Where keys are kept—Keys to open the doors of all boxes are kept in a little box fastened to the pole by the side of the street box, the box having a glass cover.

Directions for sending in fire alarms—In case of fire go to the nearest street box break the glass cover of the key box, take the key from the hook and place it in the door of the street box, which has a spring lock and is easily worked. The lock being released, open the door. Place the index finger over the little brass hook or lug projecting from the slot near the top of the inner door, pull the hook down quickly, but steadily, to the bottom of the slot and let go immediately. The hook will fly back to its original place and the fire department will do the rest. Persons turning in an alarm should remain at the box until the arrival of the department for the

purpose of giving information as to the location of the fire.

Signals given on the fire bell—Two taps on the fire bell, after the alarm from the box has been sounded, calls for one hundred pounds direct pressure. This signal repeated calls for 125 pounds pressure. Three slow taps after the alarm means "fire out." One tap on the bell denotes broken wire. The steamer responds to alarms from boxes 65 and 67.

A Heater Without Fuel

The Parlor Drum will heat an upper room without fuel, dirt, work or danger from sparks. The large cut illustrates the Parlor Drum with our Return Flue Self-Cleaning Damper. The small cut shows the same Damper as used on a stove pipe. This Damper is guaranteed to save 25 to 50 per cent of fuel and give more heat in any kind of a stove. If, after two weeks trial, it does not prove our claims, it will be taken back and money refunded.

Piano Prices and Piano Values

Even a low priced piano may show the workmanship of men who know how to put consisten value into an instrument which is to be sold at the figure asked—if you buy such a piano you get the utmost that can be given for the money you pay.

Take for example, one of our Regent Pianos—sold for $300—the lowest price at which a reliable guaranteed instrument can be bought. Examine it and compare its construction with others marked at about the same figures. You need not be an expert to see the superiority of this instrument, because in every feature it bears evidence of the skill put into its making.

You are invited to visit our salesrooms and investigate our offerings, the above of which is but one
