ANGINA PROTECTION AND MORE

—WITH SIMPLE,
ONCE-DAILY
DOSAGE

The cardiovascular protection of INDERAL—for simplified core therapy in angina

Once-daily INDERAL LA (propranolol HCl) adds simplicity and convenience to the therapeutic benefit of INDERAL in the long-term treatment of angina.

INDERAL LA provides smooth, 24-hour beta blockade with single daily dosing—to reduce the frequency and severity of anginal attacks around the clock. As core therapy, INDERAL LA is compatible with other conventional antianginal therapies.

Like INDERAL tablets, INDERAL LA should not be used in the presence of congestive heart failure, sinus bradycardia, heart block greater than first degree, or bronchial asthma.
