- **About 1200 Pages a Year**
- **Published Every Other Month**
- **Two Symposia an Issue**
- **Paperback Format**
- **\$16.00 a Year**

Devoted exclusively to therapy, *Modern Treatment* offers you the most efficient way yet developed to keep informed of the methods used today by the foremost internists at leading treatment centers.

- It delivers to you every other month a handsome, handy 200-page book containing two new treatment clinics or symposia. Each symposium is carefully planned by a Guest Editor, known for his expert knowledge of the subject and for awareness of the needs of the clinician. He, in turn, assigns each topic in the symposium to an author carefully selected for his clinical experience in the particular area as well as for his skill in presenting information in clear, concise and practical fashion.

- Drugs are specified, exact dosages given, precautions and side effects explicitly described, and minute directions for administration included in all cases. The authors describe in full the step-by-step management of the patient, the methods for prevention of complications, and the handling of those which do occur. They provide meticulous information on care of the convalescent, follow-up or long-term therapy, and the results to be expected each step of the way. When appropriate, the authors also explain the physiologic basis of treatment, and the rationale of therapy—the soundest approach to modern medical care!

Hoeber Medical Division • Harper & Row, Publishers
