The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

NATURE

provided the Clues . . .

FOR THIS NEW PROTECTED VITAMIN A PREPARATION

Nature protects virtually *all* natural foods with skins, rinds, pods or shells. Once this protective covering is removed the vitamin content may be quickly inactivated.

The human body apparently receives most of its vitamin A in the form of carotene (provitamin A)—to produce the *one or more* types of vitamin A required for normal functioning.

With these significant factors in mind, S.M.A. Corporation has evolved a new, *fully* effective vitamin A preparation—Caritol, SMACO:

● *The only preparation protecting the vitamin potency of both vitamin A and carotene with mixed tocopherols.*

Caritol Capsules SMACO, bottles of 100 (25,000 U.S.P. Units Vitamin A Activity)
Caritol with Vitamin D Capsules SMACO,

bottles of 100 (5,000 U.S.P. Units Vitamin A Activity; 1,000 U.S.P. Units Vitamin D)
Caritol with Vitamin D Liquid SMACO, bottles of 10 cc. (15,000 U.S.P. Units Vitamin A Activity; 3,000 U.S.P. Units Vitamin D per gram)

Caritol with Vitamin D Liquid SMACO, bottles of 50 cc. (15,000 U.S.P. units vitamin A activity; 3,000 U.S.P. units vitamin D per gram)

Caritol Liquid SMACO, bottles of 50 cc. (15,000 U.S.P. units vitamin A activity per gram).

Literature and trial quantities upon request. A SMACO nutritional biochemical.
