The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

# USE IT. . . OR LOSE IT!

Help prevent G.I. tract shutdown and bacterial translocation in your critical care patients

Keep the gut stimulated with this rapidly placed, "wire-guided" Dobbhoff® naso jejunal tube that also allows simultaneous gastric decompression.

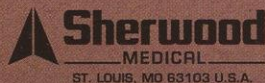

The **Dobbhoff®** Naso Jejunal Feeding/Gastric Decompression Tube from Sherwood Medical allows you to deliver immediate enteral nutrition to your patients who need it most. The 67" polyurethane tube can be rapidly inserted using endoscopy and/or fluoroscopy and is uniquely adjustable so you can selectively place the feeding tube at various depths in the small bowel to better conform to a full spectrum of patient populations.

#### **Also available from Sherwood Medical . . .**

For your patients not requiring simultaneous gastric drainage with intestinal feeding, we proudly offer our **ENDO-Tube™**, a 60" 12 French "wire-guided" nasal jejunal feeding tube for quick access into the small bowel.

**Enteral nutrition can be better for your patients and now it's easier than ever for you to deliver!**

For further information, contact your Sherwood Patient Care Sales Representative or call 1-800-325-7472.
