ANNOUNCING: a NEW antidiarrheal for more certain control of virtually all diarrheas

Addition of neomycin to the effective DONNAGEL formula assures even more certain control of most of the common forms of diarrhea. Neomycin is an ideal antibiotic for enteric use: it is effectively bacteriostatic against neomycin-susceptible pathogens; and it is relatively non-absorbable.

The secret of DONNAGEL WITH NEOMYCIN's clinical dependability lies in the comprehensive approach of its rational formula:

DONNAGEL[®] WITH NEOMYCIN

ANTIBIOTIC - ADSORBENT - DEMULCENT - ANTISPASMODIC

COMPONENT in each 30 cc. (1 fl. oz.)

Neomycin base, 210.0 mg.
(as neomycin sulfate, 300 mg.)

Dihydroxyaluminum
aminoacetate (0.25 Gm.)

Natural belladonna alkaloids:
