Our Gang:

BENJAMIN LOZARE

*Old Student
Assoc
Philippines*

A MEMBER OF MRS. AQUINO'S CABINET.

Benjamin Lozare Ph.D.'82 is a professor and dean of the College of Letters and Science at the University of the Philippines in Manila. He was here for two days recently as part of an eight-week Eisenhower fellowship, which enabled him to pursue counsel in the U.S. on issues which are now of paramount concern in the Philippines: communication and conflict management.

After the change of government last February, he was drafted to work in the Ministry of Information. "Deputy minister" is a title he eschews, as the ministry is in the process of being dismantled. "It was used for propaganda under Ferdinand Marcos," he says. "We're coming up with alternative structures which we hope are more responsive to the needs of the Filipino people."

That's to include a presidential press staff; an information agency which Lozare will head; and his conversion of government radio and television networks to public broadcasting.

Lozare took a key role following last year's disputed election. He was in charge of the citizens' group that guarded the polls to document the fraud and cheating.

"Now there is a general sense of freedom; we can go from point A to point B. We can do what we want to do. There is optimism and confidence, contrary to the media reports that I get here which imply we're almost on the brink of civil war; things are being taken out of context. A lot of play has been given to disagreement in the cabinet, but people must remember that Mrs. Aquino doesn't have a party, that this is more or less a coalition government.

"It's not like a Republican party, where everyone is a Republican, and people speak from a common perspective. The manner in which she took office was through a very broad coalition of various groups, and so all of these debates that are going on now are just part of the democratic process. In time I'm sure consensus in major programs and policies will be achieved, as it is being done now."

BY ELLEN RULSEH

Lozare does not see the Communist insurgency as a problem. "A lot of people look at it purely along ideological lines, I don't think so. Those in the insurgency are there because of social injustice, or socioeconomic problems. These things can be addressed under the new government, and I think that makes the problem less serious. The primary recruiter for the Communist insurgency was Mr. Marcos himself, and I figure now that he's gone, things will definitely improve.

"One important project we're working on is establishing information centers all over the country. Before, much of the work of the information agencies was propaganda. If you wanted a government brochure there was no choice but to go to the source; if you wanted it on agriculture you had to go to the Ministry of Agriculture; all these things were scattered. If you lived in the southern islands, you'd have to fly to Manila to be able to get that.

"Now we have established twenty-seven information centers all over the country. They're right in town and on the ground floor, preferably in a space with glass walls so that people can see what's inside. They're staffed with people who can answer inquiries, and receive complaints and feedback. It's a two-way communication media shop.

"At the time of Marcos the government was deaf. It didn't listen to the needs of the people. Now we're trying to be more sensitive to that. Rather than tell people what to do, what they need, we're encouraging them to tell us. This, of course, inevitably brings conflict, and that's why my interest in this Eisenhower exchange program centers around the role of communication and conflict management. The important point now is, how do we keep any conflict

from breaking out into physical confrontation, keep it at the level of rationality—full expression of views and opinions.

"The way in which the United States can be of service to the Philippines at this time is by participating in an exchange of information. In spite of our long relationship, I feel that there's still some room for us to get to know each other better, to understand how American policies are formulated, how American government works, and similarly, for the American people to appreciate Philippine aspirations. Things will develop from there."

Lozare has met with a wide range of people, from psychiatrists working on conflict resolution, to diplomats, journalists, academicians, scholars, and think-tank organizations. "I've met with two psychiatrists working on Arab-Israeli negotiations another in the area of race relations in Miami. I've talked with government spokesmen in the state department and the White House, the Rand corporation, and have visited several universities, and researchers working in this area. From a professional point of view it's excellent exposure.

"Madison's like home to me," said Lozare, who was here with his wife Christina. "The city and the University gave us a lot of pleasant memories. The time I was here was one of very significant professional growth. I made a lot of friends, and now that I'm moving into a new profession I'd like to pick up more things here."

Lozare is active in the Wisconsin Alumni Club in the Philippines. "Many of us appreciate what Madison Friends of International Students have done for us. They help foreign students get settled, find housing, meet friends, get acquainted with the community. So as a gesture of appreciation, what we've done is to organize a similar organization in the Philippines for international students. We thought that would be in keeping with the Madison spirit. We also have a big reunion every Christmas of Big Ten alumni. We all take turns hosting it." □

Wisconsin in the Philippines.

Students
in Philippines*

By Joel Dresang '80

QUEZON CITY, PHILIPPINES—Gloria D. Feliciano misses Madison, but she misses more the friends she made there. She is one of 160 members of an academic community here in the Philippines' capital city who confess to a special Badger nostalgia. They call themselves the Wisconsin Association of the Philippines—people who have lived, worked or studied in Wisconsin. Feliciano did all three at the UW from 1959 till she got her PhD in 1962. Three years later, with the help of UW Journalism Prof. Wilmot Ragsdale, she helped establish the Institute of Mass Communication—of which she is dean and professor—here at the University of the Philippines.

One of her colleagues on the campus is Prof. Rosalinda Tidalgo, with a PhD in economics from the UW in 1975. Another is the university's administrative vice-president, Santiago S. Simpas, who got his Wisconsin PhD in sociology in 1975. He mentions a similarity in the two universities: "both strive for academic excellence and espouse academic freedom."

Yet many faculty here find academic freedom is sometimes intimidated by the "constitutional authoritarianism" of the Marcos government. Moreover, those who should be expected to demand freedom might not do so; teachers refer to undergraduates as "martial law babies," the majority too timid, too unquestioning. And academic excellence is more difficult to attain in this country where textbooks and paper are in greater demand than in supply, and instructors have to seek jobs to supplement incomes as low as \$175 a month.

Worldwide, the Philippines ranks high in the number of college graduates per capita, but Rosalinda Tidalgo says this is less impressive than it sounds. "The level of professionalism of our students is much lower than it is in industrialized countries. Most enter college when they're sixteen; as a rule, that means they lack the maturity they need to apply themselves. Many discover they must go on to graduate school to catch up once they have become more mature, more serious."

The Diliman campus of the UP is nearly as expansive and attractive as is ours in Madison, and Santiago Simpas says there's another similarity, its reputation for stu-

dent activism. For instance, the recent state visit of President Marcos to the States triggered a series of boycotts, rallies and protests spearheaded by student "radicals," a vocal minority on the campus. Marcos' opponents challenge students to take advantage of their time and lack of both responsibilities and educational opportunities, and put their energies to resisting the government. The year-old Wisconsin Association has a different direction.

"It's more than just a social effort," says Simpas. "We want to get involved in the mainstream of national development." The association's constitution describes that involvement in part as promoting "an awareness and understanding of the various features and characteristics of contemporary Philippine society."

Association members take new foreign students to the UP's agricultural campus in Los Baños for brief visits hosted by local families. They say these trips provide a healthy exposure to Philippine life outside

of metropolitan Manila. And that's where four out of five Filipinos live—outside that densely populated city of nearly ten million.

Santiago Simpas is a founding member of the Wisconsin Association of the Philippines, just as he was of the UW Filipino Association while he was in Madison. In its seventy-five years, the UP has never before had an administrative vice-president who is not one of its alumni.

The University of the Philippines serves an Oriental society. Few of those students will have the chance to study in the U.S. probably. Foreign education is an unaffordable impossibility for most of the people in a country where per capita income is less than \$800 annually. This means they'll never see—except through the eyes of Feliciano, Tidalgo and Simpas—some of the things these three remember: Lake Mendota, the Carillon Tower, the Sun Prairie Corn Fest, and "the people and their kindness."

Bucky watches over a meeting of the Wisconsin Association of the Philippines. (Participants not identified.)

Joel Dresang, former news reporter for Madison's WMTV, is spending a year in the Philippines before touring Southeast Asia.

NEWS FROM THE UNIVERSITY OF WISCONSIN

Serving the state through campuses at Madison and Milwaukee, nine University Centers, and a statewide extension system.

RELEASE

Immediately

MADISON, Wis.--The University of Wisconsin regents Friday accepted grants and gifts and approved contracts with federal agencies aggregating \$16,544,570, including \$3,352,770 from the U.S. Office of Education to help defray costs of construction projects on four campuses.

The list--largest and longest in the University's history--also included 105 contributions from Wisconsin sources.

The building projects include the 19-story Charles R. Van Hise (language) Hall in Madison, for which the Office of Education allocated \$1,377,821; the nine-story addition to the Chemistry Research Building, Madison, \$269,016; History, Music, Art-Art Education, Madison, \$331,660; the first segment of the Numerical Analysis-Statistics Building, Madison, \$68,500; new library at Milwaukee, \$475,766; classroom, laboratory, and library facilities at the new Waukesha Center, \$610,677; and the classroom and administration buildings at the new Rock County Center near Janesville, \$219,330.

The National Institutes of Health provided \$868,221 for continued operation of the Wisconsin Regional Primate Research Center in Madison. National Science Foundation grants included \$568,175 for graduate fellowship programs and \$550,000 for expansion of facilities at the University Computing Center in Madison.

A half-million dollars was allocated by the Agency for International Development to continue support of the Land Tenure Center at Madison. The Department of Interior Office of Water Resources Research contributed \$139,797 for the University's Water Resources Center, newly established at Madison.

-more-

Add one--gifts and grants

The National Aeronautics and Space Administration provided \$900,000 to support space related research in theoretical chemistry, other areas of space science, and engineering under the direction of the Graduate School and the Theoretical Chemistry Institute.

Other allocations include \$461,000 from the Ford Foundation for the University of Wisconsin to assist in development of the School of Economics at the University of the Philippines, and \$289,468 from the State Conservation Commission to cover cooperative research programs in fishery, wildlife, water, forestry, and related resources.

The contributions from Wisconsin sources included:

The Johnson Foundation, Racine, \$1,750; Mrs. Edmund Fitzgerald, Milwaukee, \$800; Wisconsin Society for Jewish Learning, Milwaukee, \$11,375; A. J. Sweet Inc., Madison, \$200;

Mrs. Winifred Woodmansee, Milwaukee, \$320; Pelton Foundation, Milwaukee, \$1,100; Lee's Drug Store Inc., Menomonie, \$250; American Dairy Association of Wisconsin, Madison, \$500; Harry J. Grant Foundation, Milwaukee, \$4,000; Kohler, Wis., Foundation Inc., \$10,000; Wisconsin Valley Traffic Club, \$500; Kremers-Urban Co., Milwaukee, \$7,500;

Rainbow Lodge Inc., Vilas County, \$575; Production Credit Association of Appleton, \$400; Fontaine, McCurdy and Co., Milwaukee, \$500; National Society of the Colonial Dames of America in Wisconsin, \$500; Green Tree Garden Club, Milwaukee, \$500; Rock County Bankers' Association, Milton Junction, \$400; First National Bank of Ft. Atkinson, \$200;

Mr. and Mrs. Thomas A. Ringness, Madison, \$250; McKesson and Robbins, Milwaukee, \$300; Wisconsin Elks' Association, Green Bay, \$1,020; Wisconsin Fertilizer Association, Madison, \$200; Wisconsin Rural Rehabilitation Corp., Madison, \$2,700; A. O. Smith Corp., Milwaukee, \$1,500; American Cancer Society, Wisconsin division, Madison, \$800;

Add two--gifts and grants

Oak Electro/Netics Corp., Elkhorn, \$15,000; Phi Beta Play Readings, Madison, \$700; Wisconsin Cannery and Freezers' Association, Madison, \$377.50; Reedsburg, Wis., United Fund Inc., \$2,000; Wisconsin Dental Association Foundation Inc., Milwaukee, \$500; Oscar Mayer and Co., Madison, \$4,000; Belle City Malleable Iron Co., Racine, \$1,600;

Nekoosa-Edwards Foundation Inc., Port Edwards, \$3,500; Sheboygan, Wis., Public Schools, \$4,111; Prof. Robert West, Madison, \$250; Grafton, Wis., Public Schools, \$1,304;

Kraut Foundation Inc., Fond du Lac, \$200; Prof. William G. Reeder, Madison, \$1,325;

Marathon Electric Mfg. Co., Wausau, \$759; Madison Chamber of Commerce, \$711; 1965 Senior Class, University of Wisconsin-Milwaukee, \$1,936;

Wisconsin Regional Writers' Association Inc., Sheboygan Falls, \$1,028; First Wisconsin Trust Co., Milwaukee, \$325; Extension Journal Inc., Madison, \$5,000; and University Surgical Associates, Madison, \$3,000.

STATEMENT ON THE PHILIPPINE PROJECT

Assistant Professor Allen C. Kelley of the Economics Department is already at the University of the Philippines to assist in the planning of the training program and to gather data which he and others of the University of Wisconsin faculty will use in their research programs and those of their students.

Several economists from the University of Wisconsin and other institutions have already agreed to join the project or are considering association with it. Dr. Douglas Paauw, Director, Center for Development Planning, National Planning Association will leave this month to join the project in the Philippines. Professor James Earley, chairman of the Department of Economics, for 1962-65, will lecture in the fall term in the training program at the University of the Philippines.

The University of Wisconsin has a number of scholars who have had teaching-research and/or advisory experience in Southeast Asia, including P.T. Ellsworth, Everett D. Hawkins, Theodore Morgan, Hans O. Schmitt, John Smail, Fred Von der Mehden, and Edwin Young.

Edwin Young,

It is hoped that this association with the University of the Philippines will enrich the program of studies sponsored by the East Asia Committee of the University of Wisconsin and research in the field of Economic Development. Wisconsin, under the direction of Theodore Morgan, already has a three year contract with The Agency for International Development to study "Economic Interdependence in Southeast Asia".

President Fred Harvey Harrington
University of Wisconsin
Madison 6, Wisconsin

Dear President Harrington:

I am pleased to advise you that The Ford Foundation has approved a grant of \$536,000 to The Regents of The University of Wisconsin over a three-year period to assist in the development of the School of Economics at the University of the Philippines. This grant is being made in response to the request dated June 23, 1964 from Mr. Enrique T. Virata, Acting President of the University of the Philippines, to Mr. Harry L. Case, the Foundation's representative in the Philippines, and your letter of May 6, 1965 addressed to Mr. George Gant of the Foundation staff, and in accordance with this letter. A copy of my letter informing President Carlos P. Romulo of the grant is enclosed for your information.

It is our understanding that the grant funds will be used substantially in accordance with the attached budget marked Attachment A. It is also our understanding that an agreement will be negotiated between the University of the Philippines and the University of Wisconsin regarding the administration of the program.

The Foundation will refer to this grant at a later date in a press release that will be sent to you in advance. Please consult with the Foundation's Office of Reports should you wish to make an earlier announcement.

Following receipt by the Foundation of a countersigned copy of this letter and the letter notifying President Romulo of the grant, payment of the grant will be made as follows: \$461,000 will be paid to The Regents of The University of Wisconsin in annual installments upon receipt of your written requests directed to the Foundation's representative in the Philippines and on his recommendations; and \$75,000 will be paid directly to the University of the Philippines in three declining annual installments upon receipt of its written requests directed to the Foundation's representative in the Philippines and on his recommendations.

Taylor note

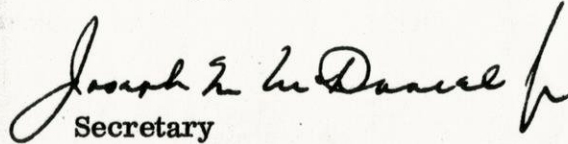

President Fred Harvey Harrington

-2-

Attachment B sets forth further terms and conditions applicable to this grant. We particularly call your attention to paragraph 3 of this statement concerning reports to the Foundation. Interim reports should precede or accompany all requests for payment of grant installments after the initial payment. If the statement and this letter correctly set forth your understanding of the arrangements made with you regarding the grant, will you please countersign and return the enclosed copy of the letter to the Foundation. If there are any points that need clarification, or if you wish additional information, please do not hesitate to communicate with us.

On behalf of the Foundation may I extend every good wish for the success of this program.

Sincerely yours,

Secretary

461 000

***To be paid directly to the University of the Philippines**

ATTACHMENT B

THE FORD FOUNDATION, 477 MADISON AVENUE, NEW YORK 22, N. Y.

TERMS OF GRANT

<u>Grantee:</u>	The Regents of The University of Wisconsin Madison 6, Wisconsin	<u>Date:</u>	June 15, 1965
		<u>Amount:</u>	\$ 536,000
		<u>Period:</u>	Three years

1. Expenditure of Grant Funds. Under the laws of the United States Government applicable to the Foundation all grants, including this one, must be expended solely for "educational, scientific, or charitable" purposes. The grant is for the specific purposes stated in the accompanying letter of grant notification and may be modified only with the Foundation's approval.
2. Return of Grant Funds. Grant funds will be returned to the Foundation
if the grantee is a United States organization and loses its tax-exempt status under United States federal laws; or
if the grantee is a foreign organization and loses its tax-exempt status under comparable laws of the nation in which its charter was issued; or
if these funds are not expended or committed for the purposes of the grant and within the period stated.
3. Reports to the Foundation. A written report will be furnished to the Secretary of the Foundation upon completion of the project or program for which the grant has been made. Where the period of the grant exceeds one year, interim reports will be furnished annually, in addition to the final report. These reports should contain a financial accounting by categories of expenditure, a narrative account of what was accomplished by the expenditure of the funds, and reference to any publications resulting from the grant which have appeared or are in preparation.
4. Public Announcements. The Foundation lists all grants in its annual report. Arrangements for announcement in a press release are stated in the accompanying letter of grant notification. If the letter states that the Foundation plans to make a press announcement, the grantee may issue more detailed information at the same time or later without prior clearance from the Foundation. The Foundation's Office of Reports would like to receive copies of press releases, photographs, film scripts, or any published material about the grant or the work it has made possible.
5. Commitment. This grant is made with the understanding that the Foundation has no obligation to provide other or additional support for the grantee, unless otherwise stated in the accompanying letter of grant notification.

THE FORD FOUNDATION
477 MADISON AVENUE
NEW YORK, NEW YORK 10022

June 15, 1965

C President Carlos P. Romulo
University of the Philippines
Quezon City, The Philippines

Dear President Romulo:

O
P
Y I am pleased to inform you that The Ford Foundation has approved a grant of \$536,000 to The Regents of The University of Wisconsin over a three-year period to assist in the development of the School of Economics at the University of the Philippines. This grant is being made in response to Acting President Enrique T. Virata's request of June 23, 1964 addressed to Mr. Harry L. Case, the Foundation's representative in the Philippines, as modified by your subsequent discussions with him, and the letter dated May 6, 1965 from President Fred H. Harrington of the University of Wisconsin addressed to Mr. George Gant of the Foundation staff.

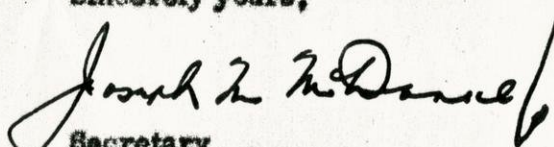

The grant will provide for eight man-years of foreign advisory personnel and ten man-months of consultants; six man-years of Ph. D. fellowships abroad; postdoctoral and other study abroad; books and equipment; professional and administrative support for advisors and consultants at the University of the Philippines and the University of Wisconsin; and indirect costs at the University of Wisconsin. The grant also provides \$75,000 of supplementary local support to research and training to be paid directly to the University of the Philippines. It is understood that an agreement will be negotiated between the University of the Philippines and the University of Wisconsin regarding the administration of the program.

Following receipt by the Foundation of a countersigned copy of this letter and the letter advising President Harrington of the grant, \$75,000 will be paid to the University of the Philippines in three annual installments of \$35,000, \$25,000 and \$15,000 upon receipt of your written requests directed to the Foundation's representative in the Philippines and on his recommendations. Each payment request after the first should be accompanied by a progress report and a statement of financial expenditure as well as a statement of projected plans for the use of the funds requested.

If this letter correctly sets forth your understanding of the arrangements made with you regarding the grant, will you please countersign and return the enclosed copy of the letter to the Foundation's representative in the Philippines. If there are any points that need clarification, or if you wish additional information, please do not hesitate to communicate with him.

On behalf of the Foundation may I extend every good wish for the success of this program.

Sincerely yours,

Secretary

News from the Ford Foundation

477 Madison Avenue, New York, N.Y. 10022
Office of Reports PLaza 1-2900

PLEASE OBSERVE RELEASE DATE

FOR RELEASE THURSDAY, P.M., AUGUST 12, 1965

For further information: Richard Magat or Walter Ashley

NEW YORK, Aug. 12 -- A series of grants to spur agricultural development in the Philippines and in Mexico was announced today by the Ford Foundation.

Grants totaling \$2.8 million were made to the University of the Philippines and Cornell University. The two institutions will extend their collaboration, through joint research and staff training, to strengthen the over-all academic program of the University of the Philippines College of Agriculture. (Details on page 2)

In Mexico, the Foundation granted a total of \$1.6 million for an intensive effort to make the results of agricultural research available to farmers, and for a program of research and teaching in agricultural economics, farm management, and marketing to which Iowa State University will supply consultants. (Details on page 2)

The Foundation also announced its first grant -- \$293,500 -- for family planning in the United Arab Republic. The grant will be used for research on contraceptives suitable for local use; training of physicians, nurses, midwives, and health administrators; and pilot action programs in rural areas

(MORE)

and urban areas near Cairo and Alexandria. The Foundation will also supply consultants. (Details on page 3)

The major purpose of the grants in the Philippines (\$1,445,000 to the University of the Philippines and \$1,375,000 to Cornell) is to develop staff competence in research and graduate teaching at the College of Agriculture. Cornell will continue to provide Ph.D. training for college staff and -- to help provide better liberal education for students at the college's Los Banos campus -- graduate fellowships for overseas study will be available to staff members in the humanities and the social sciences. Fellowships will also be provided for agricultural administration and agricultural education.

The grant will also enable the College of Agriculture to expand its agricultural-extension program in farm and home development. In addition, funds will be used to strengthen the Association of Colleges of Agriculture in the Philippines, a group formed last year to improve communications between the college and the seventeen other college-level agricultural institutions in the country. The grant will also help the college expand its library resources and enable visiting professors from other Asian countries to study and teach at Los Banos.

A grant of \$750,000 will support a program by the Mexican government designed to bring the results of agricultural research to farmers, to assist them in increasing their production of such basic crops as wheat, corn, beans, potatoes, and cotton. A new approach to agricultural extension will be centered on five existing regional research stations operating under the National Agricultural Research Institute at Chapingo. Each station will have

(MORE)

an extension supervisor, a specialist in farm management, an additional agronomist, and an additional plant-protection scientist. These teams will conduct courses and conferences for extension staff, and work with them and the farmers on production problems. As part of the program, extension workers in three regions will be deployed in different patterns -- for example, with variations in the number of farmers each worker serves, and the number of sub-professional workers supervised by one graduate -- to test the most effective use of agricultural extension manpower.

With a \$640,000 grant, Iowa State University will provide consultants to the National School of Agriculture at Chapingo, near Mexico City, for development of a master's degree program in agricultural economics, farm management, marketing, and statistics. Iowa State will also assist the University of Nuevo Leon in setting up an undergraduate program in these subjects. The program will help supply the trained Mexican manpower needed in public and private agencies concerned with credit, marketing, farm management, and land tenure, and with shaping policies on such issues as price supports and the marketing of agricultural products abroad. A grant to the National School of Agriculture of \$195,000 will be for fellowships at Chapingo to develop a cadre of Mexicans trained in farm management, marketing, and agricultural economics from which teachers for Chapingo and the five provincial universities will be selected.

The Foundation, which has previously concentrated its support for national family-planning efforts in India, Pakistan, and Tunisia, made its first grant for training and research in family planning and reproductive biology in the United Arab Republic. The grant of \$293,500 will support

(MORE)

clinical research at Cairo and Alexandria Universities on the use of oral contraceptives and intrauterine devices, with particular emphasis on problems peculiar to the United Arab Republic and similar regions. The grant will also support training in the universities' departments of public health of physicians, nurses, midwives, health administrators, and medical students. Short courses will be conducted for public and private medical practitioners as well as for health and social workers in reproductive biology, contraceptive technology, demography, vital statistics, and mass communication. The curricula for regular medical students will be revised to include these subjects.

In addition, pilot action programs in family planning will be conducted in rural areas and in urban areas near Cairo and Alexandria.

Following is a complete list of grants announced today by the Foundation:

OVERSEAS DEVELOPMENT

AFRICA

Regional

Educational Services Incorporated (Watertown, Massachusetts) -- \$20,000 grant, for further strengthening of mathematics teaching in African schools. Funds will provide the services of three additional mathematicians to work in Mombasa with Africans taking part in a mathematics-writing workshop.

Congo

Lovanium University -- \$170,000 grant, for continued support of the university's junior-college program, under which promising students are prepared for full university work.

National School of Law and Administration -- \$387,500 grant, for continued support of the school's training program. Established in 1960 with Foundation assistance, the school now has 500 regular students and more than 100 in short-term programs. The grant will be used for teachers' salaries, travel, and housing.

(MORE)

Liberia

Associated Colleges of the Midwest (Chicago) -- \$150,000 grant, for continued support of Cuttington College.

Nigeria

Nigerian Institute of International Affairs -- \$173,000 grant, to support the institute's study program through research, conferences and seminars, special lectures, and library services.

Government of Northern Nigeria (Ministry of Economic Planning) -- \$380,000 grant, to help develop a credit institution to promote small-scale private industrial enterprises. Funds will be used mainly for the services of three credit advisers.

Senegal

University of Dakar -- \$140,000 grant, to assist in the preparation of an international West African atlas by the French Institute of Black Africa.

MIDDLE EAST

Iraq

Iraq-American Educational Association (Baghdad) -- \$110,000 grant, to enable Baghdad College to continue participation in the revision of the English-language teaching program being undertaken by the Ministry of Education in Iraq, and to extend its assistance in English-language training to the Institute of Public Administration in Saudi Arabia.

Jordan

Government of Jordan -- \$310,000 grant, for a comprehensive plan to strengthen Jordan's junior colleges. The grant will help establish a new junior college to teach business skills by training five faculty members in the United States, and providing equipment and facilities.

Turkey

Turkish Management Association -- \$350,000 grant, to help establish a management development center to train practicing managers and provide technical services to business and industry in Turkey.

United Arab Republic
