MINUTES OF THE REGULAR MEETING
of the
BOARD OF REGENTS OF THE UNIVERSITY OF WISCONSIN SYSTEM

Madison, Wisconsin

Held in the Clarke Smith Room, 1820 Van Hise Hall
Friday, March 11, 1977
9:02 A.M.

President McNamara presiding

PRESENT: Regents Barkla, DeBardleben, Erdman, Fish, Gerrard, Hales, Johnson, Lavine, Lawton, McNamara, Neshek, Pelisek, Sandin, Thompson, Walter

ABSENT: Regent Grover

Upon motion by Regent Neshek, seconded by Regent Gerrard, it was VOTED, That the minutes of the meeting of the Board of Regents of the University of Wisconsin System held on February 11, 1977, be approved as sent out to the Regents.

- - -

REPORT OF THE PRESIDENT OF THE BOARD

President McNamara stated that any report the President has will come later in the meeting.

- - -

REPORT OF THE PRESIDENT OF THE SYSTEM

Regent Sandin moved adoption of the following resolution, the motion was seconded by Regent Neshek, and it was voted:

Resolution 1406: **That the Report of Non-Personnel Actions by Administrative Officers to the Board of Regents and Informational Items Reported for the Regent Record be received for the record; and that actions included in the report be approved, ratified, and confirmed. (EXHIBIT A, attached)**

-

President Weaver stated that reports on the legislative hearings which have been in process for the University budget and associated considerations have been furnished to the members of the Board, and we are now engaged in appearances before subcommittees of the Joint Education Committee and the Joint Finance Committee. He reported that the hearings have been held in a useful atmosphere of understanding--we have undergone stiff questioning but not hostile questioning. President McNamara concurred in President Weaver's assessment that we were well received by the Joint Finance Committee and while that does not mean we will get everything we want, the atmosphere was good and very thoughtful.

-

President Weaver called upon Chancellor Edward Fort for the report of the University of Wisconsin Center System. Following an audiovisual presentation, Chancellor Fort made the remarks attached as EXHIBIT B. Chancellor Fort concluded his report by stating that given continued support on the part of the Board of Regents, we can meet the mandates of quality, the pressures of cost effectiveness, and the challenges of program development.

Regent DeBardleben inquired if the faculty feels that the rather startling results achieved from a budgetary standpoint have had an adverse effect on quality. Chancellor Fort responded that the faculty entered the arena of defining the so-called core curriculum with some misgivings, particularly in relationship to the often designated fear that so-called minimum could become ultimately the maximum, but notwithstanding that reality the faculty in good faith moved ahead and became the first institution to define a liberal arts core curriculum. He stated that the faculty fears that unless the Board says in effect, "This is as far as you need go", then quality will not only be desecrated, but will no longer exist. He said what he was asking for was the reaffirmation on the part of the System for what this institution has been and continues to be about in (a) relationship to any cost effectiveness, and (b) the promulgation of quality that will assure the kind of programmatic posture that we must have to guarantee the kind of access on a quality basis that this Board insists upon.

Regent Erdman noted that the enrollment at the Medford Campus is still not high and the CSI is relatively high and wondered if he had begun to negotiate with the community to explore possibilities of increased support of this institution. Chancellor Fort responded that the local community is involved - - they have insisted on politicizing the structure to get the point across to the State Legislature that if an attempt is made to discontinue that campus, they are going to be in for the fight of their life. Regent Erdman stated that she wondered if he had begun to talk to the County Board about taking over some of the payments which the University System currently handles. She noted that the County Board is handling debt service and inquired as to why they could not take over some of the other responsibilities. Regent Lavine noted that the county has probably put more per capita into education than anybody -- they built the campus, they continue to support it educationally, and it would be unfair to say to Medford that they should carry the cost of anything more at that campus than any other county carries with respect to Center System campuses. He stated he did not support the concept that we say to the Center System that each campus should have its own CSI when we don't say that to every college within the University. He noted the Center System is more cost effective, with quality, than any other institution of four-year size in the state or comparable size two-year institution in other states.

Senior Vice President Donald Smith stated that it was difficult in conscience and equity to ask a very poor region of the state to assume a disproportionate burden of supporting education as this seems exactly contrary to what the University is about.

Regent Johnson complimented Chancellor Fort and the people of the Center System especially in regard to the relationship with Vocational Education. He said it is quite unfortunate we haven't had a closer relationship much earlier as it would have benefited both systems. He continued that in defining the mission of the System, it would have shown where the missions belong and what they should do. At the same time it shows the people of Wisconsin in the areas involved a greater opportunity to expose themselves to both systems of education and determine which one they wish to participate in. He said he hoped that in the future we will see the Center System take a greater part in the vocational system achieving these results, because they are going to be very important to the future of education in the State of Wisconsin.

Regent DeBardleben said he would like to underline what Vice President Smith had said about the inequity and unfairness of expecting people in Taylor County to do more than people elsewhere in the state in order to continue the objective of access to public higher education. He continued that from his own knowledge there are people attending the Medford Center that would be deprived of educational opportunities were the Center not there. He continued that he hoped the impression would not go out of this meeting that a substantial number of this Board take seriously the suggestion that Taylor County be treated differently than the rest of the state.

President McNamara stated that on behalf of the Board and himself he would like to commend Chancellor Fort for an excellent report and for the outstanding leadership given the Center System. He continued that under the Chancellor's leadership and with the help of a dedicated faculty and staff, the two-year centers have become important parts of higher education in Wisconsin.

REPORT OF THE EDUCATION COMMITTEE

The report of the Education Committee was presented by Regent Lavine.

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent Sandin, and it was voted:

Resolution 1407: (Policy-Revised)

That, upon recommendation of the President of the UW System and the Chancellor of UW-Eau Claire, the first paragraph of Regent Resolution No. 1384, approved by the Board on February 11, 1977, be corrected to read as follows:

"That, upon recommendation of the President of the UW System and the Chancellor of UW-Eau Claire, the following amendment be approved as substitute for that portion of the UW-Eau Claire faculty personnel policies and procedures responsive to UWS 3.06 Wisconsin Administrative Code which begins with the words "The Departmental Reappointment Committee..." in the last paragraph at the bottom of page 7 and ends with the words "...in accordance with 66.77 Wis. Stats." at the end of the paragraph at the top of page 8, such approval to be as required under UWS 2.02:"

The Department Reappointment Committee shall give the faculty member at least 20 days advance written notice of the departmental review.* This notice will inform the faculty member whether the review is to be conducted to determine a reappointment recommendation only or to determine a recommendation for tenure. This notice will also inform the faculty member of his/her right to present to the committee written information related to the criteria on which it will base its recommendation and of his/her right to request an opportunity to appear before the committee to explain the information presented. In addition to these rights, the faculty member being reviewed shall be afforded all rights provided under the Wisconsin Open Meeting statutes in effect at that time.

*Day shall mean calendar day.

Regent Lavine reported that in the Committee meeting on the previous day Senior Vice President Donald Smith briefly reviewed the 1975-76 history of experience under the Reciprocity Agreement with Minnesota, noting that during that year 4,285 Minnesota students enrolled in Wisconsin institutions and 1,860 Wisconsin students enrolled in Minnesota schools, resulting in a "balance of trade" in excess of \$4 million in favor of Wisconsin in terms of offsetting tuition, a tribute to the drawing power of Wisconsin institutions.

Regent Lavine moved adoption of the following resolution, and the motion was seconded by Regent Sandin:

Resolution 1408: That, upon recommendation of the President of the University of Wisconsin System, the Minnesota-Wisconsin Public Higher Education Reciprocity Agreement for 1977-78 be approved (copy on file with papers of this meeting).

Regent Erdman inquired why Wisconsin residents enrolled in a full-time program in a Minnesota vocational school shall be considered Minnesota residents for tuition purposes, but if they happen to be over 21 years of age, they are liable for their own out-of-state tuition, whereas the reverse is not true of Minnesota students. She was advised that the agreement does not relate to the university system but is an agreement between vocational systems of the two states, necessitated by a Minnesota law.

The question was put on Resolution 1408, and it was voted.

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent DeBardeleben, and it was voted:

Resolution 1409: That, upon recommendation of the President of the University of Wisconsin System, the memorandum of agreement which extends the existing, limited compact between Wisconsin and Michigan (UW Center-Marinette County and Gogebic Community College and Bay de Noc Community College) for the 1977-78 and 1978-79 years, including the 1977 and 1978 summer sessions (copy on file with the papers of this meeting), be approved.

Regent Lavine moved adoption of Resolution 1410 relating to UW System Faculty-Administration Relations (attached as EXHIBITS C and C-1), and the motion was properly seconded. Regent Erdman required if this is a total reversal of Regent policy for faculty governance. She said it was her understanding we had hoped eventually to get a kind of United Council of Faculty opinions and had set up an interim Faculty Consultative Council and now we have a lot of pages describing a group in which we are treading very, very lightly. We even say that this group shall not provide advice. With something like 2,500 faculty members in the System, would we like to hear from each one of them? Regent Lavine responded we are not reversing our policy. The Interim Faculty Consultative Council was highly sensitive to campus autonomy and was set up as a part of the merger law and during the development of the merged system, and wanted to have their own Senate take positions. He said this recognizes what we have been doing and there has been no effort, to his knowledge, on the part of this Board to impose on the part of the faculty a systemwide faculty governance structure. He continued that this seems to be the most appropriate balancing between getting a faculty opinion on the one hand and recognizing campus autonomy on the other.

President Weaver stated that this is a document which has been in preparation for approximately two years with all of the faculties on all of the campuses involved, and this is simply a statement of where we are at the present moment in terms of the relationship between faculty, administration, and the Board as we can best all agree upon it. He said there is a very strong consensus among the campuses of the System that they do not want a faculty body created that does in fact have the kind of legislative powers that the faculties on the campuses do. He noted that the UW-Parkside was the one exception to that attitude. They objected to this not being a stronger statement of systemwide faculty organization. He said he did not consider this a policy of the Board - - it is simply a recognition by all parties concerned that this is where we think we want these relationships to be at this point in time. If, as the System matures to new eras, and we decide that we want to move either up or down in terms of the amount of faculty involvement there is to be, as an organized group, so be it. He felt we have to accept this as a widespread consensus on which we cannot improve at this time.

Regent Lavine noted that Regent Pelisek had stressed that this is not a Regent policy statement, it is really an expression of where we are now. Regent DeBardeleben stated that he was bothered today with Regent Lavine's statement, as he was yesterday with Regent Pelisek's, that it is not a Regent policy statement. He noted we say we assume that the President or the Regents, for example, shall hear faculty agencies and inquired if that means what it says or doesn't it. Regent Lavine responded that he felt the difference is that the Board in passing this does agree to do those things and the faculty has done those things. Regent Lavine stated that this was a consensus among faculty groups and they feel free to come back and change the state of the art as it goes on along the line. The question was put on Resolution 1410 and it was voted.

Regent Lavine reviewed in some detail the extended discussion which had taken place in the Committee meeting on the previous day relating to the policy on collecting religious preference information. The Council of Chancellors has urged that any System policy allow for continued campus autonomy on the matter, a position supported by representatives of campus and off-campus religious groups. Central Administration had recommended that the subject remain a matter for campus rather than System policy, but the Education Committee in December, 1976, indicated that a System policy is needed and requested that one be recommended. He reported Vice President Percy stated that if campus autonomy on the matter is not acceptable, Central Administration would recommend a choice between two alternative resolutions as follows:

2. That official university registration processes, forms and employees shall not be used to collect information other than that required for official business purposes of the Institution. This shall not preclude Institutions from adopting policies which make it possible for recognized student organizations to distribute or gather information on a voluntary basis during the registration period, or at other times.
3. That official university registration processes, forms and employees may, if an Institution chooses, be used to collect and process information from students on a voluntary basis for use by any recognized student organization requesting and paying for such service.

Regent Lavine reported that in the Committee meeting on the previous day, Regent DeBardeleben moved, and Regent Pelisek seconded, that alternative 2. be adopted. Regent Lavine reported appearances were made at the Committee meeting by Paul

Ginsberg, Dean of Students, UW-Madison; H. Gerard Knoche, Lutheran Campus minister, representing University Religious Workers, Madison; Mrs. Catherine Ford (President) and Mrs. John Murphy (President-Elect), Wisconsin Council of Catholic Womern; Peter Gray, Student President, B'nai B'rith Hillel Foundation, UW-Madison; Michael Barry, student, UW-Stevens Point; Anne N. Gaylor, Freedom from Religion Foundation and National Society of Separationists; Rabbi Alan Lettovsky, Hillel Foundation, Madison.

Regent Lavine noted that several times during the questioning of persons appearing before the Committee the matter of making religious information collected available to any person or group who might request it came up. Regent Lavine expressed his concern that the Committee did not have a legal opinion on the question of access by any group to religious preference information that might be collected on registration cards. Regent Lavine reported that in the Committee meeting a roll call vote on the resolution supporting alternative 2. failed on a tie vote, with Regents DeBardeleben and Lavine voting "Aye" and Regent Sandin and Pelisek voting "No".

Regent DeBardeleben stated that since we do not have a legal opinion mentioned by Regent Lavine and because neither the Committee had, nor will the Board have, the recommendation of the Madison Chancellor on this issue, he moved that the entire subject be tabled pending receipt of such legal opinion and the availability of the Madison Chancellor to express his opinion, the motion was seconded by Regent Lavine and it was voted unanimously.

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent Sandin, and it was voted:

Resolution 1411: That, upon recommendation of the President of the UW System and the respective Chancellors, the Board of Regents approves the 1978-79 Academic Year Calendars shown in EXHIBIT D, attached.

Regent Lavine reported that in the Committee meeting on the previous day he noted that the Board two years ago authorized the UW-Oshkosh 7-7-3/7-7-3 calendar on an experimental basis, pending a vote by the faculty after a two-year trial period. He reported that the referendum had been held and that the faculty had voted 235 to 204 to continue the plan. He reported that Ned Kline, President of WEACTION, UW-Oshkosh Chapter of the Wisconsin Education Association Council, addressed the Committee. Regent Lavine said Professor Kline brought the request that the calendar undergo a two-year period of further evaluation followed by another referendum, and that no changes in calendar policy as set forth in a series of calendar papers be undertaken unless the matter is brought to full faculty referendum. He continued that in his remarks Professor Kline indicated that the results of the recent referendum had been influenced by intimidation and the fact that some voted who should not have been allowed to vote and some who should have voted were not permitted to do so. He reported Professor Kline stated his conviction "that correction of either of these factors, that is, intimidation or voting eligibility, would have produced a vote against the calendar". Regent Lavine reported that Regent Pelisek asked Chancellor Birnbaum to respond to the allegations regarding faculty intimidation and improper voting provisions. The Chancellor stated that the running of elections is the prerogative of the faculty senate and its elections committee, that faculty committees had made the voting arrangements and that the original process for voting was faculty-determined

without involvement of the Chancellor's office. Regent Lavine reported that Regent DeBardleben stated that if the allegations are true, formal charges should be brought. However, as allegations they should not influence the Regents in voting on the resolution.

Regent Lavine moved adoption of the following resolution, and the motion was properly seconded:

Resolution 1412: That, upon recommendation of the President of the UW System and the Chancellor of UW-Oshkosh, the Regents approve the continuation of the Oshkosh calendar for an indefinite term.

Regent Lavine made the following statement:

"Concerning the discussion of this agenda item, and the vote taken on it, let me make these points:

1. Members of the Education Committee noted the unsubstantiated and scurrilous nature of the charges made concerning the calendar referendum by Professor Kline, representing the UW-Oshkosh WEAC Chapter. Speaking personally, and yet I am certain for the full membership of the Committee, we found it unconscionable that a member of the faculty would use the public forum provided by the Regents to make such unsubstantiated charges against the faculty agencies and administration of his university, and thus bring such discredit to himself and the group he represents.

"On the basis of the record presented, the Committee has full confidence in the Chancellor, the administration, and the faculty of the University of Wisconsin-Oshkosh.

"2. The unanimous vote of the Education Committee in adopting the resolution concerning the Oshkosh calendar was also an expression of our confidence in the integrity of the process leading to the calendar experiment, the referendum of the full faculty leading to a majority vote to support continuation of the calendar, and, I should add, the substantial contribution made to higher education in Wisconsin and the nation by the efforts of the University of Wisconsin-Oshkosh to develop new and imaginative ways of serving students."

The question was put on Resolution 1412, and it was voted on a roll call vote, with Regents Barkla, DeBardleben, Erdman, Fish, Hales, Johnson, Lavine, Lawton, McNamara, Neshek, Pelisek, Sandin and Walter voting "Aye" (13), with Regents Gerrard, Grover and Thompson absent (3). There were no negative votes.

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent Sandin, and it was voted:

Resolution 1413: That, upon recommendation of the President of the UW System and the Chancellors and Faculties of the Institutions involved, the following new academic programs be approved with an effective implementation date of Summer or Fall, 1977:

UW-Eau Claire	B.A. Criminal Justice
	M.S.E.-Professional Development
UW-Green Bay	Associate of Arts
UW-Madison	M.S./Ph.D. Environmental Monitoring
UW-Milwaukee	Ph.D. Urban Social Institutions

(Continued)

UW-Oshkosh	B.F.A. (Fine Arts)
UW-Parkside	B.S. Industrial and Environmental Hygiene
UW-River Falls	B.F.A. (Fine Arts)
	B.S. Metropolitan Region Studies
UW-Stevens Point	M.S.E.-Professional Development
UW-Stout	M.S.E.-Professional Development
UW-Whitewater	B.F.A. (Fine Arts)

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent DeBardeleben, and it was voted:

Resolution 1414: **That, upon recommendation of the President of the UW System and the Chancellor of UW-Milwaukee, the leave of absence status of Professor Ronald Lingren, Department of Educational Psychology, School of Education, University of Wisconsin-Milwaukee, be continued for the balance of his current term in the Legislature.**

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent Walter, and it was voted:

Resolution 1415: **That, upon recommendation of the President of the UW System and the Chancellor of UW-Superior, authorization to recruit for a Dean, College of Fine & Applied Arts, and Dean, College of Business-Economics at UW-Superior, be approved.**

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent DeBardeleben, and it was voted:

Resolution 1416: **That, upon recommendation of the President of the UW System and the Chancellor of UW-Whitewater, authorization to recruit for an Assistant Vice Chancellor for Academic Support Services and Program Development at UW-Whitewater, be approved.**

REPORT OF THE BUSINESS AND FINANCE COMMITTEE

The report of the Business and Finance Committee was presented by Regent Hales.

Regent Hales reported that Vice President Lorenz reviewed the gifts, grants and U. S. Government contracts, calling attention to some of the major grants considered by the Committee. He noted that receipts are up approximately \$20 million over the comparable period last year, with \$12.3 million of the increase in research, \$5.2 million in student aid, and instruction ahead by \$2.6 million. Federal dollars account for nearly \$18 million of the \$20 million increase. Present projections of year-end figures would indicate that receipts will be up to about \$160 million compared to last year's total of \$132 million.

Regent Hales moved adoption of the following resolution, the motion was seconded by Regent Erdman, and it was voted:

Resolution 1417: That, upon recommendation of the President of the System, the gifts, grants and contracts presented at this meeting (copy filed with the papers of this meeting) be accepted, approved, ratified and confirmed; and that, where signature authority has not been previously delegated, appropriate officers be authorized to sign agreements.

Regent Hales reported two informational reports had been provided by Vice President Lorenz (1) The monthly report on projected General Program Operation balances at the end of the current fiscal year, with the projected balance being approximately \$29,000 higher than it was in last month's report, and (2) a report on the activities of the System internal audit staff consisting of eleven professionals, which assures the integrity of the financial records of the system. Regent Hales stated that in the Committee discussion the thought was expressed that there should be some audits conducted on an unannounced basis as is done in the banking industry. This would complement the scheduled audits.

REPORT OF THE PHYSICAL PLANNING AND DEVELOPMENT COMMITTEE

The report of the Physical Planning and Development Committee was presented by Regent Fish.

Regent Fish recalled that consideration of purchase of land located at 926 West Main Street, Whitewater, Wisconsin, had been deferred in November of 1976 awaiting new appraisals. He said the property has been appraised at approximately \$80,000, and we should be able to secure the parcel for approximately 20% less. The property is in a key location to the campus; the house is currently used for student housing. It is in poor condition, and will be demolished when acquired.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1418: That, upon the recommendation of the UW-Whitewater Chancellor and the President of the University of Wisconsin System, authority be granted to request State Building Commission approval to purchase from 1975-77 advance land acquisition funds previously appropriated by the Legislature, one parcel of land located at 926 West Main Street, Whitewater, Wisconsin.

Regent Fish stated the next request provides for the demolition of a recently purchased major factory structure located in the center of the UW-Oshkosh Campus. It is a 4.7 acre site and will be used for outdoor activities. No construction work would be done on the site.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1419: That, upon the recommendation of the UW-Oshkosh Chancellor and the President of the University of Wisconsin System, authority be granted to plan, bid and construct a Site Clearance Project on the UW-Oshkosh campus at a total project cost not to exceed \$86,250.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1420: That, upon the recommendation of the UW-River Falls Chancellor and the President of the University of Wisconsin System, the President or Vice President and Secretary or Assistant Secretary of the Board of Regents be authorized to execute an easement to the City of River Falls to construct a turn-around needed in conjunction with a street improvement project. The easement across University property involves the following-described land:

A parcel of land located in the E1/2 of the SE1/4 of Section 1, T27N, R19W, city of River Falls, Pierce County, Wisconsin described as follows:

Commencing at the E1/4 of said section 1; thence south (assumed bearing) 1263.91' along the east line of said SE1/4 to the point of beginning, said point of beginning being north 67.10' of the SE corner of the NE1/4 of said SE1/4; thence S40° W 37.80'; thence southerly 99.26' along a 50' radius curve concave easterly whose chord bears S16° 52' 12" E 83.74'; thence north 109.10' along said east line of the SE1/4 and the west line of Sixth Street to the point of beginning.

Containing 0.061 acres (2663 square feet), more or less. Said temporary turn around to be automatically vacated upon street extension.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1421: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authorization be granted to construct the following minor projects at the UW-Madison Experimental Farms at Arlington and at the Dairy Cattle Center on the UW-Madison campus at the costs indicated from College of Agricultural and Life Sciences Receipts:

(1) Emmons Blaine, Jr. Dairy Cattle Center, Arlington, Wisconsin

Three Silos Project at a total cost of \$49,100 (two concrete stave silos and one steel type silo).

(Continued)

(2) Dairy Cattle Instruction and Research Center, UW-Madison

Two Concrete Stave Silos at a total project cost of \$22,600.

(3) Beef Cattle Center (Physiology), Arlington, Wisconsin

Pole Barn Project at a total cost of \$18,500.

Regent Fish stated the next resolution relates to a two-acre parcel which had previously been approved for sale in March of 1976, but the offer had been withdrawn because the parcel could not be rezoned and therefore the prospective purchaser withdrew his offer. He stated we now have a new offer, which is also contingent upon rezoning or the ability to have the parcel annexed to the City of Madison.

Regent Fish moved adoption of the following resolution, and the motion was seconded by Regent Johnson:

Resolution 1422: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authorization be granted to sell one 2.06 acre parcel of land located in the Town of Madison for \$72,500 and that the President or Vice President and Secretary or Assistant Secretary be authorized to sign the appropriate documents. Proceeds from the sale of the property are to be deposited in the UW-Madison Arboretum Trust Account.

This parcel is described as follows:

Part of the Northeast Quarter (NE 1/4) of the Northeast Quarter (NE 1/4) of Section 34, Town 7 North, Range 9 East, Dane County, Wisconsin, described as follows: Commencing at the Northeast corner of said Section 34; thence Southerly along the East line of said section, 498.05 feet to the point of beginning of this description; thence South 89° 55' West 40 feet to an iron stake; thence continue South 89° 55' West, 563.5 feet to an iron stake; thence South 1° 55" West, 162.0 feet to an iron stake; thence North 89° 10' East, 571.0 feet to an iron stake; thence continue North 89° 10' East 40.0 feet to the East section line of said Section 34; thence North 153.94 feet to the point of beginning.

Regent DeBardeleben inquired as to the rationale for selling part of the Arboretum. Regent Fish responded that it is the same as that which we have been going through with the College of Agriculture for expanding in those areas that are logical to expand in and selling off pieces of property that do not fit in the total plan. He recalled that in July of 1974 the Board approved a long-range purchase and sale plan for the Arboretum and it included this parcel, indicating that it should be disposed of because it does not fit in with the plans for the Arboretum. He continued there are several parcels included in the Arboretum that are either isolated or in built-up areas in which there is no value to the Arboretum other than the value of the property itself. He said we could find better purposes for the money by buying pieces of property that did fulfill the Arboretum purpose.

In response to questions, Regent Fish stated that the purchase price was arrived at by two appraisals made a year ago, one of \$72,500 and one of \$83,000; these appraisals being based on the assumption that the property was rezoned. He stated that an apartment building would probably be built on the property and this has been approved by the Arboretum Committee and the Madison Chancellor. Regent DeBardeleben inquired as to the rationale for using a year-old appraisal. Vice President Winter responded that we had great difficulty getting anyone to bid on it, and the offer came from a sign on the property. He said that the sale is based on our previous experience of trying to sell the lot.

Regent Gerrard stated that the economy has turned around completely and did not feel we should be selling anything without current appraisals. Regent Erdman stated that she knew the property very well -- it is very desirable with a park across the street. She also noted that adjacent is the home of the State Journal and the Capital Times and Manchesters is out there, and this is really a growing commercial area. Regent DeBardeleben inquired if the action taken by the Arboretum Committee was a recent action and was advised that it was. Regent Fish inquired if it would meet with the approval of the members of the Committee to withdraw or table the resolution for one month and bring it back next month. Regent Barkla stated she would rather take a chance on a roll call vote.

The question was put on Resolution 1422 and it was voted on a roll call vote, with Regents Barkla, Fish, Johnson, McNamara, Neshek, Pelisek, and Sandin voting "Aye" (7), with Regents DeBardeleben, Erdman, Gerrard, Hales, Lawton, and Walter voting "No" (6), and with Regents Grover, Lavine and Thompson absent (3).

Regent Gerrard stated that he could not understand how the majority of this Board would vote to sell something that they do not know the current value of. He stated there has been a lot of change in this country in the economic picture, especially in the real estate business, and we are selling something because we have a prospective buyer. If the buyer didn't think he was getting a good deal, he would not be a prospective buyer; so we are selling something that we do not know what the current value is, and he felt this is morally wrong.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1423: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, the President or Vice President and Secretary or Assistant Secretary be authorized to execute the following instrument:

In re: Title to Lot Three (3), Block Thirty-four (34), University Hill Farms, Commercial Reserve Addition, in the City of Madison, Dane County, Wisconsin.

At the request of the owner of Lot Two (2), the Anchor Savings and Loan Association of Madison, which has entered into an agreement to purchase the above referenced property, the Board of Regents of the University of Wisconsin System, the successor corporation to the Regents of the University of Wisconsin, hereby consent to the use of Lot Three (3), Block Thirty-four (34), University Hill Farms, Commercial Reserve Addition, for the expansion of the savings and loan operation presently existing on Lot Two (2), Block Thirty-four (34).

(Continued)

This instrument is made for the purpose of releasing a restriction contained in the land contract for said lot recorded August 9, 1962, which required the express written consent of the Board of Regents if said lot was to be used for a Savings and Loan association.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Barkla, and it was voted:

Resolution 1424: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authorization be granted to name the dead-end road leading to the administrative area of the Arboretum Longenecker Drive in honor of the former director of the Arboretum, Professor G. William Longenecker.

Regent Fish reported that there had been considerable discussion in the Committee meeting on the previous day regarding the request that the Veterinary Science-II/Clinical Laboratories/Continuing Education Center be included in the 1977-79 Capital Building Program at a total project cost of \$2,900,000 from General Obligation Bonding. This facility is a part of a three part program recommended by the Governor in his 1977-79 Executive Budget which would (1) support additional stipends for Wisconsin residents to attend area veterinary schools, (2) provide \$900,000 for additional staffing and instructional costs in the Department of Veterinary Science, and (3) provide \$210,000 for debt service to construct a 2.9 million dollar building. He said the Committee felt additional information was necessary, such as the current progress in negotiating additional spaces for Wisconsin residents in area veterinarian schools. He said several on the Committee were concerned that the proposal does not provide any additional veterinary training and were concerned as to whether this would aid or slow down construction of a School of Veterinary Medicine in Wisconsin. He said that members of the Committee wish to again discuss the matter with the Department of Administration and Dean Pound and others to see exactly how this fits and for that reason the matter was tabled in Committee.

Senior Vice President Smith stated there was considerable additional information available at this time and that tabling presented a problem if the Building Commission meets prior to the next Regent meeting without having the decision of the Board available on this matter. Senior Vice President Smith recalled that in the original Regent action the School of Veterinary Medicine was approved if it were through incremental funding to our other budgets. We took the position that it should not constitute something that should be adopted within our regular budget or take resources from other existing programs. At that time a viable alternative was the development of a regional veterinary medicine school. What has developed through the Governor's Office and the Department of Administration is not a regional veterinary school, but the development of an expanded number of opportunities for Wisconsin residents to get veterinary medicine education and expansion of the veterinary science research, diagnostic services, and continuing education. At the present time there is in the Governor's budget a recommendation for providing to the Higher Educational Aids Board contract funding for additional spaces for Wisconsin students at the University of Minnesota and University of Iowa State Veterinary School. Assurances have been received that up to 35 spaces per class can be made available at a contract price from the University of Minnesota not later than 1980, with

the present level of 17 expanding to 25 next year and then up to 35 as they expand their physical facilities. University of Iowa State has indicated its willingness to provide from 8 to 11 spaces, thus making a total of 43 to 46 spaces available when the Legislature funds the proposed contract. The other aspects of the budget proposal have spoken to the question of expanded funding for research and for diagnostic services, and in that relationship for continuing education. The building proposal relates to providing the base for that kind of expansion, which in our judgment is a viable alternative. The question of whether or not it pre-empts development of a College of Veterinary Medicine is a very difficult question. He said it is true, however, that in our proposal for a College of Veterinary Medicine we did call attention to the fact that this kind of development could not provide veterinarians in the State of Wisconsin prior to 1983 at the earliest and that there was need to expand space prior to that time. He said it would be unfortunate if we wound up with expansion of contracting spaces and without providing for extending diagnostic services, research, and continuing education opportunities in Wisconsin.

President McNamara noted that the recommendation comes from the Department of Administration, from the Governor's Office, has the approval of the Madison Chancellor and the President of the University of Wisconsin System. Regent Walter inquired if it is possible to get the diagnostic services and research opportunities by contracting with other states. Vice President Smith responded that we have one of the preeminent centers for veterinary research on the campus at the present time and that we are more of an exporter of significant research on animal diseases than otherwise. With respect to diagnostic services and research he pointed out it is advantageous to be dealing with animal disease problems of your own state and locality and it would be very expensive to try to purchase that kind of assistance from other states. He noted we have and will continue to develop cooperative relationships between Minnesota and neighboring states on continuing education and some services.

Regent DeBardleben inquired if looking at this from an educational standpoint, from the standpoint of our research capability at Madison and our graduate education program, would this be something that would be recognized were it not for the ongoing dispute over whether or not we should have a professional School of Veterinary Medicine? Vice President Smith responded in the positive stating that if we are not to have an immediate decision on a school of Veterinary Medicine which would incorporate expansion of clinical services, diagnostic services and continuing education and research, that would be subsumed. He said it is educationally sound and useful to the State of Wisconsin, so that if you leave a piece of it out at this time, that part is most intrinsic to the development of our own research and diagnostic services in continuing education capability, and that would be a serious hole in the development.

Regent Fish inquired if Vice President Smith's statement was accurate, why then before the request to DOA, at the time that the Capital Budget was being placed in position, why was it not introduced at that time rather than now. Vice President Smith responded that our primary recommendation has been that we think in the next decade the optimal choice would be the development of a School of Veterinary Medicine, but this has gone through legislative examination and was returned with the recommendation that one be built and that somehow we find the money for it. The Regents quite properly took the position that it was not a proposal we could respond to, so we were left with the probability that there will be no affirmative action to fund and develop a school of veterinary medicine. He continued we did not feel earlier that it would be desirable for us to bring forward all the terms of reference for an alternative which we thought would not be optimal alternatives but on the other hand we do have to say that it meets the

terms of reference for responding to needs. In response to questions, Vice President Smith stated that the program for the school was a class of 80 with 60 from the State of Wisconsin whereas the contracting proposal is for 43 to 46 per year. He said if we do not increase the number of veterinarians per year by at least 30, we are in serious trouble and we are not providing even a minimal kind of replacement and service. He noted it is a very expensive form of education and certainly 43 to 46 is not an inconsiderable response. He stated the regional concept is something which he feels could not be brought to fruition, but that elements of the regional concept will continue to be developed with joint research and the sharing of teaching resources when possible. He said the construction that is proposed would be consistent with the placement and location of kinds of facilities that would be needed in the plan.

Regent Lawton inquired if the site for this building is in the long-range plan? Vice Chancellor Borchers responded that the money is to be invested in several different places, both at the Experimental Farm and at the Veterinary Science Building, but both are consistent with the long-range plan. Regent Erdman asked what the \$2.9 million covers. She was advised by Regent Fish that \$1,400,000 would be for construction, \$1 million for equipment for the continuing education center, \$100,000 would be for the semi-isolation building IV, and \$400,000 would be an addition to the isolation building.

Regent Johnson stated that he felt the program had great merit, but that he did not feel we are going to see a School of Veterinary Medicine in the next decade or the following decade if we go into this type of thing. He said he felt it is salve on the wound and we will find some more salve some place down the road, but we are really not accomplishing anything. He said he felt we are already five decades late in this matter and that it is a sad commentary that the funds cannot be found to go ahead to do what we really need.

Regent DeBardleben stated we do have a preeminent research facility in the veterinary science graduate program, and that it would be a shame to hobble that or in any way prevent its progress because we are not getting our way on another issue. He said that would be shortsighted and a mistake.

Regent Fish stated that he was concerned (1) this does nothing to educate new veterinarians for the state; and (2) we are building in a very high construction cost and fairly high programmatic costs; (3) the item has not had the review it ought to have had because it was rushed between cycles; (4) we are not at this time apprised of whether the funding proposal of HEAB will be approved or not. He said it seemed to the Committee members that they were better off tabling the matter until they got better answers to those questions, and we are not faulting anyone for not having these answers, as the time cycle does not provide it.

Regent DeBardleben moved adoption of the following resolution, and the motion was seconded by Regent Lavine:

Resolution 1425: That, at the request of the Department of Administration, and upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, the program for a Veterinary Science-II/Clinical Laboratories/Continuing Education Center be approved and be included as a special item in the UW System 1977-79 Capital Building Program at a total project cost of \$2,900,000 from General Obligation Bonding.

Regent Erdman stated that she was against the resolution because we are hopping to the Department of Administration's tune and that she did not think the DOA should come in to the Board of Regents in advance of our actions on a question and say "We will give you the money if you go along with it." She also objected to saying this is research and if anything is research it is absolutely sacred. She said this is continuing education. She continued that we have a splendid Department of Veterinary Science in the Graduate School and that we are not adding any research by this resolution, what we are adding is a facility for continuing education for existing veterinarians.

Regent DeBardleben stated that he did not feel it fair to say we are hopping to the DOA's tune. The faculty, the Chancellor of the Madison Campus, and Central Administration have all asked for it, and it happens there is some encouragement down town that we might be able to get it. Regent Lawton stated for the record that he looked on this as Phase I of the proposed school and that turning this down would delay the school. Regent Fish stated that it appeared to him that it is a question as to whether adoption of the resolution will aid in Wisconsin eventually getting a school of veterinary medicine or will deprive the state from eventually getting a school of veterinary medicine and he believed that at least three members of the Committee believed it will have a negative effect.

The question was put on Resolution 1425, and it was voted, with Regents DeBardleben, Gerrard, Hales, Lavine, Lawton, McNamara, Neshek, Pelisek, Sandin, Thompson and Walter voting "Aye" (11); with Regents Barkla, Erdman, Fish, and Johnson voting "No" (4); and with Regent Grover absent.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1426: That, upon the recommendation of the UW-Milwaukee and UW-River Falls Chancellors and the President of the University of Wisconsin System, the concept and budget reports be approved and authority be granted to plan, bid and construct the following projects:

(1) UW-River Falls

North Hall Remodeling Project at an increase of \$127,900 for a total project of \$610,600 and the release of an additional \$28,500 of State Building Trust Funds for the completion of design.

(2) UW-Milwaukee

Great Lakes Research Facility--Phase II Remodeling and release of an additional \$29,000 of Advance Planning Funds, for an estimated total project cost of \$706,074 and authority to transfer \$56,074 of previously authorized funding from the Great Lakes Marine Facility (Phase I) project, to this project, to provide for the consolidation of all laboratory construction within a single project.

The source of funds for these projects is General Obligation Bonds.

Regent Fish reported that after considerable discussion regarding renovation of the center portion of Old Main at UW-Stevens Point for administrative offices, it was concluded that additional information from the Department of Administration was necessary before a decision could be made. With the concurrence of the Chancellor, the Committee deferred action for thirty days.

Regent Fish reported that bids for the construction of the three maintenance/stores buildings, at UW-Green Bay, UW-Oshkosh, and UW-River Falls have been received. He recalled that the original budget for the three buildings was two million dollars, but the estimates came in approximately one million dollars high and the recommendation then was to build two of the three buildings. The Committee wanted to build the three but hold to the original estimated cost and as a result negotiated the construction manager type of bidding and supervision for the job. The total square foot cost for construction, not including the design, was estimated on this basis to be \$19.95 and came in at \$19.98 or \$17,000 in addition. There was also an additional \$23,000 representing a state allocation against the project to the Bureau of Facilities Management and some minor construction contingency allowances totalling \$14,000. He noted we actually get 747 more square feet than we had initially bid on, and the total amount of the shortfall comes to \$56,000.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1427: That, upon the recommendation of the UW-Oshkosh, Green Bay and River Falls Chancellors and the President of the University of Wisconsin System, authority be granted to increase the budget for the 1973-75 Maintenance-Stores Buildings projects on the campuses at UW-Oshkosh, Green Bay and River Falls, by \$56,000, for a revised total project cost of \$2,362,300 to be funded from tax-supported General Obligation Bonding.

Regent Fish made the following report on Department of Administration and State Building Commission Action on the UW System 1977-79 Capital Projects Budget:

The Higher Education Subcommittee of the State Building Commission, at a meeting on February 28 and March 1, took action on the Regents 1977-79 capital projects budget request. The full Commission is meeting today to consider final action regarding the request.

The Subcommittee approved projects totalling approximately \$68 million of \$79 million requested. This does not include approximately \$5.5 million of funds contained in the Regent request but incorporated into a state-wide allocation pool for advance planning and energy conservation projects. One of the major changes by the Subcommittee was the approval of a project ceiling of \$24.6 million to complete the renovation of 1300 University Avenue--the present Medical Center Complex. This includes \$3.5 million approved in the 1975-77 Capital Building program, together with \$21.1 million in the 1977-79 Program, of which \$18,750,000 will be state funds and \$2,350,000 non-State funds.

You will recall that the Regents, at our meeting last month, approved \$22 million additionally, over the \$3.5 million appropriated in the 1975-77 biennium to complete this project. The Subcommittee action funded \$21.1 of the \$22 million maximum approved by the Regents in February. This action was based on the report which is included with the report on the Higher Education Subcommittee actions included in our materials.

In summary, the Subcommittees actions were to fund construction of 11 of the 16 major projects requested; recommend that the Main Hall Renovation at La Crosse and the River Front Conservation project at Oshkosh be funded for advance planning and be returned to the State Building Commission for action in the 1977-78 annual budget review; that the Sabin Hall project at Milwaukee be funded for advance planning and be returned for construction funding in the 1979-81 capital budget, and to defer the East Campus Physical Education/Intramural Recreational Facility and King Hall Remodeling project at UW-Madison for consideration in a future biennium.

Four of the 7 major utility projects were recommended for funding. All 5 of the major projects to be financed with non-state funds were approved. Of the \$13.2 million requested by the Regents for Minor Projects, approximately \$7.3 million has received Subcommittee approval.

There was general satisfaction with the actions recommended by the Subcommittee.

Regent Fish reported the Emergency Heating Plant Modifications Project at UW-Milwaukee developed during the recent energy crunch when the school was required to go to alternate fuel. The boiler had been designed primarily to burn gas, using oil about 5 percent of the time. When the school was requested to burn oil for an extended period of time, failure of the heating plant equipment resulted. Authorization of repairs at this time will enable the plant to effectively burn oil during the 1977-78 heating season. In response to a question, Regent Fish stated that it is believed that the plant will be fully operative for oil 100% of the time.

Regent DeBardeleben stated that what he was really concerned about is that we currently also face the probability of the shortage of oil and noted that concern had been expressed whether we should be developing an alternative capability for the use of coal. Regent Fish stated that he did not know what the real answer would be to that question -- to put in a coal utilization plant at that location would have tremendous environmental impact and simply could not be done under present state pollution programs.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1428: That, upon the recommendation of the UW-Milwaukee Chancellor and the University of Wisconsin System President, authorization be granted to plan, bid and construct an Emergency Heating Plant Modifications Project on the UW-Milwaukee campus at a total project cost of \$205,000 from State Building Trust Funds Unprogrammed Surplus.

Regent DeBardleben moved adoption of the following resolution, the motion was properly seconded, and it was voted, with Regents Barkla, DeBardleben, Erdman, Fish, Gerrard, Hales, Johnson, Lavine, Lawton, McNamara, Neshek, Pelisek, Sandin, Thompson and Walter voting "Aye", and with Regent Grover absent:

Resolution 1429: That, in accordance with Section 19.85(1)(c) and 19.85(1)(f), WIS. STATS., a closed session be held to consider personnel matters.

The meeting recessed into closed session at 11:55 A.M.

The Board arose from closed session at 12:16 P.M.

President McNamara announced that the following actions had been taken in the closed session:

Resolution 1430: That, upon recommendation of the President of the System and the Chancellor of UW-Milwaukee, the following persons be awarded Honorary Degrees, to be conferred at Commencement exercises in May, 1977, at the UW-Milwaukee:

Horace Gregory - Doctor of Literature
Marya Zaturenska Gregory - Doctor of Literature
N. Scott Momaday - Doctor of Humane Letters

Resolution 1431: That, upon recommendation of the President of the System and the Chancellor of UW-Madison, the following persons be awarded Honorary Degrees, to be conferred at Commencement exercises in May, 1977, at the UW-Madison:

Oscar G. Mayer - Doctor of Laws
Mary Rennebohm - Doctor of Laws
Arthur Heisdorf - Doctor of Science
Otto Luening - Doctor of Fine Arts
George Molinaro - Doctor of Laws

President McNamara reported that the following resolution had been adopted on a roll call vote, with Regents DeBardleben, Erdman, Fish, Gerrard, Hales, Johnson, Lavine, Lawton, McNamara, Neshek, Pelisek, Sandin, Thompson, and Walter voting "Aye" (14), with Regent Barkla voting "No" (1), and with Regent Grover absent:

Resolution 1432: **That Edwin Young be elected President of the University of Wisconsin System, to take office July 1, 1977, at an annual salary fixed at this time at \$55,120 and subject to adjustment by the Regents through the compensation actions associated with the 1977-78 annual budget. The position shall carry the benefits usual to the office of the President of the University of Wisconsin System, a listing of which is attached as EXHIBIT E.**

President McNamara made the following statement:

"Let me express on behalf of the Board of Regents our extraordinary pleasure that Chancellor Young has indicated to us his willingness to accept this election to the Presidency.

"This moment culminates a search and selection process which began late last September when the Board of Regents authorized me to appoint a 17-member search committee, including representation from the faculty, students, and Chancellors of the System, as well as representatives from the Board of Regents. After an arduous national search, involving at one stage or another the evaluation of some 230 persons, the Regents have joined in an enthusiastic belief that the best person to give us the leadership we need in the years just ahead is Chancellor Young. We know of the respect and affection held for him by colleagues in higher education, both in Wisconsin and nationally. We know of the esteem and affection held for him by literally hundreds of Wisconsin citizens, and leaders in business and industry, labor, agriculture, and government. We are grateful for his willingness to undertake this arduous assignment. He will have our support, the support of his colleagues in higher education, and the support of the people of Wisconsin as he seeks even greater distinction for this excellent University of Wisconsin System, and for its traditions of service to the people of Wisconsin.

"Chancellor Young has asked that I give you his regret that he cannot join with me for this announcement. Our offer and his acceptance came while he was on the West Coast, carrying out a University speaking tour. He has dictated a brief response to our invitation which I would like to read at this time:

"Statement by University of Wisconsin System President Designate Edwin Young:

"I am most grateful for the confidence that the Regents and the Search Committee have placed in me. As head of the UW System I shall do my best to merit that confidence. The difficult task of formally establishing the System is largely behind us, thanks to the hard work of President Weaver and his administration. In the merger legislation and in Regents' policies developed in cooperation with faculty groups, our basic directions have been charted. Working with the institutions, our task will be to constantly refine those goals of autonomy, shared governance, access and excellence, with particular emphasis on providing opportunities for those who in the past have been left out.

"My many years in Wisconsin have taught me that the people of our state cherish and respect their universities and that if we make our case convincingly, they will support us. They have done so for more than a century.

"Soon I will be playing a new role, but it will be among friends I have known well--the Regents who appointed me, and chancellors with whom I have been working for years.

"After nine years as Chancellor at Madison, leaving that post saddens me. As I change positions, I want to thank the faculty, my administrative colleagues, the university's alumni, and friends for their steadfast support in good and bad times. These past experiences of trust and friendship hearten me, and my wife as well, as we take another big turn in the road."

The meeting adjourned at 12:25 P.M.

II. CONTRACT CHANGE ORDERS IN EXCESS OF \$15,000.

- A. 1971-73/1973-75 Mitchell Hall Remodeling
University of Wisconsin - Milwaukee
(Project No. 7206-17)

1. Change Order No. GC-7 ADD \$ 51,819.72

III. REPORT OF ACTIONS TAKEN (MEMOS OF AGREEMENT).

- A. An agreement with Xerox Corporation has been signed for the Board of Regents of the University of Wisconsin System granting to Xerox University Microfilms the exclusive right to produce, promote, sell, and distribute copies of a monograph created by Janet E. Dunleavy and Gareth W. Dunleavy entitled, "A Descriptive Catalog and Surname Register of the Material at Clonalis House."

- B. University of Wisconsin Press:

<u>TITLE</u>	<u>AUTHOR</u>
Five Early American Poets	Jane Donahue Eberwein
A Bibliography of American Autobiography 1945-1975	Mary Louise Briscoe

IV. REPORT OF ACTIONS TAKEN BY THE STATE BUILDING COMMISSION IN
FEBRUARY 1977 AFFECTING THE UNIVERSITY OF WISCONSIN SYSTEM.

<u>UNIVERSITY</u>	<u>PROJECT</u>	<u>ACTION</u>
1. UW-LA CROSSE	Requested allotment of \$20,300 of State Building Trust Funds to plan, bid, and construct a 1975-77 Main Hall Attic Insulation project.	APPROVED
2. UW-MADISON	Requested authority to bid and construct a 1977 Walks, Drives, Bikeways, Lighting, and Sitework stage of the previously authorized and funded \$2,673,350 1975-77 Far West Campus Site and Circulation Development project for an estimated stage cost of \$670,000.	APPROVED

* * *

UNIVERSITY	PROJECT	ACTION
2. UW-MADISON (cont.)	Requested approval of the Concept and Budget Report for the 1975-77 Center for Health Sciences Animal Care Module; authority to prepare final plans, bid, and construct the project for an estimated total project cost of \$1,806,000; and authority to construct the shell portion of the project using negotiated contract procedures with the present CHS contractors.	APPROVED as requested, except authority to use negotiated contract procedures was denied.
	* * *	
	Requested authority to construct the 1975-77 Pharmacy Remodeling and Addition project for a reduced total project cost of \$1,160,674.	APPROVED
	* * *	
	Requested allotment of an additional \$18,800 of State Building Trust Funds for the 1973-75 Clinical Laboratories Ventilation project for a revised total project cost of \$63,800.	APPROVED
	* * *	
	Requested authority to lease 12,000 square feet of space at 6080 McKee Road, Madison, Wisconsin, from Wilton Properties II for the Sea Grant Aquaculture Program from March 1, 1977 to July 1980, with option to renew for two successive one-year periods at an annual cost of \$25,200.	APPROVED
3. UW-RIVER FALLS	Requested authority to increase the budget for the 1973-75 East Campus Environmental Site Development project by \$16,000 for a revised total project cost of \$41,000.	WITHDRAWN by UW-System.
	* * *	
	Requested allotment of an additional \$48,850 of State Building Trust Funds for the 1973-75 Miscellaneous Site Clearance and Development project for a revised total project cost of \$142,750.	APPROVED allotment of an additional \$31,000 for a revised total project cost of \$125,300.

UNIVERSITY	PROJECT	ACTION
4. UW-SUPERIOR	Requested allotment of \$15,500 of State Building Trust Funds to plan, bid, and construct a 1975-77 Main Building/Erlanson Hall Attic Insulation project.	APPROVED
	* * *	
	Requested allotment of \$11,200 of State Building Trust Funds to plan, bid, and construct a 1975-77 Music Annex Roof Insulation project.	DEFERRED with requirement that BFM conduct a study and submit a recommendation not later than 1 July 1977, as to whether the existing building should be insulated or a new building constructed.
5. UW-LA CROSSE UW-OSHKOSH UW-RIVER FALLS UW-STEVENS POINT UW-STOUT UW-SUPERIOR UW-WHITEWATER	Requested authority to: (1) increase the budget for the 1976 Electrical Energy Metering project from \$27,400 to \$76,900;	APPROVED;
UW-EAU CLAIRE UW-GREEN BAY UW-LA CROSSE UW-OSHKOSH UW-PARKSIDE UW-RIVER FALLS UW-STEVENS POINT UW-STOUT UW-SUPERIOR UW-WHITEWATER	(2) decrease the budget for the 1976 Steam Energy Metering project from \$60,100 to \$51,800; and	APPROVED;
UW-EAU CLAIRE UW-GREEN BAY UW-MADISON UW-PARKSIDE UW-STEVENS POINT	(3) decrease the budget for the 1976 Chilled Water Energy Metering project from \$35,200 to \$22,600, for a net increase of \$28,600 in the sum of the total project costs for the three projects.	APPROVED.

UNIVERSITY	PROJECT	ACTION
6. UW-GREEN BAY UW-MADISON UW-PARKSIDE	Requested authority to plan, bid, and construct a 1977 Water Meter Installation project for an estimated total project cost of \$84,900.	DENIED
7. UW-EAU CLAIRE UW-LA CROSSE UW-MILWAUKEE UW-OSHKOSH UW-PLATTEVILLE UW-RIVER FALLS UW-STEVENS POINT UW-STOUT UW-SUPERIOR UW-WHITEWATER	Requested allotment of an additional \$34,400 of State Building Trust Funds and authority to:	DENIED allotment of additional funds, and
UW-EAU CLAIRE UW-GREEN BAY UW-LA CROSSE UW-MADISON UW-OSHKOSH UW-PARKSIDE UW-RIVER FALLS UW-STEVENS POINT UW-STOUT UW-SUPERIOR UW-WHITEWATER	(1) increase the budget for the 1975-77 Electrical Energy Metering project from \$36,600 to \$79,600;	APPROVED increase in budget, as requested;
UW-EAU CLAIRE UW-GREEN BAY UW-LA CROSSE UW-MADISON UW-OSHKOSH UW-PARKSIDE UW-RIVER FALLS UW-STEVENS POINT UW-STOUT UW-SUPERIOR UW-WHITEWATER	(2) decrease the budget for the 1975-77 Steam Energy Metering project from \$125,500 to \$87,900;	APPROVED decrease in budget, as requested;
UW-EAU CLAIRE UW-GREEN BAY UW-PARKSIDE UW-STEVENS POINT	(3) decrease the budget for the 1975-77 Chilled Water Energy Metering project from \$120,900 to \$113,900;	APPROVED decrease in budget, as requested;
UW-MADISON	(4) decrease the budget for the 1975-77 Chilled Water Energy Metering project from \$206,400 to \$132,000; and	APPROVED decrease in budget, as requested;
UW-GREEN BAY UW-MADISON UW-PARKSIDE	(5) increase the budget for the 1975-77 Water Meter Installation project from \$84,400 to \$194,800.	DENIED increase in budget, as requested; and withdrew authority to plan, bid, and construct the previously approved 1975-77 Water Meter Installation project, but allotted a total of \$487,400 for the above four energy metering projects.

UNIVERSITY

PROJECT

ACTION

8. UW-SYSTEM

Requested approval of the Concept and Budget Report for the 1975-77 Great Lakes Research Facility - Phase II Remodeling project, at the University of Wisconsin System Center for Great Lakes Studies in Milwaukee; release of an additional \$29,000 of Advance Planning Funds; authority to prepare final plans, bid, and construct the project for an estimated total transfer \$56,074 of previously authorized funding from the 1971-73 Great Lakes Marine Facility (Phase I) project, to this project, to provide for the consolidation of all laboratory construction within a single project.

WITHDRAWN
by UW-Milwaukee.

Chancellor Edward Fort
University of Wisconsin
Center System

March 11, 1977

UNIVERSITY OF WISCONSIN CENTER SYSTEM ANNUAL REPORT
OVERVIEW REMARKS BEFORE THE UW SYSTEM BOARD OF REGENTS

Mission

The University of Wisconsin Center System epitomizes the character of an institution committed to "The Wisconsin Idea"--a concept which has historically suggested that the boundaries of the University System are the boundaries of the state.

The Center System is designed to provide, on a decentralized basis, access to higher education for numerous segments of the population of the State of Wisconsin. These campuses have been geared to guarantee reasonable class size, immediacy of access, personalized education, and educational opportunities to non-traditional populations. As a matter of fact, when so-called non-traditional students, inclusive of adults, senior citizens, and other locally based citizens, desire the furtherance of their education, it becomes increasingly apparent that significant value is to be found at the doorstep of an institution, within the System, located in a fourteen-campus array statewide. On this basis, the Center System provides access to quality instructional environments of challenging learning, offers regionalized service to commuter populations, and enhances the intellectual and cultural life of this state.

The Students

The institution-specific effort designed to maintain an access to quality education for Wisconsin citizens, who might not otherwise be able to further their education, is clearly a particularized objective of this unit. Our campuses, as a matter of fact, extend to the rural, less populated areas of the state, providing the citizenry with the option of initiating a college program in a home setting. Relatively speaking, our studies have discerned the fact that there are three basic kinds of students whom we serve: (1) the full-time students who plan to complete a baccalaureate degree and who are taking the first two years of their program at a Center campus prior to transferring to a four-year receiving institution; (2) students who are engaged in part- or full-time employment, and who have a desire to work toward a college degree as time and money allow; (3) students who are not seeking a degree, but are interested in self-enrichment and/or professional advancement.

It is interesting to note, in relationship to the profile of our student body, that in examining the results of a recently completed transfer study, designed to determine the 1976 "transfer situation" of a random sample of students who were enrolled in the Center System in the Fall of 1973, the following is discerned: After leaving the Center System, 60% of those responding to the survey had transferred to higher educational institutions--29% to UW-Madison, 18% to UW-Milwaukee, 13% to UW-Oshkosh, 18% to other UW System institutions, with 22% going to other institutions of higher education. Approximately 80% of these transferees gave the Center System campuses high marks with regard to their overall evaluation/assessment of the academic preparation provided by these campuses. Statistical evidence contained as a part of the transfer study also denotes that levels of achievement attained by these students were equal to or even greater than that experienced while members of our institution.

Faculty

The faculty of the Center System constitutes a highly qualified group of professionals who have demonstrated an exemplary dedication to teaching students in small personalized classroom environments. The faculty is young, with the average age being 40. In excess of 36% of the faculty hold doctorates, and more than 25% of teaching staff are women. Within the ranks of this impressive array of professorial personnel are scholars who have amassed national reputations on the basis of their contributions to the various disciplines inclusive of the biological sciences, the social sciences, foreign language and the arts. Further, the faculty has played a pivotal role in assuring that the outreach mission of the Center System is and continues to be accomplished.

Sense of Accomplishment

(1) New Governance Structure/Constitution

Clearly, the overview of this institution, as just depicted before us on the screen, pretty well conceptualizes some of the major thrusts which we feel have not only been accommodated, but also have formed the basis for the kind of programmatic, organizational, and political gains which, hopefully, we have experienced during the past year. Institutionally, the unit has gained a new governance constitution, one unanimously approved by the Board of Regents in January 1976, and which identifies a level of shared governance between the Chancellor, deans, faculty, departmental chairpersons, and academic staff which is unique in the University of Wisconsin System.

(2) Preparations for North Central

Preparations for the North Central accreditation visitation were completed, and the on-site visitation occurred in October 1976. All indications lead us to conclude that the report will be favorable.

(3) Program Audit and Review

This procedure, initiated over more than a year ago by the institution's faculty, is currently being implemented and refined. Based upon the intensified ongoing activity of the senate's curriculum committee, program definitions and audit/review criteria have been examined carefully with Center System faculty, deans, and the senate itself, as well as departmental chairpersons. The identification of audit criteria, flagging mechanisms attached to same, and analyses related to strengths and concerns of specific programs, are being undertaken in a committed and personal manner by the institution's faculty.

(4) As I indicated to the Regents last month, a liberal arts core curriculum has been developed to detail the scope of curricular breadth and depth necessary for a liberal arts transfer institution and to identify an educational criterion of curricular quality to supplant the assignment of a 250 minimum FTE enrollment level, institutionally.

(5) Remarkable efforts of the Center System to achieve cost effectiveness have had positive results:

(a) Since 1972, the institution has effectively decreased the CSI over 7%. The most recently available comparable CSI figures for the University System reflect 1975-76; these figures show that the Center System CSI was only 10% higher than the average of the University Cluster, and for 1976-77, while the Center System GPR budget accounts for only 3.5% of the total UW System GPR budget, the enrollment of the Center System represents 6.2% of the total System enrollment.

(b) A significant step toward more effective and efficient resource allocation in the Center System has taken place and the Chancellor reallocated funds internally to meet most pressing instructional needs at under-funded Centers and distributed supplies and expense budgets more equitably. The average difference between the Center campuses' CSI levels and the mean CSI for the Center System is now +9%; immediately after merger in 1972-73, the average difference among Centers was +20%.¹

(6) Additionally, as suggested in the earlier film presentation, our institution has developed a number of initiatives in many special programs/service areas.

Challenges for the Future

The gubernatorial and state mandates impacting upon the Center System, as designed to examine campuses for possible phasing down/phasing out/consolidation have impacted and will continue to impact negatively upon morale and even productivity within the Center System.

For the future, however, the Center System is seriously determined to achieve the atmosphere of security necessary to the continued maintenance of educational excellence. This institution's grappling with austere budgets is, to be sure, further complicated by "economy of scale" concerns as well as by the widely differing and divergent local funding needs as perhaps determined by such variables as (1) salary differences; (2) physical plant cost differences; (3) varying mixes of permanent and ad hoc staff; (4) travel costs; and (5) differences in program specialties, pre-major variances, and local priorities.

As I indicated in speaking to the Regents a month ago, perhaps one of the greatest challenges is that concerned with the CSI. As cautioned, for example, in Senior Vice President Smith's report before the Regents in his December 8, 1976, DOA Issue Analysis Specification Paper on the Center System: "The small size of individual Centers requires caution in evaluating any 'efficiency' measure such as the CSI or cost per student (although small size cannot justify inattention to efficiency concerns). A relatively small change in budget or enrollment may appear to represent a significant change in 'efficiency' indicators for small campuses; at Medford, the most extreme case, head enrollment gain of 20 FTE above projected levels for next Fall would decrease the cost monitoring indicator by 14%."²

Because campus enrollments may vary considerably from year to year, the composite support index of a campus can exhibit apparently inordinate fluctuations. For a larger campus, small increases or decreases in enrollments have and will produce minimal changes in the CSI. However, on smaller campuses, small variations in enrollment have and will drastically affect the CSI. The whole exercise becomes a yo-yo, and it renders impossible efficient 2+2 planning.

In the area of non-traditional student needs, the Center System will increase endeavors as concerned with basic skills, minority/disadvantaged program development, and extended degree involvement in order to accommodate the unique and specific needs of increasing numbers of non-traditional students who are and will be served by this institution. The currently existing pilot endeavors which have been operationalized on the campuses of Waukesha and Rock clearly exemplify the kinds of thrusts which we anticipate in the years ahead. The question here remains one of availability of funding necessary to "get the job done".

1. Senior Vice President Smith's December 8, 1976 report to the Regent Education Committee re "DOA Issue Analysis Specifications: Center System", page 4.
2. Ibid. p. 4

The continuing challenge to develop outreach and community services will be met; and the development of the physician assistant and nursing programs will be supported in order to meet student needs in these pre-professional areas. Our main concern now with regard to the P.A. program is whether or not the gubernatorial directive excising portions of this funding support can be overridden by the State Legislature. Clearly, the challenge ahead is one of maintaining the pre-professional endeavors of the institution in these science fields.

Finally, the inter-institutional linkages which have been developed between the Center System, UW-Extension, VTAE and the four-year System institutions must be maintained and expanded, in order to enable the Center System to continue meeting student needs and programmatic challenges for the decades ahead.

Conclusion

Merger within merger fused seven former UW Centers, four WSU branch campuses, and three UW-Green Bay branch campuses into a single institutional composite--designed to provide quality transfer education to those students wishing to pursue a liberal arts post-secondary education. Notwithstanding the mandated budgetary retrenchment, the ongoing challenge of ameliorating questions concerned with the issue of salary equity, and aside from the continued problems related to the difficulties inherent in the use of CSI for the monitoring of small campus expenditures, we shall continue to offer a viable quality program and to meet, simultaneously, our commitments to cost effectiveness, administrative stability, community service, and the implementation of programs which are accessible to all motivated students.

We have faith in the future of our institution. The faculty and the administration believe that this institution has a significant role to play in the post-secondary education scene in Wisconsin. And we are convinced that we can and will serve our constituents, our mission, and the University System in an effective, creative, and forward-looking manner.

JB

UW System Faculty-Administration Relations

EDUCATION COMMITTEE

Resolution 1410:

That, upon recommendation of the President of the UW System and the faculty governance bodies of the UW System institutions at Eau Claire, Green Bay*, La Crosse, Madison*, Milwaukee, Platteville, River Falls, Stevens Point, Stout, Superior, Whitewater, Center System, and Extension*, the Regents approve the statement, as amended, entitled "UW System Faculty-Administration Relations."

In taking this action, the Regents observe that the statement should serve to clarify the current wishes of the majority of the faculties of the Institutions of the System as to the relationship with Central Administration and the Regents which they prefer. It should further clarify for the faculties, the administration, and the Regents the consultative procedures to be observed in the development of policies and procedures by the System which materially affect the responsibilities and interests of the faculties.

The Regents further observe that this statement is not a formal policy statement by the Regents affecting in any legal or material sense the definitions of powers and responsibilities of the Regents, faculties, Chancellors, President and students as specified in Chapter 36, Wis. Stats. Rather, it is a description of mutual responsibilities now accepted by the faculties, the Regents, and the administration concerning their relationships with one another.

*University Committee approval.

UW SYSTEM FACULTY-ADMINISTRATION RELATIONS

Chapter 36, Wisconsin Statutes, delegates to the faculty "primary responsibility for academic and educational activities and faculty personnel matters." It also provides for the participation of faculty in the general governance of their institutions and empowers them to organize themselves in the manner of their choosing to discharge both their primary and consultative responsibilities.

Since merger, the faculties of the several institutions have without exception organized themselves at the institutional level in ways designed to carry out their responsibilities under state law and Regents and institutional policies. However, questions have repeatedly arisen concerning the assumptions, principles, and operating procedures that would effectively relate faculty governance bodies organized at the institutional level to Central Administration and the Board of Regents. Since 1971 these questions have been addressed through a variety of informal understandings and arrangements. In 1973 the Board of Regents, upon recommendation of President Weaver, established the Interim Faculty Consultative Council. This body, consisting of representatives or designees of the senates, university committees, or senate executive committees of the several institutions, has served as a link to support better communication between the System and the institutional faculties.

While these arrangements have worked reasonably well in most situations, they suffer from two inherent disabilities: (a) they do not provide a formal statement of the "appropriate procedures" for faculty-administration relationships in System policy development and decision-making; and (b) they have not undergone any formal process of discussion and ratification by the faculty senates. This promotes continuing ambiguity as to whether or not these arrangements represent the ways in which the faculties wish to relate to Central Administration and to the Regents. During the past year Central Administration, faculty senates, and voluntary faculty organizations have brought forward proposals concerning formal organization at the System level. The following document represents the emerging consensus on this question.

I. General Principles

A. Decentralization and Institutional Autonomy

Consistent with the intent of Chapter 36, Wisconsin Statutes, the faculties of the UW System believe that the formal agencies of faculty governance should exist at the institutional level. The faculties do not seek any continuing formal agency of faculty governance at the System level. When faculty judgment concerning a particular policy or procedure of the System is sought on a Systemwide basis, it should be sought separately from each institutional senate (or the executive body or agency delegated to act for it) and from voluntary inter-institutional faculty organizations.

It should be emphasized that the System is a federation of institutions, each of which enjoys the maximum autonomy consistent with the statutory responsibilities of the Regents and the President for statewide planning and coordination of Wisconsin higher education. It is proper that each institution

should speak with its own voice on matters of Systemwide policy and procedure, and it is recognized that frequently there cannot be a single voice speaking for all of the faculties of the several institutions. When discord concerning a matter requiring Systemwide resolution exists among the faculties, resolution must be undertaken by the Regents in the best interests of higher education.

B. The Roles of Chancellor and Faculty

Consistent with the principle of decentralization, the statutes designate the chancellors as executive heads of their respective faculties and institutions, and each faculty as responsible for the immediate governance of the institution with primary responsibility for academic and educational activities and faculty personnel matters. The statutes place with the chancellors the direct and major responsibility for consultation with their faculties. As heads of their faculties, the chancellors are expected to report to Central Administration and the Board of Regents the positions and actions of their faculties as these affect the development or implementation of System policies or decisions.

Heads of faculty governance bodies or interinstitutional faculty organizations should at their request be heard directly by the President and by the Board of Regents on matters that concern the faculties. Faculties, while maintaining these rights of direct communication with the System, normally consult with their chancellors on matters of System policies or procedures. Chancellors have the responsibility for informing their faculties concerning System developments; for facilitating their participation in such developments; and for communicating the views of their faculties to Central Administration and the Regents.

C. Consultation with the Faculty

The Board of Regents, Central Administration, and the chancellors commit themselves to the principle that on matters of Systemwide policy and procedure there shall be full consultation with the faculties and their representatives. Adequate time must be provided for review by the institutional faculties prior to action upon or implementation of any Systemwide policy or procedure. It is recognized that all major System policies are likely to impact on the responsibilities of the faculties.

The Board of Regents, Central Administration, and the chancellors have the responsibility to take all practical steps to ensure that the institutional faculty governance bodies, other agencies delegated to act for them, and insofar as possible the faculties generally, are informed concerning System policy developments. Faculties should also be kept informed of avenues available for participation in policy developments, and of the time and place of consideration by the Regents of the policy at issue, or for decision by Central Administration on matters not requiring Regents action.

D. Systemwide Task Forces

The President or Central Administration may from time to time find it useful to establish Systemwide ad hoc task forces or study groups. Such groups should be used sparingly, to address issues that are Systemwide in nature of that affect several institutions in the System. Task forces or study groups do not create policy or replace the established roles of faculty governance bodies at the institutions.

II. Procedures

A. Consultation with the Faculty on Policy or Procedural Development

1. Time for Consultation. All System documents representing new or changed policies, procedures, guidelines, or directives relating to matters specified by statute or Regents' action as among the governance duties of the faculty, shall normally be sent directly to the chancellor and to the executive officer of the faculty senate of each institution no less than two months prior to the time of proposed action thereon, except that:

If the communication occurs between April 1 and August 1, ordinarily no final action shall be taken on the matter until October. If a document must be implemented or brought for action pursuant to implementation in a period of less than two months, Central Administration shall request more rapid response from the chancellors and the faculties, while explaining the reasons for this request. It is assumed that the faculties will organize themselves in ways permitting unusually rapid review and reaction to documents when necessary. It is further assumed that the President or Regents shall hear faculty agencies protesting a request for quick response on the grounds that the reasons for emergency response are not compelling.

2. Testimony on Regents Agenda Items. As a matter of policy, the Board of Regents welcomes testimony from faculty members as individuals, from faculty governance agencies of the institutions, or from voluntary associations of faculty members or their agencies, on any matter placed on the Board agenda for discussion, or for discussion and action.

a. To expedite consideration of the widest range of opinion, the Regents ask that such testimony insofar as possible be submitted in writing in advance of the meeting at which the matter is scheduled for Regents discussion. Such written testimony should be sent to the Secretary of the Board for distribution to the Regents and to relevant officers of the institutions and of Central Administration.

b. Insofar as possible, requests to give oral testimony before a Board committee or the Board concerning an agenda item should be made to the chairperson of the appropriate committee or to the President of the Board prior to the meeting. The request should state the item concerning which testimony is to be offered, and the agency, if any, to be represented by the person wishing to testify.

Requests to present oral testimony will be honored at the discretion of the chairperson of the committee or the President of the Board. In general, such requests from faculty senate or faculty executive committee chairpersons, or from representatives of major voluntary organizations of the faculty, or from individual faculty members, will be honored. Regents committee chairpersons and the President of the Board reserve the right to stipulate the time that can be made available to any person making oral presentations, and to constrain testimony that is irrelevant or unduly repetitive of material already before the Board or committee.

c. To facilitate oral testimony or written presentations by faculty, the Board and Central Administration will observe the following procedures:

(1) When matters of policy or procedure that affect the concerns of the faculty are proposed for Board consideration, information about the time and place of the committee meeting at which the matter will be considered will be sent to chancellors, and to the executive officers of faculties and of agencies delegated to act for them, at least 30 days prior to the meeting.

(2) In the event of a failure to provide such information in a timely way, consideration of the matter at issue will be delayed for a month if possible; if not, emergency inquiry will be made concerning faculty interest in providing testimony between the time of distribution of the Board agenda and the convening of the relevant Regent committee.

B. Formation of Systemwide Task Forces and Study Committees

1. Appointment Procedures. In constituting task forces and study groups, the President or a designee of the President shall solicit nominations from each chancellor with the stipulation that the chancellor shall consult with the institutional faculty prior to forwarding the names. A brief description of the qualifications or expertise of each nominee shall accompany the nominations. While the President will solicit a certain number of nominees from each institution, the institution may provide fewer names if it so chooses. When the task force is appointed, the President shall announce its membership to the chancellors and to the executive officers of the institutional faculties.

2. Membership Considerations. It is assumed that Systemwide task forces or study groups, in order to carry out their work efficiently, may not always provide for representation from all institutions of the System. In constituting such groups, Central Administration shall give consideration to: (a) the established expertise of the nominee in relation to the topic under consideration; (b) the desirability of a balance in the institutional representation on the task force, and on other recent task forces; (c) the desirability of rotating participation in System affairs among different members of the faculty; and (d) the importance of including significant numbers of women and of under-represented racial/ethnic groups.

3. Institutional Review of Reports and Recommendations. The President shall circulate copies of all Systemwide task force reports to all institutions for review and comment. When such reports are submitted to the Regents or to outside agencies, the President shall include a summary of institutional reactions.

C. Systemwide Meetings with Institutional Faculty Governance Representatives

1. Definition of the Systemwide Group and its Schedule. To improve communication with faculties and their governance agencies, the President shall schedule during the academic year regular meetings with institutional faculty governance representatives from each institution of the System. The faculty of each institution is expected to designate a representative to attend such meetings.

Meetings are ordinarily scheduled on the Tuesday of the week preceding meetings of the Board of Regents, except that in the absence of an agenda sufficient to justify a meeting, the President may cancel any meeting. The President may schedule special meetings on his/her own initiative, or at the request of faculty representatives. At the initiative of the President, meetings are held either by assembling the group in one location or by use of teleconferences.

2. Purposes of the Meetings. Meetings with faculty governance representatives are intended to facilitate communication between System officers and institutional faculties. They provide an occasion for the President or a member of his/her staff to explain policy proposals going to the Board of Regents, and to respond to questions concerning such documents; for institutional faculty representatives speaking as individuals to offer suggestions concerning such proposals; and for institutional faculty representatives to bring to the attention of Central Administration matters of Systemwide concern, or of special concern to their institutions.

Items may be placed on the agenda of each meeting either by Central Administration or by any institutional faculty representative designated to attend the meeting. Upon its own initiative or at the request of any institutional faculty representative to the group, Central Administration will duplicate documents pertinent to an agenda item, and assist faculty in the development of pertinent data.

Upon their own initiative or at the request of the President, each institutional faculty representative will undertake to bring to the attention of his/her faculty information and perspectives discussed at the meetings.

As a special order of business, Central Administration may request faculty serving as members of the group to bring to a meeting information on the status of documents circulated for review by the faculty governance body of each institution. In the presence of such a request, it is the responsibility of the representative attending the meeting to be prepared to express faculty reactions at his/her institution on the question being addressed. However, the group of institutional faculty governance representatives shall not provide advice or take a position on any issue in the name of the group.

D. Communication with the Faculty

1. Distribution of Regents Agenda. The Board of Regents office shall distribute the full or outline agenda for each meeting of the Board of Regents to the chancellors; to the executive officer of each faculty senate; to other agencies designated by the faculties to act for them in governance matters; and (where such persons are different) to the faculty members designated to act as institutional governance representatives at Systemwide meetings. Faculty organizations other than those specified above may request placement on the agenda distribution list, by written request to the Secretary of the Board; the President of the Board shall determine the response to such requests.

It is the responsibility of faculty senate presidents or chairpersons, and (where such persons are different) of the faculty members designated to act as institutional governance representatives at Systemwide meetings, to communicate information on Board agenda items of interest or concern to particular agencies or members of their faculties. It is the responsibility of each institutional faculty to determine the means of communicating such information.

2. Distribution of Regents Minutes. The Board of Regents office shall distribute the summary minutes of meetings of the Board and its committees to all faculty members or agencies included on the distribution list for Regents agenda. Responsibility for distribution of minutes within each faculty rests with the institutional faculty.

3. Public Availability of Board Agenda, Minutes, and Policies. The Board of Regents office shall distribute to the library of each institution copies of each Regents agenda, and full minutes of the meetings of Board and of its committees. These agendas and minutes shall be maintained by each institutional library at a place to be made known and available to all faculty, staff, and students.

4. Direct Communication with Faculty by Central Administration. Central Administration shall maintain one or more regular publications distributed to all faculties of the System, and shall use these publications to inform faculty about the time and place of impending hearings or Regents discussions of policies and procedures that concern the faculty. Central Administration shall distribute, in full or summary form, information on important policy and procedural actions taken by the Regents or by Central Administration.

The senior officers of Central Administration welcome opportunities for direct conversation with faculty senate executive committees, or to address faculty senates upon invitation by these groups and their institutional chancellors. Direct communication with senate presidents or chairpersons is welcomed as a means for improving understanding of the intent and interpretation of System policies and procedures or regarding matters on which the institutional faculty and chancellor may have differing viewpoints.

Benefits provided for the Office of President, University of Wisconsin System

- . The President is provided with a furnished home and maintenance by the University.
- . The President has available a car for official use, and services of a driver when needed.
- . Support for official entertainment and travel, and other special needs associated with the Office of President is provided through a "President's Fund," managed by the Foundations of the Institutions of the System. This Fund, which is currently budgeted at \$10,000 annually is maintained through private giving rather than state funds.
- . The President also has jurisdiction over a fund consisting of unrestricted gifts to the UW System, and used within guidelines established by the Board of Regents for specific educationally oriented programs or emergency type situations which would not ordinarily be met through state funds. The current balance in this fund is approximately \$35,000.
- . The President receives the fringe benefits provided for state employees in the state Executive Pay Plan. These include:
 - Comprehensive health maintenance and protection insurance, with major cost carried by the state under provisions of the State employe benefits program. Catastrophic health insurance is also available with full costs carried by the employee.
 - Life insurance with state participation in the costs.
 - Retirement benefit under the plan for state employees in the Executive Pay Plan, with benefits available at age 62.
