WISCONSIN DAIRY STATISTICS FOR THE YEAR 1921

	Pounds	Received for or valued at
Cheese produced in factories, other than cottage, skim milk, primost, cooked, butter milk and cream cheese	298,732,969	\$53,007,048.06
Cottage, skim milk, primost, cooked, butter milk and cream cheese.....	4,495,963	214,886.10
Cheese produced on farms.....	308,117	98,599.00
Butter produced in factories.....	138,693,322	57,001,852.05
Farm made butter.....	8,666,037	4,733,556.00
Condensery products:		
Evaporated, condensed, powdered, concentrated milk and evaporated cream	423,100,003	34,367,837.26
Evaporated, concentrated, powdered and condensed skim milk and compounds	25,929,094	982,502.14
Value of milk used in manufacture of malted milk, etc.....		580,967.38
Ice Cream (gallons)	5,950,556	6,166,325.64
Milk produced other than that furnished cheese factories, butter factories, condenseries, and ice cream plants (pints).....	960,621,235	28,818,637.05
Skim milk	2,550,955,989	7,142,676.77
Whey	2,567,407,785	3,594,370.48
Estimated value of milk and cream shipped to Chicago, St. Paul, Minneapolis, Dubuque, and other points outside of Wisconsin.....	250,394,650	4,118,991.99
Total.....		\$200,828,249.92

According to the figures given out by the Wisconsin Monthly Crop and Live Stock Reporter issued by the United States Department of Agriculture, and the Wisconsin State Department of Agriculture, the average price received by producers for milk in 1921 was \$1.645 per hundred weight and the average production per cow in 1921 was 4,865.7 lbs. The average number of cows in 1921 was 1,802,290. At the average production of 4,865.7 pounds of milk per cow during the year 1921 there was produced 8,769,402,453 pounds of milk.

The data for cheese, butter, condensery products and ice cream were obtained from blanks filled out by the operators of these plants.

The figures used for cheese and butter produced on farms were taken from the fourteenth census of the United States for 1920.

The value of milk produced other than that furnished cheese and butter factories and condenseries and ice cream plants was estimated as the amount used for family consumption by the total population of the state, which population is taken as 2,631,839 (census for 1920).

In estimating this amount, one pint per capita per day was used and the milk valued at 3 cents per pint.

In obtaining the estimate for the value of milk and cream shipped to Chicago, St. Paul, Minneapolis, Dubuque and other points, the number of pounds as reported in the bulletin of Wisconsin Dairy statistics for 1919 was used and the value of such milk was placed at \$1.645 per hundred weight, being the value reported by the Wisconsin Monthly Crop and Live Stock Reporter.

Skim milk was valued at one-half as much per hundred pounds as shelled corn is per bushel; and the value of whey at one-half of skim milk. The value of shelled corn was placed at 56 cents per bushel, being figures given by the Crop and Live Stock Department at Washington, D. C.

In 1921 the total production of cheese in Wisconsin was about 2.8 per cent less than the total production in 1919. At the same time, the total amount received for cheese in 1921 was $41\frac{1}{2}$ per cent less than the total amount received in 1919. The total amount of butter produced in Wisconsin in 1921 was $41\frac{1}{2}$ per cent more than the total amount of butter produced in 1919. At the same time, the total amount received for butter in 1921 was only 6.2 per cent more than the total amount received in 1919. Owing to the great slump in the price of corn in 1921 from the price in 1919, (the basis for estimating the feeding value of skim milk and whey), the estimated feeding value of skim milk and whey for 1921 is about 60 per cent less than that for 1919. These figures disclose the tremendous slump in prices for these items sustained by the farmer; that while there was an increase in the total aggregate production of factory cheese and butter, there was an enormous slump in the price received for the same.

Following is a tabulation by counties of statistics for cheese and butter factories in Wisconsin for the calendar year 1921 as compared with the years 1915, 1917, and 1919 and a tabulation showing the number of pounds of American, Brick, Limburger and Swiss cheese by counties as well as the value of cheese, cottage cheese, butter and other dairy products which includes condensery products, ice cream, skim milk and whey.

County	Number of pounds of cheese				Value of all dairy products excepting milk produced other than furnished to cheese and butter factories, condenseries and ice cream plants, Value of milk and cream shipped outside of the state, and cheese and butter made on the farm				
	American	Brick	Limburger	Swiss	Cheese (not including cottage etc.)	Cottage, skim milk primost, etc.	Butter	Condensery products, ice cream, whey, skim milk	Total
