MADISON, WIS., THURSDAY, MARCH 17, 1922

PRICE 5 CENTS

ENGINEERS IN SAINT PATRICK FROLIC TODAY

Burst Into Print In Celebration of Patron's Birthday

POSTPONE BIG PARADE

"St. Patrick was an engineer," shout the engineers from the house tops today.

"Bah," answer the lawyers; but still the engineers proclaim, "St. Patrick was an engineer, he was, he was—."

The commotion is all the result of the desire of engineers to "whoop it up" on March 17, the birthday of the venerable old saint, St. Patrick, revered in the memories of Irishmen.

Postpone Parade

Tomorrow had been set for the annual Engineers' parade, but an offer by the Madison Chamber of Commerce to take part in Madison's Spring Opening celebration, March 25, persuaded the sons of St. Pat to postpone their annual frolic until a week from Saturday. As a result the engineers are celebrating the day by breaking into print.

Madison merchants are depending on the engineers to help entertain a big influx of out of town guests on March 25. Several thousand visitors are expected on that date, many of whom will see St. Pat's sons on parade for the first time. The parade has been advertised throughout the state as the central feature of the celebration.

Many fraternities as well as all the engineering societies are planning novel features for the occasion. The mechanicals will undoubtedly lead the parade. The Engineering band, fifty strong, led by Jack Leonard '23 will vie with the saxophone sextette to win musical honors.

Give Hint of Stunts
An engineer, hinting at what might come in the parade, said yesterday:

"Remember those canes of the Law school, and the aristocratic airs that went with them; the big fuss (Continued on Page 8)

Kommerce Kaper To Close Activity Week

The Kommerce Kaper in Lathrop gymnasium Saturday night will close the All-Commerce week activities. Thompson's eight-piece orchestra will furnish the music and "Doc" Dorward '23, "Duke" Dorsey '23, and Dave Mahoney '22 will entertain with a skit of songs and dances.

The Kaper is the big annual event of the Commerce college, and the committee in charge promises a real treat in the way of novel entertainment. The affair is not for commerce students only, but all university students and faculty members are invited to attend. Tickets may be bought for \$1.50 in Sterling hall.

Mary Baldwin Will Lead Skating Hike

A roller-skating party and a bird-hike are planned for Outing club activities this week end. Mary Baldwin '23 will head the roller-skating group Saturday afternoon at 4 o'clock. Those who plan to go must sign in Lathrop.

Louise Cover '23 will lead a party at 6 o'clock Saturday morning for a hike along the lakes and into the country. Those who plan to go are asked to meet at Lathrop and to bring field glasses.

CLOSE INTERCOLLEGiate DEBATES AGAINST ILLINOIS AND MICHIGAN

COLLEGES HERE MORE CULTURAL THAN IN FRANCE

—CESTRE

Lauds Campuses as Beauty Spots; Explains His Mission

"The universities of America are more cultural than those of France, in fact the cultural aspect of college life is purely American," announced Prof. Charles Cestre, formerly of the University of Paris, in his talk to the instructors of the English and French departments at a tea given in his honor at Lathrop parlors Thursday afternoon.

Professor Cestre contrasted the universities of France and America as to their environments and methods of measuring intellectual achievement. Speaking of the college campuses of America, he termed them "oases of beauty," and said that it was a privilege to the students to gain education and culture while in such delightful surroundings.

Professor Cestre stated that his mission to America was to make the romantic poets and their poems living and vital to the college students of this country.

"There is a certain satisfaction in being able to measure the intellectual development of students by hours," Professor Cestre continued, in his discussion of the American methods. He explained that in France the students were not required to go to the lectures if they did not believe themselves benefited by attending. However, when the work is complete they are required to write, in seven hours, a well constructed essay on some phase of the work.

KREBS SUCCEEDS MORSE

Wayne Morse '22, prosecutor of the Student court, has resigned his position. George W. Krebs '23 has been appointed as his successor.

The Judicial committee of the Student Senate is at the present time working on a code for the court to use.

ARGUE TONIGHT ON WAR DEBT CANCELLATION

Michigan and Wisconsin Clash Here; Team is Optimistic

WILL HAVE ONE JUDGE

Wisconsin's affirmative team clashes with Michigan tonight in Music hall at 8 o'clock in the second intercollegiate debate of the year. "Resolved, that the war debts due the United States from her allies in the Great War should be cancelled" is the question to be discussed.

Prof. Frank Rarig of the University of Minnesota will be the sole judge, and will render the final decision. This is the second Wisconsin intercollegiate debate this year in which the decision is to be rendered by one man. The policy was instituted by the Forensic board last fall.

Negative at Illinois

The negative team, led by Phil Deicher '23, left for Urbana yesterday to engage an Illinois' affirmative team on the same question.

Sterling Tracy '22, veteran varsity debater, will appear for the last time on the platform for Wisconsin. He will close the debate for the affirmative side. Robert B. Stewart '23, a man who has made a study of world finance and who understands the economic side of the question, will act as the pivot for the team, and Frances Karel '24 will open the case. This will be Karel's first appearance in intercollegiate debating.

Team Confident

In discussing Wisconsin's chances for winning, Tracy, captain of the team, stated last night, "We feel that we have the unpopular side of the question, but we are convinced of the soundness of our position and we are prepared to wage an aggressive fight for cancellation."

The negative team was accompanied on its trip to Illinois by Prof. J. M. O'Neill, of the speech department. (Continued on Page 9)

Study, Brains, Work Needed For Success Mullin Tells Group

"Study plus brains plus work are the chief things needed for success in salesmanship," declared E. L. Mullen, sales-manager of the Fuller & Johnson company at the Commerce convocation yesterday afternoon in Sterling hall.

Mr. Mullen gave the three principles of salesmanship as gesture, tone and words and illustrated each one. He outlined the qualifications necessary for a successful salesman, also giving numerous experiences he has had in selling goods.

"If you have sold something because you have made money on it, forget it," Mr. Mullen said, "for the other man has made just as much, if not more, than you have."

"If, when you have finished college, you intend to go out to sell goods, you should be careful in the selection of the house for which you are going to work; your employer will want to know all about you, and he has a right to, and you have the same right to know all about him, for the world will know you by the people with whom you connect yourself."

Score Cover Prize Won By Townsend

The cover design for the musical score of "Kitty Corner," Haresfoot's twenty-fourth annual production, was chosen by the executive committee of the club yesterday, the work of Hubert Townsend '23 winning the five dollar award.

The design selected is in four colors, with the juvenile and ingénue in a close-up under the spotlight and the hovering figure of the forbidding parent in grotesque outlines above them.

The large demands which existed for last year's scores has caused the club to publish a thousand extra copies this year. The book, besides containing all the musical numbers, will include pictures of the cast chorus, and production staff of this year's show. It will sell for one dollar a copy, the same price as obtained last year.

Pre-Ball Dance to Be at Studio Tonight

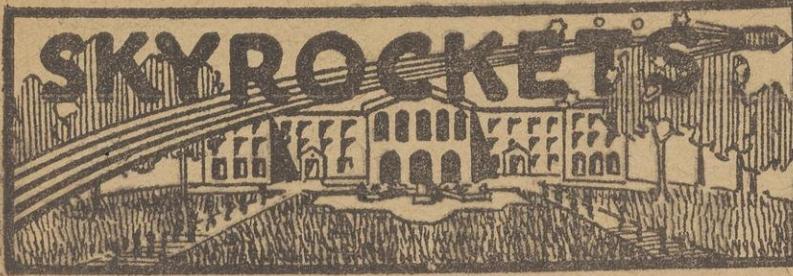

The Pre-Military ball dance will be held tonight at the remodeled Candy Shop studio, Jesse Cohen's orchestra of eight pieces furnishing the music. The attendance at this dance and the relay at the Woman's building has been limited to 200 couples.

The dance is to be in the nature of a St. Patrick's Day party, the special features, decorations, and lighting effects having been designed with that point in view. A few tickets can still be obtained from Fred Johnson '24 at the Phi Kappa Psi house, or from Morgan's and the University pharmacy.

Copy Due For Octy Haresfoot Number

In place of its regular Spring number the Octopus will publish next month a Haresfoot issue. The book will be placed on sale the Wednesday preceding the Haresfoot show, "Kitty Corner," to be given on Friday, April 21.

All copy and art work for the number is due in the Octopus office before March 29. Spring copy and Haresfoot quips that are not extremely localized are acceptable for the next issue. Conferences regarding contributions may be made at any time by calling the Octopus office in the Union building, it was announced yesterday.

ERIN GO BRAUGH!

Also, top of the mornin' to yez!

With the above bit of local color, you column scanners, March 17th line critics, morbids and casuals are introduced to the Engineers' edition of SKYROCKET'S, INC.

What'll we talk about today? Let's see! How about the condition of the upper campus? We've got the straight dope on it now. The idea is not to contrast Lincoln with Bunker Hill embankments built over night, nor is it part of the sophomore preparations for the spring crusades. Neither is it a steam line to the Law school, although if we could steam them out we'd have them trapped. But, dear perusers and parasols, it's a tunnel being built so that we, the University of Wisconsin, can more efficiently aid Jack Childs in China. 'Course we're not tunneled clear through yet, because one of the workmen had to stop yesterday to have six inches put on the end of his shovel.

This dope was confirmed by Louis Kahlenberg, who, in manner characteristic, replied:

"How do we know dot? Vy, ve found it outd."

"O, yes."

THE NOISY NEWSIE

(His nose knows)
KQUESTION: Why is an Engineer?

CAROL HOBERTS: Because they add color to the landscape. But then, there are Commerce men who are mechanically handy, too."

HANS GUDE (one of them): "Ay give a damn!"

SORORITY ALLEY (Chorus): We think they're so big and strong and masterful!"

WINNIE WINKLE (out of the window of the Tribune special train): "Gosh, I can't tell them apart!"

We are going to let you in on a secret. We found out that the Irish snake, to be used in next Saturday's parade, is a real honest-to-goodness garter snake. You can prove it for yourself when you hold down the curb on the afternoon of the 25th, for if you look closely, you will see that it is a-round hose.

Thus, the origin of the garter snake, Help! Help!

THE TWENTY-THIRD OF THE PSALMS OF HENRY
The Ford is my chariot.
I shall not want another.
It maketh me to lie down in wet places.

It destroyeth my soul.
It leadeth me into deep water.
It taketh me into the paths of ridicule for its namesake.
It prepareth a breakdown for me in the presence of mine enemies.
I will fear more evil when it's with me.
Its rods and its shafts discomforn me.
It anointeth my face with oil.
Its water boileth over.
Surely to goodness if Lizzie follows me all the days of my life,
I shall dwell in the house of Nuts forever.

First Engineer—There goes a law stude, d'yu know his name?
Second—Aw, he's Noah Count.
First—So I thot.

OWED TO ST. PAT
The Agric has his wheelbarrow;
The Commerce stude his bus;
The Lawyer has his wicked cane,
And St. Pat, his calculus.

St. Pat was quite an engineer,
A marvel among men,
He made the rivers run up hill,
And the reptiles from their den.

Had he but lived in our day,
His worth it would enhance,
To figure out the sinusoid
Of a Home-Ec.-Agric. dance.

He'd figure a factor of safety
For the flappers' skirts so brief
And contribute logarithmic tables
To the Russian Famine Relief.

B. GOREE.

OH! YOO-HOO!
FIRST CO-ED: And did you kiss the Blarney Stone today?
SECOND CO-ED: Yes, by proxy.

A BUSINESS TRANSACTION
"Hivens, Pat, the black eye ave ye! Phwat's the matter?"
"Oi paid Clancy a grudge yesterday an' that's the rebate he gave me."

We're ready to show Madison men our new stock of clothes for spring.

We're ready with wonderfully styled suits and coats; styles created by the best designers in the industry; styles that not one custom tailor in fifty could match, and no finer fabrics; no higher types of clothes making are on the market.

Here's just one example of what you'll find in clothes values

TRIO WILL GIVE SKETCH AT HOP

'Doc' Dorward '23

A song sketch by "Doc" Dorward '23, Dave Mahoney '22, and Jesse Cohen '23 will be the special feature during the intermission at the pre-Military hop to be held this evening at the formal opening of Boyd's Candy shop. "I Got My Habit On" will be the principal number given by the trio.

"This act is one of the best of its kind," said Mord Bogie '23, chairman of the features committee. "Everybody should come and have a good time."

St. Patrick Tells How He Saved All Men Fra' Schnakes

"I didn't think they allowed no reporters in Hiven," St. Patrick remonstrated mildly, adjusting the belt of his white robe over his alderman's bay-window, and pulling vigorously at his old clay pipe.

"Surely a man of your public experience doesn't object to being interviewed," cajoled the reporter.

"Shure, you're a bright boy to get in, and I couldn't refuse anything to a clever lad," the saint returned, cheerfully.

"Well, your reverence, I'd like to ask you just how you managed to drive the snakes out of Ireland. I've always wondered whether the story that we usually hear about your driving them into the sea is all there really was to it. Tell me all about it."

"So they say I drove them poor little schnakes into the say!" said St. Patrick, warming up to the subject and lapsing into Irish brogue that they had tried to train him out of in heaven. "I nivir done no such thing!"

"The Irish has always been fond of big meetin's with a speaker bhow and lots of shenanigans. Well, the country was overcrowded with these schnakes, and they held meetin's all over the country and made so much noise that the good people couldn't schlape. Somebody had to do something about it, so I took the job upon meself."

"The schnakes at this time were holdin' wan great mass-meeting of all the schnakes in Ireland, so I wint to address that same."

"I was fine lookin' young feller in them days with ellyquence in me eye, and I orated to them schnakes. I told them about how, in the years that was to come, there'd arise a race of folk that was half human

and half schnake, that would make good ould Ireland intolerable, insufferable, and entirely poisonous to schnakes of any kind. There'd be too much competishun for them, you see."

"The poor little schnakes wept big tears that went streamin' down their little scaly cheeks. Pretty soon ever wan of them got up and fled away until they came to the say, and thin, murmurin' brokenly, 'For the sake of our children's children,' they all jumped in and were entirely drowned."

"But what were those kind of people that would give the snakes too much competition?" cried the reporter.

St. Patrick gave a big, slow wink. "Twould be thim politishuns," he said.

St. Patrick's day, tomorrow, will be celebrated in many and diverse ways, from the high school boys and girls who go to school on the morning of March 17 in green stockings and to St. Patrick's parties in the evening, to the devout Irishman who attends two masses on the holy day to pray for the protection of the good saint.

Two of the four Catholic churches of Madison will have special celebrations of the day. An elaborate program will be put on by St. Raphael's church in thanksgiving for the attainment of Irish freedom, including a solemn high mass and sermon at 8 a. m. and an Irish Feis at 8:15 p. m. will be held in the Father Petit school auditorium.

A choral number, "St. Patrick's Day," will be sung by St. Raphael's choristers, to open the program. Rev. T. B. Johnson, the pastor, will give the address of the evening. An original poem, composed for the occasion will be recited by James Martin Fox, and a dramatic sketch, "An Evening in Ireland," will include many features of Irish life. Leading parts will be taken by Misses Rose Corcoran, Helen Brown and Catherine Devine. Irish folk songs and ballads, harp numbers, and Irish dancing will be presented by members of the church. The program will conclude with the singing of "The New Ireland," Victor Herbert's marching song, by St. Raphael's male quartette.

St. Paul's chapel will celebrate the Irish saint's day with mass at 7 a. m. and a sermon on St. Patrick and benediction delivered by Rev. Father H. C. Hengell. At 7 p. m. the Newman club, the organization of Catholic students, will present a program of special music and declamations.

Trexler Speaks at Lutheran Banquet

Dr. Samuel G. Trexler, president of the New England and New York synod will be the chief speaker at the Lutheran Convocation banquet to be held at Luther Memorial church from 5:30 to 8:00, Saturday night.

Gov. John J. Blaine and Mayor I. Milo Kittleson will give messages of welcome, and there will be short talks by Atty. Carl N. Hill, Rev. A. J. Soldan, Miss Marion Neprud, Wilbur Wittenberry '23, Selma Hofsoos '22, and Elroy Luedtke '23. Herbert Procknow, grad president of the Luther Memorial Student cabinet, will act as toast master, and Dr. E. B. Gordon will lead the singing.

A student orchestra will play during the banquet. Tickets at 50 cents a piece may be reserved by calling B 7855 on Friday.

Ten Places Left in Geology Field Trip To Rocky Mountains

Ten places are still open in the party taking the geology field trip to the Rocky mountains in June. This course, Geography 189, is open to all students who have had one course in the Department of Geology, such as Geology 1, 4, or 5c, and is intended to provide an opportunity for those who desire to become familiar with the features of the western states.

The party is limited to 32 members and will leave Chicago Saturday evening, June 10, returning the evening of July 4. Four points of university credit will be given for the course which requires a little preliminary preparation in the securing of necessary maps and material and a final written report. The party is to be directed by Prof. A. K. Lobeck with Miss Loft, chaperon, and an assistant. The total expense is estimated at about \$300 for the trip from Chicago back to Chicago with a university tuition fee of \$30. Each member will be assessed the actual expenses of travel.

Over a week will be spent in Colorado, including two days in the Rocky Mountain National Park, one day on the crest of the Front Range, two days in the Pikes Peak region, and a visit to the Royal Gorge. There will be a five-day trip through the Yellowstone by automobile and a week trip in Glacier Park by foot and horseback.

Those who wish further information are invited to consult with Professor Lobeck, 311 Science hall.

Legislators Not Drawn By Money Inducement

Legislators will not be attracted to the special session by any financial inducement offered them by the state to render this extra service. The sum total of their salary for two years, regardless of the length of actual attendance is set by the constitution at \$500. They were paid their salary before the opening of the six month's regular session, and now are to content themselves with railroad fare. Attempt is being made to amend the constitution increasing the salary of legislators to \$1500 for a term of two years. The present rate of pay averages between \$75 and \$90 a month, and sometimes lower, depending on the length of the session.

Park and Pleasure Board Elect in April

The annual meeting of the Park and Pleasure Drive association will be held sometime the latter part of April or the first of May, according to Ernest N. Warner, president of the association. Election of officers and a general business meeting will be held.

Will Elect Successor to Siemers Next Month

A meeting of the Vocational school board, to elect a successor to A. W. Siemers, head of the vocational school, whose term expires July 31, and who will not consider re-election will be held, sometime next month.

Badger Postmasters Confirmed by Senate

WASHINGTON, D. C.—The senate on Wednesday confirmed the following Wisconsin postmaster nominees: Edward K. Cunningham, Berlin; Bert B. Powers, Fennimore; Halvor Thorsen, Hawkins; Albert W. Priess, Maiden Rock; Vivian Brown, Minong; Claire A. Lynn, Mount Hope; Arnold E. Langemak, Sawyer and Milton R. Stanley, Shawano.

TENNIS

The most complete line of Golf goods in this part of the state will be found at the Co-Op. MacGregor clubs is all we need to say to the man or woman that plays golf, and having in stock Silver King, Radio, Red Flash, 1.62, Colonel, Paramount A, and several other golf balls, it is going to be easy for you to get a ball that will satisfy. Our line is too large to tell about it here. Better stop in and see what we have.

Wright & Ditson tennis rackets and balls have been known for years for their fine quality. Eighty per cent of the clubs in the U. S. use Wright & Ditson balls and their rackets are just as popular. You always get fresh, live balls at the Co-op.

Rackets \$2.50 to \$13.50
Balls 50c

We feel that the Old Town Canoe is in a class of its own. Style, beauty, durability, workmanship, finish are given great consideration before a model is brought out. And we have never met an owner of an Old Town that was not satisfied. It takes quite a little time to get one here. May we have your order this week?

BASEBALL

The Goldsmith or Wright & Ditson label on anything in the baseball line assures you of a liberal guarantee. We have a very complete line at reasonable prices, and to teams buying all of their equipment here we will give a quantity price.

This weather must make you think about your favorite sport, our stock is on display in the windows and store, get the things you need early in the week so that when someone calls up and wants to trim you, you will be ready.

University Co-Operative Co.

E. J. GRADY, Mgr.

HERE IS STAFF OF ENGINEER'S MAGAZINE

The Wisconsin Engineer, which again appears for sale today, has been a recognized campus organization for over twenty-five years. It has grown from a publication of two issues a year to its present program of eight issues, and from a small pamphlet size to a standard technical magazine.

As a source of news and information it is invaluable. The campus

notes furnish a touch of the days when the old-timers as students were making satire for the benefit of others. The alumni news furnishes information of the activities and locations of classmates and friends. To the students, the semi-technical articles provide a good initiation into the more formal articles with which they, as engineers, come into contact later.

The staff of this year's magazine has done much to increase the prestige that the Engineer has always held among technical college publications, and to maintain the high standard of Wisconsin's campus periodicals. The work of M. K. Drewry '22 as editor and Frank Buese '22 as business manager is meritorious and they are entitled to much credit for the work they have accomplished this year.

AGRICULTURAL SHORT COURSE MEN GRADUATE

Vivian Gives Address; Tells of Perfect Future of Co-operation

Graduation exercises for the graduating class of the Short Course in Agriculture were held in Agricultural auditorium, yesterday forenoon.

Certificates of graduation were presented to the graduates by Pres. E. A. Birge, who congratulated the class on having completed its work so successfully and charged them to be staunch supporters of the University of Wisconsin when they joined the ranks of Wisconsin's Short Course Alumni.

The commencement address was given by Dean Alfred Vivian, Ohio State College of Agriculture. Dean Vivian spoke on the subject, "A Dream Worth Dreaming." In his address, he visualized agriculture as he would like to see it in the future; a visit was made to the old farm the home, the school, and all of the rural institutions.

Farmer Leads On

"I dreamed that the greatest contributions to the future of democracy were to be made by the farmer," declared Dean Vivian. "Cooperation seemed to be the keynote of everything." Running water in the home, furnace heat, electric power, an ample library, a centralized township high school in which pupils were not educated away from the farm were a part of the Dean's vision.

In visiting the country school, he found adequate facilities for recreation. Moving pictures, home talent dramatic clubs, and farmers clubs had been organized. Home economics and agriculture were taught in the high school. A general air of good fellowship prevailed, and community factions had made up their differences.

"When I had progressed that far," declared Dean Vivian, "it suddenly dawned upon me that I must be dreaming, and I breathed a prayer. 'O Lord, if this is a dream, may I never awake! O grant that if this is not a dream, that it may be a vision.'"

TOUT PASSE?

THE riches of the Incas are dissolved; Timur and his tower of skulls are both dust; and goats brose contented in the weedy court-yards of the Caesars. The dim, titanic battles of the past, when the aurochs retreated sullenly before the slow advancing ice and the first rude man faced the snarling saber-tooth; all those brave epics of the warm young world are lost to us forever. Now and then lone figures, rebelling against the narrow limits of a life, have fought and labored for a fleeting space that there names might be remembered; and by red slaughter or high ideals, by hammered bronze or carven marbel, have striven to placate the three sisters; yet slowly and surely their little names have been buried under the creeping dunes of the sifting years.

But though the individual is soon forgotten, his works are given to the race. Like the stream of sand that pours through the hour-glass, life slips through the warm fingers of Time; and while no single figure stays to make himself immortal, each one helps or hinders the advancement of the world. The civilization of which we boast is deep based on the dreams of unknown men, and whatever we do for good or ill shall have its small effect till the last grain has dropped through the glass and the cold world roars headlong to the sun from whence it came.

Where, then, does the individual stand? Must he look on the life-struggle as profitless and on high ideals as vanities of the moment? No! Standing on the dust of the forgotten dead and possessed of the living truths they have quarried for us, it is for us to move forward one step toward the promise of the ages. Each man's life is an opportunity, and each man's immortality shall rest with his children's children. Then let the student lean to the future, the thinker strive for his goal, and the workman labor his hour; let each man fight the good fight according to his code, till stern Lachesis raise her glittering shears.

LET'S GET TOGETHER

WHEN we look at thousands of students every day, what do we see? Only faces? Or countenances that mean more to us than merely parts of the landscape? A study of the crowds always instructs. Every time we gaze around, new human traits are exposed, new characters are unfolded, and new interests of people are discovered. If we watch closely, the way in which certain interests form different groups will be shown to us. We will learn why such and such persons go together and why a certain number of people seem to have something in common.

The larger the institution becomes, the more marked become the groups, just as in the largest of cities we find the most outstanding class characteristics in the world. Just as a large city faces danger through failure to assimilate its people into one unified class, the university becomes endangered if its student body is not joined together through some common interest. Does the man from the Ghetto really understand the man from Little Italy? Does the person from the Bowery understand the one from Fifth avenue? These are extreme examples to be sure, but simply goes to show how wide a variation in classes may result from an enormous population.

All of us have some idea as to the differences of opinion, the jealousies and the quarrels that result when persons of widely divergent classes meet. Much the same difficulties are bound to arise if the same upbuilding of class distinction goes on in the university life. Are we not right to a certain extent in assuming that the more marked the ever-increasing number of groups become the more strained will grow the bonds that are holding the Wisconsin spirit together?

In spite of our loyalty to the present student body we have to admit that the certain friendly spirit that once united the entire university is losing ground. We are paying too much attention to our own affairs and to our own particular friends and forgetting that we owe something to the student body as a whole. Many of us are judging too much on personal appearance. The one who puts "so-and-so" down as "snob" or a "sissy" because he wears the latest style clothes, displays plenty of jewelry on his vest, and keeps his hair well oiled, is just as wrong as the fellow who puts "so-and-so" down as a "boor" and an ignoramus" because he wears a mackinaw, a flannel shirt, and high boots. To understand each other we must learn to judge by real personal contact, and not from mere outward appearance.

Small groups have been organized and they have helped to form acquaintances among smaller groups, but larger organizations could be started that would mix up the student body still more. With more affairs like the "Little International," the Engineers' parade, and the Kommerce Kaper, the school as a whole would come to a better understanding. Less exclusiveness among other colleges of the university might lead to the same friendliness that prevails among the "Ags" and Engineers.

WHY NOT GOLF K'S TOO?

Ten years ago no one would have dared suggest golf as a major sport. But then golf was supposed to be an old man's game ten years ago.

In all seriousness, why don't we recognize golf as an intercollegiate sport? There is plenty of material, and once the idea is started there is sure to be plenty of interest. Other schools have taken it up along with football and track, recognizing it as a varsity game and awarding athletic letters. On the Pacific Coast it shares popular interest in the spring with track and tennis. Nearly all of the larger schools have adopted it and more are doing it

BULLETIN BOARD

STUDENT SENATE MINUTES
The minutes of the Student Senate special meeting held in Pres. E. A. Birge's office, March 4, are posted on the bulletin board in the library. This arrangement is made in order that all who are interested in student self government may read the minutes of each meeting. The same custom will be observed through the balance of the year.

DANCE COMMITTEE
Pre-Military ball dance committee will meet in Union building at 12:45 Friday.

FROSH DEC
The Forensic board announces that the Freshman Declamatory contest will be held on March 27. The finals will be on March 29.

AGRIC TRIANGLE
Agric Triangle "Country Life Club" will have its regular meeting Sunday morning at 9 o'clock in the S. G. A. room Lathrop hall. Professor Hopkins will speak on "The Rural Press, Its Future, and Some of Its Problems."

MILITARY BALL USHERS
will please sign their names on sheet at entrance on the main floor of the Armory. This should be particularly noticed by those men desiring to make up cuts or anticipating same in the near future. A maximum of six hours credit will be allowed for this.

MATHEMATICS CLUB
The Junior Mathematics club will meet Thursday evening at 7 o'clock in 101 North hall. Professor Van Vleck will talk.

AN IRISH GOOD TIME
All lovers of an Irish good time are invited to celebrate St. Patrick's day on Friday evening at 7:30 in the Baptist church. Wear a bit of green, and be prepared if the girls should ask you for fifteen cents to help pay for the refreshments.

HESPERIA MEETING FRIDAY
The Hesperian Literary society will meet at 7 p. m. Friday at which time the tryouts for the Frosh Declamatory contest will be held. After the tryouts the society will attend the Michigan debate in a body.

WOMEN'S COMMERCE CLUB
Important special meeting of the Women's Commerce club, Friday, March 17, at 12:45 in 104 Sterling hall. Nomination of officers and election of new members.

OFFICIAL NOTICE
The office of the Dean of Men has approved the request for the following one o'clock party for Friday, March 17: Delta Sigma Phi, 210 Langdon street.

OUTING CLUB
Outing club week-end parties: bird hike will leave Lathrop at 6 a. m. Saturday, Louise Cover leading. Roller skating party at 4 p. m. will meet at Lathrop, Mary Baldwin in charge. Sign on club bulletin board.

OCTOPUS STAFF
A meeting of the Octopus staff, board of editors, and artists, is called for today at 3:30 o'clock in the Octopus office, Union building. Plans will be made for the copy for the next issue.

HARESFOOT ORCHESTRA
Places for a drummer and two French horn players are still open in the Haresfoot orchestra. Applicants call John Morejs at B 975.

PYTHIA TRYOUTS
Pythia tryouts at 4 o'clock Friday in S. G. A. room. The regular meeting will be held at 7.

PHI BETA KAPPA
The Wisconsin chapter of Phi Beta Kappa desire that all student members, undergraduate and graduate, send their names and addresses to the secretary, Elizabeth A. Smith, Biology building.

FRENCH CLUB TRYOUTS
French club tryouts 4:30 Friday, 323 Bascom hall. Not necessary to prepare a selection.

AG TRIANGLE
Dean John A. James will address the Agric Triangle on the subject, "Problems of the Dean," at the regular meeting of the organization, Sunday, March 19, at 9 a. m.

ST. PATRICK WAS AN ENGINEER!

St. Pat's Sons Boost "Rep" In Sporting Fields

Plumbers Claim Star Representation on All Teams

Despite the traditionally heavy schedule carried by the engineering student, many of them have found time for athletics, and the Engineering college boasts of a number of the best athletes in the university. The college is represented in practically every sport recognized by the Athletic board, including track, football, basketball, baseball, crew, swimming, gymnastics, wrestling, hockey, and skiing.

In track, the sons of St. Patrick have been particularly prominent. Three of the track captains in the past four years have been engineers: Spafford '19, Nash '21, and Knollin, captain of the present Badger team. This year Spetz in the sprints, Wille a miler, and Finkle, two miler who broke his leg at Notre Dame,—all W men in track, and mainstays of the team, are engineers. Wade, half-miler, Ellison, quarter-miler, Newell, hurdler, and Gude in the shot put, are also on the squad at present.

Engineer Skiiers

The 1921 football team claimed four engineers: Woods, halfback and end; Brumm, right tackle; Irish, end; and Gude, tackle. Brumm played in every game of the year and was chosen on many honorary elevens by prominent sport writers. Woods played in the games toward the latter part of the season and showed real class at playing offensive end and defensive halfback.

Russell Irish on the basketball team was a real find for Coach W. E. Meanwell. In the Illinois game he made a victory possible by his close guarding of Carney.

Skiing at Wisconsin is almost an Engineering college sport. The Norwegian students, all engineers, are responsible for St. Pat's skiing representation. Sverre Strom and Tom Norberg were the best bets this year, both doing well in the meet here against men who had been practicing all winter. Norberg went to Canada and represented the Badgers in the Canadian national event.

Other Sports

Czerwonky, Lamboley, Davies and Huebner represented the engineers on Joe Steinauer's crack swimming team. Czerwonky swims the breast stroke and backstroke, Huebner plunges, and both Lamboley and Davies are on the relay team and swim in the dashes.

Wisconsin's first hockey team was captained by an engineer, Gilbert G. Grieve. The team put up some good scraps against experienced hockey outfits.

It baseball and crew it is yet to be seen what the engineers will do. It is safe to say that when the roll is called, St. Pat will be represented.

This Proves They're Sons of Saint Pat

Nineteen years ago, two students of the University of Missouri, on a Geology trip, after a discouraging day of finding nothing more than a few small specimens of hematite, lay down on a bed of clover to rest.

Soon they noticed, however, that the growth which they had at first taken for clover was shamrock. Their curiosity was aroused and they at once began an investigation. To their surprise, they unearthed what appeared to be an outcrop of emerald. On further digging, however, they found it to be a large green concrete slab, the aggregate of which was composed of a silica, the kind found only in Ireland.

Engraved upon the slab, but made almost indiscernible by the erosion of centuries, they found the crude representation of a transit and an involute gear, in mesh with a slide rule. Below was the Gaelic inscription, "Erin Go Braugh," which translated by means of the well-known Blarney Stone code, means, "St. Patrick was an engineer!"

These findings have established beyond doubt that St. Patrick was the ancestor of the engineers.

Engineering Organizations Active In Social and Technical Affairs

ELECTRICALS PLAN MANY ACTIVITIES

The American Institute of Electrical Engineers, student branch, was organized in the fall of 1919 as a local of the National association. Under the leadership of "Ruly" Knoer '21, this group of junior and senior electricals soon expanded into an organization which provided the much needed social and technical get-togethers for the engineers. The society, now three years old, has already taken its place as the liveliest of the engineering organizations.

Activities of the branch this semester include a float for the Engineers' parade, March 25; the establishment of an electrical museum; and the preparation of an electrical show to be held April 20, 21, and 22.

Professor Edward Bennett has been acting as faculty advisor and the society has recognized the ef-

CIVILS ADOPT NEW STYLE OF INITIATION

The founding of the student chapter of the American Society of Civil Engineers dates back to 1886 when Prof. J. L. Van Ornum, E. S. Nethercut, Prof. E. P. Mauer, Christian Hinricks, and Prof. L. S. Smith were students in the Engineering college. The organization was then known as the University of Wisconsin Civil Engineering society, but in 1920, the American Society of Civil Engineers (founded 1852) admitted the university organization as a student chapter.

The time honored slap stick style of initiation has been abandoned by the civils. The initiates are required to deliver a short, sensible talk on some topic of general interest, and it is claimed that this instills more genuine respect for the organization into the hearts of the new men than any system of terrorization that has ever been used.

Credit Famed Inventions To Students Here

Badger Engineers Conceive Motorcycle and First Tractor Engine

The Wisconsin College of Engineering has contributed to industry and commerce much machinery which is now in world-wide use, and valuable inventions of which few students here are aware. The development of the gas engine is due in a large measure to the work of Wisconsin engineers, many of them undergraduates.

A striking example of a Wisconsin product is the Harley-Davidson motorcycle. Realizing that his homemade "motor bicycle" needed a complete overhauling thermodynamically, William S. Harley entered the engineering college to master the elements of steam and gas. Today, fifteen years after his graduation, the Harley-Davidson Motor company is the largest establishment of its kind in the world.

Make First Tractor Engine
The story of C. W. Hart and C. H. Parr, makers of the Hart-Parr tractor, reads essentially the same as Harley's. Before graduating in 1896, they made the first engine ever designed for a tractor, so that Wisconsin may truly be credited with the initiation of the farm tractor.

A more recent contribution to the field of farm tractors is the Elwood tractor, which is now being put on the market. When eight-year-old Charles Elwood made his first toy thresher, with which he threshed milkweed on his father's farm, his first active interest in farm machinery was awakened. He worked his way through high school as an expert in farm machinery and in 1914, with the plans for a tractor already well in mind, entered the College of Engineering for the sole purpose of developing his machine.

In the seven years since he graduated, Mr. Elwood has been doing experimental work on the tractor. Eleven models were built during that time, improvements were made for strength and simplicity, until now the machine is ready to be put on a production basis and marketed.

Osman Forms Corporation
The large gasoline engine which was on display at the University exposition last year is another product of student labor. It was designed and built by Ralph T. Osman '20, as a bachelor's thesis. Osman formed a corporation immediately after he left the university to finance his project, and is now improving the "Duport" motor, in order to put it on a commercial basis.

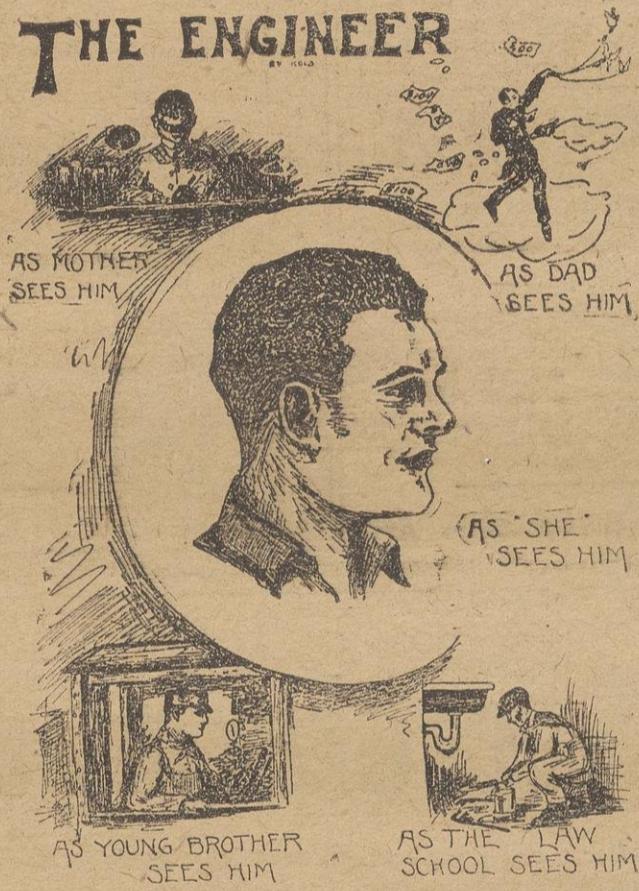

Annual Green Mag Features St. Patrick

The annual St. Patrick's edition of the Wisconsin Engineers with its symbolic green cover and special feature articles appears on the campus today. Many prominent engineers have contributed to the issue.

Pioneering in airship transportation lines in America may sometime be credited to Edward Schildauer, a graduate of the electrical engineering course in 1897, who was jointly responsible for the formation of the huge commercial air transportation company described in the *Engineer* for March.

Mr. Schildauer is the engineer who designed and installed all of the electrical equipment in connection with the Panama canal, and this new venture in the airship line already sounds like success.

"Notes on Reproduction of Engineering Drawings," by W. C. Mackey, is an article on a seldom treated subject. Two other technical articles, "The Prevention of Erosion Below Dams," by Professor C. N. Ward of the hydraulics department, and an account of "Recent Radio Studies of the Engineering Experiment Station," by L. J. Peters, are of unusual interest to the technically inclined.

forts of R. H. Herrick by re-electing him chairman for the second semester.

CHEMICAL SOCIETY IS ACTIVE ON CAMPUS

To meet the need for professional contact in their own line, the chemical engineering students organized the Chemical Engineering society. Meetings are held on alternate Tuesday evenings, at which talks of professional and general interest are given by students and outsiders.

An annual mixer is held soon after the opening of the school year for the purpose of getting acquainted. A banquet held some time during the winter is always a big event and activities are closed in the spring with a picnic.

The present officers of the society are: A. J. Huegel '22, president; A. J. Bulfer '22, vice-president; C. M. Hare '24, secretary; and Irving Rau '22, treasurer.

POLYGAN DIRECTS

ENGINEERS' ACTIVITIES

Polygon anacenethe. 12 121

Polygon, the engineering student executive organization, was formed in 1920 in an effort to centralize the efforts of the engineering societies under a common head and to promote the welfare of the Engineering college. The members are elected from each of the six societies in their junior year, and serve until graduation.

PROMINENT MEN ARE MEMBERS OF A. S. M. E.

The student branch of the American Society of Mechanical Engineers was established at the university in 1913, under the direction of the national organization, the largest of all the engineering societies. The aim of the student branch, which is composed of junior and senior students in mechanical engineering, is to bring the members into social and professional contact with each other and with older members of their profession. Papers of professional and general interest are presented by both students and visiting lecturers, at the meetings, which are held every other week.

Among the Madison members of the society are: H. J. Thorkelson, for many years business manager of the university; L. E. Reber, dean of the university extension division; John G. D. Mack, state chief engineer; Daniel W. Mead, consulting engineer and professor of hydraulic and sanitary engineering; and John C. White, state power plant engineer. Professors G. L. Larson, C. I. Corp, and Patrick H. Hyland, have also been instrumental in making the A. S. M. E. student branch a success.

MINERS DEVELOP COOKS FOR "FEED"

The Mining club was organized by the students of the Mining Engineering department in 1906 and (Continued on Page 8)

**"HAP" PHILLIPS
DIRECTS PARADE**

"Hap" Phillips '22

H. A. "Hap" Phillips '22 is manager of this year's Engineers' parade, which is to be held Saturday, March 25. Phillips is athletic editor on the staff of the Wisconsin Engineer, chairman of the student branch of the American Society of Mechanical Engineers and is a member of Sigma Nu and Inner Gate fraternities.

**Standish Recital Has
Vivid Interpretation**

A splendid interpretation of story songs of the Middle ages, the Sixteenth century, and the Crinoline period was given by Mme. Marie-Lydia Standish in Lathrop concert room Wednesday night under the auspices of Red Domino. Characteristic costumes of the three periods and piano accompaniment by Miss Emma Menke added vivid color to Mme. Standish's readings.

**Jamboree Tickets
Go on Sale Monday**

Open sale of tickets for the 1922 Jamboree will be held in the corridors of the various university buildings on Monday, March 20, according to an announcement given out by Walter A. Frautschi '24, chairman of the sale.

Tickets have already been sent to the heads of the Greek letter societies and other organized groups about the campus, for distribution among the members.

The price of the tickets will be 50 cents apiece for men and women alike.

was affiliated with the American Institute of Mining and Metallurgical Engineers in 1907. Two meetings are held each month and consist of a genuine feed prepared in the mining laboratory, followed by a talk by some prominent business man or state official and a short business meeting.

The club has secured Gov. John J. Blaine, Ex-Gov. Emanuel Phillips, and Prof. Daniel Mead to speak.

The feature of the evening is the feed, which consists of steaks broiled over assay furnaces, potatoes baked in muffled furnaces, and enough extras to make a real meal. The club is striving to train good cooks and dishwashers as well as good mining engineers, and from the fact that a dish has never been broken it would seem that they have been succeeding.

**A. E. E. STRIVES FOR
ETHICS IN WORK**

To raise the standard of ethics of the engineering profession and to promote the economic and social welfare of engineers, is the object of the American Association of Engineers. The association has lived up to its standard and has done much to bring the engineer in touch with the non-technical world, and to protect the public from the impositions of so-called practical engineers, who have never had a technical education.

TWO ENGINEERS ORGANIZE AND
DIRECT APRIL ELECTRICAL SHOW

Ernst Guillemin '22

Ernst Guillemin '22 and R. H. Herrick '22 have been the leaders in organizing and directing the efforts of the engineers who are working on the Electrical show to be held April 20, 21 and 22.

Guillemin is a member of Tau Beta Pi, Eta Kappa Nu, the American Institute of Electrical Engineers, and of the American Association of Engineers. He is one of the high honor men among the elec-

R. H. Herrick '22

trical seniors, and is planning on attending the Massachusetts Institute of Technology next year.

Herrick is president of the student branch of the American Institute of Electrical Engineers. He held the rank of major in the signal corps last year, is a member of Scabbard and Blade, and is a staff member of the radio broadcasting station W. H. A., and has charge of the lighting of this year's Military ball.

AT THE MAJESTIC.

A picture with a vital, pulsating story, with an insight into one of the great factors of the present day is found in "Enchantment," a Cosmopolitan production starring Marion Davies, which will open at the Majestic theater today. Miss Davies shows us the real modern "flapper," that product of present day civilization. She is spoiled, but she has ideas of her own and knows how to carry them out. Men are much attached to her. They besiege her with invitations to dinners and dances, and her parents decide she must be "tamed." The story tells how this doctrine was carried out.

AT THE STRAND.

Thomas H. Ince's greatest dramatic achievement, "Hail the Woman," is now being shown at the Strand theater. The story deals with Oliver Beresford (Theodore Roberts), a grim and bigoted New England farmer, whose uncompromising creed, "Men and their sons first," disposes harshly of woman's destiny.

Meet Michigan Here
Tonight in Debate

(Continued from Page 1)

ment. Henry W. Blake '23 and Fred J. Moreau '22, with Spencer, constitute the team. All three men, though debating in an intercollegiate meet for the first time, have had considerable experience in forensics.

Dean Richards of the Law school will preside at the debate with Michigan in Music hall. A charge of 25 cents will be made by the Forensic board to cover expenses. The Michigan team, composed of J. B. Glasgow, Francis H. Greenbaum, and O. W. Rush, arrived in Madison yesterday. All of these men are experienced intercollegiate debaters.

There will be a rehearsal of the cast of the "Bells of Beaujolais" in 35 Music hall at 4:30 this afternoon. The cast and chorus will rehearse at 7 p. m. in 1 Music hall.

4 MEN WANTED

A national public accounting organization has openings at present for 4 men on its student staff. We are seeking responsible young men, preferably with some bookkeeping experience, who have sufficient ambition and determination to use their spare time in study which will positively place them on the practicing staff of this company.

We are employing over 100 accountants at present, every one of whom started on the student staff. These men earn salaries of from \$150 to \$300 per month.

This is a well rated company, offering a genuine opportunity to the type of man who wants and is willing to work for a real future in the accounting profession.

Successful applicants must be clean-cut men over 21, with good education.

NEWS OF CONFERENCE SPORTS

PRE-FINALS IN MAT TOURNEY HERE TONIGHT

Ames and Illini Here
With Formidable
Squads

With the largest number of men representing any one school in the championship wrestling tournament, which will be held tonight and Saturday in the gymnasium, Coach Menner of Ames yesterday arrived in Madison to take part in the semi-final bouts this evening. His all-star squad of six grapplers includes Sogard in the 115 pound class; Loucks, 125 pound; Bower, 135 pound; Shipart, 145 pound; McKibbon, 158 pound; and Zink, heavy weight. None of the men have been defeated this season.

Fourteen bouts will be held tonight at 7:30 in the gym, two winners and two losers being picked in each division. Saturday afternoon at 3 o'clock the losers will meet for third and fourth places, and Saturday evening first and second positions will be settled.

Gym Tourney Saturday

In conjunction with the Saturday night performance there will be a gymnasium tournament to decide the conference championship in that branch of athletics. Seven schools will take part, and there will be over one hundred men entered in the eight events which include parallel and horizontal bar work, flying rings, side horse, tumbling, club swinging, fencing, and broad sword bouts.

The Iowa State college aggregation have been champions of the West for four years, and two years ago defeated Pennsylvania for the title of the United States. Last season they were runners up in the national meet, but lost to Penn state by two points in a hard fought bout. The Ames squad has upheld the record of former years this season by winning all of its eight Nebraska, Indiana, Purdue, West matches with other western schools. Virginia, Oklahoma, Northwestern and Wisconsin have all fallen easy prey to the victorious corn state grapplers.

Templin, Wisconsin's lone entrant in the finals, will meet his strongest opponent in the husky 158 pound McKibbon. In their bout at Ames last week the Iowa lad was given the decision by a close margin over the Badger representative.

Illini Hope For Win

The two Nebraska representatives, Thomas, a middleweight grappler, and Troutman, a 175 pound mat man, also made their way into the city yesterday in preparation for the deciding tests of the weekend. Squads from six other conference and Missouri valley schools who are to enter the meet are on their way and will arrive in Madison some time this morning.

Four members of the Illinois wrestling team conference champions are on their way to the Madison tournament. The Sucker representatives are Captain Esslinger, light heavyweight; Trenkle, welterweight; Flostrom, featherweight; and Borland, middleweight. The Illini squad, while claiming the title of conference champs, have not as yet met the corn fed Iowans nor the Nebrascans, and will run up against some tough customers from these Missouri Valley entrants.

Women Win Honors In Water Tryouts

Swimming honors were awarded to a number of women after the tryouts held last week. Those receiving them are: Lois Barry '25, Anita Haven '24, Ann Smith '24, Fern Foxen '22, Katherine Ely '22, Alice Cockrell '25, Katherine Fuller '24, Margaret Pantzer '25, Marion Whiting '25, Josephine Jung '24, Edna Walter '25, Elizabeth Gessel '24, Helen Cary '23, Marion Guild '25, Bess Blanding '23, Elizabeth Sikes '24, Mildred Harpster '23, Lois Beattie '24, Eula Day '22.

Boxing Tournament Reaches Semi-Finals With Twenty Left

With twenty men still to swap punches in the all-university boxing tournament, the bouts progressed to the semi-final stage yesterday. Finals to decide the school champions in each of the seven divisions will be held Saturday afternoon at 8 o'clock in the gym.

As former champions have not been barred from this meet, many interesting scraps are bound to result. In the 160 pound class, Fabera, winner of the class championship in that weight in the recent tournament, is in good shape and looks to be in excellent trim for a hard scrap on Saturday. In this weight, however, he will have to meet "Freddie" Johns, a 155 pound fighter who held the championship in that class for two years. Ray Moore is the most promising looking 150 pound man. He shows the form of an old timer in his bouts, and is in good shape after the class arguments of last week.

In the heavyweight division, Strain, last year's champ, makes a strong bid for honors again this season. The big fellow is not in very good shape, however, and may have some trouble with such men as Stipek and F. M. Koons. Klap is one of the best of the lightweights in the tournament. Medals are offered as prizes to the winners of the seven different weights.

To Have Week For Life Saving Talk

The Women's Life Saving corps of the University of Wisconsin, a meeting held Thursday noon, laid definite plans for conducting a life saving week beginning April 3. Demonstrations of rescue work and resuscitation methods will be given in all of the swimming classes, and attempts will be made to arouse greater precaution and interest in preventing accidents on the lake.

New officers were elected at the meeting. They are as follows: Elizabeth K. Kirk '23, president; Helen Pratt '23, vice-president; Olga Anderson '23, secretary and treasurer.

Tryouts for new members will be held next week when Capt. W. E. Ongfellow is here. Practice hours 2:30 to 5:30 in the pool.

Hungry Boar Invades Swiss Football Field

GENEVA—Winter in the Swiss Alps has been so severe that scores of wild boars, wolves and other animals have been driven to the towns and lowlands in search for food. The authorities are offering bounties for their death or capture. Recently several thousand persons at a football match near the western frontier were thrown into a panic by the sudden appearance on the field of a huge tusked boar. The animal charged the players and bowled several of them over. A gendarme rushed upon the field and ended the animal's escapade with a revolver shot.

Says "Flapper" Is Only Original Human Being

CHICAGO—There is nothing mysterious about the flapper—she is just "a female who has lived down thousands of years of hypocrisy and now has become what she most desired to be for ages, a human being," Dr. L. A. Stone, head of the Chicago department of health said today in an address before a health conference. "Flapper is the more or more feminism is the result of youth," added Dr. Stone, "It is the resumption of the original status of mankind."

A NEW HOLIDAY

"Arrah," said our patron Saint as he gazed at the sign in the confectionery window, "Shrove Tuesday, Ash Wednesday, and Good Friday long O've known, but what's the idea of this Nut Sunday?"

BASEBALL SQUAD TO GO OUTDOORS IF GROUND DRIES

Infield Presents Problem; Big Supply of Pitchers Out

The Varsity baseball squad will start outdoor practice as soon as the Camp Randall diamond has dried. They expected to begin their work in the open yesterday, but the grounds were in poor condition.

The gymnasium is too small for much work, and as the first practice game is scheduled to be played on April 1, Coach Guy S. Lowman is anxious to get his men on the regular diamond, where they can get more training. In the annex it has been necessary to limit practice almost entirely to separate aspects of the game, as the battery work, base stealing, sliding, and batting have been practiced.

About 35 men are reporting for the squad at present. "Jack" Williams, of the basketball squad, has reported for baseball, and "Rollie" Williams, Tebell, and Caesar will be out next week. Ellott is also expected to report next week.

The hardest problem on the team this year is to develop the infield. Since Ruediger is ineligible, and Lyman has graduated, the second and third base positions are left vacant. "Jack" Williams, regular first baseman from last year, will probably retain his old job. The other men trying out for positions in the infield are Skaife, Foy, Pigott, Combacker, and Dugan.

For the outfield, the following men will be available: Caeser, "Rollie" Williams, Tebell, Sheridan, Paul, Halverson, and Brann.

The pitching staff consists of Paddock, varsity regular and captain, and Hoffman, Mills, Christian, Richey. The catchers are Barry, Aschenbrenner, Whitten, and Prokof.

Combacker Elected Captain Puck Squad

Howard R. Combacker '23 was yesterday elected captain of the 1922-23 Varsity hockey team. Combacker played defense on this year's squad, and was one of the most consistent men who worked under Coach A. K. Viner.

He had previously played with the Hamline college, Minn., hockey team. With the return of several veterans in addition to the new captain, Wisconsin will be represented by a strong team next year.

Lorenz Clears Doctors in Resthaven Deaths

Dr. W. F. Lorenz, professor of mental and nervous diseases at the University of Wisconsin medical school, today declared that physicians and heads of Resthaven hospital were absolutely blameless in the deaths of three former service men who died recently a short time after injections of a serum had been administered. Col. Lorenz, who made a special investigation into the deaths of the three patients at the request of Gov. Blaine, asserted at the inquest before a coroner's jury here today that the serum was a proper drug to administer in the case and that every precaution had been taken by the physicians.

Senate Committee Split On Smoot Eligibility

WASHINGTON—The senate judiciary committee today split on the question of eligibility of Sen. Smoot and Rep. Burton, for membership on the allied debt refunding commission. A majority of the committee held them ineligible and a minority eligible. Both views will go to the senate.

Vet Bureau Deficiency Bill Goes to Harding

WASHINGTON—Congress today completed the deficiency appropriation bill carrying more than \$130,000,000 including about \$74,000,000 for the veterans bureau. The bill now goes to Pres. Harding for approval.

CINDER SQUAD DEPARTS FOR BIG TEN MEET

Wisconsin to Meet Stiff Competition; Illinois Doped For Win

Ten members of the Wisconsin track team left at 7:45 this morning for Evanston where they will compete in the annual Big Ten indoor track meet to be held in Patten gym, Northwestern university, tonight and Saturday. The remainder of the squad will follow this afternoon.

Coach Mead Burke accompanied the following track and field men: Spetz, Platten, Hohlfeld, Johnson, McClure, McCandless, Wade, Ramsey, Merrick, and Stolley.

Coach Thomas E. Jones has selected eleven athletes to leave this afternoon. They are: Capt. "Al" Knollin, Newell, Wille, Schnieder, Rossmeissel, Moorhead, Gibson, Hamman, Tomlinson, Sundt and Ellinson.

Prelims Tonight

Preliminaries in the quarter-mile run will be held in Patten gym tonight at 7:45. Johnson, Spetz, McCandless, and Ellinson will attempt to qualify over such speedy men as Brookins and Wilson, Iowa; Burke and Simmons, Michigan; Grausnick, Northwestern; Fessenden, Sweep, Schlapprizzi and Fields, Illinois; Sperling, Minnesota.

Three speedsters have been entered in the preliminaries of the half-mile run which is scheduled for 8:45. Ramsay, Hohlfeld, and Wade are slated to start against Yates, Illinois; Winter, Minnesota; Noll, Iowa; and Hattendorf, Michigan.

With squads of athletes from every Big Ten institution pouring into Evanston, opinion of experts picks Illinois as winner of the Big Ten meet for the third consecutive time. The Suckers copped in 1920, beat Michigan and Wisconsin last year, and are likely-looking winners for this year's meet.

Landowski vs. Merrick Michigan, Iowa, and Wisconsin will battle for second, third, and fourth places, according to those who "know." Michigan has a good set of sprinters and one good hurdler, Sargent, Landowski, recently discovered pole vault star, who hails from Milwaukee, will break into the scoring column in his event. Dale Merrick, Mid-Western intercollegiate pole vault champion, will have a difficult task to beat the Wolverine. The men tied for first place at the Illinois relays.

In the hurdles, Capt. "Al" Knollin, Stolley, and Newell will have hard going against the Wallace brothers from Illinois; Anderson, Minnesota; Sargent, Michigan; and Belding, Iowa.

"Pete" Platten is Wisconsin's hope for points in the high jump. Platten's feat of breaking the Barger indoor record against Iowa last Saturday indicates that he will furnish some stiff competition to Osborne, of Illinois.

Finkle Returns Sunday

Whether Michigan, Wisconsin, or Iowa finishes in second place will depend upon the minor places won by teams which are considered rank outsiders. If Northwestern, Chicago, Purdue, and Ohio cut in on points expected by members of the "Big Three," dope is likely to be upset.

George Finkle, Wisconsin two-miler who is in a South Bend, Ind., hospital with a broken right leg, will return to Madison with the Badger squad on Sunday.

Girls Play First Contests Tonight

A double header, the first games in the class contests for championship in women's basket ball, will be played tonight at 7:15 in Lathrop gym. The freshmen met the juniors and the sophomores meet the seniors. The games will be short, and the classes are to meet in groups for the cheering.

The captains elected for the teams are: Marjorie Fish, seniors; Florence Huprich, juniors; Elsie Harris, sophomores; Helen Robinson, freshmen.

**Showing of
Imported Silk
Sweaters from
Switzerland**

Swiss sweaters are of excellent quality and show not a few new ideas.

One sweater of jade with a white check has revers and girdles of plain heavy silk jersey. \$24.50.

A lace weave that is notably Swiss in design is to be found in lavender or fawn—very attractive at \$7.95.

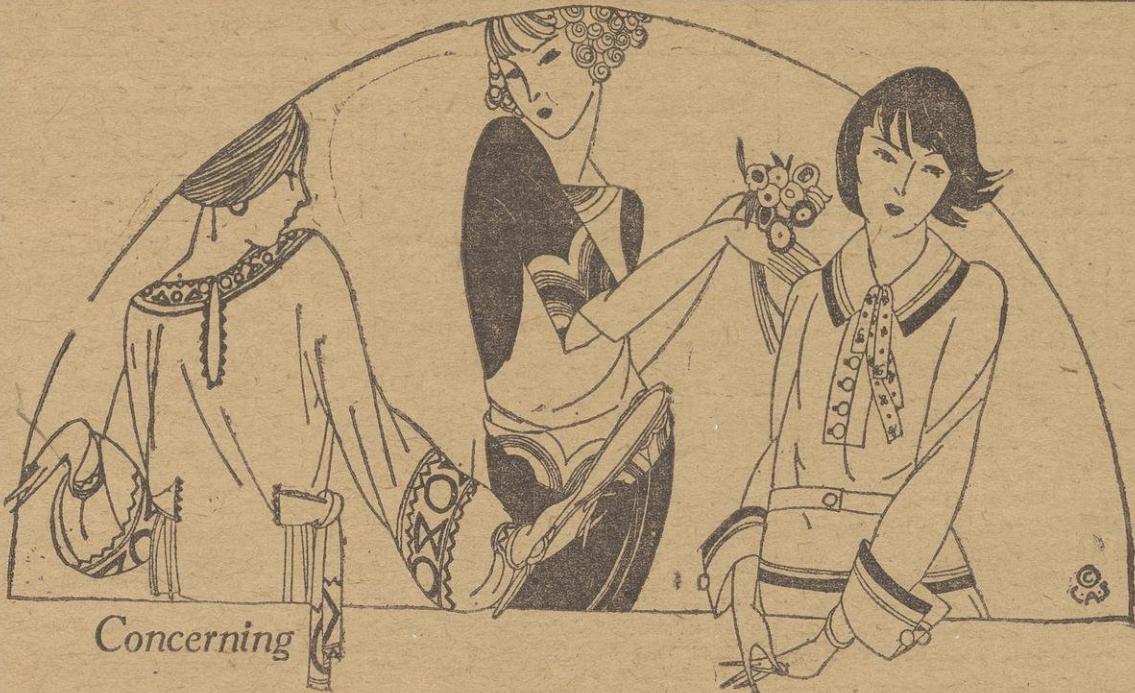

**New Skirts
Feature the
Wrap-Around
Style**

Ultra smart skirts this Spring are those deeply lapped at the side in the Wrap-Around style. Wool ratine appears under the title of Pompadour Knit; tweeds come in all manner of pleasing variations; and fringe is being accepted with the best of skirts.

A Fisher and Kennedy tweed plaid of tan and brown flecked with white and colored yarns is especially handsome. Tailored pockets are slashed at the sides and a fringe of the same material finishes the sides and bottom of this trim skirt. \$14.75.

White Pompadour Knit fringed at hem and boasting the smartest of black and white buttons in long tailored buttonholes, is perhaps the most handsome of the spring skirt arrivals, and decidedly different. \$18.50.

Concerning

Spring Blouses

And Their Complements

Many of the new blouses speak with a decided Russian accent judging from the new arrivals for wear with Spring suits.

A Russian Blouse

Emphatically different is a Russian blouse of white canton shirred at the neck in black stitching. The sleeves are cut in raglan style at the shoulder and their fullness caught into a narrow cuff at the wrist. Appliqued medallions of dull, rich Bulgarian colors add a distinctive touch to sleeve, cuff and front. \$15. The same styles are carried out in georgette and crepe de chine in white and colors.

Blouses of Silk

Favored for the Spring Tailleur

Smartness is sewed into every line of a white Pussy Willow blouse with a high, V-shaped tailored collar of narrow tucks in block design, set off with a stunning little bow of black gros grain ribbon. The cuffs and button plait are tucked likewise. \$10.50.

**Exquisite Fleur de Lis
Hand Made Blouses**
\$3.98 to \$10

There's something so dainty and exclusive about a handmade blouse, hand hem-stitched and embroidered, entirely done by hand even to the seams, and trimmed with real filet or baby Irish lace. The material is a very fine imported French Voile. The essence of daintiness for sweater-wear is a certain handmade blouse in tuxedo roll collar edged with wide filet in rose pattern and distinguished with drawn work and embroidery. \$8.50. There are many others for less.

Keeley-Neckerman Co.
