MINUTES OF THE REGULAR MEETING
of the
BOARD OF REGENTS OF THE UNIVERSITY OF WISCONSIN SYSTEM

Madison, Wisconsin

Held in the Clarke Smith Room, 1820 Van Hise Hall
Friday, April 8, 1983
9:05 a.m.

- President Beckwith presiding -

PRESENT: Regents Beckwith, Clusen, Conroy, Finlayson, Fitzgerald, Heckrodt, Knowles, Lawton, O'Harrow, Schilling, and Zirbel

ABSENT: Regents Fish, Gerrard, Grover, Podlesny and Veneman

Upon motion by Regent Knowles, seconded by Regent Finlayson, it was voted that the minutes of the regular meeting of the Board of Regents of the University of Wisconsin System, held on March 11, 1983, be approved as mailed to the members of the Board.

REPORT OF THE PRESIDENT OF THE BOARD

Regent Catherine Conroy, of Milwaukee, was welcomed to the Board by President Beckwith, who noted that she held the office of Wisconsin Vice President of the Coalition of Labor Union Women. Before her retirement, she was a representative of the Communication Workers of America and was on the Executive Board of the Wisconsin AFL-CIO. Her public service activities included membership on the State Natural Resources Board, as well as national and state advisory committees on women. In addition, she was a founder of the National Organization of Women. Her appointment was for a term ending in 1985.

Reporting as President of the State Board of Vocational, Technical and Adult Education, Regent Zirbel stated that an informational program was to be conducted concerning efforts to retrain unemployed workers. On another subject, she indicated that the State Board had recommended that the UW and VTAE Systems work together to administer the Wisconsin Higher Education Grant program.
Stating that appointments were being made to the various VTAE district boards, she noted that the numbers had been increased from seven to nine members. In conclusion, she reported that the VTAE biennial budget was being well received in the Legislature and that ground had been broken on March 30 for the new Madison Area Technical College building.

Regent Lawton, Chairman of the Council of Trustees of the UW Hospital and Clinics, summarized matters considered at the Council's meeting the previous day, reporting first that the hospital continued to be in good financial condition. While there was a decrease in bed-days, there also was an increase in revenues due to the intensity of care being provided. With respect to the public patient program, which had been discontinued in January due to lack of funds, he indicated that legislative solutions were being proposed and there was hope that it could be renewed. The issue affected the educational program, he noted, inasmuch as public patients were important in the teaching of medical students in residence.

There also was discussion of the possibility of establishing a health maintenance organization, with faculty of the Medical School and University Hospital as the base. The question was an important one in Madison, Regent Lawton pointed out, because the state might decide to contract with HMOs for the care of all state workers, and University Hospital took care of a significant number of state employees. "If we were to go into an HMO-type organization and bid for those contracts, it would be primarily to protect our existing patient load. We would hope that they would not be required to go elsewhere for their care and hinder our educational program."

Regent Lawton stated that as a final item of business, the Council reviewed the annual budget which proposed a 5.4 percent increase in the per-diem rate, still leaving University Hospital with one of the lowest rates among Midwest universities and comparable hospitals in the state. This increase would have to be approved by the recently recreated Rate Review Commission, he noted, adding that it was hoped the response would be favorable, since the proposal was a modest one. The budget was to be presented to the Board of Regents in May.

Regent Beckwith remarked that he had heard of some disquiet in the Madison medical community about UW Hospital physicians forming an HMO because they had available for their assistance residents who were not available to physicians in other clinics and hospitals. The answer to that concern, Regent Lawton felt, was that the Medical School had made every effort to include the other hospitals in their training programs to the extent that many residents were in fact working in the other three hospitals and thus could assist physicians there. "Town and gown issues are as old as medical schools, and I think our school has done extra-ordinarily well in healing a rift that is ancient." Observing that the concern in Madison medical circles was related to the intensely competitive situation which existed, he expressed the hope that there would be acceptance of the university's position in that regard.
It was announced by President Beckwith that he had asked Regents Knowles and Lawton to serve with him as Regent representatives on the committee that would be negotiating salary increases for faculty and academic staff. He noted that these matters were being considered by the Faculty/Academic Staff Compensation Committee, again chaired by Prof. James Skiles and Mr. Charles Bauer, who also had headed the Committee skillfully and thoughtfully in previous biennia. He stated the hope that The Association of University of Wisconsin Faculties, the American Federation of Teachers and all others who were interested in faculty compensation would join in presenting the best possible case to the Department of Employment Relations and to the Joint Committee on Employment Relations. "It seems to me that this is the time, if we have any modest disputes, to put those aside and work for our common interest with all the energy we have to achieve for our faculty the compensation that they are entitled to."

President Beckwith reported that he had consulted with the Chairman of the Education Committee, several other Regents and Vice President Lyall regarding a possible study of the status of both teaching and non-teaching academic staff. Indicating that he considered it appropriate for the Regents to address an array of issues on that topic, he said these matters might include the whole academic staff structure, definitional questions, whether there should be fixed-term faculty, and the appropriate use of teaching academic staff. He had, therefore, asked that the Education Committee, with the assistance of Vice President Lyall and her staff, undertake such a study, which probably would be structured somewhat like the recently completed competency study.

As Chairman of the Education Committee, Regent Schilling added that he would welcome any comments or suggestions concerning that effort.

As the final item in his report, President Beckwith noted that Mr. Jeff Browne, who had for several years reported higher education matters for The Milwaukee Journal with great skill, was leaving that assignment to accept a promotion. Stating that Mr. Browne's work had been an asset to higher education as well as to his paper, Regent Beckwith extended congratulations to him on behalf of the Board.

REPORT OF THE PRESIDENT OF THE SYSTEM

It was moved by Regent Knowles, seconded by Regent Finlayson and unanimously carried that the following resolution be adopted:
Resolution 2787: That the report of non-personnel actions by administrative officers to the Board of Regents and informational items reported for the record (copy on file with the papers of this meeting) be received for the record; and that actions included in the report be approved, ratified and confirmed.

Chancellor Shain called upon Dr. Leo Walsh, Dean of the UW-Madison College of Agricultural and Life Sciences and Director of the Agricultural Experiment Station, to introduce a special presentation. Stating that 1983 marked the 100th year of the Agricultural Experiment Station, Dean Walsh said that activities in honor of the event included a day of commemoration on March 24 and preparation of two publications highlighting contributions made by the station during the past century. (Copies are on file with the papers of this meeting.) He then introduced Prof. Fritz Albert to show a film which he had prepared on activities and accomplishments at the various branch stations. Following is a summary of information included in the presentation.

The Wisconsin Agricultural Experiment Station was established in 1883 for improvement of farming and rural life. In the past 100 years, crop varieties most suitable for Wisconsin's farms had been developed at the stations, and much research centered upon forages, the foundation of dairying and livestock farming. At the same time, agricultural engineers designed machinery that made farm work easier and more efficient. Research in corn production helped triple yields since 1940, the muscle biology laboratory worked on meat-quality problems of all kinds, and the food research institute concentrated on food safety. Experiment station scientists continually were seeking better handling, processing and marketing techniques for food products, while biochemists had been unlocking the secrets of life itself. At the turn of the century, Dr. Babcock's animal feeding experiments led to the discovery of vitamins and ushered in the new science of nutrition. Vitamin research continues and recently led to treatments for bone diseases of patients with kidney failure and also for milk fever in cattle. Biochemists, geneticists and bacteriologists found ways to study and manipulate the genetic material deep inside cells—research which was expected to lead to dramatic revolutions in health care and agriculture in years to come.

In the meantime, experiment station rural sociologists were studying people and communities. Their applied operations laboratory, which processed information from the U.S. Census and other sources, helped communities and public agencies make crucial decisions about planning and the use of public funds in such areas as planning for the elderly population's future needs and use of the lower Wisconsin River. Agriculture economists had been working with cooperatives since the 1920s on pricing, management methods and marketing techniques. The stations serve as outdoor laboratories to test plants, the impact of chemicals on the environment, and new dairy methods of breeding, feeding and management, as well as giving
students the opportunity for field experience. Research findings are shared through the work of Extension county agents, field days and various publications. Thirty field days per year have been held at branch stations, with attendance of more than 20,000.

Location of the branch stations takes into account differences in soil and climate around the state, Arlington Station having rich, prairie soil, Hancock Station sandy soil, and the Ashland Station red clay soil. The Ashland Station is noted for its excellent dairy herds, with farmers across the state benefiting from what has been learned there. At the Spooner Station, experiments with sheep began in 1936. This work led to a cure for white muscle disease, and researchers then studied the effects of different pastures upon lambs and ways to harvest, store and feed forage.

In the 1940s, central Wisconsin's Marshfield Station was used to demonstrate the value of land-forming methods, in order to allow run-off and increase productivity. Research helped alfalfa production to flourish, and animal health studies aided dairy farming, which also is important in that part of the state. Peninsular Station pioneered development of the apple and cherry industry. Researchers introduced a new cherry picker and dwarf apple, as well as making progress in pest control. In cooperation with the U.S. Department of Agriculture and all 50 states, there is cultivation of the nearly 150 species of potatoes. Seeds, which are easier to store and ship than tubors, are dried and maintained, insuring that potato breeders around the world have a source of genetically diverse material. The Hancock Station, located in the central sands area, features shelter belts against erosion. Research performed there helped the state become the number one producer of snap beans through irrigation agriculture and made important advances in vegetable preservation and disease control.

To address soil erosion problems in hilly southwestern Wisconsin, researchers at the Lancaster Station have engaged in cooperative contour farming programs, which also benefit farmers in Illinois, Iowa and Minnesota. Effects of grain supplements on conception rates and calving intervals of beef cows are being studied by animal scientists, who also experiment with different types of grasses in order to select a pasturing method that would produce the most beef per acre. The largest research complex of the experiment stations is located near Arlington. It is the center of a thousand research efforts, examples of which include feeding of bull calves for beef, improvements in diets of sows, increased corn yields through photosynthesis research, breeding of alfalfa for higher yields and disease/pest resistance and dairy product research.

At the film's conclusion, it was noted that research findings are taken to the classroom to aid in instruction, as well as being provided to farmers and others in the field of agriculture. Thus, the research that was begun 100 years ago continues, but has greatly expanded in scope, benefiting in some way all the people of Wisconsin.
Reporting on the status of the federal Solomon Amendment, President O'Neil said that after the issuance in March of a preliminary injunction against enforcement of the amendment, System legal counsel Stathas informed all UW institutions that because of this decision no further steps should be taken to implement it. Other universities concurred with this view, although there was some confusion about the precise scope and applicability of the federal court judgment. Within the past few days, however, the U.S. Justice Department seemed to have reached the same conclusion and had informed the Department of Education that steps should not be taken to enforce the Solomon Amendment until the preliminary injunction was dissolved or superseded.

In other developments on that issue, the President referred to ongoing efforts within Congress to postpone the effective date of the amendment until some time in the next academic year. At least two congressional committees had held hearings on the postponement issue, and two bills which would have that effect were pending. With regard to the regulations themselves, refinement of which was exempted from the preliminary injunction, he reported that the two federal agencies involved had clearly indicated willingness to mitigate the verification burden upon colleges and universities, at least for the first two years. While final regulations had not been issued, it was expected that they would be somewhat less onerous than the initially proposed regulations.

Turning to another legal development, President O'Neil summarized an opinion just issued by Attorney General La Follette regarding the possible effect upon ROTC programs of Chapter 112, Laws of 1981, which prohibits state contracts with contractors who discriminate against employees or applicants for employment on the basis of sexual orientation. Noting that Representative Ulichny had sought an opinion on the possibility of conflict between this recent state law and ROTC policies against commissioning acknowledged homosexuals as officers or cadets, he said the Attorney General had ruled that such a conflict was not created because the federal government is not a contractor within the meaning of the state law, a view which was reinforced by a summary of state administrative practice under earlier analogous law. Citing the potential reach of a contrary view—one which would treat the whole federal government as a contractor—the Attorney General found it unlikely that the Legislature intended such severe economic disruptions.

The President then reported on the current status of the proposed revision of Chapters 7 and 8 of the Administrative Code, which dealt with conflict of interest, ethics, disclosure and related matters. The System committee chaired by Vice President Lorenz had met to refine its recommendations and had prepared a detailed analysis of the proposed policies and how they would relate to one another. These revisions were sent to the chancellors with a request that institutional review begin as soon as possible, he continued, adding that at some institutions faculty groups had already given the matter preliminary attention. As rapidly as
the review process allowed, specific recommendations would be brought to
the Board so that a hearing could be scheduled.

With respect to the condition of financial emergency at UW-Superior,
President O'Neil announced that the Faculty Consultative Committee had, in
accordance with UWS 5.05, reviewed the university's current fiscal situa-
tion and recommended that financial emergency not be extended. While some
aspects of the future remained necessarily uncertain, the Committee was
confident of UW-Superior's ability to cope without the special measures
allowed by financial emergency status. Chancellor Meyer had so recommended
to the President, who concurred in that judgment. Accordingly, the condi-
tion of financial emergency would expire at the end of the 1983-84 fiscal
year.

The President then called attention to statements issued the previous
week by the American Council on Education, along with several other groups,
and by the American Association of University Professors, the focus of
which was recent interference with controversial speakers on college and
university campuses. Noting that these highly respected national groups
pleaded with the whole academic community to respect the rights of others
to listen to those who have been invited to speak on campus, he observed
that the statements accorded closely with University of Wisconsin tradi-
tions of intellectual freedom and protection of controversy. While the UW
had not been without efforts to interfere with controversial speakers, he
pointed out, System institutions had recently renewed their commitment to
protect free inquiry and controversy. "The issuance of these national
statements remind us both of the vitality and the frailty of that climate
of free speech for which Wisconsin's universities are so deservedly
renowned. It seems to me we do well this morning, in these nationally and
internationally troubled times, to renew that commitment and respond in
this way to the timely call from ACE, AAUP and other groups. If free
inquiry, free speech and controversy are not safe within our great
universities, they are not safe anywhere in the society."

President O'Neil joined in welcoming Regent Conroy to the Board.
Noting that this was Regent Fitzgerald's final meeting, he said that he had
learned much from her, "not only about southwestern Wisconsin, but about
interinstitutional cooperation and about some important principles and
values of higher education in the time we've been able to work together.
We will miss her presence and counsel."

In his report as President of the United Council of UW Student Govern-
ments, Mr. Scott Bentley urged support for legislation to allow graduate
assistants to bargain collectively. Before the structure agreement of the
1970s, he stated, teaching assistant appointments were given for one year
Chairman Schilling presented the Committee's report, noting that all Regents were invited to that portion of the meeting which included the first two agenda items.

The Committee first received a report on progress made by UW-Extension in implementing the policies approved a year previously by the Board regarding reorganization and new directions. Introducing the report, President O'Neill outlined the essence of those policies: (1) to reaffirm the Wisconsin Idea and the role of UW-Extension in carrying it out; (2) to reorganize the internal structure of UW-Extension by bringing together similar functions; (3) to address the responsibility for planning and coordinating outreach activity for the entire UW System; and (4) to integrate more fully functions and personnel of UW-Extension with their campus equivalents.

The report, which was summarized by UW-Extension Acting Chancellor Patrick Boyle, covered accomplishments in three principal areas. (1) With respect to internal reorganization, there had been a reduction of divisions in UW-Extension from six to three, and kindred programs had been grouped in the new divisions. (2) Concerning integration of faculty and staff of UW-Extension with other System institutions, cooperation had been enhanced with UW-Madison, UW-Milwaukee, the University Cluster and the UW Centers. (3) In development and coordination of a statewide plan, there had been six major activities: (a) Work on a long-range plan for General Extension and Cooperative Extension had begun; (b) the statewide Extension budget structure was being changed to allow more flexibility; (c) the academic program evaluation structure was being examined; (d) a modified Extension fee policy had been developed and was being tested; (e) certain Extension and VTAE activities were being coordinated; and (f) the role of the System Advisory Committee on Outreach was being clarified.

Associate Vice President Dallas Peterson then described the development of ACIS 5, the administrative guidelines for implementing the Regent policy on integration. As the guidelines were developed, drafts had been circulated widely for comment and input, culminating in the chancellors' review of the final draft the previous month.
After the report was given, Regent O'Harrow, who had chaired the Regent Committee on Extension, expressed appreciation to those who had gone beyond the call of duty in carrying out the Board's intent. In answer to a question, Acting Chancellor Boyle noted that though some positions had been lost due to budgetary problems, none had been lost as a result of integration. Chancellors Shain and Horton then described the joint committees established on their respective campuses to carry out the integration effort.

Regent Schilling reported that the second item on the Committee's agenda concerned collective bargaining. Associate Vice President Lemon reviewed Senate Bill 174 and Assembly Bill 282, which would give faculty and academic staff the right to bargain with the state. They provided for the Department of Employment Relations to negotiate and administer bargaining contracts for establishment of eight bargaining units. It was anticipated that additional costs associated with bargaining would total some $1.5 million per year. He indicated that finding accurate information from around the country about the costs of administering collective bargaining had been difficult, but that preliminary results of System Administration's survey suggested that the fiscal estimate was low in that it did not, for instance, take into account possible legal costs associated with the organization and voting process.

Appearing before the Committee, Professor David Berman, Chair of the UW-Madison University Committee, noted that the current bill was much like previous bills which the UW-Madison Faculty Senate had opposed on the basis that such legislation would jeopardize faculty governance through creation of an adversarial system in place of the current collegial system and that it is sound public policy to maintain the Board's role as a buffer between the university and the state. Professors Fannie Lemoine and Gordon Baldwin, also members of the UW-Madison University Committee, distributed written comments to the Board. It was contended by Professor Lemoine that collective bargaining would lead to the loss of employment flexibility at the disciplinary and departmental levels, would seriously undermine shared governance, would be costly to implement, and would be of questionable value in improving the quality of education or the working conditions of the faculty. Endorsing the comments of his colleagues, Professor Baldwin spoke about the unique problems faced by law faculties under collective bargaining arrangements at other universities.

Professor Lawrence Baldassaro, Chair of the UW-Milwaukee University Committee, pointed out that a poll taken of UW-Milwaukee faculty recorded overwhelming opposition to the collective bargaining bill before the Legislature the previous year. Faculty at UW-Milwaukee felt collective bargaining would place them in a political reality which they could not control. Professor Ronald Lingren, Co-President of the UW-Milwaukee Faculty Association, expressed the feeling of his group that collective bargaining would undermine merger, adding that collegiality formed the basis for the university's greatness.
Dr. Edward Muzik, Executive Secretary of The Association of University of Wisconsin Faculties, began his remarks by noting that he was the only supporter of collective bargaining in attendance because the Committee agenda had indicated the item would be for information only. He asked that the Regents not adopt a resolution at this time, given that the Legislature was not expected to act on the pending bills in the near future. He went on to say that the 1800 members of TAUWF considered collective bargaining to be a right of faculty and academic staff. After reviewing sections of the bills dealing with preserving governance and management rights, he argued in closing that organized state employees had obtained greater compensation increases than had faculty and academic staff of the UW System over the past years. A lengthy series of questions and answers followed, with Dr. Muzik indicating that some additional staff would be needed if TAUWF became the bargaining agent for the UW System. It is TAUWF's position that faculty would have greater access to the Board under collective bargaining, that collective bargaining would enhance shared governance, and that both salaries and grievance procedures would be improved for all faculty.

In response to an inquiry by Regent Conroy concerning procedure, Chairman Schilling indicated the intention was that the Education Committee meeting would be reserved for hearing and questioning of witnesses and that there would be an opportunity to debate the issue of collective bargaining during the Friday Board meeting, if the Regents chose to do so.

Asking whether or not the Board wished to consider the issue at this time, President Beckwith said his own view was that it would be unwise to do so. Noting that there were several present Board members who were unable to attend this meeting and that two recent nominees probably would be joining the Board in May, he felt these individuals might also wish to participate in the debate. It was his recommendation, therefore, that a resolution not be presented for action at this meeting. Inasmuch as the published agenda did not state that a vote would be taken, he thought Dr. Muzik's point in that regard was appropriate and that delay would allow further opportunity for both supporters and opponents to present their views.

Regent Schilling expressed his agreement, stating that he was particularly concerned that such an important issue not be clouded by any feeling that there was inadequate opportunity for comment.

Regent Conroy indicated that she also concurred in postponing debate about the matter.

Inasmuch as the Legislature probably would not conduct hearings on the pending bills until after the Board's June meeting, President Beckwith suggested that the matter be delayed until June unless it was found that action was needed at the May meeting.
Regent Knowles added that the Legislature does not consider bills with fiscal notes until the budget is approved, unless an emergency clause is attached by the Joint Committee on Finance, which was not likely in this case.

Stating that he agreed with deferring the matter, Regent Lawton asked about procedure for proposing the resolution on which the Board would vote.

President Beckwith noted that when it was thought there might be occasion to debate and vote at this meeting, he asked Secretary Temby to prepare resolutions, believing that it should be a Regent-initiated action rather than one proposed by the administration. It was his suggestion that alternative resolutions, supporting and opposing the pending legislation, be mailed with the agenda materials. The Board could then decide which one it wished to vote on, if either, and there would be an opportunity in advance of the meeting to communicate with the President, the Chairman of the Education Committee, or the Secretary about modifications in the wording.

Regent Lawton pointed out that, in the process of debate, a third resolution might emerge suggesting amendment of the bill.

System staff would be asked to continue providing information on the subject, President Beckwith indicated, adding that the Board should have the views of the President, Executive Vice President and other staff to aid in reaching a decision. He noted that President O'Neil had been involved in the administration of a campus that had collective bargaining, as well as having had long experience in the American Association of University Professors with all matters of faculty governance.

Continuing his report, Regent Schilling stated that the Committee then heard presentations regarding proposed legislation on collective bargaining for graduate assistants. Professor David Berman noted that the Regents had received copies of the manual developed by a UW-Madison committee and that policy issues included in that manual were about to be brought for action to the Faculty Senate. Observing that graduate assistants are part-time, temporary employees, he pointed out that other similar employees do not have collective bargaining rights in Wisconsin. Professor Lawrence Baldassaro indicated that the UW-Milwaukee University Committee would address its stand on this matter in a letter being prepared for the Board. Professor Francis Gentry, Chair of UW-Madison's Campus Committee on Teaching Assistant Policies and Procedures, described how the manual had been developed, the aim being to guarantee the rights of employees while preserving the departments' rights to carry out their instructional missions. He expressed the hope that the manual would be given a chance to work before legislation was acted on.

In response to a question by President Beckwith, Mr. Harvey Breuscher, director of the System Office of Statewide Communications, indicated that, because the bill on this subject also had a fiscal note, action would be delayed until after consideration of the budget bill, unless an emergency clause were attached. Mr. Curt Pawlish, Legislative Affairs Director of United Council, said it was their understanding that the bill would not be voted on by the Joint Committee on Finance until October.
Noting that the manual on teaching assistant policies and procedures was to be presented to the Faculty Senate the following Monday, Chancellor Shain expressed the hope that the Senate would endorse the educational policy matters included in that document. If it did so, the policies would be implemented promptly, he said, adding that they did not represent a significant change from the current interim policies. The primary impact would be to appoint committees that would work at the departmental, college and university levels to formalize grievance procedures and provide a mechanism for handling all aspects of the relationship between the university, the faculty and the TAs.

While he felt it was appropriate to defer consideration of this matter, Regent Schilling expressed concern that delay not be misunderstood by legislators who had asked about the Board's position.

President Beckwith replied that there had been some such inquiries, but that he thought it was generally recognized in the Legislature that it was reasonable for the Regents to wait until new members were present before voting on this question.

Regent Schilling suggested that the issues of collective bargaining for faculty and academic staff and collective bargaining for graduate assistants be scheduled for separate meetings in order to better distinguish the arguments on these two questions.

Expressing agreement, President Beckwith noted that there were different issues involved. He asked the President of United Council if he wished to comment at this meeting, and Mr. Bentley responded in the negative. It was requested by Regent Beckwith that United Council provide the Board with written materials in advance of the meeting at which the matter was to be considered.

Regent Schilling reported that the Committee approved the annual request to the trustees of the William F. Vilas Trust Estate for support of scholarships, fellowships and professorships.

Adoption of the following resolution was moved by Regent Schilling, who noted that it represented an immensely valuable gift to the university. The motion was seconded by Regent Lawton and unanimously carried.

Resolution 2788: That, upon recommendation of the President of the University of Wisconsin System, the Chancellor of the University of Wisconsin-Madison, and the Chancellor of the University of Wisconsin-Milwaukee, the Board of Regents requests that the Trustees of the William F. Vilas Trust Estate supply the following funds for the fiscal year July 1, 1983 to June 30, 1984, subject to the availability of funds, as provided by the terms of the William F. Vilas Trust:
(1) Continuation of 10 Vilas Undergraduate Scholarships at $400.00 each $ 4,000.00

(2) Continuation of 10 Vilas Graduate Fellowships:
   a. 5 at $600.00 each $3,000.00
   b. 5 traveling fellowships at $1,500.00 each 7,500.00 $10,500.00

(3) Continuation of 16 Vilas Research Professorships at $10,000.00 plus auxiliary allowances of $15,000.00 for each of the following: $400,000.00

Leonard Berkowitz - Vilas Research Professor in Psychology, College of Letters and Science, UW-Madison

R. Byron Bird - Vilas Research Professor of Chemical Engineering, College of Engineering, UW-Madison

George E. P. Box - Vilas Research Professor of Mathematics and Statistics, College of Letters and Science, UW-Madison

Winston J. Brill - Vilas Research Professor of Bacteriology, College of Agricultural and Life Sciences, UW-Madison

Arthur S. Goldberger - Vilas Research Professor of Economics, College of Letters and Science, UW-Madison

Reinhold Grimm, Vilas Research Professor of Comparative Literature and German, College of Letters and Science, UW-Madison

Joel F. Handler - Vilas Research Professor in Law, Law School, UW-Madison

Thab Hassan - Vilas Research Professor in English and Comparative Literature, College of Letters and Science, UW-Milwaukee

Jost Hermand - Vilas Research Professor in German, College of Letters and Science, UW-Madison

H. Jerome Keisler, Vilas Research Professor of Mathematics, College of Letters and Science, UW-Madison
Robert J. Lampman - Vilas Research Professor of Economics, College of Letters and Science, UW-Madison

Henry A. Lardy - Vilas Research Professor of Biological Sciences, College of Agricultural and Life Sciences and Graduate School, UW-Madison

Willard F. Mueller - Vilas Research Professor of Agricultural Economics, College of Agricultural and Life Sciences, UW-Madison

Walter Rudin - Vilas Research Professor of Mathematics, College of Letters and Science, UW-Madison

Barry Trost - Vilas Research Professor of Chemistry, College of Letters and Science, UW-Madison

Jan Vansina - Vilas Research Professor of History, College of Letters and Science, UW-Madison

(4) a. Continuation of 50 additional scholarships at $400.00 each  $ 20,000.00

b. Continuation of 50 additional fellowships at $600.00 each  $ 30,000.00

$ 50,000.00

(5) Continuation of eighty (80) additional scholarships at $400.00 each under the provisions of Paragraph (3), Article 4 of the Deed of Gift and Conveyance by the Trustees of the Estate of William F. Vilas  $ 32,000.00

(6) Retirement benefits for five (5) Vilas Professors (Fellman, Hurst, Sanchez-Barbudo, Sewell, Willard) at $2,500.00 each  $ 12,500.00

(7) Continuation of support for encouragement of merit and talent or to promote appreciation of and taste for the art of music:

a. UW-Madison: Symposium Focusing on Milton Babbitt's Influence on Music of the Latter Half of the Twentieth Century  $10,500.00

b. UW-Milwaukee: Vilas Concert Series 1983-84  $11,200.00

$ 21,700.00
(8) One-time special funding for:

Vice President Lyall reported to the Committee on the 1981-83 biennial budget provision that the UW System examine the feasibility of establishing a La Follette Institute of Public Affairs. The study committee established to undertake this task had reviewed the System's existing programs in public affairs, as well as other programs nationally. A draft report had been prepared, and comments from the institutions were being received.

Vice President Lyall reported to the Committee on the 1981-83 biennial budget provision that the UW System examine the feasibility of establishing a La Follette Institute of Public Affairs. The study committee established to undertake this task had reviewed the System's existing programs in public affairs, as well as other programs nationally. A draft report had been prepared, and comments from the institutions were being received.

Regent Schilling stated that the Committee then received an information report on the five-year review of the Doctor of Engineering (D.E.) program at UW-Milwaukee. In her summary of the review, Vice President Lyall explained that the Doctor of Engineering differed in focus from the Ph.D., in that it was geared more toward future employment in government and business than to teaching and research, a special feature of the program being a required internship in local industry. Two outside consultants, deans of schools of engineering, participated in the review, major conclusions of which were: (1) that the program was not yet up to full enrollment capacity; (2) that the program had a relatively high foreign student enrollment; (3) that the administration and faculty should consider adding senior faculty to the program; and (4) that there were concerns about the adequacy of equipment available to the program. It was indicated that many of these points were already being addressed and that, overall, the D.E. was off to a good start, represented an important addition to UW-Milwaukee's urban mission and, with the recommended improvements, had the potential of being a very strong program.

Regent Schilling reviewed in Committee the background of correspondence with Professor Anatole Beck of UW-Madison regarding the adequacy of freshman English instruction. At the invitation of the Chairman, Professor Beck appeared before the Committee to present his concerns, characterizing the information about UW-Madison given to the
Regents in Appendix A of the report on competency instruction as being too optimistic. He had solicited an opinion to this effect from Professor Robert Kimbrough of the UW-Madison English Department, and this correspondence, as well as letters from Professor Sargent Bush, Chair of the English Department, and Professor Beck had been provided to the Regents. Committee members reiterated their concern for adequate competency instruction, but noted that resource allocation decisions concerning instructional offerings were departmental and campus responsibilities. Professor Bush also appeared and commented on what he believed to be inaccuracies in Professor Kimbrough's letter.

Adoption of Resolution 2789, which had been approved in closed session of the Education Committee, was moved by Regent Schilling, seconded by Regent Finlayson and unanimously voted:

Resolution 2789: That, upon the recommendation of the President of the University of Wisconsin System and the Chancellor of the University of Wisconsin-Madison, the University of Wisconsin-Madison be authorized to recruit for an associate professor or professor to serve as Associate Dean for Clinical Affairs in the Medical School and Director of Clinical Affairs at the UW Hospitals.

REPORT OF THE BUSINESS AND FINANCE COMMITTEE

Vice President Knowles presented the Committee's report.

Providing an update on the 1983-85 biennial budget, President O'Neil advised the Committee that two events had occurred since the Regents' last meeting. On March 17, Regent President Beckwith and he had appeared before the Joint Committee on Finance at a preliminary hearing on the university's budget request. Questions were raised by the Committee on instructional funding methodology, tuition and fee levels, academic freedom for students in the classroom, possible duplication in graduate programming, current status of the Solomon Amendment, responsibilities for design and construction of physical facilities, commitment to improve mathematics and science education, details of the sabbatical leave program, tenure and accountability, and matters concerning the faculty recognition fund, salary package, and a salary cap. After the hearing, he had written to each member of the Committee to provide supplemental information.

On Wednesday of this week, the President had attended the first of three meetings of the Education Discussion Group of the Joint Committee on Finance, at which four papers were presented by the Legislative Fiscal Bureau. Action was taken on a sabbatical leave proposal to impose a limit of three percent per year, and the discussion group recommended deletion of
the faculty recognition fund. Stating that he regretted this tentative decision, which would remove a half million dollars per year from the Governor's recommendation, he said he hoped to recommend it again before the final vote on the budget. The discussion group also approved a technical adjustment accounting for depreciation in the 1983-85 student fee calculation and two technical adjustments to the budget for the School of Veterinary Medicine.

In addition to the four papers, President O'Neil continued, the discussion group considered possible reduction in the size of Medical School classes at UW-Madison and the Medical College of Wisconsin. They approved a recommendation to reduce entering classes 2.5 percent per year, starting in 1984-85 and continuing until a net reduction of 10 percent was achieved in 1987-88. It was indicated that the number of minority students enrolled in the entering class should not be decreased as a result of change in class size. Additional meetings of the discussion group were scheduled for April 13 and April 20.

At the Board meeting, Regent Beckwith expressed the hope that the faculty recognition fund would be restored. Although it was in some ways a symbolic gesture because the $1 million would not go very far, he observed, it was nonetheless very important to reward the System's finest faculty, whose employment was being solicited by other universities with greater resources.

Regent Lawton stated his agreement with that view. Concerning Medical School admissions, he doubted that the small decrease being proposed would save money since the same faculty and equipment still would be required. Because fewer students would be supporting the same instructional costs, tuition inevitably would be raised, he pointed out, noting that it was already beyond the means of the ordinary family in Wisconsin. "We're seeing more and more of the well-to-do in the Medical School and fewer of the middle class and poor." Observing that experts were divided on the question of the future supply of physicians, he explained that the state's population was aging at an accelerated pace, that people over 65 require four times as much medical care as people under that age, and that physicians were lowering the number of hours in their work week. While he did not think these considerations had been taken into account in making the recommendation to decrease admissions, he did not feel it was a matter of overriding concern at this time. There were issues demanding more immediate attention, he added, one of them being restoration of the faculty recognition fund.

Continuing his report, Regent Knowles summarized the Committee's review of the monthly list of gifts, grants and U.S. government contracts. Federal support continued to lag behind that of the previous year, with this month's report showing a federal shortfall of $15.6 million—$8.6 million in research and $5.3 million in student aid. The $45 million of nonfederal support for this year was $10 million higher than last year.

Upon motion by Regent Knowles, seconded by Regent Zirbel, the following resolution was adopted unanimously:
Resolution 2790: That, upon recommendation of the President of the University of Wisconsin System, the gifts, grants and contracts presented at this meeting (copy on file with the papers of this meeting) be accepted, approved, ratified and confirmed; and that, where signature authority has not been previously delegated, appropriate officers be authorized to sign agreements.

The Committee next considered a revised policy on signature authorization for nongovernmental gifts and grants. Vice President Lorenz explained that the proposed resolution would increase from $25,000 to $100,000 the signature authorization covering agreements between the university and profit-making firms, the current level having been in place since 1972. With the increase in university/industry cooperation, more agreements were being developed, and it was expected that two to five agreements each month would be covered by this amendment. Any agreements involving significant policy change would be brought to the Board for prior approval, regardless of the dollar amount.

It was pointed out by Regent Knowles that business contracts for the current fiscal year to date amounted to $10,105,000, while the total for the entire previous year had been $5,400,000.

In response to a question by Regent Heckrodt, Vice President Lorenz said the structure of the contract would determine whether an agreement with a consortium would be considered as one contract or as a group of separate contracts.

Regent Heckrodt remarked that he understood some other universities in the Big Ten were able to establish contracts with industry without having to comply with public reporting requirements of an ethics code. Asking for verification of this information, he stated that "if we cannot do this for private industry within the state and have results remain confidential, I think we're passing up a real source of income for the university and a real source of educational value for the students and the faculty."

Indicating that he and Chancellor Shain would soon be meeting with the other presidents and chancellors of the Council of Ten, President O'Neil replied that one day of the conference was to focus on university/industry relationships, which would provide the opportunity to find out about prevailing practices in that regard.

Regent Beckwith added that he shared the concern that, in attempting to avoid any appearance of impropriety or conflict of interest, it was important not to overreact and thus prevent the university from having the opportunity to engage in proper interaction with business.

It was moved by Regent Knowles, seconded by Regent Lawton and carried unanimously that Resolution 2791 be adopted.
Resolution 2791: That Regent Resolution #965 approved by the Board on March 7, 1975, be rescinded; and that the following revised resolution be approved effective immediately:

That any of the following corporate or administrative officers of the University of Wisconsin System—Secretary, Associate Secretary, Assistant Secretary of the Board, the President, any Vice President, and any administrative officer or administrative assistant designated by the President of the University of Wisconsin System—is authorized to sign:

1. Proposals, agreements, contracts and contract supplements with the United States Government, any of its agencies or departments, any state or municipality or any agency or department thereof or any non-profit organization for research work or any other purposes upon approval of the project by the President or any Vice President of the University of Wisconsin System or the appropriate chancellor or his designee; and

2. Certifications, releases, inventory reports, and other documents as required by the government in connection with the termination of the contracts with the federal government for research and educational services furnished by the University of Wisconsin; and

3. Applications, notices, bonds, and other instruments required by the federal government in connection with matters relating to federal laws and regulations for the purchase and use of tax-free alcohol in the laboratories of the University of Wisconsin System; and

4. Purchase orders and other instruments required by the federal government for the procurement of narcotics for use in the laboratories of the University of Wisconsin System and in University Hospitals; and

5. Contracts, leases, and agreements when the consideration is not in excess of $25,000 and is within the budget, and royalty agreements with the University of Wisconsin Press, subject to the understanding that such actions will be reported to the Regents at each subsequent meeting; and
6. Transactions of the University of Wisconsin System's employee savings bonds accounts.

Regent Knowles reported that Vice President Lorenz advised the Committee there had been no significant unanticipated activities to change the year-end projected balance, which was between $500,000 and $1 million.

---

REPORT OF THE PHYSICAL PLANNING AND DEVELOPMENT COMMITTEE

Chairman O'Harrow reported for the Committee.

The first item considered by the Committee was a request by UW-Madison for authority to enter into an agreement for assuming the remainder of a lease of a laboratory/office modular unit located on the Charmany Farm and, upon expiration of the lease, to exercise the option of obtaining the unit for $1. This had been the location of the U.S. Fish and Wildlife Services laboratories and offices while remodeling was underway in a permanent facility the service had acquired in Madison. Having occupied their new quarters, the Fish and Wildlife Service had offered the university the option of assuming the remaining 13 months of its lease at a total cost of approximately $70,000. At the conclusion of this period, the university would exercise its option to purchase the unit for $1. UW-Extension's soils and plant analysis laboratories would be relocated from leased space on South Park Street, while the wet laboratory space would be assigned to the School of Veterinary Medicine.

The following resolution was unanimously adopted, upon motion by Regent O'Harrow, seconded by Regent Fitzgerald:

Resolution 2792: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authority be granted to enter into an agreement with the U. S. Fish and Wildlife Service, U. S. Department of the Interior, and Bobit Mobile Homes, Inc., whereby the UW-Madison will assume the remainder of a lease of a laboratory/office modular unit located on the Charmany Farm and, upon expiration of the lease, exercise the option of obtaining this unit for one dollar ($1).

The Committee approved an extensive listing of minor projects, Regent O'Harrow reported, explaining that in statutory terms "minor" meant projects under $250,000. The listing included ten maintenance projects, two for energy conservation, two building demolition/site development.
projects, one for the purchase of chairs for the Center for the Arts at UW-Platteville, five health and safety projects, one for masonry repairs involving twelve buildings at UW-Eau Claire and UW-Superior, and one covering six roof repair/replacement projects at UW-Eau Claire, UW-Madison and UW-Superior.

Noting that the Committee had discussed each of these requests with campus representatives, Regent O'Harrow said special attention was given to the Marshfield/Wood County Center roof insulation project, which had been referred back to the Committee at the March Board meeting for further consideration. He had gone to Marshfield to examine the project, and Vice President Winter had furnished additional information about the State Building Commission's energy conservation program, which had begun with a five-year cost-recovery formula, but had moved to a ten-year and then to a life-cycle basis. In February of 1983, the Commission reaffirmed the policy of a 15-year discounted pay-back on mechanical and electrical modifications, a 20-year pay-back on architectural modifications, and 25 years on insulation. The Marshfield project, with a pay-back of approximately 11 years, was therefore within the Building Commission's guidelines.

Regent O'Harrow moved adoption of the following resolution, and the motion was seconded by Regent Fitzgerald:

Resolution 2793: That, upon the recommendation of the UW-Eau Claire, Madison, Milwaukee, Oshkosh, Platteville, River Falls, Stevens Point, Superior, Whitewater, and Centers Chancellors and the President of the University of Wisconsin System, authorization be granted to plan, bid and construct the following minor projects, at the costs and from the funding sources indicated:

- UW-Eau Claire - Building Projects
- UW-Madison - Building Projects
- Parking Lots - Building Projects
- Heating Plant Ash Conditioning System Project, R2793, pp 20-23
- Parking Lot #3 Reconstruction and Parking Lot #17 Resurfacing Projects, $110,200, Non-GPR Program - Revenues R2793, pp 20-23
- Eagle Heights Apartments Roads and Parking Areas Repair/Replacement Project, $60,000, Non-GPR Program - Revenues R2793, pp 20-23
- UW-Milwaukee - Building Projects
- Fine Arts Theatre Auditorium Catwalk Project, $20,200, GPR Capital Improvement Fund Earnings - R2793, pp 20-23
Approval of:

- Mead Library Flooring Replacement Project, $37,000, GPR-Capital Improvement Fund Earnings
- Primary Air Compressor Replacement Project, $37,000, GPR-Capital Improvement Fund Earnings
- Site Clearance and Development Project, $15,000, GPR-State Building Trust Funds
- Tennis Court Repairs Project, $17,000, GPR-Capital Improvement Fund Earnings
- Kolf Physical Education Center Exit Ramp Repair Project, $130,000, GPR-State Building Trust Funds
- Kolf Physical Education Center Soffit Painting and Closures Project, $37,500, GPR-State Building Trust Funds
- Williams Gymnasium Floor Repair Project, $34,500, GPR-Capital Improvement Fund Earnings
- Purchase 182 Loose Chairs and 9 Dollies, Center for the Arts, $22,000, GPR-State Building Trust Funds - Contingency Funds R.2793, pp 20-23
- UW-Platteville - Bldgs 4, hands
- Building Demolition and Site Development project, $1,200, of GPR-State Building Trust Funds - Contingency Funds, R.2793, pp 20-23
- UW-Stevens Point - Bldgs 4, hands
- Condensate Return Line Replacement Project, $75,500, GPR-supported borrowing R.2793, pp 20-23
- UW-Superior - Bldgs 4, hands
- Gates Fieldhouse Indoor Track and Gymnasium Floor Repair/Replacement Project, $79,000, GPR-Capital Improvement Fund Earnings R.2793, pp 20-23
North Campus Security and Recreation Field Lighting Replacement Project, $27,600 of GPR-Capital Improvement Fund Earnings and $64,400 of Non-GPR Program Revenue funds (estimated total project cost: $92,000).

Hyer Hall Auditorium and Stage Safety Corrections Project, $103,200, GPR-Capital Improvement Fund Earnings

Outdoor Running Track Repair Project, $17,600, GPR-Capital Improvement Fund Earnings

Twelve Masonry/Caulking Repair/Replacement Projects, $110,400, GPR-Capital Improvement Fund Earnings and $27,000 of Non-GPR Program Revenues (estimated total project cost: $137,400)

UW-Eau Claire and Superior - Buildings

Six roof repair/replacement projects, $231,500 of General Fund Supported Borrowing and $196,800 of Non-GPR Program Revenues (estimated total project cost: $428,300)

UW-Eau Claire, Madison, and Superior - Buildings

WU Center - Marshfield/Wood County

Rod Insulation Project (Fine Arts and Physical Education Buildings), $62,800, GPR-General Fund Supported Borrowing - Energy Conservation Allocation

Regent Beckwith asked if the same contractor who would be doing the roof insulation also would be responsible for other aspects of the project, to which Vice President Winter responded in the affirmative. It was further noted that there would be only one contract, with the cost being divided among the city, county and state.

Put to the vote, Resolution 2793 was adopted unanimously.

Concluding his report, Regent O'Harrow stated that the Committee approved a $21,000 budget increase for the potato storage facility on UW-Madison's Leolah Starks Elite Foundation Seed Potato Farm. This would increase the total cost to $293,000, bids received in February having been in excess of the authorized funding level. The project was to be funded from sale of farm land, including the present farm at Three Lakes, Wisconsin, but those facilities could not be vacated until the new storage building was completed.
Upon motion by Regent O'Harrow, seconded by Regent Heckrodt, Resolution 2794 was unanimously adopted.

Resolution 2794: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authorization be granted to increase the budget for the Starks Potato Farm Storage Facility by $21,000 for a revised total project cost of $293,000, from non-GPR Gift Funds-Property Land Sales-Farm Revenues.

UNFINISHED AND MISCELLANEOUS BUSINESS

The report of Professor Walter Dickey, who had been appointed to review the appeal brought by Mr. Rudy Collum regarding termination of his employment at UW-Parkside, was introduced by President Beckwith. He recalled that Regent Emeritus Fox had reviewed the record in that matter some months previously and had recommended that certain aspects of the case be given further consideration. It was upon that recommendation that Professor Dickey had been appointed. His report, dated February 28, 1983, and forwarded to President Beckwith by letter dated March 14, 1983, had been distributed to each member of the Board, along with copies of a letter from Mr. Collum's counsel, Mr. Robert Hankel, dated March 23, 1983, and a copy of a letter from Dr. Edward Muzik, Executive Secretary of The Association of University of Wisconsin Faculties, dated March 30, 1983. Mr. Collum's counsel had indicated that he would not appear at the meeting but that he stood on the position stated in his March 23 letter and asked that the Board also consider the comments of Dr. Muzik in his letter of March 30. Confirming that the Board would take those documents into consideration, Regent Beckwith called upon Professor Dickey for a review of his report.

Summarizing his consideration of the issues identified by Regent Fox, Professor Dickey said the first was whether or not the affirmative action policy of UW-Parkside applied to this termination. Noting that the relevant rules and policies were not explicit about application of affirmative action policies in this type of case, it was his assumption that were it the desire of the Board of Regents to have it applied, the rules would have said so. There was one other factor, he continued, which was that in an affirmative action statement by UW-Parkside, it was indicated that terminations having a disparate effect among underrepresented groups should be carefully scrutinized. On the assumption that this was a statement of policy which should be applied to terminations of the type in this case, he reviewed the matter and had briefs submitted, as had been done on all of the issues. Given the statistics that were presented, it was clear to him that the group in question was not underrepresented at UW-Parkside, and no evidence was offered to show that there was a disparate effect. He therefore concluded that if the affirmative action policy did apply, there was no disparate impact on an underrepresented group and thus this was not an issue that ought to lead to reversal of the decision.
The second question, Professor Dickey stated, was whether or not program needs would permit UW-Parkside to lay off Mr. Collum even though there were three people less senior to him who were not laid off. Noting that applicable administrative policy indicated that there could be deviation from seniority where program needs so dictated, he observed that at the hearings there was extensive evidence presented as to program needs at UW-Parkside. The athletic director testified that there was a desire to keep the teaching certification program and that to do so, while maintaining overall quality, the three people less senior than Mr. Collum needed to be retained. There also was evidence offered on the qualifications of those three people and the reasons it was important to continue their employment. Mr. Collum, on the other hand, disputed the wisdom of that program decision and argued that he was at least minimally qualified for two of the positions. It was Professor Dickey's understanding of shared governance that the matter of program needs was an educational decision that was within the discretion of UW-Parkside, and having made the decision that program need dictated Mr. Collum's layoff, it seemed to him that the university satisfied the requirement of overcoming presumptions in favor of seniority.

The third issue identified by Regent Fox was the question of alternative employment. It was noted by Professor Dickey that UW-Parkside rules required that, in the event of a layoff, the campus devote its best efforts to secure alternative employment within the institution and to make the affected staff member aware of openings in the UW System. In his report, he identified the efforts made by UW-Parkside to help Mr. Collum secure employment at Parkside and other places. Pointing out that the term "best efforts" was not defined, he explained that he had attempted to determine whether or not there was evidence that the committee could reasonably decide that best efforts had been put forth. His conclusion was that there was ample evidence to support the committee's decision in that regard.

Stating that there was a fourth issue, although it was not raised as such by Regent Fox, Professor Dickey noted that in his report Regent Fox had expressed discomfort about the fact that university counsel was involved in various stages of the case—as advisor to the campus committee that was to make the decision, as well as representing UW-Parkside. While Professor Dickey did not feel he had been directed to look into the question, it had been posed by Mr. Collum's attorney, and he had advised counsel on both sides that, if they could give him reason to believe that conflict of interest affected the decision, he would ask if the Board President wished him to include that matter in his review. However, no evidence had been presented that conflict of interest had any influence in the case, and he therefore declined to take further action.

Based on his review of those four issues, Professor Dickey recommended that UW-Parkside's decision be upheld. He felt his charge was not to act as a fact-finder, but rather to look at the record, hear the parties out and then determine whether or not there was enough evidence to support the decision made by the university. This review led him to conclude that there was ample evidence to support the campus's decision.
Regent Beckwith pointed out that multiple representation by counsel was a circumstance faced by administrative agencies generally. Professor Dickey concurred, adding that there was a general rule excluding such agencies from certain conflict principles and that there were good reasons for that rule.

It was suggested by Regent Beckwith that the Board adopt a resolution accepting Professor Dickey's report, making it the decision of the Board, and closing the file on this matter. He also asked the Education Committee, with the assistance of Vice President Lyall and System counsel, to consider the concluding remarks of Professor Dickey on pages 11 and 12 of his report, and to report to the Board in due course. These remarks did not relate specifically to the case in question, but rather to more general matters.

Regent Finlayson expressed concern about voting to close the issue while questions remained unanswered. With regard to the matter of disparate impact, she thought further information was needed about how many were laid off and what percentage of them were black, as well as about policies in that regard within the University System as a whole. In response to a question by Regent Beckwith, Regent Finlayson said she was concerned both about overall policy issues and about their impact on the case in question. "I just don't feel that it's a matter that we should consider closed, unless we look into ways of changing those basic things."

Noting that the Task Force on the Status of Women had addressed questions of layoff and termination in its recommendation number 33, President O'Neill said he would make certain that effects on minority persons, as well as women, would be taken into account as this proposal was considered.

Regent Zirbel asked if review of this matter would be incorporated in the charge President Beckwith had given to the Education Committee.

President O'Neill replied that the recommendations of the Advisory Council on the Status of Women, which had been established to monitor implementation of the Task Force proposals, would be brought to the Education Committee, with the first of them expected to be ready for presentation in the fall. Indicating that in May he planned to give a comprehensive report on the status of Task Force recommendations, he added that recommendation 33 was the one part of the package that had not yet been reviewed.

It was noted by Regent Beckwith that Professor Dickey had concluded that, if there were a policy that required application of affirmative action to layoffs and terminations, the record in this case did not support a finding that such policy was violated.

Professor Dickey added that he first looked at the rules to see whether or not they said that affirmative action applied to layoffs. While they did not say that explicitly, there was an affirmative action statement, and he felt it was his responsibility to assume that meant affirmative action applied in layoff situations. Assuming that there was
an affirmative action policy and that it did apply to this layoff, he
reviewed the record and asked for any evidence that an underrepresented
group was involved and that there had been disparate impact on that group.
However, he had found no such evidence.

With regard to the matter of the same counsel advising both the
committee and the staff at UW-Parkside, Regent Beckwith said he understood
Professor Dickey's finding to be that, while it might not be legally or
ethically improper in any event, even if it were considered improper, it
did not impugn the decision, and Professor Dickey said that was correct.

Regent Finlayson stated that she would vote against accepting the
report as the decision of the Board in order to register her lack of agree-
ment that the case had been reviewed in sufficient detail to prevent
similar problems from occurring throughout the System.

Regent Knowles moved adoption of the following resolution, and the
motion was seconded by Regent Zirbel:

Resolution 2795: That the Board of Regents accepts the report of
Professor Walter Dickey regarding the appeal by
Mr. Rudy Collum, makes that report the decision of
the Board and closes the file on this matter.

Regent Beckwith observed that this type of issue was difficult,
inasmuch as it was neither possible nor appropriate for the Board to review
all such personnel decisions. As a practical matter, he said, it was
necessary to rely on the guidance of others, and in that regard he
considered Professor Dickey's report to be a well-done, professional
document.

The question was put on Resolution 2795, and it was adopted, with
Regents Clusen, Conroy and Finlayson voting "No."

(The report of Professor Dickey is on file with the papers of this
meeting.)
At 11:30 a.m., the following resolution, moved by Regent Zirbel, seconded by Regent Schilling, carried on a unanimous roll call vote, with Regents Beckwith, Clusen, Conroy, Finlayson, Fitzgerald, Heckrodt, Knowles, Lawton, Schilling, and Zirbel voting "Aye" (10) and no Regents voting "No."

Resolution 2796: That the Board of Regents recess into closed session to consider personnel matters, as permitted by s. 19.85(1)(c), Wis. Stats., to consider personal histories, as permitted by s. 19.85(1)(f), Wis. Stats., and to confer with legal counsel, as permitted by s. 19.85(1)(g), Wis. Stats.

CLOSED SESSION ACTIONS

The Board arose from closed session at 12:00 noon, and adoption of the following resolutions was announced:

Resolution 2797: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, the following persons be reappointed to the UW-Madison Board of Visitors for terms ending May 1, 1986:

- Mildred Becker, Fond du Lac
- John A. Boberg, Eau Claire
- John R. Galloway, Neenah
- Margaret Nielsen, West Bend

Resolution 2798: That the President of the Board of Regents be authorized and directed to appoint members of the Board to review, with legal advice from System Counsel, appeals brought by Susan Coe and Masud Mufti and to report their recommendations to the Board.

Regent Clusen was appointed to review the appeal of Susan Coe, UW-Stevens Point, and Regent Conroy was designated to review the appeal of Masud Mufti, UWC-Marinette County.
In closed session on March 11, 1983, the Board voted to receive the report of the Chancellor regarding UW-Madison honorary degrees to be conferred at the May, 1983, commencement ceremonies. Announcement of recipients was not made at that time, pending campus receipt of acceptance from the nominees, who were:

Gay Wilson Allen - D.Litt.
James E. Doyle - LL.D.
Philip Levine - Sc.D.
Joseph Losey - L.H.D.
Emmett G. Solomon - L.H.D.
M/S. Swaminathan - Sc.D.

REPORT OF ACTIONS TAKEN (MEMOS OF AGREEMENT).

A. The University of Wisconsin-Madison lease at 33-35 North Orchard Street, for additional space for the Wisconsin Regional Primate Research Center, has been renewed for the period July 1, 1983 through June 30, 1986, at an annual cost of $9,000. The lease covers 5,153 square feet of office, shop, and storage space.

B. The lease between the Board of Regents of the University of Wisconsin System and the Department of the Army for continuation of UW-Superior's use of Wisconsin Point has been continued under the terms of Supplemental Agreement No. 2 through June 30, 1983, in lieu of the university requested 20-year term. This time will be used by the lessor to review the lessee's proposed improvements of government-owned facilities. Wisconsin Point was first approved by the Board for lease for research and instructional programs for Lake Superior Studies for a term beginning April 1, 1977 and ending March 31, 1982. Under the terms of Supplement Agreement No. 1, the original agreement was extended until December 31, 1982.
