## CHEMIST'S ANALYSES

HON. J. Q. EMERY,  
Dairy and Food Commissioner,  
Madison, Wisconsin.

SIR:

During the period from July 1, 1906, to Dec. 31, 1906, 940 samples of foods were analysed in the laboratory of the Commission, of which 421 were pronounced unlawful by reason of being adulterated or misbranded. It should be emphasized that these figures and those given in the appended summary do not by any means represent the true conditions of the Wisconsin market. In most instances only such samples are sent to the laboratory for analysis as are suspected of being adulterated.

Respectfully submitted,

RICHARD FISCHER, Chemist.
