COME TO SHEBOYGAN

TO OUR PATRONS AND PROSPECTIVE CUSTOMERS

This catalogue is a very expensive publication, has required years of experience, a great deal of time and considerable money to compile, therefore, we do not make it a rule to send same out gratis, but charge 25 cents for same.

You having sent us 25 cents for same is very good evidence that you are interested and not merely a curiosity seeker; furthermore, it having cost you something it will be well taken care of.

We assure you that this 25 cents is only a small fractional part of the cost of this catalogue and we trust, you as a business man, will use it right, and we respectfully request you to retain it for future reference, should you not require anything in our line at present. We will also appreciate any efforts you may make in our behalf with any of your friends that may require anything in our line. Duplicate copies of same can be had upon receipt of 25 cents.

We do not think it necessary to worry you with a long introduction, as most everyone in business knows of us, so we will be short and to the point.

Our past customers and goods that we have made—speak for us; in short, the trade knows "That if it is from Winter, it is right."

Regarding our financial responsibility we refer you to any commercial agency, any bank or business house in our city.

You will find our goods right, our prices right, and we will treat you right.

Soliciting your patronage and thanking those that have patronized us in the past, we are,

Yours truly,

M. WINTER LUMBER Co.,

Sheboygan, Wisconsin.

We have endeavored to make Descriptions, etc., in this Catalogue so plain that you will understand same as well as we do. Just to show a pretty cut and give you no Specifications does not Guarantee you anything. Please read our Specifications carefully and you will find there is nothing left to guess at.

COME TO SHEBOYGAN

AN INVITATION TO VISIT SHEBOYGAN

WE WOULD LIKE TO MEET YOU and extend you a cordial invitation to visit Sheboygan at any time—business or no business.

If on a pleasure trip Sheboygan is well worth visiting. It is a city of about 26,000 people; situated on Lake Michigan; 132 miles north of Chicago; accessible by the Goodrich line of boats and the Northwestern Railway.

If on business we are quite sure it would pay you, as it is one of the largest furniture manufacturing cities in the United States. You can leave Chicago early in the morning, spend nearly a whole day in Sheboygan, and be back in Chicago in the evening.

If in need of anything in our line, we are *sure* it will pay you to become acquainted with us personally, inspect our plant, examine our work, see the stores we have fitted, cases, etc., in our sample room, and permit us to make you plans, sketches, specifications and prices while you wait and do business direct with the factory.

We know that it is more satisfactory to the customer to be able to see the goods and do business direct with headquarters, and, therefore, we have no branch offices at our expense anywhere. Of course, we can send one of our designers to make you

plans, figure with you, etc., but that will not be as satisfactory to you as if you come here where you can see the goods; furthermore, you can save money by coming to Sheboygan, if your order is large enough to warrant it.

We have visitors during the year from all parts of the country, and even from foreign countries, and believe they will all admit that it pays them and is the most satisfactory way to buy fixtures, furniture, show cases and special work. Our past customers and years of experience speak for us.

If you have an order of considerable size to place, take the exact measurements of your room, get on a train and take a combination business and pleasure trip to Sheboygan. Remember Sheboygan, WISCONSIN—not Cheboygan, MICHIGAN. (Cheboygan, Michigan, is a small town on the other side of the lake.)

Should you contemplate visiting us, kindly correspond with us regarding same, advising us when you expect to be here. In the meantime we are at your service, for any further imformation you may desire in reference to train service, hotel accommodation, etc., etc. We hope to have the pleasure of meeting you at an early date.

Cordially yours,

M. WINTER LUMBER CO.

Sheboygan is located on Lake Michigan, on the Chicago & Northwestern Railroad, only about three and one-half hours' run from Chicago, with five trains each way each day. IT WILL PAY YOU TO COME TO SHEBOYGAN.

OUR ADVANTAGES

IT WILL PAY YOU TO VISIT US AT SHEBOYGAN

OUR LUMBER YARDS AND MANUFACTURING PLANT

OUR MOTTO:

Good Goods. Reasonable Prices. Prompt Service.

OUR RECORD:

We are modest and don't like to "blow our own horn," so refer you to our customers, who will speak for us.

OUR RESPONSIBILITY:

Write any Commercial Agency or any Bank, Trust Company or Business House in our City.

OUR ADVANTAGES:

Right in amongst the Lumber Region of the North.

Good Railroad and Lake Transportation Facilities.

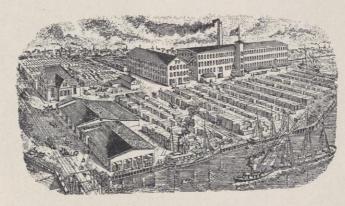

Large Grounds for Piling Lumber.

Large Dry Kilns.

Large Manufacturing Plant.

Large Finishing Rooms.

Large Warehouses.

View from the Southwest.

OUR FACILITIES:

We have the most up-to-date Designers.

We have only up-to-date Machinery.

We have on our employ only the best Mechanics.

We have the most practical Foremen.

We have the finest Finishing and Coating Rooms

We have seven of the best Dry Kilns made.

We have many inventions of our own, all of which are necessary to make fixtures perfect and complete.

We have been in the business since childhood and, though we do not claim to know it all, and are learning every day, we think our experience puts us a little ahead of our competitors.

We have the best facilities all through our plant and business, which enables us to do your work at right prices.

SPECIAL NOTICE

OUR DESIGNING DEPARTMENT is in charge of our General Manager, Mr. Charles F. Kade, who is a Practical Fixture Architect and Designer, with over Twenty (20) Years' Experience. Has designed and fitted Stores, Banks and Offices in all parts of the United States; is also a practical man in all branches of the business, having started in as an apprentice when he was 14 years old and worked his way through the mill. He is a thorough mechanic and conceded to be one of the most practical fixture designers in the United States.

Is also inventor of many of the patented features that have made modern fixtures what they are today; some of which are the following:

Kade's Sectional Drug Fixtures. Kade's Hygienic Soda Fountains.

Kade's Knock-Down Show Cases.

Kade's Knock-Down Combination

Kade's Knock-Down Pyramid Tables. Kade's Bakery Display Cases.

Kade's Sugar Counters.

Kade's Tilting Bin Counters.

Kade's Perfecto Grocery Shelving.

Kade's Fruit Display Cases.

Kade's Cigar Cases.

Kade's Coffee Counters.

Kade's Sectional Bank and Office Partitions.

Kade's All Plate Glass Cases.

Kade's Butter Counters. Kade's Upright Display Bins.

Kade's Folding Knock-Down Counters. Kade's Adjustable Display Tables.

Kade's "Original" Package Counters.

Kade's Pyramid Display Stands.

Kade's Steel Door Sheaves and Track. Kade's Safety Adjustable Brackets.

Kade's Combination Case and Desk.

Kade's Show Case Legs.

Kade's Sponge Cases. Kade's Automatic Coffee and Tea Caddies. Kade's Cracker Counters.

Kade's Novelties, etc., etc. Kade's Folding Parlor Tables

(Automatic).

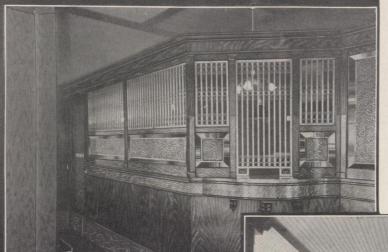

Kade's Metal Show Case Legs. Kade's Non-fall-out Ratchet Strips. Kade's Removable Glass Doors. Kade's Pneumatic Syrup Jars. Kade's Metallic Kitchen Cabinets. Etc., etc., etc.

References of Stores Designed and Fitted, all over the United States, on application.

YOU GET THE BENEFIT OF HIS EXPERIENCE and also the ideas of hundreds of merchants that he has accumulated from merchants that he has fitted stores for; combining these ideas with your ideas of what you want, enables us to give you the best results obtainable. We are prepared to make special plants, designs, specifications, etc., when necessary, for anything you may want in the wak of High Grade Store, Bank and Office fixtures and special cabinet work of all kinds, and for which we will make no charge; but before doing so, we require reasonable assurance that we have good cause to expect to obtain your order.

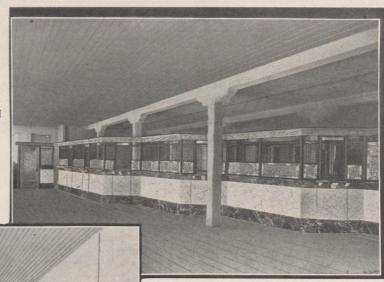

Mr. Kade has under him a number of practical draughtsmen, who are also brought upin the business and learned their profession from us, and in the factory—by a practical superintendent and practical foremen in each department. Thus your work receives our personal attention from beginning to end, and you also receive the benefit of the numerous inventions above referred to.

SPECIAL NOTICE TO OUR CUSTOMERS

This Catalogue and List Supercedes all previous Catalogues and Lists, and all former prices are hereby declared Null and Void.

All Show Cases are carefully boxed and shipped RE-LEASED unless otherwise ordered.

Send full shipping directions, if you have any preference, or we will use our own judgment in routing. We ship via cheapest route when no routing is specified.

RAILROAD COMPANY'S RECEIPT IN "GOOD OR-DER" constitutes delivery, and we are not responsible for breakage, damage or delay in transportation.

WE GUARANTEE SAFE DELIVERY. We have very little breakage. Should there be any, have your agent notate on freight bill before accepting goods.

WE RECEIVE NO UNPAID TELEGRAMS, so if you have any communications to make by wire, be sure to prepay charges.

MAKE ALL ORDERS as explicit as possible, so as to avoid loss of time and unnecessary correspondence.

BE SURE TO MENTION wood wanted; when no wood is specified we take it for granted that oak is wanted and send same in oak.

REGARDING FINISH. Be sure to mention color or shade desired, so as to make no mistake. If the finish is to match anything you already have, it will be well to send a small piece of same to match color by.

VERIFY all telegraph and telephone orders by mail, as we assume no responsibility regarding correctness of such orders.

DESTROY ALL FORMER LISTS. THIS ONLY WILL GOVERN.

NO ORDERS subject to cancellation after two days from receipt thereof. If you send us any orders you do so with above understanding.

WE ARE THE SOLE MANUFACTURERS of the celebrated "Kade" Patent Knock-down System of Show Cases, Floor Cases, and all Plate Glass Cases, as well as other important improvements in the Store Fixtures, Show Case and Commercial Line invented by our Mr. Charles F. Kade, and shall protect our rights by vigorously prosecuting any infringements.

We do not only show you a pretty cut of the goods, but we give you detailed Descriptions and Specifications so you will know all about them.

GRADES OF WORK

IT DON'T PAY to buy cheap goods just because they are cheap. If you will buy the best at once, you will save money in the end. We do not make cheap goods, but we do make Good Goods Cheap. We of course make different grades of work to meet the demands. "XXX" High Grade for Fixtures, Show Cases, Fine Cases, etc., of all descriptions. "XX" Medium Grade for Stock Show Cases, Combination Cigar Cases,

Wall Cases, Desks, Chairs, etc., where a medium grade of work is demanded. "X" a Good, but Cheap Grade for low priced Fixtures, Cases, etc., such as Fruit Cases, Grocers' Counters, Perfection Bins, etc. Our "XXX" is the best there is. Our "XX" is better than most firms' high grade work. "X" is well made, but cheap.

TERMS ARE CASH

Our REGULAR TERMS are net 30 days; 2% for cash in 10 days, or 5% for cash with order.

If you desire SPECIAL TERMS kindly mention same, and we will accommodate you if we can consistently do so.

WE USE ONLY THE BEST OF MATERIAL as well as the best of workmanship, and to enable us to make Low Prices for goods that are Right we make our terms as above.

DISCOUNTS ARE SUBJECT TO CHANGE without notice. Quotations are all F. O. B. Factory. No charge for crating or packing.

ON APPLICATION we will furnish discounts. On application we will furnish you Special Designs and Specifications for anything you may want in our line.

IF YOU DON'T SEE in our printed matter what you want, ask for it. We have it or will make it for you.

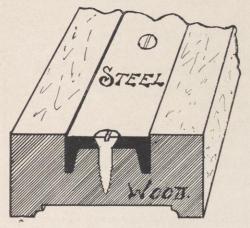

REFERENCES. If you have no commercial rating, always send good references with your order. Where good references cannot be furnished, Cash is required with the order, or upon receipt of half cash with an order, to guarantee good faith, we will send goods C. O. D. with draft attached.

OUR RESPONSIBILITY. Regarding our work and business methods, any of our customers will tell you all about us. Regarding our financial standing, any Commercial Agency or Bank, Trust Company, or Business House in our city will tell you all about us.

WE HAVE BEEN IN BUSINESS SINCE 1865—forty-three years. We are in it because we like it, and we are going to stay in it, and we want your good will.

"WINTER'S" STEEL REINFORCED GLASS DOOR STILES AND PILASTERS

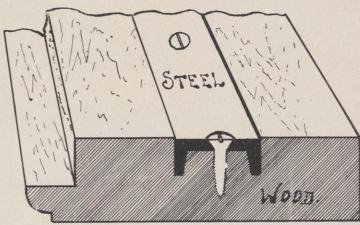

TWO OF THE KADE INVENTIONS

Section of Pilaster.

Cuts show our *improved method* of reinforcing our Slide Sideway Glass Door Stiles and Pilasters by cold rolled steel channels countersunk in the rear to keep them in proper shape.

This feature is now used on all our large slide sideway glass doors and free standing pilasters on wall cases and patent medicine shelving.

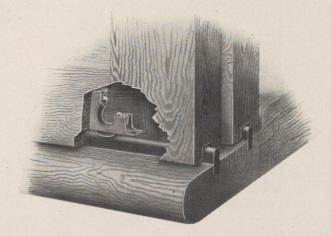

Section of Glass Door Stile.

The "Winter" way of making slide doors is the best because it is the simplest and most durable solution of the sliding door problem.

BALL-BEARING "ROLLERS" that roll—not the so-called ball-bearing sheaves that slide and wear out.

OUR "ROLLERS" roll almost noiselessly and work perfectly, rolling on *countersunk cold-rolled* steel tracks.

PRICES SUBJECT TO DISCOUNT

CONSTRUCTION A NO. 1. All large glass doors having steel lined door stiles, so they will always stay straight.

FRAMED BOTTOMS with SOLID RAISED BOTTOMS so as to prevent expansion and contraction, and raises the bottom above the tracks, which makes it easy to clean.

See the point?

"Winter Fixtures" "the standard of quality."

THE ADJUSTABLE BRACKET "WINTER" USES

THE BEST IS NONE TOO GOOD FOR OUR CUSTOMERS

OUR OWN INVENTION. Patented March 24, 1903, by Chas. F. Kade.

IT IS NOT CHEAP, but it is the best and is safe.

OUR NEW STYLE ALL STAMPED STEEL SAFETY ADJUSTABLE BRACKET used in our floor cases, jewelers' wall cases, etc.

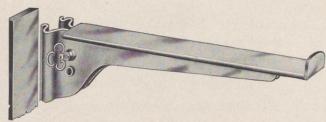

MADE OF STAMPED STEEL, on the "knife edge" principle. Put together with lock-joints, finely finished in polished nickel plate.

SUITABLE FOR ALL KINDS OF SHELVING.

THESE BRACKETS can be adjusted in height every oneeibht inch stead of every inch like the Key Hole Brackets.

THESE BRACKETS can be extended in length from 1" to 2" on an 8" bracket, from 6" to 8" on an 18" bracket.

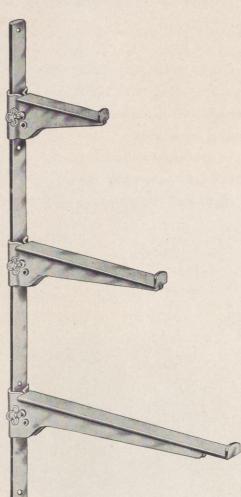

THESE BRACKETS can be adjusted within 3" of each other and can be instantly removed from back bar without disturbing other brackets.

Cut shows Bracket removed from back bar.

A FEW ADVANTAGES

THESE BRACKETS combine more valuable features than any brackets today on the market; being strong, they are adaptable to all classes of work; they are very attractive in design and are a high-grade article in every respest.

Cut shows Back Bar with three different length Brackets.

THESE BRACKETS are the strongest and the lightest made.

THESE BRACKETS use only 3" space on back bar, hence can be set closer together than most brackets.

THESE BRACKETS being stamped steel on the knife edge principle, are strong enough to act as shelf cleats to keep wooden shelves straight.

THESE BRACKETS can be used for wooden shelves, sliding shelves of glass shelves.

THESE BRACKETS are easier to adjust on account of clamp and position of screw. (Screws are interchangeable from right to left.)

THESE BRACKETS can be instantly removed from back bar without moving other brackets or shelves. A feature possessed by no other steel adjustable bracket.

THESE BRACKETS have 6" of holding surface on back bar, although they only take 3" of space; a mall twist on thumb screw instantly secures same from slipping down on back bar.

PRICES OF THE "ADJUSTABLE BRACKET."

UNIVERSAL BRACKETS

Sizes, 6 in. 8 in. 10 in. 12 in. 14 in. 16 in. 18 in. 20 in. Price, each\$0.60 \$0.60 \$0.60 \$0.60 \$0.90 \$0.90 \$1.00 \$1.00 Brackets are packet 10 in a box, all sizes.

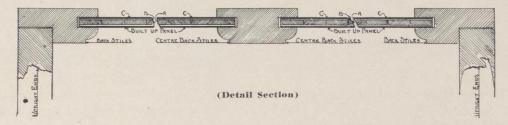

UNIVERSAL STANDARDS

ANY SIZE TO ORDER.

Screw holes are bored one-half inch from ends and at intermediate distances according to the length of standard.

The Adjustable Bracket That Is Adjustable

THE WINTER LUMBER COMPANY'S NEW SHELVING BACKING

This backing is intended mostly for Shelving Backing for Drug Store Fixtures, etc., and is used on all our best and medium grade outfits when specially requested.

Sections up to 4' wide are one piece in width without any stiles.

Sections over 4' wide are made with two panels and stiles as above detailed. When the sections are between 4' and 4' 3" wide then only the two panels and center stile is used.

EXPLANATION OF CONSTRUCTION.

"A" is glued-up pine strips. "B" is cement coating. "C" is insulated paper. This backing is painted the regular stock pea green color; other colors can be had at same prices.

THE BACKING THAT WILL NEVER GIVE YOU ANY TROUBLE

WHY NOT SELL WINTER'S FURNITURE POLISH?

"WINTER-SHINE"

THE WONDERFUL FURNITURE POLISH.

The best to be had. The same which we use on our high grade cabinet work.

Will make your old furniture look like new. This polish is put up in screw-top handy tin cans, which keeps it in good condition. Full directions in every package.

It will polish anything that has a rubbed varnish surface, such as Pianos, Organs, Chairs, Tables, Bedsteads and other Furniture; also any kind of Store Fixtures, Carriages, Sewing Machines, Bicycle Frames, the woodwork in your house, etc.

It will put a smooth, high polish on any good rubbed varnish surface.

RETAIL PRICES TO YOUR CUSTOMERS.

1/4	Pint Cans	 .\$.25	net	cash
1/2	Pint Cans	 	.40	net	cash
1	Pint Cans	 	.75	net	cash
1	Quart Cans		1.25	net	cash

DRUG STORE AND PHARMACY FIXTURES

FOR FLOOR CASES, SHOW CASES, CIGAR CASES, COUNTERS, ETC., SEE CATALOGUE NO. 88.

NOTICE. If you do not find herein what you are looking for, let us know. Give us a rough idea of what you want and we will be pleased to submit SPECIAL designs.

SPECIAL NOTICE. In writing for estimates it is very important that we have the following information:

1st—How soon will you place your order?

2nd—How soon will you want the goods?

3rd—About how much do you intend to invest?

4th—Is there any design in our catalogue that suits you?

5th—What wood and finish do you want?

6th—Where are the fixtures to be shipped to?

7th—We presume you intend to pay cash?

Please give us this information with your reply and oblige.

If you don't find herein what you are looking for, write us and tell us what you want and we will send special sketches. WE HAVE IT OR CAN MAKE IT

TO PROSPECTIVE PURCHASERS OF DRUG STORE AND PHARMACY FITTINGS OR FIXTURES.

As suggestions, we submit for your inspection, floor plans, interior views, etc., of a few of our modern, up-to-date drug store fixtures.

In writing for estimates be sure to give us as much information pertaining to your wants as possible.

Also kindly let us know the following:

1st—Approximately, how much do you intend to invest?

2nd—About when will you be ready to place your order?

3rd-About what date do you want the new fixtures?

4th—Which of our designs suits you best?

5th-What kind of floor will you have?

6th—What kind of wood do you prefer?

Will you need a fountain, or have you one?

SPECIAL NOTICE. Always give exact inside measurements of room.

Always give exact measurements between points indicated by dotted lines, in which we have omitted writing in measurements. See different plans. Always give measurements of fountain that you have or that you intend to buy. Also give wall space that you intend to cover with fountain top.

Also give length, height and width of bulkhead in show window.

Always give location of store, how near corner of block, etc., whether facing north, south, east or west.

Always state if you want combination cases, or counters and cases, or some of each.

Always be explicit about material, finish, quality of glass, etc. Any plan figured to suit any style. Fixtures to suit customers.

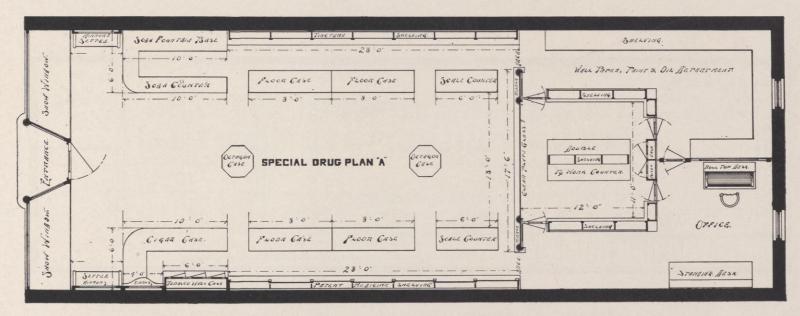

If you cannot give us all the above information, give us what you can.

Following floor plans are merely submitted to give you ideas regarding arrangements.

For floor cases, counters, etc., see catalogue No. 88.

DRUG, JEWELRY AND CIGAR STORE FIXTURES

GENERAL INFORMATION AND PRICES OF SPECIAL ARRANGEMENTS FOR DRUG STORE FIXTURES.

MINIMUM LENGTHS, ETC

LENGTHS given in this list are always OUTSIDE LENGTHS. For other dimensions see descriptions in catalogue.

Prices given per foot in this price list are based on the following minimum lengths, unless specially mentioned in catalogue. For shorter lengths the advance of 10% is made, added to the regular

Rx counters, minimum lengths...... 8 ft. each

BASIS OF LIST PRICES.

All list prices are on an oak basis, unless otherwise specified, finished in natural, antique, or golden oak. Birch, any desired finish, same price as oak.

in quantities.

SPECIAL NOTICE.

Oak in brown or black flemish, mission, weathered or green waxed finish, same price as regular finish. Birch can also be made in walnut or ebony finish, at same price as regular finish.

Always state material and finish wanted.

REGARDING OUTFITS MADE PARTIALLY OF QUARTER-SAWED OAK AND PARTIALLY OF PLAIN OAK.

Quarter-sawed oak is very expensive at present and will un-undoubtedly continue to go higher as it becomes scarcer. To give the trade something between the plain oak and the quarter-sawed oak, we have decided to make when ordered, any of our outfits that are listed in plain oak, with the cornice face plates and the most prominent large surfaces in quarter-sawed oak, the balance in plain oak, for which add to such articles as are desired made in this manoak, 100 with add to act a steel as teles as a telested in quarter-sawed oak and are desired in above manner, deduct 5%. This same rule applies to part curly birch and part plain birch.

REGARDING FRACTIONAL FEET OF FIXTURES.

Fractions will not be figured at all. If any particular piece of fixture, show case, floor case, table or counter or wall paneling is wanted longer than 6', it must be figured into the 7' bracket.

REGARDING SLIGHT CHANGES OF REGULAR DIMENSIONS.

On all goods that must be made up to order, an inch or two either way will not make any difference in the price as long as it does not increase the glass sizes.

REGARDING LOCKS ON DOORS.

Locks can be put on any of our show case doors at a slight additional cost. Of course, on the patent slide down vertical doors the locks are already included in the price, there being a special lock and automatic spring catch necessary for such doors. On slide sideway doors we can put the automatic spring catch and lock combined on each door at an additional price of per door, \$1.50 We can put a cheap lock with flat key on at......per door, 1.00 Slide up doors for wall cases, etc., require good automatic mortise locks; same will cost extra per door. automatic mortise locks; same will cost extra....per door, 4.00

ELECTRIC LIGHT, GAS FIXTURES, ETC.

Electric light or gas fixtures shown in any of the furniture herein listed are not included in these prices. We have a separate sheet and price list for electric light and gas fixtures, such as chandeliers, etc., which will be mailed on application.

For reflectors and electric light fixtures for show cases, wall cases, etc., see page 713 in catalogue No. 88.

MARBLE BASES LISTED.

Where no particular quality is mentioned it is understood that same can be had in white Italian, light, dark or gray Tennessee, in suitable height, according to the style of goods for which same is intended, at the prices as listed.

For abeciment in the prices as instead.

For above marble bases—see schedule of prices for each different style cases listed in the same schedule as the case.

For special prices per lineal foot and per square foot—see schedule of the different kinds of marble.

MARBLE BASES PER LINEAL FOOT.

MARBLE BASES PER LINEAL FO	OOT: 7%"	thick,	with top

)nvx	1.25	1.50	

REGARDING DIFFERENT DRAWER ARRANGEMENTS IN DRUG SHELVING.

In all tincture shelving the base part can be arranged to suit In all tincture shelving the base part can be arranged to suit the purchaser as long as they are not stock outfits, and as long as there is not a greater number of drawers desired than shown in the cuts. Such outfits as the "New Leader," the "Badger State" and the "Wisconsin Special" that have only a 3' high base, can also be made with a 3' 6" high base by adding a row of drawers, if so desired. This would add to such outfits for the extra 6" and the extra

REGARDING GLASS DOORS ON TINCTURE SHELVING AND OTHER SHELVING WHERE NO GLASS DOORS ARE SHOWN.

Such shelving can be furnished with glass doors, figuring on a DSAa glass basis, at the following additional prices:
Hinge doors, 2 in each section......per lineal foot, \$3.00
Slide sideway doors, 2 in each section....per lineal foot, 3.00
Slide sideway doors, 1 in each section....per lineal foot, 4.00 Slide up doors, 1 in each section......per lineal foot, 5.00
This difference is not only caused by the doors, the glass and

the extra hardware, but also on account of the shelving requiring entirely different construction.

REGARDING GLASS BACKING IN TINCTURE

We can furnish DSAa glass backing in any of the shelving, painted either black, green, red or any desired color for any of our regularly listed outfits at \$3.00 per lineal foot extra. This glass backing would be backed up with our new style sectional backing and is really the finest and most practical backing to be had.

REGARDING CHANGES IN CENTER SECTIONS OF TINCTURE AND PATENT MEDICINE
SHELVING.
Sometimes center sections are desired to be arranged for cash

registers, thus requiring a recess with small doors for perfumery, etc., above. Such arrangements would add to the cost of our regularly listed outfits, such as the "New Leader," the "Badger State," the "Sheboygan Flyer, the "Great Western" and the "Wisconsin Special," the following extra additional amounts per section, so arranged:

With straight doors in the perfume case part, DSAa glass... \$25.00 With swelled front, bent DSAa glass in perfume case part... 40.00 With swelled front perfume case part, glazed with bevel plate ornamental glass, set together in metal oxidized copper

REGARDING PLATE GLASS IN TINCTURE SHELVING AND PATENT MEDICINE SHELVING.

Tincture shelving and patent medicine shelving are seldom ever wanted with plate glass, therefore, they are always listed with DSAa glass. Any of our regular height patent medicine shelving can be made with plate glass instead of DSAa glass at an additional price ofper lineal foot, \$8.00

REGARDING SHOW WINDOW WALL MIRRORS, SPECIAL WALL PANELING AND PIER MIRRORS.

The same comparative rule will apply as previously given "Regarding Wall Mirrors," adding proportionately for the difference in more elaborate designs, etc.

For general information regarding floor cases, show cases, etc., see pages 707 to 714, catalogue No. 88.

For general information regarding jewelry fixtures, see pages 500 to 508, this catalogue.

For general information

For general information regarding cigar store fixtures, see pages 600 to 606, this catalogue.

DRUG, JEWELRY AND CIGAR STORE FIXTURES

SPECIFICATIONS FOR "WISCONSIN" SPECIAL DRUG OUTFIT.

TINCTURE SHELVING. Made any length to order. Other dimensions are given on the cuts. Base part to have in each section three shallow pill drawers and twelve drug drawers. These drawers are to be our new style dust proof, lap front drawers, with hardwood sides securely dove-tailed to the fronts, backs and bottoms grooved in. All the horizontal divisions between the drawers are to be solid so as to prevent anything from the top drawers falling into the lower ones. All is to be backed up with matched and beaded ceiling so as to make same completely vermin proof.

The upper part will have in each section three adjustable shelves on Kade's new style ratchet strips, which cannot fall out. These shelves will be 5½" wide in the clear. The upper part is to be backed up with our new style sectional built-up backing, and is to be painted a suitable color on the inside. The cornice will be an overhanging cornice as shown on the cuts, supported by heavy free standing columns which will have fine columns and turned bases. The columns will be built-up columns and veneered with selected veneer so as to show an even surface all around. The cornice will be a finely swelled cornice with egg and dart moulding as shown

PATENT MEDICINE SHELVING. Made any length to order. Style and dimensions the same as the tincture shelving. Base part to contain in each section two slide sideway panel doors and three pill drawers. The paneled doors form a cupboard with shelf inside. These panel doors are to slide sideways on our new style noiseless arrangement. The panels in these slide sideway doors are to be built-up panels, cross glued, five-ply and veneered. The upper part is to contain in each section four adjustable shelves 8" wide in the clear, resting on Kade's new style ratchet strips, which cannot fall out. The upper part is also to contain in each section one large slide sideway clear glass door, glazed with best American double strength glass; to slide on our new style steel track and ball-bearing arrangement and are to be made dust proof with our rubber strip arrangement. The doors are to be made to take out to clean by our new style pilaster arrangement, which allows the doors to be taken out to clean on the outside and inside, without removing the goods or mussing up the store. This upper part is also to be backed up with our new style built-up sectional backing, painted a suitable color on the inside. The cornice, columns, etc., to be the same as on the tincture side.

PRESCRIPTION CASE CROSS PARTITION. Made any length to order. Cut shows a 10', in which the mirrors can be three different sizes:

First	Center Mirror	36x82
	Side Mirrors	36x42
Second	Center Mirror	40x82
	Side Mirrors	34x42
Third	Center Mirror	60x82
	Side Mirrors	

The mirrors are plain so-called French plate without any bevel, so as to make it appear as much as possible as if there were no mirrors there. The center mirror

extends up from the base board to the cornice. The side mirrors extend from the swelled shelves up to the cornice. These mirrors are jointed behind the columns so as to make it look like one mirror. The panelling underneath the side mirrors is plain surface, built-up stock, five-ply cross glued and veneered with selected veneers. The columns are heavy columns with turned bases and Romanesque Corinthian capitals. The two outside columns are three-quarters round; the two center columns are half round. When the mirrors are placed behind them, they look like completely round columns and the effect is to make the store appear twice as large as it really is. The columns are built-up columns, veneered with selected veneer so as to make an even surface all around. The center columns have two oval peep holes about 5' 6" from the floor. This mirror effect is simply grand and must be seen to be appreciated. The cornice is an overhanging cornice, through which electric light or gas fixtures can be dropped, as shown on the sketch, though these electric light or gas fixtures are not included in our prices. The cornice is arranged so that it can extend on each side to the shelving or to the wall if preferable.

MATERIAL. Can be made of any desired wood to order. Our prices are based on all exposed parts being selected quarter-sawed white oak; panels large surfaces, face plates, etc., being especially selected stock, panels being built-up cross glued five-ply. Non-exposed parts basswood; drawer sides hard maple. The backing in the lower part of the shelving is to be basswood, matched and beaded ceiling, as the mice will not bother basswood. The backing in the upper part is to be our new style sectional built-up backing, which can be painted on the inside the same as the walls.

CONSTRUCTION. Construction to be strictly first class according to the best methods known to modern cabinet makers.

GLASS. Mirrors in front of the prescription case to be so-called French plate. Glass in the patent medicine shelving to be best DSAa.

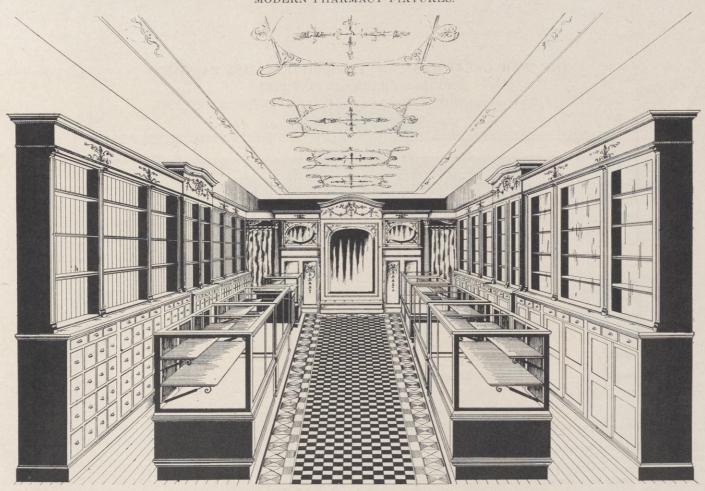

FINISH. Finish to be a hard oil, water rubbed and hand polished finish, three coat work and rubbed smooth between each coat; lastly water rubbed and polished by hand, of a suitable shade. The modern Ionic capitals on top of the columns can be finished up to match the color of the wood work, or can be finished up in the rich gilt, which looks very handsome. The upper part of the shelving will be painted a suitable color inside.

HARDWARE. Hardware to be in keeping with the rest of the fixtures. Label pulls to be furnished by contractor, but labels to be furnished by purchaser.

DELIVERY AND FITTING OF FIXTURES. Fixtures to be carefully fitted together in the factory, carefully packed and placed on board cars in condition so that one cabinet maker or carpenter can place same in position, with the assistance of a helper, ready for use in about fifteen or thirty hours (according to the size of the outfit) after the fixtures have been uncrated.

CARRIED IN STOCK. See stock list.

DRUG, JEWELRY AND CIGAR STORE FIXTURES

THE "NEW GREAT WESTERN" TINCTURE SHELVING.

MODERN PHARMACY FIXTURES.

The "New Great Western" Tincture Shelving.

Cut reduced to show seven sections.

WEIGHT. Approximate shipping weight, 78 lbs. per foot.

BASIS OF MATERIAL. Plain oak, quarter-sawed oak face panels and large surfaces, or plain oak and curly birch.

SPECIFICATIONS FOR "GREAT WESTERN" DRUG OUTFIT.

TINCTURE SHELVING. Any length to order. Base part to have in each section sixteen drug and three pill drawers. These drawers are our new style lap front drawers with lap fronts, and hardwood sides securely dove-tailed to the fronts, Backs and bottoms are grooved in. Base part, 3' 6" high.

All the horizontal divisions between the drawers are to be solid so as to prevent anything from the top drawers falling into the lower ones.

All is to be backed up with matched and beaded ceiling so as to make same completely vermin proof.

Upper part has three adjustable shelves in each section on Kade's new style ratchet strips, which cannot fall out.

Upper part is also to be backed up with our new style built-up backing, and is painted a pea green on the inside.

PATENT MEDICINE SHELVING. Any length to order. Same style and dimensions as the tincture shelving. Base part containing in each section two slide sideway panel doors and three pill drawers. The panel doors forming cupboards with shelf inside. The upper part contains in each section one slide sideway clear glass door glazed with double strength American glass. These doors slide sideway on our new steel track, ball-bearing roller arrangement, and are made dust proof by our rubber strip arrangement.

These doors are made to take out and clean, by our new style removable pilaster arrangement, which allows the doors to be taken out to clean both on the outside and inside, without removing the goods or mussing up the store.

The upper part also has three adjustable shelves 8" wide on Kade's new style ratchet strips, which cannot fall out, and is also backed up with our new style built-up backing; and painted a pea green, same as the tincture side.

PRESCRIPTION CASE. Any length to order. Cut shows case 12' long from outside of columns to outside of columns. The center mirror is a large mirror 36x66", 1½" bevel, is arched at the top and sets in receding frame. Underneath this mirror is a box settee or shelf. The side mirrors are oval mirrors, 24x36", 1½" bevel. Underneath these mirrors are swelled shelves to set a piece of statuary, a jardinier of flowers, etc., on. The columns are heavy free standing columns about 6" in diameter, with suitable cap supporting the cornice.

The arch connections connect with the prescription case front to the tincture shelving on one side and to the patent medicine shelving on the other.

PRESCRIPTION WORK COUNTER. Is 10' long as per design No. 301. To have poison case, bottle shelves, label desk, pill slides, cupboards for mortars and graduates, cork, tool and bottle drawers as shown.

THE CIGAR CASE. Is one 6' combination "Pyramid" cigar case as per our "Empire Special," bevel plate inlaid top, double strength front and ends. See page 807, catalogue No. 88.

THE SCALE COUNTER. Is a 6' double acting tilting bin scale counter, with four tilting bins in rear for sponges, etc. Eight display spaces in front. See page 825, catalogue No. 88.

SHOW CASES shown are two 6' and four 8' "Economy" show cases as per cut, and have double strength glass all the way through. They can be made with metal legs or receding base to suit the purchaser. See catalogue No. 88.

MATERIAL. All exposed parts to be of the best well seasoned and kiln dried oak. Face plates and larger surfaces, quarter-sawed oak. Can also be made of other woods.

Non-exposed parts to be of soft wood.

Drawer sides and prescription counter work top to be of hard maple.

DESIGN. Design to be as per regular "Great Western" design.

WORKMANSHIP. Workmanship to be strictly first class in every respect and in accordance with the best methods known to modern cabinet makers.

GLASS. Mirrors in front of prescription case to be what is known as French plate, 1 1/4 " bevel.

The other glass to be double strength American.

FINISH. Finish to be strictly first class, three-coat work, water rubbed and hand polished.

HARDWARE. Hardware to be in keeping with the rest of fixtures. Label pulls to be furnished by the contractor, but purchaser to furnish the labels.

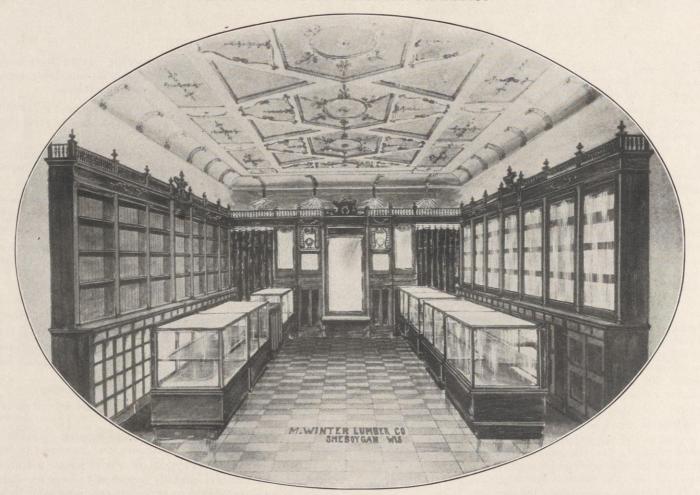

DELIVERY AND FITTING OF FIXTURES. Fixtures to be carefully fitted together at the factory, carefully packed and placed on board of cars in a condition so that one cabinet maker or carpenter can place same in position with the assistance of a helper, ready for use, in about 14 working hours after they are uncrated.

Made any length and dimensions to order.

SPECIFICATIONS FOR "SHEBOYGAN FLYER" DRUG OUTFIT.

FOR ILLUSTRATIONS SEE PAGES 398, 399 AND 400.

TINCTURE SHELVING. Any length to order. Base part to have in each section sixteen drug and three pill drawers. These drawers are our new style lap front drawers with lap dust proof fronts, and hardwood sides securely dove-tailed to the fronts. Backs and bottoms are grooved in.

All the horizontal divisions between the drawers are to be solid so as to prevent anything from the top drawers falling into the lower ones. Base part 3' 6" high.

All is to be backed up with matched and beaded ceiling so as to make same completely vermin proof.

Upper part has three adjustable shelves in each section on Kade's new style ratchet strips, which cannot fall out.

Upper part is also to be backed up with our new style built-up backing, and is painted a pea green on the inside.

PATENT MEDICINE SHELVING. Any length to order. Same style and dimensions as the tincture shelving. Base part containing in each section two slide sideway panel doors and three pill drawers. The panel doors forming cupboards with shelf inside. The upper part contains in each section one slide sideway clear glass door glazed with double strength American glass. These doors slide sideway on our new steel track, ball-bearing roller arrangement, and are made dust proof by our rubber strip arrangement.

The doors are made to take out and clean, by our new style removable pilaster arrangement, which allows the doors to be taken out to clean both on the outside and inside, without removing the goods or mussing up the store.

The upper part also has three adjustable shelves 8" wide on Kade's new style ratchet strips, which cannot fall out, and is also backed up with our new style built-up backing; and painted a pea green, same as the tincture side.

PRESCRIPTION CASE CROSS PARTITION. Any length to order. Cut shows the front of the prescription case is 10' long, as per design. Has a large center mirror, 30x66", 1½" bevel French plate, also two side mirrors 18x36", 1½" bevel French plate, also grilles, show globe openings with pedestal for show globe, and crystalline glass underneath the show globe openings.

The cornice connections run over the passage ways and connect with the tincture shelving on the one side and the patent medicine shelving on the other side.

PRESCRIPTION WORK COUNTER. The 10' prescription work counter fits behind the prescription front. Is arranged as per design No. 302. Has poison case, bottle shelves, label desk, pill slides, cupboards for mortars and graduates, tool, cork and bottle drawers as shown.

THE SCALE COUNTER is a 6' tilting bin scale counter, with four tilting bins in rear for sponges, etc. Glass display front. See page 825, catalogue No. 88.

SHOW CASES AND COUNTERS. See catalogue No. 88.

MATERIAL. All exposed parts to be of the best seasoned and kiln dried oak; can also be made of other woods.

Non-exposed parts to be of soft wood.

Drawer sides and prescription counter work top to be of hard maple.

DESIGN. Design to be carried out as per cuts of our regular "Sheboygan Flyer" outfit.

WORKMANSHIP. Workmanship to be strictly first class in every respect and in accordance with the best methods known to modern cabinet makers.

GLASS. Mirrors in front of prescription case to be what is known as French plate, 1½" bevel.

The other glass to be double strength American.

FINISH. Finish to be strictly first class, three-coat work, water rubbed and hand polished.

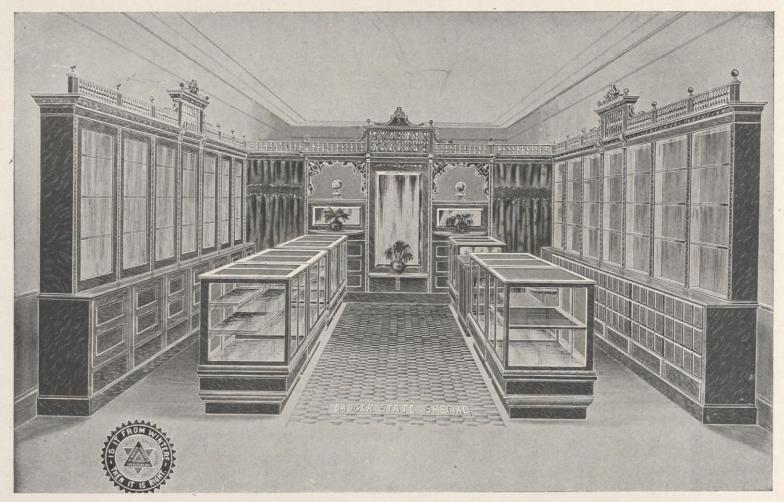

HARDWARE. Hardware to be in keeping with the rest of fixtures. Label pulls to be furnished by the contractor, but purchaser to furnish the labels.

DELIVERY AND FITTING OF FIXTURES. Fixtures to be carefully fitted together at the factory, carefully packed and placed on board of cars in a condition so that one cabinet maker or carpenter can place same in position with the assistance of a helper, ready for use, in about 14 working hours after they are uncrated.

Made any length and dimensions to order.

THE "NEW BADGER STATE" STYLE DRUG OUTFIT.

MODERN PHARMACY FIXTURES.

Practical Arrangement. Artistic Design. A No. 1 Workmanship, Material and Finish.

This is an interior view showing the outfit set up complete, using 30' tincture shelving, 30' patent medicine shelving, 10' prescription cross partition with arch connections to shelving on each side, four 8' Kade "Economy" knock-down show cases, improved style, two 6' cases same and one 6' cigar case to match, also one 6' tilting bin counter. Other styles of cases and counters can be used just as well. For prices on counters and cases, see catalogue No. 88. For general specifications see page 407. Made any dimensions to order.

For floor cases, etc., see catalogue No. 88. Read pages 320, 321 and 329.

BASIS OF MATERIAL. Oak or birch. Strictly up-to-date. Strictly full value.

DRUG, JEWELRY AND CIGAR STORE FIXTURES

SPECIFICATIONS FOR "BADGER STATE" SPECIAL DRUG OUTFIT.

TINCTURE SHELVING. Made in any desired length. For height, depth, etc., see measurements given on cuts. The drawers are to be our new style lap front drawers, dust proof fronts, and hardwood sides securely dove-tailed to the fronts; backs and bottoms grooved in. All the horizontal divisions between the drawers are to be solid so as to prevent anything from the top drawers falling into the lower ones. There will be three rows of drawers as shown, the balance to the floor being a solid front and base board. This is a very nice feature on this outfit, as it raises the lower drawers quite a distance from the floor, hence it is not necessary to stoop so low. The base part is to be backed up with matched and beaded ceiling so as to make same completely vermin proof. Base part, 3' high.

The upper part is to have three shelves in each section, 5½" wide in the clear, adjustable on Kade new style non-fall-out ratchet strips. The upper part will be made on the Kade improved knock-down principle so that any one can set it up ready for use in a very short time. This upper part being built knock-down makes it possible to secure a very low freight rate, as it can be shipped under K. D. rate. The upper part is to have our new style sectional built up backing, which makes the shelving very rigid.

PATENT MEDICINE SHELVING. Made any desired length. For height, depth, etc., see measurements given on cuts. The sliding doors in the base part are raised the same distance from the floor as the lower row of drawers in the tincture part. This is a very nice feature, as it also prevents stooping so low to reach the goods. These doors will slide sideway on our new style noiseless arrangement, will be made dust proof with our rubber strip arrangement and will be one large door in each section, so that the whole section can be opened, if desired. There will be one shelf inside. This base part will also be backed up with matched and beaded ceiling so as to make same completely vermin proof.

The upper part is to have three shelves in each section, 8" wide in the clear, adjustable on Kade new style non-fall-out ratchet strips. Upper part will be made on the Kade improved knock-down principle, so that any one can set it up ready for use in a very short time. By making this upper part knock-down

it secures a very low freight rate, as it can then be shipped K. D. The upper part is to have our new style section built up backing, which makes the shelving very rigid. The upper part is also to have in each section one large slide sideway clear glass door, glazed with best DSAa glass, one light in each door. These doors are to slide on our new style countersunk steel track ball-bearing arrangement, made dust proof with our rubber strip arrangement. These doors will be made to lift out from the front with our sliding pilaster arrangement, so that they can be cleaned inside and outside without removing the goods from the shelves or mussing up the store. Making one large door in each section does away with the wood work required for two doors, and enables one whole section to be opened at a time. The doors are out of the way, opened or closed.

DELIVERY OF FIXTURES. Fixtures to be carefully fitted together at the factory, completed in every respect, taken apart, carefully marked together, carefully packed and placed on board of cars in such a condition so that one cabinet maker or carpenter can place same in position, with the assistance of a helper, ready for use, in about 14 hours after they are uncrated. It is hardly necessary to employ a cabinet maker to put these fixtures together, as almost anyone can set them up without the aid of tools, except a screw driver and a hammer.

PRESCRIPTION CASE CROSS PARTITION. The front of the Rx case would be made any length to order. The design shows a 10' Rx case cross partition, which is made with a large center mirror 30x60, 11/2" bevel French plate. Also two side mirrors, 14x32, 11/2" bevel French plate. These two side mirrors are laid landscape and have swelled shelf underneath for placing statuary, plants, etc., on. Above these two side mirrors is an opening with grille work as shown. The grille work is made of wood, handsomely scrolled out, and is made of built-up stock so that it cannot break. In the center of these openings are turned discs or plates to set a show globe on. Can also be used for any other ornamental purpose. This partition is made sectional so that it can be shipped K. D. also. The cornice connections are made to match as shown in design, and can be connected to the shelving on either side or run straight from the partition to the wall, as may be desired. Always give exact measurements from wall to wall where the Rx case is to stand. State whether it is to connect to the shelving on either side. If so, state which side the patent medicine shelving and which side the tincture is to be placed on. This Rx case cross partition, of course, is the same height as the shelving and is to match same.

PRESCRIPTION WORK COUNTER. Made in any desired length. The cut illustrates a counter to fit the regular 10' Rx case cross partition. Same is arranged with label desk, cork and bottle drawers, tool drawers, pill slides, poison case, bottle shelves, etc., as shown in cut. It is also constructed on the Kade improved knock-down principle so that it can be shipped knock-down and obtain the lowest freight classification. Label desk has two drawers divided for labels. The counter top is of hard maple unfinished. The balance of the counter is finished to match the fixtures.

DESIGN. The design is very handsome, is strictly up-to-date. The center ornaments are fancy scrolled ornaments made of built-up stock. The cornice has a fancy carved moulding, the pilasters are also fancy carved pilasters.

MATERIAL. Can be made of any desired wood to order. Prices are based on the following: All exposed parts to be of the best well seasoned and thoroughly kiln dried oak; non-exposed parts to be of basswood and pine. Drawer slides and Rx work top to be of hard maple. Backing in the base part of the shelving to be of basswood, as mice will not bother basswood.

WORKMANSHIP. To be strictly first class in every respect, according to the best known methods of modern cabinet makers. Base part of the shelving to be so constructed that it can be shipped in several lengths.

FINISH. Finish to be strictly first class, three-coat, hard oil, hand rubbed finish of a suitable shade.

GLASS. Mirrors in the front of the Rx case to be what is known as polished French plate 1½" bevel. Glass in the patent medicine shelving is to be the best DSAa glass.

HARDWARE. Hardware is to be in keeping with the rest of the fixtures. Label pulls to be furnished by the contractor. Purchaser to furnish the labels.

NOT CARRIED IN STOCK. Made to order only.

The "St. Joseph" Special Outfit.

DRUG, JEWELRY AND CIGAR STORE FIXTURES

OUR "ST. JOSEPH" SPECIAL DESIGN DRUG OUTFIT.

MODERN PHARMACY FIXTURES.

The "St. Joseph" Special Patent Medicine and Sundry Shelving.

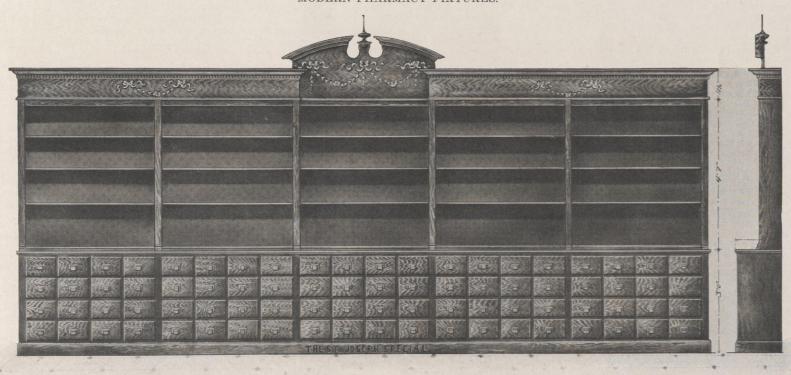

This outfit is a very rich looking outfit designed more with the intention of showing up to good advantage the material and finish, and to be easy to keep clean; than for gaudiness, filigree work, etc.

It is a suitable outfit for any class of trade. For specifications see page 412. Kade's adjustable shelves. All backed up with matched and beaded ceiling in lower part.

Doors slide sideways on steel track.

OUR "ST. JOSEPH" SPECIAL DESIGN DRUG OUTFIT.

MODERN PHARMACY FIXTURES.

The "St. Joseph" Special Tincture Shelving. All modern arrangement and construction.

SPECIAL DESIGN.

All modern arrangements. Vermin proof. Backed up same as patent medicine shelving.

For specifications see page 412.

SPECIFICATIONS FOR THE "ST. JOSEPH" SPECIAL DRUG FIXTURES.

TINCTURE SHELVING. For height, depth, etc., see measurements given on cuts. The drawers are to be our new style lap front drawers; dust proof fronts with hardwood sides, securely dove-tailed to the fronts; backs and bottoms grooved in. All the horizontal divisions between the drawers are to be solid so as to prevent anything from the top drawers falling into the lower ones. The entire base part is to be backed up with matched and beaded basswood ceiling so as to make same vermin proof. The upper part is to have three shelves in each section, 5½" wide in the clear, adjustable on Kade's new style non-fall-out ratchet strips. The upper part will be made on the Kade improved knock-down principle so that anyone can set it up ready for use in a very short time. By making this upper part knock-down, it secures a very low freight rate, as it can then be shipped K. D. The upper part is to have our new style sectional built-up backing, which makes the shelving very rigid.

PATENT MEDICINE SHELVING. For height, depth, etc., see measurements given on the cuts. The base part will be arranged as shown. The doors in the base part will slide sideway on our new style countersunk steel track noiseless arrangement; will be made dust proof with our rubber strip arrangement. The base part will also be backed up with matched and beaded basswood ceiling, making same completely vermin proof.

The upper part is to have three shelves in each section, 8" wide in the clear, adjustable on Kade's new style non-fall-out ratchet strips. The upper part will be made on the Kade improved knock-down principle so that anyone can set it up ready for use in a very short time. By making this upper part knock-down, it secures a very low freight rate, as it can be shipped K. D. The upper part is to have our new style sectional built-up backing. The upper part is to have in each section one large slide sideway clear glass DSAa door, glazed with best American glass, set from the inside and bedded in putty. These doors are to slide on our new style countersunk steel track arrangement, and made dust proof with our rubber strip arrangement. The doors will also be made so that it will be easy to take them out to clean without mussing up the store or removing the goods from the shelves. By making one large door in each section, does away with the woodwork required for two doors, and enables one whole section to be opened at a time. The doors are out of the way, open or closed.

PRESCRIPTION CASE CROSS PARTITION. The front of this Rx cross partition can be made any length to order only. The design in cut shows a 10^{\prime} case. The center mirror in the 10^{\prime} case will be 30x66, $1\frac{1}{2}^{\prime\prime}$ bevel plate. The ornamentation would be as shown in proportion according to the length desired. The side panels are selected 5-ply, built-up stock, cross glued and veneered. This is a very handsome, genteel design; is very plain and very rich. The side sections all have a suitable sized mirror, which in the 10^{\prime} case would be 14x36, $1\frac{1}{2}^{\prime\prime}$ bevel plate. There will be a swelled metal shelf below the mirror and ornamental grille work above, which grille work is made of steel, oxidized copper finish. The cornice and

ornamentation are as shown; the carvings being hand carving. The center mirror also has a neat swelled shelf about 18" from the floor.

This partition is also made sectional so that it can be shipped K. D. flat. The cornice connections are made to match the design and can be connected to the shelving on either side or run straight from the partition to wall, as may be desired.

Always give exact measurements from wall to wall where the prescription case is to stand, and state whether it is to connect to the shelving on either side. If so, state which side the patent medicine shelving and which side the tincture shelving is to be placed on. This Rx case cross partition, of course, is the same height as the shelving and is to match same.

PRESCRIPTION WORK COUNTERS. Any of the prescription work counters illustrated elsewhere in our catalogue can be made to fit behind the above referred to prescription case design. The design is very handsome, is strictly up-to-date, is very plain, modest, easy to keep clean and looks very rich for a low priced outfit.

MATERIAL. It can be made of any desired wood to order. Prices are based on the following: All exposed parts to be of the best well seasoned and thoroughly kiln dried oak; can also be made of other woods; non-exposed parts to be basswood or pine. Drawer sides and Rx work counter top to be hard maple. Backing in base part to be matched and beaded basswood ceiling, as mice will not bother basswood. Backing in the upper part to be sectional built-up backing.

WORKMANSHIP. To be strictly first-class in every respect, according to the best methods known to modern cabinet makers. Base parts of the shelving will be so constructed that they can be shipped in several lengths. The upper parts to be constructed on the Kade K. D. principle, also the Rx cross partition.

FINISH. Finish to be strictly first class, three-coat hard oil, hand rubbed finish of a suitable shade. Can also give it a water polish if desired.

GLASS. Mirrors in the Rx case to be polished plate, $1\,\%\,\prime\prime$ bevel. Glass in the patent medicine shelving to be best DSAa.

HARDWARE. To be in keeping with the rest of the fixtures. Label pulls to be furnished by the contractor, but the purchaser to furnish the glass labels.

DELIVERY OF FIXTURES. Fixtures to be carefully fitted together at the factory, completed in every respect; taken apart, carefully marked, carefully packed and placed on board of cars in a condition so that one cabinet maker or carpenter can place same in position with the assistance of a helper, ready for use, in about 14 working hours after they are uncrated. It is hardly necessary to employ a cabinet maker to put these fixtures together, as almost anyone can set them up without the aid of any tools except a screw driver and a hammer.

Prices are based on the following: All exposed parts to be of the best well seasoned and thoroughly kiln dried oak; can also be made of other woods; non-exposed parts to be basswood or pine. Drawer sides and Rx work counter top to be hard maple. Backing in base part to be matched and beaded basswood ceiling, as mice will not bother basswood. Backing in the upper part to be sectional built-up backing.

WORKMANSHIP. To be strictly first-class in every respect, according to the best methods known to modern cabinet makers. Base parts of the shelving will be so constructed that they can be shipped in several lengths. The upper parts to be constructed on the Kade K. D. principle, also the Rx cross partition.

FINISH. Finish to be strictly first class, three-coat hard oil, hand rubbed finish of a suitable shade. Can also give it a water polish if desired.

GLASS. Mirrors in the Rx case to be polished plate, $1\frac{1}{2}$ " bevel. Glass in the patent medicine shelving to be best DSAa.

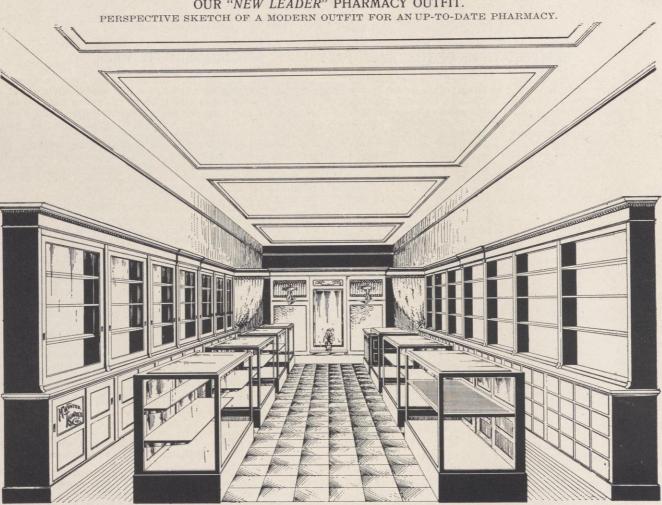

HARDWARE. To be in keeping with the rest of the fixtures. Label pulls to be furnished by the contractor, but the purchaser to furnish the glass labels.

DELIVERY OF FIXTURES. Fixtures to be carefully fitted together at the factory, completed in every respect; taken apart, carefully marked, carefully packed and placed on board of cars in a condition so that one cabinet maker or carpenter can place same in position with the assistance of a helper, ready for use, in about 14 working hours after they are uncrated. It is hardly necessary to employ a cabinet maker to put these fixtures together, as almost anyone can set them up without the aid of any tools except a screw driver and a hammer.

Tincture shelving......per lineal foot, \$10.00

SPECIFICATIONS FOR THE "NEW LEADER" DRUG OUTFIT.

TINCTURE SHELVING. Made in any desired lengths to order only. For height, depth, etc., see measurements given on the cuts. The drawers are to be our new style lap front drawers; dust proof fronts with hardwood sides, securely dove-tailed to the fronts; backs and bottoms grooved in. All the horizontal divisions between the drawers are to be solid so as to prevent anything from the top drawers falling into the lower ones. The entire base part is to be backed up with matched and beaded basswood ceiling so as to make same vermin proof. The upper part is to have three shelves in each section, 5½" wide in the clear, adjustable on Kade's new style non-fall-out ratchet strips. The upper part will be made on the Kade improved knock-down principle so that anyone can set it up ready for use in a very short time. By making this upper part knock-down it secures a very low freight rate, as it then can be shipped K. D. flat. The upper part is to have our new style sectional built-up backing, which is very easy to put on and makes the shelving very rigid.

PATENT MEDICINE SHELVING. Made in any desired lengths to order only. For height, depth, etc., see measurements given on cuts. The base part will be arranged as shown. The doors in the base part will slide sideway on our new style countersunk steel track noiseless arrangement; will be made dust proof with our rubber strip arrangement. This base part will also be backed up with matched and beaded basswood ceiling, making same completely vermin proof.

The upper part is to have three shelves in each section, 8" wide in the clear, adjustable on Kade's new style non-fall-out ratchet strips. The upper part will be made on the Kade improved knock-down principle so that anyone can set it up ready for use in a very short time. By making this upper part knock-down, it secures a very low freight rate, as it can be shipped K. D. flat. The upper part is to have our new style sectional built-up backing. The upper part is to have in each section one large slide sideway clear glass DSAa door, glazed with best American glass, set from the inside and bedded in putty. These doors are to slide on our new style countersunk steel track arrangement, and made dust proof with our rubber strip arrangement. The doors will also be made so that it will be easy to take them out to clean without mussing up the store or removing the goods from the shelves. By making one large door in each section does away with the woodwork required for two doors, and enables one whole section to be opened at a time. The doors are out of the way opened or closed.

PRESCRIPTION CASE CROSS PARTITION. The front of the Rx case can be made any desired length to order only. The design shown in cut shows a 10' case. The center mirror in the 10' case would be 30x60, 1½" bevel French plate. The ornamentation would be as shown in proportion according to the length desired. The side panels are selected 5-ply, built-up stock, cross glued and veneered. This is a very handsome, genteel design, designed more with the intention of richness and plainness, easy to keep clean and to show up the grain of the material and the fine finish than for gaudiness. The glass in the side part is ornamental

DSAa colored glass with leaded oxidized copper finished frames. This partition is also made sectional so that it can be shipped knock-down, flat. The cornice connections are made to match as shown in design and can be connected to the shelving on either side or run straight from the partition to the wall as may be desired. Always give exact measurements from wall to wall where the Rx case is to stand. State whether it is to connect to the shelving on either side. If so, state which side the patent medicine shelving and which side the tincture shelving is to be placed on. The Rx cross partition, of course, is the same height as the shelving and is to match same.

PRESCRIPTION WORK COUNTER. Any of the prescription work counters illustrated elsewhere in our catalogue can be made to fit behind the above referred to prescription case design. The design is very handsome, is strictly up-to-date, is very plain, modest, easy to keep clean and looks very rich for a low priced outfit.

MATERIAL. It can be made of any desired wood to order. Prices are based on the following: All exposed parts to be of the best seasoned and thoroughly kiln dried oak; can also be made of other woods. Non-exposed parts to be basswood or pine. Drawer sides and Rx work counter top to be hard maple. Backing in base part to be matched and beaded basswood ceiling, as mice will not bother basswood. Backing in the upper part must be sectional built-up backing.

WORKMANSHIP. To be strictly first class in every respect, according to best methods known to modern cabinet makers. Base parts of the shelving will be constructed so that they can be shipped in several lengths. The upper parts will be constructed on the Kade K. D. principle, also the Rx cross partition.

FINISH. Finish to be strictly first class, three coat hard oil, hand rubbed finish of a suitable shade. Can also give it a water polish, if desired.

GLASS. Mirrors in the Rx case to be polished French plate, $1\,1\!\!/\!_2{''}$ bevel. Glass in the patent medicine shelving to be best DSAa.

HARDWARE. To be in keeping with the rest of the fixtures. Label pulls to be furnished by contractor, but purchaser to furnish the glass labels.

DELIVERY OF FIXTURES. Fixtures to be carefully fitted together at the factory, completed in every respect, taken apart, carefully marked, carefully packed and placed on board of cars in a condition so that one cabinet maker or carpenter can place same in position with the assitance of a helper, ready for use, in about 14 working hours after they are uncrated. It is hardly necessary to employ a cabinet maker to put these fixtures together, as almost anyone can set them up without the aid of any tools except a screw driver and a hammer.

DRUG, JEWELRY AND CIGAR STORE FIXTURES

SPECIFICATIONS OF THE "IDEAL" SECTIONAL DRUG OUTFIT.

GENERAL EXPLANATION.

The idea of this outfit is to make a **sectional** outfit that will fit almost any store, and that can be extended when desired. Our old sectional outfit was a very practical outfit. This outfit, however, is more modern in design, construction and arrangement. The shelving is made in 4' sections. The mirror wall panels are made in 4' sections. The Rx partitions are made in sections of 2' 8" long, and 1' long. By combining these different sections in different ways, the combination or arrangement of the plan of your store can be changed in so many different ways that they are too numerous to mention. For example: One section can be used independently of the other and each end will show a complete finished end. Or, they can be used alternating a wall mirror, a tincture section, another wall mirror, or two or three tincture sections with wall mirrors between, or plan the store so as to have a patent medicine section in the center, etc., etc.

These sections when set together can be fastened together like one continuous

These sections, when set together, can be fastened together like one continuous piece of shelving. Being bolted together by the Kade interlocking system, anyone can put them together; requires no mechanic, and when put together are as solid as any continuous shelving you can buy.

The prescription case partition can be made any desired length from 8' up, in an even number of feet, such as 8', 10', 12', etc.

The Rx counter shown is a very suitable work counter for this partition, but any of our higher priced work counters shown in our latest catalogue can also be utilized.

The cases shown in our perspective cut are our "Competitor" cases, but more expensive cases can also be used. (See our latest catalogues for discounts, prices, etc., for all kinds of floor cases.)

GENERAL DESCRIPTION.

TINCTURE SHELVING. For general measurements, see cuts; each section contains twelve good sized drawers. These drawers are our new style lap front drug drawers with dust proof fronts, neatly rounded, and hardwood sides securely dovetailed to the fronts. Backs and bottoms are grooved in. All horizontal divisions between the drawers are to be solid so as to prevent anything from the top drawers falling into the lower ones.

The upper part has in each section three (3) adjustable shelves, 6" wide. All is backed up with our new style Compo-board backing, which can be painted a suitable color inside. The cornice is a neatly swelled cornice to match the Rx partition, pilasters are neatly rounded; shelves neatly molded. The spindle railing on top is a plain, neat "non-dust-catchy" spindle railing. The center sections have a raised ornamentation as shown, which costs extra. Each section is built in one piece from the floor up.

PATENT MEDICINE SHELVING. For measurements, see cut. Base part has in each section two (2) paneled slide sideway doors. These doors are grooved, coped and tenoned together. The cupboards in the base part each have one shelf. The upper part has in each section two (2) slide sideway DSAa glass doors. To keep these doors straight, the door stiles are reinforced on the inside with our steel channel arrangements. These doors slide on our new style steel track and ball-bearing rollers, and are made dust proof with our rubber strip arrangement. The upper part has in each section four (4) adjustable shelves, 8" wide, and all is backed up with our new style Compo-board backing and can be painted a suitable color inside. The pilasters, cornice ornamentation, etc., is the same as on the tincture shelving. Each section is built in one piece from the floor up.

WALL MIRROR SECTIONS. Wall mirror sections are also 4' long; for design see cut. The paneling is to match the shelving; same has one so-called French plate mirror 24x40, $1\frac{1}{2}$ " bevel, with a swelled shelf underneath. Cornice, etc., matches the fixtures.

PRESCRIPTION CASE CROSS PARTITION. The front of this prescription case cross partition can be made in any desired length to order; from 8' up, in an even number of feet, such as 8', 10', 12', etc. The center mirror is a so-called French plate 24x60, 1½" bevel. The large glass panels are best DSAa Florentine obscure glass. The small upright mirrors are so-called French plate and are each about 10x 24", 1½" bevel. There is a neatly swelled shelf below the center mirror, also a neatly swelled shelf below each one of the large Florentine lights of glass, making a mantel effect. The paneling is a plain, rich surface paneling of 5-ply, built-up, cross glued, selected stock, so that it cannot warp, swell, shrink or split. The plasters, cornice and ornamentation match the shelving.

TOP ORNAMENTATION. The shelving and the prescription case partition can be furnished with or without the top ornamentation. The cuts show same with the top ornamentation; same will be listed separate so that the purchaser can have the same with just the plain top or with the ornamentation or spindle railing. The high center ornamentation will also be listed separate so that the purchaser can have as many of the high center ornamentations as he desires.

PRESCRIPTION WORK COUNTERS. Any of the prescription work counters illustrated in our catalogues can be made to fit thea bove referred to Rx case. The special counter that we show, however, is specially designed for this, and the cut is self-explanatory. It has pill drawers, cork and bottle drawers, tool drawers, label desk, poison case and adjustable shelves. The counter top is made of hard maple, not finished. Balance of the work counter is made to match the shelving.

MATERIAL. It can be made of any desired wood to order. Prices are based on the following: All exposed parts to be of the best, well seasoned and thoroughly kiln dried oak, large surfaces of Rx partition to be selected quarter-sawed oak, non-exposed parts to be made of basswood or pine. Drawer sides and Rx work counter top to be of hard maple. Back of shelving to be our new style Compo-board backing.

WORKMANSHIP. To be strictly first-class in every respect according to the best methods known to modern cabinet makers. The shelving is constructed so that they can be shipped in 4' lengths. The prescription case cross partition can also be shipped in short lengths. Anyone can set these fixtures up, without any trouble, as they require no cabinet maker at all.

FINISH. To be strictly first class. Three coats hard oil and hand rubbed finish of a suitable shade. Can also give it a water polish, if desired.

GLASS. Mirrors in Rx case partition are to be so-called French plate, 11/2" beyel. Glass in the patent medicine shelving to be best DSAa glass.

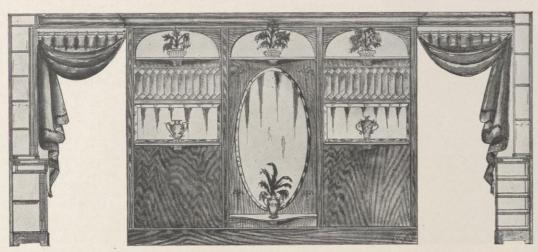

HARDWARE. To be in keeping with the rest of the fixtures. Label pulls to be furnished by the contractor, but the purchaser to furnish the glass labels.

DELIVERY. Fixtures to be fitted and finished complete at the factory, carefully packed and placed on board of cars at Sheboygan. Wisconsin, in condition so that almost anyone can uncrate and place them in position without the aid of any tools except a screw driver, a hammer and a wrench.

CARRIED IN STOCK. See stock list.

The "New Prosperity" Design Tineture Shelving.

SPECIFICATIONS FOR THE "NEW PROSPERITY" DRUG OUTFIT.

TINCTURE SHELVING. Made in any desired length to order. For height, depth, etc., see measurements given on the cuts. The drawers are to be our new style lap front drawers with dust proof fronts and hardwood sides securely dovetailed to the fronts; backs and bottoms are grooved in. All the horizontal divisions between the drawers to be solid so as to prevent anything from the top drawers falling into the lower ones. The entire base part is to be backed up with matched and beaded basswood ceiling so as to make same completely vermin proof. The upper part is to have three (3) adjustable shelves in each section, 5½" wide in the clear, adjustable on Kade's new style non-fall-out ratchet strips. The upper part is to have our new style sectional built-up backing, painted a suitable color. The cornice is to be a swelled cornice to match Rx partition. Pilasters and edges of shelving and edges of drawers all to be neatly rounded.

PATENT MEDICINE SHELVING. Made in any desired length to order only. For height, depth, etc., see measurements given on cuts. The base part will be arranged as shown, with one row of shallow pill drawers and sliding sideway panel door cupboards. The doors in the base part will slide sideway on our new countersunk steel track noiseless arrangement; will be dust proof with our rubber strip arrangement. This base part will also be backed up with matched and beaded basswood ceiling, making same completely vermin proof. The upper part is to have three (3) adjustable shelves in each section. Shelves to be 8" wide in the clear, adjustable on Kade's new style non-fall-out ratchet strips. This upper part is also to have our new style sectional built-up backing and to be painted a suitable color on the inside. The cornice is to be a swelled cornice to match the Rx partition. The pilasters and edges of shelves all to be neatly rounded. The upper part is to have in each section one large slide sideway DSAa glass door glazed with best American glass. These doors are to slide on our new style countersunk steel track arrangement running on ball-bearing sheaves. The doors will be made dust proof with our rubber strip arrangement and will be made so that they can easily be taken out by our removable pilaster arrangement. By making one large door in each section the doors work better, it does away with the woodwork required for two doors, enables one whole section to be opened at a time and the doors are out of the way open or closed.

PRESCRIPTION CASE CROSS PARTITION. The front of the Rx case can be made any desired length to order. The design shown in cut shows a 10' case. The center mirror is an oval mirror of so-called French plate, size 30x60, 1½" bevel. The side mirrors will be 16x36, 1½" bevel, so-called French plate. The art glass panels are made of best DSAa glass, leaded together and bronzed. The color of same is of a genteel cast to harmonize with the design. The panels and the framing is of 5-ply, built-up stock, cross glued and veneered on the rich plain surface style, designed with the intention of showing up the handsome grain of the wood and the fine finish. The shelves are all swelled shelves with neatly rounded edges. The pilasters are also neatly rounded and the cornice is a swelled cornice so that all will show up the rich grain of the wood, show the finish up nicely and

be easy to keep clean. The cornice connections are made to match as shown in the design and can be made to connect to the shelving or to run straight to the wall as may be desired. Always give exact measurements from wall to wall where the Rx case is to stand. State whether it is to connect to the shelving on either side. If so, state which side the patent medicine shelving and which side the tincture shelving is to be placed on. This Rx case cross partition, of course, is the same height as the shelving and is made to match same.

PRESCRIPTION WORK COUNTER. Any of the prescription work counters illustrated in our catalogue can be made to fit behind the above referred to Rx case. The special counter that we show, however, is specially designed for this and the cut is self-explanatory. It has pill drawers, cork and bottle drawers, tool drawers, label desk, poison case and adjustable shelves. The counter top is made of hard maple not finished. Balance of the work counter is finished to match the shelving.

MATERIAL. It can be made of any desired wood to order. Prices are based on the following: All exposed parts to be of the best seasoned and thoroughly kiln dried oak; large surfaces of Rx case cross partition and the cornice face plates to be of quarter-sawed oak; can also be made of other woods; non-exposed parts to be of basswood or pine. Drawer sides and Rx work counter top to be hard maple. Backing in base part to be matched and beaded basswood ceiling, as mice will not bother basswood. Backing in the upper part to be sectional built-up backing.

WORKMANSHIP. To be strictly first-class in every respect according to the best methods known to modern cabinet makers. The base parts of shelving will be constructed so that they can be shipped in several lengths. The upper part will also be constructed so that they can be shipped in several lengths. Special attention is called to the round corners on this entire outfit. All edges, pilasters, corners, etc., being neatly rounded so as to finish up well, show up the grain of the wood well and be easy to keep clean.

FINISH. Finish to be strictly first class, three coat hard oil, hand rubbed finish of a suitable shade. Can also give it a water polish, if desired.

GLASS. Mirrors in the Rx case to be polished French plate, $1\frac{1}{2}$ " bevel. Glass in the patent medicine shelving to be best DSAa.

HARDWARE. To be in keeping with the rest of the fixtures. Label pulls to be furnished by contractor, but purchaser to furnish the glass labels.

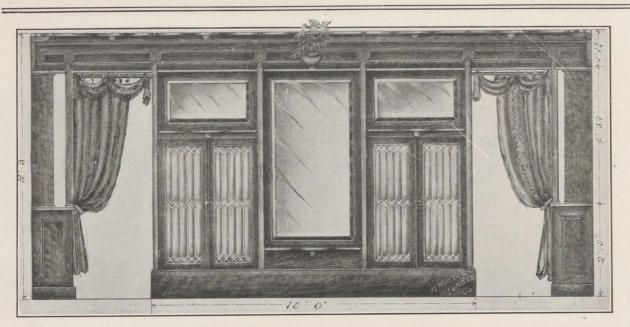

DELIVERY OF FIXTURES. Fixtures to be carefully fitted together at the factory; completed in every respect, taken apart, carefully marked, carefully packed and placed on board of cars in a condition so that one cabinet maker or carpenter can place same in position with the assitance of a helper, ready for use, in about 14 working hours after they are uncrated. It is hardly necessary to employ a cabinet maker to put these fixtures together, as almost anyone can set them up without the aid of any tools except a screw driver and a hammer.

TINCTURE SHELVING. Made in any desired length to order. For height, depth, etc., see measurements given on the cuts. The drawers are to be our new style lap front drawers with dust proof fronts and hardwood sides securely dovetailed to the fronts; backs and bottoms are grooved in. All the horizontal divisions between the drawers to be solid so as to prevent anything from the top drawers falling into the lower ones. The entire base part is to be backed up with matched and beaded basswood ceiling so as to make same completely vermin proof. The upper part is to have in each section three (3) adjustable shelves, 5½" wide in the clear; adjustable on Kade's new style non-fall-out ratchet strips. The center section will have two (2) hinge doors as shown on the sketch, glazed with Colonial DSAa art glass. The upper part is to have our new style sectional built-up backing, and painted a suitable color on the inside. The top shelf and cornice wall plates are to be as shown, with swelled shelves over each section. This makes a very pretty effect and forms a mantel shelf against the wall over the top of the shelving.

PATENT MEDICINE SHELVING. Made in any desired length to order only. For height, depth, etc., see measurements given on the cuts. The base part will be arranged as shown with one row of pill drawers and hinge panel door cupboards. The doors in the base part will have built-up panels, 5-ply, cross glued and veneered so that they cannot swell, warp, shrink or split, and will have automatic spring catches. These lower cupboards will have one shelf inside on cleats. The base part will be backed up with matched and beaded basswood ceiling, making same completely vermin proof. The upper part is to have in each section, three (3) adjustable shelves, 8" wide in the clear; adjustable on Kade's new style non-fall-out ratchet strips. This upper part will also have DSAa glass hinge doors with spring catches. The doors in the center section being glazed with Colonial DSAa art glass. (The hinge door is a proper door to go with the "Mission" design.) The upper part is also to be backed up with our new style sectional, built-up backing, and painted a suitable color on the inside. The top shelf and cornice wall plates are to be as shown, with swelled shelves over each section. This makes a very pretty effect and forms a mantel self against the wall over the top of the shelves.

PRESCRIPTION CASE CROSS PARTITION. The front of the Rx case cross partition can be made any desired length to order. The design shown in the cut shows a 10' case. The center mirror is a pier mirror of so-called French plate, size 30x60, $1\frac{1}{2}$ " bevel. The side mirrors will be 16x34, $1\frac{1}{2}$ " bevel. The top, cornice plates and swelled shelf are made to harmonize with the "Mission" design and to correspond with the tincture and patent medicine shelving. The perfume cases on each side of the mirror have oak backs and adjustable oak shelves, finished to harmonize with the "Mission" design; shelves being about 6" deep in the clear. The perfume cases are also to have two (2) hinge doors each, glazed with Colonial DSAa art glass. The recess above the perfume cases, the top shelf and the swelled shelves above the cornice make a very handsome effect and a very appropriate place for jardineres with plants, flowers, vases, statuary, bric-a-brac, etc.

PRESCRIPTION WORK COUNTER. Any of the prescription work counters illustrated in our catalogue can be made to fit behind the above referred to Rx case. The special counter that we show, however, is specially designed for this and the cut is self-explanatory. It has pill drawers, cork and bottle drawers, tool drawers, label desk, poison case and adjustable shelves. The counter top is made of hard maple not finished. Balance of the work counter is finished to match the shelving.

DESIGN. The design is a new "Mission" design and is very appropriate, very practical, easy to keep clean and will wear well; the low base and the low top of the shelving with the paneling and swelled shelves against the wall, make a very handsome effect, particularly if the walls and ceilings are decorated to harmonize with the "Mission" style.

MATERIAL. It can be made of any desired wood to order. Prices are based on the following: All exposed parts to be of the best seasoned and thoroughly kiln dried oak; large surfaces of Rx case cross partition and the cornice face plates to be of quarter-sawed oak; non-exposed parts to be of basswood or pine. The drawer sides and Rx work counter top to be made of hard maple. The backing in the base part to be matched and beaded basswood ceiling, as mice will not bother basswood. Backing in the upper part to be our new style sectional built-up backing.

WORKMANSHIP. To be strictly first class in every respect, according to the best methods known to modern cabinet makers. The shelving will be constructed so that it can be shipped in several lengths. Special attention is called to the rounded corners on this entire outfit. All edges, pilasters, corners, etc., being neatly rounded so as to finish up well, show up the grain of the wood well and be easy to keep clean.

FINISH. Finish is to be a first class finish; can be made of oak, either natural, antique or golden oak finish. Can also be made of birch, either natural, cherry or mahogany finish; but for the "Mission" design, the proper finish is the mission finish, the flemish finish, the weathered oak finish or the green weathered oak finish. Trimmings and ornamentations can be made in rich gilt at the same price if so desired, though on the "Mission" style we do not recommend it.

GLASS. Mirrors in the Rx case to be polished French plate, $1\frac{1}{2}$ " bevel. Glass in the patent medicine shelving to be best DSAa.

HARDWARE. To be in keeping with the rest of the fixtures. Label pulls to be furnished by contractor, but purchaser to furnish the glass labels.

DELIVERY OF FIXTURES. Fixtures to be carefully fitted together at the factory; completed in every respect, taken apart, carefully marked, carefully packed and placed on board of cars in a condition so that one cabinet maker or carpenter can place same in position with the assitance of a helper, ready for use, in about 14 working hours after they are uncrated. It is hardly necessary to employ a cabinet maker to put these fixtures together, as almost anyone can set them up without the aid of any tools except a screw driver and a hammer.

DRUG, JEWELRY AND CIGAR STORE FIXTURES

SPECIFICATIONS OF THE "NEW ECONOMICAL" DRUG OUTFIT. HEIGHT, DEPTH, ETC., SEE CUTS. MADE ANY LENGTH TO ORDER.

TINCTURE SHELVING. Made any length to order. For height, depth, etc., also arrangements, see elevation cuts on preceding pages. All drawers to be our new style dust proof lap front drawers, with hardwood sides securely dove-tailed to the fronts; backs and bottoms grooved in. All horizontal divisions between the drawers to be solid so as to prevent anything from the top drawers falling into the lower ones. The entire base part to be backed up with matched and beaded basswood ceiling so as to make same vermin proof. There will be three rows of drawers as shown, the balance of the space beneath the lower row being cased up. This is a very nice feature, as it raises the lower row of drawers quite a distance from floor. The upper part is as shown, has three shelves on oxidized copper finished steel brackets; these shelves are 6" wide and are stationary, but the space can be changed by removing the brackets. The distance between the base of shelving and bottom of cornice is 4' 9", high enough to allow for one row of half gallon, two rows of quart and one row of pint tiucture bottles. Cornice is a neatly round moulded cornice, finished up well, and is easy to keep clean. Cornice is an overhanging cornice and is supported by free standing turned columns, giving the whole outfit a fine massive effect. The open shelving is not backed up, but it is arranged so that it must be fastened to the walls of the building. The center cabinet or perfumery and sundry sections in the upper part is made just the length of one section, has two hinged DSAa glass doors with spring catches, inside has five adjustable shelves on Kade's non-fall-out ratchet strips. Shelves are 8" wide in the clear and are backed up with our new style built-up backing. These are listed separate and more than one can be used if desired at additional price. Base part is shipped sectional, upper part is shipped knock-down flat, hence takes a low freight rate; almost any ordinary mechanic can place same in position.

PATENT MEDICINE AND SUNDRY SHELVING. Made any length to order. For height, dept, etc., also arrangements, see elevation cuts on opposite page. Other description same as tincture shelving, with the exception that the base part has slide sideway panel door cupboards instead of drawers, one full width shelf inside of cupboards, doors sliding sideways on our new style countersunk steel track arrangement, noiseless style, made dust proof with our rubber strip arrangement. Upper part has four shelves instead of three.

PRESCRIPTION CASE CROSS PARTITION. For arrangement, design and measurements of height, see elevation cuts on opposite page, made any lengths to order. Minimum length 8'. Cut shows a 10' partition. Center mirror will be a so-called French plate, size 30x48", 1½" bevel. Side mirrors will also be so-called

French plate, size 18x32, 1½" bevel. The glass in side panels is obscure glass, double strength. Shelves are swelled shelves, to harmonize with the design.

PRESCRIPTION WORK COUNTER. Made any length to order. oFr measurements see elevation cut on opposite page. Has bottle shelves, label desk, cork and tool drawers, poison case, etc. Is a very practical work counter, though cheap. Any of the prescription work counters illustrated elsewhere in our catalogue can be made to fit behind the above referred to prescription case design. The design is very handsome, is strictly up-to-date, is very plain, modest, easy to keep clean and looks very rich for a low priced outfit.

MATERIAL. It can be made of any desired wood to order. Prices are based on the following: All exposed parts to be of the best seasoned and thoroughly kiln dried oak. Large panels in Rx cross partition to be quarter-sawed, built-up cross glued 5-ply stock; can also be made of other woods; non-exposed parts to be basswood or pine. Drawer sides and Rx work counter top to be hard maple. Backing in base part to be matched and beaded basswood ceiling, as mice will not bother basswood. Backing in the upper part to be sectional built-up backing.

WORKMANSHIP. To be strictly first class in every respect. Base parts of the shelving will be constructed so that they can be shipped in several lengths. The upper parts will be constructed on the Kade K. D. principle, also the Rx cross partition.

FINISH. Finish to be strictly first class, three-coat hard oil, hand rubbed finish of a suitable shade. Can also give it a water polish, if desired. Shelves and ceiling of shelving painted pea green.

GLASS. Mirrors in the Rx case to be polished so-called French plate, $1\frac{1}{2}$ " bevel. Glass in the patent medicine shelving to be best DSAa.

HARDWARE. To be in keeping with the rest of the fixtures. Label pulls to be furnished by the contractor,, but purchaser to furnish the glass labels.

DELIVERY OF FIXTURES. Fixtures to be carefully fitted together at the factory, completed in every respect, taken apart, carefully marked, carefully packed and placed on board of cars in a condition so that one cabinet maker or carpenter can place same in position with the assistance of a helper, ready for use, in about 14 working hours after they are uncrated. It is hardly necessary to employ a cabinet maker to put these fixtures together, as almost anyone can set them up without the aid of any tools except a screw driver and a hammer.

DRUG, JEWELRY AND CIGAR STORE FIXTURES

THE "GREAT NORTHEASTERN" OUTFIT.

A GOOD, WELL MADE, CHEAP OUTFIT FOR SMALL STORES—MODERN PHARMACY FIXTURES.

The "Great Northwestern" Design.

Sketch shows a complete interior view of one of our cheap but good outfits. Cases used are the "Kade Knock-Down" style counter, cases. Floor cases can also be used.

DESCRIPTION. This outfit we have designed for those who want a cheap, but good outfit. It is made of oak exposed parts, basswood non-exposed parts, is well made and up-to-date in arrangement, is neat, plain and tasty, is finished in hard oil, rubbed finish, and consists of the following fixtures:

TINCTURE SHELVING. Three 8' sections of tincture shelving, 36 drawers each. (Vermin proof), making 96 drawers in all. Upper part has adjustable shelves, also backing.

Price, per 8' section.....each \$90.00

PATENT MEDICINE SHELVING. Three 8' sections of patent medicine shelving; slide panel doors lower part, slide DSAa glass upper part, all on steel track; upper part has adjustable shelves.

Price, per 8' section.....each, \$100.00

"Dallas" Rx case and counter. For description and cut see page 442.

Cases and counters shown on cut are:

One 4' "Wellington" cigar case, all DSAa glass. See catalogue.

 $_{\mbox{\scriptsize Two 6}'}$ scale and wrapping counters, with tilting bin fronts. See catalogue No. 88.

Two 4' and six 8' Kade knock-down show cases, set on top of each other on a solid base. Lower cases are 20" and upper cases 16" high, base is 6" high, making a total height of 42". See Kade's knock-down show cases, catalogue No. 88.

Any other cases or counters can also be used with this shelving to good advantage.

SHELVING. Not carried in stock. Made to order only.

REGULAR DESIGN.

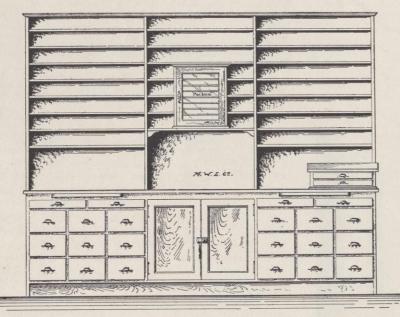

WEIGHT. Approximate shipping weights: Tincture shelving, 60 lbs. per foot; patent medicine shelving, 60 lbs. per foot; Rx counter, 8', 340 lbs.; Rx case, 8', 360 lbs.

To Suit YOUR Ideas and Requirements

PARTICULARS ON APPLICATION

COMBINATION SODA FOUNTAINS.

We can make combination soda fountains for you according to *your ideas*, either the counter service style or the wall apparatus style. We can also make them so as to use your old apparatus if necessary. Give us the size of the space you wish to utilize, an idea of what you want, and we will do the rest. We can make them to match any of our different design outfits.

On the following pages we show a few designs of our combination fountains in the standard arrangements, the refrigerator, cooler, bottles, work boards, etc. Any of these can be changed as far as the arrangements are concerned, to meet your requirements.

We also, on the following pages, show quite a number of soda fountain bases or stands, soda fountain tops, superstructures, soda fountain counters, soda fountain work boards, etc., any of which we can make up to order, to meet your requirements.

SPECIAL NOTICE. Large special sheets showing soda fountain draught arms, coolers, etc., sent on application.

M. WINTER LUMBER Co., Sheboygan, Wisconsin.

MODERN COMBINATION SODA FOUNTAIN.

SPECIAL DESIGN.

N. E. S. A.

WEIGHT. Approximate shipping weight, about 2,600 lbs.

NOT CARRIED IN STOCK. Made to order only.

This design will harmonize with almost any design outfit.

A FEW ADVANTAGES.

About one-half the cost of other style fountains.

A large saving of ice.

Easy to keep clean.

Perfectly hygienic.

Never out of style.

Easy to operate.

Entire dealing slab is free for dispensing purposes.

Very ornamental.

Will last a lifetime if properly cared for.

Very similar to the "Sheboygan" outfit, but is arranged for two operators instead of one. Has two fine ornamental draught stands with two double stream

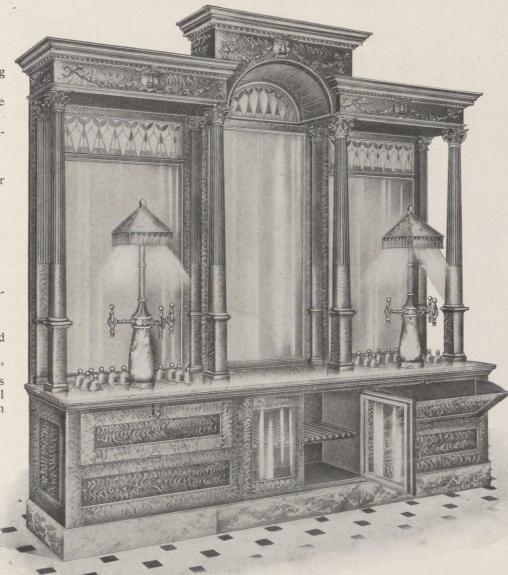

Refrigerator is zinc lined throughout, cooler box is copper lined. Coolers are made of solid block tin, has check valves and extra shut-off valve. Bottles are regulation size and labeled with recessed labels. Materials and construction are the best, workmanship and finish are A No. 1. Mirrors are beveled French plate. Electric light fixtures are to match design and finish.

Soda counter and work board not included in list price.

This is a very complete outfit; 10' long; 9' 6" high; 2' 6" deep; 24 syrup bottles, double stream draught arms, two mineral. Refrigerators, etc. Beveled plate mirror, electric light fixtures complete as shown in cut.

Special Catalogue on Application.

JEWELRY STORE FIXTURES

FOR SHOW CASES, TABLES, COUNTERS AND FLOOR CASES SEE CATALOGUE NO. 88.

NOTICE. If you do not find herein what you are looking for, let us know. Give us a rough idea of what you want and we will be pleased to submit special designs.

SPECIAL NOTICE. In writing for estimates it is very important that we have the following information:

1st-How soon will you place your order?

2nd-How soon will you want the goods?

3rd—About how much do you intend to invest?

4th—Is there any design in our catalogue that suits you?

5th—What wood and finish do you want?

6th—Where are the fixtures to be shipped to?

7th—We presume you intend to pay cash.

Please give us this information with your reply and oblige.

JEWELRY STORE FIXTURES

TO PROSPECTIVE PURCHASERS.

As suggestions, we submit for your inspection floor plans, interior views and elevations of our modern, up-to-date jewelry store fixtures.

In writing for estimates be sure to give us as much information pertaining to your wants as possible. Also kindly let us know the following information:

First—Approximately, how much do you intend to invest?

Second—About when will you be ready to place your order?

Third—About when or what date do you intend to open up for business?

Fourth—Which of our designs suits you best?

Fifth-What kind of floor will you have?

Sixth-What kind of wood do you prefer?

Seventh—What lines do you handle besides jewelry and silverware?

SPECIAL NOTICE.

Always send a rough diagram of room with exact inside measurements.

Always give length of wall cases desired.

Always state height of room.

Always give length and height of show cases.

Always state whether plate glass or DSAa glass is desired.

Always state whether room is facing north, south, east or west.

Always state whether you want tables and cases, counters and cases, or floor cases.

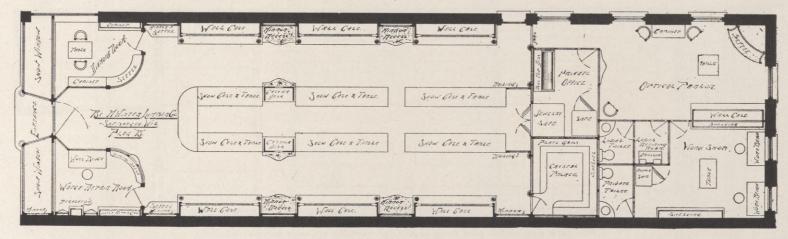

The plans on next pages are merely submitted to give ideas.

NOT HOW CHEAP, BUT HOW GOOD AT A REASONABLE PRICE, IS OUR AIM

L. S. A.

DRUG, JEWELRY AND CIGAR STORE FIXTURES

GENERAL SPECIFICATIONS OF JEWELERS' WALL CASES.

DESIGN. For general design see different styles of jewelers' wall cases herein illustrated.

DIMENSIONS. Made any length to order. The regular standard dimensions are usually an even number of feet, such as 6', 8', 10', 12', etc., as far as length is concerned. The other standard dimensions are as follows:

Base part	30"	high	outside.			
Base part	30"	deep	outside.			
Top part	60"	high	inside, in	n	the	clear.
Top part	14"	deep	inside, i	n	the	clear.

These dimensions, however, can be changed to suit purchaser when made to order without any material difference in the price as long as the upper part is not over 24" deep inside in the clear.

MATERIAL. Made of any kind of wood to order. Regularly made in oak or birch for the exposed parts; non-exposed parts basswood, drawer sides hard maple. Panels 5-ply, built-up stock. (See basis of material each page.)

CONSTRUCTION AND WORKMANSHIP. A No. 1, high grade in every respect; construction as much as possible on the lock-joint principle; joints can not come apart. Doors mortised and tenoned together. Drawers dove-tailed together; backs and bottoms grooved in. Base ceiled up at the back and bottom so as to make same mice proof; air-tight construction on all slide up doors with our bevel strip arrangement at the bottom and the top. Slide sideway doors made dust proof as near as possible with our weather strip arrangement.

FINISH. Is a high grade, A No. 1, four coat work, water rubbed and hand polished finish of any desirable shade.

GLASS. Either DSAa glass or polished plate glass can be used in any of these wall cases. DSAa glass cannot be used in wall cases over 6' long in one piece in length. Polished plate glass wall cases can be made up to 14' with the door glass one piece in length. The finer cases are usually made in polished plate glass. The DSAa glass cases are usually made up to 6' long one door in length; longer lengths from 6' to 12', two doors. Lengths above 12' divided accordingly.

The special wall cases can also be made up to 12' long, with one door in DSAa glass, dividing the DSAa glass with a German silver upright bar so that the plate glass can be put into the case later on if desired, thus having one large plate glass door instead of two when you get ready to put in the plate glass.

The DSAa glass is the best DSAa glass obtainable.

The polished plate glass is the best polished plate glass obtainable. All the glass is set from the inside, bedded in putty and fastened from the inside with moldings, making same dust proof, air tight, etc.

LINING. The interior of the upper part of this wall case is usually lined with black, blue, green or maroon felt on the backs, bottoms and tops of the high

grade cases; and the backs only of the cheaper cases; in which instance, the bottom and top is painted black. Shelves lined when requested with the same felt. The drawers are usually varnished inside.

SHELVES. In the high grade cases where shown on sketches and cuts, the shelves are adjustable on our Universal, stamped steel, safety adjustable brackets. (See page "O.") Nickel plated finish and can be adjusted every eighth inch. The shelves are regularly made of hardwood, made to match the cases, but can also be made of soft wood, lined with felt, of any color desired. The cases where stationery shelves are shown, we usually use a stamped steel, oxidized copper finished stationary bracket of suitable size, and the shelves are the same as above described. However, such wall cases as are shown with stationery shelves, can also be furnished with adjustable shelves. (See schedule on the following pages.) These wall cases can also be furnished with polished plate glass shelves, with polished round edges. (See schedule on the following page.)

These wall cases can also be furnished with French plate mirror backing for cut glass. (See schedule on following page.) Wherever any mirrors are used in mirror recesses, etc., the mirrors are the best polished plate glass mirrors $1\frac{1}{2}$ " bevel of suitable sizes.

DOORS. These wall cases are usually furnished with our slide up, air tight and dust proof doors, with bevel strip arrangement at the bottom and the top, which permits the door to move very easily when raised half an inch and wedges itself tight when closed the last half inch.

The special made to order high grade cases are hung on our steel bicycle chain with large steel pin, machine turned, ball bearing pulleys, counterbalanced with full length weight boxes in the rear. The stock sizes, such as the cheaper cases, are hung on heavy copper chains, machine turned, steel pin pulleys, counterbalanced with full length weight boxes in the rear.

BASES. The base boards on these wall cases are usually polished wooden bases to match the fixtures, but can also be made with marble bases to order, at a slight additional charge.

ELECTRIC LIGHT FIXTURES. We can furnish these wall cases with electric light fixtures at an additional charge. (See cut, description and schedule on page 505.)

SLIDE SIDEWAY DOORS. Can also furnish these wall cases made to order with slide sideway doors, which are often used when ceiling of room not high enough to slide doors up. These slide sideway doors run on steel track and large ball-bearing machine turned rollers, made as near dust proof as possible with our weather strip arrangement. Made to take out to clean with our removable pilaster arrangement wherever practical.

Prices of slide sideway doors same as slide up doors.

GENERAL INFORMATION AND PRICES OF SPECIAL ARRANGEMENTS FOR JEWELRY STORE FIXTURES.

MINIMUM LENGTHS, ETC.

LENGTHS given in this list are always OUTSIDE LENGTHS. For other dimensions see descriptions in catalogue.

Prices given per foot in this price list are based on the following minimum lengths, unless specially mentioned in catalogue. For shorter lengths the advance of 10% is made, added to the regular

	ewelers'	wall cases, minimum lengths 6 ft. each	
1	ewelers'	partitions, minimum lengths	
-	ewelers'	screens, minimum lengths 5 ft. each.	
	ewelers'	clock shelving	ì

Unless otherwise SPECIFIED IN CATALOGUE.

If shorter length a reasonable additional charge will be made.

BASIS OF LIST PRICES.

All list prices are on an oak basis, unless otherwise specified, finished in natural, antique, or golden oak. Birch, any desired

	, come post so varie	
For	quarter-sawed oak, any finishadd 10% above plain oak	
	curly or wavy birch, any finishadd 10% above plain oak	
	cherry or walnut, any finishadd 20% above plain oak	
For	mahogany, any finishadd 25% above plain oak	
For	birdseye maple, any finishadd 30% above plain oak	
For	birch or hard maple genuine white	

NOTE.—The above does not apply to the cheap line of stock goods, such as "Perfection" counters, "Favorite" fruit cases, "Acme" wall cases, etc.; in other words—stock goods that are made in quantities.

SPECIAL NOTICE.

Oak in brown or black flemish, mission, weathered or green waxed finish, same price as regular finish.

Birch can also be made in walnut or ebony finish, at same price as regular finish.

Always state material and finish wanted.

REGARDING OUTFITS MADE PARTIALLY OF QUARTER-SAWED OAK AND PARTIALLY OF PLAIN OAK.

Quarter-sawed oak is very expensive at present and will un-undoubtedly continue to go higher as it becomes scarcer. To give the trade something between the plain oak and the quarter-sawed oak, we have decided to make when ordered, any of our outfits that are listed in plain oak, with the cornice face plates and the most prominent large surfaces in quarter-sawed oak, the balance in plain oak, for which add to such articles as are desired made in this manner, 5%. On such outfits as are listed in quarter-sawed oak and are desired in above manner, deduct 5%. This same rule applies to part curly birch and part plain birch.

REGARDING FRACTIONAL FEET OF FIXTURES.

Fractions will not be figured at all. If any particular piece of fixture, show case, floor case, table or counter or wall paneling is wanted longer than 6', it must be figured into the 7' bracket.

REGARDING SLIGHT CHANGES OF REGULAR DIMENSIONS.

On all goods that must be made up to order, an inch or two either way will not make any difference in the price as long as it does not increase the glass sizes.

ELECTRIC LIGHT, GAS FIXTURES, ETC.

Electric light or gas fixtures shown in any of the furniture herein listed are not included in these prices. We have a separate sheet and price list for electric light and gas fixtures, such as chandeliers, etc., which will be mailed on application.

For reflectors and electric light fixtures for show cases, wall cases, etc., see page 505 in catalogue.

REGARDING LOCKS ON DOORS.

Locks can be put on any of our show case doors at a slight additional cost. Of course, on the patent slide down vertical doors the locks are already included in the price, there being a special lock and automatic spring catch necessary for such doors. On slide sideway doors we can put the automatic spring catch and lock combined on each door at an additional price of per door, \$1.50

We can put a cheap lock with flat key on at.....per door, 1.00 Slide up doors for wall cases, etc., require good automatic mortise locks; same will cost extra...per door, 4.00 For different woods and finishes see pages X and XX.

MARBLE BASES LISTED.

Where no particular quality is mentioned it is understood that same can be had in white Italian, light, dark or gray Tennessee, in suitable height, according to the style of goods for which same is intended, at the prices as listed.

For above marble bases-see schedule of prices for each different style cases listed in the same schedule as the case.

For special prices per lineal foot and per square foot—see schedule of the different kinds of marble.

MARBLE BASES PER LINEAL FOOT.

REGARDING DRAWER ARRANGEMENTS IN JEWELRY WALL CASES.

In all the wall cases illustrated in the catalogue that are not stock wall cases, the base parts can be arranged to suit the pur-chaser, with either all drawers, all cupboards; part drawers and part cupboards to suit at the same price.

REGARDING PLATE GLASS IN JEWELERS' WALL CASES.

Prices are given in both DSAa glass and in plate glass. It will be noticed that the average difference in list price is \$8.00 per lin-

REGARDING FRENCH PLATE MIRROR BACKING IN JEWELERS' WALL CASES.

Any of our jewelers' wall cases can be furnished with plain French plate mirror backing, divided by the adjustable bracket uprights, at an additional price of \$12.00 per lineal foot.

REGARDING POLISHED PLATE GLASS SHELVES IN JEWELERS' WALL CASES.

Any of our jewelers' wall cases can also be arranged with polished plate glass shelves, with polished round edges, adjustable on the latest all steel, safety adjustable brackets, nickel plated finished; shelves can be arranged on the straight shelf order or on the broken brica-brac order. The additional price for the polished plate glass shelves will be \$9.00 per lineal foot

REGARDING WALL MIRRORS, ETC.

For our regularly listed outfits, such as the "New Philadelphia,"
"New St. Louis," "New St. Paul," "New Monon," or "New Dixon" wall cases, we can make wall mirrors and panels to match at the following additional prices:

REGARDING SHOW WINDOW WALL MIRRORS, SPECIAL WALL PANELING AND PIER MIRRORS.

The same comparative rule will apply as previous given "Regarding Wall Mirrors," adding proportionately for the difference in more elaborate designs, etc.

REGARDING ADJUSTABLE BRACKETS IN WALL CASES.

See specifications on preceding page. For information regarding which wall cases include the adjustable brackets (such as show adjustable brackets and cuts include the brackets). On such wall cases on which adjustable brackets are not included we will furnish our stamped steel safety adjustable brackets (the best, the Universal kind), in neckel plated finish, at the following

6'	wall	case	\$10	.00	14'	wall	case	 \$20.00
8'	- wall	case		.00	16'	wall	case	 25.00
10'	wall	case	15	.00	18'	wall	case	 25.00
12'	wall	case	20	0.00	20'	wall	case	 30.00

Using regular wood shelves as shown in cuts, polished hardwood or soft wood felt covered.

For general information regarding floor cases, show cases, etc., see pages 708-714, catalogue No. 88. or general information regarding drug store fixtures, see pages

500-508, this catalogue. For general information regarding cigar store fixtures, see pages

600-606, this catalogue.

CIGAR STORE FIXTURES

FOR CIGAR CASES, FLOOR CASES, SHOW CASES, ETC., SEE CATALOGUE NO. 88.

NOTICE. If you do not find herein what you are looking for, let us know. Give us a rough idea of what you want and we will be pleased to submit special designs.

SPECIAL NOTICE. In writing for estimates it is very important that we have the following information:

1st-How soon will you place your order?

2nd—How soon will you want the goods?

3rd—About how much do you intend to invest?

4th—Is there any design in our catalogue that suits you?

5th-What wood and finish do you want?

6th—Where are the fixtures to be shipped to?

7th—We presume you intend to pay cash.

Please give us this information with your reply and oblige.

If you don't find herein what you are looking for tell us what you want and we will send special sketches.

We Have It or Can Make It.

CIGAR STORE FIXTURES.

TO PROSPECTIVE PURCHASERS.

As suggestions, we submit for your inspection floor plans, interior views and elevations of our modern, up-to-date cigar store fixtures.

In writing for estimates be sure to give us as much information pertaining to your wants as possible. Also kindly let us know the following information:

First—Approximately, how much do you intend to invest?

Second—About when will you be ready to place your order?

Third—About when or what date do you intend to open up for business?

Fourth—Which of our designs suits you best?

Fifth—What kind of floor will you have?

Sixth—What kind of wood do you prefer?

Seventh—What lines do you handle besides cigars and tobacco?

SPECIAL NOTICE.

Always send a rough diagram of room with exact inside measurements. For show cases, cigar cases, combination cases, desks, counters, settees, mirrors, tables, floor cases, etc., etc., see catalogue No. 88.

The following is merely submitted to give you ideas.

Not how cheap, but how good at a reasonable price is our aim.

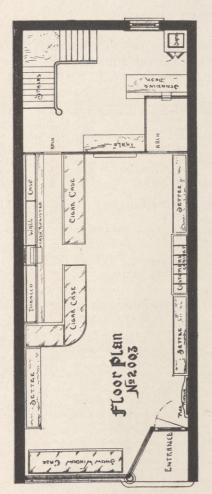

FLOOR PLAN OF A MODERN CIGAR STORE.

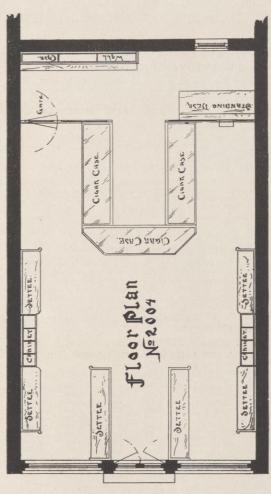

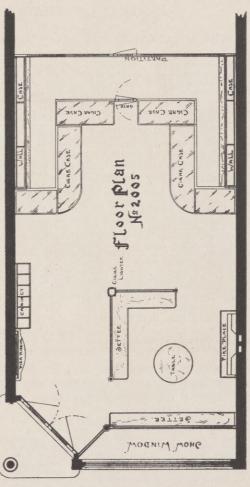

This is a plan for a "Mission" design outfit, similar to the outfit shown on page 614. We build the fixtures to fit any store.

SEND US A DIAGRAM OF YOUR ROOM AND LET US MAKE YOU A FIXTURE PLAN.

FLOOR PLANS OF A MODERN CIGAR STORE.

These plans are merely suggestions. When writing in regard to same, refer to number. Do not cut these out. We build fixtures to fit any store.

GENERAL INFORMATION AND PRICES OF SPECIAL ARRANGEMENTS FOR CIGAR STORE FIXTURES.

MINIMUM LENGTHS, ETC.

LENGTHS given in this list are always OUTSIDE LENGTHS. For other dimensions see descriptions in catalogue.

Prices given per foot in this price list are based on the following minimum lengths, unless specially mentioned in catalogue. For shorter lengths the advance of 10% is made, added to the regular prices.

Tobacco wall cases, minimum lengths	
Wall paneling, minimum lengths 6 ft.	each.
Wall mirrors, minimum lengths	
Customers' cabinets, minimum lengths 6 ft.	each.
Cross partitions, minimum lengths	each.

Unless otherwise SPECIFIED IN CATALOGUE.

If shorter length a reasonable additional charge will be made.

BASIS OF LIST PRICES.

All list prices are on an oak basis, unless otherwise specified, finished in natural, antique, or golden oak. Birch, any desired finish, same price as oak.

For	quarter-sawed oak, any finishadd 10	0%	above	plain	oak
	curly or wavy birch, any finishadd 10				
	cherry or walnut, any finishadd 20				
	mahogany, any finishadd 25				
	birdseye maple, any finishadd 30	0%	above	plain	oak
For	birch or hard maple, genuine white				

SPECIAL NOTICE.

Oak in brown or black flemish, mission, weathered or green waxed finish, same price as regular finish.

Birch can also be made in walnut or ebony finish, at same price as regular finish.

Always state material and finish wanted.

REGARDING OUTFITS MADE PARTIALLY OF QUARTER-SAWED OAK AND PARTIALLY OF PLAIN OAK.

Quarter-sawed oak is very expensive at present and will unundoubtedly continue to go higher as it becomes scarcer. To give the trade something between the plain oak and the quarter-sawed oak, we have decided to make when ordered, any of our outfits that are listed in plain oak, with the cornice face plates and the most prominent large surfaces in quarter-sawed oak, the balance in plain oak, for which add to such articles as are desired made in this manner, 5%. On such outfits as are listed in quarter-sawed oak and are desired in above manner, deduct 5%. This same rule applies to part curly birch and part plain birch.

REGARDING FRACTIONAL FEET OF FIXTURES.

Fractions will not be figured at all. If any particular piece of fixture, show case, floor case, table or counter or wall paneling is wanted longer than 6', it must be figured into the 7' bracket.

REGARDING SLIGHT CHANGES OF REGULAR DIMENSIONS.

On all goods that must be made up to order, an inch or two either way will not make any difference in the price as long as it does not increase the glass sizes.

ELECTRIC LIGHT, GAS FIXTURES, ETC.

Electric light or gas fixtures shown in any of the furniture herein listed are not included in these prices. We have a separate sheet and price list for electric light and gas fixtures, such as chandeliers, etc., which will be mailed on application.

For reflectors and electric light fixtures for show cases, wall cases, etc., see page 713 in catalogue No. 88.

For different woods and finishes see pages X and XX.

MARBLE BASES LISTED.

Where no particular quality is mentioned it is understood that same can be had in white Italian, light, dark or gray Tennessee, in suitable height, according to the style of goods for which same is intended, at the prices as listed.

For above marble bases—see schedule of prices for each different style cases listed in the same schedule as the case.

For special prices per lineal foot and per square foot—see schedule of the different kinds of marble.

MARBLE BASES PER LINEAL FOOT.

MARBLE BASES PER LINEAL FOOT; 7%" thick, with top edge polished and rounded. Bored for screws.

REGARDING ZINC LINING OF TOBACCO WALL CASES.

Such cases as are specified zinc lined underneath cuts, such zinc lining is included in price. Usually base part only is specified zinc lined. But we give the following schedule for zinc lining of wall cases, base part, center part and top part, as very often base part only is wanted lined, and sometimes other parts are desired lined with nickel or copper plated zinc. Following schedule will enable you to figure any part lined with plain zinc or nickel plated zinc or copper plated zinc:

Nickeled Coppered.

Coppered
Zinc

For general information regarding jewelry store fixtures, see pages 500-508, this catalogue.

\$1.00 \$2.00 1.00

DRUG, JEWELRY AND CIGAR STORE FIXTURES

GENERAL SPECIFICATIONS OF TOBACCO WALL CASES.

DESIGN. For general design see different styles of tobacco wall cases herein illustrated.

DIMENSIONS. Made any length to order. Standard height and depth, or special height and depth.

MATERIAL. Made of any kind of wood to order. Regularly made in oak or birch for the exposed parts; non-exposed parts, basswood. Panels 5-ply, built-up stock. (See basis of material on each page.)

CONSTRUCTION AND WORKMANSHIP. A No. 1, high grade in every respect, constructed as much as possible on the lock-joint principle; joints cannot come apart. Doors mortised and tenoned together. All constructed as air tight as possible.

FINISH. Is a high grade, A No. 1 four-coat work, water rubbed and hand polished finish or any desirable shade.

GLASS. Either DSAa glass or polished plate glass can be used in any of these wall cases. The finer cases are usually made in polished plate glass.

The DSAa glass used is the best DSAa glass obtainable.

The polished plate glass is the best polished plate glass obtainable. All the glass is set from the inside, bedded in putty and fastened with moldings; made as near dust proof and air tight as possible.

LINING. The interior of these wall cases should really be zinc lined. (See description on each page regarding just what part is zinc lined.) When no lining is specified, no lining is included. We can, however, line these wall cases to suit purchaser. (See schedule of prizes for zinc lining on previous page.)

SHELVES. The shelves in these wall cases are usually rack shelves and the wall cases are also usually arranged with moisteners in the proper places. The shelves in the upper parts are adjustable.

DOORS. Hinge doors for tobacco wall cases are the most air tight, but slide sideway doors are also sometimes very practical. Such wall cases as have slide sideway doors, such doors usually run on countersunk steel track, ball-bearing rollers and are made as near air tight as possible, with our rubber strip arrangement, and are made so that they can be easily taken out to clean. Hinge doors are usually hung on steel pin butts and have the necessary catches, etc.

BASES. The base boards on these wall cases are usually polished wooden bases to match the fixtures, but can be made with marble bases to order at a slight additional charge.

ELECTRIC LIGHT FIXTURES. Electric light fixtures inside of tobacco wall cases are not practical, as it dries out the goods. Ornamental electric light fixtures on the cornice, however, are sometimes practical, according to the design, etc., selected. We can furnish same to harmonize with the fixtures at additional charges.
