The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

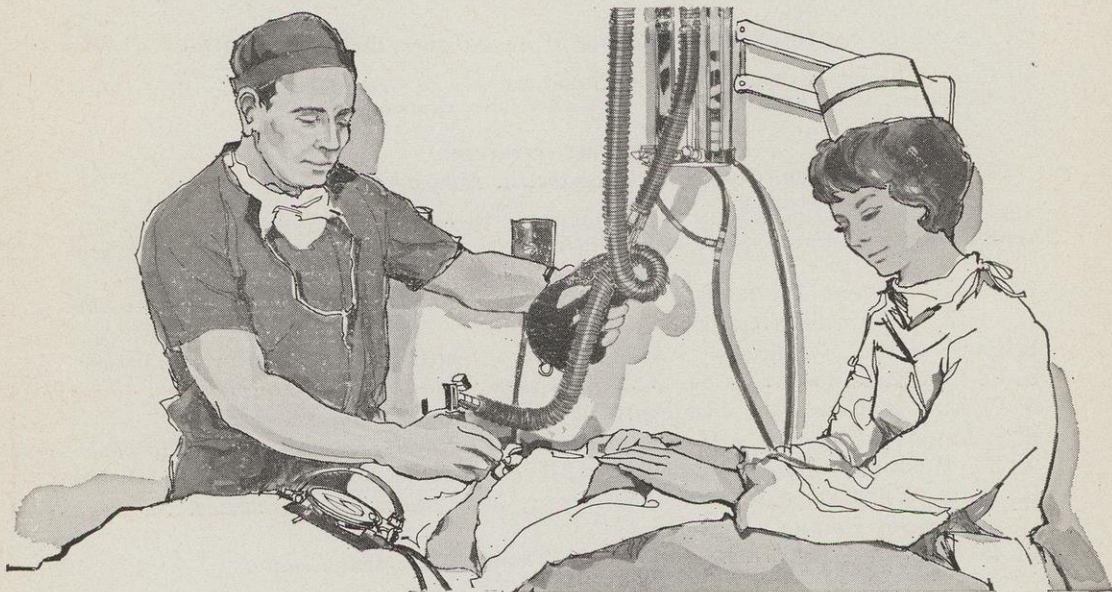

The new non-depolarising neuromuscular blocking agent

PAVULON

**RAPID ONSET OF ACTION
NO HISTAMINE RELEASE
NO GANGLION BLOCKADE
TROUBLE-FREE REVERSAL
FEWER SIDE EFFECTS**

**LESS TIME TO INTUBATION
NO BRONCHOSPASM
NO HYPOTENSION
LESS TACHYCARDIA
GREATER SAFETY**

Clinical trials involving more than 3,000 patients confirm that Pavulon, Pancuronium Bromide, produces reliable and predictable relaxation. Maximum effect is achieved in 2-2½ minutes; duration of effect is about 45 minutes from an initial dose.

Presented in packs of 6 ampoules and 25 ampoules, each ampoule containing Pancuronium Bromide 4 mg, Sodium Chloride B.P. 18 mg, and Water for Injection B.P. to 2 mls. Further information on request.

The relaxant of choice . . .
Especially in poor-risk patients
