units. Where the need for this interinstitutional service is short-term in nature, it is often necessary to arrange for appropriate compensation on an overload basis.

* Wisconsin Statutes Section 19.45(9)(m)

"No state public official or state employee who is employed in a state position full-time at an annual salary in excess of two-thirds of the midpoint of the current salary for executive salary group 2 under s. 20.923 may hold any other position from which he or she receives income from the state exceeding \$5,000 per year. No department may employ any person in violation of this subsection. Every department shall annually check to assure that no employee of the department violates this subsection. Any employee who is found in violation of this subsection shall be required to accept a termination or reduction in salary sufficient to bring the employee into compliance. This provision does not apply to those state public officials or state employees who accept other state employment during a period they are not receiving a full-time salary."

Overload payment for such services may be authorized only by the concerned Chancellors (or their designees) when the service falls outside the regularly assigned responsibilities of the person sought and is provided without affecting adversely performance of such regularly assigned responsibilities. The activity should meet the standard of being unusual, short-term, and nonrecurring.

e. Off-campus credit instruction

Off-campus credit courses should, when taught by full-time faculty members during their appointment period, be taught insofar as possible as part of their assigned full-time responsibilities. It should be recognized that past practice of the institutions has varied on the use of overload payment for such purposes, as well as on the use of ad hoc instruction. Moreover, institutions may find it desirable to maintain flexibility in the use of instructional funds and in adapting off-campus offerings to rapidly changing needs by continuing to staff some part of their off-campus credit offerings through use of overload payment and ad hoc employment. The UW System sets as a standard that no more than one-third of the staffing of off-campus credit instruction by any System institution be provided through overload or ad hoc arrangements and that such staffing be recommended by the relevant academic department or its functional equivalent and approved by the Chancellor (or designee).

The level of use of overload payment and ad hoc arrangements for off-campus credit instruction shall be monitored by each Chancellor (or designee).

With reference to statewide outreach planning, UW-Extension has responsibility for the coordination of off-campus credit offerings as set forth in ACIS-3. When institutions are unable to budget for off-campus credit courses as a part-of-load, such courses will continue to be budgeted through UW-Extension. Where that is the case, the provisions of ACIS-3, Section IV. C. apply.

For purposes of this section, ad hoc appointments are temporary appointments of persons employed to meet a particular teaching assignment, the need for which has not been anticipated in the planning of the teaching responsibilities and budget of a particular academic unit. Such appointments are made to persons who are not members of the institutional faculty, its academic staff (such as clinical professors), or its graduate assistants. Also for purposes of this section, any campus credit offerings scheduled and taught on campus through a campus extension division shall be considered within the same policy applying to off-campus offerings.

f. Non-credit continuing education and public service programs

The University of Wisconsin System commits itself to respond to the continuing education and public service needs of Wisconsin residents. To the extent that these needs can be anticipated for any regular budget period, budget arrangements should be developed to structure such assignments as part of the regular load of full-time faculty members.

If these assignments have not been anticipated, or cannot be accommodated in the regular load, overload payments may be authorized according to the policy and limits established in accord with this policy document.

With reference to statewide outreach planning, UW-Extension has responsibility for the coordination and budgeting of non-credit offerings as outlined in the April 1982 Regent's Policy and as set forth in ACIS-5.

g. Monitoring of overload payments

The Chancellor of each institution shall be responsible for monitoring overload payments and shall provide the UWS Office of Academic Affairs, upon request, a list of persons receiving overload payments having a cumulative annual total per individual of \$1,000.00 or more.

ADMINISTRATIVE APPENDIX TO ACPS-4

Definitions of Part-of-Load/Ad Hoc/Overload
Appointments and their Application for Use with
Section 6.e. Relative to Arrangements for Staffing
Off-Campus Credit Course

Part-of-Load: Services, on-campus or off-campus, during the academic year or summer, provided by faculty as part of their regular appointment and their salaries paid out of the institution's regular instructional budget. Such faculty or staff may be part-time employees of the University as adjunct faculty or Lecturers. The regular appointments may include a sharing of the individual's services by two or more institutions. This part-of-load instruction should be reported by the University or Center in the CDR.

Purchase of load appointments are treated like part-of-load appointments in dealing with the provisions under 6.e. that not more than one-third of the off-campus courses be provided through overload or ad hoc arrangements. These types of appointments are those in which off-campus credit instruction is provided through UW-Extension funds administered by a University or Center. This purchase-of-load instruction should not be reported by the University or Centers but through the UW-Extension CDR.

Faculty appointments funded by UW-Extension are treated like part-of-load appointments in dealing with the provisions in 6.e. that not more than one-third of the off-campus courses be provided through overload or ad hoc arrangements. These types of appointments are campus-based faculty members who have appointments supported by UW-Extension funds and who are teaching off-campus credit courses. These appointments include appointments of University or Center faculty members who are not, at the time of appointment holding appointments at the University or Center (e.g., during the summer period). Faculty instruction funded by UW-Extension should not be reported by a University or Center in the CDR.

Overload: Services provided by faculty on full-time UW System appointments who are being paid additional sums by an institution of the UW System for services in addition to regular assignments during their period of appointment. This overload instruction should be reported in the CDR by the institution that provides the funding for the overload payment. Credits generated through UW-Extension/institution interinstitutional agreements should be reported in the UW-Extension CDR. Approval and reporting procedures noted in other sections of ACPS-4 are applicable.

Ad Hoc: Temporary appointments to persons employed to meet a particular assignment who are not members of the institutional faculty, its teaching academic staff (such as Lecturers), or its graduate assistants, and are paid for by UW-Extension Funds. This ad hoc instruction would not be reported by the University or Centers in the CDR. (Individuals may also be appointed by institutions as part-time faculty or teaching academic staff, e.g., lecturer, adjunct professor, for on-campus teaching and paid out of the regular instructional budget as described under Part-of-Load above. Such individuals should not be considered as ad hoc personnel for the purposes of this definition. This instruction should be reported by the University or Center in the CDR.)

Provisions for Part-Time Teaching Staff

(either on Part-of-Load or Ad Hoc appointments
as defined above for Section 6.e. of ACPS-4)

The System's policy is that the quality of an institution's instructional program is more effectively assured if offered by regular full-time faculty. However, in certain instances, unusually well qualified persons may be obtained on a part-time basis who would not be available full-time. Institutions are, therefore, encouraged to take appropriate steps to insure that the part-time teaching staff are involved in regular departmental activities related to program development and evaluation through special provisions for participation in departmental activities and appropriate professional relationships with other members of the department. When appropriately provided for, part-time teaching staff can become an integral part of a department's instructional program.

It is generally undesirable for an institution to employ as part-time teaching staff individuals who are in any way administratively responsible for the students they are teaching (e.g., school administrative staff teaching teachers in their own school district).

Approved by Board of Regents
May 11, 1984

UW SYSTEM UNDERGRADUATE TRANSFER POLICY - Revised

INTRODUCTION

Mobility is a common human phenomenon. This is true among students in higher education. For reasons ranging from a change in major, to attending college close to home for economic reasons, or a family move, students are frequently faced with the necessity of obtaining their collegiate education from two or more institutions. Conscientious efforts will be made by the UW System to make the transfer process student-oriented and as easy as possible. In that context, the entire University of Wisconsin System welcomes transfer students from other accredited colleges and universities as well as intra-System transfer students.

The challenge in this UW System Undergraduate Transfer Policy is to reach an appropriate balance among varied and sometimes competing goals. Some of those goals include: (a) facilitating student mobility; (b) recognizing the distinct mission of each institution* of the UW System and the faculty role in the development of the missions; (c) providing information to students on course equivalencies and program requirements throughout the System; and (d) balancing the System concerns with institutional autonomy. The foremost goal is creation of a policy which provides a strong focus toward serving students.

I. SPIRIT OF ACCOMMODATION FOR TRANSFER STUDENTS

- A. It is in the interest of both the student and the System that each institution accept in transfer as much credit as is pertinent to the student's new curriculum and institution's graduation requirements. In accepting credits from accredited colleges and universities, maximum recognition of courses satisfactorily completed shall be given to transfer students in satisfying requirements at the receiving institution. The "Spirit of Accommodation" shall be implemented by recognizing general education/liberal arts requirements in terms of broad academic areas (social sciences, humanities, physical sciences, etc.) as well as specific courses. The student should be advised, however, that the new curriculum may require courses in addition to, or different from, the previous curriculum.

*An institution is an organization headed by a Chancellor or Executive Dean.

- B. If all other conditions for admission are met, credits shall be transferred to the new institution where the grades earned in courses at the previous institution are recognized as passing grades at the new institution and where that institution has comparable curricular areas. However, each institution will determine if credits will be applied toward a degree in courses in which grades of less than 'C' (2.00 grade point average on a 4.00 scale) are earned.
- C. Students seeking advanced standing after attending one or more accredited institutions of higher education, and who are found to be admissible, shall normally be given an evaluation of credits accepted prior to enrollment. To the greatest extent possible, the option to choose new or old program requirements shall apply equally to continuing students as well as transfer students.
- D. As far as possible, schools, colleges, and departments should seek inputs from non-baccalaureate institutions during the early stages of program development and modifications to insure full consideration of the special situation of the transfer student. Non-baccalaureate degree-granting institutions were established for the purpose of making the primary stages of university education more economically and geographically feasible for qualified Wisconsin students. This is possible only to the extent that program requirements allow for this kind of educational experience. Requirements such as early transfer and highly technical and specialized first and second year courses tend to operate to the disadvantage of all students who must transfer. Problems can be minimized if the four-year institutions are willing to be sensitive to the needs of transfer students.

II. MINIMUM GENERAL ADMISSION REQUIREMENTS FOR TRANSFER STUDENTS

- A. Normally students with an overall 'C' (2.00 grade point average on a 4.00 scale) average at their previous institution(s) shall be admissible.
- B. Students with less than an overall 'C' average at their previous institution(s) may be admissible if they would originally have been admissible as freshmen at the UW System institution to which they are now seeking entry and if they would be eligible to continue at this new institution had they achieved their existing academic record at the new institution.
- C. In fulfilling the institutional mission, it may be necessary for a School/College or Department to set standards for entry to their programs which exceed the minimum transfer requirements. Such standards for entry shall apply equally to continuing students and transfer students.
- D. Requirements for out-of-state students will be the same as those for resident students except that an institution may adopt special requirements for foreign applicants. If the number of qualified out-of-state students exceeds the ability of the institution to accommodate them, the institution shall determine the criteria for selection from among qualified applicants.

- E. Those who do not qualify under the provisions above may appeal through the appropriate director of admissions at the new institution with final approval resting with the Dean of the College/School of the student's choice or with the designated institutional officer.
- F. It is recognized that in periods of diminished resources, a policy of limitation of students' access to the institutions of their choice may be required to protect the quality of the academic program. In such cases, institutional policy will determine the criteria by which limitations of access shall be applied.

III. RECOGNITION OF INSTITUTIONS AND PROGRAMS

The University of Wisconsin System bases its general policy on the acceptance of credit from another institution on that institution's status in the regional accrediting association.

A. Regionally Accredited

Full transfer of credit as applicable to the student's choice of major(s) at the new institution. (If the institution offers both college level and non-college courses, as at several Wisconsin Vocational, Technical and Adult Education (VTAE) institutions, the full transfer applies only to the accredited college parallel courses--see Section III.D.1)

B. Not Regionally Accredited

1. **Recognized Candidate:** Full transfer of credit as applicable to student's choice of major(s) at the new institution. (Same restriction to college parallel courses at VTAE institutions.)
2. **Professional Accreditation:** For schools accredited by a professional accrediting association, credit may be granted in the specialty of accreditation (art, music, etc.) if recommended by the appropriate academic department or equivalent.
3. **Credit earned in institutions of higher education that are not accredited or candidates for accreditation as provided above is not acceptable for transfer.** Students who have taken courses at non-accredited schools may seek credit by examination in courses where resident students have the right to earn credit by examination.

C. Foreign

Credit may be granted for postsecondary work if the institution is listed either in the INTERNATIONAL HANDBOOK OF UNIVERSITIES or in COMMONWEALTH UNIVERSITIES YEARBOOK. Credit may be granted for postsecondary work from institutions not listed in these publications upon departmental evaluation of program syllabi.

D. Special Situations

1. Policy for VTAE Students Transferring to the UW System

- a. Credits satisfactorily completed in the three VTAE accredited college parallel programs at Madison, Milwaukee and Rhinelander and similar programs out-of-state will normally be accepted at all universities in the UW System through the first two years of college work. A student may generally apply up to half the credits required for the degree, but not more than 72 semester credits. This resolution does not alter the regulations concerning credits to be earned in residence on a campus.
- b. General education and/or liberal arts credits earned in a non-college parallel program at a vocational-technical institution either within or outside Wisconsin will not transfer into a degree program, but vocational-technical students not enrolled in an accredited college parallel program who apply for transfer to a UW System institution shall have an opportunity to earn credit by examination in courses where resident students have the right to earn credit by examination.
- c. In vocational-technical programs outside the college parallel area (both from Wisconsin and out-of-state), credits will not transfer to any UW System institution unless that institution has received approval from the UW System Vice President for Academic Affairs' Office. That office will compile a list of these actions by institutions and monitor the acceptance of credits from particular vocational-technical courses which have a direct relationship with institution programs. It is recognized that there has developed a clear professional development pattern between persons trained in certain vocational-technical programs who later transfer to a UW System institution to continue their studies in the same general field. In carrying out the monitoring function, the Academic Affairs Vice President will require an institution to demonstrate the direct programmatic relation of vocational-technical credits they have accepted outside the college parallel area.
- d. In those cases where a UW System institution accepts certain non-college parallel vocational-technical credits, it should be understood that the credits are not then transferable to other UW System institutions unless approved by the Academic Affairs Vice President's Office for transfer of credit to another institution. All non-college parallel vocational-technical credits accepted by an institution must be so designated on the student's transcript by specific course(s) taken.

2. Credit by Examination

Each institution has procedures allowing students the opportunity to demonstrate their competence through the use of externally and internally developed tests or by portfolio assessment procedures. Testing options will allow any student the opportunity to gain credit by demonstrating competency.

a. External

Every institution should provide appropriate methods for the use of national tests developed for credit such as the College Level Examination Program; but it should also be the prerogative of each institution to establish proficiency score levels, limitations of credit allowed, policies regarding testing fees, and other related policies, that are consistent with the characteristics of ability and achievement of the particular student body at the institution. The policies for granting credit on the basis of external examinations, such as the Advanced Placement Program, CLEP (General and Subject examinations), USAFI, International Baccalaureate, and DANTES should be applied equally to continuing and transfer students. Students who are given credit on the basis of these examinations should be informed that in the event of transfer, they can expect the receiving institution to determine if credit is to be granted.

b. Internal

Credit will be allowed whenever demonstrated proficiency is equated to satisfactory achievement in a credit course, if resident students may earn credit for that course through a similar procedure. For example, if an institution grants retroactive foreign language credit to students who demonstrate proficiency through completion of a designated foreign language course with a specified grade, those credits will be transferable to institutions which have similar retroactive credit policies.

3. Use of Guides to Evaluation of Noncollegiate Educational Experiences

With the approval of the appropriate faculty committee, each institution has the option of granting credit on the basis of recommendations made by the guides to noncollegiate educational experiences published by the American Council on Education's (ACE) Office on Educational Credit and Credentials, e.g., the Guide to the Evaluation of Educational Experiences in the Armed Services and A Guide to Educational Credits for Training Programs. In those cases in which a UW System institution accepts courses and grants credit which the ACE Office on Educational Credit and Credentials has

recommended, credits granted a student for those courses are not necessarily transferable to another UW System institution; in each case, the receiving institution will determine whether or not to accept the credits. All noncollegiate educational courses/credits accepted by the institution must be so designated on the student's transcript.

4. County Teachers Colleges

County Teachers College students who transfer to a UW System institution with at least 32 semester hours of successfully completed work in elementary education will receive credit for 32 semester hours of non-specific credit, but not more than two years' work, providing the work was completed during the years of 1970-71 and 1971-72 and providing the student is accepted in an elementary education program at the receiving institution.

IV. PROVIDING CURRENT AND ACCURATE INFORMATION ON PROGRAM CHANGES AND REQUIREMENTS THROUGHOUT THE UW SYSTEM

- A. Each institution should keep transfer applicants informed of program requirements.
- B. The appropriate office at each four-year institution will prepare equivalency matrices for all courses taught in non-baccalaureate institutions of the University of Wisconsin System (Centers and Extension).
- C. The appropriate office at each four-year institution will prepare an equivalency matrix for another four-year institution when it is determined that transfer traffic between the two institutions warrants the work involved.

V. FACILITATING THE TRANSFER OF CREDIT FROM NON-BACCALAUREATE INSTITUTIONS OF THE SYSTEM TO BACCALAUREATE-GRANTING INSTITUTIONS

A. Two-Year Colleges

Students transferring to baccalaureate degree-granting institutions may generally apply up to half the credits required for the degree, but not more than 72 semester credits. This does not alter the regulations concerning credits to be earned in residence at an institution.

B. Extension

Courses for degree credit in every instance have departmental approval for both the course and the instructor, and there should be no distinction between that course when offered on or off the campus, by regular class, media, or independent study. Such courses will transfer on the same basis as equivalent courses taken on campus.

Students applying for transfer should be made aware of the UW System transfer policy at the outset through appropriate brochures, pamphlets or bulletins. In addition, transfer policies of specific colleges or schools should be explicitly stated in catalogs and bulletins.

F. UW-RIVER FALLS

1. 1981-83 Building Demolition and Site Development
(Ag Engineering & Technology Building) (8305-33)
 - a. All Work
Holst Construction, Inc. - Prescott \$ 92,272.00
2. 1983 Campus/Residence Halls Cable TV Distribution
System (8309-18)
 - a. All Work
Bill Schmidt Electric - Platteville \$ 95,300.00

G. UW-STEVENS POINT

1. 1981-83 Learning Resources Center Addition (8202-32)
 - a. All Work
Fluor Brothers Construction Company - Oshkosh \$5,576,850.00

4. 1983-85 Tennis Courts Repair (8311-49)
 - a. All Work
B. R. Amon & Sons, Inc. - Elkhorn \$ 42,170.00

II. CONTRACT CHANGE ORDERS IN EXCESS OF \$30,000.

A. UW-MADISON

1. 1979-81/1981-83 Birge Hall Remodeling - Phase II (8007-14)
 - a. Change Order G-10: ADD \$ 45,092.00

✓ Broadcast Music, Inc. - agreement to license public performances 7-1-83 to 6-30-87, Item A.

III. REPORT OF ACTIONS TAKEN (MEMOS OF AGREEMENT).

A. An agreement between Broadcast Music, Inc. (BMI) and the Board of Regents of the University of Wisconsin System to license public performances of musical compositions in BMI's repertoire on a nonexclusive basis, for the period July 1, 1983 through June 30, 1987, has been signed by the Vice President and Trust Officer.

✓ Wis. Financial Security - ending date of agreement with Wis. Financial Security for TDA program changed to 5-31-84, Item B K-reg. - Tax Deferred

B. The existing agreement between Wisconsin Financial Security, Inc., which established a Tax Deferred Group Single Premium Annuity Purchase Program (terminal funding) (reported in June 1980) has been modified by changing its termination date from April 30, 1984 to May 31, 1984, per addendum dated April 2, 1984, and executed by Wisconsin Financial Security, Inc., and the Assistant Secretary of the Board.

✓ Madison Gas & Electric - utility easement for Madison Gas & Electric on Seed Farm, Item C. K-reg. Seed Farm Easement

C. Under the terms of Resolution 581 (June 8, 1978), an easement for utility purposes has been granted to Madison Gas and Electric Company to provide the additional land necessary to save trees on the UW-Madison Seed Farm Addition while underground cable is being buried. The easement was executed by the President and Secretary of the Board on April 6, 1984.

✓ Appleton Family Practice Clinics - Stockbridge Clinic closed as of 4-30-84, Item D.

D. The Stockbridge (Wisconsin) Clinic, operated as a satellite of the Appleton Family Practice Clinic, UW-Madison, has been terminated effective April 30, 1984, since it has been mutually determined that the Village of Stockbridge could not support a medical practice. This lease (with two one-year renewal options) was reported to the Board in February 1983 and was to expire on February 28, 1986. The annual rent for the 1,400 square feet of space was \$4,200.
